Assessment Requirements for ICTWEB445 Implement content management systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create a content management system (CMS) powered website using an open-source solution.

In the course of the above, the candidate must:

- validate CMS against standards set by the World Wide Web Consortium (W3C)
- test compatibility of website on at least two different browsers and at least two different digital devices
- confirm website is cyber safe
- obtain sign off from required personnel.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- content management systems and additions and plugins requirements
- website content structure and navigation
- licensing and hosting structures
- programming languages
- markup languages and associated standards
- server-side language and security techniques
- web content accessibility guidelines, including World Wide Web Consortium (W3C) standards and their application to website development
- content management system (front and backend) in commonly used browsers
- cyber security procedures and protocols.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- client requirements and content
- text editing software
- browsers
- required hardware, software and a range of digital devices
- a website
- content management system
- required solutions
- the internet.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB446 Integrate social web technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to develop and integrate social networking code into new and existing websites.

The unit applies to individuals working as web developers who apply a wide range of knowledge and skills across a range of general information and communications technology (ICT) environments and support small to medium enterprises (SMEs) requiring broader, rather than more specialised, ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse specifications and requirements	1.1 Evaluate different popular social networking websites 1.2 Discuss benefits and negative aspects of social networking in websites 1.3 Identify objectives and target audience of new or existing website 1.4 Select social networking website requiring integration into website according to website analysis and client requirements 1.5 Establish goals and define successful social networking integration according to client requirements
2. Develop code and	2.1 Establish methods in implementing social networking in a

ELEMENT	PERFORMANCE CRITERIA
documentation	<p>website and develop guidelines according to client requirements</p> <p>2.2 Develop code and use pre-existing scripts and tools, according to client requirements</p> <p>2.3 Integrate a social networking website into a new or existing website using developed code, pre-existing scripts and tools</p> <p>2.4 Document changes made in social web technology integration process</p> <p>2.5 Follow social media policies considering company reputation</p>
3. Validate integration	<p>3.1 Validate performance of social networking integration in different browsers and various digital devices, checking compatibility and display</p> <p>3.2 Debug website according to cyber security procedures and protocols</p> <p>3.3 Broadcast website across various channels and build web audience using social web technologies</p> <p>3.4 Evaluate audience reach and impact</p> <p>3.5 Obtain client feedback and make required changes</p> <p>3.6 Complete documentation and obtain sign off and approval from required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Analyses and consolidates information and data, from a range of sources, against defined criteria and requirements and checks accuracy and completeness
Writing	<ul style="list-style-type: none"> Develops clear and well-organised material for a specific audience, using precise language and conveys explicit information requirements and recommendations
Oral Communication	<ul style="list-style-type: none"> Determines and confirms client requirements using collaborative and inclusive techniques, including active listening and questioning and reading of verbal and non-verbal signals
Teamwork	<ul style="list-style-type: none"> Selects and uses applicable conventions and protocols when communicating with clients in a range of work contexts
Problem-solving	<ul style="list-style-type: none"> Makes routine decisions and implements standard procedures for routine tasks using formal decision-making processes for more

SKILL	DESCRIPTION
	<p>complex and non-routine situations</p> <ul style="list-style-type: none">• Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution
Self-management	<ul style="list-style-type: none">• Takes responsibility for planning, sequencing and prioritising tasks and own workload
Technology	<ul style="list-style-type: none">• Uses familiar digital technologies and systems, to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTWEB446 Integrate social web technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- integrate a social networking website into an existing website according to website analysis and client requirements.

In the course of the above, the candidate must:

- analyse integration requirements of a social networking website into a pre-existing website
- confirm website functionality against programming and security standards
- validate front end code markup, against standards set by the World Wide Web Consortium (W3C)
- confirm integrated website is functional and compatible with at least two different browsers and at least two different digital devices
- confirm website is cyber secure and safe
- document all changes and obtain sign-off from required personnel.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- markup language and its associated standards
- server-side language features
- social networking websites
- coding and documentation techniques applicable to integrating social web technologies
- integration tools across different social media channels
- social media policies relevant to integrating social web technologies
- evaluation techniques of integrating social networking into websites and audience impact.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- client specifications
- a text editor or web authoring tool
- a range of browsers and devices
- the internet
- required hardware, software and its components including pre-existing scripts and tools
- debugging tools
- application programming interface (API) documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB447 Build basic website using development software and ICT tools

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to build a basic website, consistent with the design, technical requirements and expectations, of a client's business, using industry standard software and tools.

The unit applies to individuals working as web developers who use a wide range of knowledge and skills across a range of general information and communications technology (ICT) environments and support small to medium enterprises (SMEs) requiring broader, rather than more specialised, ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse website structure and select required software and development tools	1.1 Analyse client specifications and select required development software according to business requirements 1.2 Identify website technical needs and select applicable software tools 1.3 Identify and confirm website design including structure and navigation flow and document according to organisational procedures

ELEMENT	PERFORMANCE CRITERIA
	1.4 Review design documentation and integrate design work according to web development standards
2. Construct site	2.1 Build website using selected development software and applicable tools according to client specifications 2.2 Take action and confirm user input during website construction 2.3 Validate existing information and basic content when incorporating data on website 2.4 Apply consistent design specifications to all aspects of website 2.5 Gather feedback from user on web design, content, accessibility and structure, using feedback mechanisms
3. Complete and validate website construction and content	3.1 Undertake an evaluation of website against technical requirements and design specification 3.2 Test each function and process of website and confirm functionality on various browsers and devices 3.3 Conduct navigation tests and hypertext markup language (HTML) compliance with website standards 3.4 Test and debug website according to cyber security procedures and protocols 3.5 Stress test website and confirm design criteria and user load are met 3.6 Record testing results and confirm website meets user requirements 3.7 Obtain sign-off and approval of required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	<ul style="list-style-type: none">Prepares and produces dynamic material for a specific audience, using clear and detailed language and conveys explicit information, requirements and recommendations

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none">• Selects and uses applicable conventions and protocols when communicating with clients in a range of work contexts• Establishes a sense of connection and builds rapport with clients and co-workers using a range of strategies
Problem solving	<ul style="list-style-type: none">• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations• Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution
Self-management	<ul style="list-style-type: none">• Accepts responsibility and ownership for task and makes decisions on completion parameters and need for coordination with others• Takes personal responsibility for following explicit and implicit policies, procedures and standards• Elicits and provides feedback to others• Takes responsibility for planning, sequencing and prioritising tasks and own workload
Technology	<ul style="list-style-type: none">• Uses familiar digital technologies and systems to access information, search and enter data and code, present information and communicate with others, cognisant of data security and safety

Unit Mapping Information

Supersedes and is equivalent to ICTWEB418 Use development software and ICT tools to build a basic website.

Links

Assessment Requirements for ICTWEB447 Build basic website using development software and ICT tools

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- build a basic website using development software and ICT tools according to client specifications.

In the course of the above, the candidate must:

- conduct an assessment of specifications relating to client website requirements including technical needs and structure
- select applicable software tools
- validate final web design against client requirements and make changes as required
- test and debug website and confirm functionality on at least two different browsers and at least two different devices
- document testing results and obtain client sign off.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- website functionality including structure and navigation flow
- website design principles issues around accessibility and equity principles
- software and tools used in website development
- general principles of hypertext markup language (HTML) and associated documentation standards
- technical attributes specific to building basic websites using development software and ICT tools
- documentation techniques applicable to building basic websites using development software and ICT tools
- types of code used in website generation

- testing and debugging methodologies
- organisational and industry procedures and standards applicable to building websites
- cyber security procedures and protocols
- web development standards.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- basic website specifications and guidelines
- website development software and tools
- the internet
- required hardware and its components
- range of browsers and devices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB448 Confirm website content meets technical protocols and standards

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to confirm content for a website is in accordance with customer specifications and is compatible with required technical and infrastructure protocols.

The unit applies to individuals working in the web development area who are required to populate websites according to clear benchmarks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm content meets required standards	1.1 Identify client website requirements and applicable style standards according to specifications 1.2 Confirm text-based content meets client requirements and required style standards 1.3 Confirm multimedia-based content meets business design standards and overall look of website 1.4 Check whether mix between multimedia and text-based content, provides required level of interaction identified in client requirements 1.5 Test content and conform to client expectations and technology

ELEMENT	PERFORMANCE CRITERIA
2. Confirm technology supports content	2.1 Confirm availability of applicable multimedia content protocols 2.2 Check and confirm content bandwidth and content plug-ins are available 2.3 Confirm servers support content and levels of interaction 2.4 Test and confirm compression techniques support delivery of content
3. Test content	3.1 Test and confirm content displays as intended and according to business requirements in multiple browsers and devices 3.2 Confirm content encourages interaction and content interaction performs as intended through testing with beta users 3.3 Record and document results of beta user testing according to organisational requirements 3.4 Test and confirm plug-ins download with minimal steps, complication and time 3.5 Test availability of interactive tools and provide expected results 3.6 Test and debug website and confirm website is safe and secure, according to cyber security procedures and protocols 3.7 Complete documentation and obtain sign-off from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Time technological processes using basic mathematical formula
Reading	<ul style="list-style-type: none"> Identifies and analyses online information and client specifications and confirms business requirements are met
Writing	<ul style="list-style-type: none"> Documents outcomes of tests using industry terminology and recognised symbols
Teamwork	<ul style="list-style-type: none"> Selects and uses applicable conventions and protocols when communicating with clients and co-workers in a range of work contexts
Problem solving	<ul style="list-style-type: none"> Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations
Self-management	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit

SKILL	DESCRIPTION
	<p>policies, procedures and specifications</p> <ul style="list-style-type: none">• Improves work practices and processes and elicits feedback and provides feedback to others,• Takes responsibility for planning, sequencing and prioritising tasks and own workload
Technology	<ul style="list-style-type: none">• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Unit Mapping Information

Supersedes and is equivalent to ICTWEB421 Ensure website content meets technical protocols and standards.

Assessment Requirements for ICTWEB448 Confirm website content meets technical protocols and standards

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- carry out checks and tests and confirm specifications and standards are met for a mix of website content including:
 - at least three multimedia items
 - at least three text-based content.

In the course of the above, the candidate must:

- check and use required streaming and compression techniques
- confirm website content is support by technology, including bandwidth, servers, devices and plug-ins
- manage file transfer protocols (FTPs)
- test and confirm functionality and operability of content and interactive components, on at least two different browsers and at least two different devices
- confirm website is cyber safe and secure
- document testing performed and obtain sign-off from required personnel.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- applicability of copyright, privacy and intellectual property to website development
- industry standard software compression algorithms and associated technologies
- file transfer protocol (FTP) software protocols
- internet protocols
- server access security principles and procedures
- server operating systems
- streaming technologies

- website testing and debugging methodologies
- documentation techniques, style and business design standards applicable to confirming website content meets technical protocols and standards
- multimedia content protocols
- organisational and cybersecurity procedures and protocols.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- client specifications document
- documents detailing organisational style guide and policies and design brief
- required hardware and its components and plug-ins
- industry standard software and included interactive tools
- compression and streaming software
- the internet
- a live network and its components
- networked computers
- technical documentation and installation manuals
- multiple servers, browsers and devices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB449 Confirm website access and useability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to apply the principles of accessibility, useability, privacy and equity in the context of website development.

The unit applies to individuals who provide frontline technical support for ensuring websites are accessible and useable to end users.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify user requirements and design site user test	1.1 Identify and confirm user expectations through market analysis, business intelligence and customer feedback 1.2 Identify range of users on website and their needs and expectations 1.3 Assess website performance and establish performance potential of website from business requirements and other approved sources 1.4 Establish usability test methods according to business and website requirements and accessibility standards 1.5 Establish performance measurement and success criteria and measure actual performance against user expectations
2. Conduct user test	2.1 Document process performance indicators and benchmarks

ELEMENT	PERFORMANCE CRITERIA
	<p>and disseminate them to a sample group of users</p> <p>2.2 Assemble a full representative range of users and required technologies according to research conducted</p> <p>2.3 Test site features, navigation and functions according to organisational procedures, policies and user needs</p> <p>2.4 Confirm website's intended functionality on various browsers and devices</p> <p>2.5 Confirm user, legal, accessibility, privacy and equity requirements and expectations are met</p>
3. Evaluate user test	<p>3.1 Collate and document site useability testing performance results and measure them against performance indicators and benchmarks according to user expectations</p> <p>3.2 Identify performance shortfalls and develop performance solutions according to business and user requirements</p> <p>3.3 Establish evaluation feedback mechanism and provide to users</p>
4. Document results	<p>4.1 Discuss problems with developers and confirm solutions are continuously refined</p> <p>4.2 Check and confirm proposed solutions meet user and business requirements and address user feedback</p> <p>4.3 Document and implement final solutions according to organisational procedures and policies and distribute to required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Performs mathematical calculations and analyses test and performance data and statistics
Oral communication	<ul style="list-style-type: none"> Confirms requirements, participates in a verbal exchange of ideas/solutions and uses applicable, detailed and clear language and addresses key personnel and website users
Reading	<ul style="list-style-type: none"> Analyses and consolidates information and data from a range of sources against defined criteria and requirements and checks accuracy and completeness
Writing	<ul style="list-style-type: none"> Records information and prepares correspondence and documentation, using clear language and organisational formats and protocols

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none">• Selects and uses applicable conventions and protocols when communicating with clients and co-workers in a range of work contexts
Problem solving	<ul style="list-style-type: none">• Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining solutions
Self-management	<ul style="list-style-type: none">• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements• Elicits feedback and provides feedback to others while testing usability• Takes responsibility for planning, sequencing and prioritising tasks and own workload
Technology	<ul style="list-style-type: none">• Uses familiar digital technologies and systems to access information, search and enter data and code, present information and communicate with others, cognisant of data security and safety

Unit Mapping Information

Supersedes and is equivalent to ICTWEB422 Ensure website access and useability.

Assessment Requirements for ICTWEB449 Confirm website access and useability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- test and evaluate a website in terms of accessibility and useability, according to business and user requirements.

In the course of the above, the candidate must:

- research various user needs and expectations in website
- design a usability test and set benchmark metrics
- facilitate test process and document results
- confirm user and legal requirements are met
- document and propose solutions according to user and business needs.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- accessibility, privacy and equity principles in website development context
- accessibility needs and requirements
- market conditions for area of business
- technical performance measurement of typical web site
- user testing principles and techniques
- features and functions of a website, including:
 - architecture
 - privacy
 - security
 - navigation
- workload metrics and implications for website design

- organisational policies and procedures relating to website functionality
- documentation techniques applicable to confirming website access and usability.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required hardware and its components
- industry standard analysis software
- a website
- organisational policy and procedures
- user specifications
- a site server and software
- web servers and devices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB450 Evaluate and select a web hosting service

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to determine a client's current and future internet service providers (ISPs) needs.

The unit applies to individuals working in Information and Communications Technology (ICT) who take responsibility for comparing and evaluating internet service provider (ISP) services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements and select ISP	<ul style="list-style-type: none">1.1 Discuss and confirm web hosting service requirements and establish client selection criteria according to business and user needs1.2 Review client usage and confirm email services are compliant with business needs1.3 Review characteristics of different hosting services and assess compatibility with business needs1.4 Evaluate optional server applications for advanced web business functions1.5 Select ISP hosting service according to client selection criteria and business needs

ELEMENT	PERFORMANCE CRITERIA
2. Confirm web host meets technical requirements	<p>2.1 Confirm web-hosting service has server performance and availability monitoring systems in place</p> <p>2.2 Discuss and confirm escalation procedures and performance standards with ISP</p> <p>2.3 Establish security, backup and payment procedures and technologies according to business and customer expectations and requirements</p> <p>2.4 Confirm operating system supports preferred business development software, applications, extensions and databases</p> <p>2.5 Check and confirm web-host servers support dynamic websites on various browsers, devices and preferred business technologies</p> <p>2.6 Confirm site-analysis reports are available, flexible and meet business needs</p>
3. Benchmark performance and test against specified criteria	<p>3.1 Test performance of web hosting service during on and off-peak times and document outcomes according to organisational procedures</p> <p>3.2 Confirm email and mailing services have backup procedures in place and are protected from damage, erasure and unwanted damage</p> <p>3.3 Confirm support services perform according to business needs</p> <p>3.4 Discuss and confirm performance of selected ISP against specified criteria and make required changes</p> <p>3.5 Obtain sign-off from required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Reads and interprets specifications, computer program interface and documentation from a variety of sources and consolidates information
Writing	<ul style="list-style-type: none"> Prepares documentation expressing ideas and explores complex issues
Oral Communication	<ul style="list-style-type: none"> Confirms interpretation of all business requirements using listening and questioning techniques and uses detailed and clear language to address client and ISP personnel

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none">Estimates data storage requirements using mathematical formulas
Interact with others	<ul style="list-style-type: none">Selects and uses applicable conventions and protocols when communicating with clients and co-workers in a range of work contexts
Self-management	<ul style="list-style-type: none">Takes responsibility for planning, sequencing and prioritising tasks and own workload
Problem-solving	<ul style="list-style-type: none">Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situationsAddresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution
Technology	<ul style="list-style-type: none">Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- evaluate and select a web hosting service according to business and user needs.

In the course of the above, the candidate must:

- assess client and business needs and establish selection criteria
- identify and evaluate a range of web hosting services
- confirm business and client budgetary, security and technical requirements are met
- test and benchmark web hosting service with client benchmarks
- obtain sign-off from required personnel.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different web hosting service provision options
- web hosting service characteristics including:
 - support service standards
 - data capacity
 - security technologies and procedures
 - scripting languages
 - performance monitoring systems
 - escalation procedures
 - back up procedures
 - payment procedures
- email and mailing list services

- a range of hosting services and their characteristics including support service standards, data capacity and availability of security technologies and server-side languages
- industry standard development software, applications, extensions and databases
- internet security issues
- operating systems used by ISPs
- server technologies
- documentation techniques used to evaluate and select a web hosting service
- web hosting services and performance benchmarks
- ISP performance testing methodologies
- organisational procedures applicable to selecting a web hosting service.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- industry standard web hosting plans, prices and service agreements
- technology underpinning ISP and services offered
- a business plan outlining business requirements
- user requirements
- multiple browsers and devices
- site analysis reports
- required hardware, software and its components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB451 Apply structured query language in relational databases

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to produce structured query language (SQL) statements to work with server-side scripts, enabling web developers to interact with web server databases.

The unit applies to individuals in a range of roles who are responsible for creating server-side interaction with dynamic web pages, using SQL as a means of communicating with databases.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify database requirements	1.1 Determine information required from database 1.2 Identify tables holding this information 1.3 Identify primary keys in these tables 1.4 Identify relationships between these tables including foreign keys
2. Build and implement SQL in relational databases	2.1 Identify and build SQL statements according to task requirements 2.2 Create tables in a database using SQL statements 2.3 Create primary and foreign keys required in database

ELEMENT	PERFORMANCE CRITERIA
	table 2.4 Manipulate data in a database using SQL statements 2.5 Query database using SQL statements 2.6 Retrieve information from database using written SQL statements
3. Test and verify SQL results	3.1 Construct test data and test SQL statements according to organisational procedures 3.2 Determine expected results of SQL statements 3.3 Verify result of constructed SQL statements against expected results and document findings 3.4 Confirm task requirements are met and obtain sign-off from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Analyses and consolidates information and data from a range of sources, against defined criteria and requirements
Writing	<ul style="list-style-type: none"> Uses clear and specialised technical syntax when creating codes and interrogating databases Prepares and produces, diagrammatic models and associated documents and conveys complex relationships between data
Self-management	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload
Problem-solving	<ul style="list-style-type: none"> Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution
Technology	<ul style="list-style-type: none"> Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Unit Mapping Information

Supersedes and is equivalent to ICTPRG425 Use structured query language and ICTWEB425 Apply structured query language to extract and manipulate data.

Assessment Requirements for ICTWEB451 Apply structured query language in relational databases

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- apply structured query language (SQL) to a relational database and gather required information according to task requirements.

In the course of the above, the candidate must:

- generate queries for one or more tables and provide required data
- add, modify, retrieve and delete records from database tables as required test and verify SQL statements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relating to SQL application including:
 - identifying SQL requirements from job specifications
 - testing and verifying SQL results
- features and application of primary and foreign keys in database tables, aggregate functions and clause functions required in SQL application
- principles of "combining and/or condition" in SQL statements and Boolean operators
 - IN and BETWEEN conditional operators
 - mathematical operators
 - table joins (relationships)
- documentation techniques relevant to applying structured query language in relational databases
- SQL statement testing methodologies.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- task specification documentation
- structured query language (SQL)
- industry standard software packages
- an integrated development environment (IDE)
- a database server
- required hardware, software and its component.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB452 Create a markup language document

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to use a text editor to design, create and save web pages to a given specification.

The unit applies to individuals working as web designers and developers, who generate a framework for internet information using a markup language according to client briefs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse specifications and requirements	1.1 Identify uses and audience of required document 1.2 Determine required mark-up language according to document's uses and audience 1.3 Identify and confirm required documentation according to organisational procedures 1.4 Define document structure according to organisational procedures and document requirements
2. Create document structure	2.1 Create and assign basic elements of document considering accessibility and document requirements 2.2 Markup and define sections of document and describe structure and layout according to document requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Confirm styling of web page meets document specifications and requirements
3. Incorporate web page components	3.1 Identify and evaluate web page components required according to document requirements 3.2 Incorporate required web page components into document according to organisational procedures and guidelines
4. Validate documents	4.1 Validate markup language document against specifications and record outcomes 4.2 Validate compatibility of markup language document in different browsers and devices and record outcomes 4.3 Identify gaps between specifications and requirements and markup language document and apply changes as required, according to organisational procedures 4.4 Confirm requirements are met and finalise documentation according to organisational procedures 4.5 Obtain sign-off from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies, analyses and evaluates instructions, technical information and industry guidelines and determines client needs and business requirements
Writing	<ul style="list-style-type: none"> Produces documentation for a specific audience and conveys explicit information using clear and detailed language Writes, edits and proofreads documents and confirms clarity of meaning, accuracy and consistency of information
Navigate the world of work	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and industry standard practices
Self-management	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload
Problem-solving	<ul style="list-style-type: none"> Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving

SKILL	DESCRIPTION
	processes in determining a solution
Technology	<ul style="list-style-type: none">Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Unit Mapping Information

Supersedes and is equivalent to ICTWEB429 Create a markup language document to specification.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for ICTWEB452 Create a markup language document

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design, create and save a document using a markup language using a text editor
- In the course of the above, the candidate must:
- define document structure incorporate elements as required
- generate markup language document compatible with multiple web browsers and devices
- confirm document requirements are met and records all outcomes
- validate markup document against standards set by the World Wide Web Consortium (W3C)
- obtain sign-off.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- the use of markup languages including:
 - hypertext markup language (HTML)
 - virtual reality modelling language (VRML)
 - extensible markup language (XML)
- standards set by the World Wide Web Consortium (W3C) applicable to markup language
- the range of available web browsers and their accessibility
- issues applicable to accessibility
- documentation techniques, web page components and organisational procedures and guidelines relevant to creating a markup language document to specification
- document validation procedures
- browser and device compatibility.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- an organisational style guide or policy
- user requirements
- industry standard markup languages
- word processing software
- a range of browsers and devices
- the internet
- required hardware, software and its components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB453 Optimise websites for mobile devices

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs.

Application

This unit describes the skills and knowledge required to implement mobile-user functions to websites and maintain website user experience on mobile devices. It involves optimising the functionality and accessibility of websites for mobile devices.

The unit applies to individuals who may work in roles such as website developers and technical support staff, who support the management and useability of simple websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to optimise website for mobile devices	1.1 Confirm work brief and tasks according to organisational policies and procedures 1.2 Review user needs according to work brief 1.3 Research options for responsive website design features 1.4 Select suitable responsive design option according to work brief

ELEMENT	PERFORMANCE CRITERIA
	1.5 Confirm that mobile optimisation meets required web content accessibility guidelines (WCAG) and standards
2. Integrate website sitemap	2.1 Analyse website structure and uniform resource locators (URLs) 2.2 Format URLs with corresponding code and extensible markup language (XML) tags 2.3 Validate URL codes according to work brief 2.4 Add sitemap file to required website root folder 2.5 Submit sitemap to search engines according to work brief 2.6 Test sitemap on search engine and rectify any issues
3. Implement responsive website design features	3.1 Test website functionality according to work brief using different screen orientations and resolutions 3.2 Review mobile view strategy according to work brief 3.3 Source and check view configuration components for serviceability 3.4 Develop mobile views according to mobile view strategy 3.5 Integrate navigation functions according to work brief 3.6 Test user control functions and rectify any issues
4. Periodically review mobile website functionality	4.1 Create periodic website testing plan and timelines 4.2 Test and debug mobile features according to work brief 4.3 Deploy website on mobile device and rectify any deployment issues 4.4 Seek and integrate feedback from required personnel on testing and debugging process 4.5 Document maintenance changes according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets a range of technical specifications and other information and determines solutions according to requirements
Writing	<ul style="list-style-type: none"> Develops a range of texts, codes and plans using required technical language
Planning and	<ul style="list-style-type: none"> Uses systematic processes for information gathering and

Skill	Description
organising	evaluates research findings against agreed criteria
Problem solving	<ul style="list-style-type: none">Contributes to continuous improvement of digital presence by applying basic principles of analytical thinking
Self-management	<ul style="list-style-type: none">Makes some critical and non-critical decisions to develop and test functionality and accessibility of websites according to client requirements

Unit Mapping Information

No equivalent unit. Newly created unit.

Assessment Requirements for ICTWEB453 Optimise websites for mobile devices

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement at least two mobile-user features to a website
- test the user experience of at least two different websites using a mobile device.

In the course of the above, the candidate must:

- update and adhere to website testing plans and timelines
- identify required website and design structures
- confirm functionality and accessibility of website information architecture
- apply required organisational policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- website requirements of industry-recognised mobile devices
- testing and operating procedures for user control functions, including:
 - text size
 - brightness
 - sound effects
- functions and features of mobile view strategies, responsive designs and required configuration components
- methods to test and debug website features, functionality and view options, including:

- font
- display view
- speed
- key types of code and extensible markup language (XML) tags for uniform resource locators (URLs), including:
 - location
 - last changed
 - changed frequency
 - priority of page
- methods to locate sitemap files and apply to search engines
- mobile website deployment operations
- periodic website testing plans and timelines
- web content accessibility guidelines (WCAG) and digital accessibility standards
- organisational policies and procedures, and legislative requirements relating to work tasks.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- mobile devices on which websites can be loaded and used
- required configuration and deployment components
- opportunities for interaction with others
- work brief, web standards and guidelines, and organisational policies and procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB513 Build dynamic websites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to analyse and design websites to meet technical requirements.

It applies to individuals working as web developers, who are responsible for the analysis, design, implementation and testing of websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define and analyse technical requirements	1.1 Identify business requirements and applicable legislative standards 1.2 Determine and document purpose, expectations and functionality of website according to organisational procedures 1.3 Analyse user interface design requirements including user needs, design principles and operating systems
2. Produce software design specifications	2.1 Produce a hierarchy of website showing navigation according to website requirements 2.2 Confirm content is logical and accessible to user according to website requirements 2.3 Produce prototype of user interface

ELEMENT	PERFORMANCE CRITERIA
	2.4 Determine and document website architectural requirements 2.5 Design data storage requirements according to website requirements
3. Develop website to specified design	3.1 Create software components of website according to website requirements 3.2 Test components of website according to organisational procedures 3.3 Integrate components and produce web application
4. Test and finalise web application	4.1 Test website against requirements and amend accordingly 4.2 Confirm website is secure and bug free according to cyber security procedures and protocols 4.3 Test functionality of website on multiple browsers and devices and update as required 4.4 Obtain feedback from required personnel and update web site as required 4.5 Complete and document design structure according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Analyses complex documentation from a variety of sources and consolidates information applicable to specific criteria when determining requirements
Writing	<ul style="list-style-type: none">Prepares documentation analysing requirements and design specificationsWrites and edits code and technical data in a logical manner using the required syntax
Planning and organising	<ul style="list-style-type: none">Accepts responsibility for planning and sequencing complex tasks and workloadNegotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none">Applies systematic and analytical decision-making processes for complex situations and issues
Self-management	<ul style="list-style-type: none">Takes responsibility for following policies, procedures and standards

SKILL	DESCRIPTION
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB501 Build a dynamic website.

Assessment Requirements for ICTWEB513 Build dynamic websites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- build a dynamic website using code according to technical requirements.

In the course of the above, the candidate must:

- test the website on at least two different browsers and at least two different devices
- document website requirements and actions performed
- comply with organisational requirements and legislative standards.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of analysis and design
- programming control and design structures
- web programming concepts, including:
 - authentication and web security
 - hypertext transfer protocol (HTTP)
 - session management
 - stateless programming
- client-side scripting and its application to dynamic website design, including:
 - hypertext markup language (HTML)
 - cascading style sheets (CSS)
- documentation processes applicable to documenting website design
- user-interface design requirements and production processes
- website design structures, including hierarchy and navigation design
- website architectural requirements

- data storage requirements
- website testing procedures
- debugging methods
- cyber security procedures and protocols
- organisational and legislative procedures applicable to building dynamic websites, including web development standards.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- client requirements
- a development environment
- a server
- a database server
- web browsers and devices
- hardware, software and its components required for building dynamic websites
- libraries and frameworks required for building dynamic websites
- website testing and debugging tools.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB514 Create dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to produce both server and client-side content for web pages.

It applies to individuals working as web developers, who are responsible for creating dynamic pages to provide interaction between the user and the website. They use highly developed technical and analytical skills when developing the user-website interface.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to create dynamic web pages	1.1 Obtain and review technical requirements for creating dynamic web pages 1.2 Confirm applicable legislative and organisational standards and procedures applicable to technical requirements 1.3 Identify sections of website requiring client-side dynamic content 1.4 Identify sections of website requiring server-side dynamic content 1.5 Select applicable languages and technology according to technical requirements
2. Create dynamic content	2.1 Identify and create boilerplate templates according to

ELEMENT	PERFORMANCE CRITERIA
	technical requirements 2.2 Design and create a database and organise data and content according to data storage requirements 2.3 Create page using selected languages
3. Test and finalise dynamic web pages	3.1 Debug code and confirm security of web page using cyber security protocols and procedures 3.2 Test web page functionality and content across a variety of browsers and devices 3.3 Evaluate web page functionality results and amend as required 3.4 Confirm required dynamic content functions according to task requirements 3.5 Present dynamic web page to required personnel and seek feedback 3.6 Finalise web page and obtain sign-off from required personnel, according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Analyses documentation from a variety of sources and records and consolidates information when determining requirements
Writing	<ul style="list-style-type: none">Writes and edits code and technical data in a logical manner using required syntax

Assessment Requirements for ICTWEB514 Create dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce at least three dynamic web pages according to technical requirements.

In the course of the above, the candidate must:

- include client and server-side dynamic content in each web page
- create and debug code
- test web page and code on at least two different web browsers and at least two different devices
- comply with organisational and legislative standards and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- web programming concepts, including:
 - authentication and web security
 - hypertext transfer protocol (HTTP)
 - session management
 - stateless programming
- types of technologies, including:
 - programming control structures
 - hypertext markup language (HTML) and markup languages
 - cascading style sheets (CSS)
 - syntax and uses of programming languages
- client and server-side scripting and its application to dynamic web page design
- data storage requirements

- debugging methods
- coding techniques
- cyber security protocols and procedures
- legislative and organisational procedures and standards applicable to creating dynamic web pages.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- technical requirements
- a development environment
- a server
- a database server
- web browsers and devices
- web page testing and debugging tools required for creating dynamic web pages
- hardware, software and its components required for creating dynamic web pages.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB517 Create web-based programs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to develop web applications.

It applies to individuals who work as web developers and have highly developed technical skills to take responsibility for implementing code required to create web applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to create web application	1.1 Identify and confirm requirements and functionality of web application with required personnel 1.2 Confirm applicable legislative and organisational standards and procedures applicable to web applications 1.3 Determine hypertext transfer protocol (HTTP) required 1.4 Analyse advantages and limitations of HTTP when developing web applications
2. Implement session management	2.1 Create code and handle session management 2.2 Create code and retains user interaction with website 2.3 Review and debug created code

ELEMENT	PERFORMANCE CRITERIA
3. Develop and finalise applications in a stateless environment	<p>3.1 Develop web applications that keep track of data between browser requests</p> <p>3.2 Document work performed in web application with reference to its management of statelessness</p> <p>3.3 Seek feedback on web application with required personnel and amend as required</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Identifies and analyses code for syntax and accuracy
Writing	<ul style="list-style-type: none">Prepares documentation detailing testing and work performed on web application succinctlyWrites and edits code and technical data in a logical manner using required syntax
Planning and organising	<ul style="list-style-type: none">Accepts responsibility for planning and sequencing complex tasks and workloadNegotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none">Applies systematic and analytical decision-making processes for complex situations and issues
Technology	<ul style="list-style-type: none">Uses and investigates new digital technologies and applicationsManages and manipulates data and communicates with others in a secure and stable digital environment

Assessment Requirements for ICTWEB517 Create web-based programs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a web application in a stateless environment according to technical requirements.

In the course of the above, the candidate must:

- confirm user data is tracked in web application
- document testing and work performed on web application
- confirm web application is functional on at least two browsers and at least two devices.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of web analysis and design
- features and functionalities of different web applications
- programming control structures and applicable languages
- code debugging techniques
- web application development process
- legislative and organisational requirements applicable to creating web applications
- web programming concepts including:
 - authentication and web security
 - hypertext transfer protocol (HTTP)
 - session management
 - stateless programming
- web front end and backend languages, including:
 - hypertext markup language (HTML)
 - cascading style sheets (CSS)

- JavaScript
- organisational procedures applicable to creating web applications.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a website development environment
- a server
- a database server
- web browsers and digital devices
- hardware required to create web applications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB518 Build a document using extensible markup language

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to design and build an extensible markup language (XML) document.

It applies to individuals who work in development roles and have highly developed technical skills in using XML documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish and analyse document specifications	<ul style="list-style-type: none">1.1 Identify and confirm applicable legislative and organisational standards and procedures applicable to XML document development1.2 Determine and document purpose, expectations and functionality of an XML document1.3 Plan, design and build XML documentation, allowing for iterative development according to task requirements1.4 Determine software and tools required to design an XML document1.5 Identify and determine applicable design methodologies including the use of software engineering life cycle

ELEMENT	PERFORMANCE CRITERIA
2. Design and develop document	<ul style="list-style-type: none">2.1 Select the document type definition (DTD) according to document specifications2.2 Define required entities, elements and their attributes specifications2.3 Produce XML document according to organisational requirements2.4 Identify the DTD, required entities, elements and their attributes, including associated graphics and sounds
3. Test and finalise document	<ul style="list-style-type: none">3.1 Test document offline and confirm validity of document according to document specifications3.2 Test document online with representative audiences, where applicable3.3 Confirm document validity and content on various browsers and devices3.4 Analyse test results and update the XML documentation as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">• Analyses specifications and other documentation from a variety of sources, and consolidates information when determining requirements
Planning and organising	<ul style="list-style-type: none">• Accepts responsibility for planning and sequencing complex tasks and workload• Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none">• Applies systematic and analytical decision-making processes for complex situations and issues
Self-management	<ul style="list-style-type: none">• Takes responsibility for following policies, procedures and industry standards
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data, and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB504 Build a document using extensible markup language.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for ICTWEB518 Build a document using extensible markup language

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce at least two (extensible markup language) XML documents according to technical requirements.

In the course of the above, the candidate must:

- test and validate XML document on at least two different browsers and at least two different devices
- comply with applicable organisational policies, procedures and standards.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- extensible markup language
- unified-modelling language
- software implications for XML programming
- standards impacting XML programming
- design methodologies including software engineering life cycle
- document type definition (DTD)
- XML document components including entities, elements and their attributes
- debugging methods
- document validation and testing procedures
- organisational policies, procedures and standards applicable to building XML documents.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- the client or business requirements
- an XML parser and authoring tool
- web browsers and devices
- hardware, software and tools required to use extensible markup language.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB519 Develop complex web page layouts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to design and create a web page layout to suit a range of browsers and devices.

It applies to individuals who work as web designers and web developers and have a highly developed understanding of design principles and applies technical skills proficiently, according to unique specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to develop web page layout	1.1 Identify and confirm applicable legislative and organisational standards and procedures applicable to webpage layout development 1.2 Identify main sections of web page design 1.3 Identify main sections of web page layout

ELEMENT	PERFORMANCE CRITERIA
2. Build, test and validate web page layout	<ul style="list-style-type: none">2.1 Create web page structure according to design specifications2.2 Position and style web page elements according to design specifications2.3 Create cascading style sheet and web page according to design specifications2.4 Test design and functionality of web page in various browsers and devices2.5 Amend browser and device incompatibilities according to organisational procedures2.6 Debug and confirm security of web page using cyber security procedures and protocols
3. Finalise web page layout	<ul style="list-style-type: none">3.1 Confirm accessibility of web sections, elements and pages3.2 Seek feedback from required personnel and amend layout as required3.3 Obtain sign-off and confirmation from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none">• Takes measurements and performs calculations for web page layout
Reading	<ul style="list-style-type: none">• Critically analyses specifications and other documentation from a variety of sources and consolidates information when determining requirements
Writing	<ul style="list-style-type: none">• Develops organised technical material for specific audiences using required language
Planning and organising	<ul style="list-style-type: none">• Accepts responsibility for planning and sequencing complex tasks and workload• Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none">• Applies systematic and analytical decision-making processes for complex situations

SKILL	DESCRIPTION
Self-management	<ul style="list-style-type: none">• Takes responsibility for following policies, procedures and industry standards
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data, and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB505 Develop complex web page layouts.

Assessment Requirements for ICTWEB519 Develop complex web page layouts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least two complex website layouts according to technical requirements.

In the course of the above, the candidate must:

- lay out and style page elements to suit a variety of devices
- test web page layouts in at least two different browsers and at least two different devices
- validate web page layouts against industry standards.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of web site design and web scripting design
- principles and techniques in web site design, including:
 - hypertext markup language (HTML)
 - extensible hypertext markup language (XHTML)
 - cascading style sheets (CSS)
 - hypertext transfer protocol (HTTP)
 - amending browser incompatibilities
 - web libraries
 - web frameworks
- industry procedures, policies and standards applicable to developing web page layouts
- web page testing and debugging procedures
- accessibility standards, including the World Wide Web Consortium (W3C) standards and their application to web design
- cyber security procedures and protocols applicable to developing web page layouts

- organisational procedures applicable to developing web page layouts.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- hardware, software and its components required to develop complex web pages
- design specifications brief
- a variety of browsers and digital devices
- the internet
- web page testing and debugging tools required to test complex web pages.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB520 Develop complex cascading style sheets

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to develop complex cascading style sheets (CSS) that are attached to a markup language document.

It applies to individuals working as web designers and developers, who are involved in the layout and appearance of web pages have a highly developed understanding of design principles and software languages and can apply protocols and standards proficiently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine CSS requirements	1.1 Identify and confirm applicable legislative and organisational standards and procedures applicable to CSS development 1.2 Identify and review user style requirements 1.3 Evaluate and select applicable markup language according to technical requirements
2. Develop CSS and web pages	2.1 Create CSS according to technical requirements 2.2 Style, lay out and position document elements of web page using advanced CSS techniques 2.3 Apply style sheets to applicable web pages in a website
3. Test and validate CSS	3.1 Debug web page and CSS and confirm security using cyber

ELEMENT	PERFORMANCE CRITERIA
and web pages	<ul style="list-style-type: none">security procedures and protocols3.2 Test website in various browsers and devices3.3 Rectify browser and device differences and confirm accessibility of website3.4 Confirm user requirements are met and obtain sign-off from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none">Takes measurements and performs calculations for web page layout
Oral communication	<ul style="list-style-type: none">Uses listening, questioning and summarising techniques to clarify job specifications with required personnel
Reading	<ul style="list-style-type: none">Identifies and analyses technical, workplace and industry information, and confirms all job requirements are met
Writing	<ul style="list-style-type: none">Develops organised technical material for specific audiences using required language
Planning and organising	<ul style="list-style-type: none">Accepts responsibility for planning and sequencing complex tasks and workloadNegotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none">Applies systematic and analytical decision-making processes for complex situations
Self-management	<ul style="list-style-type: none">Takes responsibility for following policies, procedures and industry standards
Technology	<ul style="list-style-type: none">Uses and investigates new digital technologies and applicationsManages and manipulates data, and communicate with others in a secure and stable digital environment

Assessment Requirements for ICTWEB520 Develop complex cascading style sheets

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a complex website, styled and formatted, using cascading style sheets (CSS) according to technical requirements.

In the course of the above, the candidate must:

- create a complex page layout using CSS
- test web pages in at least two different browsers and on at least two different devices
- comply with industry and organisational standards and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of website design
- hypertext transfer protocol (HTTP) protocol and its application to CSS
- hypertext markup language (HTML) and extensible hypertext markup language (XHTML)
- CSS rules and standards impact on document styling and layout
- methods in applying style sheets to web pages
- website accessibility requirements, including World Wide Web Consortium (W3C) standards
- website testing and debugging methods
- techniques to amend browser incompatibilities
- organisational procedures applicable to developing CSS
- cyber security procedures and protocols.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- hardware, software and its components required to use complex CSS
- design specifications brief
- applicable markup language
- markup language documents to have CSS applied to them
- the internet
- a variety of browsers and digital devices
- web page testing and debugging tools required for testing web pages.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB521 Customise complex ICT content management systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to create and customise an Information and Communications Technology (ICT) content management system (CMS) powered website using an open source to meet client requirements.

It applies to individuals working as web developers, who have a detailed knowledge of markup languages and their associated standards and are proficient in server-side language and security techniques. Individuals in this role also have high-level understanding of server functionality.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and analyse client specifications and requirements	1.1 Gather and identify client and business requirements 1.2 Compare and analyse different CMS functionalities, restraints and requirements against client specifications 1.3 Select CMS according to client and business requirements 1.4 Identify, discuss and confirm additional areas and functions not covered by chosen CMS with required personnel

ELEMENT	PERFORMANCE CRITERIA
2. Develop customisation and create CMS powered website	<ul style="list-style-type: none">2.1 Plan and outline requirements of additional functionality according to technical requirements2.2 Create and develop plug-in, extension or new functionality to CMS according to identified task requirements2.3 Seek feedback from required personnel on created developed plug-in, extension or new functionality to CMS and amend as required2.4 Install and configure chosen content management system2.5 Install and integrate new CMS functionality according to vendor requirements
3. Validate and evaluate website	<ul style="list-style-type: none">3.1 Validate final website markup against organisational website and security standards3.2 Evaluate and confirm required CMS performance, compatibility and core functionality in different browsers and devices3.3 Confirm additional functionality developed meets client requirements3.4 Obtain sign-off on final CMS powered website from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none">• Uses listening and questioning techniques to determine client requirements and articulate ideas using specific language applicable to audience
Reading	<ul style="list-style-type: none">• Analyses complex specifications, program manuals and other documentation from a variety of sources, and consolidates information to determine requirements
Writing	<ul style="list-style-type: none">• Creates a CMS powered website for specific audiences using required language
Planning and organising	<ul style="list-style-type: none">• Accepts responsibility for planning and sequencing complex tasks and workload• Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness

SKILL	DESCRIPTION
Problem solving	<ul style="list-style-type: none">• Applies systematic and analytical decision-making processes for complex situations
Self-management	<ul style="list-style-type: none">• Takes responsibility for following policies, procedures and industry standards
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB507 Customise a complex ICT content management system.

Assessment Requirements for ICTWEB521 Customise complex ICT content management systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create a content management system (CMS) powered website, using an open source with at least two additional custom functionalities not available from CMS, according to technical requirements.

In the course of the above, the candidate must:

- perform basic content manipulation tasks on at least two different browsers and at least two different devices
- evaluate additional content management functionality required against programming and security standards
- customise functionalities into pre-existing core CMS using programming techniques
- validate front-end code markup against standards set by the World Wide Web Consortium (W3C)
- confirm final website is cyber secure and complies with cyber security procedures and protocols.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different content management systems and their respective functionalities, restraints and requirements
- different markup languages and their applicable standards
- customisation creation processes, including development of plug-in's and extensions and programming techniques
- CMS vendor requirements, installation and configuration processes
- client and business specifications and requirements, including:

- server functionality
- required functionality of website
- required server-side language and application processes and hosting environment
- pre-existing restraints applicable to developing website solutions
- website, web accessibility, programming and security standards applicable to customising CMS
- website validation processes
- cyber security procedures and protocols.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- client and business specifications, requirements and content
- content management system required to customise complex CMS
- hardware, software and its components applicable to developing and installing CMS customisations
- a text editor
- a range of browsers and digital devices
- the internet and its connectivity.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB522 Develop website information architecture

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to develop information architecture for a complex website that meets business requirements.

It applies to individuals working as highly skilled web developers and designers and are responsible for the navigation and hierarchy of websites. They liaise with clients to adapt e-business into their corporate strategy, applying high-level knowledge of technical languages and design principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify content needs	1.1 Identify strategic intent of website from business requirements and client expectations 1.2 Define information and content requirements according to websites intent, intended audiences, types of client interactions and the websites long and short-term goals 1.3 Collate required information and content and group into business schemes applicable to business structure and processes 1.4 Identify website security access requirements
2. Plan content structure	2.1 Cluster and document information and content in related topics 2.2 Develop a hierarchy and site map of information and content

ELEMENT	PERFORMANCE CRITERIA
	2.3 Check data and confirm sequence of hierarchy 2.4 Confirm labels are accessible to client
3. Develop navigation system and create prototype	3.1 Build website navigation system according to business requirements 3.2 Confirm ease and accessibility of navigation on website and provide different ways of searching 3.3 Construct prototype of information architecture design
4. Test and sign off	4.1 Arrange for client and required personnel to test usability of prototype and determine if architecture meets client expectations 4.2 Confirm site content will format in business and client technical environments and different browsers and digital devices 4.3 Adjust architecture according to client feedback 4.4 Obtain sign-off prototype from required personnel and confirm business requirements are met

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to convey client requirements, and articulate complex information using specific language applicable to audience
Reading	<ul style="list-style-type: none"> Reads and interprets specifications, technical data and other documentation from a variety of sources, and consolidates information to determine requirements
Writing	<ul style="list-style-type: none"> Develops and designs information architecture for a complex website using required language according to client and business requirements Prepares correspondence using applicable language, spelling and terminology to collect and confirm information
Planning and organising	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none"> Applies systematic and analytical decision-making processes for complex situations

SKILL	DESCRIPTION
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB508 Develop website information architecture.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for ICTWEB522 Develop website information architecture

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and design information architecture for a complex website with at least ten pages, according to technical requirements.

In the course of the above, the candidate must:

- test access path to all sections of website
- confirm functionality and accessibility of website information architecture on at least two different browsers and at least two different digital devices.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- corporate strategies related to business websites
- the importance and purpose of client and business liaison
- the purpose and function of cascading style sheets (CSS)
- the use of hypertext markup language (HTML), extensible hypertext markup language (XHTML) and hypertext transfer protocol (HTTP), in web design
- technology connectivity implications
- processes for documenting technical specifications
- World Wide Web Consortium (W3C) standards
- website architecture and business process design and linkages between processes
- website accessibility and security access requirements.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a web server
- client and business requirement specifications
- an integrated development environment (IDE), required for creating web pages and server-side code
- web development technology required to develop website information architecture.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB523 Manage transactions using site server tools

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to use site server tools to host, track and monitor transactions on an e-business site.

It applies to individuals who work in a web environment and are responsible for using site server tools to maintain the integrity of an e-business site, applying detailed technical knowledge and highly developed analysis and interpretation skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define and document task requirements	1.1 Identify and confirm task and integration requirements, features and functionality of site with required personnel 1.2 Confirm platform and software related to business systems 1.3 Determine standards applicable to task and site functionality 1.4 Document the organisations current and proposed configuration according to organisational procedures 1.5 Document and validate client task requirements, performance criteria and scope of work with required personnel 1.6 Confirm available resources and budget with the client

ELEMENT	PERFORMANCE CRITERIA
2. Select and use server tools	<ul style="list-style-type: none">2.1 Identify applicable site server tools according to task requirements2.2 Review and evaluate tools according to task and site functionality requirements2.3 Load and configure server tools according to vendor guidelines and client requirements2.4 Test equipment using server tools2.5 Maintain or update required functionality using server tools2.6 Complete required tasks using server tools according to vendor guidelines
3. Review server tools and task requirements	<ul style="list-style-type: none">3.1 Monitor, analyse and evaluate organisational procedures3.2 Review site server configuration and tools applicable to client task requirements and adjust as required3.3 Validate server outcomes using site-analysis software3.4 Create and use reports and other documentation according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none">• Accommodates business requirements by interpreting budgetary constraints and undertakes mathematical calculations with reference to available resources
Oral communication	<ul style="list-style-type: none">• Uses listening and questioning techniques to convey client requirements, and articulate complex information using specific language applicable to audience
Reading	<ul style="list-style-type: none">• Critically analyses complex documentation from a variety of sources and consolidates information applicable to specific criteria
Writing	<ul style="list-style-type: none">• Prepares reports and required documentation expressing ideas and scope of work, and correspondence for specific audiences according to organisational procedures
Teamwork	<ul style="list-style-type: none">• Builds strong relationships by collaborating with others and sharing information
Planning and organising	<ul style="list-style-type: none">• Accepts responsibility for planning and sequencing complex tasks and workload• Negotiates key aspects with others, including required capabilities,

SKILL	DESCRIPTION
	<p>efficiencies and effectiveness</p> <ul style="list-style-type: none">• Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities
Problem solving	<ul style="list-style-type: none">• Applies systematic and analytical decision-making processes for complex situations
Self-management	<ul style="list-style-type: none">• Takes responsibility for following policies, procedures, legislative requirements and industry standards• Modifies or develops organisational policies and procedures to comply with industry standards and organisation goals
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB509 Use site server tools for transaction management.

Assessment Requirements for ICTWEB523 Manage transactions using site server tools

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- maintain and monitor transactions on an e-business site using at least three different site server tools.

In the course of the above, the candidate must:

- maintain expected business performance and technical standards in an e-business environment
- confirm transactions function on at least two different browsers and at least two different devices
- review e-business site procedures and task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- integration requirements and different features and functionalities of sites
- legislative and organisational standards and requirements applicable to task requirements
- documentation processes
- vendor guidelines of site server tools
- e-business site procedures and requirements
- devices and equipment required for a business site
- configuration and validation techniques for site server tools
- functions and features of site server tools applicable to:
 - required firewalls and proxy servers
 - hypertext transfer protocol (HTTP) servers
 - search engines

- cyber security measures required for site
- tools and products required for site construction
- site-building considerations applicable to business.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- server hardware
- industry standard site server tools
- an existing e-business website
- site-analysis software
- browsers and digital devices
- client and business expectations brief
- required standards and legislation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB524 Analyse information and assign meta tags

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to analyse material and assign meta tags to confirm accuracy and consistent retrieval of information by users.

It applies to individuals in a range of Information and Communications Technology (ICT) areas that use various techniques and software to create, update and enhance meta tags according to industry guidelines and client specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify meta tag requirements	1.1 Identify the scope and use of materials, and user requirements 1.2 Determine applicable type and structure of meta tags according to identified client needs, requirements and expectations 1.3 Identify and incorporate client requirements and expectations
2. Analyse material	2.1 Perform analysis on required materials according to organisational procedures 2.2 Confirm determined subject content of material reflects expected client usage requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Identify significant information from minor information 2.4 Confirm concepts derived from material analysis are applicable to business requirements and intended use
3. Create meta tags	3.1 Develop meta tags using applicable software 3.2 Confirm meta tags represent concepts and align with overall purpose and intended use of the material 3.3 Confirm meta tags conform to general conventions and business requirements 3.4 Develop reference structure of descriptors and display relationships where required 3.5 Update meta tags according to identified client needs
4. Test and monitor meta tagging practices and procedures	4.1 Test meta tagging of material and make changes as required 4.2 Review meta tagging practices and procedures and confirm client needs are met 4.3 Review industry developments in meta tagging and improve practices as required 4.4 Check meta tags regularly and confirm internal consistency and compliance with established structure, rules and authorities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Reads and interprets plans, specifications, program data and other documentation from a variety of sources and consolidates information
Writing	<ul style="list-style-type: none"> Develops meta tags using applicable language and software according to client needs and industry developments
Planning and organising	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities
Problem solving	<ul style="list-style-type: none"> Applies systematic and analytical decision-making processes for

SKILL	DESCRIPTION
	complex situations
Self-management	<ul style="list-style-type: none">• Takes responsibility for following policies, procedures, industry standards and legislative requirements, and identifies organisational implications of new regulations
Technology	<ul style="list-style-type: none">• Uses and investigates new digital technologies and applications• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB510 Analyse information and assign meta tags.

Assessment Requirements for ICTWEB524 Analyse information and assign meta tags

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- analyse information and assign at least five meta tags, according to technical requirements.

In the course of the above, the candidate must:

- update meta tags in line with client needs and industry developments
- use analysis and description tools, standards, precedents and techniques applicable to nature of the material.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- business conventions and rules for applying meta tags
- client business domain
- data modelling
- database management system (DBMS) fundamentals
- decision support systems
- document indexing and search engines
- functions and features of databases
- different types and structures of meta tags
- metadata standards, including Dublin Core and simple hypertext markup language (HTML) ontology extensions
- reference structure of descriptors and their role in assisting clients
- general conventions and business requirements applicable to meta tags
- meta tag testing and monitoring processes.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business and client information and materials
- metadata software
- project-related documentation
- hardware required to analyse information and create meta tags
- information applicable to industry developments in meta tagging.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB525 Implement quality assurance process for websites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to develop and conduct planned and systematic actions to ensure that websites conform to applicable standards and fulfil client expectations.

It applies to individuals in the web field of work that use highly developed communication, analysis and technical skills to determine intelligent strategies for ongoing website improvement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish standards	<ul style="list-style-type: none">1.1 Identify applicable regulatory, accessibility, industry and organisational compliance standards for websites1.2 Develop and quantify measurable performance standards from those standards1.3 Establish centralised, distributed or combined quality assurance methodology1.4 Determine specification from which website was developed1.5 Establish guidelines for controlling, updating and loading new content on to website

ELEMENT	PERFORMANCE CRITERIA
	1.6 Document established quality assurance procedures and processes according to organisational procedures 1.7 Confirm standards, guidelines and quality assurance methodology with required personnel and distribute documents as required
2. Apply standards and track performance	2.1 Apply all processes as integral part of website development process 2.2 Validate site, updates and new content against performance standards using wide variety of browsers, tools and devices 2.3 Document and disseminate results to required personnel 2.4 Provide feedback to web authors, users and administrators
3. Develop and apply continuous improvement process	3.1 Provide performance standards feedback to developers, maintainers and administrators 3.2 Identify below average and unacceptable performance standards and apply required performance improvement measures 3.3 Provide channels for interaction, feedback and suggestions from site users, administrators, developers and maintainers 3.4 Respond accordingly to interaction, feedback and suggestions 3.5 Develop procedures and identify whether feedback and suggestions are applied and actioned 3.6 Conduct regular benchmark reviews based on improved performance and disseminate revised benchmarks 3.7 Document and control changes to procedures, processes and results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Analyses data to quantify response times and timelines when determining performance standards
Oral communication	<ul style="list-style-type: none"> Articulates requirements and strategies via an open line of communication using language applicable to audience and environment Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work

SKILL	DESCRIPTION
	contexts
Reading	<ul style="list-style-type: none">Analyses complex documentation from a variety of sources and consolidates information applicable to specific criteria
Writing	<ul style="list-style-type: none">Prepares documentation detailing established quality assurance procedures and processes for specific audiences using succinct language according to client requirements and organisational procedures
Teamwork	<ul style="list-style-type: none">Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Initiative and enterprise	<ul style="list-style-type: none">Investigates new and innovative ideas to continuously improve work practices and processes through consultation
Planning and organising	<ul style="list-style-type: none">Accepts responsibility for planning and sequencing complex tasks and workloadNegotiates key aspects with others, including required capabilities, efficiencies and effectivenessMonitors progress of plans and schedules and reviews and changes them to meet new demands and priorities
Problem solving	<ul style="list-style-type: none">Applies systematic and analytical decision-making processes for complex situations
Self-management	<ul style="list-style-type: none">Takes responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation and regulationsModifies and develops organisational policies and procedures to comply with legislative requirements and organisational goalsSeeks to improve policies and procedures according to organisational goalsElicits feedback and provides feedback to others

Unit Mapping Information

Supersedes and is equivalent to ICTWEB511 Implement quality assurance process for websites.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for ICTWEB525 Implement quality assurance process for websites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify, establish and implement a quality assurance process for websites with at least three performance benchmarks and at least three quantitative standards.

In the course of the above, the candidate must:

- evaluate existing processes and procedures
- determine applicable quality assurance methodology
- validate a website against performance standards using at least two different browsers and on at least two different devices
- comply with organisational procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- business process design and customer and business liaison
- legislative and organisational requirements and compliance standards applicable to websites, including:
 - copyright and intellectual property
 - provisions of privacy legislation
 - website accessibility and equity legislation
- methods of developing and quantifying performance standards
- different quality assurance methodologies applicable to websites
- documentation techniques
- site validation processes
- different methods and channels for interaction, feedback and suggestions

- benchmark review processes
- functions and features of website architecture and website security
- workload metrics and technical performance measurement.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- web servers
- a website
- analysis software
- text-editing software
- automatic testing software
- hardware, browsers, tools and devices required to implement quality assurance process for websites
- channels for interaction, feedback and suggestions
- documentation for applicable regulatory, industry compliance and accessibility standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB526 Implement and use web services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to support web services for building distributed applications.

It applies to individuals working as software developers and apply specialised skills in the consumption of web services, applicable communications protocols and extensible markup language (XML) technologies used in web services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Provide information using XML	1.1 Create XML data structures from various data sources 1.2 Manipulate XML data structures using a common application programming interface (API) 1.3 Scope elements from multiple XML documents using namespaces 1.4 Validate XML data structures using a schema 1.5 Map and transform XML document from one schema to another
2. Promote web service using WSDL	2.1 Identify purpose and the three main elements of the web service description language (WSDL) 2.2 Build WSDL file according to identified purpose

ELEMENT	PERFORMANCE CRITERIA
	2.3 Provide web access to WSDL file via a uniform resource locator (URL)
3. Identify purpose of UDDI in using web services	3.1 Determine purpose of universal description, discovery and integration (UDDI) 3.2 Identify and analyse differences between public, extra-enterprise and intra-enterprise UDDI registry deployments 3.3 Define relationship between WSDL and UDDI
4. Access web services using SOAP	4.1 Identify purpose of simple object access protocol (SOAP) 4.2 Determine relationship between UDDI and SOAP 4.3 Identify basic structure and processing of SOAP messages 4.4 Retrieve XML documents from a public web service, using SOAP
5. Implement a web service	5.1 Outline a basic web service architecture 5.2 Implement, test and publish a web service 5.3 Incorporate and test a web service into an application 5.4 Confirm web service is functional on different browsers and devices 5.5 Seek feedback from required personnel and amend web service as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Reads and interprets specifications, program data and other documentation from a variety of sources and consolidates information
Writing	<ul style="list-style-type: none"> Transforms and writes technical data in a logical manner using required language and protocols Develops specifications and applicable workplace documentation for specific audiences using applicable language to convey explicit information
Planning and organising	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness

SKILL	DESCRIPTION
Problem solving	<ul style="list-style-type: none">• Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables, including outcomes of previous decisions• Applies systematic and analytical decision-making processes, for complex situations
Technology	<ul style="list-style-type: none">• Confirms knowledge of computing technologies is kept up to date in order to provide and carry out activities• Uses and investigates new digital technologies and applications• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB515 Implement and use web services.

Assessment Requirements for ICTWEB526 Implement and use web services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- transform data from at least three relational or other native data sources into an extensible markup language (XML).

In the course of the above, the candidate must:

- provide access to a business functionality via a web service description language (WSDL) file
- locate and retrieve at least three pieces of information about a public web service business function and include it in a website using universal description, discovery and integration (UDDI) and a simple object access protocol (SOAP)
- implement a web service according to business requirements, specifications and industry standards.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- functions and features of web development technologies
- web service testing processes
- purpose and uses of different web services, including XML, WSDL, UDDI and SOAP
- functions and purpose of web service architecture
- functions and features of XML language and data structures and validation techniques
- uses of namespaces
- legislative and organisational requirements applicable to the implementation and use of web services.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- web service business requirement specifications
- legislative requirements applicable to use of web services, including industry standards published by the World Wide Web Consortium (W3C)
- platform-specific documentation and help files describing syntax and use of proprietary technologies
- digital devices simulated development environment including the following elements:
 - a relational database server
 - the integrated development environment (IDE), including related frameworks, APIs and applicable proprietary classes required to implement web services and their enabling technologies
 - a web server
 - web browsers
 - XML editors
 - XML schema
 - XPath testing utilities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB527 Research and apply emerging web technology trends

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to identify, research and apply emerging web technologies.

It applies to individuals who are highly skilled technicians and have high-level knowledge of the principles of analysis and design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify emerging web technology	<ul style="list-style-type: none">1.1 Identify needs of web application1.2 Research and review new developments in web technology1.3 Identify new developments in web technology that meet identified needs of web application1.4 Evaluate and select web technology most applicable to web application needs1.5 Identify legislative and organisational requirements and standards applicable to implementation of new technology1.6 Discuss and confirm selection with required personnel

ELEMENT	PERFORMANCE CRITERIA
2. Implement new web technology	2.1 Create required code to apply web technology 2.2 Apply code to web technology according to organisational procedures 2.3 Test web application in a variety of browsers and digital devices, and rectify problems as required
3. Review and finalise web technology implementation process	3.1 Review test results and discuss findings with required personnel 3.2 Seek feedback from required personnel and amend as required 3.3 Document work performed and findings according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Critically analyses complex information from a variety of sources and consolidates information applicable to specific criteria
Writing	<ul style="list-style-type: none">Writes and edits code and technical data in a logical manner using required syntax
Initiative and enterprise	<ul style="list-style-type: none">Investigates new and innovative ideas to improve work practices and processes
Planning and organising	<ul style="list-style-type: none">Accepts responsibility for planning and sequencing complex tasks and workloadNegotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Technology	<ul style="list-style-type: none">Manages and manipulates data and communicates with others in a secure and stable digital environment

Assessment Requirements for ICTWEB527 Research and apply emerging web technology trends

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- research, investigate and apply at least two emerging web technology trends to a web application, according to organisational needs.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of the internet and technologies that underpin its existence
- key principles of analysis and design
- programming control structures and object-oriented programming applicable to implementing new web technology
- web programming concepts, including:
 - the hypertext transfer protocol (HTTP)
 - stateless programming
 - session management
 - authentication and web security
 - client-side programming
- latest web technology trends and their application to different clients
- features, functions and requirements of different web applications
- web application testing processes
- sources of information regarding new and emerging trends and technologies
- legislative and organisational requirements and standards applicable to implementation of new technologies.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a development environment
- a server
- a database server
- hardware and software applicable to implementation of new technology
- the internet
- browsers and digital devices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS205 Work safely near power infrastructure at a telecommunications workplace

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to conduct telecommunications operations near substantial safety hazards. It includes applying a risk management approach to a limited range of predictable problems when working at heights near electrical distribution infrastructure, radiation devices, or other services in confined spaces. This unit also includes the preparation of risk control measures within scope of own role that encompass job safety analysis.

It applies to telecommunications workers who perform work functions such as rigging, telecommunications installation and maintenance, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus.

It does not include any work that is or may be performed by other competent operatives within the defined 'safe work zone', which is defined by relevant state/territory regulatory agencies/bodies, local government legislation, industry bi-partite body, guidelines/codes of practice or other related requirements for safe work and access near live electrical and mechanical apparatus.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements and may require a licence/registration in relation to:

- work health and safety
- electricity/telecommunications/gas/water industry safety and compliance
- industrial relations
- anti-discrimination.

Age limits for operating certain equipment may also be covered by commonwealth, state/territory or local government legislation and regulations.

This unit does not cover legislative requirements for confined space entry, elevating work platform (EWP) operations, traffic control, or spotter/safety observation.

Unit Sector

Telecommunications – Workplace Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work safely near live electrical apparatus	1.1 Receive and confirm instructions related to the work to be performed 1.2 Identify relevant requirements and established procedures to be followed and personnel to be contacted for the work to be performed 1.3 Receive and confirm work health and safety (WHS) policies and procedures and technical standards relevant to the work and worksite 1.4 Collaborate with other telecommunications workers in meeting the safety requirements for working near live electrical apparatus 1.5. Identify, receive and confirm scope of responsibility and issued work permit/s according to workplace requirements and established procedures 1.6 Identify and confirm that first aid, safety observers and/or other related work safety procedures are in place to be followed in the event of an incident 1.7 Identify processes for reporting customer issues to appropriate personnel 1.8 Confirm site and work schedule according to given instructions and established procedures 1.9 Use safe approach distances and apply safe work zones
2. Conduct risk assessment	2.1 Assess risks from electrical, radiation, gas and other services in or adjacent to the worksite according to established procedures 2.2 Assess safety of the worksite, earthing arrangements, and other services and support structures using appropriate monitoring equipment and according to established procedures 2.3 Complete a job safety analysis (JSA) or similar risk assessment record specific to site and work requirements, and report safety hazards to relevant personnel 2.4 Assess potential emergency situations relevant to the site 2.5 Take measurements to assess electrical potential or charge leakage into adjoining infrastructure according to established procedures

ELEMENT	PERFORMANCE CRITERIA
	<p>2.6 Perform electrical and mechanical pole tests to ensure it is safe to climb</p> <p>2.7 Inspect all hand and power tools, ladders, climbing and lifting equipment apparatus before use</p>
3. Apply enterprise risk management plan	<p>3.1 Apply enterprise procedures to manage potential hazards and risks</p> <p>3.2 Communicate and confirm risk management strategies with co-workers within scope of own role</p> <p>3.3 Confirm safety procedures to ensure management of emergency situations are in place</p> <p>3.4 Obtain safety equipment and personal protective equipment (PPE)</p> <p>3.5 Delineate safe work zones and limits of approach to other services</p> <p>3.6 Observe required road safety and traffic control measures according to established procedures</p> <p>3.7 Implement safe strategies for working at heights and in confined spaces, according to regulatory requirements and within scope of own role</p>
4. Complete work safely near live electrical apparatus	<p>4.1 Report schedule and anomalies for completion and checking of work to authorised personnel, according to established procedures</p> <p>4.2 Use safety equipment and PPE effectively</p> <p>4.3 Use tested ladders, climbing and lifting equipment to work safely at heights, according to regulatory requirements and safety procedures</p> <p>4.4 Operate hand and power tools safely at heights</p> <p>4.5 Complete the work and ensure it complies with enterprise and industry earthing practices</p> <p>4.6 Provide assistance in clearing worksite to ensure safety of telecommunications workers, the public and the telecommunications network</p> <p>4.7 Complete work records and notify appropriate personnel that work is completed</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance, but not explicit in the performance criteria.

Skill	Description
-------	-------------

Skill	Description
Reading	<ul style="list-style-type: none"> Reads and interprets documentation from a variety of sources and consolidates information to determine safety requirements
Writing	<ul style="list-style-type: none"> Accurately records and completes enterprise safety documents and correspondence using clear language and correct spelling, grammar and terminology
Oral Communication	<ul style="list-style-type: none"> Uses clear language, concepts, tone and pace appropriate for the audience to communicate safety outcomes
Navigate the world of work	<ul style="list-style-type: none"> Understands rights and responsibilities and complies with legal and regulatory requirements Complies with explicit policies and procedures Explores and implements implicit expectations of policies and procedures
Interact with others	<ul style="list-style-type: none"> Uses a limited range of accepted practices for communicating in a work environment
Get the work done	<ul style="list-style-type: none"> Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration; and seeks assistance in setting priorities Responds to predictable routine problems, implementing standard or logical solutions

Unit Mapping Information

No equivalent unit. Supersedes and is not equivalent to ICTWHS203 Work safely near power infrastructure.

Links

Companion Volume Implementation Guides are available from VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a53af4e4-b400-484e-b778-71c9e9d6aff2>

Assessment Requirements for ICTWHS205 Work safely near power infrastructure at a telecommunications workplace

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to perform the tasks outlined in the elements, performance criteria, and foundation skills, and to:

- conduct a risk assessment or simulated risk assessment for a telecommunications work site near power infrastructure
- identify the safety and licensing requirements for working at heights and working in confined spaces
- apply safety precautions while working at heights or in confined spaces near power infrastructure
- test power pole infrastructure for electrical safety before working on the infrastructure
- perform tests on the mechanical soundness of a pole in accordance with the asset (pole) owner guidelines.

Note: Evidence must be provided at least once when a specific volume or frequency is not stated.

Knowledge Evidence

The candidate must demonstrate the knowledge required to perform the tasks outlined in the elements, performance criteria, and foundation skills, which includes knowledge about:

- consequences of short circuits including:
 - arc flash
 - basic power industry protection schemes like reclosers
 - drop out fuses and their limitations for current limiting
- effects of current including:
 - physiological effects and protection for physiological effects
 - basic principle by which electrical current can result in the production of heat, light and electromagnetic field

- typical effects of current
- definitions of terminologies including:
 - safe work zone
 - risk assessment
 - safe approach distances zones
 - safe working distances
 - work permit
 - access authorisation permits
 - technical standards
 - isolation procedures
 - compliance requirements
- legislation, regulations, codes, standards, guidelines, enterprise requirements, certification and licensing applicable to above performance evidence and own telecommunications role when working safely up to the defined 'safe work zone' near energised electrical apparatus (including electrical powerlines), in particular:
 - electrical safety and technical knowledge relating to operating plant or vehicle near power lines including 'step and touch potential' and earth potential rise
 - safe approach distances including safe work zones that may apply for the intended work
 - for work near live electrical infrastructure – including AS/NZS 3000:2018 Electrical installations known as the Australian/New Zealand Wiring Rules
 - main components of work health and safety (WHS) that affect the work function
 - workplace environmental and WHS procedures including:
 - designation of personnel responsible for WHS
 - requirement for employee participation in WHS management
 - standard meanings of WHS symbols found on signs and labels in the workplace
 - raising WHS issues
 - recognising and reporting on hazards
 - responding to accidents, fires and emergencies
 - work operations to control risks
 - common road and pedestrian safety control measures appropriate to the worksite
- separation and segregation between power and telecommunications cables and fittings
- ground clearances, in-span clearances and attachment point clearances
- test procedure for timber, steel, concrete and composite poles
- techniques and precautions for undertaking different work functions and working safely up to the defined 'safe work zone' near energised electrical apparatus (including electrical powerlines) applicable to above performance evidence and own telecommunications role (work functions that may be performed include, vegetation control, rigging, dogging and/or any other activity that requires working safely near live electrical apparatus by a telecommunications worker)
- limitations of installing telecommunications infrastructure on power assets, including installations near transformers and power substations

- environmental control processes:
 - disposal and handling of hazardous and dangerous substances
 - noise pollution
 - waste disposal
- electricity infrastructure assets, related voltages and requirements for working safely near live electrical apparatus as a telecommunications worker
- how step or touch potential manifests itself
- earth potential rise and how it manifests itself
- weather conditions suitable for working near live electrical apparatus as a telecommunications worker
- safe work zone for safe access near live electrical infrastructure for workers and operational plant
- established enterprise procedures relating to working safely near power infrastructure at a telecommunications workplace, including incident management procedures
- low and high aerial voltage systems.

Assessment Conditions

This unit of competency falls into the definition of high risk work and should be delivered and assessed in accordance with the national standard.

Skills must be assessed in a workplace or simulated environment where conditions are typical of those in a telecommunications work environment or workplace.

Access is required to:

- telecommunications site/s near power infrastructure
- relevant WHS legislation, regulations and codes of practice
- enterprise WHS policies and procedures
- personal protective equipment (PPE).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. Refer also to the *Requirements for assessors* of high risk units in the ICT Information and Communications Technology Training Package Companion Volume Implementation Guide.

ICTWOR202 Work effectively in the digital and telecommunications industry

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to work effectively within the digital and telecommunications industry and to work within enterprise arrangements and requirements.

It applies to individuals directly employed within a large enterprise or preparing to work for a small sub-contractor who undertake a range of tasks under supervision.

This unit applies to people who have recently entered the digital and telecommunications industry and are beginning their career as direct employees or contractors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Workplace Effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan ongoing skills development	1.1 Obtain information about the various sectors of the digital and telecommunications industry 1.2 Seek advice about future career opportunities from appropriate people 1.3 Identify possible career directions in the enterprise for personal advancement

Elements	Performance Criteria
	<p>1.4 Self-assess own skills against job role to identify skills gap and plan for further skills development</p> <p>1.5 Determine appropriate strategies to acquire additional skills</p> <p>1.6 Identify and apply methods for keeping up-to-date with industry developments</p>
2. Research a digital and telecommunications contractor business	<p>2.1 Identify activities that are undertaken by a contractor business within the digital and telecommunications industry</p> <p>2.2 Identify licences, permits, regulations or restrictions that apply to operating a contracting business</p> <p>2.3 Identify resources available to support a contracting business</p> <p>2.4 Identify costs of suitable vehicles and equipment required by a digital and telecommunications contracting business</p> <p>2.5 Identify insurance requirements for operating a digital and telecommunications contracting business</p>
3. Confirm employment arrangements	<p>3.1 Access and read employment terms and conditions, and clarify points of concern</p> <p>3.2 Access, read, negotiate and agree on work goals and objectives, according to enterprise requirements</p> <p>3.3 Obtain information relevant to technical and regulatory requirements and apply at work</p>
4. Participate in enterprise operations	<p>4.1 Consult co-workers and team members to identify team purpose, roles, responsibilities, goals, plans and objectives</p> <p>4.2 Develop strategies to support shared goals and seek assistance from others, as required, to prevent conflict</p> <p>4.3 Comply with industry standards, and work health and safety guidelines</p>
5. Contribute to teamwork and performance	<p>5.1 Give and respond to feedback to assist in meeting team and personal goals</p> <p>5.2 Communicate unresolved issues to appropriate personnel</p>
6. Follow environmental regulations	<p>6.1 Apply enterprise environmental policies and procedures</p> <p>6.2 Ask questions and seek clarification relating to environmental work requirements</p> <p>6.3 Identify environmental incidents that contravene environmental procedures and report to appropriate personnel according to these procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance, but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none">Employs a range of approaches and investigative techniques to source the knowledge required to establish, plan, manage and evaluate skill development
Reading	<ul style="list-style-type: none">Recognises and interprets text to determine key information and specific requirements and responsibilities
Writing	<ul style="list-style-type: none">Develops material for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations
Oral Communication	<ul style="list-style-type: none">Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Navigate the world of work	<ul style="list-style-type: none">Takes steps to develop skills, obtain qualifications and/or experience relevant to current or desired work roleAttempts to follow directions on the scope of responsibility within the role and begins to recognise when to involve others
Interact with others	<ul style="list-style-type: none">Cooperates with team as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountabilitySeeks support from team when preventing conflict
Get the work done	<ul style="list-style-type: none">Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing and timing

Unit Mapping Information

No equivalent unit. Supersedes and is not equivalent to ICTWOR201 Work effectively in telecommunications technology.

Links

Assessment Requirements for ICTWOR202 Work effectively in the digital and telecommunications industry

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to perform the tasks outlined in the elements, performance criteria, and foundation skills, and to:

- obtain information about relevant digital and telecommunications industry sectors including employment conditions
- develop a list of contracting opportunities within the telecommunications industry
- actively participate in a team.

Note: Evidence must be provided at least once when a specific volume or frequency is not stated.

Knowledge Evidence

The candidate must demonstrate the knowledge required to perform the tasks outlined in the elements, performance criteria, and foundation skills, which includes knowledge about:

- range of digital and telecommunications team roles and how these roles impact on the way a team works and what it might achieve
- terms and conditions of employment common to the digital and telecommunications industry
- role of contracting within the digital and telecommunications industry
- legislation, codes and other formal agreements that impact on the work activity
- various sectors of the digital and telecommunications industry
- enterprise policies, plans and procedures
- sources of advice about career planning and skill development
- specific work health and safety (WHS) requirements relating to the activity and site conditions
- environmental policies and procedures applicable to working in the digital and telecommunications industry.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of those in a telecommunications work environment or workplace.

Access is required to:

- digital and telecommunications technology team
- examples of resumes and career planning resources
- relevant enterprise documentation such as policies, procedures and practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR308 Provide customer service to telecommunications customers

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to deliver all aspects of customer service relevant to the telecommunications industry. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

It applies to technicians who perform a range of tasks in a defined context under supervision or as part of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workplace effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish contact with customers	1.1 Greet customer in a professional, courteous and concise manner according to enterprise requirements 1.2 Maintain personal presentation according to enterprise requirements 1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information 1.4 Respond appropriately to customer requests and use effective

ELEMENT	PERFORMANCE CRITERIA
	<p>communication strategies that reflect customer support needs</p> <p>1.5 Establish rapport with customer by expressing a genuine interest in customer requirements</p>
2. Identify telecommunications installation requirements	<p>2.1 Use active listening and questioning techniques to clarify installation requirements</p> <p>2.2 Identify details of existing and proposed telecommunications and/or cabling work</p> <p>2.3 Establish intended uses of equipment and associated cabling requirements</p> <p>2.4 Discuss benefits and disadvantages of alternative cabling or equipment as required</p> <p>2.5 Convey information respectfully and clearly</p>
3. Identify installation locations	<p>3.1 Assess potential locations to ensure accuracy of installation</p> <p>3.3 Propose locations and confirm with customer</p> <p>3.4 Review existing plans and verify that proposed locations match enterprise preferred locations</p> <p>3.5 Scope activities to avoid work, health and safety (WHS) hazards</p>
4. Deliver service/s to customers	<p>4.1 Establish availability, security, safety and other constraints on use of existing systems</p> <p>4.2 Communicate information according to enterprise code of conduct</p> <p>4.3 Implement enterprise procedures to install equipment and/or cabling according to industry standards and manufacturer specifications</p>
5. Work as a team to provide customer service	<p>5.1 Acknowledge workplace team in providing customer service</p> <p>5.2 Agree on and establish a set of team goals and procedures in providing customer service</p> <p>5.3 Contribute to and support other team member goals to achieve quality customer service outcomes</p> <p>5.4 Review team goals and processes, as part of the team, to ensure continuous improvement of services provided to customers</p>
6. Process customer feedback	<p>6.1 Seek, recognise and acknowledge customer feedback in order to improve personal performance and/or behaviour</p> <p>6.2 Respond according to enterprise procedures and legislative requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	6.3 Identify unmet needs and evaluate suitable ways to action feedback 6.4 Assist customers to contact other services according to enterprise policies and procedures
7. Finalise customer interaction	7.1 Complete all required documents promptly and accurately according to enterprise policies and procedures 7.2 File completed documentation according to enterprise policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance, but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Understands requirements in enterprise policy and procedure documentsInterprets product and service information in a range of formats to provide customer advice
Writing	<ul style="list-style-type: none">Records customer information according to enterprise requirements
Oral Communication	<ul style="list-style-type: none">Provides information or advice using structure and language to suit the audienceAsks questions and listens to gain information or confirm understanding
Numeracy	<ul style="list-style-type: none">Performs mathematical calculations to check and confirm location of installation
Navigate the world of work	<ul style="list-style-type: none">Follows enterprise procedures and practices relevant to own role
Interact with others	<ul style="list-style-type: none">Uses accepted communication practices to establish connections, build rapport and develop professional working relationshipsAdjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	<ul style="list-style-type: none">Addresses routine problems in familiar work contextsRecognises opportunities to enhance work practices and outcomes

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for ICTWOR308 Provide customer service to telecommunications customers

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to perform the tasks outlined in the elements, performance criteria, and foundation skills, and to:

- provide routine telecommunications customer services in a professional manner
- document and record concerns and solutions according to enterprise guidelines and escalation procedures
- identify customer needs using appropriate interpersonal skills
- provide prompt service to address customer needs according to enterprise requirements
- identify opportunities to increase the quality of service and products
- respond to and record all customer feedback according to relevant standards, and enterprise policies and procedures.

Note: Evidence must be provided at least once when a specific volume or frequency is not stated.

Knowledge Evidence

The candidate must demonstrate the knowledge required to perform the tasks outlined in the elements, performance criteria, and foundation skills, which includes knowledge about:

- telecommunications customer equipment and their general features and capabilities
- enterprise systems and telecommunications work environment
- key provisions of relevant legislation from all forms of government that apply to providing customer service
- enterprise policies and procedures relating to the customer service process
- range of typical issues and challenges that can arise when providing customer service in the telecommunications industry.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of those in a telecommunications work environment or workplace.

Access is required to:

- workplace documents, enterprise policies and procedures for customer service
- examples of customer feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTXRE401 Apply augmented reality solutions in organisations

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs.

Application

This unit describes the skills and knowledge required to design and implement augmented reality (AR) user experience (UX) solutions across organisational processes. It involves investigating extended reality technologies and developing AR UX solutions to meet business requirements.

The unit applies to individuals working in information and communications technology (ICT) roles, such as software developers, who contribute to activities required for the implementation of extended reality solutions in workplace contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Extended reality

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to design AR solutions	1.1 Confirm work brief and tasks according to organisational policies and procedures 1.2 Research industry-recognised AR solutions according to organisational policies and procedures 1.3 Shortlist preferable AR solutions according to work brief 1.4 Recommend shortlisted AR solutions and gain approval from

ELEMENT	PERFORMANCE CRITERIA
	required personnel
2. Design and test AR solutions	2.1 Analyse existing system architecture and programming requirements 2.2 Create AR solution design according to work brief 2.3 Create AR implementation plan 2.4 Source AR configuration hardware, software and tools according to implementation plan and confirm component serviceability 2.5 Configure and test AR solution prototype according to design and programming requirements 2.6 Deploy AR solution across specified organisational processes
3. Support AR solutions	3.1 Research three-dimensional (3-D) technologies related to the implemented AR solution according to work brief 3.2 Seek AR technical assistance and monitor AR solution where required and according to organisational policies and procedures 3.3 Report on monitored AR solution to required personnel according to organisational needs
4. Analyse AR solutions	4.1 Detect any issues in post-deployment AR solutions according to work brief 4.2 Test and rectify any detected issues 4.3 Report on analysis findings according to organisational policies and procedures 4.4 Store AR solutions in required locations according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reviews complex texts with at times complex technical terms
Writing	<ul style="list-style-type: none"> Develops a broad range of materials using clear language in order to convey specialised information and requirements
Planning and organising	<ul style="list-style-type: none"> Uses formal processes to identify key information and issues, evaluate strategies and plan to rectify implementation issues
Problem solving	<ul style="list-style-type: none"> Uses formal analytical techniques to implement solutions

Unit Mapping Information

No equivalent unit. Newly created unit.

Assessment Requirements for ICTXRE401 Apply augmented reality solutions in organisations

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design and deploy at least two augmented reality (AR) solutions into a virtual workspace, using at least one of the following concepts:
 - web design-based concepts
 - application design-based concepts
 - mobile design-based concepts.

In the course of the above, the candidate must:

- develop AR prototype using required programming language
- securely and safely store AR solutions in required locations
- apply required organisational policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key functions and features of desktop, web and mobile programming language, including:
 - Java Script
 - Python
 - C#
 - C++
- key functions and features of web developments and components, including:

- backends
- servers
- application programming interfaces
- application development
- game development
- required functions and features of:
 - neural networks and machine learning
 - three-dimensional (3-D) and animation technologies
- industry-recognised types of extended reality (ER) platforms for AR
- AR-enabled hands-free solutions, including:
 - AR headsets
 - smart glasses
 - portable devices
 - lens studio filters
- functions and features of:
 - AR implementation plans
 - required AR configuration hardware, software and tools
 - AR solution integration designs
 - AR solution prototypes
 - user experience (UX) solutions
- methods to confirm component serviceability
- methods to configure and apply AR solutions in virtual workspaces using different concepts and technical guidelines
- functions and application of testing tools and equipment to apply AR in organisations
- organisational formats for documentation and reports
- organisational policies and procedures and legislative requirements relating to work tasks.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a virtual workspace where AR solutions are to be applied
- AR technological infrastructure, including tools, hardware, software and configuration components
- opportunities for interaction with others
- work brief and organisational policies and procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for ICTXRE402 Apply virtual reality solutions in organisations

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- apply at least two virtual reality (VR) solutions to a virtual workspace, using at least one of the following concepts:
 - web design-based concepts
 - application design-based concepts
 - mobile design-based concepts.

In the course of the above, the candidate must:

- develop VR prototype using required programming language
- securely and safely store VR solutions to required locations
- apply required organisational policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key functions and features of desktop, web and mobile programming language, including:
 - Java Script
 - Python
 - C#
 - C++
- key functions and features of web developments and components, including:

- backends
- servers
- application programming interfaces
- app development
- game development
- required functions and features of:
 - neural networks and machine learning
 - three-dimensional (3-D) and animation technologies
- VR-enabled solutions, including:
 - VR applications
 - console and personal computer (PC)-connected headsets
 - standalone headsets
 - VR user experience hubs and showrooms
- functions and features of artificial intelligence-based diagnostic tools
- methods to configure and apply VR solutions in virtual workspaces using different concepts and technical guidelines
- organisational formats for documentation and reports
- organisational policies and procedures and legislative requirements relating to work tasks.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a virtual workspace where VR solutions are applied
- VR technological infrastructure, including tools, hardware, software and configuration components
- opportunities for interaction with others
- work brief and organisational policies and procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTXRE403 Design mixed reality solutions

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs

Application

This unit describes the skills and knowledge required to develop concepts to build immersive environments in virtual workspaces. It includes integrating mixed reality (MR) solutions to enable virtual and physical objects to interact.

The unit applies to individuals working in information and communications technology (ICT) roles who contribute to design activities required for building virtual workplaces in workplace contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Extended reality

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to design MR-enabled solutions	1.1 Confirm work brief and tasks according to organisational policies and procedures 1.2 Analyse required MR solutions and technologies in consultation with required personnel 1.3 Analyse MR hardware, software and tools according to analysis 1.4 Document MR analysis findings according to organisational

ELEMENT	PERFORMANCE CRITERIA
	policies and procedures
2. Analyse MR interaction options	2.1 Analyse existing digital architecture according to work brief 2.2 Observe organisational processes requiring MR solutions according to work brief 2.3 Research and document MR and augmented reality (AR) interaction options in required format 2.4 Select and plan MR and AR interaction solution option according to work brief 2.5 Consult with required personnel and seek feedback on MR solution plan 2.6 Seek approval for MR solution plan from required personnel
3. Make recommendations	3.1 Source and review related MR case studies from required database 3.2 Analyse technological improvements set out in MR case study 3.3 Analyse MR concept considerations and required MR solution plan according to work brief 3.4 Brainstorm and document possible MR integration solution plan according to analysis 3.5 Synthesise and present MR recommendations and MR solution plan to required personnel 3.6 Seek and implement feedback from required personnel 3.7 Store MR design documentation and virtual assets in required locations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reviews complex texts with at times complex technical terms
Writing	<ul style="list-style-type: none"> Develops a broad range of materials using clear language in order to convey specialised information and requirements

Assessment Requirements for ICTXRE403 Design mixed reality solutions

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created unit of competency to address in-demand skills needs

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design at least two mixed reality (MR) solutions with plans for a virtual workspace, using at least one of the following concepts:
 - web design-based concepts
 - application design-based concepts
 - mobile design-based concepts.

In the course of the above, the candidate must:

- securely and safely store documentation and virtual assets in required locations
- apply required organisational policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- functions and features of neural networks and machine learning
- databases containing MR case studies
- key types and techniques of integrating VR- and AR-enabled solutions, including:
 - computer vision
 - graphical processing power
 - display technology
 - input systems

- MR-enabled solutions aligned with context considerations, including:
 - virtuality continuum and categorisation
 - environmental input
 - spatial sound
 - location and positioning in real and virtual spaces
- functions and features of artificial intelligence-based diagnostic tools
- key methods to configure and apply MR device components using different concepts and technical guidelines, including:
 - holographic devices
 - immersive devices
- organisational formats for documentation and reports
- organisational policies and procedures and legislative requirements relating to work tasks.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- MR case studies where MR solution plans need to be developed
- required technological infrastructure, including tools, hardware, software and configuration components
- opportunities for interaction with others
- work brief and organisational policies and procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCRT201 Develop and apply thinking and problem solving skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to solve problems, develop questions and respond to feedback on questions on workplace issues.

The unit applies to individuals, often working under supervision or guidance, who may be required to think critically, ask essential questions and consider answers to those questions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Investigate problem solving	1.1 Identify key features and role of problem solving in the workplace 1.2 Identify different types of questions and styles of questioning 1.3 Identify basic problem solving techniques 1.4 Collaborate with relevant stakeholders and share ideas on different types of questions, styles of questioning and applicable problem solving techniques 1.5 Identify challenges in the types of questions, styles of questioning and basic problem solving techniques
2. Prepare and ask	2.1 Select a basic workplace issue within job role to be resolved

ELEMENT	PERFORMANCE CRITERIA
questions	2.2 Identify ways to structure questions on identified issue in consultation with relevant stakeholders 2.3 Develop questions to consolidate knowledge of selected issue 2.4 Ask prepared questions to relevant personnel
3. Solve basic workplace issues	3.1 Document responses to questions asked according to organisational requirements 3.2 Clarify responses given with further questions and comments 3.3 Apply basic problem solving techniques and document responses to workplace issue
4. Seek feedback on questions and problem solving	4.1 Consult with relevant stakeholders and identify improvements for problem solving process 4.2 Seek feedback on questions, questioning style and problem solving technique from relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to obtain specific information and confirm understanding
Teamwork	<ul style="list-style-type: none"> Uses accepted practices to discuss ideas with others
Planning and organising	<ul style="list-style-type: none"> Develops a plan for the use of information gathered

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBCRT101 Apply critical thinking techniques.

Assessment Requirements for BSBCRT201 Develop and apply thinking and problem solving skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, deliver, document and review a set of questions to consolidate understanding of a workplace issue within own job role on at least two occasions
- apply basic problem solving techniques to a workplace issue on at least four occasions.

In course of doing the above, the candidate must:

- use a range of different types of questions and styles of questioning
- identify potential issues that may arise in problem solving processes
- develop questions designed to consolidate information of selected issue
- ask questions to relevant stakeholders, using further questions and comments to clarify responses provided
- seek feedback on questions developed.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features and processes of critical thinking and problem solving
- basic problem solving techniques
- different types of questions and their relevance to different situations
- effective questioning techniques
- typical blockers to problem solving processes
- role of critical thinking for businesses, the community and at an individual level.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to simulated challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCRT301 Develop and extend critical and creative thinking skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to develop the habit of thinking in a more creative way through looking at things differently, musing, testing, experimenting and challenging existing thought patterns.

It applies to individuals who need to develop and extend their critical and creative thinking skills to different issues and situations and have a range of problem solving, evaluation and analysis skills.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Creative Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Develop a questioning mindset	1.1 Develop the habit of asking questions from different perspectives 1.2 Take responsibility for exploring a variety of information sources to provide relevant answers to own questions 1.3 Sort through information and ideas to identify the central questions, issues and challenges

ELEMENT	PERFORMANCE CRITERIA
	1.4 Challenge preconceptions and assumptions to determine actual constraints in defining a problem for resolution
2 Generate ideas and responses	2.1 Explore and use a range of creative thinking techniques to generate ideas and responses 2.2 Muse on, play around with and have fun with ideas in relation to a perceived objective 2.3 Identify and challenge blockers to creative thinking 2.4 Consider and explore realities beyond the current situation 2.5 Evaluate, and where appropriate, challenge existing boundaries to determine perceived or actual constraints 2.6 Show willingness to take risks with ideas and thought processes 2.7 Look around in familiar and unfamiliar places for new inspiration and habitually record observations, experiences, ideas and reflective thoughts to broaden personal knowledge base 2.8 Acknowledge and accept the opportunity for revelation when least expected 2.9 Identify connections and associations from things that seem unconnected
3 Challenge, test and re-invent ideas	3.1 Identify, interrogate and challenge the assumptions behind ideas 3.2 Experiment with variations, and explore and challenge a range of different solutions and ideas 3.3 Consciously change perspectives, and evaluate ideas and situations in new ways 3.4 Where appropriate, involve others in ideas and how they might change or be improved
4 Enhance creative thinking skills	4.1 Consciously challenge and question own thought patterns and ways of responding to work and life situations 4.2 Identify and take opportunities to self-assess and to learn about new ideas and different ways of thinking 4.3 Take opportunities to practise and experiment with creative thinking techniques across work and life situations 4.4 Pro-actively talk to others about ways that new ideas and patterns of thinking can be encouraged and developed

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.2, 2.7, 4.2	<ul style="list-style-type: none"> • Uses questioning as a strategy to expand knowledge • Reflects on existing thinking and current practices to generate new ideas
Reading	1.2, 1.3	<ul style="list-style-type: none"> • Comprehends textual information and integrates ideas and concepts from various sources
Writing	2.7	<ul style="list-style-type: none"> • Takes notes on observations, experiences and thoughts
Oral Communication	3.4, 4.4	<ul style="list-style-type: none"> • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Interact with others	3.4, 4.4	<ul style="list-style-type: none"> • Collaborates with others to test, strengthen and explore new ideas and different ways of thinking
Get the work done	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 3.2, 4.2, 4.3	<ul style="list-style-type: none"> • Uses analytical techniques to identify issues and evaluate options • Contributes to the design of new approaches within the immediate work environment • Understands and applies some basic principles of analytical and lateral thinking to identify and select ideas

Assessment Requirements for BSBCRT301 Develop and extend critical and creative thinking skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- ask relevant questions to challenge and enhance creative thinking
- use various information sources to provide answers to own questions
- use a range of creative thinking techniques to generate ideas or responses to questions or issues
- record ideas in response to a predetermined issue or situation.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain why it is important to consider different perspectives when asking questions
- list and describe different creative thinking techniques
- describe common blockers to creative thinking,
- explain boundaries that need to be considered when generating ideas and responses
- describe ways of extending and developing individual creative thinking skills.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to specific challenges and situations to which creative thinking may be applied.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCRT404 Apply advanced critical thinking to work processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to use advanced-level critical thinking skills in a professional context. This includes using methods of analysis, synthesis and evaluation.

This unit applies to individuals who evaluate processes, products and services that may be proposed or already existing. This unit applies to individuals who are typically responsible for developing work processes, products and services that may be proposed or already existing.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Unit Sector

Creativity and Innovation – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Understand critical thinking in a workplace context	1.1 Identify key characteristics of concepts in a critical thinking protocol or process 1.2 Explore situations in which critical thinking concepts may be applied in the workplace 1.3 Reflect on benefits of adopting a critical thinking mindset and

ELEMENT	PERFORMANCE CRITERIA
	risks associated with failing to do so
2. Apply a systematic approach to decision making	2.1 Analyse and understand key elements of workplace processes, products or services 2.2 Identify limitations in existing or proposed workplace processes, products or services by applying critical thinking protocols or processes 2.3 Source information from a variety of different and verified sources 2.4 Compare and contrast alternative critical thinking concepts in a workplace decision making process 2.5 Apply a decision making framework to reach a defensible conclusion in a workplace context in accordance with organisational policies and procedure 2.6 Articulate and justify decision making process
3. Develop critical thinking mindset	3.1 Conduct review of effectiveness of decision making, including critical self-reflection 3.2 Seek meaningful feedback from organisational management 3.3 Identify areas for self-development 3.4 Develop plan for future process evaluations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Reflects on own performance and seeks opportunities to improve own skills and knowledge
Reading	<ul style="list-style-type: none"> Interprets, evaluates and extracts relevant information from a range of texts for work requirements
Writing	<ul style="list-style-type: none"> Documents key research findings and ideas Develops clear workplace documents appropriate to audience and context
Oral Communication	<ul style="list-style-type: none"> Articulates ideas and requirements clearly and persuasively using techniques appropriate to audience and environment Participates in a verbal exchange of ideas and elicits the view and

	<p>opinions of others by listening and questioning</p> <ul style="list-style-type: none"> • Uses a range of persuasive responses and makes comparisons which show an understanding of topics and concepts
Numeracy	<ul style="list-style-type: none"> • Interprets and critically analyses numerical data to determine work process requirements
Navigate the world of work	<ul style="list-style-type: none"> • Recognises and considers the implications of legal and regulatory responsibilities on own work • Adheres to implicit and explicit organisational procedures and policies, seeking advice from others if necessary
Interact with others	<ul style="list-style-type: none"> • Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to achieve goals • Actively identifies the requirements of important communication exchanges, selecting appropriate channel, format, tone and content to suit purpose and audience • Reflects on personal values, behaviours and assumptions and considers how these might be perceived by others • Looks for ways of establishing connections and building genuine understanding with a diverse range of people
Get the work done	<ul style="list-style-type: none"> • Takes responsibility for systematically planning, sequencing and prioritising tasks according to agreed timelines • Uses systematic processes to gather and analyse information required to make decisions • Recognises opportunities to develop and apply new ideas and select ideas for implementation • Considers the key themes and ideas to be explored and identifies ways to response to and use diverse perspectives • Uses features and functions of digital tools and technologies to store and present information • Contributes to creating a climate where people feel comfortable to suggest, explore, adapt and adopt new ideas as a regular part of work life • Uses problem-solving skills to evaluate and challenge ideas and move towards solutions

Assessment Requirements for BSBCRT404 Apply advanced critical thinking to work processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- explain critical thinking concepts and approaches, the value of applying such approaches, and how they may apply to a workplace context
- use a range of critical thinking techniques to identify and address limitations in workplace processes, products or services
- ask questions of self and others to broaden own knowledge and understanding
- use various information sources to provide answers to own questions
- develop a proposal to articulate to a broad range of workplace stakeholders a solution to an identified issue
- incorporate feedback and self-reflection to critically assess performance

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key features and characteristics of critical thinking concepts and approaches
- key features and limitations of workplace procedures
- key legislative requirements relating to workplace procedures
- key sources of reliable information relevant to workplace procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to:

- office equipment, technology, software and consumables required to implement internal and maintain internal control procedures
- corporate governance documentation required for role
- organisational operational policies and procedures required for role.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBCRT411 Apply critical thinking to work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop solutions for two different workplace limitations using critical thinking concepts.

In the course of the above the candidate must:

- use a range of critical thinking techniques to identify and address limitations in workplace practices
- ask questions to broaden understanding of task requirements
- use various information sources to provide answers to proposed questions
- develop a proposal to articulate to a broad range of workplace stakeholders a solution to an identified issue
- incorporate feedback and self-reflection to critically assess performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- critical thinking concepts and the value of applying such approaches in a work environment
- key characteristics of critical thinking processes
- sources of reliable information relevant to workplace practices
- key components of decision-making frameworks
- features and limitations of workplace practices
- legislative requirements relating to workplace practices
- components of self-evaluation and development.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- technology, software and resources required to implement and maintain internal control procedures
- corporate governance documentation required for role
- organisational operational policies and procedures required for role.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBCRT512 Originate and develop concepts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.

The unit applies to individuals who develop concepts for any business or community activity or process. This may include marketing and advertising campaigns, staff development programs, information technology and communication systems, radio and television programs and entertainment events. These individuals operate with a high degree of autonomy and also collaborate with others to generate ideas and refine concepts for implementation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope issue	1.1 Select issue to be explored in consultation with relevant personnel 1.2 Assess possible solutions to business issue and identify restrictions according to job role and organisational policy 1.3 Research information on possible solutions to identified issue 1.4 Assess factors affecting viability of possible solutions
2. Generate and present solutions	2.1 Brainstorm ideas for addressing issue 2.2 Evaluate ideas against identified factors affecting viability 2.3 Compare ideas with best practice examples of similar products

ELEMENT	PERFORMANCE CRITERIA
	or programs or processes or services 2.4 Select and present a solution in relevant format to stakeholders
3. Refine solutions for implementation	3.1 Seek feedback on ideas from stakeholders 3.2 Respond to questions with substantiated answers 3.3 Document feedback according to organisational requirements 3.4 Refine and finalise solution according to task requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Reflects and evaluates methods used to develop concepts and seeks ways to improve Actively elicits views and opinions of others to develop and refine ideas
Oral communication	<ul style="list-style-type: none"> Expresses thoughtful and challenging opinions using engaging language and non-verbal features Elicits views and information from others using a range of active listening and questioning techniques
Reading	<ul style="list-style-type: none"> Interprets and evaluates a range of complex information
Writing	<ul style="list-style-type: none"> Documents findings and ideas using language and structure to suit the purpose Prepares proposals and plans for relevant stakeholders incorporating appropriate vocabulary and grammatical structures
Teamwork	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information
Planning and organising	<ul style="list-style-type: none"> Uses systematic, analytical processes in complex, non-routine situations to gather and evaluate possible concepts, and select the most appropriate concept for development Monitors outcomes, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations

Skill	Description
Technology	<ul style="list-style-type: none">• Uses main features and functions of digital tools to complete work tasks and access information

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop, refine and implement a solution to address a workplace issue on at least one occasion.

In the course of the above, the candidate must:

- consult with stakeholders to identify workplace issue to be addressed within scope of job role and organisational policy
- generate potential ideas that provide innovative solutions to identified issues
- evaluate viability of ideas
- present ideas and information to others and reflect on responses
- refine chosen solution in response to feedback.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques to generate innovative solutions to issues
- existing products, programs, processes or services to address selected issue
- factors affecting viability of possible solutions including:
 - commercial potential
 - suitability for the target audience or purpose
 - feasibility of implementing solution
- issues and requirements to commercialise the concept
- practical and operational issues to be considered in specific work or community context
- practical and operational issues that determine whether a concept can be implemented
- techniques for generating creative ideas and solutions, and for translating them into workable concepts.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- background information required to evaluate the operational factors that will affect the implementation of concepts
- opportunities to collaborate with others throughout the concept development process.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCRT611 Apply critical thinking for complex problem solving

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to apply critical thinking in order to develop solutions to complex issues arising in the workplace.

The unit applies to individuals who are required to think critically in order to develop structured and innovative solutions to overcome complex organisational issues. Individuals in these roles operate with a high degree of autonomy and may undertake non-standard work tasks involving escalated risks. These individuals are often responsible for a team or work area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope problem solving process	1.1 Identify complex issue for resolution within scope of job role and in consultation with relevant stakeholders 1.2 Document task objectives and risks involved in pursuing identified issue 1.3 Research legislative frameworks and organisational policy or procedures applicable to identified issue 1.4 Calculate required resources and present to relevant stakeholders
2. Lead solution	2.1 Facilitate ideation session with relevant stakeholders

ELEMENT	PERFORMANCE CRITERIA
development process	2.2 Evaluate formulated solutions for advantages and limitations using critical thinking techniques 2.3 Apply decision-making processes to select most viable solution 2.4 Prepare a brief on proposed solution according to organisational policy and present to key stakeholders
3. Refine solution for implementation	3.1 Develop a feedback register to systematically record feedback according to organisational requirements 3.2 Refine proposal based on analysis of feedback 3.3 Seek necessary approvals to implement solution

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Evaluates own performance to identify opportunities for improvement Makes a range of critical and non-critical decision in relatively complex situations, taking a range of constraints into account
Numeracy	<ul style="list-style-type: none"> Interprets, analyses and presents numeric and financial information to identify patterns and trends
Oral communication	<ul style="list-style-type: none"> Identifies and articulates ideas and requirements clearly and persuasively using techniques appropriate to audience and environment Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning
Reading	<ul style="list-style-type: none"> Gathers, interprets and analyses textual information when developing the proposal and monitoring operational performance
Writing	<ul style="list-style-type: none"> Communicates relationships between ideas and information, matching style of writing to purpose and audience
Planning and organising	<ul style="list-style-type: none"> Systematically gathers and analyses all relevant information and evaluates options in order to monitor performance and identify opportunities for improvement
Technology	<ul style="list-style-type: none"> Uses main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBCRT611 Apply critical thinking for complex problem solving

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- lead the process for addressing at least one complex workplace issue up to the point of implementation.

In the course of the above, the candidate must:

- identify task objectives and risks involved with pursuing identified problem
- research legislative frameworks and applicable frameworks for identified problem
- calculate resources required for solution development process
- facilitate others in idea generation for possible solutions
- present proposed solution to key stakeholders
- use feedback to revise solution to achieve stakeholder approval
- seek necessary approvals for the implementation of the solution.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative frameworks and organisational policy or procedures applicable to identified workplace problem
- critical and creative thinking techniques applicable to performance evidence
- advantages and risks in the development of solutions for identified workplace problems
- decision-making processes including barriers to effective decision-making
- sources of relevant information to identified issue, including desk research and stakeholder consultations
- organisational requirements for development and presentation of a brief and feedback register
- approval process for workplace solution.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- organisational policies and procedures
- opportunities to collaborate with others throughout the concept development process
- resources required to undertake research, prepare a brief and develop a feedback register.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBESB301 Investigate business opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify a business opportunity and its key components. This requires undertaking research to determine the viability of the opportunity, with reference to the legislative frameworks affecting the business.

The unit applies to those establishing or operating a business providing self-employment, as well as those establishing a new venture as part of a larger organisation. The business opportunities may relate to products and/or services offered by the business.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Entrepreneurship and Small Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify potential opportunities for business	1.1 Source and analyse market information for potential opportunities 1.2 Analyse information and list details of business ideas and opportunities 1.3 Identify and describe products and/or services that match business ideas 1.4 Identify and analyse available business, financial, digital technology and technical factors related to the potential opportunities 1.5 Identify customers for the products and/or services

ELEMENT	PERFORMANCE CRITERIA
2. Investigate market needs and factors affecting market	<p>2.1 Collect, investigate and analyse business and market information, trends and developments from primary and secondary sources to identify market needs related to business opportunities</p> <p>2.2 Identify ethical and cultural requirements of the market</p> <p>2.3 Identify projected changes in population, economic activity and other macro external factors that may impact business opportunities</p> <p>2.4 Review identified needs and factors and identify their potential impact on business opportunities</p> <p>2.5 Investigate marketing and promotion activities and strategies for identified products and/or services</p>
3. Finalise investigation into business opportunities	<p>3.1 Review personal factors against business opportunities and identify their impact on opportunities</p> <p>3.2 Examine options to address and minimise negative impact and strengthen positive impact of personal factors</p> <p>3.3 Document outcomes of investigation into business opportunity</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses and evaluates information and integrates facts and ideas
Writing	<ul style="list-style-type: none"> Uses information and industry-related terminology to develop required documentation
Numeracy	<ul style="list-style-type: none"> Extracts, evaluates and compares numerical information to determine resources and identify trends
Technology	<ul style="list-style-type: none"> Uses a range of digitally based technology and applications to access and filter data, and then extract, organise and integrate relevant information

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBSMB201 Identify suitability for micro business

- BSBSMB301 Investigate micro business opportunities
- BSBSMB306 Plan a home based business.

Assessment Requirements for BSBESB301 Investigate business opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify and investigate at least one business opportunity and assess the probability of success.

In the course of the above, the candidate must:

- research and analyse information from a range of sources for its potential impact on the market, products and/or services, and customers
- match personal factors to business opportunities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sources of business and market information on business ideas and potential business opportunities, including:
 - potential clients and past leads
 - competitor activities, products and services
 - industry trends and insights
 - legislative and regulatory requirements relevant to opportunities being investigated
- market information, trends and developments, including:
 - new and emerging markets and their features
 - expected market growth or decline and associated risk factors
 - economic activity, including projected or potential movements in prices
 - projected changes in availability of resources
- personal factors involved in choosing preferred opportunity include:
 - own skills and aspirations
 - own commitments, expectations and capabilities

- criteria for determining the viability of a business opportunity, including:
 - market size, potential, needs and trends
 - financial considerations
 - benefits and challenges of digital technologies relevant to opportunities
 - resource availability
- business research methods and data collection tools and software
- impact of ethical and cultural requirements of market on opportunities and products.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- internet access for research
- source of information on potential business opportunities, including customer or supplier information
- data collection tools and software
- legislative and regulatory information relating to business opportunities
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBESB305 Address compliance requirements for new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to source advice and specialist services to assist in addressing business compliance relating to regulatory, taxation and insurance requirements.

The unit applies to those establishing a business providing self-employment, as well as those establishing a new venture as part of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Entrepreneurship and Small Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research compliance requirements of new business venture	1.1 Identify regulatory, taxation and insurance requirements relevant to new business venture 1.2 Access information that assists in interpreting and explaining identified compliance requirements 1.3 Research relationships between legislation, regulations, codes of practice, associated standards and accessed information to determine compliance requirements of the business venture
2. Seek specialist advice on compliance and risk minimisation	2.1 Identify sources of specialist advice and services relevant to identified compliance requirements and business venture profile 2.2 Select and access identified specialist advice and services

ELEMENT	PERFORMANCE CRITERIA
	<p>according to business needs, available resources, and workplace procedures</p> <p>2.3 Clarify and confirm compliance requirements and their appropriateness for business, and risk minimisation needs with advisors</p> <p>2.4 Review and document advice and procedures</p>
3. Take action to support business compliance	<p>3.1 Arrange insurance cover for the business according to business needs, available resources, and workplace procedures</p> <p>3.2 Implement compliance procedures according to specialist advice received</p> <p>3.3 Seek feedback on implemented compliance procedures from required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets legislative and regulatory information relevant to business requirements
Oral communication	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding
Numeracy	<ul style="list-style-type: none"> Analyses numerical information to calculate specific business requirements Uses formal and informal mathematical language to discuss compliance
Self-management	<ul style="list-style-type: none"> Takes some personal responsibility for ensuring business compliance with legal and regulatory requirements
Planning and organising	<ul style="list-style-type: none"> Plans routine tasks with goals and outcomes, taking some responsibility for decisions regarding sequencing and timing Determines priorities and sequences steps involved in clearly defined tasks, and identifies and assembles resources required

Unit Mapping Information

Supersedes and is equivalent to BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business.

Assessment Requirements for BSBESB305 Address compliance requirements for new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement procedures to address at least two different compliance requirements for a business or new business venture.

In the course of the above, the candidate must:

- identify, select and access sources of advice on compliance and risk minimisation procedures
- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- regulatory, taxation and insurance compliance information, and specialist advice and services in relation to operation of new business ventures, including:
 - industry codes of practice and standards
 - registration and licensing
 - work health and safety (WHS) requirements and responsibilities
 - required insurances
- workplace procedures that support compliance of new business venture, including for:
 - selecting and accessing specialist advice and services
 - arranging business insurance cover
- key components of compliance procedures:
 - following taxation and industrial relations principles
 - updating and maintaining legal documents
 - investigating areas of non-compliance

- monitoring provision of products and/or services
- taking corrective action where necessary.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business technology, including internet access for research
- legislation, regulations, codes of practice and standards relating to compliance requirements described in performance evidence
- workplace procedures and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBESB402 Establish legal and risk management requirements of new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish legal and risk management requirements for at least one business or new business venture, and implement procedures for meeting them
- create at least one contract with a supplier of goods or services to business or new business venture
- identify, assess and treat at least three different risks specific to business or new business venture and prioritise risks with highest probability of occurrence and greatest negative impact.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory requirements relating to operation of new business ventures, including:
 - consumer legislation
 - environmental requirements and responsibilities
 - registration and licensing
 - industry codes of practice and standards
 - work health and safety (WHS) requirements and responsibilities
 - insurance products and requirements, including adequate coverage
- workplace procedures for:
 - negotiating, creating and terminating contractual arrangements, including seeking legal advice
 - investigating and securing procurement rights relating to products and/or services
 - identifying options for leasing or owning business premises
- legal rights and obligations of alternative ownership structures

- key features of workplace record-keeping processes and procedures that:
 - meet minimum legal and taxation requirements
 - maintain records in a secure and accessible manner
- key components of compliance procedures:
 - following taxation and industrial relations principles and requirements
 - updating and maintaining legal documents
 - investigating areas of non-compliance
 - monitoring provision of products and/or services
 - taking corrective action where necessary
- key steps in risk management process, including procedures for developing and implementing business risk treatment plan.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business technology, including internet access
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBESB406 Establish operational strategies and procedures for new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to develop and implement operational strategies and procedures for new businesses.

The unit applies to those establishing a business providing self-employment, as well as those establishing a new venture as part of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Entrepreneurship and Small Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review operational strategies and procedures for business or new business venture	1.1 Develop a detailed operational plan that sets out clear action points to fulfil on business goals and objectives 1.2 Identify work health and safety (WHS) and environmental issues and implement strategies to minimise risk factors 1.3 Review and evaluate, where appropriate, a quality assurance process for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop operational key performance indicators (KPIs) that align to business plan 1.5 Align KPIs to business strategies, including utilisation of existing or new technologies, where practicable, to optimise

ELEMENT	PERFORMANCE CRITERIA
	business performance
2. Implement developed operational strategies and procedures	<p>2.1 Implement systems to evaluate business performance and customer satisfaction, including by setting KPIs or targets</p> <p>2.2 Implement systems to control stock, expenditure or cost, wastage or shrinkage and risks to health and safety according to business plan, incorporating new digital technologies where applicable</p> <p>2.3 Identify and manage staffing requirements, considering a range of permanent and flexible arrangements, and adhering to budgetary constraints</p> <p>2.4 Provide products and/or services according to established legal, ethical cultural and technical standards</p> <p>2.5 Provide products and/or services according to time, cost and quality specifications, and customer requirements, incorporating new digital technologies where applicable</p> <p>2.6 Apply quality procedures to address product and/or service and customer requirements</p>
3. Evaluate business performance	<p>3.1 Use digital technologies to regularly evaluate and review achievement of operational targets to ensure optimum business performance, according to business goals and objectives</p> <p>3.2 Review and document systems and structures to support business performance</p> <p>3.3 Investigate and analyse operating problems to establish causes and implement changes as required, as part of business quality system</p> <p>3.4 Update operational policies and procedures to incorporate corrective action</p>
4. Review business operations	<p>4.1 Review and adjust business operations to increase business success, according to business goals and objectives</p> <p>4.2 Research and implement new and emerging digital technologies into business operations according to business goals and objectives and workplace procedures</p> <p>4.3 Research new business opportunities and adjust business goals and objectives as new opportunities arise</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate information clearly and effectively
Numeracy	<ul style="list-style-type: none"> Interprets numerical information to manage performance information and regulate cash flow
Self-management	<ul style="list-style-type: none"> Evaluates adherence to workplace policies and procedures and considers own role for its contribution to broader goals of work environment Identifies implications of legal and regulatory responsibilities for own work, with specific reference to safety Identifies concepts, principles and features of approaches in use in other contexts and applies them to own situation
Planning and organising	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks that may contribute to longer-term operational and strategic goals

Unit Mapping Information

Supersedes and is equivalent to BSBSMB420 Evaluate and develop small business operations.

Supersedes but is not equivalent to:

- BSBFRA401 Manage compliance with franchisee obligations and legislative requirements
- BSBFRA402 Establish a franchise
- BSBFRA403 Manage relationship with franchisor
- BSBFRA404 Manage a multiple-site franchise
- BSBFRA501 Establish a franchise operation
- BSBFRA502 Manage a franchise operation
- BSBFRA503 Manage establishment of new sites or regions
- BSBFRA504 Manage relationships with franchisees
- BSBFRA505 Manage closure of a franchise
- BSBIPR501 Manage intellectual property to protect and grow business
- BSBSMB423 Create a digital technology plan for small business.

Assessment Requirements for BSBESB406 Establish operational strategies and procedures for new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop strategies and procedures to manage operations for at least one new business or new business venture, including:
 - an operational plan
 - risk management procedures
 - a quality assurance process
 - performance measures.

In the course of the above, the candidate must:

- use existing, new and emerging digital technologies to optimise business performance
- research and record business improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislation, regulations, industry codes of practice and standards specific to small business described in performance evidence
- key features of methods for implementing operation and revenue control systems, including for controlling stock and expenditure
- methods for evaluating performance and implementing improvements, including:
 - identifying and meeting staffing requirements
 - analysing and correcting business problems
 - reviewing and adjusting the business plan
- work health and safety (WHS) responsibilities and procedures for managing hazards and assessing risks associated with business described in performance evidence
- principles of risk management, including risk assessment

- quality assurance system principles and methods
- role of digital technologies and innovation in modern business
- key features of systems to manage staff, stock, expenditure, services and customer service
- key features of required technical or specialist skills relevant to business operations
- workplace procedures for implementing new and emerging digital technologies into business operations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business equipment and resources, including business technology
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to receive, process, and store workplace information and maintain information systems. It also includes the maintenance of records management systems.

The unit applies to individuals who perform a variety of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information	1.1 Confirm task requirements 1.2 Collect physical and digital information items 1.3 Allocate time and date of receipt to relevant information items 1.4 Apply organisational policies and procedures relating to security and confidentiality in handling information
2. Process workplace information	2.1 Enter metadata applying to information items into relevant system according to organisational policies and procedures 2.2 Collate and distribute information according to task requirements

ELEMENT	PERFORMANCE CRITERIA
3. Manage information systems	<p>3.1 Maintain information and relevant classification system according to organisational policies and procedures</p> <p>3.2 Identify and dispose of inactive unpublished information items or deaccession published information items according to organisational policies and procedures</p> <p>3.3 Create new files of unpublished information materials according to organisational policies and procedures</p> <p>3.4 Update registration, accessioning, classification and index systems according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Recognises and interprets textual information to complete tasks according to organisational policies and procedures
Writing	<ul style="list-style-type: none">Records simple and routine content using an established format to organise information
Oral Communication	<ul style="list-style-type: none">Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	<ul style="list-style-type: none">Comprehends basic mathematical measurements relating to times and number sequences
Self-management	<ul style="list-style-type: none">Follows clearly defined instructions and monitors own progress to achieve timelines
Technology	<ul style="list-style-type: none">Uses digital technologies regarding data entry and retrieval

Unit Mapping Information

Supersedes and is equivalent to BSBINM201 Process and maintain workplace information.

