MARN005 Maintain seaworthiness of a vessel
MARN005 Maintain seaworthiness of a vessel

Modification History
Release 1. New unit of competency.

Application
This unit involves the skills and knowledge required to maintain the seaworthiness of a vessel.

This unit applies to people working in the maritime industry as a Watchkeeper Deck, a Master up to 500 gross tonnage (GT), or a Master up to 80 metres Near Coastal.

This unit has links to legislative and certification requirements.

Pre-requisite Unit
Not applicable.

Competency Field
N – Seamanship

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements</th>
<th>Performance criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Check weather tight and watertight integrity of vessel</td>
<td>Structural members of vessel are investigated to establish weather tight and watertight requirements of vessel</td>
</tr>
<tr>
<td></td>
<td>Inspections of vessel are planned according to regulatory and organisational requirements</td>
</tr>
<tr>
<td></td>
<td>Checks are completed to confirm weather tight and watertight integrity of vessel at all times</td>
</tr>
<tr>
<td></td>
<td>Defects and damage to vessel are identified and reported</td>
</tr>
</tbody>
</table>
2 Take action to meet environmental changes

2.1 Anticipated sea and weather conditions are analysed to identify situations that may jeopardise vessel weather tight and watertight integrity

2.2 Effect of severe wind and rolling in associated sea conditions on vessel weather tight and watertight integrity is recognised

2.3 Effect of water on deck on vessel weather tight and watertight integrity is ascertained

2.4 Appropriate action is taken to maintain vessel weather tight and watertight integrity according to organisational procedures

3 Maintain records

3.1 Relevant documents and records are completed and maintained as required according to regulatory and organisational requirements

3.2 Relevant documents are sent to appropriate bodies and copies are filed according to regulatory and organisational requirements

3.3 Documents are stored according to regulatory and organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Structural members of vessel include one or more of the following:

- bulkheads including the collision bulkhead
- frames
- freeboard deck
- hatch and tank openings
- longitudinal and transverse girders
- shell plating
- tank tops
- various types of keel arrangements
- watertight and weather tight compartments

Inspections of vessel includes one or more of the following:

- inspection of hull and fittings during dry-docking
- inspections required after completion of maintenance work
- inspections required after docking prior to refloating
- inspections to be made after any situation which may have caused damage to the vessel
- pre sailing inspections
- routine inspections

Defects and damage include one or more of the following:

- corrosion to operating or structural parts of the vessel
- damage to the vessel through cargo shift
- hatch cover seals
- structural damage through collision, grounding or fire
- watertight door seals and closing arrangements

Situations that may jeopardise vessel weather tight and watertight integrity include one or more of the following:

- collision, grounding or fire
- failure to conduct appropriate inspections
- heavy weather damage

Appropriate actions include one or more of the following:

- avoiding adverse weather
- checking the security of the vessel
- closing openings
- ensuring appropriate equipment is in readiness for damage control
- ensuring free surface is minimised in ballast and fuel tanks
- ensuring freeing ports allow water taken on deck to clear
- ensuring passenger distribution does not exceed allowed limits
- ensuring stores, cargo and equipment are properly stowed and
MARN005 Maintain seaworthiness of a vessel

- lashed
- establishing procedures for restoring or managing weather tight and watertight integrity during an emergency
- maintaining the stability condition within approved limits
- testing of tanks and other watertight areas

Relevant documents and records include one or more of the following:

- equipment manufacturer instructions
- logbooks, including oil record and garbage log books as applicable
- organisational operation orders under the International Management Code for the Safe Operation of Ships and for Pollution Prevention (ISM) Code
- plans and drawings
- relevant maritime regulations and legislative requirements
- stability data manual

Unit Mapping Information

This is a new unit. This unit is equivalent to MARN5001A Maintain seaworthiness of a vessel.
