Assessment Requirements for MSFID6017 Evaluate design project outcomes

Release: 1

Assessment Requirements for MSFID6017 Evaluate design project outcomes

Modification History

Release 1. Supersedes and is equivalent to MSFID6008 Evaluate design project outcomes.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- evaluated the outcomes of 3 interior design projects, including 1 residential and 1 commercial design
- demonstrated skills in:
  - collaboration
  - using critical thinking processes
  - reflective practice.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards and National Construction Code (NCC) relevant to interior design
- elements and principles of design, including liveability and accessibility
- ergonomics, anthropometrics, proxemics and aesthetic values
- sustainability considerations for interior design
- how to determine evaluation criteria for interior design projects, and how these may vary
- how to establish evaluation criteria for interior design projects and key considerations:
  - the design process and its application
  - application of elements and principles of design
  - consistency with project brief – client needs, budget, timeline
  - adherence to compliance requirements
  - sustainability outcomes
  - suitability for current interior design trends and expectations
  - compliance with building standards
- models and processes for collaboration, evaluation and reflective practice, including:
  - how to establish a personal work methodology
  - how to work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity
  - ways of communicating and presenting ideas and critiques
  - how to initiate new ideas and work techniques
  - how to experiment in both the planning of projects and methods of execution

- types and features of drawings and other visual presentation techniques used to present interior design solutions - digital and non-digital.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - completed designs and supporting design documentation
  - information technology for research and document creation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