BSBITU211 Produce digital text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to digitally produce word documents in a workplace context.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of word processing software/applications in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce documents	1.1 Adjust workspace, furniture and equipment to suit user ergonomic environments 1.2 Ensure workspace meets organisational work health and safety requirements for digital device operation, taking into account the type of device to be used 1.3 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required 1.4 Identify organisational and task requirements for document

ELEMENT	PERFORMANCE CRITERIA
	layout and design 1.5 Select most appropriate word processing application to produce document, in accordance with available resources and organisational policies
2. Produce documents digitally	2.1 Format document using appropriate application functions to adjust layout to meet information requirements, in accordance with organisational style and presentation requirements 2.2 Use application features to identify and manipulate display options and controls 2.3 Use relevant help functions to overcome simple issues relating to document presentation and production
3. Finalise and present documents	3.1 Review and edit final document, and prepare for delivery in accordance with organisational and task requirements 3.2 Deliver document to relevant audience within designated timelines and in accordance with organisational requirements 3.3 Name and store document appropriately in accordance with organisational requirements and exit application without information loss

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Recognises textual information within organisational and task requirements to determine work requirements
Writing	<ul style="list-style-type: none">Records numerical and textual information in accordance with requirements of task
Oral Communication	<ul style="list-style-type: none">Participates in a variety of spoken exchanges with relevant personnel in an effort to clarify document purpose, audience and presentation requirements
Navigate the world of work	<ul style="list-style-type: none">Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	<ul style="list-style-type: none">Seeks guidance from more experienced work colleagues
Get the work done	<ul style="list-style-type: none">Understands functions and features of specific digital applications

	and uses these to perform work tasks
--	--------------------------------------

BSBLDR414 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

BSBOPS404 Implement customer service strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to advise, carry out and evaluate customer service strategies.

The unit applies to individuals who have well developed skills and a broad knowledge of customer service strategies for addressing customer needs and problems. Individuals may provide guidance or delegate work related tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Advise on customer service needs	1.1 Identify organisational customer service objectives and customer needs 1.2 Assess and clarify customer requirements 1.3 Identify and diagnose problems with service delivery 1.4 Develop options to improve customer service delivery according to organisational requirements 1.5 Provide recommendations to promote improvement of customer service delivery
2. Support implementation of customer service	2.1 Consult with relevant stakeholders to develop customer service strategies 2.2 Assess customer service strategies and opportunities against

ELEMENT	PERFORMANCE CRITERIA
strategies	<p>customer service objectives</p> <p>2.3 Identify and allocate available budget resources to fulfil customer service objectives</p> <p>2.4 Action procedures to resolve customer difficulties and complaints according to organisational requirements</p>
3. Evaluate and report on customer service	<p>3.1 Review stakeholder satisfaction with service delivery according to organisational requirements</p> <p>3.2 Identify and report changes necessary to meet customer service objectives</p> <p>3.3 Prepare conclusions and recommendations on future directions of client service strategies</p> <p>3.4 Monitor systems, records and reporting procedures for changes to customer satisfaction</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Reviews textual information and comprehends details that relate to the interests or requirements of the client and organisation
Writing	<ul style="list-style-type: none"> Creates a range of formal texts using structure, grammar and clear and specialised language to describe customer needs, maintain information and support a particular position
Oral communication	<ul style="list-style-type: none"> Uses pace, intonation, intelligible pronunciation and listening and questioning techniques to interact effectively with others
Numeracy	<ul style="list-style-type: none"> Recognises and interprets numerical information and performs calculations on familiar mathematical information
Enterprise and Initiative	<ul style="list-style-type: none"> Recognises and applies organisational protocols and meets expectations associated with own work
Teamwork	<ul style="list-style-type: none"> Uses a range of strategies to establish a sense of connection and build rapport with customers Collaborates with others contributing knowledge and skills to achieve joint outcomes
Planning and organising	<ul style="list-style-type: none"> Applies formal and logical processes when planning and implementing tasks Applies standard procedures when responding to familiar problems

Skill	Description
	within own work context
Technology	<ul style="list-style-type: none">• Uses digital technologies to access, organise, present and store information relevant to own role

Unit Mapping Information

Supersedes and is equivalent to BSBCUS401 Coordinate implementation of customer service strategies.

Supersedes but is not equivalent to:

- BSBCUS402 Address customer needs
- BSBCUS403 Implement customer service standards
- BSBSLS408 Present, secure and support sales solutions.

Assessment Requirements for BSBOPS404 Implement customer service strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least two strategies to improve customer service delivery.

In the course of the above, the candidate must:

- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery, including:
 - budgeting
 - promotion to staff
 - documentation and follow up.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- customer communication techniques
- principles of customer service
- sources of verified client information
- techniques for identifying customer needs and reviewing customer satisfaction
- organisational business structure, products and services related to customer service
- techniques for drawing insights from verifiable evidence to develop recommendations and conclusions
- product and service standards and best practice models.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational policies and procedures for customer service
- examples of customer complaints and feedback
- client satisfaction data.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF201 Support personal wellbeing in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to advocate for and feel empowered about personal wellbeing in the workplace. It involves developing and applying basic knowledge of factors that may influence wellbeing, both positively and negatively.

The unit applies to those in a range of industry and workplace contexts, who work under direct supervision. It may also apply to learners who are preparing to enter the workforce.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Recognise factors that impact personal wellbeing	1.1 Identify personal factors that may impact on wellbeing 1.2 Identify workplace factors that may impact on wellbeing 1.3 Recognise relationship between personal wellbeing and identified workplace factors relevant to own role
2. Plan communication with supervisor	2.1 Select appropriate communication approach 2.2 Identify appropriate method for communication about wellbeing 2.3 Plan relevant content for communication including strategy for dealing with a negative response
3. Communicate with supervisor	3.1 Arrange communication with supervisor 3.2 Conduct communication according to developed plan

ELEMENT	PERFORMANCE CRITERIA
	3.3 Review effectiveness of communication
4. Investigate available wellbeing resources	4.1 Identify and review wellbeing resources 4.2 Select appropriate wellbeing resources applicable to own workplace 4.3 Document method for accessing selected resources

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets textual information to determine job role and requirements
Oral communication	<ul style="list-style-type: none"> Participates in discussions using clear language and features appropriate to audience Uses listening and questioning techniques to request assistance and confirm understanding
Enterprise and initiative	<ul style="list-style-type: none"> Identifies own responsibilities and performs role requirements
Teamwork	<ul style="list-style-type: none"> Establishes relationship with relevant personnel
Planning and organising	<ul style="list-style-type: none"> Plans and organises tasks to achieve outcome within timeframes Uses analytical skills to decide on effective techniques to support own wellbeing
Problem Solving	<ul style="list-style-type: none"> Uses problem solving skills to address a range of issues, seeking advice of others, where necessary

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBWOR201 Manage personal stress in the workplace.

Links

Assessment Requirements for BSBPEF201 Support personal wellbeing in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a plan for communication with supervisor
- identify and access one formal and one informal wellbeing resource.

In the course of the above, the candidate must:

- develop a plan to communicate with supervisor, including:
 - factors that may impact on own wellbeing, both positively and negatively
 - appropriate style of communication
 - appropriate method of communication
 - strategy to deal with negative response.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common personal and workplace factors that may impact on wellbeing
- advantages and disadvantages of different communication styles, including:
 - passive
 - assertive
 - aggressive
- methods for communicating with a supervisor
- key features of Employee Assistance Programs (EAPs)
- common workplace resources for addressing wellbeing.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF202 Plan and apply time management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement time management processes to organise and complete work tasks. It also addresses skills and knowledge to seek and review feedback for performance improvement regarding time management and use technology appropriate to the task.

The unit applies to individuals working under direct supervision. These individuals apply basic skills and knowledge in a broad range of work settings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise work schedule	1.1 Discuss and agree on work goals and plans with assistance from relevant personnel 1.2 Identify relationship between own work goals and plans, and organisational goals and plans 1.3 Research time management techniques and strategies 1.4 Plan and prioritise work tasks within allocated timeframes
2. Complete work tasks	2.1 Perform tasks according to designated timelines and instructions 2.2 Seek assistance from colleagues when difficulties arise in achieving allocated tasks

ELEMENT	PERFORMANCE CRITERIA
	2.3 Identify factors affecting work plan 2.4 Communicate progress on work plan to relevant personnel according to organisational policies and procedures
3. Review work performance	3.1 Seek feedback on time management from relevant personnel 3.2 Record changes to time management approach according to task instructions 3.3 Identify and plan opportunities for improvement in discussion with colleagues

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets textual information to determine and adhere to organisational and task requirements
Writing	<ul style="list-style-type: none"> Completes required documents using organisational formats
Oral communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to seek information and confirm understanding Participates in verbal interactions using language and features suitable to audience and context
Numeracy	<ul style="list-style-type: none"> Interprets numerical information related to timeframes
Enterprise and initiative	<ul style="list-style-type: none"> Complies with organisational policies, procedures and standards
Planning and organising	<ul style="list-style-type: none"> Prioritises work and completes activities within designated timeframes Identifies and solves routine problems
Technology	<ul style="list-style-type: none"> Selects and uses appropriate digital tools to complete tasks

Unit Mapping Information

Supersedes and is equivalent to BSBWOR202 Organise and complete daily work activities.

Assessment Requirements for BSBPEF202 Plan and apply time management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least one time management plan with support of relevant personnel.

In the course of the above, the candidate must:

- complete each work task within specified timeframe, seeking opportunities to use digital tools where applicable
- seek and use feedback from others to monitor and improve work performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- time management techniques and strategies
- features of a time management plan
- organisational standards, policies and procedures relevant to own work role
- relationship between own work goals and plans and organisation's goals and plans
- factors affecting work progress and performance improvement techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan and prioritise own work tasks. It also addresses the skills and knowledge to monitor and obtain feedback on personal work performance.

The unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan personal work schedule	1.1 Identify task requirements 1.2 Identify own accountabilities in line with task requirements 1.3 Assess barriers for performance of personal accountabilities 1.4 Develop a personal work schedule
2. Implement personal work schedule	2.1 Communicate personal work schedule to relevant personnel 2.2 Monitor own performance according to personal work schedule 2.3 Document variations between expected and actual work performance according to task requirements and communicate to relevant personnel

ELEMENT	PERFORMANCE CRITERIA
3. Review personal work priorities	3.1 Seek and evaluate feedback from relevant stakeholders on own work performance 3.2 Analyse variations between expected and actual work performance 3.3 Update personal work schedule according to internal and external feedback and changes in circumstances

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Develops strategies to reflect on own performance and obtain feedback
Reading	<ul style="list-style-type: none"> Identifies and applies textual information from relevant sources to understand organisation's policies and practices
Writing	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Numeracy	<ul style="list-style-type: none"> Analyses numerical information related work accountabilities
Enterprise and initiative	<ul style="list-style-type: none"> Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Planning and organising	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Unit Mapping Information

Supersedes and is equivalent to BSBWOR404 Develop work priorities.

Supersedes but is not equivalent to:

- BSBSMB408 Manage personal, family, cultural and business obligations
- BSBWOR424 Develop a time management plan.

Assessment Requirements for BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop, implement and review one personal work schedule.

In the course of the above, the candidate must:

- identify personal responsibilities and barriers to their fulfilment according to task requirements
- prepare a personal work schedule
- communicate work schedule to relevant personnel
- monitor personal work performance to identify variations between expected and actual work performance
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from internal and external stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- content of work plans including:
 - resource requirements
 - stakeholder needs
 - workgroup targets
- business technology applications to schedule tasks and plan work
- methods of personal work performance review including:
 - self-assessment
 - feedback from others
- techniques to prepare personal plans and establish priorities
- methods to elicit, analyse and interpret feedback.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG430 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to undertake a minor project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

The unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish project parameters	1.1 Identify project scope 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to project and project parameters 1.4 Identify responsibilities of relevant stakeholders and reporting requirements 1.5 Clarify relationship of project to other projects and to the objectives of the organisation 1.6 Identify availability and access of resources for undertaking the project

ELEMENT	PERFORMANCE CRITERIA
2. Develop project plan	2.1 Identify risks and develop a risk management plan for project, including Work Health and Safety (WHS) 2.2 Develop project budget and timeframe and seek approval from relevant stakeholders 2.3 Consult team members and apply their views in planning the project 2.4 Identify and access appropriate project management tools 2.5 Develop project plan according to project parameters and deliverables 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Communicate to project team members their responsibilities and project requirements 3.2 Establish and maintain required recordkeeping systems throughout the project 3.3 Implement and monitor plans for managing the project 3.4 Undertake risk management as required
4. Finalise and review project	4.1 Complete financial recordkeeping associated with project and confirm according to agreed budget 4.2 Complete project documentation and obtain sign-offs for concluding project 4.3 Review project outcomes and processes against the project scope and plan 4.4 Document feedback and suggested improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	<ul style="list-style-type: none"> Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text Establishes and maintains records according to organisational requirements
Numeracy	<ul style="list-style-type: none"> Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial

SKILL	DESCRIPTION
	information
Oral communication	<ul style="list-style-type: none"> Participates in verbal discussions using clear language and appropriate features to present or seek information Using listening and questioning skills to seek information and confirm understanding
Self-management	<ul style="list-style-type: none"> Identifies and responds to organisational and legislative/regulatory requirements
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations Uses collaborative techniques to engage stakeholders in consultations and negotiations
Planning and organising	<ul style="list-style-type: none"> Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands Systematically gathers and analyses all relevant information and evaluates options to make informed decisions Evaluates outcomes of decisions to identify opportunities for improvement
Technology	<ul style="list-style-type: none"> Uses digital technologies and applications to access, organise and share information

Unit Mapping Information

Supersedes and is equivalent to BSBPMG522 Undertake project work.

Supersedes but is not equivalent to BSBADM407 Administer projects.

Assessment Requirements for BSBPMG430 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- undertake project work on a minor project or a section of a larger project.

In the course of the above, the candidate must:

- confirm the quality of project outcomes according to expectations of the organisation
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project management tools
- types of documents and other sources of information commonly used in defining the parameters of a project
- mission, goals, objectives and operations of the organisation
- relevant legislation and regulations, including work health and safety (WHS) requirements, for project planning
- project management processes according to policies and procedures of the organisation and including:
 - lines of authority and approvals
 - quality assurance
 - human resources
 - budgets and finance
 - risk management
 - recordkeeping

- reporting.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG530 Manage project scope

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to determine and manage project scope. It involves obtaining project authorisation, developing a scope management plan, and managing the application of project scope controls.

The unit applies to individuals responsible for managing and leading a project in an organisation, business or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Conduct project authorisation activities	1.1 Develop and confirm procedures for project authorisation with an appropriate authority 1.2 Obtain authorisation to expend resources 1.3 Confirm project delegations and authorities in project governance arrangements
2. Define project scope	2.1 Identify and negotiate project boundaries with relevant stakeholders 2.2 Establish measurable project benefits, outcomes and outputs 2.3 Establish a shared understanding of desired project outcomes with relevant stakeholders

ELEMENT	PERFORMANCE CRITERIA
	2.4 Document scope management plan
3. Manage project scope control process	3.1 Implement agreed scope management procedures and processes 3.2 Monitor impact of scope changes within established time, cost and quality constraints according to change control procedures 3.3 Identify and document scope management issues and recommend improvements for future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets and analyses information from a range of complex texts
Writing	<ul style="list-style-type: none"> Develops project documentation and procedures using formats and language appropriate to context
Oral Communication	<ul style="list-style-type: none"> Participates in discussions and negotiations using clear language and appropriate non-verbal features Uses active listening and questioning to elicit views and opinions of others
Numeracy	<ul style="list-style-type: none"> Interprets numerical information to determine project timelines and measure outcomes against project scope
Initiative and enterprise	<ul style="list-style-type: none"> Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of work environment
Teamwork	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with diverse stakeholders Collaborates with others to achieve joint outcomes, playing an active role in negotiating and facilitating agreement
Planning and organising	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation and manages relevant communications Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account Uses experience to reflect on ways variables impact outcomes and identify future improvements

Unit Mapping Information

Supersedes and is equivalent to BSBPMG511 Manage project scope.

Supersedes but is not equivalent to BSBPMG602 Direct the scope of a project program.

Assessment Requirements for BSBPMG530 Manage project scope

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project scope on at least two occasions.

In the course of the above, the candidate must:

- collaborate with stakeholders to produce a scope-management plan
- review and document scope-management implementation and recommend improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- components of a project scope-management plan
- factors likely to impact the project scope
- formal change-control processes
- methods for measuring work outcomes and progress against plans
- methods for segmenting and documenting a work breakdown structure
- problem areas likely to be encountered in scope management
- procedures for reporting scope change
- project life cycle and the significance of scope management
- project management tools used for managing scope
- roles and responsibilities of project manager in relation to project planning
- types of project initiation documentation.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation used to document and manage project scope
- examples of feedback from project stakeholders regarding management of project scope.
-

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG532 Manage project quality

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to manage quality within projects. It involves determining quality requirements, implementing quality control and assurance processes, and using review and evaluation to make quality improvements in current and future projects.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine quality requirements	1.1 Identify quality objectives and standards with input from relevant stakeholders 1.2 Develop quality metrics for the project and any product output in a quality management plan 1.3 Select quality management methods and tools for resolving quality issues 1.4 Consult with project team and stakeholders on quality requirements
2. Implement quality processes	2.1 Perform quality assurance audit of project processes for compliance with agreed plans

ELEMENT	PERFORMANCE CRITERIA
	2.2 Assess quality control of project and product output according to agreed quality specifications 2.3 Identify causes of variance to quality metrics and undertake remedial action 2.4 Maintain a quality management system for timely recording of quality audit data
3. Implement project quality improvements	3.1 Review processes and implement agreed changes continually throughout the project life cycle 3.2 Review project outcomes against performance requirements 3.3 Identify and document lessons learned and recommended improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies, analyses and assesses textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	<ul style="list-style-type: none"> Develops and documents quality requirements for project plan Records results of quality audits according to organisational requirements
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language and appropriate non-verbal features to provide and seek relevant information Uses active listening and questioning techniques to elicit views and opinions of others
Numeracy	<ul style="list-style-type: none"> Interprets information to determine measurable objectives Interprets numerical information to measure outcomes against objectives Uses analytical skills to review and evaluate process and decide on future improvements
Self-management	<ul style="list-style-type: none"> Takes responsibility for identifying and following policies, procedures and standards

Assessment Requirements for BSBPMG532 Manage project quality

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project quality on at least two occasions.

In the course of the above, the candidate must:

- document a quality-management plan
- implement quality control and assurance processes for a defined project using a range of tools and methodologies.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- quality management theory
- relevant project quality standards that apply in the organisation
- quality assurance and control techniques, key tools and methodologies
- roles and responsibilities of quality management personnel
- methods for managing continuous improvement.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project documentation including quality criteria, evidence of quality monitoring and improvement practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG536 Manage project risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to manage risks that may impact achievement of project objectives. It involves identifying, analysing, treating and monitoring project risks, and assessing risk management outcomes.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify project risks	1.1 Identify risk objectives and standards, with input from stakeholders 1.2 Identify project risk context to inform risk management processes 1.3 Identify project risks using valid and reliable risk identification methods
2. Analyse project risks	2.1 Identify risk analysis classification criteria and apply to agreed risk ranking system 2.2 Use risk analysis processes, within delegated authority, to analyse and qualify any risks, threats and opportunities 2.3 Identify risk priorities in agreement with project client and other

ELEMENT	PERFORMANCE CRITERIA
	stakeholders 2.4 Document risk analysis outcomes for inclusion in risk register and risk management plan
3. Establish risk treatments and controls	3.1 Identify and document existing risk controls 3.2 Analyse risk treatment options using agreed consultative methods 3.3 Record and implement agreed risk treatments 3.4 Update risk plans and allocate risk responsibilities to project team members
4. Monitor and control project risks	4.1 Establish risk review processes 4.2 Monitor risk environment and identify changed circumstances impacting project risks 4.3 Evaluate risk responses to changed environment 4.4 Implement agreed risk responses and modify plans
5. Assess risk management outcomes	5.1 Review project outcomes for effectiveness of risk-management processes and procedures 5.2 Develop recommended improvements for application in future projects 5.3 Identify and document risk management issues and recommended improvements for application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets and critically analyses complex texts from a range of sources and determines how content may be applied according to organisational requirements
Writing	<ul style="list-style-type: none"> Documents risk analysis and risk controls using required formats and structure Modifies and updates workplace documentation according to requirements
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language to provide and seek information Uses active listening and questioning techniques to confirm understanding

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none">Analyses numerical data to identify project risk levels and rank risks according to agreed system of classification
Self-management	<ul style="list-style-type: none">Identifies and adheres to organisational policies and standardsConsiders own role in terms of its contribution to broader goals of work environment
Teamwork	<ul style="list-style-type: none">Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share informationIdentifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience
Planning and organising	<ul style="list-style-type: none">Identifies and develops approaches to risk management and implements complex tasks to achieve outcomesAnalyses information to make decisions, involving others when appropriateUses formal and informal processes to monitor implementation of decisions and reflect on outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBPMG517 Manage project risk.

Assessment Requirements for BSBPMG536 Manage project risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project risk on at least two occasions.

In the course of the above, the candidate must:

- conduct effective risk management processes for a project of sufficient complexity
- apply risk management techniques, strategies and tools.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project risks in a range of risk categories
- key components of a risk management plan
- relevant project risk controls
- industry sector risk classifications and different risk contexts
- organisational and industry standard risk frameworks
- project risk-management processes and procedures
- characteristics, techniques and applications of quantitative and qualitative risk management techniques and approaches.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources
- feedback from project stakeholders about how risks were managed.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG537 Manage project procurement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to undertake procurement in projects.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine procurement requirements and processes	1.1 Identify project objectives, needs and budget 1.2 Identify procurement requirements 1.3 Establish agreed procurement management plan 1.4 Identify potential suppliers 1.5 Obtain information from potential suppliers capable of fulfilling procurement requirements 1.6 Determine selection processes and selection criteria, and communicate to suppliers 1.7 Obtain approvals from relevant stakeholders for procurement processes to be used
2. Conduct procurement activities	2.1 Communicate agreed proposals and specifications to potential suppliers and confirm understanding of project objectives

ELEMENT	PERFORMANCE CRITERIA
	2.2 Seek supplier responses and evaluate according to proposal requirements 2.3 Select preferred supplier according to legal requirements and agreed selection criteria 2.4 Negotiate with preferred supplier and agree on terms and conditions of supply
3. Monitor procurement	3.1 Implement procurement management plan and arrange regular meetings with supplier to track progress 3.2 Maintain procurements records and documentation according to organisational policies and procedures 3.3 Monitor completion of task against agreed terms and conditions 3.4 Review progress and manage agreed variations 3.5 Identify and report procurement management challenges and implement agreed remedial actions
4. Manage procurement finalisation procedures	4.1 Conduct finalisation activities and confirm deliverables meet contracted requirements 4.2 Review project outcomes using procurement records and information and determine effectiveness of procurement processes and procedures 4.3 Seek and respond to feedback from relevant stakeholders on management of project procurement 4.4 Document lessons learned and recommended improvements for future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets, evaluates and critiques ideas and information from a range of complex texts
Writing	<ul style="list-style-type: none"> Develops plans using vocabulary, structure and conventions appropriate to text Creates documents for internal and external use, using vocabulary and structure suitable for audience and context Drafts requests for approvals using organisational formats
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language to seek and provide information, or request approvals Uses active listening and questioning techniques to confirm

SKILL	DESCRIPTION
	understanding
Numeracy	<ul style="list-style-type: none">• Recognises cost parameters and interprets numerical information accordingly• Calculates changes to timelines resulting from changes to plan
Self-management	<ul style="list-style-type: none">• Identifies responsibilities and boundaries of own role
Teamwork	<ul style="list-style-type: none">• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information• Uses interpersonal skills to negotiate acceptable outcomes
Planning and organising	<ul style="list-style-type: none">• Plans and organises complex activities, monitors implementation and manages relevant communication• Resolves problems and makes decisions based on analysis of options against set criteria and targets

Unit Mapping Information

Supersedes and is equivalent to BSBPMG518 Manage project procurement.

Supersedes but is not equivalent to BSBPMG609 Direct procurement and contracting for a project program.

Assessment Requirements for BSBPMG537 Manage project procurement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project procurement on at least two occasions.

In the course of above, the candidate must:

- determine procurement requirements and produce a procurement management plan
- carry out procurement and contracting activities according to agreed processes
- monitor activities across a project's life cycle and resolve issues that could affect achievement of project objectives
- create and maintain procurement records and documentation according to requirements of project and organisation
- document a review of procurement management processes and procedures
- identify and act according to probity and project governance constraints.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project objectives, needs and budget
- procurement management plan
- vendor selection criteria
- legal obligations
- probity and project governance constraints that relate to project procurement in a project and industry context
- selection processes and selection criteria
- project life cycle
- conflict resolution and management.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to procurement and contracts.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
 - determine staffing requirements
 - coordinate skill-gap training where required
 - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSTR601 Manage innovation and continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to sustain and develop an environment in which continuous improvement, innovation and learning are promoted and rewarded.

The unit applies to individuals with managerial responsibilities who aim to build a better and more effective work environment. Continuous improvement and innovation have links with the model of the learning organisation and people working at this level play an important role in building the culture, values and attitudes of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking and Problem Solving – Business Strategy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish ways of working within team	<ul style="list-style-type: none">1.1 Identify relevant team members and communicate ways of working objectives, expectations and desired outcomes1.2 Identify and establish strategies to monitor and evaluate performance and sustainability of key systems and processes1.3 Consult and seek advice from stakeholders, to identify opportunities for improvement1.4 Communicate with and mentor team members on ways of working that contribute to continuous improvement1.5 Communicate with and coach team members how they can be innovative

ELEMENT	PERFORMANCE CRITERIA
2. Identify improvements	2.1 Analyse performance reports and variance from organisational plans within workplace 2.2 Identify and analyse changing trends and opportunities relevant to the workplace 2.3 Collect data and analyse areas for improvement in supply chains, and operational and service systems 2.4 Conduct a gap analysis of supply chains, and operational and service systems and identify improvement needs and opportunities 2.5 Communicate with and agree on team members identified improvement needs and opportunities 2.6 Identify learning opportunities for team members
3. Implement innovative processes	3.1 Confirm objectives, timeframes, measures and communication plans are in place to manage implementation 3.2 Address the impact of change and consequences for people and implement transition plans 3.3 Implement contingency plans in the event of non-performance 3.4 Follow up failure by investigation and analysis of causes and manage emerging challenges and opportunities 3.5 Confirm that learnings from activities are captured and managed using relevant knowledge management system
4. Develop workplace culture and tools for continuous improvement, innovation and learning	4.1 Evaluate continuous improvement systems and processes and innovation on a regular basis 4.2 Identify and communicate with stakeholders costs and benefits of innovations and improvements 4.3 Establish rewards for continuous improvement, innovation and learning 4.4 Seek and respond to feedback from relevant stakeholders' systems and processes for continuous improvement, innovation and learning

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Analyses, evaluates and integrates facts and ideas to construct meaning from a range of text types

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none"> Integrates information and ideas from a range of sources, utilising appropriate support materials Communicates complex relationships between ideas and information, matching style of writing to purpose and audience
Numeracy	<ul style="list-style-type: none"> Selects and interprets mathematical information to analyse performance Performs calculations required to establish timeframes, cost-benefits and measures for continuous improvement and innovation processes
Initiative and enterprise	<ul style="list-style-type: none"> Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how
Self-management	<ul style="list-style-type: none"> Plans and implements strategies to review and improve own performance
Teamwork	<ul style="list-style-type: none"> Recognises the importance of building rapport to establish positive and effective working relationships Collaborates with others to achieve joint outcomes, playing an active role in encouraging innovation and facilitating effective group interaction
Problem solving	<ul style="list-style-type: none"> Applies problem-solving processes to identify risks, evaluate options and determine solutions Uses lateral and analytical thinking to evaluate options against needs, resources and constraints before making decisions Actively identifies systems, devices and applications with potential to meet current and or future needs
Planning and organising	<ul style="list-style-type: none"> Plans, organises, implements or reviews organisational strategies, systems and processes
Initiative and enterprise	<ul style="list-style-type: none"> Recognises that the current way is only one way of doing something and explores possibilities that challenge current approaches Facilitates a climate in which creativity and innovation are accepted as an integral part of achieving outcomes

Assessment Requirements for BSBS*TR601 Manage innovation and continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage and promote innovation and continuous improvement for an organisation or work area on at least one occasion.

In the course of the above, the candidate must:

- identify opportunities for improvement
- consult with stakeholders
- promote the value of creativity, innovation and sustainability and recognising successes
- support testing and trialling of new ideas
- undertake risk management and cost-benefit analysis for options
- plan for and implement improvements using organisation's processes for approvals, project management and change management
- facilitate contributions to and communications about continuous improvement and innovation
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- cost-benefit analysis methods
- knowledge management systems
- continuous improvement systems and processes
- creativity and innovation theories and concepts
- organisational learning principles
- quality management and continuous improvement theories
- relevant risk management concepts

- key aspects of supply chains, and operational, product and service systems
- method for conducting gap analysis
- changing trends and opportunities in workplace.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS211 Participate in sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to measure, support and find opportunities to improve the sustainability of work practices.

The unit applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions. These individuals work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Measure sustainable work practices	1.1 Identify sustainable work practices in own work role 1.2 Measure current usage of resources in own work role 1.3 Record and file resource usage documents 1.4 Identify resource inefficiencies from gathered information
2. Support sustainable work practices	2.1 Identify and comply with workplace sustainability procedures 2.2 Identify workplace environmental hazards according to environmental regulations and standards 2.3 Report any breaches and potential breaches to organisational personnel
3. Seek opportunities to	3.1 Identify areas of improvement to work practices in own work

ELEMENT	PERFORMANCE CRITERIA
improve sustainable work practices	<p>area</p> <p>3.2 Consult with colleagues and management to assess potential to improve sustainability of identified work practices</p> <p>3.3 Make suggestions for improvements to workplace practices in own work area</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Calculates basic metric measurements to determine resource usage
Reading	<ul style="list-style-type: none"> Recognises and interprets textual information to establish job requirements
Writing	<ul style="list-style-type: none"> Completes documents using required formats
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with co-workers in range of work contexts Collaborates and cooperates with others to achieve joint outcomes
Initiative and enterprise	<ul style="list-style-type: none"> Implements actions according to requirements, taking some responsibility for sequencing and timing of tasks Analyses current practices to identify opportunities for improvement
Self-management	<ul style="list-style-type: none"> Understands and adheres to legal and regulatory responsibilities related to own work
Technology	<ul style="list-style-type: none"> Uses main features and functions of digital tools to complete work tasks and access information

Unit Mapping Information

Supersedes and is equivalent to BSBSUS201 Participate in environmentally sustainable work practices.

Assessment Requirements for BSBSUS211 Participate in sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- participate in at least three sustainable work practices.

In the course of the above, the candidate must:

- identify benefits of sustainable work practices and areas of improvement for sustainable practices in the workplace
- identify and apply sustainability legislation and organisational sustainability policies and procedures
- participate in and support discussions for improved resource efficiency processes
- identify, measure and document usage of resources
- collaborate with team members to develop suggestions for improving workplace sustainability practices.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- environmental and resource hazards and risks
- Australian and international standards for corporate social sustainability
- sustainability regulations and codes of practice applicable to own role
- organisational sustainability policies and procedures
- reporting channels and procedures to report breaches and potential issues
- advantages of sustainable practices in the workplace.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- documentation, information and resources on workplace environmental and resource efficiency
- sustainability legislation, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	<p>This version first released with BSB Business Services Training Package Version 2.0.</p> <p>Version created to better align unit to AQF level.</p>

Application

This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing compliance with

ELEMENT	PERFORMANCE CRITERIA
	<p>environmental/sustainability regulations</p> <p>1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate</p> <p>1.4 Collect, analyse and organise information from a range of sources to provide information/advice and tools/resources for improvement opportunities</p> <p>1.5 Measure and document current resource usage of members of the work group</p> <p>1.6 Analyse and document current purchasing strategies</p> <p>1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement</p>
2. Set targets for improvements	<p>2.1 Seek input from stakeholders, key personnel and specialists</p> <p>2.2 Access external sources of information and data as required</p> <p>2.3 Evaluate alternative solutions to workplace environmental issues</p> <p>2.4 Set efficiency targets</p>
3. Implement performance improvement strategies	<p>3.1 Source and use appropriate techniques and tools to assist in achieving efficiency targets</p> <p>3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management</p> <p>3.3 Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities</p> <p>3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area</p> <p>3.5 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate</p> <p>3.6 Implement costing strategies to fully utilise environmental assets</p>
4. Monitor performance	<p>4.1 Use and/or develop evaluation and monitoring, tools and technology</p> <p>4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders</p> <p>4.3 Evaluate strategies and improvement plans</p> <p>4.4 Set new efficiency targets, and investigate and apply new tools</p>

ELEMENT	PERFORMANCE CRITERIA
	and strategies 4.5 Promote successful strategies and reward participants where possible

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 1.7, 2.3, 3.1	<ul style="list-style-type: none"> Identifies and analyses complex texts to determine legislative, regulatory and business requirements Reviews reported information to evaluate workplace strategies and improvement practices
Writing	1.5, 1.6, 2.1, 2.2, 2.4, 3.1-3.3, 4.4, 4.5	<ul style="list-style-type: none"> Documents findings of investigations from written and oral sources according to organisational requirements Provides updates about progress using formats and language appropriate to the audience and context
Oral Communication	2.1, 2.2, 3.3-3.5, 4.4, 4.5	<ul style="list-style-type: none"> Presents information and seeks advice using structure and language appropriate to audience Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 2.4, 3.1, 3.6, 4.4	<ul style="list-style-type: none"> Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Navigate the world of work	1.1, 1.2	<ul style="list-style-type: none"> Recognises and follows legislative requirements and organisational policies and procedures associated with own role
Interact with others	1.3, 2.1, 2.2, 3.3-3.5, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation Uses systematic, analytical processes to set

		<p>environmental targets, gather relevant information, identify and evaluate alternative approaches</p> <ul style="list-style-type: none">• Evaluates outcomes of decisions to identify opportunities for improvement• Uses the main features and functions of digital tools to complete work tasks and access information

Modification History

Release	Comments
Release 1	<p>This version first released with BSB Business Services Training Package Version 2.0.</p> <p>Version created to better align unit to AQF level.</p>

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
 - measure current resource usage
 - solve problems and generate ideas for improvements
 - evaluate and implement strategies to improve resource usage
 - plan, implement and integrate improvements into operations
 - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements

- explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
- outline common environmental and energy efficiency issues within the industry
- give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
- outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
 - supply chain, procurement and purchasing
 - quality assurance
 - making recommendations and seeking approvals

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS402 Implement an environmental management plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to interpret requirements of an organisational environmental management plan and effectively implement it.

It applies to individuals who are responsible for sustainability, either as their primary duty or as a part of a work role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to implement environmental management plan	1.1 Access and interpret plan and relevant compliance documentation to determine process for implementation 1.2 Prepare schedule for implementation process 1.3 Identify required resources for the implementation in accordance with the schedule 1.4 Identify roles, responsibilities and training needs of individuals and work teams
2. Implement and monitor	2.1 Communicate implementation process to staff

ELEMENT	PERFORMANCE CRITERIA
the environmental management plan	2.2 Allocate roles and responsibilities, and arrange required training 2.3 Execute implementation process in accordance with schedule 2.4 Provide on-going support to those conducting the plan's activities 2.5 Establish and apply procedures for monitoring activities against achievement targets and adjust resources as necessary
3. Review implementation process	3.1 Review implementation results in accordance with organisational requirements 3.2 Amend process as a result of review or other organisational changes 3.3 Document, maintain and store environmental management records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4	<ul style="list-style-type: none"> Identifies and analyses complex texts to determine legislative, regulatory and business requirements Reviews texts to create a working plan and align resources
Writing	1.2, 2.1, 2.2, 2.5, 3.2, 3.3	<ul style="list-style-type: none"> Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Oral Communication	2.1, 2.2, 2.4	<ul style="list-style-type: none"> Presents information and seeks advice using language appropriate to audience Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.3, 2.5	<ul style="list-style-type: none"> Applies calculations to identify required resources and timeframes Monitors results against defined goals and resources
Navigate the	1.4, 2.2, 3.1, 3.3	<ul style="list-style-type: none"> Recognises and follows legislative requirements and organisational policies and procedures associated

world of work		with own role <ul style="list-style-type: none"> Allocates roles and enables appropriate training for others
Interact with others	2.1, 2.2, 2.4	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Get the work done	1.1-1.4, 2.2-2.5, 3.1-3.3	<ul style="list-style-type: none"> Interprets and implements actions according to the organisational plan, taking responsibility for sequencing and timing of tasks Schedules to manage tasks for self and others, with an awareness of how implementation contributes to the broader organisation Analyses outcomes in accordance with organisational requirements to identify opportunities for improvement.

Assessment Requirements for BSBSUS402 Implement an environmental management plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- interpret an environmental plan to establish underpinning organisational and legislative requirements
- prepare an implementation process schedule that incorporates resource requirements and meets organisational and legislative obligations
- communicate individual roles and responsibilities to staff
- address training and support needs
- implement and monitor the schedule against required outcomes
- review results and prepare required documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational and legislative requirements in relation to environmental management
- explain methods used to identify and address training needs
- describe how resource requirements are identified
- explain methods for creating and communicating schedules
- explain how to monitor, review and record results of the implementation process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation and workplace policies and procedures
- interaction with others
- case studies or, where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSUS411 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement and monitor at least three environmentally sustainable work practices.

In the course of the above, the candidate must:

- identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability in the workplace
- engage and consult with relevant stakeholders to develop and implement sustainability improvements, encourage feedback and to report on outcomes
- plan and organise work group activities to:
 - measure current resource usage
 - evaluate alternative solutions to workplace environmental issues
 - resolve workplace sustainability issues and generate ideas for improvements
 - evaluate and implement strategies to improve resource usage
 - comply with environmental requirements
- apply continuous improvement approaches to enhance organisation's sustainability performance
- apply change management techniques to support sustainability performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and sustainability issues
- relevant internal and external sources of information for the development of efficiency targets
- benchmarks for environmental and resource sustainability relevant to organisation

- Australian and international standards for corporate social sustainability
- continuous improvement approaches for workplace practices
- resources for monitoring sustainable work practices including:
 - questionnaires and surveys
 - visual calculations
 - supply records and invoices
 - previous internal and external audit documents
- organisational systems and procedures that relate to environmental and resource sustainability improvements, including:
 - supply chain, procurement and costing strategies
 - quality assurance
 - recommendation development and seeking approvals
 - sales strategies and operations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- environmental sustainability legislation, regulations, standards and codes
- workplace reference materials for environmental sustainability and practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS511 Develop workplace policies and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to develop and implement workplace sustainability policies and to modify the policy to suit changed circumstances.

The unit applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces. These individuals also engage with a range of relevant stakeholders and specialists.

'Sustainability' in this unit refers to a broad approach that focuses on the minimisation of an organisation's social, economic and environmental impact, as well as proactive value creation in these areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare workplace sustainability policies	1.1 Establish scope and objectives of workplace sustainability policies 1.2 Gather information for development of sustainability policies 1.3 Analyse information and consultation insights 1.4 Develop and document sustainability policies according to organisational processes

ELEMENT	PERFORMANCE CRITERIA
	1.5 Incorporate implementation and continuous improvement processes into sustainability policies
2. Implement workplace sustainability policies	2.1 Present workplace sustainability policies and implementation processes to key stakeholders 2.2 Identify and source resources required to implement sustainability policies 2.3 Support implementation of workplace sustainability policies 2.4 Track continuous improvements in sustainability approaches using recording systems
3. Review implementation of workplace sustainability policies	3.1 Document outcomes and provide feedback to key personnel and stakeholders 3.2 Identify trends requiring remedial action to promote continuous improvement of performance 3.3 Modify sustainability policies to incorporate improvements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Interprets and uses mathematical equations to calculate numerical information relating to time durations and costs
Oral communication	<ul style="list-style-type: none"> Presents information and seeks advice using language appropriate to audience Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Reading	<ul style="list-style-type: none"> Identifies, analyses and evaluates complex textual information to determine legislative and regulatory requirements, trends and outcomes
Writing	<ul style="list-style-type: none"> Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Initiative and enterprise	<ul style="list-style-type: none"> Develops, monitors and modifies organisational policies and procedures according to legislative requirements and organisation goals
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information Plays a lead role in consulting and negotiating positive outcomes with

Assessment Requirements for BSBSUS511 Develop workplace policies and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement workplace policies and procedures for sustainability on at least one occasion, including:
 - implementing sustainability policy and procedures into wider organisational policies and procedures
 - consulting and communicating with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- Australian and international standards relating to corporate sustainability
- environmental and sustainability legislation, regulations and codes of practice applicable to organisation
- internal and external sources of information and their use in planning and developing organisational sustainability policies and procedures
- elements required for the development of organisational sustainability policies and processes including:
 - agreed outcomes of the policy and procedures
 - policy timeframes and costs
 - performance indicators
 - activities to be undertaken
 - assigned responsibilities
 - record keeping, review and improvement processes
 - common sustainability issues with organisational systems and procedures

- typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- corporate sustainability legislation, regulations, standards and codes
- organisational documentation on sustainability and sustainable practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC101 Operate digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on digital devices.

The unit applies to those who perform a range of routine digital tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Activate digital device and access features	1.1 Prepare workspace, furniture and equipment to suit user ergonomic requirements, where required 1.2 Activate digital device, and access or log on according to organisation policies and procedures 1.3 Identify basic functions and features of digital devices 1.4 Customise desktop or application configuration 1.5 Request assistance from relevant personnel for using digital device, where required 1.6 Access help functions, where required
2. Navigate and organise file or application	2.1 Open, close and access file or application by selecting correct desktop or menu icons

ELEMENT	PERFORMANCE CRITERIA
environment	2.2 Create shortcuts onto the desktop or menu, and request assistance from relevant personnel, where required 2.3 Identify and apply keyboard functions for both alpha and numeric keyboard input devices 2.4 Create folders and subfolders with relevant names 2.5 Identify and access storage devices relevant to the digital device 2.6 Download new applications with assistance from relevant stakeholder 2.7 Use search functions to locate files or applications
3. Edit and update stored information	3.1 Rename and move folders and subfolders 3.2 Remove files or applications as required, with assistance from relevant stakeholder 3.3 Open relevant file, document, or application 3.4 Edit content of the file, document, application, or similar in accordance with simple instructions 3.5 Save changes in digital device
4. Deactivate personal digital device	4.1 Save and close all open files, documents or applications 4.2 Deactivate digital device according to user procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises textual information within internal procedures and technical documents to determine and complete work requirements
Writing	<ul style="list-style-type: none"> Inputs information using familiar text types and records numerical and textual information for file naming conventions

Unit Mapping Information

Supersedes and is equivalent to BSBITU111 Operate a personal digital device.

Supersedes but is not equivalent to:

- BSBITU112 Develop keyboard skills
- BSBITU307 Develop keyboarding speed and accuracy.

Assessment Requirements for BSBTEC101 Operate digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least three occasions, activate, navigate, and deactivate a digital device.

In the course of the above, the candidate must:

- follow user procedures to power up and access a digital device
- follow user procedures and system information when using the basic functions on digital device, seeking assistance where required
- shut down applications and the device.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- user procedures for powering up and accessing a digital device
- key components of the digital system, including what each component does
- ergonomic issues that impact the use of digital devices
- key functions of the operating system
- organisational conventions for naming files.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- device user information
- different types of digital device.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC201 Use business software applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to select and use software and organise electronic information and data.

The unit applies to those who use a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare to use technology	1.1 Identify task purpose, audience, format and presentation requirements, and clarify with relevant personnel, where required 1.2 Select relevant technology and software applications to achieve requirements of the task 1.3 Adjust workspace, furniture and equipment to suit own ergonomic requirements
2. Input and process information or data	2.1 Identify and open application, according to task and organisational requirements 2.2 Enter information or data into application according to organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure information or data is checked and amended according to organisational and task requirements 2.4 Format information or data using appropriate application functions according to organisational and task requirements 2.5 Use relevant help functions to overcome simple issues
3. Finalise and store document	3.1 Review and edit final information or data, and prepare for storage in accordance with organisational and task requirements 3.2 Name and store document and exit application

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets information from familiar sources to determine job role and task requirements
Writing	<ul style="list-style-type: none"> Produces and amends files to meet task and organisational requirements Completes required documentation using organisational formats

Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU211 Produce digital text documents
- BSBITU212 Create and use spreadsheets
- BSBWOR204 Use business technology.

Supersedes but is not equivalent to BSBCUE301 Use multiple information systems.

Assessment Requirements for BSBTEC201 Use business software applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- select and use at least three business software applications on two occasions each.

In the course of the above, the candidate must:

- select and use technology safely and according to organisational requirements
- identify and address faults according to requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of:
 - organisation's work health and safety requirements relevant to own role
 - organisation's requirements for file naming and storage
 - applications used for organising electronic information and data.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- electronic files, information and data
- workplace documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC202 Use digital technologies to communicate in a work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to effectively identify, select and use available methods of digital communication in a workplace context. These methods may include email, instant messaging and other similar platforms.

The unit applies to those who use digital technology to communicate with relevant stakeholders. This will be particularly relevant to individuals in teams that work remotely. The individual will use a limited range of practical skills and fundamental knowledge in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify purpose and methods of digital communication	1.1 Identify purpose for communication, intended audience and content of proposed communication 1.2 Identify available digital communication applications by accessing relevant sources of information and clarify with relevant personnel, where required 1.3 Select most appropriate application for communication according to available resources and relevant organisational policies and procedures

ELEMENT	PERFORMANCE CRITERIA
2. Implement procedures to send and receive digital communications	<p>2.1 Access application for sending and receiving digital communications according to organisational policies and procedures</p> <p>2.2 Create outgoing digital communication, check for accuracy and ensure that any required attachments are included according to application requirements and organisational policies and procedures</p> <p>2.3 Identify urgent, confidential, personal, suspicious or dangerous digital communication and take appropriate action, clarify with relevant stakeholder, where required</p> <p>2.4 Access and identify most appropriate action in response to incoming digital communications, according to organisational policies and procedures</p>
3. Assist with managing digital communications	<p>3.1 Follow established security levels and filters for incoming digital communications according to organisational policies and procedures</p> <p>3.2 Assist relevant personnel to create plan for monitoring and maintaining digital communications across multiple applications according to organisational policies and procedures</p> <p>3.3 Store digital communications and attachments according to organisational policies and procedures</p> <p>3.4 Archive or permanently delete digital communications according to organisational policies and procedures</p> <p>3.5 Create methods for communicating electronically with targeted groups of stakeholders as relevant to organisation</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises textual information within different materials and interprets information to determine requirements, as well as confirming accuracy of content
Writing	<ul style="list-style-type: none"> Records key information relevant to requirements and prepares simple correspondence using basic punctuation, text and correct spelling
Oral Communication	<ul style="list-style-type: none"> Obtains information through listening and questioning and uses clear and appropriate language suitable to audience

SKILL	DESCRIPTION
Self-management	<ul style="list-style-type: none">Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Problem solving	<ul style="list-style-type: none">Recognises and responds to routine problems in context of own work

Unit Mapping Information

Supersedes and is equivalent to BSBITU213 Use digital technologies to communicate remotely.

Links

Assessment Requirements for BSBTEC202 Use digital technologies to communicate in a work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on four occasions send digital communications
- on four occasions receive and process digital communications.

In the course of the above, the candidate must:

- follow organisational and technology provider requirements when communicating electronically across multiple digital applications, including in relation to security of communications
- follow organisational policy and procedures when managing all aspects of digital communication, including by storing, filing, archiving, and deleting inbound communications
- communicate electronically with targeted groups of colleagues, clients or similar as relevant to organisation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- existing and emerging methods of digital communication, including strengths and limitations
- industry practice relating to digital communication etiquette in a workplace setting
- commercial sensitivities in relation to knowledge management
- organisational policies and procedures relating to the use of digital communication
- security levels and filters for digital communications.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- industry applications/platforms for communicating digitally
- relevant organisational policies and procedures
- relevant workplace documentation and resources.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC203 Research using the internet

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan, conduct and present research using the internet within an organisational context.

The unit applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of research in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan research	1.1 Confirm task requirements 1.2 Identify research objectives in consultation with relevant stakeholders 1.3 Identify potential sources for research information according to organisational policies and procedures 1.4 Select application and search engine according to organisational policies and procedures 1.5 Plan key search terms to be used in research
2. Conduct research	2.1 Power up digital device and access internet using selected application

ELEMENT	PERFORMANCE CRITERIA
	2.2 Open search engine according to research plan 2.3 Enter search terms according to research plan 2.4 Collect information according to research plan and organisational policies and procedures 2.5 Use relevant help functions to overcome simple issues, where required
3. Present research	3.1 Document information collected according to task requirements 3.2 Deliver document to relevant stakeholders according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises textual information within organisational and task requirements to determine work requirements
Writing	<ul style="list-style-type: none"> Records numerical and textual information in accordance with requirements of task
Oral Communication	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with relevant stakeholders in an effort to clarify research purpose, audience and presentation requirements
Self-management	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Technology	<ul style="list-style-type: none"> Understands functions and features of specific digital applications and uses these to perform work tasks

Unit Mapping Information

No equivalent unit. New unit.

Supersedes but is not equivalent to BSBITU315 Purchase goods and services online.

Assessment Requirements for BSBTEC203 Research using the internet

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least three occasions, plan, conduct, and present research on a work task using the internet.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key elements of basic research methods
- key functions of required applications
- relevant organisational policies and procedures
- key principles of documenting research.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- device user information
- relevant organisational policies and procedures
- workplace documentation and resources.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC301 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents. It includes selecting and using a range of functions on a variety of computer applications.

The unit applies to those who possess fundamental skills in computer operations. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Use basic design principles and ensure document design is consistent with organisational requirements 1.4 Discuss and clarify format and style with required stakeholder
2. Design document	2.1 Identify, open and create files according to task and organisational requirements 2.2 Design document and ensure efficient entry of information

ELEMENT	PERFORMANCE CRITERIA
	2.3 Use a range of functions to ensure consistency of design and layout
3. Produce document	3.1 Complete document production according to organisational policies, procedures and requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document 3.4 Use help function to overcome basic difficulties with document design and production, where required
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Modify document according to task requirements 4.3 Name and store document in accordance with organisational requirements and exit application 4.4 Present document according to task requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Recognises and interprets textual information from a range of sources to determine and adhere to requirements
Writing	<ul style="list-style-type: none">Develops documents using required format, accurate spelling and grammar and terminology specific to requirementsOrganises content to support purposes and audience of material, using clear and logical language
Self-management	<ul style="list-style-type: none">Recognises and follows explicit and implicit protocols and meets expectations associated with own role

Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU306 Design and produce business documents
- BSBITU313 Design and produce digital text documents.

Supersedes but is not equivalent to:

- BSBINT305 Prepare business documents for the international trade of goods
- BSBITU309 Produce desktop published documents.

Assessment Requirements for BSBTEC301 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design, produce and finalise four different types of business documents, using at least two different software applications.

In the course of the above, the candidate must:

- comply with organisational policies and procedures for producing business documents
- adhere to task requirements when producing documents including:
 - applying basic design principles
 - applying consistent formatting
 - using appropriate styles
 - using correct layouts
 - proofreading
- use required data storage options.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- technology required to produce document
- key functions and features of contemporary computer applications
- organisational policies and procedures
- organisational requirements for document design, including style guide.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- relevant software applications
- style guide
- organisational policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC302 Design and produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to develop spreadsheets through the use of spreadsheet applications.

The unit applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision. These individuals are generally required to have intermediate knowledge and understanding of a number of spreadsheet applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Identify task purpose and audience 1.2 Identify task requirements according to data entry, storage, output, timeline and presentation format 1.3 Select most appropriate application to produce spreadsheet, according to available resources and organisational policies and procedures
2. Plan spreadsheet design	2.1 Design spreadsheet design to suit purpose, audience and information requirements of task 2.2 Confirm spreadsheet is designed to enhance readability and appearance, and is in accordance with organisational and task

ELEMENT	PERFORMANCE CRITERIA
	requirements 2.3 Use available application functions and confirm consistency of design and layout, adhering to organisational and task requirements
3. Create spreadsheet	3.1 Enter data, check and amend to maintain consistency of design and layout, in accordance with organisational and task requirements 3.2 Format spreadsheet using application functions, according to organisational policies and procedures and presentation requirements 3.3 Consult with relevant stakeholders and confirm formulae are tested and output meets task requirements 3.4 Use required help functions and action issues as required
4. Produce charts	4.1 Select chart type and design that offers analysis of numerical data, and meets organisational and task requirements 4.2 Create charts using required data range in spreadsheet 4.3 Modify chart type and layout using formatting features, adhering to organisational and task requirements
5. Finalise and present spreadsheets	5.1 Review and edit final spreadsheet and accompanying charts, and prepare for delivery according to task requirements 5.2 Deliver document to required stakeholders according to organisational requirements, policies and procedures 5.3 Name and store spreadsheet according to organisational requirements and exit application

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Recognises and interprets numerical and textual information to determine organisational and task requirements
Writing	<ul style="list-style-type: none">Inputs numerical and key reporting information when creating and finalising spreadsheetsUses format, layout, style guides and standard naming conventions to organise data according to purpose and audience
Numeracy	<ul style="list-style-type: none">Uses mathematical equations to create simple formulae and validate numerical data

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none">• Collaborates with others to achieve joint outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBITU314 Design and produce spreadsheets.

Supersedes but is not equivalent to BSBITU311 Use simple relational databases.

Assessment Requirements for BSBTEC302 Design and produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, design, produce and finalise a spreadsheet on at least four occasions.

In the course of the above, the candidate must:

- produce spreadsheet documents that align to document purpose and appropriate to target audience
- design spreadsheets using:
 - formulas and functions with:
 - addition, subtraction, division, multiplication
 - brackets
- design spreadsheets that address a range of data and organisational requirements
- use software functions to create spreadsheets that adhere to organisational requirements relating to style and presentation
- use relevant help functions to rectify document issues
- produce spreadsheet document in appropriate format for review, including ability to create and modify intermediate-level charts that analyse the dataset.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key elements of formatting of spreadsheets appropriate to workplace documents, including the ability to calculate:
 - sum totals
 - averages
 - counts of values
- key features of spreadsheet applications, both cloud-based and non-cloud based

- key features of organisational guidelines on spreadsheet design and use
- organisational requirements for ergonomics, work periods and breaks, and sustainability in relation to spreadsheet production.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- industry software/applications for producing spreadsheets
- digital device user information
- relevant legislation and codes of practice
- relevant organisational policies and procedures
- workplace documentation and resources, including style guide.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC303 Create electronic presentations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to design and produce electronic presentations using various applications and platforms.

The unit applies to individuals employed in a range of work environments who design electronic presentations. They may work as individuals providing administrative support within an enterprise, or may be responsible for production of their own electronic presentations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to create presentation	1.1 Organise personal work environment according to ergonomic requirements 1.2 Identify purpose, audience and mode of presentation in consultation with content author or relevant stakeholder 1.3 Identify organisational and task requirements 1.4 Select required application to produce presentation, according to available resources and organisational policies and procedures
2. Create presentation	2.1 Plan presentation, notes and handouts according to organisational and task requirements and image and style requirements

ELEMENT	PERFORMANCE CRITERIA
	2.2 Use application functions for consistency of design and layout 2.3 Balance presentation features for visual impact and emphasis 2.4 Use application features and customise presentation as required 2.5 Prepare presentation according to organisational requirements 2.6 Use relevant help functions to overcome issues relating to presentation creation, where required
3. Finalise presentation	3.1 Check presentation for spelling and consistency in presentation features and style, according to task requirements 3.2 Prepare presentation materials for delivery according to presenter or audience requirements 3.3 Name and store presentation appropriately, according to organisational requirements and exit application

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Evaluates and integrates information and ideas to construct meaning in an effort to design and create a presentation
Writing	<ul style="list-style-type: none">Communicates relationships between ideas and information in a style appropriate to audience and purpose in accordance with organisational and task requirements
Planning and organising	<ul style="list-style-type: none">Plans and implements routine tasks and workload making limited decisions on sequencing and timing
Teamwork	<ul style="list-style-type: none">Collaborates with others to achieve joint outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBITU312 Create electronic presentations.

Assessment Requirements for BSBTEC303 Create electronic presentations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on three occasions prepare, create and finalise an electronic presentation.

In the course of the above, the candidate must:

- follow relevant ergonomic requirements and organisational policies and procedures
- adhere to task requirements and organisational policies and procedures relating to:
 - following designated timelines
 - consistency of design and layout
 - editing and style requirements
- use relevant help functions to rectify presentation issues
- produce presentation in appropriate format
- store presentation in accordance with organisation policies and procedures relating to data security.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- design features and their effect on the readability and appearance of electronic presentations
- key functions of relevant applications for producing electronic presentations
- organisational requirements for ergonomics
- key features of organisational style and presentation guide.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and materials
- relevant digital applications
- examples of electronic presentations
- relevant organisational policies and procedures
- relevant workplace documentation and resources including style guide.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC405 Review and maintain organisation's digital presence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to undertake data analysis, review digital presence content, and update and maintain digital presence.

The unit applies to those who have knowledge of relationship between digital presence and core functions of an organisation. They also have working knowledge and skills to perform basic updates to website and other digital and social media. They may provide administrative support within an organisation or be other individuals who have been delegated this responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review digital presence content and use	1.1 Monitor and analyse customer and user feedback according to organisational requirements 1.2 Analyse automatically collected data and identify trends 1.3 Make recommendations on changes to digital presence and its content in response to feedback, data analysis and relevant regulatory requirements 1.4 Review cost implications of the recommended changes and determine viability 1.5 Approve changes scheduled for implementation

ELEMENT	PERFORMANCE CRITERIA
2. Update digital presence	<ul style="list-style-type: none">2.1 Identify sources of information on the organisation, including website and social media platforms2.2 Replace superseded and inaccurate information with current information and add additional material according to organisational requirements2.3 Follow protocols for ensuring the accuracy and authenticity of information2.4 Remove services no longer available or required and add new services according to organisational requirements2.5 Check offline information against online information and rectify any discrepancies according to organisational timelines2.6 Follow security procedures for updating digital presence
3. Carry out non-technical maintenance	<ul style="list-style-type: none">3.1 Analyse user feedback to confirm faults are not user issues3.2 Rectify faults and make improvements to digital presence in response to user feedback approved by the organisation3.3 Add new digital features and remove redundant features according to organisational requirements3.4 Change digital presence according to changes in marketing strategy, organisational requirements, policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">• Recognises text within job specifications and work processes related to the outcomes of the job
Writing	<ul style="list-style-type: none">• Records key information related to the outcomes of the job
Numeracy	<ul style="list-style-type: none">• Uses basic numeracy skills to determine cost implications and viability
Self-management	<ul style="list-style-type: none">• Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need to coordinate with others• Takes personal responsibility for following security procedures and meeting organisational requirements
Planning and organising	<ul style="list-style-type: none">• Takes responsibility for planning, sequencing tasks for efficient and effective organisational outcomes

SKILL	DESCRIPTION
Problem solving	<ul style="list-style-type: none">• Uses problem solving processes to identify and analyse technical issues• Contributes to continuous improvement of digital presence by applying basic principles of analytical thinking
Technology	<ul style="list-style-type: none">• Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete tasks in accordance with security requirements

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBEBU401 Review and maintain a website.

Assessment Requirements for BSBTEC405 Review and maintain organisation's digital presence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least two occasions, review, update and carry out maintenance on an organisation's digital presence, including:
 - website
 - social media platforms.

In the course of the above, the candidate must:

- analyse data and make recommendations about changes to digital presence
- update digital presence according to organisational requirements
- analyse data, identify and resolve faults, errors and complaints about digital presence.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of relevant digital platforms, including:
 - social media
 - websites
 - digital directories
- key provisions of relevant legislation, regulations, and standards and codes of practice that may affect aspects of organisation's digital presence
- basic principles of design and maintenance of relevant platforms
- key aspects of online security issues
- organisational policies and procedures relevant to digital presence
- key methods of data analysis relevant to online stakeholder engagement.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- documentation relating to analysis and strategies/policies for implementation
- organisational policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC501 Develop and implement an e-commerce strategy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to evaluate e-commerce models and strategies for use in a business context. This includes the ability to incorporate results of evaluations into design of an e-commerce strategy, including marketing, buying and selling goods and services online.

The unit applies to those who possess skills and knowledge in a specialist business area, as well as knowledge of digital applications and other technologies. They apply these skills and knowledge in the evaluation, selection and implementation of new strategies for business, which incorporate e-commerce solutions. They may be responsible for overseeing these tasks along with technical or other knowledge experts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse opportunities for e-commerce	1.1 Undertake a competitive analysis to determine the impact emerging trends will have on industry sectors and competitors 1.2 Complete value chain analysis and identify processes and relationships that may benefit from the adoption of e-commerce solutions, according to organisational strategies 1.3 Identify threats and opportunities of e-commerce implementation and evaluate potential contributions to the organisation

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Conduct resource analysis and identify cost and revenue implications in opportunities, according to organisational policies and procedures</p> <p>1.5 Identify and evaluate legal and ethical issues in e-commerce opportunities</p>
2. Evaluate e-commerce models	<p>2.1 Identify and analyse business-to-business, business-to-consumer, intra-organisational e-commerce applications and e-commerce models, and assess applicability to own organisation</p> <p>2.2 Rank compatible e-commerce models in terms of their strengths and weaknesses, identify resourcing, technical and security requirements of each and assess according to organisational strategies</p> <p>2.3 Analyse cost implications of implementation of e-commerce models</p> <p>2.4 Determine an e-commerce model most appropriate in relation to organisational strategies</p>
3. Design an e-commerce strategy	<p>3.1 Formulate purpose, objectives and values for the e-commerce</p> <p>3.2 Identify target market, and value chain structure according to chosen e-commerce model</p> <p>3.3 Identify and obtain technical needs and expertise required to implement e-commerce model</p> <p>3.4 Investigate and identify possible culture issues, and develop plan to manage transition to e-commerce, according to organisational policies and procedures</p>
4. Implement an e-commerce strategy	<p>4.1 Develop policies and procedures that support customers, supply chain and staff and ensure successful implementation</p> <p>4.2 Monitor performance of organisational goals and adjust policies and procedures to respond to changing requirements of customers, staff and supply chain</p> <p>4.3 Review e-commerce systems and models, seek feedback from users and stakeholders responsible for e-commerce implementation</p> <p>4.4 Incorporate evaluation results and feedback and improve future e-commerce strategies</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Interprets a range of textual information to evaluate opportunities, possible exemplars and technical considerations
Writing	<ul style="list-style-type: none">Takes personal notes and develops workplace documentation that clarifies complex ideas using language and structure to suit context and audience
Oral Communication	<ul style="list-style-type: none">Articulates information clearly using language and tone appropriate to audience and environmentUses active listening and questioning techniques to receive feedback and confirm understanding
Numeracy	<ul style="list-style-type: none">Analyses numerical information to determine resources required for job
Initiative and enterprise	<ul style="list-style-type: none">Develops and reviews organisational procedures to achieve broader workplace goalsInvestigates new and innovative ideas as a means to continuously improve work practices and processes
Self-management	<ul style="list-style-type: none">Takes responsibility for developing and implementing organisational processes that comply with legislative requirements and achieve required outcomes
Problem solving	<ul style="list-style-type: none">Systematically gathers and analyses all relevant information and evaluates options to solve problems or make decisions
Technology	<ul style="list-style-type: none">Uses digital technologies and systems safely, legally and ethically to access, store and share information

Unit Mapping Information

Assessment Requirements for BSBTWK201 Work effectively with others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- work with a group to achieve an objective on at least two occasions and address at least one identified problem or conflict on each occasion.

In the course of the above, the candidate must:

- distinguish individual responsibilities from workgroup responsibilities
- demonstrate the ability to:
 - support team members
 - communicate according to the cultural and linguistic requirements of the individual
 - act on constructive feedback
 - use communication channels to share information
 - cooperate and contribute to team goals
 - identify improvement opportunities
- identify problems and conflicts and address them according to organisational and ethical policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and ethical standards, policies and procedures that relate to own work role
- team responsibilities and duties and their relationship to individual responsibilities and duties
- organisational policies and procedures relating to workplace discrimination and bullying
- personal values and beliefs including their importance in the development of relationships
- communication channels used to communicate in work teams including:
 - team meetings

- one-on-one interactions with individual team members
- emails
- instant messaging
- calls
- key problems and conflicts arising in workgroup contexts
- methods of resolving team problems including referral to relevant organisational personnel
- conflict resolution techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace discrimination and bullying legislation
- organisational and ethical standards, policies and procedures for working with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBTWK502 Manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the effectiveness of at least one work team.

In the course of the above, the candidate must:

- provide feedback to encourage, value and reward others
- model desired behaviour and practices
- encourage and foster shared understanding of purpose, roles and responsibilities
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- impacts of group dynamics on team performance
- methods of establishing team activities including communication processes
- strategies that can support team cohesion, participation and performance
- strategies for gaining consensus
- issue resolution strategies.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documents relevant to team task objectives.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others, and to assist in responding to incidents. It covers following work health and safety (WHS) policies, procedures, instructions and requirements; and participating in WHS consultative processes.

The unit applies to those who require a basic knowledge of WHS to carry out own work in a defined context, under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
----------	----------------------

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Operate safely in own work environment	1.1 Identify organisational WHS policies and procedures that apply to own work setting 1.2 Carry out work tasks according to WHS instructions 1.3 Carry out pre-start systems and equipment checks under supervision and according to organisational policies and procedures 1.4 Participate in responding to incidents according to organisational policies and procedures
2. Operate safely within requirements of own role	2.1 Identify individuals and/or parties to whom queries and concerns about safety in the workplace should be directed 2.2 Identify existing and potential hazards relating to own role, and record and report them according to organisational policies and procedures 2.3 Identify and contribute to implementing WHS instructions and organisational policies and procedures specific to own work area 2.4 Identify and report incidents and injuries to required personnel according to organisational policies and procedures
3. Participate in WHS consultative processes	3.1 Contribute to workplace meetings, inspections, and other WHS consultative activities 3.2 Identify existing and potential WHS hazards and report them to designated persons according to organisational policies and procedures 3.3 Participate in actions to minimise or eliminate workplace hazards and to reduce risks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets short and simple information in relation to WHS and incidents
Writing	<ul style="list-style-type: none"> Uses structure and language appropriate to audience and context when giving factual information

Skill	Description
Oral Communication	<ul style="list-style-type: none">• Uses language and non-verbal communication appropriate to audience and context in descriptions, opinions and explanations• Extracts meaning and main ideas from verbal descriptions, opinions and explanations
Navigate the world of work	<ul style="list-style-type: none">• Follows WHS legislative requirements under supervision and with assistance• Follows protocols and procedures relating to own role• Seeks assistance from others when WHS issues are beyond scope of immediate responsibilities
Get the work done	<ul style="list-style-type: none">• Plans, organises and implements routine tasks in order to optimise health and safety• Selects and implements actions from predetermined procedures

Assessment Requirements for BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- actively participate in two different work activities that contribute to the health and safety of self and others
- identify and report at least one hazard to designated personnel.

During the above, the candidate must follow required procedures and instructions relating to work health and safety (WHS) and incidents.

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- organisational safety policies, procedures, instructions and requirements relating to own work role in relation to:
 - checking systems and equipment
 - conducting routine work operations
 - personal protective equipment (PPE)
 - recording existing and potential WHS issues
 - responding to and reporting incidents and injuries
 - responding to fires and incidents
- meaning of commonly used hazard signs and safety symbols
- duty holder responsibilities, as specified in WHS laws, including:
 - self and co-workers
 - persons conducting a business or undertaking (PCBUs)
 - officers
 - others in the workplace

- distinction between hazards and risks
- WHS hazards that may be present in the workplace, including the harm they can cause and how this harm occurs
- process of hazard identification and risk control.

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures, and work instructions covered in the knowledge evidence
- WHS laws relevant to performance evidence requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS301 Protect own personal online profile from cyber security threats

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to protect own personal online profile from cyber security threats, and to limit the potential impact of online security breaches.

It applies to those working in a broad range of industries and job roles under some supervision and guidance, who protect their own online profile so that it is cyber secure.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify existing and potential security threats to own personal online profile	1.1 Determine all current online accounts and profiles 1.2 Identify common threats to security of online profiles 1.3 Identify industry-specific risk factors that raise risk levels to own personal profile
2. Audit own personal online profile for identified security threats	2.1 Review all online accounts, associated applications and browsers at risk of identified threats according to organisational policies and procedures 2.2 Review public online profiles that can be linked to own personal identity 2.3 Check billing and account records carefully to detect

ELEMENT	PERFORMANCE CRITERIA
	<p>early indicators of potential theft</p> <p>2.4 Report identified suspicious cyber activity according to cyber security legislative requirements and organisational policies and procedures</p>
3. Address identified existing and potential security threats to own personal online profile	<p>3.1 Secure personal online profile and remove potential security risks</p> <p>3.2 Confirm that software used on own desktop/laptop and mobile devices is current and sufficient</p> <p>3.3 Remove potentially sensitive personal and company information according to organisational policies and procedures</p> <p>3.4 Create strong passwords across personal and work accounts</p> <p>3.5 Turn on two factor authentication across all accounts where available</p> <p>3.6 Adjust privacy/security settings on internet browser, web applications and applicable online accounts</p> <p>3.7 Delete all unused online accounts/applications according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Modifies behaviour following exposure to new information
Reading	<ul style="list-style-type: none"> Recognises and interprets information from relevant sources to determine organisational expectations relating to cyber security
Technology	<ul style="list-style-type: none"> Uses appropriate technology platforms to assist with protecting online profile from cyber security threats
Problem solving	<ul style="list-style-type: none"> Uses problem solving skills to understand the nature of potential threat to personal profile or device and to undertake required action

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXCS301 Protect own personal online profile from cyber security threats

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- conduct one audit of own personal online profile and identify existing and potential cyber security threats
- identify and address three potential cyber security risks to own personal online profile.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative requirements relating to reporting cyber security threats
- organisational policies and procedures relating to online profiles, including escalation routes for cyber security issues
- basic principles of cyber security, including:
 - importance of data confidentiality, integrity and availability
 - common cyber security terms
 - common cyber security threats that individuals might be exposed to online
 - secure internet browsing
- risk factors relating to own personal online profile, including:
 - password management practices:
 - strength of created passwords
 - number of passwords used for multiple accounts
 - frequency of change to passwords
 - own work role within organisation
 - regular tasks in own work that raise personal risk level, including internet browsing
 - potential targets for cyber attack in own direct professional network
 - protocols for handling personally identifiable information

- physical safety of devices
- industry-specific risk factors and their risk to online profiles
- common strategies, tools and techniques for improving security of own personal online profile, including for:
 - password protection
 - secure password management and account replicating and splitting
 - fundamentals of two-factor authentication
 - billing and account privacy settings
 - software patching
 - connecting to public Wi-Fi via virtual private networks (VPNs)
- common methods and practices for:
 - responding to cyber security issues, including reporting protocols
 - secure internet browsing, including banking and email
- common cyber security threats that individuals and data might be exposed to, including:
 - phishing
 - social engineering
 - social media
 - malware
 - physical threats, including data loss due to working insecurely in public spaces.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards and organisational procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS302 Identify and report online security threats

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to identify and report online security threats to limit potential impact of cyber security breaches.

It applies to those working in a broad range of industries and job roles under some supervision and guidance who encounter and report online threats during the course of their work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify online security threats	1.1 Review internal policies, procedures and plans relating potential online security breaches 1.2 Identify features of common types of potentially fraudulent communications 1.3 Implement techniques to verify suspicious requests for information
2. Respond to an online security breach	2.1 Block and report potential security breaches on computer and mobile device according to organisational policies and procedures 2.2 Respond to actual security breach or cyber security incident according to organisational response plan 2.3 Report security breach or cyber security incident according to

ELEMENT	PERFORMANCE CRITERIA
	legislative requirements and organisational policies and procedures
3. Support post- breach review	3.1 Provide information to required personnel to assist in documenting potential and actual breaches 3.2 Support post-incident review and identifying lessons learnt 3.3 Contribute updates to cyber security incident response plan as required and within scope of own role

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none">Modifies behaviour following exposure to new information
Oral communication	<ul style="list-style-type: none">Asks open and closed probing questions and actively listens to ensure that concepts regarding cyber security are well understood
Reading	<ul style="list-style-type: none">Recognises and interprets information from relevant sources to determine organisational expectations relating to cyber security
Writing	<ul style="list-style-type: none">Uses clear, specific and industry-related terminology relating to cyber security for breach and incident reports
Technology	<ul style="list-style-type: none">Uses appropriate technology platforms to share information within the organisation relating to potential online security threats

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXCS302 Identify and report online security threats

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify and report three different online security threats in a work area.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative requirements relating to identifying and reporting online security threats, including:
 - data protection
 - implications of Notifiable Data Breach legislation on an organisation and other associated Australian privacy laws
 - established international legislation
- organisational policies and procedures relating to online information security breaches, including:
 - blocking and reporting potential security breaches
 - escalation routes for cyber security issues
- common types of online scams and security risks, including phishing scams
- common techniques of phishing and spear phishing used by attackers, including:
 - spam email and SMS text
 - social engineering, including telephone calls, social media and website requests for information
- basic principles of cyber security
- indicators of insecure connection to websites, in particular where data is being collected
- Australian government sources of information on current online security threats
- common online security threats to which individuals might be exposed to, including physical threats

- common procedures for:
 - mitigating online security threats
 - following organisational cyber security incident response plan
 - responding to cyber security breaches.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards and organisational procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS303 Securely manage personally identifiable information and workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to securely manage personally identifiable information (PII) and workplace information.

It applies to those working in a broad range of industries and job roles under some supervision and guidance who manage large amounts of PII and workplace information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Handle PII and workplace information responsibly	1.1 Review current standards, practices and procedures relating to workplace information 1.2 Identify sensitive data in own workplace environment according to organisational policies and procedures and within scope of own role 1.3 Classify workplace information types according to organisational procedures 1.4 Apply privacy policies to all data devices that require confidentiality
2. Store and share PII and workplace information	2.1 Organise obtained data sets in an easily retrievable format 2.2 Implement required access control protocols for identified

ELEMENT	PERFORMANCE CRITERIA
securely	<p>sensitive data</p> <p>2.3 Confirm that data is accurate, up-to-date, and comprehensive</p> <p>2.4 Identify and report malfunctioning infrastructure and attacks on infrastructure that pose a threat to data integrity</p>
3. Apply information protection protocols	<p>3.1 Conduct back-up of on-site and off-site data according to organisational policies and procedures</p> <p>3.2 Conduct privacy impact assessments on data</p> <p>3.3 Confirm adherence to data protection compliance standards</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Modifies behaviour following exposure to new information
Numeracy	<ul style="list-style-type: none"> Interprets mathematical data
Oral communication	<ul style="list-style-type: none"> Asks open and closed probing questions and actively listens to clarify consultations
Reading	<ul style="list-style-type: none"> Recognises and interprets information from relevant sources to determine organisational expectations and legal requirements
Planning and organising	<ul style="list-style-type: none"> Efficiently and logically sequence the stages of data management
Technology	<ul style="list-style-type: none"> Uses appropriate technology platforms to assist with data storage, data retrieval and data management

Unit Mapping Information

No equivalent unit. New unit.

Links

Companion Volume Implementation Guide is found on VETNet: -

Assessment Requirements for BSBXCS303 Securely manage personally identifiable information and workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use data protection techniques to manage workplace information for one work area over the life of a small project or work cycle.

In the course of the above, the candidate must store and share personally identifiable information (PII) in a secure manner.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative requirements relating to securely managing PII and workplace information, including:
 - data protection
 - implications of Notifiable Data Breach legislation on an organisation and other associated Australian privacy laws
 - established international legislation
- organisational policies and procedures relating to:
 - identifying sensitive data
 - securely storing, sharing and managing customer information
 - encryption, and protocols for its uses
 - data classification
 - media and document labelling
 - monitoring and reporting faults and malfunctions in IT infrastructure
- industry best practice and Australian government sources of information relating to access control, including:

- password protection
- storage locations
- securely sharing
- data deletion
- risks and benefits of cloud storage
- risks of communicating sensitive information via non-secure means e.g. email and SMS
- framework for distributed storage
- technologies, techniques and protocols for storing and retrieving data
- data protection protocols and industry-standard compliance standards relating to:
 - back-up
 - data sharing
 - data storage
 - disposal of sensitive information
 - privacy impact assessments.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards, organisational procedures, and legislative requirements required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS401 Maintain security of digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required ensure the cyber security of digital devices.

It applies to those working in a broad range of industries who as part of their job role ensure the security of digital devices used.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify appropriate security for digital devices	1.1 Create and maintain register of digital devices on organisation's network 1.2 Confirm what information is held on the registered devices 1.3 Categorise level of risk associated with each device based on sensitivity of information stored 1.4 Select required security protocol to manage level of risk associated with each device
2. Apply protection strategies to digital devices	2.1 Install and run latest anti-malware on each device 2.2 Create strong passwords across personal and work accounts 2.3 Switch on two-factor authentication where available

ELEMENT	PERFORMANCE CRITERIA
	2.4 Encrypt devices according to instructions 2.5 Develop associated physical security plan and communicate this to whole organisation
3. Evaluate effectiveness of applied protection strategies	3.1 Review number of breaches and business impact over review period 3.2 Monitor latest developments in digital security 3.3 Support organisation to select most appropriate security strategies
4. Patch software across multiple devices	4.1 Apply updates to software and applications across own desktop and mobile devices 4.2 Ensure that new devices are updated and configured correctly as part of initial start-up procedure

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Modifies behaviour following exposure to new information
Numeracy	<ul style="list-style-type: none"> Interprets mathematical data Completes at times complex calculations and records mathematical data
Reading	<ul style="list-style-type: none"> Recognises and interprets information from relevant sources to determine organisational expectations relating to cyber security
Technology	<ul style="list-style-type: none"> Uses appropriate technology platforms to assist with protection strategies relating to cyber security

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXCS401 Maintain security of digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use best practice protection strategies to maintain the security of two different electronic devices over the life of a small project or work cycle
- conduct gap analysis to evaluate effectiveness of all applied best practice strategies.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- external party security risks and methods for mitigating risk
- industry-accepted best practice protection strategies for improving security on digital devices:
 - password management
 - use of anti-virus software
 - virtual private network (VPN) use on public Wi-Fi
 - router settings
 - fundamentals of two-factor authentication
 - encryption
 - patching software applications
- risk management methodologies
- tools and techniques to conduct gap analysis of strategy performance
- data protection requirements for:
 - stored data
 - data in transit
 - data in third party applications
- mobile device security strategies.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards and organisational procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS402 Promote workplace cyber security awareness and best practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to promote cyber security in a work area.

It applies to those working in a broad range of industries who as part of their job role support policies, procedures and practice within an organisation that promote cyber security.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop cyber security awareness in work area	1.1 Establish current level of awareness in work area relating to cyber security 1.2 Create and maintain cyber security awareness program that reflects organisation-wide best practice 1.3 Contribute to developing cyber security policies and procedures, and communicate to required personnel
2. Support effective cyber security practices in work area	2.1 Review cyber security practices according to organisational policies and procedures 2.2 Arrange training and information updates as required, and maintain related records 2.3 Present insights from review and training to required

ELEMENT	PERFORMANCE CRITERIA
	personnel, and potential related impacts on workplace
3. Review cyber security awareness in work area	<p>3.1 Review latest cyber security threats and trends impacting organisations</p> <p>3.2 Document outcomes of review and suggested improvements for consideration by required personnel</p> <p>3.3 Communicate review outcomes and cyber security improvement requirements according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none">Modifies behaviour following exposure to new informationShares insights gained from cyber security trend analysis
Oral communication	<ul style="list-style-type: none">Consults with stakeholders to inform decision making
Reading	<ul style="list-style-type: none">Interprets information from relevant sources to determine organisational expectations
Writing	<ul style="list-style-type: none">Uses clear, specific and industry-related terminology relating to cyber security in workplace documents
Planning and organising	<ul style="list-style-type: none">Maintains records and documentation relating to cyber security protection
Teamwork	<ul style="list-style-type: none">Works collaboratively with interdisciplinary teams to promote cyber security
Technology	<ul style="list-style-type: none">Uses appropriate technology platforms to assist with promoting cyber security within work area

Unit Mapping Information

No equivalent unit. New unit.

Links

Companion Volume Implementation Guide is found on VETNet: -

Assessment Requirements for BSBXCS402 Promote workplace cyber security awareness and best practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop one set of policies and procedures for a work area that promote cyber security awareness and practices
- arrange training or updates to be provided to colleagues that support practice or awareness in relation to two different cyber security matters.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative requirements relating to cyber security context of performance evidence, including:
 - data protection
 - implications of Notifiable Data Breach legislation on an organisation and other associated Australian privacy laws
 - established international legislation
- organisational policies and procedures relating to:
 - securely storing, sharing and managing information
 - encryption, and protocols for its uses
 - data classification and management
 - media/document labelling
 - data governance
 - acceptable use
 - bring your own device
- Australian government sources of information on current threats
- risks associated with workplace cyber security
- strategies and techniques for promoting workplace cyber security

- techniques for:
 - implementing and promoting workplace cyber security awareness
 - facilitating training that promotes cyber security awareness, including the use of simulated activities.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards and organisational procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS403 Contribute to cyber security threat assessments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to support maintaining a cyber secure network through identifying cyber security threats for an organisation.

It applies to those working in a broad range of industries who as part of their job role contribute to assessments of level of risk relating to real and potential cyber security breaches.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Contribute to reviewing workplace cyber security threats	1.1 Identify relevant organisational data security/protection policies and procedures 1.2 Contribute to organisation-wide cyber security audits 1.3 Contribute to identifying threats to workplace security of cyber security threats
2. Assist in assessing risks and potential business impact of cyber security threats	2.1 Assist in assessing cyber security risks and their likelihood, consequences and suggested mitigation strategies 2.2 Assist in reviewing industry level threats and best practice cyber security strategies 2.3 Assign risk levels for identified cyber risks based

ELEMENT	PERFORMANCE CRITERIA
	on measurement scale 2.4 Contribute to identifying impact of risks
3. Finalise cyber security threat assessment	3.1 Document impact findings that include recommendations for required responses to control risks 3.2 Support the communication of cyber security threat assessment outcomes and recommendations to required personnel 3.3 Seek feedback as required on assessment findings 3.4 Assist in integrating feedback to finalise threat assessment 3.5 Distribute or store final threat assessment according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Modifies behaviour following exposure to new information
Numeracy	<ul style="list-style-type: none"> Interprets mathematical data Completes at times complex calculations and records mathematical data
Oral communication	<ul style="list-style-type: none"> Asks open and closed probing questions and actively listens to clarify consultations Communicate findings of assessment of business impact to required personnel
Reading	<ul style="list-style-type: none"> Recognises and interprets information from relevant sources to determine organisational expectations
Writing	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology relating to cyber security Produces written reports on business impact of assessed threat
Teamwork	<ul style="list-style-type: none"> Works collaboratively with interdisciplinary teams to ensure procedures are implemented
Technology	<ul style="list-style-type: none"> Uses appropriate technology platforms to assist with cyber security threat assessments

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXCS403 Contribute to cyber security threat assessments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- provide non-technical support to a cyber security threat assessment in a work area by describing three threats
- communicate and distribute findings of the identified threats.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative requirements relating to contributing to cyber security threat assessments, including:
 - data protection
 - implications of Notifiable Data Breach legislation on an organisation and other associated Australian privacy laws
 - established international legislation
- potential organisational impact of cyber attacks
- online risks affecting organisation's operations
- common procedures for cyber threat rating and modelling
- strategies, techniques and tools that improve an organisation's cyber security and audit processes
- organisational policies and procedures for information security, including:
 - confidentiality, integrity, and availability
 - communicating threat assessment findings.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards and organisational procedures required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS404 Contribute to cyber security risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to contribute to cyber security risk management, which includes assisting in developing and managing associated risk management strategies.

It applies to those working in a broad range of industries and job roles who work alongside technical experts to develop cyber security risk-management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Contribute to recommending risk management strategies that mitigate cyber security risk	<ul style="list-style-type: none">1.1 Consult with stakeholders to determine scope of risk management appropriate to organisation and industry1.2 Review relevant critical cyber risk management strategies appropriate to level of risk1.3 Assist in developing suitable cyber security response options according to organisational policies and procedures1.4 Present options for risk management strategies for approval within scope of own role1.5 Document approved risk management strategies

ELEMENT	PERFORMANCE CRITERIA
2. Support implementation of approved risk management strategies in response to risk	2.1 Support communication of approved risk management strategies to required personnel 2.2 Contribute to monitoring cyber security risk according to selected risk management strategies 2.3 Assist in determining compliance with implemented cyber risk mitigation strategies 2.4 Address non-compliance within scope of own role and escalate where required according to organisational policies and procedures 2.5 Assist in establishing feedback processes that provide warning of potential new risks according to organisational requirements
3. Review and revise implemented risk management strategies	3.1 Identify benchmarks to track effectiveness of risk management strategies 3.2 Support evaluation of effectiveness of implemented strategies 3.3 Update risk management strategies with new information as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Modifies behaviour following exposure to new information
Numeracy	<ul style="list-style-type: none"> Interprets mathematical data

Assessment Requirements for BSBXCS404 Contribute to cyber security risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- contribute to developing and implementing risk management strategies that control two different identified cyber security risks and document the response option applied to each risk
- support evaluation of effectiveness of each implemented strategy.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory requirements relating to contributing to cyber security risk management, including:
 - data protection legislation
 - notifiable data breach legislation
 - Australian privacy laws
 - established international legislation
- key risk management strategies, including:
 - regular organisational training
 - regular threat assessment
 - cyber security incident response plan
 - clear escalation routes
- organisational policies and procedures, including for:
 - analysing and reviewing risk management methodologies
 - developing communications plans
 - evaluating effectiveness of risk management strategies
 - monitoring cyber risk

- reviewing currency of risk register
- industry-specific knowledge of suitable procedures for applying risk management strategy
- guidelines required for updating technology
- business process design principles in relation to risk management
- reporting mechanisms for tracking organisational cyber security maturity.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards, organisational procedures, and legislative requirements required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCS405 Contribute to cyber security incident responses

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Application

This unit describes the skills and knowledge required to assist in responding to and containing cyber security incidents.

It applies to those working in a broad range of industries and job roles who work alongside technical experts to develop cyber security risk-management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence – Cyber Security

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm cyber security incident and contribute to its containment	1.1 Confirm nature and location of cyber security incident according to organisational policies and procedures 1.2 Estimate risk, likelihood and potential consequence of incident according to organisational response procedures 1.3 Assist in ensuring that cyber incident is contained according to legislative requirements and organisational cyber security incident response plan 1.4 Assist in confirming no further risks according to legislative requirements and organisational response procedures
2. Communicate information on cyber security incident	2.1 Escalate cyber security incident with required workplace personnel according to organisational policies and

ELEMENT	PERFORMANCE CRITERIA
	<p>procedures</p> <p>2.2 Consult with required internal and external stakeholders on communication needs relating to cyber security incident</p> <p>2.3 Assist in alerting required external parties according to legislative requirements and organisational procedures</p>
3. Contribute to post-incident activities	<p>3.1 Support post-breach review and reporting</p> <p>3.2 Assist in identifying lessons learnt from incident response and recommended changes to cyber security response plan</p> <p>3.3 Assist in updating cyber security response plan to reflect review outcomes according to organisational policies and procedures</p> <p>3.4 Communicate lessons learnt and recommendations to required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Modifies behaviour following exposure to new information Understands developments within cyber security protection and is able to advise on which options are appropriate
Numeracy	<ul style="list-style-type: none"> Interprets mathematical data Completes at times complex calculations and records mathematical data
Oral communication	<ul style="list-style-type: none"> Asks open and closed probe questions and actively listens to clarify consult with business and ICT technicians Communicate findings of assessment of business impact to required personnel
Reading	<ul style="list-style-type: none"> Recognises and interprets information from relevant sources to determine organisational expectations and legal requirements
Writing	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology relating to cyber security Produce written reports on business impact of assessed threat
Planning and organising	<ul style="list-style-type: none"> Manages cyber security incident response plan including protection strategies through to responding to breaches

Skill	Description
Technology	<ul style="list-style-type: none">• Uses appropriate technology platforms to assist with cyber security incident responses

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXCS405 Contribute to cyber security incident responses

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to assist in:

- responding to two different cyber security incidents in a work area
- conducting one post-breach review.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative requirements relating to contributing to cyber security incident responses, including:
 - data protection
 - implications of notifiable data breach legislation on an organisation and other associated Australian privacy laws
 - established international legislation
- procedures for developing communications plans
- organisational policies and procedures relating to cyber security incident response, including procedures for:
 - confirming nature and location of incidents
 - determining risk, likelihood, and consequence of incidents
 - containing incidents
 - notifying internal and external stakeholders of incident
 - internal and external communications
 - conducting post-breach reviews
- reporting methods for cyber security incidents, including official government channels
- key features of cyber security incident response plan
- risk mitigation strategies and procedures relating to cyber security

- internal and external stakeholders involved in responding to cyber security incidents.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of a work environment requiring cyber secure practices, processes and procedures.

Access is required to:

- information and data sources relating to cyber security
- device with active internet connection
- internet browser
- industry standards, organisational procedures, and legislative requirements required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXTW301 Work in a team

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 5.0. Version created to rectify typographical error
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to work effectively as part of permanent or project based teams in a workplace within an industry.

This unit applies to a wide range of workers, but has a specific focus on the teamwork skills required for workers with limited responsibility for others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cross Sector Skill

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify individual work tasks within a team	1.1 Identify own responsibilities according to organisational policies and procedures 1.2 Identify own role and task requirements within team 1.3 Articulate team structure and roles of other team members 1.4 Plan and prioritise own tasks according to given time frames and

	team requirements
2. Contribute effectively to team goals	<p>2.1 Identify team goals and own responsibilities relevant to achieving team goals</p> <p>2.2 Contribute ideas and information in team planning discussions</p> <p>2.3 Share knowledge and skills with team members to enable effective teamwork and seek or offer support as required</p>
3. Work effectively with team members	<p>3.1 Communicate clearly and respectfully with team members, considering the needs of those from diverse backgrounds and roles</p> <p>3.2 Collaborate effectively with team members, including those who are working remotely on workplace issues</p> <p>3.3 Seek and provide assistance and feedback to team members where appropriate</p>
4. Communicate effectively with team leaders	<p>4.1 Receive and confirm understanding of task instructions or directions</p> <p>4.2 Communicate personal commitments in a timely manner</p> <p>4.3 Identify and report any issues preventing the completion of workplace tasks, according to organisational requirements</p> <p>4.4 Seek and act upon feedback to improve personal performance and/or behaviour</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Interact with others	<ul style="list-style-type: none"> • Uses appropriate communication practices when communicating with others • Cooperates and collaborates with team members
Get the work done	<ul style="list-style-type: none"> • Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, seeking assistance in setting priorities • Uses digital technology to find, record or communicate information

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXTW301 Work in a team

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 5.0. Version created to rectify typographical error
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- identify individual and team roles and responsibilities
- plan assigned tasks according to priorities and deadlines, and in accordance with organisational requirements
- contribute to achievement of team goals
- share knowledge, ideas and problems with team members
- act on feedback in a constructive manner
- collaborate with a remote team member on a workplace issue.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- organisational requirements relevant to working in a workplace team:
 - workplace policies
 - codes of conduct
 - organisational reputation and culture
- typical compositions of workplace teams, and the roles and responsibilities of team members within organisations
- techniques for giving and receiving feedback in a constructive manner
- methods to support team members
- key principles of cross-cultural communication and communication with individuals with special needs or disabilities

- methods and tools to work with others remotely:
 - collaboration via phone or mobile
 - collaboration via video conference
 - collaboration via other digital tools or software
- issues that may impact team performance and outcomes
- techniques to collaborate effectively with those working remotely.
-

Assessment Conditions

Mandatory conditions for assessment include:

- A safe working or simulated environment

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBXTW401 Lead and facilitate a team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to effectively lead and facilitate a team in a workplace within any industry.

This unit has a specific focus on the teamwork skills required for team leader or supervisor level (depending on organisational structure) workers with responsibility for others or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cross Sector Skill

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan team outcomes	1.1 Identify common objectives of workplace team, responsibilities and required outcome(s) 1.2 Use performance plans to establish expected outcomes, goals, and behaviours for individual team members in accordance with team objective and relevant policies

	<p>1.3 Select appropriate strategies to ensure team members are accountable for their roles and responsibilities</p> <p>1.4 Plan for contingencies that could impact the team</p>
2. Coordinate team and individuals	<p>2.1 Communicate common team objectives and responsibilities to team members</p> <p>2.2 Allocate tasks to team members based on staff expertise or development potential and provide appropriate instructions</p> <p>2.3 Facilitate open and respectful communication and collaboration between team members, considering the needs of those from diverse backgrounds</p> <p>2.4 Identify opportunities for cross collaboration amongst external and internal teams and individuals</p>
3. Support team	<p>3.1 Provide coaching to staff to enhance workplace culture</p> <p>3.2 Support individuals according to organisational requirements to work towards common team goals</p> <p>3.3 Facilitate team to identify, brainstorm, report and resolve task related issues and inefficiencies</p> <p>3.4 Use problem solving skills to deal with any team, task or individual challenges</p>
4. Monitor team performance	<p>4.1 Measure team member performance against agreed work plans</p> <p>4.2 Provide timely and constructive performance feedback to team members according to expected organisational standards</p> <p>4.3 Identify specific learning and development opportunities to improve team and individual performance and behaviours</p> <p>4.4 Implement action plans to address individual and team training needs</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Interact with others	<ul style="list-style-type: none"> • Uses appropriate communication practices when communicating with team members and facilitating activities • Establishes and builds relationships and rapport with team members to foster a positive team environment • Recognises the perspectives of team members and diversity of

Skill	Description
	opinion, and manages conflict as required
Navigate the world of work	<ul style="list-style-type: none">Understands and explains ethical and legal, regulatory and organisational responsibilities to team
Get the work done	<ul style="list-style-type: none">Plans, organises and implements work activities in line with organisational policies and procedures

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXTW401 Lead and facilitate a team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- assign tasks to team members with appropriate instruction and considering any required contingencies
- provide feedback and assistance to team members
- collate feedback on individual and team performance
- identify and implement development opportunities for others
- manage conflicts and challenges according to organisational requirements.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- organisational requirements relevant to workplace teams:
 - workplace policies
 - codes of conduct
 - organisational reputation and culture
- legislative requirements relevant to the workplace
- facilitation techniques to encourage team cohesion and effectiveness
- mentoring and coaching techniques to support team members
- strategies for conflict resolution and negotiation
- different methods and styles of communication

- key principles of cross-cultural communication and communication with individuals with special needs or disabilities
- professional behaviours to role model as a leader
- typical workplace contingencies that can impact teams:
 - unplanned leave or absence of workers
 - re-allocation of work tasks
 - succession planning for important team roles
- teamwork challenges relevant to performance evidence:
 - difficulties performing tasks
 - conflicts with clients or team members
 - potential risks or safety hazards
 - unethical or inappropriate behaviour.

Assessment Conditions

Mandatory conditions for assessment include:

- A safe working or simulated environment

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

CPCCBC4004 Identify and produce estimated costs for building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to establish estimated costs associated with the acquisition of materials and labour for building and construction projects. It includes factoring in relevant overhead costs and margins.

This unit of competency applies to estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Establish project requirements. | <p>1.1 Read and interpret construction drawings and specifications in conjunction with relevant building and construction regulations, codes and standards.</p> <p>1.2 Identify building site features, type of building and method of construction, and specified building materials.</p> <p>1.3 Establish site facilities, and communication and temporary boundary fencing requirements.</p> <p>1.4 Identify waste removal requirements and apply waste management site fees.</p> <p>1.5 Identify additional project-specific statutory, approvals or compliance costs.</p> |
| 2 Calculate materials and labour costs. | <p>2.1 Produce a materials and consumables quantity list and obtain a price from supplier.</p> <p>2.2 Identify and estimate off-site production costs, including delivery.</p> <p>2.3 Identify numbers of contractors, sub-contractors and employees appropriate for the project and work rates.</p> <p>2.4 Estimate labour hours and calculate labour costs, including on-costs and worker insurance costs.</p> |
| 3 Identify type and cost of physical resources. | <p>3.1 Identify physical resources required for the project.</p> <p>3.2 Determine limitations, conditions, operational costs and timeframes for hire of physical resources.</p> <p>3.3 Obtain supplier prices, including transport of physical resources.</p> <p>3.4 Identify, itemise and cost plant, equipment and machinery.</p> |

- | | | | |
|---|----------------------------------|-----|---|
| 4 | Produce estimated project costs. | 4.1 | Review and compile materials, consumables and off-site production costs and delivery charges. |
| | | 4.2 | Compile labour costs inclusive of rates and entitlements. |
| | | 4.3 | Compile costs of physical resources. |
| | | 4.4 | Apply organisational overhead recovery and margins. |
| | | 4.5 | Produce estimated project costs for inclusion in a tender or bill. |
| | | 4.6 | Manage and mitigate risks associated with estimating project costs. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCBC4004A Identify and produce estimated costs for building and construction projects.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCBC4004 Identify and produce estimated costs for building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by estimating the cost of one residential or commercial building and construction project.

In doing this, the candidate must:

- estimate project costing from construction drawings, specifications and written information
- list physical resources appropriate for the construction of the project
- produce project cost using an appropriate software program.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction regulations
- building and construction standards and codes
- the National Construction Code (NCC)
- organisational policies and procedures
- organisational scope, processes and requirements for using employee and subcontractor labour
- Environmental Protection Authority (EPA) regulations
- construction drawings and specifications
- relevant physical resources and requirements for their operations:
 - earth moving and excavation equipment
 - hoists and lifting equipment
 - mobile cranes
 - compressors
 - generators
 - pumps

- calculating unit costs:
 - construction cost per square metre
 - laying of foundation per metre
 - laying of slabs per square metre
 - masonry walls per square metre
 - laying of steel tray roofing per square metre
 - installation of pipes per metre
 - installation of sanitary ware per unit
 - tiling per square metre
 - painting per square metre
- a range of digitally-based technology and applications to estimate quantities, calculate costs and maintain records
- workplace procedures, workplace safety and environmental requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- building and construction standards and codes
- government building and construction regulations
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- calculating technology, online applications and software to produce building and construction costs.

CPCCCM2007 Use explosive power tools

Modification History

Release 1.

Supersedes and equivalent to CPCCCM2007B Use explosive power tools.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit of competency specifies the skills and knowledge required to safely and effectively operate explosive power tools (EPTs) using explosive charges in a magazine to fasten materials or fix fasteners to bases.

The unit supports the application of knowledge to safely and effectively use a range of indirect action explosive powered fastening tools used in the construction industry.

It applies to workers who work with EPTs in the construction industry. It involves working under supervision in a team environment.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Unit Sector

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan and prepare to set up, operate and maintain indirect action EPTs.	<p>1.1 Review and clarify task to set up, operate and maintain indirect action EPTs.</p> <p>1.2 Review work health and safety (WHS) requirements for the</p>

	<p>task in accordance with safety plans and policies.</p> <p>1.3 Identify safety signage and barricade requirements.</p> <p>1.4 Review environmental requirements for the task in accordance with environmental plans and legislative requirements.</p> <p>1.5 Calculate material quantity requirements.</p> <p>1.6 Check EPTs for operation in accordance with manufacturers' specifications and safety requirements for use of EPT.</p>
2. Set out fasteners.	<p>2.1 Erect identified safety signage and barricades, and fit personal protective equipment (PPE).</p> <p>2.2 Select fastener in accordance with requirements of the job.</p> <p>2.3 Set-out fasteners adhering to minimum distances for set out from edge of substrate material in accordance with requirements.</p> <p>2.4 Position material, check it is level, and temporarily fix or clamp into designed position in accordance with detailed drawings.</p>
3. Operate EPTs.	<p>3.1 Select charge in accordance with the requirements for material, base and penetration.</p> <p>3.2 Install any attachments and accessories to EPT in accordance with manufacturers' specifications and WHS requirements.</p> <p>3.3 Load fastener and charge into EPT in accordance with manufacturers' specification.</p> <p>3.4 Carry out EPT operation and fix fastener into place in accordance with manufacturers' specifications and legislative requirements.</p> <p>3.5 Check depth of fastening penetration and adjust power regulating device in accordance with conditions.</p> <p>3.6 Carry out misfire procedures in accordance with manufacturers' specifications and legislative requirements.</p> <p>3.7 Remove temporary holdings and fixings without damage to material.</p>
4. Maintain EPTs and kit.	<p>4.1 Check safety features of tools for serviceability in accordance with manufacturers' specifications.</p> <p>4.2 Clean and lubricate tools in accordance with manufacturers' specifications.</p> <p>4.3 Carry out periodic maintenance service in accordance with manufacturers' specifications.</p> <p>4.4 Replenish diminished stocks of charges and fasteners to designed effectiveness of EPT kit.</p> <p>4.5 Check and complete logbook and record maintenance in</p>

	accordance with manufacturers' specifications.
5. Secure and store EPT equipment and charges.	<p>5.1 Store used charges in designated container in accordance with requirements.</p> <p>5.2 Store unused fasteners, the EPT and attachments in a carry case in line with manufacturers' specifications.</p>
6. Clean up after operating EPTs.	<p>6.1 Clear work area and dispose of, re-use or recycle materials in accordance with legislation, regulations, codes of practice and task requirements.</p> <p>6.2 Clean, check, maintain and store tools and equipment in accordance with manufacturers' specifications and workplace requirements.</p>

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

- reading skills to:
 - interpret legislative requirements including those of Australian Standards and the National Construction Code (NCC)
- numeracy skills to:
 - apply measurements and calculations to fastener set-out
- oral communication skills to:
 - use questioning to identify and confirm requirements
 - discuss cause of problems
 - report work site hazards, including faults in tools, equipment and materials.

Unit Mapping Information

Supersedes and is equivalent to CPCCCM2007B Use explosive power tools.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCCM2007 Use explosive power tools

Modification History

Release 1.

Supersedes and equivalent to CPCCCM2007B Use explosive power tools.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must use explosive power tools (EPTs) to fix metal and timber to one steel base, one concrete base, and one masonry base.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional legislation and regulations relating to setting up, operating and maintaining indirect action EPTs including those for work health and safety (WHS), and protection of the environment, including:
 - job safety analyses (JSAs)
 - safe work method statements (SWMSs)
 - safety data sheets (SDSs)
 - safety manuals and instructions for plant, tools and equipment
 - signage and barricades
 - personal protective equipment (PPE)
 - environmental and work site safety plans
- requirements of Australian Standards and the National Construction Code (NCC) relating to setting up, operating and maintaining indirect action EPTs
- functions, operations and limitations of EPTs
- EPT materials
- EPT charges and fasteners
- EPT attachments, including channel, rebate and other manufacturer attachments
- EPT, fastener and charge manufacturers' specifications
- processes for interpreting drawings and using information for:
 - setting-out fasteners, including:
 - regulated minimum distances

- bases, including concrete, masonry or steel
- positioning material
- processes for:
 - using EPTs, including:
 - stripping and assembling tools
 - completing log of serviceability
 - maintaining and cleaning tools
 - selecting charges and fasteners applicable to the base material and material being fixed
 - misfire procedures
 - using attachments
 - complying with storage and security regulations and work health and safety (WHS) requirements for the working environment
 - selecting signage
 - test fire
 - maintaining EPTs and kits
 - securing and storing EPT equipment and charges
- materials storage and environmentally friendly waste management
- processes for the calculation of material requirements
- security and storage procedures for equipment and charges
- workplace and equipment safety requirements.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- industry-standard indirect action EPTs, attachments, fasteners and charges
- specifications for tasks requiring use of EPTs
- appropriate documents, materials, tools equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCDE3014 Remove non-friable asbestos

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Rectified pre-requisite unit.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCDE3014A Remove non-friable asbestos.
Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the outcomes required to remove non-friable asbestos containing material (ACM).

It includes preparing, containing and removing non-friable ACM, and knowledge of decontamination and disposal requirements.

Site location can be a real workplace or simulated environment that may include domestic or commercial premises, a demolition site, a new worksite or an existing structure being renovated, extended, restored or maintained.

Project sites for removal of non-friable asbestos include construction sites, ships and soils.

The model work health and safety (WHS) regulations and the Code of Practice: How to safely remove asbestos (2018) requires workers to hold certification for the class of licensed asbestos removal work they will be undertaking. Completion of this unit of competency is certification to undertake non-friable (Class B) removal work.

Occupational licenses are required nationally. This unit is required for all ACM removal workers engaged in the removal of more than ten square metres of non-friable ACM.

Candidates are advised to consult with the relevant state and territory regulatory authorities to confirm specific jurisdictional licensing requirements to remove non-friable ACM.

Pre-requisite Unit

CPCCWHS1001 Prepare to work safely in the construction industry

Unit Sector

Demolition

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|----------------------------------|---|
| 1 Prepare for asbestos removal. | <ul style="list-style-type: none">1.1 Obtain work instructions and participate in review of asbestos removal control plan (ARCP) and safe work method statements (SWMS).1.2 Gather safety requirements and data from an on-site assessment and asbestos register where available.1.3 Use information sources to ensure the ARCP and SWMS are site-specific for the removal of asbestos materials.1.4 Select tools, equipment and personal protective equipment (PPE) consistent with job requirements to carry out tasks, check for serviceability, and rectify or report faults prior to commencement.1.5 Notify regulator, occupants, neighbours and other affected parties according to legislation and within limits of own responsibility and code of practice.1.6 Contribute to the preparation and use of an emergency plan, within limits of own responsibility and according to legislative and company requirements.1.7 Contribute to processes required to undertake air monitoring and to meet health monitoring requirements in line with level of authority and responsibility and regulatory requirements. |
| 2 Prepare asbestos removal site. | <ul style="list-style-type: none">2.1 Identify location of non-friable asbestos materials and confirm with supervisor location of site boundaries.2.2 Implement signage and barricade requirements to delineate the asbestos removal site according to ARCP.2.3 Prepare and place materials and equipment required for removal of ACM from site. |
| 3 Set up asbestos work area. | <ul style="list-style-type: none">3.1 Designate boundaries of asbestos work area according to ARCP requirements.3.2 Set up decontamination according to ARCP. |

- | | | |
|--------------------------------------|-----|--|
| | 3.3 | Set up asbestos waste storage and waste transit route according to ARCP. |
| | 3.4 | Undertake processes to ensure the safety of the site, including deactivating or securing utilities where necessary prior to commencing work. |
| 4 Remove non-friable asbestos. | 4.1 | Fit-check respiratory protective equipment (RPE) and fit PPE. |
| | 4.2 | Wet down or spray work area with particle binder. |
| | 4.3 | Carry out asbestos removal ensuring airborne asbestos fibres are kept to a minimum (i.e. appropriate tools, wet removal, minimise breakage, good handling techniques). |
| | 4.4 | Contain, wrap or otherwise seal the wet asbestos, place into removal bags or bins, seal and label according to ARCP. |
| 5 Carry out decontamination process. | 5.1 | Carry out decontamination of the work area and tools according to ARCP. |
| | 5.2 | Carry out personal decontamination according to ARCP. |
| 6 Clean up work area. | 6.1 | Remove asbestos waste materials and equipment from the area according to ARCP. |
| | 6.2 | Store tools, plant and equipment according to manufacturer recommendations and regulatory requirements to ensure site is ready for clearance inspection. |
| | 6.3 | Take steps to ensure clearance inspection requirements are met, within the limits of own responsibility and to ensure clearance certificate is gained from a competent person or licensed asbestos assessor. |
| 7 Complete regulatory processes | 7.1 | Ensure clearance inspection is undertaken prior to removing signage, plant and equipment. |

- 7.2 Contribute to the preparation and use of documentation for regulatory notification processes, within limits of own responsibility and according to legislative and company requirements.
- 7.3 Provide stakeholders with clearance inspection certificate prior to reoccupation, as required.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCDE3014A Remove non-friable asbestos.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCDE3014 Remove non-friable asbestos

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Rectified pre-requisite unit.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCDE3014A Remove non-friable asbestos.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must undertake two separate non-friable asbestos removal and disposal tasks.

This must include:

- planning and preparing for removal of non-friable asbestos
- preparing non-friable asbestos removal site and removal area
- isolating non-friable removal area
- carrying out non-friable asbestos removal process
- carrying out non-friable asbestos decontamination process
- cleaning up removal work area after removal of non-friable asbestos.

In doing this, the candidate must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- the compliance requirements of the relevant Australian Standards, Building Code of Australia (BCA), model codes of practice, environmental and work health and safety (WHS) legislation
- range of materials manufactured using asbestos, the type of asbestos used in each material, and the usual applications associated with the material, together with an understanding of:
 - health effects caused by exposure to non-friable asbestos containing material (ACM) and requirements for safe handling and removal
 - health impacts on the community and requirements for safe handling and disposal

- hazards, including health hazards, associated with non-friable ACM and circumstances that may change the nature of ACM from non-friable to friable
- safe work methods for the removal of non-friable asbestos
- requirements of current legislation and standards
- handling requirements of differing types of asbestos materials
- work area procedures
- risk assessment processes and contingency planning, job safety analysis (JSA), safety data sheets (SDS), asbestos registers and register amendments and safe work method statements (SWMS) related to removal of non-friable asbestos
- materials storage and hazardous waste management
- method of operation, and cleaning, use and maintenance requirements of equipment
- techniques associated with removing asbestos
- types, characteristics, uses and limitations of plant and equipment involved in enclosing and removing asbestos
- workplace and equipment safety requirements, including other associated hazard areas
- purpose and application of documentation for notification; and use of asbestos removal control plan (ARCP) and clearance inspections.
-

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the candidate demonstrating competency has access to:

- worksite/s and specifications for removal of non-friable asbestos
- appropriate documents, materials, tools, equipment and personal protective equipment (PPE) currently approved for use in industry, as per codes of practice, Australian Standards, requirements of legislation, regulations and requirements of workplace policies and as required by state, territory and Commonwealth regulators.

CPCCDE3014A Remove non-friable asbestos

Modification History

New to CPC08

Replaces unit CPCCDE3012A Encapsulate and remove asbestos

Not equivalent

Unit Descriptor

This unit of competency specifies the outcomes required to remove non-friable asbestos containing material (ACM). The unit includes preparing, containing and removing non-friable ACM, and includes knowledge of decontamination and disposal requirements.

Application of the Unit

Site location for work may be either domestic or commercial, and may be a demolition site, a new work site or an existing structure being renovated, extended, restored or maintained. Project sites may be construction sites and may also include ships, soils in relation to the non-friable asbestos removal process, and fences.

Licensing/Regulatory Information

Occupational licenses are required nationally.

Work must be completed according to relevant legislative, industry, customer and organisational requirements, including work health and safety (WHS) policies and procedures.

Regulatory mechanisms apply to this unit. This unit is required for all ACM removal workers engaged in the removal of non-friable ACM. Candidates are advised to check for regulatory requirements.

Pre-Requisites

CPCCOHS1001A Work safely in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|---|---|
| 1 | Prepare for asbestos removal. | <p>1.1 Work instructions and asbestos removal control plan (ARCP) are obtained and confirmed for preparation purposes.</p> <p>1.2 <i>Safety requirements</i> and data gathered from an on-site assessment, an asbestos register where available, and other information sources are used to prepare for a safe and compliant removal process.</p> <p>1.3 <i>Tools, equipment</i> and <i>personal protective equipment</i> (PPE) consistent with job requirements are selected to carry out tasks and checked for serviceability; and faults are rectified or reported prior to commencement.</p> <p>1.4 ARCP is accessed according to legislative and company requirements, and understood.</p> |
| 2 | Prepare asbestos removal area and removal site. | <p>2.1 <i>Non-friable asbestos containing materials</i> to be removed are identified, referring to the asbestos register or following clarification by an approved competent person as required and according to <i>workplace procedures</i>.</p> <p>2.2 Signage and barricade requirements are identified and implemented to delineate the work area.</p> <p>2.3 Decontamination procedure is tested according to workplace procedures.</p> <p>2.4 Materials and equipment required for removal of ACM</p> |

- from *project sites* are identified, checked and prepared for operation.
- 2.5 Processes are undertaken to ensure the safety of the site, including deactivating or securing *utilities* where necessary prior to commencing work.
- 3 Isolate removal site.
- 3.1 ***Requirements to isolate the removal site*** safely are identified from the ARCP, and implemented according to legislative and company requirements.
- 3.2 Boundaries of asbestos removal site are designated according to ARCP requirements.
- 3.3 Occupants, neighbours and other affected parties are notified according to legislation and within limits of own responsibility and the code of practice.
- 4 Carry out asbestos removal process.
- 4.1 ***Asbestos is removed*** from work area and work site as specified by the supervisor and in the appropriate manner, ensuring the safe use of tools and according to ARCP, legislative and regulatory requirements, and codes of practice.
- 4.2 Removed ***asbestos is contained***, wrapped or otherwise sealed, and placed into removal bags or bins, sealed, labelled and, where loaded into a truck, the tray or skip is lined prior to removal of ACM from site according to regulatory requirements and company standards.
- 5 Carry out decontamination process.
- 5.1 Decontamination of the work area and tools is carried out according to workplace procedures, ARCP and regulatory requirements.
- 5.2 ***Decontamination of asbestos removal workers is carried out*** according to workplace procedures, ARCP and regulatory requirements.
- 5.3 Asbestos removal and decontamination equipment is removed from the area according to ARCP and regulatory requirements.

6	Clean up work site.	6.1	Work area is cleared and materials disposed of according to legislation, regulations, codes of practice and job specification.
		6.2	Plant, tools and equipment are cleaned, decontaminated, checked, maintained, removed from the work area, and stored according to manufacturer recommendations and regulatory requirements.
7	Contribute to and use documentation in line with regulatory requirements.	7.1	Contribution is made within limits of own responsibility to the preparation and use of documentation for regulatory notification processes according to legislative and company requirements.
		7.2	Steps are taken within limits of own responsibility to ensure clearance inspection requirements are met and clearance certificate is gained from a competent person or licensed asbestos assessor.
		7.3	Contribution is made within limits of own responsibility to the preparation and use of an emergency plan according to legislative and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and appropriate level of language skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and apply:
 - documentation from a variety of sources
 - drawings and specifications
 - use language and concepts appropriate to cultural differences

- initiative and enterprise skills to:
 - evaluate own actions and make judgements about performance and necessary improvements
 - identify and report faults in tools, equipment and materials to appropriate personnel
- planning and organising skills to:
 - set out work
 - recognise procedures, follow instructions and contribute to workplace responsibilities, such as current environmental and safety systems and the ARCP
- teamwork skills to:
 - coordinate own work with others to action tasks
 - relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- self-management skills to:
 - work independently and in teams to read and interpret relevant documentation and to prepare for non-friable asbestos removal tasks according to the recommended safe work method and ARCP
 - set up the asbestos removal area and removal site according to the safe work method and ARCP
 - check, fit and use PPE, and hand and power tools safely
 - apply general WHS procedures for construction work, including:
 - identifying, avoiding and eliminating electrical hazards
 - working safely at heights and in confined spaces
 - applying safe work practices to the use of tools appropriate to ACM removal
 - handling hazardous materials safely
 - applying safe work methods for the removal of non-friable asbestos
- follow correct cleaning, decontamination and disposal procedures

Required knowledge

- range of materials manufactured using asbestos, the type of asbestos used in each material, and the usual applications associated with the material, together with an understanding of:
 - health effects caused by exposure to ACM and requirement for safe handling and removal
 - health impacts on the community and requirement for safe handling and disposal
- general WHS procedures for construction work as required, including identifying and mitigating risks
- health hazards associated with friable ACM and circumstances that may change the nature of ACM from non-friable to friable, such as:
 - weathering
 - wear and tear
 - application of tools and equipment
 - accidental damage

- licensing requirements for the use of specific equipment, such as excavators
- safe work methods for the removal of non-friable asbestos
- requirements of current legislation and standards relating to asbestos safety, and the decontamination, transport and disposal of asbestos waste
- general construction terminology
- handling requirements of differing types of asbestos materials
- hazards associated with removal processes
- work area procedures
- job safety analysis (JSA) and safe work method statements (SWMS) if required for construction
- safety data sheets (SDS)
- materials storage and hazardous waste management
- method of operation, and cleaning, use and maintenance requirements of equipment
- plans, drawings and specifications, asbestos registers and register amendments
- quality requirements relating to the removal of non-friable asbestos
- risk assessment processes and contingency planning relating to the removal of non-friable asbestos
- techniques associated with enclosing and removing asbestos
- types, characteristics, uses and limitations of plant and equipment involved in enclosing and removing asbestos
- workplace and equipment safety requirements
- purpose and application of documentation for notification; and use of ARCP and clearance inspections

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, providing that simulated or project-based assessment techniques fully replicate workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person should demonstrate the ability to: <ul style="list-style-type: none">• obtain and apply work instructions for the safe and correct removal of non-friable asbestos• set up the work area and test equipment for use in the removal process of non-friable asbestos• isolate the site prior to removal, complying with regulatory requirements

	<ul style="list-style-type: none"> remove non-friable asbestos safely and comply with regulatory requirements contain the ACM and ensure its handling and disposal are safe and comply with requirements decontaminate self, work equipment, and the work site safely and correctly complete documentation that supports the removal process within limits of own responsibility.
Context of and specific resources for assessment	<p>This unit is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.</p> <p>Assessment is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> an induction procedure and requirement realistic tasks or simulated tasks covering the mandatory task requirements relevant specifications and work instructions tools and equipment appropriate to applying safe work practices support materials appropriate to activity workplace instructions relating to safe work practices and addressing hazards and emergencies research resources, including industry-related systems information safety data sheets. <p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p>
Method of assessment	<p>Assessment methods must:</p> <ul style="list-style-type: none"> satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application reinforce the integration of employability skills with workplace tasks and job roles confirm that competency is verified and able to be transferred to other circumstances and environments.

