MEM05037 Perform geometric development

Release: 1
MEM05037 Perform geometric development

Modification History
Release 1. Supersedes and is equivalent to MEM05037C Perform geometric development

Application
This unit of competency has been developed for Engineering Tradesperson – Fabrication apprenticeship training and the recognition of trade-level skills in marking out general fabrications using geometric development techniques.

Marking out associated with geometric development is done to specifications interpreted from technical drawings and job specifications.

This unit applies in jobbing workshops and involves the development of templates and general fabricating using geometrical layout techniques.

Skills covered by this unit are generally applied in occupational and work situations associated with steel fabrication, boiler making or sheet metal work.

For skills required for marking out activities associated with general engineering and maintenance functions, see the following units:

- MEM07005 Perform general machining
- MEM12006 Mark off/out (general engineering)
- MEM18006 Perform precision fitting of engineering components.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A
Unit Weight: 6

Pre-requisite Unit
MEM09002 Interpret technical drawing
MEM12023 Perform engineering measurements
MEM12024 Perform computations
MEM13015 Work safely and effectively in manufacturing and engineering
MEM14006 Plan work activities
MEM16006 Organise and communicate information
## Competency Field

Fabrication

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

### 1 Determine job requirements

1.1 Follow standard operating procedures (SOPs)

1.2 Comply with work health and safety (WHS) requirements at all times

1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs

1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

### 2 Transfer dimensions from a detail drawing to work

2.1 Determine and apply specifications and work requirements using appropriate calculations

2.2 Carry out development to specifications or procedures using appropriate tools and equipment

2.3 Establish datum points and mark appropriate to task requirements

### 3 Make templates as required

3.1 Select appropriate template material

3.2 Produce templates to specification

3.3 Follow correct storage procedures, including labelling and identification to procedures

### 4 Develop patterns as required

4.1 Select and apply parallel line, radial line and triangulation development methods as appropriate to the work requirements

4.2 Determine and transfer allowances for fabrication and assembly
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

5 Interpreting relevant codes, standards and symbols
   5.1 Interpret relevant standards/codes and symbols
   5.2 Interpret requirements of standards/codes and apply to materials and processes

6 Estimating quantities of materials from detail drawings
   6.1 Identify materials
   6.2 Estimate quantities from drawings
   6.3 Minimise material wastage

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Template materials include one (1) or more of the following:
- steel plate
- perspex
- timber
- cardboard
- paper

Storage procedures include one (1) or more of the following:
- labelling
- identification (e.g. template lofts)

Development methods include one (1) or more
- parallel line
- radial line
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

of the following:
- triangulation

Allowances include one (1) or more of the following:
- thickness
- bend
- pitch
- angle
- circumference
- perimeter

Standards/codes and symbols includes:
- carrying out all work in accordance with legislative and regulatory requirements

Unit Mapping Information
Release 1. Supersedes and is equivalent to MEM05037C Perform geometric development
