Release 1. New qualification

Qualification Description

This qualification describes the skills and knowledge required to design, construct, install and repair interior and exterior blinds and awnings and security screens and grilles using a range of materials, fixtures and fittings for residential and commercial premises.

Work is usually performed in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Specialisation is possible in this qualification depending on the electives chosen. A specialisation can be identified on the testamur where a minimum of five (5) Group A elective units of competency are achieved in blinds and awnings or a minimum of five (5) Group B elective units of competency are achieved in security screens and grilles.

Where a specialisation is achieved, RTOs should identify this as follows:

**MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles
(specialising in Blinds and Awnings) or (specialising in Security Screens and Grilles)**

Licensing applies in some jurisdictions for installation of blinds, awnings, security screens/grilles and shade sails. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.
