# MSF Furnishing Training Package

**Release: 6.0**

# CONTENTS

**MSF10113 Certificate I in Furnishing ..... 31**
**MSF20113 Certificate II in Furnishing ..... 34**
**MSF20213 Certificate II in Furniture Finishing ..... 43**
**MSF20313 Certificate II in Furniture Making ..... 46**
**MSF20413 Certificate II in Glass and Glazing ..... 51**
**MSF20516 Certificate II in Furniture Making Pathways ..... 55**
**MSF30113 Certificate III in Furniture Finishing ..... 58**
**MSF30213 Certificate III in Furniture Making ..... 62**
**MSF30313 Certificate III in Timber and Composites Machining ..... 66**
**MSF30422 Certificate III in Glass and Glazing ..... 72**
**MSF30518 Certificate III in Picture Framing ..... 78**
**MSF30613 Certificate III in Soft Furnishing ..... 81**
**MSF30713 Certificate III in Upholstery ..... 86**
**MSF30818 Certificate III in Flooring Technology ..... 90**
**MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles ..... 96**
**MSF31018 Certificate III in Interior Decoration Retail Services ..... 103**
**MSF31113 Certificate III in Cabinet Making ..... 107**
**MSF31213 Certificate III in Piano Technology ..... 114**
**MSF40118 Certificate IV in Interior Decoration ..... 118**
**MSF40222 Certificate IV in Furniture Design and Manufacturing ..... 122**
**MSF40318 Certificate IV in Kitchen and Bathroom Design ..... 127**
**MSF40418 Certificate IV in Glass and Glazing ..... 131**
**MSF50218 Diploma of Interior Design ..... 135**
**MSF50322 Diploma of Furniture Design and Manufacturing ..... 139**
**MSF60118 Advanced Diploma of Interior Design ..... 143**
**MSFAH4003 Advise on security technology, hardware and services ..... 147**
**Assessment Requirements for MSFAH4003 Advise on security technology, hardware and services ..... 150**
**MSFAH4004 Prepare architectural door hardware schedules ..... 152**
**Assessment Requirements for MSFAH4004 Prepare architectural door hardware schedules ..... 155**
**MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles ..... 157**
**Assessment Requirements for MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles ..... 160**
**MSFBA3011 Assemble awnings ..... 164**
**Assessment Requirements for MSFBA3011 Assemble awnings ..... 167**
**MSFBA3012 Assemble interior blinds ..... 170**
**Assessment Requirements for MSFBA3012 Assemble interior blinds ..... 173**
**MSFBA3014 Assemble pelmets ..... 176**
**Assessment Requirements for MSFBA3014 Assemble pelmets ..... 179**
**MSFBA3015 Install louvre shutters ..... 183**
**Assessment Requirements for MSFBA3015 Install louvre shutters ..... 187**
**MSFBA3016 Install awnings ..... 191**
**Assessment Requirements for MSFBA3016 Install awnings ..... 195**
**MSFBA3017 Install interior blinds ..... 199**
**Assessment Requirements for MSFBA3017 Install interior blinds ..... 202**
**MSFBA3018 Assess suitability of blinds and awnings ..... 205**
**Assessment Requirements for MSFBA3018 Assess suitability of blinds and awnings ..... 208**

**MSFBA3019 Assemble roller shutters ....211**
**Assessment Requirements for MSFBA3019 Assemble roller shutters....214**
**MSFBA3020 Install roller shutters....217**
**Assessment Requirements for MSFBA3020 Install roller shutters ....221**
**MSFBA3021 Assemble louvre shutters....225**
**Assessment Requirements for MSFBA3021 Assemble louvre shutters ....228**
**MSFDG3001 Protect leadlight and stained glass ....231**
**Assessment Requirements for MSFDG3001 Protect leadlight and stained glass....233**
**MSFDG3002 Prepare and install architectural engineered leadlight and stained glass ...235**
**Assessment Requirements for MSFDG3002 Prepare and install architectural engineered leadlight and stained glass....238**
**MSFDG3004 Assemble copper foil glass components ....240**
**Assessment Requirements for MSFDG3004 Assemble copper foil glass components....243**
**MSFDG3005 Fuse glass....245**
**Assessment Requirements for MSFDG3005 Fuse glass....248**
**MSFDG3006 Process coloured and textured glass by hand....250**
**Assessment Requirements for MSFDG3006 Process coloured and textured glass by hand253**
**MSFDN4003 Produce patterns and templates ....255**
**Assessment Requirements for MSFDN4003 Produce patterns and templates....259**
**MSFDN5001 Generate and transfer complex computer-aided drawings and specifications261**
**Assessment Requirements for MSFDN5001 Generate and transfer complex computer-aided drawings and specifications ....265**
**MSFFDM4001 Assemble custom furniture....267**
**Assessment Requirements for MSFFDM4001 Assemble custom furniture....270**
**MSFFDM4002 Collect and interpret information to support production processes....273**
**Assessment Requirements for MSFFDM4002 Collect and interpret information to support production processes ....277**
**MSFFDM4003 Construct and evaluate prototypes and samples ....279**
**Assessment Requirements for MSFFDM4003 Construct and evaluate prototypes and samples....282**
**MSFFDM4004 Construct joints for custom furniture....285**
**Assessment Requirements for MSFFDM4004 Construct joints for custom furniture ....288**
**MSFFDM4005 Design, construct and test jigs ....290**
**Assessment Requirements for MSFFDM4005 Design, construct and test jigs....293**
**MSFFDM4006 Hand carve wood to custom design....295**
**Assessment Requirements for MSFFDM4006 Hand carve wood to custom design ....298**
**MSFFDM4007 Identify and calculate production costs ....301**
**Assessment Requirements for MSFFDM4007 Identify and calculate production costs....304**
**MSFFDM4008 Investigate materials and technologies for design projects....306**
**Assessment Requirements for MSFFDM4008 Investigate materials and technologies for design projects....309**
**MSFFDM4009 Match furnishing style and materials to customer requirements ....311**
**Assessment Requirements for MSFFDM4009 Match furnishing style and materials to customer requirements....314**
**MSFFDM4010 Prepare and present design and manufacturing information ....317**
**Assessment Requirements for MSFFDM4010 Prepare and present design and manufacturing information ....319**
**MSFFDM4011 Prepare tender submissions....321**
**Assessment Requirements for MSFFDM4011 Prepare tender submissions ....324**
**MSFFDM4012 Produce computer-aided line and component production drawings....326**
**Assessment Requirements for MSFFDM4012 Produce computer-aided line and component production drawings....328**
**MSFFDM4013 Produce curved and shaped components for custom furniture ....330**

**Assessment Requirements for MSFFDM4013 Produce curved and shaped components for custom furniture ....333**
**MSFFDM4014 Produce manual and computer-aided drawings from design concepts ....336**
**Assessment Requirements for MSFFDM4014 Produce manual and computer-aided drawings from design concepts....339**
**MSFFDM4015 Produce patterns and templates....341**
**Assessment Requirements for MSFFDM4015 Produce patterns and templates ....343**
**MSFFDM4016 Produce timber veneered components for custom furniture....345**
**Assessment Requirements for MSFFDM4016 Produce timber veneered components for custom furniture ....348**
**MSFFDM4017 Purchase materials and consumables ....351**
**Assessment Requirements for MSFFDM4017 Purchase materials and consumables....354**
**MSFFDM4018 Research and organise product inspection and testing....356**
**Assessment Requirements for MSFFDM4018 Research and organise product inspection and testing....359**
**MSFFDM4019 Research and select manufacturing technologies ....361**
**Assessment Requirements for MSFFDM4019 Research and select manufacturing technologies ....364**
**MSFFDM4020 Research and select product finishes ....366**
**Assessment Requirements for MSFFDM4020 Research and select product finishes....368**
**MSFFDM4021 Research furniture styles and movements....370**
**Assessment Requirements for MSFFDM4021 Research furniture styles and movements373**
**MSFFDM4022 Select, use and maintain hand tools for the creation of custom products 375**
**Assessment Requirements for MSFFDM4022 Select, use and maintain hand tools for the creation of custom products....378**
**MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs....380**
**Assessment Requirements for MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs....383**
**MSFFDM5001 Construct custom furniture using advanced techniques....385**
**Assessment Requirements for MSFFDM5001 Construct custom furniture using advanced techniques....390**
**MSFFDM5002 Coordinate and optimise workplace maintenance programs....392**
**Assessment Requirements for MSFFDM5002 Coordinate and optimise workplace maintenance programs....395**
**MSFFDM5003 Design product suitable for batched or limited production....397**
**Assessment Requirements for MSFFDM5003 Design product suitable for batched or limited production ....401**
**MSFFDM5004 Design product suitable for high-volume technology services in production404**
**Assessment Requirements for MSFFDM5004 Design product suitable for high-volume technology services in production ....408**
**MSFFDM5005 Design product suitable for mass production ....411**
**Assessment Requirements for MSFFDM5005 Design product suitable for mass production414**
**MSFFDM5006 Develop and document technical workplace information....416**
**Assessment Requirements for MSFFDM5006 Develop and document technical workplace information....418**
**MSFFDM5007 Develop, trial and evaluate prototypes ....420**
**Assessment Requirements for MSFFDM5007 Develop, trial and evaluate prototypes....423**
**MSFFDM5008 Evaluate design proposals and concepts....426**
**Assessment Requirements for MSFFDM5008 Evaluate design proposals and concepts ..429**
**MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications ....431**

**Assessment Requirements for MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications ....434**
**MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design ....436**
**Assessment Requirements for MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design....438**
**MSFFDM5011 Plan production....440**
**Assessment Requirements for MSFFDM5011 Plan production ....442**
**MSFFDM5012 Research, test and apply materials and technologies for design projects.444**
**Assessment Requirements for MSFFDM5012 Research, test and apply materials and technologies for design projects....447**
**MSFFDM5013 Work collaboratively on design projects ....449**
**Assessment Requirements for MSFFDM5013 Work collaboratively on design projects..451**
**MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing ....453**
**Assessment Requirements for MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing....456**
**MSFFDT4012 Research furniture styles and movements....459**
**Assessment Requirements for MSFFDT4012 Research furniture styles and movements 464**
**MSFFT4007 Sample, inspect and test products to specifications ....466**
**Assessment Requirements for MSFFT4007 Sample, inspect and test products to specifications ....470**
**MSFFT4010 Identify and calculate production costs ....472**
**Assessment Requirements for MSFFT4010 Identify and calculate production costs....476**
**MSFFT4011 Purchase materials and consumables ....478**
**Assessment Requirements for MSFFT4011 Purchase materials and consumables....482**
**MSFFT4012 Prepare a tender submission....484**
**Assessment Requirements for MSFFT4012 Prepare a tender submission ....488**
**MSFGG2017 Fabricate and install insect and security screens....490**
**Assessment Requirements for MSFGG2017 Fabricate and install insect and security screens....493**
**MSFGG3032 Mirror glass....495**
**Assessment Requirements for MSFGG3032 Mirror glass ....498**
**MSFGG4009 Apply standards and codes of practice for the glass industry ....500**
**Assessment Requirements for MSFGG4009 Apply standards and codes of practice for the glass industry....503**
**MSFGG4010 Use glass industry data systems....506**
**Assessment Requirements for MSFGG4010 Use glass industry data systems ....508**
**MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings....510**
**Assessment Requirements for MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings ....513**
**MSFGG4014 Operate complex glass processing plant control systems....515**
**Assessment Requirements for MSFGG4014 Operate complex glass processing plant control systems ....519**
**MSFGG4015 Manage glass processing plant shutdown and restart....521**
**Assessment Requirements for MSFGG4015 Manage glass processing plant shutdown and restart....523**
**MSFGG4016 Plan and coordinate commercial glazing installations ....525**
**Assessment Requirements for MSFGG4016 Plan and coordinate commercial glazing installations....528**
**MSFGN3003 Advise customers on products and services ....530**
**Assessment Requirements for MSFGN3003 Advise customers on products and services 533**

# MSF10113 Certificate I in Furnishing

## Modification History

Release 5. Imported units updated. Supersedes and is equivalent to MSF10113 Certificate I in Furnishing (Release 4).

Release 4. Minor changes. Supersedes and is equivalent to MSF10113 Certificate I in Furnishing (Release 3).

Release 3. Imported units updated. Supersedes and is equivalent to MSF10113 Certificate I in Furnishing (Release 2).

Release 2. Imported units updated. Supersedes and is equivalent to MSF10113 Certificate I in Furnishing (Release 1).

Release 1. Supersedes but is not equivalent to LMF10108 Certificate I in Furnishing.

## Qualification Description

This qualification describes the skills and knowledge required to perform basic furnishing industry tasks used in a range of industry job roles involving given routines and procedures and limited accountability for the quality of outcomes while supporting others.

This qualification is typically used to develop skills and knowledge in basic furnishing techniques that include a variety of employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To be awarded the MSF10113 Certificate I in Furnishing, competency must be achieved in **eight (8)** units of competency, including:

© Commonwealth of Australia, 2025 Skills Insight

- **five (5)** core units of competency
- **three (3)** elective units of competency.

**CORE UNITS**

Complete all **five (5)** units from this list:

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS100 | Follow WHS procedures |
| MSMOPS101 | Make measurements |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |

**ELECTIVE UNITS**

Select a maximum of **three (3)** elective units from Group A or B.

**Group A**

Select up to **three (3)** elective units from Group A.

| Unit code | Unit title |
|---|---|
| CUADES201 | Follow a design process |
| CUADES202 | Evaluate the nature of design in a specific industry context |
| CUADES301 | Explore the use of colour |
| MSFBA1001 | Construct a basic roll up blind |
| MSFFF1001 | Complete a basic furniture finishing product |
| MSFFL1001 | Complete simple floor covering installation |
| MSFFM1001 | Construct a basic timber furnishing product |
| MSFFM1002 | Operate basic woodworking machines |
| MSFGG1001 | Complete a basic glass and glazing project |

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSFSS3005 | Assemble non-security and security screens and grilles |
| MSFID1001 | Plan the decoration of a simple space |
| MSFPF1001 | Frame a simple artwork |
| MSFSF1001 | Produce basic soft furnishing accessories |
| MSFUP1001 | Complete a basic upholstery project |

**Group B**

**Two (2)** units may be chosen from units available in this Training Package or from other endorsed Training Packages and accredited courses. The units must be aligned at Certificate I or II level.

# MSF20113 Certificate II in Furnishing

## Modification History

Release 8. Imported units updated. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 7)

Release 7. Minor upgrades. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 6).

Release 6. Imported units updated. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 5).

Release 5. Imported unit updated. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 4).

Release 4. Imported units updated. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 3).

Release 3. Imported units updated. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 2)..

Release 2. Unit titles corrected for MSFFM2010 and MSFSF2014. Supersedes and is equivalent to MSF20113 Certificate II in Furnishing (Release 1).

Release 1. New qualification.

## Qualification Description

This qualification describes the skills and knowledge required to perform basic furnishing industry tasks used in a range of industry job roles involving known routines and procedures and some accountability for the quality of outcomes.

This qualification is typically used to develop skills and knowledge in basic furnishing techniques that include employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

# Entry Requirements

There are no entry requirements for this qualification.

# Packaging Rules

To be awarded the MSF20113 Certificate II in Furnishing, competency must be achieved in **fourteen (14)** units of competency including:

- **five (5)** core units of competency
- **nine (9)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list:

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS200 | Work safely |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFGN2001 | Make measurements and calculations |

**ELECTIVE UNITS**

Select up to **nine (9)** elective units from Groups A and B as specified below.

**Group A**

**Security screens and grilles**

| Unit code | Unit title |
|---|---|
| MSFBA2001 | Use blinds, awnings, security screens and grilles hand and power tools |
| MSFFM2010 | Set up and operate basic static machines |
| MSFGG2016 | Assemble glazing products |
| MSFSS3005 | Assemble non-security and security screens and grilles |
| MSFSS2001 | Rectify faults in product |

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSFSS2003 | Undertake surface preparation |

**Picture framing**

| Unit code | Unit title |
|---|---|
| MSFPF2009 | Cut mouldings to length |
| MSFPF2010 | Join mouldings |
| MSFPF2011 | Mount artwork |
| MSFPF2012 | Cut mat boards |
| MSFPF2013 | Cut and handle glazing |
| MSFPF2014 | Assemble basic artwork packages |

**Soft furnishings production**

| Unit code | Unit title |
|---|---|
| MSFSF2015 | Cut single layer fabrics |
| MSFSF2002 | Machine sew materials |
| MSFSF2003 | Machine sew specialised sewn products |
| MSFSF2004 | Hand sew soft furnishings |
| MSFSF2005 | Operate a steam press |
| MSFSF2006 | Calculate fabric quantities for window coverings |
| MSFSF2007 | Construct unlined curtains and drapes |
| MSFSF2008 | Construct lined curtains and drapes |
| MSFSF2009 | Construct padded pelmets |
| MSFSF2014 | Use soft furnishing sector hand and power tools |

**Blinds, awnings and shade sail - production**

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSTTF2009 | Identify and select canvas and sail materials |
| MSTTF2014 | Weld plastic materials |
| MSFBA2001 | Use blinds, awnings, security screens and grilles hand and power tools |
| MSFBA2002 | Set up, operate and maintain blinds and awnings sector static machines |
| MSFBA2004 | Construct roll-up and pull-down style blinds and awnings |
| MSFBA2005 | Construct vertical-style blinds |
| MSFBA2006 | Construct textiles for canopy-style awnings |
| MSFBA2007 | Construct plastic and timber Venetian-style blinds |
| MSFBA2008 | Construct aluminium Venetian-style blinds |
| MSFBA2009 | Construct metal louvre and canopy-hooded style awnings |
| MSFBA2010 | Construct aluminium roll-up style awnings |

**Blinds, awnings and shade sail - installation**

| Unit code | Unit title | Prerequisites |
|---|---|---|
| AHCLS321 | Install metal structures and features | |
| CPCCCM2002 | Carry out hand excavation | *CPCCWHS2001 - Apply WHS requirements, policies and procedures in the construction industry |
| CPCCCO2013 | Carry out concreting to simple forms | *CPCCWHS2001 - Apply WHS requirements, policies and procedures in the construction industry |
| CPCWHS1001 | Prepare to work safely in the construction industry | |
| MSTGN2005 | Perform minor maintenance | |
| MSTTF2015 | Install products on and off-site | |
| MSFBA3016 | Install awnings | |

# MSF20213 Certificate II in Furniture Finishing

## Modification History

Release4. Metadata has been updated.

Release 3. Imported units updated. Equivalent.

Release 2. Imported units updated. Equivalent.

Release 1. New qualification

## Qualification Description

This qualification describes the skills and knowledge required to perform a range of finishing techniques for furniture and covers basic dismantling and assembly of furniture items for surface finishing involving known routines and procedures and some accountability for the quality of outcomes. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To be awarded the MSF20213 Certificate II in Furniture Finishing, competency must be achieved in **thirteen (13)** units of competency.

- **eight (8)** core units of competency
- **five (5)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

**CORE UNITS**

© Commonwealth of Australia, 2025 Skills Insight

Complete all **eight (8)** units from this list.

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS100 | Follow WHS procedures |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFFF2001 | Use furniture finishing sector hand and power tools |
| MSFFF2003 | Remove surface coatings |
| MSFGN2001 | Make measurements and calculations |
| TLID2003 | Handle dangerous goods/hazardous substances |

**ELECTIVE UNITS**

Select **five (5)** units from Groups A and B as specified below.

**Group A**

Select a minimum of **three (3)** units from Group A.

| Unit code | Unit title |
|---|---|
| MSFFF2002 | Dismantle and reassemble furniture |
| MSFFF2004 | Prepare surfaces for finishing |
| MSFFF2005 | Maintain spray equipment and booth |
| MSFFF2006 | Apply surface coatings by spray gun |
| MSFFF2007 | Apply stains, fillers and bleach |
| MSFFF2008 | Apply surface coatings by hand |

**Group B**

© Commonwealth of Australia, 2025 Skills Insight

A maximum of **two (2)** relevant units may be chosen from other units not selected in Group A, or units available in this Training Package, other endorsed Training Packages and accredited courses. The units must be aligned at Certificate II or III level.

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

## Qualification Mapping Information

Supersedes and is based on LMF20202 Certificate II in Furniture Finishing. Outcomes are equivalent.

# MSF20313 Certificate II in Furniture Making

## Modification History

Release 7. Imported units and metadata updated.

Release 6. Imported units updated. Equivalent.

Release 5. Qualification Descriptor adjusted to reflect target group - no change to qualification.

Release 4. Group A selection corrected. Additional information in qualification descriptor. Imported units updated. Equivalent.

Release 3. Imported units updated. Equivalent.

Release 2. Unit title corrected for MSFFM2010. No change in outcomes.

Release 1. New qualification

## Qualification Description

This qualification describes the skills and knowledge required to perform the manufacture of free-standing furniture or built-in cabinets, and provide on-site assistance in the installation of furniture or cabinets involving known routines and procedures and some accountability for the quality of outcomes. It reflects vocational outcomes for those performing assistant cabinet maker, assistant installer of built-in cabinets, and production operator within a cabinet making enterprise. Cabinets include free-standing and built-in furniture or fitted cabinets, such as those used in kitchens and bathrooms. Skills are also included that cover assisting in the installation or renovation of kitchens and bathrooms and other fitted cabinets, which involves collaboration with others through members of a group or team. This qualification does not cover shopfitting.

Meaningful involvement of industry is essential to achieving this qualification outcome.

This qualification is suitable for persons employed in furniture making as described above. It also applies to persons who are formally engaged in a traineeship in accordance with the Australian Apprenticeships policy. The MSF20516 Certificate II in Furniture Making Pathways is the appropriate qualification for VET delivered to secondary students.

There are no specific licences that relate to this qualification. However, depending on the state and territory where work is undertaken licensing may relate to this qualification where the candidate is required to work on-site. The licensing requirement will usually involve construction induction training. Where licensing is required the unit CPCWHS1001 - Prepare to work safely in the construction industry should be selected. If no licensing requirement exists (e.g. where all work will be off-site) then the unit MSMWHS200 Work safely should be selected

Release 1. New qualification. Supersedes and is equivalent to LMF20411 Certificate II in Glass and Glazing.

## Qualification Description

This qualification describes the skills and knowledge required to perform basic glass and glazing job roles, such as safely processing and moving thin glass. It may include assembly/repair of leadlight and stained glass involving known routines and procedures and some accountability for the quality of outcomes.

This qualification is typically used to develop skills and knowledge in basic glass and glazing techniques that include employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

# MSF20516 Certificate II in Furniture Making Pathways

## Modification History

Release 1. New qualification

## Qualification Description

This qualification applies to a learning and assessment environment where access to structured on-the-job learning in a workplace may not be available. This qualification is only for institutional delivery.

The qualification is intended for people interested in exposure to a furniture making or related working environment with a view to entering into employment in that area.

This qualification delivers broad-based underpinning skills and knowledge in a range of furniture making tasks which will enhance the graduates' entry-level employment prospects for apprenticeships, traineeships or general employment in a furniture manufacturing environment or related workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To be awarded the MSF20516 Certificate II in Furniture Making Pathways competency must be achieved in a minimum of twelve (12) units of competency, chosen as outlined below:

- all five (5) core units of competency
- a minimum of six (6) units of competency from Group A
- a maximum of one (1) unit of competency from Group B.

There are no units with prerequisite requirements in this qualification.

This qualification does not allow for the importation of units of competency from other Training Packages or other MSF qualifications. The units listed below are the only units that can be accessed for achievement of this qualification.

© Commonwealth of Australia, 2025 Skills Insight

**Core units**

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMPCI103 | Demonstrate care and apply safe practices at work |
| MSFGN2001 | Make measurements and calculations |
| MSFFP2001 | Undertake a basic furniture making project |
| MSFFP2002 | Develop a career plan for the furnishing industry |

**Elective units**

**Group A**

| Unit code | Unit title | Prerequisites |
|---|---|---|
| MEM16006A | Organise and communicate information | |
| MEM16008A | Interact with computing technology | |
| MSFFM2001 | Use furniture making sector hand and power tools | |
| MSFFM2002 | Assemble furnishing components | |
| MSFFM2003 | Select and apply hardware | |
| MSFFP2003 | Prepare surfaces | |
| MSFFP2004 | Apply domestic surface coatings | |
| MSFFP2005 | Join furnishing materials | |
| MSFFP2006 | Make simple timber joints | |
| MSFFP2007 | Identify materials used in furnishing production | |
| MSFFP2008 | Make a basic upholstery product | |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| MSFFP2009 | Identify materials suitable for kitchen or bathroom construction | |
| MSFFP2010 | Research and draw a basic kitchen or bathroom design | |
| **Group B** | | |
| **Unit code** | **Unit title** | **Prerequisites** |
| MSMPCI101 | Adapt to work in industry | |
| MSMSUP106 | Work in a team | |

The units coded MSFFP are pathways units for use in this qualification and other pre-vocational pathways qualifications. They should not be imported to other MSA manufacturing work based qualifications.

# MSF30113 Certificate III in Furniture Finishing

## Modification History

Release 3. Metadata updated.

Release 2. Imported units updated. Equivalent.

Release 1. New qualification

## Qualification Description

This qualification describes the skills and knowledge required to perform a wide range of tasks associated with the preparation of surfaces and applying stains, coatings and finishes to furniture in manufacture or repair. Participation in teams, including group or team coordination, may be required.

A specialisation in French polishing can be recognised in this qualification where the following elective units are achieved:

MSFFF2003 Remove surface coatings

MSFFF2004 Prepare surfaces for finishing

MSFFF2007 Apply stains, fillers and bleach

MSFFF2008 Apply surface coatings by hand

MSFFF3001 Match and make up colours

MSFFF3007 Apply graining and decorative finishes

MSFFF3008 Apply traditional French polishing techniques

Where this specialisation is achieved, RTOs should identify this as follows:

**MSF30113 Certificate III in Furniture Finishing**

**(specialising in French Polishing)**

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

Not applicable

© Commonwealth of Australia, 2025 Skills Insight

# Packaging Rules

To be awarded the MSF30113 Certificate III in Furniture Finishing, competency must be achieved in **twenty-three (23)** units of competency.

- **ten (10)** core units of competency
- **thirteen (13)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

### CORE UNITS

Complete all **ten (10)** units from this list.

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS200 | Work safely |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFFF2001 | Use furniture finishing sector hand and power tools |
| MSFFF2002 | Dismantle and re-assemble furniture |
| MSFGN2001 | Make measurements and calculations |
| MSFGN3001 | Read and interpret work documents |
| MSFGN3002 | Estimate and cost job |
| TLID2003 | Handle dangerous goods/hazardous substances |

### ELECTIVE UNITS

Select **thirteen (13)** units from Groups A, B and C as specified below.

### Group A

Select a minimum of e**ight (8)** units from Group A.

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSFFF2003 | Remove surface coatings |
| MSFFF2004 | Prepare surfaces for finishing |
| MSFFF2005 | Maintain spray equipment and booth |
| MSFFF2006 | Apply surface coatings by spray gun |
| MSFFF2007 | Apply stains, fillers and bleach |
| MSFFF3001 | Match and make up colours |
| MSFFF3003 | Apply plural component coatings |
| MSFFF3004 | Apply soft rubber techniques |
| MSFFF3006 | Repair and touch up surfaces |

### Group B

Select at least **one (1)** unit from Group B.

| Unit code | Unit title |
|---|---|
| MSFFF2008 | Apply surface coatings by hand |
| MSFFF3002 | Set up, operate and maintain mechanical coatings systems |
| MSFFF3005 | Enhance finishes |
| MSFFF3007 | Apply graining and decorative finishes |
| MSFFF3008 | Apply traditional French polishing techniques |
| MSFFF3009 | Set up, operate and maintain computer numerically controlled (CNC) coating systems |

### Group C

Up to **four (4)** relevant units may be chosen from units not already selected from Groups A and B, or units available in this Training Package or other endorsed Training Packages and accredited courses. Units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 4 units) or Certificate IV level (maximum 1 unit).

© Commonwealth of Australia, 2025 Skills Insight

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

## Packaging Rules

To be awarded the MSF30213 Certificate III in Furniture Making, competency must be achieved in **twenty-eight (28)** units of competency.

- **fifteen (15)** core units of competency
- **thirteen (13)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

**CORE UNITS**

Complete all **fifteen (15)** units from this list.

# MSF30313 Certificate III in Timber and Composites Machining

## Modification History

Release 5. Imported units and one low use unit removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives

Release 4 - Imported units updated. Equivalent.

Release 3 - Imported units updated. Equivalent.

Release 2 - Imported units updated. Equivalent.

Release 1 - New qualification

## Qualification Description

This qualification describes the skills and knowledge required to perform timber and composites machining for the manufacture of furniture, cabinetry, windows and doors, and other components utilising a range of specialist machinery, and includes preparing and working from drawings and cutting lists. The skills include static and computer numerically controlled (CNC) machine set up, operation maintenance and basic troubleshooting.

There are three possible specialist streams embedded in this qualification:

**Stream 1 -- Flat Panel Machining**

**Stream 2 – Solid Timber Machining**

**Stream 3 – Machining Technician**

Units may be chosen from the specialist stream elective groups to achieve any of the three specialisations or a broad combination of competencies can be selected from all electives with no identified specialisation.

Where specialisation is achieved, RTOs should identify this as follows:

**MSF30313 Certificate III in Timber and Composites Machining**

**(Flat Panel Machining)**

or

**MSF30313 Certificate III in Timber and Composites Machining**

**(Solid Timber Machining)**

or

**MSF30313 Certificate III in Timber and Composites Machining**

**(Machining Technician)**

© Commonwealth of Australia, 2025 Skills Insight

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

# Entry Requirements

There are no entry requirements for this qualification.

# Packaging Rules

To be awarded the MSF30313 Certificate III in Timber and Composites Machining, competency must be achieved in **twenty-seven (27)** units of competency.

- **eleven (11)** core units of competency
- **sixteen (16)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

### CORE UNITS

Complete all **eleven (11)** units from this list.

# MSF30422 Certificate III in Glass and Glazing

## Modification History

Release 1. Addition of MSFGG2017 to Group D electives. Supersedes and is equivalent to MSF30418 Certificate III in Glass and Glazing (Release 2).

## Qualification Description

This qualification reflects the role of individuals involved in manufacturing, processing, moving or installing various types of glass products. Job roles may be in glass processing, glazing or designed glazing in both residential and commercial operations.

Workers use a range of technical knowledge to perform skilled work involving known routines, methods and procedures. They use discretion and judgement to adapt and transfer their skills and knowledge to different job needs and take responsibility for their own work within organisational parameters.

In some states and territories there may be licensing requirements that link to this qualification, and other licensing requirements where the individual is required to work onsite. Depending on the jurisdiction, licensing or regulatory requirements may also apply to the use of some units in this qualification. Licensing of glazing work applies in Queensland, NSW and South Australia. Local regulations should be checked for details.

## Entry Requirements

Nil

## Packaging Rules

Total number of units = 23 including:

- 8 core units
- 15 elective units consisting of:
- 1 unit only from Group A
- at least 8 units in any combination from Groups B, C, D or E
- up to 6 additional units from Group B, C, D, E, F, or any endorsed Training Package or accredited course. These units must be relevant to the work outcome as outlined in the qualification description above, must not duplicate the outcome of other units available within this qualification, and if imported from other Training Packages, at least 4 must be units reflecting outcomes at AQF level 3 or higher.

Electives may be packaged to provide a qualification with a specialisation. General packaging rules must still be met when packaging units for a specialisation.

© Commonwealth of Australia, 2025 Skills Insight

All Group B electives and at least 6 Group C electives, including those marked with '#', must be selected for the award of *MSF30422 Certificate III in Glass and Glazing (Glass Processing).*

All Group B electives and at least 6 Group D electives, including those marked with '#'**,** plus at least 1 installation unit (MSFGG3033 – MSFGG3037), must be selected for the award of *MSF30422 Certificate III in Glass and Glazing (Glazing).*

At least 3 Group E electives, including those marked with '#', must be selected for the award of *MSF30422 Certificate III in Glass and Glazing (Designed Glazing).*

**CORE UNITS**

| **Unit code** | **Unit title** | **Prerequisite** |

# MSF30518 Certificate III in Picture Framing

## Modification History

Release 2. One elective unit updated. Supersedes and equivalent to MSF30518 Certificate III in Picture Framing (Release 1).

Release 1. Supersedes and is equivalent to MSF30513 Certificate III in Picture Framing.

## Qualification Description

This qualification reflects the role of a picture framer. Picture framers usually work in small retail outlets, which provide framing services to the general public. However, they may also undertake framing for businesses and specialise in particular types of framing.

Picture framers assess framing design requirements and use a range of technical skills to create artwork packages of varying complexity. In the first instance, they assess framing requirements from both a technical and design perspectives. Picture framers then use discretion and judgment and specialised knowledge and skills to select and use equipment and materials to achieve the desired framing effects.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

# MSF30613 Certificate III in Soft Furnishing

## Modification History

Release 5. Imported units updated

Release 4. Minor upgrades. Supersedes and is equivalent to MSF30613 Certificate III in Soft Furnishing (Release 3).

Release 3. Imported units updated. Supersedes and is equivalent to MSF30613 Certificate III in Soft Furnishing (Release 2).

Release 2. Imported units updated. Supersedes and is equivalent to MSF30613 Certificate III in Soft Furnishing (Release 1).

Release 1. New qualification. Supersedes and is equivalent to LMF30902 Certificate III in Soft Furnishing.

## Qualification Description

This qualification describes the skills and knowledge required to perform soft furnishing sewing, selection, manufacture and installation of curtains and drapes and/or blinds with required fittings and may include production administration, quality assurance, sales and manufacture of bedspreads, linen and soft furnishing accessories.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To be awarded the MSF30613 Certificate III in Soft Furnishing, competency must be achieved in **twenty (20)** units of competency, including:

- **six (6)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

**CORE UNITS**

© Commonwealth of Australia, 2025 Skills Insight

Complete all **six (6)** units from this list.

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS200 | Work safely |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFSF2014 | Use soft furnishing sector hand and power tools |
| MSFSF3008 | Measure up and calculate fabric quantities for window coverings |

**ELECTIVE UNITS**

Select **fourteen (14)** units from Groups A, B and C as specified below.

Select a minimum of **ten (10)** units from Groups A and B.

**Group A - Manufacture**

| Unit code | Unit title |
|---|---|
| MSFSF2015 | Cut single layer fabrics |
| MSFSF2002 | Machine sew materials |
| MSFSF2003 | Machine sew specialised sewn products |
| MSFSF2004 | Hand sew soft furnishings |
| MSFSF2005 | Operate a steam press |
| MSFSF2007 | Construct unlined curtains and drapes |
| MSFSF2008 | Construct lined curtains and drapes |
| MSFSF2009 | Construct padded pelmets |
| MSFSF3001 | Operate drop cutting machines |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| MSFSF3002 | Use automated curtain pleating equipment |
| MSFSF3003 | Follow patterns to produce window toppings |
| MSFSF3014 | Construct Roman-style blinds |
| MSFSF3005 | Construct Austrian festoon-style blinds |
| MSFSF3006 | Chemically join textiles |
| MSFSF3007 | Lay out patterns and cut fabrics |
| MSFSF3009 | Manufacture bedspreads, bed linen and table cloths |
| MSFSF3012 | Follow patterns to produce soft furnishing accessories |

### Group B - Installation

| **Unit code** | **Unit title** |
|---|---|
| MSFSF2010 | Make up tracks for window coverings |
| MSFSF2011 | Fit and adjust curtain hardware |
| MSFSF2012 | Fit and adjust interior blinds |
| MSFSF2013 | Dress windows |
| MSFSF3011 | Install motorised curtains and blinds |

### Group C

Up to **four (4)** relevant units may be chosen from:

- units not already selected from Groups A and B
- Group C units, below
- other units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 4 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

# MSF30713 Certificate III in Upholstery

## Modification History

Release 3. Metadata updated.

Release 2. Imported units updated. Equivalent.

Release 1. New qualification

## Qualification Description

This qualification describes the skills and knowledge required to perform upholstery, including dismantling and reassembling furniture; selecting, cutting, sewing and fitting fabric and leather upholstery materials; and producing loose covers. There is a specialist stream in production upholstery.

Specialisation is possible in this qualification depending on the electives chosen. A specialisation can be identified on the testamur where a minimum of two (2) Group A elective units of competency are achieved in production upholstery.

Where the production upholstery specialisation is achieved, RTOs should identify this as follows:

**MSF30713 Certificate III in Upholstery**

**(specialising in Production Upholstery)**

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

Not applicable

## Packaging Rules

To be awarded the MSF30713 Certificate III in Upholstery, competency must be achieved in **twenty-five (25)** units of competency.

- **fourteen (14)** core units of competency
- **eleven (11)** elective units of competency.