	<p>Validity and sufficiency of evidence requires that:</p> <ul style="list-style-type: none"> • competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace • where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge • all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence. <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.</p>
--	--

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Safety requirements</i> will be specified from a range of sources that include:</p>	<ul style="list-style-type: none"> • asbestos removal control plan • company policies and procedures, including: <ul style="list-style-type: none"> • accessing toilets and other amenities • managing work hours to minimise risk from tiredness • working in heat and avoiding heat stress • JSA • legislation and regulations, including the Code of Practice for the Safe Removal of Asbestos • operating manuals and specifications for materials and equipment • SWMS • asbestos register.
--	---

<p>Tools and equipment may require separate licensing for use and may include:</p>	<ul style="list-style-type: none"> • high efficiency particulate air (HEPA) vacuum cleaners to comply with AS3544-1988 and AS4260-1997 as amended from time to time • atomiser and water spray bottles (not pressurised) • hoses and spray fittings • barricades, including tape, para-webbing and fencing • bars (crow and pinch) • bolt cutters • buckets • cold chisels • excavators • hand drills (manual and low-speed only) • fire extinguishers • hammers • hand tools (full kit) • ladders conforming to construction regulations • scaffolds • scrapers • shovels and spades • staple guns.
<p>Personal protective equipment will be specified to the requirements of the job and must include:</p>	<ul style="list-style-type: none"> • protective clothing, such as: <ul style="list-style-type: none"> • disposable coveralls with fitted hood and cuffs • safety footwear (pull-on, not lace-up) • protective eyewear • disposable or protective gloves • correct face fitting and use of respiratory protective equipment (RPE) • respiratory protection required for the job, including class P1 and P2 face masks • spare sets of PPE.
<p>Materials may include:</p>	<ul style="list-style-type: none"> • approved and branded plastic bags, including heavy-duty polythene bags (200 µm minimum thickness) • duct tape • foam infill spray • acrylic paint to seal ACM • polyvinyl alcohol (PVA) adhesive as spray to seal ACM • rags or other material wipes (used once) • signs • 200 µm unused (not recycled) plastic sheeting or drop sheet.
<p>Non-friable asbestos containing materials</p>	<ul style="list-style-type: none"> • asbestos cement • asbestos cement moulded guttering • asbestos cement sheets

<p>may include:</p> <p>Note:</p> <ul style="list-style-type: none"> Non-friable asbestos is also known as bonded asbestos ACM notionally listed as non-friable may become friable due to weathering or damage 	<ul style="list-style-type: none"> asbestos tiles bitumastic felts and materials adhesives and glues compressed asbestos cement panels floor vinyl covering mortar resinous backing board sealant mastic tape.
<p>Workplace procedures may include:</p>	<ul style="list-style-type: none"> environmental requirements, such as: <ul style="list-style-type: none"> clean-up management dust and noise management notification to occupants, neighbours and other affected parties sedimentation control vibration management waste management, including the safe disposal of ACM quality requirements, such as: <ul style="list-style-type: none"> internal company quality policy and standards manufacturer specifications relevant regulations, including Australian standards workplace operations and procedures.
<p>Project sites may include:</p>	<ul style="list-style-type: none"> residential, commercial, industrial and public buildings plant, equipment and fire boards (e.g. friction plant and gaskets) demolition sites electricity supply authority or work site fences ships and other forms of transport sites for new building development.
<p>Utilities may include:</p>	<ul style="list-style-type: none"> air conditioning electricity water services.
<p>Requirements to isolate the removal site:</p>	<ul style="list-style-type: none"> will reflect the nature of the site must comply with legislative requirements and the ARCP may include: <ul style="list-style-type: none"> using barriers using signage ensuring occupants are aware of the need to stay away

	<p>from the removal site</p> <ul style="list-style-type: none"> ensuring isolation has occurred by a licensed electrician and that this is documented.
<p><i>Asbestos is removed</i> in a manner that complies with legislative and company requirements, and may include:</p>	<ul style="list-style-type: none"> wet method (most preferred): <ul style="list-style-type: none"> saturate material by gently spraying with water and surfactant mixture (PVA in water ratio of 5:1) remove materials in sections with the minimum amount of cutting and separation and using hand tools as appropriate place removed sections in appropriate containers or packaging Note: The application of the wet asbestos removal method requires the disconnection of the building's power supply and use of a temporary power source fitted with earth leakage and residual current device (RCD) dry method (least preferred): <ul style="list-style-type: none"> to be used only where conditions prohibit use of the wet spray method, i.e. in the vicinity of electrical conductors fully encapsulate the work area with plastic sheeting use air respirators appropriate to the job ensure removal methods minimise the production of airborne material, for example the use of asbestos vacuum cleaners for shadow vacuuming (Note: domestic vacuum cleaners even fitted with a HEPA filter are unsuitable) place removed material immediately in appropriate containers and dampen with sprayed mist.
<p><i>Asbestos is contained</i> and sealed using a range of techniques, including:</p>	<ul style="list-style-type: none"> double-bagging using heavy-duty polythene bags (200 µm minimum thickness) labelled with an appropriate warning using drums or bins in good condition with well-fitting lids labelled with appropriate warning signage or labels. <p>Note: If too large for a bin or bag, a skip or vehicle tray may be used provided it is double-lined with heavy-duty thick plastic sheeting. When ACMs are loaded on a truck tray, the ACMs must be wetted down and then fully wrapped and sealed with a layer of 200 µm sheeting or bagged. Labelling must occur.</p>
<p><i>Decontamination of asbestos removal workers is carried out:</i></p>	<ul style="list-style-type: none"> using a range of techniques, including: <ul style="list-style-type: none"> 'buddy' vacuuming decontamination unit for large non-friable removals in certain circumstances wet wiping.
<p><i>Documentation may</i></p>	<ul style="list-style-type: none"> air-monitoring results, where necessary

include:	<ul style="list-style-type: none">• asbestos register• notification to regulator of asbestos removal work• clearance certificates• asbestos removal control plans• procedures for the WHS management system and the emergency plan• equipment test reports• health-monitoring program• RPE face fits• competency training certificates.

Construction

CPCCLDG3001 Licence to perform dogging

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Minor edits to formatting.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCLDG3001A Licence to perform dogging.
Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to safely perform dogging work. Dogging consists of the application of slinging techniques to move a load, including the selection and inspection of lifting gear, and the directing of a plant operator in the movement of a load when the load is out of sight of the operator.

Dogging work is conducted in the construction industry and other industries where loads are lifted and moved using cranes or hoists.

Completion of the general construction induction training program, specified in the Safe Work Australia model Code of Practice: Construction Work, is required by anyone carrying out construction work. Achievement of CPCCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Competence in this unit does not in itself result in a licence. A licence is obtained after competence is assessed under applicable Commonwealth, state or territory work health and safety (WHS) regulations.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the Performance criteria describe what needs to be done to

essential outcomes.	demonstrate achievement of the element.
1 Plan task.	<ul style="list-style-type: none">1.1 Review task instructions, consult with relevant persons to seek clarification as required, and obtain relevant workplace information.1.2 Obtain and interpret information, including safe work method statements (SWMSs), required to ensure that activities are performed in compliance with workplace-specific and safe work requirements.1.3 Obtain and interpret information required to ensure that equipment inspection, use, maintenance and storage complies with manufacturer requirements.1.4 Identify workplace and task-specific hazards and determine required risk controls and safety measures and equipment, including signs and barricades, personal protective equipment (PPE), and fall prevention and fall arrest equipment.1.5 Calculate load weight, dimensions and centre of gravity.1.6 Determine lifting and slinging points.1.7 Calculate derated working load limit (WLL) of lifting equipment resulting from selected slinging techniques.1.8 Establish required communication methods with plant operator.
2 Select and inspect equipment.	<ul style="list-style-type: none">2.1 Select risk controls and equipment, including fall prevention and fall arrest equipment, and check that it is working and fit for purpose.2.2 Select and check PPE.2.3 Select lifting equipment and gear, inspect for defects, and isolate, tag out, report and record defective items.2.4 Select communication equipment and check that it is working and fit for use.
3 Set up task.	<ul style="list-style-type: none">3.1 Establish and maintain communication with relevant persons to ensure lift plan and risk controls are communicated clearly, including any impact on other

- workplace activities.
- 3.2 Ensure risk controls and safety measures and equipment have been put in place.
 - 3.3 Prepare lifting equipment and gear for safe use.
 - 3.4 Consult with relevant persons to ensure that the load destination is stable, able to bear the load and prepared for safe access and landing.
 - 3.5 Attach and secure lifting equipment and gear to the plant-designated lifting point.
- 4 Perform task.
- 4.1 Direct plant designated lifting point/hook, over the load's centre of gravity.
 - 4.2 Attach and secure lifting equipment and gear to the load using slinging techniques.
 - 4.3 Attach and secure tag line as required to guide the load.
 - 4.4 Use signals and radio communication methods to direct the load movement, both in and out of sight of the plant operator.
 - 4.5 Conduct test lift to check the security of the slings and the stability of the load, lifting equipment and gear.
 - 4.6 Direct the movement of the load in accordance with lift plan, including lowering and landing.
 - 4.7 Disconnect lifting gear from the load and direct the positioning of crane or hoist for next task.
- 5 Pack up and clean up.
- 5.1 Remove excess materials from work area.
 - 5.2 Inspect lifting equipment and gear for defects, and isolate, label and report defective items.
 - 5.3 Store lifting equipment and gear in accordance with workplace requirements.
 - 5.4 Remove risk controls and safety measures and equipment.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCLDG3001 Licence to perform dogging

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Minor edits to formatting.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCLDG3001A Licence to perform dogging.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by slinging and directing the movement of at least five loads of differing shapes, sizes and weights.

The loads must be moved by a slewing mobile crane of a maximum rated capacity of at least seven tonnes.

The candidate must:

- check relevant workplace information, including safe work method statements (SWMSs), and equipment service and maintenance records and checklists
- perform all activities in compliance with safe work practices and workplace-specific procedures and policies, and check, use, maintain and store equipment in compliance with manufacturer requirements
- identify hazards and use appropriate risk controls and safety measures and equipment
- determine load weight and travel path in consultation with crane operator
- select and inspect appropriate lifting gear and apply slinging techniques appropriate to the type of load, its mass and centre of gravity
- identify the working load limit (WLL) tags of the lifting equipment and gear and calculate the deration of the WLL resulting from the slinging techniques applied
- make temporary connections to loads using fibre or synthetic ropes
- use radio communication and hand and whistle signals to guide the crane operator, including when the load is out of sight of the crane operator.

The candidate must use the following bends and hitches when slinging and directing the movement of loads:

- single sheet bend
- clove hitch

- rolling hitch
- bowline.

Load types must include:

- stillage containing at least ten scaffolding standards or loose steel pipes of 200 kg or more
- ten loose steel pipes, of at least 2 m length, that need wrapping
- an uneven load of at least two tonnes requiring slinging
- steel plate of at least 1.5 m x 2 m x 25 mm
- a round load with a minimum diameter of 300 mm and minimum length of 3 m.

The candidate must direct each load through at least 180 degrees of the crane's slewing radius.

Each of the following must be used at least once:

- flexible steel wire rope (FSWR) sling
- synthetic sling
- chain sling (including shortener)
- spreader bar or lifting beam
- tag line
- shackles
- eyebolts
- plate clamps.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- safe work requirements for dogging under Commonwealth and state or territory work health and safety (WHS) legislation, standards and codes of practice
- workplace information, including legislative requirements covered by:
 - SWMSs
 - permits and certifications
 - information about equipment:
 - service and maintenance checklists and records
 - manufacturer specifications and manuals
 - workplace procedures, including emergency plans and incident reporting
- hazard identification and mitigation strategies, including the hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - use of personal protective equipment (PPE)
- hazards commonly encountered in dogging:

- instability of landing surfaces
- overhead and underground hazards
- insufficient lighting
- traffic
- weather
- pedestrian traffic
- work at heights
- risk controls and equipment:
 - traffic management plan
 - traffic barricades and control
 - exclusion zones
 - pedestrian barricades
 - PPE
 - lights
 - fall prevention and fall arrest equipment
- PPE:
 - hard hat
 - safety boots
 - gloves
 - high-visibility clothing
 - breathing, hearing, sight and skin and sun protection
- hand, whistle and two-way radio communication, including signals for:
 - stop
 - hoist up and down
 - luff boom up and down
 - telescope in and out
 - slew left and right
- selection, inspection, care, handling, application, limitations and storage of dogging equipment and gear:
 - (FSWR sling
 - synthetic sling
 - chain sling (including shortener)
 - spreader bar or lifting beam
 - tag line
 - shackles
 - eyebolts
 - plate clamps
- slinging techniques
- load destination stability, load capacity and safe access for walking and unpacking the load:

- ground
- loading platforms
- suspended floors
- vehicles
- mathematical processes for calculating deration of WLL of lifting equipment and gear due to slinging techniques
- methods of making temporary connections to loads using fibre and synthetic ropes:
 - single sheet bend
 - clove hitch
 - rolling hitch
 - bowline.

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Only assessors who are accredited in the licence class by the appropriate WHS regulator for the jurisdiction governing the licence are permitted to conduct the final high-risk work licence assessment. The final licence assessment will only be undertaken with candidates who have completed training and been formally assessed against all elements in this unit.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations, including:

- the use of full-scale, industry-standard equipment, not simulators
- performance of tasks within the timelines expected in a workplace.

Candidates must have access to:

- a slewing mobile crane of at least seven tonnes maximum rated capacity, and lifting equipment and gear in a safe and compliant condition
- loads and equipment required to perform the tasks specified in the Performance Evidence
- a licensed crane operator to undertake lifting activity
- workplace information and records, including:
 - equipment and maintenance checklists
 - record system for service and maintenance history
 - incident reports
 - workplace procedures, including emergency plan
 - equipment manuals and manufacturer specifications.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCLRG3001 Licence to perform rigging basic level

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCLRG3001A Licence to perform rigging basic level. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to safely perform basic rigging work.

Riggers use mechanical load shifting equipment and associated gear to move, place or secure loads, including plant, equipment or members of a structure. Riggers ensure the stability of those members and set up and dismantle hoists.

This unit applies to rigging work involving:

- structural steel erection
- hoists
- pre-cast concrete members of a structure
- safety nets and static lines
- mast climbing work platforms
- perimeter safety screens and shutters
- cantilevered crane loading platforms.

Rigging work is undertaken in construction and other industries where load shifting equipment is used to move, place or secure loads.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of CPCCWHS1001 *Prepare to work safely in the construction industry* meets this requirement.

Competence in this unit does not in itself result in a licence. A licence is obtained after competence is assessed under applicable Commonwealth, state or territory work health and safety (WHS) regulations.

Pre-requisite Unit

CPCCLDG3001 Licence to perform dogging

Unit Sector

Licencing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---------------------------------|--|
| 1 Plan task. | 1.1 Review task instructions, consult with relevant persons to seek clarification as required, and obtain relevant workplace information. |
| | 1.2 Obtain and interpret information, including safe work method statements (SWMSs), required to ensure that activities are performed in compliance with workplace-specific and safe work requirements. |
| | 1.3 Obtain and interpret information required to ensure that equipment inspection, use, maintenance and storage complies with manufacturer requirements. |
| | 1.4 Identify workplace and task-specific hazards and determine required risk controls and safety measures and equipment, including signs and barricades, personal protective equipment (PPE), and fall prevention and fall arrest equipment. |
| | 1.5 Identify methods of moving and placing tools, equipment and materials to minimise the risk of falling objects, to avoid inappropriate carrying on ladders and to minimise hazardous manual tasks. |
| | 1.6 Identify required rigging equipment and associated gear. |
| | 1.7 Calculate loads associated with mechanical load shifting equipment and associated gear required to erect and dismantle structures and plant. |
| | 1.8 Establish required communication methods with relevant persons. |
| 2 Select and inspect equipment. | 2.1 Select risk controls and equipment, including fall prevention and fall arrest equipment, and check that it is working and fit for purpose. |
| | 2.2 Select and check PPE. |

- 2.3 Select rigging equipment and associated gear, inspect for defects, and isolate, tag out, report and record defective items.
 - 2.4 Select communication equipment and check that it is working and fit for use.
- 3 Set up task.
 - 3.1 Establish and maintain communication with relevant persons to ensure task plan and risk controls are communicated clearly, including any impact on other workplace activities.
 - 3.2 Ensure risk controls and safety measures and equipment have been put in place, including the fitting, adjusting and anchoring of fall protection equipment.
 - 3.3 Consult with relevant persons to ensure that ground and foundation have been assessed as suitable for task.
 - 3.4 Consult with relevant persons to ensure that the structure has been assessed as suitable for load bearing task.
- 4 Undertake basic rigging activities.
 - 4.1 Erect and dismantle all structures and plant while maintaining stability, in accordance with workplace and manufacturer requirements.
 - 4.2 Erect structural steel.
 - 4.3 Erect pre-cast concrete members of a structure, or lift and install a series of scenery panels.
 - 4.4 Erect and dismantle a safety net and static line.
 - 4.5 Erect and dismantle a hoist or mast climbing work platform.
 - 4.6 Install and dismantle a perimeter safety screen or shutter.
 - 4.7 Install and dismantle a cantilevered crane loading platform.
- 5 Complete task.
 - 5.1 Remove excess materials from work area.
 - 5.2 Inspect structures, plant, equipment and gear for defects,

and isolate, tag out and report defective items.

- 5.3 Store plant, equipment and gear in accordance with workplace requirements.
- 5.4 Remove risk controls and safety measures and equipment.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCLRG3001A Licence to perform rigging basic level.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCLRG3001 Licence to perform rigging basic level

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCLRG3001A Licence to perform rigging basic level. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by safely performing rigging tasks at a basic level, including:

- erecting and dismantling a portal frame of structural steel consisting of columns (150 UC 29.8 kg/m), beams (minimum 200 UB 29.8 kg/m) and braces in accordance with engineering detail. It must include:
 - appropriate structural bolts, nuts, washers, purlins and girts
 - beams installed at a height of at least 4 m
 - suitable access and working platform (e.g. elevated work platform, mobile scaffold, scissor lift, portable industrial grade ladder)

It must be packed and plumbed and include temporary bracing during erection and dismantling. Hand tools and working at height safety equipment, including harness, lanyard and inertia reel, must be used

- installing and removing a series of three retaining wall panels, each panel being not less than 4 m high by 2 m wide and not less than 1.5 tonnes. One panel must be set at a 90-degree angle to one of the other panels - candidates must identify any defective lifting equipment
- installing and removing a safety (catch) net with minimum dimensions of 3 m x 4 m in accordance with manufacturer specification and engineering detail on portal frame - candidates must identify any defective nets
- installing, using and removing a static line at least 2.1 m above the beams on portal frame, in accordance with manufacturer specifications and engineering detail – candidates must identify any defective static lines and associated equipment
- installing and removing a cantilevered materials hoist (1 or 2 barrow) or a mast climbing work platform of at least three mast sections and tied in accordance with specifications
- installing and dismantling a perimeter safety screen or shutter of at least 4 m x 2 m in accordance with manufacturer specifications and engineering detail
- installing and dismantling a cantilevered crane loading platform at a height of at least 4 m with secure gates and handrails in accordance with manufacturer specifications and engineering detail

- setting up and operating a powered winch to move a load of at least 1 tonne
- using the following splice and hitch techniques:
 - eye splice
 - becket hitch.

The candidate must:

- check relevant workplace information, including safe work method statements (SWMSs) and equipment service and maintenance records and checklists
- perform all activities in compliance with workplace-specific, safe work and manufacturer requirements
- use the following associated gear:
 - beam clamps or pipe clamps or plate clamps
 - tag lines
 - flexible steel wire rope (FSWR)
 - chains
 - wire and synthetic slings
 - shackles
 - wedge sockets
 - eye bolts
 - rope grips
 - turnbuckles
 - chain blocks
 - sheave blocks
 - spreader bars or lifting beam
 - levers/podgers
 - skates/rollers
 - wedges
 - props
 - powered winches
 - snatch blocks
 - wire rope winches
 - lever pull (e.g. come-alongs)
- identify hazards and use appropriate risk controls and safety measures and equipment
- safely erect and dismantle structures and plant.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- safe work requirements for rigging under Australian Standards and Commonwealth and state or territory work health and safety (WHS) legislation, regulations, standards and codes of practice
- workplace information, including legislative requirements covered by:

- SWMSs
- permits and certifications
- information about equipment:
 - service and maintenance checklists and records
 - manufacturer and supplier specifications and manuals
- workplace procedures, including emergency plans and incident reporting
- hazard identification and mitigation strategies, including the hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - use of personal protective equipment (PPE)
- hazards commonly encountered in rigging basic level:
 - instability of work areas
 - damaged or poor-quality equipment
 - overhead and underground hazards
 - electrical items
 - mobile plant
 - insufficient lighting
 - wind and other adverse weather conditions
 - traffic
 - pedestrian traffic
 - hazardous manual tasks
 - falling objects
 - falls from heights
- minimum clearance distance from powerlines or electrical equipment specific to mobile plant and scaffolding and other structures as determined by relevant state or territory authority or electrical supply authority
- risk controls and equipment:
 - traffic control
 - pedestrian barricades
 - PPE
 - adequate illumination
 - safety structures and screens
- inspection, handling and storage of rigging structures and equipment, associated gear, and other required equipment:
 - rigging structures and equipment:
 - elevated work platforms
 - cantilevered crane loading platforms

- portal frames
- hoists
- pre-cast concrete members
- mast climbing work platform
- safety screens and shutters
- safety nets
- associated gear:
 - power and manually operated lifting gear
 - lifting clutches
 - tag lines
 - FSWR
 - chains
 - wire and synthetic slings
 - shackles
 - terminations
 - wedge sockets
 - eye bolts
 - beam clamps
 - pipe clamps
 - plate clamps
 - rope grips
 - turnbuckles
 - chain blocks
 - lever blocks
 - lever-action winches
 - sheaves
 - spreader bars
 - lifting beams
 - jacks
 - levers
 - skates
 - wedges
 - rollers
 - beam trolley
 - props
- safety equipment:
 - full-body safety harness
 - energy absorber
 - lanyard
 - inertia reel (fall arrester)

- static safety lines
- PPE:
 - hard hat
 - safety boots
 - gloves
 - high-visibility clothing
 - breathing, hearing, sight, skin and sun protection
- communication equipment:
 - two-way radios
 - whistles
- relevant persons:
 - doggers
 - riggers
 - crane operators
 - engineers
 - supervisors
- ground and foundation suitability:
 - rough, uneven ground
 - backfilled ground
 - soft soils
 - hard compacted soil
 - rock
 - bitumen
 - concrete
 - suspended concrete floors
 - building roofs
 - landings
 - ground bearing pressure
- mathematical processes for estimating and measuring loads for basic rigging
- techniques for making temporary connections.

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Only assessors who are accredited in the licence class by the appropriate WHS regulator for the jurisdiction where the licence is obtained are permitted to conduct the final high-risk work licence assessment. The final licence assessment will only be undertaken with candidates who have completed training and been formally assessed against all elements in this unit.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations, including:

- the use of full-scale, industry-standard equipment, not simulators
- performance of tasks within the timelines expected in a workplace
- participation of the candidate in activities within a team of three to five members.

Candidates must have access to:

- all personnel and equipment required to perform the tasks specified in the Performance Evidence
- workplace information and records, including:
 - equipment and maintenance checklists
 - record system for service and maintenance history
 - incident reports
 - workplace procedures, including SWMSs and emergency plans
 - equipment manuals and manufacturer specifications
 - relevant plant supplier information.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCOHS1001A Work safely in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	1.1.Applicable <i>OHS legislative requirements</i> relevant to own work, role and responsibilities are identified and explained. 1.2.Duty of care requirements are identified. 1.3.Own responsibilities to comply with <i>safe work practices</i> are identified and explained.
2. Identify construction hazards and control measures.	2.1.Basic principles of risk management are identified. 2.2. <i>Common construction hazards</i> are identified and discussed. 2.3. <i>Measures for controlling</i> hazards and risks are identified.
3. Identify OHS communication and reporting processes.	3.1.OHS communication processes, information and documentation are identified and discussed. 3.2.Role of <i>designated OHS personnel</i> is identified and explained.

ELEMENT	PERFORMANCE CRITERIA
4. Identify OHS incident response procedures.	3.3. <i>Safety signs and symbols</i> are identified and explained.
	3.4. Procedures and <i>relevant authorities</i> for reporting hazards, <i>incidents</i> and injuries are identified.
	4.1. <i>General procedures</i> for responding to incidents and <i>emergencies</i> are identified and explained.
	4.2. Procedures for accessing first aid are identified.
	4.3. Requirements for the selection and use of relevant <i>personal protective equipment</i> are identified and demonstrated.
	4.4. <i>Fire safety equipment</i> is identified and discussed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - clarify OHS legislative requirements
 - verbally report construction hazards and risks
 - ask effective questions
 - relay information to others
 - discuss OHS issues and information
- comprehension skills to:
 - explain the basic OHS legislative requirements which will be applicable to own work
 - explain the meaning of safety signs and symbols
 - identify common construction hazards
 - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
 - persons in control of construction work/projects
 - employers and self-employed persons
 - supervisors
 - employees
 - designers
 - inspectors
 - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
 - housekeeping
 - identification of hazards
 - preventing bullying or harassment
 - smoking
 - use of amenities
 - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

EVIDENCE GUIDE

manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Method of assessment

Assessment methods may include more than one of the following:

- practical assessment
- oral questioning
- written test
- work-based activities
- simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards
- OHS and welfare Acts and regulations
- safety codes of practice.

Duty of care requirements relate to:

- legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

RANGE STATEMENT

	<ul style="list-style-type: none"> • own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency • relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
<i>Safe work practices</i> include:	<ul style="list-style-type: none"> • access to site amenities, such as drinking water and toilets • general requirements for safe use of plant and equipment • general requirements for use of personal protective equipment and clothing • housekeeping to ensure a clean, tidy and safer work area • no drugs and alcohol at work • preventing bullying and harassment • smoking in designated areas • storage and removal of debris.
<i>Risk</i> relates to:	<ul style="list-style-type: none"> • likelihood of a hazard causing injury or harm.
<i>Principles of risk management</i> include:	<ul style="list-style-type: none"> • assessing the risks involved • consulting and reporting ensuring the involvement of relevant workers • controlling the hazard • identifying hazards • reviewing to identify change or improvement.
<i>Hazard</i> relates to:	<ul style="list-style-type: none"> • any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
<i>Common construction hazards</i> include:	<ul style="list-style-type: none"> • confined spaces • electrical safety • excavations, including trenches • falling objects • hazardous substances and dangerous goods • HIV and other infectious diseases • hot and cold working environments • manual handling • noise • plant and equipment

RANGE STATEMENT

Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:

- traffic and mobile plant
- unplanned collapse
- ultraviolet (UV) radiation
- working at heights.

OHS communication processes include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.
- discussions with OHS representatives
- OHS meetings
- OHS notices, newsletters, bulletins and correspondence
- OHS participative arrangements
- processes for raising OHS issues
- toolbox talks
- workplace consultation relating to OHS issues and changes.

OHS information and documentation includes:

- accident and incident reports
- Acts and regulations
- Australian standards
- codes of practice
- construction documentation and plans
- emergency information contact
- evacuation plans
- guidance notes
- job safety analyses
- labels
- material safety data sheets (MSDS)
- proformas for reporting hazards, incidents and injuries
- reports of near misses and dangerous occurrences
- risk assessments
- safe work method statements
- safety meeting minutes
- site safety inspection reports.

Designated OHS personnel includes:

- first aid officers
- OHS committee members

RANGE STATEMENT

Safety signs and symbols include:

- OHS representatives
- supervisors.
- emergency information signs (e.g. exits, equipment and first aid)
- fire signs (e.g. location of fire alarms and firefighting equipment)
- hazard signs (e.g. danger and warning)
- regulatory signs (e.g. prohibition, mandatory and limitation or restriction)
- safety tags and lockout (e.g. danger tags, out of service tags).

Relevant authorities include:

- emergency services (e.g. police, ambulance, fire brigade and emergency rescue)
- OHS regulatory authority
- supervisor.

Incidents include:

- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
- breathing apparatus malfunctioning to the extent that the user's health is in danger
- collapse of the floor, wall or ceiling of a building being used as a workplace
- collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
- collapse or partial collapse of a building or structure
- collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
- damage to or malfunction of any other major plant
- electric shock.
- electrical short circuit, malfunction or explosion
- uncontrolled explosion, fire or escape of gas, hazardous substance or steam
- any other unintended or uncontrolled incident or event arising from operations carried on at a

RANGE STATEMENT

	workplace.
<i>General procedures</i> for responding to incidents and emergencies include:	<ul style="list-style-type: none"> • basic emergency response (keep calm, raise alarm, obtain help) • evacuation • notification of designated OHS personnel and authorities • notification of emergency services (e.g. when and how) • referring to site emergency plans and documentation.
<i>Emergencies</i> include:	<ul style="list-style-type: none"> • chemical spill • fire • injury to personnel • structural collapse • toxic and/or flammable vapours emission • vehicle/mobile plant accident.
<i>Personal protective equipment</i> includes:	<ul style="list-style-type: none"> • aprons • arm guards • eye protection • gloves • hard hat • hearing protection • high visibility retro reflective vests • protective, well fitting clothing • respiratory protection • safety footwear • UV protective clothing and sunscreen.
<i>Fire safety equipment</i> includes:	<ul style="list-style-type: none"> • breathing apparatus • fire blankets • firefighting equipment.

Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- | | |
|--|---|
| 1. Identify health and safety legislative requirements of construction work. | 1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to <i>jurisdictional health and safety legislative requirements</i> . |
| | 1.2. Duty of care requirements are identified. |
| | 1.3. Construction safe work practices are identified and explained. |
| 2. Identify construction hazards and risk control measures. | 2.1. Basic principles of risk management are identified. |
| | 2.2. Construction hazards are identified and discussed. |
| | 2.3. Purpose and use of PPE are identified and demonstrated. |
| | 2.4. Measures for controlling hazards are identified. |
| 3. Identify health and safety communication and reporting processes. | 3.1. Health and safety documents are identified and discussed. |
| | 3.2. Roles of designated health and safety personnel are identified and explained. |
| | 3.3. Safety signs and symbols are identified and explained. |
| | 3.4. Procedures for reporting hazards, incidents and injuries are identified. |
| 4. Identify incident and emergency response | 4.1. Procedures for responding to incidents and emergencies are identified and explained. |
| | 4.2. Procedures for accessing first aid are identified. |

procedures.

- 4.3. Types and purpose of fire safety equipment are identified and discussed.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"> locate and recognise numbers commonly used in safety signs.
Oral communication skills to:	<ul style="list-style-type: none"> ask questions to clarify instructions listen to instructions to identify key safety information tell another person about a construction problem or hazard.
Reading skills to:	<ul style="list-style-type: none"> follow simple pictorial safety instructions follow simple safety instructions that are written in English.
Problem-solving skills to:	<ul style="list-style-type: none"> select risk control measures.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Jurisdictional health and safety legislative requirements</i> must include at least one of the following state and territory Acts or their equivalent:	<ul style="list-style-type: none"> Australian Capital Territory: Work Health and Safety Act 2011 New South Wales: Work Health and Safety Act 2011 Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011 Queensland: Work Health and Safety Act 2011 South Australia: Work Health and Safety Act 2012 Tasmania: Work Health and Safety Act 2012 Victoria: Occupational Health and Safety Act 2004 Western Australia: Occupational Safety and Health Act 1984.

Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry

Modification History

Release Comment

Version Replaces superseded equivalent CPCCOHS1001A Work safely in the construction
1 industry.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- orally explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
 - fire blankets
 - fire extinguishers, including water, carbon dioxide, powder and foam
 - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- orally explain the roles of the following designated health and safety personnel:
 - first aid officers
 - work health and safety representatives
 - work health and safety committee members
 - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat

- high visibility retro reflective vest.

Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
 - identify hazard
 - assess risk
 - consult and report
 - control hazard
 - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
 - asbestos
 - confined spaces
 - electrical: power lines, cords and equipment
 - excavations and trenches, including underground services
 - dust
 - falling objects
 - hazardous substances and dangerous goods
 - hot and cold work environments
 - manual handling
 - noise
 - plant and equipment operation
 - traffic and mobile plant
 - unplanned collapse
 - ultraviolet radiation
 - working at heights, including scaffolding
- construction work that requires a high risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and ultraviolet (UV) protective clothing and sunscreen
- construction emergencies, including:
 - chemical spill
 - fire
 - injury to personnel
 - structural collapse
 - toxic or flammable vapour emission

- vehicle or mobile plant accident
- construction incidents, including:
 - incidents resulting in personal injury or damage to property
 - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
 - accessing and using site amenities for drinking water, hand washing and toilets
 - following safety procedures when performing work tasks and using equipment
 - identifying and reporting hazards, incidents and injuries in the workplace
 - keeping the work area clean, tidy and free from debris
 - not using or being affected by drugs and/or alcohol while at work
 - preventing bullying and harassment in the workplace
 - selecting and using required PPE
 - smoking only in designated areas
 - storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
 - emergency information signs: exits, emergency equipment and first aid
 - fire signs: location of fire alarms and firefighting equipment
 - hazard signs and symbols: danger and warning
 - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
 - safety and lockout tags: danger and out-of-service tags.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - all of the PPE listed in the performance evidence
- specifications:
 - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Assessors must hold the unit *CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry*, or its successor.

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess risks.	<p>1.1 Identify, assess and report hazards in the work area to designated personnel.</p> <p>1.2 Report safety risks in the work area based on identified hazards, to designated personnel.</p> <p>1.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks.</p> <p>1.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state or territory WHS legislation, and relevant information.</p>
2. Identify hazardous materials and other hazards on work sites.	<p>2.1 Correctly identify and, if appropriate, handle and use hazardous materials on a work site in accordance with legislative requirements, and workplace policies and procedures.</p> <p>2.2 Apply measures for controlling risks and construction hazards effectively and immediately.</p> <p>2.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers, immediately they are identified.</p> <p>2.4 Identify asbestos-containing materials on a work site and report to designated personnel.</p>
3. Plan and prepare for safe work practices.	<p>3.1 Identify, wear, correctly fit, use and store correct personal protective equipment and clothing for each area of construction work in accordance with workplace procedures</p> <p>3.2 Select tools, equipment and materials, and organise tasks in conjunction with other personnel on site and in accordance with workplace procedures.</p> <p>3.3 Determine required barricades and signage, and erect at the appropriate site location.</p> <p>3.4 Apply material safety data sheets (MSDSs), job safety analyses (JSAs) and safe work method statements (SWMSs) relevant to the work to be performed.</p>
4. Apply safe work practices.	<p>4.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements, and workplace policies and procedures.</p> <p>4.2 Use plant and equipment guards in accordance with manufacturers' specifications, work site regulations and Australian Standards.</p> <p>4.3 Follow procedures and report hazards, incidents and injuries</p>

	<p>to relevant authorities.</p> <p>4.4 Recognise and do not use prohibited tools and equipment in areas containing identified asbestos.</p> <p>4.5 Identify and follow requirements of work site safety signs and symbols.</p> <p>4.6 Clear and maintain work site area to prevent and protect self and others from incidents and accidents, and to meet environmental requirements.</p>
5. Follow emergency procedures.	<p>5.1 Identify designated personnel in the event of an emergency for communication purposes.</p> <p>5.2 Follow safe workplace procedures for dealing with accidents, fire and other emergencies, including identification and use, if appropriate, of fire equipment within scope of own responsibilities.</p> <p>5.3 Describe, practice and effectively carry out emergency response and evacuation procedures when required.</p> <p>5.4 Carry out emergency first aid treatment of minor injuries and, as soon as possible, accurately report treatment details to designated personnel.</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPCPCM2043A Carry out WHS requirements

Modification History

Changes to application, elements and performance criteria, required skills and knowledge, range statement and critical aspects

Not equivalent to CPCPCM2023A

Unit Descriptor

This unit of competency specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in a plumbing and services work environment.

The unit requires the performance of work in a safe manner through awareness of risks, work requirements and the planning and performance of safe work practices with concern for personal safety and the safety of others.

It includes the initial response to workplace emergencies; the safe use of electricity; the identification of hazardous materials, including asbestos; and compliance with legislated work safety practices.

Application of the Unit

This unit of competency supports safe work practices for the plumbing and services industry.

Site location for work application may be either domestic or commercial and may be a new work site or an existing structure or fitting being renovated, extended, restored or maintained. It could also be conducted in an on or off-site workshop or at a customer's premises.

The unit does not cover the removal of asbestos, which is a licensed activity.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--|--|
| 1 | Participate in workplace induction. | 1.1 <i>Workplace induction</i> is received. |
| | | 1.2 Location of emergency equipment is identified. |
| | | 1.3 Current workplace emergency and evacuation procedures are identified. |
| | | 1.4 Identify safe working conditions with employer. |
| | | 1.5 Identify employee and employer rights and responsibilities regarding safe working conditions. |
| 2 | Assess risks. | 2.1 Hazards in the work area are identified, assessed and reported to designated personnel. |
| | | 2.2 WHS issues and risks in the work area are identified, assessed and reported to designated personnel. |
| | | 2.3 <i>Safe work practices</i> , procedures and instructions are followed. |
| | | 2.4 WHS, hazard, accident or incident reports are completed according to workplace procedures and <i>statutory and regulatory authorities</i> and legislation. |
| 3 | Identify hazards and hazardous materials on work site. | 3.1 Hazardous materials on a work site are identified, secured and tagged using appropriate signs and symbols; and if appropriate, handled and used according to company and legislated procedures. |
| | | 3.2 Measures for controlling risks and construction hazards |

- are applied effectively and immediately.
- 3.3 ***Asbestos-containing materials (ACM) are identified*** on a work site ***and reported*** to designated personnel.
- 4 Plan and prepare for safe work practices.
- 4.1 Quality assurance requirements of company operations and safe work practices are identified and adhered to.
- 4.2 Personal protective equipment (PPE) is selected, correctly fitted and used according to the requirements of the job.
- 4.3 Tools and equipment are selected consistent with safe work practice requirements, checked for serviceability, and any faults are reported to supervisor.
- 4.4 Required barricades, hoardings and signage are determined and erected at job location.
- 4.5 Material safety data sheets (MSDS) are identified and applied.
- 4.6 ***Sustainability principles and concepts*** are observed when preparing for and undertaking work process.
- 5 Use safe work practices to carry out work.
- 5.1 Work is carried out safely and according to state or territory statutory requirements and company policy.
- 5.2 ***Safety hazards*** and common workplace accidents and incidents are identified in the course of work and reported according to policy.
- 5.3 Industry, site and personal safety rights and responsibilities are applied.
- 5.4 Prohibited tools and equipment in areas with identified asbestos are identified and isolated.
- 5.5 Firefighting equipment is selected and used according to type of fire and correct operating procedures.
- 5.6 Current site emergency and first aid procedures are followed.

- | | | |
|---|-------------------------------------|---|
| 6 | Maintain safety of self and others. | 6.1 Safety signs, identified in terms of colour and shape, symbols and alarms, are adhered to. |
| | | 6.2 Hazardous chemicals and materials are identified, handled and stored, maintaining the safety to self, others and the environment. |
| | | 6.3 Incidents are reported according to legislative requirements and workplace procedures. |
| | | 6.4 Common causes of accidents in the industry are identified and prevention measures implemented in line with site induction. |
| | | 6.5 Site area is maintained to prevent incidents and accidents and protect self and others |
| | | |
| 7 | Use electricity safely. | 7.1 Safest supply and route for electrical supply are determined. |
| | | 7.2 Leads are supported and placed according to regulations. |
| | | 7.3 Power board visual check is conducted. |
| | | 7.4 Leads and equipment are checked for tags and visual damage. |
| | | 7.5 Electrical hazards are identified and reported. |
| | | |
| 8 | Apply emergency response. | 8.1 Emergencies are identified. |
| | | 8.2 Emergency response is provided according to company procedures and requirements. |
| | | 8.3 Details of actions taken are reported according to company procedures and requirements using appropriate communications. |
| | | |
| 9 | Clean up work site area. | 9.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specifications. |
| | | 9.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations |

and standard work practices.

- 9.3 Information is accessed and documentation completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - complete written reports and other relevant documentation
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to:
 - evaluate safety issues in the workplace and determine appropriate action
 - recognise WHS hazards, including asbestos, and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools or materials
- literacy skills to read and interpret:
 - documentation from a variety of sources
 - MSDS
 - work safety procedures and instructions
- self-management skills to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
 - access and understand site-specific instructions in a variety of media
 - use mobile communication technology

Required knowledge

- asbestos management code relating to prevention of exposure
- job safety analysis (JSA) and safe work method statements (SWMS)

- manual handling techniques
- MSDS
- relevant legislation, regulations and workplace requirements relating to WHS, including hazard reduction and personal safety
- requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited from being used near identified ACM
- risk assessment
- safe work practices in normal working environment
- types, possible location and risks of ACM, including serpentine and amphibole groups and their use in common building materials
- workplace and equipment safety requirements
- workplace hazards and their precautions and reduction
- workplace response to emergencies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications for applying safe work practices in the workplace
- apply safety requirements throughout the performance of work sequences, including electrical requirements and personal protective clothing and equipment
- apply sustainability principles and concepts
- undertake site and workplace induction
- correctly identify the location of ACM
- understand and apply policies and procedures for reporting presence of ACM to designated personnel
- assess workplace risks and interpret and apply safe work practices

- understand workplace requirements for emergency response, including evacuation procedures
- correctly locate and identify workplace firefighting and other safety equipment and appliances
- correctly select and use appropriate processes, tools and equipment
- safely complete all work to specification
- comply with regulations, standards and workplace instructions, procedures and processes, including reporting and documentation
- communicate and work effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or

simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace induction may include:

- first aid officers and kits

- personnel competent and/or licensed in the safe handling of asbestos
- site induction work site locations
- specific site WHS issues
- specific site requirements.

Safe work practices are to be according to state and territory legislation and regulations and may include:

- handling of materials
- hazard control procedures and procedures for handling hazardous materials and substances
- PPE prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

Identifying and reporting asbestos-containing materials:

- includes recognising common types of ACM that may be found in construction materials and buildings
- covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, millboard, asbestos flues, sheeting under ceramic or vinyl floor or wall tiles in wet areas
- involves reporting ACM to person in control of the workplace as set out in the relevant Asbestos Management Code.

Sustainability principles and concepts:

- cover the social, economic and environmental use of resources to meet current and future needs
- may include:
 - selecting appropriate components and material
 - choosing efficient products
 - using material efficiently
 - storing and disposing of hazardous material to ensure minimal environmental impact.

Safety hazards may include:

- hazards and risks associated with tools and equipment
- inflammable materials and fire hazards
- lifting practices
- lighting, gases, electricity and water
- spillage, waste and debris
- toxic and hazardous substances
- working at heights
- working in confined spaces.

Emergencies may include:

- accidents
- fires
- injuries
- sudden illness.

Emergency response may include:

- common site signs
- equipment tags
- facility or location signs
- safety barricades and warning signs
- site direction
- traffic signs
- workplace evacuation involving staff and customers.

CPPSEC3124 Prepare and present evidence in court

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3009A Prepare and present evidence in court.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Application

This unit specifies the skills and knowledge required to prepare and present evidence in court.

It requires

- sourcing, organising and checking security information to be used as evidence in court proceedings, and checking compliance against rules of evidence and evidence management principles to ensure admissibility
- participating in oral briefing sessions, submitting evidence briefs and preparing documentation and exhibits
- adhering to court procedures and protocols such as those relating to personal presentation, manner and language
- presenting evidence in a clear, concise and unambiguous manner and providing specialist opinion on request.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

Pre-requisite Unit

Nil

Unit Sector

Security operations

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
---	--

1. Prepare evidence.	<p>1.1 Review workplace policies and procedures to ensure compliance with legal rights and responsibilities when preparing and presenting evidence in court.</p> <p>1.2 Source, research and collate case summary and supporting information.</p> <p>1.3 Select information to be used as evidence in court and confirm its relevance, validity and admissibility in court.</p> <p>1.4 Organise evidence and check compliance against evidence management principles.</p> <p>1.5 Interpret requirements for recording and presenting evidence in court.</p>
2. Prepare for court proceedings.	<p>2.1 Participate in oral briefing session with relevant persons to confirm court arrangements, own role and involvement.</p> <p>2.2 Discuss information to be presented as evidence and clarify negotiation parameters with relevant persons.</p> <p>2.3 Submit briefs of evidence in a logical sequence and check compliance with rules of evidence to ensure admissibility in court proceeding.</p> <p>2.4 Conduct a thorough review of material to be used or referred to in court proceeding prior to presentation in court to ensure familiarity, completeness and availability.</p> <p>2.5 Prepare documentation and exhibits and review to confirm their acceptability for use in court.</p>
3. Attend court proceeding and present evidence.	<p>3.1 Attend court and adhere to court procedures and protocols including those for personal presentation, manner and language throughout proceeding.</p> <p>3.2 Present admissible evidence in a clear, concise and unambiguous manner and on request, provide specialist opinion within own area of competence and expertise in accordance with evidence requirements.</p> <p>3.3 Note, file and store outcomes of proceedings and associated documentation and evidence in accordance with evidence management principles.</p>

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to use security industry approved terminology

- writing skills to:
 - prepare documentation using formal structure and language
 - sequence security information and evidence to present cohesive text
- reading skills to interpret:
 - procedures and policies that clarify legal rights and responsibilities
 - information and evidence that may be technical in nature, and in pictorial, diagrammatic or written formats
- speaking and listening skills to:
 - use active listening to check understanding when participating in briefing sessions
 - participate effectively in spoken interactions in a court setting using strategies to confirm, clarify or repair understanding
 - make constructive additions to what has been said when offering own specialist opinion in court
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
 - verify accuracy and sources when gathering information and evidence
 - analyse information to ensure it complies with rules of evidence for admissibility
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others
- technology skills to use a range of common information technologies to access, store, study, retrieve, transmit and manipulate data or information that may be used as evidence.

Unit Mapping Information

Supersedes and is equivalent to CPPSEC3009A Prepare and present evidence in court.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSEC3124 Prepare and present evidence in court

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3009A Prepare and present evidence in court.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Performance Evidence

To demonstrate competency in this unit, a person must prepare and present evidence in court in two separate court proceedings.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when preparing and presenting evidence in court:
 - anti-discrimination and diversity
 - duty of care
 - licensing requirements and limits of own authority
 - information privacy and confidentiality
 - workplace health and safety (WHS)
- basic research techniques that can be used to gather information and evidence
- evidence management principles
- methods for complying with privacy and confidentiality regulations when gathering, presenting and storing security information
- methods for identifying proofs of an offence
- methods for preserving, maintaining, storing and transporting evidence and exhibits that may be used in court
- operational functions of a range of information technologies used to gather, organise and present security information and evidence
- own areas of competence and expertise to provide specialist opinion in court
- procedures for preparing briefs of evidence
- procedures, protocols and rules to be followed when presenting evidence in court:
 - addressing court personnel
 - language

- manner
- participating and giving evidence
- personal presentation
- who's who in court
- purpose of the Evidence Act
- requirements for recording information that is factual and can be used as evidence in court, including meaning of 'continuity of evidence'
- requirements for recording and reporting incidents
- requirements for taking statements from witnesses
- rules of evidence that can be presented in court:
- contemporaneousness
 - must not be 'hearsay'
 - must not be opinion
 - must be relevant
 - must be admissible
- storage requirements for information that is susceptible to spoil or damage, such as film, tapes and images
- techniques for validating the accuracy and reliability of security information and evidence
- treatment of persons being interviewed
- types of documentation and exhibits that may be presented as evidence in court
- types of law:
 - civil
 - common
 - criminal
 - statute.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in an operational workplace environment or environment that reflects workplace conditions. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to prepare and present evidence in court
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- information technologies required to gather, organise and present security information and documentation
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations
- access to a court environment to allow achievement of the performance evidence.

CPPSEC5003 Assess security risk management options

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5003A Assess security risk management options. Updated to meet the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to assess security risks associated with client operations and formulate suitable treatment options as part of a risk management strategy. It includes analysing the client's security objectives and operating environment and establishing criteria to select and prioritise risk treatment options consistent with recognised industry practice and guidelines provided by *ISO 31000:2018 Risk management – Guidelines* (ISO 31000). The unit requires preparing formal reports detailing risk management options and possible consequences of not implementing recommended treatments.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

None.

Unit Sector

Security/Risk management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Assess client's security requirements

1.1 Access and interpret key requirements of legislation, regulations and Australian standard ISO 31000 to understand and comply with requirements for assessing

- and risk environment. security risk management options.
- 1.2 Clarify client security objectives and risk assessment terms of reference in consultation with relevant persons.
 - 1.3 Source and review information to identify and assess risks associated with operating environment of client.
 - 1.4 Analyse type, nature and cause of identified security risks and prioritise based on severity and likelihood of occurrence.
 - 1.5 Document risk assessment outcomes and check to ensure data currency and reliability.
- 2 Formulate security risk management options.
- 2.1 Identify security risk treatment options commensurate with risk assessment and client requirements.
 - 2.2 Research the application of identified treatment options in similar contexts to assess their effectiveness in mitigating risks to client's operating environment.
 - 2.3 Establish criteria to assess effectiveness of treatment options consistent with recognised industry practice and guidelines provided by ISO 31000.
 - 2.4 Apply criteria to select and prioritise recommended treatment options.
- 3 Finalise and present security risk management options.
- 3.1 Finalise and document security risk assessment detailing recommended risk management options and possible consequences of not implementing recommended treatments.
 - 3.2 Check report to ensure analysis and recommendations are clear, coherent and consistent with terms of reference, and supported by verifiable information.
 - 3.3 Present report to relevant persons within agreed timeframes and explain identified security risks and treatment options to enhance understanding and acceptance of recommendations.
 - 3.4 Complete and secure risk assessment documentation in a manner that facilitates future retrieval and maintains client confidentiality according to workplace and

regulatory requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate client agreement
- writing skills to prepare succinct and logically structured assessment reports
- numeracy skills to apply basic probability statistics when assessing security risks.

Unit Mapping Information

Supersedes and equivalent to CPPSEC5003A Assess security risk management options.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSEC5003 Assess security risk management options

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5003A Assess security risk management options. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by assessing security risks and formulating risk management options associated with two of the following scenarios:

- security of a mass gathering
- security of a crowded place
- asset security.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when assessing security risk management options:
 - key requirements of legislation, regulations and codes of conduct governing security risk management in the jurisdiction of operation
 - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
 - licensing requirements in the security industry
 - trespass and removal of persons
 - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- distinction between information and intelligence and methods for validating information sources
- implications for security risk management arising from:
 - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
 - *Active Armed Offender Guidelines for Crowded Places*
 - *Improvised Explosive Device Guidelines for Crowded Places*
 - *Chemical Weapon Guidelines for Crowded Places*

- *Hostile Vehicle Guidelines for Crowded Places*
- methods for determining the type, nature and causes of potential and actual security risks
- methods for prioritising security risks and treatment options based on degree of risk
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
 - definition of crowded places
 - key security issues for crowded places
 - objectives, characteristics and identification of active armed offenders
 - definition of hostile vehicles and methods of attack
 - signs of chemical weapons attack and recommend response
 - general features of improvised explosive devices and recommended incident response
- recognised industry practice and application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when establishing criteria to assess risks and treatment options
- types of treatment options appropriate to the range of security risks and threats to various client operating environments:
 - assets
 - buildings
 - crowded places
 - mass gatherings.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to assessing security risk management options in the jurisdiction of operation
- client instructions and operating environment information, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*

- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

CPPSEC5004 Develop security risk management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5004A Prepare security risk management plan. Updated to meet the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to develop comprehensive security risk management plans based on the principles of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000). It includes identifying and evaluating security risks and existing control measures, developing action plans to identify and manage risks, designing risk treatment options and testing them in the field as part of a security risk management strategy.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

None.

Unit Sector

Security/Risk management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Evaluate security risks and controls. | 1.1 Access and interpret key requirements of legislation, regulations and Australian standard ISO 31000 to understand and comply with requirements for developing security risk management plans. |
|---|---|

- 1.2 Clarify client security requirements and operating environment in consultation with relevant persons.
 - 1.3 Source and review information to identify security risks.
 - 1.4 Clearly distinguish and confirm acceptable and unacceptable security risks.
 - 1.5 Set priorities for risk treatment and assurance of controls.
 - 1.6 Highlight and specify risks that are high priority to ensure appropriate controls are developed.
 - 1.7 Evaluate existing controls to determine impact on risk occurrence and implement required modifications.
- 2 Plan risk management strategies.
 - 2.1 Develop and document action plans that identify tasks, activities and resources required to achieve security risk management objectives.
 - 2.2 Select security risk control measures based on assessed type, nature, cause and degree of risk associated with identified security risks.
 - 2.3 Incorporate actions to respond to contingencies when planning risk management strategies.
 - 2.4 Establish communication and reporting arrangements to maintain currency of action plans in consultation with relevant persons.
- 3 Design security risk treatment options.
 - 3.1 Assess client's operating environment to confirm potential and real security risks.
 - 3.2 Select feasible risk treatment options and conduct research to confirm implications for controlling whole or part of security risks.
 - 3.3 Document and cost recommended risk treatment options to ensure compatibility with nature of risk and client requirements.
 - 3.4 Consult with relevant persons to verify suitability of recommended risk treatment options and obtain required approvals.

- | | | |
|---|---|--|
| | 3.5 | Test risk treatment options in the field and analyse results to verify effectiveness of treatments in the security context. |
| 4 | Finalise and present security risk management plan. | |
| | 4.1 | Finalise and document comprehensive security risk management plan in the required format according to workplace requirements. |
| | 4.2 | Check security risk management plan to ensure analysis and recommendations are clear, coherent and consistent with client requirements, and based on the principles of ISO 31000. |
| | 4.3 | Present risk management plan to relevant persons within agreed timeframes and explain identified security risks and treatments to enhance understanding and acceptance of recommendations. |
| | 4.4 | Implement procedures to monitor and review security risk management activities to ensure continuous improvement. |
| | 4.5 | Complete and secure risk management plan in a manner that facilitates future retrieval and maintains client confidentiality according to workplace and regulatory requirements. |

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate client agreement
- writing skills to prepare succinct and logically structured security risk management plans
- numeracy skills to apply statistical methods and present statistical data.

Unit Mapping Information

Supersedes and equivalent to CPPSEC5004A Prepare security risk management plan.

Assessment Requirements for CPPSEC5004 Develop security risk management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC5004A Prepare security risk management plan. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing and documenting two security risk management plans that meet the requirements of clients with different risk management requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when developing security risk management plans:
 - key requirements of legislation, regulations and codes of conduct for security risk management in the jurisdiction of operation
 - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
 - licensing requirements in the security industry
 - trespass and removal of persons
 - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- distinction between information and intelligence and methods for validating information sources
- activities to be included in action plans for security risk management
- implications for security risk management arising from:
 - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
 - *Active Armed Offender Guidelines for Crowded Places*
 - *Improvised Explosive Device Guidelines for Crowded Places*
 - *Chemical Weapon Guidelines for Crowded Places*
 - *Hostile Vehicle Guidelines for Crowded Places*

- methods for determining the type, nature and causes of potential and actual security risks
- methods for distinguishing between acceptable and unacceptable security risks
- methods for prioritising security risks and treatment options based on degree of risk
- methods for testing treatment options in the field
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
 - definition of crowded places
 - key security issues for crowded places
 - objectives, characteristics and identification of active armed offenders
 - definition of hostile vehicles and methods of attack
 - signs of chemical weapons attack and recommend response
 - general features of improvised explosive devices and recommended incident response
- recognised industry practice and application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when designing security risk management strategies and treatment options
- types of treatment options appropriate to the range of security risks and threats to various client operating environments:
 - assets
 - buildings
 - crowded places
 - mass gatherings.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to developing security risk management plans in the jurisdiction of operation
- client instructions and operating environment information, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
- *Australia's Strategy for Protecting Crowded Places from Terrorism*
- *National Guidelines for the Protection of Places of Mass gathering from Terrorism*

- *Active Armed Offender Guidelines for Crowded Places*
- *Improvised Explosive Device Guidelines for Crowded Places*
- *Chemical Weapon Guidelines for Crowded Places*
- *Hostile Vehicle Guidelines for Crowded Places.*

CPPSEC5005 Implement security risk management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPSEC5005A Implement security risk assessment plan. Updated to meet the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to implement security risk management plans. It includes organising, costing and allocating resources, monitoring emerging security risks and changes in the operating environment against activities and targets in action plans, and reviewing treatment options to update security risk management plans. Risk management plans are implemented based on the principles of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000).

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

None.

Unit Sector

Security/Risk management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Organise and allocate resources to support security risk management plan. | 1.1 Access and interpret key requirements of legislation, regulations and Australian standard ISO 31000 to understand and comply with requirements for implementing security risk management plans. |
|---|---|

- 1.2 Review security risk management plan to clarify and cost resource requirements.
 - 1.3 Plan and schedule activities and targets to meet requirements of risk management action plans.
 - 1.4 Define roles, responsibilities and work schedules for implementing security risk management plan and communicate to relevant persons.
 - 1.5 Organise efficient allocations of resources, equipment and materials required to implement risk management action plans.
 - 1.6 Disseminate information to support security risk management plan information according to workplace and regulatory requirements.
- 2 Monitor emerging security risks and operating environment.
 - 2.1 Monitor emerging risks and assess ongoing suitability of implemented security risk treatment options based on ISO 31000 principles.
 - 2.2 Monitor changes to operating environment and identify and incorporate corrective contingency measures into security risk management plan.
 - 2.3 Regularly review risk management targets and outcomes against action plans to confirm aims and objectives are achieved.
 - 2.4 Prepare documentation and guidelines explaining incidence, nature and causes of emerging security risks and contingencies implemented.
- 3 Review treatment options and update security risk management plan.
 - 3.1 Systematically review effectiveness of security risk treatment options in meeting risk management objectives.
 - 3.2 Identify and test required corrective measures to confirm suitability to meet risk management objectives.
 - 3.3 Modify security risk management plan to incorporate corrective measures and address discrepancies between treatment options and risk incidence.

- 3.4 Seek feedback from relevant persons on effectiveness of treatment options and make required adjustments to incorporate feedback.
- 3.5 Cost long and short-term options to accurately estimate resource allocations to support security risk management plan.
- 3.6 Confirm stages of implementation for security risk management plan and coordinate required resources to ensure availability.
- 3.7 Finalise updated security risk management plan according to workplace and regulatory requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate agreements
- writing skills to prepare succinct and logically structured security risk management documents and guidelines
- numeracy skills to apply statistical methods and present statistical data.

Unit Mapping Information

Supersedes and equivalent to CPPSEC5005A Implement security risk management plan.

Assessment Requirements for CPPSEC5005 Implement security risk management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPSEC5005A Implement security risk assessment plan. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by implementing two different security risk management plans.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply when implementing security risk management plans:
 - key requirements of legislation, regulations and codes of conduct for security risk management in the jurisdiction of operation
 - legal rights and responsibilities of employers, supervisors and employees associated with work health and safety and duty of care
 - licensing requirements in the security industry
 - trespass and removal of persons
 - use of force
- application of integrated security measures including physical security, manpower, security technologies and security of personnel and information
- distinction between information and intelligence and methods for validating information sources
- work scheduling methods
- activities and targets contained in risk management action plans
- methods for achieving efficiencies when allocating resources, equipment and materials to the implementation of security risk management plans
- implications for security risk management arising from:
 - *National Guidelines for the Protection of Places of Mass gathering from Terrorism*
 - *Active Armed Offender Guidelines for Crowded Places*
 - *Improvised Explosive Device Guidelines for Crowded Places*
 - *Chemical Weapon Guidelines for Crowded Places*

- *Hostile Vehicle Guidelines for Crowded Places*
- methods for determining the type, nature and causes of potential and actual security risks
- methods for distinguishing between acceptable and unacceptable security risks
- methods for prioritising security risks and treatment options based on degree of risk
- methods for testing treatment options in the field
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
 - definition of crowded places
 - key security issues for crowded places
 - objectives, characteristics and identification of active armed offenders
 - definition of hostile vehicles and methods of attack
 - signs of chemical weapons attack and recommend response
 - general features of improvised explosive devices and recommended incident response
- recognised industry practice and application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when implementing and updating security risk management plans
- types of treatment options appropriate to the range of security risks and threats to various client operating environments:
 - assets
 - buildings
 - crowded places
 - mass gatherings.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. CPPSEC5006 Develop strategies to implement advanced technology security systems

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC5006A Determine strategy for the implementation of biometrics technology. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to develop strategies to implement security systems that employ advanced technologies including biometrics, artificial intelligence (AI), robotics, smart technologies and video integration. It includes assessing risks and threats to client assets, evaluating existing security measures, and devising feasible implementation options that integrate advanced technology security systems within existing security architectures.

This unit is suitable for those using a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex problems.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

None.

Unit Sector

Security/Risk management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Assess client's security requirements. | <p>1.1 Access and interpret key requirements of legislation and regulations to understand and comply with requirements for implementing advanced technology security systems.</p> <p>1.2 Clarify client assets, security requirements, budget and timeframes for implementing advanced technology security system in consultation with relevant persons.</p> <p>1.3 Identify and assess threats to physical and technical security of client.</p> <p>1.4 Identify and assess security risks to client assets and prioritise risk levels.</p> <p>1.5 Evaluate reliability and effectiveness of existing security measures against identified threats and risks.</p> <p>1.6 Document findings and seek specialist assistance as required to assess security requirements of client.</p> |
| 2 Identify requirements for implementing advanced technology security system. | <p>2.1 Assess advanced technology security system options to meet security threats and risks and client requirements.</p> <p>2.2 Analyse and confirm physical and technical specifications for advanced technology security system to be installed.</p> <p>2.3 Assess existing security architecture to identify requirements for effectively integrating advanced technology security system.</p> <p>2.4 Identify resources, skills and training required to implement advanced technology security system.</p> <p>2.5 Summarise implementation requirements in a format suitable for further analysis.</p> |
| 3 Design and verify implementation options for advanced technology security system. | <p>3.1 Design system implementation options based on analysis of implementation requirements.</p> <p>3.2 Conduct checks to verify implementation options are feasible and comply with time schedules, available resources and budget.</p> <p>3.3 Confirm implementation options will effectively control</p> |

assessed risks and threats to client assets.

4 Finalise strategy for implementing advanced technology security system.	4.1	Finalise and document strategy to implement advanced technology security system.
	4.2	Check strategy to ensure analysis recommendations are clear, coherent and consistent with client requirements, include contingency measures, and are supported by verifiable information.
	4.3	Present strategy to relevant persons within agreed timeframes and explain system design and implementation requirements to enhance understanding and acceptance of recommendations.
	4.4	Complete and secure implementation strategy documentation in a manner that facilitates future retrieval and maintains client confidentiality according to workplace and regulatory requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to negotiate client agreements
- writing skills to prepare logical and sequenced technical specifications for implementing advanced technology security systems
- reading skills to interpret key requirements of technical specifications, plans and designs for security systems.

Unit Mapping Information

Supersedes and non-equivalent to CPPSEC5006A Determine strategy for the implementation of biometric technology.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSEC5006 Develop strategies to implement advanced technology security systems

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPPSEC5006A Determine strategy for the implementation of biometrics technology. Unit has been broadened to cover other advanced technologies in addition to biometrics. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing and documenting two strategies to implement security systems that employ at least two types of advanced technologies from the list below:

- artificial intelligence (AI)
- biometrics
- robotics
- smart technologies
- video integration.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory requirements that apply to the implementation of advanced technology security systems:
 - client service standards
 - licensing requirements in the security industry
 - regulatory requirements associated with providing advice on implementing security systems
 - application of *ISO 31000:2018 Risk management – Guidelines* (ISO 31000) when developing strategies to implement advanced technology security systems
- methods for achieving efficiencies when allocating resources, equipment and materials to the implementation of advanced technology security systems
- methods for assessing security risks and threats and determining the type, nature and causes of potential and actual security risks
- methods for comparing and contrasting advanced technology security system information

- methods for determining security system requirements including single and multiple applications of advanced technologies
- operational principles of, and information technologies used in internet protocol networked security systems
- process and application of dynamic risk assessment and risk management methods
- purpose of *Australia's Strategy for Protecting Crowded Places from Terrorism* and understanding of:
 - definition of crowded places
 - key security issues for crowded places
 - objectives, characteristics and identification of active armed offenders
 - definition of hostile vehicles and methods of attack
 - signs of chemical weapons attack and recommend response
 - general features of improvised explosive devices and recommended incident response
- requirements for integrating a range of advanced technology security systems within existing security architecture across local area networks and wide area networks
- types, functions and parameters of a range of advanced technology security systems involving:
 - AI
 - biometrics
 - robotics
 - smart technologies
 - video integration
- ways that social and cultural differences may be expressed.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- legislation, regulations and codes of practice that apply to the implementation of advanced technology security systems in the jurisdiction of operation
- client specifications and information, resources and information technologies required to achieve the performance evidence
- ISO 31000
- *Australia's Strategy for Protecting Crowded Places from Terrorism*.

CUAANM301 Create 2D digital animations

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to plan and implement design concepts and use industry animation software to create 2D animations for inclusion in interactive media products, short stand-alone animated sequences and basic games.

It applies to individuals who work in a team environment and report to a senior animator, designer, director or producer.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Animation and Digital Effects

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify animation requirements	1.1 Clarify 2D animation requirements, including design specifications and storyboard in consultation with relevant people 1.2 Clarify target users or audience and requirements with regard to output formats and delivery platforms
2. Generate and assess ideas	2.1 Review animations, artworks and other creative sources that may inspire design ideas 2.2 Generate a range of animation ideas that are technically feasible,

ELEMENT	PERFORMANCE CRITERIA
	<p>respond to specifications and provide creative solutions to all design issues</p> <p>2.3 Discuss animation ideas with relevant people</p>
3. Plan approach	<p>3.1 Assess the range of 2D animation software to determine compatibility with design specifications</p> <p>3.2 Select the most appropriate 2D animation software in consultation with relevant people</p> <p>3.3 Evaluate initial design ideas and discuss with relevant people to select final design concept to meet production requirements and timelines</p>
4. Produce animations	<p>4.1 Apply basic screen, visual design, communication and animation principles and animation techniques to produce animated sequences based on concept</p> <p>4.2 Use animation software to import or generate sufficient quantity of key frames to establish required actions</p> <p>4.3 Check copyright conditions on images from external sources</p> <p>4.4 Combine animated objects to produce single sequences according to creative requirements and specifications</p> <p>4.5 Integrate audio assets where necessary</p> <p>4.6 Adopt safe ergonomic practices when using screens and keyboards for long periods of time</p> <p>4.7 Save and store animations using appropriate output file formats and standard naming conventions</p>
5. Finalise animations	<p>5.1 Review animations to assess creative solutions to design specifications, appropriateness to users or audience and technical feasibility</p> <p>5.2 Discuss and confirm with relevant people additional requirements or modifications to overall designs or animations and undertake necessary amendments</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description
-------	-------------	-------------

	Criteria	
Reading	1.1, 2.1-2.3, 3.1, 3.3, 4.3, 4.4, 5.1	<ul style="list-style-type: none"> Interprets production documentation and design specifications in relation to own duties Locates and reviews creative sources that may inspire new ideas
Writing	2.3, 4.1, 4.7, 5.2	<ul style="list-style-type: none"> Generates and records information for the design of 2D animations in required format Uses standard naming conventions and version control protocols when saving and storing files
Oral Communication	1.1, 2.3, 3.2, 3.3, 4.1, 5.2	<ul style="list-style-type: none"> Obtains information by listening and questioning Uses clear language to discuss ideas, contribute information, and express requirements
Navigate the world of work	4.3, 4.6	<ul style="list-style-type: none"> Complies with legislative requirements relevant to own position
Interact with others	1.1, 2.3, 3.2, 3.3, 4.1, 5.2	<ul style="list-style-type: none"> Responds to and draws on others' perspectives when negotiating design of 2D animations Collaborates to achieve joint outcomes in the design process, playing an active role in facilitating effective group interaction
Get the work done	1.1, 1.2, 2.1-2.3, 3.1-3.3, 4.1, 4.2, 4.4, 4.5, 5.1, 5.2	<ul style="list-style-type: none"> Organises and completes animation requirements in line with specifications, arranging consultations at key design points Takes responsibility for decisions directly related to completion of own tasks Uses digital software to create drawings and animations and to manage files

Assessment Requirements for CUAANM301 Create 2D digital animations

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- interpret design specifications and generate a range of creative ideas and concepts that respond to the brief
- collaborate with others to clarify requirements, discuss ideas, select final design concept and review final animations
- use animation software to create 2D animations that meet requirements of design briefs within production deadlines
- correctly name and store animations in appropriate file formats.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain basic animation techniques and principles
- describe screen, visual design and communication principles as they apply to animations
- outline intellectual property considerations if using images from external sources
- identify work health and safety standards as they apply to using screens and keyboards for extended periods of time.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- production documents and briefs
- resources, equipment and software required for 2D animations

- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAANM302 Create 3D digital animations

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to animate simple 3D models and create 3D animations, which may include audio components. The models are for inclusion in interactive media products, short stand-alone animated sequences and basic games.

It applies to individuals who plan and create 3D animated sequences in consultation with relevant personnel in a wide variety of contexts in the digital content industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Animation and Digital Effects

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify animation requirements	1.1 Clarify 3D animation requirements documented in design briefs with relevant personnel 1.2 Examine models to be animated to determine appropriate animation techniques 1.3 Identify file formats and delivery platform for animated sequences 1.4 Identify factors that may influence animation design approach

ELEMENT	PERFORMANCE CRITERIA
	1.5 Clarify work flow sequences with relevant personnel to ensure production schedule deadlines are met
2. Plan approach	2.1 Research animations, artworks and other creative sources that may inspire ideas 2.2 Generate a range of ideas for animations that are technically feasible, respond to briefs and provide creative solutions to all design issues 2.3 Present ideas to relevant personnel using appropriate design techniques 2.4 Adjust approach to incorporate feedback and agree on final design concept 2.5 Discuss and select 3D animation software with relevant personnel to ensure animated sequences meet technical and creative requirements 2.6 Identify audio assets to support animations as required
3. Produce animated sequences for review	3.1 Create 3D animations using software and animation techniques to suit design requirements 3.2 Adopt safe ergonomic practices when using equipment for long periods of time 3.3 Apply basic animation, screen, visual design and communication principles to produce animations 3.4 Apply real world camera techniques to virtual cameras used in 3D animation as required 3.5 Confirm with relevant personnel that models have not infringed copyright 3.6 Render completed animated sequences using appropriate output file formats 3.7 Save and store animated sequences using standard naming conventions and version control protocols 3.8 Demonstrate 3D animated sequences to relevant personnel for evaluation by agreed deadlines
4. Finalise animated sequences	4.1 Review animated sequences to assess creative solutions to design briefs, appropriateness to users or audience, and technical feasibility 4.2 Discuss and confirm additional requirements or modifications with relevant personnel, and complete changes as required for signoff

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.5, 2.1, 2.2, 3.5, 4.1	<ul style="list-style-type: none"> Interprets production documentation and design specifications in relation to own duties and copyright issues
Writing	3.6, 3.7, 4.2	<ul style="list-style-type: none"> Generates and records information for the design of 3D animations in required format Uses standard naming conventions and version control protocols when saving and storing files
Oral Communication	1.1, 1.5, 2.3-2.5, 4.2	<ul style="list-style-type: none"> Obtains information by listening and questioning Uses clear language to discuss ideas, contribute information, and express requirements
Navigate the world of work	3.2, 3.5	<ul style="list-style-type: none"> Understands and complies with legislative requirements relevant to role
Interact with others	1.1, 1.5, 2.3-2.5, 3.8, 4.2	<ul style="list-style-type: none"> Responds to and draws on others' perspectives when negotiating design of 3D animations Collaborates to achieve joint outcomes in the design process, playing an active role in facilitating effective group interaction
Get the work done	1.1-1.5, 2.1-2.3, 2.5, 2.6, 3.3-3.8, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes animation requirements in line with specifications, arranging consultations at key design points Takes responsibility for decisions directly related to own tasks Uses digital software to create drawings and animations and to manage files

CUAANM412 Create digital visual effects

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to use different industry software applications and material to create digital visual effects sequences for projects in film, television, games or digital media productions.

The unit applies to those who combine elements into the final image while retaining the established style and continuity of the project. They work collaboratively with a production team in 3D animation to meet production deadlines.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – Animation and digital effects

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify work requirements	1.1 Clarify requirements for digital visual effects with reference to production documentation 1.2 Identify workflow sequences and production deadlines to be met, in consultation with required personnel 1.3 Select software that best suits type of production and delivery platform for which visual effects sequences are being created 1.4 Gather and analyse reference material used as inspiration for visualising final sequences
2. Prepare components required for creating	2.1 Check all assets are in the correct output file format and do not infringe copyright laws

ELEMENT	PERFORMANCE CRITERIA
visual effects	2.2 Create optimum visual impact by choosing digital visual effects that best represent the vision of scripts 2.3 Check components comply with storyboard requirements 2.4 Determine methods and techniques to create required digital visual effects
3. Assemble previsualisations	3.1 Create previsualisation of required visual effects sequences using appropriate assets and compositing techniques 3.2 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time 3.3 Experiment with previsualisation to establish results in line with work requirements 3.4 Solve problems that arise during the process of creating visual effects as required 3.5 Submit previsualisation visual effects sequences to required personnel for evaluation and feedback
4. Produce visual effects	4.1 Create final visual effects using feedback from previsualisation sequences 4.2 Render visual effects to desired format according to work requirements 4.3 Submit visual effects sequences to required personnel for evaluation and feedback by agreed deadlines
5. Finalise visual effects	5.1 Adjust visual effects using feedback and according to design and production specifications as required 5.2 Save files to specified storage system accessible to production team 5.3 Make back-up copies of files, and save and store visual effects using appropriate output file formats and standard naming conventions 5.4 Review own work and process used for creating digital visual effects and note areas for future improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> Uses appropriate communication practices to seek and respond to feedback from others

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none">Clearly states work requirements and listens carefully to discussion and feedback using questions as required
Reading	<ul style="list-style-type: none">Identifies most efficient approach to the job using textual and diagrammatic informationRefers to script and storyboard requirements during all stages of production
Writing	<ul style="list-style-type: none">Uses clear language to convey project workflow, process improvement opportunities and to complete work-related documentation
Problem solving	<ul style="list-style-type: none">Solves technical and production problems as required
Self-management	<ul style="list-style-type: none">Follows organisational procedures when managing files and directories including back-up of filesFollows work health and safety requirementsManages time and priorities to ensure job outcomes meet production requirements
Teamwork	<ul style="list-style-type: none">Meets production deadlines by collaborating with other personnel
Technology	<ul style="list-style-type: none">Selects software for different productions and selected delivery platforms

Unit Mapping Information

Supersedes and is equivalent to CUAANM402 Create digital visual effects.

Assessment Requirements for CUAANM412 Create digital visual effects

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create digital visual effects sequences for at least two different projects.

In the course of the above, the candidate must:

- select visual effects software appropriate for delivery platform
- assemble previsualisations based on storyboards and scripts
- store visual effects in appropriate file formats using industry naming conventions
- ensure product meets all requirements and production deadlines
- review own performance and the visual effects process for improvement.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- required file formations and standard naming conventions
- typical challenges of creating visual effects and strategies to handle these
- processes for using selecting visual effects software
- strategies to evaluate performance to improve techniques
- visual impact of effects such as lighting, colour and composition
- impact of delivery platforms on the process of creating visual effects
- compositing methods and techniques as they apply to visual effects creation
- process of rendering visual effects
- procedures for checking copyright requirements
- work health and safety requirements relating to working with computers and keyboards.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- production documents and briefs
- interaction with others required to demonstrate the performance evidence
- visual effects software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUACAM311 Shoot material for screen productions

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to shoot material for screen productions using a single-camera unit. This includes preparing for shoots, setting up locations and shooting equipment, and ensuring the shoot is wrapped up according to production requirements.

The unit applies to those who have prime responsibility to capture screen images using a range of video equipment. They generally work under direction, and perform different camera, sound and lighting functions. Depending on the scale of the shoot, they may have an assistant or may be required to assist senior camera operators.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – Camera/cinematography

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for shoots	1.1 Confirm production and post-production requirements by participating in pre-production briefings 1.2 Arrange equipment and accessories for shoots as directed 1.3 Confirm there are adequate supplies of charged batteries and capture media to meet production requirements 1.4 Prepare and pack lighting equipment 1.5 Identify and report equipment faults to required production personnel

ELEMENT	PERFORMANCE CRITERIA
	1.6 Complete minor repairs on faulty equipment 1.7 Complete workplace documentation according to organisational procedures prior to shoots
2. Set up on location	2.1 Contribute ideas to production concepts in discussion with required personnel 2.2 Plan camera positions that ensure composition of shots provides visual interpretation of material or subject according to production requirements 2.3 Set up and secure cameras and other equipment 2.4 Plan repositioning of equipment and accessories during shoots according to production requirements 2.5 Label and load capture media and check camera functions 2.6 Position microphones according to production requirements and conduct audio check
3. Set up lighting	3.1 Determine whether correction is required by assessing quality and quantity of available light according to production requirements 3.2 Mount and position lighting equipment safely 3.3 Run lighting cables and connect to power sources safely 3.4 Install colour frames and gels according to production requirements 3.5 Select lenses and filters appropriate to prevailing weather conditions
4. Position and operate camera	4.1 Select camera shots and angles that produce effective cuts between shots according to production requirements 4.2 Shoot and record sequences as directed according to production and post-production requirements 4.3 Implement planned or rehearsed shots according to direction from required personnel by checking camera movements
5. Manipulate cables and camera positioning	5.1 Confirm final camera and cable movements by participating in rehearsals 5.2 Position and move camera cabling during shoots according to instructions and cues from required personnel 5.3 Avoid undue lapses in timing by responding to cues from required personnel 5.4 Move cameras and cabling without impeding work of camera operators in cooperation with required personnel 5.5 Handle cabling without damaging equipment or causing injury to others
6. Wrap up shoots	6.1 Use safe lifting techniques when packing equipment and accessories

ELEMENT	PERFORMANCE CRITERIA
	6.2 Label recorded material and associated documentation according to organisational procedures 6.3 Identify and report additional equipment faults and complete required documentation 6.4 Leave shoot locations in original or improved condition 6.5 Review and reflect on own performance and note areas for improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> • Listens carefully and responds to verbal and non-verbal instructions • Reports results and faults using appropriate language
Reading	<ul style="list-style-type: none"> • Interprets textual information to determine production requirements and plans
Writing	<ul style="list-style-type: none"> • Completes production documentation according to requirements
Initiative and enterprise	<ul style="list-style-type: none"> • Makes decisions directly related to own role • Identifies and responds to predictable routine problems • Seeks assistance when problems are beyond immediate responsibilities or experience
Planning and organising	<ul style="list-style-type: none"> • Plans, organises and implements routine tasks according to production requirements
Self-management	<ul style="list-style-type: none"> • Takes responsibility for meeting legal and regulatory responsibilities within scope of role • Follows instructions to complete tasks according to production requirements
Teamwork	<ul style="list-style-type: none"> • Achieves desired results working collaboratively with technical experts

Unit Mapping Information

Supersedes and is equivalent to CUACAM301 Shoot material for screen productions.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for CUACAM311 Shoot material for screen productions

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- shoot at least two examples of material for screen productions.

In the course of the above, the candidate must:

- contribute to pre-production discussions about:
 - ways to capture desired style of moving images
 - location, schedules and timelines of shoot
- assemble equipment and accessories in readiness for camera shoots
- position camera on location so shots are captured from the best angles
- safely set up and test equipment and accessories
- safely operate different professional video camera equipment and accessories to capture shots as directed and in a way that facilitates post-production editing
- work according to project requirements
- work as a team member to position equipment before and during shoots and pack up gear at conclusion of shoots
- assist with moving cables and cameras during shoots.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- roles and responsibilities of production and post-production personnel
- typical problems that arise in the context of shooting material for screen productions and ways to address them
- different image capture media and their uses
- labelling procedures used for capture media
- basic framing techniques and methods of composition

- characteristics of microphones and audio equipment commonly used for shooting screen productions
- impact of different light sources, lenses and filters on lighting sets and talent
- basic principles of lighting that apply in the context of shooting material for screen productions
- techniques for handling and attaching cabling
- legal and regulatory responsibilities within scope of own role and work context
- strategies to work collaboratively with a team
- work health and safety (WHS) and security procedures that apply to shooting on location.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- camera, lighting and sound equipment
- locations for shooting video
- productions for which material needs to be filmed
- production documents
- WHS and security procedures that apply to shooting video on location
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG211 Maintain interactive content

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to maintain interactive content for websites or social media channels using a content management system. It involves confirming content requirements, checking links and media assets are valid and functional, updating applicable content and testing content functionality on the server.

The unit applies to those, working under direction, who upload media assets and change text content.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Check content	1.1 Confirm frequency of content updates and production deadlines with required personnel 1.2 Obtain, access and review content and confirm versions meet content requirements 1.3 Confirm existing content to be retained or deleted with required personnel
2. Check links and media assets	2.1 Check existing links are valid and source replacement links as required 2.2 Confirm assets are functional and in file format and size that meets content requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Document technical and content issues according to organisational policies and procedures 2.4 Confirm with required personnel that copyright clearance has been obtained on all new content
3. Update content	3.1 Access content management system and upgrade content 3.2 Import and change content material as required and specify metadata and tags according to content requirements and organisational policies and procedures 3.3 Make heading, typographical, caption and image revisions, applying applicable style sheets and alt tags as required 3.4 Add pages and screens as required, applying applicable templates or themes 3.5 Submit edited files to server and confirm upload was successful 3.6 Advise required personnel if new interface designs are required to incorporate additional materials
4. Test and confirm changes	4.1 Check all content is displayed and functions on server as required 4.2 Confirm with required personnel that all changes have been made 4.3 Store original content according to organisational policies and procedures and file using standard industry conventions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and follows familiar written instructions Checks content and confirms styles, links and subject matter meet requirements
Writing	<ul style="list-style-type: none"> Enters electronic information in required format Prepares technical documents in required format
Oral Communication	<ul style="list-style-type: none"> Clarifies requirements using questioning and listening techniques Discusses tasks with required personnel using clear, everyday language
Self-management	<ul style="list-style-type: none"> Adheres to organisational and legislative requirements
Teamwork	<ul style="list-style-type: none"> Discusses and confirms requirements using applicable communication practices
Planning and	<ul style="list-style-type: none"> Plans and completes work tasks, seeking advice as required

SKILL	DESCRIPTION
organising	
Technology	<ul style="list-style-type: none">Examines, amends and uploads interactive content using applicable software

Unit Mapping Information

Supersedes and is equivalent to CUADIG201 Maintain interactive content.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for CUADIG211 Maintain interactive content

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- maintain interactive content for five different websites and social media channels.

In the course of the above, the candidate must:

- undertake interactive content maintenance procedures, including:
 - checking links and media assets
 - updating text, media assets and pages
 - assigning correct metadata or tags
 - checking that changes have uploaded successfully
- use a content management system according to organisational policies and procedures
- document technical and content issues according to organisational policies and procedures
- adopt safe ergonomic practices when using equipment
- store content according to industry conventions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- impact on usability of web pages of outdated links
- procedures for checking copyright clearance
- procedures for using metadata and tags to classify content
- purpose of alt tags and how they relate to accessibility standards
- safe work practices in relation to working on computers for periods of time.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- applicable interactive content
- content management system, the internet and authoring tools.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG212 Develop digital imaging skills

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to use basic techniques to work with digital images. It involves preparing resources for digital imaging, using and testing different techniques to produce digital images and reviewing plans to further develop own skills.

The unit applies to those applying fundamental skills in the use of digital software for general design or drawing purposes in a creative arts practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare digital imaging resources	1.1 Identify and obtain tools, equipment and materials used to create digital images 1.2 Prepare tools, equipment and materials according to organisational policies, procedures and safety requirements 1.3 Set up a safe work space with guidance from required personnel
2. Use and test digital imaging techniques	2.1 View different digital images in different styles produced by key practitioners and discuss with others how these effects are achieved 2.2 Match potential techniques for producing images to own ideas with assistance from required personnel 2.3 Nominate and test techniques and determine the effects they

ELEMENT	PERFORMANCE CRITERIA
	<p>achieve</p> <p>2.4 Produce digital images using selected techniques and safe work practices</p> <p>2.5 Clean work space and equipment and return to original condition</p>
3. Make plans to develop skills	<p>3.1 Seek and use feedback from required personnel on own digital imaging work and identify areas for improvement</p> <p>3.2 Review different opportunities to build own skills and select suitable options</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> Identifies skill improvement needs, considers opportunities and begins to plan and manage the learning process
Reading	<ul style="list-style-type: none"> Interprets straightforward information from applicable sources to plan and complete tasks
Oral Communication	<ul style="list-style-type: none"> Discusses concepts and techniques with others and seeks feedback on work outcomes using clear and related language Clarifies information and confirms understanding using questioning and active listening techniques
Self-management	<ul style="list-style-type: none"> Follows defined procedures and safety and intellectual property requirements to plan and complete tasks, with some guidance from others
Teamwork	<ul style="list-style-type: none"> Follows accepted communication methods and practices to seek guidance and advice from others
Planning and organising	<ul style="list-style-type: none"> Prepares work space and identifies and assembles required resources with input from others using simple organisational methods Uses familiar digital tools and equipment to produce work
Initiative and enterprise	<ul style="list-style-type: none"> Makes simple analytical decisions to determine potential techniques and evaluate outcomes of limited testing and exploration
Technology	<ul style="list-style-type: none"> Produces work using familiar digital tools and equipment

Unit Mapping Information

Supersedes and is equivalent to CUADIG202 Develop digital imaging skills.

Assessment Requirements for CUADIG212 Develop digital imaging skills

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce digital images according to at least three different ideas.

In the course of the above, the candidate must:

- use and test digital imaging techniques and materials to support the idea for the work
- explore the process for producing digital imaging in a discussion with others
- adopt safe ergonomic practices when using equipment
- review own progress and identify at least one or more ways to further develop skills.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- function and capabilities of materials, tools and equipment commonly used for digital imaging
- major styles of digital imaging and the work of key practitioners
- common digital imaging techniques
- safe cleaning techniques for tools and equipment used in producing digital images
- procedures for working safely with digital materials, tools and equipment.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- tools, equipment, materials for producing digital images

- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG301 Prepare video assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to prepare video assets for inclusion in interactive media.

It applies to individuals who work in collaboration with others and under supervision to convert video into forms appropriate for streaming, downloading and/or digital media products. In smaller organisations, they may combine this role with video editing, authoring or programming.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify video assets	1.1 Obtain and assess digital video content as determined by production 1.2 Clarify production schedules and deadlines with relevant personnel 1.3 Identify file format, output purpose, destination and platform of source video according to production requirements 1.4 Discuss, with relevant personnel, required output file format and

ELEMENT	PERFORMANCE CRITERIA
	codecs for specified bandwidths, and appropriate video encoding software
2. Prepare video assets	<p>2.1 Load video files into appropriate video encoding software</p> <p>2.2 Check duration and quality of video sequences meet production requirements, and balance and clip sequence if necessary</p> <p>2.3 Determine and apply appropriate video and audio codecs to meet quality standards</p> <p>2.4 Batch and optimise video files where possible</p> <p>2.5 Save files in appropriate output file format using standard industry or enterprise naming conventions</p> <p>2.6 Follow safe ergonomic practices when using computer equipment for long periods of time</p>
3. Package video assets	<p>3.1 Assign metadata tags if required</p> <p>3.2 Group files in folder system using standard industry or enterprise naming conventions</p> <p>3.3 Archive and store in share drive or asset repository for production team access</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.5, 3.1, 3.2	<ul style="list-style-type: none">Identifies and interprets information in organisational documentsLocates correct folders for storing electronic dataChecks textual information for accuracy
Writing	2.5, 3.1, 3.2	<ul style="list-style-type: none">Writes metadata tags to aid classification of filesApplies standard naming conventions to electronic data
Oral Communication	1.2, 1.4	<ul style="list-style-type: none">Discusses video requirements using industry appropriate languageUses questioning and listening techniques to clarify requirements

Numeracy	2.2, 2.3	<ul style="list-style-type: none"> Calculates basic bandwidth requirements
Navigate the world of work	2.5, 2.6, 3.2	<ul style="list-style-type: none"> Complies with enterprise and legislative requirements
Interact with others	1.2, 1.4	<ul style="list-style-type: none"> Uses appropriate communication practices and protocols to confirm requirements with personnel
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.3	<ul style="list-style-type: none"> Plans and completes tasks required to achieve requirements within deadlines Makes decisions directed related to completion of tasks Used digital tools to prepare and store video assets

Unit Mapping Information

Assessment Requirements for CUADIG301 Prepare video assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare video sequences for use in media distribution channels or interactive media products
- use video encoding software to prepare video sequences that meet quality requirements within production deadlines
- save and store files according to industry or enterprise conventions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the features of the delivery platforms used to prepare video assets
- explain why video file compression is required
- identify common digital video sources and output formats
- explain appropriate codecs for various platforms and destinations
- describe techniques for saving and preparing digital video output to optimise file size
- explain purposes and procedures for correctly naming and tagging video files
- explain safe work practices in relation to working on computers for periods of time.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- video encoding and editing software and equipment
- manuals and instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG302 Author interactive sequences

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to use an authoring tool to produce discrete interactive sequences for websites.

It applies to individuals working collaboratively with technical assistance and under direction, who develop small components such as web pages or a sequence of screens, which are integrated into a larger project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan use of authoring tool	1.1 Identify a range of appropriate authoring software and discuss their application to various delivery platforms with relevant people 1.2 Clarify design specifications of the project and deadlines with relevant people 1.3 Discuss with relevant personnel the technical requirements of the project and select appropriate authoring software
2. Prepare to author	2.1 Load selected authoring software, create a new file in website

ELEMENT	PERFORMANCE CRITERIA
sequence	<p>directory for specified task and name using standard industry naming conventions</p> <p>2.2 Source and assemble all media assets and text content, and check compliance with copyright conditions</p> <p>2.3 Display and use tools and features of authoring software</p> <p>2.4 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time</p>
3. Produce interactive sequences	<p>3.1 Produce screen layout according to design specifications applying basic visual design principles and/or templates or themes</p> <p>3.2 Create interactive media components as required</p> <p>3.3 Source text content and apply style sheets to format text</p> <p>3.4 Source relevant media assets, optimise if required, and integrate using appropriate file formats</p> <p>3.5 Link all components according to production storyboard</p> <p>3.6 Manipulate HTML mark-up code where errors are occurring or to refine sequence functionality</p> <p>3.7 Apply features to optimise accessibility</p> <p>3.8 Save file to website directory structure as components are produced</p>
4. Check functionality of interactive sequence	<p>4.1 Check interactive elements function with minimal error on a variety of devices, operating systems and browsers</p> <p>4.2 Incorporate changes as required</p> <p>4.3 Present sequence to relevant people</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 3.1, 3.3, 3.5, 3.6, 3.8	<ul style="list-style-type: none"> Identifies and interprets information in organisational documents Locates correct folders for storing electronic data Checks textual information for accuracy

Writing	2.1, 3.6, 3.8	<ul style="list-style-type: none"> Selects the vocabulary and conventions appropriate to text for writing code and naming files
Oral Communication	1.1-1.3, 4.3	<ul style="list-style-type: none"> Asks questions and listens carefully to confirm design and technical specifications of the project
Navigate the world of work	2.2, 2.4	<ul style="list-style-type: none"> Complies with legislative requirements
Interact with others	1.1-1.3, 4.3	<ul style="list-style-type: none"> Uses appropriate communication practices and protocols to confirm requirements and present interactive sequences
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.8, 4.1, 4.2	<ul style="list-style-type: none"> Takes responsibility for planning and producing interactive sequences according to project requirements and design principles Makes decisions directed related to completion of tasks Uses digital tools to create, optimise and store interactive sequences

Unit Mapping Information

Assessment Requirements for CUADIG302 Author interactive sequences

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- assemble text content, interactive media components and media assets required for a project
- use appropriate software to produce interactive media sequences that meet design and project specifications within deadlines
- apply visual design principles, templates, style sheets and HTML mark-up language to interactive sequences
- check interactive sequence functionality on at least two operating systems, browsers and devices
- save and store files correctly.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list appropriate file formats for web delivery
- outline when optimisation of media assets is necessary
- explain why application of accessibility standards in the web environment is important
- describe basic visual design principles as they apply to website page layout
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- text and media assets
- authoring software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG303 Produce and prepare photo images

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to prepare photo images for integration into an interactive media sequence or product.

It applies to individuals who produce a variety of photo images for production of virtual worlds, from digital still composition to panoramas. They work closely with a programmer or interactive media author and may offer technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use scanner to capture photo images	1.1 Source and identify appropriate photographic images according to requirements of photographic project brief 1.2 Discuss selection of images with relevant personnel, and check compliance with copyright conditions 1.3 Assess scanner features to confirm quality outcomes will meet brief requirements 1.4 Operate scanner according to manufacturer's specifications

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5 Use appropriate scanner settings to ensure image output meets production requirements</p> <p>1.6 Transfer and store photographic image files to a computer using standard naming conventions</p>
2. Use digital camera to create photo images	<p>2.1 Clarify photographic project brief with relevant personnel</p> <p>2.2 Assess digital camera features to ensure outcome will meet requirements of brief</p> <p>2.3 Plan camera shots, taking into account lighting, framing, composition and other relevant factors</p> <p>2.4 Load and operate digital camera according to manufacturer's specifications</p> <p>2.5 Consider digital camera focus, exposure and shutter speed to ensure image capture meets production requirements</p> <p>2.6 Check photographic images meet brief requirements</p> <p>2.7 Transfer and store photographic image files to a computer using standard naming conventions</p>
3. Edit photo images	<p>3.1 Load digital imaging software and import photo image source files</p> <p>3.2 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time</p> <p>3.3 Manipulate and save digital images using designated digital imaging software</p> <p>3.4 Create photo images that incorporate visual design and communication principles</p> <p>3.5 Evaluate outcome for visual impact, effectiveness and fitness for purpose</p> <p>3.6 Confirm images meet project requirements with relevant personnel</p>
4. Prepare photo image assets	<p>4.1 Save files in appropriate output format to meet platform requirements</p> <p>4.2 Assign metadata tags if required</p> <p>4.3 Group files logically in a folder system using standard naming conventions</p> <p>4.4 Store files in share drive or repository for production team access</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4-1.6, 2.4-2.7, 4.1, 4.3	<ul style="list-style-type: none"> Interprets textual information to follow equipment operation and project requirements
Writing	1.6, 2.7, 4.1-4.3	<ul style="list-style-type: none"> Selects the vocabulary and conventions appropriate to text for naming files
Oral Communication	1.2, 2.1, 3.6	<ul style="list-style-type: none"> Uses listening and questioning techniques to discuss project brief and to confirm outcomes Uses descriptive and technical language to participate in oral exchanges
Navigate the world of work	1.2, 3.2	<ul style="list-style-type: none"> Complies with legislative requirements
Interact with others	1.2, 2.1, 3.6	<ul style="list-style-type: none"> Uses appropriate communication practices and protocols to confirm requirements and present images
Get the work done	1.1, 1.3-1.6, 2.2-2.7, 3.1, 3.3-3.6, 4.1-4.4	<ul style="list-style-type: none"> Takes responsibility for logically planning and producing photo images according to design briefs and visual design principles Makes decisions directly related to task completion Utilises a range of features within digital cameras, scanners and digital imaging software to create and store photo images

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUADIG303 Produce and prepare photo images	CUFDIG303A Produce and prepare photo images	Updated to meet Standards for Training Packages. Minor edits to performance criteria.	Equivalent unit

Links

Assessment Requirements for CUADIG303 Produce and prepare photo images

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- use a scanner and digital camera to capture images that satisfy project briefs
- use digital imaging software and techniques, design and communication principles to produce images that meet project requirements
- save and store files according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the features of a digital camera that are essential for creating images to the required standard
- outline the basic techniques used to compose camera shots
- explain how visual design and communication principles are relevant to photography
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a scanner and digital camera
- digital imaging software
- project briefs
- information or manuals about operating equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG304 Create visual design components

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to create visual designs for interactive media components that can be integrated into a range of media products.

It applies to individuals who generate and assess ideas to create visual design components in response to specifications under supervision in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify work requirements	1.1 Clarify visual design components required in the project brief, in consultation with relevant personnel 1.2 Identify project timelines and discuss factors that may determine or affect visual design concepts 1.3 Clarify, in discussion with relevant personnel, the target user or audience, and determine format and delivery platform
2. Generate and assess ideas	2.1 Research media products, designs, images, artwork and other creative sources that may inspire visual design ideas

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Develop a range of visual design ideas that are technically feasible, respond to project specifications and provide creative solutions to design issues</p> <p>2.3 Present and review visual design ideas with relevant personnel</p>
3. Develop design concept	<p>3.1 Experiment with traditional and digital methods to create required visual design components</p> <p>3.2 Explore a range of typographical and visual design elements to create components</p> <p>3.3 Evaluate initial design ideas with relevant personnel to select final design concept</p> <p>3.4 Confirm design concept complies with copyright laws</p> <p>3.5 Check output format meets delivery platform requirements</p> <p>3.6 Adopt safe ergonomic practices when using equipment for long periods of time</p>
4. Produce components	<p>4.1 Develop components based on the final design concept using various design techniques</p> <p>4.2 Apply visual design principles and communication principles to produce components that have high visual impact</p> <p>4.3 Save components in an appropriate format according to project specifications</p>
5. Finalise visual design components	<p>5.1 Review visual design components against design and technical specifications</p> <p>5.2 Discuss and confirm additional requirements or modifications with relevant personnel, and make amendments as required</p> <p>5.3 Save and archive visual design components using industry or enterprise naming conventions and version control protocols</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 3.1, 3.2, 3.3,	<ul style="list-style-type: none"> Reviews and researches creative source material to generate ideas

	4.1, 4.3, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> Checks that output meets requirements Locates correct folders for storing electronic data
Writing	2.2, 3.1, 3.2, 4.1, 4.3, 5.2, 5.3	<ul style="list-style-type: none"> Prepares information to accompany design components Names files according to requirements
Oral Communication	1.1-1.3, 2.3, 3.3, 4.3, 5.2	<ul style="list-style-type: none"> Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding
Navigate the world of work	3.4, 3.6	<ul style="list-style-type: none"> Complies with legislative requirements
Interact with others	1.1-1.3, 2.3, 3.3, 4.3, 5.2	<ul style="list-style-type: none"> Collaborates with relevant personnel to ensure that end result meets requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3, 3.5, 4.2, 4.3, 5.1-5.	<ul style="list-style-type: none"> Takes responsibility for planning and producing design components according to project requirements and design principles Makes decisions directed related to completion of tasks Uses experimentation to develop new or innovative design approaches Selects and uses appropriate software to conceive, produce, store and present visual design components

Assessment Requirements for CUADIG304 Create visual design components

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- explore and experiment with design techniques and visual design and communication principles to produce ideas and concepts for visual design components
- use design techniques to create visual design components that respond effectively to a project brief
- present and discuss ideas, concepts and designs with relevant personnel
- save and archive files using standard industry or enterprise naming conventions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe differences between traditional and digital methods in creating visual images, and advantages and disadvantages of each
- describe visual design, typographic and communication principles used to construct visual design components
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- project briefs
- relevant software

- manuals and information to support software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG311 Prepare video assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to prepare video assets for inclusion in interactive media. It involves identifying, organising and packaging video assets in a variety of digital formats.

The unit applies to those who collaborate with others and under supervision to convert video into forms appropriate for streaming, downloading and digital media products. In smaller organisations, they may combine this role with video editing, authoring or programming.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and evaluate video assets	1.1 Confirm production schedules and deadlines with required personnel 1.2 Obtain and assess digital video content according to production requirements 1.3 Identify file details and confirm they meet production requirements 1.4 Confirm required output file format, codecs for specified bandwidths and applicable video encoding software
2. Organise video assets	2.1 Load video files into applicable video encoding software 2.2 Confirm duration and quality of video sequences meet

ELEMENT	PERFORMANCE CRITERIA
	production requirements 2.3 Confirm video and audio codecs meet production requirements 2.4 Save files in output file format using required naming conventions
3. Package video assets	3.1 Assign metadata tags as required 3.2 Save files using standard naming conventions 3.3 Archive materials for future use according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information in organisational documents Locates correct folders for storing electronic data Checks textual information for accuracy
Oral Communication	<ul style="list-style-type: none"> Discusses video requirements using industry standard language Clarifies requirements using questioning and listening techniques
Numeracy	<ul style="list-style-type: none"> Calculates basic bandwidth requirements
Self-management	<ul style="list-style-type: none"> Complies with enterprise and legislative requirements
Teamwork	<ul style="list-style-type: none"> Confirms requirements with personnel using applicable communication practices and protocols
Planning and organising	<ul style="list-style-type: none"> Plans and completes tasks required to achieve requirements within deadlines Makes decisions directed related to completion of tasks Used digital tools to prepare and store video assets
Technology	<ul style="list-style-type: none"> Prepares and stores video assets using digital tools

Unit Mapping Information

Supersedes and is equivalent to CUADIG301 Prepare video assets.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for CUADIG311 Prepare video assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare video assets according to at least two different production requirements.

In the course of the above, the candidate must:

- prepare video sequences for use in media distribution channels or interactive media products
- use video encoding software to prepare video sequences that meet quality requirements within production deadlines
- save and store files according to industry or enterprise conventions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- features of the delivery platforms used to prepare video assets
- purpose of video file compression
- common digital video sources and output formats
- appropriate codecs for common platforms and destinations
- techniques for saving and preparing digital video output to optimise file size
- purposes and procedures for correctly naming and tagging video files
- safe work practices in relation to working on computers for periods of time.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- video encoding and editing software and equipment

- manuals and instructions relating to the preparation of video assets.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG312 Author interactive sequences

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to use an authoring tool to produce discrete interactive sequences for websites. It involves planning the use of the authoring tool, preparing authoring software for authoring and producing interactive sequences according to project requirements.

The unit applies to those working collaboratively with technical assistance and under direction, who develop small components such as web pages or a sequence of screens, which are integrated into a larger project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan use of authoring tool	1.1 Identify different applicable authoring software and discuss their application to various delivery platforms with required personnel 1.2 Clarify design specifications, technical requirements and deadlines of the project in discussion with required personnel 1.3 Select authoring software that meets project requirements
2. Prepare to author sequence	2.1 Load selected authoring software and prepare sequence according to operating procedures 2.2 Source and assemble all media assets and text content, and

ELEMENT	PERFORMANCE CRITERIA
	confirm compliance with copyright conditions 2.3 Display and use tools and features of authoring software
3. Produce interactive sequences	3.1 Produce screen layout according to design specifications 3.2 Create interactive media components as required 3.3 Source text content and apply style sheets to format text 3.4 Source applicable media assets, optimise if required, and integrate using required file formats 3.5 Link all components according to production storyboard 3.6 Manipulate mark-up code where errors are occurring or to refine sequence functionality 3.7 Apply features to optimise accessibility 3.8 Save file to website directory structure as components are produced
4. Check functionality of interactive sequence	4.1 Check interactive elements function according to project requirements on different devices, operating systems and browsers 4.2 Incorporate changes as required 4.3 Present sequence to required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information in organisational documents Locates required folders for storing electronic data Checks textual information meets project requirements
Writing	<ul style="list-style-type: none"> Selects the vocabulary and conventions applicable to text for writing code and naming files
Oral Communication	<ul style="list-style-type: none"> Asks questions and listens carefully to confirm design and technical specifications of the project
Self-management	<ul style="list-style-type: none"> Complies with legislative requirements
Teamwork	<ul style="list-style-type: none"> Confirms requirements and presents interactive sequences using applicable communication practices and protocols
Planning and	<ul style="list-style-type: none"> Takes responsibility for planning and producing interactive sequences according to project requirements and design principles

SKILL	DESCRIPTION
organising	
Initiative and enterprise	<ul style="list-style-type: none">• Makes decisions directed related to completion of tasks
Technology	<ul style="list-style-type: none">• Creates, optimises and stores interactive sequences using digital tools

Unit Mapping Information

Supersedes and is equivalent to CUADIG302 Author interactive sequences.

Assessment Requirements for CUADIG312 Author interactive sequences

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce interactive media sequences according to at least two different project requirements.

In the course of the above, the candidate must:

- assemble text content, interactive media components and media assets
- use applicable software to meet design and project specifications within deadlines
- apply visual design principles, templates, style sheets and mark-up language to interactive sequences
- adopt safe ergonomic practices when using screens and keyboards
- check interactive sequence functionality on at least two operating systems, browsers and devices
- save and store files according to organisational policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- applicable file formats for web delivery
- requirements for the optimisation of media assets when authoring interactive sequences
- importance of applying accessibility standards in the web environment
- basic visual design principles as they apply to website page layout
- safe work practices in relation to working on computers for periods of time
- procedures for checking copyright clearance.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- text and media assets
- authoring software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG401 Author interactive media

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to author a complete interactive media product, for example, an entire website.

It applies to individuals who apply sound knowledge of mark-up and scripting languages to develop templates, themes styles sheets, forms and form objects for programmers and the technical support team. They may also use a variety of authoring software used to produce complex interactions such as digital simulations, games and puzzles. They work primarily on client-side technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Digital Content and Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify multimedia elements	1.1 Assess design specifications to determine technical and creative objectives of the project 1.2 Locate and assess content required for production 1.3 Discuss issues of integration and formats of media assets with relevant personnel, and confirm production timelines 1.4 Determine, with relevant personnel, an interactive sequence to

ELEMENT	PERFORMANCE CRITERIA
	become the prototype
2. Identify scope of authoring software	2.1 Identify a range of industry-standard authoring software and assess in relation to specified delivery platform 2.2 Discuss suitability of authoring software to meet specified outcomes with relevant personnel 2.3 Select authoring software to meet production requirements
3. Use authoring software	3.1 Load authoring software and create a file directory structure for the specified task and name using standard industry or enterprise naming conventions 3.2 Display and use tools and features of authoring software relevant to the authoring process 3.3 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time.
4. Create interactive sequence	4.1 Slice and reassemble the user interface appropriate to the authoring software 4.2 Import and assemble components in appropriate sequence according to creative requirements 4.3 Create interactive features according to creative and technical requirements, sourcing and writing appropriate mark-up and scripting languages as required 4.4 Check that interactive sequence conforms to navigation design 4.5 Integrate media assets to optimum levels of technical performance 4.6 Check interactive sequence conforms to loading specifications 4.7 Test for interoperability and accessibility, eliminate all bugs and validate scripting 4.8 Present interactive sequence as a prototype ensuring sequence meets creative, production and technical requirements 4.9 Save output file formats and identify for specified purpose
5. Evaluate interactive prototype	5.1 Present prototype to relevant personnel 5.2 Evaluate prototype against design specifications, including achievement of a creative and user-centred product 5.3 Discuss and agree on any required changes and make adjustments to prototype 5.4 Assist in user testing as required

ELEMENT	PERFORMANCE CRITERIA
	5.5 Evaluate feedback from user testing 5.6 Seek confirmation from relevant personnel to transform prototype into final product
6. Finalise interactive media product	6.1 Make necessary changes as indicated by user testing 6.2 Replicate prototype functionality to complete the interactive product 6.3 Make final checks to ensure sequences conform to design specifications 6.4 Test for interoperability and accessibility, eliminate bugs and validate scripting 6.5 Save to specified storage system accessible to production team 6.6 Assist in loading product to specified platform as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 4.2-4.4, 4.6-4.9, 5.2, 5.5, 6.1, 6.3, 6.4, 6.5	<ul style="list-style-type: none"> Selects and applies a range of reading strategies to interpret design and technical requirements Reviews and interprets feedback from user trials to enable completion of final product Validates scripting to ensure accurate operation of interactive media Locates correct folders for logical storing of electronic data to assist with production
Writing	3.1, 4.3, 4.9, 6.5	<ul style="list-style-type: none"> Creates a range of texts incorporating specific scripting language, mark-up and standard file naming conventions
Oral Communication	1.3, 1.4, 2.2, 4.8, 5.1-5.6	<ul style="list-style-type: none"> Uses clear language, questioning and listening techniques to specify and discuss interactive prototypes and final product
Navigate the world of work	3.3	<ul style="list-style-type: none"> Complies with legislative responsibilities
Interact with	1.3, 1.4, 2.2, 4.8,	<ul style="list-style-type: none"> Uses appropriate communication practices and

others	5.1-5.6	protocols to confirm requirements and present prototypes to a range of personnel
Get the work done	1.1-1.4, 2.1-2.3, 3.1, 3.2, 4.1-4.9, 5.1-5.6, 6.1-6.6	<ul style="list-style-type: none"> • Takes responsibility for managing a range of tasks concurrently to produce an interactive prototype and final product which meets creative, production and technical requirements • Applies evaluation and diagnostic tests to identify necessary adjustments • Uses authoring and graphics software to create, test, evaluate and adjust interactive prototypes • Identifies, saves and stores final prototypes in digital format

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUADIG401 Author interactive media	CUFDIG401A Author interactive media	Updated to meet Standards for Training Packages. Minor edits to elements and performance criteria to clarify intent.	Equivalent unit

Assessment Requirements for CUADIG401 Author interactive media

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- discuss and determine requirements for an interactive media product
- use authoring software to create logical file directory structures and build a prototype of an interactive media product
- evaluate and incorporate feedback from user testing to the prototype
- use authoring software to develop a fully functional interactive media product that:
 - conforms to design and creative requirements specifications
 - meets accessibility and interoperability standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain technical requirements for integrating media assets (video, audio, animation, images) for use on a range of delivery platforms
- describe interoperability and accessibility standards used in interactive media product design
- explain the purpose and process of script validation
- outline basic health and safety requirements when working on computers and keyboards.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- design specifications

- sample content including a range of media assets
- authoring software
- software manuals and other relevant information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG512 Design digital applications

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to determine project requirements, and research and draft designs for digital applications, which may consist of one or multiple technologies integrated in various combinations.

The unit applies to those who work with clients to design specifications for digital applications, which are then built by other specialised team members. Digital applications may be operated in a web, mobile or other device environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – Digital content and imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Analyse project brief and identify project requirements in discussion with required personnel 1.2 Determine target audience characteristics and their influence on design 1.3 Identify content and application functions and how these are accessed, searched and delivered
2. Research and select digital applications	2.1 Research different digital applications and analyse how these meet project requirements 2.2 Identify issues relating to delivery platform and technical and industry standards, and determine how these may affect digital

ELEMENT	PERFORMANCE CRITERIA
	application options 2.3 Confirm different digital application options identified in consultation with required personnel 2.4 Select applications that meet project requirements
3. Draft design specifications	3.1 Outline interrelationship of different components and screens and design architecture of digital application 3.2 Identify content and data displays, and specify how these will be logically structured and integrated into digital application 3.3 Specify production requirements, including applicable testing strategies 3.4 Produce draft design specifications and instructions for development teams according to project brief requirements
4. Review and confirm design specifications	4.1 Review designs against project requirements 4.2 Present draft design specifications using industry standard techniques and discuss with required personnel 4.3 Adjust designs as necessary after discussions with required personnel 4.4 Clarify ownership of intellectual property according to project and organisational requirements 4.5 Confirm acceptance of design specifications with required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Participates effectively in spoken interactions using language and features applicable to audience Confirms project requirements and elicits relevant feedback using questioning and listening strategies Communicates with different audiences using applicable practices and protocols
Reading	<ul style="list-style-type: none"> Interprets texts using different reading strategies
Writing	<ul style="list-style-type: none"> Drafts and confirms specifications and instructions using text, graphic diagrammatic and visual formats.

SKILL	DESCRIPTION
Initiative and enterprise	<ul style="list-style-type: none">Analyses information and makes decisions that affect the entire project
Planning and organising	<ul style="list-style-type: none">Takes responsibility for planning, organising and implementing tasks, coordinating with others when required
Self-management	<ul style="list-style-type: none">Adheres to organisational and legislative requirements
Teamwork	<ul style="list-style-type: none">Collaborates with others throughout all stages of design process
Technology	<ul style="list-style-type: none">Uses digital tools that specify architecture, navigation and content to meet project brief specifications

Unit Mapping Information

Supersedes and is equivalent to CUADIG502 Design digital applications.

Assessment Requirements for CUADIG512 Design digital applications

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design at least two digital applications according to different project briefs.

In the course of the above, the candidate must:

- research digital applications
- design technically feasible specifications for digital applications that:
 - meet audience, function and content requirements
 - detail all aspects of the application's:
 - interactive features, functionality, navigation and user interfaces
 - access permissions, media assets and reports
 - search capability, architecture, content and screen designs
- present and discuss draft specifications
- review and adjust design specifications where required.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sequence and interrelationships of stages in the process of designing digital applications
- common digital application platforms
- structures of content and data displays in digital applications
- different components and design architecture of digital applications
- issues relating to technical standards and platform functions that may impact on digital application options
- testing strategies used in design of digital applications
- impact of web standards on design of digital applications
- typical formats and techniques for documenting design of digital applications

- concept of intellectual property rights and how these are managed in context of digital applications.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project briefs on which designs can be based
- sample content
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG513 Design e-learning resources

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to identify learner requirements, research, and draft the design of e-learning resources in consultation with clients.

The unit applies to those who work in education or training organisations, or in media production companies that specialise in the development of e-learning resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – Digital content and imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify project requirements	1.1 Confirm project brief requirements in consultation with required personnel 1.2 Identify target learner characteristics and determine impact on resource design 1.3 Identify content requirements, accessibility and delivery requirements 1.4 Determine delivery platforms that meet project requirements and assess implications for media asset formats and content modification
2. Research and select instructional design model	2.1 Identify and analyse content, establishing learning outcomes and assessment strategies 2.2 Research instructional design models and discuss suitability for

ELEMENT	PERFORMANCE CRITERIA
	<p>project brief requirements with required personnel</p> <p>2.3 Identify accessibility and technical standards that apply for delivery platforms</p> <p>2.4 Evaluate different interactive learning and assessment activities that meet learning styles of target learners</p> <p>2.5 Select instructional design model that meets learning needs and project brief requirements in consultation with required personnel</p>
3. Draft design specifications	<p>3.1 Design architecture of e-learning resource using selected instructional design model</p> <p>3.2 Develop sequences, interactivity and content templates based on content and project requirements</p> <p>3.3 Specify media assets, user interface, and communication and collaboration tools as required</p> <p>3.4 Specify production requirements and testing strategies</p> <p>3.5 Produce design specifications and instructions for development teams</p>
4. Finalise design specifications	<p>4.1 Present design specifications and discuss with required personnel</p> <p>4.2 Review designs against project brief requirements and target learner needs and adjust as required</p> <p>4.3 Clarify ownership of intellectual property and confirm compliance with project brief requirements</p> <p>4.4 Confirm acceptance of design specifications with required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> • Uses language and features required for audience • Confirms project requirements and elicits feedback using questioning and listening strategies • Communicates with audiences using various practices and protocols
Reading	<ul style="list-style-type: none"> • Identifies and interprets relevant information including applicable legislation and organisational requirements • Integrates technical and descriptive information and ideas from different sources • Interprets project briefs to inform process of designing e-learning resources

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none">• Drafts and confirms requirements and specifications using text, diagrammatic and graphic formats
Initiative and enterprise	<ul style="list-style-type: none">• Generates complex creative ideas in alignment with project brief• Takes responsibility for analysing information and making decisions and ensures designs meet project brief requirements
Planning and organising	<ul style="list-style-type: none">• Adopts methodical and logical approach to planning, organising and implementing tasks
Self-management	<ul style="list-style-type: none">• Adheres to organisational and legislative requirements
Teamwork	<ul style="list-style-type: none">• Collaborates with others throughout all stages of the design process
Technology	<ul style="list-style-type: none">• Assists with design of e-learning resources using digital tools

Unit Mapping Information

Supersedes and is equivalent to CUADIG503 Design e-learning resources.

