**Release: 1**

# Assessment Requirements for MSFID5024 Design workplace interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID5013 Design for small to medium scale commercial or institutional interiors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented designs that meet the requirements of the brief for 3 workplace interiors.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards and the National Construction Code (NCC) aligned to the building classification
- mathematical procedures for estimation and measurement
- current and emerging trends that influence workplace design, including changing nature of work and employee interactions with the workplace
- different types of workplaces and impacts on the design process
- type and scope of client and/or project brief that informs work in a workplace context:
  - budget
  - client preferences
  - requirements:
    - aesthetic
    - functional
  - site characteristics
  - timeline
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools

- product tools
- communication tools
- elements and principles of design, their interrelationships, and how they are used in interior design
- ergonomics, anthropometrics, proxemics and aesthetic values
- design process, key stages and associated planning techniques
- types of information that may inform the design process:
  - commercial
  - cultural
  - environmental
  - historical
  - political
  - technological
- types of creative methodologies used in the design process
- types and features of drawings and other visual presentation techniques used to present design solutions -
- digital and non-digital sketching and drawing techniques to architectural drawing standards
- regulations, conditions and variables relating to the specific workplace context:
  - access
  - building conditions
  - building standards
  - decision making processes
  - electricity supply
  - flexibility of structural changes
  - guidelines for traffic flow
  - guidelines relating to the specific use such as health standards
  - lease conditions
  - occupancy rates
  - other occupancy
  - public use patterns
  - safety standards
  - services available
  - size
  - workforce planning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - workplace sites for design
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