© Commonwealth of Australia, 2025 Skills Insight

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

## CORE UNITS

Complete all **fourteen (14)** units from this list.

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS200 | Work safely |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFGN2001 | Make measurements and calculations |
| MSFGN3001 | Read and interpret work documents |
| MSFGN3002 | Estimate and cost job |
| MSFUP2001 | Use upholstery sector hand and power tools |
| MSFUP2002 | Fit upholstery components |
| MSFUP2004 | Machine sew basic upholstery final cover materials |
| MSFUP2005 | Develop cutting plan and cut single layer upholstery fabric |
| MSFUP2006 | Dismantle and reassemble furniture for upholstering |
| MSFUP3002 | Fit and apply final cover materials to furniture using basic techniques |
| TLID2003 | Handle dangerous goods/hazardous substances |

## ELECTIVE UNITS

Select **eleven (11)** units from Groups A, B and C as specified below.

### Group A

Select a minimum of **two (2)** units from Group A.

| Unit code | Unit title |
|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| **Production Upholstery Stream** | |
| MSFUP2003 | Apply contemporary foundations to upholstered furniture |
| MSFUP3008 | Apply finishing techniques to upholstered furniture |

**Upholstery Stream**

| | |
|---|---|
| MSFUP3010 | Cut, sew and fit skirts to upholstered furniture |
| MSFUP3011 | Cut, sew and fit or fill cushions |

**Group B**

Select up to **nine (9)** units from Groups B and C.

| Unit code | Unit title |
|---|---|
| MSFSF3010 | Advise customers on interior decoration |
| MSFUP3001 | Apply traditional foundations to upholstered furniture |
| MSFUP3003 | Fit and apply final cover materials to furniture using decorative techniques |
| MSFUP3004 | Lay out patterns and cut leather |
| MSFUP3005 | Machine sew complex upholstery final cover materials |
| MSFUP3006 | Fit and apply leather to furniture |
| MSFUP3007 | Manufacture and fit loose covers |
| MSFUP3009 | Develop cutting plan and cut multiple layer upholstery fabric |
| MSFUP3012 | Apply marine sewing and installation techniques |
| MSFUP3013 | Cut and sew canvas and acrylics |
| MSFUP3014 | Set up, operate and maintain computer numerically controlled (CNC) cutting machines |

**Group C**

© Commonwealth of Australia, 2025 Skills Insight

Up to **six (6)** relevant units may be chosen from units not already selected from Groups A or B, or from units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 6 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

# Qualification Mapping Information

Supersedes and is based on LMF31002 Certificate III in Upholstery and LMF31102 Certificate III in Production Upholstery. Outcomes are equivalent. Additional elective units available.

# MSF30818 Certificate III in Flooring Technology

## Modification History

Release 3. Four low use units removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives. Supersedes and is equivalent to MSF30818 Certificate III in Flooring Technology (Release 2).

Release 2. Minor upgrades. Supersedes and is equivalent to MSF30818 Certificate III in Flooring Technology (Release 1).

Release 1. Supersedes but is not equivalent to MSF30813 Certificate III in Flooring Technology.

## Qualification Description

This qualification reflects the role of flooring technicians who install floors or flooring materials in residential or commercial premises. Floors and flooring materials may be carpet, timber, vinyl, resilient, resin or concrete. Flooring technicians use a range of technical knowledge to perform skilled work involving known routines, methods and procedures. They use discretion and judgement to adapt and transfer their skills and knowledge to different job needs and take responsibility for their own work.

In some states and territories, this qualification is linked to licensing requirements for the installation of timber floors. In addition, licensing or regulatory requirements may apply to the use of some units in this qualification in some jurisdictions. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

**Total number of units = 24**

- **12** core units
- **12** elective units, consisting of:
  - **at least 8 units in any combination from A, B, C or D**
  - up to 4 units from Groups A, **B, C, D, E or,** any endorsed Training Package or accredited course – these units must be relevant to the work outcome, and if imported from other Training Packages, must be units first packaged in a Certificate III level qualification or higher.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Any combination of electives that meets the rules above can be selected for the award of the Certificate III in Flooring Technology. Where appropriate, electives may be packaged to provide a qualification with a specialisation.

### Packaging for each specialisation

**At least 7** Group A electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Carpet).

**All 8** Group B electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Resilient).

**All 7** Group C electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Resin).

**At least 8** Group D electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Timber).

## CORE UNITS

| Unit Code | Unit Title |
|---|---|
| CPCCWHS1001 | Prepare to work safely in the construction industry |
| MSFFL2030 | Receive and prepare flooring materials |
| MSFFL2032 | Select, prepare and apply moisture barriers to concrete subfloors |
| MSFFL2034 | Prepare subfloors with cementitious coating applications |
| MSFFL3052 | Plan and cost flooring technology work |
| MSFFL3053 | Establish and maintain a safe flooring technology work environment |
| MSFFL3054 | Assess flooring installation sites |
| MSFGN2001 | Make measurements and calculations |
| MSFGN3001 | Read and interpret work documents |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| TLID2003 | Handle dangerous goods/hazardous substances |

# MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles

## Modification History

Release 2. One low use unit removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives. Supersedes and is equivalent to to MSF30919 Certificat III in Blinds, Awnings, Security Screens and Grilles.

Release 1. Supersedes but is not equivalent to MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles.

## Qualification Description

This qualification describes the skills and knowledge required to estimate, fabricate, assemble and install blinds, awnings, shade sails, shutters, and screens and grilles using a range of materials, fixtures and fittings.

Work is usually performed in a defined range of skilled operations, where a range of methods, tools, materials and information are used to complete routine activities. Discretion and judgement are required in selecting equipment, services and contingency measures and resolving mostly predictable problems within known time constraints.

Licensing applies in some jurisdictions for the installation of blinds, awnings, shade sails, shutters, security screens and grilles. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = **18**

- **5 core** units
- **13 elective** units, consisting of:
- at least 8 units from Group A, Group B and Group C
- up to 5 units from Group D and remaining Group A*, Group B and Group C units
- up to three units from any endorsed Training Package or accredited course provided these units are relevant to the work outcome and were first packaged in a Certificate II level qualification or higher.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available in this qualification.

© Commonwealth of Australia, 2025 Skills Insight

If units of competency selected have prerequisite units, these prerequisite units must also be selected as part of completion of this qualification.

### Packaging for specialisations

Electives may be packaged to provide a qualification with a specialisation.

At least 5 Group A electives must be selected for award of MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles (Fabrication and Assembly)

At least 5 Group B electives must be selected for award of MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles (Installation)

At least 5 Group C electives must be selected for award of MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles (Estimating Detailing)

### CORE UNITS

# MSF31113 Certificate III in Cabinet Making

## Modification History

Release 7. Elective and imported units updated. Equivalent.

Release 6. Elective units updated. Equivalent.

Release 5. Group A and Group E selection corrected. Imported units updated. Equivalent.

Release 4 - Imported units updated. Equivalent.

Release 3. Packaging for pathways clarified and choice for Group A corrected. No changes to packaging rules.

Release 2. One unit title corrected for MSFFM3010. No change in outcomes.

Release 1. New qualification

## Qualification Description

This qualification covers the skills and knowledge required to perform a range of skills at trade-level for those working in furniture making and those involved in the manufacture and installation of fitted furniture typically in a kitchen, bathroom and related context. Installation skills may be applied to new or renovation work. The work is in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

This qualification offers a generic Certificate III in Cabinet Making, as well as two pathways targeting the skill requirements of free-standing furniture makers and kitchen and bathroom cabinet makers and installers.

The following additional qualification descriptors are approved for this qualification:

**Pathway 1:** *MSF31113 Certificate III in Cabinet Making (Furniture)*

**Pathway 2:** *MSF31113 Certificate III in Cabinet Making (Kitchens and Bathrooms)*

The MSS30312 Certificate III in Competitive Systems and Practices is available for employees at this level who already possess technical skills and who require additional manufacturing practice skills above those available in this qualification.

© Commonwealth of Australia, 2025 Skills Insight

Depending on the state and territory where work is undertaken licensing may relate to this qualification where the candidate is required to work on-site assisting in kitchen and bathroom installation. The licensing requirement will usually involve construction induction training. Where licensing is required the unit CPCCOHS1001A Work safely in the construction industry should be selected. If no licensing requirement exists e.g. where all work will be off-site then the unit MSAPMOHS200A Work safely should be selected.

# Entry Requirements

There are no entry requirements for this qualification.

# Packaging Rules

To be awarded the MSF31113 Certificate III in Cabinet Making, competency must be achieved in **twenty-eight (28)** units of competency.

- **six (6)** core units of competency
- **twenty-two (22)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

### CORE UNITS

Complete all **six (6)** units from this list.

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFFM2001 | Use furniture making hand and power tools |
| MSFGN2001 | Make measurements and calculations |
| MSFGN3001 | Read and interpret work documents |

### ELECTIVE UNITS

© Commonwealth of Australia, 2025 Skills Insight

Select **twenty-two (22)** units from Groups A to F as specified below.

### Generic qualification

- **one (1)** unit from Group A
- a minimum of **eight (8)** units in any combination from Groups B, C or D
- a minimum of **eight (8)** units from Group E

### Pathway 1 – Furniture

- **one (1)** unit from Group A
- a minimum of **eight (8)** units from groups B or D
- a minimum of **eight (8)** units from Group E

### Pathway 2 – Kitchens and Bathrooms

- **one (1)** unit from Group A
- a minimum of **eight (8)** units from Groups C or D
- and a minimum of **eight (8)** units from Group E

The balance of units (up to 5) can be chosen from Group F, or from Groups B, C or D.

### Group A

| Unit code | Unit title |
|---|---|
| CPCWHS1001 | Prepare to work safely in the construction industry |
| | OR |
| MSMWHS200 | Work safely |

### Group B

| Unit code | Unit title |
|---|---|
| MSFFF2004 | Prepare surfaces for finishing |
| MSFFM2002 | Assemble furnishing components |

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSFFM2005 | Join solid timber |
| MSFFM2006 | Hand make timber joints |
| MSFFM3002 | Construct furniture using leg and rail method |
| MSFFM3005 | Fabricate custom furniture |
| MSFFM3006 | Install furnishing products |

**Group C**

| Unit code | Unit title |
|---|---|
| MSFKB2001 | Prepare for cabinet installation |
| MSFKB3002 | Determine requirements for installation of cabinets |
| MSFKB3003 | Check and measure fit of cabinets |
| MSFKB3004 | Conduct on-site adjustments to cabinets and components |
| MSFKB3005 | Fabricate cabinets for the built-in environment |
| MSFKB3006 | Install fitted cabinets and components |
| MSFKB3011 | Plan kitchen and bathroom projects |

**Group D**

| Unit code | Unit title |
|---|---|
| BSBOPS304 | Deliver and monitor a service to customers |
| MSFFM2003 | Select and apply hardware |
| MSFFM2010 | Set up, operate and maintain basic static machines |
| MSFFM2011 | Apply manufactured board conversion techniques |
| MSFFM3010 | Prepare cutting list from plans and job specifications |

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSFFM3021 | Set up, operate and maintain computer numerically controlled (CNC) sizing machines |
| MSFFM3022 | Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres |
| MSFGN3002 | Estimate and cost job |
| MSS402082 | Apply cost factors to work practices |

**Group E**

| Unit code | Unit title |
|---|---|
| CUAACD312 | Produce computer-aided drawings |
| MSMOPS363 | Organise on-site work |
| MSMPER200 | Work in accordance with an issued permit |
| MSMSUP390 | Use structured problem-solving tools |
| MSFFF2006 | Apply surface coatings by spray gun |
| MSFFM2012 | Set up, operate and maintain pressure and clamping machines |
| MSFFM3001 | Construct chair and couch frames |
| MSFFM3003 | Produce angled and curved furniture using manufactured board |
| MSFFM3004 | Produce angled and curved furniture using solid timber |
| MSFFM3007 | Prepare and apply decorative surfaces for furniture |
| MSFFM3008 | Select timbers for furniture production |
| MSFFM3009 | Produce manual and computer-aided production drawings |
| MSFFM3011 | Measure and draw site layout for manufactured furniture products |
| MSFFM3012 | Set up, operate and maintain sawing machines |
| MSFFM3013 | Set up, operate and maintain drilling machines |
| MSFFM3014 | Set up, operate and maintain joining machines |

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSFFM3015 | Set up, operate and maintain planing and finishing machines |
| MSFFM3016 | Set up, operate and maintain multi-head planing and moulding machines |
| MSFFM3017 | Set up, operate and maintain routing and shaping machines |
| MSFFM3018 | Set up, operate and maintain mechanical wood-turning lathes |
| MSFFM3019 | Set up, operate and maintain automated edge banding machines |
| MSFFM3020 | Fabricate synthetic solid surface products |
| MSFFM3023 | Produce and maintain cutting tools |
| MSFFM3024 | Construct jigs and fixtures |
| MSFFT4001 | Coordinate on-site installation of furnishing products |
| MSFFDM4018 | Research and organise product inspection and testing |
| MSFFDM4002 | Collect and interpret information to support production processes |
| MSFFDM4009 | Match furnishing style and materials to customer requirements |
| MSS402001 | Apply competitive manufacturing practices |
| MSS402002 | Sustain process improvements |
| MSS402010 | Manage the impact of change on own work |
| MSS402020 | Apply quick changeover procedures |
| MSS402021 | Apply Just in Time procedures |
| MSS402040 | Apply 5S procedures |
| MSS402050 | Monitor process capability |
| MSS402051 | Apply quality standards |
| MSS402083 | Use planning software systems in operations |
| MSS402061 | Use SCADA systems in operations |
| MSS402080 | Undertake root cause analysis |
| MSS402081 | Contribute to the application of a proactive maintenance strategy |

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| TLID0021 | Store and handle dangerous goods and hazardous substances |

**Group F**

Up to **five (5)** relevant units may be chosen from units not already selected from Groups B to E, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 5 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group F must be relevant to the qualification outcome and not duplicate units available within this qualification.

# Qualification Mapping Information

Release 5 – Group A and Group E selection corrected. Imported units updated. Equivalent.Release 4 - Imported units updated. Equivalent.

Release 3 - Packaging for pathways clarified and choice for Group A corrected. No changes to packaging rules.

Release 2 - One unit title corrected for MSFFM3010. No change in outcomes.

Release 1 - New qualification

Release 1. New qualification. Supersedes and is based on LMF32109 Certificate III in Cabinet Making. Outcomes are equivalent.

# MSF31213 Certificate III in Piano Technology

## Modification History

Release 3. Imported units and metadata updated

Release 2. Imported units updated. Equivalent.

Release 1. New qualification

## Qualification Description

This qualification describes the skills and knowledge required to repair, rebuild, re-pin, re-string and tune upright and grand pianos.

Credit can be granted towards this qualification by those who have completed a relevant Certificate II Furnishing qualification, such as MSF20213 Certificate II in Furniture Finishing or achieved equivalent industry experience.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

Not applicable

## Packaging Rules

To be awarded the MSF31213 Certificate III in Piano Technology, competency must be achieved in **twenty-five (25)** units of competency.

- **five (5)** core units of competency
- **twenty (20)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

**CORE UNITS**

Complete all **five (5)** units from this list.

© Commonwealth of Australia, 2025 Skills Insight

| Unit code | Unit title |
|---|---|
| MSMENV272 | Participate in environmentally sustainable work practices |
| MSMWHS200 | Work safely |
| MSMSUP102 | Communicate in the workplace |
| MSMSUP106 | Work in a team |
| MSFGN2001 | Make measurements and calculations |

**ELECTIVE UNITS**

Select **twenty (20)** units from Groups A, B and C as specified below.

**Group A**

Select a minimum of **twelve (12)** units from Group A.

| Unit code | Unit title | Prerequisites |
|---|---|---|
| MSFPT3001 | Apply piano industry knowledge and work techniques | |
| MSFPT3002 | Select materials for piano actions and key repairs | |
| MSFPT3003 | Repair upright and grand piano actions, keys and pedals | |
| MSFPT3004 | Rebuild upright and grand piano actions, keys and pedals | |
| MSFPT3005 | Re-string and re-pin a piano | |
| MSFPT3006 | Regulate actions, keys and pedals of upright pianos | |
| MSFPT3007 | Regulate actions, keys and pedals of grand pianos | |
| MSFPT3008 | Apply piano tuning theory and basic acoustics | |
| MSFPT3009 | Develop control of tuning hammers | |
| MSFPT3010 | Pitch raise a piano | |
| MSFPT3011 | Tune unisons aurally to a beatless condition | |
| MSFPT3012 | Tune octaves aurally to appropriate stretch | |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| MSFPT3013 | Tune a temperament octave to produce an equally tempered scale | |
| MSFPT3014 | Tune a piano aurally and electronically within time and accuracy constraints | * |
| MSFPT3015 | Voice a piano | |
| MSFPT3016 | Provide advice to customers on piano tuning and repairs | |

**Group B**

Select a minimum of **three (3)** units from Group B.

| Unit code | Unit title |
|---|---|
| MSFFF2008 | Apply surface coatings by hand |
| MSFFF3005 | Enhance finishes |
| MSFFF3006 | Repair and touch up surfaces |
| MSFFF3008 | Apply traditional French polishing techniques |
| MSFFM2002 | Assemble furnishing components |
| MSFFM2006 | Hand make timber joints |
| MSFFM2010 | Set up, operate and maintain basic static machines |
| MSFGN2002 | Move and store materials and products |
| MSFGN3001 | Read and interpret work documents |
| MSFGN3002 | Estimate and cost job |
| TLID0019 | Shift loads using manually-operated equipment |
| TLID0021 | Store and handle dangerous goods and hazardous substances |

**Group C**

Up to **five (5)** relevant units may be chosen from units not already selected from Groups A and B or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 2 units), Certificate III level (maximum 5 units) or Certificate IV level (maximum 2 units).

© Commonwealth of Australia, 2025 Skills Insight

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

# Qualification Mapping Information

Supersedes and is based on LMF31508 Certificate III in Piano Technology. Outcomes are equivalent.

# MSF40118 Certificate IV in Interior Decoration

## Modification History

Release 3. Imported units and metadata updated.

Release 2. Minor upgrades to imported unit. Supersedes and is equivalent to MSF40118 Certificate IV in Interior Decoration (Release 1)

Release 1. Supersedes and is equivalent to MSF40113 Certificate IV in Interior Decoration.

## Qualification Description

This qualification reflects the role of individuals who provide advice and practical assistance on the finishing and furnishing of existing interior spaces. They may work in retail, consulting and building businesses as interior decorators or colour consultants. Individuals in this role are typically involved in:

- working with clients and other building and design professionals and suppliers
- research and analysis of the client's goals and requirements
- planning, designing and arranging space
- interior styling
- specifying finishes and furnishings
- selection of colours
- specifications and purchasing.

Decorators use a broad range of specialised and technical knowledge and skills, and they research and compare information from diverse sources to develop decoration solutions. They also use well-developed communication skills, and may provide some leadership and guidance to others.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit CPCCWHS1001 *Prepare to work safely in the construction industry*. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 17

© Commonwealth of Australia, 2025 Skills Insight

- **7** core units
- **10** elective units, consisting of:
  - at least 7 units from the electives listed below
  - up to 3 units from the electives listed below, any endorsed Training Package or accredited course – these units must be relevant to the work outcome

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

## CORE UNITS

| | |
|---|---|
| BSBDES302 | Explore and apply the creative design process to 2D forms |
| BSBDES303 | Explore and apply the creative design process to 3D forms |
| CUAACD301 | Produce drawings to communicate ideas |
| CUAACD303 | Produce technical drawings |
| MSFGN4001 | Research and meet ethical and compliance requirements |
| MSFID4012 | Decorate residential interiors |
| MSFID4016 | Design colour schemes for interior and exterior spaces |

## ELECTIVE UNITS

| | |
|---|---|
| BSBCRT412 | Articulate, present and debate ideas |
| BSBCRT413 | Collaborate in a creative process |
| BSBESB406 | Establish operational strategies and procedures for new business ventures |
| BSBMGT402 | Implement operational plan |
| BSBTEC201 | Use business software applications |
| CPPBDN4001 | Research and evaluate construction materials and methods for building design projects |
| CUAACD312 | Produce computer-aided drawings |
| CUADES301 | Explore the use of colour |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| CUADES305 | Source and apply information on the history and theory of design |
| CUADES411 | Generate design solutions |
| CUADES413 | Develop and extend design skills and practice |
| CUADES423 | Research and apply techniques in spatial design |
| CUADIG303 | Produce and prepare photo images |
| CUADIG304 | Create visual design components |
| CUAILL401 | Develop and refine illustrative work |
| MSFID4013 | Design residential interior lighting |
| MSFID4015 | Prepare materials and finishes boards for client presentation |
| MSFID4017 | Research and recommend furniture and accessories |
| MSFID4019 | Research interior decoration and design influences |
| MSFID4021 | Design soft furnishing solutions for interior spaces |
| MSFSF3008 | Measure up and calculate fabric quantities for window coverings |
| MSFSF3010 | Advise customers on interior decoration |
| MSFSF3013 | Provide technical advice to customers |
| MSMENV472 | Implement and monitor environmentally sustainable work practices |
| MSMWHS200 | Work safely |
| SIRRMER004 | Develop visual merchandising creative concepts |
| SIRRMER005 | Implement visual merchandising concepts |
| SIRRMER007 | Design and install visual merchandising displays |
| SIRRMER009 | Plan and organise display lighting |
| SIRRMER011 | Design and install merchandise signage |

# MSF40222 Certificate IV in Furniture Design and Manufacturing

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the role of individuals who work in product design–related and manufacturing or custom-made furniture roles in furniture or similar organisations where a combination of technical, creative, practical, research and project coordination skills is required. At this level, these individuals use knowledge of design principles and concepts in a practical way to drive design process, materials capability and production processes to develop and create product and process solutions in response to varied design briefs. Depending on the context, an individual may also use other product-specific technical production skills.

There are no specific licenses that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 18

- 5 core units
- 13 elective units selected from those listed below, or from any endorsed training package or accredited course (these units must be relevant to the work outcome), and comprising:
  - a minimum of 8 MSF-coded units
  - a minimum of 1 unit from each of Groups A to F.

The remaining 4 electives may be chosen from any endorsed training package or accredited course (these units must be relevant to the work outcome). Units selected from other training packages and accredited courses must not duplicate units available within this qualification.

| **Core Units** | |

# MSF40318 Certificate IV in Kitchen and Bathroom Design

## Modification History

Release 2. Imported units updated. Supersedes and is equivalent to MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces (Release 1).

Release 1. Supersedes and is equivalent to MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces.

## Qualification Description

This qualification reflects the role of individuals who design kitchens and bathrooms that typically feature built-in cabinetry and furniture. They may work in larger organisations or as independent designers.

Designers work directly with the client and/or with professionals, such as architects, builders, retailers, interior designers and suppliers. They possess a broad range of specialised and technical knowledge and skills, and they research and compare information from diverse sources to develop design solutions. They also use well-developed communication skills and may provide some leadership and guidance to others.

There are no specific licences that relate to this qualification. Work may require access to construction sites and require White Card construction induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 16

- **11** core units
- **5** elective units, consisting of:
  - **at least 3** units from the electives listed below
  - **up to 2** units from the list below, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

# MSF40418 Certificate IV in Glass and Glazing

## Modification History

Release 3. Imported units and metadata updated.

Release 2. Minor upgrades to imported units. Supersedes and is equivalent to MSF40418 Certificate IV in Glass and Glazing (Release 1).

Release 1. Supersedes and is equivalent to MSF40413 Certificate IV in Glass and Glazing.

## Qualification Description

This qualification reflects the role of individuals in glass and glazing enterprises who perform a range of specialist and/or leadership functions, including sales, estimating scheduling, design, production control and quality assurance. Leadership job roles include higher tradesperson (post-trade), factory-based leading hands/supervisors or site supervisors in glass processing, glazing or architectural glass functions in residential and commercial operations.

Roles at this level may include requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of leadership and guidance to others in the application and planning of glass and glazing skills.

Entry to the qualification may be from trade and non-trade backgrounds. Industry expectation is that it will be undertaken primarily by those who have completed a Certificate III in Glass and Glazing or achieved equivalent industry experience.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

**Total number of units = 11**

- **2** core units
- **9** elective units, consisting of:
  - 4 units from Group A or Group B, with at least 2 from Group A
  - up to 5 additional units from Group A, Group B, Group C, any endorsed Training Package or accredited course - these units must be relevant to the work outcome, and if imported from other Training Packages, at least 3 must be units first packaged in a Certificate IV level qualification or higher.

## CORE UNITS

| Unit Code | Unit Title |
|---|---|
| BSBMGT401 | Show leadership in the workplace |
| BSBWHS401 | Implement and monitor WHS policies, procedures and programs to meet legislative requirements |

## ELECTIVE UNITS

### Group A

| Unit Code | Unit Title |
|---|---|
| MSFGG4009 | Apply standards and codes of practice for the glass industry |
| MSFGG4010 | Use glass industry data systems |
| MSFGG4011 | Manage glass industry production scheduling |
| MSFGG4012 | Perform laser measurement and levelling for glass windows and doors in buildings |
| MSFGG4014 | Operate complex glass processing plant control systems |
| MSFGG4015 | Manage glass processing plant shutdown and restart |
| MSFGG4016 | Plan and coordinate commercial glazing installations |

### Group B

| Unit Code | Unit Title |
|---|---|
| BSBOPS505 | Manage organisational customer service |
| BSBLDR414 | Lead team effectiveness |
| BSBPMG420 | Apply project scope management techniques |
| BSBPRO401 | Develop product knowledge |
| CPCCBC4012 | Read and interpret plans and specifications |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| CPCCBC4013 | Prepare and evaluate tender documentation |
| ICPSUP455 | Supervise and schedule work of others |
| MSFFT4012 | Prepare a tender submission |
| MSMENV472 | Implement and monitor environmentally sustainable work practices |
| MSS403021 | Facilitate a Just in Time system |
| MSS404084 | Undertake process capability improvements |

**Group C**

| **Unit Code** | **Unit Title** |
|---|---|
| BSBCUS402 | Address customer needs |
| BSBOPS403 | Apply business risk management processes |
| BSBSLS408 | Present, secure and support sales solutions |
| BSBWRT411 | Write complex documents |
| CPCCBC4001A | Apply building codes and standards to the construction process for low rise building projects |
| CPCCBC4004 | Identify and produce estimated costs for building and construction projects |
| CPCCBC4005 | Produce labour and material schedules for ordering |
| MEM30031A | Operate computer-aided design (CAD) system to produce basic design elements |
| MSFAH4003 | Advise on security technology, hardware and services |
| MSFAH4004 | Prepare architectural door hardware schedules |
| MSFDN4003 | Produce patterns and templates |
| MSFDN5001 | Generate and transfer complex computer-aided drawings and specifications |
| MSFFM3009 | Produce manual and computer-aided production drawings |
| MSFFT4007 | Sample, inspect and test products to specifications |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| MSFFT4010 | Identify and calculate production costs |
| MSFFT4011 | Purchase materials and consumables |
| MSS402031 | Interpret product costs in terms of customer requirements |
| MSS404054 | Apply statistics to operational processes |
| TAEDEL301 | Provide work skill instruction |
| TAEDEL402 | Plan, organise and facilitate learning in the workplace |
| TAEDEL404 | Mentor in the workplace |
| TLIA0025 | Assess and monitor optimum stock levels |
| TLIA0031 | Organise transport of freight or goods |

# MSF50218 Diploma of Interior Design

## Modification History

Release 2. Imported units and metadata updated.

Release 1. Supersedes and is not equivalent to MSF50213 Diploma of Interior Decoration and Design.

## Qualification Description

This qualification reflects the role of interior designers who provide advice mainly for residential building interiors. They may also be involved in the provision of advice about interior decoration. Individuals may be self-employed or employed in businesses such as design studios.

Designers provide a broad range of design advice and services, and are involved in:

- researching and analysing the client's goals and requirements
- planning, arranging and styling the space, and preparing detailed client presentations
- selecting and specifying colour schemes, furniture, fabrics, fixtures and lighting
- working in collaboration with builders, architects and service contractors
- preparing detailed design documentation.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require induction training and certification covered by the unit CPCWHS1001 *Prepare to work safely in the construction industry*. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 27

- **10** core units
- **17** elective units, consisting of:
  - at least 11 units from Groups A and B, with at least 5 from Group A
  - up to 6 additional units from Group A, Group B, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

© Commonwealth of Australia, 2025 Skills Insight

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

## CORE UNITS

| | |
|---|---|
| BSBDES302 | Explore and apply the creative design process to 2D forms |
| BSBDES303 | Explore and apply the creative design process to 3D forms |
| BSBDES502 | Establish, negotiate and refine a design brief |
| MSFID4013 | Design residential interior lighting |
| MSFID4014 | Produce digital models and documentation for interior design projects |
| MSFID4016 | Design colour schemes for interior and exterior spaces |
| MSFID5020 | Design residential interiors |
| MSFID5021 | Evaluate site structure and services for interior design briefs |
| MSFID5022 | Explore and apply creative design methodology to interior space |
| MSFID5025 | Develop residential interior design project documentation |

## ELECTIVE UNITS

### Group A

| | |
|---|---|
| BSBCRT512 | Originate and develop concepts |
| BSBPMG430 | Undertake project work |
| CUAANM313 | Create 3D digital models |
| CUADIG517 | Design digital simulations |
| CUAPPR513 | Present a body of own creative work |
| MSFGN4001 | Research and meet ethical and compliance requirements |
| MSFID4020 | Research and integrate embedded technologies in interior designs |
| MSFID4021 | Design soft furnishing solutions for interior spaces |
| MSFID4022 | Prepare quotation and contract documentation for design projects |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| MSFID5016 | Develop decoration proposals for complex sites |
| MSFID5017 | Develop event decoration proposals |
| MSFID5018 | Provide interior styling service |
| MSFID5019 | Decorate interiors for restoration projects |
| MSFID5023 | Design for all ages and abilities |
| MSFID5024 | Design workplace interiors |
| MSFID5027 | Research and recommend colour applications and finishes |
| MSFID5028 | Research and recommend artwork |
| MSS015022 | Develop strategies for more sustainable use of resources |

**Group B**

| | |
|---|---|
| BSBCRT412 | Articulate, present and debate ideas |
| BSBCRT413 | Collaborate in creative processes |
| BSBESB406 | Establish operational strategies and procedures for new business ventures |
| BSBMGT402 | Implement operational plan |
| CPCWHS1001 | Prepare to work safely in the construction industry |
| CPPBDN4001 | Research and evaluate construction materials and methods for building design projects |
| CUADES304 | Source and apply design industry knowledge |
| CUADES305 | Source and apply information on the history and theory of design |
| CUADES411 | Generate design solutions |
| CUADES413 | Develop and extend design skills and practice |
| CUADES423 | Research and apply techniques in spatial design |
| CUADIG303 | Produce and prepare photo images |
| CUADIG304 | Create visual design components |
| CUAILL401 | Develop and refine illustrative work |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| CUAPPR514 | Establish and maintain environmentally sustainable creative practice |
| MSFFDT4012 | Research furniture styles and movements |
| MSFID4012 | Decorate residential interiors |
| MSFID4015 | Prepare materials and finishes boards for client presentation |
| MSFID4017 | Research and recommend furniture and accessories |
| MSFID4018 | Research and recommend hard materials and finishes for interiors |
| MSFID4019 | Research interior decoration and design influences |

# MSF50322 Diploma of Furniture Design and Manufacturing

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the role of individuals who work in paraprofessional design and manufacturing roles in furniture or similar organisations using a combination of technical, creative, practical, research and project management skills in small-scale design projects. At this level these individuals are able to work collaboratively to establish and refine the design brief and to develop and implement design solutions for application in a commercial context. They use detailed knowledge of the design process, current technologies, materials capability and production processes. Depending on the context, an individual may also use other product-specific technical production skills.

There are no specific licenses that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

**Packaging Rules**

**Total number of units = 18**

7 core units

11 elective units consisting of:

at least 6 units from the electives listed below

up to 5 units from the electives listed below, any endorsed Training Package or accredited course – these units must be relevant to the work outcome

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

# MSF60118 Advanced Diploma of Interior Design

## Modification History

Release 2. Imported units and metadata updated.

Release 1. Supersedes and is equivalent to MSF60113 Advanced Diploma of Interior Design.

## Qualification Description

This qualification reflects the role of interior designers who develop creative and technical solutions for built interior environments. Interior design at this level covers the planning and detailing of complex residential, commercial and institutional design projects with an emphasis on space creation, space planning and the factors that affect peoples' responses to living and working environments.

Designers may be self-employed or employed in businesses as design consultants, design project administrators and design managers. Work involves the use of systematic and coordinated methodologies, including research, analysis and integration of knowledge into the creative process, and knowledge of the principles of interior design and building technologies. Contexts are diverse and often unpredictable. Accountability and responsibility for self and others in achieving outcomes is involved.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 39

- **16** core units
- **23** elective units, consisting of:
  - at least 11 units from Group A and B, with at least 5 from Group A
  - at least **6** units from Group C
  - up to 6 additional units from Group A, Group B, Group C, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

© Commonwealth of Australia, 2025 Skills Insight

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

## CORE UNITS

# MSFAH4003 Advise on security technology, hardware and services

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4001 Advise on security technology, hardware and services.

## Application

This unit describes the skills and knowledge required to apply architectural hardware product and service knowledge to provide advice to customers and other sales staff on the design, technical features and uses of architectural hardware and security products, ancillary items, prices and warranties.

This unit applies to architectural hardware specifiers who analyse and compare information from a range of sources to respond to customer needs. Customers include those requiring architectural hardware schedules and products for construction and renovation projects.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Architectural hardware

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research architectural hardware product range | 1.1 Identify job requirements from plans and specifications<br>1.2 Identify potentially suitable architectural hardware products by accessing relevant sources of information<br>1.3 Identify hardware components that suit customer specifications and meet applicable legislation, codes and national standards |
| 2. Recommend door and | 2.1 Provide and explain detailed manufacturer product specifications to |

# Assessment Requirements for MSFAH4003 Advise on security technology, hardware and services

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4001 Advise on security technology, hardware and services.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- matched compliant architectural hardware products to 2 different customer briefs or specifications
- undertaken both imperial and metric measurements and matching to hardware measuring systems
- read and interpreted:
  - plans
  - designs
  - specifications.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legislation, codes and standards that apply to architectural hardware, including key features of Regulation 90
- architectural hardware:
  - types of jobs
  - typical customers
- sources of information on architectural hardware products and services
- available architectural hardware and/or keying system options and basic requirements for installation
- types and functions of architectural hardware and/or keying system
- organisational policies and procedures, in relation to:
  - client confidentiality
  - sales and/or customer service
  - methods of dealing with special requirements of customers
  - customer complaints
  - price negotiation
- building construction methods and types that impact on architectural hardware

© Commonwealth of Australia, 2025 Skills Insight

- type of problems associated with architectural hardware systems and how to avoid and respond
- principles of effective communication
- documentation requirements and processes.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - architectural hardware products
  - job specifications and/or requirements
  - legislation, codes and standards

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFAH4004 Prepare architectural door hardware schedules

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4002 Prepare architectural door hardware schedules.

## Application

This unit describes the skills and knowledge required to assess door hardware and keying requirements across commercial, industrial and residential applications. It requires the ability to source relevant information, determine customer requirements and use appropriate assessment methods to make an accurate determination of architectural hardware equipment and/or system options. The unit also includes development of keying schedules.

This unit applies to architectural hardware specifiers who analyse and compare information from a range of sources to respond to customer needs. Customers include those requiring architectural hardware schedules and products for construction and renovation projects.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Architectural hardware

# Assessment Requirements for MSFAH4004 Prepare architectural door hardware schedules

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4002 Prepare architectural door hardware schedules.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- matched architectural hardware products and systems to 2 different client briefs or specifications – must include keying schedules.
-

## Knowledge Evidence

- legislation, codes and standards that apply to architectural hardware
- risk assessment methods and procedures in the context of architectural hardware
- features and formats of plans, designs and specifications for architectural hardware
- available architectural hardware and/or keying system options and basic requirements for installation
- types and functions of architectural hardware and/or keying system
- environmental factors that impact product selection
- building construction methods and types that impact on architectural hardware
- types and characteristics of different door and frame types
- organisational and client confidentiality requirements
- type of problems associated with architectural hardware systems and how to avoid and respond
- principles of effective communication
- documentation requirements and processes.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - architectural hardware products
  - job specifications and/or requirements

© Commonwealth of Australia, 2025 Skills Insight

- legislation, codes and standards.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles

## Modification History

Release 1. Supersedes and is equivalent to MSFBA2003 Select and apply blinds and awnings hardware and fixings.

## Application

This unit of competency describes the skills and knowledge required to select and use hardware and other fixings in the manufacture and installation of blinds, awnings, and non-security and security screens and grilles.