Assessment Requirements for CUADIG513 Design e-learning resources

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design at least two e-learning resources according to different project briefs.

In the course of the above, the candidate must:

- research and select instructional design models
- draft specifications for technically feasible e-learning resources for delivery on different platforms that:
 - meet learner requirements
 - detail aspects of e-learning resources including resource architecture, interactive learning and assessment activities, media assets, communication and collaboration tools, user interface production requirements and testing strategies
- present and discuss design specifications.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- instructional design learning models for e-learning
- industry standard learning management systems
- target learner characteristics and how these impact on instructional design choices
- e-learning delivery platforms, and briefly describe any particular design requirements
- interactive learning and assessment activities
- different media assets used for e-learning and associated implications
- common formats and techniques for documenting design of e-learning resources
- impact of web standards on design of e-learning resources
- intellectual property rights and how these are managed in the context of e-learning resource development
- communication and collaboration tools.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project briefs on which designs can be based
- industry standard instructional design models
- sample content.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADIG517 Design digital simulations

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to research, plan and design drafts for digital simulations of real-world environments and processes.

The unit applies to those who work closely with subject experts to develop virtual environments for fields including architecture, science and engineering, medicine, conservation and manufacturing. They may also collaborate with programmers and software authors so the simulation is technically achievable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – Digital content and imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify project requirements	1.1 Confirm objectives and desired outcomes of project brief in consultation with required personnel 1.2 Identify target audience and determine format and delivery platform of simulations in discussion with required personnel
2. Research and plan approach	2.1 Investigate real world environment to be simulated and determine technical parameters that may be required 2.2 Evaluate designs and other information that may assist modelling real world environment 2.3 Determine performance objectives, task complexity and user skill levels

ELEMENT	PERFORMANCE CRITERIA
	2.4 Determine required depth of physical and functional fidelity that meets production requirements 2.5 Research and identify applicable simulation authoring tools 2.6 Discuss ideas and solutions in collaboration with required personnel
3. Draft simulation design documents	3.1 Identify processes that determine functional behaviour of simulation and specify how this behaviour is represented by control objects 3.2 Define underlying functionality in model that specifies essential settings, states, conditions and parameters 3.3 Specify user interface controls that enable user interaction with simulation 3.4 Identify critical impacts, alerts or costs for incorrect user operation 3.5 Specify sequencing of difficulty levels, if required 3.6 Confirm proposed simulation is technically feasible in consultation with required personnel 3.7 Present clear and detailed draft simulation design specifications for discussion and feedback with required personnel 3.8 Outline positive and negative feedback from user responses when interacting with simulations, and adjust as required
4. Finalise simulation design documents	4.1 Review designs against desired project outcomes and objectives 4.2 Review designs against creative, technical and intellectual property requirements 4.3 Adjust design specifications as necessary after discussions with required personnel 4.4 Archive user interface controls

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Participates effectively in spoken interactions using language and features applicable to audience Confirms project requirements and elicits feedback using questioning and listening strategies Communicates with audience using industry standard practices and protocols

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">• Interprets and comprehends familiar and unfamiliar technical, descriptive, and legal textual information
Writing	<ul style="list-style-type: none">• Documents information using correct formatting procedures, and uses specialised vocabulary when drafting design documents• Accurately incorporates modifications and user feedback in specification documentation
Initiative and enterprise	<ul style="list-style-type: none">• Integrates prior knowledge with new technical research and feedback from required personnel• Ensures design integrity remains and continually generates and evaluates design ideas• Makes decisions that impact on entire project
Planning and organising	<ul style="list-style-type: none">• Takes responsibility, coordinates and plans tasks and ensures project requirements met• Ensures project is continually assessed and evaluated
Self-management	<ul style="list-style-type: none">• Adheres to legislative requirements related to intellectual property
Teamwork	<ul style="list-style-type: none">• Works collaboratively with production personnel throughout all stages of project
Technology	<ul style="list-style-type: none">• Assists with design tasks using digital tools

Unit Mapping Information

Supersedes and is equivalent to CUADIG507 Design digital simulations.

Assessment Requirements for CUADIG517 Design digital simulations

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design at least two examples of digital simulations according to different project briefs.

In the course of the above, the candidate must:

- research and generate ideas for technically feasible simulations that meet target audience requirements
- develop draft design specifications for digital simulations that are clear, detailed and technically feasible
- review and seek feedback from required personnel and produce final design specifications.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- typical formats and documentation for presenting simulation designs
- strategies to evaluate designs and respond to feedback to improve designs
- technical parameters of digital simulations, including:
 - algorithms
 - rules
 - laws
 - physical & mathematical formulae
- authoring tools used for digital simulations
- user interfaces used for digital simulations
- ways that technical parameters represent real world processes
- common delivery platforms of simulations
- how intellectual property rights are managed in design of digital simulations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- briefs for digital simulations on which designs can be based
- access to real-world environments to be simulated
- facilities and resources to develop design simulations
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAPHI524 Prepare digital images for pre-press processing

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to prepare client image files for pre-press processing. It involves planning for pre-press, preparing files for pre-press processing and reviewing finished work.

The unit applies to those who possess the self-directed skills and knowledge to process image files prior to printing.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

Unit Sector

Visual Communication – Photo Imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for pre-press processing	1.1 Source printing requirements from required personnel and interpret print specifications 1.2 Discuss and resolve with required personnel any constraints associated with different printing processes and other diffusion techniques
2. Prepare files for pre-press processing	2.1 Prepare image files using required pre-press processing techniques 2.2 Choose suitable test charts or targets and print to required specifications for ink density and stock on linearised proofer 2.3 Calibrate digital proofing device to examine test charts and use results to generate colour profile 2.4 Print test file on calibrated digital proofing device and use results

ELEMENT	PERFORMANCE CRITERIA
	<p>to generate output profile for press and stock</p> <p>2.5 Produce sample image, confirm quality of image with required personnel and modify if required</p> <p>2.6 Optimise images and output image product to profile specifications using industry standards</p> <p>2.7 Save image files in appropriate format for pre-press processing and prepare invoice or account for client</p> <p>2.8 Assemble completed images for electronic or physical dispatch and deliver with invoice or account to agreed location by required methods within agreed timeframe</p>
3. Wrap up and review print preparation	<p>3.1 Catalogue and archive images according to industry standards</p> <p>3.2 Review feedback from required personnel on final printed product</p> <p>3.3 Maintain contractual and financial records for business and taxation purposes</p> <p>3.4 Evaluate own performance in job context and identify future improvements</p> <p>3.5 Identify future opportunities, work directions, equipment needs and workflow changes resulting from job</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets and evaluates technical specifications and guidelines Checks results of test charts to inform colour profile
Writing	<ul style="list-style-type: none"> Accurately records information from a range of sources
Oral Communication	<ul style="list-style-type: none"> Participates in complex discussions with technical experts using industry-specific terminology Confirms information using effective listening and open question techniques
Numeracy	<ul style="list-style-type: none"> Calculates account fees for invoices
Self-management	<ul style="list-style-type: none"> Takes responsibility for compliance with industry standards and legislative requirements Understands workplace expectations and evaluates own performance according to those expectations

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none">• Selects and uses appropriate communication methods and practices to participate in discussions about pre-process requirements
Planning and organising	<ul style="list-style-type: none">• Uses methodical planning processes to prepare, optimise and save image files in appropriate formats• Stores and maintains images and records according to requirements• Makes decisions that require understanding of printing techniques and test processes• Reviews outcomes and feedback from others to determine future requirements and opportunities for change
Technology	<ul style="list-style-type: none">• Uses digital tools to create and store files

Unit Mapping Information

Supersedes and is equivalent to CUAPHI514 Prepare digital images for pre-press processing.

Assessment Requirements for CUAPHI524 Prepare digital images for pre-press processing

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare digital images for pre-press processing according to at least two different printing requirements.

In the course of the above, the candidate must:

- use appropriate pre-press processing techniques when preparing digital images
- manage colour in pre-press processing
- produce required test files and samples
- correctly save and archive completed images
- evaluate outcomes and identify future improvements or opportunities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- important aspects of colour management during pre-press processing
- equipment, tools and materials required for pre-press processing
- technique for pre-press processing of images
- different printing and diffusion techniques and their constraints with respect to design
- systems used to catalogue and archive photo images and business records.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- an environment in which where digital image files can be prepared for pre-press processing
- required equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CUAPOS211 Perform basic vision and sound editing

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to perform basic editing functions for media productions. It involves preparing source materials to be edited and completing basic edits according to production requirements.

The unit applies to those who are responsible for digitising, cutting and logging pre-recorded image and audio content under the direction of an experienced editor. Within clearly defined parameters, they also edit content using the basic functions of editing software.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – Post-production

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify requirements and prepare source materials for edit	1.1 Clarify project requirements for digital editing in consultation with required personnel 1.2 Obtain and label source materials 1.3 Organise transfer of source materials to medium that meets project requirements as required 1.4 Check media storage meets project requirements 1.5 Assess source materials for technical and creative quality, and arrange for remedial action where problems are identified 1.6 Ingest content in specified formats, checking selected format is compatible with available software and hardware

ELEMENT	PERFORMANCE CRITERIA
	1.7 Align, synchronise and organise uncut images and sound 1.8 Finalise list of required shots and logging method in consultation with required personnel
2. Prepare for editing	2.1 Check editing facilities are safe, operational and arrange for resolution of faults and problems as required according to organisational procedures 2.2 Load source materials onto editing facility and confirm image and sound are ready for use and synchronised or aligned according to production requirements 2.3 Identify and catalogue required shots and sequences from source materials according to production requirements 2.4 Log selected edits with reference to time codes and shot descriptions according to organisational procedures 2.5 Organise and save selected materials according to production requirements 2.6 Finalise logging and submit to required personnel by agreed deadline as required
3. Perform basic edits	3.1 Assemble sequences according to production requirements using editing software 3.2 Review edited sequences and evaluate quality and content, identifying problems 3.3 Manipulate editing software and solve identified problems seeking expert advice as required 3.4 Submit sequences to required personnel and obtain feedback by agreed deadlines 3.5 Amend sequences as required and save in format that meets production requirements 3.6 Confirm source materials and back-up copies are stored securely and labelled according to production requirements 3.7 Complete required documentation according to organisational procedures, noting variations and issues from original instructions 3.8 Leave workstation in original or improved condition

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
-------	-------------

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Implements and records time codes and timings using mathematical techniques
Oral communication	<ul style="list-style-type: none"> Provides information using clear and required language Obtains information and instructions using listening and questioning techniques
Reading	<ul style="list-style-type: none"> Interprets and reviews required visual and textual material and determines job requirements
Writing	<ul style="list-style-type: none"> Records accurate identification information and reports faults using clear and specialised language Produces lists, logs, and catalogues information Updates records and reflects changes in requirements
Initiative and enterprise	<ul style="list-style-type: none"> Makes limited decisions about sequencing, timing and required outcomes and seeks assistance when required
Planning and organising	<ul style="list-style-type: none"> Organises and implements routine tasks Prepares source materials in logical steps and makes routine decisions
Self-management	<ul style="list-style-type: none"> Accepts responsibility for tasks within boundaries of own role and seeks assistance as required Follows workplace protocols and organisational procedures
Teamwork	<ul style="list-style-type: none"> Completes editing tasks in collaboration with others Follows accepted communication methods and practices when receiving instructions, seeking advice and reporting information
Technology	<ul style="list-style-type: none"> Uses main features and functions of digital editing tools and equipment

Unit Mapping Information

Supersedes and is equivalent to CUAPOS201 Perform basic vision and sound editing.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for CUAPOS211 Perform basic vision and sound editing

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- perform basic vision and sound editing for at least three different media productions.

In the course of the above, the candidate must:

- respond to project requirements that contain digital, creative and content resolution elements
- transfer and ingest audio and video content
- prepare vision and sound content segments for editing
- log single images, audio grabs and basic sequences according to organisational procedures
- edit content using basic functions of editing software, within clearly defined parameters
- take direction and respond to feedback from required personnel
- follow procedures for completing workplace documentation
- adhere to work health and safety (WHS) requirements
- meet work deadlines.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- basic vision and sound editing conventions and techniques
- roles of post-production personnel
- basic features of digital vision and sound editing software
- organisational procedures for preparing for and performing editing
- WHS procedures that apply when using computers and keyboards.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- content requiring editing
- post-production facilities
- editing software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAPOS411 Edit digital content for fast turnaround

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to use non-linear digital facilities to edit digital content for fast turnaround. It involves identify and preparing source materials, undertaking edits of materials, assembling vision, sound and effects, and finalising edits according to production requirements.

The unit applies to those who have a reasonable level of experience who are involved in editing for screen and daily programs such as television news, web shows, and current affairs. At times they work on more complex programs of a formatted or routine nature, or on the editing of daily rushes for feature films.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – Post-production

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for edit	1.1 Clarify production requirements in consultation with required personnel and with reference to documentation as required 1.2 Confirm editing equipment and software are in working condition 1.3 Identify and prepare source materials for off-line and online editing 1.4 Assess materials for editing against required technical and creative criteria in consultation with required production personnel 1.5 Agree on replacement material or editing approach and overcome

ELEMENT	PERFORMANCE CRITERIA
	<p>technical problems identified with source materials</p> <p>1.6 Review source materials and visualise look of final edited sequences</p>
2. Commence editing process	<p>2.1 Check compatibility of source materials with editing equipment and monitor capture for sound and image quality</p> <p>2.2 Create and edit decision list noting in and out points for each edit, as time allows</p> <p>2.3 Maintain documentation of editing instructions according to production requirements</p> <p>2.4 Prioritise and select materials according to production requirements</p> <p>2.5 Arrange and present selected material and ensure intended meaning of words and images are retained</p> <p>2.6 Identify ways other materials may clarify and enhance final edit</p>
3. Assemble vision and sound	<p>3.1 Check technical and creative criteria of edit meet production requirements with required personnel</p> <p>3.2 Assemble content and produce coherent images and sound according to standard editing conventions</p> <p>3.3 Confirm assembled materials meet production requirements and transmission criteria</p> <p>3.4 Insert transitions, special effects and additional materials as required</p> <p>3.5 Make compromises between content and quality that meet production timelines</p>
4. Finalise edits	<p>4.1 Review assembled online or off-line edits with required production personnel</p> <p>4.2 Implement changes as required and finalise edit according to production timelines</p> <p>4.3 Complete necessary documentation and archive source materials according to organisational procedures</p> <p>4.4 Report problems encountered with completing edits to required personnel</p> <p>4.5 Provide media and information required for successful transmission of edited material</p> <p>4.6 Evaluate own performance against technical and creative criteria and discuss with required personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Provides information and discusses requirements and solutions using clear, specific language Obtains and confirms information using listening and questioning techniques
Reading	<ul style="list-style-type: none"> Interprets production documentation and extracts and analyses required information
Writing	<ul style="list-style-type: none"> Records lists and required information and reports faults using clear language and terminology Completes documentation using required formats, terminology and conventions specific to industry and organisational procedures
Initiative and enterprise	<ul style="list-style-type: none"> Makes decisions about sequencing and use of other materials
Planning and organising	<ul style="list-style-type: none"> Plans and sequences content preparation and editing tasks
Problem solving	<ul style="list-style-type: none"> Makes considered editing decisions under some pressure and evaluates their effectiveness in meeting requirements
Self-management	<ul style="list-style-type: none"> Meets expectations for own role and responsibilities for planning and completing work in line with project requirements and in compliance with organisational procedures
Teamwork	<ul style="list-style-type: none"> Collaborates with others as required Clarifies information, engages in discussions and elicits feedback from others using selected industry standard communication methods and practices
Technology	<ul style="list-style-type: none"> Assembles sound and vision components using different features and functions of digital editing tools

Unit Mapping Information

Supersedes and is equivalent to CUAPOS401 Edit screen content for fast turnaround.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for CUAPOS411 Edit digital content for fast turnaround

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- edit digital content for at least two productions and within a fast turnaround.

In the course of the above, the candidate must:

- interpret and respond to production requirements including restricted timelines and technical and creative transmission criteria
- review and prepare materials for editing
- select and note in and out points of sequences to be used in edits
- produce final edits that bring vision and sound content together in line with production requirements and timelines
- review final edits and finalise according to production requirements
- follow procedures for completing workplace documentation
- work collaboratively with production personnel to produce edited sequences.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- vision and sound editing techniques
- features of industry-standard editing software and equipment
- roles and responsibilities of post-production personnel
- creative and technical elements of digital content that typically need editing within short timeframes
- codes of practice and relevant aspects of copyright laws relating to editing digital content
- health and safety requirements as they relate to working for periods of time on screens and keyboards
- organisational procedures for completing documentation and archiving source material

- industry standard communication methods and practices
- typical problems with editing vision and sound content for fast turnaround and common solutions.

Assessment Conditions

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- vision and sound editing techniques
- features of industry-standard editing software and equipment
- roles and responsibilities of post-production personnel
- creative and technical elements of digital content that typically need editing within short timeframes
- codes of practice and relevant aspects of copyright laws relating to editing digital content
- health and safety requirements as they relate to working for periods of time on screens and keyboards
- organisational procedures for completing documentation and archiving source material
- industry standard communication methods and practices
- typical problems with editing vision and sound content for fast turnaround and common solutions.

CUAPOS412 Manage media assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to implement systems and processes to manage media assets for media productions and projects. It involves establishing media asset management systems, recording documentation and media assets, and confirming required personnel have ongoing access to the systems.

The unit applies to those who are working on projects or productions that require different media assets. They work directly with the creators of audio, video and graphic assets to ensure the asset management system accommodates their needs. They set up conventions for file naming, sourcing, sorting and storing formal documents and media assets. Though reporting to a producer or manager, they work with a fair degree of autonomy.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – Post-production

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish procedures for managing content and outputs	1.1 Confirm media asset management requirements with required personnel 1.2 Set up file naming system for projects based on standard conventions and protocols 1.3 Source and review storage repository and back-up systems that meet project requirements 1.4 Establish processes and conventions for recording and tracking information, locations, progress and location of formal documents

ELEMENT	PERFORMANCE CRITERIA
	<p>and media assets</p> <p>1.5 Brief team members on media asset management system, including process for advising personnel of problems encountered as system is implemented</p>
2. Record documentation and media assets	<p>2.1 Document sources of media assets according to organisational procedures</p> <p>2.2 Document progress and details of different project outputs</p> <p>2.3 Maintain records of technical information on work in progress</p> <p>2.4 Maintain copyright and permissions information</p> <p>2.5 Track media assets and record information according to established system</p> <p>2.6 Maintain version control and identify status of interim products, prototypes and other media assets</p> <p>2.7 Respond to and resolve problems encountered as system is implemented, seeking specialist assistance as required</p>
3. Finalise projects	<p>3.1 Confirm procedures and schedule for signing-off projects with required personnel</p> <p>3.2 Determine requirements for archiving</p> <p>3.3 File and index formal documents and scripts according to agreed project or organisational procedures and timelines</p> <p>3.4 Archive media assets in established repository system according to industry practice</p> <p>3.5 Check required personnel have ongoing access to formal documents and media assets developed for projects</p> <p>3.6 Review effectiveness of media asset management system and note areas for future improvement</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Provides information and instructions to audience and environment using industry standard language Obtains and confirms information using listening and questioning techniques
Reading	<ul style="list-style-type: none"> Interprets texts of varying complexity, extracts information and determines work requirements

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none">• Prepares detailed, logically sequenced text and describes procedures and processes when identifying, recording, tracking and filing information• Maintains and updates documentation
Planning and organising	<ul style="list-style-type: none">• Plans, organises and implements systematic procedures and processes when managing media assets and handling required communication
Self-management	<ul style="list-style-type: none">• Meets expectations associated with own role and takes responsibility for planning and implementing media asset management system according to organisational procedures and recognised industry practice
Teamwork	<ul style="list-style-type: none">• Collaborates with others and achieves joint outcomes• Clarifies requirements and provides comprehensive information and support to others using selected communication methods and practices
Technology	<ul style="list-style-type: none">• Organises, enters, updates and tracks information and assets using digital technologies

Unit Mapping Information

Supersedes and is equivalent to CUAPOS402 Manage media assets.

Assessment Requirements for CUAPOS412 Manage media assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish a media asset management system for at least two media productions.

In the course of the above, the candidate must:

- develop and establish processes and systems for organising and filing formal documents and media assets
- use information tracking and repository systems when recording documentation and media assets
- produce and accurately update records
- archive assets from completed projects with ongoing access conditions
- provide directions for users of processes and systems.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- roles and responsibilities of personnel involved in creating and managing media assets for screen and media projects
- relationship between creative aspects of screen and media projects and the process of managing media assets
- typical problems with implementing media asset management systems, and common solutions
- processes and conventions used when managing media assets, including common naming conventions and protocols
- requirements for maintaining copyright and permissions requirements
- organisational procedures for documenting sources of media assets and filing scripts
- features of file and resource repository systems.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- file and resource management systems
- media assets.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAPPM417 Create storyboards

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Application

This unit describes the skills and knowledge required to create storyboards for different digital content, including video, film, animation and interactive media.

The unit applies to those who break down content, stories or scripts into discrete elements and visualise creative concepts in collaboration with a creative production team. Depending on the type and scale of production, storyboard artists, designers, producers and information architects may create storyboards. In some industry environments, they may work closely with directors, producers and in a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – Production planning and management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan storyboards	1.1 Clarify storyboard requirements for production in consultation with required personnel 1.2 Identify factors that affect the nature and type of storyboard to be created 1.3 Contribute ideas in pre-production meetings and refine storyboard requirements 1.4 Research and select storyboard tools that meet production requirements 1.5 Obtain sign-off of on type of storyboard to be created from required personnel

ELEMENT	PERFORMANCE CRITERIA
2. Draft storyboards	2.1 Break down content, scripts and stories into frames using storyboarding techniques, tools and methods according to production and safety requirements 2.2 Specify storyboard elements for each frame and reflect creative concepts 2.3 Specify linear or non-linear frame sequence and show connection between each frame according to production requirements 2.4 Provide descriptions for each frame 2.5 Discuss work in progress with required personnel, seeking feedback and assistance and adjust as required 2.6 Confirm draft storyboards adhere to production requirements
3. Finalise storyboards	3.1 Present draft storyboards and discuss feedback with required personnel 3.2 Refine final storyboard as required 3.3 Produce final storyboard according to production requirements 3.4 Back-up copies of draft and final storyboards according to organisational procedures 3.5 Submit final storyboard to required personnel by agreed deadlines 3.6 Review process of creating storyboard and note areas for future improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Presents explanation of own ideas to others and discusses ideas and solutions using industry standard language Facilitates and participates in potentially abstract discussions and elicits participant views using listening and questioning skills
Reading	<ul style="list-style-type: none"> Determines specifications and key action in script sequence using knowledge gained from interpretation of information Analyses and contrasts information and selects that which informs own work
Writing	<ul style="list-style-type: none"> Records detail of research and consultation outcomes and conveys ideas effectively using industry standard vocabulary and grammar Creates legible and clear descriptions and conveys information and requirements in sequential order

SKILL	DESCRIPTION
Initiative and enterprise	<ul style="list-style-type: none">• Makes decisions related to production using analytical processes• Refines task and identifies opportunities to improve storyboard process using feedback
Planning and organising	<ul style="list-style-type: none">• Plans, sequences and prioritises storyboard tasks with awareness of how they contribute to production goals
Self-management	<ul style="list-style-type: none">• Meets expectations associated with role and accepts responsibility for storyboard production in compliance with organisational procedures
Teamwork	<ul style="list-style-type: none">• Collaborates effectively with required personnel during production

Unit Mapping Information

Supersedes and is equivalent to CUAPPM407 Create storyboards.

Links

Companion Volume Implementation Guide is found on VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

Assessment Requirements for CUAPPM417 Create storyboards

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create storyboards for at least two different productions.

In the course of the above, the candidate must:

- interpret and respond to production requirements
- select storyboard type that meets production requirements
- visualise creative concepts using storyboard techniques, tools and methods
- produce clear and logical storyboards using storyboard techniques, tools and methods
- present storyboards to others for discussion and adjust as required in response to feedback.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- roles and responsibilities of different members of a creative team, and their contribution to the process of visualising and interpreting creative concepts into storyboards
- common production requirements of creating storyboards including:
 - number of required storyboard tools
 - legibility and detail standards
 - accuracy standards
- typical storyboard tools and techniques
- sources of storyboard tools
- components of storyboards including frames, elements and descriptions
- storyboard creation methods that break down content, stories and scripts into discrete elements
- organisational procedures for backing-up copies of draft and final storyboards
- work health and safety procedures (WHS) that apply to creating storyboards and working for periods of time on computers.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- storyboard and visualising tools
- different types of productions requiring storyboards
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUASOU212 Perform basic sound editing

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to perform basic digital sound editing.

The unit applies to those working under supervision who are responsible for preparing, assembling and digitally editing relatively simple sound sequences for media content.

Individuals are expected to contribute to creative outcomes, including selection and acquisition of sound materials.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and Entertainment Production – Audio/Sound

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for editing sound	<ul style="list-style-type: none">1.1 Confirm production requirements and creative and technical objectives in consultation with required personnel1.2 Obtain, label and securely store audio source materials according to organisational procedures1.3 Confirm editing hardware has sufficient capacity to handle digitising and editing processes1.4 Confirm editing software is suited to technical requirements and enterprise practices1.5 Organise additional equipment to minimise interruptions during editing as required

ELEMENT	PERFORMANCE CRITERIA
2. Assemble sequences for editing	<ul style="list-style-type: none">2.1 Digitise content in format required for specified platform2.2 Monitor and optimise quality of digital output and fix problems as required2.3 Identify sound edit positions and document according to requirements2.4 Log and assess sound sequences and create and save digital back-up copies2.5 Evaluate and edit audio content according to technical and creative objectives
3. Edit sound sequences	<ul style="list-style-type: none">3.1 Edit audio content and document details of each edited sound sequence according to production requirements3.2 Apply audio effects and enhancements to maximise creative outcomes as required3.3 Produce sequences and resolve identified problems using edited software3.4 Refine edits using feedback from required personnel as required3.5 Submit final edits according to agreed deadline and organisational procedures
4. Finalise sound edits	<ul style="list-style-type: none">4.1 Archive and document edited audio files according to organisational procedures4.2 Report on editing equipment requiring maintenance as required and leave workstation in required condition4.3 Participate in post-production debriefing sessions as required4.4 Seek feedback from colleagues and evaluate own creative and technical performance for improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none">Gathers and provides information using clear and required languageConfirms understanding using listening and questioning techniques
Reading	<ul style="list-style-type: none">Interprets textual information to determine job requirements
Writing	<ul style="list-style-type: none">Records detailed information in workplace documentation using simple vocabulary and industry terminology

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none">Follows required communication methods and practices when discussing task requirements and seeking feedback on task progress
Initiative and enterprise	<ul style="list-style-type: none">Makes routine decisions about source materials, equipment capacity and audio formats, and monitors output for problemsDetermines editing techniques required for creative impact
Planning and organising	<ul style="list-style-type: none">Plans and implements routine tasks and workload in a methodical sequence with input from others
Technology	<ul style="list-style-type: none">Manipulates software to resolve problemsPrepares sound components using digital tools

Unit Mapping Information

Supersedes and is not equivalent to CUASOU202 Perform basic sound editing.

Assessment Requirements for CUASOU212 Perform basic sound editing

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and edit at least two audio files that meet creative and technical production requirements.

In the course of the above, the candidate must:

- use editing software and equipment according to requirements, manipulating and applying effects as required
- digitise audio content in compatible formats
- assess and optimise quality of sound sequences
- mark, log and archive accurate edited sequences
- respond to feedback from others to improve own technical and creative performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- digital formats compatible with various editing processes, platforms and equipment
- key factors, purpose and procedures relating to industry terminology:
 - digital audio consoles
 - digital audio workstations (DAW)
 - digital signal processing
- procedures used to log and document edited sequences
- common challenges of collecting and organising content for broadcast and publication, and strategies to address them
- characteristics of sound that can be manipulated to achieve high quality output
- work health and safety requirements for working with sound.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- audio editing software and equipment
- manuals and instructions to support software and equipment
- audio content.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CUASOU304 Prepare audio assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to prepare audio assets for inclusion in broadcasting, games and interactive media.

It applies to individuals who prepare and package audio content into formats appropriate for various media distribution channels and interactive products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and Entertainment Production – Audio/Sound

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify audio assets	1.1 Obtain analogue or digital sources of audio and identify the source file formats 1.2 Clarify output purpose, destination and platform 1.3 Discuss with relevant personnel the required output file format and audio codecs for specified bandwidths 1.4 Discuss with relevant personnel the appropriate audio encoding software
2. Prepare audio assets	2.1 Open appropriate audio encoding software and load audio file

ELEMENT	PERFORMANCE CRITERIA
	2.2 Eliminate or treat defects on sound recordings 2.3 Equalise sound output levels where necessary 2.4 Check duration and quality of audio sequences meet production requirements, and adjust if necessary 2.5 Determine and apply appropriate audio codecs 2.6 Batch optimise audio files where possible 2.7 Save files in appropriate output file format using standard industry or enterprise naming conventions 2.8 Follow safe ergonomic practices when using screens and keyboards for long periods of time
3. Package audio assets	3.1 Assign metadata tags if required 3.2 Group files logically in folder system using standard industry or enterprise naming conventions 3.3 Archive and store in share drive or repository for production team access

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.4	<ul style="list-style-type: none"> Interprets information to determine standards and job requirements
Writing	2.7, 3.1, 3.2	<ul style="list-style-type: none"> Uses clear language and terminology to identify and group files
Oral Communication	1.3, 1.4	<ul style="list-style-type: none"> Uses clear language to contribute information Obtains information by listening and questioning
Numeracy	2.4	<ul style="list-style-type: none"> Uses basic calculations to measure time
Navigate the world of work	2.7, 2.8, 3.2, 3.3	<ul style="list-style-type: none"> Accepts responsibility for tasks within boundaries of own role Meets organisational expectations in performance of task
Interact with	1.3, 1.4	<ul style="list-style-type: none"> Follows accepted communication methods and

others		practices in discussions with project team members
Get the work done	1.1, 1.2, 2.1-2.7, 3.2	<ul style="list-style-type: none"> • Makes decisions about audio asset requirements with guidance from others • Uses digital tools to prepare, refine and package audio assets that meet interactive media requirements

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUASOU304 Prepare audio assets	CUFSOU301A Prepare audio assets	Updated to meet Standards for Training Packages. Minor edits to performance criteria.	Equivalent unit

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for CUASOU304 Prepare audio assets

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare audio content for inclusion in interactive media products and media distribution channels
- use editing software to treat, equalise and clip sound sequences to meet technical standards
- use audio encoding and editing software
- complete file naming and storage according to industry or enterprise conventions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the need for audio file compression in media distribution channels and interactive media products
- describe how codecs work to optimise audio outputs and identify appropriate codecs for various platform destinations
- explain techniques to achieve audio equalisation
- explain file compression
- outline procedures for naming and tagging audio files following standard enterprise or industry conventions
- outline work health and safety requirements for working with sound.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- audio encoding and editing software and equipment
- manuals and instructions that support encoding and editing software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUASOU417 Edit sound

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to edit sound material in line with production requirements in music, screen, media, entertainment and events industries. This involves assessing the quality of source materials, preparing source materials for sound editing, using sound editing software and equipment to make edits and rectify issues with source sounds, and applying effects to enhance the final product.

The unit applies to those who may work as part of a production team to edit sound material for a range of productions or work independently to edit material for their own work. Individuals work with minimal supervision and guidance, and may supervise others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – Audio/sound

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for sound editing	1.1 Discuss desired technical and creative outcomes of production, production procedures and timeframe with required personnel 1.2 Confirm necessary copyright releases have been obtained 1.3 Confirm sound editing software and equipment is safe, operational and suitable for editing sound according to production requirements 1.4 Prepare plan to complete sound editing work in line with production requirements and required timeframe

ELEMENT	PERFORMANCE CRITERIA
	1.5 Obtain copies of sound sources and assess their quality against production requirements 1.6 Advise required personnel if sound sources do not meet production requirements and resolve issues within scope of own role as required
2. Edit complex sound sequences	2.1 Determine extent and range of required edits by listening critically to sound sources 2.2 Edit sound sources and resolve identified problems according to desired technical and creative production outcomes using sound editing software and equipment 2.3 Use sound effects or signal processing to enhance the purpose, genre, and technical and creative outcomes of production 2.4 Incorporate sound effects and elements to meet creative and production requirements
3. Finalise editing operations	3.1 Share final sound mix with required personnel and adjust as required 3.2 Save final files in required format according to production requirements 3.3 Conduct quality check of final sound mix according to production requirements and organisational procedures 3.4 Archive edited files and complete documentation as required according to organisational procedures 3.5 Confirm work environment is cleaned after use and restored to pre-editing condition 3.6 Organise sound effect library that can be used for future productions in collaboration with required personnel 3.7 Provide feedback to production team members on sound editing process as required and seek feedback on own performance 3.8 Evaluate own performance and note areas for improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Interacts with required personnel using clear language and industry terminology
Reading	<ul style="list-style-type: none"> Interprets textual information and applies knowledge gained to current work

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none">• Prepares information using required terminology and language for intended audience
Initiative and enterprise	<ul style="list-style-type: none">• Uses innovative techniques to organise work and support the creative process
Planning and organising	<ul style="list-style-type: none">• Plans and prioritises complex tasks
Problem solving	<ul style="list-style-type: none">• Recognises and responds to routine problems within scope of own role
Self-management	<ul style="list-style-type: none">• Follows required work health and safety (WHS) procedures• Identifies, confirms and applies copyright requirements relevant to role• Derives meaning from audio sources to inform work requirements
Teamwork	<ul style="list-style-type: none">• Collaborates with others to achieve joint production outcomes
Technology	<ul style="list-style-type: none">• Uses equipment and software to manage and backup files

Unit Mapping Information

Supersedes and is equivalent to CUASOU407 Edit sound.

Assessment Requirements for CUASOU417 Edit sound

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- edit sound material and create a final mix for at least two different productions, according to production requirements.

In the course of the above, the candidate must:

- incorporate sound effects or signal processing into final mixes
- work collaboratively as part of a production team within required timeframes
- follow work health and safety (WHS) procedures
- store required final files in applicable format
- use industry-standard sound editing software and equipment.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different types and purposes of sound used in production
- impact of using different release sound formats
- WHS procedures and safe work practices related to using sound editing software and equipment
- impact of sound effects and signal processing on enhancing production outcomes and methods for using them
- collaboration in a team in a production environment.
- organisational procedures for finalising editing operations, including:
 - conducting a quality check of final sound mix
 - archiving files
 - completing required documentation when finalising a sound mix
- copyright implications that relate to sound editing
- main principles and techniques of sound editing

- strategies to evaluate performance in a production environment to identify improvements
- issues and challenges that typically arise when editing sound material and strategies for addressing them.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment required to demonstrate work described in performance evidence
- productions where sound editing is required
- production documentation
- interaction with others required to demonstrate work described in performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUASOU504 Produce sound recordings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to plan, organise and produce audio recordings.

It applies to individuals who work collaboratively and creatively with artists and performers to produce audio recordings for distribution via any media.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Media and entertainment production – audio/sound

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm concept for recording project	1.1 Use knowledge of commercial trends, market niches, new styles and artists to develop the vision and concept for a recording project 1.2 Discuss and confirm vision and concepts with relevant people, and achieve consensus on project outcomes 1.3 Establish and discuss production requirements for recording project with relevant people 1.4 Research copyright requirements to confirm project process and outcomes will comply with legislation

ELEMENT	PERFORMANCE CRITERIA
2. Confirm arrangements for recording project	<p>2.1 Confirm repertoire, artists, project outcomes and operational details with relevant people</p> <p>2.2 Confirm project outcomes can be achieved within time and budget constraints</p> <p>2.3 Plan and agree on communication processes and recording schedule with relevant people</p> <p>2.4 Draw up and distribute rehearsal and recording schedules to relevant people</p> <p>2.5 Discuss and confirm appropriate recording locations with relevant people</p>
3. Coordinate and conduct sound recording sessions	<p>3.1 Confirm that sessions are scheduled to allow adequate rehearsal and sound testing prior to main recording sessions</p> <p>3.2 Confirm recording location, sound equipment and recording format meet production and work health and safety (WHS) requirements</p> <p>3.3 Assess the acoustic characteristics of the recording location, and provide feedback on instrument/voice placement and settings to relevant people</p> <p>3.4 Provide balanced, constructive and supportive feedback to artists, to ensure that performance meets project expectations</p> <p>3.5 Recognise and consider individual perspectives, and negotiate acceptable outcomes to conflicts as required</p> <p>3.6 Monitor and adjust recording to produce a final product that meets required project outcomes</p>
4. Evaluate recording process and product	<p>4.1 Use appropriate techniques to evaluate the recording process and completed product</p> <p>4.2 Seek feedback and opinions from relevant people, and document results of evaluation</p> <p>4.3 Evaluate own role in the recording process, and note areas for improvement</p> <p>4.4 Use evaluation results to improve future practice</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.3, 4.4	<ul style="list-style-type: none"> Uses self-evaluation and reflection to identify strategies to build own skills and knowledge
Reading	1.4	<ul style="list-style-type: none"> Interprets textual information from relevant sources to identify compliance with policy and procedures
Writing	1.1, 2.3, 2.4, 4.3	<ul style="list-style-type: none"> Prepares specific information using terminology and a form appropriate to the task and audience
Oral Communication	1.2, 1.3, 2.1, 2.3, 2.5, 3.3-3.5, 4.2	<ul style="list-style-type: none"> Uses industry appropriate language to check understandings and elicit different viewpoints Participates in a verbal exchange of ideas/solutions, and draws on active listening strategies
Numeracy	2.2, 2.3, 3.1	<ul style="list-style-type: none"> Uses mathematical concepts and calculations to estimate and plan project costs and timeframes
Navigate the world of work	1.4, 3.2	<ul style="list-style-type: none"> Identifies, confirms and applies legislative requirements relevant to role
Interact with others	1.2, 1.3, 2.1, 2.3, 2.5, 3.3-3.5, 4.2	<ul style="list-style-type: none"> Collaborates and works cooperatively to maximise creative objectives Uses appropriate communication practices to discuss and direct requirements and agree on outcomes Considers the perspectives of others during planning and production Anticipates potential for conflict and deals with conflict effectively
Get the work done	1.3, 2.1, 2.3, 2.5, 3.1-3.6, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Plans and priorities a range of tasks, including contingencies to achieve goals efficiently Identifies innovative approaches that could enhance outcomes Analyses information to make decisions and solve problems Evaluates own role to make improvements in the creative process

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUASOU504 Produce sound recordings	CUSOU502A Produce sound recordings	Updated to meet Standards for Training Packages. Minor edits to performance criteria to clarify intent.	Equivalent unit

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for CUASOU504 Produce sound recordings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- develop creative sound concepts for recording projects
- work creatively, collaboratively and constructively with others to produce at least two sound recordings for distribution
- adjust recordings to achieve project outcomes
- document the evaluation of the recording process, outcomes and own role.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the production requirements that may impact decisions about recording projects
- explain the legislative requirements that relate to sound recording
- explain how different recording and performance environments affect sound, and what adjustments can be made to produce required sound recordings
- explain the sound equipment required for a range of recording situations
- describe techniques for evaluating the quality of a sound recording
- explain the issues and challenges that typically arise when producing sound recordings, and how to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- relevant instruments and equipment

- scores, charts or other written music resources
- participants, such as performers and technical crew
- appropriate recording facilities with adequate space and acoustic qualities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

ICTBWN302 Install optical fibre splitters in fibre distribution hubs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install optical fibre splitters in fibre distribution hubs (FDH) as part of a fibre to the premises (FTTP) network.

It applies to individuals who work in teams to deliver very high speed broadband capacity for the National Broadband Network (NBN) initiative.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – broadband and wireless networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Set up and prepare for installation	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Scope work by obtaining project plan from appropriate personnel and arrange for site access to comply with security arrangements 1.3 Notify appropriate personnel of identified safety hazards at worksite

	<p>1.4 Determine type of FDH enclosure and optical splitter module from project plan, and identify splitter installation requirements using work instructions</p> <p>1.5 Obtain tools and safety equipment and material to perform tasks safely and efficiently</p> <p>1.6 Select and use required protective equipment and make site safe and secure for installation work</p> <p>1.7 Obtain splitter module, visually inspect for splitter module damage and replace if necessary</p>
2. Install splitter module in FDH	<p>2.1 Follow work health and safety (WHS) and environmental requirements, and identify and avoid other services</p> <p>2.2 Open enclosure and assess suitability of FDH according to project plan</p> <p>2.3 Locate next available slot in splitter module area of FDH for installation</p> <p>2.4 Insert splitter module and secure according to manufacturer's specifications</p> <p>2.5 Inspect installed splitter module and surrounding area for completeness of job</p>
3. Prepare and connect splitter input fibres to feeder cable	<p>3.1 Locate feeder port to be connected and remove protective cover in preparation</p> <p>3.2 Use optical power meter to verify feeder port is not active</p> <p>3.3 Clean adaptor and mated connector according to manufacturer's specifications, and route splitter input fibre to correct feeder port</p> <p>3.4 Remove dust cap and clean end face according to manufacturer's specifications to prevent possible damage from mating contaminated connectors</p> <p>3.5 Connect input fibre to feeder port and record connection according to organisational policy</p>
4. Connect output fibres and test splitter	<p>4.1 Determine output fibre to be connected and required adapter in distribution field</p> <p>4.2 Clean adapter and fibre end-face according to manufacturer's specifications</p> <p>4.3 Route output fibre and connect with adapter in distribution field</p> <p>4.4 Test operation of optical splitter for optical power levels at operating wavelength division multiplexing (WDM) optical wavelengths</p> <p>4.5 Record connections, test results and park unused fibre leads for safety reasons according to organisational policy</p>

5. Clean up work site	<p>5.1 Replace all dust caps on internal enclosures and close FDH</p> <p>5.2 Remove installation waste and debris from worksite and dispose of according to environmental requirements</p> <p>5.3 Notify appropriate personnel of job completion and obtain sign off</p>
-----------------------	--

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1-2.4, 3.2-3.4, 4.1, 4.2, 4.5	<ul style="list-style-type: none"> Reads and interprets specifications and other documentation from a variety of sources and consolidates information to determine requirements
Writing	1.2, 1.3, 3.5, 4.5, 5.3	<ul style="list-style-type: none"> Accurately completes relevant reports and documentation using clear and technically specific language and numerical data
Oral Communication	1.2, 1.3, 5.3	<ul style="list-style-type: none"> Participates in verbal exchanges with key personnel using appropriate, clear and detailed language to exchange information, ideas or solutions Uses listening and questioning skills to confirm understanding of requirements
Numeracy	3.2, 3.5, 4.4	<ul style="list-style-type: none"> Performs mathematical calculations to check, interpret and confirm results of system tests
Navigate the world of work	1.4, 2.1, 3.5, 4.5, 5.2	<ul style="list-style-type: none"> Complies with explicit policies and procedures Explores and implements where identified the implicit expectations of policies and procedures
Interact with others	1.2, 1.3, 5.3	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols Complies with work instructions and contributes to work group discussions using accepted conventions
Get the work done	1.1, 1.4-1.7, 2.2-2.5, 3.1-3.5, 4.1-4.5, 5.1, 5.2	<ul style="list-style-type: none"> Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities Responds to predictable routine problems and implements standard or logical solutions Uses the main features and functions of digital tools

		to complete work tasks and access information
--	--	---

Assessment Requirements for ICTBN302 Install optical fibre splitters in fibre distribution hubs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- comply with all work health and safety (WHS) regulations, standards and work practices
- safely use optical power test equipment
- accurately measure optical signals at two wavelength division multiplexing (WDM) wavelengths
- correctly install splitter in the enclosure
- connect input and out optical fibres to the splitter
- test optical splitter
- complete connection recording.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the location and summarise the contents of relevant organisational policies and procedures
- discuss WHS risks and control measures when working with optical fibre and equipment
- explain propagation of light in optical communication systems
- outline the role of transmitters and receivers in optical communication systems
- identify and describe the critical aspects of cleaning of connectors
- summarise specific WHS requirements relating to the handling of optical fibre and the use of laser light sources
- explain WDM applications.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – broadband and wireless networks field of work and include access to:

- a fibre distribution hub and relevant optical splitter
- tools, equipment and personal protective equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTBWN303 Install lead-in module and cable for fibre to the premises

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install a lead-in module and its associated cable for a fibre to the premises (FTTP) installation. Optical networks and FTTP are part of the strategies by service providers using wavelength division multiplexing (WDM) to deliver very high speed broadband capacity through the access network for the National Broadband Network (NBN) initiative.

It applies to individuals with specialist technical skills who work in teams to provide either underground or aerial services in next generation networks (NGN) using emerging technologies.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – broadband and wireless networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Set up and	1.1 Obtain relevant legislation, codes, regulations and standards for

prepare for installation	<p>compliance when conducting work</p> <p>1.2 Scope work by obtaining project plan from appropriate personnel and arrange for site access to comply with security arrangements</p> <p>1.3 Notify appropriate personnel of identified safety hazards at worksite</p> <p>1.4 Determine type of lead-in module and cable from project plan and identify installation requirements using work instructions</p> <p>1.5 Obtain tools and safety equipment and material to perform tasks safely and efficiently</p> <p>1.6 Select and use required protective equipment and make site safe and secure for installation work</p> <p>1.7 Obtain lead-in module, visually inspect for lead-in module damage and replace if necessary</p>
2. Install lead-in module in enclosure	<p>2.1 Follow work health and safety (WHS) and environmental requirements for given work, and identify and avoid other services</p> <p>2.2 Identify position in enclosure to secure module and install mounting bracket according to manufacturer's specifications</p> <p>2.3 Splice lead-in module tail to distribution joint</p> <p>2.4 Attach lead-in module to mounting bracket and secure in position</p>
3. Install optical fibre lead-in cable to premises	<p>3.1 Unpack and prepare lead-in cable according to manufacturer's specifications</p> <p>3.2 Haul optical fibre lead-in cable to premises, observing maximum strain on cable for underground installation</p> <p>3.3 Coil excess cable length within enclosure</p> <p>3.4 Install aerial lead-in using catenary and bearer wire to meet relevant height and minimum sag requirements</p>
4. Terminate lead-in cable at premises	<p>4.1 Access optical network termination (ONT) unit to expose lead-in cable to retrieve fibre and connector</p> <p>4.2 Clean ONT adapter and connector according to manufacturer's specifications</p> <p>4.3 Mate fibre connector with ONT adapter, ensuring free of contaminants</p> <p>4.4 Route fibre cable within ONT and secure in position</p> <p>4.5 Test operation of lead-in at ONT for optical power levels at designated operating WDM optical wavelength</p> <p>4.6 Record connections, test results and park unused fibre leads for safety reasons according to organisational policy</p>
5. Clean up work site	<p>5.1 Seal ONT and enclosure</p> <p>5.2 Remove installation waste and debris from worksite and dispose of</p>

	according to environmental requirements
	5.3 Notify appropriate personnel of job completion and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 3.1, 3.3, 3.4, 4.2, 4.5, 4.6	<ul style="list-style-type: none"> Reads and interprets plans, specifications and other documentation from a variety of sources and consolidates information to determine requirements
Writing	1.2, 1.3, 3.5, 4.5, 4.6, 5.3	<ul style="list-style-type: none"> Accurately completes relevant reports and documentation using clear and technically specific language and numerical data
Oral Communication	1.2, 1.3, 5.3	<ul style="list-style-type: none"> Participates in verbal exchanges with key personnel using appropriate, clear and detailed language to exchange information, ideas or solutions Uses listening and questioning skills to confirm understanding of requirements
Numeracy	3.2, 3.4	<ul style="list-style-type: none"> Takes measurements and uses them for work layout and construction Performs mathematical calculations to check, interpret and confirm results of system tests
Navigate the world of work	1.4, 2.1, 2.2, 3.4, 4.6, 5.2	<ul style="list-style-type: none"> Complies with explicit policies and procedures Explores and implements where identified the implicit expectations of policies and procedures
Interact with others	1.2, 1.3, 5.3	<ul style="list-style-type: none"> Uses a limited range of accepted practices for communicating in a work environment Complies with work instructions and contributes to work group discussions using accepted conventions
Get the work done	1.1, 1.5-1.7, 2.2, 3.2-3.4, 4.1-4.6, 5.1, 5.2	<ul style="list-style-type: none"> Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness

		<p>of the outcome</p> <ul style="list-style-type: none">• Uses the main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for ICTBWN303 Install lead-in module and cable for fibre to the premises

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- safely use optical power test equipment
- accurately measure optical signals at TWO wavelength division multiplexing (WDM) wavelengths
- install lead-in module in the enclosure for both an aerial and an underground installation
- complete connection recording for both lead-ins
- perform and test an optical fibre lead-in to a distribution joint.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline licence requirements for working at heights
- identify the location and summarise the contents of relevant organisational policies and procedures
- discuss personal safety issues
- explain the propagation of light in optical communication systems
- describe the role of transmitters and receivers in optical communication systems
- identify the critical aspects of site engineering
- explain specific WHS requirements relating to the handling of optical fibre and the use of laser light sources
- explain WDM applications.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – broadband and wireless networks field of work and include access to:

- a fibre lead-in module, distribution pit, premises conduit and relevant optical network termination (ONT) unit
- tools, equipment and personal protective equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL205 Joint metallic conductor cable on customer premises

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0. Minor updates made to Knowledge Evidence.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to joint metallic conductor cable.

It applies to individuals who work in technical roles completing tasks on customer premises in underground situations, pits, jointing enclosures or above ground.

All customer cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media Authority (ACMA) accredited registrar.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare for jointing	1.1 Arrange access to site according to required procedures 1.2 Inform appropriate personnel of identified hazards on worksite 1.3 Organise tools, equipment and materials for given work 1.4 Review site plans and documentation 1.5 Select cable type and requirements for cable joint

ELEMENT	PERFORMANCE CRITERIA
2 Joint cable and test joint	<p>2.1 Joint metallic cable following work health and safety (WHS) and environmental requirements and complying with manufacturer's requirements and relevant industry standards</p> <p>2.2 Perform relevant cable tests to ensure joint complies with site specifications, manufacturer's specifications and relevant legislation, codes, regulations and standards</p> <p>2.3 Rectify any cable faults</p> <p>2.4 Make visual inspection of joint to confirm soundness and completeness</p>
3 Complete records and clean up site	<p>3.1 Complete required records and notify customer</p> <p>3.2 Remove installation waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions</p> <p>3.3 Reinstate site according to customer and company requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Interprets textual information from relevant sources to identify relevant and key information
Writing	<ul style="list-style-type: none">Uses clear, specific and industry related terminology to complete workplace documentation
Numeracy	<ul style="list-style-type: none">Takes readings and measurements and interprets results
Navigate the world of work	<ul style="list-style-type: none">Complies with explicit policies, procedures and legislative requirements relevant to own role
Interact with others	<ul style="list-style-type: none">Identifies and follows accepted communication practices and protocols when liaising with internal and external personnel on technical and operational matters
Get the work done	<ul style="list-style-type: none">Determines job sequence and works logically and systematically to undertake clearly defined tasksAnalyses task requirements to decide on appropriate equipment and practices

Unit Mapping Information

ICTCBL205 Joining metallic conductor cable on customer premises supersedes and is equivalent to ICTCBL2016A Joint metallic conductor cable on customer premises

Assessment Requirements for ICTCBL205 Joint metallic conductor cable on customer premises

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- organise resources and prepare for the task of jointing
- joint at least one 20 pair (or greater) cable
- test joint
- interpret test results
- rectify cable faults
- check that the enclosure is properly sealed
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- the current Australian Communications and Media Authority (ACMA) Competency Requirements for Telecommunications Cabling Provider Rules, legislation, codes of practice and other formal agreements that impact on the work activity
- features and operating requirements of test equipment
- information required to operate equipment according to a test specification
- manufacturer's requirements for safe operation of equipment
- specific WHS requirements relating to the activity and site conditions

- test methods and performance requirements
- typical issues and challenges that occur on site
- purpose, construction and characteristics of cable types
- cable colour screening
- basic telephony, including operation.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sites where jointing metallic conductor cable may be conducted
- use of joint testing equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on cable jointing and testing activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL211 Install an above ground equipment enclosure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, build, install and earth an equipment enclosure for cabling provisioning on or above the ground.

It applies to individuals who work in technical roles in civil construction including the installation of enclosures such as pillars, cabinets, remote integrated multiplexers (RIM) and mobile equipment enclosures for new or upgrade network installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to construct and install enclosure	<ul style="list-style-type: none">1.1 Obtain construction plan from appropriate personnel to scope work and arrange for site access1.2 Notify appropriate personnel of identified safety hazards and other services at worksite1.3 Obtain plant, tools, safety equipment and material to perform tasks safely and efficiently1.4 Determine location and type of above ground enclosure specified

ELEMENT	PERFORMANCE CRITERIA
	in construction plan required for project
2. Build enclosure	2.1 Use tools according to enterprise guidelines and work health and safety (WHS) regulations 2.2 Construct footings or foundations to construction design specifications 2.3 Construct enclosure to specifications given in construction design 2.4 Connect enclosure to earth according to construction plan and industry practice
3. Complete project	3.1 Complete reports according to enterprise policy and record alterations to plans using appropriate symbols 3.2 Recover obsolete materials and equipment, and return to appropriate point for disposal 3.3 Restore site according to requirements of enterprise or approving authority and to client satisfaction 3.4 Notify appropriate personnel of job completion and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.1-2.4	<ul style="list-style-type: none"> Interprets textual information from technical sources to identify relevant and key information
Writing	1.2, 3.1, 3.4	<ul style="list-style-type: none"> Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols
Numeracy	1.4, 2.2, 2.3	<ul style="list-style-type: none"> Takes measurements and uses them for work layout and construction Make basic calculations appropriate for measuring and estimating materials for construction
Navigate the world of work	1.2, 2.1, 3.1, 3.3	<ul style="list-style-type: none"> Complies with explicit policies and procedures, and legislative requirements relevant to own role
Interact with others	1.1, 1.2, 3.3, 3.4	<ul style="list-style-type: none"> Identifies and follows accepted communication practices and protocols when liaising with clients and

		internal and external personnel on technical and operational matters
Get the work done	1.1, 1.3, 2.1-2.4, 3.2, 3.3	<ul style="list-style-type: none"> • Determines job sequence and works logically and systematically to undertake clearly defined tasks • Analyses task requirements to decide on appropriate equipment and practices

Assessment Requirements for ICTCBL211 Install an above ground equipment enclosure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare to install an enclosure using construction plans
- use appropriate tools and equipment to construct and connect an enclosure according to plans, specifications, and work health and safety (WHS) requirements
- complete reports and document alterations to plans as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the plant, tools and equipment required for construction
- describe enclosure construction methods
- describe footings and foundations
- read, interpret and make basic modifications to plans
- read and interpret legislation, codes of practice and other formal agreements that impact on the work activity
- identify specific WHS requirements relating to the activity and site conditions
- identify typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where enclosure construction and connection may be conducted

- construction tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on construction.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL212 Erect aerial cable supports

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes skills and knowledge required to erect cable supports in small aerial client installations and access networks where they may be required to do new installations, upgrades or maintain existing networks in domestic, commercial and industrial installations to deliver services in xdigital subscriber lines (xDSL), fibre to the home (FTTH) and hybrid fibre coaxial (HFC) networks.

It applies to individuals working as telecommunications linesmen and line installers who make use of aerial support structures and specialist tools.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements.

Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install aerial cable structure	1.1 Obtain construction plan from appropriate personnel to scope work and arrange for site access

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Notify appropriate personnel of identified safety hazards at cabling worksite</p> <p>1.3 Determine cable route from construction plan, identifying and avoiding other services</p> <p>1.4 Obtain plant, tools, safety equipment and material to perform tasks safely and efficiently</p>
2. Install aerial support structures	<p>2.1 Use tools according to enterprise guidelines and work health and safety (WHS) regulations</p> <p>2.2 Erect safety barriers according to enterprise guidelines to secure site</p> <p>2.3 Excavate hole to specifications and according to enterprise guidelines for erection of mounting pole</p> <p>2.4 Install pole using mechanical lifting devices according to enterprise guidelines</p> <p>2.5 Install fixing structures on pole securely according to manufacturer's specifications</p> <p>2.6 Install aerial fixing devices where support is other than pole according to enterprise guidelines</p>
3. Complete project	<p>3.1 Complete reports according to enterprise policy and record alterations to plans using appropriate symbols</p> <p>3.2 Recover obsolete materials and equipment and return to appropriate point for disposal</p> <p>3.3 Restore site according to requirements of enterprise or approving authority and to client satisfaction</p> <p>3.4 Notify appropriate personnel of job completion and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.3, 2.5, 3.1, 3.4	<ul style="list-style-type: none"> Interprets information from technical sources to identify relevant and key information

Writing	1.2, 3.1	<ul style="list-style-type: none"> Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols
Numeracy	1.3, 2.3	<ul style="list-style-type: none"> Interprets scales and ratios on plans Performs basic calculations appropriate to measuring and estimating size
Navigate the world of work	1.2, 2.1, 3.1, 3.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal, regulatory and organisational requirements relevant to own work context
Interact with others	1.1, 1.2, 3.4	<ul style="list-style-type: none"> Identifies and follows accepted communication practices and protocols when liaising with clients and internal and external personnel on technical and operational matters
Get the work done	1.1, 1.4, 2.1-2.6, 3.2, 3.3	<ul style="list-style-type: none"> Determines job sequence and works logically and systematically to undertake clearly defined tasks Analyses task requirements to decide on appropriate equipment and practices Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Automatically implements standard procedures for routine decisions in response to familiar problems

Assessment Requirements for ICTCBL212 Erect aerial cable supports

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- install a pole and aerial fixing device after relevant authorities have been notified and approvals obtained prior to commencement
- demonstrate use of specialised hand or power tools and equipment for the installation of aerial cable supports safely
- apply work health and safety (WHS) requirements and work practices associated with the installation of aerial cable supports, including protective clothing and personal safety items, adequate warning signs and safety devices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the features and operating requirements of equipment
- describe the information required to operate equipment according to a specification
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- describe licence requirements for working at heights
- identify the manufacturer's requirements for safe operation of equipment
- identify specific WHS requirements relating to the activity and site conditions
- describe test methods and performance requirements
- identify typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where aerial cable supports may be installed
- plant, tools and equipment to erect aerial supports currently used in industry
- relevant regulatory and equipment documentation that impacts on aerial support erection activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL219 Apply safe technical work practices for cabling registration when configuring an ADSL circuit

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to practice safe installation, alteration and configuration of the carrier network termination device/asymmetric digital subscriber line (NTD/ADSL) filter and modem/modem 3 socket/cabling, for an alarm system connected to a monitoring station using a carrier line supporting an ADSL modem service, used for Open and Restricted Cabling Registration.

It applies to cablers, installers and technicians working in the field of installation, maintenance or upgrades of existing systems in voice, data or security systems, and in the context of technology convergence and digital subscriber line (DSL) technologies as applied in the telecommunications industry.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Build and test direct current (DC) and alternating current (AC)	1.1 Identify any hazards and work health and safety (WHS) issues for safe worksite and notify appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
circuits and telephone earthing	<p>1.2 Connect series and parallel DC and AC circuit configuration following safe work practices</p> <p>1.3 Choose appropriate test equipment and measure values of electrical quantities of circuits</p> <p>1.4 Use calculations to verify measured values of electrical quantities in series and in parallel circuit configuration</p> <p>1.5 Compare measured values to calculated values and determine reasons for any variations</p> <p>1.6 Evaluate results and determine probable faults if relevant</p> <p>1.7 Measure voltages present on telephone line and compare to exchange battery voltage</p> <p>1.8 Measure resistance to earth, ensuring electrical earth in telecommunications installation</p>
2. Configure a safe ADSL circuit configuration with mode 3 connection	<p>2.1 Determine effects of bandwidth, frequency and attenuation on DSL circuits as used for broadband client access</p> <p>2.2 Design and configure ADSL circuit from network boundary through to mode 3 socket for alarm system connected to monitoring station</p> <p>2.3 Configure connection to ensure that ADSL circuit is not disconnected for safety reasons when alarm activation in conjunction with a mode 3 socket disconnects plain old telephone service (POTS) circuit</p> <p>2.4 Use level 3 tester to verify correct termination and installation of digital transmission line</p>
3. Diagnose and rectify faults	<p>3.1 Determine urgency and impact of faults and required response timeframe for clearance</p> <p>3.2 Identify type of fault and determine most probable causes of fault from data and historical trends where available</p> <p>3.3 Select tools and test equipment relevant to system and type of fault</p> <p>3.4 Diagnose fault in methodical and safe manner using suitable fault-finding technique</p> <p>3.5 Isolate fault progressively to remove likely variables from diagnostic</p> <p>3.6 Determine options to rectify fault and present to client for decision on rectification</p> <p>3.7 Document test methods and results, and file with other system</p>

ELEMENT	PERFORMANCE CRITERIA
	installation records
4. Alter existing services	<p>4.1 Identify existing and proposed cable systems for altering services to existing installation</p> <p>4.2 Plan alterations to cause minimal disruption to ongoing client activity</p> <p>4.3 Use appropriate tools to safely terminate telecommunications cables and outlets</p> <p>4.4 Identify and rectify any cable fault</p> <p>4.5 Carry out alterations in safe manner and according to both mandatory and recommended industry standards</p> <p>4.6 Identify risks posed by contact with remote power feeding services</p> <p>4.7 Test alteration and obtain sign off with client</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.2, 4.7	<ul style="list-style-type: none"> Uses explicit strategies to make connections between information and ideas while reading
Writing	3.6, 3.7	<ul style="list-style-type: none"> Interrelates ideas, information and some support material when writing about familiar topics
Oral Communication	1.1, 3.6	<ul style="list-style-type: none"> Demonstrates awareness of choices for register, especially in situations that are familiar
Numeracy	1.3-1.5, 1.7, 3.1, 3.2, 4.7	<ul style="list-style-type: none"> Uses 'in the head' and written methods to calculate, and uses calculation and technological processes and tools to undertake the problem solving process
Navigate the world of work	1.1, 1.2, 2.1, 4.5, 4.6	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect self or others
Get the work done	1.3, 1.6, 2.1-2.4, 3.1-3.7, 4.1-4.4,	<ul style="list-style-type: none"> Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues

	4.7	<ul style="list-style-type: none">Automatically implements standard procedures for routine decisions in response to familiar problemsUnderstands when to take responsibility and when to notify others

Assessment Requirements for ICTCB219 Apply safe technical work practices for cabling registration when configuring an ADSL circuit

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- demonstrate the use of asymmetric digital subscriber line (ADSL) concepts in application and design
- demonstrate fault-finding techniques to locate cabling faults in telecommunications networks
- solve calculations for direct current (DC) and alternating current (AC) electrical problems
- apply digital transmission principles and testing
- demonstrate the use of ADSL test equipment
- comply with all related work health and safety (WHS) requirements and work practices in the alteration of existing client services.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss WHS issues and practices relating to ADSL circuits and working with electricity
- describe typical electrical faults, fault-finding techniques and the type and use of testing equipment, including:
 - multimeter to measure direct current (DC) voltage, current and resistance
 - continuity tester to check continuity wiring
 - testing of open circuits and short circuits
 - ADSL test set
- identify the appropriate tools used in ADSL cabling

- describe the types of cable terminations used for a range of telecommunications cable applications
- outline the following:
 - ADSL circuitry and configurations
 - digital transmission concepts, including installation practices and testing
 - procedures in altering existing services, including sign off
 - the distinction between analog and digital signals.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – cabling field of work and include access to:

- special purpose tools, equipment and materials
- a site where altering of existing services for a client may be conducted
- appropriate AC and DC testing equipment
- manufacturer's documentation and equipment
- correct tools and measuring equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL238 Install, maintain and modify customer premises communications cabling: ACMA Lift Rule

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0. Minor updates to Foundation Skills and Assessment Requirements.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to safely install, maintain and modify communications cabling required on a customer's premises, according to Australian Communications and Media Authority (ACMA) Lift Cabling Provider Rule.

It applies to individuals who are qualified licensed electricians working in technical roles for lift installations on new or upgrade installations for an existing network or subsystem for convergence to next generation network (NGN) applications.

All customer cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an ACMA accredited registrar.

To undertake aerial and underground cabling, individuals must attain the specialist competencies as indicated in ACMA cabling provider rules Pathways to cabling registration.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work within constraints imposed by customer premises and ACMA regulatory environment	<p>1.1 Prepare for lift cabling work according to regulatory environment, cabling environment, cable type, cable identification, termination systems, earthing and protection, records and relevant legislation, codes, regulations and standards</p> <p>1.2 Identify building infrastructure that places critical constraints on cabling when undertaking typical lift cabling installation from local distributor (LD) to lift car socket</p> <p>1.3 Develop strategies to manage other infrastructure in relation to cabling</p> <p>1.4 Notify appropriate personnel of identified safety hazards at cabling worksite</p>
2. Manage remote power feed	<p>2.1 Identify and avoid risks posed by contact with remote power feeding services when performing cabling activity</p> <p>2.2 Make site safe by identifying remote power feeding services that operate at above telecommunications network voltage (TNV) inside customer premises</p>
3. Install and modify cable support, earthing and termination infrastructure	<p>3.1 Install fixings and cable support structures of adequate strength safely and align with environment according to manufacturer's and customer's specifications</p> <p>3.2 Secure catenary supports to building structure and tension where necessary to ensure cable weight can be carried in operating conditions with interference and safety segregation maintained, including adherence to current Australian Standards</p> <p>3.3 Install protective earthing of metal work to industry standards where required</p> <p>3.4 Inspect installed support structure to ensure cable will not be exposed to damage during installation and general operation</p> <p>3.5 Position terminating equipment and fixing to accepted industry codes of practice, current Australian Standards and customer requirements</p> <p>3.6 Inspect control cubicles, travelling cable supports, junction boxes, line isolator units, backmount and outlet layout, to ensure compliance with manufacturer's specifications, allow adequate work space for ease of access and avoid overlaying</p> <p>3.7 Segregate incoming and outgoing cables to ensure ease of access, and avoid overlaying</p>

ELEMENT	PERFORMANCE CRITERIA
4. Install cables and earth wires	<p>4.1 Install lift communications cable from LD to lift car socket</p> <p>4.2 Install cables according to manufacturer's application specifications, including tension and bending stress requirements</p> <p>4.3 Identify and avoid sources of possible damage to cable, including hot pipes, sharp edges, cable burn, kinks and stretching</p> <p>4.4 Allow sufficient excess at cable ends to facilitate termination</p> <p>4.5 Place and secure cable to maintain safety and interference segregation according to legislative and industry standards</p> <p>4.6 Install cable fasteners with correct tension to prevent cable sheath damage or transmission impairment, and trim flush to prevent risk of personal damage</p> <p>4.7 Install aerial cables supported by catenaries in external environment to meet minimum above ground clearances and clearances from hazardous electrical services according to current Australian Standards</p> <p>4.8 Install and secure travelling cables to maintain safety and according to relevant legislative, industry and manufacturer's standards</p> <p>4.9 Install local isolation units (LIU) as required according to current Australian Standards</p> <p>4.10 Install over-voltage protection devices to all cable pairs, where required, to suppress voltage surges, with devices protectively earthed and according to current Australian Standards</p> <p>4.11 Protect earth wire insulation against damage with protective earths segregated according to relevant industry and legislative standards</p>
5. Terminate and test cables and earth wires	<p>5.1 Remove cable sheath to allow for correct termination length and without damage to underlying conductors and their insulation</p> <p>5.2 Install terminating modules according to manufacturer's specifications, ensuring cable pairs are neatly and sequentially fanned for termination</p> <p>5.3 Terminate conductors according to recommended colour code sequence using appropriate termination tools in manufacturer's specified manner</p> <p>5.4 Earth cable shield, if applicable, to manufacturer's specifications and relevant industry codes of practice, including current Australian Standards</p> <p>5.5 Undertake visual inspection to confirm termination colour code sequence has been followed, prior to end to end testing of wire and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>pair termination integrity</p> <p>5.6 Terminate earth wires with connectors recommended by manufacturer according to relevant industry codes of practice, including current Australian Standards</p> <p>5.7 Maintain earth wire continuity throughout to meet interface requirements with electrical systems</p> <p>5.8 Test earthing installation for continuity, insulation resistance and conductive resistance according to relevant industry standards, including current Australian Standards</p> <p>5.9 Confirm compatibility of alterations with existing systems and test new work both in isolation and when integrated with existing systems</p>
6. Inspect cable route to ensure correct separations	<p>6.1 Inspect separations along entire cable route and rectify separations that do not comply with regulations</p> <p>6.2 Install barriers to achieve separations where sufficient spatial separation cannot be met</p>
7. Evaluate earthing needs for cable systems on customer premises	<p>7.1 Locate existing customer earthing systems and analyse earthing needs of cable systems</p> <p>7.2 Calculate upper and lower limits of resistance for variety of cable system earths using relevant cable characteristics</p>
8. Label earthing systems	<p>8.1 Identify label requirements for all types of earthing systems</p> <p>8.2 Attach label to earthing systems according to industry regulations</p>
9. Create or update cable plans and records	<p>9.1 Document installation details on record sheets and plans, and store according to customer requirements</p> <p>9.2 Label cable pairs clearly to provide accurate identification according to manufacturer's, industry and customer standards</p> <p>9.3 Record cabling details in cable pair record books to provide accurate record according to industry codes of practice and current Australian Standards</p> <p>9.4 Complete Telecommunications Cabling Advice (TCA) form</p>
10. Monitor work activity	<p>10.1 Maintain close supervision of cablers not holding appropriate registration for task to ensure installation and maintenance activity is strictly according to legislative requirements and industry standards for safety and network integrity, including all current Australian Standards</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets complex technical information, legislation, codes, regulations and standards to identify key requirements
Writing	<ul style="list-style-type: none"> Completes required documentation to meet customer, organisational and legislative requirements using industry relevant terminology
Oral communication	<ul style="list-style-type: none"> Delivers clear and specific instructions and confirms understanding using questioning and active listening
Numeracy	<ul style="list-style-type: none"> Takes measurements and interprets results
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for adherence to legal, regulatory and organisational requirements relevant to own work context, including supervising the work of others
Interact with others	<ul style="list-style-type: none"> Identifies and follows accepted communication practices and protocols when liaising with customers, internal and external personnel on technical and operational matters
Get the work done	<ul style="list-style-type: none"> Determines job sequence and works logically and systematically to undertake clearly defined tasks Analyses task requirements to decide on appropriate equipment and practices Implements actions as per plan, making adjustments if necessary, and addressing some unexpected issues Automatically implements standard procedures for routine decisions in response to familiar problems

Assessment Requirements for ICTCBL238 Install, maintain and modify customer premises communications cabling: ACMA Lift Rule

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0. Minor updates to Foundation Skills and Assessment Requirements.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- install a lift cabling system from local distributor (LD) via a travelling cable to a lift car socket, including accurate completion of installation records, drawing alterations and compliance forms
- read and interpret cable drawings and plans for locations and terminations
- apply cable conductor identification codes
- conduct and interpret cable test results
- interpret and apply related regulations and industry codes
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Australian Communications and Media Authority (ACMA) competency requirements for Telecommunications Cabling Provider Rules
- the features and operating requirements of test equipment
- the information required to operate equipment according to a test specification

- legislation, codes of practice and other formal agreements that impact on the work activity
- manufacturer's requirements for safe operation of equipment
- explain protection earthing
- the features of lift construction and the types of cables required
- the types of cable used for manual controlled fire services
- cables and the types of cabling
- common distributors
- specific WHS requirements relating to the activity and site conditions
- typical issues and challenges that occur on site.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of those in a telecommunications work environment or workplace and include access to:

- a site on which lift communications cabling activities may be carried out
- cabling and field equipment currently used in industry
- licensing requirements and other site related documentation.

Note: All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar. Assessment by a Telecommunications Industry Training Advisory Board (TITAB) registered assessor is recommended for this unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL301 Install, terminate and certify structured cabling installation

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to place, secure and terminate structured cabling for indoor and outdoor installations and to certify the installation within a domestic, commercial or industrial client's premises.

It applies to technical staff who install, terminate and certify structured cabling installations for communications applications including digital and analog, telephony, data, video, digital broadcasting, computer networks, local area networks (LAN), wide area networks (WAN) and multimedia.

All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar.

The ACMA Pathways for Cabler Registration of Specialist Competency ICTCBL301 requires completion of ICTCBL247 and a WHS/OHS unit.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for	1.1 Confirm client requirements and ensure compliance with relevant

ELEMENT	PERFORMANCE CRITERIA
installation of structured cabling	<p>legislation, codes, regulations and standards</p> <p>1.2 Arrange access to site according to required procedure</p> <p>1.3 Inform appropriate personnel of identified safety hazards on worksite</p> <p>1.4 Organise tools and cabling products equipment for given work</p> <p>1.5 Erect barriers according to safety requirements</p> <p>1.6 Select cable type and match structured cabling to installation environment and client requirements</p> <p>1.7 Verify proposed route to meet manufacturer's specifications and industry standards</p>
2. Install structured cable	<p>2.1 Place and secure correct type of cable following work health and safety (WHS) and environmental requirements, and according to accepted industry practice and standards</p> <p>2.2 Maintain cable and services separations in runs and cross overs to meet manufacturer and industry standards</p> <p>2.3 Install structured cabling to industry standards</p> <p>2.4 Minimise twist ratio defects to avoid accumulation effect on structured cable performance</p> <p>2.5 Fit over-voltage protection devices to all cables and metallic components where required</p>
3. Terminate structured cable	<p>3.1 Terminate cable according to accepted industry practice and standards</p> <p>3.2 Maintain correct twist ratio to optimise system performance at rated level</p> <p>3.3 Use correctly rated termination hardware with appropriate termination tool to ensure integrity and performance of termination</p> <p>3.4 Earth cable shield to manufacturer's specifications and relevant industry standards if applicable</p>
4. Certify system performance to required level and complete documentation for client	<p>4.1 Test installation and termination to comply with certification requirements</p> <p>4.2 Record and verify system performance promptly where required</p> <p>4.3 Authorise and issue appropriate documentation to client to certify system performance and complete records where required</p> <p>4.4 Reinstate site to client's satisfaction and dispose of waste in environmentally safe manner</p> <p>4.5 Notify client and obtain sign off</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Integrates new ideas and information with existing understanding Recognises the structures and distinguishing features of a range of familiar text types
Writing	<ul style="list-style-type: none"> Sequences writing to produce cohesive text
Oral Communication	<ul style="list-style-type: none"> Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Numeracy	<ul style="list-style-type: none"> Interprets and comprehends whole numbers and familiar or routine fractions, decimals and percentages
Navigate the world of work	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect self or others
Interact with others	<ul style="list-style-type: none"> Recognises the purpose of various communications directly relevant to own role
Get the work done	<ul style="list-style-type: none"> Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Automatically implements standard procedures for routine decisions in response to familiar problems Understands when to take responsibility and when to notify others

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Over-voltage protection devices requirements must	<ul style="list-style-type: none"> ACMA standards enterprise or local environmental hazard
--	--

<i>comply with:</i>	<ul style="list-style-type: none">• manufacturer's specifications.
----------------------------	--

Assessment Requirements for ICTCBL301 Install, terminate and certify structured cabling installation

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- install, terminate and certify a structured cabling installation to industry standards, applying related work health and safety (WHS) requirements and work practices
- install and test the following UTP (Cat 6, Cat 6A & Cat 7) and FTP (Cat 6 2x2)
- install termination hardware
- conduct a termination test and interpret the results
- verify compliance with manufacturer's installation specifications and warranties
- provide a report certifying the installation and test results to the client.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- Australian Communications and Media Authority (ACMA) competency requirements for Telecommunications Cabling Provider Rules
- legislation, codes of practice and other formal agreements that impact on the work activity
- application of industry standards on cable bending, anchors, tension, twist and labelling
- tools and equipment commonly used in cable installations and testing
- features and operating requirements of test equipment

- types and structure of cable and termination hardware used in communications installations
- information required to operate equipment according to a test specification
- identify the manufacturer's requirements for safe operation of equipment
- identify specific WHS hazards and requirements relating to the activity and site conditions
- test methods and performance requirements
- different types of records and documentation that may be required for certification and reporting
- typical issues and challenges that occur on site.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sites where installation, termination and certification of structured cabling may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on installation.

Note: All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar. Assessment by a Telecommunications Industry Training Advisory Board (TITAB) registered assessor is recommended for this unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL303 Install and terminate coaxial cable

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This unit first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install and terminate coaxial cable on client premises in communications applications, digital and analog, including master antenna television (MATV), cable television (CATV), closed-circuit television (CCTV), digital video broadcasting – terrestrial (DBVT), digital video broadcasting – satellite (DVB-S), data and video, including digital broadcasting, computer networks such as local area networks (LAN) and wide area networks (WAN), and multimedia.

It applies to technical staff who install and terminate coaxial cable for new installations, upgrades or the maintenance of existing networks in domestic, commercial and industrial installations on a client's premises.

Where this unit of competency is undertaken as a competency related to the ACMA Cabler Registration, this requires prior completion of ICTCBL247 and a WHS/OHS unit of competency.

All cabling work for clients in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media Authority (ACMA) accredited registrar.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install and terminate coaxial cable	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards 1.2 Arrange access to site according to required procedure 1.3 Inform appropriate personnel of identified hazards on worksite 1.4 Select coaxial cable type, connectors and manufacturer's tool to comply with installation environment and client requirements 1.5 Check proposed route and bend radius to meet manufacturer's specifications and industry standards 1.6 Test cable on drum for continuity and inspect visually for crushing and kinks 1.7 Discuss with client proposed method of installation and cable route, and adjust if necessary
2. Install, terminate and test coaxial cable	2.1 Maintain cable segregation to industry standards 2.2 Protect integrity of coaxial shield cable to ensure no loss of signal during operation and maintain bend ratios to not exceed manufacturer's specifications and industry standard 2.3 Install cable securing hardware to ensure cable is not crushed or kinked while maintaining cable manufacturer's bend radius 2.4 Install cable following work health and safety (WHS) and environmental requirements, and complying with manufacturer's specifications and industry standards 2.5 Terminate cable and perform type of termination specified in plan using safe work practices and according to manufacturer's specifications 2.6 Test termination for transmission loss and signal levels, and re-terminate the coaxial cable if the transmission loss exceeds the manufacturer's specifications 2.7 Record all measurements 2.8 Fit over-voltage protection devices to all cables with metallic component where required
3. Remove termination waste from work area	3.1 Clean work area thoroughly to minimise risk of injury from loose metal strands 3.2 Dispose of waste safely according to relevant environmental requirements 3.3 Restore worksite to client's satisfaction
4. Document installation	4.1 Update plans and records with details of installation and test

ELEMENT	PERFORMANCE CRITERIA
	<p>results</p> <p>4.2 Show client completed work and ensure work matches agreed method of installation and cable route</p> <p>4.3 Notify client of work completion and obtain sign off</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reads and interprets plans, specifications, and other documentation from a variety of sources and consolidates information
Writing	<ul style="list-style-type: none"> Accurately records information and prepares documentation using clear language and organisational formats and protocols
Oral Communication	<ul style="list-style-type: none"> Demonstrates an awareness of the need to vary structure, style, tone and vocabulary to meet the requirements of the audience, context and purpose
Numeracy	<ul style="list-style-type: none"> Makes calculations appropriate for measuring and estimating materials Performs mathematical calculations to check, interpret and confirm results of system tests
Navigate the world of work	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect self or others
Interact with others	<ul style="list-style-type: none"> Recognises the purpose of various communications directly relevant to own role
Get the work done.	<ul style="list-style-type: none"> Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Automatically implements standard procedures for routine decisions in response to familiar problems Understands when to take responsibility and when to notify others

Assessment Requirements for ICTCBL303 Install and terminate coaxial cable

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- install and terminate coaxial cable types including RG6 quad shielded coaxial cable
- install different connector types
- conduct and interpret test results
- verify the installation complies with manufacturer's specifications and warranties
- prepare a report for a client that documents the installation and test results
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislation, regulations, standards and codes of practice associated with the installation of coaxial cables
- features of types of coaxial cable and the manufacturer's specifications that apply
- features and operating requirements of test equipment for coaxial cable
- information required to operate equipment according to a test specification
- manufacturer's requirements for safe operation of coaxial cable tools and equipment
- safety precautions when working with coaxial cable and radio frequency (RF) based systems

- specific WHS requirements relating to the activity and site conditions
- test methods and performance requirements
- types and techniques for connecting and termination of coaxial cable, including:
 - compression termination
 - crimp termination
- function of over-voltage protection devices
- transmission and propagation characteristics of coaxial cable
- typical issues and challenges that occur on site.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- special purpose tools, equipment and materials
- sites where installation and termination of coaxial cabling may be conducted
- equipment and personal protective equipment currently used in industry
- testing equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on installation activities.

Note: All client cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media (ACMA) accredited registrar. Assessment by a Telecommunications Industry Training Advisory Board (TITAB) registered assessor is recommended for this unit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL305 Hand over cable systems and equipment

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to effectively transfer control of a newly installed or upgraded system to a client. It includes the transfer of information to the client and the completion of relevant documentation.

It applies to field officers, technicians or technical supervisors from carriers, contractors or other service providers completing domestic, commercial or industrial installations. Communications applications include digital and analog, telephony, data, video, digital broadcasting, computer networks, local area networks (LAN), wide area networks (WAN) and multimedia.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Inform client of system functions and capacities	1.1 Provide client with cables systems and equipment information 1.2 Demonstrate physical installation, cable system usage or equipment operation and answer client queries on system functions 1.3 Confirm variations to specifications with client
2. Hand over records and documentation	2.1 Update documentation and plans 2.2 Present complete and orderly records and system documentation to client 2.3 Adhere to all relevant company policies and relevant legislation, codes, regulations and standards
3. Complete contract documentation	3.1 Provide guarantees to client in required format where work is subject to guarantee 3.2 Present invoices to client to complete contractual arrangements 3.3 Obtain client's sign off to confirm acceptance of cabling work completed where required 3.4 Advise client of opportunities for system upgrades, additional services and training where appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	<ul style="list-style-type: none">• Reads and interprets plans, specifications and technical information to pass on to client• Evaluates information and products from a variety of sources to ensure appropriateness to client needs
Writing	<ul style="list-style-type: none">• Prepares documentation and correspondence using clear language and correct spelling and terminology• Accurately records and completes information in organisational systems• Records outcomes of communication with client for action

Oral Communication	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges, using active listening and questioning, to convey and clarify information Clearly explains detailed information using language, tone and pace appropriate to the audience
Numeracy	<ul style="list-style-type: none"> Performs mathematical calculations to present financial data and contract requirements, and to accurately process invoice
Navigate the world of work	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Uses a range of strategies to establish a sense of connection and build rapport with clients and workmates Recognises and accommodates basic differences and priorities of others
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Uses familiar digital technologies and systems to access information, enter data, present information and communicate with the client

Evidence of the ability to:

- demonstrate and explain the cable and equipment system to the client
- present accurate records and system documentation to the client
- complete contract documentation
- respond to client requests.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- cabling types, connectors and cabling structures
- equipment on the client's premises
- typical performance parameters and faults that may be encountered with the client equipment
- various equipment types
- warranty information for equipment supplied and contractor work guarantees.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where cabling system and client equipment have been installed or upgraded
- relevant regulatory and equipment documentation that impacts on system and equipment installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL306 Locate and identify cable system faults

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to locate and identify cable system faults in communications cables at enterprise and client premises sites. The cable types may be telecommunications digital, voice and data in digital TV cabling.

It applies to technical staff who are required to locate and rectify communications cable system faults, including local area networks (LAN) and wide area networks (WAN), master antenna television (MATV), cable television (CATV), closed-circuit television (CCTV), digital video broadcasting – terrestrial (DVB-T), digital video broadcasting – satellite (DVB-S), security alarm systems, fire systems, voice over internet protocol (VoIP) networks and radio communications. The telecommunications cabling types may be twisted pair, coaxial or fibre optic types.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to locate and rectify cable fault	<ul style="list-style-type: none">1.1 Prepare for given work according to relevant legislation, codes, regulations and standards1.2 Inform appropriate personnel of existing and potential hazards on worksite1.3 Arrange access to site according to required procedure1.4 Establish type of cable and nature of fault from client for cable system1.5 Select suitable testing tools and equipment and personal protective equipment to meet required industry standards
2. Locate and diagnose cable fault	<ul style="list-style-type: none">2.1 Conduct appropriate test following work health and safety (WHS) and environmental requirements to identify type of cable fault2.2 Isolate fault progressively to remove likely variables from assessment2.3 Locate cable or cable termination equipment fault without undue interruptions to client activity in shortest possible time2.4 Notify client of findings
3. Rectify fault	<ul style="list-style-type: none">3.1 Present client with options to rectify fault3.2 Advise client of costs of any repair not covered by service agreement3.3 Conduct fault rectification, if client agrees, in a manner that is safe for repair team and client3.4 Escalate any unresolved faults to other parties for resolution if required
4. Complete documentation and clean up worksite	<ul style="list-style-type: none">4.1 Advise client of successful fault clearance and obtain sign off4.2 Complete all records4.3 Complete reports to justify fault diagnosis and rectification methodology if required4.4 Remove all waste and debris from worksite and dispose of according to environmental requirements4.5 Restore any changes made to worksite during fault repair to client's satisfaction

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">• Interprets, consolidates and checks information and data• Interprets technical documentation and test results from equipment manuals and specifications
Writing	<ul style="list-style-type: none">• Accurately records and completes information in organisational systems• Prepares documentation and correspondence using clear language and correct spelling and terminology
Oral Communication	<ul style="list-style-type: none">• Clearly explains detailed information using language, tone and pace appropriate to the audience• Interacts effectively in verbal exchanges using active listening, questioning, and reading of verbal and non-verbal signals to convey and clarify information
Numeracy	<ul style="list-style-type: none">• Performs mathematical calculations to check, interpret and confirm numerical information
Navigate the world of work	<ul style="list-style-type: none">• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements• Seeks advice and clarification for new activities
Interact with others	<ul style="list-style-type: none">• Uses a range of strategies and reads verbal and non-verbal signals to establish a sense of connection and build rapport with clients and workmates• Selects and uses appropriate conventions and protocols when communicating to clients and co-workers in a range of work contexts
Get the work done	<ul style="list-style-type: none">• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes• Accepts responsibility for addressing less predictable problems and initiates standard procedures in response, applying problem solving processes in determining a solution• Uses familiar digital technologies and systems to test cables, access information, enter data, present information and communicate with others

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify different faults using checks, tests and fault-finding methodology
- determine and rank likely causes of fault
- provide the client with solutions for rectifying faults
- rectify the faults
- escalate unresolved faults to other parties for resolution
- comply with all related health and safety requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- Australian Communications and Media Authority (ACMA) competency requirements for Telecommunications Cabling Provider Rules
- features and operating requirements of test equipment
- equipment according to a test specification
- legislation, codes of practice and other formal agreements that impact on the work activity
- manufacturer's requirements for safe operation of testing instruments
- specific work health and safety (WHS) requirements relating to the activity and site conditions
- test methods and identify the test performance requirements

- typical issues and challenges that occur on site.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sites where cable system tests may be conducted
- fault-finding equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on cable system testing and fault-finding activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL311 Install systems and equipment on customer premises

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install customer premises cabling and equipment for indoor and outdoor installations. This may include communications applications such as telephony, broadband data, video including digital broadcasting, and computer networks including local area networks (LAN), wide area networks (WAN) and multimedia.

It applies to field officers, technicians or technical supervisors from carriers, contractors or other service providers who provide voice, data and security installation and maintenance services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for customer premises systems and equipment installation	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards 1.2 Arrange access to site according to required procedure 1.3 Inform appropriate personnel of existing and potential hazards on

ELEMENT	PERFORMANCE CRITERIA
	worksite 1.4 Verify location of proposed customer communications equipment installation according to plans obtained from authorised personnel 1.5 Develop installation plans to ensure minimal disruption to workplace and according to standards 1.6 Select suitable tools and equipment
2. Install system hardware	2.1 Install network equipment following work health and safety (WHS) and environmental requirements according to manufacturer's instructions 2.2 Confirm service interruption is within limits agreed with customer 2.3 Complete cable jumpering to distribution infrastructure and terminal equipment to specification 2.4 Document all installation drawings for customer
3. Configure and test system	3.1 Install software and, if required, configure system according to specifications 3.2 Test to verify system performance according to customer requirements 3.3 Record all test results
4. Clean up worksite and complete documentation	4.1 Remove and dispose of installation waste and debris from worksite according to environmental requirements 4.2 Restore worksite to customer's satisfaction 4.3 Complete all installation documents and present to customer 4.4 Notify customer and obtain signoff

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.1, 2.3, 3.1, 3.2	<ul style="list-style-type: none">Analyses and consolidates test results and data from a range of sources, against defined criteria and requirementsReads and interprets plans, specifications and other documentation from a variety of sources and consolidates

		information to determine requirements
Writing	1.2, 1.3, 1.5, 2.4, 3.3, 4.3, 4.4	<ul style="list-style-type: none"> Prepares documentation and correspondence using clear language and correct spelling and terminology Accurately records and completes information in organisational systems
Oral Communication	2.2, 4.3, 4.4	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges using active listening, questioning and reading of verbal and non-verbal signals to convey and clarify information Presents complex information in formal situations using clear and convincing language, tone and pace appropriate for the audience and purpose
Numeracy	2.1, 2.3, 3.2, 3.3	<ul style="list-style-type: none"> Make calculations appropriate for measuring and estimating materials for construction Performs mathematical calculations to check, interpret and confirm results of system tests
Navigate the world of work	1.1, 1.2, 1.5, 2.1, 4.1	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	1.2-1.4, 2.2, 4.2-4.4	<ul style="list-style-type: none"> Uses a range of strategies to establish a sense of connection and build rapport with customers and workmates
Get the work done	1.1, 1.5, 1.6, 2.1, 2.3, 3.1, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Accepts responsibility for addressing less predictable problems and initiates standard procedures in response, applying problem solving processes in determining a solution

Assessment Requirements for ICTCBL311 Install systems and equipment on customer premises

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- read and interpret:
 - related floor plans
 - building plans
 - reflected ceiling plans
 - schematic drawings
- install customer premises equipment
- configure and test systems and equipment
- apply relevant regulations and standards
- comply with all related health and safety requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and select cabling types, connectors and cabling structures
- describe the connections to carrier infrastructure or equipment, such as main distribution frame (MDF) or asymmetric digital subscriber line (ADSL), multiplexer (MUX), integrated services digital network (ISDN), network termination device (NTD) or other carrier interface unit
- recognise electrical and/or optical properties to be measured
- explain the health and safety considerations for the works including:
 - electrical safety
 - lifting hazards
 - manufacturer's requirements for safe operation of equipment

- describe the equipment to be installed on the customer's premises
- identify and select the test methods and performance requirements for the installation
- identify typical issues and challenges that occur on the worksite.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- a site where installation of electronic equipment and customer cabling may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL314 Install network cable equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install indoor or outdoor, domestic, commercial or industrial network cable equipment at a client's premises or service provider access networks. This may include communications applications in telephony, broadband, data, video, radio frequency (RF) equipment, security and computer networks, including local area networks (LAN), wide area networks (WAN) and multimedia.

It applies to technicians and lineman installers who install network cable equipment within the broadband infrastructure deployment where they may upgrade coaxial or optical fibre cables as part of a hybrid fibre coaxial (HFC) network, a broadband access network or a large client private network.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Obtain relevant legislation, codes, regulations and standards for given work 1.2 Scope work by obtaining project plan from appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>and arrange for site access to comply with security arrangements</p> <p>1.3 Notify appropriate personnel of identified safety hazards at worksite</p> <p>1.4 Determine cable route and type of network cable equipment from project plan, and identify and avoid other services</p> <p>1.5 Obtain plant, tools and safety equipment and material to perform tasks safely and efficiently</p> <p>1.6 Evaluate nature of job and infrastructure hierarchy from plan, and obtain approval from client on key features of installation to meet client requirements</p> <p>1.7 Coordinate other parties to minimise disruption to services and down time</p> <p>1.8 Segregate incoming and outgoing cables to facilitate access and avoid overlaying and backtracking of cable</p>
2. Install required cable and equipment support structure	<p>2.1 Evaluate existing equipment support structure and develop plan for additional support structure provisioning</p> <p>2.2 Install additional cable support, equipment support structure and cable runs according to manufacturer's specifications, industry practice, and health and safety and environmental requirements</p> <p>2.3 Determine cable route between rack and sub-rack and cable termination point to comply with client requirements, site limitations, equipment specifications and regulations</p> <p>2.4 Install cabling infrastructure to interface rack and sub-rack according to installation instructions</p> <p>2.5 Complete cabling requirements to support installation of equipment</p>
3. Install equipment and earthing protection	<p>3.1 Install lightning protection equipment where required, according to manufacturer's specifications and industry practice</p> <p>3.2 Install earthing protection and line conditioning where required, according to relevant Australian Communications and Media Authority (ACMA), local power company and industry practice</p> <p>3.3 Install equipment component into rack and sub-rack and complete connections according to manufacturer's specifications and compliance with warranty requirements</p>
4. Perform tests	<p>4.1 Power-on test individual equipment items</p> <p>4.2 Visually check that all connections and interconnections are firm and sound</p>

ELEMENT	PERFORMANCE CRITERIA
	4.3 Electrically test all terminations for continuity according to enterprise guidelines
5. Complete project documentation	<p>5.1 Install labels to new equipment and radiation warning signs, where required, according to enterprise guidelines</p> <p>5.2 Record test results for future reference, complete reports on equipment installation and amend design to reflect existing cable layout and equipment according to enterprise requirements</p> <p>5.3 Recover obsolete materials and return to appropriate point for disposal</p> <p>5.4 Restore site according to requirements of enterprise or approving authority and to client satisfaction</p> <p>5.5 Notify appropriate personnel of job completion and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.6, 2.2, 2.4, 3.1-3.3, 5.4	<ul style="list-style-type: none"> Analyses and consolidates test results and data from a range of sources, against defined criteria and requirements Reads and interprets plans, specifications and other documentation from a variety of sources and consolidates information to determine requirements
Writing	1.2, 1.3, 2.1, 5.1, 5.2, 5.5	<ul style="list-style-type: none"> Prepares documentation and correspondence using clear language and correct spelling and terminology Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols
Oral Communication	1.2, 1.3, 1.6, 1.7, 5.4, 5.5	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges using active listening, questioning and reading of verbal and non-verbal signals to convey and clarify information
Numeracy	2.3-2.5, 3.1-3.3, 4.1, 4.3	<ul style="list-style-type: none"> Makes calculations appropriate for measuring and estimating materials for construction Takes measurements and uses them for work layout and construction Performs mathematical calculations to check, interpret and confirm results of system tests

Navigate the world of work	1.6, 2.2-2.4, 3.1-3.3, 4.3, 5.1, 5.2, 5.4	<ul style="list-style-type: none"> • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	1.2, 1.3, 1.6, 1.7, 5.4, 5.5	<ul style="list-style-type: none"> • Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers • Recognises and accommodates basic differences and priorities of others
Get the work done	1.1, 1.2, 1.4-1.8, 2.1-2.5, 3.1-3.3, 4.1-4.3, 5.1, 5.3, 5.4	<ul style="list-style-type: none"> • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes decisions and implements procedures for routine tasks, using formal decision making processes for more complex and non-routine situations. • Addresses problems and initiates standard procedures in response, applying problem solving processes in determining a solution

Assessment Requirements for ICTCBL314 Install network cable equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare for installation of network cable equipment
- provide cable infrastructure
- install cable equipment support structure for power, alarms and interrogation requirements
- install equipment, test and interpret test results
- label equipment correctly
- safely use any specialised hand or power tools and equipment
- apply regulations and standards related to the installation
- comply with all related health and safety requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and select cabling types, connectors and cabling structures
- identify connections to carrier infrastructure or equipment, such as main distribution frame (MDF) or customer interface units (CIU)
- describe the network cable installation requirements for the client's equipment
- define the electrical and/or optical properties to be measured
- identify the health and safety considerations including:
 - electrical safety
 - lifting hazards
 - manufacturer's requirements for safe operation of equipment
- describe the test methods and performance requirements to be used
- identify the typical issues and challenges that occur on the worksite

- describe the purpose of warranties and service level agreements.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- a site where installation of network cable equipment may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL316 Install ribbon fibre cable in the FTTX distribution network

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the performance outcomes, skills and knowledge required to install ribbon cable in the fibre access node (FAN) site and distribution, local and access underground enclosure joints. Cables may range from 12 fibre to 576 fibre cables.

It applies to individuals who are optical fibre cable installers and splicers deploying broadband access networks using optical technologies. They combine technical skills with specific work health and safety (WHS) skills to work safely on ribbon fibre.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

ICTCBL330	Splice and terminate optical fibre cable for carriers and service providers
-----------	---

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation of ribbon fibre	1.1 Select safety equipment to protect self, co-workers and public in line with WHS and environmental requirements 1.2 Identify and obtain tools and appropriate equipment required for installation 1.3 Check physical conditions relevant to installation and confirm layout of equipment to be installed 1.4 Inform appropriate personnel of identified hazards on worksite 1.5 Locate other services from relevant authorities 1.6 Secure worksite with tests for dangerous gases and guards around open manholes 1.7 Obtain approval for alterations to design within organisational guidelines
2. Check and secure existing optical fibre cable	2.1 Following WHS practices, verify that cable was installed according to installation plan and inspect cable for signs of sheath damage 2.2 Maintain minimum bend ratios of cable according to manufacturer specifications while manoeuvring into position 2.3 Secure cable according to safe industry practice, avoiding damage to cable and sheath
3. Install ribbon fibres into high density drawers and/or pivot sub-racks in internal cabinets	3.1 Introduce cable into cabinet rack through appropriate route 3.2 Remove cable sheath and lay up ribbon loose tubes into sub-racks without damage to fibre 3.3 Remove loose tubes, clean ribbon fibres and prepare for splicing using organisational techniques 3.4 Splice ribbon fibres and secure into splice holders 3.5 Confirm that fibres are accurately spliced according to organisational specifications
4. Install and splice ribbon cable in underground enclosures	4.1 Select appropriate enclosure for function and cable type 4.2 Prepare cables for mid-span and butt splicing following vendor guidelines 4.3 Feed cable accurately into enclosure according to network owner guidelines

	<p>4.4 Lay up ribbon fibre in enclosure splice tray to allow accurate and efficient splicing</p> <p>4.5 Cross-reference fibre numbering to match fibres accurately</p> <p>4.6 Strip ribbon fibres to specifications</p> <p>4.7 Splice ribbon fibres accurately</p> <p>4.8 Apply heat-shrink sleeves to ensure protection of spliced ribbon fibres</p> <p>4.9 Secure spliced ribbon fibres in splice holders</p>
5. Close and seal enclosure	<p>5.1 Check cable and ribbon fibre placement in splice trays conform to vendor and network owner specifications and adjust if necessary</p> <p>5.2 Close and secure splice trays and fit enclosure cap</p> <p>5.3 Heat shrink seals around cable entry ports when using heat shrinking techniques, according to vendor and network owner guidelines</p> <p>5.4 Close and tighten seals around ribbon fibre cables when using mechanical sealing techniques, according to vendor and network owner guidelines</p> <p>5.5 Check for signs of effective seal and re-seal if necessary</p>
6. Complete site reinstatement, reporting and sign off requirements	<p>6.1 Place sealed enclosure in pit and secure to vendor and network owner specifications</p> <p>6.2 Identify signs of damage or potential damage to pit and cable and take steps to mitigate</p> <p>6.3 Reinstall site to network owner specifications</p> <p>6.4 Prepare and finalise reports, including test results and alterations to plans, according to network owner requirements</p> <p>6.5 Advise client of work completion and obtain sign off</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reads and interprets plans, specifications and other documentation from a variety of sources and consolidates information to determine requirements
Writing	<ul style="list-style-type: none"> Accurately records and completes organisational

	documents and correspondence using clear language and correct spelling, grammar and terminology
Oral Communication	<ul style="list-style-type: none"> • Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Navigate the world of work	<ul style="list-style-type: none"> • Complies with explicit policies and procedures • Explores and implements where identified the implicit expectations of policies, procedures and standards
Get the work done	<ul style="list-style-type: none"> • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations

Assessment Requirements for ICTCBL316 Install ribbon fibre cable in the FTTX distribution network

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare cable for mid-span splicing – strip and coil
- prepare cable for butt end splicing – strip and coil
- install ribbon fibre cable into:
 - one heat shrink seal enclosure
 - one mechanical seal enclosure
 - one high density ribbon fibre termination drawer
- splice ribbon fibre according to specifications
- observe all network owner requirements and product practices to ensure optimal performance of cable systems
- adapt techniques to a range of technical and environmental conditions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- applicable network owner standards, specifications and procedures for cable installation
- cable installation requirements, including:
 - causes of signal strength loss in optical fibre

- colour coding and numerical coding of fibres
- application of relevant safe operation of laser instruments
- installation equipment
- industry and organisational policies and procedures when splicing optical fibre cable
- manufacturer requirements for safe operation of optical fibre equipment
- common hazards associated with the construction site
- work health and safety (WHS) and environmental control processes and responsibilities on worksites
- safe handling of optical fibres and related equipment including:
 - hazards relating to handling of optical fibre and laser light source in the workplace
 - injuries:
 - damage to retina from lasers
 - damage to lungs from inhalation of fibre offcuts and particles
 - needle stick injury from fibres and offcuts
 - laser warning signs and labels relating to optical fibre components and equipment
 - safety requirements when handling and working with:
 - active equipment
 - laser light sources
 - optical fibre connectors
 - optical fibres
 - patch cords
- major feature and use of ribbon fibre, including:
 - bend ratios for ribbon fibre
 - procedures for handling and placing ribbon fibre in enclosures
 - procedures for physical handling of ribbon fibre cables
 - structure of ribbon fibre cables
 - splicing techniques for ribbon fibre
 - types and functions of ribbon fibre enclosures
- risks associated with confined spaces and determine the appropriate responses.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- optic fibre cabling and equipment
- a range of cabinet types and other housings requiring cable-handling techniques
- personal protective equipment
- first aid and fire safety equipment
- ribbon fibre cleaners, stripper and splicer
- joint pressure testing equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL319 Rearrange large size copper cable

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to modify a large size cable network or cut over new large size cables in the telecommunications access network. It includes telephony, data security and emergency services within the cable sheath.

It applies to linesworkers, technicians or copper jointers working for carriers, contractors or other service providers who cut over and rearrange large size cable to distribution cabinets and housings.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for cable modification and cutover	1.1 Obtain relevant legislation, codes, client practices, regulations and standards for given work

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Obtain project plan from appropriate personnel and use it to scope work</p> <p>1.3 Arrange for site access according to local government and other authority requirements</p> <p>1.4 Inspect site to develop a work health and safety (WHS) plan and notify appropriate personnel of identified safety hazards</p> <p>1.5 Determine cable route and type of cable from project plan, and identify and avoid other services</p> <p>1.6 Determine large size cable handling and support facilities</p> <p>1.7 Obtain plant, tools, safety equipment and material to perform tasks safely and efficiently</p> <p>1.8 Prepare implementation plan with cutover tasks based on identified nature of job and seek client approval, if required</p> <p>1.9 Notify client and network carrier of proposed cutover details and proposed disruption to services</p> <p>1.10 Undertake additional preparatory non-jointing work, as required, according to client practices and site conditions</p> <p>1.11 Coordinate labour required for remote cutover of large size cable</p>
2. Joint and cutover cable	<p>2.1 Follow WHS and environmental requirements for given work</p> <p>2.2 Notify appropriate personnel of cable pressure and equipment alarms</p> <p>2.3 Prepare joint enclosure and jointing cabinet for cutover cable entry, jointing activities and entry port enclosure sealing</p> <p>2.4 Set up jointing machines and jigs for jointing</p> <p>2.5 Joint cable according to jointing sequence, materials, joint type, location, and client practices and manufacturer's guidelines and to meet service level agreements (SLAs)</p> <p>2.6 Test cable for performance and rectify any faults relating to cutover according to location, materials available and client practice</p> <p>2.7 Seal all joints according to cable type, location, and enterprise and manufacturer's guidelines</p>
3. Arrange cables and secure site	<p>3.1 Arrange cables in jointing chamber or cabinet according to client practices</p> <p>3.2 Recover obsolete materials and return to appropriate point for disposal</p> <p>3.3 Restore site according to client practices and other authority requirements</p>

ELEMENT	PERFORMANCE CRITERIA
4. Complete project documentation	<p>4.1 Complete reports on cutover installation, and design amendments to reflect existing cable layout, according to client practices</p> <p>4.2 Notify appropriate personnel of completion of cutover and obtain sign off</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets plans, specifications and other documentation from various sources Consolidates information to determine requirements Analyses test results and data from a range of sources against defined criteria and requirements
Writing	<ul style="list-style-type: none"> Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols Prepares documentation and correspondence using clear language and correct spelling and terminology
Oral Communication	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges using appropriate language, listening and questioning skills to convey and clarify information
Numeracy	<ul style="list-style-type: none"> Make calculations required for measuring and estimating materials for construction Performs mathematical calculations to check, interpret and confirm results of system tests
Navigate the world of work	<ul style="list-style-type: none"> Complies with policies, procedures and legislative requirements relevant to own role
Interact with others	<ul style="list-style-type: none"> Uses appropriate practices and protocols to communicate effectively with colleagues, clients and others
Get the work done	<ul style="list-style-type: none"> Plans, sequences and carries out tasks according to meet required outcomes Analyses task requirements to decide on appropriate equipment and practices Uses problem solving processes to address less predictable problems, referring to standard procedures

	to determine solutions

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- obtain and use information to prepare a plan to implement cutover tasks
- obtain all resources required to carry out cutover tasks
- implement plan including:
 - preparing jointing cabinets and chambers for cutover
 - preparing, entering and sealing new cables to large size joint enclosures
 - using jointing machines and jigs for jointing
 - conducting tests to determine success of cutover
 - interpreting results and rectifying faults occurring as a result of cutover
 - sealing joints and restoring alarms
- comply with all related health and safety requirements, client and work practices
- complete and store required project documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common cabling types, connectors and cabling structures
- use of colour for identification of cables

- legislation, codes of practice and other formal agreements that impact on the work activity
- equipment used for the work activity and the manufacturer's requirements for safe operation
- cutover of large size cable and client equipment
- health and safety concerns relevant to the work activity
- cable performance test requirements
- equipment, including operating requirements, used to test cable
- issues and challenges that occur on worksites, and how to address them
- warranties and service level agreements (SLAs).

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- systems and equipment required for cutover activities
- installation equipment currently used in industry
- regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL320 Jumper metallic conductor cable in the access network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to jumper metallic conductor cable in access network cabinets or exchange distribution frames. It applies to new or existing jumpering for upgrades or network cabling rearrangements for convergence to next generation networks (NGN).

It applies to linesworkers, technicians or jointers who carry out technical roles involving indoor and outdoor distribution frame jumpering. All jumpering in access network distribution cabinets must be conducted by workers who have been authorised by the network owner or carrier to undertake the work involved.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare cabinet and termination frame for	1.1 Arrange access according to customer and individual worksite requirements

ELEMENT	PERFORMANCE CRITERIA
jumpering	<p>1.2 Set up work site to ensure public safety and to comply with utility provider, local, state and commonwealth requirements</p> <p>1.3 Inspect site to develop work health and safety (WHS) plan and notify appropriate personnel of identified safety hazards</p> <p>1.4 Prepare for cable jumpering work observing client practices, cable type, termination systems, earthing and protection and relevant legislative requirements</p> <p>1.5 Select correct jumpering activities for installation according to client practices</p> <p>1.6 Identify remote power feeding services that operate at above telecommunications network voltage (TNV) and special services that terminate in the cabinet of housing</p> <p>1.7 Take necessary precautions to work safely with network voltages and minimise service disruption to special services</p> <p>1.8 Remove all contaminants from worksite that may adversely affect jumpering and prepare worksite to ensure adequate visibility to minimise errors and reduce eye strain</p> <p>1.9 Plan block locations following client practices within the frame and allow for capacity to expand jumpering where possible</p>
2. Jumper terminal blocks on frame	<p>2.1 Install terminating modules to frame according to manufacturer's specifications</p> <p>2.2 Set up jumpering reel near source terminal block and draw jumper through frame</p> <p>2.3 Terminate jumper to block and return, cut and terminate source end of jumper</p> <p>2.4 Identify and label jumpers according to client practices</p> <p>2.5 Install over-voltage protection devices to all cables with metallic component where required</p> <p>2.6 Earth cable shield to manufacturer's specifications and industry standards</p>
3. Test jumpering and seal closure	<p>3.1 Conduct visual inspection to confirm that jumper is not kinked or jammed</p> <p>3.2 Test termination to satisfy performance specifications and record results if required</p> <p>3.3 Close housing, seal and re-pressurise where necessary</p>
4. Complete records and restore site	<p>4.1 Update records and plans accurately with cabling details according to industry codes of practice and current Australian standards</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2 Remove installation waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions</p> <p>4.3 Notify appropriate personnel about completion of job and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.1, 2.4, 2.6, 3.2, 4.1	<ul style="list-style-type: none"> Interprets textual information from relevant sources to identify relevant and key information
Writing	1.3, 2.4, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete workplace documentation
Oral communication	1.1, 1.3, 4.3	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges using appropriate language, listening and questioning skills to convey and clarify information
Numeracy	1.4, 1.6, 2.1, 2.6, 3.2, 4.1	<ul style="list-style-type: none"> Takes readings and measurements and interprets results
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 1.7, 1.8, 2.5, 2.6, 4.1, 4.2	<ul style="list-style-type: none"> Complies with policies, procedures and legislative requirements relevant to own role
Interact with others	1.1, 1.3, 4.3	<ul style="list-style-type: none"> Identifies and follows accepted communication practices and protocols when liaising with clients, colleagues and others
Get the work done	1.1, 1.4, 1.5, 1.6, 1.9, 2.1, 3.1, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> Plans, sequences and carries out tasks to meet required outcomes Analyses task requirements to decide on appropriate equipment and practices

Assessment Requirements for ICTCBL320 Jumper metallic conductor cable in the access network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- plan and prepare for jumpering activity including:
 - arranging safe access to site
 - identifying special services and remote power feeds a
 - following appropriate procedures
- carry out jumpering activity including:
 - populate terminal frames with new terminal blocks where necessary
 - running jumpers through frame and terminate jumper to terminal blocks
 - using correct methods to terminate a range of jumpers
 - conducting tests and interpreting cable test results for several different types of lead-in faults
 - interpreting and applying relevant legislative requirements
- finalise jumpering activity including:
 - updating records and plans to show cable locations
 - restoring site to required condition
 - obtaining final sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the termination tools required for the work activity and explain how to operate them according to safety and manufacturer's guidelines
- describe the features and operating requirements of testing equipment

- describe the process used to install and maintain cabling products according to manufacturer's guidelines
- outline legislation, codes of practice and other formal agreements that impact on the work activity
- describe specific work health and safety requirements relating to the activity and site conditions
- explain termination methods and performance requirements for jumpering activity
- describe typical issues and challenges that occur on site and how to address them.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where metallic conductor cable may be terminated
- colour codes for visual inspections or wire-mappers for 4 pair cable tests
- regulatory and cabling documentation that impacts on cable terminating activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL401 Prepare design drawings and specification for a cable installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare design drawings and specification for indoor or outdoor, domestic, commercial or industrial cable installations for communications applications compliant with appropriate Australian Communications and Media Authority (ACMA) technical standards.

It applies to technical staff who prepare design drawings and specifications for digital and analog, telephony, data, video, digital broadcasting, computer networks, local area networks (LAN), wide area networks (WAN) and multimedia cable communication installations on a client's premises.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather information on existing and proposed	1.1 Confirm cable installation requirements with client 1.2 Inspect site to confirm building plans where possible

ELEMENT	PERFORMANCE CRITERIA
installation	1.3 Review existing cable plans and drawings
2. Determine installation options	2.1 Assess available installation options against client requirements and relevant legislation, codes, regulations and standards 2.2 Establish and assess cost of options against client's budget 2.3 Select most suitable option based on function and cost considerations, and present to client
3. Prepare suitable drawings	3.1 Prepare clear and accurate cable installation drawings indicating proposed outlets and services 3.2 Provide drawings to relevant parties and file copies for later reference according to company policies
4. Prepare cabling specifications	4.1 Prepare detailed cabling specifications for cabling system 4.2 Prepare accurate costing from detailed specification, including equipment and material required
5. Verify specifications with client	5.1 Verify prepared documentation with client 5.2 Obtain authorisation and sign off from client to proceed according to company policy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.3	<ul style="list-style-type: none"> Analyses complex documentation from a variety of sources Interprets and checks completeness and accuracy of information and data Evaluates information and products from a variety of sources to ensure appropriateness for client needs
Writing	1.1, 2.3, 3.1, 4.1, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> Writes, edits and proofreads plans and documents to ensure clarity of meaning, accuracy and consistency of information Records client information and completes organisational documents and correspondence using clear language and correct spelling, grammar and terminology

Oral Communication	1.1, 2.3, 5.1, 5.2	<ul style="list-style-type: none"> Use active listening and questioning to clarify requirements
Numeracy	1.2, 1.3, 2.1-2.3, 3.1, 4.1, 4.2	<ul style="list-style-type: none"> Performs mathematical calculations to check, interpret and confirm information for design specifications and drawings Makes calculations appropriate for measuring, estimating materials and costs
Navigate the world of work	2.1, 5.2	<ul style="list-style-type: none"> Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation on design parameters
Interact with others	1.1, 2.3, 3.2, 5.1, 5.2	<ul style="list-style-type: none"> Selects and uses appropriate communication practices with others
Get the work done	1.1, 1.2, 2.1, 2.3, 3.2	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities

Assessment Requirements for ICTCBL401 Prepare design drawings and specification for a cable installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine installation requirements and options
- produce schematic and floor plan drawings based on design parameters
- produce specifications based on design drawings
- verify design drawings and specifications with client
- produce a costing of the design and specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- recognise and apply the Australian Communications and Media Authority (ACMA) regulation requirements for Telecommunications Cabling Provider Rules in the design
- recognise and apply legislation, codes of practice and other formal resources that impact on the design
- recognise and apply industry recognised drafting principles and standards
- identify key features and operating requirements of resources and equipment required for the client cable installation
- identify and include the manufacturer's performance specifications for equipment and consumables in the design
- assess health and safety requirements relating to the design.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where cable installation may be conducted
- equipment currently used in industry
- relevant regulations, company policies and cabling specifications that impact on cable installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL403 Supervise cabling project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to supervise an indoor or outdoor, domestic, commercial or industrial communications cabling project. It requires planning, preparing financial budgets and monitoring cabling work. Communications applications include digital and analog, telephony, data, video, digital broadcasting, computer networks, local area networks (LAN), wide area networks (WAN) and multimedia.

