MSFFP2018 Source and review information about furnishing product materials

Release: 1

MSFFP2018 Source and review information about furnishing product materials

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Application

This unit describes the skills and knowledge required to research materials used in furnishing products and apply this knowledge to production needs. Materials for kitchens and bathroom construction are covered in a separate unit. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

Workers with this competency undertake research to guide materials choice in furnishing production.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Furniture making pathways

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information about furnishing product materials	1.1 Identify material requirements for furnishing production 1.2 Identify and use multiple reliable sources of information to identify materials that meet furnishing production needs
2. Apply knowledge of material characteristics to guide production choices	2.1 Identify strength, durability and other physical characteristics of material relevant to production needs 2.2 Identify material cost, handling requirements, workplace safety and environmental impact considerations relevant to production needs 2.3 Identify common problems and faults in materials 2.4 Identify finishing requirements, including surface finishing, for materials

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.5. Compare benefits and limitations of different materials to guide choice of material for production

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret unfamiliar information about materials from diverse sources.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFP2007 Identify materials used in furnishing production.