The unit applies to those working in the blinds, awnings, non-security and security screens and grilles industry, in both residential and commercial environments and small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Plan and prepare work | 1.1 | Identify hardware and fixing requirements from work order |
| | 1.2 | Identify and select types of hardware and fixings required for the work |
| | 1.3 | Identify work health and safety (WHS) requirements and personal protection requirements of job according to workplace procedures |
| | 1.4 | Identify and select required tools and equipment based on |

# Assessment Requirements for MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles

## Modification History

Release 1. Supersedes and is equivalent to MSFBA2003 Select and apply blinds and awnings hardware and fixings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly identify, select and apply hardware and fixings to at least four different styles of blinds, awnings, or non-security and security screens and grilles.

In the course of each of the above, the person must:

- interpret work order and use information to select and apply hardware and fixings
- plan and organise own work activities, including the preparation and layout of work site, and obtaining equipment and materials to avoid backtracking
- select, set up, and maintain tools and equipment according to manufacturer instructions and workplace procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to materials, tools, equipment, hardware, fixings and products
  - maintain required production output and quality
  - use tools, equipment, products and material safely
  - use personal protective equipment (PPE)
  - apply safe lifting and handling procedures
- work with others and in a team when selecting and applying hardware and fixings

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational and site standards, requirements, policies and procedures for applying the hardware and fixings described in the performance evidence
- types, characteristics, uses, maintenance and limitations of the hardware, fixings, tools and equipment used to apply hardware and fixings required in the performance evidence, and procedures for their safe use, operation and maintenance
- features of work orders relating to the work in the performance evidence, and how to identify and interpret key information
- work health and safety (WHS) policies, procedures and regulations specific to work described in performance evidence:

© Commonwealth of Australia, 2025 Skills Insight

  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating with site supervisor and others in work area
  - emergency and evacuation
  - manual handling, including lifting and carrying
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - setting up, using, maintaining and storing tools and equipment used when applying hardware and fixings
  - pre-checking and inspection techniques that assist in anticipating production problems, and avoiding rework and wastage
  - quality and continuous improvement processes and standards
  - cleaning and storing tools and equipment
  - storing and labelling surplus unused items
  - tagging and reporting faulty tools and equipment
  - recording and reporting work information
- mathematical methods for estimating and measuring materials and spaces, including factoring in required tolerances
- techniques for using hardware and fixings required for performance evidence that include processes that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- key features of documentation relating to work described in performance evidence:
  - work orders
  - work instructions
  - operator instructions and manuals
- key features, uses and techniques for using hardware:
  - cord locks
  - Dyna Bolts
  - head boxes
  - head rails
  - Loxons
  - nails
  - nuts and bolts
  - plugs

© Commonwealth of Australia, 2025 Skills Insight

  - pop rivets
  - screws
  - split pins
  - Tek screws
  - wands
- key features, uses, and techniques for using fixings:
  - chemical anchors
  - hollow wall anchors
  - masking tape
  - mongo plugs
  - silicone spray and silastic
  - spring brackets
- key features, uses, and techniques for using tools and equipment:
  - caulking guns
  - drills, including hand, powered and cordless
  - hammers
  - hollow wall anchor guns
  - pop rivet guns
  - screwdrivers, including hand, power and cordless

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- PPE applicable to job requirements, including:
  - hearing protection
  - protective clothing
  - respiratory protection
  - safety footwear
  - safety glasses or goggles
- WHS documentation specific to the performance evidence
- hardware and fixings specified in the knowledge evidence
- workplace documentation, including:
  - work orders
  - customer care cards
  - workplace procedures specified in the knowledge evidence
  - manufacturer specifications
  - time sheets.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3011 Assemble awnings

## Modification History

Release 1. New unit of competency.

## Application

This unit of competency describes the skills and knowledge required to prepare and assemble a range of awnings according to job requirements. The unit involves planning job requirements, identifying required products and components to be assembled and their measurements, and applying workplace procedures to ensure safe and correct assembly.

The unit applies to those assembling any awning for residential and commercial environments. The styles of awning to be assembled include folding-arm and canopy style. The awnings include light-weight domestic, heavy-weight commercial, and fire-rated and cyclone-rated. They may be intended for installation in a range of openings, including windows, doors and building entrances.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| Elements<br>Elements describe the essential outcomes. | Performance Criteria<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to assemble awnings | 1.1 | Identify and confirm job requirements and style of awning to be assembled from work order and supplier instructions |
| | 1.2 | Identify work health and safety (WHS) and personal protection requirements of assembly |
| | 1.3 | Select tools and equipment, and check their safe and effective operation |

© Commonwealth of Australia, 2025 Skills Insight

| Elements<br>Elements describe the essential outcomes. | Performance Criteria<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 1.4 | Select materials from stock and check against job requirements |
| | 1.5 | Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials |
| 2. Assemble awnings | 2.1 | Source required materials, equipment, and awning mechanisms in line with work instructions and manufacturer specifications |
| | 2.2 | Lay out, measure, mark and cut materials for awning |
| | 2.3 | Assemble component parts according to job requirements and manufacturer specifications |
| | 2.4 | Finish awning assembly according to work instructions |
| 3. Finalise assembly | 3.1 | Check that assembled awning complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel |
| | 3.2 | Clean assembled awning according to workplace procedures |
| | 3.3 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.4 | Clean, maintain and store remaining tools and equipment according to workplace procedures |
| | 3.5 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.6 | Legibly complete and process required workplace documentation according to workplace procedures |

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in work orders, work instructions and awning specifications |

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Requirements for MSFBA3011 Assemble awnings

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble each of the following styles of awnings:
    - roll-up style
    - canopy style
    - folding-arm style, including preparing skin
    - metal louvre style.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
    - minimise risk of injury to self and others
    - prevent damage to tools, equipment and products
    - maintain required production output and quality
    - use hand and power tools safely
    - use personal protective equipment (PPE)
- report material faults, damaged products and equipment
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the awnings in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
    - key requirements of Australian standards and codes of practice for assembly
    - safety considerations and potential dangers associated with incorrect assembly

© Commonwealth of Australia, 2025 Skills Insight

    - cutting patterns and sequences
    - identifying work process problems and resolving within scope of own role
- work health and safety (WHS) legislation, regulations, standards, codes of practice, and procedures specific to assembly work described in performance evidence:
    - legislation and codes of practice relating to child safety mechanisms
    - controlling hazards and risks
    - eliminating hazardous materials and substances
    - using firefighting equipment and first aid equipment
    - using personal protective equipment:
        - hearing protection
        - protective clothing and head wear
        - respiratory protection
        - safety footwear
        - safety glasses and goggles
- workplace procedures relating to:
    - communication channels and protocols
    - manual handling, including lifting and carrying
    - safely cutting and assembling awnings
    - following manufacturer instructions and procedures
    - cleaning and storing assembled awnings
    - storing surplus unused items
    - assessing condition of cutting tools
    - tagging and reporting faulty tools and equipment
    - disposing of waste safely and in an environmentally sustainable manner
    - recycling and re-use guidelines
    - using, cleaning, maintaining and storing tools and equipment
    - recording and reporting assembly information
- techniques for measuring, cutting, setting up and assembling awnings described in performance evidence that:
    - conform to quality requirements
    - comply with supplier instructions and manufacturer specifications
    - maximise the appearance of the finished work
    - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work
- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
    - awning components and materials
    - operating mechanisms required for type of awning being assembled

© Commonwealth of Australia, 2025 Skills Insight

- fittings and attachments, including threads
- tools and equipment used to assemble awnings, and procedures for their safe use, operation and maintenance:
  - cutting tools
  - cutting bench
  - saws
- documentation requirements for assembly work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- awnings requiring assembly as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for assembly work, including:
  - work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3012 Assemble interior blinds

## Modification History

Release 1. New unit of competency.

## Application

This unit of competency describes the skills and knowledge required to prepare and assemble a range of interior blinds according to job requirements. The unit involves planning job requirements, identifying required products and components to be assembled and their measurements and applying workplace procedures to ensure safe and correct assembly. The unit does not involve installing the blinds.

The unit applies to those assembling any blind for interior residential and commercial environments. The style of blinds to be assembled include aluminium, plastic or timber Venetian blinds; Roman blinds; roll-up and pull-down blinds; and vertical-style blinds. The blinds may be intended for installation in a range of openings, including windows, fixed and sliding doors, and building entrances. The unit does not apply to assembling wood-weave style blinds.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings.

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to assemble interior blinds | 1.1 | Identify and confirm job requirements and style of blind to be assembled from work order and supplier instructions |
| | 1.2 | Identify work health and safety (WHS) and personal protection requirements of assembly |

# Assessment Requirements for MSFBA3012 Assemble interior blinds

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble three of the following interior blinds:
  - aluminium, plastic or timber Venetian
  - pleated style
  - roll-up or pull-down
  - roller
  - wood-weave Roman
  - vertical.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- report material faults, damaged products and equipment
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the blinds in the performance evidence, and how to identify and interpret key information

© Commonwealth of Australia, 2025 Skills Insight

- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - safety considerations and potential dangers associated with incorrect assembly
  - cutting patterns and sequences
  - identifying work process problems and resolving within scope of own role
- work health and safety (WHS) legislation, regulations, standards, codes of practice and procedures specific to assembly work described in performance evidence:
  - legislation and codes of practice relating to child safety mechanisms
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling blinds
  - following manufacturer instructions and procedures
  - responding to emergencies and evacuations
  - cleaning and storing completed assembled blinds
  - storing surplus unused items
  - assessing condition of cutting tools
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - using, cleaning, maintaining and storing tools and equipment
  - recording and reporting assembly information
- techniques for measuring, cutting, setting up and assembling blinds described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances

© Commonwealth of Australia, 2025 Skills Insight

- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work
- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - blind components and materials
  - operating mechanisms required for type of blind being assembled
  - fittings and attachments, including threads
  - tools and equipment used to assemble blinds, and procedures for their safe use, operation and maintenance:
    - cutting tools
    - cutting bench
    - saws
- documentation requirements for assembly work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- blinds specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each assembly process, including:
  - work orders
  - workplace procedures
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3014 Assemble pelmets

## Modification History

Release 1. Supersedes and is equivalent to MSFBA3008 Construct pelmets.

## Application

This unit of competency describes the skills and knowledge required to cut, prepare and assemble pelmet components for interior blind installations according to job requirements. The unit involves planning job requirements, identifying required pelmets and components to be used, and applying workplace procedures to ensure safe and correct assembly. The unit does not involve installing pelmets.

The unit applies to those assembling pelmets for any interior residential or commercial environment. The pelmets may be for a range of interior blinds, including aluminium, plastic or timber Venetian blinds; and Roman, roller or vertical blinds.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings.

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare for pelmet assembly | 1.1 | Identify job and pelmet requirements from work order and supplier instructions |
| | 1.2 | Identify work health and safety (WHS) and personal protection requirements of assembly according to workplace procedures |
| | 1.3 | Identify and select required materials, hardware, components, tools and equipment based on work order, and check their safe and effective operation |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 1.4 | Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials |
| 2. Prepare and assemble pelmet components | 2.1 | Set up required materials and equipment in line with work instructions and manufacturer specifications |
| | 2.2 | Measure and cut components to specification and lay out ready for assembly according to workplace procedures |
| | 2.3 | Assemble components according to work instructions |
| | 2.4 | Monitor work operations to identify problems and resolve within scope of own role or report to designated personnel in line with workplace procedures |
| 3. Finalise assembly | 3.1 | Check that completed assembled pelmet complies with quality and work order requirements, and rectify identified deficiencies within scope of own role |
| | 3.2 | Clean, package and store completed pelmet according to workplace procedures |
| | 3.3 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.4 | Clean, maintain and store remaining tools and equipment according to workplace procedures |
| | 3.5 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.6 | Legibly complete and process required workplace documentation according to workplace procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in pelmet specifications, work orders and instructions<br>• use mathematical information to estimate and measure assembly requirements, including required tolerances |
| Oral communication skills to: | • communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems:<br>  • speaking clearly<br>  • asking questions to gain information |
| Reading skills to: | • interpret routine workplace documentation, including:<br>  • WHS requirements and procedures<br>  • assembly requirements<br>  • work orders and pelmet specifications, including design, size, colour and quantity |

# Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFBA3008 Construct pelmets.

# Assessment Requirements for MSFBA3014 Assemble pelmets

## Modification History

Release 1. Supersedes and is equivalent to MSFBA3008 Construct pelmets.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- cut pelmet component materials according to work orders to within +/- 1 mm and safely and correctly assemble pelmets for at least four of the following different styles of internal blinds:
- aluminium Venetian blinds
- plastic or timber Venetian blinds
- roller blinds
- Roman blinds
- vertical blinds.

One of the above four assemblies must be for a bay window, box bay window or corner window.

In the course of the four assemblies, the following pelmets must be assembled:

- metal
- timber
- wood weave.

In the course of each of the above assemblies, the person must:

- interpret work order and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications, workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered.

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the pelmets in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - safety considerations and potential dangers associated with incorrect assembly
  - cutting patterns and sequences
  - typical work process problems and ways of resolving within scope of own role
- work health and safety (WHS) regulations, standards, procedures and practices specific to assembly work described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling pelmets
  - following manufacturer instructions and procedures
  - responding to emergencies and evacuations
  - cleaning, packaging and storing completed assembled pelmets
  - storing surplus unused items
  - assessing condition of cutting tools
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - using, cleaning, maintaining and storing tools and equipment
  - recording and reporting assembly information
- techniques for measuring, cutting, setting up and assembling blinds described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of finished work

© Commonwealth of Australia, 2025 Skills Insight

    - provide for economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work and assembled pelmets
- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
    - pelmet components and materials
    - operating mechanisms
    - fittings and attachments
    - tools and equipment:
        - cutting tools
        - drills
        - glue guns
        - hammers
        - pop rivet guns
        - saws
        - screwdrivers
    - hardware:
        - screws
        - nails
        - pop rivets
- documentation requirements for assembly work described in performance evidence.

# Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- pelmets for blinds specified in the performance evidence
- PPE applicable to job requirements:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses or goggles
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each assembly process, including:

© Commonwealth of Australia, 2025 Skills Insight

- work orders
- workplace procedures
- supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3015 Install louvre shutters

## Modification History

Release 1. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Application

This unit of competency describes the skills and knowledge required to identify work requirements and then install louvre shutters according to job requirements. The unit involves planning job requirements, identifying required shutter products to be used and their measurements and fasteners, and applying workplace procedures to ensure their safe and correct installation.

The unit applies to those installing interior and exterior louvre shutters in residential and commercial environments. The shutters may be installed on a range of surfaces, including aluminium, ceramic tiles, porcelain tiles, concrete, masonry, plasterboard and timber.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings.

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare for installation of louvre shutters | 1.1 | Identify job and shutter requirements from work order and supplier instructions |
| | 1.2 | Complete a check measure on site and document required product specifications and specific access and installation requirements |
| | 1.3 | Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 1.4 | Identify and select required materials, tools, equipment and accessories based on work order, and check their safe and effective operation |
| | 1.5 | Schedule installation and agree access arrangements to site |
| | 1.6 | Plan logical, safe and efficient work sequence that reflects work order and quality requirements |
| 2. Install louvre shutters | 2.1 | Inspect installation site in consultation with customer, confirm type of shutter to be installed, and address job, site and customer-specific technical and safety requirements |
| | 2.2 | Set up required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications |
| | 2.3 | Fit shutter to opening according to work order and manufacturer specifications |
| | 2.4 | Fasten shutter according to shutter type, work order and opening surface; and using fastening tools in line with supplier instructions and workplace procedures |
| | 2.5 | Test installed shutter for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility |
| 3. Finalise installation | 3.1 | Check that completed work complies with quality and work order requirements, and rectify identified deficiencies within scope of own role |
| | 3.2 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.3 | Identify and store surplus unused items for re-use and recycling according to workplace procedures |
| | 3.4 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.5 | Clean and store remaining tools and equipment according to workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 3.6 | Advise customer on correct operation and maintenance of louvre shutters |
| | 3.7 | Legibly complete and process required workplace and customer documentation according to workplace requirements |

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in routine workplace documentation<br>• process customer documentation, including required invoicing and receipting<br>• keep records of hours worked, quantity of items used and additional routine costs<br>• estimate and measure materials and installation spaces, including factoring in required tolerances |
| Oral communication skills to: | • discuss and negotiate site access, installation requirements, and correct operation of louvre shutters with a range of customers, including real estate agents, body corporate representatives, builders, home owners, and tenants:<br>  • speaking clearly<br>  • applying effective listening techniques<br>  • asking questions to gain information |
| Reading skills to: | • interpret routine workplace documentation, including work orders, WHS requirements and workplace installation procedures |

# Assessment Requirements for MSFBA3015 Install louvre shutters

## Modification History

Release 1. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install one of each of the following types of louvre shutters:
  - one interior louvre shutter for a residential building
  - one interior louvre bi-fold shutter for either a residential or commercial building
  - one interior louvre bi-pass shutter for either a residential or commercial building
  - one special-shaped interior louvre shutter for either a residential or commercial building, based on the template created by candidate for that purpose
  - one exterior louvre shutter for a residential building
  - one exterior louvre shutter for a commercial building.

One of the above interior installations must be in a bay window, box bay window, or corner window.

One of the above exterior installations must be above ground level and demonstrate the safe and correct use of lifting equipment.

In the course of each of the above installations, the person must:

- interpret work order and locate and use materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the types of louvre shutters in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - building code requirements specific to installation described in performance evidence
  - safety considerations and potential dangers associated with incorrect installation
  - wind zoning requirements relating to exterior louvre shutters
- operation and maintenance requirements of louvre shutters in performance evidence
- emerging trends in installing louvre shutters, including new materials used and their associated energy ratings and fire retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - managing rain and wind resistance during installation
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating work requirements with customers
  - scheduling installation
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - safely installing and fastening louvre shutters
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting installation information
  - presenting invoices, and collecting and receipting payments
- techniques for installing electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
  - manual, including winders and straps
- effect of site characteristics and access restrictions on installation equipment selection and use

© Commonwealth of Australia, 2025 Skills Insight

- techniques for installing and fastening louvre shutters described in performance evidence, including:
  - on surfaces made of:
    - aluminium
    - ceramic and porcelain tiles
    - concrete
    - masonry
    - plasterboard
    - timber
  - fastening agents:
    - adhesive tape
    - nails
    - screws
  - installing and fastening that:
    - conform to quality requirements
    - comply with supplier instructions and manufacturer specifications
    - maximise appearance of the finished work
    - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring materials and installation spaces, including factoring in required tolerances
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - products and materials specific to louvre shutter installation:
    - fastening products, including adhesive tape, Dyna Bolts, masonry anchors, nails, nuts and bolts and screws
    - fillers, including caulking, cover strips and filler strips
    - shutter hardware, including hinges and mounting brackets
    - track systems
  - tools and equipment:
    - hand tools, including caulking gun, scissors, screwdrivers and tape measure
    - power tools, including coping saw, docking saw, jigsaw and power drill
    - equipment, including ladders, drop sheets, barriers, cones, signs and lifting equipment
- documentation requirements for installation work described in performance evidence.

# Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

© Commonwealth of Australia, 2025 Skills Insight

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- louvre shutters requiring installation as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each installation, including:
  - work quotations and work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer care cards
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3016 Install awnings

## Modification History

Release 1. Supersedes but is not equivalent to MSFBA3002 Install exterior blinds and awnings.

## Application

This unit of competency describes the skills and knowledge required to install awnings according to job requirements. The unit involves planning job requirements, identifying required products to be used and their measurements and fasteners, and applying workplace procedures to ensure safe and correct installation.

The unit applies to those installing awnings in residential and commercial environments. The style of awning to be installed may be aluminium roll-up, folding-arm, metal-hooded canopy, textile canopy or metal louvre. The material used in the awnings may be light-weight domestic, heavy-weight commercial, fire-rated or cyclone-rated. The awnings may be installed in a range of openings, including windows; fixed and sliding doors; and building entrances. They may be installed on a range of surfaces, including aluminium, concrete, masonry, plasterboard, steel and timber.

Where installed control devices involve wiring to be connected to mains power, electrical work must be completed by a qualified licensed electrician.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings.

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |

# Assessment Requirements for MSFBA3016 Install awnings

## Modification History

Release 1. Supersedes but is not equivalent to MSFBA3002 Install exterior blinds and awnings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install one of each of the following types of exterior awnings:
  - one manual pull-down awning for a residential building
  - one motorised roll-up awning for a commercial building
  - one awning for a residential building that is either a metal hooded canopy or a textile canopy
  - one folding-arm awning for a commercial building that is fitted with an electric wind sensor control device.

One of the above installations must be above ground level and demonstrate the safe and correct use of lifting equipment.

One of the above motorised control devices must be a 240V device connected to mains power; and one a 12V rechargeable solar or battery-operated device.

In the course of each of the above installations, the person must:

- interpret work order and locate components, materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use fixing hardware, hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions, and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

In installing the suite of awnings, the candidate must demonstrate the ability to:

- install in at least two of the following different openings:
  - door or window

© Commonwealth of Australia, 2025 Skills Insight

  - sliding door
  - wide-span opening 3 metres or above
- fasten to at least two of the following different surfaces:
  - aluminium
  - concrete
  - masonry
  - plasterboard
  - steel
  - timber.

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the types of awnings in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - building code requirements specific to installation described in performance evidence
  - safety considerations and potential dangers associated with incorrect installation
  - wind zoning requirements
- operation and maintenance requirements of awnings in performance evidence
- emerging trends in installing awnings, including new materials used in face, reveal and packing and their associated energy ratings and fire retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - managing rain and wind resistance during installation
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating work requirements with customers
  - scheduling installation
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - safely installing and fastening awnings
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines

© Commonwealth of Australia, 2025 Skills Insight

    - cleaning and storing tools and equipment
    - storing surplus unused items
    - recording and reporting installation information
    - presenting invoices, and collecting and receipting payments
- techniques for installing electric and manual control devices:
    - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
    - manual, including wands and pull sticks
- effect of site characteristics and access restrictions on installation equipment selection and use
- techniques for installing and fastening awnings described in performance evidence, including:
    - in openings made of:
        - aluminium
        - concrete
        - masonry
        - plasterboard
        - steel
        - timber
    - installing and fixing that:
        - conform to quality requirements
        - comply with supplier instructions and manufacturer specifications
        - maximise the appearance of the finished work
        - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring installation openings, including factoring in required tolerances
- requirements and procedures for using qualified licensed electricians when installation and control devices involve mains power
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
    - awning products and materials
    - special application brackets
    - operating mechanisms required for type of awnings being installed, including radio-controlled remote devices and photocell sensor devices
    - specialised fixing hardware used for the different types of awnings:
        - Dyna Bolts
        - masonry anchors
        - mounting brackets
        - nuts and bolts
        - screws, including hex screws

© Commonwealth of Australia, 2025 Skills Insight

- tools and equipment:
  - hand tools, including drills, screwdrivers, hex keys and snip cutters
  - power tools, including 240V mains connected and 12V rechargeable solar and battery-operated
  - equipment, including ladders, drop sheets, barriers, cones, signs and lifting equipment
- documentation requirements for installation work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- awnings requiring installation as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- fixing hardware, tools and equipment specified in the knowledge evidence
- control devices for awnings being installed
- workplace documentation required for each installation, including:
  - work orders, customer orders, job cards and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer care cards
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3017 Install interior blinds

## Modification History

Release 1. Supersedes and is equivalent to MSFBA3001 Install interior blinds.

## Application

This unit of competency describes the skills and knowledge required to identify work requirements and then install interior blinds according to specifications. The unit involves planning job requirements, identifying required blind products, fittings, and attachments to be used, and applying workplace procedures to ensure their safe and correct installation

The unit applies to those installing blinds in any interior space of residential and commercial environments. The style of blinds to be installed includes aluminium, plastic or timber Venetian, Roman, roller, and vertical blinds. The blinds may be installed on a range of surfaces, including concrete, masonry, plasterboard and timber.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings.

## Elements and Performance Criteria

| | 1.4 | Schedule installation and agree access arrangements to site |
| | 1.5 | Plan logical, safe and efficient work sequence that reflects work order and quality requirements |
| 2. Install interior blind | 2.1 | Inspect installation site in consultation with customer, confirm blind to be installed, and address job, site and customer-specific technical and safety requirements |
| | 2.2 | Set up required materials, equipment and blind mechanisms in line with work instructions and manufacturer specifications |
| | 2.3 | Fit pelmets and cord brackets using required hardware and adjust to suit blind operation according to workplace procedures |
| | 2.4 | Fit blind and pulley according to work order, design requirements and manufacturer specifications |
| | 2.5 | Test installed blind for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility |
| 3. Finalise installation | 3.1 | Check that completed work complies with quality and work order requirements and rectify identified deficiencies |
| | 3.2 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.3 | Identify and store surplus unused items for re-use and recycling according to workplace procedures |
| | 3.4 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.5 | Clean and store remaining tools and equipment according to workplace procedures |
| | 3.6 | Advise customer on correct operation and maintenance of blind |
| | 3.7 | Legibly complete and process required workplace and customer documentation according to workplace procedures |

# Assessment Requirements for MSFBA3017 Install interior blinds

## Modification History

Release 1. Supersedes and is equivalent to MSFBA3001 Install interior blinds.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install at least four of the following interior blinds:
  - aluminium Venetian blinds
  - plastic or timber Venetian blinds
  - roller blinds
  - Roman blinds
  - vertical blinds.

One of the above four installations must be in a bay window, box bay window, or corner window or door.

In the course of each of the above installations, the person must:

- interpret work order and locate materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

In installing the suite of blinds, the candidate must also demonstrate the ability to install on the following surfaces:

- concrete or masonry
- plasterboard or timber.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- features of installation work orders and supplier instructions relating to the styles of interior blinds in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - consumer product safety standards and requirements associated with domestic corded internal window blinds
  - safety considerations and potential dangers associated with incorrect installation
- operation and maintenance requirements of blinds in performance evidence
- emerging trends in installing interior blinds, including new materials and their associated energy ratings and fire retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating work requirements with customers
  - scheduling installation
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - safely installing and securing blinds
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting installation information
  - presenting invoices, and collecting and receipting payments
- techniques for installing and securing blinds described in performance evidence that include attachment processes that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for economical use of materials and labour
- effect of site characteristics and access restrictions on equipment selection and use
- mathematical methods for estimating and measuring installation materials and spaces, including factoring in required tolerances
- types of common problems that occur during installation, and how to avoid and respond

© Commonwealth of Australia, 2025 Skills Insight

- tools and equipment required for the installations described in performance evidence:
  - hand tools, including drills, hammers, ladders and screwdrivers
  - power tools required to install interior blinds described in performance evidence
  - equipment, including drop sheets and ladders
  - materials, including bolts, masonry anchors, nails and screws
  - fittings and attachments, including mounting brackets and operating mechanisms
- systems for storing and labelling materials required for the installation work
- types, characteristics, uses, maintenance, and limitations of the following items required for the installations described in performance evidence:
  - blind products and materials
  - operating mechanisms required for style of interior blind being installed
  - fittings and attachments
  - tools and equipment
- documentation requirements for installation work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- blind styles requiring installation and installation locations specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each installation, including:
  - work orders, customer orders, job cards and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3018 Assess suitability of blinds and awnings

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3010 Assess suitability of blinds or awnings.

## Application

This unit of competency describes the skills and knowledge required to assess the suitability of blinds and awnings in a range of environments taking into account building structure, natural environmental constraints, regulations and legislation.

The unit applies in those assessing the suitability of blinds and awnings for both residential and commercial environments in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Develop and maintain knowledge of blind and awning products | 1.1 | Research and analyse information on characteristics of blind and awning product and component characteristics |
| | 1.2 | Collect and organise materials, product samples and visual aids for future retrieval and use |
| | 1.3 | Research and analyse information on building styles, building codes, regulations and legislation required for assessing suitability of blind and awning products |
| 2. Assess suitability of | 2.1 | Review work instructions to establish customer requirements |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| blind and awning products for customer requirements, and building and location | 2.2 | Inspect location for product observing work health and safety (WHS) requirements |
| | 2.3 | Assess restrictions and limitations of building and natural environment |
| | 2.4 | Assess restrictions and limitations of blind and awning products |
| 3. Provide advice to customer following assessment on suitability of blind and awning products | 3.1 | Explain characteristics of product to customer using sample materials, visual aids and product specifications |
| | 3.2 | Explain building covenant and other regulations and legislative requirements relevant to product, building and location to customer |
| | 3.3 | Select range of suggested product styles and materials, and present to customer for evaluation |
| | 3.4 | Discuss and respond to customer queries using examples to illustrate advice on finished products |
| 4. Finalise assessment | 4.1 | Return sample products to storage |
| | 4.2 | Prepare report of recommended product costing and overall estimate |
| | 4.3 | Present assessment and costing information to customer |

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, use and discuss mathematical information in workplace documentation<br>• use a blend of personal ‘in-the-head’ methods and formal methods to calculate routine and familiar costs<br>• use a calculator to calculate and compare costs of blinds and awnings |

© Commonwealth of Australia, 2025 Skills Insight

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| | • estimate and measure blinds, awnings and their installation locations |
| Oral communication skills to: | • greet and interact with customers in a professional manner<br>• use questioning and active listening techniques to identify and clarify customer requirements<br>• express own opinion clearly using sufficiently broad vocabulary |
| Reading skills to: | • interpret at times complex workplace documentation, including building covenants and other regulations and legislative requirements specific to the assessment |
| Technology skills to: | • use ICT-based tools to access blind and awning product information<br>• organise and maintain product information in an easily accessible manner |
| Writing skills to: | • write simple notes of research findings<br>• legibly document assessment outcomes, including product costings |

# Assessment Requirements for MSFBA3018 Assess suitability of blinds and awnings

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3010 Assess suitability of blinds or awnings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- assess each of the following requirements for blinds and awnings, and provide a suitable and practical assessment in line with customer requirements:
  - awning in a residential property
  - exterior blinds in a multi-story commercial property
  - awning on a ground level commercial property abutting a natural feature of cultural significance
  - exterior blinds in a bushfire-prone location
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legislation, regulations, standards and codes of practice applicable to assessment of suitability of blinds and awnings described in the performance evidence:
  - codes relating to wind loads, fire attenuation and set backs
  - building covenants and heritage trust
  - body corporate requirements
  - environmental requirements and constraints
  - work health and safety (WHS) requirements
- standards and requirements specific to site, and policies and procedures for assessing suitability of blinds and awnings for situations
- sources of authoritative and current information on blinds and awnings specified in performance evidence
- types of tools and equipment used for assessing suitability of blinds and awnings for situations, and procedures for their safe use, operation and maintenance
- types and styles of buildings, and legislation that applies to their construction, modification and decoration
- terms used to describe components of blinds and awnings

© Commonwealth of Australia, 2025 Skills Insight

- sources of authoritative and current information on products relating to assessment services described in performance evidence
- workplace procedures relating to:
  - assessing suitability of blinds and awnings
  - customer service standards
  - communicating product information to customers, including presentation methods
  - recording and reporting outcomes of customer discussion
  - storing and retrieving product information
  - documenting, communicating, reporting and retrieving assessment-related information
- products suitable to customer location
- emerging trends in blinds and awnings, including new materials and their associated energy ratings and fire-retardant attributes
- key features and characteristics of products and components used in the construction and installation of blinds and awnings, including features described in:
  - product instructions and specification sheets
  - service conditions
  - manufacturer specifications
  - special requirements
- restrictions and limitations on suitability of blinds and awnings:
  - building, including materials, height, architectural integrity, structure and access
  - natural environment, including overhang, space and height
  - weather, including wind rating and rainfall
  - directional perspective, including north, south, east and west facing
- impact of the following customer requirements on suitability of blind and awning product:
  - advertising and branding
  - darkening effects
  - decoration
  - insulation
  - light dispersal
  - noise reduction
  - presenting a professional image
  - privacy
  - sun protection
  - weather protection
- principles and techniques of customer service
- mathematical methods for estimating and measuring blinds, awnings and their installation locations.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- authoritative sources of information relating to range of products that apply to assessment in performance evidence
- computer with access to the internet
- product samples, materials and visual aids relating to products, including:
  - magazines
  - photographs
  - software presentations
  - sketches
  - trade brochures
- legislation, regulations, standards, codes of practice and workplace procedures specified in knowledge evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3019 Assemble roller shutters

## Modification History

Release 1. New unit of competency.

## Application

This unit of competency describes the skills and knowledge required to identify and assemble roller shutters according to job requirements. The unit involves planning job requirements, identifying required shutter products to be assembled and their measurements, and applying workplace procedures to ensure safe and correct assembly. The unit does not involve installing the roller shutters.

The unit applies to those assembling residential and commercial roller shutters, which can include light-weight domestic, heavy-weight commercial, and fire-rated and cyclone-rated shutters. The shutters may be required for a range of openings, including windows, fixed and sliding doors, building entrances, and inside and exterior to buildings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| Elements<br>Elements describe the essential outcomes. | Performance Criteria<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to assemble roller shutters | 1.1 | Identify and confirm job requirements and style of shutter to be assembled from work order and supplier instructions |
| | 1.2 | Identify work health and safety (WHS) and personal protection requirements of assembly according to workplace procedures |
| | 1.3 | Select tools and equipment, and check their safe and effective operation |

© Commonwealth of Australia, 2025 Skills Insight

| Elements<br>Elements describe the essential outcomes. | Performance Criteria<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 1.4 | Select materials from stock and check against job requirements |
| | 1.5 | Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials |
| 2. Assemble roller shutters | 2.1 | Source required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications |
| | 2.2 | Lay out, measure, mark and cut materials for shutter according to workplace procedures |
| | 2.3 | Assemble component parts according to job requirements and manufacturer specifications |
| | 2.4 | Finish shutter assembly according to work instructions |
| 3. Finalise assembly | 3.1 | Check that assembled shutter complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel |
| | 3.2 | Clean assembled shutter according to workplace procedures |
| | 3.3 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.4 | Clean, maintain and store remaining tools and equipment according to workplace procedures |
| | 3.5 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.6 | Legibly complete and process required workplace documentation according to workplace procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFBA3019 Assemble roller shutters

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble each of the following types of roller shutters:
  - light-weight exterior domestic roller shutter
  - heavy-weight exterior commercial roller shutter
  - fire-rated or cyclone-rated roller shutter
  - interior roller shutter.

In the course of the above four assembly processes, the person must demonstrate the ability to assemble shutters with the following shutter control devices:

- at least two electric systems involving a radio-controlled remote device or photocell sensor device
- at least one manual system involving winders or straps.

One of the above shutter control devices must be a 240V control device to be connected to mains power when installed; and one a 12V rechargeable solar or battery-operated control device.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage

© Commonwealth of Australia, 2025 Skills Insight

- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the types of roller shutters in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - building code requirements specific to roller shutter product described in performance evidence
  - safety considerations and potential dangers associated with incorrect assembly
  - impact of wind zoning requirements on assembly of exterior roller shutters
- operation of roller shutters in performance evidence
- emerging trends in roller shutters, including:
  - new materials used in face, reveal and packing
  - associated energy ratings and fire-retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to assembly work described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling roller shutters
  - following manufacturer instructions and procedures
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting assembly information
- techniques for assembling shutters with electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control

© Commonwealth of Australia, 2025 Skills Insight

    - manual, including winders and straps
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work
- types, characteristics, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
    - roller shutter products and materials
    - operating mechanisms required for type of roller shutter being assembled
    - tools and equipment used to assemble roller shutters and procedures for their safe use, operation and maintenance:
        - hand tools, including screwdrivers, hack saws and snip cutters
        - power tools, including 240V mains connected, and 12V rechargeable solar and battery-operated
- documentation requirements for assembly work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- roller shutters requiring assembly as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- shutter control devices
- workplace documentation required for assembly process, including:
    - work orders
    - workplace procedures specified in the knowledge evidence
    - supplier instructions and manufacturer specifications

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3020 Install roller shutters

## Modification History

Release 1. New unit of competency.

## Application

This unit of competency describes the skills and knowledge required to identify and install roller shutters according to job requirements. The unit involves planning job requirements, identifying required shutter products to be used and their measurements and fasteners, and applying workplace procedures to ensure their safe and correct installation.

The unit applies to those installing roller shutters in residential and commercial environments. The shutters to be installed include light-weight domestic, heavy-weight commercial, and fire-rated and cyclone-rated shutters. The shutters may be installed in a range of openings, including windows, fixed and sliding doors, building entrances, and inside and exterior to buildings. They may be fastened to a range of surfaces, including aluminium, concrete, masonry, plasterboard and timber.

