MSFFL3022 Mix and apply epoxy and seamless floor coverings

Release: 1

MSFFL3022 Mix and apply epoxy and seamless floor coverings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers preparation, application and finishing of epoxy and seamless floor coverings.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Pre-requisite Unit

Flooring technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Prepare for the work | 1.1 | Applicable work health and safety (WHS), legislative, organisational and information requirements relevant to the application of epoxy and seamless floor coverings are verified and complied with |
| | | 1.2 | Work orders and/or plans are read and interpreted |
| | | 1.3 | The condition of the sub-floor is inspected and confirmed as suitable for use |
| | | 1.4 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |

- | | | | |
|---|-------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------|
| | | 1.5 | Floor preparation, including conventional and decorative formwork, is established, levelled and secured |
| 2 | Apply epoxy materials for floor coverings | 2.1 | Surfaces are checked for contamination, moisture content and suitable preparation |
| | | 2.2 | Materials and equipment are prepared and positioned for use |
| | | 2.3 | Material safety data sheets (MSDS), or equivalent, are read and applied during the work |
| | | 2.4 | Epoxy is mixed and trial application of surface materials is made to check equipment operation, materials consistency and specified surface finish |
| | | 2.5 | Surface coatings are applied with the depth and coverage in accordance with manufacturer specifications and job requirements |
| | | 2.6 | Decorative additives are applied in accordance with job requirements |
| | | 2.7 | Floor is checked and cleared for further processing |
| 3 | Complete housekeeping | 3.1 | Unused materials are stored or recycled as required |
| | | 3.2 | Tools and equipment are cleaned and stored appropriately |
| | | 3.3 | Work area is cleaned and rubbish disposed of appropriately |
| | | 3.4 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

Epoxy and seamless flooring includes:

- trowelled epoxy
- self-levelling epoxy
- flake floors
- granule floors
- epoxy coatings (seamless)
- spray on roller coatings
- waterproofing
- joint sealing

Sub-floor preparation includes:

- sanding
- grinding
- the application of levelling compounds and primers

General tools and equipment include:

- utility knife
- straight edge
- square
- tape measure
- trowels
- rollers
- brushes
- buckets
- trolley

Sanding equipment includes:

- sander
- edger
- belt-sander
- sander belts and paper

Materials include:

- acrylics
- epoxy

- polyurethane
 - separating strips
 - flushing strips
 - joining strips
 - expansion jointing
 - additives (flakes and granules)
 - oil and lubricants for equipment
- Grinding equipment includes:**
- grinder
 - grinding stones and materials
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
 - work instructions, including job sheets, cutting lists, plans, drawings and designs
 - workplace procedures relating to reporting and communication
 - manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFL3401A Mix and apply epoxy and seamless floor coverings
