Assessment Requirements for MSFFL3037 Install sprung timber flooring

Release: 1

Assessment Requirements for MSFFL3037 Install sprung timber flooring

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Complete a minimum of one (1) type of sprung timber sports floor installation
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to installation of sprung timber sports flooring
- Organisational and site standards, requirements, policies and procedures for the installation of sprung timber sports flooring
- Environmental protection requirements
- Types and uses of tools and equipment used during the installation of sprung timber sports flooring
- Workplace safety system requirements relevant to the installation of sprung timber sports flooring
- Work flow in relation to the laying of sprung timber sports flooring
- Appropriate mathematical procedures for estimation and measurement
- Procedures for the recording, reporting and maintenance of workplace records and information
- Types, characteristics, uses and limitations of:
 - sprung timber sports flooring
 - installation adhesives
 - underfloor pads
- Basic wood working techniques relevant to the installation of sprung timber sports flooring
- Characteristics and requirements of sub-floor preparation
- Work flow in relation to flooring installation operations

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a realistic sprung timber floor installation requirement, materials, equipment and specifications relevant to installing sprung timber flooring.
