MSFKB2003 Prepare for cabinetry installation

Release: 1

MSFKB2003 Prepare for cabinetry installation

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Application

This unit describes the skills and knowledge required to prepare an installation site and confirm cabinetry and components are complete and ready for installation. It includes checking work documentation and confirming that quality requirements have been met. Workers with this competency follow established procedures, often as assistants under the guidance of a supervisor with trade qualifications.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Competency Field

Kitchens and bathroom

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow site procedures	1.1 Identify roles of different people on site and site communication protocols 1.2 Identify and follow site work health and safety requirements 1.3 Identify and follow site procedures for access and deliveries
2. Prepare for work	2.1 Identify own work requirements from installation plans 2.2 Locate required installation tools and equipment and confirm operational readiness 2.3 Clear and prepare work area in accordance with installation and site safety requirements 2.4 Determine, confirm and access safe power source for tools
3. Confirm readiness of	3.1 Check cabinetry components against delivery documentation and

cabinetry for assembly and installation	installation plan and confirm completeness 3.2 Move cabinetry components to installation site while minimising risk of injury to self and others and risk of damage to cabinets 3.3 Assess cabinetry and components against work documentation, including quality requirements, and report any defects in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret installation documentation
- Writing skills to report basic information about cabinet condition
- Oral communication skills to use questioning and active listening for communication on site
- Numeracy skills to interpret numerical data on installation and delivery documentation and complete numerical processes involving counting and comparison.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFKB2001 Prepare for cabinet installation.
