MSFFDM4009 Match furnishing style and materials to customer requirements

Release: 1

MSFFDM4009 Match furnishing style and materials to customer requirements

Modification History

Release 1. Unit code and application changed. Elements and performance criteria changed. Range of conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.

Application

This unit describes the skills and knowledge required to determine and match customer style and materials requirements and create the related workplace documentation.

This unit applies to individuals providing furnishing product information to customers in any sector. Customers may be internal or external.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Design practice

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine customer requirements	1.1 Establish customer needs through review of documentation or consultation with customer and in-person inspection of product site if required 1.2 Research and identify potential options and provide details or examples of potential furnishing or similar products that meet styles and materials requirements to customer 1.3 Explain limitations and benefits of different styles and materials within context of product's intended location and use 1.4 Identify and explain options for the use and modification of styles or materials to customer 1.5 Confirm customer specifications and parameters for making final selections

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Match options to customer requirements	2.1 Compare customer specifications and user requirements with furnishing styles and materials options, ensuring consistency of style and materials between existing and proposed new products or locations 2.2 Present range of best-fit styles and materials to customer for evaluation 2.3 Answer customer queries and use examples to illustrate answers
3. Document customer requirements	3.1 Establish and confirm specifications, delivery requirements and required quality standards in accordance with workplace procedures 3.2 Calculate required product quantities and associated costs 3.3 Document details in accordance with workplace procedures, including research results and confirmation of styles and materials matching, and special instructions required for production

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations relating to product and production costings.
- Reading skills to interpret research information and specifications.
- Writing and oral communication skills to document research results and report to stakeholders.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.
