Assessment Requirements for MARJ001 Follow environmental work practices

Release: 2

Assessment Requirements for MARJ001 Follow environmental work practices

Modification History

Release 2. ISC Upgrade. Awareness of MARPOL and types of waste compactors and crushers suitable for use on board a vessel included in KE. Safety and hazard control procedures included in PE.

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying safety and hazard control procedures when disposing of waste and garbage
- making suggestions for improved environmental work practices
- preparing and keeping clear and concise environmental records
- recognising procedures and following instructions for environmental work practices
- reporting environmental hazards and risks in a timely way.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- environmental and resource hazards and risks associated with the maritime industry
- environmental laws, regulations and standards relevant to work in the maritime industry
- procedures and processes that support environmentally sustainable principles
- procedures for reporting environmental hazards and risks
- relevant environmental sustainability principles
- requirements for waste management and control systems under the International Convention for the Prevention of Pollution from Ships (MARPOL Convention)
- types and application of waste compactors and crushers suitable for use on board a vessel
- use of oil spill equipment and its limitations.

Assessment Conditions

Assessors must satisfy National Vocational Education and Training Regulator (NVR)/Australian Quality Training Framework (AQTF) assessor requirements.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- tools, equipment, machinery, materials and personal protective equipment currently used in industry
- applicable documentation such as legislation, regulations, codes of practice, workplace procedures and operational manuals
- range of relevant exercises, case studies and/or simulations.