It applies to technical staff who supervise a cabling project on a client's premises where technical and organisational skills are required to ensure an effective outcome for the client.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and organise cabling activities	1.1 Obtain cabling installation specifications and project specifications from client 1.2 Prepare work schedules and installation plans identifying key dates and milestones

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Organise resource requirements</p> <p>1.4 Verify location of proposed installation according to plans obtained from authorised personnel</p> <p>1.5 Obtain information on location of other services from relevant authorities</p> <p>1.6 Document plans for cabling project and advise relevant parties</p>
2. Prepare financial budgets	<p>2.1 Prepare budget identifying cost and expenditure items from scheduling and planning documentation</p> <p>2.2 Advise relevant personnel of purchasing and other delegations within budget allocations</p> <p>2.3 Prepare budget projections within estimated and approved contract pricing</p>
3. Source human resource requirements for cabling	<p>3.1 Estimate number and determine availability of suitable human resources according to contract requirements and relevant industrial and enterprise policy</p> <p>3.2 Establish necessary competency and licence requirements of project personnel prior to recruitment</p> <p>3.3 Schedule personnel workloads and allocate within industrial and enterprise requirements</p>
4. Monitor cabling works	<p>4.1 Follow work health and safety (WHS) processes and site-specific safety requirements according to plan</p> <p>4.2 Monitor compliance regularly with client specification, relevant legislation, codes, regulations and standards</p> <p>4.3 Notify client promptly on difficult or known problem areas</p> <p>4.4 Reallocate work as required to meet client and company requirements</p> <p>4.5 Monitor costs and time schedules to identify and resolve any potential problem</p> <p>4.6 Provide report on work progress activity and schedule</p>
5. Evaluate outcomes of cabling projects	<p>5.1 Review cabling projects to identify areas where performance has been below client and enterprise expectations</p> <p>5.2 Implement recommendations to ensure effective improvements</p>
6. Complete administrative tasks	<p>6.1 Complete documentation</p> <p>6.2 Notify client and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 2.1	<ul style="list-style-type: none"> Critically analyses complex documentation from a variety of sources Checks completeness and accuracy of information and data
Writing	1.2, 1.6, 2.1, 2.3, 3.3, 4.3, 4.6, 6.1, 6.2	<ul style="list-style-type: none"> Completes organisational documents and correspondence using clear language and correct spelling, grammar and terminology Documents outcomes and changes to schedules using industry relevant terminology and symbols Writes, edits and proofreads documents to ensure clarity of meaning, accuracy and consistency of information
Oral Communication	1.1, 1.6, 2.2, 4.3, 4.6, 6.2	<ul style="list-style-type: none"> Participates in verbal exchanges using collaborative and inclusive techniques including active listening and questioning to convey and clarify information Presents complex information using clear and convincing language, tone and pace appropriate for the audience and purpose
Numeracy	1.2-1.5, 2.1-2.3, 3.1, 3.3, 4.5	<ul style="list-style-type: none"> Interprets and manipulates numerical information relating to targets and timelines Make calculations appropriate for measuring and estimating materials for installation work Performs mathematical calculations to analyse labour, costs and quantities to accurately produce quotations and budgets
Navigate the world of work	3.1-3.3, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> Takes full responsibility for following policies, procedures and legislative requirements, and identifies the organisational implications of new legislation or regulation Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	1.1, 1.6, 2.2, 4.3, 6.2	<ul style="list-style-type: none"> Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships Collaborates with others, sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment Manages conflict in the workplace through the recognition

		of contributing factors and by implementing strategies to resolve conflict
Get the work done	1.2-1.6, 3.2, 4.2, 4.4, 4.5, 5.1, 5.2	<ul style="list-style-type: none">• Accepts responsibility for planning, sequencing and monitoring complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness• Responds to problems requiring immediate resolution, drawing on past experiences

Assessment Requirements for ICTCBL403 Supervise cabling project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- complete all appropriate plans and financial budgets for cabling activities
- supervise cabling project applying human resource policies, including awards and conditions and all related health and safety and work practices
- monitor and implement alternate plans where necessary to meet work schedules and client requirements
- complete a project report on a cabling project detailing recommendations for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe appropriate methods for scheduling, costing and managing labour and resources on a project
- recognise the requirements to safely operate equipment and install components according to a manufacturer's specification
- outline the health and safety standards and practices required to:
 - manage risk and hazards in the workplace
 - use health and safety standards
 - work systematically with required attention to detail without injury to self or others
- identify and describe legislation, codes of practice and other formal agreements that impact on the work activity
- identify typical issues and challenges that occur in scheduling and supervising a worksite
- outline the components of reports and identify the reasons for other documentation required when supervising a project.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- a site with a cabling project
- human resource policies, including awards, conditions and all related work health and safety (WHS) and work practices
- relevant regulatory and equipment documentation that impacts on monitoring activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL404 Test cable bearers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to test cable bearers. It involves setting up, testing and interpreting test results and determining appropriate action for all cable types (metallic, optical fibre and coaxial).

It applies to technicians and line installers whose work involves testing cable bearers for connections, signal strength or loss of cable links on client cable and service provider networks, in accordance with manufacturer's and design specifications.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare and set up for cable test	1.1 Obtain relevant legislation, codes, regulations and standards 1.2 Scope work by obtaining project plan from appropriate personnel and arrange for site access to comply with security arrangements 1.3 Notify appropriate personnel of identified safety hazards at worksite

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Determine type of cable bearer and cable route from project plan and identify test requirements using work instructions</p> <p>1.5 Obtain tools and safety equipment and material to perform tasks safely and efficiently</p> <p>1.6 Select and use required protective equipment and make site safe and secure for testing work</p> <p>1.7 Determine need for outage, extent, location and timing, if required, and negotiate with appropriate personnel</p> <p>1.8 Select and set up suitable test equipment according to manufacturer's specifications for cable tests to be performed to ensure relevance of test data</p> <p>1.9 Ensure equipment calibration certification is current to reduce possibility of unreliable test data and ensure traceability</p>
2. Perform cable tests	<p>2.1 Follow work health and safety (WHS) and environmental requirements for given work, and identify and avoid other services</p> <p>2.2 Determine and record cable parameters for consideration in assessment of performance</p> <p>2.3 Conduct performance tests as required by both equipment and enterprise specification for specific cable type and purpose</p>
3. Interpret test results and determine action	<p>3.1 Record test results for evaluation and compare against manufacturer's and site specifications</p> <p>3.2 Analyse test results and evaluate cable performance with consideration of recorded cable parameters</p> <p>3.3 Diagnose problems to determine cable faults and make arrangements for repairs or modifications</p> <p>3.4 Retest faulty cable after faults have been rectified</p>
4. Document test results and clean up site	<p>4.1 Produce evaluated test results according to enterprise guidelines and without delay to ensure test results remain current</p> <p>4.2 Update site and installation files to ensure traceability of information on system performance is maintained</p> <p>4.3 Archive test record details for life of cable according to enterprise guidelines</p> <p>4.4 Remove waste and debris from worksite and dispose of according to environmental requirements</p> <p>4.5 Notify appropriate personnel of job completion and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.6-1.9, 2.1, 3.1	<ul style="list-style-type: none"> Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness
Writing	1.2, 2.2, 3.1, 4.1, 4.2, 4.5	<ul style="list-style-type: none"> Records information and prepares correspondence and documentation using clear language and organisational formats and protocols Records information in organisational systems
Oral Communication	1.2, 1.3, 1.7, 3.3, 4.5	<ul style="list-style-type: none"> Conveys and clarifies information effectively to a range of personnel using active listening, questioning and reading of verbal and non-verbal signals Presents complex information in formal situations using clear and convincing language, tone and pace appropriate for the audience and purpose
Numeracy	2.3, 3.1-3.4, 4.1	<ul style="list-style-type: none"> Performs mathematical calculations to check, analyse, interpret and confirm results of system tests
Navigate the world of work	1.1, 1.4, 2.1, 2.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Takes full responsibility for following policies and procedures Identifies and resolves key variations to standard procedures identified from conducting tests
Interact with others	1.2, 1.3, 1.7, 4.5	<ul style="list-style-type: none"> Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers
Get the work done	1.2, 1.4-1.9, 2.1-2.3, 3.1, 3.3, 3.4, 4.1-4.4	<ul style="list-style-type: none"> Plans and sequences complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables including the outcomes of previous tests Applies systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for ICTCBL404 Test cable bearers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- perform tests on cable bearers
- use a range of tests
- interpret test results
- rectify a range of faults
- report on the completed tests
- comply with all related health and safety requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the features, operation and specifications of test equipment
- identify a range of tests performed on cable bearers
- describe codes of practice and standard procedures that apply to cable bearers
- list common cable bearer faults and describe how to rectify them
- specify health and safety requirements relating to use and operation of test equipment
- outline the components of reports and identify the reasons for other documentation required when conducting tests.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where testing may be conducted

- cabling and equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on testing cable bearers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCBL405 Remotely locate and identify cable network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to remotely locate and identify cable network faults in voice, video and data telecommunications applications using metallic and optical fibre cables.

It applies to technicians who are required to locate telecommunications cable faults in access networks. This may be done at a centralised testing office and make use of computer test routines and databases.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Telecommunications – cabling

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Verify fault report	1.1 Locate source of fault using available information and contacts to verify nature of fault as reported 1.2 Perform preliminary operational testing according to type of fault presentation, fault environment and enterprise guidelines to verify nature of fault

ELEMENT	PERFORMANCE CRITERIA
	1.3 Analyse historical data to identify possible causes and solutions
2. Conduct remote testing to diagnose network fault	2.1 Evaluate cable fault details and plan strategy to conduct remote testing 2.2 Conduct appropriate remote diagnostic test to isolate and diagnose network fault 2.3 Determine urgency and impact of fault and identify required response time frame 2.4 Evaluate diagnostic tests to determine type, location and nature of network fault
3. Dispatch fault-finding field personnel	3.1 Prepare fault report and forward to appropriate staff according to enterprise guidelines 3.2 Notify fault centre and arrange for dispatch of technician to rectify fault 3.3 Notify client of fault progress and arrange for fault clearance time

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 2.4	<ul style="list-style-type: none"> Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness
Writing	2.1, 3.1-3.3	<ul style="list-style-type: none"> Prepares a range of textual information appropriate for the audience and for informal and formal purposes
Oral Communication	1.1, 3.1-3.3	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges, using active listening and questioning, to convey and clarify information
Numeracy	1.2, 1.3, 2.2-2.4	<ul style="list-style-type: none"> Takes measurements and performs mathematical calculations to check, interpret and confirm results of system tests
Navigate the world of work	1.2	<ul style="list-style-type: none"> Takes full responsibility for following policies, procedures and legislative requirements

Interact with others	1.1, 3.1-3.3	<ul style="list-style-type: none">• Collaborates with and implements strategies for a diverse range of colleagues and clients to build rapport, foster strong relationships and achieve outcomes
Get the work done	1.1-1.3, 2.1-2.4, 3.3	<ul style="list-style-type: none">• Plans and sequences complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness• Applies systematic and analytical decision making processes for complex and non-routine situations• Uses digital technologies and systems to access information, research and diagnose faults

Assessment Requirements for ICTCBL405 Remotely locate and identify cable network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- methodically approach fault identification
- conduct tests appropriate to the type of fault identified
- interpret test results
- provide instructions to staff engaged in on-site repair.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the features and operating requirements of test equipment
- identify appropriate tests to be performed
- describe the legislation, codes of practice and standard procedures for cable network faults
- specify health and safety requirements relating to fault finding in cable networks
- identify typical issues and challenges that occur when performing remote tests and fault finding.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where remote investigation of cable network faults may be conducted
- fault-finding equipment currently used in industry
- relevant documentation that impacts on cable network and fault-finding activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTCMP201 Organise and monitor cabling to ensure compliance with regulatory and industry standards

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to organise teams undertaking cabling work on all cable types, and to ensure compliance with regulatory and industry standards.

It applies to technical staff supervising teams within a customer premises and ensuring compliance with the Australian Communications and Media Authority (ACMA) and industry standards. They may make use of formal documentation, such as accurate completion of a telecommunications cabling advice (TCA) form (TCA1 form), test routines and databases.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Compliance

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise cabling work activity	1.1 Arrange access to site according to required procedure 1.2 Make worksite safe by identifying and controlling hazards 1.3 Review site plans and documentation

	<p>1.4 Organise supply of cable, equipment, tools and materials in line with customer and manufacturer's specifications</p> <p>1.5 Schedule and allocate work</p> <p>1.6 Establish communication protocols and processes</p>
2. Monitor work activity	<p>2.1 Manage remote power feed following workplace health and safety (WHS) and environmental requirements</p> <p>2.2 Monitor work activity to ensure it meets site specifications, enterprise requirements, and relevant legislation, codes, regulations and standards</p> <p>2.3 Reallocate work as needed</p>
3. Complete records and obtain sign off	<p>3.1 Complete required records</p> <p>3.2 Ensure installation waste and debris is removed from worksite and disposed of according to environmental requirements to maintain safe worksite conditions</p> <p>3.3 Ensure site is reinstated according to customer and company requirements</p> <p>3.4 Notify customer and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 3.3	<ul style="list-style-type: none"> Reads and interprets plans, specifications and other documentation from a variety of sources and consolidates information to determine requirements
Writing	1.1, 1.6, 3.1, 3.4	<ul style="list-style-type: none"> Prepares workplace documentation and correspondence using clear language, correct spelling and accurate terminology
Oral Communication	1.1, 1.6, 3.4	<ul style="list-style-type: none"> Uses everyday language to provide information or maintain a conversation in familiar spoken contexts
Numeracy	1.3, 2.2	<ul style="list-style-type: none"> Makes calculations appropriate for measuring and estimating materials
Navigate the world of work	1.1, 1.6, 2.1, 2.2, 3.2, 3.3	<ul style="list-style-type: none"> Follows clear instructions within defined level of responsibility Recognises organisational expectations and follows explicit protocols and procedures

		<ul style="list-style-type: none"> Seeks clarification when required
Interact with others	1.6, 2.3, 3.4	<ul style="list-style-type: none"> Follows instructions regarding what and how to communicate following predetermined scripts Recognises common differences in other people and implements basic strategies to address own reaction to these differences
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1-2.3, 3.2, 3.3	<ul style="list-style-type: none"> Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary Responds to highly obvious routine problems using step-by-step instruction and procedures or a trial and error process for non-critical situations Uses digital technologies following strict instructions to enter and retrieve data

Assessment Requirements for ICTCMP201 Organise and monitor cabling to ensure compliance with regulatory and industry standards

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- organise, schedule and establish communication protocols for cabling work
- monitor work activity and reallocate as required to meet specifications, work health and safety (WHS) and ensure compliance with relevant regulations and standards
- ensure cabling work is completed and records are maintained.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete unit requirements safely and effectively, the individual must:

- describe and explain Australian Communications and Media Authority's (ACMA) Competency Requirements for Telecommunications Cabling Provider Rules, legislation, codes of practice and other formal agreements that impact work activity
- describe and explain cable installations
- list features and operating requirements of test equipment
- describe and explain information required to operate equipment according to a test specification
- explain manufacturer's requirements for safe operation of equipment
- identify specific work health and safety (WHS) requirements relating to activity and site conditions
- describe test methods and performance requirements
- identify and explain typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Compliance field of work and include access to:

- sites where staff monitoring may be required
- supervision rules
- use of tools, materials and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Note: Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Refer to the ICT Implementation Guide Companion Volume for recommended assessor details.

ICTDBS407 Monitor physical database implementation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake database-management system modelling and to monitor database performance.

It applies to database support staff required to test and scrutinise the operation of a physical database, in order to ensure that it functions as efficiently as possible.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Database

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Undertake database management system modelling	1.1 Review the database prototype as appropriate, to determine the acceptance criteria and performance standards 1.2 Load the test data according to the technical sequence detailed in the relevant documentation 1.3 Generate a test schedule for the database, of tasks to be performed and the results expected
2. Monitor database performance	2.1 Evaluate database performance against the acceptance criteria and performance standards

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify discrepancies in the results, when the expected outcomes do not meet the acceptance criteria 2.3 Identify areas needing enhancement, and document the changes to be made 2.4 Modify the database according to project standards 2.5 Repeat performance testing until the expected results are achieved
3. Seek client feedback and sign-off	3.1 Present test results in a document, and provide to the client for feedback 3.2 Incorporate client change requests as appropriate 3.3 Obtain client sign-off to the monitoring process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1-2.3, 3.2	<ul style="list-style-type: none"> Analyses and interprets textual information to establish performance requirements and discrepancies
Writing	1.3, 2.3, 3.1	<ul style="list-style-type: none"> Uses appropriate language, layout and format in logically presenting technical data and other information
Oral Communication	1.1, 3.1-3.3	<ul style="list-style-type: none"> Listens, and participates, in oral exchanges in order to effectively identify and confirm requirements Presents information using appropriate and effective language in order to convey information
Get the work done	1.1-1.3, 2.1-2.5	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation, and manages relevant communication Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against the agreed criteria Applies key principles and concepts underpinning the design and operation of digital systems, and tools

Assessment Requirements for ICTDBS407 Monitor physical database implementation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify technical considerations affecting the implementation of a database
- analyse and monitor performance issues during the implementation of a database
- modify a database to meet project and client performance requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain
- list current industry-accepted hardware and software products
- describe requirements of basic database design
- identify required database performance standards
- outline quality assurance practices
- outline testing and benchmarking processes
- list three or more current principles of databases.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the database field of work, and include access to:

- industry software packages
- the database management system (DBMS)
- the target database prototype

- testing and benchmarking software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTDBS413 Determine database requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to identify the scope and the physical and security requirements of a database, including the assessment and identification of options to meet user requirements.

It applies to individuals employed as database administrators who are required to plan and select a database to meet user requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Database

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the database size	1.1 Determine the database scope from the user requirements 1.2 Calculate the database size from the database scope and technical specifications. 1.3 Document and justify the size and scope of the database
2. Develop the technical database requirements	2.1 Design and document the data tables and relationships suitable to the user requirements and data sample 2.2 Develop and document the data dictionary, table attributes and

	<p>keys suitable to the user requirements</p> <p>2.3 Determine and document the database reports required by the user requirements and user acceptance criteria</p>
3. Determine security, performance, recovery and audit requirements	<p>3.1 Determine and document database security controls appropriate for the user requirements and the organisational data security plan</p> <p>3.2 Determine and document database performance, database recovery and database audit requirements to meet the user requirements and the organisational data security plan</p>
4. Seek client feedback and approval	<p>4.1 Evaluate and document database management systems against the database scope and size, technical database requirements, and security, performance, recovery and audit requirements to determine the appropriate option for the user</p> <p>4.2 Present database scope and size, technical database requirements, and security, performance, recovery and audit requirements documentation to the user for feedback</p> <p>4.3 Review user feedback and adjust the database documentation to meet the user acceptance criteria and user feedback</p> <p>4.4 Present database documentation to the user for final approval</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets and analyses textual information in order to gather detailed information, and confirm requirements
Numeracy	<ul style="list-style-type: none"> Extracts and calculates numerical information from textual and numerical information to determine and confirm requirements
Writing	<ul style="list-style-type: none"> Uses technically appropriate language and presents information in a format and layout that conveys factual information
Oral Communication	<ul style="list-style-type: none"> Uses active listening, questioning and summarising skills, in order to effectively identify, and confirm, requirements
Get the work done	<ul style="list-style-type: none"> Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying, and evaluating options against the agreed criteria Applies formal problem-solving processes when tackling an

	unfamiliar problem, breaking complex issues into manageable parts, identifying, and evaluating several options for action <ul style="list-style-type: none"> • Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when identifying database scope and requirements
--	--

Assessment Requirements for ICTDBS413 Determine database requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For one database:
 - analyse user requirements and system architecture
 - determine the scope and size of the database
 - evaluate at least three database management systems and select option to meet user requirements
 - develop technical database requirements including tables, relationships, dictionary, attributes and keys
 - document the database scope and requirements
 - align database management system and related user security with data security plan
 - seek and incorporate user feedback
 -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Principles of databases and database design
- General features and capabilities of current databases and database management systems
- Data types and storage requirements of data types and database management systems
- Quality assurance practices that apply to database design
- Technical and security database requirements

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- User requirements and acceptance criteria
- Technical documentation defining the system architecture
- Operating system specifications and security plan
- Database supplier technical specifications and manuals
- Data sample
- Individual user to consult
- Database package

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTDBS414 Complete database backup and restore

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to establish database backup and restore procedures in accordance with organisational requirements, and consistent with the database architecture.

It applies to individuals who are technical support personnel, such as help desk supervisors, information and communications technology (ICT) support technicians, database support technicians and user-support specialists.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Database

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan database backup and restore	1.1 Examine architecture of database file systems and determine likely risk and failure scenarios 1.2 Determine methods for database backup and restore to mitigate likely risk and failure scenarios 1.3 Prepare backup maintenance schedules according to organisational backup and restore policy 1.4 Prepare contingency plans according to organisational

	backup and restore policy
2. Undertake backup methods appropriate to database requirements	<p>2.1 Complete full off-line backups with acceptable downtime according to organisational backup and restore policy and procedure</p> <p>2.2 Complete online file backups with acceptable downtime according to organisational backup and restore policy and procedure and organisational data security plan</p> <p>2.3 Deploy redundant array of inexpensive disks (RAID) configuration aligned with the organisational backup and restore policy</p> <p>2.4 Arrange off-site copies of backup files consistent with organisational back and restore procedure and organisational data protection plan</p>
3. Establish and test recovery points and disaster-recovery procedures	<p>3.1 Determine and document database recovery points based on backup methods, according to organisational backup and restore policy and procedure</p> <p>3.2 Test restore process to ensure database can be restored to given recovery points with acceptable down time as specified in organisational backup and restore policy</p> <p>3.3 Complete and document restoration of databases to point of failure, without loss of committed transactions</p>
4. Create and deploy a standby database	<p>4.1 Create and deploy standby databases to support critical organisational functions according to organisational back and restore policy and procedure</p> <p>4.2 Prepare documentation for standby databases that meet requirements of organisational backup and restore policy</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses complex textual information in order to evaluate a range of backup and restoration methods
Numeracy	<ul style="list-style-type: none"> Interprets mathematical information in order to construct date and time based schedules Extracts and calculates numerical information from textual and numerical information to determine and confirm requirements

Writing	<ul style="list-style-type: none"> • Uses technically specific language in developing plans, schedules and documentation • Articulates information, and presents this information, in a clear, concise, sequential and grammatically-correct manner, and in a writing style that is appropriate to the audience
Oral Communication	<ul style="list-style-type: none"> • Facilitates successful discussions by employing effective listening, questioning and summarising skills to ensure that appropriate information is gathered
Navigate the world of work	<ul style="list-style-type: none"> • Recognises and follows, both explicit and implicit protocols, and meets expectations associated with own role when complying with organisational and security standards, and guidelines
Get the work done	<ul style="list-style-type: none"> • Takes responsibility for planning, sequencing and prioritising tasks, and own workload for efficiency, and for effective outcomes • Makes routine decisions, and implements standard procedures, for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response to these, applying problem-solving processes in determining a solution • Uses familiar digital technologies and systems to access information, search and enter data, and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTDBS414 Complete database backup and restore

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Backup and restore one database
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Principles and functions of diagnostic tools, structured query language (SQL), databases and backup tuning methodologies
- Principles of backup and recovery methods, database administration, database security and open file backup procedures and restore operations
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT workplace or working environment. This includes:

- Organisational data backup and restore policy and procedure
- Organisational security plan
- Vendor documentation
- Information of current industry standard software and diagnostic tools
- Database package with data
- Server, and a networked computer, on which to conduct the backup and restore procedures

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTDBS415 Build a database

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to build, implement, test and evaluate a database using an established design.

It applies to individuals employed as database administrators and designers who are required to build databases for information storage and retrieval requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Database

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm the database design	1.1 Review database design documentation, including data structures, queries, reports, and user interfaces to identify organisational data management, access and security requirements 1.2 Evaluate sufficiency of database access and security feature design to organisational data security plan 1.3 Document and rectify inconsistencies between database design and organisational data security plan
2. Create a prototype	2.1 Develop prototype database according to database design

database	<p>2.2 Populate database tables with current organisational data to test database implementation</p> <p>2.3 Write conversion programs to import data from existing systems in accordance with scope specified in database design documentation</p> <p>2.4 Assess functionality of prototype with user, including identifying errors in program code and modifying user interfaces and reports</p> <p>2.5 Incorporate feedback from user into prototype</p> <p>2.6 Obtain user approval of prototype</p>
3. Deploy the database	<p>3.1 Develop implementation plan for database aligned with user acceptance criteria</p> <p>3.2 Install database management system software on network in accordance with implementation plan</p> <p>3.3 Populate database tables with organisational data in accordance with implementation plan</p> <p>3.4 Implement security and access controls in accordance with database design documentation and implementation plan</p> <p>3.5 Test and document database output and security controls, and record results in accordance with database design documentation</p>
4. Evaluate the database	<p>4.1 Review the database against user acceptance criteria and rectify discrepancies</p> <p>4.2 Complete database documentation in accordance with user acceptance criteria</p> <p>4.3 Identify and document user training requirements from database design documentation</p> <p>4.4 Seek and secure user acceptance of database in accordance with user acceptance criteria</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses and interprets textual information in order to establish client system requirements and establish design inconsistencies

Writing	<ul style="list-style-type: none"> • Uses appropriate technical terminology in recording test results and discrepancies • Produces reports and documentation that are cohesive and well-structured, in order to convey detailed and accurate information, and instructions
Oral Communication	<ul style="list-style-type: none"> • Uses active listening, questioning and summarising skills to establish client requirements, training needs and when seeking product or stage approval
Interact with others	<ul style="list-style-type: none"> • Recognises and applies the protocols governing what to communicate, with whom, and how
Get the work done	<ul style="list-style-type: none"> • Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses a formal decision-making process, setting or clarifying goals, gathering information, and identifying and evaluating several choices, against a limited set of criteria • Uses analytical processes to decide on a course of action, establishing criteria for deciding between different options

Assessment Requirements for ICTDBS415 Build a database

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in elements and performance criteria of this unit; including evidence of the ability to:

- For one database:
 - review the database design documentation including data structures, queries, reports, access, and user interface
 - identify the organisation's data management and security requirements
 - produce a prototype database including current organisation data and assess the functionality of the database with the user
 - populate and perform tests on the database
 - interact with the user to obtain approval
 - identify and document user training requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Principles of database design including database management system (DBMS) fundamentals
- Functions and features of a database
- Logical data modelling
- Object-model design concepts related to:
 - development of data structures
 - development of a prototype
 - queries
 - user interfaces
 - reports
- Physical design concepts in relation to a prototype
- Run-time facilities related to implementing a live database and operation of a prototype
- Structured query language (SQL)

- Principles and concepts underpinning the design, and operation of digital systems and tools.
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Software packages and systems containing organisational data
- Database design documentation including data structure, queries, reports, and user interfaces
- Database management system software
- Individual user to consult
- User acceptance criteria
- Networked computer on which to install the database management system software and conduct testing
- Organisational data security plan.
- Data organisation system with existing data

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTDBS503 Create a data warehouse

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design, develop and implement a data warehouse within an organisation.

It applies to individuals who are senior database staff required to provide data warehouse functionality for their organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Database

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify the required data and sources	<p>1.1 Identify the required organisational data, according to the enterprise's knowledge management strategy</p> <p>1.2 Identify the subject areas, according to the business processes and the required enterprise data</p> <p>1.3 Explore the operational data, define the warehouse sources, and record the outcomes</p> <p>1.4 Develop the warehouse source specifications, according to the existing data tables and files</p>

ELEMENT	PERFORMANCE CRITERIA
2. Determine warehouse operational steps and processes	2.1 Develop the warehouse targets, according to the business processes and the required enterprise data 2.2 Identify the warehouse agents, according to the system's configuration 2.3 Identify and develop, warehouse steps and processes
3. Design and develop warehouse features	3.1 Design and develop the warehouse user interface, according to the principles of user interface design 3.2 Develop and implement the warehouse security strategy, according to the enterprise's security plan 3.3 Identify dimension tables and fact tables, according to the required enterprise data 3.4 Develop the warehouse information catalogue, according to the enterprise's knowledge management strategy
4. Test and implement the data warehouse	4.1 Test data the warehouse against the business requirements, to ensure that iterations meet the business objectives 4.2 Recommend changes to business processes, to ensure compatibility with the data warehouse and the knowledge management strategy 4.3 Implement the data warehouse 4.4 Establish an ongoing maintenance schedule to keep the system efficient 4.5 Benchmark and document the performance level of the data warehouse
5. Finalise work processes	5.1 Arrange for users to have ongoing training in the data warehouse 5.2 Validate the test results 5.3 Obtain sign-off for the data warehouse

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1-1.4, 2.2, 2.3, 3.3, 4.5, 5.2	<ul style="list-style-type: none"> Critically analyses documentation from a variety of sources and records, and consolidates, information to determine requirements
Writing	1.3, 2.1, 2.3, 3.1, 3.2, 3.4, 4.2, 4.4, 4.5, 2.2, 5.3	<ul style="list-style-type: none"> Collates and compiles data and text, using clear and detailed language, in order to convey specific information, requirements and recommendations
Oral Communication	1.1-1.3, 2.1, 2.3, 4.2, 4.3, 5.1-5.3	<ul style="list-style-type: none"> Uses effective listening, questioning and summarising skills, to articulate requirements and convey information clearly
Numeracy	4.5	<ul style="list-style-type: none"> Perform mathematical calculations to analyse the cost benefit of the data warehouse project
Navigate the world of work	3.2, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Recognises and follows, explicit and implicit protocols, and meets the expectations associated with own role when obtaining sign-off for the data warehouse Modifies or develops organisational policies and procedures, to comply with legislative requirements and organisational goals
Get the work done	All	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks, with an awareness of how they may contribute to the longer-term operational and strategic goals Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options, against the agreed criteria Uses and investigates new digital technologies and applications to manage and manipulate data, and to communicate effectively with others, in a secure and stable digital environment

Assessment Requirements for ICTDBS503 Create a data warehouse

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare the specifications for a data warehouse, from a range of organisational information
- design a data warehouse system that reflects the current, and future, business specifications, and also the business's knowledge management strategy
- test the data warehouse system
- implement the data warehouse design.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the functions and features of:
 - data warehousing and data mining
 - dimension tables and fact tables
 - various steps and processes, including transformer steps, program steps, structured query language (SQL) steps, and user-defined program steps
 - subject areas, warehouse sources and warehouse targets
 - warehouse agents and agent sites
- outline the business operating systems related to the data sources
- describe the decision support systems related to the knowledge management strategies
- define the parameters for a security plan
- outline the system's configuration parameters
- describe the key features of "Big Data" including:
 - data access speeds and processing

- the information handled by large corporations
- distribution, via the cloud, across the database servers.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the database field of work, and include access to:

- equipment and materials
- industry software packages
- the business requirements
- computers configurable as information servers
- the enterprise's knowledge management strategy
- internet connectivity tools
- the local area network (LAN), with a relational database management system (DBMS)
- proxy server software
- specialised internet security software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTDRE302 Locate and rectify digital reception equipment faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to locate and rectify all types of customer digital reception equipment (DRE) faults on a customer premises as part of a home network.

It applies to individuals who install and maintain integrated services in digital receiving equipment or small business networks, and who apply skills and knowledge in this unit to locate and rectify faults of DRE home networks such as broadband, digital TV, free to air (FTA), subscription TV (pay TV) and internet protocol TV (IPTV).

No licensing, legislative or certification requirements apply at the time of publication.

Unit Sector

Telecommunications – Digital Reception Technology

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for DRE fault identification	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Notify customer to verify fault report and arrange for site access to comply with security arrangements 1.3 Notify supervisor of identified safety hazards at worksite and complete a

ELEMENT	PERFORMANCE CRITERIA
	job safety analysis (JSA) before commencing work 1.4 Identify existing warranties, service agreements and equipment specifications and documentation covering digital reception equipment 1.5 Select and obtain tools and materials appropriate for the work order
2. Assess likely cause and location of fault	2.1 Verify system details to assist with fault identification 2.2 Assess available data and historical trends to determine likelihood of fault being the set top fault or existing customer equipment or cabling fault 2.3 Rank likely causes of fault in order of probability ensuring a methodical approach to fault-finding is used 2.4 Discuss problem fully with customer and advise of likely charges
3. Perform tests to diagnose fault	3.1 Conduct visual inspection of system for likely damage following work health and safety (WHS) and environmental requirements 3.2 Check connections, plugs, terminations and leads for operation 3.3 Measure signal strength at wall plate and beyond to ensure adequate signal level for equipment processing 3.4 Conduct functional test of facilities to identify faulty equipment 3.5 Progressively isolate fault to remove likely variables from assessment using manufacturer's diagnostic chart 3.6 Locate fault with minimal disruption to client activity, in the shortest possible time 3.7 Provide customer with regular progress reports
4. Rectify faults	4.1 Identify faulty cabling parts and equipment and replace or repair according to service agreement 4.2 Advise customer of cost of repair if service agreement does not exist 4.3 Re-program equipment to customer requirements if required 4.4 Complete work in a manner safe to repairer and customer
5. Provide replacement service to customer	5.1 Provide customer with temporary replacement equipment similar to existing equipment while faulty equipment is being repaired 5.2 Program replacement equipment to customer requirements 5.3 Test replacement service for functionality before handover – to meet customer satisfaction
6. Clean up worksite and complete	6.1 Remove waste and debris from site and dispose of in a safe and environmentally appropriate manner 6.2 Restore site to original condition and customer satisfaction

ELEMENT	PERFORMANCE CRITERIA
documentation	<p>6.3 Prepare invoices and other financial documentation, where required, and present to customer</p> <p>6.4 Obtain authorised signatures on required documentation to confirm acceptance of completed work</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.1	<ul style="list-style-type: none"> Interprets textual information from relevant sources to identify key information
Writing	1.3, 3.3, 3.5, 6.3,	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to complete workplace documentation
Oral Communication	1.2, 2.4,	<ul style="list-style-type: none"> Articulates clearly using appropriate language for environment and uses listening techniques to confirm understanding
Numeracy	3.3	<ul style="list-style-type: none"> Takes readings and measurements and interprets results
Navigate the world of work	1.1, 1.5, 5.1, 6.1-6.4	<ul style="list-style-type: none"> Takes responsibility for following safe, sustainable, appropriate and efficient workplace procedures
Interact with others	4.2, 6.4	<ul style="list-style-type: none"> Deals with customer to provide reports and sign-off on completed work
Get the work done	2.1-2.3, 4.1, 4.3, 4.4, 5.2, 5.3,	<ul style="list-style-type: none"> Plans, organises and implements tasks efficiently to meet customer requirements

Assessment Requirements for ICTDRE302 Locate and rectify digital reception equipment faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine parameters for addressing digital reception faults for a customer and keep customer informed on progress
- apply a methodical approach to fault identification
- use test equipment to identify faults
- interpret test results
- install temporary equipment while repairs are affected
- repair faults, repair cable terminations or replace faulty cable equipment and test to verify correct function
- complete documentation in accordance with enterprise requirements and present to customer for approvals.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss broad knowledge of whole industry product range
- outline customer service principles, particularly dealing with customers face to face
- explain enterprise methods for test analysis and diagnosis
- discuss enterprise or service specific knowledge of products and services supplied
- review work health and safety (WHS) general principles and enterprise specific job safety analysis (JSA) requirements
- give an overview knowledge of:
 - objectives and methods of training for product use for customer education
 - radio frequency (RF) theory, principles and safety

- telephony principles to support return path awareness
- identify pre-installation enterprise-specific requirements
- state quality assurance of enterprise requirements
- explain return path technology
- list signal measurement and other enterprise-specific tools
- discuss understanding of contemporary equipment and connection methods.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Digital Reception Technology industry and include access to:

- site for digital reception equipment installation
- digital reception equipment currently used in industry
- test equipment required for digital reception equipment installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTDRE303 Install a complex digital reception system

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design, install, test and commission a complex digital reception broadband service system.

It applies to individuals who work on complex radio frequency (RF) and digital distribution systems, such as master antenna television (MATV) and satellite master antenna television (SMATV), in commercial or multi-dwelling unit (MDU) environments.

No licensing, legislative or certification requirements apply at the time of publication.

Unit Sector

Telecommunications – Digital Reception Technology

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan installation of a complex digital reception system	1.1 Notify customer to arrange access to site and identify customer equipment 1.2 Select type of complex digital systems and consequent constraints on installation according to customer specifications 1.3 Complete a job safety analysis (JSA) identifying work health and

ELEMENT	PERFORMANCE CRITERIA
	<p>safety (WHS) issues</p> <p>1.4 Prepare for installation according to relevant legislation, codes, regulations and standards</p> <p>1.5 Verify design requirements are suitable for site application and required system performance</p>
2. Assemble complex digital reception system	<p>2.1 Select and obtain materials, tools and equipment for installation</p> <p>2.2 Select suitable headend location and cable access</p> <p>2.3 Build headend according to design requirements and manufacturer's specifications</p> <p>2.4 Configure headend and distribution devices to operate according to design and manufacturer's specifications</p> <p>2.5 Run cables along identified routes</p> <p>2.6 Terminate cables according to both design and manufacturer's specifications</p>
3. Test and commission system	<p>3.1 Conduct performance test operation of headend and distribution devices</p> <p>3.2 Activate system and conduct signal measurement using test equipment</p> <p>3.3 Record and analyse initial test results for quality of service according to design specifications</p> <p>3.4 Rectify identified faults and adjust system to optimal operation</p> <p>3.5 Conduct final signal measurement using test equipment to optimise performance</p> <p>3.6 Update design plans to 'as built' status</p>
4. Complete administrative tasks	<p>4.1 Record final commissioning test results and settings in line with client requirements</p> <p>4.2 Complete appropriate records and test results, and store according to policy</p> <p>4.3 Complete all financial and other documentation</p> <p>4.4 Hand over to customer and obtain sign off</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets textual information from relevant sources to identify relevant and key information
Writing	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete workplace documentation
Oral Communication	<ul style="list-style-type: none"> Articulates clearly using appropriate language for environment and uses listening techniques to confirm understanding
Numeracy	<ul style="list-style-type: none"> Takes readings and measurements and interprets results
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following safe, sustainable, appropriate, and efficient workplace procedures
Interact with others	<ul style="list-style-type: none"> Makes contact with customer Deals with customer to obtain sign-off on completed work

Assessment Requirements for ICTDRE303 Install a complex digital reception system

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- obtain relevant approvals for access to site and equipment
- plan, assemble and install a complex digital reception system
- conduct functionality tests and interpret results
- examine performance of adjustments (tuning, balancing and replacing components)
- perform handover with customer
- apply related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- procedures and equipment required for measurement of:
 - forward and reflected radio frequency (RF) power
 - feedline insertion loss
 - distance to fault
 - modulation error rate (MER) and bit error rate (BER) for purpose of signal integrity
- features of instruments, test equipment and performance requirements
- legislation, codes of practice and other formal agreements directly impacting operation and testing of radio communications antennas and equipment

- principles of master antenna television (MATV) and satellite master antenna television (SMATV)
- RF spectrum and its relationship to digital reception systems
- RF awareness, electromagnetic radiation (EMR) standards and specific WHS requirements impacting use and testing of radio communications instruments and equipment
- typical issues and challenges that occur in telecommunications antenna installations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- site for complex digital reception system installation
- complex digital reception systems currently used in industry
- test equipment required for digital reception system installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTDRE401 Integrate customer digital reception equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to integrate emerging audiovisual technology equipment in a customer home network.

It applies to individuals working as installers with a range of customer equipment limited to radio frequency (RF) signal services types requiring current knowledge of equipment capabilities and connection types.

No licensing, legislative or certification requirements apply at the time of publication. However, users should confirm requirements with the relevant federal, state or territory authority.

Unit Sector

Telecommunications – Digital Reception Technology

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate existing customer equipment	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Notify customer to verify installation order and arrange for site access to comply with security arrangements 1.3 Notify supervisor of identified safety hazards at worksite and complete a job safety analysis (JSA) before commencing work

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Use test equipment to verify customer equipment is operational prior to installation</p> <p>1.5 Assess equipment capabilities and connection types against customer requirements for suitability</p> <p>1.6 Assess customer premises against installation plan according to client specifications and by-laws, standards and regulations</p> <p>1.7 Produce an installation diagram using appropriate drawing symbols to indicate connection details of customer system</p>
2. Design and build system	<p>2.1 Determine connection pathways for optimal performance of system equipment</p> <p>2.2 Confirm compatibility for proposed connections to existing system</p> <p>2.3 Produce a final design with block diagrams and specifications</p> <p>2.4 Select and connect cables to suit connectivity using appropriate materials</p> <p>2.5 Activate equipment to check for network operation</p>
3. Provide enterprise equipment	<p>3.1 Determine best method of connection to service source according to client specifications</p> <p>3.2 Connect service to system following work health and safety (WHS) and environmental requirements and test to verify connection status</p> <p>3.3 Notify service provider if identified problems cannot be rectified at local level</p>
4. Configure services and optimise customer system	<p>4.1 Conduct client specific and customer set-up operations</p> <p>4.2 Test performance of enterprise and customer equipment across a range of settings</p> <p>4.3 Record and evaluate test results to satisfy manufacturer's operational margins</p> <p>4.4 Tune customer equipment for optimal performance</p> <p>4.5 Restore site to original condition and customer satisfaction</p>
5. Train customer and complete contract documentation	<p>5.1 Conduct customer training appropriate to equipment, services and vendor literature</p> <p>5.2 Complete appropriate records and update administration systems according to enterprise policy</p> <p>5.3 Record and store test results in appropriate database, leaving copies on site according to enterprise policy</p> <p>5.4 Provide warranties to customer in required format where work and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>equipment are subject to warranty</p> <p>5.5 Prepare invoices and other financial documentation, where required, and present to customer</p> <p>5.6 Obtain authorised signatures on required documentation to confirm acceptance of completed work</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 5.1, 5.3	<ul style="list-style-type: none"> Interprets textual information from relevant sources to identify key information
Writing	1.7, 2.3, 4.3, 5.3, 5.5	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to complete workplace documentation
Oral Communication	1.2, 1.3, 5.1	<ul style="list-style-type: none"> Articulates clearly using appropriate language for environment and uses listening techniques to confirm understanding
Numeracy	4.2, 5.5	<ul style="list-style-type: none"> Takes readings and measurements and interprets results Uses simple calculations to prepare financial documentation
Navigate the world of work	1.5, 1.6, 2.1, 2.2, 3.1, 3.2, 4.1, 4.4, 4.5, 5.4	<ul style="list-style-type: none"> Takes responsibility for following safe, sustainable, appropriate and efficient workplace procedures
Interact with others	3.3, 5.6	<ul style="list-style-type: none"> Advises service provider of any problems that cannot be resolved locally Deals with customer to sign-off on completed work
Get the work done	2.4, 2.5	<ul style="list-style-type: none"> Plans, organises and implements tasks to achieve them efficiently to meet customer requirements

Assessment Requirements for ICTDRE401 Integrate customer digital reception equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify modulation and other signal characteristics of a range of contemporary products
- design and build system
- install three types of equipment and services, applying all related work health and safety (WHS) requirements and work practices
- configure services and optimise customer system
- conduct functionality tests and interpret results
- provide customer training appropriate to equipment
- complete task and handover to customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify analog and digital connectors
- list contemporary equipment and connection methods
- explain continuity, ingress, egress, signal level and signal quality performance tests
- outline customer service principles, particularly dealing with customers face-to-face
- discuss enterprise or service specific knowledge of products and services supplied
- describe equipment types:
 - amplifiers
 - couplers
 - splitters
 - taps
- discuss modulation techniques

- define objectives and methods of training for product use for customer education
- discuss WHS general principles and enterprise-specific job safety analysis (JSA) requirements
- assess performance adjustments for tuning, balancing and replacing components
- summarise quality assurance of enterprise requirements
- review test analysis and diagnosis (enterprise diagnosis methods)
- describe video and audio fundamentals

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Digital Reception Technology industry and include access to:

- a site for Digital Reception Technology (DRE) integration
- DRE currently used in industry
- test equipment required for DRE integration.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTEDU301 Train customers in new technology

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to conduct training for customers on telecommunications equipment including convergent technology applications, such as internet protocol television (IPTV), digital television and internet protocol (IP) based customer equipment. It involves assessing the type of training suitable for the product and customer, delivering and checking the training.

It applies to individuals involved with installation of new technology or an upgrade of an existing network or subsystem deploying next generation networks (NGN) for customer premises equipment (CPE) installation, or as dedicated trainers involved in very large installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Education

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify training required	1.1 Confirm training to be provided with installation quote 1.2 Assess customer's expertise and actual training details

	1.3 Identify and prepare for specialised training needs 1.4 Provide quotes for enhanced training and confirm with customer
2. Conduct training	2.1 Demonstrate and explain relevant equipment, functions and network facilities 2.2 Provide customers with hands-on experience operating the equipment 2.3 Provide feedback to customers on their operational ability 2.4 Provide customers with relevant product literature 2.5 Provide enhanced training as agreed
3. Check training	3.1 Measure customer's skill using the equipment 3.2 Review training delivery and note improvements 3.3 Update and store records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.4, 3.1, 3.2, 3.3,	<ul style="list-style-type: none"> Evaluates and integrates facts and ideas to construct meaning and develop training plans from a range of sources
Writing	1.3, 1.4, 2.1-2.5, 3.2, 3.3	<ul style="list-style-type: none"> Communicates relationships between ideas and information in a style appropriate to audience and purpose
Oral Communication	1.1, 1.4, 2.1, 2.2, 2.3, 2.4, 2.5, 3.1	<ul style="list-style-type: none"> Demonstrates flexibility in spoken texts by choosing appropriate structures and strategies while instructing, providing constructive feedback or interacting with customers, employer, supervisors, work associates, team members and other contractors
Numeracy	1.1, 1.4, 3.1,	<ul style="list-style-type: none"> Identifies and comprehends relevant mathematical information in familiar activities or texts such as costing training
Navigate the world of work	3.3	<ul style="list-style-type: none"> Complies with explicit policies and procedures Explores and implements, where identified, implicit expectations of policies and procedures

Interact with others	1.2, 2.1, 2.2, 2.3, 2.4, 2.5	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols Recognises common cultural and other differences of people in the work context, and makes adjustments in addressing differences Elicits feedback and provides feedback to others
Get the work done	1.1, 1.3, 3.1, 3.2	<ul style="list-style-type: none"> Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, seeks assistance in setting priorities Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates effectiveness of outcome

Assessment Requirements for ICTEDU301 Train customers in new technology

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- review and confirm predetermined training for telecommunications installation
- analyse learner characteristics and actual training needs
- prepare training material, including equipment specifications and guidelines
- conduct customer training on a telecommunications installation including:
 - demonstration
 - hands-on experience
 - feedback on performance
- complete training documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe in detail the content of learning to be provided
- explain common sources of technical training information
- summarise and explain appropriate training techniques for:
 - demonstration
 - individual and group activities
 - instruction
 - questioning.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Education field of work and include access to:

- a range of information and training resources
- customer premises equipment product information
- appropriate training facilities
- relevant industry software packages.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTGAM418 Use simple modelling for animation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan and produce an animated sequence.

It applies to individuals who support the design, development and programming of basic digital games as part of a larger development team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Game development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify the animation requirements of models	<p>1.1 Clarify the animation requirements and design specifications for the model, in consultation with the relevant personnel, and according to the production documentation</p> <p>1.2 Examine the most appropriate animation techniques for the animation, in order to determine which modelling techniques to use</p> <p>1.3 Identify the file format and delivery platform for animated sequences</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Identify factors that may influence the animation design approach</p> <p>1.5 Clarify work flow sequences, in consultation with the relevant personnel, to ensure that production schedule deadlines are met</p>
2. Plan the approach	<p>2.1 Research animations, artworks and other creative sources that may inspire visual design ideas</p> <p>2.2 Generate a range of animation ideas that are technically feasible, respond to briefs, and provide creative solutions to all design issues</p> <p>2.3 Present animation ideas to the relevant personnel using appropriate design techniques</p> <p>2.4 Adjust the approach to incorporate feedback, and agree on final design concepts</p> <p>2.5 Discuss and select animation software with the relevant personnel to ensure that the animated sequences of the model meet specified outcomes</p> <p>2.6 Analyse audio assets supplied for animations, as required</p>
3. Produce animated sequences for review	<p>3.1 Create animations of models using animation and modelling techniques to suit design requirements</p> <p>3.2 Apply basic animation principles, screen principles, visual design principles and communication principles</p> <p>3.3 Apply real-world camera techniques to the virtual cameras used in the animation</p> <p>3.4 Render the completed animated sequences</p> <p>3.5 Save and store the animated sequences using appropriate output file formats, standard naming conventions, and version-control protocols</p> <p>3.6 Present the animated sequences of simple models to the relevant personnel for evaluation by agreed deadlines</p>
4. Finalise animated sequences	<p>4.1 Review the animated sequences to assess creative solutions to the design briefs, appropriateness to users or audience, and technical feasibility</p> <p>4.2 Discuss and confirm with the relevant personnel, additional requirements or modifications, and complete any changes as required</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 2.4, 2.5, 4.2	<ul style="list-style-type: none"> Identifies, evaluates and interprets texts containing complex technical, 3-D modelling and animation terminology to clarify requirements and research ideas Interprets and comprehends computer generated text, audio tracks, abbreviations, symbols, icons, numbers and letters necessary to use 3-D modelling and animation software
Oral Communication	1.1, 1.5, 2.1, 2.3, 2.4, 2.5, 3.6, 4.1, 4.2	<ul style="list-style-type: none"> Participates in verbal exchanges of ideas and solutions, using a range of animation and 3-D modelling terminology, and effective listening and questioning techniques to clarify information Presents designs speaking clearly and concisely, using specific terminology and appropriate non-verbal features
Numeracy	1.1, 1.4, 1.5, 2.2, 2.5, 2.6, 3.1, 3.2, 3.3, 3.4, 3.5, 4.1	<ul style="list-style-type: none"> Uses whole numbers, decimals and percentages relevant to file size, software and hardware specifications, measurement, scale, form, weight, volume, colour, shading, and other attributes/variables in the development of animated sequences
Get the work done	All	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks to achieve required outcomes Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations Addresses less predictable problems and uses problem-solving processes to determine solutions Contributes to improvement of work practices by applying the basic principles of analytical and lateral thinking Uses digital technologies and systems to access information, enter data and code, present information and communicate with others

Assessment Requirements for ICTGAM418 Use simple modelling for animation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- create digital animated sequences of a model that:
 - demonstrates the principles of simple model animation, basic screen, visual design and communication
 - meets the technical requirements of specific platforms
 - satisfies the design brief and client requirements
 - meets the production deadlines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline basic digital animation techniques
- outline the principles of animation, screen, visual design and communication in relation to the production of animated sequences
- describe the features of a range of delivery platforms for animated sequences
- discuss the issues and challenges that arise in the context of creating models for digital animations
- outline the stages in the production process from initial design through to finished product
- outline the roles and responsibilities of project team members.

Assessment Conditions

conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the game development field of work, and include access to:

- appropriate computer hardware, software and games engines
- file storage
- design specifications and production documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT424 Address cyber security requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to determine the cyber security requirements of an organisation and use a range of resources to protect valuable assets.

This unit applies to individuals who are required to participate in the identification and implementation of cyber security controls.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse cyber security requirements	1.1 Identify and document valuable assets to create register of valuable assets 1.2 Perform threat and risk assessment on valuable assets register to identify and document cyber security requirements 1.3 Review current cyber security controls against the cyber security requirements to identify cyber security gaps
2. Select and implement cyber security controls	2.1 Identify cyber security controls which address cyber security gaps

	<p>2.2 Determine specific cyber security controls to address cyber security gaps against the organisation's risk appetite</p> <p>2.3 Seek feedback from organisational representative and agree on cyber security controls to implement</p> <p>2.4 Implement, test and document agreed cyber security controls to address cyber security gaps</p> <p>2.5 Seek feedback from organisational representative to identify discrepancies between cyber security controls and cyber security requirements</p>
3. Maintain and improve security controls	<p>3.1 Determine currency of valuable assets register to identify new valuable assets and changed threats and risks</p> <p>3.2 Identify, determine, and agree on cyber security controls to address new cyber security gaps</p> <p>3.3 Implement and document new and modified cyber security controls to address cyber security gaps</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Identifies, plans and implements strategies to manage gaps in cyber security knowledge
Reading	<ul style="list-style-type: none"> Analyses and consolidates information and data from sources, against defined criteria and requirements, and checks for accuracy and completeness Recognises and interprets textual information to determine specific information about security incidents
Writing	<ul style="list-style-type: none"> Develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	<ul style="list-style-type: none"> Articulates information clearly, using specific and relevant language suitable to audience to convey recommendations and provide verbal reports Uses listening and questioning techniques to confirm understanding
Numeracy	<ul style="list-style-type: none"> Extracts and evaluates the mathematical information embedded in a range of tasks and texts
Navigate the world of work	<ul style="list-style-type: none"> Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need for coordination with others Takes personal responsibility for following explicit and implicit

	policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Selects form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	<ul style="list-style-type: none"> Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands Gathers and analyses data, and seeks feedback, to improve plans and processes Makes decisions in a complex and diverse environment, using input from a range of sources Explores and incubates new ideas through unconstrained analysis and critical thinking, to develop and improve the organisation's controls

Assessment Requirements for ICTICT424 Address cyber security requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For two difference cyber security requirements:
 - analyse cyber security requirements to protect valuable assets
 - determine threats and risks based on current controls and requirements
 - identify and apply controls to protect valuable assets
 - identify improvements to cyber security controls
 -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Common cyber security threats and risks
- Common cyber security controls, key features, and associated advantages and disadvantages
- Cyber security control implementation processes and procedures
- Industry standards relevant to cyber security
- Testing procedures and processes
- Legislative and regulatory requirements relevant to cyber security
- Approaches to performing cyber security threat and risk assessment
-

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Organisational representative
- Organisational cyber security requirements
- Specifications of existing cyber security controls
- Information on organisational assets, both valuable and non-valuable
- Software required for performing cyber security threat and risk assessments

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT426 Identify and evaluate emerging technologies and practices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to identify emerging technologies and practices in the ICT sector and evaluate their potential impact on organisational practices.

It applies to individuals who work across a wide range of information technology (IT) areas, including technical support, network administration, web technologies, software applications and digital media technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify emerging technologies and practices in IT	1.1 Access sources of information on emerging technologies and practices in the IT industry 1.2 Identify and document emerging technologies and practices relevant to organisational context
2. Evaluate the impact of emerging technologies	2.1 Evaluate features and functions of emerging technologies and practices to determine advantages and disadvantages

and practices	<p>relevant to organisational context</p> <p>2.2 Assess and document potential impacts of emerging technologies and practices on current organisational technologies and practices</p> <p>2.3 Seek and obtain feedback from organisational representative on assessment of impact of emerging technologies and practices and incorporate feedback into report</p>
3. Develop strategies to prepare for emerging technologies and practices	<p>3.1 Develop and document strategies to prepare organisation for impacts of emerging technology and practices</p> <p>3.2 Identify and document changes to organisational technologies and practices required based on strategies to determine organisational response</p> <p>3.3 Seek and obtain feedback from organisational representative on strategy and organisational response from organisation and incorporate feedback into strategy and organisational response</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Investigates, evaluates and applies information from a range of complex and technical texts to expand own knowledge and to identify current and emerging technology, trends and practices that are likely to impact the organisation Considers the reliability of an information source against criteria including the author's background, the intended audience and purpose, and the date of publication Identifies reputable sources of information from which to gather resources and information
Reading	<ul style="list-style-type: none"> Identifies and interprets technical documentation containing complex terminology and diagrams to identify current and emerging technologies
Oral Communication	<ul style="list-style-type: none"> Uses clear, easy-to-understand language, translating industry-specific terminology into plain English when necessary
Navigate the world of work	<ul style="list-style-type: none"> Recognises opportunities to enhance personal professional development Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context

Interact with others	<ul style="list-style-type: none">Discusses ideas and complex information on issues and developments in the IT industry
Get the work done	<ul style="list-style-type: none">Recognises some general design and operating principles of digital tools

Assessment Requirements for ICTICT426 Identify and evaluate emerging technologies and practices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Describe and evaluate purpose, features, attributes and potential applications of:
 - three emerging technologies
 - three emerging practices in the ICT sector
- Develop a strategy to respond to each of the three emerging technologies and three emerging practices, including:
 - potential organisational opportunities and threats resulting from the emerging technology and practice
 - likely impact on current organisational technologies and practices
 - objectives of the organisation in responding to the emerging technology or practice
 - changes required in order to achieve intended objectives of the organisation
 - considerations for how to implement the changes required
 -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Research approaches for emerging technologies and practices in the ICT sector and their potential impact on current technologies and practices
- Technology implementation planning methods
- Organisational technologies and practices

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Organisational representative

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT428 Select cloud storage solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to select cloud storage solutions based on the analysis of organisational requirements. It includes the development of implementation strategies to ensure that the organisation is prepared for the implementation of the selected cloud storage solutions.

This unit applies to individuals who undertake the evaluation of organisational data storage requirements and plan the implementation for the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine requirements for a cloud storage solution	1.1 Review organisational data storage requirements and guidelines, and industry standards to determine need for cloud storage solutions within scope of own responsibilities 1.2 Identify and evaluate cloud storage options with respect to organisational data storage requirements 1.3 Identify data and security risks to evaluate cloud storage

	options for organisations
2. Develop an implementation plan for implementing cloud storage solutions	<p>2.1 Select cloud storage options to satisfy organisational data storage requirements</p> <p>2.2 Identify potential providers of cloud storage solutions and evaluate providers with respect to organisational data storage requirements</p> <p>2.3 Develop and document an implementation plan for the cloud storage solution aligned to the organisation data storage requirements within scope of own responsibilities</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> • Draws on a broad range of strategies to build and maintain understanding throughout complex texts • Organises, evaluates and critiques ideas, and information, from a wide range of complex texts
Writing	<ul style="list-style-type: none"> • Generates complex written texts, demonstrating control over a broad range of writing styles and purposes
Numeracy	<ul style="list-style-type: none"> • Analyses and synthesises highly-embedded mathematical information, in a broad range of tasks and texts • Extracts numerical information to calculate cloud storage and performance requirements and costs
Navigate the world of work	<ul style="list-style-type: none"> • Develops, and implements, strategies that ensure that the organisational and regulatory requirements are met • Monitors and reviews the organisation's requirements and adherence to legislative requirements, in order to implement and manage change
Get the work done	<ul style="list-style-type: none"> • Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Gathers and analyses data, and seeks feedback, to improve plans and processes • Makes high-impact decisions in a complex and diverse environment, using input from a range of sources

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Determine the cloud storage needs of an organisation within the scope of own responsibilities including the identification of three cloud storage options through considering the following:
 - data
 - security
 - performance
 - usability
 - and broader organisational benefits and detriments
- Review service level agreements (SLAs) for the three identified cloud storage options to identify hidden costs, ownership of data, disaster recovery and rights to retrieval, availability and performance, security standards and audit rights, data storage location and dispute mediation processes in the identification of potential cloud service providers
- Evaluate the performance and usability of the three cloud storage options
- Develop and document one cloud storage implementation plan for an organisation including the evaluation and selection of cloud storage solutions

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key requirements of an ICT implementation plan
- Business types that may have cloud storage requirements
- Current trends and directions in information and communications technology (ICT), and the major industry technology standards used in cloud storage options
- Advantages and disadvantages of cloud storage options and providers
- Major themes relating to data and cyber security and their application within the organisational environment

- Current industry hardware and software products and their general features, capabilities and application as relevant to cloud storage options
- Characteristics relating to cloud storage that must be included in service level agreements
- Costs and organisational impacts relevant to a cloud storage strategy
- SLA terms related to service availability and performance

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- A site where cloud storage technologies may be used
- Organisational data storage requirements and guidelines relating to the storage of information
- Cloud storage options currently used in industry
- Service level agreements (SLA) documentation relevant to cloud storage providers
- Standards, guidelines, and organisational requirements relating to work health and safety (WHS) and sustainability

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT517 Match ICT needs with the strategic direction of the organisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to ensure information and communications technology (ICT) products and systems match the strategic direction of the organisation.

It applies to individuals whose responsibilities may include improving, evaluating, acquiring, maintaining and supporting ICT for organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate current strategic plan and propose changes	1.1 Analyse and document current strategic plan of organisation against industry environment and organisational objectives 1.2 Determine and document current state of ICT systems and practices in organisation 1.3 Compare strategic plan objectives and current state of ICT to determine ICT gaps, improvement opportunities, and proposed

	<p>changes</p> <p>1.4 Report on proposed changes, gaps and improvement opportunities to superior</p>
2. Evaluate effect of changes	<p>2.1 Evaluate impact of proposed changes to ICT systems and products against strategic objectives of organisation</p> <p>2.2 Evaluate the difficulty of implementing proposed changes to ICT systems and products</p> <p>2.3 Prioritise proposed changes to refine opportunities and assist in scheduling implementation</p> <p>2.4 Document evaluation process and provide to superior for feedback</p>
3. Plan implementation of changes	<p>3.1 Develop action plan to implement proposed changes including prioritised schedule and consistency with organisational policy and procedures</p> <p>3.2 Detail standards, targets and implementation methods in action plan</p> <p>3.3 Provide action plan to superior for feedback and approval</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reviews, analyses and evaluates complex online and hard copy documentation containing ICT specific terminology, diagrams and numerical information to determine ICT gaps and improvement opportunities
Writing	<ul style="list-style-type: none"> Uses plain English, together with vocabulary, grammatical structures, terminology, diagrams, numerical information, formatting and structure relevant to the job role and organisation
Oral Communication	<ul style="list-style-type: none"> Uses plain English, translating technical terminology when necessary, to communicate with a range of personnel and determine objectives, articulate ideas and requirements, and develop plans Elicits information using effective listening and questioning techniques
Numeracy	<ul style="list-style-type: none"> Interprets numerical data and applies mathematical calculations to assess the financial implications of introducing changes
Navigate the	<ul style="list-style-type: none"> Accepts responsibility and ownership for the task and makes decisions

world of work	<p>according to organisational needs and the need for coordination with others</p> <ul style="list-style-type: none"> • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with clients and colleagues in a range of work contexts • Recognises and accommodates basic differences and priorities of others • Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	<ul style="list-style-type: none"> • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making processes for complex and non-routine situations • Investigates new and innovative ideas as a means to continuously improve work practices and processes through consultation and formal and analytical thinking • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others in a secure and stable digital environment

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTICT517 Match ICT needs with the strategic direction of the organisation	ICTICT511 Match ICT needs with the strategic direction of the enterprise	Edits to title, application, elements 1–3, assessment requirements and foundation skills to clarify intent and scope.	Equivalent unit

Assessment Requirements for ICTICT517 Match ICT needs with the strategic direction of the organisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For one organisation:
 - interpret a strategic plan and objectives of the organisation
 - evaluate the current state of ICT in the organisation
 - identify possible gaps and opportunities in ICT and evaluate organisational impact with reference to the strategic plan and the objectives
 - determine and prioritise proposed changes to meet organisational needs
 - evaluate the difficulty of implementing proposed changes
 - develop an action plan for implementation

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key sections of an action plan for ICT implementation projects
- Methods of evaluation and planning approaches to technical problems and strategic objectives
- Methods of evaluation of competing and complementary internal and external ICT systems and products
- Current and emerging system and product trends and directions

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- A site where ICT needs and strategic directions of the organisation are coordinated
- Detailed information relating to a strategic organisation plan, objectives, and direction

- Organisational policies and procedures relating to the implementation of ICT changes
- Individual superior in the organisation
- Information on current ICT systems and practices in the organisation including operating systems, hardware, and security

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT608 Interact with clients on a business level

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to interact with clients at a management level.

It applies to individuals working as management personnel in a range of information and communications technology (ICT) areas who are responsible for maintaining client relationships.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review client's business domain	1.1 Research organisational service standards, values and culture to understand the organisational environment 1.2 Investigate and document the goods and services provided by the organisation 1.3 Review current service level agreements (SLAs) if appropriate
2. Develop new business	2.1 Research client service needs and preferred level of service

ELEMENT	PERFORMANCE CRITERIA
with client	2.2 Research opportunities for new business with client 2.3 Develop draft proposals to cover these new initiatives
3. Negotiate new business initiatives	3.1 Conduct a session with the client to present the new opportunities 3.2 Present proposals to the client in a clear, concise and comprehensive manner 3.3 Present proposed cost and timeframes to the client 3.4 Negotiate terms with the client and record alterations if required 3.5 Clarify areas of uncertainty or disagreement 3.6 Document agreement negotiated with the client
4. Monitor, adjust and implement procedures to maintain client focus	4.1 Assess progress in achieving new client initiatives 4.2 Gather client feedback to improve the proposals 4.3 Adjust service provided to the client based on client feedback and in line with organisational guidelines 4.4 Document changes to new provisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 4.1, 4.2	<ul style="list-style-type: none"> Identifies, analyses and evaluates a range of complex information to identify relevant and key information
Writing	2.3, 3.6, 4.4	<ul style="list-style-type: none"> Uses plain English, appropriate grammatical structures and specialised terminology, diagrams and flow charts, logical document structures and formatting relevant to the job role and organisation to record document proposals and agreements
Oral Communication	1.1-1.3, 2.1, 2.2, 3.1-3.5, 4.1, 4.2	<ul style="list-style-type: none"> Uses open questioning and effective listening techniques to elicit information, clarify requirements and conduct effective negotiations Uses appropriate vocabulary, grammatical structure,

		voice tone, body language and reflective responses to build business relationships and present proposals
Numeracy	1.2, 1.3, 2.3, 3.3-3.5, 4.3, 4.4	<ul style="list-style-type: none"> Interprets numerical information and applies mathematical calculations and financial functions relating to time durations and projected costs
Navigate the world of work	1.3, 4.3	<ul style="list-style-type: none"> Recognises and responds to both explicit and implicit protocols within familiar work contexts and appreciates the importance of identifying and responding to organisational procedures
Interact with others	3.1, 3.2, 3.4	<ul style="list-style-type: none"> Invests considerable time and energy in building and maintaining effective working relationships within and beyond immediate work context, recognising and intuitively responding to the subtle and complex mix of factors at play in every interaction
Get the work done	1.1, 1.2, 2.1-2.3, 4.1	<ul style="list-style-type: none"> Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with new opportunities Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables, consider possible implications of different courses of action and determine the best course of action Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world Demonstrates a sophisticated understanding of expectations, social protocols and online etiquette, intuitively selecting the appropriate channel, content and tone for diverse purposes and audiences

New Topic (129)

Assessment Requirements for ICTICT608 Interact with clients on a business level

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assemble a proposal for a new business initiative
- develop a strong awareness of the clients business
- present and negotiate a proposal with the client
- formulate and implement new business
- monitor and maintain client relationship and requirements of service.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss business practices relevant to understanding client needs, including:
 - change management
 - information gathering techniques
 - planning process, including development of information and communications technology (ICT) business solutions
 - preparation of reports
- identify current industry accepted hardware and software products relevant to client services and support, including:
 - general features and capabilities
 - vendor product directions
- identify and interpret legal principles of commercial contracts and service level agreements (SLAs)
- interpret organisational policies, plans and procedures, including contracting
- summarise the concepts of negotiation and the process for building business relationships.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- organisational policies, procedures and SLAs for the ICT industry
- contexts for negotiating agreements and contracts
- current ICT hardware and software products.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNPL401 Apply business acumen to network planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to consider business drivers in a decision-making process for network planning and investment. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse forecasts using customer demand	1.1 Gather and organise information concerning customer service and usage data to determine customer demand 1.2 Determine trends in customer demands in specific customer operating environments and markets 1.3 Assess key measures of capacity and customer demand for forecast

2. Build models to develop business cases	<p>2.1 Construct a model to represent key options to formulate strategic proposals in network planning</p> <p>2.2 Determine rights of carriers and service providers in installing facilities under Commonwealth legislation</p> <p>2.3 Produce a strategic network plan using key variables, and communicate them to intended audience</p> <p>2.4 Apply business case methodology to determine key economic measures and risks to business success</p> <p>2.5 Evaluate business value and options to recommend appropriate planning strategy</p>
3. Apply financial analysis	<p>3.1 Use a financial investment tool relevant to the business environment to determine financial viability of the planning project</p> <p>3.2 Apply key economic measures in an analysis process and develop business strategy</p> <p>3.3 Determine relevant level of financial analysis required to optimise network planning</p>
4. Analyse demographic trends for strategy development	<p>4.1 Gather demographic data and determine impact of demographic diversity on planning strategies</p> <p>4.2 Analyse data and produce demographic trends for use in strategy developments in network planning</p>
5. Assess technology implementation	<p>5.1 Determine unit costs associated with technologies and products by using lifecycle of technologies</p> <p>5.2 Research what different technology bases can deliver and circumstances and locations in which they should be successfully deployed</p>
6. Evaluate network deployment architecture	<p>6.1 Evaluate network deployment architecture using network deployment rules and reasoning behind architecture rules</p> <p>6.2 Produce a business model of network planning, applying commercial considerations and exemption process</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Reading	1.1, 2.2, 2.5, 4.1, 5.2, 6.1	<ul style="list-style-type: none"> Identifies and evaluates text to determine key information and specific requirements and responsibilities
Writing	1.2, 2.1, 2.3, 2.4, 3.1, 3.2, 6.2	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language Uses expected forms and conventions to present required information
Oral Communication	2.3	<ul style="list-style-type: none"> Articulates specific information using an appropriate tone and vocabulary for intended audience
Numeracy	1.1-1.3, 2.1, 2.4, 3.1-3.3, 4.1, 4.2, 5.1, 6.1, 6.2	<ul style="list-style-type: none"> Interprets numerical information and applies mathematical calculations relating to time durations and financial consequences Applies different financial models to the planning process and highlights benefits and drawbacks of different strategies
Navigate the world of work	2.2	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	2.3	<ul style="list-style-type: none"> Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts
Get the work done	1.1-1.3, 2.1, 2.2, 2.4, 2.5, 3.1-3.3, 4.1, 4.2, 5.2, 6.1, 6.2	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Unit Mapping Information

Assessment Requirements for ICTNPL401 Apply business acumen to network planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- analyse forecasts using customer demand
- build accurate models to develop business cases, applying financial analysis
- analyse demographic trends for strategy development
- assess technology implementation
- communicate with customers
- evaluate network deployment architecture.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain different forms of business modelling
- identify commercial considerations, including:
 - capital expenditure (CAPEX)
 - operational expenditure (OPEX)
 - product revenue and demand versus network cost
 - return on investment (RoI)
 - time to market
- identify role of demographics in the planning process
- outline emerging technologies of telecommunications
- identify financial investment tools:
 - cost-benefit analysis
 - investment management system

- net present value (NPV)
- identify financial models
- explain forecasting of trends
- identify and explain relevant legislation as it applies to:
 - Australian competition and consumer affairs
 - telecommunications industry regulatory accounting
 - universal services obligations
- describe network planning processes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network planning data
- relevant databases
- business and financial models
- systems and deployment rules and relevant legislation
- planning processes and regulatory frameworks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL402 Plan the deployment of access network architectures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan deployment of network architecture when conducting access network telecommunications work.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope the project	1.1 Prepare for work according to site specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Determine type of access network by accessing and using network information sources 1.3 Produce a brief on how access network architecture components relate to the larger network and their impact on the work

	<p>1.4 Evaluate equipment type and technologies to be considered, to determine availability and compatibility with existing network equipment</p> <p>1.5 Obtain resources and equipment needed for the work according to enterprise procedures and check for correct operation and safety</p> <p>1.6 Assess capacity limitations of various platforms in the context of the work to ensure maximum network performance</p> <p>1.7 Determine product capability and calculate allowable capacity of the access network to allow for network growth</p>
2. Produce deployment plan for an Access Network	<p>2.1 Conduct planning work using current equipment components and complying with access network deployment rules and exemption process criteria</p> <p>2.2 Produce a preliminary plan on deployment of the network that maintains integrity of the access network</p> <p>2.3 Discuss unexpected situations with appropriate personnel, with consideration to job specifications, safety and enterprise procedures to establish a solution</p> <p>2.4 Review plan to ensure it complies with all standards and codes required when working on network access, and where appropriate make adjustments</p>
3. Complete work and report its impact on network access	<p>3.1 Produce final deployment plan including recommendations agreed with customer</p> <p>3.2 Provide a report on network monitoring techniques used to manage the network to ensure it is performing at optimum level</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4-1.7, 2.1, 2.4	<ul style="list-style-type: none"> Identifies and evaluates written and visual text in specialised workplace documentation to determine key information and specific requirements
Writing	1.3, 2.2, 3.2	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language and expected forms and conventions

Oral Communication	1.6, 1.7, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Articulates specific information using an appropriate tone and vocabulary for the intended audience
Numeracy	1.6, 1.7, 3.1, 3.2	<ul style="list-style-type: none"> Employs mathematical calculations to determine features and limitations of different networks
Navigate the world of work	1.1, 1.5, 2.1, 2.3, 2.4	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	2.3	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers
Get the work done	1.1-1.7, 2.1, 3.1	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Assessment Requirements for ICTNPL402 Plan the deployment of access network architectures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- gather data appropriately within information sources and evaluate how the data relates to the access architecture
- source current major equipment and technologies used in an access network and detail their compatibilities
- accurately plan deployment of an access network architecture, including deployment rules, capacity and capability management and monitoring techniques
- complete work within a timeframe typically expected of the discipline, work function and industrial environment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the features of an access network, including:
 - architectures and geographical categorisation
 - information sources
 - technology and equipment
- define capacity and capability management
- identify capacity limitation of various platforms
- describe commercial considerations of access network deployment
- identify compatibility issues of technology and equipment
- explain currency of technology and equipment use
- summarise enterprise deployment rules and rationale

- identify exemption process criteria
- identify major equipment components of a modern access architecture
- describe monitoring techniques to manage the access network
- outline network topologies
- identify product capability and availability allowable within an access network
- outline telecommunications access networks issues and challenges.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network design documentation and other site-related documentation
- equipment specifications
- live network or training facilities
- organisational guidelines
- networked computers
- networked telecommunications components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL409 Apply knowledge of regulation and legislation for the telecommunications industry

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess the impact of deregulation, competition, economic conditions, regulations and legislation on enterprise-specific policies and procedures and its subsequent incorporation into the planning process.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate economic and political influences	1.1 Research the impact of deregulation and competition in the telecommunications industry on planning priorities of competing service providers in Australia due to the different federal government policies

	<p>1.2 Assess the influence of local and international economic conditions on the growth of the industry that would impact on the planning justification for a new network</p> <p>1.3 Evaluate and produce a report on the economic and political influences on public and commercial enterprises providing services in a competitive telecommunications market of fast changing technologies</p>
2. Evaluate impact of key regulations and legislation	<p>2.1 Access all legislation governing carriers in Australia to determine the rights of carriers and service providers in installing facilities under Commonwealth legislation</p> <p>2.2 Use the Telecommunications Industry Regulatory Accounting Framework (RAF) to determine the method used by the Australian Competition and Consumer Commission (ACCC) in enforcing competitive provisions between service providers</p> <p>2.3 Evaluate the impact on planning of services by the obligation placed by Universal Service Obligation (USO) on service providers to ensure services are reasonably accessible to all people in Australia on an equitable basis</p> <p>2.4 Produce a summary report evaluating the impact of the legislation on the planning process of access networks and plan strategies to facilitate network planning</p>
3. Apply internal financial compliance	<p>3.1 Use an enterprise-specific investment management system (IMS) to create on the spot reports for performance measurement of an existing planning project against the business plan</p> <p>3.2 Produce a report of planning work activities incorporating enterprise-specific policies and procedures underpinned by regulatory and compliance obligations</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2-1.3, 2.1-2.4, 3.1, 3.2	<ul style="list-style-type: none"> Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements Evaluates complex text to determine legislative, regulatory and project requirements

Writing	1.2, 1.3, 2.2-2.4, 3.1, 3.2	<ul style="list-style-type: none"> Develops complex material for a specific audience using clear and detailed language employing expected forms and conventions Prepares reports which incorporate evaluation of information and specialised and cohesive language
Navigate the world of work	1.1, 1.2, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> Ensures knowledge of legislative requirements and products is kept up to date in order to provide accurate information Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Get the work done	1.1-1.3, 2.1-2.4, 3.1	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking Uses familiar digital technologies and systems to access information, search and enter data and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTNPL409 Apply knowledge of regulation and legislation for the telecommunications industry

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- produce a comprehensive evaluation report on economic and political influences on the telecommunications industry in Australia
- produce a comprehensive evaluation report on the impact of key regulation and legislation on the telecommunications industry
- produce an accurate summary report evaluating the impact of the legislation on the planning process of access networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the impact of deregulation on the telecommunications industry
- outline the investment management system
- identify and describe the purpose and implementation of relevant telecommunications legislation
- identify and describe the impact of market forces on telecommunications
- outline procedures for developing plans for telecommunications systems
- outline the telecommunications industry, framework and networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- relevant legislation
- planning processes
- Telecommunications Industry Regulatory Accounting Framework (RAF) planning tools
- enterprise-specific investment management system (IMS)
- relevant databases
- licensing requirements
- other related procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL410 Plan the telecommunications access network for an estate

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan access networks delivering voice, data and video services to customers, and involves the collation and evaluation of data relating to network shortfalls and projected usage, leading to the development of solutions and ultimately network plans for an estate.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather data on network usage	1.1 Determine the type of access network by accessing and using

for planning activity	<p>network information sources</p> <p>1.2 Collect planning data using network information sources to determine network trends</p> <p>1.3 Evaluate new and emerging technologies to determine availability and compatibility with existing network equipment</p> <p>1.4 Access relevant legislation and associated regulatory and operational codes</p>
2. Evaluate need for network growth	<p>2.1 Evaluate capacity of the existing network to absorb planned growth</p> <p>2.2 Identify need and likely timing of necessary network increments</p> <p>2.3 Assess new or alternate technologies to rectify network shortfall</p> <p>2.4 Identify barriers relating to planned network extensions impacting planning the network realisation</p> <p>2.5 Assess the impact of not meeting network shortfall needs and long term ramifications on the business</p>
3. Develop solution and network plan to address network shortfall	<p>3.1 Review overall planning parameters prior to commencement of the planning process to produce forecasts for specific network area and cost-benefit analysis</p> <p>3.2 Establish the optimum solution to address network shortfall with justification for the proposal</p> <p>3.3 Determine project details and ascertain preliminary costing and resource requirements</p> <p>3.4 Determine availability of required technology or technology features within the specified timeframe</p> <p>3.5 Produce a specific network plan with solution and recommendations for anticipated projects for approval according to enterprise procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements Evaluates complex text to determine legislative,

		regulatory and project requirements
Writing	1.3, 2.3, 2.5, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> Develops complex material for a specific audience using clear and detailed language and visuals while employing expected forms and conventions Prepares reports which incorporate evaluation of information and specialised and cohesive language
Oral Communication	2.3, 2.4, 3.2-3.5	<ul style="list-style-type: none"> Clearly articulates requirements using language appropriate to audience and environment and participates in a verbal exchange of ideas and solutions
Numeracy	1.2, 2.1, 2.5, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Interprets numerical information and applies basic mathematical calculations relating to time durations and budgetary information
Navigate the world of work	1.4	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	1.2, 1.3, 2.1-2.5, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking

Assessment Requirements for ICTNPL410 Plan the telecommunications access network for an estate

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement planning processes including associated monitoring and control mechanisms
- develop effective solutions to address access network shortfalls that satisfy customer and enterprise needs
- develop network plans with consideration of appropriate technological developments and product implementation
- produce accurate forecasts for a specific network including cost-benefit analysis.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and summarise legislation affecting the telecommunications industry
- outline the features of an access network and the influence on:
 - cost estimates and operating budgets according to enterprise policy
 - telecommunications industry in Australia
- describe the theory of project management and associated databases and project management software programs
- describe the process and features of planning for an access network on an estate
- determine the economic and political influences on public and commercial enterprises
- describe the financial authorities and delegations associated with an access network plan
- define the influence of the local and international economic conditions on the telecommunications industry
- describe the typical challenges and limits facing technology today and the consideration of future needs

- describe the process of collating and writing project briefs, reports and project charters.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- a network planning area systems and deployment
- rules and standards
- relevant databases
- licensing requirements and other site related procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK420 Install and configure virtual machines

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to select and implement virtualisation solutions to meet organisational needs in an information and communications technology (ICT) environment.

It applies to individuals who work in the network area of organisations and are responsible for the virtualisation of desktop and server operating systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify options and select virtualisation solution	1.1 Research and determine government and industry guidelines and policies for use of desktop and server virtualisation 1.2 Determine and document current and future requirements of organisations based on guidelines, policies and organisational structure 1.3 Identify benefits and detriments of virtualisation of desktop and server environments relevant to needs of organisation 1.4 Identify available features of current virtualisation software

	<p>relevant to needs of organisation</p> <p>1.5 Select virtualisation solutions based on current and future needs of organisation</p> <p>1.6 Seek and obtain feedback on selected virtualisation solution from organisation and incorporate feedback into selected virtualisation solutions</p>
2. Prepare for, install and configure virtualisation technology	<p>2.1 Identify, clarify and document technical requirements of organisation relating to virtualisation technologies including virtual machines, virtual networks, and virtualisation software</p> <p>2.2 Identify and document hardware, software, network, and infrastructure components required to be installed and configured to meet technical requirements</p> <p>2.3 Seek and obtain feedback on technical requirements and documented components from organisation and incorporate feedback into technical requirements and documented components</p> <p>2.4 Install and configure software to provide support for virtualisation of desktop and server operating systems according to technical requirements</p> <p>2.5 Configure virtualisation software application features to accommodate required functionality according to organisational needs</p>
3. Install, configure and test virtual machines	<p>3.1 Install and configure virtual machines according to technical requirements</p> <p>3.2 Install and configure virtual networks according to technical requirements</p> <p>3.3 Test functionality of installed virtual machines and virtual networks against technical requirements and rectify errors</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Recognises and interprets industry and government guidelines to determine organisational requirements
Oral Communication	<ul style="list-style-type: none"> Elicits information and organisational needs by using listening and questioning techniques

Navigate the world of work	<ul style="list-style-type: none"> Complies with explicit organisational policies and procedures
Get the work done	<ul style="list-style-type: none"> Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account Initiates standard procedures when adapting configuration procedures, depending on differing operational contingencies, risk situations and environments Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential impact of new technology In familiar contexts, responds promptly and intuitively to problems involving virtualised machine environments requiring immediate attention

Assessment Requirements for ICTNWK420 Install and configure virtual machines

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Identify one virtualisation solution for the organisation including the identification of applicable guidelines or policies, benefits and detriments and currently available software
- Interpret organisational needs to determine technical requirements of virtualisation solution once
- Install and configure virtualisation software to accommodate organisational needs once
- Install, configure, and test the functionality of two virtual machines, including evidence of the ability to:
 - backup virtual machine state on shutdown
 - restore virtual machine state on start up
 - backup and restore a virtual hard drive and software configuration files for virtual machine
- Configure and test the functionality of a virtual network for the two virtual machines, including the ability to:
 - configure internet protocol (IP) addresses to match selected network configuration
 - configure virtual network as host only, bridged, and network address translation (NAT) configurations
 - configure services to operate under current network configuration

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Government and industry policies and guidelines related to virtualisation
- Technologies and processes relating to virtualisation
- Tools and software applications for virtual machine management
- Configuration of software applications required to manage virtual machines

- Configuration requirements for the integration of virtual machines into an existing network design

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Site or prototype where virtual machine environments are to be implemented
- Information relating to organisational policies and procedures and structures
- Current and future user needs relating to desktop and server environments
- Network technical requirements
- Networked computers
- Individual user to clarify and confirm requirements
- Software to support implementation of virtual machines.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK421 Install, configure and test network security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to install, configure and test network security in an organisational environment.

It applies to individuals who are involved in the installation, configuration, and testing of network security for networks of any size in job roles including network administrator, penetration tester, and security consultant.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess network security threats and vulnerabilities	<p>1.1 Review current system security against organisational asset security requirements to identify security threats and vulnerabilities</p> <p>1.2 Analyse network, software, hardware and system security threats and vulnerabilities to prioritise deficiencies to be addressed</p> <p>1.3 Make recommendations to management to address security deficiencies according to organisational asset security</p>

	requirements
2. Implement countermeasures for identified threats and vulnerabilities	<p>2.1 Implement required level of perimeter security to meet organisational asset security requirements and according to identified threats and vulnerabilities</p> <p>2.2 Assess and implement server and network hardening techniques and measures</p> <p>2.3 Implement secure authentication and user account controls to secure data integrity and transmission</p>
3. Test and verify functionality and performance of countermeasures implemented	<p>3.1 Design function and performance test items to verify key functions and performance of countermeasures</p> <p>3.2 Conduct function and performance tests to modify and debug countermeasures</p> <p>3.3 Develop documentation on the current system settings and file according to organisational guidelines</p>
4. Maintain and improve network security	<p>4.1 Review logs and audit reports to identify and record security incidents, intrusions and attempts</p> <p>4.2 Carry out spot checks and audits to ensure that procedures are not being bypassed</p> <p>4.3 Document newly discovered security threats vulnerabilities and recommendations in a report for presentation to superior to gain approval recommendations to be implemented</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Recognises and interprets textual information to determine specific information about security incidents
Writing	<ul style="list-style-type: none">Accurately records test results and develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	<ul style="list-style-type: none">Articulates information clearly, using specific and relevant language suitable to audience to convey recommendations and provide verbal reportsUses listening and questioning techniques to confirm understanding

Numeracy	<ul style="list-style-type: none"> Extracts and evaluates the mathematical information embedded in tasks and texts
Get the work done	<ul style="list-style-type: none"> Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks Recognises and responds to predictable routine problems related to own role in the immediate work context, including detecting intrusion and debugging the system when required

Unit Mapping Information

Assessment Requirements for ICTNWK421 Install, configure and test network security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- With respect to one network:
 - identify and analyse network security threats and vulnerabilities
 - make recommendations to management to address network security deficiencies and fulfil organisational asset security requirements
 - implement perimeter security, network hardening measures and authentication and user account controls according to identified deficiencies and organisational asset security requirements
 - design and conduct testing to verify the key function and performance measures of network security
 - debug network security according to test results
 - review logs and audit reports to identify and record five security incidents, intrusions and attempts
 - undertake three spot checks and audits to ensure that procedures are not being bypassed
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Security requirements of the organisation, including:
 - organisational structure and functions
 - features and capabilities of networking technologies
 - privacy issues and privacy legislation
 - security information sources
 - risk analysis

- Virtual private network (VPN) issues, including bandwidth and dynamic security environment
- Configuration of routers and switches
- Current hardware and software security products, including general features and capabilities
- Function and operation of VPN concepts including encryption, firewalls, packet tunnelling, and authentication
- Network protocols and operating systems
- Security perimeters and functions
- Security protocols, standards and data encryption
- Security threats including eavesdropping, data interception, data corruption and data falsification
- Types of VPNs including site-to-site and user-to-site internet traffic and extranets
- Systems and procedures related to:
 - audit and intrusion detection systems
 - auditing and penetration testing techniques
 - cryptography
 - local area network (LAN), wireless local area network (WLAN) and wide area network (WAN)
 - screened subnets
 - transmission control protocol, internet protocol (TCPs/IPs), and applications
 - virus detection software

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Site where secure network installation, configuration, and monitoring may be conducted
- Network security documentation
- Organisational asset security requirements and information on organisational structure and functions
- Equipment specifications
- Network components
- Testing software
- Individual manager in the organisation
- Firewalls (hardware and software)
- Live network
- Networked (LAN) computers
- WAN service point of presence

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK529 Install and manage complex ICT networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to install and manage enterprise-wide information and communications technology (ICT) networks.

It applies to individuals with excellent ICT skills who are working as senior networking staff responsible for the sustainability of an organisation by using virtualisation technologies in complex computing environments of medium- to-large companies to provide network services and resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and design a complex network to meet business requirements	1.1 Review network design, business requirements and latest vendor technical specifications for network components 1.2 Research options available for providing the network functionality required 1.3 Plan network implementation to provide network services and resources to meet business requirements

ELEMENT	PERFORMANCE CRITERIA
2. Design and implement a security strategy	2.1 Analyse requirements for internal and external security 2.2 Design security strategy to meet requirements 2.3 Implement security strategy 2.4 Undertake ongoing monitoring of the viability and reliability of network security, through testing and use of technical tools 2.5 Continually monitor internal and external network access for security breaches
3. Install and configure a complex network to meet business requirements	3.1 Check and install cabling and associated components according to industry standards 3.2 Install and configure servers, routers, switches or other devices to provide internet protocol (IP) addressing and routing 3.3 Install and configure servers, routers, switches or other devices to provide name resolution 3.4 Install and configure servers, routers, switches or other devices to provide network services 3.5 Install and configure remote access services 3.6 Install and configure devices to provide data management services
4. Provide integrated network services across a complex network	4.1 Integrate multiple network services across network 4.2 Analyse and resolve interoperability issues 4.3 Optimise performance 4.4 Rectify security conflicts arising from integrating services
5. Plan, design and implement voice and video business communications system	5.1 Install software and configure and test voice over internet protocol (VoIP) and videoconferencing services 5.2 Incorporate the use of a communications server to provide real-time multimedia communications 5.3 Select common voice and videoconferencing codecs according to standards and practices
6. Manage and support a complex network	6.1 Identify and evaluate appropriate network management tools to assist in the administration of the complex network 6.2 Select and install network management tools according to industry and organisational standards 6.3 Set and monitor alerts and logs

ELEMENT	PERFORMANCE CRITERIA
	6.4 Capture and analyse network performance data 6.5 Implement automated server updates 6.6 Implement desktop management policies 6.7 Implement automated virus checking 6.8 Use remote management tools
7. Test network functionality and obtain sign-off	7.1 Test network functionality and record results 7.2 Record results of network functionality test 7.3 Complete network documentation according to organisational standards

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 6.6	<ul style="list-style-type: none"> Recognises and interprets technical and organisational documentation to determine and confirm job requirements
Writing	2.2, 7.1-7.3	<ul style="list-style-type: none"> Develops a broad range of material, including recording test results for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	2.1	<ul style="list-style-type: none"> Uses listening and questioning skills to confirm understanding for requirements, and participates in a verbal exchange of ideas/solutions
Numeracy	6.4	<ul style="list-style-type: none"> Interprets numerical data when taking measurements and evaluating the performance and interoperability of network services
Navigate the world of work	3.1, 5.3, 6.2, 7.3	<ul style="list-style-type: none"> Recognises and responds to both explicit and implicit protocols within familiar work contexts and appreciates the importance of identifying and responding to protocols in new situations
Get the work done	1.1, 1.3, 2.3-2.5, 3.1-3.6, 4.1-4.4,	<ul style="list-style-type: none"> Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and

	5.1-5.3, 6.1-6.8, 7.1	<p>enhance or reduce risks</p> <ul style="list-style-type: none"> • Actively identifies, creates and utilises linkages to enhance knowledge sharing, idea creation, individual and collective engagement, and work outcomes • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Uses nuanced understanding of context to recognise anomalies in a network environment and subtle deviations to normal expectations, focussing attention and remedying problems as they arise
--	-----------------------	---

Assessment Requirements for ICTNWK529 Install and manage complex ICT networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design and implement a complex network that involves integrating multiple network services to meet business requirements
- design and implement an appropriate security strategy for a complex network
- monitor and test the performance of aspects of the solution
- provide ongoing management and support of the network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe firewall configurations and their application
- summarise internet protocol (IP) addressing and network configuration
- summarise and apply the following aspects of a network:
 - infrastructure
 - load balancing for applications
 - security
 - server operating systems
 - service configuration, including:
 - domain name system (DNS)
 - dynamic host configuration protocol (DHCP)
 - file transfer protocol (FTP)
 - network time protocol (NTP)
 - server messages block (SMB)

- mail
- proxy
- web
- service management
- identify and describe troubleshooting tools and techniques, including network diagnostic utilities
- outline the purpose of user authentication and directory services
- describe voice over internet protocol (VoIP)
- describe virtual private network (VPN).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- network design and business requirements documents
- a complex network or hardware and software required to build a network involving multiple servers, multiple physical locations (or simulation of) and a combination of network services.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNW K536 Plan, implement and test enterprise communication solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to manage the deployment and administration of enterprise communication solutions. It includes email and remote access email, web portal or content management solution, and enterprise collaboration tools.

It applies to individuals working as information and communications technology (ICT) professionals who configure and deploy software to supply email, collaboration and messaging services to meet the needs of enterprise users.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for enterprise communication solutions	1.1 Research and identify enterprise communication solutions to meet organisational requirements 1.2 Evaluate and compare enterprise communication solutions against organisational requirements 1.3 Select enterprise communication solutions to address

	<p>organisational requirements</p> <p>1.4 Acquire enterprise communication solutions in accordance with organisational requirements</p> <p>1.5 Consult with stakeholders to develop implementation plan addressing the organisational requirements</p>
2. Implement enterprise communication solutions	<p>2.1 Implement and configure enterprise communication solutions in accordance with implementation plan</p> <p>2.2 Determine if implementation of enterprise communication solutions meets implementation plan and organisational requirements and modify implementation to address variance</p>
3. Test and monitor implementation of enterprise communication solutions	<p>3.1 Test enterprise communication solutions to determine if enterprise communication solutions are operating correctly according to system specifications</p> <p>3.2 Monitor and analyse performance and logs of enterprise communication solutions to determine if organisational requirements are met</p> <p>3.3 Modify enterprise communication solutions to address instances where organisational requirements are not met</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Gathers, interprets and analyses technical documentation to test and implement enterprise tools successfully
Numeracy	<ul style="list-style-type: none"> Selects and interprets mathematical information that may be partly embedded in a range of familiar and less familiar tasks to evaluate performance and interoperability of communication services
Get the work done	<ul style="list-style-type: none"> Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to plan, design and implement a communications solution Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals and begins to recognise strategic and operational applications Uses specialised software to ensure an enterprise can engage with geographically distributed team members Initiates standard procedures when responding to a predictable range

	of network and software compatibility problems
--	--

Assessment Requirements for ICTNWK536 Plan, implement and test enterprise communication solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Plan, implement and test enterprise communication solutions including:
 - one email system including:
 - preparing existing networks
 - configuring users, mailboxes, address lists, distribution lists, user constraints, remote email access, message integrity and antispam controls, antivirus controls and anti-phishing controls
 - one content management system including:
 - planning namespace and server roles
 - configuring access, security, network infrastructure and customisations
 - providing high availability and disaster recovery
 - one collaboration tool including:
 - planning namespace and server roles
 - configuring access, security, network infrastructure and customisations
 - providing high availability and disaster recovery

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key requirements of an ICT implementation plan
- Features and purpose of an email server application
- Features and purpose of organisational collaboration tools
- Features and purpose of web portal or content management software
- Testing processes
- Key principles of data protection, including:

- backup and restoration
- firewall configuration
- security and authentication practices
- Important features of network administration, including:
 - load balancing for applications
 - server and directory administration
 - infrastructure
 - web server administration
 -

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Site where server applications can be installed
- Networked servers
- Organisational requirements for email solution, remote access to email, content management system, and collaboration tools.
- Details relating to enterprise email requirements including users, mailboxes, address lists, distribution lists, and user constraints
- Antivirus, antispam, and anti-phishing controls
- Enterprise collaboration software
- Workstations
- Switch
- Wide area network (WAN) service point of presence
- Individual stakeholders to consult

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and implement troubleshooting and monitoring strategies to ensure reliability and performance on advanced integrated internet protocol (IP) networks.

It applies to individuals with advanced information and communications technology (ICT) skills who are working as advanced support engineers, network support specialists and ICT network engineers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan the strategies for troubleshooting and monitoring the performance of advanced integrated IP networks	1.1 Develop a plan to monitor and manage the IP network to optimise its performance and reliability 1.2 Plan the isolation of network segments for troubleshooting procedures 1.3 Plan the testing sequences and scenarios of network

ELEMENT	PERFORMANCE CRITERIA
	infrastructure 1.4 Select appropriate network testing and monitoring tools, and software application to suit the specific network troubleshooting and monitoring sequence
2. Manage and monitor troubleshooting strategies for complex enterprise networks	2.1 Manage and monitor strategies for network monitoring structure 2.2 Produce a routine internetwork operating system (IOS) device maintenance plan to include monitoring of routing protocols and router configurations 2.3 Isolate sub-optimal internetwork operations at the appropriate open systems interconnection (OSI) model layer 2.4 Produce a plan for troubleshooting and monitoring security issues related to IOS services for mission critical applications 2.5 Produce a plan for troubleshooting and monitoring internet protocol version 6 (IPv6) and version 4 (IPv4) interoperability
3. Implement test plans for advanced network solutions	3.1 Test switch-to-switch connectivity, access ports and loop prevention for the virtual local area network (VLAN) based solution 3.2 Test private VLANs 3.3 Test switch virtual interfaces (SVI) 3.4 Test switch support of advanced services 3.5 Troubleshoot switch configuration

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2-1.4, 2.2, 2.4, 2.5	<ul style="list-style-type: none">Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	1.1, 2.2, 2.4, 2.5	<ul style="list-style-type: none">Develops a broad range of material, including troubleshooting plans for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations

Numeracy	3.1-3.4	<ul style="list-style-type: none"> Interprets numerical data when testing plans for advanced network solutions, including taking measurements to evaluate performance and interoperability of network
Get the work done	1.2-1.4, 2.1-2.5, 3.1-3.4	<ul style="list-style-type: none"> Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand the uses and potential of new technology Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to generate possible solutions depending on differing operational contingencies, risk situations and environments

Unit Mapping Information

Assessment Requirements for ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan and monitor internet protocol (IP) networks for performance and reliability
- evaluate, design and implement a troubleshooting structured plan
- use network testing and monitoring tools
- produce a maintenance plan for monitoring routing protocols and configurations
- implement tests of advanced network solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise advanced network solutions
- explain configuration, verification and troubleshoot procedures to undertake:
 - router operation and routing
 - virtual local area networks (VLANs) switching and inter-switching communications
- outline deployment schemes
- explain iDevice operating system (iOS) and IP networking models
- explain IOS services
- explain IP network topologies, architectures and elements
- identify and describe network testing and monitoring tools
- outline networking standards and protocols
- summarise threat mitigation strategies
- outline VLAN technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a site where complex network installation may be conducted
- hardware and software
- organisational guidelines
- computers
- local area network (LAN) and wide area network (WAN) systems, including voice and video hardware and software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK615 Design and configure desktop virtualisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design, and configure, the desktop virtualisation technologies needed to support an enterprise virtualisation business solution.

It applies to senior networking staff responsible for increasing the sustainability of an enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare the design specifications and plan to implement enterprise desktop environments	1.1 Research the available desktop virtualisation software vendors 1.2 Evaluate the desktop virtualisation environment 1.3 Analyse and compare, the features and components of desktop virtualisation environment 1.4 Identify the desktop-specific design objectives, requirements and limitations 1.5 Document the design infrastructure, according to the

ELEMENT	PERFORMANCE CRITERIA
	enterprise requirements 1.6 Plan implementation and deployment, using the recommended design
2. Implement and configure the desktop virtualisation infrastructure and services	2.1 Assess the desktop virtualisation software and analyse its relevance to the enterprise requirements 2.2 Install and configure the desktop virtualisation environment 2.3 Implement specific features and functions, in order to provide suitable solutions to identified problems 2.4 Implement and manage the testing process 2.5 Apply desktop virtualisation technologies, to an accepted industry standard
3. Implement the application virtualisation	3.1 Plan the implementation and deployment of the application virtualisation software 3.2 Configure and test the application virtualisation system's components 3.3 Maintain, update and tune, the system's components

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1	<ul style="list-style-type: none"> Organises, evaluates and critiques ideas, and information, from a wide range of complex texts
Writing	1.5, 3.1	<ul style="list-style-type: none"> Demonstrates sophisticated writing skills by selecting the appropriate conventions and stylistic devices, to express the precise meaning
Navigate the world of work	1.5, 2.1, 2.5	<ul style="list-style-type: none"> Works autonomously, making high-level decisions to achieve, and improve, organisational goals Develops and implements strategies that ensure that organisational policies, procedures and regulatory requirements are being met
Get the work done	1.2-1.4, 1.6, 2.2-2.5, 3.2, 3.3	<ul style="list-style-type: none"> Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands

		<ul style="list-style-type: none">• Makes high-impact decisions in a complex and diverse environment, using input from a range of sources• Identifies the key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision-making strategies, where appropriate• Uses digital technologies to manage business operations, and actively investigates new technologies for strategic and operational purposes
--	--	---

Assessment Requirements for ICTNWK615 Design and configure desktop virtualisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design, configure and manage the implementation of the virtualised enterprise desktop environment
- analyse and critically evaluate, the features and functions of the virtualised enterprise desktop environment
- plan, configure and maintain, the application virtualisation software.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- research current government and industry policies, and guidelines, relating to the development of efficient and reliable, information and communications technology (ICT) environments
- research the current technologies and processes designed to produce an efficient and reliable ICT environment
- determine the structure, functions and business organisation of the client
- identify and apply, the available tools and software applications required to manage the virtual desktop environment
- formulate the configuration of software applications required to manage the virtual desktop environment
- formulate the configuration required to integrate virtual machines into the existing network design.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site where industry-specific technologies may be used
- industry-specific technologies currently used in the industry
- documents detailing workplace health and safety (WHS) standards, environmental guidelines and enterprise requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTOPN403 Prepare activity plans and specifications for a fibre to the x installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare the activity plans and specifications required by field technical staff to deploy a fibre to the x (FTTx) installation for optical access networks.

It applies to individuals who work in a supervisory capacity within a team environment. They are technically skilled and integral to the delivery of a very high speed broadband through the access network for the National Broadband Network (NBN) initiative.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for FTTx planning tasks	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Scope work by obtaining project plan from appropriate personnel and arrange for site access to comply with security arrangements

	<p>1.3 Notify appropriate personnel of identified safety hazards at the worksite</p> <p>1.4 Obtain tools and safety equipment and material to perform tasks safely and efficiently</p> <p>1.5 Select and use required protective equipment and make site safe and secure for installation work</p> <p>1.6 Identify and select plant and machinery for installation work activities</p>
2. Plan FTTx activities and develop specifications	<p>2.1 Follow work health and safety (WHS) and environmental requirements for given work and identify and avoid other services</p> <p>2.2 Inspect proposed cable route visually according to cable plan and identify barriers to the cable installation</p> <p>2.3 Modify cable plan, if required, and notify appropriate personnel</p> <p>2.4 Prepare installation activities for FTTx provisioning according to project plan</p> <p>2.5 Prepare installation specifications according to safe work practices and manufacturer's instructions to include optical fibre cable size, distribution area (DA), distribution joint including lead-in multipoint serving area (DLMSA), enclosures, location of optical network terminations (ONT), location and type of fibre distribution hub (FDH) and optical splitter provisioning</p> <p>2.6 Verify cable length from customer access network fibre centre to end-user ONT is within 20 km operating limit</p> <p>2.7 Consult with appropriate personnel to confirm project scope, installation requirements and installation specifications according to project plan</p>
3. Complete documentation and obtain sign-off	<p>3.1 Complete and present updated planning activities documentation to authorised personnel</p> <p>3.2 Complete and provide updated specification documentation to vendors for supply of material and resources</p> <p>3.3 Submit documentation to appropriate person for approval and sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Reading	1.1, 2.2, 2.5, 2.7	<ul style="list-style-type: none"> Interprets textual information from relevant sources to plan, identify all job requirements and adhere to procedures and standards
Writing	1.2, 1.3, 2.3, 2.7, 3.1, 3.2	<ul style="list-style-type: none"> Accurately completes relevant reports and documentation using clear and technically specific language and numerical data
Oral Communication	1.2, 1.3, 2.3, 2.6, 2.7, 3.1	<ul style="list-style-type: none"> Uses listening and questioning skills to confirm understanding of requirements, participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel and customers
Numeracy	2.6	<ul style="list-style-type: none"> Uses simple mathematical equations to determine equipment and installation requirements
Navigate the world of work	1.1, 1.3-1.5, 2.1, 2.5	<ul style="list-style-type: none"> Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in the immediate work context Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context with specific reference to workplace safety
Interact with others	3.1-3.3	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.2, 1.4-1.6, 2.2, 2.4, 2.6, 2.7	<ul style="list-style-type: none"> Takes responsibility for own workload, negotiating some key aspects with others Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals Makes decisions in relatively complex situations, taking a range of constraints into account Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts Reflects on ways digital systems and tools are used, or could be used to achieve work goals and begins to recognise strategic as well as operational applications

Unit Mapping Information

Assessment Requirements for ICTOPN403 Prepare activity plans and specifications for a fibre to the x installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine the scope of the installation
- visually inspect proposed cable route
- prepare installation activities for fibre to x (FTTx) provisioning
- prepare and document FTTx designs and specifications and submit for approvals
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline properties of passive optical devices, including splitters and couplers
- identify FTTx installation equipment, including tools and safety equipment
- explain FTTx specifications
- outline legislative privacy, safety and environmental requirements including:
 - WHS requirements relating to handling of optical fibre and using laser optical sources
 - other personal safety issues
 - plant and equipment safety to be used in installation plans
 - discussion of manufacturer's requirements for safe operation of equipment
- summarise operation of optical transmitters and receivers
- identify organisational policy and procedures relevant to this work
- discuss propagation of light in optical communication systems
- summarise the role of optical transmitters and receivers in optical communication systems
- explain the concept of wavelength division multiplexing (WDM)

- discuss the importance of a knowledge of site engineering
- describe typical issues and challenges in preparing an activity plan for a site
- demonstrate a knowledge of the workplace and industry environment and their relationship to this work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications \-- Optical Networks field of work and include access to:

- vendor product information and installation guides
- relevant regulatory and equipment documentation impacting installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG202 Plan, organise and undertake work activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, organise and undertake work activities in a telecommunications environment, including voice, video and data networks in domestic, commercial or industrial installations.

It applies to individuals who plan, organise and undertake work on client premises and who may be part of a project team responsible for cabling equipment deployment in network infrastructure, such as broadband provisioning, wireless mobile and data networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to undertake work activities	1.1 Prepare work requirements from job request or work orders and confirm with appropriate parties, including client and other appropriate parties and/or by site inspection 1.2 Apply and monitor work health and safety (WHS) standards, statutory requirements, relevant legislation, codes, regulations and

	<p>standards, and enterprise procedures throughout work procedure</p> <p>1.3 Procure resources required to satisfy job plan for compliance with job specifications</p> <p>1.4 Coordinate requirements, including requests for equipment isolation, with others involved or affected by the work according to enterprise requirements</p>
2. Coordinate and undertake work	<p>2.1 Coordinate work activities with appropriate parties according to enterprise procedures, and job and environmental requirements</p> <p>2.2 Undertake and monitor tasks to comply with plans, work requirements and enterprise procedures</p>
3. Complete work	<p>3.1 Finalise work and restore worksite according to enterprise procedures and job requirements</p> <p>3.2 Notify appropriate parties of work completion according to enterprise procedures and job requirements</p> <p>3.3 Complete job records, costing data and necessary reports according to enterprise procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance criteria	Description
Reading	1.2, 2.1, 2.2, 3.1	<ul style="list-style-type: none"> Recognises and interprets visual and written text in a variety of forms to determine key information and job requirements
Writing	1.1, 1.3, 1.4, 2.1, 3.2, 3.3	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language to convey explicit information
Oral Communication	1.1-1.4, 2.1, 3.2	<ul style="list-style-type: none"> Explains information using relevant language suitable for specific audiences
Numeracy	3.3	<ul style="list-style-type: none"> Uses basic mathematical calculations to determine job requirements and costs
Navigate the world of work	1.2, 1.4, 2.1, 2.2, 3.1-3.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own

		work context with specific reference to workplace safety
Get the work done	1.1, 1.3, 1.4, 2.1	<ul style="list-style-type: none"> Plans a range of routine tasks, accepting goals and aiming to achieve them efficiently Implements standard procedures for routine decisions Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts Understands the purpose and specific functions of common digital tools used in some work contexts

Assessment Requirements for ICTPMG202 Plan, organise and undertake work activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and prepare for work activities
- coordinate and undertake work activities, applying all related work health and safety (WHS) requirements and work practices
- complete all documents and reports for work activities according to organisation procedures
- demonstrate alignment with job request and consideration of client needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate tools, plant, equipment and materials required to do the work
- describe enterprise permit procedures and recording procedures
- identify and describe WHS requirements for work activities
- identify relevant engineering and design practices and procedures
- identify relevant statutory requirements
- explain the team communication process and goals
- list personal time management techniques
- outline work planning and organisation theory.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which work may be conducted
- equipment currently used in industry
- relevant regulatory and organisational procedures and equipment documentation that impact on the work undertaken.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG402 Schedule installation of customer premises equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge to effectively schedule the installation of customer premises equipment (CPE), including planning, provisioning and monitoring of customer premises installations.

It applies to individuals with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan installation project	1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work 1.2 Plan work schedules for relevant parties to provision services and

	<p>deliverables in correct sequence for satisfactory project completion within specified timeframe</p> <p>1.3 Order materials in advance of needs to avoid work delays</p> <p>1.4 Negotiate provision and connection of required network capacity and facilities with network provider</p> <p>1.5 Determine customer equipment types and quantities, and organise timing of delivery according to work schedule timeframe</p> <p>1.6 Determine essential criteria for selecting labour resources to satisfy regulatory, enterprise and customer requirements</p> <p>1.7 Calculate installation workloads to complete task within specified timeframe</p>
2. Provision resources for installation project	<p>2.1 Arrange for connection of network services to customer equipment</p> <p>2.2 Coordinate logistics associated with delivery of material to site according to installation timeframe</p> <p>2.3 Allocate labour to installation as determined in planning stage</p> <p>2.4 Ensure that all installation personnel are advised of installation and customer requirements</p>
3. Monitor and adjust resource allocations	<p>3.1 Adjust labour resources as necessary to meet budget and completion timeframe</p> <p>3.2 Monitor work progress against project schedules and budgets</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Reading	1.1, 1.5, 1.6	<ul style="list-style-type: none"> Analyses and interprets various textual material to determine key information, requirements and responsibilities Researches relevant codes and standards to ensure latest requirements, regulations and standards are adhered to
Writing	1.2, 1.4, 1.5, 1.6, 2.1, 2.2, 2.4	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language to convey explicit information
Oral Communication	1.4, 1.5, 1.6, 2.1, 2.2, 2.3, 2.4	<ul style="list-style-type: none"> Explains information using relevant language suitable for specific audiences
Numeracy	1.7, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> Uses mathematical calculations to determine staffing and logistical requirements and to plan

		for the future
Navigate the world of work	1.1, 1.6	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context with specific reference to workplace safety
Get the work done	1.1, 1.2, 1.3, 1.5, 1.6, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Applies formal processes when planning more complex tasks, producing plans with logically sequenced steps, and reflecting some awareness of time and resources constraints Implements standard decisions for routine tasks Initiates standard procedures when responding to familiar problems within the immediate context Recognises general design and operating principles of digital tools and uses this information when planning the installation of new technologies

Assessment Requirements for ICTPMG402 Schedule installation of customer premises equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- access relevant information and plan an installation project
- schedule work for the installation team according to the plan
- organise supply of materials in a timely manner
- arrange for connection of network services
- monitor and apply contingencies if required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the importance and requirements of Australian Communications and Media Authority (ACMA) licensing
- outline the use of computers and application of software programs used in the telecommunications industry
- outline industry cabling practices
- identify work health and safety (WHS) procedures
- outline the stages of project management including:
 - phases of project management
 - roles and responsibilities within project management
 - project reporting
- identify telecommunications components and assemblies
- identify telecommunications customer premises equipment (CPE).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a work site where scheduling may be conducted
- relevant hardware and software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG403 Manage the delivery of network infrastructure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage the delivery of network infrastructure, including scoping the project, developing a project brief, managing the project and directing the activities of installation staff, building workers, contractors, manufacturers and vendors.

It applies to individuals who work in appropriate project management roles associated with access and core networks, including switching and transmission via optical fibre, radio, microwave and satellite.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope network infrastructure requirements	1.1 Determine requirements of project from client and approved network plan 1.2 Assess current access network conditions to determine existing

	<p>network capacity and capability</p> <p>1.3 Analyse site survey data and geographical information where necessary to assess suitability of site to design requirements</p> <p>1.4 Assess risk of barriers to plan realisation to ensure delivery of network infrastructure project is achievable</p> <p>1.5 Analyse impact on planning of relevant legislation and associated operational codes</p> <p>1.6 Produce scoping document with consideration to new technology or technology features required in project</p>
2. Develop project brief	<p>2.1 Develop planning options considering current and new technology, facilities, features, and present and future needs</p> <p>2.2 Conduct cost-benefit studies to guide decision making processes according to sound business practice</p> <p>2.3 Discuss project brief with client, as required, and obtain approval of planning options</p> <p>2.4 Produce planning specifications relating to location, route, area, product and/or platform</p> <p>2.5 Estimate timing, costing and operating budget according to enterprise policy</p> <p>2.6 Prepare final project brief and present to operational staff for implementation</p>
3. Manage project	<p>3.1 Define roles and responsibilities of stakeholders within terms of project</p> <p>3.2 Establish reporting and communications line to ensure project is effectively managed</p> <p>3.3 Review and continually monitor progress of project against deliverables and timelines, and invoke contingencies if required</p> <p>3.4 Complete project documents in line with enterprise standards and guidelines</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Reading	1.1, 1.3, 1.5, 1.6, 3.3, 3.4	<ul style="list-style-type: none"> Interprets and comprehends visual and written content in a variety of forms to determine key information, requirements and responsibilities Researches relevant codes and standards to ensure latest requirements, regulations and standards are adhered to
Writing	1.6, 2.1, 2.3-2.6, 3.2, 3.4	<ul style="list-style-type: none"> Develops accurate technical documents for a specific audience using clear and specific instructions and data in a format and sequence that convey explicit information
Oral Communication	2.3, 2.6, 3.1, 3.2	<ul style="list-style-type: none"> Elicits the views and opinions of others using listening and questioning skills Clearly articulates information using relevant language with a level of negotiation
Numeracy	1.3, 2.2, 2.4, 2.5, 3.3	<ul style="list-style-type: none"> Uses mathematical equations to estimate and cost numerical information Uses financial analysis skills to identify potentially misleading information, review financial outcomes and develop material based on verified data
Navigate the world of work	1.5, 2.5, 3.4	<ul style="list-style-type: none"> Monitors adherence to legal and regulatory rights and responsibilities, and organisational policies and procedures, and considers own role in terms of its contribution to the broader goals of the work environment
Interact with others	2.6	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose
Get the work done	1.1-1.4, 1.6, 2.1, 2.4, 2.5, 3.1-3.3	<ul style="list-style-type: none"> Plans a range of routine tasks, accepting stated goals and aiming to achieve them efficiently Takes responsibility for the outcomes of routine decisions related directly to own role Recognises and anticipates an increasing range of familiar problems, their symptom and causes, actively looking for early warning signs and implementing contingency plans Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications

Assessment Requirements for ICTPMG403 Manage the delivery of network infrastructure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine scope of network infrastructure requirements
- accurately analyse and document considerations in project specifications and the impact of legislative and environmental conditions on the project plan
- prepare a project brief outlining specifications, timeframes, costing and operating budget
- manage the delivery of network infrastructure to completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline Australian Communications and Media Authority (ACMA) licensing requirements
- explain common client telecommunications applications and related equipment
- identify correct computer operation
- describe the workplace and industry environment
- outline industry cabling practices
- explain leasing versus purchase options
- identify legislative and environmental impacts, including options for green information and communications technology (ICT) installations
- outline network and transmission equipment, network topologies, interfaces and interconnect solutions
- describe work health and safety (WHS) procedures
- identify performance parameters and typical faults in equipment and related connection and transmission media, and various test equipment types
- explain the process of project management
- identify telecommunications components and assemblies

- identify warranty information and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which projects may be conducted
- relevant databases, legislative requirements and other project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG503 Prepare a project brief

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare a brief for realising a telecommunications project, including costing, vendor and technology choices, scheduling and resourcing.

It applies to individuals who may work under limited supervision and have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan project brief	1.1 Contact client to obtain project details and approved network plan 1.2 Assess current network conditions 1.3 Analyse site survey data and geographical information to initiate studies if required

	<p>1.4 Assess barriers to plan realisation</p> <p>1.5 Analyse impact of relevant legislation, codes, regulations and standards on planning processes</p>
2. Develop preliminary project brief	<p>2.1 Develop project specifications, including new technology, according to client requirements</p> <p>2.2 Draft sketch plan according to enterprise practice for area in question</p> <p>2.3 Clarify project brief with client as required</p> <p>2.4 Present final report with option for approval before proceeding with project brief</p>
3. Assess tenders	<p>3.1 Follow process for seeking quotes or issuing tenders for completion of project</p> <p>3.2 Assess quotes or tenders against project criteria and any proposed variations</p> <p>3.3 Examine detailed project costing estimates to ensure that budget parameters are attained</p> <p>3.4 Assess competitive tenders with consideration to meet specified timeframes</p> <p>3.5 Obtain tender approval from client</p>
4. Monitor contract progress and completion	<p>4.1 Monitor contract activity with progress against specifications</p> <p>4.2 Establish and maintain regular liaison with project manager and site supervisor</p> <p>4.3 Discuss contract problems or difficulties with project manager and contractor as required</p> <p>4.4 Negotiate and implement contract variations</p> <p>4.5 Prepare project completion advice in conjunction with project manager, installation manager and operational staff</p> <p>4.6 Undertake quality audit of project and submit any recommendations for improvement according to enterprise procedures</p> <p>4.7 Prepare final report on project outcomes and achievement</p> <p>4.8 Present report to client and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 1.5, 3.2-3.4, 4.1, 4.6	<ul style="list-style-type: none"> • Draws on a broad range of strategies to build and maintain understanding throughout complex texts • Identifies relevant information and extrapolates content to determine project impact, provide recommendations and confirm requirements
Writing	1.1, 2.1-2.4, 3.1, 3.5, 4.2-4.7	<ul style="list-style-type: none"> • Generates complex written texts, demonstrating control over a broad range of writing styles and purposes • Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning
Oral Communication	1.1, 2.3, 2.4, 3.5, 4.2-4.6	<ul style="list-style-type: none"> • Clearly articulates information using relevant language suitable for specific audiences and checks for understanding • Participates in a verbal exchange of ideas and solutions and uses detailed and clear language to clarify and present information according to requirements and audience
Numeracy	1.3, 2.1, 2.2, 3.2-3.4, 4.1, 4.6	<ul style="list-style-type: none"> • Uses highly developed numeracy skills to interpret complex financial information and perform difficult calculations • Performs mathematical calculations to analyse labour, costs and quantities, and accurately process costs and estimates
Navigate the world of work	1.5, 3.1, 4.6	<ul style="list-style-type: none"> • Considers legal requirements and organisational policies and procedures relevant to own role
Interact with others	2.4, 4.8	<ul style="list-style-type: none"> • Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.2-1.4, 2.1, 3.2, 3.4, 4.1, 4.6	<ul style="list-style-type: none"> • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Develops plans to manage relatively complex, non-routine tasks • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem rather than the

		<p>symptom</p> <ul style="list-style-type: none">• Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities

Assessment Requirements for ICTPMG503 Prepare a project brief

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- develop a project brief for a telecommunications project
- analyse and document considerations in project specifications
- apply legislative and environmental conditions to project brief development
- appropriately assess tenders
- monitor contract work to completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the key aspects of common client telecommunications applications and related equipment
- discuss the telecommunications workplace and industry environment, and how it affects project design
- describe leasing versus purchase options
- identify legislative and environmental impacts, including options for green information and communications technology (ICT) installations
- identify and discuss the key features of network and transmission equipment
- discuss a variety of network topologies, interface and interconnect solutions
- describe the performance parameters and typical faults in equipment and related connection and transmission media, and various test equipment types
- identify the key features of warranty information and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which projects may be conducted
- relevant databases, legislative requirements and other site and project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG301 Apply introductory programming techniques

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create simple applications or games.

