# **Assessment Requirements for MSFKB4007 Design ancillary residential cabinetry**

**Release: 1**

# **Assessment Requirements for MSFKB4007 Design ancillary residential cabinetry**

## **Modification History**

Release 1 - New unit of competency

## **Performance Evidence**

- Liaise with client to establish design requirements for ancillary residential cabinetry
- Inspect the installation site to take measurements, identify available services and structural features and develop cabinetry design options to discuss with the client
- Calculate trade and associated labour costs such as plant/equipment and overheads for completing the design brief work to specifications
- Produce and present to the client a quote that documents cabinetry fabrication, installation and design costs in a manner that informs the client of their choices and the details of the inclusions
- Confirm client choices for the cabinetry and complete design documentation, including drawings, costing and specifications for client approval
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## **Knowledge Evidence**

- Processes used for the construction and installation of cabinets
- Features and limitations of cabinets and components
- State or territory WHS legislation, regulations, standards and codes of practice relevant to cabinets and components
- Relevant information resources
- Costing techniques

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, supervisor's reports and completed design and quotation documentation for residential cabinetry.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to work-related information resources.
