MSFFL3103 Install soft carpet underlay and grippers

Release: 1

MSFFL3103 Install soft carpet underlay and grippers

Modification History

Release 1. Supersedes and is equivalent to MSFFL2036 Install soft carpet underlays and gripper accessories. Changes to title, application, elements and performance criteria to improve clarity and consistency across MSFFL units. Changes to assessment requirements.

Application

This unit describes the skills and knowledge required to prepare to install and install soft carpet underlay, carpet gripper strips and gripping edging trims, in preparation for the installation of carpet on concrete and timber subfloors and non-complex stairs.

Workers with this competency undertake routine tasks on residential and non-residential/commercial sites according to job instructions including plans and specifications and workplace procedures using discretion, judgement and problem-solving to identify and resolve routine issues. They work with a high degree of self-direction under routine supervision, and they are responsible for their output.

The work described in this unit may require a licence or certification in some jurisdictions, and state or territory authorities should be consulted to determine the current status. Workers on construction sites are required by law to complete induction training. They must also comply with relevant legislation, regulations, Australian Standards, codes and manufacturer installation instructions.

Competency Field

Flooring technology

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to install soft carpet underlay and grippers	1.1 Interpret underlay and gripper strips and metal moulding installation requirements from job and manufacturer instructions and calculate the quantities of materials required 1.2 Identify hazards relating to the work site, work practices, materials, tools and equipment, and check risk treatments are in place and operating 1.3 Select and check all required tools and equipment are ready to use, and organise to fix any deficiencies according to workplace procedures 1.4 Gather underlay, gripper strips, gripping edging trims and other
