MEM08006 Produce clear and/or coloured and/or sealed anodised films on aluminium

Release: 1

MEM08006 Produce clear and/or coloured and/or sealed anodised films on aluminium

Modification History

Release 1. Supersedes and is equivalent to MEM08006B Produce clear and/or coloured and/or sealed anodised films on aluminium

Application

This unit of competency defines the skills and knowledge required to produce clear or coloured sealed anodised films on aluminium and its alloys in applicable applications. Colouring is produced by dyeing or by ‘in-bath’ processes.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM08002	Pre-treat work for subsequent surface coating
MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Surface finishing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, job sheets or work instructions |
| 2 | Prepare for anodising | 2.1 | Apply taping and waxing masking techniques, where required |
| | | 2.2 | Minimise contact marks and shielding |
| 3 | Assess preparation of work for correct jiggging/loading | 3.1 | Connect work correctly for the required current flow with minimum contact marks and shielding |
| | | 3.2 | Reject all incorrectly loaded work |
| 4 | Anodise work | 4.1 | Carry out anodising treatment steps following SOPs |
| | | 4.2 | Carry out sealing or dyeing and sealing steps following SOPs |
| | | 4.3 | Maintain process parameters within specified limits |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, accessibility of the item, and local industry and regional contexts) are included.

Applications include one (1) or more of the following:

- electrical
- decorative
- mechanical
- architectural purposes

Anodising steps include (1) one or more of the following:

- pre treatment
- anodising
- dyeing
- sealing

Masking techniques include one (1) or more of the following:

- taping
- waxing

Process parameters include one (1) or more of the following:

- temperature
- current density
- time

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM08006B Produce clear and/or coloured and/or sealed anodised films on aluminium
