Assessment Requirements for MSFPF3010 De-frame artwork

Release: 1

Assessment Requirements for MSFPF3010 De-frame artwork

Modification History

Release 1. Supersedes and is equivalent to MSFPF3001 De-frame artwork.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- de-framed and documented 5 artwork items that include:
    - an object
    - a textile
    - a work on paper
    - a canvas.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for dismantling of framed items
- different reasons for de-framing artwork and how the scope of work may vary
- safety considerations and requirements when de-framing, including personal protective equipment
- frame construction techniques, materials and processes
- techniques for de-framing artwork, the types of problems that can occur and how to respond
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools used to de-frame artwork:
    - cutting blades
    - hand-operated tools
    - pincers
    - pliers and marking out tools
    - screwdrivers
- documentation requirements for de-framing, including recording for reference all components and their positioning
- potential effects of the de-framing process on the artwork and liabilities and obligations
- artwork conservation handling techniques and practices.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - workspace equipped with:
        - tools and equipment to complete de-framing tasks in the Performance Evidence
        - personal protective equipment
    - work orders and condition reports.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