It applies to individuals with responsibility for creating applications or games and includes creating code, using programming standards, testing, and debugging.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply language syntax and layout	1.1 Apply basic language syntax rules 1.2 Use language data types, operators, and expressions to create a clear and concise code 1.3 Apply the variables and variable scope 1.4 Use the library functions in a program 1.5 Use commenting to create a clear meaning to the code
2. Apply control	2.1 Apply the language syntax for sequence, selection and iteration

ELEMENT	PERFORMANCE CRITERIA
structures	constructs 2.2 Use logical operators to create expressions for use in selection and iteration constructs
3. Code using standard algorithms	3.1 Develop algorithms that use the sequence, selection and iteration constructs 3.2 Create and use arrays 3.3 Code the standard sequential access algorithms, for reading and writing text files, including end-of-file detection loops 3.4 Apply string manipulation
4. Test the code	4.1 Use debugging techniques to trace code execution and examine the variable contents to detect, and correct, errors 4.2 Create and conduct simple tests, to confirm that the code meets the design specification 4.3 Document the tests performed and results achieved
5. Create an application or game	5.1 Design an algorithm in response to basic program specifications 5.2 Develop the application or game to meet the program specification 5.3 Test and confirm that the application, or game, meets the initial specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	1.2, 1.5, 4.3	<ul style="list-style-type: none"> Prepares workplace documentation, according to organisational formats and protocols Creates program code using the correct syntax
Numeracy	2.2, 3.1, 5.1	<ul style="list-style-type: none"> Uses mathematical formulae to ensure that the program specifications are met
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.1, 3.2, 3.3,	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes

	3.4, 4.1, 4.2, 5.2, 5.3	<ul style="list-style-type: none">• Uses problem-solving techniques to analyse the required outcomes, in order to determine the correct program code• Uses a formal decision-making process, identifying and evaluating several choices against a limited set of criteria, when selecting syntax• Evaluates the effectiveness of decisions in terms of how well they meet stated design specifications• Uses the features of digital tools to complete complex tasks
--	-------------------------	---

Assessment Requirements for ICTPRG301 Apply introductory programming techniques

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply programming language syntax, sequence, selection and iteration control structures to the development of an application, or game
- produce an application, or game, that is designed and built from the program specifications
- confirm that the created application, or game, meets the original program specifications, and obtain user sign-off for the completed program.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe common games programming languages, their syntax, and command structure
- describe the development of small-sized applications or games.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the programming and software development industry, and include access to:

- the requirement documents
- the site documents
- software development tools currently used in industry, such as a compiler
- an independent development environment (IDE).

Assessors must satisfy NVR/AQTF assessor requirements.

ICTPRG430 Apply introductory object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the performance outcomes, skills and knowledge required to undertake introductory programming tasks using an object-oriented programming language including tool usage, documentation, debugging, and testing techniques.

It applies to individuals who are programmers in a variety of fields and who are required to produce simple programs in object-oriented languages.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Determine application design	1.1 Review and clarify user requirements with user 1.2 Plan and determine application design specifications to satisfy user requirements
2. Implement the application design	2.1 Develop application according to application design and organisational code conventions 2.2 Document application according to organisational documentation conventions

3. Test the application	<p>3.1 Develop tests to determine that application logic and syntax satisfies user requirements and application specifications, and modify application to meet user requirements and application specifications</p> <p>3.2 Document tests according to organisational documentation conventions</p>
4. Hand over the application to the user	<p>4.1 Review application against user requirements to ensure user requirements are satisfied</p> <p>4.2 Present application to user and obtain user acceptance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Evaluates, and integrates, information and ideas to construct meaning and selects, and applies reading strategies in relation to design specifications, coding standards, and coding- language documentation
Writing	<ul style="list-style-type: none"> Communicates relationships between ideas and information, in a style appropriate to the audience and purpose, and selects the vocabulary, grammatical structures and conventions appropriate to the text, in relation to coding, recording outcomes, and documenting activities
Numeracy	<ul style="list-style-type: none"> Selects from, and flexibly applies, mathematical and problem-solving strategies and techniques, in a programming context Uses formal written mathematical language and representation, in the context of programming
Navigate the world of work	<ul style="list-style-type: none"> Recognises and follows, explicit and implicit standard and meets expectations associated with own role when developing code that is compliant with standards and guidelines
Get the work done	<ul style="list-style-type: none"> Uses a formal decision-making process, identifying and evaluating several choices against a limited set of criteria, when selecting language data types, operators and expressions Evaluates the effectiveness of decisions, in terms of how well they meet the stated design specifications Uses analytical processes to decide on a course of action when debugging Utilises features within applications in order to develop software programs Recognises, and uses language and symbols, when applying the coding syntax

	<ul style="list-style-type: none">Actively identifies systems, devices and applications with the potential to meet current and future needs regarding programming

Assessment Requirements for ICTPRG430 Apply introductory object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Select and use three language data types, three operators and three expressions
- Use correct language syntax for one sequence, one selection and two iteration constructs
- Use a modular approach to implement the logic for one object operation
- Implement a class that uses arrays of primitive data types twice.
- Read from and write to one text file
- Implement two classes that each contain four instance variables
- Implement one class that contains two options for object construction
- Implement one class that uses user-defined object aggregation
- Implement polymorphism once for code extensibility
- Use one debugging tool
- Apply code and documentation conventions that specify at least 3 aspects, according to organisational requirements
- Perform and document two unit test cases
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Processes and techniques related to object-oriented programming, including the concepts and language
- Syntax language rules, data types structures
- Primitive instance variables
- Class variables
- Small-size application development processes
- Polymorphism and inheritance

- Debugging and testing approaches and techniques
- Constructors
- Object aggregation
- Sequence, selection and iteration constructs
- Organisational documentation
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or workplace. This includes:

- Integrated development environment
- Applications relevant to software development
- Organisational code and documentation conventions
- User requirements
- Individual user to consult

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG531 Prepare for application development using current methods

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to carry out application development using current methods.

It applies to ICT workers and individuals who are programmers in a variety of job roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine application development requirements	1.1 Review detailed organisational requirements and application requirements to select tool sets 1.2 Develop prioritised plan using series of recursive and iterative stages of build to satisfy organisational and application requirements 1.3 Identify and formally allocate responsibilities for features to developers to implement prioritised plan 1.4 Plan and document endorsement of reviews, administration

	schedules, and development milestones
2. Determine the work metrics	<p>2.1 Set development goals in consultation with user</p> <p>2.2 Seek and secure agreement on, and adherence to, single common notation with user</p> <p>2.3 Determine tools, features and techniques for development environment</p> <p>2.4 Plan, develop, document and facilitate version and change-control methods</p> <p>2.5 Plan for and facilitate training and exposure for user via chosen development method</p>
3. Implement the administration method	<p>3.1 Determine and reach agreement on specifications with user</p> <p>3.2 Confirm dates for established milestones with user and secure written agreement</p> <p>3.3 Administer and maintain time-recording and management methodologies</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets, and critically analyses, complex texts and applies the appropriate strategies to construct meaning from complex technical documents
Writing	<ul style="list-style-type: none"> Displays a knowledge of structure and layout, employing a broad vocabulary, grammatical structure and the conventions appropriate to text, when developing documentation
Oral communication	<ul style="list-style-type: none"> Demonstrates flexibility in spoken texts by choosing the appropriate structures and strategies Applies appropriate strategies to extract the main ideas from oral texts when liaising with stakeholders, facilitating training and informing parties on the administration method
Interact with others	<ul style="list-style-type: none"> Recognises and applies, the protocols governing what to communicate, with whom, and how, when liaising with stakeholders, facilitating training and informing parties on administration methods Recognises the importance of joint ownership of the process, and outcomes, and tries to identify common ground, shared goals, and agreement on the best course of action

Get the work done	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation, and manages relevant communication, when implementing a prioritised plan and database, scheduling timelines, allocating responsibilities, and establishing goals and methods Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account Uses analytical processes to decide on a course of action, establishing the criteria for deciding between options Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world, and uses these to troubleshoot and understand, the uses and potential of new technology
-------------------	--

Assessment Requirements for ICTPRG531 Prepare for application development using current methods

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Prepare once for application development using current methods, including the ability to:
 - determine the organisational requirements including selecting and using a tool set, implementing and incorporating a physical database, and identifying the schedule of modules
 - determine the work metrics including development goals, features and techniques most appropriate to the development environment
 - facilitate, plan, develop and document the version and change-control methods
 - facilitate training and exposure for users via chosen method
 - determine and secure agreement as to specifications and milestones
 - inform the production-system parties and secure written acknowledgment
 - administer and maintain time-recording and management
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Commonly used and industry-accepted prototyping tools
- Programming languages commonly used for application development
- Quality assurance practices required for software development
- Iterative software development methodologies
- Training development and facilitation approaches
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Integrated development environment
- Physical database
- Detailed user requirements
- Prototyping software
- Individuals users including to enable training facilitation
- Application requirements document, including the model and scope

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG532 Apply advanced object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to undertake advanced programming tasks using object-oriented programming languages in the development of large-sized applications.

It applies to individuals who are programmers producing complex object-oriented programming in the development of large-sized applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan application implementation	1.1 Plan implementation of application according to system specifications 1.2 Present implementation plan to user and negotiate to reach agreement
2. Implement the application design	2.1 Prepare version control system according to implementation plan 2.2 Develop application according to implementation plan, system

	<p>specifications and organisational code conventions</p> <p>2.3 Document application according to organisational documentation conventions</p>
3. Test the application	<p>3.1 Develop tests to determine application logic and syntax satisfies system specifications</p> <p>3.2 Perform testing on application to determine application satisfies system specifications and address variances</p> <p>3.3 Document tests according to organisational documentation conventions</p>
4. Hand over the application to the user	<p>4.1 Review application against system specifications and address variances</p> <p>4.2 Present the application to the user and obtain user acceptance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets and critically analyses complex texts and applies appropriate strategies to construct meaning from complex standards and guidelines documents
Writing	<ul style="list-style-type: none"> Displays knowledge of structure and layout, employing broad vocabulary, grammatical structure and conventions appropriate to text when creating program documentation and documenting tests and test results Communicates complex relationships between ideas and information, matching the style of writing to the purpose and audience, and displays a knowledge of structure and layout, employing a broad vocabulary, grammatical structure, and the conventions appropriate to text
Numeracy	<ul style="list-style-type: none"> Selects from, and applies, an expanding range of mathematical and problem-solving strategies
Get the work done	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload, taking into account capabilities, efficiencies and effectiveness Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria Uses analytical processes to decide on a course of action, establishing

	<p>criteria for deciding between options</p> <ul style="list-style-type: none">• Understands key principles and concepts underpinning the design and operation of digital systems and tools
--	---

Assessment Requirements for ICTPRG532 Apply advanced object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Plan, implement, test, and handover one application, using two object-oriented languages, including the ability to:
 - implement nested classes
 - design and implement dynamic data structures including a doubly linked list and a binary tree
 - design and implement a data structure utilising a hash function
 - compare three sorting algorithms
 - select and implement a sorting algorithm and a comparator
 - compare three search algorithms
 - select and implement a search algorithm
 - implement two inter-process communication mechanisms
 - select and implement a search algorithm
 - implement a graphical user interface with:
 - drag and drop
 - help files
 - 2D graphics
 - utilise an architectural framework and third party library
 - implement a client-server application including data transfers
 - create tests and debug an application
 - document code
 - utilise a version control system for code and documentation management
 -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Architectural framework for web-enabled application development
- Inter-process communication mechanisms
- Development methodologies for large-size applications
- Testing techniques as applied to distributed application development
- Design patterns
- Graphical user interface design principles
- Client-server model
- Dynamic data structures and associated space and time complexities
- Hash functions and data structures using hash functions and associated space and time complexities
- Sorting algorithms and associated time complexities
- Search algorithms and associated time complexities
- Programming language features and syntax
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Database management system (DBMS)
- Networked computers
- Integrated development environment
- Debugging tools
- System specifications including problem descriptions
- Organisational code conventions
- Organisational documentation conventions
- Individual user
- Access to third party libraries and related documentation
- Access to architectural frameworks and related documentation
- Access to version control system

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN201 Install a satellite antenna

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assemble, connect, align and test equipment according to plans, specifications and site specific requirements.

It applies to individuals who work on single and multiple dwellings, commercial buildings, telecommunications structures and at ground level to enable signals from geostationary communications satellites. Installations might be new or existing, stand alone or be a part of a site with multiple antennas.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work on satellite antenna	1.1 Prepare for installation, applying all relevant legislation, codes, regulations and standards, and identify any safety issues 1.2 Organise resources to be available on site

	<p>1.3 Contact client to arrange access to site and notify about possible outage</p> <p>1.4 Organise tools and equipment and ensure they are in safe working order and adjusted to manufacturer's specifications</p> <p>1.5 Obtain details of satellite to be acquired and precise details of satellite antenna location</p> <p>1.6 Determine azimuth and elevation for satellite receiving antenna</p> <p>1.7 Determine polarisation angle of satellite receiving antenna feedhorn</p> <p>1.8 Determine suitable position to mount antenna with agreement from client</p>
2. Assemble and mount satellite antenna and cables	<p>2.1 Assemble satellite antenna on site according to plans, specifications and enterprise guidelines using safe industry practices</p> <p>2.2 Connect coaxial cable to antenna and install lightning protection devices</p> <p>2.3 Mount satellite antenna on to installed mounting arrangements and set initial antenna azimuth, elevation and polarisation</p>
3. Test and align antenna system	<p>3.1 Connect installed antenna system to satellite receiver or test equipment and make final adjustments to azimuth, elevation and polarisation to optimise signal level and quality</p> <p>3.2 Conduct performance tests according to manufacturer's specifications and enterprise guidelines</p> <p>3.3 Interpret test results, compare with manufacturer's design specifications and make adjustments</p>
4. Complete administrative duties	<p>4.1 Record test results and complete appropriate records</p> <p>4.2 Secure and clean up site to original condition in environmentally safe manner</p> <p>4.3 Notify client of work completion and obtain sign off</p>

Foundation Skills

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Reading	1.4, 2.1, 3.2, 3.3	<ul style="list-style-type: none"> Recognises and interprets textual information from relevant sources to determine specifications, enterprise guidelines and plans
Writing	1.3, 1.8, 4.1, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.3, 1.8, 4.3	<ul style="list-style-type: none"> Uses specific and relevant language to clearly articulate operational and site matters Uses questioning and listening techniques to determine the views and opinions of others
Numeracy	1.6, 1.7	<ul style="list-style-type: none"> Analyses numerical information to measure angles, evaluate technical data, interpret results and take measurements
Navigate the world of work	1.1, 1.4, 2.1, 4.2	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safe industry practices Understands the main tasks, responsibilities and boundaries of own work
Get the work done	1.2, 1.4, 1.5, 1.8, 2.1-2.3, 3.1-3.3	<ul style="list-style-type: none"> Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the resources and access required Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account Identifies and implements standard solutions for routine problems

Assessment Requirements for ICTRFN201 Install a satellite antenna

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare the site and obtain resources in preparation for installation
- determine satellite type and orientation
- assemble, install, align and test a satellite antenna according to plans and specifications, and site specific safety requirements
- conduct performance tests according to manufacturer's specifications and enterprise guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of a satellite antenna:
 - directivity
 - operation of parabolic reflector and feedhorn
 - optimum placement
 - pattern
 - polarisation
- discuss bit error ratio (BER)
- summarise coaxial cable types and properties
- discuss electromagnetic waves with reference to:
 - absorption by trees and buildings
 - effect of weather on absorption
 - awareness of exposure to electromagnetic radiation (EMR)

- outline legislation, codes of practice and other formal agreements that directly impact on antenna installation
- explain modulation:
 - bandwidth
 - individual spectrum shape of digital satellite television signals
- discuss modulation error ratio (MER)
- outline radio frequency (RF) spectrum terminology related to bands used for satellite broadcasting (C, S, L, Ku, Ka bands)
- outline satellite antenna product knowledge
- summarise signal level expressed in dBuV units
- explain specific work health and safety (WHS) requirements that impact on the installation of satellite antenna equipment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a suitable site for satellite antenna installation
- a range of antennas and cables currently used in industry
- a range of general tools and test equipment required for satellite antenna installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for ICTRFN202 Install a terrestrial antenna

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- organise the site and obtain relevant resources in preparation for installation
- assemble, install, align and test a terrestrial antenna according to plans and specifications, and site specific safety requirements
- conduct performance tests according to manufacturer's specifications and enterprise guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of an antenna:
 - directivity
 - front to back ratio
 - optimum placement
 - pattern
 - polarisation
- discuss bit error ratio (BER)
- summarise coaxial cable types and properties
- discuss electromagnetic waves including:
 - absorption by trees and buildings
 - awareness of exposure to electromagnetic radiation (EMR)
 - reflection

- outline legislation, codes of practice and other formal agreements that directly impact on antenna installation
- explain modulation including:
 - bandwidth
 - individual spectrum shape of analog and digital television signals and digital audio broadcasting plus (DAB+) digital radio signals
- discuss modulation error ratio (MER)
- outline radio frequency (RF) spectrum including:
 - Australian DAB+ digital radio channel frequencies
 - Australian television ultra high frequency (UHF) and very high frequency (VHF) channel plan (digital and analog)
 - terminology related to bands used for broadcasting (Bands I, II, III, IV and V)
- explain signal level expressed in dBuV units
- discuss specific work health and safety (WHS) requirements that impact on the installation of terrestrial antenna equipment
- summarise television antenna product knowledge.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a suitable site for satellite antenna installation
- a range of antennas and cables currently used in industry
- a range of general and test equipment required for satellite antenna installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN301 Install a radio communications antenna and feedline

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install and test a communications antenna and feedline on a range of fixed or mobile structures

It applies to individuals working as telecommunications and radio communications technicians who operate within cellular, radio broadband and digital TV reception applications. Installations may be new or existing, standalone or part of a site with multiple antennas.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan assembly of antenna system	1.1 Arrange access to site according to required procedure 1.2 Apply all relevant legislation, codes, regulations and standards in planning process

	<p>1.3 Obtain relevant antenna specifications, requirements and radio communication site management book (RCSMB) from appropriate personnel</p> <p>1.4 Organise appropriate installation personnel to be available on site</p> <p>1.5 Assess relevant hazard levels from RCSMB and take appropriate preventative action according to prescribed safety requirements</p> <p>1.6 Identify other antennas at site location and notify those who may be affected by outages</p> <p>1.7 Inspect antenna system and feedline for physical damage before further work is performed</p> <p>1.8 Organise tools and equipment and ensure they are in safe working order and adjusted to manufacturer's specifications</p>
2. Assemble, mount and align antenna and prepare feedline	<p>2.1 Follow site specific safety requirements and enterprise work health and safety (WHS) processes and procedures</p> <p>2.2 Assemble antenna system in safe manner according to manufacturer's instructions</p> <p>2.3 Mount antenna with correct azimuth and polarisation according to manufacturer's instructions and work practices</p> <p>2.4 Install radome to antenna if provided</p> <p>2.5 Install lightning protection systems according to plans and specifications</p> <p>2.6 Align antenna in horizontal and vertical planes to maximise signal</p>
3. Test antenna installation and document test results	<p>3.1 Conduct performance tests in safe manner according to manufacturer's specifications and instructions</p> <p>3.2 Record, interpret and compare test results with manufacturer's data or design specifications</p> <p>3.3 Confirm correct overall operation of antenna system</p>
4. Complete administrative tasks and clean up site	<p>4.1 Complete and store appropriate records and test results according to enterprise policy</p> <p>4.2 Label radio frequency (RF) transmitter equipment and feedlines according to legislation</p> <p>4.3 Notify all affected by outage that normal operation can resume</p> <p>4.4 Clean, pack and store all tools and test equipment, and organise transport in suitable protective casing where appropriate</p> <p>4.5 Restore any changes made to worksite to client's satisfaction and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.8, 2.2, 2.5, 3.1, 4.1	<ul style="list-style-type: none"> Recognises and interprets textual information from relevant sources to determine specifications, enterprise guidelines, policy and instructional material
Writing	1.4, 1.6, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.3, 1.4, 1.6, 4.3	<ul style="list-style-type: none"> Uses specific and relevant language to clearly articulate operational and site matters and appropriate tone for successful negotiations Uses questioning and listening techniques to determine the view and opinions of others
Numeracy	2.6, 3.1, 3.2	<ul style="list-style-type: none"> Analyses numerical information to evaluate technical data and interpret results, take measurements and correctly calibrate equipment
Navigate the world of work	1.5, 2.1-2.3, 4.2	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements with specific reference to safe industry practices Understands the main tasks, responsibilities and boundaries of own work
Get the work done	1.1, 1.6-1.8, 2.3-2.5, 3.1, 3.3, 4.1, 4.4, 4.5	<ul style="list-style-type: none"> Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the resources and access required Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account Identifies and implements standard solutions for typical installation challenges Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to own enterprise policy

Assessment Requirements for ICTRFN301 Install a radio communications antenna and feedline

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine installation requirements and ensure site inspection activities are conducted prior to installation
- conduct installation of a communications antenna according to plans and specifications
- assess hazard levels at a radio frequency (RF) site and apply knowledge of safety precautions for self, fellow workers and the public
- mount an antenna, connect a transmission line and physically align an antenna
- use appropriate test equipment to perform a return loss sweep measurement or a measurement of forward and reflected power on at least two different antenna systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline current industry practice for antenna installation including:
 - earthing
 - lightning protection
- describe the procedures and equipment required for:
 - antenna sweep testing to measure return loss
 - measurement of distance to fault
 - measurement of feedline insertion loss
 - measurement of forward and reflected RF power
- summarise features of instrument and equipment test methods and performance requirements

- outline legislation, codes of practice and other formal agreements that directly impact on operation and testing of radio communications antennas and equipment
- identify the general components and installation of antennas and feedlines
- discuss the application of RF and electromagnetic radiation (EMR) standards and specific work health and safety (WHS) requirements
- discuss the impact on the use and testing of radio communications instruments and equipment
- identify the types of antennas that can withstand extreme environments
- summarise typical issues and challenges that occur in telecommunications antenna installations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a site for antenna installation
- a range of antennas and feedlines currently used in industry
- a range of general tools and test equipment required for antenna installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN304 Construct and test a radio communications device

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, build and review a radio communications transmitting or receiving device.

It applies to individuals working as radio maintenance technicians, radio installers and radio repairers who use specialist equipment and work within regulatory and legislative frameworks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to construct radio communications device	1.1 Prepare for construction, applying all relevant legislation, codes, regulations and standards, and identify any safety issues 1.2 Determine details of radio communications device to be constructed from project specifications 1.3 Produce wiring diagram, component list and block diagram of radio

	<p>communications device to prepare for construction and testing of device</p> <p>1.4 Draw up plans showing method of construction and enclosure details</p> <p>1.5 Designate suitable test points along signal flow paths on circuit diagram for testing of functional blocks</p> <p>1.6 Produce test setups to evaluate performance of radio communications device</p> <p>1.7 Obtain tools and test equipment</p>
2. Construct and test radio communications device	<p>2.1 Assemble radio communications device according to circuit diagram and layout drawing</p> <p>2.2 Test performance and operation of individual functional blocks and overall radio communications device according to test regime</p> <p>2.3 Transmit or receive signals to evaluate qualitative performance through radio communications device</p>
3. Complete documentation and clean up worksite	<p>3.1 Document results of test procedures and compare with initial project specifications</p> <p>3.2 Finalise project report and make recommendations for improvement to radio communications device</p> <p>3.3 Remove waste from worksite according to environmental requirements and restore site to safe condition</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	<ul style="list-style-type: none"> Recognises and interprets textual information from relevant sources to determine job specifications and regulatory and legislative requirements
Writing	1.3-1.5, 3.1, 3.2	<ul style="list-style-type: none"> Uses clear, technically specific language, appropriate formatting and diagrammatic information to complete and update workplace documentation
Numeracy	2.3	<ul style="list-style-type: none"> Analyses numerical information when undertaking test measurements, interpreting results and evaluating performance

Navigate the world of work	1.1, 3.3	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safe industry practices • Understands the nature and purpose of own role and associated responsibilities
Get the work done	1.1, 1.6, 1.7, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> • Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the equipment, resources and access required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Identifies and implements standard solutions when troubleshooting and managing contingencies to adapt assembly and review procedures • Reviews outcomes and identifies technical improvements that could be made

Assessment Requirements for ICTRFN304 Construct and test a radio communications device

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and prepare for construction of a radio communications device
- prepare a wiring diagram and component list
- construct a radio communications device
- test a radio communications device.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain electrical symbols and circuit diagrams
- summarise the general principles of radio communications and radio propagation
- identify and outline the characteristics of:
 - radio communications components
 - device pinouts
 - part numbers
 - polarities
 - ratings
- summarise the operation and characteristics of:
 - amplifiers
 - demodulators
 - mixers
 - modulators

- oscillators
- explain the principles of modulation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites where radio communications devices may be constructed and tested
- test instruments currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN305 Operate and maintain radio communications technical instruments and field equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to take measurements, find faults, undertake minor repairs and commission new instruments and equipment.

It applies to individuals with proficient technical skills including field officers from regulatory authorities or other private and public organisations. In this role, individuals must comply with radio communications transmitter licensing requirements, operator certificates for maritime and aeronautical services, work health and safety (WHS) and electromagnetic radiation (EMR) licensing requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for use of instruments and field equipment	1.1 Plan and prepare work according to site procedures, operating environment and relevant legislation, codes, regulations and standards 1.2 Select measurements required to meet performance outcomes

	<p>1.3 Read, interpret and use equipment and system manuals, specifications and relevant organisational policy to determine work requirements</p> <p>1.4 Select and ensure equipment for work activities is ready for operation</p> <p>1.5 Determine, address and report potential risks, hazards and environmental issues</p> <p>1.6 Adhere to relevant emergency procedures, policy guidelines and WHS procedures to ensure safety of personnel and plant</p>
2. Test instruments and field equipment	<p>2.1 Perform safety checks according to instrument and equipment manual and organisational procedures</p> <p>2.2 Confirm equipment is calibrated and calibration label is within approved timeframes</p> <p>2.3 Select appropriate traceable calibrated equipment where measurements are required to be traceable according to national standards</p> <p>2.4 Label and report damaged or unsafe instruments and field equipment, and send for service</p> <p>2.5 Update operational log books</p>
3. Operate instruments and field equipment	<p>3.1 Optimise instrument and equipment settings for particular measurement or analysis</p> <p>3.2 Perform measurements with optimum precision given field and technical constraints</p> <p>3.3 Assess data for accuracy and precision against quality control information, known standards and references within measurement uncertainty</p>
4. Maintain instruments and field equipment	<p>4.1 Use fault finding techniques to verify and rectify faults</p> <p>4.2 Perform preventative maintenance within limits of authorisation and report equipment wear and faults</p> <p>4.3 Replace defective parts and make adjustments according to equipment specifications</p> <p>4.4 Seek expert help from appropriate colleagues where problems are encountered</p> <p>4.5 Update maintenance and calibration records according to organisational procedures</p>
5. Commission new instruments and equipment	<p>5.1 Arrange commissioning procedures with manufacturer's agent</p> <p>5.2 Unpack, check and assemble instruments and equipment according to manufacturer's warranty requirements</p>

	<p>5.3 Check instrument and equipment performance against specifications prior to acceptance of item</p> <p>5.4 Prepare operating instructions and make available to relevant personnel</p>
--	---

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 3.3, 4.3, 5.2, 5.3	<ul style="list-style-type: none"> Recognises and interprets information from relevant sources to determine technical specifications and regulatory and legislative requirements
Writing	1.5, 2.4, 2.5, 4.2, 4.5, 5.1, 5.4	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with relevant internal and external personnel
Oral Communication	1.5, 4.2, 4.4, 5.1	<ul style="list-style-type: none"> Uses specific and relevant language and appropriate tone to clearly articulate technical, operational and legal information to internal and external personnel Uses listening techniques to determine the understanding of others
Numeracy	3.2, 3.3, 5.3	<ul style="list-style-type: none"> Analyses numerical information when undertaking test measurements, interpreting results, calibrating equipment and evaluating performance
Navigate the world of work	1.1, 1.6, 2.1, 2.3, 4.5	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to the safety of self, other personnel and the plant Understands the nature and purpose of own role and associated responsibilities
Get the work done	1.1, 1.2, 1.4, 2.2, 2.4, 3.1, 4.1-4.3, 5.2	<ul style="list-style-type: none"> Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the instruments, equipment and other resources required Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and

		taking situational factors into account <ul style="list-style-type: none">Identifies and implements standard solutions for typical equipment and instrument faultsReflects on outcomes and identifies what worked and where things could be done differently in the future

Assessment Requirements for ICTRFN305 Operate and maintain radio communications technical instruments and field equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- obtain read and interpret radio communications instrument operating documentation
- prepare, operate and maintain radio communications instruments and field equipment appropriate to a radio communications environment
- comply with site risk control, work health and safety (WHS), environmental, quality and communication requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the features and operating requirements of calibrated equipment and test equipment including:
 - digital radio communications measuring equipment
 - radio frequency (RF) termination
 - spectrum analyser
 - power meter
 - modulation analyser
- outline features of instrument and equipment test methods and performance requirements
- explain legislation, codes of practice and other formal agreements that directly impact on operation and testing of radio communications instruments and equipment
- outline manufacturer's requirements for operation and testing of radio communications equipment and calibrated equipment
- summarise measurements according to test specifications

- list radio communications instruments and equipment
- list and describe the common WHS requirements that impact on the use and testing of radio communications instruments and equipment
- discuss typical issues and challenges that occur with radio communications instruments and field equipment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which instruments and field equipment can be operated
- field measurement equipment currently used in industry
- relevant instrument and equipment manuals and other procedural documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN402 Select antenna system for radio communications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to interpret industry practices and theories, and select appropriate antenna equipment for small projects or parts of larger projects to a job specification.

It applies to individuals working alone or responsible for a technical team within regulatory authorities or other private and public organisations where they combine technical radio communications skills with broader organisational and administrative skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to select antenna system	1.1 Establish extent of project from design brief or specification within team environment 1.2 Obtain and review plans and drawings of existing or proposed installation site

	<p>1.3 Determine whether antenna system hardware requires secure hut or shelter</p> <p>1.4 Determine antenna requirements and antenna feedline requirements from design brief or specifications, and research available commercial products</p> <p>1.5 Determine earthing components to meet regulatory and earthing requirements of antenna system</p> <p>1.6 Prepare antenna feedline route to comply with job specifications and regulatory requirements</p> <p>1.7 Identify installation options, and assess against performance requirements and client requirements</p>
2. Select antenna system	<p>2.1 Evaluate potential antenna system solutions that satisfy required performance, budgetary and regulatory requirements, and are suitable for installation in specified environment</p> <p>2.2 Make recommendations and select optimum antenna system</p>
3. Document antenna system selection	<p>3.1 Document calculations, final specifications and reasons for selection of antenna system</p> <p>3.2 Prepare final report, including documentation and drawings of selected antenna system, and distribute to appropriate persons in accordance with enterprise policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.6, 2.1, 3.2	<ul style="list-style-type: none"> Examines and interprets plans, specifications and data from relevant sources to determine all technical requirements
Writing	3.1, 3.2	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology in appropriate formats to complete and update workplace documentation
Numeracy	1.4, 2.1, 2.2	<ul style="list-style-type: none"> Evaluates and reviews numerical information when evaluating budgetary considerations, test results and technical data, and when converting values to ratios
Interact with others	1.1, 2.2, 3.2	<ul style="list-style-type: none"> Collaborates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability

		<ul style="list-style-type: none"> Understands what to communicate to relevant personnel in routine work situations
Get the work done	1.2, 1.3, 1.5-1.7, 2.1, 2.2	<ul style="list-style-type: none"> Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks Identifies and assembles the instruments, equipment and other resources required to competently undertake the job Uses formal decision making processes with support to clarify goals in more complex, non-routine situations Gathers information and identifies and evaluates choices against a limited set of criteria Applies formal problem solving processes, breaking difficult issues into manageable parts and identifying relevant options for action

Assessment Requirements for ICTRFN402 Select antenna system for radio communications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify the antenna installation parameters
- select an antenna system required to meet the parameters
- determine the feedline installation from design and specifications
- document the recommendations for the antenna system selection
- comply with specifications and regulatory requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the principles of antenna wave propagation and the impact on antenna array design
- describe the principles of transmission line design and operation, and the impact on antenna design and installation including:
 - allowable loss in dB
 - characteristic impedance
 - mechanical characteristics
 - method of securing
 - radio frequency (RF) connector type
 - weatherproofing.
- describe the process for selecting an antenna design based on the application and performance requirements
- identify and describe a range of antenna systems

- summarise specific issues related to antenna installations and the creation of particular radiation patterns
- identify and describe the regulatory and industry standards relevant to antenna installations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- antenna resources such as manufacturers' data sheets, specifications and catalogues
- transmission line resources such as manufacturers' data sheets, specifications and catalogues.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN405 Install radio communications base station equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skill and knowledge required to operate transmitters, receivers, feedline, multicoupling, data and voice equipment to connect a station in the very high frequency (VHF), ultra high frequency (UHF) or microwave bands.

It applies to individuals working as field officers from private or public organisations. They combine technical radio communications skills with organisational and administrative skills in a range of commercial and community contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install radio communications base station equipment	1.1 Assess available installation options against client requirements and relevant legislation, codes, regulations and standards 1.2 Arrange access to site according to required procedure 1.3 Confirm equipment locations

	<p>1.4 Confirm base station equipment listings and manufacturer's and enterprise documents against installation brief</p> <p>1.5 Review installation briefs in consultation with designers or manufacturers</p> <p>1.6 Adjust tools and equipment to manufacturer's specification</p>
2. Install equipment and terminate voice and data cables, power cables and radio frequency (RF) cables	<p>2.1 Observe anti-static precautions when handling circuit cards and conduct all work in manner that is safe to self, fellow workers and the public</p> <p>2.2 Install racks, frames and shelves as required for data and voice frequency (VF) interface equipment, transmitter and receiver</p> <p>2.3 Position equipment and install according to manufacturer's specifications and design detail</p> <p>2.4 Label equipment, distribution frames and blocks according to enterprise policy</p> <p>2.5 Strip cables and terminate conductors according to manufacturer's specifications</p> <p>2.6 Clean optical fibre connectors using appropriate cleaning techniques</p> <p>2.7 Connect network termination unit (NTU) cables to data and VF interface unit via distribution frame</p> <p>2.8 Connect data and VF cables to radio equipment</p> <p>2.9 Connect digital and analog alarm inputs and outputs to supervisory, control and data acquisition (SCADA) controller</p> <p>2.10 Connect power cables to rectifier, battery rack, circuit breakers and equipment according to manufacturer's and enterprise documents</p> <p>2.11 Use computer or handheld device to program internal software in data and VF interface equipment, and transmitter and receiver</p> <p>2.12 Interconnect multicoupling equipment to antenna feedline and transmitter and receiver units</p> <p>2.13 Mount lightning protection equipment and earth wire according to specification</p>
3. Connect receiver and transmitter multicoupling equipment to antenna feedline	<p>3.1 Perform distance to fault measurement on antenna feedline</p> <p>3.2 Perform return loss measurement of overall antenna system at transmitter and receiver connector points</p> <p>3.3 Record test results</p>
4. Finalise installation and complete	<p>4.1 Complete preliminary tests to verify transmitter and receiver operation prior to commissioning</p> <p>4.2 Complete installation report, test results and administrative tasks and</p>

preliminary tests and administrative tasks	forward to appropriate person according to enterprise policy 4.3 Dispose of packaging according to accepted environmental conditions 4.4 Notify appropriate person that base station is ready for commissioning and integration
--	---

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.6, 2.3-2.5, 2.10, 2.13, 4.3	<ul style="list-style-type: none"> Recognises and interprets enterprise, regulatory and technical information from relevant sources to determine all specifications and frameworks
Writing	1.3, 2.4, 3.3, 4.2, 4.4	<ul style="list-style-type: none"> Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.3, 1.5, 4.4	<ul style="list-style-type: none"> Liaises with internal and external personnel about technical requirements using specific and relevant language Uses listening and questioning techniques to confirm understanding

Assessment Requirements for ICTRFN405 Install radio communications base station equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- assess the client and installation requirements
- ensure relevant regulations and standards will be applied
- install radio communications base station equipment
- perform distance to fault measurement on feedline
- perform return loss measurement on feedline
- document and complete installation report.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the following:
 - anti-static precautions
 - radio frequency (RF) radiation hazard awareness
 - network termination unit
 - radio transmitter system
 - radio receiver system
 - multicoupler
 - supervisory, control and data acquisition (SCADA) system inputs and outputs
- outline the operation and purpose of testing equipment
- interpret the meaning of various test results
- identify network element and system specifications

- outline the principles and performance testing and fault finding techniques of telecommunications networks
- describe the practices and procedures for installation of radio communications equipment for the following:
 - fibre optic connector cleaning techniques
 - computer software installations to various devices
- identify and describe the appropriate test equipment to undertake performance and fault-finding techniques in telecommunications networks including:
 - distance to fault measurement
 - return loss measurement
 - terminate data and voice and RF cable.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which base station installation can be conducted
- tools and equipment required for installation
- technical specifications, organisational documentation and requirements for installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN502 Test and measure cellular phone and network equipment performance

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse test results and recommend modifications to the network.

It applies to individuals working as field officers and supervisors from telecommunications carriers, service providers, contractors and other public or private organisations who perform measurements during equipment upgrades or during commissioning, acceptance testing and routine maintenance on cellular network equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to test cellular phone and network equipment	1.1 Obtain and follow relevant legislation, codes, regulations and standards 1.2 Scope work by obtaining work details from appropriate personnel and arrange for site access to comply with security

	<p>arrangements</p> <p>1.3 Evaluate manufacturer's technical documentation and network procedures to plan test schedule for cellular network</p> <p>1.4 Verify calibration of test equipment to ensure that tested cellular equipment is compliant</p> <p>1.5 Prepare cellular equipment for testing according to manufacturer's test procedure</p> <p>1.6 Notify operational staff of test and measurement schedule to ensure minimal impact on cellular network</p>
2. Test and measure cellular phone and network equipment	<p>2.1 Work safely following work health and safety (WHS) and environmental requirements for given work, identifying hazards and using personal protective equipment</p> <p>2.2 Configure network equipment for testing and set options to record test results</p> <p>2.3 Block or mask alarms that may be triggered and interfere with test program</p> <p>2.4 Run performance measurement software with options set and record test results</p> <p>2.5 Re-establish alarms and normal operational status at conclusion of tests, and notify appropriate personnel of completion of test schedule</p>
3. Analyse measurement and prepare evaluation report	<p>3.1 Analyse results of performance tests and measurements and determine performance level of cellular equipment and compatibility with network</p> <p>3.2 Prepare evaluation report, making recommendations on network modifications or changes to configurations settings for improved quality of service</p> <p>3.3 Present test results and evaluation report to appropriate personnel according to enterprise policy</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.5, 3.3	<ul style="list-style-type: none"> Recognises and interprets regulatory and technical information from relevant sources to determine all

		specifications and frameworks
Writing	1.6, 2.4, 2.5, 3.2	<ul style="list-style-type: none"> • Uses clear, specific and industry related terminology to complete and update workplace documentation and when presenting information to work associates, supervisors, team members and clients
Oral Communication	1.2, 1.6, 2.5, 3.3	<ul style="list-style-type: none"> • Liaises with internal and external personnel about technical requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	3.1	<ul style="list-style-type: none"> • Evaluates and interprets technical data and results according to predetermined specifications
Navigate the world of work	2.1	<ul style="list-style-type: none"> • Understands the nature and purpose of own role and associated responsibilities • Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safety

Assessment Requirements for ICTRFN502 Test and measure cellular phone and network equipment performance

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and coordinate test activities and equipment
- test cellular phone and network equipment according to test procedure
- analyse test results
- report and make recommendations on performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the features and operating requirements of cellular test equipment, including the digital cellular test set, spectrum analyser and radio frequency (RF) power meter
- explain network components, their functions and approved specifications
- provide detailed information about transmission lines, transmitter and receiver architecture and associated cellular network
- provide detailed information about cellular antenna and feedlines, and their impact on mobile spectrum interference
- explain testing network components
- outline the types of adjustments that need to be made when measuring cellular transmission
- summarise the types of networks that will influence the transmission on the radio path and/or the transmission line.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which cellular network testing may be conducted
- test equipment currently used in industry
- manufacturer's and enterprise technical documentation
- relevant regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAD501 Model data objects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to understand business operations, identify entities and data, diagrammatically represent their relationships, and prepare a data model.

It applies individuals who have a broad range of analytical, technical and communication skills and who work within broad but established parameters.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify entities and relationships	1.1 Analyse business data to understand operations 1.2 Identify boundaries of the system 1.3 Identify entities, attributes, data types and relationships of data 1.4 Review business rules to determine impact 1.5 Document relationships in an entity relationship diagram

ELEMENT	PERFORMANCE CRITERIA
2. Develop normalisation	2.1 Identify suitable business data 2.2 Undertake normalisation of business data and document results 2.3 Compare normalisation results with entity relationship diagram 2.4 Reconcile differences between data
3. Validate model	3.1 Validate data model with client 3.2 Resolve issues or recommendations 3.3 Document completed data model 3.4 Submit to client for final approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.3, 2.4	<ul style="list-style-type: none"> Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.5, 2.2, 2.4, 3.3, 3.4	<ul style="list-style-type: none"> Prepares and produces diagrammatic models and associated documents that convey complex relationships between data Documents outcomes and changes to discussions, using industry relevant terminology and recognised symbols
Oral Communication	3.1-3.4	<ul style="list-style-type: none"> Participates in verbal exchanges by listening and questioning clients to elicit information, resolve issues, and obtain final product and work outcome approval
Interact with others	3.1, 3.2, 3.4	<ul style="list-style-type: none"> Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts Elicits feedback and provides feedback to others
Get the work done	1.1-1.4, 2.1, 3.2, 3.3	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness Applies systematic and analytical decision making

		<p>processes for complex and non-routine situations</p> <ul style="list-style-type: none">• Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others, in a secure and stable digital environment

Assessment Requirements for ICTSAD501 Model data objects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document client business requirements
- construct an entity relationship diagram
- construct and document a data model
- normalise the model
- validate the model.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- fully describe:
 - database identifiers and their impact on database usability
 - normalisation rules and processes
 - type hierarchies, including sub-types, super-types and root-types related to development of structured data types
 - validation procedures and processes
- describe the function and features of:
 - an approach to data modelling, such as the entity-relationship model
 - keys, e.g. unique keys, composite keys, primary keys and primary index
 - time stamps related to the use of keys
 - user defined types, structured types, reference types and user defined functions
 - data types and their application
- summarise the particular business domain.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client's business requirements
- special purpose tools, equipment and materials
- industry software packages
- computer aided software engineering (CASE) tools
- entity relationship diagrams.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD502 Model data processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather process data and business information in order to model data processes within an organisation.

It applies to individuals who can apply a broad range of technical knowledge and skills within the context of a complex project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop scope of model	1.1 Identify relevant data processes and sources of information 1.2 Identify information gathering method and modelling methodology to be used 1.3 Document modelling information gathered 1.4 Validate modelling information with client
2. Gather process data	2.1 Identify business functions and collect process data using chosen method

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify external events, procedures and results 2.3 Identify processes and required decomposition
3. Develop and validate data model	3.1 Model process data according to modelling methodology 3.2 Validate process model with client to determine inaccuracies 3.3 Incorporate identified changes, as required 3.4 Review business rules to determine impact on process models and change as required 3.5 Validate completed process models with client

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.4	<ul style="list-style-type: none"> Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.3, 1.4, 3.3-3.5	<ul style="list-style-type: none"> Prepares and produces diagrammatic models and associated documents that convey complex relationships between data
Oral Communication	1.4, 3.2, 3.5	<ul style="list-style-type: none"> Determines and confirms client requirements using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding
Interact with others	1.4, 3.2, 3.5	<ul style="list-style-type: none"> Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1, 1.2, 2.1-2.3, 3.1, 3.4	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness Applies systematic and analytical decision making processes for complex and non-routine situations Uses and investigates new digital technologies and applications to manage and manipulate data, and

Assessment Requirements for ICTSAD502 Model data processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify data processes that represent the client's business reality
- model data processes according to industry and organisation standards
- complete documentation of the data model.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss modelling rules and conventions with reference to naming processes and events
- outline features and functions of process mappers
- explain features of data analysis, particularly in determining process flows
- describe processes and techniques, using logical design concepts related to designing process models.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client's business requirements
- special purpose tools and equipment
- industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD604 Manage and communicate ICT solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage and communicate requirements for new information and communications technology (ICT) systems to a broad and diverse audience.

This unit applies to individuals who require high-level management, business and technical skills to manage complex analysis within the information and communications technology (ICT) industry, often as part of business critical ICT projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage identified client ICT requirements and scope of solution	1.1 Establish baseline client ICT requirements and change control processes to track changes to requirements and solution scope 1.2 Resolve issues and conflicts that emerge during final stages of identifying and analysing requirements 1.3 Determine how requirements will be presented for review 1.4 Secure approval of requirements from those stakeholders who

ELEMENT	PERFORMANCE CRITERIA
	have the appropriate authority
2. Manage requirement relationships and dependencies	2.1 Examine and organise the set of requirements and record the dependencies and relationships for each 2.2 Perform impact analysis to assess or evaluate the impact of a change 2.3 Deploy requirements management tools as necessary
3. Maintain requirements for re-use	3.1 Identify requirements that the organisation will use in the long term 3.2 Name and define requirements available for future re-use
4. Prepare requirements package	4.1 Decide which formats are appropriate for a particular project and its stakeholders 4.2 Prepare requirements package according to organisational need

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2	<ul style="list-style-type: none"> Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.4, 2.1, 3.2, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> Writes, edits and proofreads documents to ensure clarity of meaning, and accuracy and consistency of information Prepares documentation and correspondence using clear language, correct spelling and terminology, and ensuring accuracy of information
Oral Communication	1.4, 5.1, 5.2	<ul style="list-style-type: none"> Uses collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and to confirm understanding
Navigate the world of work	4.2, 5.2	<ul style="list-style-type: none"> Works autonomously, making high-level decisions to achieve and improve organisational goals Develops and implements strategies that ensure organisational policies and procedures are being met

Interact with others	1.2, 1.4, 5.1, 5.2	<ul style="list-style-type: none"> • Selects, implements and manipulates communications systems, processes and practices for maximum impact • Influences and fosters a collaborative culture, facilitating a sense of commitment and workplace cohesion • Shares knowledge, information and experience openly as an integral part of the working relationship • Recognises potential for conflict and, working with others, seeks to develop organisational processes to deal with conflict
Get the work done	1.1-1.3, 2.1-2.3, 3.1, 3.2, 4.1	<ul style="list-style-type: none"> • Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision making strategies where appropriate • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisation's goals

Assessment Requirements for ICTSAD604 Manage and communicate ICT solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish processes to:
 - trace requirements
 - control and track changes to requirements
 - scope solutions
- manage requirement relationships
- package and communicate requirements according to what is appropriate for a project or stakeholder group.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain conflict resolution and issue management techniques to handle possible changes to solution scope
- outline requirements management and traceability processes
- list and apply techniques for managing version control and configuration.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- a simulated or workplace project in a medium-to-large enterprise

- observation of the candidate carrying out business analysis work
- reports and plans prepared for the projects
- a portfolio of the project work to be undertaken.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS305 Provide ICT advice to clients

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide information and communications technology (ICT) advice and support to clients, including the communication of comprehensive technical information.

It applies to frontline technical support individuals who work under a level of supervision but have responsibility for providing technical support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review client support issues	1.1 Check for new problems logged by client 1.2 Check previous logs for similar problems or requests from client 1.3 Investigate and document support issues affecting client 1.4 Notify client of the results of investigation and provide advice and support on findings

ELEMENT	PERFORMANCE CRITERIA
	1.5 Obtain client feedback and make changes
2. Provide advice on software, hardware or network	2.1 Confirm software, hardware or network requirements with client 2.2 Investigate and document a solution 2.3 Document additional requirements identified in the investigation and refer them to the client 2.4 Obtain approval from client to implement the solution 2.5 Investigate and document amount of technical support client may require 2.6 Discuss and agree level of technical support identified with client 2.7 Arrange time with client when support will take place 2.8 Provide technical support as part of group or one-to-one instruction to the client 2.9 Provide manuals and help documentation to client
3. Obtain client feedback	3.1 Create an appropriate evaluation or feedback form or other mechanism to gather feedback about solution and support provided 3.2 Provide client with instructions on how to complete form or use other means of providing feedback 3.3 Distribute evaluation or feedback to client 3.4 Review feedback from client to identify areas for improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.5, 2.2, 2.5, 3.4	<ul style="list-style-type: none"> Interprets and evaluates information to compare technical specifications, identify areas of improvement and recognise solutions to new and emerging issues
Writing	1.3-1.5, 2.2, 2.3, 2.5,	<ul style="list-style-type: none"> Uses written vocabulary, grammatical structures and conventions to accurately convey instructions and

	2.9, 3.1-3.4	record complex information
Oral Communication	1.2, 1.4, 1.5, 2.1, 2.4-2.8	<ul style="list-style-type: none"> Participates in verbal exchange of ideas/solutions using detailed and clear language to contribute information for discussion and confirm client requirements Varies content, structure, style, tone and vocabulary to suit the needs of audiences
Interact with others	1.4, 1.5, 2.1, 2.3, 2.4, 2.6-2.9, 3.2, 3.3	<ul style="list-style-type: none"> Participates in routine conversations directly relevant to role, responding and contributing in appropriate ways when providing advice to clients and receiving feedback Shares information and resources, offers assistance voluntarily and provides feedback on others' work when providing client support
Get the work done	1-1-1.3, 1.5, 2.2-2.5, 2.7, 3.1-3.4	<ul style="list-style-type: none"> Plans a range of routine, and some non-routine, tasks, accepting stated goals and aiming to achieve them efficiently when obtaining feedback from client Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Selects from a range of predetermined options in routine situations, identifying and taking some situational factors into account Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action Understands key principles and concepts that underpin the design and operation of digital systems and tools

Assessment Requirements for ICTSAS305 Provide ICT advice to clients

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- investigate client support requests and provide a documented solution after consultation with client
- convey comprehensive technical information to clients in a clear, concise, jargon-free and coherent manner
- use technical manuals and 'help' documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe the available in-house and vendor support
- explain contract and service agreements with vendors
- identify features of different types of hardware supported by the organisation
- identify sources of information relevant to the provision of services and support
- identify operating system:
 - functions and basic features
 - supported by the organisation
- identify and describe security and network guidelines and procedures
- identify the advanced features of software, including the functions and support provided by the organisation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- peers and supervisors for obtaining information
- relevant information sources
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS308 Run standard diagnostic tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to troubleshoot problems, identify and implement preventative maintenance techniques, and conduct diagnostic tests on a range of platforms.

It applies to individuals who, while working under a level of supervision, have responsibility to action tasks in a frontline technical support capacity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify common symptoms and preventative maintenance techniques for ICT software and hardware	1.1 Plan troubleshooting processes for ICT software and hardware to guide the resolution of common ICT problems based on requirements for ICT testing and maintenance 1.2 Determine and document common symptoms of ICT problems for ICT software and hardware to increase troubleshooting process efficiency and focus 1.3 Identify and select testing and preventative maintenance

	techniques taking into consideration the common symptoms of ICT problems to complete planning troubleshooting processes
2. Operate system diagnostics	<p>2.1 Run the system diagnostic program according to specifications to identify required modifications in line with requirements for ICT testing and maintenance</p> <p>2.2 Modify the system configuration as indicated by the diagnostic program to address symptoms</p> <p>2.3 Carry out preventative maintenance techniques to address common symptoms of ICT problems</p>
3. Monitor and remove system viruses	<p>3.1 Scan system to check and maintain virus protection</p> <p>3.2 Report identified viruses and proposed actions to superior to gain approval</p> <p>3.3 Implement approved actions to remove detected virus infections using software tools and procedures and by restoring backups</p> <p>3.4 Document virus symptoms and removal information to keep a record of actions for future application</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets textual information to identify issues and solutions to maintain the standards
Writing	<ul style="list-style-type: none"> Records key information to note output of investigations, and sequences writing to produce cohesive text for reference
Oral Communication	<ul style="list-style-type: none"> Presents factual information in a clear manner, using specific language
Interact with others	<ul style="list-style-type: none"> Selects and uses appropriate strategies to establish and maintain spoken communication in familiar and some unfamiliar contexts Derives meaning from oral texts in familiar and some unfamiliar contexts
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations

	<ul style="list-style-type: none">• Applies problem solving processes, breaking complex issues into manageable parts and identifying and evaluating options for action• Understands key principles and concepts that underpin the design, application and operation of digital systems and tools

Assessment Requirements for ICTSAS308 Run standard diagnostic tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Identify and document six ICT problems and corresponding testing and preventative maintenance techniques to provide for troubleshooting process planning
- Implement preventative maintenance techniques to address three common symptoms of problems associated with each of the following:
 - desktop application
 - operating system
 - laptop
 - mobile device
 - printer
- Identify and address three virus infections using a system diagnostic program
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Impact of organisational structure, diagnostic testing procedures and guidelines, and software specifications on conducting diagnostic testing
- Hardware and software diagnostic tools, including products that manage:
 - backup procedures
 - configuration procedures
 - hardware maintenance
 - security
- Common symptoms of problems associated with:
 - desktop applications
 - operating systems

- laptops
- mobile devices
- printers
- Preventative maintenance techniques relevant to maintaining hardware and software applications
- Common diagnostic testing approaches
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment typical of those in an ICT working environment.

- Hardware and software diagnostic tools and specifications
- System with virus protection software installed
- Tools, equipment, materials, software packages
- ICT documentation including details of current architecture, operating system, software applications, and hardware
- Requirements relating to ICT maintenance and testing
- Individual superior in the organisation

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAS502 Establish and maintain client user liaison

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish and maintain client user liaison in an information and communications technology (ICT) environment, post support implementation. This occurs after the business critical functions have been determined.

It applies to individuals who are responsible for system and business analysis and administration, and liaising with clients to ensure that their requirements are fully met.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine support areas	1.1 Identify and record information communications technology used in the organisational unit 1.2 Identify stakeholders of the system 1.3 Identify organisational structure, culture and politics related to support requirements 1.4 Determine the level of support required by each organisational

ELEMENT	PERFORMANCE CRITERIA
	unit
2. Develop support procedures	2.1 Contact organisational units as required to verify support needs 2.2 Establish procedures for providing required support, including method of contact, frequency of meetings and reporting 2.3 Document agreed procedures or service level agreement (SLA)
3. Assign support personnel	3.1 Identify ICT skills required to assist each organisational unit with support activities 3.2 Assign personnel according to human resource processes 3.3 Verify availability of selected personnel 3.4 Provide support using agreed procedures 3.5 Obtain feedback from appropriate persons on a regular basis

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1	<ul style="list-style-type: none"> Comprehends textual information and numerical data to determine and adhere to required actions
Writing	1.1, 2.1, 2.3, 3.3, 3.5	<ul style="list-style-type: none"> Records key information in the required format and layout, and develops material to a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	2.1, 3.3, 3.5	<ul style="list-style-type: none"> Uses appropriate language, tone and pace to interact effectively with others, and listening and questioning techniques to obtain feedback relevant to the task
Navigate the world of work	3.2, 3.4	<ul style="list-style-type: none"> Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation Seeks to improve policies and procedures to better meet organisational goals
Interact with others	2.1, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships

		<ul style="list-style-type: none"> Influences and fosters a collaborative culture, and facilitates a sense of commitment and workplace cohesion
Get the work done	1.4, 2.1, 2.2, 3.4, 3.5	<ul style="list-style-type: none"> Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands Gathers and analyses data and seeks feedback to improve plans and processes Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause

Assessment Requirements for ICTSAS502 Establish and maintain client user liaison

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish and maintain client liaison
- establish and document procedures for providing required support
- identify information and communications technology (ICT) skill requirements
- assign appropriate support personnel.

Note: Evidence must be provided in at least TWO ICT environments.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify adequate response times for providing services
- analyse the role of stakeholders in the organisation, and their level of dependence on ICT infrastructure
- explain the capabilities of a range of ICT devices
- research and evaluate current industry accepted hardware and software products
- identify and describe equipment that is vital in supplying business critical services, including:
 - internet file transaction security for client accounts
 - web server for e-business
- describe in detail the areas related to the organisation's services and the ICT system functionality required to supply the essential and desirable services to the organisation
- describe the quality assurance practices relating to the supplied service and service level agreements (SLAs)
- analyse the role of ICT in the client's business domain
- identify and describe server types to provide:
 - application

- backup
- email
- firewall
- proxy
- web.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- agreed procedures or SLAs
- documented support requirements
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS512 Review and manage delivery of maintenance services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to review and manage the delivery of maintenance services.

It applies to individuals with managerial experience and responsibility for supervising individuals working under their direct or indirect supervision.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review service standards	1.1 Review service level agreements (SLAs) 1.2 Identify actual fault reporting and restoration performance, and compare with SLAs to ensure they meet requirements 1.3 Record areas of discrepancy
2. Review infrastructure	2.1 Identify internal support and maintenance options 2.2 Undertake a review of infrastructure

ELEMENT	PERFORMANCE CRITERIA
	2.3 Record areas of discrepancy
3. Determine and implement solutions	3.1 Compare service standards and infrastructure discrepancies, and identify gaps in existing service 3.2 Document discrepancies identified 3.3 Determine cost effective solutions and impact 3.4 Implement solutions
4. Organise reviews	4.1 Determine guidelines for regular reviews with stakeholders 4.2 Undertake reviews as per agreed guidelines 4.3 Document review process and submit to the stakeholder 4.4 Ensure effective reporting procedures are in place and used

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1	<ul style="list-style-type: none"> Evaluates textual and numerical information from a range of documentation to inform maintenance requirements and solutions
Writing	1.3, 2.1, 2.3, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> Uses clear and precise language and document formats appropriate to the task to convey explicit information and instructions
Numeracy	3.3	<ul style="list-style-type: none"> Calculates and compares whole numbers and decimals to estimate projected costs against budgets
Navigate the world of work	3.4, 4.2, 4.4	<ul style="list-style-type: none"> Works independently and collectively in making decisions to achieve organisation outcomes in maintenance service delivery
Get the work done	1.2, 2.1, 2.2, 3.1, 3.3, 3.4, 4.1-4.4	<ul style="list-style-type: none"> Accepts responsibility for planning, prioritising and sequencing complex tasks and workload Uses problem solving techniques to analyse required outcomes in order to manage maintenance-service delivery

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTSAS512 Review and manage delivery of maintenance services	ICASAS512A Review and manage delivery of maintenance services	Updated to meet Standards for Training Packages	Equivalent unit

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for ICTSAS512 Review and manage delivery of maintenance services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and report on faults and restoration performance
- comply with service level agreement (SLA)
- review infrastructure and document discrepancies
- analyse and prioritise requests according to business requirements
- implement cost effective solutions and evaluate impact.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe and explain business scheduling requirements
- discuss capacity planning and change-control procedures
- compare and contrast current industry accepted hardware and software products, including their general features and capabilities
- outline key features of the client business domain
- evaluate help desk and maintenance practices
- analyse the role of stakeholders and the degree of stakeholder involvement
- describe the system's current functionality and the features and functions of system under modification.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- sites on which review of maintenance-services delivery may be conducted
- established ICT service infrastructure
- SLAs and business guidelines.

Assessor must satisfy NVR/AQTF assessor requirements.

ICTSAS518 Install and upgrade operating systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain, install new and upgrade existing operating systems (OS) in a medium to large organisation.

It applies to individuals who apply technical and specialised knowledge to undertake complex support operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine organisational help desk procedures	1.1 Review organisation's technical support procedures 1.2 Interrogate help desk system 1.3 Liaise with client
2. Install or upgrade a desktop OS	2.1 Install an OS 2.2 Upgrade an existing OS 2.3 Research and implement automated OS installation techniques

ELEMENT	PERFORMANCE CRITERIA
	and procedures 2.4 Migrate files
3. Manage and troubleshoot resource access	3.1 Configure local resources access 3.2 Configure sharing of local resources 3.3 Assign access rights to shared resources
4. Configure and troubleshoot hardware devices and drivers	4.1 Determine and resolve problems with hardware resources 4.2 Research and install appropriate device drivers 4.3 Configure hardware resources 4.4 Configure device drivers
5. Configure and troubleshoot the desktop and user environments	5.1 Construct profiles for users 5.2 Organise shortcuts 5.3 Arrange screen management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.1-3.3, 4.2	<ul style="list-style-type: none"> Interprets and analyses a range of textual information and numerical data from a range of technical sources to determine necessary actions
Writing	1.3	<ul style="list-style-type: none"> Uses clear and precise information and numerical data in appropriate formats to convey information to clients/users
Oral Communication	1.3	<ul style="list-style-type: none"> Uses clear and accurate language to convey technical information to clients/users
Numeracy	1.1, 2.3, 4.2	<ul style="list-style-type: none"> Interprets and applies numerical data in source materials relevant to the activity
Interact with others	1.3	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with clients
Get the work	1.2, 2.1-2.4, 3.1-3.3,	<ul style="list-style-type: none"> Accepts responsibility for planning, prioritising and sequencing complex tasks and workload

done	4.1-4.4, 5.1-5.3	<ul style="list-style-type: none">• Uses problem solving techniques to analyse required outcomes to manage client operating systems• Uses digital technologies to manage information and communications technology (ICT) operations
------	------------------	--

Unit Mapping Information

Assessment Requirements for ICTSAS518 Install and upgrade operating systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine organisation operating systems (OS) requirements
- install or upgrade OS
- customise OS to user requirements
- manage and configure hardware devices
- manage and configure desktop.

Note: Evidence must be provided for at least TWO operating systems.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain procedures and techniques involved in the installation and upgrade of OS
- explain procedures and principals involved in unattended OS installation
- describe OS configuration issues that may arise with hardware and desktop environments.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- stand-alone or networked personal computers
- appropriate OS installation compact disk or recovery boot disks
- drivers for connected devices

- helpdesk system
- OS service packs.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS519 Perform systems tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to ensure that the properties of an entire system are tested and proved adequate before handover to the user for final acceptance testing.

It applies to individuals employed in a range of information and communications technology (ICT) work environments who apply specialised and technical knowledge and systematic approaches to testing, fault finding and problem solving.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for test	1.1 Determine acceptance criteria from system specifications 1.2 Determine and document software life cycle according to system specifications and contact in operations 1.3 Define test plan from acceptance criteria, software life cycle, system specifications and in compliance with organisational testing and acceptance processes 1.4 Notify contact in operations of scheduled tests to understand

	<p>implications for operations and modify schedule to minimise implications for operations</p> <p>1.5 Develop test scripts for online test and test run for batch test according to test plan</p> <p>1.6 Prepare test environment and select test tools according to test plan</p> <p>1.7 Prepare test logs and result sheets according to test plan</p> <p>1.8 Conduct walk-through with superior to review expected results against acceptance criteria and incorporate feedback</p>
2. Conduct test	<p>2.1 Create clean test environment and initialise test environment according to test plan</p> <p>2.2 Run test scripts and document results according to organisational testing and acceptance processes and test plan</p> <p>2.3 Finalise test environment and document completed tests according to test plan and test logs and result sheets.</p> <p>2.4 Compare and document actual results to expected results for each system unit and complete result sheets</p>
3. Analyse and classify results	<p>3.1 Analyse test results against acceptance criteria to identify variances</p> <p>3.2 Summarise and classify test results to prepare report highlighting critical and urgent variances</p> <p>3.3 Notify contact in operations of test completion to communicate implications</p> <p>3.4 Obtain and incorporate feedback from superior on test results report to finalise report</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets and analyses a range of textual information and numerical data to determine necessary actions
Writing	<ul style="list-style-type: none"> Uses clear language to record and report technical information, and checks for accuracy at all times Uses writing style and documentation formats appropriate to the task
Oral	<ul style="list-style-type: none"> Uses clear and accurate language to provide and obtain information

Communication	relevant to the task
Numeracy	<ul style="list-style-type: none"> • Uses mathematical equations to calculate technical data • Accurately records, analyses and documents numerical and technical system data
Navigate the world of work	<ul style="list-style-type: none"> • Takes full responsibility for following policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> • Influences and fosters a collaborative culture and facilitates a sense of commitment and workplace cohesion • Uses communication tools and strategies to build and maintain effective working relationships
Get the work done	<ul style="list-style-type: none"> • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Applies systematic and analytical decision making processes for complex and non-routine situations • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause

Assessment Requirements for ICTSAS519 Perform systems tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Perform two system tests on a system including:
 - develop acceptance criteria
 - develop test plans
 - prepare and initialise a clean test environment
 - test the operation and consistency of the total system prior to delivery according to system specifications, including testing:
 - performance
 - security
 - configuration sensitivity
 - start-up and recovery from failure modes
 - analyse and report test results
 - obtain and act on feedback coming from test results
 -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key features and processes of automated test tools
- Typical procedures for system testing and acceptance
- Implications for organisational operations of system testing activities
- Software life cycles
- Test planning and scheduling
- Test script development
- Test environment preparation

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes:

- Relevant industry software packages
- Documentation of system requirements and design
- Organisational testing and acceptance processes
- Individual contact in operations in the organisation
- Superior in the organisation
- Hardware and environments for system test use
- System or application suitable for testing

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAS520 Develop detailed test plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to plan for testing information and communications technology (ICT) systems including software, systems administration, networking, and web development, by collating documentation of conditions and expected results sufficiently to allow for thorough system testing.

It applies to individuals who use technical and specialised knowledge and systematic approaches in performing or organising others to complete complex technical testing operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare test environment and stakeholders	1.1 Determine structure of system and user accounts to understand test environment from system specifications 1.2 Develop and document draft test plan according to organisational testing procedures and system specifications 1.3 Notify stakeholders of test objectives and test schedule

	<p>according to organisational testing procedures</p> <p>1.4 Notify contact in operations of scheduled test and incorporate feedback to ensure preparedness and common understanding of implications and dependencies</p>
2. Prepare test data and schedule	<p>2.1 Gather test schedules according to organisational testing procedures</p> <p>2.2 Correlate schedules with related functionality according to organisational testing procedures</p> <p>2.3 Check testing schedule prior to validation according to organisational testing procedures</p> <p>2.4 Prepare test according to the test plan and document expected results</p> <p>2.5 Register test plan and initiate log entries according to organisational testing procedures</p>
3. Complete test plan and acceptance processes	<p>3.1 Validate test and acceptance processes with stakeholders</p> <p>3.2 Finalise test plan and ensure documentation is compliant with organisational testing procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses and evaluates textual and numerical information from a range of documentation to determine required action
Writing	<ul style="list-style-type: none"> Uses clear and precise language and document formats appropriate to the audience and task to convey explicit information and instructions
Oral Communication	<ul style="list-style-type: none"> Uses clear and accurate language, and inclusive and collaborative techniques to convey information to a range of personnel
Interact with others	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with colleagues and others
Get the work done	<ul style="list-style-type: none"> Accepts responsibility for planning, prioritising and sequencing complex tasks and workload Applies systematic and analytical decision making processes for complex and non-routine situations Uses digital technologies to manage ICT operations

Assessment Requirements for ICTSAS520 Develop detailed test plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For two systems:
 - interpret software specifications to plan for system testing
 - develop a comprehensive test plan that includes:
 - test approach including activities
 - test conditions and cases to be applied
 - test objectives
 - acceptance processes
 - data to be processed
 - automated testing coverage
 - expected results
 - dependencies
 - quality benchmarks
 - gain acceptance of test objectives and test schedule from stakeholders and contact in operations
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Systems relevant to testing requirements
- System specifications analysis
- Implications of testing processes for organisation
- Quality benchmarks for comparison
- Testing approaches and processes and associated advantages and disadvantages in different scenarios

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes:

- Testing software package
- System engineering management plan
- Test and evaluation program plan
- System suitable for testing and associated documentation including system specifications
- User account details
- Individual stakeholders
- Individual contact in operations in the organisation
- Organisational testing procedures including acceptable test approaches, log entry requirements and quality benchmarks.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAS522 Manage the testing process

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to effectively manage and administer the end-to-end testing process, including test definition, execution and reporting.

It applies to experienced individuals who work autonomously in performing or organising others to undertake testing of systems and applications.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine test scope and schedule	1.1 Determine testing requirements and objectives based on system requirements and acceptance criteria 1.2 Develop test plans based on system and testing requirements and objectives 1.3 Develop testing timelines and allocate resources according to organisational requirements and objectives 1.4 Document test schedules according to test procedures and provide to superior

	1.5 Obtain feedback from superior on test requirements, objectives, and schedule and incorporate required changes
2. Manage test procedures	2.1 Insert code into the test environment 2.2 Allocate personnel to testing procedures and manage work to ensure test procedures are carried out according to requirements and objectives 2.3 Administer alterations to the code if errors are detected 2.4 Integrate code into production environment 2.5 Administer full system test to ensure suitability of the system
3. Review the completeness and accuracy of the system	3.1 Record, prioritise, and investigate discrepancies and corrections according to organisational testing procedures 3.2 Brief superior on test results and agree required actions 3.3 Schedule required code changes based on test results 3.4 Evaluate results of system test against acceptance criteria to determine acceptability of system

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Compares and evaluates textual information and numerical data and specifications from documentation to inform testing requirements
Writing	<ul style="list-style-type: none"> Uses technically specific language and a range of writing styles to articulate requirements Uses appropriate formats and structures to present information logically for different audiences and revises documents based on feedback and outcomes
Oral Communication	<ul style="list-style-type: none"> Explains technical requirements and plans to relevant personnel, using clear and precise language and listening and questioning skills to confirm understanding
Interact with others	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with colleagues and others
Get the work done	<ul style="list-style-type: none"> Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals Uses problem solving techniques to analyse required outcomes in

	<ul style="list-style-type: none">order to manage the testing process• Uses digital technologies to manage operations
--	--

Assessment Requirements for ICTSAS522 Manage the testing process

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Develop one test schedule including plan, timeline, objectives and reporting arrangements
- Manage the testing process including allocating personnel to testing procedures on one occasion
- Review the system based on test results, brief organisational representative or line manager on outcomes and evaluate the results to determine acceptability on one occasion
- Identify, prioritise, schedule and evaluate required code changes based on test results on one occasion

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Testing techniques and automated test tools and associated key features and processes
- Typical testing procedures, standards and requirements
- Key system requirements and features
- Resource allocation and scheduling approaches and methodologies
- System testing evaluation methodologies

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Automated testing tools
- System requirements and acceptance criteria
- Organisational testing procedures and standards
- Project procedures and timeframe

- Individual organisational representative or line manager
- Individual personnel carrying out test procedures
- Test hardware and environments; test and production
- System or application suitable for testing

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSMB401 Set up and operate a contractor business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to own, operate and manage a small scale contractor business with employees that install telecommunications services.

It applies to individuals who operate their own contracting business delivering and installing telecommunications services to major service providers.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – small and micro business

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Set up business operation	1.1 Develop business plan for small business operation according to business planning guidelines 1.2 Follow statutory and legal requirements to register business 1.3 Mitigate liabilities by obtaining adequate business insurance 1.4 Provide and maintain vehicle through purchase, lease or hire purchase, including managing fringe benefits tax (FBT) liabilities

	according to business plan
2. Provide client service	<p>2.1 Develop and maintain client base to support business plan</p> <p>2.2 Analyse and determine client expectations in relation to industry standards</p> <p>2.3 Provide client service that meets client expectations according to enterprise standards</p> <p>2.4 Monitor and evaluate performance on installations completed against industry standards</p>
3. Perform small business financial management tasks	<p>3.1 Record income and expenditure using bookkeeping tools and software according to normal accounting standards</p> <p>3.2 Construct small business financial balance sheet using banking records or supply information to accountant according to normal accounting standards</p> <p>3.3 Calculate small business taxation and superannuation requirements or supply information to accountant according to normal accounting standards</p> <p>3.4 Complete a business activity statement (BAS) or supply data to accountant according to normal accounting standards</p>
4. Cost and quote installation	<p>4.1 Establish extent of work to be completed through professional and personable discussions with client</p> <p>4.2 Complete job specification for quote with cost estimates of time required to complete work</p> <p>4.3 Estimate and include cost of materials using supplier quoted prices</p> <p>4.4 Determine and include margin for profit and ongoing costs for installation according to business plan</p> <p>4.5 Check finalised quote for accuracy</p> <p>4.6 Submit quote to client within agreed timeframe</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.2, 2.4,	<ul style="list-style-type: none"> Evaluates and integrates facts and ideas to construct meaning from a prescribed and limited

	3.4, 4.3, 4.5	range of text types, including relevant regulatory, taxation and insurance information
Writing	1.1, 2.1, 2.3, 2.4, 3.4, 4.2, 4.6	<ul style="list-style-type: none"> Conveys intended meaning on familiar topics for a limited range of purposes and audiences
Oral Communication	2.3, 2.4, 4.1	<ul style="list-style-type: none"> Selects and uses appropriate strategies to establish and maintain spoken communication in familiar and some unfamiliar contexts, particularly in relation to clients, employees and government officers
Numeracy	1.1, 1.3, 1.4, 2.2, 2.4, 3.1-3.4, 4.1-4.6	<ul style="list-style-type: none"> Selects from and uses a variety of mathematical and problem solving strategies in a range of familiar and some less familiar contexts, including preparation of quotes and calculation of profit margins Extracts and evaluates the mathematical information embedded in a range of tasks and texts, including interpretation of financial information
Navigate the world of work	1.2, 2.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to business registration Recognises and follows protocols in relation to enterprise standards and meets client expectations associated with role
Get the work done	1.1, 1.3, 1.4, 2.1-2.4, 3.1, 3.2, 4.1	<ul style="list-style-type: none"> Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to develop a business plan Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Makes a range of critical and non-critical decisions in relation to mitigating liabilities and providing client service, taking a range of constraints into account Uses analytical processes to decide on a course of action, establishing criteria for deciding between options when developing client solutions Uses a broad range of features within bookkeeping tools and applications to improve personal productivity, optimising software functions for specific purposes

Performance Evidence

Evidence of the ability to:

- produce a business plan and set up a business
- define and meet client needs
- perform simple financial management tasks including maintaining simple financial records, and completing business activity statement (BAS), fringe benefits tax (FBT) and insurance documentation
- quote for installation jobs that cover all aspects of costing.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify business registration and licensing requirements
- identify and describe Commonwealth, state, territory and local government legislative requirements relating to business operations including:
 - anti-discrimination
 - environmental issues
 - equal employment opportunity
 - industrial relations
 - work health and safety (WHS)
 - taxation requirements
- analyse costs associated with running a business
- identify the current tax rates
- identify relevant industry codes of practice and evaluate their impact on the business
- identify relevant industry standards in relation to:

- materials and labour costs
- rates of pay
- identify common business liabilities
- evaluate several sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – small and micro business field of work and include access to:

- Australian Taxation Office guides
- industry standards labour rates
- general office bookkeeping procedures
- client service guides
- material suppliers
- financial management record keeping software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS402 Install and test power saving hardware

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install and test power saving components in servers, motherboards and other networking equipment.

It applies to individuals in the information and communications technology (ICT) industry who operate with a degree of autonomy, but who may also supervise the work of others when necessary.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to install and test power saving hardware	1.1 Arrange access to site according to required procedure 1.2 Assess extent of system implementation using feasibility report and organisational guidelines 1.3 Produce report to meet client and organisational requirements

	<p>1.4 Liaise with appropriate person to obtain approval for plans with recommendations</p> <p>1.5 Determine and source power saving hardware components according to agreed plan</p>
2. Install, test and evaluate power saving hardware	<p>2.1 Install and configure components according to work health and safety (WHS) and environmental requirements, plan, and manufacturer's and industry standards</p> <p>2.2 Resolve identified problems</p> <p>2.3 Test and enhance system performance to meet organisational requirements</p>
3. Complete documentation and clean up worksite	<p>3.1 Produce evaluation report on actual cost and benefits of implementing power saving hardware in organisation</p> <p>3.2 Provide support manual for client</p> <p>3.3 Record all test results and records for client</p> <p>3.4 Restore any changes made to worksite to client's satisfaction and obtain sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5, 2.1, 2.3	<ul style="list-style-type: none"> Identifies, analyses and evaluates complex text to determine legislative, regulatory, technical and business requirements, and to confirm requirements
Writing	1.3, 1.4, 3.1-3.3	<ul style="list-style-type: none"> Prepares reports, design solutions and recommendations that convey an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel
Oral Communication	1.4	<ul style="list-style-type: none"> Articulates clearly using specific language suitable for technical, operational and business audiences to convey requirements Uses listening and questioning techniques to confirm understanding
Numeracy	3.1	<ul style="list-style-type: none"> Analyses numerical information to assess cost

		and benefits of power saving hardware
Navigate the world of work	1.1, 1.2, 2.1, 2.3	<ul style="list-style-type: none"> Recognises and responds to both explicit and implicit organisational procedures and protocols, and legislative and regulatory requirements
Interact with others	3.4	<ul style="list-style-type: none"> Selects appropriate communication protocols in a range of work contexts
Get the work done	1.1, 1.5, 2.1-2.3	<ul style="list-style-type: none"> Develops plans for complex activities with strategic implications Systematically gathers and analyses all relevant information and evaluates options to make informed decisions Uses a range of digitally based technology and applications to access and filter data, and extract, organise, integrate and share relevant information in effective ways Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Assessment Requirements for ICTSUS402 Install and test power saving hardware

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for installation and testing of power saving hardware
- plan and connect the hardware components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe systems diagnostic features
- outline business processes
- summarise client business domain, business function and organisation
- discuss compatibility issues and resolution procedures
- describe the process of configuration of internet protocol (IP) networks
- identify current industry accepted hardware products
- describe the major components of client and business liaison
- explain how to document technical specifications
- discuss linkage between processes
- identify set up and configuration procedures
- outline technologies such as:
 - areas of the hardware relevant to configuration and testing
 - installation procedures
 - power saving hardware functionality

- explain vendor specifications and requirements for component installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which energy saving solutions can be implemented
- power saving hardware currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for ICTSUS403 Install and test power management software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- clarify and meet client requirements for installation and testing of power management software
- plan and connect the software components according to vendor and technical specifications across a variety of situations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify areas of the hardware relevant to configuration and testing
- explain current industry-accepted software products, with general features and capabilities
- summarise appropriate installation procedures
- outline work health and safety (WHS) requirements in relation to work safety, environmental factors and ergonomic considerations
- explain power saving software functionality
- describe set up and configuration procedures
- discuss systems diagnostic features
- explain vendor specifications and requirements for component installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which energy saving solutions can be implemented
- power saving hardware currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS404 Install thin client applications for power over ethernet

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to set up energy and cost efficient installations to meet sustainability targets by remotely feeding power over ethernet (PoE).

It applies to individuals with a range of telecommunication skills who install and configure thin client applications to enable PoE on a low powered workstation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to install thin client applications	1.1 Assess extent of applications to be implemented using feasibility report and organisational guidelines 1.2 Highlight issues associated with adoption of Web 2.0 applications 1.3 Produce implementation plan and present to client 1.4 Liaise with appropriate person to obtain approval for plans with any

	recommendations 1.5 Notify client for site access
2. Evaluate appropriate applications	2.1 Develop criteria for Web 2.0 applications to satisfy enterprise needs 2.2 Test and evaluate Web 2.0 applications according to agreed criteria 2.3 Present findings to client with recommendations on Web 2.0 applications
3. Install hardware components and applications	3.1 Follow work health and safety (WHS) and environmental requirements according to plan and manufacturer's specifications 3.2 Develop implementation plans with prioritised tasks and contingency arrangements for minimum disruption to client 3.3 Install hardware components and thin client software needed for work according to network and organisational requirements 3.4 Bench test performance of applications 3.5 Resolve identified problems
4. Complete work and document activities	4.1 Document installation and integration process according to organisational guidelines 4.2 Provide user documentation 4.3 Notify client and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.2, 3.1, 3.3, 4.1	<ul style="list-style-type: none"> Identifies, analyses and evaluates technical installation manuals and other text to determine regulatory and technical requirements
Writing	1.3, 1.5, 2.1, 2.3, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Prepares reports and design solutions in required formats that convey an understanding of outcomes and alternatives and uses terminology appropriate to present to relevant personnel
Oral Communication	1.3-1.5, 2.3, 4.3	<ul style="list-style-type: none"> Articulates clearly using specific language suitable for technical, operational and business audiences to convey requirements Uses listening and questioning techniques to

		confirm understanding
Navigate the world of work	1.1, 3.1, 3.3, 4.1	<ul style="list-style-type: none"> Recognises and responds to both explicit and implicit organisational procedures and protocols, and legislative and regulatory requirements
Interact with others	2.3, 4.3	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1, 1.2, 2.1, 2.2, 3.3-3.5	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals Takes responsibility for own workload, negotiating some key aspects with others Systematically gathers and analyses all relevant information and evaluates options to make informed decisions Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Assessment Requirements for ICTSUS404 Install thin client applications for power over ethernet

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for thin client applications
- install and configure components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline why businesses use thin technologies
- explain client business domain, business function and organisation
- summarise compatibility issues and resolution procedures
- explain the configuration of internet protocol (IP) networks
- discuss the importance of client and business liaison
- explain how to document technical specifications
- summarise linkage between processes
- explain set up and configuration procedures
- discuss systems diagnostic features
- explain Web 2.0 including:
 - applications and functionality
 - areas of the Web 2.0 relevant to configuration and testing
 - current industry accepted Web 2.0 products
 - vendor specifications and requirements for Web 2.0 applications
 - Web 2.0 application procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which remote power feeding applications can be implemented
- relevant documentation, feasibility studies and equipment manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess risk, use rigging equipment, and climb and perform rescues on standard telecommunications network structures.

It applies to technical staff who work in a team environment and who use rigging on telecommunications radio structures and may make use of rigging plant and equipment, fall arrest, fall guarding and fall constraint.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to use safe rigging practices	1.1 Notify appropriate personnel and take necessary precautions to minimise, control or eliminate hazards that may exist during work activities 1.2 Prepare for given work according to minimum approach distances for hazards on telecommunications network structures, as prescribed in relevant legislation, codes, regulations and

	standards
2. Assess status and condition of telecommunications network structures and identify climbing route	<p>2.1 Inspect and assess status and condition of telecommunications structures, according to industry practice</p> <p>2.2 Plot optimum climbing route to avoid hazards and ensure most effective use of selected equipment, according to manufacturer's instructions and industry practice</p>
3. Prepare climbing equipment	<p>3.1 Select climbing equipment in keeping with structures to be climbed, according to industry practice</p> <p>3.2 Inspect climbing equipment for damage, according to specifications and industry practice</p>
4. Climb telecommunications network structures	<p>4.1 Use safe climbing practices when ascending telecommunications network structures according to work health and safety (WHS) practices</p> <p>4.2 Maintain permanent attachment when more than three metres from ground, adhering to safety requirements</p> <p>4.3 Maintain three points of contact at all times, according to industry practice</p> <p>4.4 Manage ropes to avoid entanglement or fouling on structure</p> <p>4.5 Maintain safe working and minimum approach distances from hazards on telecommunications network structures at all times, according to standards and regulations</p>
5. Use climbing and working fall arrest systems	<p>5.1 Perform transfers to and from climbing system and working system using fall prevention practices, according to industry practice</p> <p>5.2 Use working fall arrest system, according to specifications</p>
6. Perform rescues	<p>6.1 Perform rescues according to situation, industry practice and local instruction</p> <p>6.2 Ascertain and seek required medical treatment according to enterprise standards</p> <p>6.3 Report accidents or incidents according to company procedures and local instructions</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 3.2, 4.1, 4.5, 5.1, 5.2	<ul style="list-style-type: none"> Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards
Writing	1.1, 6.3	<ul style="list-style-type: none"> Accurately completes relevant reports and documentation using clear and technically specific language and diagrammatic information
Oral Communication	1.1, 6.1, 6.3	<ul style="list-style-type: none"> Uses listening and questioning skills to confirm understanding for requirements, and participates in a verbal exchange of ideas and solutions Uses appropriate, detailed and clear language to address key personnel and to disseminate information
Numeracy	1.2, 4.2, 4.3, 4.5	<ul style="list-style-type: none"> Uses mathematical formulae to calculate ratios and scale, make adjustments to equipment and interpret methodological information
Navigate the world of work	1.2, 2.1, 2.2, 3.1, 3.2, 4.1-4.5, 5.1, 5.2, 6.1, 6.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements, standards, manufacturer's instructions and industry practice relevant to own work context, and draws attention to any issues that may affect self or others in relation to climbing and performing rescues
Get the work done	1.2, 2.1, 2.2, 3.1, 3.2, 4.4, 6.2	<ul style="list-style-type: none"> Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of the climbing and rescue context to identify relevant information and risks, and to identify and evaluate alternative strategies and resources Makes a range of critical and non-critical decisions regarding route, equipment and need for medical treatment in relatively complex climbing and rescue situations, taking a range of constraints into account Recognises and takes responsibility for addressing predictable and some less predictable safety problems in familiar work contexts

		<ul style="list-style-type: none">• Initiates standard procedures when responding to familiar problems within immediate context• Applies formal problem-solving processes when selecting equipment and managing ropes, breaking complex issues into manageable parts and identifying and evaluating several options for action
--	--	---

Unit Mapping Information

Assessment Requirements for ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- use safe rigging practices according to all work health and safety (WHS) legislative requirements, regulations and standards
- assess the status and condition of the telecommunications structure to be climbed and plot a climbing route according to industry practice
- select climbing equipment and climb a telecommunications network structure
- work safely using climbing and working fall arrest systems
- perform rescues from telecommunications network structures to industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss falls, including:
 - fall factors according to the Guidelines for the Prevention of Falls
 - fall prevention
 - fall types according to Australian Standards and regulations
- list features and operating requirements of rigging equipment
- summarise optical fibre cabling and equipment safety practices
- identify personal protective equipment for rigging projects
- summarise, in relation to radio frequency (RF) electromagnetic radiation (EMR):
 - associated risks
 - methods of detecting

- need to verify and maintain the EMR hazard management plan against an on-site situation
- preparing for work at a telecommunications site with potential EMR hazards
- reporting EMR hazards safety practices
- sources and types of RF EMR
- discuss rescue methods and practices relevant to the rigging environment
- outline safe rigging principles
- describe suspension trauma, including:
 - cause
 - effect
 - prevention
 - treatment
- discuss, in relation to a safety harness:
 - hazards associated with wearing a safety harness
 - how to check, fit and use a safety harness
 - the types and application of different safety harnesses
- explain licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- outline risks present when working on telecommunications radio structures
- clarify specific WHS issues that affect rigging, including:
 - relevant regulations, and applicable site and company WHS procedures
 - rigging practices and systems for telecommunications radio structures
 - safe climbing practices, including maintaining three points of contact while climbing
 - safe working and minimum approach distances for hazards on telecommunications network structures, according to standards and regulations
 - safety requirements when working at heights according to WHS legislation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN203 Install and configure a home or small office network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for entry level networking support to establish a small office or home office (SOHO) internet connected PC network.

It applies to individuals who may work as an installer or network technician configuring small networks with simple internet protocol (IP) addressing schemes that share a limited range of resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation of home or small office network	1.1 Prepare for given work confirming site-specific work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of the network and network resources from job briefs or appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Select and obtain personal computer system and network device requirements according to enterprise procedures</p> <p>1.5 Obtain operating instructions, manuals, hardware and software testing methodologies</p> <p>1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite</p>
2. Install and troubleshoot home or small office network	<p>2.1 Set up personal computer systems according to manufacturer's specifications and enterprise procedures</p> <p>2.2 Set up, configure and share network resources between network devices</p> <p>2.3 Determine network addressing scheme for network connectivity and confirm using calculations</p> <p>2.4 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures</p> <p>2.5 Identify security threats and initiate control measures according to enterprise procedures</p>
3. Complete and document network installation	<p>3.1 Restore worksite to safe condition according to established safety procedures</p> <p>3.2 Record and store essential installation information according to enterprise procedures</p> <p>3.3 Notify appropriate personnel of completion of the task according to enterprise procedures</p> <p>3.4 Notify appropriate personnel and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	3.2, 3.4	<ul style="list-style-type: none"> Completes workplace documentation accurately using appropriate form and vocabulary for intended audience
Oral Communication	3.3, 3.4	<ul style="list-style-type: none"> Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience

Numeracy	2.3	<ul style="list-style-type: none"> Confirms decisions using basic calculations and predictions
Navigate the world of work	1.1-1.4, 2.4, 2.5, 3.1-3.3	<ul style="list-style-type: none"> Follows legislative requirements and organisational protocols, policies and procedures relevant to own role
Interact with others	1.1-1.3, 1.6	<ul style="list-style-type: none"> Collaborates and cooperates with others to achieve specific outcomes
Get the work done	1.4, 1.5, 2.1-2.5	<ul style="list-style-type: none"> Prioritises and plans work to meet organisational requirements and client expectations Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement work health and safety (WHS) workplace procedures and practices
- plan installation of an internet connected network with advice and approvals of relevant personnel
- set up and configure wired and wireless networks with simple addressing schemes
- troubleshoot network and internet connectivity
- set up resource sharing
- deploy simple firewall network security
- obtain sign-off with relevant personnel.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline correct usage of tools and equipment
- describe enterprise WHS procedures
- outline basic computer systems and network operating systems
- describe computer networking principles (wired and wireless)
- outline network addressing systems (basic)
- explain network services and associated network models and protocols
- outline network security management
- outline troubleshooting procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where installation of a small office home office network may be conducted
- tools, equipment and materials currently used in the industry
- relevant workplace procedures, specifications and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN204 Install and configure a small to medium business network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to establish and support a small to medium business network capable of providing wide area network (WAN) connectivity and common web internet services.

It applies to individuals who may be working as a small to medium enterprise (SME) internet protocol (IP) network installer, network technician or SME network support person.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation of small to medium enterprise network	1.1 Prepare for given work, confirming site-specific work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Determine nature and scope of business network and network resources from job briefs or appropriate personnel</p> <p>1.4 Select and obtain computer system and network device requirements according to enterprise procedures</p> <p>1.5 Obtain operating instructions, manuals, hardware and software testing methodologies</p> <p>1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at worksite</p>
2. Install and configure small to medium enterprise network	<p>2.1 Set up wired infrastructure according to manufacturer's specifications and enterprise procedures</p> <p>2.2 Set up and configure resource sharing on a network server</p> <p>2.3 Install WAN connection and ISP services and configure according to enterprise procedures</p> <p>2.4 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures</p> <p>2.5 Implement data back-up and disaster recovery measures according to enterprise procedures</p>
3. Complete and document network installation	<p>3.1 Restore worksite to safe condition according to established safety procedures</p> <p>3.2 Record and store essential installation information according to enterprise procedures</p> <p>3.3 Notify appropriate personnel of completion of the task according to enterprise procedures</p> <p>3.4 Notify customer and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3	<ul style="list-style-type: none"> Identifies and interprets scope of job and relevant procedures
Writing	3.2, 3.4	<ul style="list-style-type: none"> Completes workplace documentation accurately using appropriate form and vocabulary for the intended

		audience
Oral Communication	3.3, 3.4	<ul style="list-style-type: none"> Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience
Numeracy	1.3, 2.1	<ul style="list-style-type: none"> Makes calculations appropriate for measuring and estimating materials and for installation
Navigate the world of work	1.1-1.3, 2.1, 2.3-2.5, 3.1-3.3	<ul style="list-style-type: none"> Follows legislative requirements and organisational protocols, policies and procedures relevant to own role
Interact with others	1.1-1.3, 1.6	<ul style="list-style-type: none"> Collaborates and cooperates with others to achieve desired outcomes
Get the work done	1.4, 1.5, 2.3-2.5	<ul style="list-style-type: none"> Prioritises and plans work to meet organisational standards, regulatory requirements and client expectations Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate Uses digital technologies and systems to complete work tasks

Assessment Requirements for ICTTEN204 Install and configure a small to medium business network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement work health and safety (WHS) workplace procedures and practices
- plan installation of a network that uses subnet addressing and provides internet service provider (ISP) services
- set up and configure wired infrastructure
- troubleshoot local network and wide area network (WAN) connectivity and services
- configure resource sharing on a network server
- provide network data back-up and disaster recovery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify correct usage of tools and equipment
- outline data back-up services and procedures
- describe enterprise WHS procedures
- define ISP services
- outline network device configuration
- describe network models and topologies
- define subnet addressing
- outline troubleshooting procedures
- describe WAN services and ISP responsibilities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where installation of a small to medium business network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures
- product and manufacturing specifications and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN205 Build and maintain a secure network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to build a simple and secure wired local area network (LAN) or wide area network (WAN) using a range of client server applications and services.

It applies to individuals who may work in job roles such as an installer of internet protocol (IP) networks, a WAN and LAN network technician or a WAN and LAN network support person.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to build LAN or WAN	1.1 Prepare for given work confirming site-specific work health and safety (WHS) and environmental requirements, with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine network design specification from job briefs or

ELEMENT	PERFORMANCE CRITERIA
	appropriate personnel 1.4 Determine network addressing scheme for network connectivity and confirm using calculations 1.5 Select and obtain network hardware according to established procedures 1.6 Obtain operating instructions, manuals, hardware and software testing methodologies 1.7 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2. Build and verify network	2.1 Establish connections between network hardware according to manufacturer's specifications and established procedures 2.2 Verify network routing and switching to conform to network design specification 2.3 Set up, configure and share network resources between network devices
3. Monitor network performance and troubleshoot network	3.1 Monitor network traffic and assess performance metrics against manufacturer's specifications and established procedures 3.2 Identify security threats and initiate control measures according to enterprise procedures 3.3 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures
4. Complete and document network build	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store network schematics and network addressing scheme 4.3 Notify appropriate personnel of completion of the task 4.4 Notify customer and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Reading	1.3, 2.1	<ul style="list-style-type: none"> Identifies and interprets scope of job and relevant procedures
Writing	4.2, 4.4	<ul style="list-style-type: none"> Completes workplace documentation accurately using appropriate form and vocabulary for intended audience
Oral Communication	4.3, 4.4	<ul style="list-style-type: none"> Articulates specific messages in a tone and manner appropriate for intended audience
Numeracy	1.4, 3.1	<ul style="list-style-type: none"> Confirms and checks decisions using basic calculations and predictions
Navigate the world of work	1.1, 1.2, 1.4, 1.5, 2.1, 3.1-3.3, 4.1	<ul style="list-style-type: none"> Follows legislative requirements and organisational protocols, policies and procedures relevant to own role
Interact with others	1.1-1.3, 1.7,	<ul style="list-style-type: none"> Collaborates and cooperates with others to achieve specific outcomes
Get the work done	1.5, 1.6, 2.1, 2.2, 3.1-3.3, 4.2	<ul style="list-style-type: none"> Plans and prioritises tasks, developing and implementing a work program in line with organisational expectations, legislative requirements and work role Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN205 Build and maintain a secure network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- effectively implement work health and safety (WHS) workplace procedures and practices
- develop a network addressing scheme
- determine required network components to build the network
- plan, build, configure, test and analyse performance of a network
- troubleshoot network problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe enterprise WHS procedures
- explain internet and computer network communication
- outline network addressing schemes including open systems interconnect (OSI) and transmission control protocol (TCP)/IP model
- describe planning the cabling of ethernet networks
- define the seven layer OSI model
- identify correct tool and equipment usage
- identify troubleshooting procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where building and maintenance of secure network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures
- product and manufacturing specifications and reference material.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN206 Operate new media software packages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to produce a media design through selection and appraisal of media software tools, assessment and manipulation of software functions and the use and creation of graphics and editing media files.

It applies to individuals who want an introduction to the use of media software packages and may eventually lead to employment in graphic design, industrial design, or production of promotional and marketing media material.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify relevant new media software and supporting hardware to meet design brief	1.1 Perform media work in a safe manner to comply with work health and safety (WHS) criteria and accepted industry practice 1.2 Identify basic requirements of media design brief, including user environment from customer specifications 1.3 Research and review new media software and hardware available to realise design requirements

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select a new media software program to meet design brief requirements 1.5 Identify relevant new media hardware to support design brief requirements 1.6 Select, re-encode and transcode relevant file formats to process and modify digital media files to suit user application
2. Develop a new media graphic design	2.1 Review design brief to ensure customer requirements are well interpreted 2.2 Procure or create suitable graphics, video or sound to meet requirements of design brief 2.3 Manipulate graphics, video or sound using freely available software tools for evaluating capabilities and limitations of different software packages 2.4 Produce a media design according to customer specifications, and save new media files using designated file formats
3. Review new media design	3.1 Evaluate media design for creative, dramatic and technical quality, file size, and data suitability to meet the brief 3.2 Test and run graphics, video and sound of media design as part of a multimedia presentation, and present designs in the appropriate format

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1	<ul style="list-style-type: none"> Interprets workplace documents and confirms specifications are met
Numeracy	2.3, 3.1	<ul style="list-style-type: none"> Calculates dimensions and measurements to meet job specifications
Navigate the world of work	1.1	<ul style="list-style-type: none"> Follows legislative requirements and organisational protocols, policies and procedures relevant to own role

Get the work done	1.3, 1.4, 1.6, 2.2, 2.3, 2.4, 3.1, 3.2	<ul style="list-style-type: none">• Prioritises and plans work to meet organisational expectations, legislative requirements and client expectations• Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate• Evaluates features of digital tools against set criteria to inform decisions about suitability• Uses digital technologies and systems to enter, manipulate and store data
-------------------	--	--

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTTEN206 Operate new media software packages	ICTTEN2218A Operate new media software packages	Updated to meet Standards for Training Packages.	Equivalent unit

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for ICTTEN206 Operate new media software packages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate new media software
- manipulate files effectively
- produce an effective media design using two new media software packages
- evaluate a design
- test and run a design.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain functions and features of two new media applications
- define graphic design and stylistic language conventions
- identify software tools to develop, edit and test design
- outline principles of:
 - digital imaging and file formats
 - file management
 - transfer systems
 - video and sound file formats
 - visual design principles
- outline vendor product directions in new media hardware and software
- describe visualisation and interpreting creative information, scripts (text) and images.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- work stations with appropriate software tools
- media capable PCs
- peripheral media equipment with HD capability
- LAN with media server
- internet access.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN207 Install and test internet protocol devices in convergence networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for entry-level installations and testing for internet protocol (IP) based telecommunications networking, using convergent technologies to deliver services of Next Generation Networks (NGN).

It applies to technicians and cable installers who install and maintain IP-based equipment for customer and service providers for NGN services, including internet protocol TV (IPTV), IP security, digital home networks, IP-based cable access TV (CATV), IP core and access networks, home automation, interactive TV, radio frequency identification (RFID), biometric recognition systems, mesh networks, smart grids and cloud computing.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather information to prepare for installation of IP device	1.1 Obtain work health and safety (WHS) requirements and environmental requirements for a given work area, and clarify with appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Identify safety hazards and notify appropriate personnel</p> <p>1.3 Obtain identified operating instructions, manuals, and hardware and software testing methodologies</p> <p>1.4 Obtain documentation on a range of IP devices that can be networked according to the open system interconnection (OSI) reference model in networking</p> <p>1.5 Obtain the range of required IP devices to be connected to the network and identify the IP-based telecommunications application that will be provided</p>
2. Prepare for installation of IP device	<p>2.1 Select IP device for installation that can be integrated into existing network</p> <p>2.2 Obtain appropriate hardware, software, network protocols, peripheral devices and media types and connectors for configuration process</p> <p>2.3 Draw physical topology of the device connection to network and seek approval from appropriate personnel</p> <p>2.4 Obtain configuration details to start setting up device</p>
3. Configure and test IP device	<p>3.1 Determine network addressing scheme for mapping network connectivity and verify by calculations</p> <p>3.2 Assign a valid static IP address to device</p> <p>3.3 Use network commands to determine and verify the media access control (MAC) address, the IP address and network performance of the device</p> <p>3.4 Determine security threats and initiate security solutions to prevent security breaches according to enterprise procedures</p>
4. Complete and document network installation	<p>4.1 Restore worksite to safe condition according to established safety procedures</p> <p>4.2 Record and store essential installation information according to enterprise procedures</p> <p>4.3 Notify appropriate person of task completion according to enterprise procedures</p>
5. Test wireless link	<p>5.1 Select types of wireless connections used in telecommunications</p> <p>5.2 Set up a wireless link to connect two wireless devices, following safe work practices</p> <p>5.3 Transmit data over the link and verify accuracy of received data</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 3.3, 3.1	<ul style="list-style-type: none"> Evaluates information and products from a variety of sources to ensure appropriateness to client needs
Writing	2.3, 3.2, 3.3, 4.2, 4.3, 5.3	<ul style="list-style-type: none"> Develops accurate and industry specific drawings Writes computer code and commands and records technical data, ensuring correct syntax and accuracy
Oral Communication	4.3	<ul style="list-style-type: none"> Uses clear language and concepts, and tone and pace appropriate for audience and purpose
Numeracy	3.1	<ul style="list-style-type: none"> Performs basic mathematical calculations to compare and verify connectivity
Navigate the world of work	1.1, 3.4, 4.1-4.3, 5.2	<ul style="list-style-type: none"> Understands roles and responsibilities for task and makes basic decisions on work and completion parameters Ensures knowledge of WHS requirements Recognises organisational expectations and follows explicit protocols and procedures Seeks clarification when required
Interact with others	1.1, 1.2, 2.4	<ul style="list-style-type: none"> Follows instructions regarding what and how to communicate, following predetermined scripts Initiates a connection with others through verbal, or nonverbal communication responding as appropriate
Get the work done	1.2-1.5, 2.1-2.4, 3.1-3.4, 4.1, 5.1-5.3	<ul style="list-style-type: none"> Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates outcome effectiveness Responds to predictable routine problems and implements standard or logical solutions Uses digital technology for basic reading, recording and searching information, and for communications following routine procedures and security requirements

Assessment Requirements for ICTTEN207 Install and test internet protocol devices in convergence networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare for installation of internet protocol (IP) device connected to a network
- set up and configure IP device with simple addressing schemes
- test and secure device against security threats
- produce essential installation information
- follow work health and safety (WHS) workplace procedures and practices
- test wireless link.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe principles of computer networking and identify common types and protocols used
- describe IP-based telecommunications and importance of network configuration including:
 - IP addressing
 - IP devices
- identify and describe the purpose of common hardware and software used in IP communications
- identify and summarise organisational policies and procedures relating to installation and testing of internet protocol devices
- describe common procedures for basic testing and troubleshooting an IP device
- describe procedures for assigning networking protocols
- explain the purpose for internet security and describe common configurations

- describe various basic wireless technologies and their application in communications
- describe environmental factors requiring management on telecommunications equipment
- identify and describe WHS requirements and personal safety issues relating to installation and testing of internet protocol devices
- define open system interconnection (OSI) and explain various levels involved
- identify common types of peripheral devices used in network communications systems
- calculate using the binary system
- describe common computer commands used to verify and manage IP and network performance
- identify common security threats attributed to networks and specify solutions to combat these threats
- identify common wireless technologies used in communications.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a small network with IP devices
- tools, equipment, materials and documentation required for installing and testing IP devices
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN301 Provide infrastructure for telecommunications network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install supporting infrastructure for telecommunications equipment and associated hardware equipment.

It applies to field officers, installation technicians or technical supervisors from carriers, contractors or other service providers who install switching, transmission and radio networks and the various transmission paths – including cable, optical fibre, radio, microwave and satellite.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation infrastructure work	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Notify customer to arrange site access and obtain installation plan and specifications

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Conduct site survey to verify infrastructure installation requirements can be met</p> <p>1.4 Identify site hazards and notify appropriate personnel to make site safe</p> <p>1.5 Notify customer of alterations required to installation design and make recommendations for possible solutions</p> <p>1.6 Obtain approval for alterations and update installation plan</p> <p>1.7 Develop installation activity schedule to minimise workplace disruption and according to relevant regulations and standards</p> <p>1.8 Obtain material supplies, safety equipment, resources, tools and test equipment so it is available when required for installation for safe work practice</p>
2. Build network equipment infrastructure	<p>2.1 Prepare for given work according to work health and safety (WHS) and environmental requirements</p> <p>2.2 Build metal superstructure to house equipment according to manufacturer's specifications and to safety and electrical standards</p> <p>2.3 Build ducts and tray ways for signal and data cabling and optical cables according to plan and specification after consultation with operational staff</p> <p>2.4 Build busbars or power cabling infrastructure as specified on the plan</p> <p>2.5 Install cable distribution frames according to plan and manufacturer's specifications</p> <p>2.6 Install earthing to all metal infrastructures according to specifications</p>
3. Install power infrastructure	<p>3.1 Install batteries and rectifiers and connect according to manufacturer's and WHS requirements</p> <p>3.2 Test and monitor battery discharge levels and obtain replacement batteries under warranty where required</p>
4. Supervise DC power distribution	<p>4.1 Coordinate and arrange for power distribution work to be performed by qualified personnel to meet electrical safety requirements and certifications</p> <p>4.2 Monitor electrical work to ensure compliance with installation plan</p> <p>4.3 Identify and rectify faults where possible or escalate according to enterprise policy</p>
5. Restore site and	<p>5.1 Attach infrastructure labels and designations according to</p>

ELEMENT	PERFORMANCE CRITERIA
complete documentation	<p>enterprise requirements</p> <p>5.2 Complete inspection sheets and declare asset ready for next stage of installation using appropriate sign-off documentation</p> <p>5.3 Clean up and prepare site in readiness for next installation phase</p> <p>5.4 Notify customer and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1-2.6, 3.1, 4.1, 4.2	<ul style="list-style-type: none"> Interprets and applies textual information from plans, specifications, legislation and regulatory documents to building and construction
Writing	1.3, 1.5-1.7, 5.1, 5.2, 5.4	<ul style="list-style-type: none"> Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols Prepares documentation for outcomes of tests and inspections for reporting to clients and others
Oral Communication	1.2, 1.4-1.6, 2.3, 5.4	<ul style="list-style-type: none"> Uses active listening skills and oral exchange when discussing and clarifying installation parameters and providing feedback to clients Actively engages with others to communicate work requirements and activities
Numeracy	2.2-2.6, 3.2	<ul style="list-style-type: none"> Takes measurements and uses them for work layout and construction Makes calculations appropriate to measuring and estimating materials for construction
Navigate the world of work	1.1, 1.7, 2.1, 2.2, 3.1, 4.1, 4.3, 5.1	<ul style="list-style-type: none"> Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need of coordination with others Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.2, 1.4-1.6, 2.3, 3.2, 4.1	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating to clients and co-workers in a range of work contexts

		<ul style="list-style-type: none">Complies with work instructions and contributes to work group discussions using accepted conventions
Get the work done	1.1, 1.3, 1.4, 1.7, 1.8, 2.2-2.6, 3.1, 3.2, 4.1-4.3, 5.2, 5.3	<ul style="list-style-type: none">Takes responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective outcomesMakes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations

Unit Mapping Information

Assessment Requirements for ICTTEN301 Provide infrastructure for telecommunications network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify potential earthing locations, cable routes, cables trays, data cabinets, telecommunication enclosures and distributors
- build metal superstructure
- install protective earth and functional earth installations
- install power infrastructure
- supervise DC power distribution
- discuss and inform the customer on the progress of works and obtain sign off when completed.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe cabling types, connectors and cabling structures
- recognise common customer telecommunications applications and related equipment
- demonstrate connections to carrier infrastructure or equipment
- recognise and describe current legislation relating to installation of telecommunications equipment and connection to carrier services
- describe environmental impact of cabling works, including options for green ICT installations
- describe network topologies, interface and interconnect solutions
- recognise and describe work health and safety (WHS) requirements for:
 - working in confined spaces
 - electrical safety

- working at heights
- lifting
- materials handling
- other physical hazards
- outline network and transmission equipment and their application
- describe power requirements and electrical safety as they apply to the network environment
- recognise warranty information for equipment supplies and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications networks engineering field of work and include access to:

- a site where installation of supporting infrastructure may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package version 3.0.

Application

This unit describes the skills and knowledge required to remove and replace electronic circuit boards and associated equipment in switching, transmission, fixed, mobile radio, access and site environmental management networks, including the various transmission path components.

It applies to linesworkers, technicians or technical supervisors working for carriers, or other service providers. It also applies to work, which may be performed under direction of the relevant authority.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for hardware replacement	1.1 Obtain repair/replacement brief, relevant legislation, codes, regulations and standards for the job 1.2 Discuss and record details of hardware to be removed or replaced, and proposed work schedule with the relevant authority 1.3 Inspect network and determine the scope of the repair task

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Work safely according to relevant safety legislation and client practices</p> <p>1.5 Obtain appropriate new or replacement hardware and associated installation documentation</p> <p>1.6 Obtain tools and check they are in good working order</p> <p>1.7 Undertake an impact risk assessment of the hardware replacement with the relevant authority and prepare a contingency plan</p>
2. Replace hardware	<p>2.1 Notify relevant authority of any building or equipment cabinet alarms that might be activated by accessing site</p> <p>2.2 Verify serial/part numbers of replacement card</p> <p>2.3 Determine card suite, rack, shelf and slot location</p> <p>2.4 Remove and replace connecting cables and card as required</p> <p>2.5 Replace electronic equipment, as instructed by the relevant authority, following relevant anti-static precautions</p> <p>2.6 Complete associated jumpering or cabling as required</p> <p>2.7 Request relevant authority or integration team to activate the card</p> <p>2.8 Escalate any hardware replacement problems with the relevant authority and implement contingency plan</p> <p>2.9 Restore pressurisation systems as required</p>
3. Clean up worksite and complete required documentation	<p>3.1 Remove and dispose of waste and debris from worksite, according to environmental requirements, and restore work area</p> <p>3.2 Recover faulty equipment and return to appropriate point for disposal or refurbishment</p> <p>3.3 Complete documentation, update fault records and make recommendations according to the client practices</p> <p>3.4 Notify relevant authority of job completion and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description
-------	-------------	-------------

	Criteria	
Reading	1.1, 1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 2.3, 3.3	<ul style="list-style-type: none"> Recognises and interprets technical, regulatory and enterprise documentation
Writing	1.2, 1.3, 1.7, 2.1, 3.3, 3.4	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to complete and update workplace documentation
Oral Communication	1.2, 1.7, 2.1, 2.7, 2.8, 3.4	<ul style="list-style-type: none"> Liaises with a range of personnel about technical and operational requirements using specific and relevant language Uses listening and questioning techniques to confirm understanding
Numeracy	1.2, 1.5, 2.2, 2.6, 3.3	<ul style="list-style-type: none"> Uses mathematical formulae to calculate power, voltage, current and the resistance, capacitance or inductance of various components
Navigate the world of work	1.1, 1.4, 2.5, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Complies with policies, procedures and legislative requirements relevant to own role
Interact with others	1.2, 1.7, 2.1, 2.7, 2.8, 3.4	<ul style="list-style-type: none"> Uses appropriate practices and protocols to communicate effectively with a range of personnel
Get the work done	1.1, 1.3, 1.5, 1.6, 1.7, 2.1, 2.3, 2.4, 2.6, 2.7, 2.8, 2.9, 3.1, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> Plans, sequences and carries out tasks to meet required outcomes Analyses task requirements to make routine decisions, taking some situational factors into account Anticipates potential problems and prepares contingency plans Follows required procedures when responding to problems Understands purpose and some specific functions of common digital tools used in work contexts

Assessment Requirements for ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- interpret, discuss and confirm required work
- obtain documentation, equipment and hardware for required work
- notify relevant personnel of alarms that could be activated in the access and restoration of equipment cabinets and enclosures
- prepare a contingency plan to use if card replacement is unsuccessful, in consultation with relevant personnel
- remove and replace circuit boards as instructed by relevant authority, following work health and safety (WHS) requirements and anti-static precautions
- replace telecommunications hardware according to client practices
- follow required practices or contingency plan if hardware replacement is unsuccessful
- update fault records and complete required documentation
- restore site to required condition
- liaise with personnel from relevant authority for information and reporting purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain application of direct current (DC) and alternating current (AC) electrical principles to the removal and replacement of circuit boards
- describe static electricity and its impact on electronic circuit boards in telecommunications equipment
- outline performance testing and fault finding techniques of telecommunications networks
- describe the purpose and operation of common testing equipment

- describe the behaviour of faulty network elements including symptoms and impact on network
- summarise common telecommunications hardware and network structures
- list types of power sources used in telecommunications networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site to replace telecommunications network hardware
- a range of hardware currently used in industry
- a range of general and test equipment required for testing telecommunications network hardware.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN402 Estimate and quote for customer telecommunications equipment installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess and estimate costs for all types of customer cabling needs.

It applies to individuals who undertake successful negotiations with customers and suppliers, and who update schematic drawings and specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm and update schematic drawings and specifications	1.1 Obtain existing specifications and drawings and prepare additional or new schematic drawings and specifications for installation if required 1.2 Confirm all fittings, cable types and equipment locations with customer
2. Price labour, materials and other relevant items	2.1 Obtain quotations and delivery dates from suppliers to ensure

ELEMENT	PERFORMANCE CRITERIA
and establish availability	<p>fair comparisons across suppliers</p> <p>2.2 Estimate labour costs based on company or industry labour rates and conditions</p> <p>2.3 Check pricing documentation to ensure supply proposal matches customer specification for material, quality and performance</p>
3. Estimate labour, materials and other relevant item requirements	<p>3.1 Prepare estimations allowing for contingencies during installation and relevant legislation, codes, regulations and standards</p> <p>3.2 Calculate costs using standard unit measures where relevant</p> <p>3.3 Ensure estimates will return a profit on installation where appropriate</p>
4. Prepare and confirm quote with customer	<p>4.1 Prepare an equipment installation quote that meets customer requirements</p> <p>4.2 Negotiate changes and variations to meet customer and company needs</p>
5. Establish customer's financial arrangements	<p>5.1 Obtain customer's approval of purchase arrangements and method of payment</p> <p>5.2 Complete finance company negotiations successfully, where required, and obtain customer's agreement</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.3	<ul style="list-style-type: none"> Recognises and interprets technical documentation such as equipment manuals and specifications and other drawings to determine job requirements
Writing	1.1, 1.2, 3.1, 4.1, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.2, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> Participates in an oral exchange with customers and suppliers, requiring some negotiation and liaison on technical and operational matters
Numeracy	2.2, 3.1-3.3	<ul style="list-style-type: none"> Uses mathematical formulae to measure equipment

		requirements and accurately calculate equipment costs
Navigate the world of work	3.1	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	1.1, 2.1, 5.2	<ul style="list-style-type: none"> Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks in a safe manner Implements actions according to a predetermined plan, making slight adjustments if necessary Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, and identifying and taking some situational factors into account Initiates standard procedures when responding to familiar equipment and logistics problems within immediate context

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status

Assessment Requirements for ICTTEN402 Estimate and quote for customer telecommunications equipment installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine customer equipment requirements
- prepare detailed estimates, updated schematic drawings and specifications, including material and labour costs for telecommunications equipment installations
- negotiate with contractors on material availability and pricing for customer equipment installations
- complete detailed quotes for installations that allow for variations
- negotiate and confirm variations to quote and financial arrangements with customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe features of customer telecommunications equipment
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain processes and techniques required to prepare plans, estimate and quote for installations
- describe specific work health and safety (WHS) issues that may impact a quotation for customer equipment installation
- outline typical issues and challenges that occur when negotiating with customers.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which estimates and quotes may be conducted
- relevant databases, licensing requirements and other site- related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN403 Assign a transmission path

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to allocate channel capacity to a customer or customer group based on details provided in a service request.

It applies to individuals working as technical officers or engineers for private and public organisations. They combine technical skills with organisational skills to assess customer requirements and allocate a transmission medium to provide access to the customer.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect data to evaluate capability of transmission path	1.1 Determine service details from service request 1.2 Use transmission medium plans to locate customer position relative to the access network provisioning 1.3 Evaluate existing transmission mediums in close proximity to assess their capability to deliver service to customer 1.4 Specify equipment to be used on the service from service request

ELEMENT	PERFORMANCE CRITERIA
	1.5 Specify line interface type to be used, according to enterprise guidelines
2. Allocate transmission medium for service	2.1 Select appropriate transmission medium to deliver service to customer's premises 2.2 Record information about transmission medium between customer's premises and exchange or network terminal point 2.3 Verify service delivery point interface at exchange or network terminal point is compatible with required system 2.4 Conduct appropriate allocation process to assign new services and send completed allocation information to appropriate field staff to verify physical allocation before providing service
3. Maintain transmission medium records	3.1 Advise relevant personnel of impending bearer shortages to facilitate future planning allocation 3.2 Update plans and databases to record all details

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5	<ul style="list-style-type: none"> Recognises and interprets technical documentation to determine job requirements
Writing	1.4, 1.5, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to record and notate workplace documentation
Oral Communication	1.4, 1.5, 2.3, 3.1	<ul style="list-style-type: none"> Uses listening and questioning skills to confirm understanding of requirements and participates in a verbal exchange with technical staff, subject matter experts and manufacturers Uses appropriate, detailed and clear language to address key personnel and disseminate information
Numeracy	2.4	<ul style="list-style-type: none"> Makes calculations to determine capacity requirements
Interact with others	2.4	<ul style="list-style-type: none"> Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and

		audience
Get the work done	1.3, 2.4, 3.2	<ul style="list-style-type: none">• Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks• Implements actions according to a predetermined plan, making slight adjustments if necessary• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account• Understands purpose and specific functions of common digital tools used in work contexts

Assessment Requirements for ICTTEN403 Assign a transmission path

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- assess transmission needs for a transmission path according to service request
- select suitable equipment to provide new services
- communicate effectively with stakeholders to meet customer needs
- assess future needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- review common customer telecommunications applications and related equipment
- investigate core networks using emerging and converging technologies
- explain current legislation relating to installation of telecommunications equipment and connection to carrier services
- evaluate customer access options and their technical support systems
- describe multiplexing principles and transmission hierarchies
- summarise network and transmission equipment
- outline network topologies, interfaces and interconnect solutions.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where transmission paths can be allocated

- a computer networking facility
- relevant regulatory and equipment documentation
- equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN404 Install and configure a wireless mesh network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to connect and test wireless networking equipment or radio communications equipment.