Licensing, legislative, or certification requirements may apply to this unit. Relevant state/territory and local government agencies should be consulted to determine necessary requirements for installing roller shutters

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| Elements<br>Elements describe the essential outcomes. | Performance Criteria<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare for installation of roller shutters | 1.1 | Identify job and shutter requirements from work order and supplier instructions |
| | 1.2 | Complete check measure on site and document required product specifications and specific access and installation requirements |

# Assessment Requirements for MSFBA3020 Install roller shutters

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install one of each of the following types of roller shutters:
  - light-weight exterior domestic roller shutter
  - heavy-weight exterior commercial roller shutter
  - fire-rated or cyclone-rated roller shutter
  - interior roller shutter.

One of the above installations must be in an above-ground level opening and demonstrate the safe and correct use of lifting equipment.

In the course of the above four installations, the person must demonstrate the ability to install shutters with the following shutter control devices:

- one electric system involving radio-controlled remote device or photocell sensor device
- one manual system involving winders or straps.

One of the above shutter control devices must be a 240V control device connected to mains power, and one a 12V rechargeable solar or battery-operated control device.

In the course of each of the above installations, the person must:

- interpret work order, and locate required materials, tools and equipment
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

© Commonwealth of Australia, 2025 Skills Insight

In installing the suite of roller shutters, the candidate must demonstrate the ability to:

- install in at least two of the following different openings:
  - door or window
  - sliding door
  - wide-span opening of 3.2 metres or above requiring the help of an assistant
- fasten to at least two of the following different surfaces:
  - aluminium
  - concrete
  - masonry
  - plasterboard
  - timber.

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the types of roller shutters in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - building code requirements specific to installation described in performance evidence
  - safety considerations and potential dangers associated with incorrect installation
  - wind zoning requirements relating to exterior roller shutters
- operation and maintenance requirements of roller shutters in performance evidence
- emerging trends in installing roller shutters, including:
  - new materials used in face, reveal and packing
  - their associated energy ratings and fire-retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - managing rain and wind resistance during installation
  - using firefighting equipment, first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communication channels and protocols
  - scheduling installation
  - accessing and inspecting installation sites

© Commonwealth of Australia, 2025 Skills Insight

    - manual handling, including lifting and carrying
    - following manufacturer instructions and procedures
    - safely installing and fastening roller shutters
    - tagging and reporting faulty tools and equipment
    - disposing of waste safely and in an environmentally sustainable manner
    - recycling and re-use guidelines
    - cleaning and storing tools and equipment
    - storing surplus unused items
    - recording and reporting installation information
    - presenting invoices, and collecting and receipting payments
- techniques for installing electric and manual shutter control devices:
    - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
    - manual, including winders or straps
- effect of site characteristics and access restrictions on installation equipment selection and use
- techniques for installing and fastening roller shutters described in performance evidence, including:
    - in openings made of a range of:
        - aluminium
        - concrete
        - masonry
        - plasterboard
        - timber
    - installing and fastening that:
        - conform to quality requirements
        - comply with supplier instructions and manufacturer specifications
        - maximise the appearance of the finished work
        - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring installation openings, including factoring in required tolerances
- requirements and procedures for using qualified licensed electricians when installation and control devices involve mains power
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
    - roller shutter products and materials
    - operating mechanisms required for type of roller shutter being installed, including radio-controlled remote devices and photocell sensor devices
    - specialised fasteners used for the different types of roller shutters
    - tools and equipment:

© Commonwealth of Australia, 2025 Skills Insight

    - hand tools, including screwdrivers, hack saws and snip cutters
    - power tools, including 240V mains connected, and 12V rechargeable solar and battery-operated
    - equipment, including ladders, drop sheets, barriers, cones, signs and lifting equipment
- documentation requirements for installation work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- roller shutters requiring installation as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- tools and equipment specified in the knowledge evidence
- control devices for shutters being installed
- workplace documentation required for each installation, including:
    - work orders, customer orders, job cards, and work quotations
    - workplace procedures specified in the knowledge evidence
    - supplier instructions and manufacturer specifications
    - customer care cards
    - customer invoices and receipts
    - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA3021 Assemble louvre shutters

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Application

This unit of competency describes the skills and knowledge required to prepare and assemble louvre shutters according to job requirements. The unit involves planning job requirements, identifying required products and components to be assembled and their measurements, and applying workplace procedures to ensure their safe and correct assembly.

The unit applies to those assembling interior and exterior louvre shutters used in residential and commercial environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to assemble louvre shutters | 1.1 | Identify and confirm job requirements and style of shutter to be assembled from work order and supplier instructions |
| | 1.2 | Identify work health and safety (WHS) and personal protection requirements of assembly according to workplace procedures |
| | 1.3 | Select tools and equipment, and check their safe and effective operation according to workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 1.4 | Select materials from stock and check against job requirements |
| | 1.5 | Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials |
| 2. Assemble louvre shutters | 2.1 | Source required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications |
| | 2.2 | Lay out, measure, mark and cut materials for shutter |
| | 2.3 | Assemble component parts according to job requirements and manufacturer specifications |
| | 2.4 | Finish shutter assembly according to work instructions |
| 3. Finalise assembly | 3.1 | Check that assembled shutter complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel |
| | 3.2 | Clean assembled shutter according to workplace procedures |
| | 3.3 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.4 | Clean, maintain and store remaining tools and equipment according to workplace procedures |
| | 3.5 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.6 | Legibly complete and process required workplace documentation according to workplace procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in shutter specifications, work orders and instructions<br>• use mathematical information to estimate and measure assembly requirements, including required tolerances |
| Oral communication skills to: | • communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems:<br>  • speaking clearly<br>  • asking questions to gain information |
| Reading skills to: | • interpret routine workplace documentation, including:<br>  • WHS requirements and procedures<br>  • workplace assembly requirements and operator instructions<br>  • work orders and instructions<br>  • shutter specifications, including design, size and quantity |

# Assessment Requirements for MSFBA3021 Assemble louvre shutters

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble each of the following styles of shutters:
  - one fixed louvre shutter
  - one louvre bi-fold shutter
  - one sliding louvre shutter
  - one special-shaped louvre shutter for either a residential or commercial building, based on the template created by candidate for that purpose.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- report material faults, damaged products and equipment
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the types of louvre shutters in the performance evidence, and how to identify and interpret key information

© Commonwealth of Australia, 2025 Skills Insight

- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - building code requirements specific to assembly described in performance evidence
  - safety considerations and potential dangers associated with incorrect assembly
  - cutting patterns and sequences
  - identifying work process problems and resolving within scope of own role
- operation requirements of louvre shutters in performance evidence
- emerging trends in louvre shutters, including new materials used and their associated energy ratings and fire-retardant attributes
- work health and safety (WHS) regulations, standards, procedures, and practices specific to assembly described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment, first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling louvre shutters
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting assembly information
- techniques for measuring, setting up and assembling electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
  - manual, including winders and straps
- techniques for measuring, cutting, setting up and assembling louvre shutters described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond

© Commonwealth of Australia, 2025 Skills Insight

- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - shutter components and materials
  - operating mechanisms required for type of shutter being assembled
  - tools and equipment required to assemble shutters, and procedures for their safe use, operation and maintenance:
    - cutting tools
    - cutting bench
    - saws
- documentation requirements for assembly work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly work described in the performance evidence above, including:

- louvre shutters requiring assembly as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for assembly work, including:
  - work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards

# MSFDG3001 Protect leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3002 Protect stained glass and leadlighting.

## Application

This unit describes the skills and knowledge required to protect leadlight and stained glass for security, environmental and heritage purposes.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Leadlight and Stained Glass

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify protection requirements | 1.1 Identify and follow work health and safety, legislative and organisational requirements<br>1.2 Inspect and determine the process for achieving protection of the leadlight and stained glass<br>1.3 Identify types and quantities of materials required for the protection of leadlight and stained glass from plans or work instructions<br>1.4 Determine work sequence in a logical order to suit the job<br>1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 2. Install protection | 2.1 Cut, shape and form protection materials to ensure correct size and application<br>2.2 Install or fit protection materials in accordance with protection requirements<br>2.3 Identify and rectify problems occurring during the operation. |
| 3. Finalise the protection process | 3.1 Inspect glass for quality of work and identify and repair deficiencies<br>3.2 Clean and store tools, equipment and materials in accordance with workplace procedures<br>3.3 Clean work area and leave in a safe condition and dispose of or recycle waste in accordance with workplace protocols<br>3.4 Accurately complete required workplace documentation |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3002 Protect stained glass and leadlighting.

# Assessment Requirements for MSFDG3001 Protect leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3002 Protect stained glass and leadlighting.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- protected 2 different leadlight and stained glass components in-situ using at least 2 different methods and/or techniques.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for leadlight and stained glass operations
- leadlight and stained glass protection terminology and techniques
- organisational and site standards, requirements, policies and procedures for the protection of leadlight and stained glass
- types of glass and other materials used in the leadlight and stained glass industry, their characteristics, properties, uses and limitations
- protection methods, their properties, uses and limitations
- characteristics and properties of materials used in the protection of leadlight and stained glass
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution
- procedures for the recording, reporting and maintenance of workplace records and information
- mathematical procedures for estimation and measurement.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - stained glass and leadlight for protection

© Commonwealth of Australia, 2025 Skills Insight

- tools and equipment to complete tasks in the Performance Evidence
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFDG3002 Prepare and install architectural engineered leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3004 Prepare and install architectural engineered leadlight and stained glass.

## Application

This unit describes the skills and knowledge required to prepare and install leadlight and stained glass in structural and other architecturally engineered applications.

This unit applies to individuals working with designed glass.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

N/A

## Unit Sector

Leadlight and Stained Glass

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify work requirements | 1.1 Identify and follow work health and safety, legislative and organisational requirements<br>1.2 Identify, confirm and clarify work requirements with appropriate personnel<br>1.3 Identify the process for preparing and installing architecturally engineered leadlight and stained glass |

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Requirements for MSFDG3002 Prepare and install architectural engineered leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3004 Prepare and install architectural engineered leadlight and stained glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- constructed 3 different leadlight panels which individually or cumulatively include geometric and organic shapes
- made repairs that individually or cumulatively include all of the following:
  - corner
  - edge
  - internal
  - complete re-lead
  - bench repair
  - in situ repair.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for leadlight and stained glass operations
- architectural leadlight and stained glass construction terminology and techniques
- organisational and site standards, requirements, policies and procedures for preparation and installation of architectural leadlight and stained glass
- types of glass and other materials used in the leadlight and stained glass industry, their characteristics, properties, uses and limitations
- structural leadlight and stained glass, their properties, uses and limitations
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- mathematical procedures for estimation and measurement.
-

# Assessment Requirements for MSFDG3004 Assemble copper foil glass components

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3006 Assemble copper foil glass components.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled copper foil components for:
  - 1 panel or door insert
  - 1 three-dimensional object
- repaired and reinforced 1 copper foil component.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for assembling copper foil components
- organisational and site standards, requirements, policies and procedures for component assembly
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution relating to copper foil glass assembly
- types of tools and equipment and procedures for their safe use, operation and maintenance
- characteristics of copper foil components and materials used in assembly
- procedures for recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

Supersedes and is equivalent to MSFSL3007 Fuse glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used 3 different fusing techniques to the capacity of the kiln being used.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for assembling copper foil components
- qualities and characteristics of fusing glass, including hazards and handling requirements
- equipment, processes and procedures for fusing glass
- procedures for reporting materials, product or equipment faults
- correct operation of kilns and understanding of the development of kiln firing schedules
- problem identification and resolution relating to fusing glass
- work flow requirements related to fusing of glass
- environmental protection requirements relating to the disposal of waste material
- characteristics of materials used and uses of products produced.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass for fusing
  - kiln
  - tools and equipment to complete tasks in the Performance Evidence
  - workplace procedures.
  -

# MSFDG3006 Process coloured and textured glass by hand

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3008 Process coloured and textured glass by hand.

## Application

This unit describes the skills and knowledge required to cut, shape and apply finishing techniques to annealed, coloured and textured glass of manufactured thickness.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Leadlight and Stained Glass

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine job requirements | 1.1 Read work documentation and identify job requirements<br>1.2 Identify and follow work health and safety requirements<br>1.3 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use<br>1.4 Plan sequence of work to ensure processing is conducted in a logical order |
| 2. Plan and prepare for work | 2.1 Select glass cutting table and clear work surface of debris and dust<br>2.2 Clear work area of obstructions and potential hazards with cullet bins |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 2.3 Check glass for imperfections and damage prior to handling<br>2.4 Safely place glass to be cut in the required work area using correct manual handling procedures<br>2.5 Accurately measure glass within specified tolerances accurately to minimise waste<br>2.6 Set and test equipment settings and safety controls in accordance with workplace procedures |
| 3. Process glass | 3.1 Achieve required quality and output through correct operating and monitoring of tools and equipment in accordance with manufacturer instructions<br>3.2 Make routine lubrication and adjustments of tools and/or equipment in accordance with manufacturer recommendations<br>3.3 Identify and report problems occurring during work operations to appropriate personnel in accordance with workplace procedures<br>3.4 Inspect completed product for quality of work and repair, reprocess or discard in accordance with workplace procedures |
| 4. Complete work | 4.1 Label and store processed glass ensuring there are no projections in accordance with workplace procedures<br>4.2 Remove scraps and off-cuts for disposal and/or recycling in accordance with environmental or workplace procedures<br>4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures<br>4.4 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures<br>4.5 Accurately complete workplace documentation in accordance with workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFDG3006 Process coloured and textured glass by hand

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3008 Process coloured and textured glass by hand.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed all of the following in annealed coloured, opaque and textured glass by hand:
  - straight cuts
  - simple shapes
  - truncated and radius corners
  - circles
  - complex shapes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- qualities and characteristics of coloured and textured glass, including hazards and handling requirements
- correct identification and use of glass cutting equipment, their functions and procedures for use
- set-up and operation of glass cutting equipment, including procedures for reporting product defects or equipment faults
- work flow requirements related to glass cutting
- environmental protection requirements relating to the disposal of waste material
- established communication channels and protocols.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2025 Skills Insight

- equipment, tools and materials required to complete tasks specified in the Performance Evidence
- glass product to be cut
- safety and personal protective equipment
- work orders
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFDN4003 Produce patterns and templates

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers developing patterns and/or templates for production processes by hand, by using appropriate tools and equipment, and by computer-assisted production.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing design

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for and dimension the task | 1.1 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.2 | Customer orders are interpreted to establish required sizes of finished products |
| | | 1.3 | Size requirements are checked in relation to the production process and finishing capacity of the workplace |
| 2 | Plan process | 2.1 | Material for pattern or template is identified for approximate size and characteristics |
| | | 2.2 | Required instruments and equipment are identified, located and assembled |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.3 | Drawings and related specifications are interpreted |
| | | 2.4 | Procedures for using pattern development instruments and tools are checked and equipment is prepared for use |
| 3 | Plot dimensions | 3.1 | Equipment and tools are used following normal workplace procedures |
| | | 3.2 | Each dimension is measured, exploded and plotted maintaining appropriate angles, arcs and curves |
| | | 3.3 | Visual inspection and measurements are used to compare pattern dimensions and shapes with drawings and specifications |
| 4 | Complete pattern or template | 4.1 | Pattern or template is completed ensuring that the pattern indicates completion date and original drawing details |
| | | 4.2 | Required workplace approval of pattern or template is obtained |
| | | 4.3 | Plans are marked with notations for workplace requirements, including authorship, process or customer requirements, authorisation and any review dates |
| | | 4.4 | Plans are copied and filed, as required, according to workplace policies and procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the

© Commonwealth of Australia, 2025 Skills Insight

work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate conceptual ability, discretion, judgement and problem-solving skills in the production of patterns or templates<br>• work is performed with little external assistance and with minimal supervision or direction<br>• development of patterns and/or templates is undertaken in accordance with established enterprise procedures and practices<br>• customers may be internal or external |
| **Tools and equipment include:** | • computer numeric controlled (CNC) machines<br>• static woodworking machines<br>• relevant hand tools |
| **Materials include:** | • manufactured board<br>• solid timbers<br>• composite materials |
| **Personal protective equipment includes:** | • that prescribed under legislation, regulations and enterprise policies and practices |
| **Information and procedures include:** | • work organisation procedures and practices relating to the production of patterns and/or templates<br>• designer/drawer specifications and instructions<br>• legislation/regulations/codes relevant to the work undertaken<br>• furniture production techniques and criteria, including ergonomic requirements<br>• quality and Australian Standards and procedures |

# Assessment Requirements for MSFDN4003 Produce patterns and templates

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret drawings and extrapolate to physical dimensions
- Select appropriate mediums and materials and produce a minimum of three (3) patterns or templates making use of:
  - manufactured board
  - solid timber
  - composite material
- Suggest improvements to pattern and template production and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Company operating procedures, including procedures for pattern and/or template production
- Types, characteristics uses and limitations of pattern/template materials
- Operation requirements of equipment and work systems in own work area
- Competency requirements of the work activities
- Relevant regulatory requirements, recognised standards and codes, and industry practices

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to drawings, job specifications, information on production/fabrication process, production materials and relevant computer equipment and software.

# MSFDN5001 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing complex drawings using computer-aided techniques and capabilities, including three-dimensional modelling, exploded assembly drawings and conversion of drawings for computer numerically controlled (CNC) applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing design

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Create exploded assembly drawings | 1.1 | Drawing preparations, including drawing name, labelling information, dimensions, specifications and information management requirements, are obtained/completed |
| | | 1.2 | Three-dimensional models are prepared for all components |
| | | 1.3 | Perspective view of the model is created and confirmed |
| | | 1.4 | Model is exploded so that all components are visible |
| | | 1.5 | All individual components are labelled in accordance with enterprise requirements |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Quality checks are completed to ensure accuracy of outcomes |
| | | 1.7 | Drawings are stored in accordance with enterprise requirements |
| 2 | Create job sheets | 2.1 | Preparations, including file storage, product coding, inventory information and drawing management requirements, are identified and completed |
| | | 2.2 | Job sheet template is set up in accordance with enterprise requirements and practices |
| | | 2.3 | Necessary orthographic views are created and dimensioned |
| | | 2.4 | Sequencing of machine operations and operator requirements, including work health and safety (WHS) are identified and listed |
| | | 2.5 | Draft job sheets are prepared, reviewed, tested and amended to enterprise requirements |
| | | 2.6 | Job sheets are stored in accordance with enterprise requirements |
| 3 | Convert drawings for CNC applications | 3.1 | Conversion requirements are identified and confirmed from the CNC machine specifications |
| | | 3.2 | Layers and additional information required for final conversion are created |
| | | 3.3 | Drawing entities are assigned to the relevant layers |
| | | 3.4 | Conversion to the required file type is completed |
| | | 3.5 | Converted file is stored in accordance with enterprise requirements |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate conceptual, analytical and organisational ability, judgement and problem-solving applied under broad guidance within routine and non-routine situations
- work involves enterprise and client-initiated ideas or requests

**Preparing complex drawings includes:**

- identification, selection and use of computer-aided techniques and capabilities, including three-dimensional modelling, exploded assembly drawings and conversion of drawings for CNC applications
- researching software trends and developments
- generating and presenting ideas
- liaising with client and/or other functional areas
- compiling information

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- customer requirements
- work specifications
- product catalogues and style manuals or equivalent
- inventory systems and records
- organisation work procedures and sequencing arrangements
- legislation/regulations/national and industry codes and practices relevant to the product
- quality and Australian Standards and procedures

# Assessment Requirements for MSFDN5001 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Create a minimum of two (2) exploded assembly drawings, including:
  - preparation of three-dimensional models
  - creation of perspective views
  - exploding the models to expose all components
  - labelling of all components
  - management and storage of drawings
- Create a minimum of two (2) confirmed job sheets which have the necessary orthographic views and all required management and inventory information
- Convert a minimum of two (2) drawings for CNC application, including the creation of layers, assignment of drawing entities and the protection and storage of converted files
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity
-

## Knowledge Evidence

- Design core and professional practices
- Ergonomic principles for furniture design and manufacture
- Type, range, uses and limitations of contemporary computer-aided design (CAD) software

© Commonwealth of Australia, 2025 Skills Insight

- Types, range, uses and limitations of contemporary CAD applications
- Industry product ranges and detailed knowledge of furniture construction processes
- Types of construction materials and their characteristics, uses and limitations
- Materials, trims, accessories and their properties and characteristics
- Enterprise information management systems and processes related to drawings
- Relevant WHS legislation, regulatory requirements and codes of practice

# Assessment Conditions

# MSFFDM4001 Assemble custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4002 Assemble custom furniture.

## Application

This unit describes the skills and knowledge required to assemble custom furniture to production specifications for design, manufacturing or similar operations.

This unit applies to individuals working in a manufacturing or design studio environment who participate in the assembly of custom furniture, either alone or as part of an internal or external team.

No licensing or legislative or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for work | 1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to assembling custom furniture<br>1.2 Read and interpret job requirements to identify processes and materials<br>1.3 Plan assembly sequence and confirm materials and component layout from job specifications<br>1.4 Select and check tools, equipment and materials in accordance with workplace procedures<br>1.5 Select adhesives, trims and accessories and evaluate against job specifications |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.6 Develop and document quality-checking procedures for each step of assembly process |
| 2. Assemble custom furniture | 2.1 Lay out components, materials and tools in accordance with assembly plan<br>2.2 Check components against specification prior to assembly and reject components that are out of specification in accordance with workplace procedures<br>2.3 Assemble components and check against job specification for accuracy, fit, twist and distortion<br>2.4 Assemble and fit other features to meet job specifications<br>2.5 Apply hardware and decorative accessories in accordance with job specifications<br>2.6 Prepare product for final finish, including checking for and removing bruises, scratches, dents and marks, to meet quality standards<br>2.7 Check product quality at identified checkpoints in accordance with work plan and against job specifications |
| 3. Finalise operation and maintain equipment | 3.1 Store or recycle unused materials as required in accordance with workplace procedures<br>3.2 Clean and store tools and equipment according to manufacturer specifications and workplace procedures<br>3.3 Tag and report on faulty or defective equipment in accordance with workplace procedures<br>3.4 Clean and clear work area in accordance with workplace procedures<br>3.5 Complete required workplace documentation |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations including measurements.
- Reading skills to interpret written instructions and specifications.
- Writing skills to document quality standards and report on the assembly process.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Requirements for MSFFDM4001 Assemble custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4002 Assemble custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- assemble and finish three different and significant custom furnishing products using three different adhesive types to meet quality standards and job specifications.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- techniques for the assembly, fixing and finishing of custom furniture components including:
  - wall units
  - vanity units
  - kitchen cabinets
  - sideboards/buffets
  - drawer units
  - display cabinets
  - counters
  - tables
  - beds
  - shelving
  - doors
- characteristics and properties of materials used in furniture components and their assembly including:
  - timber (both native and imported)
  - adhesives
  - screws
  - nails
  - dowels
  - metal fasteners

© Commonwealth of Australia, 2025 Skills Insight

    - knockdown fittings
    - glass
    - decorative finishes
    - abrasive paper
- types, characteristics, uses, limitations and safety requirements of tools and equipment used in assembly operations including:
    - clamps
    - winding sticks
    - measuring tapes or rules
    - hammers
    - mallets
    - squares
    - presses
- types, characteristics, uses, limitations and safety requirements of adhesives and fasteners used in custom furniture assembly
- locational characteristics that impact the approach to and outcomes of assembly of custom furniture
- potential workflows relating to the furniture items being assembled
- relevant problem identification and resolution relating to faults, out-of-specification components, tools, equipment and overall quality
- safe handling requirements for equipment, products and materials, including use of personal protective equipment
- applicable legislative, work health and safety and workplace requirements relevant to assembling custom furniture
- work instructions, operating procedures and inspection processes to:
    - minimise the risk of injury to self or others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality
- workplace and site standards, requirements, policies and procedures for the assembly of custom furniture.

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment, information and resources, including:
    - product specifications
    - assembly equipment and materials
    - location information for where custom furniture will be fitted, sufficient to inform assembly approach and methods.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4002 Collect and interpret information to support production processes

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed, and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT4003 Organise production processes and MSFFT4008 Interpret and use workplace information.

## Application

This unit describes the skills and knowledge required to collect and apply statistical and other information to support the development and organisation of production processes in a furniture or similar operation.

This units applies to individuals working in a manufacturing environment who use information to analyse production processes, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

| | 5.7 Record and report on any non-conformity in product output and investigate possible causes |
| 6. Evaluate production process | 6.1 Gather, prepare and process productivity information and other data reports in accordance with workplace procedures<br>6.2 Check and report on all procedures for process and conformity with trial outcomes<br>6.3 Note reasons for both positive and negative outcomes as per requirements<br>6.4 Analyse outcomes for trends or patterns that can be used to optimise workplace operations<br>6.5 Gain authorisation for ongoing work procedures from appropriate personnel for implementation, and negotiate required changes<br>6.6 Recommend variations to design specifications based on trial outcomes |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret job specifications.
- Numeracy skills to establish, document and interpret statistical information relating to production.
- Writing and oral communication skills to record and report on information and provide analysis.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Assessment Requirements for MSFFDM4002 Collect and interpret information to support production processes

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed, and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT4003 Organise production processes and MSFFT4008 Interpret and use workplace information.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- collect and interpret information to support production processes for one specified and significant production operation, including:
  - reading and interpreting workplace documents including job specifications, statistical reports and other data and process documents
  - conducting trials
  - coordinating and evaluating the production process
  - reporting on the success of the process
  - undertaking statistical gathering and analysis using appropriate methods for the audience.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of workplace information including:
  - production plans and schedules
  - product drawings and specifications
  - equipment instructions and capacities
  - relevant standards, inspection requirements and design rules
  - customer-related information
  - inventory and stock levels
  - archives and records
  - supplier and market analysis
- workplace and workflow theory relating to production processes and manufacturing
- equipment safety features
- workplace procedures for setting up for production and reporting

© Commonwealth of Australia, 2025 Skills Insight

- company products, market, work systems and equipment
- contemporary business information and statistical reporting, forecasting and presentation techniques
- softwares suitable for storage, manipulation, management and presentation of statistical information
- equipment and machine processes relevant to the production processes, including microprocessor or computer-controlled machines
- quality procedures, inspection and testing requirements
- legislative requirements of the work activities
- job specifications, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - production plans and procedures
  - past collections of data
  - data-collecting and analysis tools or software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4003 Construct and evaluate prototypes and samples

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4005 Construct and evaluate furniture prototypes and samples, and MSFFT4006 Construct prototypes and samples.

## Application

This unit describes the skills and knowledge required to construct and evaluate, or oversee the construction and evaluation of, prototypes and samples based on established plans, drawings or specifications. Prototypes may be produced by hand, by using appropriate machines, tools and equipment, or by computer-assisted production, and may require the application of joinery, construction and finishing techniques.

The unit applies to individuals working in an industry operation of any size, or a design studio environment, who produce prototypes, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish work requirements | 1.1 Identify purpose of prototype or sample from prototype specifications<br>1.2 Identify materials specifications for item from prototype specifications and workplace documentation<br>1.3 Identify and verify ergonomic requirements from prototype specifications<br>1.4 Identify construction requirements and methods for materials |

# Assessment Requirements for MSFFDM4003 Construct and evaluate prototypes and samples

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4005 Construct and evaluate furniture prototypes and samples, and MSFFT4006 Construct prototypes and samples.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- construct two different prototypes or samples from concept sketches and freehand development drawings, and in doing so:
  - interpret a design brief to apply design elements and principles
  - identify compatibility or incompatibility of materials, adhesives, fittings and fasteners for the application
  - select and apply appropriate joinery, construction and finishing techniques
  - select and use appropriate materials, equipment and processes for the item being constructed
  - show how the design of the prototype components relates to the expected life of the item
  - ensure that the prototype satisfies the original or varied specification.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the function and features of a design brief, including:
  - the aims, objectives, milestones for the design project
  - target audience
  - budget
  - timeline
  - consultation requirements
  - colour requirements
  - image requirements
  - function
- the characteristics and behaviours of a broad range of materials, including:

© Commonwealth of Australia, 2025 Skills Insight

  - scrap timber and manmade timber
  - plastics
  - metal and metal alloys
  - stone
  - glass
  - fabrics and textiles
  - fibreglass
  - leather
  - foam
  - cardboard and paper products
  - any other manipulable substance
  - adhesives
  - fillers and finishes
- assembly processes, including:
  - nailing
  - gluing
  - screwing
  - welding
  - pressing
  - sewing
  - bonding
  - jointing
  - connecting various materials
- work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for the construction of prototypes and samples
- workplace and site standards, requirements, policies and procedures for constructing prototypes and samples
- environmental protection requirements in relation to the selection and use of materials
- established communication channels and protocols relevant to the prototyping process, including stakeholder or client communications
- relevant problem identification and resolution to meet job specifications in terms of function, aesthetics, elements and principles of design, technical integrity and ergonomics
- elements and principles of design, including:
  - line
  - shape
  - form (geometric or organic)
  - texture
  - colour
  - function
- principles of ergonomic design and aesthetic values
- types of tools and equipment and procedures for their safe use, operation and maintenance

© Commonwealth of Australia, 2025 Skills Insight

- set-up and operation of equipment
- design and other relevant software and applications used in prototyping
- product assembly techniques
- sketching and drawing methods, including:
  - isometric
  - oblique
  - perspective
  - orthographic
  - elevation drawings that explode the parts of the concept sketches and include:
    - rough sizes
    - scale
    - tones
    - values
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- appropriate mathematical procedures for estimation and measurement
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4004 Construct joints for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4002 Construct joints for custom furniture.

## Application

This unit describes the skills and knowledge to join timber by constructing joints using hand and portable power tools. It includes adapting or designing joints that are compatible with the product material, purpose and style of the product being made.

This unit applies to individuals working in a manufacturing or design studio environment who make and adapt joints to join timber, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop Practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for work | 1.1 Verify and comply with relevant legislative, work health and safety and workplace requirements related to constructing joints<br>1.2 Read and interpret product specifications and other relevant documentation to identify furniture joint requirements<br>1.3 Identify product purpose, furniture style and construction material required from supplied documentation<br>1.4 Identify joint requirements and select appropriate joint type for design, construction or adaption<br>1.5 Select tools, adhesives and fasteners to match joint type<br>1.6 Check tools, equipment and materials for serviceability and safety in accordance with workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 1.7 Develop and document quality-checking procedures for each step in joint construction process |
| 2. Make joint | 2.1 Mark out cutting and joining lines to suit joint type<br>2.2 Check measurements and calculations for accuracy and to ensure quality outcomes<br>2.3 Identify timber features and observe optimal usage criteria<br>2.4 Cut timber to specification, and inspect and prepare for joining<br>2.5 Join timber in accordance with job specifications<br>2.6 Use fasteners and adhesives to ensure that, based on specification, required joints are firm<br>2.7 Check finished joint against quality requirements |
| 3. Finalise the work sequence | 3.1 Prepare product for finishing in accordance with design specification<br>3.2 Clean, maintain and store carving tools in accordance with manufacturer specifications<br>3.3 Clean and clear work area in accordance with workplace procedures<br>3.4 Complete required workplace documentation |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations including measurements.
- Reading skills to interpret job specifications.
- Writing and oral communication skills to document quality standards and procedures and record and report on joint construction.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Assessment Requirements for MSFFDM4004 Construct joints for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4002 Construct joints for custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce a minimum of four different joint types that meet industry standards and tolerances, with at least two produced substantially by hand operations, and in doing so:
  - utilise at least three different adhesive types across the different joint types
  - match requirements of adhesives and fasteners to the timbers/materials used.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of joints used, including:
  - dowel
  - mortise and tenon
  - dovetail
  - lap joint
  - biscuit joint
  - finger joint
  - housing joint
  - mitre or bridle joints
- types of tools and equipment used in joint construction and procedures for their safe use, operation and maintenance, including:
  - chisels
  - mallets
  - mortise gauges
  - vernier callipers
  - vices
  - dovetail, tenon and coping saws
  - planes
  - files

© Commonwealth of Australia, 2025 Skills Insight

  - hand and power drills
  - dowel jigs
  - portable biscuit machines
  - power routers, planers, saws and sanders
- characteristics and properties of timber being used for joint
- characteristics, properties and selection criteria of adhesives used, including:
  - resorcinol formaldehyde
  - polyurethane
  - epoxy
  - cyanoacrylate
- moisture suppressants and barrier systems relevant to joint construction and finishes
- workflow in relation to the products being made or repaired
- equipment safety features and serviceability criteria
- applicable work health and safety, legislative and workplace requirements relevant to constructing joints for custom.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a selection of products requiring joints
  - a full suite of tools and adhesives for potential selection and use.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4005 Design, construct and test jigs

## Modification History

Release 1. Unit code and Application changed. Element and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4004 Design, construct and test jigs and MSFFDT4015 Produce templates and jigs for custom-made furniture.

## Application

This unit describes the skills and knowledge required to design, construct and test jigs required for manufacture, assembly, construction and testing of products. It covers all jigs, whether temporary or highly engineered, designed manually or through use of computer-aided design tools.

This unit applies to individuals required to design, construct and test jigs as part of their job role in design, manufacturing and similar workplaces, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Determine production requirements | 1.1 Identify and follow work health and safety requirements, including personal protection needs, throughout the work<br>1.2 Gather information about item to be produced from work documentation and liaise with others involved in design and production process<br>1.3 Identify and review constraints and opportunities for jig design from requirements and workplace procedures |
| 2. Design jig | 2.1 Develop ideas for jig design based on knowledge of materials and production processes |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| | 2.2 Refine jig design through testing and experimentation to meet requirements<br>2.3 Make accurate calculations to support effective jig design<br>2.4 Plan a production process that works effectively with jig design<br>2.5 Produce jig design based on testing and production process investigation undertaken<br>2.6 Specify materials for jig construction from design process |
| 3. Construct jig | 3.1 Select tools and equipment suited to the jig design<br>3.2 Construct jig in accordance with design and within tolerances using techniques that match requirements |
| 4. Test jig | 4.1 Use jig to produce sample and determine its adherence to set tolerances<br>4.2 Adjust jig and design specifications to meet production requirements in response to testing |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but are not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations including measurements=.
- Reading skills to interpret job requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency*.

# Assessment Requirements for MSFFDM4005 Design, construct and test jigs

## Modification History

Release 1. Unit code and Application changed. Element and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4004 Design, construct and test jigs and MSFFDT4015 Produce templates and jigs for custom-made furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully design, construct and test jigs that operate within acceptable production tolerances for two projects, including one moving jig.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to interpret detailed product specifications and technical drawings
- characteristics, uses and limitations of materials used for jig construction
- construction techniques relevant to the chosen jig material
- processes for testing jig design
- machine technical specifications, including the acceptable criteria for related jigs
- mathematical procedures for taking measurements and making calculations for jig design.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications and drawings
  - drawing materials or equipment for jig design
  - jig construction materials
  - construction machinery, equipment and hand tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4006 Hand carve wood to custom design

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is equivalent to MSFFM4001 Hand carve wood to custom design.

## Application

This unit describes the skills and knowledge required to confirm the design requirements, select the wood, hand carve a custom design and prepare the carving for finishing.

This unit applies to individuals working in a manufacturing or design studio environment who hand carve wood components, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |

# Assessment Requirements for MSFFDM4006 Hand carve wood to custom design

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is equivalent to MSFFM4001 Hand carve wood to custom design.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- hand carve two significant products, showing:
  - the interpretation and necessary adoption of the design specifications
  - the selection of suitable timber for the carving
  - the completion of the carving to specification or commercially acceptable standard
  - the preparation of the products for finishing
- carry out operator maintenance on hand tools used across the two significant products, including the grinding and sharpening of at least one knife and one chisel.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- terminology covering hand carving operations and materials
- techniques used in hand carving, including:
  - chip carving
  - relief carving
  - Scandinavian flat plane
  - caricature carving
  - love spoon
  - treen
  - whittling
- types, characteristics, uses and limitations of timber species for hand carving
- techniques for the design and documentation of specifications for hand carved products
- workplace and site standards, requirements, policies and procedures for hand carving of wood
- types, characteristics, uses, limitations and maintenance requirements of the range of tools used in wood carving, including:

© Commonwealth of Australia, 2025 Skills Insight

  - carving knives
  - chisels (straight and curved)
  - short bent front bent
  - spoon bit
  - back bent
  - skew
  - fishtail
  - spade
  - parting tool
  - macaroni (fluterino and backeroni)
  - palm tools
  - rasps
  - rifflers
  - punches
  - gouges
  - venier
  - router
- processes for evaluating the quality of carving tools in terms of specifications, safety, maintainability and commercial reputation
- preparation methods wood for carving, including:
  - confirming grain
  - identifying and responding to faults
  - dealing with knots and contaminants
  - cutting wood to workable size and shape
- applicable work health and safety, legislative and workplace requirements and instructions relevant to the hand carving of wood.

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications and/or drawings
  - a range of hand carving tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4007 Identify and calculate production costs

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is not equivalent to MSFFT4010 Identify and calculate production costs.

