**Release: 1**

## MSFSF3015 Construct Roman-style blinds

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to construct and sew bonded, cascade, looped, oriental, staggered, straight or relaxed Roman-style blinds using lining, interlining or full block fabric and aluminium or timber battens. It does not include wood-weave style Roman blinds, and it does not include blind installation. Workers with this competency interpret work documentation, identify fabrics and components to be used, and plan and complete construction, resolving routine problems and faults and optimising workflow and productivity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Competency Field

Soft furnishing

### Elements and Performance Criteria

| Elements                                   | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Elements describe the essential outcomes.      | Performance criteria describe the performance needed to demonstrate achievement of the element.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                                                | blinds<br>1.7 Identify task sequence and quality checks for each stage to optimise workflow and avoid rework                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2. Sew Roman-style blinds                      | 2.1 Lay out fabric according to workplace procedures<br>2.2 Measure and mark out fold and stitching lines for batten placement according to task requirements<br>2.3 Hold fabric together and support where required according to workplace procedures<br>2.4 Complete pre-batten machine sewing operations according to workplace procedures<br>2.5 Measure and check finished length and width of panels against task requirements, and adjust where required<br>2.6 Insert batten pockets and fix according to workplace procedures<br>2.7 Complete post-batten hems and corners, and trim threads |
| 3. Assemble Roman-style blinds                 | 3.1 Attach child safety labels and hardware<br>3.2 Attach care labels<br>3.3 Attach fabric to the headboard or track<br>3.4 Attach rings and affix lifting cords                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 4. Finalise construction of Roman-style blinds | 4.1 Check that finished blind complies with quality and other task requirements and rectify and report identified deficiencies within scope of own role<br>4.2 Protect finished work and dispatch to next process according to workplace procedures<br>4.3 Clean work area and surfaces and dispose of waste safely and sustainably according to workplace procedures<br>4.4 Check and store tools and equipment, and tag and report faulty items according to workplace procedures<br>4.5 Complete and process task documentation according to workplace procedures                                  |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information on familiar workplace documents
- Numeracy skills to measure and calculate length and area and material requirements
- Oral communication skills to confirm and clarify task requirements and to support cooperative and efficient workflow

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF3014 Construct Roman-style blind.