It applies to individuals working as technicians and technical officers for private and public organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Configure wireless mesh nodes and wireless access points	1.1 Determine internet protocol (IP) addressing schemes from design plan, obtained from appropriate personnel 1.2 Confirm compatibility of factory installed firmware in wireless routers with mesh routing requirements – otherwise install upgrade firmware 1.3 Configure wireless router settings and wireless fidelity (WiFi) for wireless access point settings for inclusion in mesh network 1.4 Connect mesh node and access node back-to-back via a straight

ELEMENT	PERFORMANCE CRITERIA
	LAN cable according to design plan
2. Connect separate mesh networks via backbone	<p>2.1 Configure routing software on mesh and backbone nodes to enable mesh traffic to reach backbone</p> <p>2.2 Connect mesh node and backbone node back-to-back via a straight LAN cable</p> <p>2.3 Configure gateway server and gateway node and add required services to network</p>
3. Test connectivity within mesh network	<p>3.1 Assemble all wireless mesh routers with configuration sheets attached, and power up routers</p> <p>3.2 Connect PC to a wireless mesh router and confirm an IP address is provided automatically by dynamic host configuration protocol (DHCP)</p> <p>3.3 Confirm connectivity to mesh nodes and the gateway by pinging individual IP addresses, and rectify faulty nodes if required</p>
4. Test network connectivity via wireless backbone	<p>4.1 Install mesh nodes according to design plan</p> <p>4.2 Install and align directional antennas on wireless backbone path according to installation instructions and work health and safety (WHS) procedures</p> <p>4.3 Confirm connectivity between mesh clusters at either end of wireless backbone</p>
5. Clean up worksite and complete administrative work	<p>5.1 Remove waste from worksite, dispose of according to environmental requirements and restore work area to customer's satisfaction</p> <p>5.2 Update documentation records and make recommendations according to enterprise policy</p> <p>5.3 Notify customer of job completion and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	4.2, 5.2	<ul style="list-style-type: none"> Recognises and interprets technical documentation to

		determine job requirements
Writing	5.2, 5.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats
Numeracy	1.3, 2.3	<ul style="list-style-type: none"> Performs calculations to interpret results and evaluate different types of technical data and configure system performance
Navigate the world of work	4.2, 5.1, 5.2	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.1, 5.3	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication when liaising with customers, vendors and installation personnel on technical and operational matters
Get the work done	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks Implements actions according to a predetermined plan, making adjustments if necessary Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account When dealing with complex issues, may use intuition to identify problems, switching to analytical processes to modify activities depending on operational contingencies, risk situations and environments to generate possible solutions

Assessment Requirements for ICTTEN404 Install and configure a wireless mesh network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- configure wireless mesh nodes
- install wireless mesh nodes, access point nodes and gateway
- test nodes for connectivity.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain requirements for 802.11 wireless protocols
- describe allocation of internet protocol (IP) addresses and subnet masks
- summarise antenna gain and polarisation
- outline cable loss
- explain calculation of effective isotropic radiated power (EIRP)
- explain calculation of line of site radio range
- explain decibels and related units
- outline network topologies
- describe radio frequency (RF) bands
- summarise routing protocols
- outline transmission control protocols(TCP)-IP describe wireless networking hardware, access points, wireless routers and gateway.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which configuring and installing wireless mesh network may be conducted
- technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN406 Effect changes to existing customer premises equipment systems and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to effect changes to existing customer premises' equipment (CPE), systems and products, through producing plans, carrying out alterations and testing new work.

It applies to individuals who may be working as linespeople, line installers and technicians for telecommunications carriers, contractors, other service providers or private providers who upgrade or modify customer equipment and systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare requirements for alteration	1.1 Arrange site access according to required procedure and comply with site security arrangements and relevant legislation, codes, regulations and standards 1.2 Assess facilities and capacity to ensure requirements can be met 1.3 Evaluate existing system availability and access to accommodate

ELEMENT	PERFORMANCE CRITERIA
	<p>proposed changes</p> <p>1.4 Notify appropriate personnel of identified safety hazards at worksite</p> <p>1.5 Evaluate compatibility of existing and proposed systems and equipment before proceeding with planned changes</p> <p>1.6 Negotiate planned system outages and outage time with the customer</p>
2. Document specifications and plans for alteration	<p>2.1 Produce an amendment plan of systems alterations to assess suitability with existing system</p> <p>2.2 Produce specifications for alteration requirements according to customer requirements</p> <p>2.3 Select materials and tools and equipment compatible with upgrade activity</p>
3. Install additional equipment and program system feature changes	<p>3.1 Produce an activity plan for minimal disruption of alterations to ongoing client activity</p> <p>3.2 Carry out all alterations in a safe manner according to relevant standards and regulations and manufacturer's specifications</p> <p>3.3 Test new work in isolation and when integrated with existing systems to confirm compatibility of alterations with existing network</p>
4. Update plans and records	<p>4.1 Update all plans and documents to show installed systems accurately and clearly</p> <p>4.2 Complete documentation for customer support</p>
5. Restore site to required condition	<p>5.1 Remove waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions</p> <p>5.2 Recover obsolete equipment and return to customer or disposal of as agreed with customer</p> <p>5.3 Notify customer of job completion and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.1, 2.2, 3.1, 4.1, 4.2, 5.3	<ul style="list-style-type: none"> Completes workplace documentation accurately using appropriate form and vocabulary for intended audience
Oral Communication	1.4, 5.3	<ul style="list-style-type: none"> Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience
Navigate the world of work	1.1, 3.2, 5.1, 5.2	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.4, 1.6, 5.2	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.1, 1.3, 1.5, 2.1, 2.2, 3.1, 3.3	<ul style="list-style-type: none"> Prioritises and plans work to meet deadlines and client expectations Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN406 Effect changes to existing customer premises equipment systems and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify customer's needs
- develop plans and drawings to give effect to planned changes to systems and equipment
- alter system and equipment including physical and programming change according to work health and safety (WHS) regulations and relevant standards
- identify, conduct and interpret tests appropriate to the change
- notify customer and relevant personnel of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and other formal agreements that impact changes to customer equipment and systems
- identify manufacturer's requirements for safe operation of equipment
- define network addressing
- consider specific WHS requirements relating to customer premises' equipment
- establish types of customer premises' equipment (CPE) that may require upgrade
- describe typical issues and challenges that occur on site
- identify vendor products.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- systems and equipment to effect changes
- appropriate manuals and specifications
- relevant enterprise policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN408 Complete equipment and software upgrades

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to upgrade telecommunications equipment and software in service provider networks and customer premises, and may apply to switching, transmission, radio, and computer networks using cable, optical fibre, radio, microwave and satellite transmission.

It applies to individuals who supervise installation and maintenance teams involved in new installations or maintenance, upgrades and cut overs of emerging technologies in IP-based telecommunications networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for upgrade activity	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Contact customer for site access, security arrangements and location details of equipment for upgrade 1.3 Identify site hazards and notify appropriate personnel to make

ELEMENT	PERFORMANCE CRITERIA
	<p>site safe</p> <p>1.4 Prepare an upgrade plan against work order and seek approval from customer</p> <p>1.5 Organise system back-up from support personnel</p> <p>1.6 Obtain tools and test equipment and check for accuracy and safety</p> <p>1.7 Allocate specific tasks according to the skill mix of staff involved</p> <p>1.8 Run test plan on current equipment and identify and rectify problems in consultation with planners</p> <p>1.9 Complete functional testing of new systems and equipment prior to upgrade to minimise system downtime</p> <p>1.10 Analyse test results to predict compatibility and interoperability issues of equipment and systems prior to the upgrade work</p>
2. Undertake upgrade	<p>2.1 Implement upgrade according to design specification, following work health and safety (WHS) and environmental requirements</p> <p>2.2 Follow procedures for upgrade of network in sequential order as defined in instruction manuals</p> <p>2.3 Monitor progress of upgrade periodically to ensure plans in relation to time and duration are being met</p> <p>2.4 Notify planner of problems encountered with detail of the impact on the upgrade plan</p> <p>2.5 Abort upgrade and implement contingency plan if upgrade plan cannot be realised without major disruption to network</p> <p>2.6 Monitor system response during upgrade and take action according to instructions provided</p>
3. Test upgrade for acceptance	<p>3.1 Undertake tests according to predetermined test plan</p> <p>3.2 Analyse test results and verify against specified performance levels</p> <p>3.3 Escalate problems encountered according to enterprise policy</p> <p>3.4 Invoke reversion procedure to pre-upgrade state, if directed by planners, according to enterprise policy</p> <p>3.5 Record upgrade test results and provide to network management group</p> <p>3.6 Run post-upgrade routines according to documented</p>

ELEMENT	PERFORMANCE CRITERIA
	procedures
4. Monitor post-upgrade performance	4.1 Conduct ongoing tests to ensure success of upgrade 4.2 Monitor relevant alarms to measure impact of upgrade 4.3 Review customer complaints to assess impact of upgrade on customer satisfaction
5. Finalise administrative work and clean up worksite	5.1 Complete relevant work documentation and administrative tasks according to enterprise policy 5.2 Amend site records to show upgraded equipment layout 5.3 Organise customer training in the new or modified system 5.4 Clean up and restore site to customer satisfaction 5.5 Collect and dispose of waste material and debris according to environmental requirements 5.6 Declare asset ready for use 5.7 Notify customer of upgrade job completion to obtain sign-off of work order and present with a copy of documentation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 2.6, 4.3	<ul style="list-style-type: none"> Interprets and analyses complex technical information
Writing	1.4, 3.5, 5.1, 5.2, 5.7	<ul style="list-style-type: none"> Employs appropriate vocabulary and tone to convey specific information to different audiences
Oral Communication	1.2, 2.4, 5.7	<ul style="list-style-type: none"> Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience
Numeracy	1.10, 3.2, 3.5	<ul style="list-style-type: none"> Performs calculations to analyse data and records results in required format
Navigate the world of work	1.1-1.3, 1.5, 1.6, 2.1, 2.2, 3.3, 3.4, 3.6, 5.1, 5.4, 5.5	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with	1.4, 1.5, 1.7, 1.8,	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of

others	2.4, 5.4	communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.7-1.10, 2.3, 2.5, 2.6, 3.1-3.6, 4.1, 4.2, 5.3, 5.6	<ul style="list-style-type: none"> Organises, plans and sequences own workload and schedules work activities of others Applies problem-solving processes and reviews impact to ensure solutions or contingency plans are effective Uses digital technologies and systems to complete work tasks

Assessment Requirements for ICTTEN408 Complete equipment and software upgrades

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- analyse implications of hardware and software upgrade on remainder of the network
- identify components of the upgrade process
- prepare an upgrade plan and organise system back-up
- run test plan and analyse test results
- implement upgrade according to work health and safety requirements
- monitor progress of upgrade periodically using both vendor- and enterprise-specific monitoring tools
- implement contingency plan when required, and analyse alarms and alarm conditions
- escalate unresolved problems and review customer complaints to assess impact of upgrade
- make necessary arrangements with the customer for site access and training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain alarms used to monitor operation of computer software systems
- explain use of back-up systems
- illustrate common upgrades and post-upgrade routines
- describe escalation and outage procedures
- investigate network management systems
- outline telecommunications networks and equipment
- identify telecommunications monitoring tools
- describe telecommunications test equipment and test set-ups
- describe telecommunications wiring practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where upgrade may be conducted
- equipment, software, test and monitoring equipment currently used in industry
- relevant regulatory, equipment, enterprise and vendor documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN409 Commission an electronic system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to commission an electronic system with applications, including cellular telemetry, voice over IP (VoIP), radio frequency identification (RFID), supervisory control and data acquisition (SCADA) networks and SCADA security, telephony, data, video, IP television (IPTV) and multimedia.

It applies to individuals who may work as field officers and technicians employed by telecommunications carriers, service providers or contractors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to commission electronic system	1.1 Prepare for work following work health and safety (WHS) requirements 1.2 Organise resources based on existing and potential site hazards 1.3 Contact customer or network operations personnel for site access and network specifications 1.4 Determine function and requirements of electronic system from

ELEMENT	PERFORMANCE CRITERIA
	<p>specifications</p> <p>1.5 Identify potential security threats and vulnerability where remote monitoring and control via public telecommunications network or internet are used, and report to appropriate personnel</p> <p>1.6 Verify installed electronic system and associated cabling conform to specifications, and assess compatibility of system units</p> <p>1.7 Establish commissioning dates with all parties and establish planned outage</p> <p>1.8 Check suitability and calibration status of test equipment</p> <p>1.9 Produce a preliminary commissioning plan according to manufacturer's instructions and enterprise guidelines for discussion with the customer</p>
2. Organise planned outages	<p>2.1 Negotiate outage times with appropriate groups and affected customers to minimise disruptions</p> <p>2.2 Arrange for emergency communications based on contingency plans</p> <p>2.3 Notify alarm management centre of planned action</p> <p>2.4 Obtain authority to proceed from relevant control centre and notify customers affected by the outage</p>
3. Perform commissioning procedures	<p>3.1 Configure electronic system parameters and install software according to manufacturer's specifications and customer requirements</p> <p>3.2 Conduct tests according to manufacturer's specifications and industry practice</p> <p>3.3 Conduct cut over according to project design and industry practice in consultation with appropriate personnel</p> <p>3.4 Conduct a security audit, including remote threat analysis in applications where the public telecommunications network or internet is linked to the overall electronic system</p>
4. Finalise commissioning	<p>4.1 Record configuration information and update relevant databases according to enterprise and network guidelines</p> <p>4.2 Notify appropriate person of commissioning results and work completion</p> <p>4.3 Complete administrative tasks according to industry practice and enterprise guidelines</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4	<ul style="list-style-type: none"> Interprets complex information to determine job requirements
Writing	1.9, 4.1	<ul style="list-style-type: none"> Completes technical workplace documentation using vocabulary and form appropriate to intended audience
Navigate the world of work	1.1, 1.5-1.7, 4.1, 4.3	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.3, 1.5, 1.6, 2.1, 2.3, 2.4, 4.2	<ul style="list-style-type: none"> Collaborates and negotiates with others to achieve specific goals Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.2, 1.4, 1.7, 1.8, 1.9, 2.2, 3.1-3.4	<ul style="list-style-type: none"> Considers a range of complex factors when completing set tasks to ensure work is completed accurately and safely Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN409 Commission an electronic system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- effectively negotiate arrangements for commissioning
- accurately configure electronic equipment and system parameters
- commission electronic system according to specifications and following work health and safety (WHS) requirements
- deal with faults and problems and provide solutions
- identify potential security threats and vulnerability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain acceptance testing
- formulate a commissioning procedure and commissioning tests for an electronic system
- identify electrical and optical properties to be measured
- evaluate an extensive range of networking equipment
- outline legislation and licensing associated with installation of telecommunications equipment
- outline network operation procedures
- explain power requirements and electrical safety
- explain setup and operation of test equipment applicable to a wide range of measurements
- outline transmission type and signals that may be encountered.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which installation and commissioning procedures may be conducted
- relevant regulatory and equipment documentation
- testing equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN410 Locate, diagnose and rectify faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to locate, diagnose and rectify faults in telecommunications networks.

It applies to individuals who may work as telecommunications officers, communications cablers, or installers of customer premises' equipment, for optical and radio frequency (RF) equipment, multimedia and IP networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to locate and rectify fault	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes, standards and identified hazards 1.2 Arrange site access according to required procedure 1.3 Obtain information on the nature of fault from the customer 1.4 Obtain suitable testing tools and equipment and specify personal

ELEMENT	PERFORMANCE CRITERIA
	protective equipment 1.5 Conduct fault-finding using methodical and safe practices suitable for system and problem type
2. Locate and diagnose fault	2.1 Conduct appropriate test to identify type of fault 2.2 Isolate fault progressively to remove likely variables from assessment 2.3 Locate fault without undue interruptions to customer activity, in the shortest possible time 2.4 Notify customer of findings
3. Rectify fault	3.1 Determine options to rectify fault, and present options to customer 3.2 Advise customer of costs of any repair not covered by service agreement 3.3 Rectify fault if in agreement with client 3.4 Conduct work in a manner which is safe for repairer and customer 3.5 Refer any unresolved faults to other parties for resolution or escalation if required
4. Complete documentation and clean up worksite	4.1 Advise customer of successful fault clearance and secure sign-off 4.2 Complete all records 4.3 Complete reports to justify fault diagnosis and rectification methodology, if required 4.4 Remove all waste and debris from worksite and dispose of them according to environmental requirements 4.5 Restore any changes made to worksite during fault repair to the customers satisfaction

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Writing	4.1, 4.2, 4.3	<ul style="list-style-type: none"> Completes technical workplace documentation using appropriate language and form to meet specific purpose
Oral Communication	1.3, 2.4, 3.2	<ul style="list-style-type: none"> Articulates specific requirements clearly and checks understanding Uses questioning and active listening to obtain required information
Numeracy	2.1	<ul style="list-style-type: none"> Interprets numerical data from network tests
Navigate the world of work	1.1, 1.2, 3.4, 4.4, 4.5	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.3, 3.1, 3.3, 3.5, 4.1	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> Plans and implements tasks in line with organisational expectations, legislative requirements and work role Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN410 Locate, diagnose and rectify faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- effectively identify different faults
- establish context and background information, and determine and rank likely causes of fault
- obtain suitable tools and equipment and apply simple checks, tests and fault-finding methodology
- apply recommended means to rectify fault
- comply with all related work health and safety (WHS) requirements and work practices
- ensure customer and relevant personnel are informed of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate various fault-finding techniques for different networking situations
- specify and evaluate test equipment used for fault finding
- specify safety standards required when testing different types of systems
- outline common network faults and their rectification
- explain the value of specific regulatory and other documentation required when testing and reporting on test results.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- an appropriate site
- test and related equipment currently used in industry
- relevant technical specifications and requirements
- regulatory and site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN411 Monitor, analyse and action telecommunications network alarms

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to diagnose problems, restore a network, normalise an alarm system and examine the impact on a network.

It applies to individuals who are proficient communicators, excellent trouble-shooters and who have a clear understanding of network alarm systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan response to network alarm	1.1 Determine alarm severity and specific network elements affected from presentation of alarm 1.2 Assess likely impact to client and network of the alarm 1.3 Notify the network operating centre (NOC) and other relevant parties of alarm condition 1.4 Prioritise actioning of alarms according to existing service level

ELEMENT	PERFORMANCE CRITERIA
	agreement obligations and enterprise policy 1.5 Assess impact of any outage issues and major customers affected 1.6 Provide information to and seek advice from other relevant parties in identifying the problem and cause of the alarm condition 1.7 Diagnose likely cause of alarm condition using established methodical strategies 1.8 Escalate diagnosis to higher level fault clearance unit according to enterprise policy where necessary
2. Arrange rectification of network problem	2.1 Implement enterprise policy relating to outages as required 2.2 Rectify network problems when appropriate capability and time constraints can be met 2.3 Enact escalation procedures according to enterprise policy 2.4 Make all alarm data and diagnosis available to other areas with responsibility and jurisdiction for network restoration 2.5 Provide clear and concise instructions to field staff to facilitate all repair efforts 2.6 Monitor progress of the network repair effort 2.7 Apply enterprise policy in relation to alarms requiring no further action
3. Complete alarm clearance tasks	3.1 Reset alarms following network restoration 3.2 Notify all relevant parties of problem rectification 3.3 Undertake appropriate cause and effect studies to prevent re-occurrence of problem 3.4 Complete administrative tasks and recommend any changes required by the enterprise quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 1.8, 2.1, 2.3,	<ul style="list-style-type: none">Recognises and interprets complex technical data and procedures to determine job requirements

	2.7, 3.4	
Writing	1.3, 2.5, 3.2, 3.4	<ul style="list-style-type: none"> • Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.3, 2.5, 3.2	<ul style="list-style-type: none"> • Articulates requirements clearly and concisely to provide advice and guidance to others and to liaise with technical personnel working across different levels and in different contexts • Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.1	<ul style="list-style-type: none"> • Uses mathematical formulae to interpret numerical data
Interact with others	1.6, 2.4	<ul style="list-style-type: none"> • Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work done	1.1, 1.2, 1.4, 1.5, 1.7, 1.8, 2.1, 2.2, 2.6, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> • Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when necessary

Assessment Requirements for ICTTEN411 Monitor, analyse and action telecommunications network alarms

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- monitor and analyse a range of network alarms including use of fault history and ranking of likely causes
- ensure customers and relevant personnel are appropriately notified of network status
- undertake and monitor network repairs
- plan and coordinate actioning of network alarms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define purpose of escalation policies and procedures for network alarm systems
- describe installed telecommunications systems and equipment
- explain principles and use of path protection
- outline key components of a telecommunications network
- evaluate commonly used test equipment and test procedures
- outline typical problems and challenges that arise in Network Operations Centres (NOCs) and in the field
- describe typical systems and procedures for monitoring alarms.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which local and remote monitoring and analysis of network alarms may be conducted
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN412 Undertake routine maintenance of the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to perform routine maintenance of network plant and equipment in various telecommunications switching and transmission environments, including wide area networks (WAN), virtual private networks (VPN) and core networks, using wireless, optical, broadband and Next Generation Networking (NGN) technologies.

It applies to individuals working as field officers or technicians from carriers, contractors and other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan routine maintenance	1.1 Obtain relevant legislation, codes, regulations and standards for the given work 1.2 Determine network elements requiring maintenance, and maintenance details from manufacturer's equipment manual

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Notify the Network Operations Centre (NOC) of proposed maintenance schedule and maintenance details to minimise disruption to the network</p> <p>1.4 Assess potential impact of proposed maintenance on customers and network, and plan for possible outage or deferral of maintenance</p> <p>1.5 Obtain necessary tools, test equipment and resources to undertake maintenance</p> <p>1.6 Produce a written schedule of planned routine maintenance</p> <p>1.7 Negotiate schedules and access with the customer, and find out where equipment to be maintained is located on customer premises</p> <p>1.8 Ascertain and record network stability to determine network performance</p>
2. Undertake planned maintenance	<p>2.1 Conduct routine maintenance tasks following work health and safety (WHS) and environmental requirements, and record results</p> <p>2.2 Escalate unresolved faults according to established enterprise procedure</p> <p>2.3 Test network equipment for required performance following routine maintenance</p> <p>2.4 Check operation of associated network equipment to ensure the maintenance did not generate other faults or alarms</p>
3. Report on routine maintenance and document results	<p>3.1 Notify all relevant parties of results of the routine maintenance</p> <p>3.2 Update routine maintenance logs and record other additional work for inclusion in the next cycle of maintenance</p> <p>3.3 Complete administrative tasks and recommend any changes as required by the enterprise quality assurance system</p> <p>3.4 Notify NOC of job completion and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 3.3	<ul style="list-style-type: none">Recognises and interprets plans, specifications, complex technical data and procedures to determine

		job requirements
Writing	1.3, 1.6-1.8, 2.1, 3.1-3.4	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.3, 1.7, 3.1, 3.4	<ul style="list-style-type: none"> Articulates requirements clearly and concisely to provide advice and guidance to others and to liaise with technical personnel working across different levels and in different contexts Uses well-developed listening and questioning techniques to confirm understanding
Navigate the world of work	2.1	<ul style="list-style-type: none"> Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context, identifying improvement opportunities where appropriate
Interact with others	1.3, 1.7	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts
Get the work done	1.1, 1.2, 1.4, 1.5, 1.8, 2.2-2.4	<ul style="list-style-type: none"> Formulates plans and implements actions according to plan, making adjustments if necessary Works logically and systematically to monitor, analyse and action job priorities Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when necessary Uses digital technologies and systems to install software, and for data entry and storage

Unit Mapping Information

Assessment Requirements for ICTTEN412 Undertake routine maintenance of the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan a detailed routine maintenance schedule
- conduct and record routine maintenance activities procedures and techniques
- test network equipment and analyse results
- carry out works in compliance with site risk controls, work health and safety (WHS), environmental, quality and communication requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe computer systems required to facilitate a routine maintenance check of a telecommunications network
- explain the operation of network alarm systems
- describe the function and purpose of network management systems
- outline key components of a telecommunications network equipment and architecture, and their function including:
 - switching
 - mobile communications
 - satellite
 - transmission
 - antennas
 - radio frequency
 - basic telephony

- identify and specify telecommunications test equipment, test configurations, and analysis of results for a range of telecommunications network problems
- describe WHS risks associated with routine maintenance tasks
- explain telecommunications wiring practices
- explain the use of a scheduler
- describe the importance of customer relations when dealing with clients, in particular, obligations and expectations of the technician
- describe the operation, application and characteristics of digital logic integrated circuits and installation packages
- outline the importance of enterprise policies and procedures for:
 - escalation of issues
 - enterprise information systems

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which routine maintenance may be conducted
- maintenance tools and test instruments currently used in industry
- relevant regulatory and equipment documentation impacting maintenance activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN413 Undertake remote diagnosis and repair of network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake fault diagnostic and repair strategies for working with remote network equipment.

It applies to individuals working as field technicians, remotely accessing the network and the Network Operation Centre (NOC) which controls the coordination of remote network activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Diagnose remote faults	1.1 Install remote access software on notebook computers 1.2 Verify network fault by analysing relevant data 1.3 Investigate context and background information relevant to the network fault 1.4 Source appropriate documentation and test equipment relevant to

ELEMENT	PERFORMANCE CRITERIA
	the network fault 1.5 Conduct appropriate tests and analyse results 1.6 Diagnose network faults using established methodical strategies in a timely fashion without disruption to other services
2. Plan remote repair	2.1 Assess involvement level of the NOC in planning the repair 2.2 Plan for any necessary outages and notify customers 2.3 Develop repair strategies to clear fault 2.4 Develop a strategy for rerouting customer traffic if applicable 2.5 Advise on-site personnel of required work and clearly communicate the repair strategy
3. Repair fault	3.1 Initiate remote repair strategies to reconfigure or repair remote equipment in a manner safe to self, fellow workers, network equipment and public 3.2 Inform customers of repair progress where fault has caused degradation of service or outage 3.3 Escalate unresolved faults according to established enterprise procedure 3.4 Test remote repair for required performance 3.5 Assess ongoing network performance and the likelihood of further problems
4. Report remote diagnosis and repair and document results	4.1 Notify all relevant parties of results of remote diagnosis and repair 4.2 Record details relating to any outage according to enterprise procedures 4.3 Complete all relevant documentation and recommend any changes required by the enterprise quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Reading	1.2, 1.3, 3.3, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets complex technical data, procedures, equipment, system manuals and specifications
Writing	2.2-2.5, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation and make recommendations
Oral Communication	2.2, 2.5, 3.2, 4.1	<ul style="list-style-type: none"> Articulates clearly and concisely to provide advice and guidance to technical personnel working across different levels and in different contexts Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.2, 1.5	<ul style="list-style-type: none"> Interprets a wide variety of numerical readings and data
Navigate the world of work	3.1, 3.3, 4.2	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities, and enterprise policies and procedures relevant to own work Alerts others of issues that may affect self or others, with specific reference to safety
Interact with others	2.2, 3.2, 4.1	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts
Get the work done	1.1, 1.3-1.6, 2.1-2.3, 3.1, 3.3-3.5, 4.3	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology Works logically and systematically to monitor, analyse and action job priorities Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties

Unit Mapping Information

Assessment Requirements for ICTTEN413 Undertake remote diagnosis and repair of network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- communicate effectively with relevant parties, using appropriate technical and non-technical language
- diagnose and identify faults, including using fault history and ranking likely causes
- plan and coordinate repair of network faults
- apply enterprise escalation and outage procedures following related work health and safety (WHS) requirements and work practices
- ensure customers and others are kept notified of works progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe telecommunications systems and equipment and technologies likely to be encountered in remote networks
- explain principles and use of path protection
- outline key components of a telecommunications network
- describe test equipment and test procedures required for determining network faults
- evaluate test results and specify solutions
- explain typical problems and challenges that arise in Network Operations Centres (NOCs) and in the field.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which remote diagnosis and repair of network may be conducted
- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN414 Repair telecommunication system faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to examine a customer report or a maintenance schedule, and diagnose faults which may be in optical, computer, radio, satellite, security or radio frequency identification (RFID) systems found in customer and service provider access networks.

It applies to individuals working as field officers, technicians or technical supervisors from carriers, contractors or other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for equipment repairs	1.1 Obtain relevant legislation, codes, regulations and compliance standards for conducting work 1.2 Identify hazards, make worksite safe according to relevant safety legislation and company work practices and use personal protective equipment 1.3 Notify customer and other appropriate personnel of work, and

ELEMENT	PERFORMANCE CRITERIA
	arrange for site access and security where required 1.4 Obtain fault details to determine type of system fault 1.5 Determine the type of repair required according to enterprise guidelines, site requirements and type of equipment, and arrange for additional technical support as appropriate 1.6 Confirm if warranties and service agreements covering identified repairs exist 1.7 Obtain tools and necessary hardware and ensure replacement parts and material is delivered to the worksite at the required time
2. Repair fault	2.1 Follow work health and safety (WHS) and environmental requirements when carrying out repair or replacement tasks 2.2 Notify appropriate personnel of service disruption and remove network equipment from service 2.3 Diagnose the fault and carry out repair work on equipment according to manufacturer's or enterprise procedures 2.4 Test equipment to manufacturer's specifications following repairs and return to live operation for testing overall performance
3. Complete repair work documentation and administrative tasks	3.1 Notify customer and other appropriate personnel of completion of repair work according to enterprise guidelines 3.2 Record any changes to equipment and store according to enterprise guidelines 3.3 Dispose of waste and debris from worksite according to environmental requirements and enterprise guidelines 3.4 Complete administrative tasks and make recommendations for improvements under quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 1.6, 2.3, 3.1, 3.3, 3.4	<ul style="list-style-type: none">Recognises and interprets complex technical documentation and standards to determine job requirements

Writing	1.3, 2.2, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.3, 2.2, 3.1	<ul style="list-style-type: none"> Provides information using language appropriate to audience and context Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.5	<ul style="list-style-type: none"> Uses mathematical formulae to interpret numerical data including equipment specifications
Navigate the world of work	1.2, 2.1, 3.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context
Interact with others	1.3, 2.2, 3.1	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts
Get the work done	1.1, 1.3-1.5, 1.7, 2.3, 2.4	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology Works logically and systematically to monitor, analyse and action job priorities Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Initiates standard procedures when responding to familiar problems within immediate context

Assessment Requirements for ICTTEN414 Repair telecommunication system faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- communicate effectively with customers and other personnel, using appropriate technical and non-technical language to ensure understanding
- diagnose and identify faults methodically, using fault history and recognition of likely causes
- repair telecommunication equipment according to manufacturer's or enterprise procedures, applying related work health and safety (WHS) requirements and work practices
- test equipment following repairs and put back into commission
- communicate with personnel and customers during and upon completion of works.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe anti-static procedures required to protect equipment under repair
- outline enterprise policies and procedures
- summarise fault diagnosis techniques
- describe general fault-finding techniques and test equipment
- outline work health and safety (WHS) requirements and work practices
- identify commonly used and emerging products
- explain safety requirements and standards
- summarise telecommunications network and equipment fault types and rectification
- describe telecommunications network and equipment types
- provide a detailed explanation of test equipment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which diagnosis and repair of communication equipment may be conducted
- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN415 Install and configure internet protocol TV in a home network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to arrange a secure internet protocol (IP) network for a customer.

It applies to individuals who install Next Generation Networks (NGNs). These IP networks provide fast internet, voice over internet protocol (VoIP), IPTV and internet TV services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to implement IPTV in a home network	1.1 Obtain and clarify work health and safety (WHS) requirements and risk control measures and procedures for a given work area, with appropriate personnel 1.2 Evaluate existing customer home network equipment for operational status
2. Design IPTV integration to a home	2.1 Prepare a configuration layout integrating IPTV to existing customer network using IPTV network elements to provide optimum

ELEMENT	PERFORMANCE CRITERIA
network to meet customer requirements	<p>video delivery service</p> <p>2.2 Select IPTV network elements to provide optimum video delivery service</p> <p>2.3 Obtain configuration instructions for network elements</p> <p>2.4 Design connection plan to integrate customer network elements and optimise system performance</p> <p>2.5 Identify any connection problems and amend design plan</p>
3. Implement IPTV design plan to a home network	<p>3.1 Interconnect network elements according to design plan using manufacturer's instructions and IP addressing schemes</p> <p>3.2 Configure and test network elements to provide integrated IPTV to the existing system</p> <p>3.3 Provide a free-to-air (FTA) connection over digital video broadcasting – terrestrial (DVB-T) to complement the IPTV service</p> <p>3.4 Set up customer specific operations as required</p> <p>3.5 Configure security measures in an IPTV network to protect against security threats</p> <p>3.6 Troubleshoot home network according to manufacturer's specifications and escalate unresolvable items to the service provider</p>
4. Complete and document network installation	<p>4.1 Restore worksite to safe condition, according to established safety procedures</p> <p>4.2 Record and store essential installation information</p> <p>4.3 Notify appropriate personnel of completion of the task and obtain sign-off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.1	<ul style="list-style-type: none"> Recognises and interprets complex technical specifications and related information
Writing	1.1, 2.4, 2.5, 4.2, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce plans and update workplace documentation

Oral Communication	4.3	<ul style="list-style-type: none"> • Articulates clearly and concisely to provide advice and guidance to customers and personnel • Uses well-developed listening and questioning techniques to confirm understanding
Navigate the world of work	1.1, 4.1	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to organisational procedures and protocols, and legal and regulatory responsibilities relevant to own work
Get the work done	1.1, 1.2, 2.1-2.3, 2.5, 3.1-3.6	<ul style="list-style-type: none"> • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to resolve a predictable range of network problems, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTTEN415 Install and configure internet protocol TV in a home network	ICTTEN4126A Install and configure internet protocol TV in a home network	Updated to meet Standards for Training Packages.	Equivalent unit

Assessment Requirements for ICTTEN415 Install and configure internet protocol TV in a home network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- create and follow implementation plans for internet protocol television (IPTV)
- install relevant network hardware and software
- configure and test IPTV network according to specified guidelines
- integrate IPTV to existing network
- produce appropriate documentation
- implement secure network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain competing video delivery over broadband networks
- outline current industry-accepted hardware and software products
- summarise IPTV configurations
- clarify IPTV protocols and encoding techniques
- summarise networking technologies, incorporating substantial depth in network operating systems and IP networks
- outline transmission technologies and protocols
- summarise video compression formats
- describe the common issue that affects home network performance.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and configuration of an IPTV network may be conducted
- equipment currently used in industry
- information on different protocols
- relevant technical information, legislative requirements and other site and project-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN417 Install, configure and test a router

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake router installation and configuration, as part of an upgrade in an existing network or the implementation of a new network.

It applies to individuals who carry out installation, maintenance and upgrade of information and communication technologies (ICT) networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install router	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes and standards 1.2 Arrange site access according to required procedure 1.3 Ascertain network topology from technical requirements 1.4 Determine the internet protocol (IP) addressing scheme for the network topology

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5 Evaluate network management and security requirements, with reference to current and future requirements</p> <p>1.6 Select a router with appropriate features according to technical requirements</p> <p>1.7 Choose cables, wireless application protocol (WAP), wide area network (WAN) connectors and other peripherals according to network and router specification, and WAN protocols</p>
2. Install and configure router	<p>2.1 Assemble router and peripherals according to manufacturer's requirements, enterprise guidelines and protocols</p> <p>2.2 Connect communications cables and WAN connectors to the router and network</p> <p>2.3 Configure router according to manufacturer's instructions and technical requirements, taking into account interoperability requirements with network components</p>
3. Test router and reconfigure network	<p>3.1 Test the router for connectivity across the network and for routing protocol functions</p> <p>3.2 Adapt or modify predetermined router configuration, depending on outcome of tests</p> <p>3.3 Review router in line with organisational requirements</p> <p>3.4 Test router and peripherals according to manufacturer's instructions and technical requirements</p> <p>3.5 Test hardware and router to ensure full functionality and interoperability</p> <p>3.6 Reconfigure additional hardware as required</p> <p>3.7 Make adjustments to network depending on test results</p>
4. Complete documentation and clean worksite	<p>4.1 Tabulate test results and complete all user reports</p> <p>4.2 Complete report and notify client of network status</p> <p>4.3 Clean up and restore worksite to client's satisfaction</p> <p>4.4 Secure sign-off from appropriate person</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.3, 3.2, 3.3	<ul style="list-style-type: none"> Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	3.4, 4.1, 4.2	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats
Oral Communication	4.2	<ul style="list-style-type: none"> Clearly liaises with internal and external personnel on technical, operational and business related matters Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.3, 3.1, 3.2, 3.4-3.7	<ul style="list-style-type: none"> Undertakes test measurements, interprets results and evaluates performance and interoperability of network
Navigate the world of work	1.1, 4.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	4.4	<ul style="list-style-type: none"> Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.2-1.7, 2.1-2.3, 3.1-3.7	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required Takes responsibility for own workload, negotiating some key aspects with others Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments

Unit Mapping Information

Assessment Requirements for ICTTEN417 Install, configure and test a router

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and prepare for router installation task
- select router to meet client's business specifications
- install and test the router ensuring interoperability within the network, and applying router principles and technologies
- report on status of completed installation and seek sign-off and customer satisfaction
- use routers
- apply solutions to defined routing problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and outline codes of practice for computing
- explain the effect of a router on delimiting broadcast traffic and on conserving bandwidth
- explain how dynamic routing algorithms or protocols create and maintain routing tables
- explain how to provide the network with redundant paths for reliability, and the way routers manage these paths
- summarise the following aspects of routers including:
 - basic router commands
 - configuration
 - clock rate
 - password protection of router
 - routing protocol
 - dynamic routing

- firewalls
- functions
- routing protocols and how they operate
- tables
- describe router-based network architectures
- explain the use of routing tables in intelligent packet routing and switching.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where router installation may be conducted
- field measurement equipment currently used in industry
- relevant router specifications
- technical requirements for a network
- router
- cabling
- networked (LAN) computers
- wide area network (WAN) service point of presence
- relevant equipment and organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN418 Install and test a radio frequency identification system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for installation of either a new logistical or security network or upgrade of an existing system.

It applies to individuals who integrate new and converging functionalities to information and communications technology (ICT) networks. They are employed by telecommunications and information technology networking provisioning companies specialising in radio frequency identification (RFID) technology.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install specified RFID system	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes, and standards 1.2 Arrange site access according to required procedure 1.3 Choose the most suitable RFID system based on specifications and in consultation with appropriate person

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Evaluate options for equipment installation siting and antenna positioning to include effects of electromagnetic interference and shielding</p> <p>1.5 Investigate causes of interference with RFID systems</p> <p>1.6 Specify network element requirements for the installation and any training requirements for clients</p> <p>1.7 Create a deployment plan including down times and advise the user group</p> <p>1.8 Obtain all components and devices required for the RFID system</p>
2. Install specified RFID system and resolve any faults	<p>2.1 Install interrogators or readers according to given plan</p> <p>2.2 Install tags and document correct procedures for locating and orienting tags</p> <p>2.3 Install and undertake network configuration activities using relevant operating system and application upgrades to integrate RFID system into the overall network</p> <p>2.4 Troubleshoot problems between interrogators or readers, tags and networks, including tuning for optimum performance and rectify any faults</p>
3. Test RFID installation according to specification and standards	<p>3.1 Test system installation according to design specifications and standards including optimum placement of tags, data transmission completeness and record outcomes</p> <p>3.2 Carry out any changes</p> <p>3.3 Validate changes or additions against specifications</p> <p>3.4 Document the test results</p>
4. Complete documentation in compliance with customer requirements and clean worksite	<p>4.1 Complete all documentation for users according to the design and customer requirements</p> <p>4.2 Complete report and notify client of network status and standards applying to the installation</p> <p>4.3 Clean up and restore worksite to client's satisfaction</p> <p>4.4 Secure sign-off from appropriate person</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 3.3, 4.1	<ul style="list-style-type: none"> Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	1.6,1.7, 2.2, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation, including user and training documentation in required formats
Oral Communication	1.3, 1.6, 1.7	<ul style="list-style-type: none"> Clearly liaises with internal and external personnel on technical, operational and business related matters Uses listening and questioning skills to confirm understanding for requirements
Numeracy	3.1	<ul style="list-style-type: none"> Undertakes test measurements, interprets results and evaluates performance and interoperability of RFID system
Navigate the world of work	1.1, 4.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	4.4	<ul style="list-style-type: none"> Cooperates with others as part of familiar, routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.2-1.5, 1.8, 2.1-2.4, 3.1, 3.2	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required Takes responsibility for own workload, negotiating some key aspects with others Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTTEN418 Install and test a radio frequency identification system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan installation
- use basic research skills for adapting radio frequency identification (RFID) technologies to specified plan and design
- implement and verify RFID operations
- implement RFID architecture across a secure environment
- encode RFID tags and attach to items
- integrate RFID information into business applications
- configure network with IP addressing
- cable and test RFID network
- create technical and user documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the client business domain, business function and organisation
- describe common network cable types and connectors
- summarise compatibility issues and resolution procedures
- describe configuration of internet protocol (IP) networks
- describe current industry-accepted hardware and software products used in RFID systems
- explain desktop applications and operating systems as required
- summarise enterprise communication and training systems in relation to training and advising staff involved in deployment
- summarise network topologies

- outline RFID technologies including:
 - network operating systems
 - protocols
 - interrogators and sensors
 - wireless technologies
 - cabling standards.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where RFID installation may be conducted
- field measurement equipment currently used in industry
- relevant network element specifications
- technical requirements for an RFID network
- cabling
- networked (LAN) computers
- workstations
- RFID diagnostic software
- wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN419 Implement and troubleshoot enterprise routers and switches

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to determine customer needs, use information communication technologies (ICT) to meet network requirements, rectify equipment errors and create appropriate workplace documentation.

It applies to individuals working as installers of internet protocol (IP) networks, enterprise network technicians, network administrators and other network support personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare for implementation of network routers and switches	1.1 Prepare for given job according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of network routers, network switches and network resources from job briefs or appropriate

ELEMENT	PERFORMANCE CRITERIA
	personnel 1.4 Select and obtain network services and network application requirements according to enterprise procedures 1.5 Obtain identified operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2 Implement network switches and routers	2.1 Configure routers and switches according to manufacturer's specifications and enterprise procedures 2.2 Determine network addressing scheme for network connectivity, and verify using calculations 2.3 Activate, and verify wide area network (WAN) links provide network connectivity 2.4 Enable network services and network applications to the network to complete network connectivity process 2.5 Set up traffic access and filtering according to enterprise procedures
3 Troubleshoot network switches and routers	3.1 Monitor network performance and isolate faults using diagnostic and analysis tools 3.2 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures
4 Document configuration and troubleshooting records	4.1 Restore work-site to safe condition according to established safety procedures 4.2 Record and store essential implementation information according to enterprise procedures 4.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1, 1.3, 1.4, 2.1, 2.5, 3.2, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	1.1, 1.2, 4.2, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation and in communications with relevant personnel
Oral Communication	1.1-1.3, 4.3	<ul style="list-style-type: none"> Clearly liaises with personnel on technical matters Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.2	<ul style="list-style-type: none"> Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 4.1	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.6	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.4, 1.5, 2.1-2.5, 3.1, 3.2	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including troubleshooting common network problems Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes on the basis of safety and specified work outcomes

Unit Mapping Information

Assessment Requirements for ICTTEN419 Implement and troubleshoot enterprise routers and switches

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine customer networking requirements
- configure routers and switches using hierarchical addressing over virtual local area networks (VLANs) to meet network link requirements
- enable and control access to network services and applications across the network
- diagnose and rectify network hardware and device configuration faults
- document configuration information, fault-finding history and remediation action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise access control lists
- give examples of characteristics of a typical enterprise including:
 - features and applications
 - work health and safety (WHS) procedures
 - record keeping procedures
 - switching and routing protocols and strategies:
 - hierarchical addressing
 - multilayer switching
 - routing protocols
 - VLAN routing
- summarise implementation of enterprise wide area networks (WAN) links
- explain network diagnostic and troubleshooting techniques
- describe network modelling

- specify how to configure and activate network access and security measures
- describe the process of configuring switches and routers to enable local area networks (LAN) and WAN links
- describe the connection process for enterprise networks using WAN services and applications
- describe the purpose of maintaining enterprise network documentation
- summarise the process and importance of troubleshooting network faults and implementing recovery actions
- describe the use of a hierarchical internet protocol (IP) network address scheme
- select and use tools and equipment to analyse enterprise networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network facility and workstations
- operating instructions, installation documents and manuals
- hardware and software testing tools currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN420 Design, install and configure an internetwork

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to determine customer needs, create appropriate workplace documentation, connect and organise an internetwork according to design specifications, resolving technical problems as they arise.

It applies to individuals who design and install internet protocol (IP) networks including enterprise internetwork technicians, network administrators and network support personnel for large, medium and small office home office (SOHO) enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for design and installation of internetwork	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of internetwork from job briefs and appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Obtain operating instructions, manuals, hardware and software testing methodologies</p> <p>1.5 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite</p>
2. Design enterprise internetwork	<p>2.1 Produce enterprise internetwork topology after considering technical requirements, physical and financial constraints and expansion projections</p> <p>2.2 Determine network devices and network resources, according to enterprise procedures</p> <p>2.3 Produce internetwork design including network security and router and switch configurations to meet design specifications and enterprise procedures</p>
3. Install and configure designed internetwork	<p>3.1 Install network hardware to network topology design plan according to enterprise procedures</p> <p>3.2 Determine network addressing scheme for network connectivity, and verify using calculations</p> <p>3.3 Configure routers and switches to perform logical connection of the internetwork</p> <p>3.4 Conduct connectivity and performance tests to verify network installation meets design specification</p> <p>3.5 Troubleshoot internetwork and internet connectivity according to manufacturer's specifications and enterprise procedures</p>
4. Complete and document network design and installation	<p>4.1 Restore worksite to safe condition according to established safety procedures</p> <p>4.2 Record and store essential design and installation information according to enterprise procedures</p> <p>4.3 Notify appropriate personnel of completion of the task according to enterprise procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1, 1.3, 2.2, 2.3, 3.1, 3.4, 3.5, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets legislation, enterprise procedures, manuals and technical specifications to determine job requirements
Writing	2.1, 2.3, 4.2, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce network documentation and maintain network records Writes concisely when communicating with relevant personnel
Oral Communication	1.2, 4.3	<ul style="list-style-type: none"> Negotiates with customers and peers to achieve design specifications Uses listening and questioning skills to confirm understanding for requirements
Numeracy	3.2	<ul style="list-style-type: none"> Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 2.2, 2.3, 3.1, 3.5, 4.1-4.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others Recognises and follows organisational procedures protocols and meets expectations associated with own role

Assessment Requirements for ICTTEN420 Design, install and configure an internetwork

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine customer requirements
- design internetwork that uses advanced routing and addressing techniques
- install internetwork according to design specification
- configure network devices to meet design functionality
- document internetwork design, installation and configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe enterprise work health and safety (WHS) procedures
- summarise open systems interconnect (OSI) layered communication model
- outline network requirements including:
 - applications
 - lifecycle
 - manageability
 - quality of service
- clarify network design concepts including:
 - business requirements
 - network topologies
 - physical and financial constraints
 - security
 - wired or wireless options

- describe tool and equipment use
- outline troubleshooting components of this work including:
 - impact of network failure
 - maintenance
 - troubleshooting methodologies
- analyse impact of applications on traffic flow in the network
- describe network design methodologies used to design networks providing a range of services and applications found in larger networks
- define technical requirements, constraints and manageability issues for a given customer network
- identify and describe common tools and equipment used in internet work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where design and installation of an internet network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN421 Apply advanced routing protocols to network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use software tools, equipment, software and protocols to configure and troubleshoot network routers.

It applies to individuals who work cooperatively with others, interpret technical information accurately and work proficiently with information communication technology (ICT). Installers of internet protocol (IP), small and medium sized enterprise (SME) network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to apply routing protocols	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of network and network routing

ELEMENT	PERFORMANCE CRITERIA
	requirements from job briefs and appropriate personnel 1.4 Determine hardware and software diagnostic test methodologies and testing resources according to enterprise procedures 1.5 Obtain operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite
2. Build and test advanced routing	2.1 Set up router interfaces according to manufacturer's specifications and established procedures 2.2 Implement advanced routing protocols to achieve network design requirements 2.3 Implement classless addressing across a network to perform logical connectivity, and confirm using calculations 2.4 Troubleshoot network routing according to manufacturer's specifications and established procedures 2.5 Identify security threats and initiate control measures according to enterprise procedures
3. Complete and document advanced router installation	3.1 Restore worksite to safe condition according to established safety procedures 3.2 Record and store essential installation information according to enterprise procedures 3.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Assessment Requirements for ICTTEN421 Apply advanced routing protocols to network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan network routing requirements to meet design specification
- configure advanced protocols on network routers
- manage network addressing
- troubleshoot network
- install network security.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain distance vector routing protocols RIP v1 and v2
- outline dynamic routing
- summarise enterprise work health and safety (WHS) procedures
- outline hybrid routing protocols enhanced interior gateway routing protocol (EIGRP)
- explain link-state routing protocols open shortest path first (OSPF)
- explain routing and packet forwarding
- describe routing tables
- summarise scalable routing strategies variable length subnet masking (VSLM) and classless inter-domain routing (CIDR)
- outline security protocols using access lists
- clarify static routing
- explain the use of software tools and equipment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network facility and workstations
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN422 Configure and troubleshoot advanced network switching

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to perform network switch configuration and troubleshooting. This unit applies to large networks involving wireless local area networks (WLANs), virtual local area networks (VLANs), interVLAN routing, remote access management and operating system management of network devices.

It applies to individuals who work cooperatively with others, interpret technical information accurately, and work proficiently with information communication technology (ICT). Installers of internet protocol (IP), enterprise network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work on switched network	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in

ELEMENT	PERFORMANCE CRITERIA
	consultation with appropriate personnel 1.3 Determine nature and scope of network and network topology from job briefs or appropriate personnel 1.4 Select and obtain wireless and wired network components requirements according to enterprise procedures 1.5 Obtain operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite
2. Configure network switches	2.1 Set up and configure network switches according to manufacturer's specifications and enterprise procedures 2.2 Build and configure a routed network using remote access management 2.3 Establish multiple VLANs across the network to manage access and traffic across the network
3. Troubleshoot network	3.1 Monitor network traffic and assess performance against manufacturer's specifications and established procedures 3.2 Troubleshoot network according to manufacturer's specifications and enterprise procedures 3.3 Identify and rectify faults according to enterprise procedures
4. Complete and document network installation and configuration	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store essential configuration information according to enterprise procedures 4.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1,	<ul style="list-style-type: none">Recognises and interprets enterprise procedures, manuals and specifications to determine job

	3.2, 3.3, 4.2, 4.3	requirements
Writing	4.2, 4.3	<ul style="list-style-type: none"> • Uses clear, specific and industry-related terminology to develop network documentation and maintain network records • Writes concisely when communicating with relevant personnel
Oral Communication	1.2, 1.3, 4.3	<ul style="list-style-type: none"> • Liaises and negotiates with customers and peers to achieve outcomes • Uses listening and questioning skills to confirm understanding of requirements
Numeracy	2.2, 2.3, 3.1-3.3	<ul style="list-style-type: none"> • Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 2.1, 3.1-3.3, 4.1-4.3	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others • Recognises and follows organisational procedures and protocols and meets expectations associated with own role
Interact with others	1.6	<ul style="list-style-type: none"> • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts
Get the work done	1.4, 1.5, 2.1-2.3, 3.1-3.3	<ul style="list-style-type: none"> • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including troubleshooting network malfunctions • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes, on the basis of safety and specified work outcomes

Assessment Requirements for ICTTEN422 Configure and troubleshoot advanced network switching

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- build and configure a routed network
- configure a virtual local area networks (VLAN) on a given network topology
- configure VLAN trunking and spanning tree protocols
- establish VLANs over a wireless network
- design and deploy remote access and network security.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- explain interVLAN routing
- describe spanning tree protocol
- clarify switch and remote network security management
- describe the tool and equipment required, and their correct usage
- outline troubleshooting procedures
- summarise VLAN trunking protocol
- explain wireless local area network (LAN) set-up and access configuration.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where configuring advanced network switching may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN423 Install and maintain a wide area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use appropriate tools, equipment, software and protocols to connect and support a wide area network (WAN).

It applies to individuals who work cooperatively with others, interpret technical information accurately and work proficiently with information communication technology (ICT).

Installers of internet protocol (IP) networks, IP network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation and maintenance of network with WAN access	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine network nature and scope from job briefs or appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Select and obtain network hardware, software, WAN protocol and technology requirements according to enterprise procedures</p> <p>1.5 Obtain operating instructions, manuals, installation procedures, hardware and software testing methodologies and testing resources</p> <p>1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite</p>
2. Install and maintain WAN accessible network	<p>2.1 Determine network addressing scheme for network connectivity, and confirm using calculations</p> <p>2.2 Identify security threats and initiate control measures according to enterprise procedures</p> <p>2.3 Set up and configure network to provide WAN access according to manufacturer's specifications and enterprise procedures</p> <p>2.4 Use hardware and software analysis and diagnostic methodologies to test network connectivity</p>
3. Complete and document WAN network installation	<p>3.1 Restore worksite to safe condition according to established safety procedures</p> <p>3.2 Record and store essential installation information according to enterprise procedures</p> <p>3.3 Notify appropriate personnel of completion of the task according to enterprise procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.2, 2.3, 3.2, 3.3	<ul style="list-style-type: none"> Recognises and interprets enterprise procedures, manuals and specifications to determine job requirements
Writing	1.2, 3.2, 3.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to develop network documentation and maintain network records Writes concisely when communicating with relevant personnel

Oral Communication	1.2, 1.3, 1.6, 3.3	<ul style="list-style-type: none"> Liaises and negotiates with others to achieve outcomes Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.1	<ul style="list-style-type: none"> Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 1.4, 2.2, 2.3, 3.1-3.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others Recognises and follows organisational procedures and protocols and meets expectations associated with own role
Interact with others	1.6	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.4, 1.5, 2.1-2.4, 3.2, 3.3	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including using industry-standard troubleshooting Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes, on the basis of safety and specified work outcomes

Assessment Requirements for ICTTEN423 Install and maintain a wide area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan installation of a wide area network (WAN) accessible network
- select and apply WAN link protocols
- configure internet protocol (IP) addressing across WAN
- troubleshoot WAN communication issues
- install WAN access security measures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- explain IP addressing services and network scaling
- summarise methods of securing network services including access control lists
- explain Open Systems Interconnection (OSI) layered communication model
- outline requirements to provide teleworker network services
- describe correct usage of relevant tools and equipment
- outline WAN link protocols including:
 - frame relay
 - high-level data link control (HDLC)
 - link access procedure, balanced (LAPB)
 - point-to-point protocol (PPP)
- summarise WAN troubleshooting methodologies and analysis and diagnostic tools.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and maintenance of a WAN may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN425 Design, install and configure a customer smart technology network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to test and troubleshoot smart technology network installations.

It applies to individuals who design and install smart grid networks for domestic or industrial enterprises using internet protocol (IP) networking technology.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for design and installation of a smart technology network	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel from the enterprise 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of the smart technology network from customer specifications and appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Obtain operating instructions, manuals, hardware and software testing methodologies</p> <p>1.5 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite</p>
2. Design a customer smart technology network	<p>2.1 Produce a smart technology network topology that is interoperable and scalable after considering customer requirements, technical specifications, physical and financial constraints and expansion projections</p> <p>2.2 Determine network devices and network resources according to enterprise procedures</p> <p>2.3 Produce smart technology network design including network security and network element configurations to meet design specifications and enterprise procedures</p>
3. Install and configure a designed smart technology network	<p>3.1 Install smart technology network hardware to topology design plan according to enterprise procedures</p> <p>3.2 Determine network addressing scheme for network connectivity, and verify using calculations</p> <p>3.3 Configure network elements to perform logical connection of smart technology network topology with required network security features</p> <p>3.4 Conduct connectivity and performance tests to verify the network installation meets design specification</p> <p>3.5 Troubleshoot smart technology network and internet connectivity according to manufacturer's specifications and enterprise procedures</p>
4. Complete and document network design and installation	<p>4.1 Restore worksite to safe condition according to established safety procedures</p> <p>4.2 Record and store essential design and installation information according to enterprise procedures</p> <p>4.3 Notify appropriate personnel of task completion according to enterprise procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.1, 2.3, 3.5, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets enterprise procedures, manuals and specifications to determine important information
Writing	2.3, 4.2, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to develop network documentation and update workplace records and in written communications with customers
Oral Communication	1.1-1.3, 1.5, 4.3	<ul style="list-style-type: none"> Liaises with appropriate personnel about technical requirements using specific and relevant language Uses listening and questioning techniques to confirm understanding
Numeracy	2.1, 3.2	<ul style="list-style-type: none"> Evaluates and reviews technical data and makes calculations to verify connectivity and configuration
Navigate the world of work	1.1, 1.2, 2.2, 2.3, 3.1, 3.5, 4.1-4.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others Recognises and follows organisational protocols and meets expectations associated with own role
Interact with others	1.1-1.3, 1.5	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction Selects and uses appropriate conventions and protocols when communicating with customers and co-workers in a range of work contexts
Get the work done	1.3, 1.4, 2.1, 2.2, 3.1-3.5, 4.2	<ul style="list-style-type: none"> Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks Implements actions according to a predetermined plan, making slight adjustments if necessary, and addressing some unexpected issues Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes Understands purposes and specific functions of common digital systems and uses them effectively to complete routine tasks

Assessment Requirements for ICTTEN425 Design, install and configure a customer smart technology network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine job requirements by referring to documentation and through discussion with appropriate people
- design a smart technology network that uses advanced networking techniques
- install a smart technology network according to design specification
- configure network devices to meet design functionality
- document smart technology network design, installation and configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- summarise network design concepts including:
 - business requirements
 - network topologies
 - physical and financial constraints
 - security
 - wired or wireless options
- explain network requirements:
 - applications
 - lifecycle
 - manageability
 - quality of service

- summarise open systems interconnect (OSI) layered communication model
- summarise the following areas of troubleshooting including:
 - impact of network failure
 - maintenance troubleshooting
 - different problem-solving methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where design and installation of a smart technology network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN426 Design network projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, design, construct and manage access, building or core telecommunications networks.

It applies to individuals working as technical officers, communications workers or engineers, from private and public organisations who plan, design and manage access, building and core network technologies for a service provider.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse different types of network technologies	1.1 Review available network technologies and compare them for application to the expansion or augmentation of network services 1.2 Examine various techniques for access networks to provide service to green fields, brown fields and rehabilitation projects 1.3 Examine various techniques for building and core networks to provide for new service, capacity expansion and equipment recovery projects

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Determine the type of network by accessing and using network information sources</p> <p>1.5 Produce a brief on how network architecture components relate to the larger network and their impact on the work</p> <p>1.6 Develop an installation activity schedule to minimise workplace disruption and according to relevant regulation and standards</p> <p>1.7 Evaluate equipment type and technologies to be considered to determine availability and compatibility with existing network equipment</p>
2. Apply deployment and construction practices for network technologies	<p>2.1 Review conduit and jointing chamber standards and practices for the access network</p> <p>2.2 Examine standards, practices and requirements for locating telecommunications infrastructure in the access network</p> <p>2.3 Examine standards, practices and requirements for locating and standing racks and cabinets and supporting infrastructure</p> <p>2.4 Examine capacity and practices for cabling and patching of twisted pair, coax and fibre distribution frames</p>
3. Review network standards and prepare draft design	<p>3.1 Review client's network deployment rules and apply to a network design</p> <p>3.2 Produce preliminary plan or design on deployment of the network that maintains integrity of access, building or core networks</p> <p>3.3 Establishing a solution for unforeseen problems through discussions with appropriate personnel, with consideration to job specifications, safety and enterprise procedures to establish a solution</p> <p>3.4 Review plan to ensure it complies with all applicable standards and codes required when working on network, and where appropriate make adjustments</p> <p>3.5 Produce final design including recommendations agreed with customer</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.4, 1.6, 3.3	<ul style="list-style-type: none"> Recognises and interprets technical and non-technical documentation to incorporate important information in designs
Writing	1.5, 1.6, 3.1, 3.2, 3.4, 3.5	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to document technical requirements and procedures
Oral Communication	3.3	<ul style="list-style-type: none"> Liaises with appropriate personnel about technical and operational requirements using specific and relevant language Uses listening and questioning techniques to confirm understanding
Navigate the world of work	2.1-2.4, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities and practices relevant to own work Recognises and follows organisational procedures protocols and meets expectations associated with own role
Interacts with others	3.3	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1-1.3, 1.7, 3.3	<ul style="list-style-type: none"> Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes Reflects on ways digital systems and tools are used to achieve work goals, and recognises strategic and operational applications

Assessment Requirements for ICTTEN426 Design network projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify the most suitable network technology to be deployed for a given requirement
- apply established planning, design or management techniques for project deployment
- produce a design, which is compliant to the techniques, rules and standards of the deployed network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of a telecommunications network:
 - architecture and geographical categorisations
 - information sources
 - technology and equipment
 - capacity and capability management
 - capacity limitation of various platforms
 - commercial considerations of access network deployment
 - compatibility issues of technology and equipment
 - currency of technology and equipment use
 - enterprise deployment rules and rational
 - exemption process criteria
 - major equipment components of a modern access architecture
 - monitoring techniques to manage the access network
 - network topologies

- product capability and availability allowable within an access network
- telecommunications access networks issues and challenges
- telecommunications legislation, acts and regulations
- identify and describe key features of common telecommunications networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- network planning, design and other site-related documentation
- equipment specifications
- live network of training facilities with simulated network organisational guidelines
- relevant standards and practices documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN427 Conduct site surveys to identify carrier installation requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to implement design processes, develop solutions, and merge technological development and product implementation in access, building and core networks.

It applies to individuals working as technical staff on projects within a carrier network for carrier, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain access to work site	1.1 Notify appropriate personnel, if necessary, to arrange site access, discuss installation requirements and identify carrier network systems 1.2 Assess site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.3 Use network information systems to obtain planning data

ELEMENT	PERFORMANCE CRITERIA
2. Identify existing infrastructure	2.1 Confirm details of installation with stakeholders 2.2 Verify site conditions and building construction 2.3 Locate and record existing facilities and systems 2.4 Confirm installation locations and identify barriers to planned network extension 2.5 Integrate existing network and floor plans into documentation where available
3. Integrate existing infrastructure into design brief	3.1 Review existing plans, drawings and databases against the design brief 3.2 Calculate capacity of existing facilities against proposed usage to ensure appropriate design decisions for new installation 3.3 Incorporate all data into new installation design 3.4 Mark up plans and prepare report on new installation design 3.5 Develop contingency plans for anticipated constraints
4. Review design for compliance with standards and legislation	4.1 Examine standards, practices and requirements for locating telecommunications infrastructure in the access network 4.2 Review installation design to ensure compliance with requirements of federal, state and local regulations, relevant legislation, codes and standards 4.3 Initiate any special studies or investigations necessary for completion of the project
5. Complete required reports and documentation	5.1 Complete required documents promptly and according to planning parameters 5.2 Obtain carrier confirmation from documented requirements 5.3 Distribute design documentation to stakeholders promptly 5.4 Obtain project plan sign-off from carrier

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.3, 2.2-2.5, 3.1, 3.5, 4.2, 5.2	<ul style="list-style-type: none"> Recognises and interprets a wide variety of technical and non-technical documentation
Writing	1.1, 2.1, 2.3, 3.3, 3.4, 4.1, 4.3, 5.1, 5.2, 5.4	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to document technical requirements and procedures
Oral Communication	1.3, 2.1, 2.4, 4.3, 5.2	<ul style="list-style-type: none"> Participates in verbal exchanges with customers and team members about technical and operational requirements using specific and relevant language Uses listening and questioning techniques to confirm understanding
Numeracy	3.2	<ul style="list-style-type: none"> Analyses numerical information to interpret site-specific data
Navigate the world of work	1.2, 4.1, 4.2, 5.1	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work
Interact with others	2.1, 4.3, 5.2, 5.4	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with customers and co-workers in a range of work contexts
Get the work done	1.1-1.3, 2.2-2.5, 3.3, 3.5, 4.3, 5.2-5.4	<ul style="list-style-type: none"> Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks and plan necessary resources Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes Recognises and initiates approaches to enhance work practices, taking present and future needs and barriers to plan completion into account Reflects on ways digital systems and tools are used to achieve work goals, and recognises strategic and operational applications

Assessment Requirements for ICTTEN427 Conduct site surveys to identify carrier installation requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate existing infrastructure on an installation site
- integrate existing infrastructure into an installation design
- develop design specifications for an installation project
- engage stakeholders and carriers in design approval process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain the impact of relevant legislation, codes of practice and other formal agreements that impact communications work
- describe access networks in Australia and state how it influences development of projects
- identify costs associated with carrier installations and determine estimates and operating budgets for an installation
- identify network performance information required to produce a network design
- specify current, new and emerging technologies to be considered for a communications design, including barriers that may have an impact
- define project management and its purpose and explain associated databases and project management software programs used
- explain economic and political influences and trends that impact communications installations for public and commercial enterprises
- describe a network plan and its components
- explain the purpose of having authorities and delegations required when costing and estimating financials for projects

- explain the impact of local and international economic conditions on telecommunications installations and infrastructure, and typical challenges and limits facing technology today and on future needs
- describe the process and documentation required to collate and write project briefs, reports and project charters
- identify specific work health and safety requirements relating to site conditions and activities, including manufacturer's requirements for safe operation of equipment to be incorporated into project documentation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network planning area, systems and deployment rules and standards
- relevant databases, licensing requirements and other site related procedures
- a location and scenario suitable to conduct a site survey.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN429 Estimate and quote for carrier telecommunications equipment installations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare detailed estimates and quotes, including updating schematic drawings and specifications for carrier telecommunications equipment installations.

It applies to technical staff who provide estimates and quotes to clients for indoor and outdoor installation within a carrier network for commercial or industrial communications installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm and update schematic drawings and specifications	1.1 Review existing specifications and drawings for completeness 1.2 Prepare additional drawings and specifications for installation if required 1.3 Compare drawings with design brief to confirm requirements

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm all cable and locations with carrier
2. Price labour, materials and other relevant items and establish availability	2.1 Obtain quotations and delivery dates from suppliers 2.2 Use schedule of rates for scheduled items 2.3 Obtain quotes and supply dates for all non-scheduled items or activities 2.4 Estimate labour costs based on company practices 2.5 Check pricing documentation to ensure supply proposal matches carrier specification for material, quality and performance
3. Estimate labour, materials and other relevant item requirements	3.1 Prepare estimations allowing for contingencies during installation and relevant legislation, codes, regulations and standards 3.2 Ensure estimates will return a profit on installation where appropriate
4. Prepare and confirm quote with carrier	4.1 Prepare a project installation quote that meets carrier requirements 4.2 Negotiate changes and variations to meet carrier and company needs
5. Establish carrier's financial arrangements	5.1 Obtain carrier's approval for project design drawings and estimate 5.2 Issue design drawings and specifications for authority to construct

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1-2.5	<ul style="list-style-type: none"> Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness
Writing	1.2, 1.3, 2.1, 3.1, 3.2, 4.1, 5.1, 5.2	<ul style="list-style-type: none"> Documents outcomes and changes to plans using industry-relevant terminology and recognised plan symbols Accurately records and completes organisational plans, specifications and correspondence using clear language and correct spelling, grammar and industry

		terminology
Oral Communication	1.4, 2.1, 4.2, 5.1	<ul style="list-style-type: none"> • Uses collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding • Presents complex information in formal situations using clear and convincing language, tone and pace appropriate for the audience and purpose
Numeracy	2.1-2.5, 3.1, 3.2	<ul style="list-style-type: none"> • Applies financial modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations • Performs mathematical calculations to analyse labour, costs and quantities to accurately process quotations
Navigate the world of work	2.4, 3.1, 4.1	<ul style="list-style-type: none"> • Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.4, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers
Get the work done	1.1-1.4, 2.1-2.5, 3.1, 5.2	<ul style="list-style-type: none"> • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution • Uses familiar digital technologies and systems to access information, enter data, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTTEN429 Estimate and quote for carrier telecommunications equipment installations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare detailed estimates
- update schematic drawings and specifications for telecommunications equipment installations including:
 - materials
 - labour costs
- negotiate material availability and pricing for carrier equipment and network installations with contractors
- document detailed quotes for installations that allow for changes and variations
- prepare and confirm quote and financial arrangements with carrier.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast features of carrier telecommunications equipment
- identify and summarise application of legislation, codes of practice and other formal agreements that impact the work activity
- analyse and document the manufacturer's requirements for safe operation of equipment
- describe processes and techniques required to prepare plans, estimate and quote for installations
- identify and apply specific work health and safety (WHS) requirements relating to design and site conditions
- identify and remedy typical issues and challenges of dealing with carriers
- explore allocations to be included in the design specifications and quotation

- determine common contingencies to consider in a specification or quotation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- sites on which estimates and quotes may be conducted
- relevant databases and licensing requirements
- site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB430 Produce server-side script for dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to produce server-side scripts for dynamic web pages using a range of relevant features from different languages.

It applies to individuals working as web designers who apply a wide range of knowledge and skills across different information and communications technology (ICT) environments to support organisations that require broad ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the requirements for web documents requiring server-side dynamic interaction	1.1 Review and assess user requirements with user to determine the necessary web document 1.2 Determine and document dynamic functionality of web document to meet user requirements 1.3 Determine appropriate language based on required dynamic functionality 1.4 Finalise web document requirements

2. Design server-side scripts	<p>2.1 Design web document and server-side code to interact with an external data source</p> <p>2.2 Design web document and server-side code to allow administrator to insert, update, and delete entries to external data source</p> <p>2.3 Implement security features in web document based on user requirements</p>
3. Produce the web documents	<p>3.1 Write extensible hypertext markup language (XHTML) in line with XHTML standards, to define web page structure</p> <p>3.2 Write server-side scripts in line with XHTML standards to enable customised page content generation</p> <p>3.3 Upload images to web-hosted database to enable dynamic retrieval for web page</p>
4. Test the scripts and debug	<p>4.1 Test web document and rectify issues to meet user requirements</p> <p>4.2 Complete test results documentation and submit it to superior for discussion and acceptance</p>
5. Set up security	<p>5.1 Determine and implement permissions to prevent error messages displaying to the public</p> <p>5.2 Configure server software to minimise potential database attacks</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Identifies, analyses and evaluates workplace instructions and technical documentation, to determine all organisational requirements
Writing	<ul style="list-style-type: none">Develops clear and well-organised material for a specific audience, using precise language to convey explicit information requirements and recommendations
Oral Communication	<ul style="list-style-type: none">Clearly articulates requirements using the language appropriate to the audience, and participates in a verbal exchange of ideas/solutions
Navigate the world of work	<ul style="list-style-type: none">Identifies and complies with the current standards
Interact with	<ul style="list-style-type: none">Uses strategies to establish a sense of connection, and to build rapport,

others	with clients and colleagues
Get the work done	<ul style="list-style-type: none"> • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations • Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Unit Mapping Information

Assessment Requirements for ICTWEB430 Produce server-side script for dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Create a dynamic web page according to one set of user requirements
- Use server-side scripting to retrieve information from a web-hosted database in two different instances
- Analyse three language options and the associated advantages and disadvantages based on web document requirements to select most appropriate language
- Configure one webserver to deliver the website using HTTPS
- Create one script for each of the following:
 - inserting, updating, and deleting data from a web server database
 - implementing security features
 - uploading and retrieving images
 - managing sessions and creating secure logins
- Test web document and undertake corrective actions to meet requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Server-side technologies and at least three web scripting languages and associated advantages and disadvantages
- Server-side web analysis and design parameters
- XHTML standards
- Testing tools and processes and associated advantages and disadvantages
- Control structures and object-oriented programming
- Web-programming concepts including:

- the hypertext transfer protocol (HTTP) and HTTP Secure (HTTPS)
- stateless programming
- session management
- authentication and web security
- database vulnerabilities and preventative software configuration and programming practices
- Organisational procedures to document test results
-

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Web-hosted database
- Server with software for configuration
- User requirements relating to web documents
- Software development environment
- XHTML standards
- Individual users as well as superior in the organisation

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB431 Create and style simple markup language documents

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to design and create basic markup language documents and cascading style sheets (CSS) in order to define the structure and style of a website.

It applies to individuals in ICT roles who are required to create web pages with consistency in appearance and user experience.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review the requirements	1.1 Review user requirements to determine website design 1.2 Develop testing approach and test cases based on requirements and refine with user 1.3 Select appropriate markup language based on user requirements
2. Create the document structure	2.1 Create and assign basic elements of documents based on user requirements

	2.2 Mark-up sections of documents to depict structure and refine with user
3. Format, style and lay out the elements on a web page	3.1 Style and format documents using CSS according to user requirements 3.2 Lay out document elements using CSS according to user requirements
4. Test and validate the web pages	4.1 Test website in different browsers according to test approach and cases, and correct and re-test issues 4.2 Document test results and provide to user to explain any outstanding issues and corrective actions 4.3 Recommend, agree, and undertake any outstanding corrective actions with the user to achieve user acceptance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies, interprets and uses information from technical and organisational documents to complete a work task
Writing	<ul style="list-style-type: none"> Develops content in a manner that supports and conveys information, using the appropriate structures and specialised language Uses specific software and technical language to create, format, review, save and access web-based documents, diagrams and images
Oral Communication	<ul style="list-style-type: none"> Identifies work outcomes through open-ended questioning, active listening, paraphrasing and summarising Uses clear and detailed verbal language in order to convey explicit information
Navigate the world of work	<ul style="list-style-type: none"> Understands own role and responsibilities, and follows organisational standards Completes work to user requirements and industry standards
Get the work done	<ul style="list-style-type: none"> Sequences and schedules complex activities within the specified timeframe, monitors implementation, and manages relevant communication Analyses documentation in order to apply and obtain desired results, and to resolve problems Utilises a combination of lateral and analytical thinking, to design and refine solutions that are adaptable to different contexts Uses a range of digitally-based technologies, and the software

	packages and hardware required

Assessment Requirements for ICTWEB431 Create and style simple markup language documents

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Interpret and implement one set of user requirements, including the ability to
 - select markup language according to requirements
 - use a markup language without the automated generation of code
 - customise website style and layout according to user requirements
 - create consistent style and format using CSS across multiple documents on the web page
 - identify testing approach and test cases based on user requirements
 - develop a website style and format using cascading style sheets (CSS)
- Test website in at least two common browsers and take corrective action according to test results
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Markup languages and their associated standards, advantages, and disadvantages
- Standard web and CSS design principles
- Application of the following to CSS:
 - hypertext mark-up language (HTML)
 - extensible hypertext mark-up language (XHTML)
 - standards for design
- Hypertext transfer protocol (HTTP) and HTTP Secure (HTTPS)
- Testing tools and processes and associated advantages and disadvantages
- Troubleshooting processes relating to CSS and websites
- Features and limitations of common web browsers

- Organisational procedures to document test results
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or workplace. This includes, but is not limited to:

- Software package
- Computer with internet connection
- User requirements relating to website
- Common web browsers to allow testing of website
- Individual users

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS201 Provide telecommunications services safely on roofs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge to engage in safe work practices when installing or repairing telecommunications equipment on roof structures.

It applies to individuals employed as technicians and installers who are required to safely install or repair telecommunications equipment on roof structures. It includes planning, risk assessment and implementing control measures while undertaking telecommunications installation or repairs.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Telecommunications – Occupational Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Follow workplace procedures for hazard identification and risk control	1.1 Notify customer and arrange site access 1.2 Recognise and report hazards in the work area to designated personnel according to workplace procedures 1.3 Follow work health and safety (WHS) legislative requirements, workplace procedures and work instructions to control risks

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Comply with safe work practices for working safely on roofs and adhere to workplace environmental requirements throughout the work</p> <p>1.5 Implement duty of care requirements to provide a safe working environment</p> <p>1.6 Complete job safety analysis (JSA) sheets according to work requirements, including hazard identification and risk assessment</p> <p>1.7 Use and maintain personal protective equipment and personal safety equipment according to work requirements and apply fall protection and personal safety requirements according to regulatory requirements</p>
2. Prepare for work on rooftop	<p>2.1 Assess scope of work according to workplace procedures, relevant legislation, codes, regulations and standards and relevant job information details</p> <p>2.2 Inspect site to determine layout and equipment requirements according to work order</p> <p>2.3 Select materials, tools and equipment, including personal protective equipment, and check for serviceability</p> <p>2.4 Inspect and install fall protection and perimeter protection equipment, ensuring adequacy for work and conformance to regulatory requirements</p> <p>2.5 Install roof safety system according to workplace and regulatory requirements</p> <p>2.6 Select and install appropriate signage and barricades</p>
3. Perform telecommunications work on rooftop	<p>3.1 Inspect access from ground to work area ensuring it is safe and according to regulatory requirements</p> <p>3.2 Estimate total weight of material to be raised to rooftop to carry out the work</p> <p>3.3 Determine and use the safest lifting method to bring materials and equipment to rooftop according to regulatory requirements.</p> <p>3.4 Secure test equipment, hardware and tools safely on rooftop and distribute weight to eliminate risk of damage to roof cover</p> <p>3.5 Inspect safety system periodically for compliance with regulations according to workplace procedures and report faults</p> <p>3.6 Monitor risk control measures to ensure they are effective and appropriate to the task and work environment</p> <p>3.7 Reassess risk control measures as required, according to changed work practices or site conditions and make alterations within scope of authority</p>

ELEMENT	PERFORMANCE CRITERIA
4. Complete activities and documentations	<p>4.1 Dismantle safety system according to prescribed sequence and remove from worksite</p> <p>4.2 Clear work area and dispose of materials or recycle according to state and territory legislation and workplace procedures</p> <p>4.3 Clean, check and maintain tools and equipment according to manufacturer's recommendations and workplace procedures</p> <p>4.4 Complete documentation according to workplace requirements and notify customer for sign off</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.6	<ul style="list-style-type: none"> Interprets textual information from sources to identify relevant safety signs
Writing	1.2, 1.6, 4.4	<ul style="list-style-type: none"> Prepares documentation and correspondence using clear language, correct spelling and terminology in the preparation of reports, JSA, SWMS and other reports
Oral Communication	1.1, 1.2, 4.4	<ul style="list-style-type: none"> Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Numeracy	3.2	<ul style="list-style-type: none"> Performs mathematical calculations to estimate, interpret and confirm safe roof loading
Navigate the world of work	1.3-1.5, 1.7, 2.1, 2.4, 2.5, 3.1, 3.3, 3.6, 3.7, 4.1-4.3	<ul style="list-style-type: none"> Complies with explicit policies and procedures. Explores and implements, where identified, the implicit expectations of policies and procedures
Interact with others	1.1, 1.2, 4.4	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols Uses a limited range of accepted practices for communicating in a work environment
Get the work done	1.1, 1.2, 1.4-1.7, 2.1-2.6, 3.1-3.4, 3.6, 3.7, 4.1-4.4	<ul style="list-style-type: none"> Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities Responds to predictable routine problems,

		implementing standard or logical solutions
--	--	--

Assessment Requirements for ICTWHS201 Provide telecommunications services safely on roofs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- locate, interpret and apply relevant information, standards and specifications for working safely on roofs
- apply safety requirements throughout the work sequence, including the use of personal protective equipment
- provide for erection, maintenance and dismantling of the fall and perimeter protection requirements for the site
- carry out a risk assessment ensuring:
 - correct identification of risks and safety requirements
 - correct selection and use of appropriate processes, tools and equipment
 - completion of all work to specification
 - compliance with regulations, standards and organisational quality procedures and processes
 - open communication and the ability to work effectively and safely with others.

Note: As a minimum, given the plans and specifications for the roof working area of a corner, extending at least 4 metres in either direction and greater than 1.8 m high, incorporating harnesses and harness fixing points for safe personal and stores access to the roof, stores and equipment locations

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the purpose of job safety analysis (JSA) and safe work method statements
- identify the various hazards associated with working on roofs
- identify levels of responsibility when operating in a hazardous situation
- specify workplace procedures relating to working on roofs

- describe the hierarchy of control in a workplace health and safety environment in the context of:
 - hazards
 - risk
 - control
- list and describe common workplace practices that impact health and safety
- explain 'duty of care' and its relevance to workplace health and safety
- list and describe the use of safety personal protective equipment (PPE) and equipment used for working on roofs
- describe safe lifting methods
- explain reporting methods for safe work practices
- explain the nature of work undertaken on roofs
- list and apply processes of providing for safe working practices
- identify and comply with relevant statutory and regulatory authority requirements related to working safely on roofs
- identify and use roof safety equipment and systems and considerations to facilitate working safely on roofs
- apply SI system of measurement for measurement.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Occupational Health and Safety field of work and include access to:

- site on roof where operations may be conducted
- induction procedure and requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- relevant regulations, standards specifications and manuals, including industry related systems information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the performance outcomes, skills and knowledge required to use organisational risk control procedures when working with a risk of exposure to radio frequency (RF) electromagnetic radiation (EMR) hazards.

The unit applies to site maintenance staff, technicians and installers who install or maintain equipment at installations that are sources of RF EMR.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – work health and safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work in RF EMR environment	1.1 Identify characteristics of RF EMR and situations that can lead to exposure to RF EMR hazards 1.2 Identify potential effects of RF EMR on human body and contributing factors that affect it 1.3 Research relevant regulations and standards that apply to

ELEMENT	PERFORMANCE CRITERIA
	working with and controlling RF EMR hazards 1.4 Obtain and review RF EMR information required for work environment
2. Assess RF EMR risks	2.1 Assess potential RF EMR hazards in telecommunications work environment 2.2 Estimate likely field strength pattern of potential RF EMR hazard
3. Control RF EMR risks	3.1 Explain typical organisational controls to manage and control identified RF EMR hazards 3.2 Choose and apply appropriate RF EMR controls 3.3 Report EMR exposure that exceeds acceptable levels according to organisational work health and safety (WHS) requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.2, 3.1	<ul style="list-style-type: none"> Uses a number of reading strategies to identify and interpret relevant information within familiar text types
Writing	3.3	<ul style="list-style-type: none"> Prepares organisational WHS documentation using clear language, correct spelling and terminology
Oral Communication	3.3	<ul style="list-style-type: none"> Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Numeracy	2.2	<ul style="list-style-type: none"> Performs mathematical calculations to estimate, interpret and compare RF signal strength
Navigate the world of work	1.3, 1.4, 3.1-3.3	<ul style="list-style-type: none"> Understands responsibility to comply with legal and regulatory requirements
Interact with others	3.3	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.4, 2.1, 3.1, 3.2	<ul style="list-style-type: none"> Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary

		<ul style="list-style-type: none">• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions• Responds to predictable routine problems and implements standard or logical solutions
--	--	--

Assessment Requirements for ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify the effect of radio frequency (RF) electromagnetic radiation (EMR) on the human body
- locate, interpret and apply relevant information, standards and specifications for working safely with RF EMR
- identify organisational controls for exposure to RF EMR, including lock-out procedures and the use of personal protective equipment
- identify risks and safety requirements and record in a job safety analysis (JSA) sheet or safe work method statement (SWMS) or similar record sheet
- select and use appropriate processes, tools and equipment to minimise RF EMR risk
- comply with regulations, standards and organisational procedures and processes
- communicate and work effectively and safely with others.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the characteristics of RF EMR and sources of RF EMR, and state their effect on the human body
- describe the nature of work undertaken close to sources of RF EMR and identify the associated risks and hazards
- identify and summarise the regulations and standards that govern the generation of RF and EMR
- identify the relevant statutory and regulatory requirements relating to working safely with RF EMR
- describe the organisational control processes for managing exposure to RF EMR.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- induction procedures and requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- relevant regulations, standards, specifications and manuals, including industry related systems information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS204 Follow work health and safety and environmental policy and procedures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to follow safe working practices and environmental policy in the management of a telecommunications workplace.

It applies to telecommunications staff working under supervision in a technical environment and includes school based workers, entry-level workers, trainees and apprentices, and field officers deploying broadband access networks using optical technologies and other work on live systems.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – work health and safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Identify work health and safety (WHS) legislative requirements	1.1 Locate WHS legislative requirements relevant to own work, role and responsibilities 1.2 Explain own responsibilities in relation to duty of care 1.3 Identify the relationship between legislative requirements and

ELEMENT	PERFORMANCE CRITERIA
	safe work practices
2 Identify construction hazards and control measures	2.1 Identify basic principles of risk management 2.2 Identify common construction hazards 2.3 Identify measures for controlling hazards and risks
3 Follow workplace procedures for hazard identification and risk control	3.1 Recognise and report hazards in work area to designated personnel according to workplace procedures 3.2 Follow WHS legislative requirements, workplace procedures and work instructions to control risks 3.3 Comply with safe work practices 3.4 Implement duty of care requirements 3.5 Complete job safety analysis (JSA) sheets or safe work method statement (SWMS) according to work requirements, including hazard identification and risk assessment 3.6 Use and complete checks of personal protective equipment according to work requirements 3.7 Assess and test for harmful gases associated with workplace
4 Follow safety requirements for working with optical fibre equipment	4.1 Identify and use safe work practices when handling optical fibre, lasers and optical connectors according to the relevant Australian Standards 4.2 Identify and use safe working practices when handling and disposing of chemical waste
5 Identify and implement WHS communication and reporting processes	5.1 Apply WHS communication processes, information and documentation 5.2 Identify designated WHS personnel 5.3 Comply with safety signs and symbols 5.4 Identify procedures and relevant authorities for reporting emergencies, incidents and injuries
6 Follow WHS incident response procedures	6.1 Follow general procedures for responding to incidents and emergencies 6.2 Identify procedures for accessing first aid 6.3 Select and use relevant personal protective equipment 6.4 Explain and apply workplace procedures for fire safety
7 Contribute to management of WHS	7.1 Raise WHS issues with designated personnel according to workplace procedures and relevant WHS legislation

ELEMENT	PERFORMANCE CRITERIA
	7.2 Contribute to participative arrangements for WHS management in workplace, within organisational procedures and scope of responsibilities and competencies
8 Contribute to management of workplace environmental issues	<p>8.1 Raise environmental issues with designated personnel according to workplace procedures and relevant environmental requirements and legislation</p> <p>8.2 Contribute to participative arrangements for environmental management in workplace, within organisational procedures and scope of responsibilities and competencies</p> <p>8.3 Record and report all WHS issues, risks and hazards to designated personnel</p>
9 Identify and respond appropriately to asbestos containing materials (ACM) hazards	<p>9.1 Identify asbestos containing materials (ACM) hazards or their likelihood</p> <p>9.2 Respond to asbestos containing materials hazards or their likelihood</p> <p>9.3 Report identified or suspected asbestos containing materials hazards to designated personnel according to workplace procedures</p>
10 Identify minor traffic management	<p>10.1 Assess traffic safety requirement of general location with respect to regulatory and enterprise requirements</p> <p>10.2 Identify safe work zone around vehicle and work space using traffic cones and signs according to regulatory requirements</p> <p>10.3 Identify changed traffic conditions and act in accordance</p>
11 Recognise and respond appropriately to confined space	<p>11.1 Identify confined space in accordance with regulatory or enterprise guidelines that can only be entered by personnel with specialist training</p> <p>11.2 Refer identified confined space to appropriate personnel</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 4.1, 5.4, 6.1-6.4	<ul style="list-style-type: none"> Analyses and consolidates information and data from a range of sources, against

		defined criteria and requirements, to identify safety requirements
Writing	1.1, 3.1, 3.5, 7.1, 7.2, 8.1-8.3, 9.3, 11.2	<ul style="list-style-type: none"> Accurately records information and prepares documentation using clear language and organisational formats and protocols
Oral Communication	1.1, 7.1, 7.2, 8.1-8.3, 9.3, 11.2	<ul style="list-style-type: none"> Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.6, 4.1, 5.1, 5.3, 5.4, 6.4, 7.1, 7.2, 8.1, 8.2, 9.3, 10.2, 11.1	<ul style="list-style-type: none"> Builds an understanding of personal roles and responsibilities for work Explores and implements, where identified, the implicit expectations of policies and procedures Understands rights and responsibilities, and complies with legal and regulatory requirements
Interact with others	1.1, 7.1, 7.2, 8.1- 8.3, 11.2	<ul style="list-style-type: none"> Complies with work instructions and contributes to work group discussions using accepted conventions Recognises common differences in other people and implements basic strategies to address own reaction to these differences
Get the work done	1.1-1.3, 2.1-2.3, 3.1, 3.4-3.7, 4.1-4.2, 5.1-5.4, 6.1- 6.4, 9.1, 9.2, 9.3, 10.1-10.3, 11.1	<ul style="list-style-type: none"> Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary Makes low impact decisions within familiar situations, based on a range of predefined or routine solutions Identifies ideas for other applications and considers them in current contexts Responds to predictable routine problems and implements standard and logical solutions

Assessment Requirements for ICTWHS204 Follow work health and safety and environmental policy and procedures

Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 3.1. Release created to correct numbering in performance criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify and apply the work health and safety (WHS) legislative and safety requirements for construction work
- identify the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- apply WHS communication processes, information and documentation
- contribute to the WHS committees and support representatives
- recognise the common safety signs and symbols
- identify and apply procedures for reporting hazards, incidents and injuries
- identify and apply the general procedures for responding to incidents and emergencies, including evacuation, first aid, fire safety equipment and personal protective equipment
- recognise and report hazards to designated personnel
- follow workplace procedures necessary to control risks in the workplace
- recognise the safe handling procedures for optical fibres and laser sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the relevant Commonwealth, state and territory WHS legislation, regulations, codes of practice, and industry standards and guidance notes relevant to own workplace, role and responsibilities
- describe the differences between Commonwealth, state and territory WHS legislation and regulations
- identify and describe the common construction hazards
- identify different types of asbestos containing materials (ACM) (via photographs) and common sources of asbestos containing materials (ACM) found in the work environment and describe the controls required to mitigate risk
- identify the general construction work activities that require licences, tickets or certificates of competency
- identify and discuss the information and documentation used to maintain and inform on safe work practices
- explain the purpose of environmental control processes for the following:
 - air quality management
 - disposal and handling of hazardous and dangerous substances
 - noise pollution
 - safe disposal of fibre offcuts
 - stormwater and materials spillage
 - waste disposal
- describe the WHS responsibilities and rights of duty holders and workplace parties under environmental and WHS legislation, regulations and codes of practice, including:
 - persons in control of construction work and/or projects
 - employers and self-employed persons
 - persons in control of a business or undertaking (PCBU) and officers
 - supervisors
 - employees and workers
 - designers
 - inspectors
 - manufacturers and suppliers
- describe how individuals engage and participate in WHS activities in the workplace
- list the safety implications of working with optical fibres and equipment including:
 - hazards relating to handling of optical fibre and laser light source in the workplace
 - injuries that may occur:
 - damage to retina from lasers
 - damage to lungs from inhalation of fibre offcuts and particles
 - needle stick injury from fibres and offcuts
 - laser warning signs and labels relating to optical fibre components and equipment
 - safety requirements when handling and working with:
 - devices
 - laser light sources

- optical fibre connectors
 - optical fibres
 - patchcords
- state the personal responsibilities in complying with safe work practices including those relating to:
 - housekeeping
 - identification of hazards
 - preventing bullying or harassment
 - smoking
 - use of amenities
 - use of drugs and alcohol
- discuss the principles of risk management (including hazard identification, risk assessment and control) for construction work
- state ways in which WHS is managed in the workplace, and activities required under WHS legislation including:
 - hazard identification
 - hazards that exist in the workplace
 - WHS instruction
 - preferred order of ways to control risks (known as the hierarchy of control)
 - risk assessment and controls
 - role of WHS committees and representatives
 - training and provision of WHS information
 - types of common personal protective equipment and fire safety equipment
 - types of WHS information and documentation
- describe the workplace environmental and WHS procedures relevant to various types of work being undertaken, including procedures for:
 - designated personnel responsible for WHS
 - employee and worker participation in WHS management
 - general first aid response requirements
 - general workers compensation and injury management
- describe the procedure for recognising, reporting and responding to WHS for:
 - accidents
 - dangerous occurrences
 - emergencies
 - hazards
 - incidents
 - injuries
 - fires
 - near misses
 - evacuation procedures

- identify and describe the function of WHS communications processes within an organisation
- discuss the purpose and process for completing job safety analysis or safe work method statements
- describe the meaning of WHS symbols found on signs and labels in the workplace
- describe the work operations to control risks
- explain the process of traffic control for a single vehicle
- describe the risks associated with confined spaces and harmful gasses, and explain the appropriate responses.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- relevant WHS legislation, regulations and codes of practice
- WHS implementation resources, such as sample forms, signs and procedures
- enterprise WHS policies and procedures
- personal protective equipment
- first aid equipment
- fire safety equipment
- relevant work areas for identification of hazards and control measures
- optic fibre cabling and equipment.

Note: Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Refer to the ICT Implementation Guide Companion Volume for recommended assessor details.

ICTWOR301 Organise resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to organise resources for a telecommunications project in a client environment, including preparing and evaluating tenders, organising equipment and labour resources, and client training.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise for third party supply	1.1 Develop specifications and company criteria for material supply and purchasing, and include in appropriate tender documents 1.2 Prepare tender documents according to company policy 1.3 Identify likely material suppliers and invite to tender and supply

	1.4 Evaluate and accept tenders as appropriate to company policy 1.5 Negotiate price and conditions of purchase to company guidelines and satisfaction
2. Organise supply of equipment and material	2.1 Develop specifications detailing types and quantities of equipment and material 2.2 Notify supplier to deliver equipment and material to designated location within specified timeframe
3. Organise client training	3.1 Ascertain detail of training required from client and establish timeframe for client training 3.2 Determine and organise resources to undertake level of training required
4. Assess and organise labour resources	4.1 Produce estimate of total labour resources required, using standard installation times and allowing for contingencies 4.2 Determine required labour skills to meet resource allocation for planned activities 4.3 Establish workforce with required numbers and skills of staff to meet demand 4.4 Notify workforce of job requirements including work health and safety (WHS) considerations, and organise priorities to ensure agreed timeframe with client is met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4	<ul style="list-style-type: none"> Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities
Writing	1.1-1.3, 1.5, 2.1, 2.2, 3.1, 4.4	<ul style="list-style-type: none"> Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.3, 1.5, 2.3, 3.1, 4.1	<ul style="list-style-type: none"> Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning

Numeracy	1.1, 1.4, 1.5, 2.1, 3.1, 4.1-4.3	<ul style="list-style-type: none"> • Uses mathematical skills to estimate materials and resource requirements
Navigate the world of work	1.4, 1.5	<ul style="list-style-type: none"> • Recognises and follows company policies and guidelines when evaluating and selecting tenders and negotiating price and conditions
Get the work done	All	<ul style="list-style-type: none"> • Applies formal processes when planning material and labour supply and client training tasks, producing plans with logically sequenced steps, reflecting some awareness of time and resource constraints and the needs of others in the immediate vicinity • Initiates standard procedures when responding to familiar problems within labour supply context

Assessment Requirements for ICTWOR301 Organise resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- accurately develop tenders for customer premises equipment (CPE) products, equipment, peripherals and associated equipment
- assess tenders and provide a clear report outlining all options, including recommendations with supporting reasons
- organise supply of equipment and material to designated location to meet specified timeframe
- identify labour needs and organise labour to meet installation schedules
- determine client training needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline appropriate engineering and design practices and procedures
- identify appropriate tools, equipment and materials required to do the work
- identify enterprise permit procedures and recording procedures
- identify the work health and safety (WHS) practices
- outline work planning and organisation theory
- identify relevant plant and equipment operations
- identify relevant statutory requirements
- explain time management techniques.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for organising resources
- enterprise and site-related documentation
- regulatory, supplier and equipment documentation than impacts on activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR302 Organise material supply

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to organise material supplies for a telecommunications project, including preparing and evaluating tenders from third party suppliers.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine material needs	1.1 Assess material needs from design plans and comply with relevant legislation, codes, regulations and standards 1.2 Check availability of required materials within existing stock 1.3 Assess availability of material from preferred suppliers

2. Prepare and evaluate tenders	2.1 Develop specifications and criteria for material supply and purchasing 2.2 Prepare tender documents and invite quotes from material suppliers according to enterprise policy 2.3 Evaluate tenders and ensure they are detailed in accordance with enterprise procedures
3. Organise delivery of equipment and material to site	3.1 Select types and quantities of equipment available from existing stocks and pack for distribution 3.2 Arrange delivery of equipment and material within specified timeframe 3.3 Organise third party supply according to agreed timeframe and supply agreements
4. Undertake administrative tasks	4.1 Record warranty details and distribute to relevant parties as required 4.2 Issue relevant financial documents according to enterprise policy 4.3 Record materials received in asset register according to enterprise procedures 4.4 Complete administrative requirements according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.3	<ul style="list-style-type: none">Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities
Writing	2.1, 2.2, 3.2, 3.3, 4.1, 4.4	<ul style="list-style-type: none">Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendationsEmploys the expected writing and formatting conventions to meet the expectations of a specific audience
Oral Communication	2.2, 3.2, 3.3, 4.1	<ul style="list-style-type: none">Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning

Numeracy	1.1, 2.2, 2.3, 3.1, 4.2, 4.3	<ul style="list-style-type: none"> Uses mathematical skills to estimate materials and resource requirements
Navigate the world of work	1.1, 4.2-4.4	<ul style="list-style-type: none"> Takes personal responsibility for adherence to relevant legislation, codes, regulations and standards, and enterprise policies and procedures
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3	<ul style="list-style-type: none"> Plans purchasing and supply of materials and equipment, accepting stated goals and aiming to achieve them efficiently Implements actions in relation to supply and delivery as per plan, making slight adjustments if necessary, and addressing some unexpected issues Uses a formal decision making process, setting or clarifying goals, gathering information, and identifying and evaluating several choices against a limited set of criteria in relation to assessing needs, selecting materials and equipment, and evaluating tenders

Assessment Requirements for ICTWOR302 Organise material supply

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- accurately apply the tender process according to both enterprise and legislative requirements
- comply with all related work health and safety (WHS) requirements and work practices
- determine material needs:
 - from design plans
 - from relevant databases
 - beyond current holdings
- organise supply of equipment and material to site
- record materials received on asset register.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate engineering and design practices and procedures
- outline enterprise permit and recording procedures
- describe WHS practices
- outline work planning and organisational theory
- describe relevant plant and equipment operations
- identify relevant statutory requirements
- identify time management techniques
- identify tools, equipment and materials required to do the work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for ordering materials
- relevant regulatory, enterprise, supplier and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR303 Schedule resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake scheduling of resources for a new installation or upgrade of an existing system for all telecommunications applications including telephony, data, video and multimedia.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope project resources	1.1 Collate and analyse design and estimation documents from appropriate personnel for resource needs and deadlines, complying with relevant legislation, codes, regulations and standards 1.2 Consult interested parties for input to schedule
2. Schedule	2.1 Coordinate resource requirements for project to match available

resources for project	<p>labour to quantity and type of work required</p> <p>2.2 Schedule availability of resources to suit relevant interested parties and according to works schedules, including start and finish dates</p> <p>2.3 Document and clearly communicate resources schedule to appropriate personnel for approval</p>
3. Monitor and coordinate resources schedule according to project progress	<p>3.1 Monitor and coordinate quantity, quality and timing of supply of each input and service according to progress of projects being undertaken</p> <p>3.2 Reschedule resources based on priorities and report to appropriate person according to enterprise guidelines</p> <p>3.3 Complete administrative tasks</p>

Foundation Skills

This section describes the Foundation Skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.3	<ul style="list-style-type: none"> Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities
Writing	1.1, 1.2, 2.2, 2.3, 3.2, 3.3	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.2, 2.3, 3.2	<ul style="list-style-type: none"> Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.1, 2.1-2.3, 3.1, 3.2	<ul style="list-style-type: none"> Uses mathematical skills to estimate resource allocation and work schedules
Navigate the world of work	1.1, 2.3, 3.2	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to scoping of project resources Recognises and follows explicit and implicit enterprise protocols regarding gaining approval for resources schedule and any rescheduling
Interact with others	1.2	<ul style="list-style-type: none"> Understands what to communicate, with whom and how in consultations regarding input to schedule

Get the work done	All	<ul style="list-style-type: none">Sequences and schedules complex activities, monitors implementation and manages relevant communication when scoping, scheduling, monitoring and coordinating resources scheduleUses systematic, analytical processes in matching labour supply to work required and monitoring progress, gathering relevant information and evaluating options against agreed criteriaRecognises and takes responsibility for addressing predictable and less predictable problems when rescheduling according to priorities

Assessment Requirements for ICTWOR303 Schedule resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify resource requirements from plans, equipment and system manuals, specifications and relevant enterprise policy
- plan and provision to meet key dates and milestones for:
 - appropriately skilled labour
 - volume and type of material
- monitor work progress, and coordinate and adjust resource requirements to meet client needs and cost parameters.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate engineering and design practices and procedures
- identify enterprise permit procedures and enterprise recording procedures
- identify relevant industrial awards and work health and safety (WHS) practices
- outline relevant plant and equipment operations
- identify relevant statutory requirements
- describe team communication processes and deadline setting
- explain time management techniques
- identify tools, equipment and materials required to do the work
- outline work planning and organisational theory.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a suitable telecommunications operations site
- current equipment
- relevant enterprise and site related documentation
- relevant regulatory, supplier and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage spare parts in all areas of telecommunications and includes maintenance of a database, stock control and dispatch.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage receipt and dispatch of spare parts	1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work 1.2 Identify hazards and make worksite safe according to relevant safety legislation and company work practices, and use personal

	<p>protective equipment</p> <p>1.3 Unload, unpack and store incoming spare parts using appropriate methods and enterprise procedures, and check off delivered items on documentation</p> <p>1.4 Package, label and relocate outgoing spare parts ready for dispatch using enterprise procedures</p> <p>1.5 Update parts database to reflect current spare parts movements and holdings, following each dispatch or delivery, and complete any other administrative task required by enterprise</p>
2. Store spare parts	<p>2.1 Label spare parts using appropriate identification scheme and place in predefined storage locations</p> <p>2.2 Observe antistatic precautions when handling equipment susceptible to damage by electrostatic discharge</p> <p>2.3 Display, maintain and update material safety data sheets (MSDS) on site</p>
3. Manage stock flow	<p>3.1 Action spare parts requests by checking database for availability and location, and organise the dispatch</p> <p>3.2 Monitor levels of spare parts stock by examining database reports against enterprise usage and replenishing stock when necessary</p> <p>3.3 Investigate and keep records of alternative suppliers of spare parts to minimise impact of availability and cost issues with regular suppliers</p> <p>3.4 Monitor spare parts with limited shelf life, and dispose of and replace when necessary</p> <p>3.5 Audit spare parts holdings for ready supply of items to minimise disruptions to job completions</p> <p>3.6 Update database from appropriate documentation each time a store's transaction occurs to maintain validity of data</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.2, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Recognises and interprets written and visual text to determine key information, and specific requirements and responsibilities

Writing	1.3-1.5, 2.1, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations Uses expected writing conventions and forms
Oral Communication	3.1	<ul style="list-style-type: none"> Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.3-1.5, 3.2-3.5	<ul style="list-style-type: none"> Uses mathematical skills to estimate materials and evaluate and predict resource requirements
Navigate the world of work	1.1-1.4, 2.1-2.3	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements relevant to spare parts work context, and draws attention to any issues that may affect self or others Recognises and follows explicit and implicit company and health and safety protocols, and meets expectations associated with own role
Get the work done	All	<ul style="list-style-type: none"> Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, when managing receipt and dispatch, storage and stock flow Uses systematic, analytical processes when monitoring and auditing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria Initiates standard problem solving procedures when identifying hazards within immediate context Seeks to improve a future response through investigating alternative suppliers Uses database systems and tools to access, organise, analyse and display information relevant to role

Assessment Requirements for ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- safely apply spare parts management procedures
- efficiently arrange for storage and ordering of spare parts
- research alternative parts replacements
- accurately update spare parts management database.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and database operation
- describe handling of:
 - chemicals and dangerous materials
 - sensitive electronic equipment using antistatic procedures and safeguards
- outline modern storage practices and identification of parts location
- outline work health and safety (WHS) procedures
- identify service level agreements
- describe stocktake and audit of spare parts holdings
- identify telecommunications components and assemblies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site where work may be conducted
- current equipment
- a database for relevant regulations
- organisational procedures
- equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR305 Supervise worksite activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to supervise small-scale projects with a limited range of technical skills.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for worksite activities	1.1 Clarify requirements of job with client and project personnel, and arrange access to site 1.2 Confirm resource requirements and allocate time and schedule activities with project manager following relevant legislation, codes, regulations and standards, site specific safety requirements and enterprise procedures

	1.3 Document or articulate worksite activities plan and verify with project manager 1.4 Source materials and equipment and place orders according to enterprise policy 1.5 Confirm external agency licences and approvals 1.6 Notify affected parties of works to be undertaken 1.7 Inform staff of their responsibilities on site
2. Supervise and monitor worksite activities	2.1 Direct and supervise staff in work activities, following plan 2.2 Account for staff, activities and resource usage 2.3 Recognise contingency situations and take corrective actions in consultation with project manager
3. Perform administrative tasks	3.1 Undertake administrative tasks 3.2 Prepare simple report and present to project manager

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 1.5, 3.1	<ul style="list-style-type: none"> Recognises and interprets text to determine key information and specific requirements and responsibilities
Writing	1.1-1.3, 1.5-1.7, 2.1, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language
Oral Communication	1.1-1.3, 1.5-1.7, 2.1, 2.3, 3.2	<ul style="list-style-type: none"> Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning
Numeracy	1.2, 2.2	<ul style="list-style-type: none"> Uses mathematical skills to estimate materials and evaluate and predict resource requirements
Navigate the world of work	1.2-1.5	<ul style="list-style-type: none"> Appreciates the implications of legal and regulatory responsibilities related to own work, and recognises some general legal principles applicable across work contexts Recognises and follows explicit and implicit

		enterprise policies and protocols, and meets expectations associated with own role
Interact with others	1.1-1.7, 2.1-2.3	<ul style="list-style-type: none"> Understands what to communicate, with whom and how when preparing, monitoring and supervising worksite activities Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role when supervising and monitoring activities Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies and resources when preparing, supervising and monitoring worksite activities Recognises and takes responsibility for addressing predictable and less predictable problems in familiar work contexts

Unit Mapping Information

Assessment Requirements for ICTWOR305 Supervise worksite activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- accurately plan work activities, prioritising and allocating tasks
- liaise effectively with client or project manager
- monitor work progress and reallocate resources to meet completion requirements
- supervise staff, ensuring compliance with work health and safety (WHS) and relevant regulations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate tools, equipment and materials required for the work
- identify enterprise permit procedures and recording procedures
- describe WHS practices
- identify relevant plant and equipment operations
- identify relevant statutory requirements and industrial awards
- explain team communication processes
- describe typical worksite issues
- describe work planning and organisation theory.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a telecommunications operations site
- equipment currently used in industry
- enterprise and site related documentation
- agency licences and relevant regulatory, supplier and equipment documentation that impacts on worksite activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR306 Resolve technical enquiries using multiple information systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to remotely support the resolution of complex technical enquiries related to a product or service.

It applies to individuals in a call centre environment with a background in telecommunications and experience in client access networks and client infrastructure, including equipment and cabling, who use multiple information systems to both obtain and record client information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Initiate contact with client	1.1 Apply all relevant legislation, codes, regulations and standards in resolution process 1.2 Receive and analyse enquiry to efficiently select initial course of action

	1.3 Engage effectively with client to confirm initial referral details and propose initial course of action
2. Obtain information from multiple information systems	2.1 Identify information needs and sources of this information 2.2 Log on to and navigate relevant information systems efficiently 2.3 Record details of informant and enquiry in information systems according to enterprise requirements 2.4 Identify and verify information relevant to enquiry and its resolution with informant
3. Develop plan to resolve enquiry	3.1 Review critical information with informant and apply technical expertise to develop options for resolving enquiry 3.2 Consider all inputs and recommend course of action, including escalation 3.3 Negotiate suitable course of action with informant 3.4 Record details of course of action as required by enterprise information systems
4. Implement plan to resolve enquiry	4.1 Confirm negotiated course of action with informant prior to initiating actions and seek agreement on schedule of actions for longer term resolutions 4.2 Identify and initiate actions to be taken by technical support operator, informant or other parties 4.3 Contact informant to confirm success of planned actions 4.4 Record outcomes of resolution as required by information systems

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2	<ul style="list-style-type: none"> Recognises and interprets text to determine key information and specific requirements and responsibilities
Writing	1.3, 2.3, 2.4, 3.1, 3.3, 3.4, 4.1-4.4	<ul style="list-style-type: none"> Prepares specific information that conveys an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel

Oral Communication	1.3, 2.4, 3.1, 3.3, 4.1-4.3	<ul style="list-style-type: none"> Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning Articulates requirements and strategies clearly, distinctively and creatively, based on techniques and language appropriate to the audience and environment
Navigate the world of work	1.1	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements relevant to own work context
Interact with others	1.3, 2.4, 4.1, 4.3	<ul style="list-style-type: none"> Initiates and contributes to conversations with clients, responding, explaining, clarifying and expanding on ideas and information as required
Get the work done	1.2, 1.3, 2.2, 2.3, 3.1-3.3, 4.4	<ul style="list-style-type: none"> Plans and implements client enquiry resolution, accepting stated goals and aiming to achieve them efficiently Selects from a range of pre-determined options when determining action to be taken by others, identifying and taking situational factors into account Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action Uses multiple digital information systems and tools to access, organise, analyse and display information relevant to role

Assessment Requirements for ICTWOR306 Resolve technical enquiries using multiple information systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- apply efficient computer usage to efficiently navigate relevant systems for the required information
- use effective interpersonal skills to develop a plan of action to deal with the enquiry
- develop agreement to resolve the enquiry
- accurately document all dealings for future reference and follow up resolution effectively.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain a range of conflict resolution approaches
- identify database and spreadsheet concepts
- describe enterprise escalation policies and procedures
- identify enterprise information systems
- identify legislation, codes of practice and other formal agreements that directly impact on resolution processes
- outline typical issues and challenges that occur when dealing with clients in a telecommunications environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a client contact centre
- current client contact technologies
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR307 Collect and analyse technical information

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to investigate a technical situation involving the collection and analysis of information from a variety of sources, including interviews and database systems. The technical situation under investigation may be the result of a fault or failure of a product, service or process.

It applies to individuals who undertake investigations. It may involve a degree of autonomy and some accountability for the quality of outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunication – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain recorded information	1.1 Apply all relevant legislation, codes, regulations and standards in analysis process 1.2 Verify situation to be investigated and identify appropriate sources of information for this situation 1.3 Obtain relevant information from computer systems and analyse

	and record information
2. Conduct simple interview	<p>2.1 Select interviewees with correct information about matter being investigated and select interview process to suit circumstances of interviewee</p> <p>2.2 Prepare for interview by performing preliminary research</p> <p>2.3 Develop interview questions to identify key points for effective interview</p> <p>2.4 Inform interviewee how the information will be used and observe their right to privacy</p> <p>2.5 Conduct interview using effective listening and questioning techniques, and focus interviewee on information relevant to matter being investigated</p> <p>2.6 Record information obtained in interview</p>
3. Analyse information	<p>3.1 Analyse critical information by reviewing situation being investigated</p> <p>3.2 Distinguish between factual information and assumptions, and make deductions based on factual critical information</p> <p>3.3 Incorporate assumptions into reasoning process where it assists in forming valid inferences</p> <p>3.4 Analyse inferences from those deductions and assumptions, and produce resolution of situation being investigated</p>
4. Implement outcomes of analysis	<p>4.1 Identify practical actions based on inferences arising from analysis process</p> <p>4.2 Implement practical actions to resolve situation</p> <p>4.3 Review outcomes of practical action by assessing their impact on situation</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 3.2, 4.1	<ul style="list-style-type: none"> Recognises and evaluates text to determine key information and specific requirements and responsibilities
Writing	1.2, 1.3, 2.1, 2.3, 2.5,	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language

	2.6, 3.1, 3.3, 3.4, 4.3	<ul style="list-style-type: none"> Records information in a sequential manner using clear and appropriate terminology for reference purposes
Oral Communication	1.2, 2.1, 2.4, 2.5	<ul style="list-style-type: none"> Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning, modifying the approach according to individual responses Presents expectations of workplace procedures, choosing language appropriate to the audience
Numeracy	3.1, 3.2	<ul style="list-style-type: none"> Performs mathematical calculations to check, interpret and confirm results of analysis
Navigate the world of work	1.1	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory requirements relevant to the analysis process
Get the work done	All	<ul style="list-style-type: none"> Takes responsibility for planning and organising the resolution process, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others Applies formal processes when planning analysis, producing plans with logically sequenced steps and reflecting some awareness of time and resource constraints and the needs of others Implements practical actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Uses a formal decision making process in analysing information, setting or clarifying goals, gathering information, and identifying and evaluating against a limited set of criteria Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action

Assessment Requirements for ICTWOR307 Collect and analyse technical information

Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 3.1. Release created to correct numbering in performance criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- apply keyboard skills and computer literacy to accurately use a database
- demonstrate appropriate listening, questioning and interviewing techniques
- develop an accurate record of interview
- integrate information from varied sources
- draw logical inferences from information gathered and make sound recommendations for action based on inferences.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe analytical techniques appropriate for information analysis, especially deductive reasoning
- explain conflict resolution approaches
- explain database and spreadsheet concepts and enterprise information systems
- explain information types and their sources
- identify sources of legislation, codes of practice and other formal agreements that directly impact on resolution processes
- describe listening, questioning and interviewing techniques

- identify privacy issues
- outline the influence of human factors on information analysis, including prejudice, biases and fallacies in reasoning
- describe typical issues and challenges that occur when dealing with clients.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a client contact centre
- current client contact technologies
- interview and evidence recording equipment
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR401 Undertake a civil site survey

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess a site for a telecommunications project, including gathering information about the site and the project, surveying the site and evaluating the suitability of the site for the work.