## Application

This unit describes the skills and knowledge required to gather and analyse information needed for the costing process and then estimate, calculate and document production costs in a commercial production environment.

This unit applies to individuals working in a role requiring estimation of end-to-end production costs, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Gather and analyse information | 1.1 Identify and collect information required to calculate production costs<br>1.2 Analyse information and extract relevant details<br>1.3 Convert required information to an appropriate format or software and store ready for retrieval and application |
| 2. Estimate production costs | 2.1 Estimate and accurately record types and quantities of materials required for production based on specifications<br>2.2 Estimate time requirements for production activities and other lead times based on specifications<br>2.3 Estimate and record labour requirements for direct production and handling operations based on specifications |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| | 2.4 Estimate and record costs associated with wastage (labour, materials, consumables) based on specifications and previous project outcomes |
| 3. Determine production costs | 3.1 Calculate and document total production costs using required software in accordance with workplace procedures<br>3.2 Determine and document allowance for overheads and mark-up percentages in accordance with workplace procedures<br>3.3 Determine costs associated with transportation and packaging of product<br>3.4 Calculate and communicate final cost to customer through liaison with marketing/sales personnel and other personnel involved in financial decision-making |
| 4. Document costing | 4.1 Document details of costs in accordance with workplace procedures and formats<br>4.2 Check and verify costing details in accordance with workplace procedures<br>4.3 File and store costing information for future reference in accordance with workplace procedures<br>4.4 Respond appropriately and in accordance with workplace procedures to changes in scope and other requirements |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to identify and interpret different data types, perform calculations including measurements and provide product and production estimates.
- Reading skills to interpret product and production costing information.
- Writing and oral communication skills to record and report on production costing processes and information accurately.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

© Commonwealth of Australia, 2025 Skills Insight

# Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFT4010 Identify and calculate production costs.

# Assessment Requirements for MSFFDM4007 Identify and calculate production costs

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is not equivalent to MSFFT4010 Identify and calculate production costs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- identify and calculate production and product costs for two different products, and:
  - deliver documentation that identifies accurate costing information about all of the following:
    - materials
    - labour
    - overheads and percentage mark-ups
    - wastage
    - transport and packaging where relevant
  - produce reporting that shows the collection, organisation, and interpretation of information including procedures (in the context of cost), materials costings, payroll data, accounting records, costing matrices of other businesses and past production data
  - select suitable software or other means for documenting and communicating the production and product costs
  - adapt costings based on differences or changes in production scope, and report on the impact of those changes for one of the products.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- information required to establish production costs and what specific details are required:
  - product specifications
  - process specifications
  - production plan
  - labour unit costs
  - warehousing and distribution
  - logistic support contracts

© Commonwealth of Australia, 2025 Skills Insight

- supply agreements
- overhead costs:
  - rental/lease costs
  - utilities
  - non-production resources
  - depreciation of plant and equipment
  - warehousing margins
  - physical distribution unit costs
  - insurance
- workplace financial and costing policies and procedures for calculating and communicating costings
- how changes in product/production scope impact on costings
- features of software applications for calculating production costs to inform appropriate selection
- methods of communication relating to documenting production costs for both internal workplace and stakeholder/client consumption
- mathematical procedures used to calculate production costs:
  - estimation
  - the four basic mathematical operations: addition, subtraction, multiplication, and division
  - calculation of percentage mark-ups.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications
  - production process information
  - workplace costing policies and procedures
  - current information technology used for calculating and communicating costings.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4008 Investigate materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4011 Research and select furniture materials and technology.

## Application

This unit describes the skills and knowledge required to research and recommend materials and technologies that meet the requirements of a design brief.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare product and technology information from a wide range of sources to develop a design solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine project requirements | 1.1 Review and clarify project brief with client to confirm requirements<br>1.2 Confirm and evaluate parameters and constraints from requirements<br>1.3 Select work resources based on needs of project<br>1.4 Identify and assess aspects of brief that inform finish selection<br>1.5 Identify key project stakeholders and establish required communication protocols |
| 2. Research materials | 2.1 Assess aesthetic requirements of materials and identify potential options that meet requirements<br>2.2 Evaluate intended use against the functional features of different |

# Assessment Requirements for MSFFDM4008 Investigate materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4011 Research and select furniture materials and technology.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- investigate materials and associated technologies that respond to three different design briefs and which individually or cumulatively involve at least two types of materials, and in doing so:
  - evaluate the variations in costs and quality outcomes associated with different materials and technologies for each of the three design briefs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships and how they are used in materials selection
- how different technologies can be used to achieve design elements, and how materials and technologies interact
- emerging industry technologies and the potential for application to meet a design brief
- production methodologies of furniture (or similar) manufacturers, including suitability of different methods for a range of output volumes
- design techniques for products based on materials selection
- materials used to produce products, including:
  - their specifications, behaviours and limitations
  - wood, plastics, metals and other commonly used materials
- how to structure and present research information and recommendations.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 Skills Insight

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

# MSFFDM4009 Match furnishing style and materials to customer requirements

## Modification History

Release 1. Unit code and application changed. Elements and performance criteria changed. Range of conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.

## Application

This unit describes the skills and knowledge required to determine and match customer style and materials requirements and create the related workplace documentation.

This unit applies to individuals providing furnishing product information to customers in any sector. Customers may be internal or external.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Determine customer requirements | 1.1 Establish customer needs through review of documentation or consultation with customer and in-person inspection of product site if required<br>1.2 Research and identify potential options and provide details or examples of potential furnishing or similar products that meet styles and materials requirements to customer<br>1.3 Explain limitations and benefits of different styles and materials within context of product's intended location and use<br>1.4 Identify and explain options for the use and modification of styles or materials to customer<br>1.5 Confirm customer specifications and parameters for making final |

# Assessment Requirements for MSFFDM4009 Match furnishing style and materials to customer requirements

## Modification History

Release 1. Unit code and application changed. Elements and performance criteria changed. Range of conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- match furnishing style and/or materials to meet the needs of two different customers, providing information on all of the following:
  - product characteristics and origins
  - competitive features
  - how the product meets specific customer needs
  - costs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations when providing information to customers, including individual responsibility under Australian consumer law
- parameters for making furnishing style and materials selections:
  - overall design parameters
  - colour
  - materials
  - practicality
  - cost
  - end user requirements
- historical and contemporary, including emerging art and design styles and movements, and their respective style characteristics and materials, and options relevant to the work context:
  - product characteristics and origins
  - competitive features
  - costs
- visual aesthetics

© Commonwealth of Australia, 2025 Skills Insight

- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs:
  - brochures
  - magazines
  - websites such as online galleries and retail sites
  - design forums
  - reference books
  - other existing workplace design information
  - transferable technological ideas or concepts
  - natural or man-made structures and objects
- current ethical issues in society affecting makers and designers, including but not limited to:
  - social justice
  - environmental sustainability
  - ethical sourcing of material
  - biodiversity
  - cultural heritage and sensitivities
  - social responsibilities of makers and designers
- making techniques for products based on materials selection
- style, materials and finishes used to produce products, including their specifications, behaviours and limitations, and how currently available materials and finishes can be applied to achieve historical art and design styles
- workplace policies and procedures for:
  - costing of products
  - interactions with customers
  - documentation requirements
- mathematical procedures for calculation of costs.

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information about product options
  - information technology for documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4010 Prepare and present design and manufacturing information

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove content duplicated with Performance Criteria, and volume/frequency of evidence added. Supersedes and is not equivalent to MSFFDT4007 Prepare and present furniture design information.

## Application

This unit describes the skills and knowledge required to prepare and present information about design concepts and the associated manufacturing proposals in response to a design brief.

This unit applies to individuals who analyse and use information from a wide range of sources as part of the design process. They may work alone or as a member of a collaborative design/manufacturing team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | presentation to suit audience needs<br>2.3 Source and prepare supporting written information about design, proposed manufacturing process and potential options<br>2.4 Include information about all stages of manufacturing process |
| 3. Present information | 3.1 Present recommendations in a format and level of detail suited to client and scope of the project<br>3.2 Articulate rationale for chosen solution and present to client<br>3.3 Seek client feedback on proposed solution and use feedback in design process |

# Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret design briefs and other relevant information.
- Writing and oral communication skills to record and report on design and manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFDT4007 Prepare and present furniture design information.

# Assessment Requirements for MSFFDM4010 Prepare and present design and manufacturing information

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove content duplicated with Performance Criteria, and volume/frequency of evidence added. Supersedes and is not equivalent to MSFFDT4007 Prepare and present furniture design information.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare and present design and manufacturing information for two different products that includes:
  - two types of drawings (sketches, working drawings, digital drawings or manual drawings)
  - information on materials, and construction techniques or manufacturing technologies, and finishing
  - one of maquettes, prototypes or samples
  - selection of workplace technology including communication and design software that shows consideration of audience
  - selection and implementation of one or more methods to review the effectiveness of the presentation.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- information collection methods that support presentation development and delivery
- communication protocols
- elements and principles of design
- application and use of ergonomic and anthropometric data (or factors) in design projects
- presentation methods for communicating elements and principles of design
- manufacturing methodologies being presented, including their advantages and disadvantages.
- digital and non-digital presentation methods options for presentation methodology, and the advantages and disadvantages and associated equipment requirements for presenter and audience:
  - presentation boards
  - portfolios

© Commonwealth of Australia, 2025 Skills Insight

- photography
- video and remote delivery
- other forms of multimedia.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - current information technology including design software for preparation of information.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4011 Prepare tender submissions

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content added to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4012 Prepare a tender submission.

## Application

This unit describes the skills and knowledge required to analyse tender requirements and prepare and submit a formal tender for the supply of products and services.

This unit applies to individuals working in senior operational, supervisory or management roles in any industry sector, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify opportunity to provide products or services | 1.1 Identify opportunities that are within operational scope or work areas of business unit or workplace<br>1.2 Match available workplace resources expertise to potential opportunities<br>1.3 Assess feasibility of undertaking proposed project or work and seek approval in accordance with workplace policies and procedures |
| 2. Analyse tender requirements | 2.1 Correctly interpret tender specification documentation and seek clarification with originator if required<br>2.2 Develop proposed methodology that matches scope and nature of tender request<br>2.3 Identify required resources and confirm their availability with |

# Assessment Requirements for MSFFDM4011 Prepare tender submissions

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content added to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4012 Prepare a tender submission.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare two formal tenders for different and significant goods and services that address:
  - the full requirements of the tender brief
  - total resource requirements
  - total costing covering all components and scenarios
  - legislative requirements
  - options for the client.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work area for which tender is being prepared, including:
  - compliance requirements (internal and external)
  - quality requirements
- features and formats of complex information that includes:
  - multi-trade work instructions and work orders
  - building and structural plans and safety procedures – and how to interpret them
- report writing techniques
- factors that impact decision to submit tenders:
  - resources
  - capacities
  - capabilities
- tender processes:
  - management
  - preparation
  - submission

# MSFFDM4012 Produce computer-aided line and component production drawings

## Modification History

Release 1. Unit code and title changed. Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify volume/frequency of evidence. Supersedes and is equivalent to MSFDN4002 Produce line and component production drawings.

## Application

This unit describes the skills and knowledge required to use computing and software capabilities to produce line and component production drawings intended for use in a furnishing industry production, manufacturing or marketing environment.

This unit applies to individuals required to create line drawings as part of their job role in design, manufacturing and similar workplaces for production purposes.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Produce line drawings | 1.1 Identify and obtain essential information that informs drawing requirements<br>1.2 Select presentation style and appropriate software to achieve desired result<br>1.3 Create clear drawings that accurately reflect product specification and presentation requirements |
| 2. Prepare component production drawings | 2.1 Obtain essential information on component specifications, dimensions and drawing and labelling management<br>2.2 Identify drawing conventions and specifications to be noted on |

Assessment Requirements changed to remove duplication with Performance Criteria and clarify volume/frequency of evidence. Supersedes and is equivalent to MSFDN4002 Produce line and component production drawings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce three computer-aided line and production drawings, of which one must be 3D, and:
  - interpret specifications and measurements in two and three-dimensional (2D and 3D) forms across the three drawings.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- typical features and functions of computer-aided drawing programs and their application in producing detailed line and production drawings:
  - drawing tools
  - view displays
  - edit functioning
  - working layers
  - plotting
- basic elements of line and component production drawings:
  - size and shape of component or product
  - projection and production method
  - limits, fits and tolerances of size, form and position
  - surface treatments
  - materials specifications
- regulatory requirements, recognised standards and codes, and industry practices for drawing.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design concepts
  - specifications
  - computer-aided design equipment included current industry-standard software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4013 Produce curved and shaped components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4003 Produce curved and shaped components for custom furniture.

## Application

This unit describes the skills and knowledge required to produce curved and shaped components for custom furniture or similar products in in furnishing or similar operations.

This unit applies to individuals working in a manufacturing or design studio environment who produce custom curved or shaped components, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for work | 1.1 Verify and comply with relevant legislative, work health and safety and organisation requirements related to producing curved and shaped components<br>1.2 Read and interpret job specifications to identify processes and materials<br>1.3 Identify, evaluate and select production materials<br>1.4 Select and check tools and equipment in accordance with workplace procedures<br>1.5 Identify, evaluate and select techniques for bending, forming and |

# Assessment Requirements for MSFFDM4013 Produce curved and shaped components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4003 Produce curved and shaped components for custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce six significant timber curved components, five from solid timber and one using ply:
  - one involving shaping from solid timber using hand techniques
  - one involving shaping from solid timber using machine techniques
  - one involving laminating
  - one involving use of heat/steam
  - one involving other techniques
- items must demonstrate appropriate design, use of materials and strength for purpose
- perform checks on tools and equipment used across the six components, relating to appropriateness for use, service standards and safety.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- techniques for timber bending, forming and shaping, including:
  - laminating
  - coopering
  - steam bending
  - saw kerfing
  - hand shaping
  - machine shaping
  - timber shaped by hand or static machine tools
- types and characteristics of materials use in the curving or shaping of components, including:
  - solid timber and timber composites including plywood, medium density fibreboard (MDF) and veneer

© Commonwealth of Australia, 2025 Skills Insight

  - plastic laminate
  - sheet metal
  - adhesives
  - screws
  - nails
  - dowels
  - decorative finishes
  - abrasive paper
  - finishing materials
- types, characteristics, uses, limitations and maintenance requirements of solid timbers commonly used in furniture production
- types, characteristics, uses and limitations on hand and power tools used in timber bending, forming and shaping, including:
  - band, cross-cut, mitre, panel and rip saws
  - surface and panel planers
  - belt sanders
  - horizontal borers
  - vertical drill presses
  - dove-tailers
  - pedestal grinders
  - wood-turning lathes
  - veneer guillotines
  - presses
- interpretation of plan representations of furniture design
- techniques for the preparation of drawings/set-outs/rods and geometrical concepts
- workflow within the workplace
- applicable work health and safety, legislative and workplace requirements relevant to the production of curved and shaped components for custom furniture are verified and complied with
- workplace and site standards, requirements, policies and procedures for the production of curved and shaped components for custom furniture

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hand and power tools
  - a wide range of timber and timber composite materials

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4014 Produce manual and computer-aided drawings from design concepts

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4001 Produce drawings from design concepts.

## Application

This unit describes the skills and knowledge required to produce manual and computer-aided drawings of furnishing or similar products from design concepts.

This unit applies to individuals required to create drawings as part of their job role in design, manufacturing and similar workplaces, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for drawing work | 1.1 Identify product purpose, characteristics and production materials and methods, and assess impact of these on drawing process<br>1.2 Confirm type of drawing to be developed from information and select appropriate medium and tools<br>1.3 Set up hardware and software as required in accordance with operating instructions and workplaces procedures<br>1.4 Identify drawing conventions and specifications for notation on drawing<br>1.5 Establish and document design concept requirements, identifying dimensions, angles, shapes and finished size |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 2. Quantify and draft initial drawing | 2.1 Accurately plot dimensions from prototype sketch and documented specifications<br>2.2 Connect dimensional points to match appropriate drawing view<br>2.3 Accurately note required production information or special requirements<br>2.4 Note drawing conventions and specifications on documentation |
| 3. Complete drawing | 3.1 Check angles, shapes and dimensions against specifications and concept prototype drawing<br>3.2 Identify and make required adjustments to designs based on review and consultation with relevant people<br>3.3 Check drawing for compliance with workplaces documentation requirements<br>3.4 Store data files in accordance with operating instructions and workplaces procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations.
- Reading skills to interpret the product or design specifications.
- Writing skills to document production and other requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Assessment Requirements for MSFFDM4014 Produce manual and computer-aided drawings from design concepts

## Modification History

.Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4001 Produce drawings from design concepts.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- interpret specifications and measurements in two and three-dimensional (2D and 3D) form, and:
  - produce three drawings from design concepts, including:
    - one manual drawing
    - one computer-aided 2D drawing
    - one computer-aided 3D drawing
  - select appropriate equipment and software to achieve the drawing requirements
  - utilise the features and functions of equipment and software in a best-practice manner.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- manual and computer-aided drawing:
  - processes
  - techniques
  - expected features
  - presentation protocols
- principles for design and manufacture, especially relating to furniture and furnishings
- current industry-standard softwares used for CAD, including their features and functions:
  - drawing tools
  - view displays
  - edit functions
  - working with layers
  - plotting
  - printing

© Commonwealth of Australia, 2025 Skills Insight

- regulatory requirements, recognised standards and codes, and industry practices for drawing.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design concepts
  - specifications
  - drawing equipment and current industry-standard software

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4015 Produce patterns and templates

## Modification History

Release 1. Unit code and Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFDN4003 Produce patterns and templates.

## Application

This unit describes the skills and knowledge required to plan process and plot dimensions to develop patterns and/or templates for production processes using both hand tools and computer-assisted production.

This unit applies to individuals working in design and manufacturing roles who produce patterns and templates, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for and dimension the task | 1.1 Identify and follow work health and safety requirements<br>1.2 Correctly interpret customer orders to establish required sizes of finished products<br>1.3 Check size requirements in relation to production process and finishing capacity of workplace |
| 2. Plan process | 2.1 Identify material for pattern or template for approximate size and characteristics<br>2.2 Identify, locate and assemble required instruments and equipment<br>2.3 Correctly interpret drawings and related specifications<br>2.4 Check procedures for using pattern development instruments and tools and prepare equipment for use |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 3. Plot dimensions | 3.1 Use equipment and tools in accordance with procedures<br>3.2 Measure, explode and plot each dimension maintaining appropriate angles, arcs and curves<br>3.3 Use visual inspection and measurements to compare pattern dimensions and shapes with drawings and specifications |
| 4. Complete pattern or template | 4.1 Complete pattern or template ensuring that pattern indicates completion date and original drawing details<br>4.2 Obtain required approvals of pattern or template<br>4.3 Mark plans with notations for workplace requirements, including authorship, process or customer requirements, authorisation and any review dates<br>4.4 Copy and file plans in accordance with workplace policies and procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations including measurements.
- Reading skills to interpret job requirements.
- Writing skills to document requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Assessment Requirements for MSFFDM4015 Produce patterns and templates

## Modification History

Release 1. Unit code and Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFDN4003 Produce patterns and templates.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- interpret drawings and select appropriate mediums and materials to produce a minimum of three patterns or templates which individually or cumulatively make use of three different types of materials, and
  - produce patterns and templates by hand and by computer.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses and limitations of pattern and template materials
- pattern and template production:
  - procedures and processes
  - techniques
- softwares suitable for production of patterns and templates, and their applications
- operating requirements of equipment and work systems in own work area
- regulatory requirements, recognised standards and codes, and industry practices.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - drawings
  - specifications
  - information on production/fabrication process
  - computer equipment and software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4016 Produce timber veneered components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4004 Produce timber veneered components for custom furniture.

## Application

This unit describes the skills and knowledge required to produce timber veneered components including laminates (two or more layers of veneer adhered to each other) for custom-made furniture and similar products in a wide variety of operations.

This unit applies to individuals working in a manufacturing or design studio environment who produce custom curved or shaped components, either alone or as part of an internal or external team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |

# Assessment Requirements for MSFFDM4016 Produce timber veneered components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4004 Produce timber veneered components for custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare a minimum of one significant veneer, including:
  - the selection of materials
  - the preparation of the cutting face
  - the cutting and dressing of the veneer
- apply and finish veneers to at least three different surfaces, including:
  - one flat
  - one curved
  - one laminate
  - at least two requiring veneer edging
- perform checks on tools and equipment used in the above production items, relating to appropriateness for use, service standards and safety.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses and limitations of veneers including laminates
- techniques for the manufacture and application of veneers, including:
  - mechanical press
  - vacuum technique
  - hot glue hammering
  - butting two right angle edges together then ‘stitching’ the veneer using a hot melt glue or tape
  - using a scarf joint then gluing the surfaces together
- types, characteristics, uses and limitations of different veneering timbers:
  - wood
  - particleboard

© Commonwealth of Australia, 2025 Skills Insight

    - medium density fibreboard (MDF)
- techniques for style and edge finishes, both solid timber and veneer edging to cover exposed edges
- techniques for briefing and plan representations of furniture design
- the preparation of drawings or set-outs
- types, characteristics, uses and limitations of tools and equipment and procedures for their safe use, operation and maintenance, including:
    - knives
    - chisels
    - measuring tapes or rules
    - mallets
    - squares
    - levels
    - planes
    - band saws
    - rotary lathe
    - slicing machine
    - half round lathe
    - power saws
    - power drills/screwdrivers
    - hand drills
    - pneumatic tools, compressor and spray equipment
    - clamps
    - screwdrivers
    - rollers
    - laminate trimmers
    - cutters and hand routers
    - sandpaper
    - wire wool
    - sanding block
- materials used in the veneer manufacturing and application process, including:
    - timber
    - manufactured board
    - laminates
    - timber strips
    - adhesives
    - cleaning materials
    - tapes
- workflow in relation to furniture production and application of timber veneer

© Commonwealth of Australia, 2025 Skills Insight

- applicable work health and safety, legislative and workplace requirements relevant to producing timber veneered components for custom-made products
- workplace and site standards, requirements, policies and procedures for the production of timber veneer components.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - veneer manufacturing and application equipment and materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4017 Purchase materials and consumables

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4011 Purchase materials and consumables.

## Application

This unit describes the skills and knowledge required to purchase materials and consumables for production within a furnishing or similar enterprise, through existing contracts and other formal purchasing arrangements or through local purchase delegation.

This unit applies to individuals working in a manufacturing or design studio environment who are involved with production preparation, stock management and estimations, either working alone or as part of an internal or external team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify purchasing requirements | 1.1 Identify purchasing requirements from material specifications, orders and instructions, and in accordance with workplace procedures<br>1.2 Prioritise purchasing requirements in consultation with others in accordance with workplace procedures<br>1.3 Determine and confirm quantities, quality of goods, price limitations and delivery requirements in consultation with appropriate personnel and in accordance with workplace procedures |
| 2. Source materials and consumables | 2.1 Identify sources of materials and/or consumables from workplace preferred supplier lists or through networks and knowledge of local and/or overseas suppliers |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 2.2 Report difficulties in supply in accordance with workplace procedures<br>2.3 Confirm availability of supply |
| 3. Compare costs | 3.1 Contact alternative suppliers to check costing<br>3.2 Compare actual costs with predicted costs<br>3.3 Recommend alternative suppliers as relevant to appropriate personnel in accordance with workplace procedures<br>3.4 Delegate ordering of goods/materials/equipment in accordance with workplace procedures |
| 4. Purchase materials and consumables | 4.1 Ensure supplier has capacity to meet price, quality and delivery expectations<br>4.2 Develop purchase order or list in accordance with workplace procedures<br>4.3 Place order with supplier and confirm delivery schedules<br>4.4 Issue and respond to orders and invoices in accordance with workplace procedures |
| 5. Maintain and monitor material and consumable supplies | 5.1 Monitor stock regularly using inventory records and physical checks, where applicable, to ensure maintenance of supply<br>5.2 Maintain up-to-date records of materials and consumables<br>5.3 Document acquisition requirements in accordance with workplace procedures<br>5.4 Suggest improvements to purchasing operations and, where authorised, negotiate changes |
| 6. Liaise with other departments | 6.1 Establish communication channels with other departments in accordance with workplace procedures<br>6.2 Liaise with other departments to ensure customer requirements are achieved |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

- Numeracy skills to interpret technical information and perform calculations.
- Writing skills to complete ordering-relating documentation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFT4011 Purchase materials and consumables.

# Assessment Requirements for MSFFDM4017 Purchase materials and consumables

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4011 Purchase materials and consumables.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- purchase materials on a minimum of four occasions, including two different materials and at least one perishable consumable purchase, in accordance with workplace procedures.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- contemporary supply or purchasing systems theory
- inventory systems management
- production planning processes and theories
- company operating procedures, including procedures for purchasing materials and consumables
- material and consumable usage rates
- operation requirements of equipment and work systems in own work area
- work health and safety requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- access to workplace policies, procedures and stock documentation

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4018 Research and organise product inspection and testing

## Modification History

Release 1. Unit code and title changed. Application changed. Substantial changes to Elements and Performance Criteria. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFT4007 Sample, inspect and text products to specifications.

## Application

This unit describes the skills and knowledge required to identify specifications and test procedures for products, identify and organise the application of authorised testing procedures, interpret test results and report findings within a furnishing or similar workplace.

This unit applies to individuals working in a manufacturing or design studio environment who engage with quality and other control measures relating to products, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify product specifications and test and inspection requirements | 1.1 Read and interpret product quality specifications and drawings to inform test requirements<br>1.2 Identify test parameters from product quality specifications and drawings<br>1.3 Identify test methods for each required test parameter and select most effective and efficient method according to workplace procedures<br>1.4 Identify design features that may impact testing methods, results and inspection procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret product specifications and drawings.
- Writing skills to record and report on product inspection and testing results.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFT4007 Sample, inspect and test products to specifications.

# Assessment Requirements for MSFFDM4018 Research and organise product inspection and testing

## Modification History

Release 1. Unit code and title changed. Application changed. Substantial changes to Elements and Performance Criteria. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFT4007 Sample, inspect and text products to specifications.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- read and interpret job specifications, drawings, test/inspection and workplace procedures to develop and implement test/inspection procedures for a minimum of four different products or procedures.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- general quality systems theory
- sampling techniques for commonly encountered materials including:
  - timber
  - metal alloys
  - glass
  - fabrics and textiles
  - plastics
  - leather
  - adhesives
  - fillers; and
  - finishes
- inspection techniques and faults common within the sector products
- testing techniques (destructive and nondestructive) relevant to the sector and related equipment/aids
- requirements and processes of specialised inspection and test personnel
- testing requirements at all stages of product development and production, including of samples of raw materials, components, assemblies and end products
- workflow in relation to required times and stages where quality checking is required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- types of designer or drawer specifications and instructions, including the softwares through which these might be developed and communicated
- quality systems documentation or equivalent containing sampling, inspecting and testing frequency and criteria
- workplace specifications and requirements.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications and drawings
  - access to specialised facilities and personnel as required.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4019 Research and select manufacturing technologies

## Modification History

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Application

This unit describes the skills and knowledge required to determine production considerations and then to investigate and select a manufacturing technology that is suitable for the design concept.

This unit applies to individuals working in a manufacturing or design studio environment. They analyse and compare technical information from a wide range of sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine production considerations | 1.1 Identify and collate information about project brief and initial design concepts<br>1.2 Review information and establish production parameters and constraints<br>1.3 Identify all those involved in the production process and seek input on key considerations for selecting manufacturing technology<br>1.4 Establish key technical parameters for selection of manufacturing technology |
| 2. Investigate potential manufacturing technologies | 2.1 Identify and assess information sources on potential technologies<br>2.2 Assess feasibility of technologies in context of design concept and overall design brief |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 2.3 Identify and interrogate how manufacturing process and its technical application may impact eventual outcome<br>2.4 Identify sustainability and safety aspects of technologies and assess implications for use<br>2.5 Source and compare information about costs and technology access against project brief |
| 3. Refine ideas and select solution | 3.1 Explore and refine ideas about technologies through process of reflection and testing<br>3.2 Test compatibility of manufacturing technologies with design concept and adapt approaches<br>3.3 Choose manufacturing technology solution that works with proposed design solution and make it integral to ongoing design process<br>3.4 Provide clear and relevant rationale for technology chosen |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret research information and design briefs.
- Writing skills to record and repot on manufacturing technologies research and document solutions.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

# Assessment Requirements for MSFFDM4019 Research and select manufacturing technologies

## Modification History

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and select manufacturing technologies and their application to three different design briefs, which individually or cumulatively involve at least two types of manufacturing technologies.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how the selection of the manufacturing technology sits within the overall design and production process
- information needed to inform technology selection
- roles and responsibilities of those involved in decisions about selection of manufacturing technologies
- types of technical parameters that need to be considered and the nature of the relationship between the design concept and manufacturing technologies
- sources of information on manufacturing technologies
- key features, costs, efficiencies and technical application of current and emerging technologies, including:
  - CNC operations
  - 3D printing
  - foundries and casting
  - robotics
  - laser cutting
  - water-jet cutting
- how to structure and present information and recommendations.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs and associated concepts
  - information technology for research and presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

# MSFFDM4020 Research and select product finishes

## Modification History

Release 1. Unit Code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant items moved to Assessment Requirements. Assessment Requirements changed to include volume/frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4010 Research and select furniture product finishes.

## Application

This unit describes the skills and knowledge required to determine project requirements, and then to research and select finishes that meet the requirements of the brief.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare product information from a wide range of sources to develop a design solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Determine project requirements | 1.1 Review and clarify project brief with client<br>1.2 Confirm and evaluate parameters and constraints of project from specifications<br>1.3 Select work resources based on the needs of project<br>1.4 Identify and assess aspects of brief that inform finish selection<br>1.5 Identify key project stakeholders and establish required communication protocols |
| 2. Research finish options | 2.1 Assess aesthetic requirements of finish and identify potential options<br>2.2 Evaluate intended use against functional features of different products<br>2.3 Identify and consider new and emerging finish technologies for their |

# Assessment Requirements for MSFFDM4020 Research and select product finishes

## Modification History

Release 1. Unit Code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant items moved to Assessment Requirements. Assessment Requirements changed to include volume/frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4010 Research and select furniture product finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and select finishes that respond to three different design briefs and that individually or cumulatively involve at least:
  - two types of base material onto which the finish is applied
  - two types of finishing materials
  - two different application methods.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships, and how they are used in relation to finishes
- characteristics, properties and selection criteria for different finishing or coating materials, both aesthetic and functional, including:
  - lacquers
  - laminates
  - metal
  - oils
  - paints
  - paper
  - pigments
  - plastics
  - stainless steel
  - stains
  - synthetics
  - textiles
  - veneers

© Commonwealth of Australia, 2025 Skills Insight

  - vinyls
  - waxes
- the interactions of different finishing materials with different base materials
- properties of finishes and how these inform recommendations:
  - aesthetics
  - application methods and technologies
  - construction, composition and materials, including tactile nature of finishes
  - maintenance requirements
  - quality
  - safety application, flammability, fixing requirements
  - sustainability sourcing, production, longevity, recycling or end of life disposal
- current and emerging finishing technologies
- how to structure and present research information and recommendations.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4021 Research furniture styles and movements

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4012 Research furniture styles and movements.

## Application

This unit describes the skills and knowledge required to research furniture styles and movements and analyse how they influence design by accessing a range of information sources. It also covers identifying influences on the design of furniture and documenting information for use in future design projects.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare product information from a wide range of sources to develop a design solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

History of design

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Plan research | 1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to researching furniture styles and movement<br>1.2 Clearly define research objectives and scope based on work needs from design brief<br>1.3 Evaluate and select formal and informal research methods based on their potential to meet research objective<br>1.4 Identify and locate relevant and credible sources of information on furniture styles and movements |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 2. Gather and analyse information on furniture styles and movements | 2.1 Gather information using a systematic approach<br>2.2 Establish relevance of information against research objectives<br>2.3 Compare and contrast different information sources and extract key information<br>2.4 Identify different influences on furniture styles, movements and features<br>2.5 Identify significant trends, designers and techniques and their influences on styles and movements<br>2.6 Apply research information to current furniture design trends, philosophy and surrounding buildings<br>2.7 Organise and compile research materials and results of research in a manner that facilitates future use and reference |
| 3. Maintain currency with furniture styles and movements | 3.1 Regularly check research sources and compiled information for usefulness in informing design projects<br>3.2 Analyse current and emerging cultural, economic and environmental influences on furniture styles and movements for impact and usefulness in future projects<br>3.3 Identify and pursue opportunities to update and expand knowledge of styles and movements<br>3.4 Incorporate findings from research into design outcomes based on project needs |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret research information.

# Assessment Requirements for MSFFDM4021 Research furniture styles and movements

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4012 Research furniture styles and movements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and collate or document key aspects of information on all of the following to inform one significant project:
  - significant influences on furniture styles
  - individual designers of note
  - changes in furniture styles, movements and philosophy over time
  - current and emerging furniture trends that impact design practice.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- credible sources of information on furniture styles and movements, and the type of information they can provide
- importance of accurate referencing of information sources
- types of research techniques, both formal and informal
- significant influences on furniture styles and movements, including:
  - cultural and social
  - economic
  - environmental
  - geographical
  - individual designers
- ways to collate and/or document research information to facilitate future use.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

# MSFFDM4022 Select, use and maintain hand tools for the creation of custom products

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to clarify volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4013 Select use and maintain hand tools for the creation of custom furniture.

## Application

This unit describes the skills and knowledge required to select and use hand tools in applications relating to custom furniture making. It includes manufacturing specialist hand tools that support unique functions.

This unit applies to individuals working in a manufacturing or design studio environment use hand tools in the creation of products, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for hand-tools work | 1.1 Verify and ensure compliance with work health and safety (WHS), legislative and workplace requirements relevant to selection and applicable to use of hand tools<br>1.2 Research and identify suitable type and range of hand tools based on their functions, manufacturing specifications and quality reputations<br>1.3 Select hand tools based on job requirements<br>1.4 Check hand tools for serviceability, precision settings, maintenance compliance and safety |

# Assessment Requirements for MSFFDM4022 Select, use and maintain hand tools for the creation of custom products

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to clarify volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4013 Select use and maintain hand tools for the creation of custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select, use and maintain six different hand tools for different specified production functions across three different products, utilising the full capabilities of the hand tools to achieve outcomes
- design and manufacture one specialist hand tool for a specified production function
- tune and sharpen two of the following:
  - chisels
  - hand planes
  - spokeshave.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses, limitations and maintenance requirements of the range of hand tools used in furniture production, including:
  - hand planes
  - chisels
  - hand saws
  - spokeshave
  - hammer
  - mallet
  - marking-out tools
  - files
  - rasps
  - scraper
  - screwdrivers

© Commonwealth of Australia, 2025 Skills Insight

    - hand drill
    - straight edges
    - knives
    - clamps
    - steel/bronze wool
    - sandpaper
    - brushes
    - stones and whetstones
    - grinder
- manufacturing specifications for hand tools
- processes for evaluating the quality of hand tools in terms of specifications, safety, maintainability and commercial reputation
- techniques for the design of specialised hand tools and the manufacturer of one-off tools
- workflow within the workplace
- relevant work health and safety regulations, legislation, regulations, standards and codes of practice relevant to use of hand tools
- workplace and site standards, requirements, policies and procedures for use of hand tools.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - a wide range of industry-standard hand tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs

## Modification History

Release 1. Unit code, title and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs.

## Application

This unit describes the skills and knowledge to set up, operate and maintain basic static woodworking machines to achieve design requirements for furniture or similar products. It includes tuning and general problem-solving.

This unit applies to individuals working in a manufacturing or workshop environment who set up, operate and maintain basic static woodworking machines, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |

# Assessment Requirements for MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs

## Modification History

Release 1. Unit code, title and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up, operate and maintain four different basic static woodworking machines for use on two different projects.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses, limitations and maintenance requirements of the range of static woodworking machines used in furniture production, including:
  - table saw
  - thicknesser
  - jointer
  - band saw
- interrelationship between basic static woodworking machines and design outcomes
- manufacturing specifications for static woodworking machines
- processes for evaluating the quality of static woodworking machines in terms of specifications, safety, maintainability and commercial reputation
- workflow within the furnishing workplace
- applicable work health and safety, legislative and workplace requirements relevant to the selection and use of static woodworking machines.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2025 Skills Insight

- required range of basic static woodworking machines.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5001 Construct custom furniture using advanced techniques

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice and reviewed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT5004 Construct custom furniture using advanced techniques.

## Application

This unit describes the skills and knowledge required to construct original and unique custom furniture using or adapting traditional and innovative construction techniques. It includes interpreting and adapting design specifications that are compatible with the product material, purpose and style of the furniture.

