MSFFM3009 Produce manual and computer-aided production drawings

Modification History
Release 1 - New unit of competency

Application
This unit of competency covers producing manual and computer-aided production drawings. No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector
Furniture Making

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify object to be drawn

1.1 The purposes and any operational characteristics of object to be drawn are identified

1.2 Production materials and method are identified

2 Establish drawing criteria and limitations

2.1 Type of drawing to be completed is identified

2.2 Drawing requirements are established and documented identifying dimensions, angles, shapes and finished sizes

2.3 Drawing conventions and specifications to be noted on the drawing are identified

2.4 Appropriate medium for drawings is identified and selected

3 Quantify and draft

3.1 Dimensions are plotted from criteria and documented
3.2 Dimensional points are connected to match appropriate drawing views

3.3 Any production notes or special requirements are noted

3.4 Drawing conventions and specifications are noted on the documentation

4 Complete drawing

4.1 Angles, shapes and dimensions are checked against specifications and sample

4.2 Adjustments are made to the drawing within scope of authority

4.3 Drawing is checked for compliance with workplace documentation requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Scope of drawing:

- is to be limited to that used for manufacture/production purposes and is not to encompass original design concepts
- drawing is to be completed using both manual and computer-aided design (CAD) techniques and processes

Unit scope includes:

- drawings in metric scale and covering all dimensions of the furniture and furnishings

Calculations include:

- manual and with the aid of a calculator

Unit context includes:

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods codes,
and local safe operating procedures
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

Personal protective equipment includes:
- that prescribed under legislation, regulations and enterprise policies and practices

Information and procedures include:
- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

Unit Mapping Information
Supersedes and is equivalent to LMFFM3011B Produce manual and computer-aided production drawings.
