MEM07005 Perform general machining

Release: 2

MEM07005 Perform general machining

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM07005 Perform general machining (Release 1).

Release 1. Supersedes and is equivalent to MEM07005C Perform general machining.

Application

This unit of competency has been developed for Engineering Tradesperson – Mechanical apprenticeship training and the recognition of trade-level skills in non-computer numerical controlled (CNC) machining of ferrous and non-ferrous materials.

Where high level production machining applications are undertaken unit MEM07041 Perform production machining should be selected.

Where set-up and operation of electro-discharge machines (EDM) is required unit MEM07014 Perform electro-discharge machining (EDM) operations should also be selected.

Where machining is undertaken without undertaking any set up, including mounting of tools, setting of speeds, feeds and other operational parameters unit MEM07024 Operate and monitor machine and process and unit MEM07025 Perform advanced machine and process operation, should be selected as appropriate.

Where the selection and use of precision measurement is required unit MEM12003 Perform precision mechanical measurement should also be selected.

Where substantial marking out is required unit MEM12006 Mark off/out (general engineering) should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 8

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM12024	Perform computations

MEM13015	Work safely and effectively in manufacturing and engineering
MEM14006	Plan work activities
MEM16006	Organise and communicate information
MEM18001	Use hand tools

Competency Field

Machine and process operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Determine sequence of operations	2.1	Determine sequence of operations to meet job specifications
		2.2	Select appropriate material and establish datum, as required
3	Select and mount tools	3.1	Select appropriate tools for job, sharpen and shape, as required
		3.2	Mount and position tools to meet requirements
4	Perform	4.1	Transfer dimensions to determine machining parameters

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

machining operations	4.2	Set machining parameters to meet job requirements and maximise tool life
	4.3	Ensure work is securely held to avoid damage to product, and meet safety requirements
	4.4	Perform machining to produce product to meet specifications
	4.5	Carry out routine maintenance and adjustments, as required
5 Check components	5.1	Check components for compliance with specifications
	5.2	Rectify non-compliant product in accordance with SOPs as required

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Operations include one (1) or more of the following:

- parallel cutting
- slotting
- planing
- drilling
- knurling
- cutting flats
- non-precision surface grinding operations

Materials include one

- ferrous

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

(1) or more of the following:

- non-ferrous

Measuring instruments include one (1) or more of the following:

- micrometres
- vernier calipers
- calipers
- steel rules
- dividers
- scribes

Tools include the following:

- cutting tools
- tool holders

Machining parameters include one (1) or more of the following:

- speeds
- feeds
- stops
- coolant and cutting lubricants

Machines include one (1) or more of the following:

- lathes
- mills
- planers
- shapers
- slotters
- surface grinder

Maintenance and adjustments include one (1) or more of the following:

- machining parameters
- slide and collar adjustment
- cleaning and lubrication

Unit Mapping Information

Release 2. Supersedes and is equivalent to MEM07005 Perform general machining (Release 1).

Release 1. Supersedes and is equivalent to MEM07005C Perform general machining.