This unit applies to individuals working in a manufacturing or design studio environment who construct custom furniture, either alone or as part of an internal or external team.

No licensing or legislative or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for work | 1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to constructing custom furniture<br>1.2 Read and interpret job specifications and other relevant documentation to identify furniture construction and finishing requirements<br>1.3 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for work, serviceable and in safe condition |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 1.4 Identify product purpose, context, furniture style and construction materials<br>1.5 Plan and document work sequence covering each step in construction process, including sub-assemblies, in accordance with workplace requirements<br>1.6 Develop and document quality-checking procedures for each step in construction process |
| 2. Curve and shape components | 2.1 Identify, evaluate and confirm techniques for bending, forming and shaping components as being appropriate for construction requirement<br>2.2 Set out component specifications in accordance with work instructions and mark materials in accordance with industry practices<br>2.3 Use tools, machines and equipment in accordance with safety requirements and manufacturer specifications<br>2.4 Bend, form and shape materials in accordance with production plan and workplace procedures<br>2.5 Check components against specified tolerances, fit and accuracy |
| 3. Veneer components | 3.1 Identify, evaluate and select suitable veneer material from design specifications<br>3.2 Use tools, machines and equipment in accordance with safety requirements and manufacturer specifications<br>3.3 Measure, mark and cut veneer components to size based on job specifications<br>3.4 Prepare and lay out veneers for application<br>3.5 Select and prepare suitable joining processes for backing and adjacent veneers<br>3.6 Apply adhesives in accordance with workplace procedures or manufacturer instructions<br>3.7 Produce rough veneering components in accordance with production plan and workplace procedures<br>3.8 Complete final trim and finishing to specifications<br>3.9 Check work against required quality standards, and rectify any non-conformance |
| 4. Make joints | 4.1 Identify joints requirements and select type of joint to be used and adapt/design as necessary |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 4.2 Select tools, adhesives and fasteners to match joint type<br>4.3 Mark out cutting and joining lines to suit joint type<br>4.4 Check measurements and calculations for accuracy to ensure quality outcomes<br>4.5 Identify material features and observe optimal usage criteria<br>4.6 Cut material to specification, and inspect and prepare for joining<br>4.7 Join material in accordance with job specifications<br>4.8 Use fasteners and adhesives to make joints firm where required and in accordance with workplace procedures<br>4.9 Check finished joint against quality requirements |
| 5 Construct sub-assemblies | 5.1 Lay out components and materials, including adhesives, trims and accessories, and tools, in accordance with assembly plan<br>5.2 Check components against specification prior to assembly and reject items out of specification<br>5.3 Assemble sub-assemblies using appropriate tools, jigs and fixtures and check against specification for accuracy, fit, twist and distortion<br>5.4 Check sub-assembly quality against plans at identified checkpoints |
| 6. Assemble custom furniture | 6.1 Lay out components, sub-assemblies and materials, including adhesives, trims and accessories, and tools, in accordance with assembly plan<br>6.2 Check components and sub-assemblies against specification prior to assembly and reject items out of specification<br>6.3 Assemble components, fit using appropriate tools, jigs and fixtures, and check against specification for accuracy, fit, twist and distortion<br>6.4 Apply hardware and decorative accessories to specification<br>6.5 Prepare product for final finish, including the removal of bruises, scratches, dents and marks<br>6.6 Check product quality against plans at identified checkpoints |
| 7. Finish furniture surface | 7.1 Using samples of the type of material surface and specified finish, evaluate various finishing options and select the preferred option<br>7.2 Test sample of material with selected finishing technique to ensure appropriateness<br>7.3 Prepare furniture surface in accordance with finishing specification |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 7.4 Rectify imperfections, pores or nail or screw holes on surface<br>7.5 Apply finishing processes and materials in accordance with agreed specifications<br>7.6 Polish or buff surface depending on shine required from specification<br>7.7 Check work against required quality standards<br>7.8 Rectify any non-conformity with required quality standards |
| 8. Complete housekeeping | 8.1 Store or recycle unused materials as required<br>8.2 Clean and store tools and equipment in accordance with procedures<br>8.3 Tag and report faulty or defective equipment in accordance with workplace practices<br>8.4 Clean and clear work area in accordance with workplace procedures<br>8.5 Complete workplace documentation, including time log for operations for costing and business improvement activities. |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to interpret technical information and perform calculations including measurements
- Reading skills to interpret job specifications
- Writing skills to complete workplace documentation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

Release 1. Supersedes and equivalent MSFFDT5004 Construct custom furniture using advance techniques.

# Assessment Requirements for MSFFDM5001 Construct custom furniture using advanced techniques

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice and reviewed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT5004 Construct custom furniture using advanced techniques.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- complete all aspects of the construction and finishing of two furniture items requiring advanced construction techniques and satisfying high-quality custom-made furniture standards and expectations in terms of innovation, complexity, tolerance and fit of components and quality.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of tools and equipment used in construction and procedures for their safe use, operation and maintenance
- workflow techniques appropriate for the management of the construction work/project
- presentation and interpretation of plan representation of a furniture design
- techniques for timber bending, forming and shaping including:
  - steam/heat bending
  - curfing
  - pressure bending
  - shaping by hand or static machine
- techniques for the preparation of drawings or set-outs or rods and geometrical concepts
- types, characteristics, uses and limitations of materials
- techniques for the manufacture and application of veneers
- techniques for assembly, fixing and finishing of custom furniture components
- types, characteristics, uses, limitations and safety requirements of adhesives, fasteners and hardware used in custom furniture assembly
- matching requirements of adhesives and fasteners to timbers/materials used
- finishing techniques
- characteristics, properties and selection criteria of finishing materials
- finishing characteristics and properties of timber being used

© Commonwealth of Australia, 2025 Skills Insight

- applicable work health and safety, legislative and workplace requirements relevant to constructing custom furniture are verified and complied with.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5002 Coordinate and optimise workplace maintenance programs

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5005 Organise enterprise maintenance programs and MSFFT5007 Optimise computer numerically controlled operations.

## Application

This unit describes the skills and knowledge required to establish, organise and implement both preventative and reactive maintenance programs including software updates, capabilities and manipulations required to optimise operational and production performance. It includes computer numerically controlled (CNC) operations as well as other production and facility equipment involved in the production process.

This unit applies to individuals working in a technology- and maintenance-based role within a manufacturing workplace.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Clarify maintenance requirements | 1.1 Check equipment specifications, service requirements and workplace procedures for recommended maintenance intervals and processes<br>1.2 Separate special requirements for maintenance from normal lubrication, adjustment and maintenance schedules<br>1.3 Compare information with previous experience, future equipment use, production requirements and standard operating procedures<br>1.4 Identify and develop an outline plan for maintenance and a related |

# Assessment Requirements for MSFFDM5002 Coordinate and optimise workplace maintenance programs

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5005 Organise enterprise maintenance programs and MSFFT5007 Optimise computer numerically controlled operations.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- establish the maintenance program for one significant production operation that includes:
  - at least one computer numerically controlled operation
  - coordination of maintenance within the context of production schedules
  - identification of resource requirements for maintenance, including skills of employees involved
  - recording and reporting requirements to provide system visibility and accountability potential
  - identification of opportunities for optimisation across the operation, including for automated processes
- complete one cost–benefit analysis of an existing and significant maintenance program and suggest improvements to maintenance operations and, where authorised, negotiate changes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- contemporary equipment maintenance theories covering benefits and costs
- the effects of production schedules, time and resource requirements when scheduling the maintenance process
- risk analysis processes
- workplace operating procedures, including procedures for maintenance
- operation requirements of equipment and work systems in the work area, including:
  - computer numerically controlled (CNC) operations
  - competency requirements of the maintenance work activities
  - workplace health and safety maintenance system requirements
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others

© Commonwealth of Australia, 2025 Skills Insight

- prevent damage to goods, equipment and products
- maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - production schedules and other relevant workplace information
  - access to CNC equipment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5003 Design product suitable for batched or limited production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5005 Design batch or limited production item of furniture.

## Application

This unit describes the skills and knowledge required to design products suitable for batched or limited production (including one-off items) in a furniture-making or similar operation. It includes the considerations required to enable production of further batches, including details and fittings being produced with jigs and fixtures, and assessing the production methods required for particular materials.

This unit applies to individuals working in a manufacturing or design studio environment who design products with production methods as a consideration, working either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research product needs | 1.1 Identify parameters affecting the design of product from client or end recipient and other information sources<br>1.2 Identify and record product functional needs from client or end recipient following industry best-practice methods<br>1.3 Investigate similar products in market and design elements from relevant sources<br>1.4 Assess materials for production-method limitations from materials |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|

# Assessment Requirements for MSFFDM5003 Design product suitable for batched or limited production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5005 Design batch or limited production item of furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully design products suitable for batched or limited production runs (including one-off items) for one major and two minor projects, and in doing so:
  - analyse potentially suitable materials to use in the work process and ensure these are acceptable for both client needs and batched or limited production run manufacturing
  - follow industry best-practice in design briefing coverage, including budget, timelines, product measurements and other specifications, production needs and methods and potential external collaborators or partners
  - follow workplace best-practice in communicating with both internal and external clients and collaborators to ensure transparency of process and that clients' needs are met
  - develop and present final product proposals that balance the limitations and opportunities of batched and limited production for products with client functional and aesthetic needs, including cost-effective use of materials and tools or equipment
  - evaluate the variations in costs associated with different production methods and production runs of different sizes
  - lead others and work effectively in a team to improve design quality and outcomes
  - recognise dependencies in the workplace and across the wider production team (which may include external collaborators) and use cooperative approaches to optimise workflow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- historical and contemporary art and design styles and movements
- design methodologies
- ergonomic and anthropometric standards
- visual aesthetics of products being designed
- ideas generation and conceptual development techniques, including:

© Commonwealth of Australia, 2025 Skills Insight

    - suspending belief
    - looking for gaps of need alternatives
    - daydreaming
    - creative leaping
    - filaments
    - brainstorming
    - six thinking hats
    - asking questions of norms and beliefs
- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs
- current ethical issues in society affecting makers and designers
- all aspects of the product design, including:
    - shape and dimension
    - materials
    - colour
    - texture, patterns and relief
    - the site and positioning of the end product
    - ability to produce in batches or limited production runs
    - ability to adapt the design to different production methods or volumes
- production methodologies of furniture (or similar) manufacturers
- production techniques for products based on materials selection
- materials and finishes used to produce products
- costing techniques
- design-based softwares and other tools suitable for presenting design briefs
- established workplace communication channels and protocols including document control methods
- relevant work health and safety legislation, regulations, standards and codes of practice relevant to the design and manufacture of products
- work instructions, operating procedures and inspection processes to:
    - minimise the risk of injury to self or others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - design software that reflects current industry standards

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5004 Design product suitable for high-volume technology services in production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5006 Design a furniture using high volume technology services (HVTS) in production.

## Application

This unit describes the skills and knowledge required to design products suitable for, or with components requiring, production using high-volume technology services in a furniture-making or similar operation. It includes the considerations required to enable the application of these services to produce details and components for the design.

This unit applies to individuals working in a manufacturing or design studio environment who design products with production methods as a consideration, working either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

Produce final product proposal information | 6.1 Finalise and document product details including production methods, in accordance with industry best-practice methods<br>6.2 Document visual aspects of product proposal in accordance with industry best-practice methods<br>6.3 Document parts details relevant to high-volume technology services production in manner suited to place of manufacture and materials specifications<br>6.4 Ensure all other relevant details are recorded in accordance with industry best-practice methods<br>6.5 Ensure product proposal addresses work health and safety and other related requirements<br>6.6 Review proposal process to improve design quality and outcomes |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical and production information.
- Writing and oral communication skills to produce design briefs and document and present manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

© Commonwealth of Australia, 2025 Skills Insight

# Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5006 Design a furniture using high volume technology services (HVTS) in production.

# Links

# Assessment Requirements for MSFFDM5004 Design product suitable for high-volume technology services in production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5006 Design a furniture using high volume technology services (HVTS) in production.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully produce design proposals using three different materials requiring different high-volume machinery for production, and in doing so:
  - collect, organise, read and interpret information including workplace procedures, manufacturer and materials specifications and client requirements
  - identify potentially suitable materials to use in the work process and ensure these are acceptable for both client needs and high-volume technology services that may be on- or offsite
  - follow industry best-practice in design briefing coverage, including budget, timelines, product measurements and other specifications, production needs and methods and potential external collaborators/partners
  - follow workplace best-practice in communicating with both internal and external clients and collaborators to ensure transparency of process and that clients' needs are met
  - develop and present final product proposals that balance the limitations and opportunities of batched and limited production for products with client functional and aesthetic needs, including cost-effective use of materials and tools or equipment
  - apply mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements and product/production costs as part of design proposal
  - evaluate the variations in costs and other benefits associated with different production methods and production runs of different sizes
  - lead others and work effectively in a team to improve design quality and outcomes
  - recognise dependencies in the workplace and across the wider production team (which may include external collaborators) and use cooperative approaches to optimise workflow and productivity.

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- historical and contemporary art and design styles and movements
- design methodologies
- ergonomic and anthropometric standards
- visual aesthetics of products being designed
- ideas generation and conceptual development techniques, including:
  - suspending belief
  - looking for gaps of need alternatives
  - daydreaming
  - creative leaping
  - filaments
  - brainstorming
  - six thinking hats
  - asking questions of norms and beliefs
- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs:
  - brochures
  - magazines
  - websites such as online galleries and retail sites
  - design forums
  - reference books
  - other existing workplace design information
  - transferable technological ideas or concepts
  - natural or man-made structures and objects
- current ethical issues in society affecting makers and designers, including but not limited to:
  - social justice
  - environmental sustainability
  - ethical sourcing of material
  - biodiversity
  - cultural heritage and sensitivities
  - social responsibilities of makers and designers
- all aspects of the product design, including but not limited to:
  - shape and dimension
  - materials
  - colour
  - texture, patterns and relief
  - the site and positioning of the end product
  - ability to produce in batches or limited production runs

© Commonwealth of Australia, 2025 Skills Insight

    - ability to adapt the design to different production methods or volumes
- production methodologies of furniture (or similar) manufacturers, including suitability of different high-volume technology methods for a range of materials and output volumes
- production methods, processes and input requirements for high-volume technology services including:
    - laser cutting
    - machine point to point cutting
    - water jet cutting
    - plasma cutting
    - stereolithography (SLA) and computer numerically controlled (CNC) machining
- making techniques for products based on materials selection
- materials and finishes used to produce products, including their specifications, behaviours and limitations
- costing techniques including components overheads and wastage
- design-based softwares and other tools suitable for presenting design briefs, design ideas and product proposals for a range of clients, both internal and external, and both local and international
- established workplace communication channels and protocols including document control methods
- relevant work health and safety legislation, regulations, standards and codes of practice relevant to the design and manufacture of products
- work instructions, operating procedures and inspection processes to:
    - minimise the risk of injury to self or others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - design software that reflects current industry standards
    - access to workplaces that provide high-volume technology services

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5005 Design product suitable for mass production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT5012 Design for mass production.

## Application

This unit describes the skills and knowledge required to design products suitable for mass production in a furniture-making or similar operation. It includes the considerations required to review and adapt a design brief, specify equipment requirements and personnel capabilities, identify cost-effective opportunities and plan for future production runs.

This unit applies to individuals working in a manufacturing or design studio environment who design products with production methods as a consideration, working either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan for design | 1.1 Review, confirm and clarify elements of furniture design brief with appropriate personnel and client<br>1.2 Establish and maintain communication with relevant personnel in accordance with workplace processes<br>1.3 Address and verify any problems or underlying factors raised by design brief in terms of adaption to mass production<br>1.4 Identify featured elements of design from design brief<br>1.5 Identify featured principles of design from design brief |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 1.6 Set and cost volumes of mass production runs and evaluate these against identified intended market |
| 2. Design for mass production | 2.1 Review concepts for proposed adaption of design brief in context of mass furniture production requirements<br>2.2 Present and review different solutions to satisfy requirements of design brief<br>2.3 Review sample maquette and prototypes against concept sketches<br>2.4 Review and compile final working drawings and specifications in readiness for mass production<br>2.5 Design concept for mass manufacture, considering available equipment and resources and other variables |
| 3. Evaluate production requirements for mass production | 3.1 Review and assess equipment capabilities and modify design brief based on available or obtainable equipment<br>3.2 Review and assess personnel capabilities and modify design brief based on assessed and available skills<br>3.3 Assess material or resource supply chain to workplace, set stock sizes and modify design brief based on availability of resources<br>3.4 Assess and review outsourcing opportunities using cost–benefit analysis<br>3.5 Review workflow methods, including consideration of work health and safety, and amend design brief or workflow methods to cater for mass production<br>3.6 Research and implement opportunities for innovation in mass production procedures in accordance with workplace procedures |
| 4. Implement design | 4.1 Plan and organise manufacturing process, considering available equipment and resources and workplace procedures<br>4.2 Process material in accordance with manufacturing plan and work health and safety regulations<br>4.3 Produce jigs to assist with manufacturing components in accordance with work requirements<br>4.4 Produce components and prepare for assembly in accordance with workplace procedures<br>4.5 Assemble components based on working drawings |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 5. Finalise mass production | 5.1 Finish final product in accordance with specifications<br>5.2 Evaluate final product for functionality and aesthetic appeal against design brief<br>5.3 Review mass production methodology in accordance with workplace procedures<br>5.4 Package and dispatch production run products in accordance with enterprise transport methods<br>5.5 Record and report on product anomalies resulting from mass production anomalies to appropriate personnel and in accordance with workplace procedures |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to interpret technical and production information.
- Reading skills to interpret design briefs.
- Writing and oral communication skills to produce or adapt design briefs and document and present manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5012 Design for mass production.

# Assessment Requirements for MSFFDM5005 Design product suitable for mass production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT5012 Design for mass production.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully design, or redesign, products suitable for mass production for one major and two minor projects, and in doing so:
  - apply research, analytical and mathematical skills to the identification and selection of materials and the selection of appropriate production and construction techniques for products
  - create innovative designs that satisfy the agreed parameters and consider, but are not limited by, other historical or contemporary influences
  - prepare and work through a design brief taking into account the requirements of mass production to fulfil the design brief and oversee a mass production run
  - review information provided and creatively generate proposals for a furnishing or similar product
  - apply elements and principles of design to designing for mass production in accordance with a design brief
  - evaluate the variations in costs associated with different production methods and production runs of different sizes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace and site standards, requirements, policies and procedures for designing for mass production
- environmental protection requirements
- established communication channels and protocols
- relevant problem identification and resolution
- elements and principles of design and their relationship with mass production practices, including:
  - ergonomics and aesthetic values

© Commonwealth of Australia, 2025 Skills Insight

- supply chain management
- approaches to outsourcing arrangements
- cost–benefit analysis methods
- workplace resource audit techniques
- types of tools and equipment and procedures for their safe use, operation and maintenance
- characteristics of materials, products and defects and their relevance in a mass production environment
- set-up and operation of furniture-making and related equipment
- relevant computer programs, software and digital communication tools
- product machining, assembly and finishing techniques
- sketching and drawing techniques
- storage systems and labelling relating to the packaging and dispatch of mass-produced items
- procedures for the recording, reporting and maintenance of workplace records and information
- appropriate mathematical procedures for estimation and measurement.
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - access to mass production operations facilities and/or personnel
  - design software that reflects current industry standards

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5006 Develop and document technical workplace information

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5004 Develop and document procedures and specifications.

## Application

This unit describes the skills and knowledge required to establish documentation requirements and draft information that provides concise and unambiguous direction and guidance for workplace activities. Documentation may be procedures, specifications or technical manuals.

This unit applies to individuals responsible for the creation of potentially complex documentation, either working alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify documentation requirements | 1.1 Determine purpose of documentation through consultation and review of work information<br>1.2 Establish documentation functionality and format based on its purpose, level of formality and compliance requirements<br>1.3 Determine requirements and protocols for document creation and quality of production based on workplace requirements<br>1.4 Create design that allows for efficient entry of information and maximises effective presentation |
| 2. Prepare | 2.1 Identify, obtain and collate information for documentation |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| documentation | 2.2 Plan information sequence for logical and clear flow<br>2.3 Draft text using language appropriate to audience and purpose of document |
| 3. Review documentation | 3.1 Check text for accuracy and rectify errors<br>3.2 Confirm adherence to compliance requirements through analysis of documentation<br>3.3 Prepare final documentation in agreed format and seek and obtain approvals from relevant personnel<br>3.4 Assign or designate responsibility for all updates and changes to documentation in accordance with workplace requirements |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret and communicate technical information.
- Reading skills to interpret a range of technical information.
- Writing and oral communication skills to develop and document technical information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

Supersedes and not equivalent to MSFFT5004 Develop and document procedures and specifications.

# Assessment Requirements for MSFFDM5006 Develop and document technical workplace information

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5004 Develop and document procedures and specifications.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop one of the following documentation types:
  - a complete operational procedure that identifies and provides clear instruction of key steps in the process
  - a formal product specification comprising:
    - project and document scope
    - product name and model numbers as relevant
    - product dimensions
    - product features
    - technical drawings or photographs
    - quality standards
    - other product-specific information
  - and in doing so meeting all internal and external quality and compliance requirements.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work area for which documentation is being prepared, including:
  - compliance requirements (internal and external)
  - quality requirements
- common requirements for development of operational procedures and specifications, including:
  - format
  - presentation
  - required inclusions
  - document management, including version control
- technical writing techniques

© Commonwealth of Australia, 2025 Skills Insight

- range of people potentially involved in development of procedures and specifications
- communication protocols for the approval and dissemination of procedures and specifications.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information technology
  - workplace requirements/formats for documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5007 Develop, trial and evaluate prototypes

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5008 Develop, trial and evaluate prototypes.

## Application

This unit covers the skills and knowledge required to develop specifications, identify and select materials and processes, perform a production trial of prototypes and complete evaluation tasks and documentation. Prototypes may be produced by hand, by using appropriate machines, tools and equipment or by computer-assisted production, and may require the application of joinery, construction and finishing techniques.

This unit applies to individuals working alone in an industry operation of any size, or a design studio environment, where they play a lead role in the design and prototyping of products, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice, workshop practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop prototype or sample specifications | 1.1 Identify and analyse purpose and outline requirements for prototype or sample from design concepts or customer requirements<br>1.2 Research and identify materials suitable to match design concepts or customer requirements<br>1.3 Research and identify appropriate construction requirements and methods for materials to be used<br>1.4 Research and identify ergonomic requirements from design concepts or customer requirements and in accordance with principles of |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | ergonomic design<br>1.5 Prepare and document detailed prototype or sample design specifications, including drawings as required, following industry best-practice methods |
| 2. Plan for prototype construction | 2.1 Verify that purpose of prototype or sample is reflected in plans and drawings<br>2.2 Verify materials specifications and compatibility for item from prototype or sample documentation<br>2.3 Verify construction requirements and methods including equipment for materials being used<br>2.4 Prepare work plan for item, including construction stages or steps, checkpoints for measurements and tests, assembly methods, and work health and safety considerations, in accordance with workplace procedures<br>2.5 Clean and clear a suitable work area for prototype or sample production<br>2.6 Ensure required materials and other items are available and ready for use<br>2.7 Ensure jigs and other construction aids are identified and where required adjusted to suit work |
| 3. Produce the prototype | 3.1 Follow work plan to construct the prototype or sample, referencing any sketches and other job specifications<br>3.2 Conduct checks at the identified points and in accordance with workplace procedures<br>3.3 Identify, document and implement any required modifications to design and plan within workplace procedures<br>3.4 Perform initial inspection of prototype or sample to ensure it is fit for purpose<br>3.5 Ensure learnings from prototype construction are referred back to development personnel |
| 4. Finalise the work sequence | 4.1 Prepare prototype or sample for finishing in accordance with design specification<br>4.2 Clean, maintain and store tools and equipment in accordance with manufacturer specifications<br>4.3 Clean and clear work area, including applying waste management strategies in accordance with workplace procedures<br>4.4 Complete workplace documentation, including recommendations for optimisation of prototype or sample brief or work plan |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| 5. Trial and evaluate the prototype | 5.1 Develop, specify and document trial objectives and processes in accordance with industry best-practice methods<br>5.2 Ensure personnel involved in trial and evaluation are prepared for their responsibilities and functions<br>5.3 Prepare and certify trial equipment, tools and materials prior to use in accordance with relevant specifications and workplace procedures<br>5.4 Conduct prototype or sample trials and capture or record results in accordance with trial specifications<br>5.5 Evaluate results of trial including longevity of product and make recommendations for production in accordance with procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations.
- Reading skills to interpret design concepts.
- Writing and oral communication skills to develop and document prototype processes and results and work collaboratively with other personnel.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Assessment Requirements for MSFFDM5007 Develop, trial and evaluate prototypes

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5008 Develop, trial and evaluate prototypes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop and evaluate two different prototypes, and in doing so:
  - identify compatibility/incompatibility of materials, adhesives, fittings and fasteners for the application
  - demonstrate how the design of the prototype or sample components will influence the working lifetime of the item.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the function and features of a strong design brief, including:
  - the aims, objectives, milestones for the design project
  - workplace or personal profiles
  - target audience
  - budget
  - timeline
  - consultation requirements
  - colour requirements
  - image requirements
  - function
- range, characteristics and behaviours of a broad range of materials, including:
  - scrap timber and manmade timber
  - plastics
  - metal and metal alloys
  - stone
  - glass
  - fabrics and textiles
  - fibreglass

© Commonwealth of Australia, 2025 Skills Insight

  - leather
  - foam
  - cardboard and paper products
  - any other manipulable substance
  - adhesives
  - fillers and finishes
- assembly processes, including:
  - nailing
  - gluing
  - screwing
  - welding
  - pressing
  - sewing
  - bonding
  - jointing
  - connecting various materials
- state or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for the construction of prototypes and samples
- organisational and site standards, requirements, policies and procedures for constructing prototypes and samples
- environmental protection requirements
- established communication channels and protocols
- relevant problem identification and resolution
- elements and principles of design, including:
  - line
  - shape
  - form (geometric or organic)
  - texture
  - colour
  - function
- trends and detailed knowledge of furniture construction
- principles of ergonomics design and aesthetic values
- types of tools and equipment and procedures for their safe use, operation and maintenance
- set-up and operation of equipment
- design and other relevant software and applications
- product assembly techniques
- sketching and drawing methods, including:
  - isometric
  - oblique
  - perspective
  - orthographic

© Commonwealth of Australia, 2025 Skills Insight

    - elevation drawings that explode the parts of the concept sketches and include:
        - rough sizes
        - scale
        - tones
        - values
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- destructive and non-destructive testing techniques and processes
- appropriate mathematical procedures for estimation and measurement
- work instructions, operating procedures and inspection processes to:
    - minimise the risk of injury to self or others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5008 Evaluate design proposals and concepts

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Assessment Requirements changed. Supersedes and is not equivalent to:

- MSFFDT4004 Assess environmental impact of a design
- MSFFDT4006 Determine work health and safety (WHS) implications of designs
- MSFFDT5002 Assess and resolve technical integrity of a design
- MSFFDT5010 Evaluate furniture design proposals and concepts
- MSFFDT5011 Assess economic impact of a design
- MSFFT5009 Determine production feasibility of designs.

## Application

This unit describes the skills and knowledge required to establish design evaluation criteria, apply those criteria and determine the feasibility of designs for commercially viable production, usually as part of a collaborative process. It may involve original design or adaptations developed by self or others.

This unit applies to individuals working in a manufacturing or design studio environment who use specialised knowledge and critical thinking to evaluate and use diverse and potentially complex information.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Establish design evaluation criteria and process | 1.1 Analyse original design brief as basis for developing evaluation criteria<br>1.2 Identify and analyse business objectives and capacity in determining evaluation criteria<br>1.3 Establish scope of creative and operational criteria required for design evaluation and gather all relevant information |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.4 Identify and select products which are competitors or potential competitors in marketplace for comparative purposes<br>1.5 Identify all those involved in evaluation process and establish communication<br>1.6 Determine evaluation criteria and process through collaboration and review of information<br>1.7 Document criteria and process in accordance with workplace requirements |
| 2. Apply evaluation criteria | 2.1 Evaluate competitive products and proposed design against all criteria in accordance with agreed process<br>2.2 Use collaboration and critical thinking in evaluation process<br>2.3 Document outcomes in accordance with agreed process |
| 3. Determine feasibility and options | 3.1 Analyse evaluation outcomes of proposed design and competitive products using critical analysis skills<br>3.2 Identify potential design improvements as part of evaluation process<br>3.3 Make determination about potential for designs to be progressed based on agreed process<br>3.4 Complete and process evaluation records in accordance with workplace requirements |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to understand technical information product and production costings.
- Reading skills to interpret design proposals and business information.
- Writing and oral communication skills to document evaluation records

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

# Assessment Requirements for MSFFDM5008 Evaluate design proposals and concepts

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Assessment Requirements changed. Supersedes and is not equivalent to:

- MSFFDT4004 Assess environmental impact of a design
- MSFFDT4006 Determine work health and safety (WHS) implications of designs
- MSFFDT5002 Assess and resolve technical integrity of a design
- MSFFDT5010 Evaluate furniture design proposals and concepts
- MSFFDT5011 Assess economic impact of a design
- MSFFT5009 Determine production feasibility of designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- evaluate three different design proposals and concepts, that each consider all of the following:
  - adherence to brief
  - design process and its application
  - functionality
  - the application and use of design to meet the elements and principles of design and ergonomics
  - marketability
  - production considerations:
    - materials
    - production process and impacts on overall business operations
    - safety
    - costs
  - profitability
  - sustainability
  - technical integrity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- nature and scope of the design evaluation process:
  - who is involved – roles, responsibilities and interrelationships
  - process and key stages

© Commonwealth of Australia, 2025 Skills Insight

  - documentation requirements
  - role of collaboration
- elements and principles of design, their interrelationships and how they can be used to create good design
- how to establish evaluation criteria against which a design needs to be evaluated and key considerations:
  - adherence to brief
  - compliance
  - design process and its application
  - functionality
  - profitability
  - application of elements and principles of design
  - production considerations
  - marketability
  - sustainability
  - technical integrity
- manufacturing technologies in the relevant industry sector
- processes that support critical analysis and how to use them, including:
  - comparing
  - contrasting
  - reflecting
  - distinguishing relevant from irrelevant.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - proposed designs.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed. Supersedes and is equivalent to MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.

## Application

This unit describes the skills and knowledge required to prepare complex drawings using computer-aided techniques and capabilities, including three-dimensional (3D) modelling, exploded assembly drawings and conversion of drawings for computer numerically controlled (CNC) applications.

This unit applies to individuals working in design and manufacturing roles who produce and manage complex computer-aided drawings and specifications, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Create exploded assembly drawings | 1.1 Obtain and complete drawing preparations, including applying expected features of drawing<br>1.2 Prepare accurate 3D models for all components<br>1.3 Create and confirm perspective view of model<br>1.4 Explode model so that all components are visible<br>1.5 Label all individual components in accordance with workplace requirements<br>1.6 Complete quality checks to ensure accuracy of outcomes |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| | 1.7 Store drawings in accordance with workplace requirements |
| 2. Create job sheets | 2.1 Identify and complete preparations in accordance with workplace requirements<br>2.2 Set up job sheet template in accordance with workplace requirements and practices<br>2.3 Create and accurately dimension necessary orthographic views<br>2.4 Identify and accurately list sequencing of machine operations, safety and operator requirements<br>2.5 Prepare, review and test draft job sheets and amend to workplace requirements<br>2.6 Store job sheets in accordance with workplace requirements |
| 3. Convert drawings for CNC applications | 3.1 Identify and confirm conversion requirements from CNC machine specifications<br>3.2 Create layers and additional information required for final conversion<br>3.3 Assign drawing entities to relevant layers<br>3.4 Complete conversion to required file type<br>3.5 Store converted file in accordance with workplace requirements |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations and measurements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Assessment Requirements for MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed. Supersedes and is equivalent to MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- create two exploded assembly drawings that include:
  - preparation of 3D models
  - creation of perspective views
  - exploding the models to expose all components
  - industry-standard features: drawing name, labelling of all components, dimensions and/or scale bar and specifications
- create two confirmed job sheets that have the necessary orthographic views and all required management and inventory information including file storage, product coding, inventory information and drawing management requirements
- convert two drawings for CNC application, including the creation of layers, assignment of drawing entities and the protection and storage of converted files
- apply information management strategies to manage and store the drawings and job sheets produced (both hardcopy and digital), including version control.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of professional design practice
- type, range, uses and limitations of contemporary computer-aided design (CAD) software and applications
- construction processes in the relevant context
- types of construction materials and their characteristics, uses and limitations in the relevant context
- workplace information management systems and processes related to drawings.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications
  - computer-aided drawing equipment and current industry-standard software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed and volume/frequency of evidence clarified. Supersedes and is not equivalent to MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product.

## Application

This unit describes the skills and knowledge required to confirm design requirements, research potential ergonomic, anthropometric and proxemic considerations for a design and apply findings to the design process.

This unit applies to individuals working in a manufacturing or design studio environment who use specialised knowledge and critical thinking to evaluate and use diverse and potentially complex information.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm design requirements | 1.1 Review, confirm and clarify design brief with product owner or briefer<br>1.2 Identify potential issues relating to ergonomic, anthropometric and proxemic factors |
| 2. Research ergonomic, anthropometric and proxemic considerations | 2.1 Identify credible sources of information about ergonomics, anthropometrics and proxemics<br>2.2 Source and analyse information for its application to design solution<br>2.3 Assess how ergonomic, anthropometric and proxemic factors impact |

© Commonwealth of Australia, 2025 Skills Insight

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | functionality of design for different types of people<br>2.4 Determine potential impacts of ergonomic, anthropometric and proxemic issues on how solution meets elements and principles of design<br>2.5 Identify, distil and document key information that applies to design |
| 3.Use information in the design process | 3.1 Explore different solutions based on research outcomes to satisfy the requirements of the design brief through testing and experimentation<br>3.2 Make accurate calculations for product adjustments that arise from ergonomic, anthropometric and proxemic considerations<br>3.3 Integrate outcomes into work on overall design solution and associated documentation, drawings and models |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret research information.
- Writing skills to document ergonomic, anthropometric and proxemic consideration outcomes.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

# Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product.

# Assessment Requirements for MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed and volume/frequency of evidence clarified. Supersedes and is not equivalent to MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and use information about ergonomics, anthropometrics and proxemics in the design of three different products, drawn from any of one major and two minor design projects), and in doing so:
  - balance ergonomic, anthropometric and proxemic considerations with aesthetic and functional requirements
  - follow industry best-practice in understanding and application of ergonomics, anthropometrics and proxemics
  - seek subject-matter expertise to guide design, solutioning and assessment of results.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, and their interrelationship with ergonomic, anthropometric and proxemic values
- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs and demonstrate ergonomic, anthropometric and proxemic values:
  - brochures
  - magazines
  - websites such as online galleries and retail sites
  - design forums
  - reference books
  - other existing enterprise design information
  - transferable technological ideas or concepts
  - natural or man-made structures and objects
- key aspects of the following and how they may impact the design of different products:

© Commonwealth of Australia, 2025 Skills Insight

  - ergonomics:
    - safety
    - comfort
    - ease of use
    - productivity and performance
    - aesthetics
  - anthropometrics:
    - physical requirements and attributes of product end user
  - proxemics:
    - spacing requirements of product end user and location of product
- all aspects of the product design, including but not limited to:
  - shape and dimension
  - materials
  - colour
  - texture, patterns and relief
  - the site and positioning of the end product
  - ability to produce in batches or limited production runs
  - ability to adapt the design to different production methods or volumes
- Australian Standards and government recommendations for product design concerning ergonomics, anthropometrics and proxemics
- materials, finishes and production methods, and how these interact with achievement of ergonomic, anthropometric and proxemic requirements.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5011 Plan production

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT5006 Plan production.

## Application

This unit describes the skills and knowledge required to plan and document the overall requirements of production in a furnishing or similar workplace.