It applies to individuals who work as technical staff with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for survey	1.1 Discuss detailed requirements and arrange access to site with key stakeholders 1.2 Examine regulatory and statutory requirements associated with telecommunications project 1.3 Determine need for specialist studies for site
2. Survey land,	2.1 Survey existing buildings to assess capability of meeting changes

buildings and facilities	<p>required for project</p> <p>2.2 Collect information through site survey</p> <p>2.3 Determine environmental impact of development</p> <p>2.4 Estimate impact of prevailing weather conditions on planned changes</p> <p>2.5 Assess and document building options should new structure be necessary</p> <p>2.6 Assess geographical nature of land and determine barriers to signalling</p>
3. Report findings and recommendations	<p>3.1 Outline survey findings and recommendations to accommodate project requirements on site</p> <p>3.2 Develop options to meet planned changes and associated cost-benefit data</p> <p>3.3 Complete report and forward to relevant stakeholders following relevant procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.3-2.5	<ul style="list-style-type: none"> Evaluates complex texts to determine key information, and specific requirements and responsibilities
Writing	1.1, 2.1, 2.2, 2.4-2.6, 3.1-3.3	<ul style="list-style-type: none"> Develops written and complex diagrammatic material for a specific audience using appropriate forms and conventions Records information in a sequential manner using clear and appropriate terminology for reference purposes
Oral Communication	1.1, 3.1, 3.3	<ul style="list-style-type: none"> Conveys details that incorporate evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience
Numeracy	2.1, 2.2, 2.5, 2.6, 3.2	<ul style="list-style-type: none"> Uses complex mathematical equations to calculate accurately required measurements and diagrams

Navigate the world of work	1.2, 3.3	<ul style="list-style-type: none"> Keeps up to date on changes to legislation or regulations relevant to own rights and responsibilities, and considers implications of these when negotiating, planning and undertaking telecommunications project work Recognises and follows explicit and implicit protocols and meets expectations associated with own role in relation to communication with stakeholders
Get the work done	1.1-1.3, 2.1-2.6	<ul style="list-style-type: none"> Sequences and schedules survey activities, monitors implementation and manages relevant communication with stakeholders Uses systematic, analytical processes in planning and implementing a survey, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria Uses analytical processes to decide on a course of action, establishing criteria for deciding between options in relation to new structures and planned changes

Assessment Requirements for ICTWOR401 Undertake a civil site survey

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- negotiate with key stakeholders, enterprise personnel, clients, community representatives, specialists and other contractors on environmental and network needs
- accurately undertake a survey of environmental conditions, land, buildings and facilities for a telecommunications project
- apply legislative requirements to the project, including relevant operational codes, work health and safety (WHS) requirements and work practices
- report survey findings, outlining options and including recommendations with supporting reasons and coverage of existing and proposed needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the background information required to undertake a civil site survey
- explain basic meteorology and weather conditions
- describe the features and operating requirements of construction equipment
- describe geographical barriers to signalling
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- describe licensing and regulatory issues applying to a civil site survey on telecommunications sites
- outline soil testing methods and requirements
- describe
 - civil site safety practices
 - personal protective equipment for civil survey projects

- WHS requirements relating to surveys and site conditions
- outline typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for survey
- current equipment
- relevant regulatory and enterprise documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Establish contact with customers	1.1 Acknowledge and greet customer in a professional, courteous and concise manner according to organisational and legislative requirements 1.2 Maintain personal dress and presentation in line with organisational requirements 1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Maintain sensitivity to customer specific needs and any cultural, family and individual differences</p> <p>1.5 Establish rapport/relationship with customer and express a genuine interest in customer needs/requirements</p>
2 Identify customer needs	<p>2.1 Use appropriate questioning and active listening to determine customer needs</p> <p>2.2 Assess customer needs for urgency to identify priorities for service delivery</p> <p>2.3 Provide customer with information about available options for meeting customer needs and assist customer to identify preferred option/s</p> <p>2.4 Identify personal limitations in addressing customer needs and seek assistance from designated persons where required</p>
3 Deliver service to customers	<p>3.1 Provide prompt customer service to meet identified needs according to organisational requirements</p> <p>3.2 Provide information regarding problems and delays, and follow-up within appropriate timeframes as necessary</p> <p>3.3 Communicate with customers in a clear, concise and courteous manner</p> <p>3.4 Identify opportunities to enhance the quality of service and products, and take action to improve the service whenever possible</p>
4 Process customer feedback	<p>4.1 Promptly recognise customer feedback and handle sensitively according to organisational and legislative requirements</p> <p>4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures and legislative requirements</p> <p>4.3 Identify any unmet customer needs and discuss suitability of other products/services</p> <p>4.4 Support customers to make contact with other services according to organisational policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> Understands requirements in organisational policy and procedure documents Interprets product and service information in a range of formats to provide customer advice
Writing	4.2	<ul style="list-style-type: none"> Records customer information according to organisational requirements
Oral Communication	1.1, 1.3, 1.4, 1.5, 2.1-2.4, 3.2, 3.3, 4.3	<ul style="list-style-type: none"> Provides information or advice using structure and language to suit the audience Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> Follows organisational procedures and practices relevant to own role
Interact with others	1.1, 1.3-1.5, 2.1-2.4, 3.1, 3.2, 3.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Uses accepted communication practices to establish connections, build rapport and develop professional working relationships Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	3.2, 3.4, 4.1- 4.3	<ul style="list-style-type: none"> Addresses routine problems in familiar work contexts Recognises opportunities to enhance work practices and outcomes

Assessment Requirements for BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- greet customer and establish rapport/relationship in accordance with organisational requirements
- identify customer needs using appropriate interpersonal skills
- provide prompt service to address customer needs in accordance with organisational requirements
- identify and follow up opportunities to increase the quality of service and products
- respond to and record all customer feedback according to organisational standards, policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and briefly describe key provisions of relevant legislation from all forms of government that apply to provision of customer services
- identify and explain workplace organisational policies and procedures relating to customer service and the customer service process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service

- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES401 Generate design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate design solutions in response to a particular design need.

It applies to individuals who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

This unit builds on BSBDES201 Follow a design process, and places greater focus on research, concept generation and collaboration with others as key aspects of the design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Define the design challenge	1.1 Determine and evaluate user/client needs 1.2 Clarify specifications, parameters and constraints of the

ELEMENT	PERFORMANCE CRITERIA
	<p>design challenge in consultation with relevant stakeholders</p> <p>1.3 Articulate essence of the design challenge in an appropriate format</p>
2 Undertake research to inform the design solution	<p>2.1 Source, evaluate and acknowledge information that may assist in responding to the design challenge</p> <p>2.2 Consider historical, current and future perspectives and trends that might inform design solutions</p> <p>2.3 Consider relevant social, economic, environmental, ethical and cultural issues that may impact design solutions</p> <p>2.4 Analyse, distil and collate information to inform the development of the design solution</p>
3 Communicate and collaborate with others	<p>3.1 Establish and develop working relationships with key stakeholders</p> <p>3.2 Seek and integrate input and ideas from others during design process</p> <p>3.3 Inform key stakeholders about progress of the design and related implications</p> <p>3.4 Negotiate and agree on any changed requirements or modifications</p>
4 Generate ideas and responses to the design challenge	<p>4.1 Reflect on and integrate ideas generated from research and consultation</p> <p>4.2 Use a range of creative thinking techniques to generate different options and ideas</p> <p>4.3 Apply relevant principles of functionality, ergonomics, aesthetics and sustainability to development of different options</p>
5 Select a design solution	<p>5.1 Develop and use a range of criteria to evaluate different options and ideas</p> <p>5.2 Select a preferred solution based on agreed criteria and in consultation with relevant key stakeholders</p> <p>5.3 Adjust and refine proposed design solution based on research, testing and reflection</p> <p>5.4 Present proposed design solution with appropriate supporting documentation according to project requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.4	<ul style="list-style-type: none"> Researches, collates and analyses textual information from a wide range of sources
Writing	1.2, 1.3, 2.1, 2.4, 5.1, 5.3, 5.4	<ul style="list-style-type: none"> Documents ideas, sources and concepts using appropriate formats and specific language Refines and edits work
Oral Communication	1.2, 1.3, 3.2-3.4, 5.2, 5.4	<ul style="list-style-type: none"> Actively participates in verbal exchanges of ideas and elicits views and opinions of others by listening and questioning Clarifies, explains or presents information relating to design solution using clear and specific language appropriate to audience
Numeracy	1.3, 4.3, 5.1, 5.4	<ul style="list-style-type: none"> Interprets numeric data and applies mathematical calculations relevant to design solution
Navigate the world of work	2.3	<ul style="list-style-type: none"> Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in immediate work context
Interact with others	1.3, 3.1, 5.4	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.1, 2.1, 2.2, 2.4, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is Systematically analyses and evaluates information to aid in decision making and problem solving Applies some basic principles of lateral thinking to generate new or innovative ideas

Assessment Requirements for BSBDES401 Generate design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and document a design solution through research, reflection, and generation and refinement of ideas
- demonstrate effective collaboration with others in the design process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in the relevant design context
- describe key features of the wider industry, and the economic, social and historical context design solutions are being generated in
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant industry context
- identify sources of information that support the development of technical and other knowledge
- describe the materials, tools, equipment, techniques and processes used in the generation of design solutions in the relevant industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- interaction with others to reflect the collaborative nature of the design process

- sources of information on design for the relevant industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES402 Interpret and respond to a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work.

It applies to individuals working in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief.

Work is carried out independently, although guidance is available if required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Interpret design brief	1.1 Correctly interpret the specifications of design brief 1.2 Establish and clarify user or client for the proposed product/service to inform design decisions 1.3 Identify and clarify specifications, parameters or constraints of design brief in consultation with relevant colleagues

ELEMENT	PERFORMANCE CRITERIA
	1.4 Source and evaluate information pertinent to design brief
2 Explore and develop design concept	2.1 Generate ideas for design concept through research, exploration and experimentation 2.2 Develop initial design concept consistent with design brief parameters 2.3 Evaluate and explore options for refining concept to best meet design brief parameters 2.4 Refine options and select approach which best meets design brief requirements
3 Liaise with client	3.1 Agree on communication process and frequency of communication with client 3.2 Present concepts for work at appropriate stages during design process as required 3.3 Present and explore different options and creative ideas with client when appropriate 3.4 Proactively seek and act on client feedback 3.5 Reach agreement on concept for work which complies with design brief
4 Plan production of work	4.1 Assess specific design production risks 4.2 Identify all components required to produce a prototype 4.3 Assess technical requirements for production against specified guidelines 4.4 Identify and consult with support services required for production 4.5 Produce a prototype and evaluate against design brief requirements 4.6 Analyse prototype and determine any further adjustments to production requirements 4.7 Finalise production specifications supported by accurate and complete documentation
5 Complete production of work	5.1 Collect and/or organise required components for the work 5.2 Produce or monitor the production of work ensuring all parameters of design brief are met 5.3 Accurately document work progress in a format appropriate to the nature of the design and requirements of design brief

ELEMENT	PERFORMANCE CRITERIA
	5.4 Seek client approval for work where appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 4.3, 4.5	<ul style="list-style-type: none"> Analyses textual information to accurately interpret job specifications
Writing	1.3, 3.2-3.5, 4.4, 4.5, 4.7, 5.3, 5.4	<ul style="list-style-type: none"> Uses specific industry-related terminology and appropriate formats to develop, document and amend workplace documentation
Oral Communication	1.3, 3.1-3.5, 4.4, 5.4	<ul style="list-style-type: none"> Actively participates in verbal exchanges of ideas and elicits the views and opinions of others by listening and questioning Uses clear language to clarify, explain and present information
Numeracy	1.1, 1.3, 4.5, 5.3	<ul style="list-style-type: none"> Interprets numeric data and applies mathematical calculations to produce prototype according to design specification
Interact with others	1.3, 3.1-3.5, 4.4, 5.4	<ul style="list-style-type: none"> Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience Collaborates and negotiates with others to achieve joint outcomes
Get the work done	1.1, 1.2, 2.1-2.4, 3.2, 4.1-4.3, 4.6, 4.7, 5.1, 5.2	<ul style="list-style-type: none"> Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is Systematically analyses and evaluates information to aid in decision making and problem solving Applies some basic principles of lateral thinking to generate new or innovative ideas Understands and explicitly applies some basic principles of lateral thinking to generate new or innovative ideas

Assessment Requirements for BSBDES402 Interpret and respond to a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- articulate and document the process of developing own design practice by learning to develop new skills, ideas and a unique voice
- adjust work processes via peer feedback and self-evaluation
- identify work options and incorporate networking in career development.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list current and emerging designers in the relevant design discipline
- discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- identify professional development information and resources available to designers
- summarise sources of information relating to work opportunities and career planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES403 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer.

It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation.

Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Acquire and develop technical skills	1.1 Plan strategies to ensure the development of appropriate technical skills in design practice 1.2 Plan and use opportunities to develop and assess technical skills 1.3 Identify and use practice, feedback, discussion and evaluation

ELEMENT	PERFORMANCE CRITERIA
	<p>opportunities to continuously improve technical skills</p> <p>1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment</p> <p>1.5 Identify and use relevant media to stimulate technical and professional development</p>
2 Develop conceptual skills and ideas	<p>2.1 Engage in ongoing experimentation and exploration of different ideas and techniques</p> <p>2.2 Discuss ideas with others and apply knowledge gained to inform own work</p> <p>2.3 Use work practice to gain experience in a range of genres and interpretations</p> <p>2.4 Study the work of others to stimulate conceptual and technical skills development</p> <p>2.5 Research and share ideas across a range of design disciplines</p> <p>2.6 Identify and use a range of opportunities to develop own skills and keep informed about current design practice</p>
3 Develop own voice	<p>3.1 Explore and experiment with new ideas in making and/or interpreting design work</p> <p>3.2 Explore and use technology, where appropriate, to develop own voice and expand practice</p> <p>3.3 Demonstrate own voice through design project realisation implementation</p>
4 Evaluate own work	<p>4.1 Seek and apply constructive criticism from others to improve own work</p> <p>4.2 Evaluate own work against planned strategy for own practice</p> <p>4.3 Evaluate own work in the context of work by others to extend own practice</p> <p>4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes</p>
5 Research work opportunities	<p>5.1 Correctly identify sources of information relating to work opportunities for designers</p> <p>5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities</p> <p>5.3 Incorporate research results and information into own work and career planning</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1-1.5, 2.2, 2.4, 2.6, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Uses practical strategies to identify and implement improvements in own creative skills and technical design skills and practice
Reading	1.5, 2.4, 2.5, 5.1-5.3	<ul style="list-style-type: none"> Researches and evaluates a variety of textual information from a wide range of sources
Writing	2.5, 4.1, 5.3	<ul style="list-style-type: none"> Uses clear and specific language to document ideas, feedback and research results
Oral Communication	1.3, 2.2, 2.5, 4.1	<ul style="list-style-type: none"> Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit the audience Uses active listening and questioning techniques to clarify and confirm understanding
Navigate the world of work	1.2, 1.3, 2.3, 4.1, 5.2	<ul style="list-style-type: none"> Recognises the importance of developing technical skills and of learning from feedback and self-reflection Begins to broaden areas of interest and focus, seeking new challenges and recognising that expertise can be adapted and applied in diverse contexts
Interact with others	2.5, 4.1, 5.2	<ul style="list-style-type: none"> Begins to cultivate relationships with people with the knowledge, skills and influence to provide collaborative support
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.6, 3.1-3.3, 4.2, 4.4, 5.1	<ul style="list-style-type: none"> Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is Systematically analyses and evaluates information to aid in decision making and problem solving Applies some basic principles of lateral thinking to generate new or innovative ideas Recognises the potential of new approaches to enhance work practices and outcomes Evaluates effectiveness of decisions on how well they meet stated goals Understands key principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology

BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

It applies to individuals who implement concepts and solutions in response to a design challenge in any industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Organise resources for realising the design solution	1.1 Confirm the nature and scope of the proposed design solution 1.2 Research resources required for developing the design concept to implementation stage 1.3 Investigate different factors impacting the selection and use of resources 1.4 Select and prepare resources based on research and other

ELEMENT	PERFORMANCE CRITERIA
	legislative or organisational requirements
2 Test the design solution	2.1 Experiment with a range of different techniques and processes to test the design solution 2.2 Evaluate, challenge and refine testing processes 2.3 Gain input and feedback from key stakeholders during testing 2.4 Accurately document outcomes of testing 2.5 Select final design solution based on outcomes of testing and input from others
3 Develop prototype or model	3.1 Create prototype or model based on agreed approaches 3.2 Select and organise materials, tools and equipment, where appropriate, according to chosen design solution 3.3 Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement 3.4 Compare completed prototype or model against identified needs and other considerations and make adjustments as required
4 Present prototype or model	4.1 Identify key stakeholders design should be presented to 4.2 Select appropriate format for presentation based on nature of audience and design 4.3 Present prototype or model to optimise clarity, conciseness and appeal

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 3.4	<ul style="list-style-type: none"> Researches and accurately interprets textual information from a wide range of sources
Writing	1.2, 1.3, 2.3, 2.4, 3.4, 4.3	<ul style="list-style-type: none"> Documents research, resource requirements and testing outcomes using appropriate language and formats
Oral Communication	1.1, 2.3, 4.3	<ul style="list-style-type: none"> Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit audience

		<ul style="list-style-type: none"> • Uses active listening and questioning techniques to gain input and feedback
Numeracy	1.1-1.3, 2.4, 2.5	<ul style="list-style-type: none"> • Interprets and applies numeric information relevant to design solution • Compares numerical data gathered from testing
Navigate the world of work	1.4	<ul style="list-style-type: none"> • Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution
Interact with others	4.3	<ul style="list-style-type: none"> • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how
Get the work done	1.1-1.4, 2.1, 2.2, 2.5, 3.1-3.4, 4.1, 4.2	<ul style="list-style-type: none"> • Sequences and schedules routine and complex activities, monitors implementation, and manages relevant communication • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process • Makes a range of critical and non-critical decisions in relatively complex situations, taking client requirements and range of constraints into account • Creates new or innovative ideas through exploration, analysis and critical thinking

Assessment Requirements for BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- present model to key stakeholders using the most appropriate best practice methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in relevant design context
- describe key features of the wider industry, with the economic, social and historical context for the design solution
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context
- summarise sources of information that support the development of technical and other knowledge
- describe the technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- other people to reflect the collaborative nature of the design process

- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Establish design requirements	1.1 Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client 1.2 Identify and source information and references relevant to the design project 1.3 Undertake critical analysis of sources and extract key information to inform the design project

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project</p> <p>1.5 Proactively seek, review and act on information needed to inform constructive communication with client</p> <p>1.6 Build trust and respect between self and client through effective communication and demonstration of professional integrity</p>
2 Develop and refine design brief	<p>2.1 Develop concepts and ideas for inclusion in design brief, taking account of overall objectives and parameters</p> <p>2.2 Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs</p> <p>2.3 Present ideas in an appropriate format/medium and seek feedback from key stakeholders</p> <p>2.4 Use effective communication techniques to generate discussion, debate and critical analysis</p> <p>2.5 Re-evaluate and refine options based on own analysis and discourse with others</p> <p>2.6 Establish and agree on final nature and scope of design brief with client and accurately document details</p>
3 Negotiate terms and conditions	<p>3.1 Negotiate and agree terms and conditions of brief in accordance with relevant organisational and professional standards</p> <p>3.2 Clarify, agree and document roles and responsibilities of those involved in the project</p> <p>3.3 Confirm agreements in writing in accordance with organisational requirements</p> <p>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek appropriate assistance</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.2, 2.5	<ul style="list-style-type: none"> Identifies and interprets textual information from

		various sources to develop ideas and concepts
Writing	1.1, 1.3-1.5, 2.1-2.3, 2.6, 3.1-3.3	<ul style="list-style-type: none"> Develops a range of documents using appropriate vocabulary, context and formatting for different audiences
Oral Communication	1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.2	<ul style="list-style-type: none"> Participates in discussions to elicit views of others by asking questions and listening to responses Presents ideas and seeks feedback from others using appropriate tone, vocabulary and language structures
Numeracy	1.2-1.4	<ul style="list-style-type: none"> Interprets and applies numeric information relevant to design brief
Navigate the world of work	1.2, 1.3, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and design of design solution
Interact with others	1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.4	<ul style="list-style-type: none"> Uses appropriate communication conventions and protocols to seek information from stakeholders Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others
Get the work done	1.1-1.3, 1.5, 2.1, 2.2, 2.5, 3.2	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation, and manages relevant communication Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process Makes a range of critical and non-critical decisions in relatively complex situations, taking client and organisational requirements and possible constraints into account Generates new or innovative ideas or concepts through exploration, analysis and critical thinking

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Information and references relevant to the design brief must include consideration of:	<ul style="list-style-type: none"> legislative and regulatory context financial/budgetary information organisational materials technical reports/data.

Assessment Requirements for BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and finalise at least TWO design briefs for a specific industry purpose
- demonstrate highly-developed interpersonal skills, self-evaluation techniques and the ability to seek expert advice when required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the legal issues that affect negotiations and contracts in the relevant work context
- explain the design process within the specific industry context/design discipline
- compare and contrast the scope, nature and potential variations that occur within design briefs relevant to a specific context
- identify sources of information to assist the development of design concepts within a specific industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- appropriate equipment and media to communicate and present ideas and concepts
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

This unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context.

At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning and evaluation and leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect, analyse and communicate information and ideas	1.1 Collect relevant information from appropriate sources and analyse and share with the work team to improve work performance 1.2 Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the

ELEMENT	PERFORMANCE CRITERIA
	<p>audience and any specific needs</p> <p>1.3 Lead consultation processes to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes</p> <p>1.4 Seek and value contributions from internal and external sources in developing and refining new ideas and approaches</p> <p>1.5 Implement processes to ensure that issues raised are resolved promptly or referred to relevant personnel as required</p>
2. Develop trust and confidence as leader	<p>2.1 Treat all internal and external contacts with integrity, respect and empathy</p> <p>2.2 Use the organisation's social, ethical and business standards to develop and maintain effective relationships</p> <p>2.3 Gain and maintain the trust and confidence of colleagues, customers and suppliers through competent performance</p> <p>2.4 Adjust interpersonal styles and methods to meet organisation's social and cultural environment</p> <p>2.5 Lead and encourage other members of the work team to follow examples set according to organisation's policies and procedures</p>
3. Develop and maintain networks and relationships	<p>3.1 Use networks to identify and build relationships</p> <p>3.2 Use networks and other work relationships to provide identifiable benefits for the team and organisation</p>
4. Manage difficulties into positive outcomes	<p>4.1 Identify and analyse difficulties and take action to rectify the situation within the requirements of the organisation and relevant legislation</p> <p>4.2 Guide and support colleagues to resolve work difficulties</p> <p>4.3 Regularly review and improve workplace outcomes in consultation with relevant personnel</p> <p>4.4 Manage poor work performance within the organisation's processes</p> <p>4.5 Manage conflict constructively within the organisation's processes</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	<ul style="list-style-type: none"> Collects, analyses and evaluates textual information from a range of resources to inform improvement strategies
Oral Communication	1.2, 1.3, 2.4, 2.5, 4.2	<ul style="list-style-type: none"> Selects or adjusts communication style to maintain effectiveness of interaction and build and maintain engagement consistent with organisational requirements
Navigate the world of work	2.2, 2.5, 4.1, 4.4, 4.5	<ul style="list-style-type: none"> Recognises and follows legislative and organisational requirements relevant to own role
Interact with others	1.1-1.4, 2.1, 2.3, 2.5, 3.1, 3.2, 4.2, 4.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders Adapts personal communication style to build trust and positive working relationships and to show respect for the opinions, values and particular needs of others Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others
Get the work done	1.1, 1.5, 4.1, 4.3	<ul style="list-style-type: none"> Plans and implements activities and processes to manage and review work performance Systematically gathers and analyses all relevant information to formulate and evaluate possible solutions to difficulties

Assessment Requirements for BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
 - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
 - forge effective relationships with internal and/or external people and help to maintain these networks
 - encourage participation and foster contribution of and respect for ideas and feedback
 - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation's requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation's goals and objectives 1.4 Establish and use key performance indicators to meet

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	<p>2.1 Use organisation's standards and values in conducting business</p> <p>2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation</p> <p>2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility</p>
3. Make informed decisions	<p>3.1 Gather and organise information relevant to the issue/s under consideration</p> <p>3.2 Facilitate individual's and team's active participation in decision-making processes</p> <p>3.3 Examine options and assess associated risks to determine preferred course/s of action</p> <p>3.4 Ensure decisions are timely and communicate them clearly to individuals and teams</p> <p>3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams</p> <p>3.6 Use feedback processes effectively to monitor the implementation and impact of decisions</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	<ul style="list-style-type: none"> Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	<ul style="list-style-type: none"> Records and reports key information related to the organisational goals, standards and objectives Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

		objectives
Numeracy	1.4	<ul style="list-style-type: none"> Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	<ul style="list-style-type: none"> Understands how own role meshes with others and contributes to broader work goals Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	<ul style="list-style-type: none"> explicitly stated values values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
 - relevant information
 - examination of options and associated risks
 - input from relevant people
- communicate about making and implementing decisions including:
 - facilitating agreement on the preferred course of action and implementation plans
 - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
 - stated

- implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
 - organisational values
 - role modelling
 - integrity and credibility
 - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSUS201 Participate in environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively measure current resource use and carry out improvements, including reducing the negative environmental impact of work practices.

It applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions, and work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Document and measure current usage of resources using appropriate techniques 1.4 Record and file documentation measuring current usage, using

ELEMENT	PERFORMANCE CRITERIA
	technology (such as software systems) where applicable 1.5 Identify and report workplace environmental hazards to appropriate personnel
2. Comply with environmental regulations	2.1 Follow workplace procedures to ensure compliance 2.2 Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1 Follow organisational plans to improve environmental practices and resource efficiency 3.2 Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.3 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 3.1	<ul style="list-style-type: none"> Recognises and interprets textual information to establish job requirements from relevant information
Writing	1.3, 1.4, 1.5, 2.2	<ul style="list-style-type: none"> Completes documents using required formats
Oral Communication	1.5, 2.2, 3.3	<ul style="list-style-type: none"> Articulates ideas clearly and uses simple and relevant language to identify and report issues to designated person
Numeracy	1.3	<ul style="list-style-type: none"> Calculates basic metric measurements to determine resource usage
Navigate the world of work	2.1	<ul style="list-style-type: none"> Understands and adheres to legal and regulatory responsibilities related to own work
Interact with others	1.5, 2.2, 3.2, 3.3	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with co-workers in range of work contexts Collaborates and cooperates with others to achieve joint outcomes
Get the work	1.1-1.4, 3.1, 3.3	<ul style="list-style-type: none"> Implements actions as per plan, taking some responsibility for sequencing and timing of tasks

done		<ul style="list-style-type: none">• Uses main features and functions of digital tools to complete work tasks and access information• Analyses current practices to identify opportunities for improvement.

Assessment Requirements for BSBSUS201 Participate in environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- locate and interpret a range of environment/sustainability legislation and procedural requirements
- participate in and support discussions for an improved resource efficiency process
- identify, document and measure usage of resources
- collaborate with team members on suggestions for improving workplace practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify environmental and resource hazards/risks as well as environmental or sustainability legislation, regulations and codes of practice applicable to own role
- outline sustainability requirements in the workplace
- identify reporting channels and procedures to report breaches and potential issues
- identify where to find environmental and resource efficiency systems and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- documentation, information and resources related to workplace environmental and resource efficiency issues
- office equipment and resources
- case studies and, where possible, real situations

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

FSKDIG002 Use digital technology for routine and simple workplace tasks

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use digital technology to undertake workplace tasks that are simple and routine in nature. It requires the ability to identify and interpret technical instructions, and setup and apply a range of digital technologies to achieve predetermined outcomes.

An individual performing these tasks may work with an expert or mentor where support is available if requested.

This unit applies to individuals who use, or are preparing to use, digital skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Technology

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to use digital technology for routine and simple task	1.1 Identify nature and scope of routine and simple workplace task that requires the use of digital technology 1.2 Identify purpose of task and required outcome 1.3 Identify, select and locate appropriate digital technology required

Element	Performance Criteria
	for task 1.4 Locate and identify simple workplace information and terminology associated with technology
2. Perform routine and simple workplace task using digital technology	2.1 Interpret and follow simple instructions to access and use digital technology required for the task 2.2 Use technology to enter, store and retrieve information relevant to the task 2.3 Comply with workplace procedures relevant to using digital technology in completing task 2.4 Use basic security protocols related to workplace task
3. Finalise task	3.1 Complete use of technology for designated task in accordance with workplace procedures 3.2 Review performance against required outcome 3.3 Seek feedback on performance against outcomes and identify ways to improve performance

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Mapping Information

Supersedes and is equivalent to FSKDIG02 Use digital technology for simple workplace tasks.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for FSKDIG002 Use digital technology for routine and simple workplace tasks

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use digital technology to complete at least three routine and simple workplace tasks with different required outcomes and in accordance with workplace procedures.

During the above, the candidate must use the main features and functions of the selected digital technology and suitable security protocols.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit, including knowledge of:

- outcomes of routine and simple workplace tasks
- familiar types of digital technology commonly used in the workplace, their purposes and their uses
- familiar workplace instructions and procedures for the use of digital technology relevant to routine and simple workplace tasks
- relevant ethical and security practices applicable to workplace digital technology
- simple conventions of online etiquette
- strategies to review and improve performance.

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using routine and simple tasks that reflect those typically found in a workplace.

The following resources are to be made available:

- an expert or mentor to provide support to learner if requested
- digital technology required to complete the performance evidence
- workplace procedures required to complete the performance evidence
- own familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of digital technology, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.

FSKDIG003 Use digital technology for non-routine workplace tasks

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use digital technology to undertake non-routine workplace tasks, such as, operating machinery with computerised settings, entering text into a scanning device, collecting data to construct tables, graphs and charts in a spreadsheet, and measuring, recording and interpreting data using digital equipment.

An individual performing these tasks works independently and uses familiar support resources as needed.

This unit applies to individuals who use, or are preparing to use, digital skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Technology

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to use digital technology for non-routine task	1.1 Identify nature and scope of non-routine workplace task that requires the use of digital technology 1.2 Identify purpose of task and set the required outcome 1.3 Select and organise appropriate digital technology required for

Element	Performance Criteria
	task 1.4 Locate and interpret routine workplace information and terminology associated with technology, and relevant safety procedures
2. Perform non-routine workplace task using digital technology	2.1 Interpret and follow routine information and instructions from a range of sources to access and use digital technology required for task 2.2 Apply knowledge or skills to adapt instructions to suit changes or requirements in the workplace 2.3 Comply with workplace procedures and security protocols relevant to using digital technology in completing task
3. Finalise task	3.1 Determine and complete shut down or reset of technology in accordance with workplace procedures 3.2 Review performance against required outcomes 3.3 Evaluate and plan ways to improve performance

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for FSKDIG003 Use digital technology for non-routine workplace tasks

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use digital technology to complete at least three non-routine workplace tasks with different required outcomes and in accordance with workplace procedures.

During the above, the candidate must demonstrate use of the main features and functions of selected digital technology and application of security protocols.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit, including knowledge of:

- outcomes of relevant non-routine workplace tasks using digital technology
- types of digital technology – software and hardware – commonly used in the workplace, their purposes and their uses
- legislation or policies relevant to the use of workplace technology
- workplace procedures for safely accessing and using digital technology
- techniques to synthesise relevant information and instructions from various sources
- relevant ethical and security practices applicable to use of digital technology for non-routine workplace tasks
- conventions of online etiquette
- strategies to review and improve performance.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using non-routine tasks that reflect those typically found in a workplace.

The following resources are to be made available:

- digital technology required to complete the performance evidence
- workplace procedures required to complete the performance evidence
- own familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of digital technology, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.

HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to all persons who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for cardiopulmonary resuscitation (CPR).
- 1.4. Seek assistance from emergency services.

2. Perform CPR procedures.

- 2.1. Perform CPR in accordance with the ARC guidelines.
- 2.2. Display respectful behaviour towards casualty.
- 2.3. Operate an automated external defibrillator (AED) according to manufacturers' instructions.

3. Communicate details of the incident.

- 3.1. Accurately convey incident details to emergency services.
- 3.2. Report details of incident in line with appropriate workplace or site procedures.
- 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.

- 4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID001 Perform cardiopulmonary resuscitation

Assessment Requirements for HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
 - handing over to emergency services
 - providing an accurate verbal report of the incident
 - reviewing the incident
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - relevant ARC guidelines to managing the unconscious breathing and non-breathing casualty and provision of CPR
 - potential incident hazards and risk minimisation processes when providing first aid

- infection control procedures, including use of standard precautions and resuscitation barrier devices
- requirements for currency of skill and knowledge
- first aid codes of practice
- appropriate workplace or site procedures relevant to the provision of first aid
- legal, workplace and community considerations, including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- AED training devices
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

- 3. Communicate details of the incident.
 - 3.1. Accurately convey incident details to emergency services.
 - 3.2. Report details of incident in line with appropriate workplace or site procedures.
 - 3.3. Complete applicable workplace or site documentation, including incident report form.
 - 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
- 4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
 - minor wound cleaning and dressing
 - nosebleed
 - shock

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally

- rate, ratio and depth of compressions and ventilations
- correct hand positioning for compressions
- basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening and life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, strains and sprains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

ICPDMT3460 Incorporate video into multimedia presentations

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to edit and add video to multimedia presentations.

It applies to individuals who select and use industry standard software and hardware to produce digital video sequences to meet required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital media technologies

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to incorporate digital video	1.1 Identify job requirements and video specifications 1.2 Identify and select digital video software 1.3 Identify methods for saving and producing multimedia presentation
2. Design digital video	2.1 Select digital video software 2.2 Use digital video editing software to combine video assets 2.3 Control variations in video frame rates 2.4 Apply time stamping techniques to video frames 2.5 Save digital video according to enterprise procedures
3. Edit and present digital	3.1 Edit single and multiple video tracks

ELEMENT	PERFORMANCE CRITERIA
video	3.2 Join multiple tracks of digital video 3.3 Apply digital effects to modify and integrate digital video tracks 3.4 Apply time encoding to single and multiple edited digital video tracks 3.5 Insert video track into multimedia production sequence 3.6 Test and combine digital video with other digital imaging, sound and animation to create multimedia sequence 3.7 Save and present multimedia sequence with video to client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Evaluates textual information to establish and confirm job requirements
Oral Communication	<ul style="list-style-type: none"> Uses clear technical terminology to provide information about video to others
Numeracy	<ul style="list-style-type: none"> Uses simple mathematical calculations to verify image quality and image size and to measure frame frequencies and track lengths
Problem Solving	<ul style="list-style-type: none"> Determines requirements and makes routine decisions directly related to completion of tasks
Planning and Organising	<ul style="list-style-type: none"> Plans and implements tasks required to complete jobs according to specifications
Technology	<ul style="list-style-type: none"> Identifies the purposes, functions and features of digital systems and tools used for video recording and editing, and uses them to complete tasks

Unit Mapping Information

Supersedes and is equivalent to ICPDMT346 Incorporate video into multimedia presentations.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for ICPDMT3460 Incorporate video into multimedia presentations

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of the unit, including evidence of the ability to:

- design, compile, edit and present at least two multimedia sequences incorporating video.

In the course of the above the candidate must respond to client requirements and modify video as required.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- factors affecting combining digital videos with other digital imaging, sound and animation in a multimedia sequence
- features and uses of current video software programs
- limiting factors of video production on computers
- methods of obtaining differences of image quality and image size
- data input, processing and output for videos
- process of combining video assets
- process for controlling variations in video frame rates
- process and reason for applying time stamping techniques to video frames.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the area of work.

This includes access to:

- video-editing software
- multimedia output devices
- materials required for construction and editing of sound files.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICPPRP4840 Set up and operate automated workflow

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to operate a digital workflow to check files, manage job tickets, manage colour and prepare files for output.

It applies to individuals who set up and operate an automated workflow to produce a print-ready file.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Pre-Press

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Check job files and perform pre-flight	1.1 Identify job specifications, work health and safety (WHS) requirements and enterprise procedures and check and confirm all details required for the job 1.2 Load files and check all file resources to determine if file is ready for production 1.3 Identify file format and select method of submission according to job specifications 1.4 Embed missing fonts where available and optimise, crop and compress image data as required 1.5 Thicken hairlines to a minimum width according to job specifications 1.6 Assign and down sample layout images as high resolution data

ELEMENT	PERFORMANCE CRITERIA
	1.7 Generate thumbnails for viewing pages
2. Create portable job ticket format processors	2.1 Define parameters for individual elements and steps for all phases of the job 2.2 Sequence all job phases according to workflow and enterprise processes 2.3 Set access levels for operators according to job and manufacturer specifications 2.4 Review and save workflow definition
3. Transform colours	3.1 Check assigned colour libraries for consistency and convert colour names if inconsistency is present 3.2 Convert spot colours to process colours as required 3.3 Identify and select International Colour Consortium (ICC) profile according to job specifications 3.4 Match output colours to colours input using selected International Colour Consortium (ICC) profile 3.5 Set colours for final proof output
4. Set trapping parameters and proof pages	4.1 Use portable job ticket format trapping settings and add additional trapping requirements as required 4.2 View and check traps in file, and modify and remove as required 4.3 View a separation-capable proof to confirm separations will output as required 4.4 Assign imposition plan to the job 4.5 Print form proof from plotter containing all printer marks, and view signature marks for final checking 4.6 Output and check pages on a proofer, making any required changes before client approval
5. Prepare for output	5.1 Output jobs to be imaged to required output media 5.2 Capture and manage data according to enterprise procedures 5.3 Generate information for presetting of cutting and folding machines as required and confirm plug-ins are available 5.4 Export and save Job Definition Format files as required for the print console and output for required output media 5.5 Save and archive job data 5.6 Sign-off documentation according to enterprise procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none">Identifies and evaluates text to establish job requirementsProofreads documents and confirms vocabulary, grammar and consistency of information and clarity of meaning
Writing	<ul style="list-style-type: none">Completes workplace documents using technical and enterprise-specific vocabulary
Oral Communication	<ul style="list-style-type: none">Participates in spoken interactions with clients to confirm and clarify understanding
Self-management	<ul style="list-style-type: none">Follows organisational procedures relevant to own roleTakes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts
Problem Solving	<ul style="list-style-type: none">Uses required communication protocols and conventions to gain client approval
Planning and Organising	<ul style="list-style-type: none">Takes responsibility for planning and organising own workload and assembles required resources
Technology	<ul style="list-style-type: none">Utilises a broad range of features within applications, optimising software functions for specific purposes

Unit Mapping Information

Supersedes and is equivalent to ICPPRP484 Set up and operate automated workflow.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for ICPPRP4840 Set up and operate automated workflow

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of the unit, including evidence of the ability to:

- set up and operate an automated workflow to produce two different print-ready files.

In the course of the above, the candidate must:

- identify and operate a range of software applications according to brief requirements
- communicate with the client and adapt to new information and requirements as required.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- file resource checks during pre-flight
- required file formats
- different submission methods and the selection criteria for different file formats
- the purpose of changing hairline effects
- enterprise workflow process
- enterprise process for sequencing a job
- the importance of the colour space
- International Colour Consortium (ICC) profiles and their use in printing
- trapping
- criteria for checking that separations will output
- enterprise procedures for dealing with CIP3 and CIP4 data
- work health and safety (WHS) requirements for completing changeovers
- manufacturer manuals, work health and safety and enterprise documentation, including their location and purpose.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the area of work.

This includes access to:

- industry software packages for automation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

PSPPCM023 Manage strategic contracts

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPROC607A Manage strategic contracts.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with new standards• All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage contracts for strategic purchases, to effectively minimise risks and achieve value for money to meet an organisation's core objectives. It includes managing the establishment, performance and evaluation of strategic contracts.

This unit applies to those working in roles that involve the acquisition of strategic assets.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently seeking advice as required, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Manage contract establishment	<p>1.1 Discuss and agree upon requirements of contracts and strategic initiatives with all parties.</p> <p>1.2 Assign responsibilities for establishing and carrying out procedures to achieve contract outcomes.</p> <p>1.3 Establish and implement effective communication strategies and processes to assist ongoing communication between internal and external stakeholders and contractors.</p> <p>1.4 Perform relationship management with all levels of personnel involved in procurement and contract management, within probity boundaries.</p> <p>1.5 Establish strategic relationships within probity boundaries to improve procurement capability and performance.</p> <p>1.6 Update risk management plans.</p>
2. Manage contract performance	<p>2.1 Monitor progress of contracts against set targets and performance measures to ensure success of procurement activities.</p> <p>2.2 Take action to rectify performance where set targets, performance measures and probity requirements are not being met.</p> <p>2.3 Provide advice and support to solve problems, make improvements and maintain progress.</p> <p>2.4 Manage disputes promptly according to contractual conditions to achieve resolution and maintain contract performance and progress.</p> <p>2.5 Seek and negotiate opportunities to continuously improve procurement outcomes with contractors.</p> <p>2.6 Provide or gain approvals for contract variations that are negotiated and agreed between the parties.</p> <p>2.7 Provide opportunities for stakeholders and contractors to have input into and receive feedback on progress during the performance of the contract.</p> <p>2.8 Engage internal and external stakeholders as necessary throughout the life of the contract to maintain progress.</p>
3. Manage contract evaluation	<p>3.1 Evaluate contract performance relative to planned performance measures and in consultation with stakeholders and contractors.</p> <p>3.2 Undertake dispute resolution where stakeholders and contractors do not agree.</p> <p>3.3 Detail conclusions against agreed criteria to provide a complete</p>

	<p>picture of performance of contractors, organisation's procurement processes and value for money.</p> <p>3.4 Measure performance of strategic initiatives relative to planned outcomes in consultation with industry and other stakeholders.</p> <p>3.5 Document lessons learnt from evaluations of contracts and strategic initiatives and use to continuously improve future procurement activities.</p> <p>3.6 Advise contractors and stakeholders of evaluation outcomes.</p>
--	---

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC607A Manage strategic contracts.

Assessment Requirements for PSPPCM023 Manage strategic contracts

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- writing complex documents
- managing teams of expert negotiators in functions identifying and resolving strategic contract management issues
- identifying, assessing and implementing opportunities for performance improvement
- manage strategic procurement contracts, contract management plans and sub-plans

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to managing strategic contracts, including environmental purchasing guidance.
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to managing strategic contracts
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- government procurement environment
- implications of particular contracting arrangements
- whole-of-life considerations
- cultural issues relating to contract management and industry development

- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to managing strategic contracts

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

RIICCM202D Identify, locate and protect underground services

Modification History

Release	Comment
1	This unit replaces RIICCM202A Identify, locate and protect underground services.
2	Editorial corrections.
3	Amended Performance Evidence.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to identify, locate and protect underground services in Civil Construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for identify, locate and protect underground services	<p>1.1 Access, interpret and apply underground services documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify, obtain and implement traffic signage requirements</p> <p>1.4 Select, and check for faults, equipment/tools for work activities</p> <p>1.5 Identify and apply environmental protection requirements</p>
---	---

	<p>1.6 Obtain and prepare information for search requirements prior to making contact with the service provider (Dial Before You Dig)</p> <p>1.7 Determine location, alignment direction, level and grade of services and/or utilities from the plans and location details</p>
2. Locate underground services	<p>2.1 Obtain details of services and utilities location from the site owners</p> <p>2.2 Determine emergency numbers, contact details and procedures for types, and owners, of the services/utilities</p> <p>2.3 Contact owners of the services/utilities and confirm plans and location details</p> <p>2.4 Select appropriate plant/equipment, and search for services/utilities on which construction may impact</p> <p>2.5 Use visual or physical means to search for services and/or utilities prior to commencing construction</p> <p>2.6 Move, protect and support services/utilities from the construction process in conjunction with the service/utility owner</p> <p>2.7 Report any damage to services/utilities during activity</p>
3. Conduct housekeeping activities	<p>3.1 Clear work area and dispose of or recycle materials</p> <p>3.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues</p> <p>3.3 Manage/report hazards, and maintain a safe working environment</p> <p>3.4 Process written records</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIICCM202A Identify, locate and protect underground services

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIICCM202D Identify, locate and protect underground services

Modification History

Release	Comment
1	This unit replaces RIICCM202A Identify, locate and protect underground services.
2	Editorial corrections.
3	Amended Performance Evidence.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of the identification, location and protection of underground services including:
 - selecting and using relevant tools and equipment
 - communicating effectively to clarify instructions/information
 - completion of housekeeping activities
- works effectively with others to undertake and complete the identification, location and protection of underground services in a way that meets all of the required outcomes:
 - using a range of communications techniques and equipment
 - complying with written and verbal reporting requirements and procedures
- demonstrates completion of identifying, locating and protecting underground services that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - identifying and locating underground services employing appropriate techniques, plant and equipment to search for services and utilities
 - identifying services and owners of services and utilities

Knowledge Evidence

The candidate must demonstrate knowledge of the following when identifying, locating and protecting underground services:

- accessing, interpreting and applying the organisation and site requirements and procedures for:
 - identifying and reporting on hazards
 - using operational tools and equipment safely and effectively
 - achieving project quality and accuracy
 - using JSA's/JSEA/Safe work methods
 - applying site isolation and traffic control
- planning and organising work activities
- working with civil construction terminology
- identifying types of services/utilities and providers
- using construction principles
- identifying equipment types, characteristics, technical capabilities and limitations
- using safety data sheet and materials handling methods
- carrying out operational, maintenance and basic diagnostic procedures

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIICCM202E Identify, locate and protect underground services

Modification History

This unit replaces RIICCM202D Identify, locate and protect underground services. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application

This unit describes the skills and knowledge required to identify, locate and protect underground services in civil construction.

It applies to those working in operational roles and overseeing construction work. They generally work under supervision and hold some responsibility for identifying, locating and protecting underground services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Civil construction

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to identify, locate and protect underground services	<ul style="list-style-type: none">1.1 Obtain, interpret and confirm work requirements1.2 Access, interpret and apply Australian standards and documentation required for identifying, locating and protecting underground services and confirm work activity is compliant1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies1.4 Identify and adhere to traffic signage requirements1.5 Select equipment and tools required for service locating works and check for faults and report or rectify within scope of own role1.6 Identify and apply environmental protection

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements for task</p> <p>1.7 Obtain and prepare information for search requirements from national referral service prior to making contact with the service provider</p> <p>1.8 Contact, obtain service and utility location details from and identify specific requirements of service and utility owners</p>
<p>2. Identify and locate underground services</p>	<p>2.1 Identify hazards and environmental issues, assess risks, implement control measures and confirm safe working environment</p> <p>2.2 Determine location, alignment direction, level and grade of services and utilities from plans and location details</p> <p>2.3 Comply with specific requirements of service and utility owners</p> <p>2.4 Use visual and physical means to inspect site for services and utilities prior to commencing construction</p> <p>2.5 Use required service locating equipment to detect and determine position of underground services and, in consultation with operator undertaking construction work, which assets are affected by planned works</p> <p>2.6 Mark out positions of underground services and utilities as required</p> <p>2.7 Generate reports of underground service location</p>
<p>3. Protect underground services</p>	<p>3.1 Advise operators undertaking construction of requirements for asset and utility protection according to service and utility owners requirements</p> <p>3.2 Establish clearance distances and isolate work as required according to safety requirements</p> <p>3.3 Move, relocate as necessary, protect and support services and utilities from construction process according to safety requirements and in conjunction with service and utility owners as required</p> <p>3.4 Advise non-destructive and manual excavation as required</p> <p>3.5 Confirm restoration of infrastructure assets and backfilling according to safety, and service and utility owners' requirements, and advise road authority once work is completed as required</p> <p>3.6 Record and report to asset owners and supervisory staff any damage to services and utilities during activity</p>
<p>4. Conduct housekeeping</p>	<p>4.1 Clear work area and dispose of and recycle materials as required</p>

ELEMENT	PERFORMANCE CRITERIA
activities	<p>4.2 Clean, check and maintain condition of equipment, and report issues as required or address within scope of own role</p> <p>4.3 Manage and report hazards as required</p> <p>4.4 Finalise and process written records as required according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Adjusts activities given tolerances of plan details and equipment
Oral communication	<ul style="list-style-type: none"> Verbally acquires details from and reports problems and/or hazards to a supervisor or service and/or utility owner
Reading	<ul style="list-style-type: none"> Identifies and interprets information from at times complex workplace procedures, documentation, legislation and regulations
Self-management	<ul style="list-style-type: none"> Monitors and minimises self-exposure to worksite risks during activities
Writing	<ul style="list-style-type: none"> Records simple and routine information relating to work activities

Unit Mapping Information

Supersedes and is equivalent to RIICCM202D Identify, locate and protect underground services.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIICCM202E Identify, locate and protect underground services

Modification History

This unit replaces RIICCM202D Identify, locate and protect underground services. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify, locate and protect underground services on at least two occasions, including:
 - use electromagnetic locating equipment on at least one occasion to detect conductive underground services.

During the above, the candidate must:

- locate, apply and retain on site access to documentation, policies and procedures required to identify, locate and protect underground services
- implement the requirements, procedures and techniques for completing the identification, location and protection of underground services, including:
 - selecting and using required tools and equipment
 - communicating to clarify instructions and information
 - completing housekeeping activities
- work with others to identify, locate and protect underground services that meets required outcomes, including:
 - using a range of communication techniques and equipment
 - complying with written and verbal reporting requirements and procedures
- employ required techniques, plant and equipment to search for services and utilities
- identify services and owners of services and utilities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key indicators of work quality and accuracy
- processes for planning and organising work activities
- safety data sheets and materials handling methods
- electromagnetic locating and radar based technologies

- job safety analyses (JSAs), job safety environmental analyses (JSEAs), and safe work method statements (SWMSs)
- key risks relating to identifying, locating and protecting underground services, including those associated with:
 - traffic
 - live electrical services
 - confined spaces
 - falls
 - locating near other works in progress
 - manual handling
 - gas
- key policies and procedures, legislation and established requirements for identifying, locating and protecting underground services, including those for:
 - workplace health and safety
 - environmental protection
 - operating and maintaining equipment
 - fault checking and calibrating locating equipment
 - marking underground asset locations
 - waste disposal and recycling
 - site isolation and traffic control
 - excavation and finished surfaces reinstatement
 - obtaining emergency numbers and contact details of service and utility owners
 - obtaining and preparing search requirement information from Dial Before You Dig (DBYD)
 - damage to services and utilities
- key factors affecting work activities described in performance evidence above, including:
 - types of services, utilities and providers
 - working in a road reserve
 - equipment types, characteristics, technical capabilities and limitations
 - asset specific clearance distances
 - non-destructive excavation methods for exposing underground services.

Assessment Conditions

- Mandatory conditions for assessment of this unit are stipulated below. The assessment must:
- include access to:
 - underground service locating equipment
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,

- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous	1	1 Year

Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare for working in confined space	<p>1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant</p> <p>1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure</p> <p>1.3 Obtain, confirm, clarify and apply safety requirements</p>
--	---

	<p>1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements</p> <p>1.5 Confirm the emergency response procedure is with the stand-by person and understood</p> <p>1.6 Identify, obtain and implement signage and barrier requirements</p> <p>1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults</p> <p>1.8 Identify, confirm and apply the environmental protection requirements</p> <p>1.9 Position rescue equipment by the entry permit</p>
2 Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Ensure that the atmosphere is tested and monitored for harmful elements</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space correctly</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3 Exit confined space	<p>3.1 Exit confined space correctly</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined space</p> <p>3.4 Secure access to the confined space</p> <p>3.5 Remove tagging and lock-out</p> <p>3.6 Accurately complete confined space entry permit</p>
4 Clean up	<p>4.1 Clear work area and dispose of or recycle materials</p> <p>4.2 Clean, check, maintain and store tools and equipment</p> <p>4.3 Remove, clean and store barriers and signs</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS202A Entering and working in confined spaces

Assessment Requirements for RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - obtain appropriate entry permit and instructions for performing work in confined space
 - interpreting and applying safe work method statements
 - apply tagging and lock out
 - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
 - entering the confined space
 - using atmospheric monitoring devices prior to entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - remove tagging and lock out

Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS202E Enter and work in confined spaces

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Application

This unit describes the skills and knowledge required to enter and work in confined spaces in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for working in confined space	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to enter and work in confined spaces 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Obtain and confirm authorisation of a confined space entry permit

ELEMENT	PERFORMANCE CRITERIA
	<p>that meets regulatory requirements</p> <p>1.5 Select and wear appropriate personal protective equipment for planned work activities</p> <p>1.6 Obtain and interpret emergency procedures with the stand-by person, and be prepared for emergency situations</p> <p>1.7 Identify, obtain and implement signage and barrier requirements according to workplace procedures</p> <p>1.8 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults to relevant personnel</p> <p>1.9 Position rescue equipment by the entry permit</p>
2. Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Test and monitor the atmosphere for harmful elements according to workplace procedures</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space according to workplace procedures</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3. Exit confined space	<p>3.1 Exit confined space according to workplace procedures</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined spaces according to workplace procedures</p> <p>3.4 Remove tagging and lock-out procedures</p> <p>3.5 Complete confined space entry permit requirements according to workplace procedures</p>
4. Clean up	<p>4.1 Clear work area and dispose of materials according to workplace procedures</p> <p>4.2 Remove, clean and store barriers and signs</p> <p>4.3 Conduct equipment inspections to identify faults according to manufacturer specifications and workplace procedures and report to relevant personnel</p> <p>4.4 Conduct routine operational servicing, lubrication and housekeeping activities according to workplace procedures</p> <p>4.5 Process written maintenance records according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Identifies and interprets information from workplace procedures, documentation and regulations
Writing	<ul style="list-style-type: none">Produces and completes written documents required for workplace procedures
Self-management	<ul style="list-style-type: none">Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	<ul style="list-style-type: none">Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIWHS202D Entering and working in confined spaces.

Links

Companion Volume Implementation Guide is found on VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS202E Enter and work in confined spaces

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- enter and work in confined spaces on at least two occasions, including:
 - obtaining the required entry permit and instructions for performing work in confined spaces
 - interpreting and applying workplace procedures
 - applying tagging and lock out procedures
 - selecting, wearing and caring for personal protective equipment
 - using atmospheric monitoring devices prior to entering the confined space
 - entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - removing tagging and lock out.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for entering and working in confined spaces
- work effectively with others to enter and work in confined spaces in a way that meets all required outcomes

- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation relevant to enter and work in confined spaces
- key policies, procedures and documentation required to enter and work in confined spaces, including:
 - entry and exit procedures, risks and regulations
 - site and equipment safety requirements
 - site isolation and site control responsibilities and authorities
 - safety data sheets
 - incidents and emergency response documentation
- principles and techniques for identifying and responding to:
 - areas that constitute confined spaces
 - types of air contaminants and toxic gases
 - limitations of breathing apparatus
 - relevant hazards and emergencies
- equipment types, characteristics, technical capabilities and limitations
- principles and techniques for using confined space and industry terminology
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to entering and working in confined spaces
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert	

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
	experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to work safely at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Identify work requirements	<p>1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant</p> <p>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards</p>
-------------------------------	--

	<p>1.3 Adhere to WHS requirements</p> <p>1.4 Identify, select and check safety equipment for serviceability</p> <p>1.5 Identify, manage and report potential risks and hazards</p>
2. Identify work procedures and instructions	<p>2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability</p> <p>2.2 Select, wear and care for personal protective equipment</p> <p>2.3 Inspect/install fall protection and perimeter protection equipment</p> <p>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights</p> <p>2.5 Ensure safety system has been installed correctly</p> <p>2.6 Select and install appropriate signs and barricades</p>
3. Access and install equipment	<p>3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted</p> <p>3.2 Ensure all required equipment is installed</p> <p>3.3 Use recommended methods to access work area for people, tools and equipment</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate</p> <p>4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with authorised personnel to ensure safety system is dismantled and removed</p> <p>5.2 Clear work area and dispose of or recycle materials</p> <p>5.3 Clean, check, maintain and store tools and equipment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS204A Working safely at heights

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risk associated with working at heights and implement control methods
 - selecting wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
 - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS204E Work safely at heights

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to work safely at heights in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to work safely at heights 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Inspect worksite to determine layout and physical condition, condition of structures and equipment requirements 1.5 Adhere to legislative requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.6 Select appropriate plant, tools and equipment for the job, inspect them for serviceability and rectify or report any faults prior to commencement of work activities</p> <p>1.7 Select and wear personal protective equipment appropriate for work activities</p> <p>1.8 Obtain and interpret emergency procedures, and be prepared for emergency situations</p>
2. Identify work procedures and instructions	<p>2.1 Consult with relevant personnel to select materials, tools and equipment required for the work activities</p> <p>2.2 Inspect and install fall protection and perimeter protection equipment</p> <p>2.3 Identify methods of moving tools and equipment to the work area according to workplace procedures</p> <p>2.4 Ensure the safety system has been installed according to workplace procedures</p> <p>2.5 Select and install appropriate signs and barricades according to workplace procedures</p>
3. Access and install equipment	<p>3.1 Consult with relevant personnel to ensure anchor fall protection and associated equipment is fitted and adjusted according to workplace procedures</p> <p>3.2 Ensure all required equipment is installed according to workplace procedures</p> <p>3.3 Access work area for people, tools and equipment according to workplace procedures</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe according to workplace procedures</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment according to workplace procedures</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed according to workplace procedures</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate according to workplace procedures</p> <p>4.7 Reassess risk control measures, as required, in accordance with workplace procedures and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with relevant personnel to ensure safety system is dismantled and removed according to workplace procedures</p> <p>5.2 Clear work area and dispose of materials</p>

ELEMENT	PERFORMANCE CRITERIA
	5.3 Clean and maintain the plant and equipment, inspect for ensure serviceability and rectify or report any faults or issues to relevant personnel 5.4 Process written maintenance records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Identifies and interprets information from workplace procedures, documentation and regulations
Self-management	<ul style="list-style-type: none">Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	<ul style="list-style-type: none">Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIWHS204D Working safely at heights.

Assessment Requirements for RIIWHS204E Work safely at heights

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- work safely at heights on at least two occasions, including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risks associated with working at heights and implementing control methods
 - selecting, wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking the correct fitting, adjusting and anchoring of fall protection and associated equipment
 - performing work safely at heights.

During the above, the candidate must:

- locate and apply relevant documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for working safely at heights
- work effectively with others to work safely at heights in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to work safely at heights

- key policies, procedures and documentation required to work safely at heights, including:
 - statutory and regulatory authority requirements
- principles and techniques for work safely at heights, including:
 - heights safety systems
 - safe work methods
- principles and techniques for identifying names and functions of equipment, components and materials
- principles and techniques for complying with equipment manufacturer instructions and specifications
- safe shifting and handling of tools and materials
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to working safely at heights
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment

- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to control traffic with stop-slow bat in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Plan and prepare	<p>1.1 Access, interpret and apply site traffic plan procedures and ensure the work activity is compliant</p> <p>1.2 Obtain, confirm, clarify and apply work instructions</p> <p>1.3 Obtain, confirm, clarify and apply safety requirements</p> <p>1.4 Identify, obtain and implement signage and devices</p> <p>1.5 Select tools and equipment, check for serviceability and rectify or report any faults</p>
---------------------	--

	1.6 Identify, confirm, clarify and apply environmental protection requirements
2. Control traffic	2.1 Position or confirm temporary traffic signs and barriers 2.2 Direct traffic correctly 2.3 Control vehicles and pedestrian traffic and ensure safety 2.4 Monitor traffic, make adjustments for changing conditions and position waiting vehicles for smooth traffic flow 2.5 Use hand held stop/slow bats 2.6 Use visibly clear and unobstructed hand signals 2.7 Report traffic offenders
3. Operate communication devices	3.1 Adjust communication device controls for optimum reception/transmission results 3.2 Transmit messages clearly and concisely 3.3 Maintain communication device power supply 3.4 Check communications contact after nominated period of non-contact
4. Clean up	4.1 Remove or cover signs and devices sequentially to provide warning to motorists during shutdown 4.2 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of controlling traffic with a stop-slow bat that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - reading and interpreting the work instruction and planning work activity accordingly
 - positioning signage and barriers
 - directing and controlling vehicle traffic
 - directing and controlling pedestrian traffic
 - communicating to drivers and pedestrians clearly using hand signals
 - using approved communication devices such as hand held radios or phones to transmit message and report of offenders
 - removing or covering signs after work completion

Knowledge Evidence

The candidate must demonstrate knowledge of controlling traffic with stop-slow bat through:

- site and equipment safety requirements

- traffic controlling requirements and procedures
- complying with traffic management plans
- erecting traffic control signage and barricades
- communication device operations
- determine equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- detailing site isolation and traffic control responsibilities and authorities
- describing the effects of travel speed and vehicle mass on stopping distances
- interpreting and implementing safe work method statement

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal	1	1 Year

Mining, Extractive (Quarrying) and Civil Construction	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWHS205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application

This unit describes the skills and knowledge required to control vehicle and pedestrian traffic using stop-slow bats, hand signals and approved communication devices in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work in teams in live traffic environments under some degree of supervision.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented registered training organisations are advised to contextualise the unit of competency by referring to the existing state/territory OHS legislative requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to control traffic	1.1 Select and wear personal protective equipment required for work activities 1.2 Access, interpret and confirm work instructions and plan work 1.3 Access, interpret and apply required workplace policies, procedures, jurisdictional safety and environmental protection requirements 1.4 Obtain and interpret site emergency procedures and prepare for accidents and emergencies 1.5 Select tools and equipment, check for serviceability, and rectify faults and report according to workplace policies and procedures
2. Control traffic and operate	2.1 Adjust approved communication devices according to site

communication devices	<p>requirements</p> <p>2.2 Direct traffic using hand held stop-slow bat and visibly clear and unobstructed hand signals as required</p> <p>2.3 Monitor traffic, make adjustments for changing traffic conditions and position waiting vehicles as required</p> <p>2.4 Communicate messages to other personnel, confirm recipient understanding and clarify as required</p> <p>2.5 Check and perform maintenance on approved communication devices according to requirements</p> <p>2.6 Check communications contact after nominated period of non-contact</p> <p>2.7 Report traffic offenders according to workplace policies and procedures</p>
3. Conduct housekeeping activities	<p>3.1 Confirm and remove signs and devices in line with job requirements and cover as required</p> <p>3.2 Clean, check and store tools and equipment</p> <p>3.3 Report environmental damage and potential for future damage as required</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Applies basic mathematical problem solving processes, including simple addition, subtraction, multiplication and division
Oral communication	<ul style="list-style-type: none"> Listens to short, explicit instructions for work procedures and asks questions to clarify and confirm
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Technology	<ul style="list-style-type: none"> Identifies purposes, specific functions and key features of common digital systems and tools and operates them as required
Writing	<ul style="list-style-type: none"> Produces and completes workplace reports using appropriate vocabulary, grammatical structures and conventions

Unit Mapping Information

Supersedes and is equivalent to RIIWHS205D Control traffic with stop-slow bat.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWHS205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Control traffic with a stop-slow bat according to traffic guidance schemes in a manner that is safe and follows workplace policies and procedures on at least two occasions, including:
 - directing pedestrian traffic, including at least one of the following:
 - ~ pedestrians with mobility issues
 - ~ pedestrians with prams
 - ~ cyclists
 - using approved communication devices to transmit message and report traffic offenders, including the use of at least one of the following devices:
 - ~ hand held radios
 - ~ telephones.

During the above, the candidate must:

- coordinate operations with pilot vehicle in a shuttle flow work arrangement
- participate in risk assessment and management processes
- identify the type and scope of hazards and their impact and recommend risk control measures
- identify key environmental protection issues and describe required solutions
- locate and complete at least one incident report
- complete housekeeping requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- risk assessment processes and hierarchy of control
- work instructions and procedures for planning work
- jurisdictional safety requirements relevant to temporary traffic management

- environmental protection requirements
- site emergency procedures
- site and equipment safety requirements
- traffic control requirements and procedures for directing the following pedestrian traffic groups:
 - pedestrians with mobility issues
 - pedestrians with prams
 - cyclists
- traffic guidance scheme and traffic management plan compliance
- communication device operations, including:
 - hand held radios
 - telephones
- traffic control equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities
- the effects of travel speed and vehicle mass on stopping distances.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - stop-slow bat
 - personal protective equipment
 - hand held radio or telephone
- be conducted in a safe environment; and
- be assessed in context of this sector's work environment on a real live road setting under supervision; and
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 year
	2	2 years
Drilling, Coal Mining and Extractive (Quarrying), Metalliferous Mining and Civil Construction	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any	

	relevant regulation.
--	----------------------

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit develops a participant's skills and knowledge required to implement a traffic management plan in Civil construction.

This unit is appropriate for those working in supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare to implement traffic management plan	<p>1.1 Access, interpret and apply traffic management documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify, address and report potential risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for the work activity</p>
---	---

	<p>1.5 Identify, obtain and implement traffic control signage and devices</p> <p>1.6 Select, and check for faults, tools and equipment to carry out tasks</p> <p>1.7 Identify, confirm and apply environmental protection requirements</p> <p>1.8 Check the designated traffic controllers' training and qualifications for currency</p> <p>1.9 Advise traffic controllers of the traffic flow requirements</p>
2 Set out the traffic guidance scheme	<p>2.1 Select traffic guidance scheme to suit site conditions, traffic volumes and work activities</p> <p>2.2 Determine and ensure adherence to work schedule, maximum traffic delays, signals and site communications</p> <p>2.3 Ensure signs and devices are correctly positioned on the approaches to the work area</p> <p>2.4 Ensure that signs and devices are positioned and displayed on each approach</p> <p>2.5 Ensure signs and devices are positioned and displayed laterally</p> <p>2.6 Ensure traffic is controlled effectively to protect the work crew</p>
3 Monitor traffic guidance scheme	<p>3.1 Ensure traffic flow is monitored and effectiveness of guidance scheme determined</p> <p>3.2 Monitor work activities and provide guidance to adjust scheme</p> <p>3.3 Apply process for dealing with traffic controllers who fail to adhere to approved procedures</p> <p>3.4 Apply procedures to deal with offending motorists</p>
4 Close down traffic guidance scheme	<p>4.1 Ensure traffic is controlled to protect work crew removing traffic control devices</p> <p>4.2 Ensure signs are removed in sequence to provide maximum warning during removal</p> <p>4.3 Ensure guidance scheme details are recorded and reported as required</p> <p>4.4 Ensure incidents are recorded and reported as required</p>
5 Clean up	<p>5.1 Ensure work area is appropriately cleared</p> <p>5.2 Ensure tools and equipment are cleaned, checked, maintained</p>

	and stored
--	------------

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS302A Implement traffic management plan

Assessment Requirements for RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of implementing traffic management plans that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - complying with State/Territory regulations on three separate live traffic projects, and
 - completing one (1) project controlling site construction vehicles
 - identify and select traffic guidance scheme according to conditions
 - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan

- monitor and adjust scheme according to variances in requirements
- apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence

The candidate must demonstrate knowledge of implementing a traffic management plan through:

- accessing, interpreting and applying legislative, organization and site requirements and procedures for:
 - JSAs/JSEA/Safe work method statement
 - potential hazards and risks
 - controlling traffic
 - basic signalling
 - signs and devices
 - radio operations
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying site isolation and traffic control responsibilities and authorities
- identifying quality requirements
- applying civil construction terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS302E Implement traffic management plans

Modification History

This unit replaces RIIWHS302D Implement traffic management plan. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application

This unit describes the skills and knowledge required to set out, monitor and close down traffic management plans and traffic guidance schemes in civil construction.

It applies to those working in supervisory roles. They generally work in teams in live traffic environments and hold some responsibility for the outcomes of others.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented registered training organisations are advised to contextualise the unit of competency by referring to the existing state/territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to implement traffic management plan	<p>1.1 Determine worksite requirements and scope of traffic management plan and traffic guidance scheme</p> <p>1.2 Identify, address and report potential risks, hazards and environmental issues and determine control measures</p> <p>1.3 Validate suitability of traffic management plan and traffic guidance scheme to site conditions, traffic volumes and work activities and confirm requirements are met</p> <p>1.4 Resource personnel to implement traffic management plan and traffic guidance scheme according to workplace policies and procedures</p> <p>1.5 Confirm required liaison and communication activities are</p>

	<p>carried out according to instructions</p> <p>1.6 Provide traffic guidance scheme implementation instructions to traffic control personnel and clarify and confirm recipient understanding as required</p>
2. Set out traffic guidance scheme	<p>2.1 Check required signs and devices are positioned and installed according to traffic guidance scheme</p> <p>2.2 Inspect traffic guidance scheme and authorise roadwork crew to proceed with work activities</p> <p>2.3 Confirm roadwork crew are protected from work site hazards</p>
3. Monitor traffic guidance scheme	<p>3.1 Confirm traffic flow is being monitored by required personnel according to traffic guidance scheme</p> <p>3.2 Apply adjustments to traffic guidance scheme as necessary to maintain required traffic flow and according to own job role</p> <p>3.3 Monitor work activities and apply required measures to mitigate and address roadwork crew and road user non-conformance</p> <p>3.4 Apply workplace policies and procedures to address offending road users as required</p>
4. Close down work activities	<p>4.1 Direct covering and required removal of equipment, signs and devices according to traffic guidance scheme</p> <p>4.2 Confirm tools and equipment are cleaned, checked, maintained and stored according to workplace policies and procedures</p> <p>4.3 Finalise traffic work zone close-down and complete required reporting</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Applies basic mathematical problem solving processes, including simple addition, subtraction, multiplication and division
Oral communication	<ul style="list-style-type: none"> Presents information and provides assistance using industry specific vocabulary Uses listening and questioning to clarify and confirm understanding
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations

Writing	<ul style="list-style-type: none">• Produces and completes workplace reports, including risk management matrices, using appropriate vocabulary, grammatical structures and conventions
---------	--

Unit Mapping Information

Supersedes and is equivalent to RIIWHS302D Implement traffic management plan.

Assessment Requirements for RIIWHS302E Implement traffic management plans

Modification History

This unit replaces RIIWHS302D Implement traffic management plan. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement traffic management plans in a manner that is safe and follows workplace policies and procedures on at least three separate live traffic projects, including:
 - completing at least two of the following:
 - ~ lane closure
 - ~ lateral shift
 - ~ implementing a traffic management plan at an intersection
 - completing at least one project controlling site construction vehicles.

During the above, the candidate must:

- locate and apply required legislations, documentation, policies and procedures including documentation required for worksite projects and required traffic management
- work with traffic control personnel to implement and complete a traffic management plan and traffic guidance scheme that meets all required outcomes including:
 - confirming all necessary resources are available, including qualified personnel
 - confirming all personnel understand, and are able to implement, their roles, task requirements, safety requirements and reporting requirements
 - communicating with others to resolve resourcing and coordination requirements prior to and during work activities
 - confirming that unattended sites and shut-down procedures are completed according to traffic management plan and traffic guidance scheme
 - complying with written and verbal reporting requirements and procedures, including reporting offending road users.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- required legislation, regulations, codes and procedures including Austroads Codes of Practice and WHS applicable to temporary traffic management

- temporary traffic management principles
- risk management principles and procedures for identifying, analysing and treating potential hazards and risks
- key principles for implementing WHS, including the role of Job Safety Analysis, Job Safety and Environmental Analysis and Safe Work Method statements.
- scope of authority to modify traffic management plan and traffic guidance scheme
- basic signalling procedures for temporary traffic management
- procedures for selecting, using and placing signs and devices, including sequences of installation and removal and provisions for unattended sites
- radio operations procedures and protocols
- equipment types, characteristics, technical capabilities and limitations, including for required specialist and externally-sourced equipment
- site isolation, traffic control and emergency responsibilities and authorities.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - traffic management plan
 - traffic guidance scheme
 - personal protective equipment
 - devices, equipment and signs specified in the performance criteria
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment on a real live road setting under supervision; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided

- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

SIRXCEG006 Provide online customer service

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to interact with customers using online communication tools. It requires the ability to provide information to customers, handle customer difficulties, and provide customer service and support in an online environment.

It applies to individuals who interact with customers online in a diverse range of businesses with an online presence. They operate with some independence, under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Customer Engagement

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Communicate with customers online.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Use digital communication tools to communicate with customers online according to organisational online customer

service standards and procedures.

1.2. Communicate with customers online using appropriate communication styles and within designated response times.

1.3. Use correct spelling and grammar when communicating with customers in written form.

1.4. Identify and take opportunities to improve customer experience within scope of own responsibility.

1.5. Promote customer loyalty and repeat business when communicating with customers online.

1.6. Request referrals, ratings and user-generated content from customers.

1.7. Monitor customer demand for products and services and inform relevant personnel to ensure customer needs are met.

1.8. Record customer interactions and feedback according to organisational policies and procedures.

1.9. Make suggestions for improved customer service standards and procedures to relevant personnel.

2. Respond to customer difficulties online.

2.1. Identify customer difficulties and provide required support.

2.2. Identify customer dissatisfaction and take action to avoid escalation.

2.3. Follow organisational online customer service standards and procedures to respond to customer complaints.

2.4. Refer complex customer complaints to relevant personnel for action.

2.5. Maintain a professional manner during online customer interactions.

2.6. Identify consistent and potential customer difficulties and report to relevant personnel to minimise future customer dissatisfaction.

3. Process online refunds and exchanges.

3.1. Identify reasons for refunds and exchanges, and offer a replacement or alternative product or solution to maximise sales opportunities.

3.2. Process online refunds and exchanges according to organisational policies and procedures.

Foundation Skills

FOUNDATION SKILLS

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Self-management skills to:	<ul style="list-style-type: none">• maintain professionalism in difficult situations related to customer complaints.
Technology skills to:	<ul style="list-style-type: none">• use online technology and tools to communicate with customers.

Unit Mapping Information

No equivalent unit

Assessment Requirements for SIRXCEG006 Provide online customer service

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify customer requirements and provide online customer service to address requirements, across four different online customer interactions
- provide service to the above customers following organisational online customer service standards and procedures
- follow organisational customer service standards and procedures to:
 - resolve a customer complaint
 - resolve a customer difficulty
 - process an online refund
 - process an online exchange
- make suggestions for improved online customer service standards and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key legal and ethical considerations as related to online customer service provision:
 - Australian Consumer Law
 - privacy
- organisational policies and procedures:
 - processing refunds and exchanges online
 - recording customer information
- organisational online customer service standards:
 - response times
 - communication styles
 - handling customer complaints
 - reporting customer services issues
- key aspects of online communication:
 - written communication techniques
 - appropriate communication styles

- role and use of tone in written communication
- maintaining brand integrity
- common causes of customer complaints and difficulties in an online environment
- online customer service provision and techniques for:
 - identifying customer dissatisfaction
 - handling customer complaints
 - handling customer difficulties
 - generating customer loyalty
 - building rapport with customers
 - seeking referrals and user generated content
- role and impact of customer feedback in an online environment:
 - positive feedback
 - negative feedback
- commercial impact of:
 - unresolved customer complaints
 - customer dissatisfaction
 - refunds and exchanges.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures:
 - processing refunds and exchanges online
 - recording customer information
 - organisational online customer service standards:
 - response times
 - communication styles
 - handling customer complaints
 - reporting customer service issues
- information technology hardware and software
- online communication tools
- online information systems
- online customers with whom the individual can interact. These can be:
 - individuals in an industry workplace, or

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage the use of social media platforms to interact with customers and promote products and services.

It applies to individuals working in customer service management roles in a diverse range of industry sectors and business contexts that have a social media presence. They operate independently with some responsibility for decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Marketing

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Prepare to use social media.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Review organisational social media requirements and policies and procedures.
- 1.2. Research various social media platforms, and identify and compare their audience, functionality and reach.

- 1.3. Research emerging trends in social media platform use.
- 1.4. Select social media platforms that meet brand needs and reach target customer.
- 1.5. Source information and content from internal and external sources for use on social media platforms
- 1.6. Develop content in line with target audience, brand cultures and social media requirements as required.
- 1.7. Source or create a social media calendar.
2. Use social media to enhance customer engagement.
 - 2.1. Create opportunities to attract and promote user-generated content.
 - 2.2. Respond to customers in a timely manner, directing them to relevant information as required.
 - 2.3. Identify potential brand damage, and take action to prevent escalation.
 - 2.4. Promptly respond to customer complaints and issues according to social media policies and procedures.
 - 2.5. Adhere to legal and ethical practices for social media use.
3. Promote products and services.
 - 3.1. Identify social media marketing opportunities and curate and post content to promote products and services.
 - 3.2. Use social media to promote special offers, events and promotions as required.
 - 3.3. Post content according to social media policies and procedures.
4. Review social media use.
 - 4.1. Track social media activity using monitoring tools.
 - 4.2. Identify opportunities to improve customer experience, and recommend to relevant personnel.
 - 4.3. Update the look and feel of the social media account to maximise effectiveness.
 - 4.4. Report on social media engagement and reach to relevant personnel.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

- Reading skills to:
- interpret technical terminology relevant to the use of social media platforms.

- Writing skills to:
- use correct spelling and grammar in social media posts.
- Technology skills to:
- upload images, text files, PDF files, audio files, video files and link associated files
 - import and export software functions
 - conduct online research for appropriate content
 - compare social media platform functionality.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research four social media platforms and select two platforms for use, appropriate to business needs and target customer
- use the above two social media platforms to engage the customer by:
 - curating and posting written and visual content appropriate to the target customer
 - promote one organisational marketing activity
 - respond to two of the following types of customer social media posts:
 - customer reviews
 - user generated content
 - questions
 - complaints
 - troll
- review effectiveness of social media platform across a one month period by:
 - reporting on social media activity
 - making at least one recommendation for continuous improvement of social media use.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for social media use
- rules and regulations and terms of use of specific social media platforms:
 - privacy
 - spamming
 - copyright
 - creative commons
- social media trends:
 - trending platforms
 - consumer behaviour
 - trending content

- various social media platforms:
 - demographic of primary users
 - key features and uses
 - integration into business activity
 - useability
 - privacy and security features
 - costs
- legal and ethical practices for use of social media:
 - responsible use of platforms
 - responsible marketing practices
 - fair competition guidelines
 - duty of care
 - bullying and harassment policy
- types of social media users and their impacts:
 - troll
 - angry customer
 - misguided customer
 - unhappy customer
 - complimentary customers
 - brand advocates
- techniques for:
 - marketing the business using social media platforms:
 - promoting products
 - promoting special events
 - creating brand awareness
 - responding to customer posts on social media:
 - customer reviews
 - user generated content
 - questions
 - complaints
 - troll
- social media tools, and their use, for:
 - monitoring
 - scheduling social media content
 - capturing engagement and reach data
- commercial impact of social media platform both favourable and unfavourable:
 - importance of consumer reviews and user generated content
 - value of building a community of advocates on a social media platform
 - types of crisis issues or conflicts that can arise on social media locally, nationally and internationally

- sources and types of social media content:
 - product information
 - images and photos
 - links to other websites
 - videos
 - text and graphics
 - current trends
 - Internet.

Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for social media use
 - legal and ethical use of social media
- social media content calendar that details:
 - key events and promotions
 - milestones and relevant dates
 - content for release
- files for use across social media platforms:
 - image files
 - text files
 - PDF files
 - audio files
 - video files
 - link associated files
- computer or mobile device with Internet access
- social media monitoring tools
- social media platforms
- customer postings on social media platforms
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition

- 1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
- 1.2 Attachments are checked to ensure appropriate adjustment and operation
- 1.3 Mirrors and seats are adjusted for safe operation by driver
- 1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements

2 Drive forklift

- 2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
- 2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
- 2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
- 2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures

3 Operate forklift to handle loads

- 3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
- 3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures

4 Monitor site conditions

- 4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
- 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

5 Monitor and maintain forklift performance

- 5.1 Performance and efficiency of vehicle operation is monitored during use
- 5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
- 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

UEPOPS423 Plan a scheduled outage

Modification History

Release 1. This is the first release of this unit of competency in the UEP Generation Training Package.

Application

This unit involves the skills and knowledge required to plan for a scheduled outage of power generating plant.

A schedule is a plan of action detailing a series of tasks to be undertaken at or during a specified time. A forced outage is the shutdown of generation facility, transmission or distribution line when a generating unit is unavailable to produce power due to an unexpected breakdown.

Competency in this unit requires the ability to identify outage requirements, create outage plans, implement outage plans and complete documentation. Individuals will, in general, work as an operator with responsibility for quality control, in a power generation facility.

Power generation plant operators are typically trained and authorised to isolate, prepare plant and issue permits to work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Note: Workplace practice

The application of the skills and knowledge described in this unit may require a licence or training permit to practice in the workplace where work is carried out on gas and electrical installations. Additional conditions may apply under state and territory legislative and regulatory licensing requirements.

Pre-requisite Unit

There are no prerequisite units.

Competency Field

Operations

Unit Sector

Electricity generation

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify outage requirements

- 1.1 Outage requirements are identified from work orders and is clarified with the appropriate personnel or site inspection, in accordance with workplace procedures
- 1.2 Safety issues are identified, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and legislative requirements, industry standards and workplace procedures
- 1.3 Date, time and expected duration of outage is assessed and confirmed from relevant information and statistical records in accordance with workplace procedures
- 1.4 Schematic diagrams, drawings, plans or maps are consulted to determine area affected by outage, in accordance with workplace procedures

2 Create outage plan

- 2.1 Impact of outage is ascertained, in accordance with workplace procedures
- 2.2 Key stakeholders and/or equipment affected by outage are identified, in accordance with workplace procedures
- 2.3 Status of plant and consumers affected by outage is identified and assessed, in accordance with workplace procedures
- 2.4 Key stakeholders are consulted to determine timetable and contingency plan, in accordance with workplace procedures
- 2.5 Disruptions to key consumers are minimised, in accordance with workplace procedures, by providing alternative routes of power generation supply
- 2.6 Scope of work to be carried out during outage is evaluated against allocated timeframes, in accordance with workplace procedures
- 2.7 Work permits required prior to and during outage are obtained, in accordance with workplace procedures

- | | |
|---------------------------------|---|
| 3 Implement outage plan | 3.1 Work crews are notified of outage plan through the appropriate channels, in accordance with workplace procedures |
| | 3.2 Notification of outage is communicated to all stakeholders, in accordance with workplace procedures |
| 4 Complete documentation | 4.1 Records are maintained, in accordance with workplace procedures |
| | 4.2 Documentation is updated, in accordance with workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UEPOPS423B Plan a scheduled outage.

Links

Assessment Requirements for UEPOPS423 Plan a scheduled outage

Modification History

Release 1. This is the first release of this unit of competency in the UEP Generation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and includes:

- advising and communicating with key stakeholders
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including:
 - emergency procedures
 - risk control measures
 - safe working practices
- communicating with personnel
- creating outage plans
- identifying outage requirements
- implementing legislation, industry standards, codes of practice and regulations
- interpreting manufacturers' specifications and manuals
- investigating implications of outage
- planning outage work
- recognising power generation plant status
- using documenting and recording procedures
- working with permit to work system

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- communication and liaison techniques
- legislation, industry standards, codes of practices and regulations
- manufacturers' specifications and manuals
- outages and potential impact
- permit to work system

- power generation plant and equipment, its location and operating parameters
- power generation plant status
- scheduling methods and tools
- stakeholders
- types of schedules
- typical arrangements of power generation plant
- WHS/OHS policy and procedures including:
 - emergency procedures
 - risk control measures
 - safe working practices
- workplace documentation
- workplace policies and procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

UETDREL006 Work safely in the vicinity of live electrical apparatus as a non-electrical worker

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Application

This unit involves the skills and knowledge required to work safely in the vicinity of live electrical apparatus as a non-electrical worker.

It includes compliance with safe approach distances for the worker, plant, tools and equipment.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace.

Other conditions may also apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Entry Level Cross Discipline

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to work safely in the vicinity of live electrical apparatus

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Legislation, regulations, standards, codes of practice and organisational workplace requirements for the work to be performed are referred to and confirmed

- 1.2 Work plan is obtained and confirmed in accordance with workplace requirements
 - 1.3 Materials required for work are determined and obtained in accordance with work plan and workplace requirements
 - 1.4 Plant, tools, equipment and personal protective equipment (PPE) required for work are determined, obtained and confirmed in working order
 - 1.5 Hazards are identified, risks assessed and control measures identified and applied
 - 1.6 Work permits are received and signed in accordance with workplace requirements
 - 1.7 Safety observer role and responsibilities are discussed and confirmed in accordance with workplace requirements
 - 1.8 Communication method between the workers and safety observer is determined and confirmed in accordance with workplace requirements
 - 1.9 Worksite is prepared in accordance with the work plan and workplace requirements
 - 1.10 Electricity infrastructure assets and associated voltages are identified and confirmed
 - 1.11 Safe approach distances for the work to be performed are determined and confirmed in accordance with workplace requirements
- 2 Work safely in the vicinity of live electrical apparatus**
- 2.1 Legislation, regulations, standards, codes of practice and organisational workplace requirements for the work to be performed are applied and monitored
 - 2.2 Lifting, working at heights and the use of plant, tools, equipment and PPE are carried out in accordance with workplace requirements
 - 2.3 Hazard control measures are monitored in accordance with workplace requirements
 - 2.4 Safety observer is positioned to observe the work in accordance with workplace requirements

- | | | |
|--|------------|--|
| | 2.5 | Communication methods between workers and safety observer are used in accordance with workplace requirements |
| | 2.6 | Safe approach distances are maintained when the work is being performed |
| | 2.7 | Incidents or unplanned events are responded to in accordance with workplace requirements |
| 3 Complete work and documentation | 3.1 | Incidents or unplanned events are reported in accordance with workplace requirements |
| | 3.2 | Work permits are signed off in accordance workplace requirements |
| | 3.3 | Works records, reports and documentation are completed, and appropriate personnel notified in accordance with workplace requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=229bace1-b7bc-4653-9300-dffb13ecfad7>

Assessment Requirements for UETDREL006 Work safely in the vicinity of live electrical apparatus as a non-electrical worker

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, regulations, standards, codes of practice and organisational workplace requirements, including:
 - work health and safety (WHS)/occupational health and safety (OHS)
- identifying hazards, assessing risks, identifying, applying and monitoring control measures
- obtaining, inspecting and using relevant personal protective equipment (PPE)
- determining communication method with safety observer
- confirming safety observer is in position in accordance with workplace requirements
- confirming and maintaining the safe approach distance, including:
 - mobile plant, tools and equipment
 - personal
- determining electricity network voltages, including:
 - low voltage (LV)
 - high voltages (HV)
- identifying electricity network assets
- obtaining and signing on and off relevant work permits in accordance with workplace requirements
- dealing with an unplanned event on at least one (1) occasion
- completing relevant work records, reports and documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant legislation, regulations, standards, codes of practice and organisational workplace requirements, including:
 - WHS/OHS
 - safe approach distances

- emergency procedures
- hazard, risk assessment and risk control requirements, including potential hazards
- types and application of PPE
- safe use of plant, tools and equipment, including:
 - earthing of mobile plant
- application, purpose and types of work permits
- events constituting an unplanned event or incident
- procedures for responding to an unplanned event or incident
- safety observer:
 - role and responsibilities
 - communication methods
- basic electrical principles, including:
 - voltage, current and resistance
 - typical effects of current, including physiological effects and induced voltages
 - consequences of short circuits, including arc flash and touch and step potentials
- electricity networks, including:
 - LV
 - HV
 - earthing systems
 - associated assets
 - asset identification
 - layouts and configuration
 - basic protection
 - relationship between an overhead and underground supply system
- terminology related to working safely in the vicinity of live electrical apparatus.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations, where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry

- applicable documentation, including workplace requirements, equipment specifications, regulations, codes of practice and operation manuals.

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=229bace1-b7bc-4653-9300-dffb13ecfad7>

UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers compliance with working safely up to the defined “safe approach distance” near energised electrical apparatus (inc. electrical powerlines) for non-electrical workers. It includes work functions that may be performed, such as vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker. Also included is the preparation of risk assessment control measures that encompass job safety assessment. It does not include any work that is or may be performed by other competent operatives within the defined “safe working zone”. The defined “safe working zone” is that so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical and Mechanical Apparatus.

Application of the Unit

Application of the Unit 2)

This competency standards unit shall apply to Transmission, Distribution, Rail Traction, Telecommunications and Vegetation Management Control industry sectors.

Licensing/Regulatory Information

License to practice 3)

The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, industrial relations, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

Pre-Requisites

Prerequisite Unit(s) 4)

Competencies 4.1)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed plus all the competencies in one (1) of the identified Pathway Unit Group(s):

There are no prerequisite competencies to this unit.

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 "Literacy and Numeracy".

Reading 3 Writing 3 Numeracy 3

Employability Skills Information

Employability Skills 5)

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit
Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare to work safely near live electrical apparatus as non-electrical worker	<p>1.1 Instructions related to the work to be performed safely near live electrical apparatus as non-electrical worker are received and confirmed.</p> <p>1.2 Relevant requirements and established procedures to be followed and, relevant personnel to be communicated with for the work to be performed are identified.</p> <p>1.3 OHS policies and procedures to be followed for the work to be performed are received and confirmed.</p> <p>1.4 Suggestions to assist in meeting the safety requirements for working near live electrical apparatus as a non-electrical worker are made to others involved in the work.</p> <p>1.5 Hazards are identified, OHS risks assessed and control measures are prioritised, implemented and monitored including emergency exits kept</p>

ELEMENT

PERFORMANCE CRITERIA

clear according to established procedures.

- | | |
|------|--|
| 1.6 | Scope of responsibility and process of relevant work permit(s) issue is identified, received and confirmed according to requirements and established procedures. |
| 1.7 | Relevant responsibility associated with First Aid, Safety Observers and/or other related work safety procedures at the worksite are identified in accordance with requirements and established procedures to ensure safety measures are followed in the instance of an incident. |
| 1.8 | Processes for identifying and reporting client issues to appropriate personnel in accordance with industry/acceptable /community standards are identified. |
| 1.9 | Site and the work schedule to be prepared are confirmed according to given instructions for a quality outcome and to minimise risk and damage to property, commerce, stock and individuals in accordance and established procedures. |
| 1.10 | Electricity infrastructure assets, related voltages and requirements for working safely near live electrical apparatus as non-electrical worker are identified. |
| 1.11 | Safe approach distances including any zones thereof that may apply, as defined in industry guidelines, requirements and/or established procedures for the intended work are confirmed. |
| 2 | Carry out the work safely near live electrical apparatus as non-electrical worker. |
| 2.1 | OHS principles and practices to reduce the incidents of accidents are identified in accordance with given instructions, requirements and/or established procedures. |
| 2.2 | Working safely and complying with all safety requirements for working near live electrical apparatus as a non-electrical worker are followed in accordance with given instructions and |

ELEMENT	PERFORMANCE CRITERIA
	established routines/procedures.
	2.3 Processes for monitoring and reporting/referring hazards and OHS risks to the immediate authorised personnel for directions according to established procedures are followed.
	2.4 Non-routine events are referred to the immediate authorised personnel for directions according to established procedures.
	2.5 Unexpected events associated with working safely near live electrical apparatus as a non-electrical worker are responded to using acquired known solutions and skills related to routine procedures to ensure work instructions and established procedures are met.
3 Complete the work safely near live electrical apparatus as non-electrical worker.	3.1 Work schedule and anomalies for completion and checking of the work are reported to authorised personnel in accordance with established procedures.
	3.2 Processes for reporting to authorised personnel accidents and/or incidents are confirmed in accordance with established procedures.
	3.3 Requirements for returning work permit(s) and/or access authorisation permits are confirmed.
	3.4 Appropriate personnel are notified of work completion according to established procedures.
	3.5 Works completion records, report forms/data sheets are completed accurately in accordance with given instructions and established procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential

REQUIRED SKILLS AND KNOWLEDGE

skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of working safely near live electrical apparatus as non electrical worker.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TEL14A Power Line Safety – Non Electrical Workers

Evidence shall show an understanding of power line safety – non electrical workers to an extent indicated by the following aspects:

T1 Basic electrical principles encompassing:

- Fundamental units - basic measurement of units
- Electrical characteristics of material: characteristics of solid materials, insulators; terms electrical charge, electrical current, electromagnetic forces
- Nature of electrical current and change - basic rules of electrical current flow
- Sources of Electricity: basic fundamentals of alternating current, direct current and single EMF source (induction)
- A simple circuit - circuit protection devices used on the network, effects of an open circuit, a closed circuit and a short circuit and earthing – using the ground as a form of conductor to return current back to a source
- Resistance - relationship between voltage and current and resistance (Ohms Law)
- Effects of current - physiological effects and protection for physiological effects; basic principle by which electrical current can result in the production of heat, light and electromagnetic fields and typical effects of current.
- Three phase and single phase power systems: star delta configurations, three phase star connections, relationship between line and phase voltages, three phase 4 wire systems - purpose of the neutral
- Consequences of short circuits - arc flash, ESI Protection schemes
- Magnetism - magnetic field patterns, concepts of electromagnetism, effects of electromagnetism and magnetic fields around straight conductors
- Hazards encountered in an ESI environment - touch and step potentials, electric shock, fire, chemicals, falls, safe use of tools and equipment.

T2 Transmission, distribution and rail power systems encompassing:

- Relationship between the transmission, distribution and rail/tram system within an overall power system - different organisations responsible for generation, transmission, distribution and rail/tram and, how they correlate and their functions
- Characteristics of a transmission, a distribution and a rail system - principal components, typical voltage levels and methods of transmission and distribution including grid type transmission systems, radial, parallel and ring main feeders
- Relationship between an overhead and underground supply systems within an overall power system - advantages/disadvantages, applications.
- Single line drawings and layouts - drawings and layouts of transmission and distribution systems including, radial, parallel and ring main feeders and the HV

REQUIRED SKILLS AND KNOWLEDGE

equipment associated with substations

T3 Fundamentals for working safely near live electrical apparatus for non-electrical worker encompassing:

- Standards, guidelines/codes of practice, State/Territory/local government legislation, supply authority regulations and or enterprise requirements including relevant certification and licensing, applicable to working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker
- Definitions of terminologies - ‘safe working zone’, ‘risk assessment’, ‘safe approach distances zones’, ‘safe working distances’, ‘work permits’, access authorisation permits’, ‘Technical standards’, ‘isolation procedures’ and compliance requirements’
- OHS policies and procedures for working safely - duties of a safety observer, permit to work systems and isolation procedures, safe application of different types of tools and equipment and operation of mobile plant and machinery (e.g. EWP) near live electrical apparatus
- Techniques and precautions in undertaking different work functions and working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker (work functions that may be performed include, vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely near live electrical apparatus by a non-electrical worker)

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment 9.1)

Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment

intervention. It is the Industry's preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with Industry and, Regulatory policy in this regard.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be 'rich' in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit 9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated on at least two occasions in accordance with the "Assessment Guidelines – UET12". Evidence shall also comprise:

- A representative body of Performance Criteria demonstrated within the timeframes typically expected of the discipline,

work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:

- Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
- Apply sustainable energy principles and practices as specified in the Performance Criteria and range; and
- Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner's performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and
- Demonstrate an appropriate level of employability skills; and
- Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and
- Demonstrated performance across a representative range of contexts from the prescribed items below:

Range of tools/equipment/materials/procedures/workplaces/other variables		
Group No	The minimum number of items on which skill is to be demonstrated	Item List
A	All of the following:	Confirmation of the "safe working zone" for Safe work and access near live Electrical Apparatus Identification of the relevant technical standards. Acts, regulations and codes/guidelines Identification of established (Enterprise) procedures
B	All of the following:	Confirmation of the principles of electricity,

		<p>the three phase power system, electric shock and resuscitation, power system</p> <p>Recognition of aerial voltage systems</p> <p>Identification of Low Voltage Aerial Circuits</p> <p>Identification of High Voltage</p>
C	All of the following:	<p>Procedures in the event of an incident</p> <p>Events constituting an incident</p> <p>Procedures for responding to incidents</p> <p>Hazard and risk assessment procedure</p> <p>Conduct Work-site Hazard Assessment</p> <p>Confirmation of essential components of Hazard Assessment Checks</p> <p>Applying Hazard Identification in Electrical Work</p> <p>Confirmation of the Basic Safety Principles for Work on Electrical works</p> <p>Hazard Identification and Risk Assessment</p> <p>Hazard Control</p> <p>Risk Assessment and Management (JSAs) Control</p> <p>The Hierarchy of Controls including Evaluation, Worksite Hazard and Risk</p>

		Assessment Checklist, Pre-job Hazard Assessment Check (HAC) Items, Planned Inspection and Pre-Work Hazard Risk Assessment Form
D	All of the following:	Use of work permits and/or authorisation permits Sustainable energy principles and practices Possible affects of weather conditions on working near electrical apparatus as a non-electrical worker
E	At least one occasion	Dealing with an unplanned event by drawing on essential knowledge and associated skills to provide appropriate solutions incorporated in the holistic assessment with the above listed items.

Context of and specific resources for assessment 9.3)

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual work near live electrical apparatus

In addition to the resources listed above, in context of and specific resources for assessment, evidence should show demonstrated

competency working below ground, in limited spaces, with different structural/construction types and method and in a variety of environments.

Method of assessment

9.4)

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units

9.5)

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to safe working so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical Apparatus.

Work functions that may be performed, such as vegetation control, operation of cranes, elevating work platforms, excavators, concrete pumps etc, scaffolding,

RANGE STATEMENT

rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker/

Working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker including an understanding of risk assessment control measures that encompass job safety assessment but excluding any work that is or may be performed by other competent operatives within the defined “safe working zone”.

Safe use of plant, equipment and tools within electrical environments including but not limited by the electricity supply infrastructure assets, infrastructure constructions and excavations including an understanding of safe approach distances zones/Safe Working Clearance, work permit(s) and/or access authorisation permits, technical standards and Industry Guidelines, rural applications, road construction, pavements and effect of inclement weather

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

- Appropriate and relevant persons
- Appropriate authorities
- Assessing risk
- Authorisation
- Drawings and specifications
- Emergency
- Established procedures
- Hazards
- Identifying hazards
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
- Work clearance systems

Unit Sector(s)

Not applicable.

Competency Field

Competency Field 11)

Entry Level – Cross Discipline Units.

ICT Information and Communications Technology

ICTSS00077 Telecommunications Linesworker Copper Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to install copper telecommunications cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT20219 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL211 Install an above ground equipment enclosure

ICTCBL249 Haul underground cable for installation and maintenance work

ICTCBL250 Haul and fix aerial cable

ICTCBL253 Construct underground telecommunications infrastructure

ICTCBL320 Jumper metallic conductor cable in the access network

ICTPMG201 Prepare site for support installation

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of copper telecommunications cable.

ICTSS00078 Telecommunications Linesworker Fibre Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to install telecommunications optical fibre cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT20519 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL249 Haul underground cable for installation and maintenance work

ICTCBL211 Install an above ground equipment enclosure

ICTCBL250 Haul and fix aerial cable

ICTCBL253 Construct underground telecommunications infrastructure

ICTPMG201 Prepare site for support installation

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

ICTTEN318 Inspect, clean and handle optical fibre cable and connectors

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of telecommunications optical fibre cable.

ICTSS00080 Copper Cable Joiner Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to joint copper telecommunications cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL254 Joint metallic conductor cable in access network

ICTCBL326 Cut over metallic conductor cable in the access network

ICTCBL319 Rearrange large size copper cable

ICTCBL336 Install and cut over metallic conductor cable to access network cabinet

ICTTEN312 Install telecommunications network equipment

ICTTEN313 Work on and resolve recurrent network faults

Target Group

This skill set is for telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the jointing of copper telecommunications cable.

ICTSS00083 Underground Installations Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to install underground telecommunications cable. This Skill Set includes the requirements for the underground specialisation units for ACMA. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards:

ICT20219 Certificate II in Telecommunications Network Build and Operation

ICT30419 Certificate III in Telecommunications Network Build and Operation

ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL329 Install underground cable for communications applications

ICTCBL334 Install underground enclosures and conduit

Target Group

This skill set is for telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements to install underground telecommunications cable within the ACMA Regulatory framework for Customer Premises.

ICTSS00084 Basic Open Cabler Registration Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to install, maintain and modify telecommunications customer cabling in domestic and commercial premises in accordance with Australian Communications and Media Authority (ACMA) requirements.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL247 Install, maintain and modify customer premises communications cabling:
ACMA Open Rule

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

Target Group

This skill set is for new or existing workers in the telecommunications industry who wish to be employed as open registered cablers in accordance with ACMA requirements.

Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority training requirements for open cabling registration.

ICTSS00085 Basic Restricted Cabler Registration Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to perform a restricted range of residential and small business cabling work in accordance with Australian Communications and Media Authority (ACMA) requirements.

Pathways Information

This skill set provides credit towards ICT20319 Certificate II in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL246 Install, maintain and modify customer premises communications cabling:
ACMA Restricted Rule

ICTCMP203 Perform restricted customer premises broadband cabling work: ACMA
Restricted Rule

ICTTEN202 Use hand and power tools

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTWHS204 Follow work health and safety and environmental policy and procedures

Target Group

This skill set is for new or existing workers in the telecommunications industry who wish to be employed as restricted registered cablers in accordance with ACMA requirements.

Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority training requirements for restricted cabling registration.

ICTSS00086 ACMA Advanced Cabler Registration Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set covers the additional training required for an open registered cabler to install, maintain, test and certify copper, fibre and coaxial installations in customer premises in accordance with Australian Communications and Media Authority (ACMA) requirements.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL247 Install, maintain and modify customer premises communications cabling:
ACMA Open Rule

ICTCBL301 Install, terminate and certify structured cabling installation

ICTCBL303 Install and terminate coaxial cable

ICTCBL322 Install, test and terminate optical fibre cable on customer premises

ICTCBL323 Test cables and systems on customer premises

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTWHS204 Follow work health and safety and environmental policy and procedures

Target Group

This skill set is for ACMA open registered cabling technicians who need additional training to carry out specialist work.

Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority requirements for mandatory specialist cabling endorsement of an existing open registered cabling technician.

ICTSS00087 Basic Technician Network Build and Operate Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the introductory skills and knowledge required in a range of NBN broadband industry occupations specifically for the national rollout construction and maintenance of the high-speed broadband infrastructure.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTTEN315 Determine and apply technologies within a telecommunications system

ICTWOR308 Provide customer service to telecommunications clients

ICTTEN317 Locate, identify and rectify telecommunications network faults

Target Group

This skill set is for entry level workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for construction and maintenance of the high-speed broadband infrastructure.

ICTSS00091 Radio Technician Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to install, modify and maintain basic radio communications networks.

Pathways Information

This skill set provides credits towards ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTRFN301 Install a radio communications antenna and feedline

ICTRFN304 Construct and test a radio communications device

ICTRFN407 Conduct radio frequency measurements

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTTEN312 Install telecommunications network equipment

ICTTEN410 Locate, diagnose and rectify faults

ICTTEN414 Repair telecommunication system faults

ICTWHS204 Follow work health and safety and environmental policy and procedures

Target Group

This skill set is suitable for individuals with limited experience in the telecommunications industry who wish to specialise in radio communications.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for working in the installation, modification and maintenance of basic radio communications networks.

ICTSS00092 Technical Help Desk Support Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to provide information and communication technology (ICT) advice to customers and to resolve technical enquiries.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTSAS305 Provide ICT advice to clients

ICTWOR306 Resolve technical enquiries using multiple information systems

ICTWOR308 Provide customer service to telecommunications customers

Target Group

This skill set is for Telecommunications Cablers who wish to provide help desk support.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for help desk support roles.

ICTSS00093 Telecommunications Linesworker HFC Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required for TAP down installation of hybrid fibre coaxial (HFC) cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT20219 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL249 Haul underground cable for installation and maintenance work

ICTCBL250 Haul and fix aerial cable

ICTCBL251 Install aerial and underground cable lead-ins

ICTCBL252 Joint and terminate coaxial cable

ICTBWN306 Use radio frequency measuring instruments

ICTPMG201 Prepare site for support installation

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for TAP down installation of HFC cable.

ICTSS00094 Technician Fibre Skill Set

Modification History

Release	Comments
Release 3	<p>This version released with ICT Information and Communications Technology Training Package Version 7.0.</p> <p>Release 3 created to reflect the updated units of competency.</p>
Release 2	<p>This version released with ICT Information and Communications Technology Training Package Version 6.0.</p> <p>Release 2 created to reflect the updated units of competency.</p>
Release 1	<p>This version released with ICT Information and Communications Technology Training Package Version 5.0.</p>

Description

This skill set addresses the skills and knowledge required to install, test and terminate telecommunications optical fibre cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN308 Work safely on live optical fibre installations

ICTBWN307 Use optical measuring instruments

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTCBL322 Install and terminate optical fibre cable on customer premises

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

ICTTEN318 Inspect, clean and handle optical fibre cable and connectors

ICTTEN409 Commission an electronic system

ICTTEN434 Install, configure and test internet protocol networks

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for working with telecommunications optical fibre cable.

ICTSS00095 Fibre Splicer Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0. Release 2 created to reflect the updated units of competency.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to splice telecommunications fibre. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN302 Install optical fibre splitters in fibre distribution hubs

ICTBWN308 Work safely on live optical fibre installations

ICTBWN307 Use optical measuring instruments

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTCBL316 Install ribbon fibre cable in the FTTX distribution network

ICTCBL330 Splice and terminate optical fibre cable for telecommunications projects

ICTTEN318 Inspect, clean and handle optical fibre cable and connectors.

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements to splice telecommunications fibre.

ICTSS00096 Technician Hybrid Fibre Coaxial Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set reflects the role of operators in performing underground and aerial equipment and system installations from the tap to the optical node. This role works on access network to enable efficient interconnection to the NBN broadband services. This includes connection and termination of HFC cabling, diagnosing and rectifying HFC system faults.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN306 Use radio frequency measuring instruments

ICTCBL248 Install and terminate hard-line coaxial cable

ICTCBL333 Install aerial cable for communications applications

ICTTEN312 Install telecommunications network equipment

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for tap to the optical node work on Hybrid Fibre Coaxial access network to enable efficient access and interconnection to the NBN broadband services.

ICTSS00097 Telecommunications Customer Service Technician - HFC Technician Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set reflects the role of operators installing, activating and assuring HFC equipment and systems from the last connection point of the network to the customer premises (tap to NTD) to enable efficient access and interconnection to the NBN broadband services.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN306 Use radio frequency measuring instruments
ICTCBL303 Install and terminate coaxial cable
ICTDRE314 Design communications wiring systems for customer premises
ICTTEN312 Install telecommunications network equipment
ICTCBL251 Install aerial and underground cable lead-ins
ICTCBL306 Locate and identify cable system faults
ICTDRE308 Install a cable broadband multi-dwelling unit system

ICTTEN207 Install and test internet protocol devices in convergence networks

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for tap to NTD work on Hybrid Fibre Coaxial access network to enable efficient interconnection to the NBN broadband services.

ICTSS00098 Network Technician HFC Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 7.0. Release 2 created to reflect the updated units of competency.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set provides individuals with skills and knowledge that reflects the role of an advanced Hybrid Fibre Coaxial (HFC) technician (technical officer), team leader or supervisor with a wide range of telecommunications skills. This role works on the access network to enable efficient interconnection to the NBN broadband services. This includes diagnosing and rectifying complex HFC system faults, commissioning and verifying the HFC network performance.

Pathways Information

This skill set provides credit towards the ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTTEN410 Locate, diagnose and rectify faults

ICTRFN406 Maintain hybrid fibre coaxial broadband cable network

ICTTEN409 Commission an electronic system

ICTTEN312 Install telecommunications network equipment

ICTRFN405 Install radio communications base station equipment

Target Group

This skill set is for telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements to meet a wide range of telecommunications skills.

ICTSS00099 Cloud Design and Configuration Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package Version 7.0. Release 3 created to reflect the updated units of competency.
Release 2	Correcting an error. No change to skill set content.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to assess, design, improve and monitor cloud architecture within Information and Communications Technology (ICT) environments.

Pathways Information

The units provide credit towards ICT50120 Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCLD501 Develop cloud disaster recovery plans

ICTCLD502 Design and implement highly-available cloud infrastructure

ICTCLD503 Implement web-scale cloud infrastructure

ICTCLD504 Improve cloud-based infrastructure

Target Group

This skill set is for cloud architects, cloud network engineers, cloud consultants and cloud developers who use cloud computing solutions for organisations.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cloud computing in organisations.

ICTSS00100 Cloud Implementation and Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to implement and maintain cloud computing solutions within organisations.

Pathways Information

The units provide credit towards ICT50120 Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCLD505 Implement cloud infrastructure with code

ICTCLD506 Implement virtual network in cloud environments

ICTCLD507 Build and deploy resources on cloud platforms

ICTCLD508 Manage infrastructure in cloud environments

Target Group

This skill set is for cloud engineers, cloud systems administrators and those who work within cloud computing operations to program, implement and maintain cloud computing solutions for businesses.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cloud engineering in organisations.

ICTSS00101 Cyber Incident Response Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to respond to cyber security incidents within organisations in Information and Communication Technology (ICT) environments.

Pathways Information

The units provide credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS402 Identify and confirm cyber security incidents

ICTCYS403 Plan and implement information security strategies for an organisation

ICTCYS406 Respond to cyber security incidents

Target Group

This skill set is for information technology security administrators and network administrators who work in information technology security within business environments.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cyber security incident response organisations.

ICTSS00102 Cyber Incident Threat Detection and Prevention Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to run vulnerability assessments, interpret information for threats and develop incident response plans to maintain cyber security.

Pathways Information

The units provide credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS404 Run vulnerability test assessments for an organisation

ICTCYS405 Develop cyber security incident response plans

ICTCYS407 Gather, analyse and interpret threat data

Target Group

This skill set is for network penetration testers, information and technology security consultants, and network and security consultants who work in business environments.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cyber security threat detection and prevention in ICT contexts.

ICTSS00103 Cyber Security Strategy and Governance Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to identify and implement cyber security standards within organisations.

Pathways Information

The units provide credit towards ICT60120 Advanced Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS601 Create cyber security standards for organisations

ICTCYS604 Implement best practices for identity management

ICTCYS606 Evaluate an organisation's compliance with relevant cyber security standards and law

ICTCYS608 Perform cyber security risk assessments

Target Group

This skill set is for Information and Communications Technology security (ICT) consultants, cyber security analysts, business development managers, cyber risk and assurance managers, network security consultants and administrators, ICT risk managers, cyber security solutions architects and network engineers who implement cyber security standards within businesses.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cyber security management in ICT contexts.

ICTSS00104 Data Analysis Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to manipulate data and report data abnormalities in Information and Communication Technology (ICT) environments.

Pathways Information

The units provide credit towards ICT50120 Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTDAT501 Gather, analyse and verify data from different source inputs

ICTDAT502 Conduct significance tests

ICTDAT503 Use unsupervised learning for clustering

Target Group

This skill set is for data analysts, data scientists, and machine learning engineers, developers and programmers who analyse and test data against business requirements.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for data analysis and management in ICT contexts.

ICTSS00105 Internet of Things Developer Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to design, program and assess Internet of Things (IoT) devices.

Pathways Information

The units provide credit towards ICT50120 Diploma of Information Technology, ICT60120 Advanced Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS609 Evaluate threats and vulnerabilities of IoT devices

ICTIOT502 Program IoT devices

ICTIOT503 Design and test IoT devices and networks

Target Group

This skill set is for software developers and programmers, IoT developers, cyber security and risk analysts, software developers, programmers and network engineers who work in businesses.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for IoT developers in ICT contexts.

ICTSS00106 Introductory Tools and Applications Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to use basic computer operating systems, computer hardware, software applications and digital texts for a range of purposes required within an Information and Communications Technology (ICT) context.

Pathways Information

The units provide credit towards Certificate III in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

BSBITU211 Produce digital text documents

ICTICT206 Install software applications

ICTICT213 Use computer operating systems and hardware

ICTICT216 Design and create basic organisational documents

ICTICT221 Identify and use specific industry standard technologies

Target Group

This skill is for individuals looking to enter the ICT industry who will use basic computing operating systems, computer hardware, software applications and digital texts for a range of purposes.

Suggested words for Statement of Attainment

These units of competency from BSB Business Services and ICT Information and Communications Technology Training Packages meet industry requirements for applying introductory computer tools and applications in ICT contexts.

ICTSS00107 Introductory Help Desk Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to perform routine Information and Communications Technology (ICT) support for a range of purposes required within an ICT context.

Pathways Information

The units provide credit towards ICT 30120 Certificate III in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTICT219 Interact and resolve queries with ICT clients

ICTSAS210 Update and maintain hardware, software and documentation inventories

ICTSAS211 Develop solutions for basic ICT malfunctions and problems

ICTSAS213 Maintain ICT system integrity

Target Group

This skill is for individuals looking to enter the ICT industry who will provide routine help desk support.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Packages meet industry requirements for applying routine maintenance and troubleshooting skills in ICT contexts.

ICTSS00108 Digital Skills for Small Business Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.1.

Description

This skill set addresses the skills and knowledge needed to support small businesses in building a digital presence, transitioning to online solutions and providing online customer service.

Pathways Information

These units of competency provide credit towards BSB30315 Certificate III in Micro Business Operations, ICT30120 Certificate III in Information Technology SIR30216 Certificate III in Retail and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

BSBXCS303 Securely manage personally identifiable information and workplace information

ICTWEB304 Build simple web pages

SIRXCEG006 Provide online customer service

SIRXMKT002 Use social media to engage customers

Target Group

This skill set is for those working in small businesses in any industry who require the skills and knowledge to transform and transition their business models so that they can operate in an online context.

Suggested words for Statement of Attainment

These units of competency from the BSB Business Services, ICT Information and Communications Technology and SIR Retail Services Training Packages meet industry requirements for applying digital skills to help small businesses transition to an online context.

ICTSS00109 Entry to Tech Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.1.

Description

This skill set addresses the skills and knowledge needed to support individuals in gaining basic technological knowledge and general ICT skills as they enter into specialised and non-specialised ICT careers.

Pathways Information

These units of competency provide credit towards ICT30120 Certificate III in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

BSBXCS303 Securely manage personally identifiable information and workplace information

ICTCLD301 Evaluate characteristics of cloud computing solutions and services

ICTICT443 Work collaboratively in the ICT industry

ICTPRG302 Apply introductory programming techniques

Target Group

This skill set is for people in all industries who are seeking a pathway into the ICT industry and require upskilling in general ICT skills.

Suggested words for Statement of Attainment

These units of competency from the BSB Business Services and ICT Information and Communications Technology Training Packages meet industry requirements for gaining basic technological knowledge and general ICT skills.

ICTSS00110 Radio Frequency Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.0.

Description

This skill set addresses the skills and knowledge required to install, modify and maintain basic radio frequency networks.

Pathways Information

This skill set provides credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTBWN306 Use radio frequency measuring instruments

ICTRFN407 Conduct radio frequency measurements

ICTRFN506 Evaluate radio frequency signal coverage plots

ICTTEN418 Install and test a radio frequency identification system

Target Group

This skill set is for entry level radio frequency workers.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet industry requirements to meet a wide range of telecommunications skills.

ICTSS00111 Optical Networking Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.0.

Description

This skill set addresses the skills and knowledge required to install, modify and maintain basic optical networks.

Pathways Information

This skill set provides credit towards ICT50220 Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTBWN308 Work safely on live optical fibre installations

ICTOPN404 Test optical communications systems and components

ICTOPN508 Perform acceptance and commissioning tests on optical networks

ICTOPN511 Test performance of specialised optical devices

Target Group

This skill set is for entry level optical networking workers.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet industry requirements to meet a wide range of telecommunications skills.

ICTSS00113 Telecommunications Networking Management Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.0.

Description

This skill set addresses the skills and knowledge required for advanced learners to manage the skills required of the broader telecommunications and ICT industry.

Pathways Information

The units provide credit towards ICT60220 Advanced Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTICT818 Develop knowledge management strategies

ICTICT819 Lead analysis of information and communications technology business strategy

ICTICT822 Manage automated ICT system applications

ICTSUS812 Lead applied research in ICT sustainability

ICTTEN817 Plan transmission networks

ICTTEN823 Manage voice, data and internet protocol network solutions

ICTTEN824 Manage network testing strategies

Target Group

This skill set is for advanced or managerial workers within a telecommunications and ICT environment.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet industry requirements for telecommunications network management in ICT contexts.

ICTSS00114 Advanced Telecommunications Networking Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.0.

Description

This skill set addresses the skills and knowledge for experienced leaders to acquire the required skills of the broader telecommunications and ICT industry.

Pathways Information

The units provide credit towards ICT60220 Advanced Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTRFN804 Produce radio link budgets

ICTRFN805 Analyse cellular mobile network systems

ICTRFN806 Analyse satellite communications systems

ICTTEN823 Manage voice, data and internet protocol network solutions

ICTTEN825 Investigate applications of cloud networks in network switching

ICTTEN826 Evaluate and apply digital signal processing to communication systems

Target Group

This skill set is for experienced workers within a telecommunications and IT environment.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet industry requirements for telecommunications network management in ICT contexts.

ICTSS00115 XG Cellular Network Infrastructure Rollout Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.0.

Description

This skill set addresses the skills and knowledge required to support the rollout of cellular wireless networks, including the fifth generation (5G) network and subsequent cellular network generations, in a range of telecommunications industry occupations.

Pathways Information

The units provide credit towards ICT30419 Certificate III in Telecommunications Network Build and Operation, ICT41219 Certificate IV in Telecommunications Engineering Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTTEN312 Install telecommunications network equipment

ICTTEN409 Commission an electronic system

ICTTEN410 Locate, diagnose and rectify faults

Target Group

This skill set is for those who work in roles that support the rollout of cellular wireless networks, including the 5G network and subsequent cellular network generations.

Suggested words for Statement of Attainment

These units of competency from the ICT Training Package meet industry requirements for supporting the rollout of cellular wireless networks.

ICTSS00116 XG Cellular Network Implementation Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.0.

Description

This skill set addresses the skills and knowledge required to integrate and maintain device connection to cellular wireless networks, including the fifth generation (5G) network and subsequent cellular network generations, in a range of telecommunications industry occupations. This skill set addresses all digital reception technology methods.

Pathways Information

The units provide credit towards ICT41219 Certificate IV in Telecommunications Engineering Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTDRE302 Locate and rectify digital reception equipment faults

ICTEDU301 Train customers in new technology

ICTRFN407 Conduct radio frequency measurements

ICTTEN415 Install and configure internet protocol TV in a home network

ICTTEN425 Design, install and configure a customer smart technology network

Target Group

This skill set is for those who work in roles that integrate and maintain device connection to cellular wireless networks, including the fifth generation (5G) network and subsequent cellular network generations.

Suggested words for Statement of Attainment

These units of competency from the ICT Training Package meet industry requirements for supporting the integration and maintenance of connecting devices to cellular networks.

ICTSS00117 Cyber Security Insider Risks and Threats Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 7.2.

Description

This skill set addresses the skills and knowledge to prevent, analyse, detect and respond to intentional and unintentional cyber security insider risks and threats and expand capabilities for minimising vulnerability in an organisational context.

Pathways Information

The units provide credit towards ICT60220 Advanced Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS601 Create cyber security standards for organisations

ICTCYS607 Acquire digital forensic data

ICTCYS614 Analyse cyber security insider risks and threats and devise recommendations

ICTCYS615 Detect and respond to cyber security insider risks and threats

Target Group

The skill set is for individuals who work in information technology security roles, including cyber security analysts and specialists, cyber risk and assurance managers, and other related roles that are responsible for preventing, analysing, detecting and responding to cyber security insider risks and threats.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet industry requirements for cyber security insider risk and threat prevention, analysis, detection and response in ICT contexts.