This unit applies to an individual working alone or as part of a team but with limited guidance, in a furnishing or similar workplace or any size, who has responsibility for managing production processes.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish production requirements | 1.1 Interpret data from sales or market forecast for inclusion in production plan<br>1.2 Analyse specifications and supporting data<br>1.3 Establish projected requirements regarding product quantity, quality, raw materials and performance characteristics<br>1.4 Determine and confirm production capacity of machines and personnel<br>1.5 Identify resources required, including raw materials supply requirements for production line |
| 2. Prepare production | 2.1 Assemble and confirm information and details to include in |

# Assessment Requirements for MSFFDM5011 Plan production

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT5006 Plan production.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- establish and confirm the production requirements for one significant production requirement, and in doing so:
  - prepare the production plan
  - monitor and coordinate variations to the plan
  - maintain records
  - engage with appropriate workplace software and systems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- production processes, products, machines, planning and forecasting software
- the range of production operations, including:
  - repetitive production runs
  - short runs
  - quick changes
  - indent orders
  - stock replenishment
- work and workplace organisation systems including:
  - just in time (JIT)
  - quick response
  - quality systems
  - team processes
  - benchmarking systems
- suppliers, their capabilities and customer requirements
- safety and environmental aspects of relevant workplace activities
- workplace procedures and reporting/recording processes, including:
  - the workplace business plan
  - previous production plans

© Commonwealth of Australia, 2025 Skills Insight

  - planning and production policies
  - machine/equipment specifications
  - work orders
  - job procedures
- work health and safety requirements, including:
  - legislation
  - building codes
  - material safety management systems
  - hazardous and dangerous goods codes
  - local safe operating procedures or equivalent.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- access to workplace procedures, equipment, stock systems and other relevant workplace information.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5012 Research, test and apply materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Application

This unit describes the skills and knowledge required to research different complex materials and technologies and their applications. It also covers how to use this information to inform design briefs, select materials and technologies that interact harmoniously together, and establish testing requirements for final selection.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare information and test results to develop a combined materials and technologies production solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine project requirements | 1.1 Review and clarify project brief with client<br>1.2 Confirm and evaluate parameters and constraints from project brief<br>1.3 Identify and assess aspects of brief that are impacted by materials and technologies selection<br>1.4 Identify key project stakeholders and establish required communication protocols |
| 2. Research materials and technologies for | 2.1 Evaluate features of briefed product and research how materials and |

# Assessment Requirements for MSFFDM5012 Research, test and apply materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research, test and apply materials and associated technologies for three different design briefs, and in doing so:
  - research five different types of materials and three different design- or production-related technologies
  - develop, implement and report on a test program for two different types of materials and two different design- or production-related technologies
- prepare and present three reports in appropriate formats to convey information to key stakeholders.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships and how they are used in materials selection
- characteristics, properties and selection criteria for different materials, both aesthetic and functional, including:
  - manmade and natural timbers (native and imported) including composites and finishes
  - plastics
  - metals
  - alloys
  - stone-based products
  - glass
  - textiles
  - fibreglass
  - foam
  - synthetics
  - cardboard and paper products

© Commonwealth of Australia, 2025 Skills Insight

    - any other manipulable substance
- particular features and behaviours of materials and the impact of these on production methods and technologies
- types and methods of testing specific to different materials, including strength and performance under different conditions
- design- and production-related technologies applicable to all stages of a project, and their impact on materials selection and output variables
- key features, costs, efficiencies and technical application of current and emerging technologies, including:
    - CNC operations
    - 3D printing
    - foundries and casting
    - robotics
    - laser cutting
    - water-jet cutting
- how to structure and present testing program results and recommendations
- the expertise and specialised equipment or technologies required for different materials, and the impact of these on project constraints including timeframes and budgets
- non-traditional materials that complement or enhance the overall design.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - design briefs
    - range of complex materials for testing
    - industry-standard technologies suitable for design and production
    - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

# MSFFDM5013 Work collaboratively on design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5015 Work collaboratively on a design project.

## Application

This unit describes the skills and knowledge required to establish, implement and maintain collaboration on a complete design project.

This unit applies to individuals working in a manufacturing or design studio environment who participate in the management of a design project as part of a collaborative team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Plan for project collaboration | 1.1 Agree, confirm and clarify project requirements with client<br>1.2 Identify and pursue opportunities for collaboration in project, establishing communication with all those involved in design process |
| 2. Establish and implement collaborative approaches | 2.1 Establish shared understandings of objectives and parameters through discussion and ongoing communication<br>2.2 Agree on ways of working that acknowledge different contributions of those involved and need for a holistic approach<br>2.3 Acknowledge and follow ethical approaches to information sharing, privacy and need to take responsibility for outcomes<br>2.4 Share, challenge and test ideas and approaches to design and manufacturing challenges in a supportive way<br>2.5 Organise, allocate and document tasks and activities in |

# Assessment Requirements for MSFFDM5013 Work collaboratively on design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5015 Work collaboratively on a design project.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- work as a member of a collaborative team on two design projects that involve:
  - establishment of requirements with collaborator and client
  - design ideation
  - development and refinement of all aspects of design proposals and briefs
  - coordination of implementation of design brief in production
  - delivery of end result to client
  - recognition of dependencies and cooperative approaches that optimise workflow and productivity
  - industry best-practice communication methods and collaboration tools that enhance collaboration.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- potential collaborators in a design project and the different roles people play
- legal and ethical considerations for collaborative practice, including:
  - copyright and intellectual property
  - privacy, confidentiality and disclosure
- benefits of collaboration for individuals and organisations, including the value of collaboration as a problem-solving tool
- types of behaviours that support effective collaborative relationships
- types of tools and documents to support the establishment, implementation and maintenance of collaborative practice
- inclusions for design project management planning:
  - budget
  - communication, consultation and reporting
  - objectives and milestones

© Commonwealth of Australia, 2025 Skills Insight

  - resources - human, financial and physical
  - quality assurance process
  - responsibilities of different people
  - risk management and contingency plans
  - timeframes
- typical problems encountered in a collaborative process and how they may be avoided or resolved
- ways of evaluating projects in terms of their success as collaborative undertakings.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design brief
  - people for collaboration.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing

## Modification History

Release 1. New unit of competency.

## Application

This unit of competency describes the skills and knowledge required to identify job requirements and then select, fit and install low-voltage technology, automation and intelligent management systems in furnishing products. The unit involves taking measurements to support the accurate fit of the items; and correctly using and applying adhesives and concealment methods suited to the installation design, product being installed, and furnishing product material. It also involves understanding quality and compliance indicators and requirements so that the installation complies with industry-accepted standards.

This unit applies to unlicensed installers working in all sectors of the furnishing industry using low voltage (24 volts or less) technology, automation, or intelligent management systems. The furnishing products involved are diverse, and may include kitchen and bathroom cabinetry, fitted furniture and window furnishings. The items installed are also diverse and may include docking stations, and sound and visual devices.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Where installation involves wiring to be connected to mains power, electrical work must be completed by a qualified licensed electrician

## Pre-requisite Unit

Not applicable.

## Unit Sector

Furniture design and technology

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare for installation of low-voltage technology, | 1.1 | Identify job and product requirements from work order and visual representations of installation design |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| automation, and intelligent management system item into furnishing | 1.2 | Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures |
| | 1.3 | Identify and select required installation items based on the work order |
| | 1.4 | Identify and select tools, equipment and accessories to be used during installation and check their safe and effective operation |
| | 1.5 | Clean and prepare furnishing product surfaces to enable accurate fitting |
| 2. Install low-voltage technology, automation and intelligent management system item into furnishing | 2.1 | Take accurate measurements and fit item according to design requirements |
| | 2.2 | Secure item using fitting tools according to supplier instructions and workplace procedures |
| | 2.3 | Apply adhesives according to supplier instructions and workplace procedures |
| | 2.4 | Test installed item against expected performance and troubleshoot performance problems in line with own level of responsibility |
| | 2.5 | Place cabling concealments according to installation design |
| 3. Finalise installation | 3.1 | Check that completed work complies with quality and work order requirements, and rectify identified deficiencies |
| | 3.2 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.3 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.4 | Clean and store remaining tools and equipment according to workplace procedures |
| | 3.5 | Identify and store surplus unused items for re-use and recycling according to workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 3.6 | Complete required workplace documentation according to workplace procedures |

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in work orders and design specifications<br>• use a blend of 'in the head' and formal methods and tools to correctly complete measurements<br>• estimate and measure installation items |
| Reading skills to: | • interpret routine workplace documentation, including work orders, WHS requirements, and workplace installation procedures |

# Unit Mapping Information

Release 1. New unit of competency. No equivalent unit

# Assessment Requirements for MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install in furnishing a minimum of the following items in line with job requirements and workplace procedures:
  - one low-voltage hardware item
  - one item requiring automation
  - one item from an intelligent management system.

In the course of each of the above installations, the person must:

- interpret work order and design specifications relating to the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to surface, tools, equipment and materials
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and visual representations of designs, and how to identify and interpret key information
- emerging trends in installing low-voltage technology, automation and intelligent management systems in furnishing products
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence

© Commonwealth of Australia, 2025
Skills Insight

- workplace procedures relating to:
  - manual handling, including lifting and carrying
  - safely installing, securing and concealing installation items
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting fitting and installation information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - boundaries of work for unlicensed personnel
  - key requirements of Australian standards for individual installers
  - safety considerations and potential dangers associated with incorrect installation
- techniques for installing, securing, and concealing items described in performance evidence
- mathematical methods for estimating and measuring installation items
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, expected performance benchmarks, and limitations of low-voltage technology, automation, intelligent management system items and after-market serviceability:
  - cabinet hardware
  - charging devices
  - docking stations
  - lighting
  - sound
  - visual devices
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - adhesives and their suitability for different material types
  - hand tools
  - power tools
- documentation requirements for installation work described in performance evidence

# Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- work orders and design specifications
- workplace and WHS procedures specified in knowledge evidence

© Commonwealth of Australia, 2025
Skills Insight

- supplier instructions and manufacturer specifications
- furnishing items requiring installation of low-voltage technology, automation, and intelligent management systems
- low-voltage technology, automation and intelligent management system items, and associated required hand and power tools, equipment, materials and accessories
- PPE applicable to job requirements.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFFDT4012 Research furniture styles and movements

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers researching furniture styles and movements and analysing how they influence furniture design by accessing a range of information sources. It also covers identifying influences on the design of furniture and documenting information for use in furniture design projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture design and technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan research | 1.1 | Applicable work health and safety (WHS), legislative and organisational requirements relevant to researching furniture styles and movements are verified and complied with |
| | | 1.2 | Design brief is reviewed, confirmed and clarified with appropriate personnel |
| | | 1.3 | Relevant research sources of information on furniture styles and movements are located |
| | | 1.4 | Formal and informal research techniques are selected to access the information |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.5 | Scope of research is determined |
| 2 | Conduct research and document findings | 2.1 | Research is conducted using a range of research techniques |
| | | 2.2 | Geographical research is conducted to detect influences |
| | | 2.3 | Cultural, economic and environmental influences on furniture styles and movements are identified |
| | | 2.4 | Features of furniture are identified |
| | | 2.5 | Significant trends, designers and techniques and their influences on styles and movements are identified |
| | | 2.6 | Research information is applied to current furniture design trends, philosophy and surrounding buildings |
| | | 2.7 | Information is documented to develop reference materials to inform design projects |
| | | 2.8 | Research materials and results of the research are organised and compiled into easy to access facilities for further reference |
| 3 | Maintain currency with furniture styles and movements | 3.1 | Research sources and compiled information are regularly checked for usefulness in informing design projects |
| | | 3.2 | Opportunities to update and expand research of styles and movements are scheduled |
| | | 3.3 | Findings from research are regularly incorporated into design outcomes |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving
- customers or suppliers may be internal or external

**Design brief includes:**

- the aims, objectives, milestones for the design project
- organisational or personal profiles
- target audience
- budget
- timeline
- consultation requirements
- colour requirements
- image requirements
- function

**Research sources include:**

- scientific texts
- historical texts and journals
- oral histories
- journals
- periodicals
- images
- objects
- films
- videos
- microfiche
- internet
- technical information
- stories
- libraries
- museums

© Commonwealth of Australia, 2025 Skills Insight

**Information includes:**

- universities
- collection catalogues
- philosophy texts
- world histories
- cultural issues publications
- spiritual issues publications
- religious texts
- histories of furniture design
- linguistics, aesthetics and political publications
- gender and identity issues texts
- place, signs and symbols
- criticism
- new technologies
- popular media

**Styles and movements include:**

- furniture designers and key figures, such as Frank Lloyd Wright, Charles Eames and Antonio Gaudi
- schools and movements, such as Bauhaus in Germany, Federal style in the United States, and Art Nouveau in Europe
- periods and styles, such as the neo-classical Adams style, the simple lines of Art Deco, and the asymmetrical style of Rococo
- decorative details, such as:
  - rosettes
  - foots
  - hinges
  - mouldings

**Research techniques include:**

- internet searches
- interview
- discussion
- books
- journals
- films
- documentaries
- first hand review

**Geographical research includes:**

- international
- national
- regional
- local influences

**Facilities include:**

- files
- computer files
- indices

© Commonwealth of Australia, 2025 Skills Insight

**Documentation includes:**

- databases
- charts
- diagrams
- freehand drawings
- sketches
- ideation drawings
- working drawings
- computer-generated documentation
- pictures
- illustrations
- photos
- multimedia presentations
- materials or theme boards
- specifications
- measurements

# Unit Mapping Information

# Assessment Requirements for MSFFDT4012 Research furniture styles and movements

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Identify materials used in the work process
- Research furniture styles and movements to assist with informing current design practices, challenging and adapting influences into current designs
- Apply design elements and principles to the research of styles and movements in accordance with the concepts and design brief
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to researching styles and movements
- Organisational and site standards, requirements, policies and procedures for researching styles and movements
- Elements and principles of design
- Ergonomics and aesthetic values
- Significant trends, designers and techniques and their influences on styles and movements
- Characteristics of materials, products and defects
- Relevant computer programs for research and documentation
- Relevant research techniques
- Presentation techniques and equipment
- Procedures for the recording, reporting and maintenance of workplace records and information
- Environmental protection requirements

© Commonwealth of Australia, 2025 Skills Insight

- Established communication channels and protocols
- Relevant problem identification and resolution

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to researching styles and movements.

# MSFFT4007 Sample, inspect and test products to specifications

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers taking product samples, identifying and applying authorised testing procedures, interpreting test results and reporting findings within a furnishing enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify specifications and test procedures | 1.1 | Product quality specifications are read, drawings interpreted and test parameters are identified |
| | | 1.2 | Test methods for each required test parameter are identified and the most efficient test method is noted |
| | | 1.3 | Any requirement for testing by personnel external to the work area is identified and appropriate permission is obtained |
| | | 1.4 | Design features that impact on testing and inspection are identified |
| 2 | Select evidence | 2.1 | Appropriate conforming and/or non-conforming products, |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | materials and/or waste are selected for testing in accordance with enterprise requirements |
| | | 2.2 | Observations of operators and copies of procedures are collected |
| 3 | Conduct and interpret tests | 3.1 | Tests are conducted following workplace procedures and results are documented |
| | | 3.2 | Comparisons of all data collected are made |
| | | 3.3 | Any recommendations are noted and considered for feasibility |
| 4 | Report findings | 4.1 | Findings of tests are documented |
| | | 4.2 | Any potential or existing problems and appropriate recommendations are identified and reported in accordance with enterprise procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. # Assessment Requirements for MSFFT4007 Sample, inspect and test products to specifications

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Arrange and conduct a minimum of four (4) different processes covering sampling, inspection and testing
- Analyse test results and interpret outcomes against requirements
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- General quality systems theory
- Sampling techniques for commonly encountered materials
- Inspection techniques and faults common within the sector products
- Testing techniques (destructive and non-destructive) relevant to the sector and related equipment/aids
- Work flow in relation to required times and stages where quality checking is required

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

# MSFFT4010 Identify and calculate production costs

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers estimating materials, labour and time requirements, and establishing costs for the provision of products, including all overheads in a significant mass production environment. It may involve referral of matters to other enterprise personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Gather information | 1.1 | Details of the particular product and competition products are obtained |
| | | 1.2 | Details of the proposed production operation are obtained and analysed |
| | | 1.3 | Labour unit cost projections are obtained and agreed |
| | | 1.4 | Logistic support contracts, supply agreements or equivalent are obtained and analysed |
| | | 1.5 | Details of proposed warehousing and physical distribution systems and related cost factors are obtained |
| | | 1.6 | Information is converted to usable form and stored ready |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | for retrieval and application |
| 2 | Estimate materials and labour | 2.1 | Types and quantities of materials required for production are estimated and recorded |
| | | 2.2 | Time requirements for production activities and other lead times are estimated |
| | | 2.3 | Labour requirements for direct production and handling operations are estimated and recorded |
| 3 | Determine and calculate overheads | 3.1 | Components contributing to overhead costs are identified |
| | | 3.2 | Overhead costs to be attributed to work in accordance with commercial and enterprise procedures are identified |
| 4 | Calculate production costs | 4.1 | Total materials costs and labour costs are calculated in accordance with enterprise procedures |
| | | 4.2 | Total production cost is calculated, including overheads and mark-up percentages |
| | | 4.3 | Final cost to customer is calculated in conjunction with marketing/sales personnel |
| 5 | Document details and verify, where necessary | 5.1 | Details of costs and charges are documented in accordance with enterprise practice |
| | | 5.2 | Costs, calculations or other details are verified by other enterprise personnel, as required |
| | | 5.3 | Details are documented for future reference in accordance with enterprise practices |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate organisational and administrative ability, discretion, judgement and problem solving
- work is undertaken in accordance with established procedures involving a range of products, equipment and installation sites
- interaction with customers and other personnel from the operator's workplace

**Tools, equipment and resources include:**

- measuring equipment
- product sales literature
- product samples

**Overhead costs include:**

- rental/lease costs
- utilities
- non-production resources
- depreciation of plant and equipment
- warehousing margins
- physical distribution unit costs
- insurance
- other costs incurred by doing business

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- enterprise production plan and schedule
- enterprise financial management policy and procedures
- enterprise policy and procedures for cost and apportioning overheads
- labour employment costs (awards, enterprise bargaining agreements and contracts)
- material/supply costs (contracts, standing agreements,

# Assessment Requirements for MSFFT4010 Identify and calculate production costs

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- For a significant mass production operation, determine the production and product costs using the following or equivalent steps:
  - obtain all information relevant to the determination of costs
  - interpret plans, specifications and instructions for production and materials to be used
  - estimate quantities of materials required
  - determine the types and amount of labour required to complete the work
  - estimate time required to complete the work
  - determine/calculate overheads
  - document the process and outcomes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Production systems documentation processes
- Enterprise costing procedures

© Commonwealth of Australia, 2025 Skills Insight

- Mathematical formulae and processes relevant to costing
- Components of labour costs
- Enterprise/commercial approach to overhead costs
- Enterprise/commercial approaches to warehousing and physical distribution costs
- Enterprise information management processes, including storage requirements

# Assessment Conditions

- Assessors must:

# MSFFT4011 Purchase materials and consumables

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers purchasing materials and consumables required for production within a furnishing enterprise, through existing contracts and other formal purchasing arrangements or through local purchase delegation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify purchasing requirements | 1.1 | Purchasing requirements are identified from material specifications, orders and instructions in accordance with workplace procedures |
| | | 1.2 | Purchasing requirements are prioritised, where required, in consultation with others |
| | | 1.3 | Quantities, quality of goods, price limitations and delivery requirements are determined or confirmed in consultation with appropriate personnel |
| 2 | Source materials and consumables | 2.1 | Sources of materials and/or consumables are identified from workplace preferred supplier lists or through networks and knowledge of local and/or overseas suppliers |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Difficulties in supply are reported in accordance with workplace procedures |
| | | 2.3 | Availability of supply is confirmed |
| 3 | Compare costs | 3.1 | Alternative suppliers are contacted to check costing |
| | | 3.2 | Actual costs are compared to predicted costs |
| | | 3.3 | Any recommendations regarding alternative suppliers are communicated to appropriate personnel following workplace procedures |
| | | 3.4 | Delegation to order goods/materials/equipment is exercised |
| 4 | Purchase materials and consumables | 4.1 | Capacity of supplier to meet price, quality and delivery expectations is checked |
| | | 4.2 | Purchase order/list is developed in accordance with workplace procedures |
| | | 4.3 | Order is placed with supplier and delivery schedules are confirmed |
| | | 4.4 | Appropriate orders and invoices are exchanged according to workplace procedures |
| 5 | Maintain and monitor material and consumable supplies | 5.1 | Stock is regularly monitored using inventory records and physical checks, where applicable, to ensure maintenance of supply |
| | | 5.2 | Up-to-date records of materials and consumables are maintained |
| | | 5.3 | Acquisition requirements are documented in accordance with workplace procedures |
| 6 | Liaise with other departments | 6.1 | Communication channels with other departments are established in accordance with workplace procedures |
| | | 6.2 | Liaison with other departments is conducted to ensure customer requirements are achieved |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate administrative ability, discretion, judgement and problem solving
- work is performed with little external assistance and with minimal supervision or direction
- customers may be internal or external

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- work procedures/instructions
- existing contracts or formal purchasing arrangements
- supply system directories, indexes and catalogues
- machinery/equipment/system technical manuals
- legislation/regulations/national and industry codes and practices related to the materials and consumables
- quality and Australian Standards and procedures

# Unit Mapping Information

Supersedes and is equivalent to LMFFT4011B Purchase materials and consumables.

# Assessment Requirements for MSFFT4011 Purchase materials and consumables

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Purchase materials on a minimum of four(4) occasions, including two (2) different materials and at least one (1) perishable consumable
- Suggest improvements to purchasing operations and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids, and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Contemporary supply/purchasing systems theory
- Company operating procedures, including procedures for purchasing materials and consumables
- Material and consumable usage rates
- Operation requirements of equipment and work systems in own work area

## Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to production operation with consumable and material requirements, preferred supplier lists and workplace procedures.

# MSFFT4012 Prepare a tender submission

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing and submitting a tender for supply of products and services in the furnishing industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify opportunity to provide goods and/or services | 1.1 | Opportunities that are within the operational scope of the business unit or organisation are identified |
| | | 1.2 | Organisational resources which are available, or expertise which may be accessed, is identified and matched to opportunities |
| | | 1.3 | The feasibility of undertaking the proposed project/work is assessed and approval is sought according to organisational policies and procedures |
| 2 | Analyse tender requirements | 2.1 | Tender specifications and scope of tender requirement are identified and clarified with the originator if required |
| | | 2.2 | Proposed methodology for satisfying the request is |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | developed |
| | | 2.3 | Required resources are identified and their availability confirmed with the provider in accordance with organisational procedures |
| | | 2.4 | Methodology is adjusted to accommodate the availability of resources and expertise available |
| 3 | Prepare a tender estimate | 3.1 | Estimate is prepared taking all requirements into account and providing for contingencies as required by organisational policies, procedures and requirements |
| | | 3.2 | Costing of estimate conforms to organisational policies and procedures |
| | | 3.3 | The estimate satisfies the total requirement and where this cannot be provided, an explanation/compromise/option is identified |
| | | 3.4 | Estimate is checked for accuracy and detail in accordance with organisational procedures |
| 4 | Submit a tender | 4.1 | Tender is prepared in accordance with organisational policies and procedures |
| | | 4.2 | Tender addresses required details and meets originator's requirements |
| | | 4.3 | Tender is submitted within the required timeframe in the form required by the request |
| | | 4.4 | Organisational requirements for record keeping and documentation of tenders are completed |
| 5 | Review tender process | 5.1 | Changes and variations to the tender are negotiated to meet the needs of the client and the organisation in accordance with contractual arrangements, organisational policies, procedures and delegated authority |
| | | 5.2 | The tender content and process is reviewed and evaluated using the outcome and the feedback provided by client and stakeholders |
| | | 5.3 | Procedures are adjusted if required to improve subsequent bids |

# MSFGG2017 Fabricate and install insect and security screens

## Modification History

Release 1 New unit of competency.

Note: MSFGG2010 Fabricate and install insect and security screens was superseded by MSFSS3005 Assemble non-security and security screens and grilles in 2020, but a subsequent review found that the content of MSFGG2010 should be restored to the qualification. This unit, MSFGG2017, has the same title and content (with minor updates) as MSFGG2010. MSFGG2017 is a new unit and does not supersede any other unit.

## Application

This unit describes the skills and knowledge required to measure, fabricate and install insect or security screens for doors or windows using aluminium.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1 Plan for work | 1.1 Determine specifications of insect or security screen from work instructions, including the identification of its pattern or plan<br>1.2 Identify and apply work health and safety requirements relevant to fabrication and installation of aluminium screens, including personal protective equipment<br>1.3 Identify fabrication and installation processes to meet specifications<br>1.4 Calculate quantities of materials required from plans, work instructions and measurement of screen opening in accordance with Australian Standards and industry practice<br>1.5 Prepare cutting lists from plans, work instructions and measurements |

# Assessment Requirements for MSFGG2017 Fabricate and install insect and security screens

## Modification History

Release 1 New unit of competency.

Note: MSFGG2010 Fabricate and install insect and security screens was superseded by MSFSS3005 Assemble non-security and security screens and grilles in 2020, but a subsequent review found that the content of MSFGG2010 should be restored to the qualification. This unit, MSFGG2017, has the same title and content (with minor updates) as MSFGG2010. MSFGG2017 is a new unit and does not supersede any other unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure, fabricate and install one hinged aluminium screen door, one sliding aluminium screen door and one aluminium window screen
- safely use at least three of the following:
- drop saw
- up-cut saw
- stamping and notching tools
- copy routers
- end millers
- crimpers
- electric or pneumatic powered drills and screwdrivers
- pop rivet guns
- welding machine.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workflow requirements in relation to the fabrication and installation of insect and security screens
- characteristics and application of materials and fittings used in fabrication and installation of screens including:
- extruded door framing
- corner stakes
- interlocks
- fly mesh
- heavy-duty security mesh

© Commonwealth of Australia, 2025 Skills Insight

- emergency escape security screen
- fittings and fixing/fasteners (screws and pop rivets)
- anti-jemmy protection hardware
- hinges
- wheels
- lock mechanisms that comply with Australian Standards
- door closures
- lock guards
- workplace safety system requirements related to fabricating and installing aluminium insect and security screens
- relevant Australian Standards relating to security screen doors and security window grilles.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including those specified in the performance evidence
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG3032 Mirror glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3012 Set up and operate glass mirroring equipment.

## Application

This unit describes the skills and knowledge required to set up, operate, monitor and maintain glass mirroring equipment.

This unit applies to glass processing workers mirroring glass in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for work | 1.1 Read work instructions and identify job and quality requirements<br>1.2 Identify and follow work health and safety requirements, using all required personal protective equipment<br>1.3 Identify quality procedures for each stage of the process<br>1.4 Plan work sequence in a logical order to suit the job and workplace procedures<br>1.5 Establish and maintain communication with others involved with the work to ensure efficient work flow coordination, personnel cooperation and safety |

# Assessment Requirements for MSFGG3032 Mirror glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3012 Set up and operate glass mirroring equipment.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the mirroring process on 3 different types of glass.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of relevant Australian Standards
- workplace safety system requirements related to the operation of glass mirroring equipment
- work flow requirements in relation to the operation of glass mirroring equipment, including how the process fits into the overall glass processing system
- the role and importance of communication with others in relation to quality and safety
- characteristics of materials used and uses of products produced by glass mirroring operations
- mathematical procedures
- common items found in work instructions for glass laminating, including:
  - material to be used
  - number of sheets to be mirrored and holding area for completed items
  - process required to complete work tasks
- qualities, characteristics and uses of different types of glass for mirroring, including:
  - annealed
  - laminated
  - sheet
  - toughened
- types, characteristics, safe use, maintenance and limitations of glass mirroring equipment:
  - backing paint
  - buffing and cleaning tables
  - compressors
  - copper plating electrodes

© Commonwealth of Australia, 2025 Skills Insight

  - dual nozzle spray guns
  - extractor fans
  - heated drying racks
  - mirroring formulas
  - semi-automatic and computer-navigated mirroring equipment
  - solution containers
  - spray booths
  - stripping acid tanks for re-mirroring
  - tinning solution
  - water distiller
- identification, handling and storage requirements for hazardous chemicals
- procedures for the preparation of glass and the mirroring process, the types of problems that may occur and how to avoid and respond
- quality indicators for mirrored glass
- handling and storage requirements for completed mirrored glass
- procedures for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in Performance Evidence
  - glass product to be mirrored
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG4009 Apply standards and codes of practice for the glass industry

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4001 Apply standards and codes of practice for the glass industry.

## Application

This unit describes the skills and knowledge required to evaluate potentially complex glass and glazing requirements, determine codes and standards that must be applied and integrate those requirements into work processes.

This unit applies to experienced workers who interpret and use potentially complex technical information to develop glass and glazing work solutions. They may work in the manufacture, processing and/or installation of glass components. Job roles often involve leadership responsibilities.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil.

## Competency Field

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate glass and glazing work requirements | 1.1 Identify and correctly interpret glass and glazing job requirements from workplace documentation and consultation<br>1.2 Accurately record requirements to inform analysis<br>1.3 Conduct technical evaluation and correctly determine compliance |

# Assessment Requirements for MSFGG4009 Apply standards and codes of practice for the glass industry

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4001 Apply standards and codes of practice for the glass industry.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assessed requirements and developed documentation that complies with Australian Standards (AS) for jobs that individually or cumulatively involve glass and glazing for:
  - stairways
  - balustrading
  - sloped or overhead glass
  - 5-star rated buildings
  - fire-rate applications
  - curtain walls and/or facades
  - partitions.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- scope and nature of workplace documentation that informs evaluation of work requirements:
  - specialist technical specifications
  - client brief
  - location of work
- key aspects of:
  - AS 1288: sections 6, 7 and 9
  - AS/NZS 2208: all sections
  - AS/NZS 1170: all sections
  - AS/NZS 4667: all sections
  - AS/NZS 4668: all sections
  - National Construction Code (NCC) references to windows and doors in buildings
- workplace safety system requirements related to the handling and installation of glass and glazing products that impact specification development
- types, characteristics uses and limitations of different glass, including issues related to:

© Commonwealth of Australia, 2025 Skills Insight

  - aspect ratios
  - energy efficiency
  - installation methods
  - thermals
  - tolerances
  - wind loadings
- current and emerging trends and developments in glass and glazing, including:
  - products
  - techniques and/or applications
- sources of specialist glass and glazing technical advice
- workplace procedures for development of specifications, including:
  - format
  - required inclusions
  - technical drawings
  - document control
- range of people or parties potentially involved in glass and glazing work and typical interactions required:
  - architects
  - builders
  - customer
  - engineers
  - internal staff
  - product developers and/or suppliers
  - logistics personnel
- communication protocols for the approval and dissemination of work specifications and other information to external parties.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - details of glass and glazing work requirements as specified in the Performance Evidence
  - AS/NZS documentation as detailed in the Knowledge Evidence
  - product information
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG4010 Use glass industry data systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4002 Use glass industry data systems.

## Application

This unit describes the skills and knowledge required to use a specialised glass industry software system. Software systems are diverse in nature and may be those used for estimating, design, inventory or sales.

This unit applies to individuals in glass and glazing enterprises who perform specialist or leadership functions.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select data system and information for work role | 1.1 Identify specialist software for data and workplace information needs and determine its application to work role<br>1.2 Assess and confirm data entered in the system is accurate<br>1.3 Open data system and log on operator for the work |
| 2. Enter and manipulate data | 2.1 Enter data into the system and navigate the system to meet work requirements<br>2.2 Check entered or edited data for accuracy<br>2.3 Effectively use features of the system in the manipulation, processing and presentation of data |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 2.4 Transfer data between applications, linking and embedding related data files, in accordance with work requirements |
| 3. Generate reports | 3.1 Generate processed data in the correct format<br>3.2 Check generated reports and other documentation for accuracy and completeness of information<br>3.3 Identify and correct any data or processing errors before completion |
| 4. Save data and exit system | 4.1 Save and store data in appropriate directory or folder in accordance with workplace procedures<br>4.2 Close file and exit application without loss of data<br>4.3 Back up reports and other data in accordance with workplace procedures |
| 5. Respond to problems with the system | 5.1 Recognise faults that occur during data entry, processing and outputting<br>5.2 Identify causes of data processing faults and take appropriate action<br>5.3 Log and report problems in accordance with workplace procedures |

# Assessment Requirements for MSFGG4010 Use glass industry data systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4002 Use glass industry data systems.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used a specialised glass and glazing software application to generate documentation and/or reports for 3 three different jobs or work situations.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- glass industry standards and codes of practice
- types, features and capabilities of glass industry software applications available for different purposes
- detailed operating procedures and capabilities of one specialised software application
- processes for identifying and responding to faults related to:
  - incorrect or misleading data
  - system software
  - system equipment.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - computers and software applications used in the glass and glazing industry
  - data for management within the system
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings.

## Application

This unit describes the skills and knowledge required to plan for work, take accurate measurements, make alignment calculations and complete the levelling and alignment of glass windows and doors prior to installation.

This unit applies to individuals in glass and glazing enterprises who perform specialist or leadership functions.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for glass laser measurement and levelling | 1.1 Determine task requirements through review of documentation and inspection of windows and doors to be installed<br>1.2 Select laser levelling equipment suitable for the installation and set up to manufacturer recommendations<br>1.3 Plan levelling in detail including sequencing, and prioritise tasks and system requirements<br>1.4 Identify and mitigate potential site hazards for personnel and property and/or select control measures in accordance with the work |

# Assessment Requirements for MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- levelled and aligned the following, either sub-frame or sub-channel, for installation in buildings:
  - door
  - shopfront
  - balustrade
- confirmed accuracy of the readings taken, including set up and movement of laser levelling device in two locations.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory work health and safety legislation and regulations, including individual rights and obligations
- role of a laser safety officer
- key aspects of the following Australian Standards:
  - AS 2047-2014 Windows in buildings - Selection and Installation
- hazards and control measures associated with levelling and alignment
- workplace safety system for laser measurement and levelling, including personal protective equipment
- documentation that informs planning for laser measurement and levelling and how to interpret technical drawings
- effects on installed glass window and door components if not correctly levelled and aligned
- principles of levelling and alignment and numerical operations, geometry and calculations and/or formulae for levelling, including Reduced Level (RL)
- levelling device types, characteristics, technical capabilities and limitations, including:
  - rotating laser level
  - line and dot level

© Commonwealth of Australia, 2025 Skills Insight

  - duel beam level
  - laser square level
- glass product specifications and tolerances plus or minus 1mm and size over a distance
- hierarchy of control and basis of control for glass plant/s
- communication protocols for radio, phone, computer and paper, including permissions and/or authorities
- role and use of manufacturer manuals
- types, characteristics, uses and limitations of shimming and packing materials
- settings and the correct scale for each setting on laser levelling devices and procedures for obtaining accurate measurements
- techniques, tools, equipment and procedures to carry out levelling and installation of glass components in buildings, including:
  - use of jacking bolts and shimming material
  - use of levelling equipment
- maintenance and storage requirements for laser levelling devices
- procedures for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - laser levelling equipment
  - glass window and door components
  - manufacturer documentation
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG4014 Operate complex glass processing plant control systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4006 Operate complex glass processing plant control systems.

## Application

This unit describes the skills and knowledge required to operate a complex glass processing plant control panel using control loops and a broad range of control algorithms to control plant areas and multiple products and /or process streams.

This unit applies to technicians and/or central control room operators who manage multiple complex tasks and take overall responsibility for the operation of all equipment and processes within the plant area. This may include optimisation of the area using the control system.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Use operator interface | 1.1 Correctly use system equipment and features to access control system<br>1.2 Monitor glass processing task using the operator interfaces selecting appropriate controller modes<br>1.3 Access required historical data and information from system<br>1.4 Monitor and acknowledge messages and alarms and take appropriate action in accordance with workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 1.5 Access and manage advanced control features to meet work requirements |
| 2. Access control information | 2.1 Access relevant data and information from the control system and drawings by applying systems knowledge<br>2.2 Determine status of individual pieces of equipment from control panel readings and use information to identify potential faults<br>2.3 Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics<br>2.4 Determine and relate overall operating effectiveness of the plant area to the required targets for the area |
| 3. Control process variations and monitor operations | 3.1 Use historical data on plant operations to assist the identification of problems and process all available information to identify potential faults<br>3.2 Make required set point or output changes to meet plant area and process requirements<br>3.3 Adjust production in response to test results and control panel information<br>3.4 Monitor key process and environmental variables and take appropriate action according to workplace procedures<br>3.5 Adjust controller settings in accordance with procedures<br>3.6 Optimise plant area in accordance with guidelines<br>3.7 Undertake coordination with stakeholder's external to the plant area based on work requirements<br>3.8 Accurately record adjustments and variations to specifications and/or schedules and communicate to appropriate personnel within required timeframes |
| 4. Facilitate planned and unplanned process startups and shutdowns | 4.1 Select and apply procedures for planned startup and shutdown processes<br>4.2 Select and apply procedures to unplanned shutdown processes<br>4.3 Implement emergency responses in accordance with workplace procedures<br>4.4 Identify and communicate necessary information to all personnel affected by events<br>4.5 Log required information accurately and regularly |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 5. Respond to alarms or out of specification conditions and control hazards | 5.1 Identify and prioritise system(s) affected by the alarm or condition and take appropriate action in accordance with workplace procedures<br>5.2 Respond promptly to alarm or incidents in accordance with workplace procedures<br>5.3 Deal with any out of specification material in accordance with procedures and communicate the problem and/or solution to appropriate personnel<br>5.4 Record incident information as required by workplace procedures and communicate details of the alarm and action taken to the next shift at change over<br>5.5 Follow up incidents to confirm that appropriate action has been taken<br>5.6 Identify hazards in the production and/or processing work area and assess the risks arising from those hazards<br>5.7 Implement measures to control risks in line with workplace procedures and duty of care |
| 6. Resolve other problems within scope of responsibility | 6.1 Identify possible problems in equipment, control systems or process to determine problems needing action<br>6.2 Establish possible fault causes and rectify problem using appropriate solution within area of responsibility<br>6.3 Follow initiated control actions until resolution and report problems outside area of responsibility to designated person |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFGG4014 Operate complex glass processing plant control systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4006 Operate complex glass processing plant control systems.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- determined, analysed and acted on all of the following causes of problems, alarms and/or fault indications at least once, including:
  - instrument failure or malfunction
  - electrical failure or malfunction
  - mechanical failure or malfunction
  - equipment design deficiencies
  - product parameters (temperature, flows, pressure and levels)
  - process control system malfunction
  - power or utility failures
  - software problems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic science of upstream and downstream glass processes
- glass product specifications and tolerances
- general operating principles and features of glass processing plants, including:
  - process control philosophies, strategies and systems, including multiple control systems
  - systems operating parameters and integrity limits
  - architecture and location of the glass process and/or production equipment
  - interactions between glass plant items and/or processes and between plant units within entire plant
  - communication systems and techniques for effective communication
  - fire and gas detection and protection systems
  - emergency shutdown procedures
- organisational procedures for the operation of a specific plan control system
- features and functions of control loops, including:

© Commonwealth of Australia, 2025 Skills Insight

  - interactions between multiple control loops
  - cascade control
  - piping and instrumentation (P&ID) control
  - set points
  - controlled variable and indicated variable
- features and functions of instrumentation and control systems and components, including:
  - feed forward, feedback and open control
  - sensing devices
  - final control elements
  - transducers and/or transmitters
- impacts of changing controller settings and the limits within which changes can be made
- features of typical problems encountered in a glass processing plant, and the process of how to respond, including for:
  - operating without advanced control features
  - loss of power or utilities
  - analysing failure modes
  - variation and/or loss of feed
  - unstable control of pressure, temperature level and flows
  - control equipment failure
  - process plant trips
  - change in atmospheric conditions (rain, temperature, wind and lightning)
  - emergency situations
  - how to interpret complex process drawings, including P&ID diagrams, probability of failure on demand (PFD) and cause and effect.

# Assessment Conditions

Skills must have been demonstrated in a glass processing workplace.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG4015 Manage glass processing plant shutdown and restart

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4007 Manage glass processing plant shutdown and restart.

## Application

This unit describes the skills and knowledge required to coordinate and document the shutdown and restart of a glass production or processing plant in a safe and efficient manner. The shutdown may be a planned or an unplanned shutdown or emergency situation.

This unit typically applies to the leading plant technician on a shift, who uses discretion and judgment to respond to the cause of the shutdown and coordinate all personnel involved in the shutdown to ensure it happens in an orderly a fashion and that the plant is left in the best condition possible for a quick restart. It does not apply to individual plant operators shutting down individual production units.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Manage shutdown sequence | 1.1 Check and verify glass plant safety systems and ensure that plant has been made safe<br>1.2 Identify the reason for, or cause of, the plant shutdown by troubleshooting the system using all available data and information systems<br>1.3 Obtain confirmation of the identified shutdown from operators to verify both the nature and the reliability of the shutdown |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| | 1.4 Initiate procedures to rectify the fault or shutdown cause through repair or readjustment before returning the system to startup status |
| 2. Conduct startup process | 2.1 Satisfy all start-up permissions prior to startup process being commenced<br>2.2 Safely and efficiently conduct startup and return to normal operation in accordance with workplace procedures |
| 3. Document shutdown and startup process | 3.1 Accurately complete logs and workplace documentation with required details, actions and responses<br>3.2 Record and report any ongoing production problems to appropriate persons or authority |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Unit Mapping Information

Supersedes and is equivalent to MSFGG4007 Manage glass processing plant shutdown and restart.

# Links

# Assessment Requirements for MSFGG4015 Manage glass processing plant shutdown and restart

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4007 Manage glass processing plant shutdown and restart.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- shutdown and restarted a glass processing plant safety and efficiently on at least 1 occasion.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace safety system and its relationship to plant shutdown and restart
- basic physics, chemistry and mathematics relevant to the process
- glass product specifications and tolerances
- general operating principles and features of glass processing plants, including:
  - process control philosophies, strategies and systems, including multiple control systems
  - basis of control for glass processing plant/s
  - systems operating parameters and integrity limits
  - architecture and location of the glass process and/or production equipment
  - interactions between glass plant items and/or processes and between plant units within entire plant
  - communication systems and protocols
  - fire and gas detection and/or protection systems
  - emergency shutdown procedures
- organisational procedures for the operation of a specific glass plant
- planned, unplanned and emergency reasons for processing plant shutdown, and different types of shutdown:
  - shutdown 'to cold'
  - short shutdown to allow minor work
  - 'warm shutdown'
  - plant trip and restart 'hot shutdown'
- the actions involved in facilitating a shutdown and who is involved

© Commonwealth of Australia, 2025 Skills Insight

- typical routine and major glass processing plant idiosyncrasies and problems, faults and the process of how to respond
- personnel involved in a shutdown and their respective roles
- complex process drawings, including piping and instrumentation diagrams (P&ID), probability of failure on demand (PFD)
- correct methods of starting, stopping, operating and controlling glass processing plants.

## Assessment Conditions

Skills must have been demonstrated in a glass processing workplace.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG4016 Plan and coordinate commercial glazing installations

## Modification History

Release1. Supersedes and is equivalent to MSFGG4008 Undertake planning and coordination for commercial glazing installation operations.

## Application

This unit describes the skills and knowledge required to interpret contract documentation, develop a project schedule and coordinate all resources required for the complete glass and glazing installation process in accordance with quality requirements. It includes the requirement for establishing and maintaining communication with a diverse range of site personnel.

This unit applies to individuals in glass and glazing enterprises who perform specialist or leadership functions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine installation requirements | 1.1 Identify key components and conditions of work from analysis of contract documentation<br>1.2 Confirm glass installation specifications and timing through consultation with principal contractors and architects and/or engineers |

# Assessment Requirements for MSFGG4016 Plan and coordinate commercial glazing installations

## Modification History

Release1. Supersedes and is equivalent to MSFGG4008 Undertake planning and coordination for commercial glazing installation operations.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and coordinated 2 commercial glazing installations in accordance with contract requirements.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory building and construction codes, standards and government regulations relevant to the glass installation being undertaken
- glass industry standards, codes of practice and commercial glass handling and installation techniques
- certification requirements for glass installation work performed under regulations or local authority requirements and processes and timeframes for regulatory approvals
- features, formats and inclusions in contract documentation and how to interpret these
- types and features of other documentation used for planning installation:
- key stakeholders in commercial installations and communication requirements with these people:
  - client
  - construction professionals, internal and external
  - regulatory inspectors
- communication and negotiation techniques for establishing and maintaining effective working relationships on site
- potential site requirements and limitations, and how these are managed:
  - access permits
  - access limitations and challenges and impact on work
  - communication protocols
  - delivery processes
  - impact of other building and construction personnel and/or equipment
  - safety requirements
  - regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

- potential installation resource requirements, both internal and external:
  - human, including staff labour and subcontractors
  - physical, including plant, equipment and materials
  - financial
- project management and critical path techniques:
  - planning and scheduling
  - documentation
  - monitoring
  - communication
- quality control processes and how these are implemented.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace and at worksites requiring commercial glazing installations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGN3003 Advise customers on products and services

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3009 Provide advice to customers on blinds and awnings.

## Application

This unit of competency describes the skills and knowledge required to provide advice to customers on products and services. It requires broad and current knowledge relating to the products and services, and skills required to establish customer product or service requirements, and present and discuss the benefits and features of viable options that meet customer requirements and preferences.

The unit applies to those providing customers with product and service advice in a wide range of residential and commercial environments, including small through to large-scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication

## Pre-requisite Unit

Not applicable.

## Unit Sector

Generic

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Develop knowledge of products and services relevant to own workplace | 1.1 | Research and analyse information on characteristics of products and services relevant to own workplace |
| | 1.2 | Record and store research findings according to workplace procedures |
| | 1.3 | Collect and organise information, materials, product samples and visual aids relating to products and services for future retrieval and use |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 2. Prepare to provide advice to customer | 2.1 | Review work instructions to establish customer product and service requirements |
| | 2.2 | Select fit-for-purpose information, materials, product samples and visual aids that match customer requirement |
| | 2.3 | Schedule appointment with customer |
| 3. Provide advice to customer | 3.1 | Attend scheduled appointment with customer equipped with suitable support information, products, materials and visual aids |
| | 3.2 | Consult with client to confirm client requirements and expectations |
| | 3.3 | Present viable options relating to product and service requirements in a format and style suited to customer needs |
| | 3.4 | Explain and discuss features, benefits, limitations, availability and approximate costs, terms and product and service options with customer within context of customer's specific requirements |
| 4. Finalise advisory service to customer | 4.1 | Assist customer to decide on preferred product and service options |
| | 4.2 | Document customer preferences and selections according to workplace procedures |
| | 4.3 | Establish availability of customer preferences and selections with suppliers |
| | 4.4 | Store support information, products, materials and visual aids according to workplace procedures |
| | 4.5 | Complete workplace documentation and submit to required personnel according to workplace procedures |
| | 4.6 | Complete required customer follow-up according to workplace customer service procedures |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in workplace documentation<br>• quantify customer requirements<br>• estimate and discuss product and service cost information<br>• schedule appointments and discuss cooling-off periods and payment terms and conditions |
| Oral communication skills to: | • listen to customer requirements using questioning and active listening techniques to clarify customer requirements and elicit preferences<br>• respond to and feedback customer requirements accurately and clearly, using suitable and sufficiently broad vocabulary to convey the features and characteristics of products and services<br>• express own opinion clearly |
| Reading skills to: | • interpret at times complex workplace documentation, including service conditions, customer and supplier legal obligations |
| Technology skills to: | • use ICT-based tools in familiar contexts to access product and service information |
| Writing skills to: | • write simple notes of research findings<br>• legibly document customer preferences and selections |

# Unit Mapping Information

Release 1. Supersedes but is not equivalent to MSFBA3009 Provide advice to customers on blinds and awnings.

# Assessment Requirements for MSFGN3003 Advise customers on products and services

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3009 Provide advice to customers on blinds and awnings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- provide at least three different customers with product and service advice; once in relation to a product, once in relation to a service.

In the course of providing the above advice, the person must:

- establish and clarify customer requirements and expectations
- demonstrate current and suitably broad knowledge of product and service range
- explain and discuss each suggested viable option with customer, including:
  - features, benefits and limitations of product or service
  - product or service availability
  - approximate costs
- facilitate informed customer decision-making
- finalise advisory service according to workplace procedures and customer service standards
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of authoritative and current information on products and services relating to advisory services described in performance evidence
- workplace procedures relating to:
  - customer service standards
  - consultation methods
  - communicating product and service information to customers, including presentation methods
  - scheduling appointments
  - recording and reporting outcomes of customer appointment
  - storing and retrieving product and service information

© Commonwealth of Australia, 2025 Skills Insight

    - documenting, communicating and reporting customer preferences
- products and services offered by own workplace
- key features, characteristics, and terms of products and services relating to advisory services described in performance evidence, including features described in:
    - product and service instructions and specification sheets
    - service conditions
    - manufacturer specifications
    - special requirements
- legal obligations associated with products and services described in performance evidence, including:
    - cooling-off periods
    - payment terms and conditions
- principles and techniques of customer service and product promotion
- mathematical methods for quantifying customer requirements and estimating costs.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to a commercially realistic range of customers requiring the advice described in the performance evidence above, including:

- authoritative sources of information relating to range of products and services that apply to advice in performance evidence
- computer with access to the internet for further research
- product samples, materials and visual aids relating to workplace products and services, including:
    - magazines
    - photographs
    - software presentations
    - sketches
    - trade brochures
- workplace procedures specified in knowledge evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards

# MSFGN3004 Resolve quality and compliance issues

## Modification History

Release 1. Supersedes and is equivalent to MSFSS3003 Resolve quality and compliance issues

## Application

This unit of competency describes the skills and knowledge required to identify actual and potential quality and compliance issues, and plan and implement cost-effective and efficient solutions to resolve those issues.

The unit applies to those resolving routine quality and compliance issues in the fabrication, assembly and installation of blinds, awnings, shutters, security screens and grilles. Resolution of non-routine issues identified in the course of this work is not part of this unit.

Licensing, legislative or certification requirements apply to this unit as roller shutter installers require a building licence in certain States. Relevant state/territory and local government agencies should be consulted to determine necessary certification or licensing for installing roller shutters. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

Not applicable.

## Unit Sector

Generic

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Plan and organise quality and compliance checks | 1.1 | Identify nature and scope of quality and compliance checks to be undertaken on work products and processes |
| | 1.2 | Access and interpret instructions and plans applicable to work products and processes |
| | 1.3 | Access and interpret legislative and workplace quality and |

| | | compliance documentation applicable to checking process |
| | 1.4 | Identify work health and safety (WHS) and personal protection requirements of compliance check according to workplace procedures |
| | 1.5 | Plan and organise required materials, tools and equipment according to workplace and safety procedures and in line with workplace environmental considerations |
| 2. Identify quality and compliance issues | 2.1 | Investigate products and processes and note actual and potential quality and compliance issues in workmanship, process, and materials |
| | 2.2 | Assess nature and scope of noted non-compliances |
| | 2.3 | Document current condition of hardware, software, user and procedure |
| | 2.4 | Provide verbal and written reports on identified actual and potential quality and compliance issues to required personnel according to workplace procedures and nature of issue |
| | 2.5 | Escalate actual and potential quality and compliance issues that represent imminent risk and are outside scope of own level of responsibility |
| 3. Plan and implement solutions to resolve quality and compliance issues | 3.1 | Identify and prioritise cost-effective and efficient solutions to resolve identified quality and compliance issues and meet quality, compliance and performance requirements |
| | 3.2 | Determine quality and compliance issues that can be resolved at own level, and escalate where specialist and higher level intervention is required according to workplace procedures |
| | 3.3 | Plan solution to resolve quality and compliance issues |
| | 3.4 | Check that planned solution complies with quality and workplace requirements |
| | 3.5 | Plan strategies for evaluating effectiveness of planned solution |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 3.6 | Document planned solution and evaluation strategies, and seek authorisation to proceed as required according to workplace procedures |
| | 3.7 | Implement planned solution to rectify identified non-compliances within scope of own role and according to workplace procedures |
| 4. Finalise quality and compliance resolution process | 4.1 | Maintain record of substantiated non-compliances |
| | 4.2 | Evaluate effectiveness of implemented solution using established strategies |
| | 4.3 | Legibly complete and process report detailing quality and compliance issues and implemented solution according to workplace requirements |
| | 4.4 | Clean work area and dispose of, re-use and recycle waste safely and sustainably according to workplace procedures |
| | 4.5 | Check tools and equipment, and tag and report faulty items according to established workplace practices |
| | 4.6 | Clean and store remaining materials, tools and equipment according to workplace procedures |

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Learning skills to: | • review own skills and knowledge in relation to quality and compliance criteria, and seek information as required<br>• approach colleagues where assistance and advice are needed in identifying and resolving quality and compliance issues |
| Numeracy skills to: | • interpret, discuss and use routine mathematical information in documentation and identify quality and compliance implications<br>• complete measurements and estimate product and material requirements |

# Assessment Requirements for MSFGN3004 Resolve quality and compliance issues

## Modification History

Release 1. Supersedes and is equivalent to MSFSS3003 Resolve quality and compliance issues

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- plan and safely and effectively complete checks on five different products or processes relevant to own work in fabricating, assembling, or installing blinds, awnings, shutters, security screens or grilles
- recommend and have accepted:
  - planned solutions to actual or potential quality and compliance issues
  - planned strategies to evaluate solutions
- implement recommended solutions and report on each of the above five resolution processes and their outcomes
- avoid backtracking, work flow interruptions and wastage
- work with others in a team and use cooperative approaches to optimise productivity.

Three of the above issues must be separate and different quality issues, and two must be separate and different compliance issues.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- quality and compliance requirements relating to products and processes being checked in performance evidence:
  - Australian standards
  - state and territory legislation and local government regulations
  - accepted industry good practice
  - manufacturer specifications
  - product drawings
- key features of product specifications and workplace procedures relating to product and process checks described in performance evidence
- work health and safety (WHS), legislative, and workplace requirements relevant to undertaking quality and compliance checks in the performance evidence, including safety data sheets, hazardous and dangerous goods codes and safe operating procedures

© Commonwealth of Australia, 2025 Skills Insight

- workplace procedures relating to:
  - identifying and resolving quality and compliance issues
  - communicating and escalating non-compliance issues with required personnel
  - recording and reporting non-compliance information
  - safe handling requirements for equipment, products and materials, including use of personal protective equipment
  - following work instructions and inspection processes to:
    - minimise the risk of injury to self and others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality
- environmental protection requirements relating to disposal of waste material

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- products and processes in the blinds, awnings, shutters, security screens or grilles sectors relevant to candidate where there are quality and compliance issues, which relate to at least two of the following:
  - hardware or software quality or compliance issues
  - user or procedural quality or compliance issues that increase wastage, or unnecessary increase in production or installation time
- defective or inappropriate products, materials or equipment
- PPE applicable to job requirements
- workplace documentation relevant to products and processes being checked, including quality and compliance criteria:
  - manufacturer and product specifications
  - relevant and current legislation, regulations, codes and standards
  - state, territory and local authority policies
- colleagues with specialist and higher level experience to whom quality and compliance issues can be escalated.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFPF3010 De-frame artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3001 De-frame artwork.

## Application

This unit describes the skills and knowledge required to dismantle and remove artwork from frames, including the sorting, recording and documentation of original items.

This unit applies to picture framers who de-frame items in different media for the purposes of repair, restoration or re-framing. They use discretion, judgement and specialised knowledge.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Picture Framing

## Elements and Performance Criteria

# Assessment Requirements for MSFPF3010 De-frame artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3001 De-frame artwork.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- de-framed and documented 5 artwork items that include:
  - an object
  - a textile
  - a work on paper
  - a canvas.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for dismantling of framed items
- different reasons for de-framing artwork and how the scope of work may vary
- safety considerations and requirements when de-framing, including personal protective equipment
- frame construction techniques, materials and processes
- techniques for de-framing artwork, the types of problems that can occur and how to respond
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools used to de-frame artwork:
  - cutting blades
  - hand-operated tools
  - pincers
  - pliers and marking out tools
  - screwdrivers
- documentation requirements for de-framing, including recording for reference all components and their positioning
- potential effects of the de-framing process on the artwork and liabilities and obligations
- artwork conservation handling techniques and practices.
-

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - tools and equipment to complete de-framing tasks in the Performance Evidence
    - personal protective equipment
  - work orders and condition reports.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFSF2015 Cut single layer fabrics

## Modification History

Release 1. Supersedes and is equivalent to MSFSF2001 Cut single layer fabrics

## Application

This unit of competency describes the skills and knowledge required to measure, mark out and cut single layer fabrics for the manufacture of curtains and soft furnishing accessories.

The unit applies to those in the furnishing industry cutting all types of single layer fabrics, including lining and interlining. It does not apply to cutting from patterns.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Soft furnishing

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to cut single layer fabrics | 1.1 | Identify job and equipment requirements from work order |
| | 1.2 | Select and lay out fabrics according work order and workplace procedures |
| | 1.3 | Inspect fabrics for flaws, design features affecting job requirements and required finish |
| | 1.4 | Select suitable scissors and blades and check prior to use for required sharpness, set, operation and safe condition |
| 2. Undertake cutting | 2.1 | Mark out measurements for pleat lines, hems, headings and special seam allowances using workplace-approved |

# Assessment Requirements for MSFSF2015 Cut single layer fabrics

## Modification History

Release 1. Supersedes and is equivalent to MSFSF2001 Cut single layer fabrics

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- accurately measure and cut fabric quantities to minimise waste and produce consistent quality items for at least five different work orders; each work order must relate to one of the following types of products:
  - curtain
  - cushion
  - drape
  - swag
  - upholstered furniture component.

Each of the above work orders must require a different type of fabric and number of items to be cut. One work order must require lining or interlining, and one hanging cut fabric.

In the course of completing each of the above five work orders, the person must:

- interpret work order and locate required materials, tools and equipment
- apply safe handling procedures
- follow work instructions and safe operating and inspection procedures to:
  - minimise risk of injury to self and others
  - prevent damage to materials, equipment and products
  - maintain required production output and quality
  - use personal protective equipment (PPE)
- identify special marking out requirements
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety (WHS) requirements to observe when cutting fabrics:

© Commonwealth of Australia, 2025 Skills Insight

    - ergonomic criteria
    - personal protection requirements
- work order requirements, and industry-accepted quality indicators and requirements, relating to the cutting process described in performance evidence:
    - safety considerations and potential dangers associated with cutting equipment
    - operation of work systems
    - environmental requirements of cutting operations
    - work flow requirements for cutting process
- layout and key features of work order requirements relating to cutting single layer fabrics:
    - required fabrics
    - number of items to be cut
    - fabric sizes to be cut
    - required allowances
    - required equipment
    - workplace standards
- workplace procedures for:
    - selecting and laying out fabrics
    - marking out measurements for pleat lines, hems, headings and special seam allowances
    - inspecting fabric types for flaws
    - identifying design features affecting job requirements
    - identifying and labelling cut-out materials
    - selecting and using cutting equipment:
        - blades
        - cutting machines
        - scissors
    - cutting out and labelling materials
    - hanging fabrics
    - checking tools and equipment and tagging damaged items
- effect of cutting on fabrics
- use of material features in realising attractive use of fabric patterns:
    - face of materials
    - naps
    - direction
    - pattern matches

# Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

© Commonwealth of Australia, 2025 Skills Insight

Access is required to:

- single layer fabric required for the performance evidence, including lining or interlining
- PPE applicable to job requirements
- measuring and calculating equipment:
  - tapes
  - rulers
  - calculator and other workplace calculating equipment
- cutting equipment:
  - scissors
  - blades
  - cutting machines
- workplace documentation specified in the knowledge evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFSF3014 Construct Roman-style blinds

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSF3004 Construct Roman-style blinds.

## Application

This unit of competency describes the skills and knowledge required to construct and sew Roman-style blinds to job requirements. The unit involves planning job requirements, identifying required fabrics and blind components to be used, and applying workplace procedures to ensure their safe and correct construction. The unit does not involve installing the blinds or constructing wood-weave style Roman blinds.

The unit applies to those constructing Roman-style blinds for any interior residential or commercial environment. The Roman blinds may be bonded, cascade, kooped, oriental, staggered, straight or relaxed. They may be made using lining, interlining or full block fabric. The battens used may be aluminium or timber.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Soft furnishing

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to construct Roman-style blinds | 1.1 | Identify job requirements from work order and supplier instructions, and confirm with required personnel |
| | 1.2 | Identify work health and safety (WHS) and personal protection requirements of blind construction process |
| | 1.3 | Identify, select and prepare required hardware, components, tools, and equipment based on work order, and check their |

| | | safe and effective operation |
| | 1.4 | Identify required fabric and correct side, naps, direction of pattern and pattern matches, and check for flaws |
| | 1.5 | Select and thread suitable needle types for selected fabric |
| 2. Sew Roman-style blinds | 2.1 | Lay out work to be sewn according to workplace procedures |
| | 2.2 | Measure and mark out of fold and stitching lines for batten placement according to work order, workplace procedures, and quality requirements |
| | 2.3 | Hold fabric together, and support where required, according to workplace-approved methods |
| | 2.4 | Complete pre-batten machine sewing operations according to work order and workplace procedures |
| | 2.5 | Measure and check finished length and width of panels against work order, and adjust where required to meet quality requirements |
| | 2.6 | Insert batten pockets and fix according to workplace procedures |
| | 2.7 | Complete post-batten hems and corners, and trim threads |
| 3. Finalise construction of Roman-style blinds | 3.1 | Check that finished blind complies with quality and work order requirements, and rectify and report identified deficiencies within scope of own role |
| | 3.2 | Press work for next work stage and attach rings according to workplace procedures |
| | 3.3 | Protect finished work and dispatch to next process according to workplace procedures |
| | 3.4 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.5 | Check and store tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.6 | Legibly complete and process required workplace |

# Assessment Requirements for MSFSF3014 Construct Roman-style blinds

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSF3004 Construct Roman-style blinds.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly measure and construct at least two different types of Roman-style blinds to required size and accuracy that match work order requirements.

One of the above blinds must be for a bay window, box bay window or corner window.

Each blind must be a different size and use a different fabric type, design, nap and pattern direction.

One blind must use standard lining and interlining and one blind must use block-out fabric.

One blind must use aluminium back battens and one blind must use timber battens.

In the course of constructing each of the above blinds, the person must:

- interpret work order, and locate required specifications, tools and equipment
- identify fabrics to be used and any special sewing requirements
- apply safe lifting and handling requirements
- follow work instructions, safe operating procedures and inspection processes to:
  - minimise risk of injury to self and others
  - prevent damage to materials, tools, equipment and products
  - maintain required production output and product quality
  - use power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- identify and resolve routine problems and faults encountered
- avoid backtracking, work flow interruptions and wastage
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- features of work order and supplier instructions relating to the blind construction specified in the performance evidence, and how to identify and interpret key information
- emerging trends in constructing Roman-style blinds, including new materials and their associated energy ratings and fire retardant attributes
- work order requirements, and industry-accepted quality indicators and requirements, relating to blind-construction described in performance evidence:
  - safety considerations and potential dangers, including risks to health from repetitive actions and prevention strategies
  - identifying work process problems and resolving within scope of own role
  - blind construction requirements relating to:
    - headboard and track requirements
    - cutting patterns and sequences
    - measuring and marking out fold or stitching lines
    - lining and interlining
    - mounting style
    - number and widths of panels
    - required fasteners
    - seam allowances and types
    - widths and numbers of finished blinds
- work health and safety (WHS) regulations, standards, procedures, and practices specific to blind-construction described in performance evidence:
  - ergonomic criteria
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - identifying required fabric, equipment and processes
  - cutting and laying out work to be sewn:
    - laying out lining and interlining materials and folding ready for sewing
    - matching and securing lining material patterns
    - methods for checking pattern matching and maintaining finished length
    - keeping pattern matches uniform within drops and across matching sets of blinds
  - machine sewing operations that match quality and work requirements

© Commonwealth of Australia, 2025 Skills Insight

- inspecting fabric and finished blind
- responding to emergencies and evacuations
- tagging and reporting faulty tools and equipment
- disposing of waste safely and in an environmentally sustainable manner
- recycling and re-use guidelines
- using, cleaning, and storing tools and equipment
- recording and reporting blind construction information

- techniques for measuring, cutting, setting up and constructing blinds that:
  - comply with supplier instructions and manufacturer specifications
  - conform to quality requirements relating to:
    - even and appropriate seam stitch type, length and visibility
    - lining and interlining attachment to back of blind
    - required weights, stitch type and sewing method for hems
    - inserting and fixing batten pockets
    - end finishing
    - final length of finished blind
  - maximise the appearance of the finished work:
    - pattern matches
    - flat and straight seam lines
    - clean corners
    - secured beginning and end of threads
  - provide for economical use of labour and materials
- types of common fabric faults and problems that occur during blind construction, and how to avoid and respond
- types, characteristics, terminology, uses, design features and limitations of the following items required to construct the Roman-style blinds in performance evidence:
  - materials to be machined:
    - fasteners
    - headboard and track
    - interlining and curtain fabrics
    - lining
    - threads
  - power tools:
    - sewing machines
    - drills
    - pressing equipment
    - saws
    - staplers
  - hardware:
    - needle types suited to fabric used in the performance evidence

© Commonwealth of Australia, 2025 Skills Insight

    - aluminium and timber battens
- documentation requirements for blind construction described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- fabrics to construct blinds specified in the performance evidence
- sewing machine
- PPE applicable to job requirements
- WHS documentation specific to the construction
- tools and equipment specified in the knowledge evidence
- workplace documentation required for blind-construction process, including:
    - work orders
    - workplace procedures
    - equipment and supplier instructions, and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFSS3004 Install non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSS3001 Install security screens and grilles

## Application

This unit of competency describes the skills and knowledge required to identify and install non-security and security screens and grilles according to job requirements. The unit involves planning job requirements, identifying required products to be installed and their measurements and fasteners, and applying workplace procedures to ensure safe and correct installation compliant with industry and Australian standards.

The unit applies to those installing non-security and security screens and grilles in residential and commercial environments on surfaces, including aluminium, concrete, masonry, steel and timber.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking non-security and security screens and grilles work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Non-security and security screens and grilles

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare for installation of non-security and security screens and grilles | 1.1 | Identify job and product requirements from work order and supplier instructions, and confirm with required personnel |
| | 1.2 | Complete check measure on site and document required product specifications, and specific access and installation requirements |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | 1.3 | Identify work health and safety (WHS) and personal protection requirements of installation |
| | 1.4 | Identify and select required screens and grilles, tools and equipment based on work order, and check their safe and effective operation according to manufacturer specifications |
| | 1.5 | Plan logical, safe and efficient work sequence that reflects work order |
| 2. Install non-security and security screens and grilles | 2.1 | Set up required product, materials and equipment in line with work instructions and manufacturer specifications |
| | 2.2 | Prepare installation opening for screens and grilles |
| | 2.3 | Insert and fasten security screens and grilles and install locking mechanism according to work order and manufacturer specifications |
| | 2.4 | Test installed screens and grilles for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility |
| 3. Finalise installation | 3.1 | Check that completed work complies with quality and work order requirements, and rectify identified deficiencies within scope of own role |
| | 3.2 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.3 | Identify and store surplus unused items for re-use and recycling according to workplace procedures |
| | 3.4 | Check tools and equipment, and tag and report faulty items according to established workplace procedures |
| | 3.5 | Clean and store remaining tools and equipment according to workplace procedures |
| | 3.6 | Advise customer on correct operation and maintenance of screens and grilles |
| | 3.7 | Legibly complete and process workplace documentation according to workplace requirements |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

| This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency. | |
|---|---|
| Numeracy skills to: | • interpret, discuss and use mathematical information in work orders, job sheets, cutting lists, plans, drawings and designs<br>• use a blend of 'in the head' and formal methods and tools to estimate and measure materials and installation spaces, including factoring in required tolerances |
| Oral communication skills to: | • confirm installation requirements and specifications, and report work outcomes and problems:<br>  • speaking clearly<br>  • applying effective listening techniques<br>  • asking questions to gain information |
| Reading skills to: | • interpret routine workplace documentation, including work orders, WHS requirements and safety procedures, basic plans and workplace installation procedures |

# Assessment Requirements for MSFSS3004 Install non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSS3001 Install security screens and grilles

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install the following in line with legislative requirements, industry and Australian standards requirements, and workplace procedures:
  - one hinged security screen door
  - one sliding security screen door
  - one internal or external fixed window grille above ground level in a residential or commercial building, demonstrating the safe and correct use of lifting and safety equipment
  - one emergency egress security screen
  - one non-security screen in any opening or building type.

In the course of each of the above installations, the person must:

- interpret work order and locate and use materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- demonstrate safe and correct use of safety equipment
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use and maintain hand and power tools safely
  - use personal protective equipment (PPE)
  - use and dispose of waste sustainably
  - avoid backtracking, work flow interruptions and wastage
  - identify and resolve routine problems and faults encountered
  - work with others, by recognising dependencies and using cooperative approaches to optimise work flow and productivity

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and instructions relating to the types of non-security and security screens and grilles in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - safety considerations and potential dangers associated with incorrect installation
  - consumer product safety standards and requirements
  - instructions for removing existing screens and grilles and installing replacement screens and grilles, including caveats on operational requirements
- key requirements of legislation, regulations, standards and codes of practice relevant to the full range of processes required to install the non-security and security screens and grilles:
  - Australian standards and National Construction Code requirements for individual installers:
    - bushfire attack levels
    - fire attenuation
    - cyclone protection
    - fall prevention
  - requirements specific to installation described in performance evidence
- operation and maintenance requirements of non-security and security screens and grilles in performance evidence
- emerging trends in installing non-security and security screens and grilles
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using safety and personal protective equipment
- workplace procedures relating to:
  - communicating work requirements
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - installing and securing non-security and security screens and grilles
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items

© Commonwealth of Australia, 2025 Skills Insight

    - recording and reporting installation information:
        - installation completion and equipment faults and malfunctions
        - hazards and incidents
        - outcomes of inspection
        - lock type and location of combination and keys
        - operating limitations and requirements of installed product
        - quality outcomes
- techniques for installing and securing screens and grilles described in performance evidence, including:
    - into openings made of the following materials:
        - aluminium
        - concrete
        - masonry
        - plasterboard
        - steel
        - timber
    - preparing installation position for screens and grilles
        - removing existing screens and grilles
        - assessing suitability of jamb for screen and grille frames to be installed
        - making adjustments to existing jambs
        - safely and securely positioning screen and grille frames
        - preparing for locking mechanism
    - identifying and resolving installation and operational problems:
        - new installation problems
        - problems associated with existing opening and products in place
    - installing and securing that:
        - conform to quality requirements
        - conform to standard building practices
        - comply with supplier instructions and manufacturer specifications
        - maximise the appearance of the finished work
        - provide for economical use of materials and labour
- mathematical methods for estimating and measuring materials and installation spaces, including factoring in required tolerances
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, terminology of, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
    - products and materials specific to screen and grille installation:
        - securing products, including DynaBolts, masonry anchors, nails, nuts and bolts, screws and rivets
        - hardware, including tabs, locks, rollers and hinges

© Commonwealth of Australia, 2025 Skills Insight

- tools and equipment:
  - hand tools, including hammers, screwdrivers, tape measures, squares, chisels and files
  - power tools, including power drills
  - equipment, including ladders, safety barricades, cones, signs, lifting equipment and scaffolding
- documentation requirements for installation work described in performance evidence.
-

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- non-security and security screens and grilles to be installed
- locations requiring installation specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installations in the performance evidence
- tools and equipment specified in the knowledge evidence
- workplace documentation required for installations in the performance evidence, including:
  - work orders
  - job sheets, cutting lists, plans, drawings and designs
  - legislative and workplace requirements and procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFSS3005 Assemble non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFGG2010 Fabricate and install insect and security screens

## Application

This unit of competency describes the skills and knowledge required to measure and assemble non-security and security screens and window grilles and their components. It involves following workplace procedures that comply with the requirements of industry and Australian standards.

The unit applies to those assembling non-security and security screens and grilles for residential and commercial environments. The screens and grilles may be for hinged and sliding door and window openings, and for emergency egress.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Non-security and security screens and grilles

## Elements and Performance Criteria

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| 1. Prepare to assemble non-security and security screens and grilles | 1.1 | Identify job requirements from work instructions and select work method for assembling screens and grilles |
| | 1.2 | Calculate quantity of required materials and prepare cutting list from plans, work instructions and measurements of opening to suit type of screen or grille to be installed |
| | 1.3 | Select fittings, fixings, joining devices and materials, and |

| **Elements**<br>Elements describe the essential outcomes. | **Performance Criteria**<br>Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|
| | | tools and equipment to meet job requirements |
| | 1.4 | Check safe and effective operation of tools and equipment according to manufacturer specifications |
| | 1.5 | Plan work sequence to suit job requirements and workplace procedures |
| | 1.6 | Check size, quantity, finish and profile of screen and grille components against work order |
| 2. Assemble non-security and security screens and grilles | 2.1 | Measure and mark materials according to cutting list requirements and to maximise economical use |
| | 2.2 | Cut materials according to cutting list requirements and workplace procedures |
| | 2.3 | Assemble components of screens and grilles in line with work health and safety (WHS) requirements and job requirements, industry standards and workplace procedures |
| | 2.4 | Fasten fittings to screens and grilles according to workplace procedures |
| | 2.5 | Identify and report non-routine problems to designated personnel according to workplace procedures |
| 3. Finalise assembly | 3.1 | Check that assembled product complies with quality and work instruction requirements, and rectify identified deficiencies within scope of own role |
| | 3.2 | Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures |
| | 3.3 | Identify and store surplus unused materials for re-use and recycling according to workplace procedures |
| | 3.4 | Check tools and equipment, and tag and report faulty items according to workplace procedures |
| | 3.5 | Clean and store remaining tools and equipment according to workplace procedures |
| | 3.6 | Legibly complete and process required workplace documentation according to workplace requirements |

# Assessment Requirements for MSFSS3005 Assemble non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFGG2010 Fabricate and install insect and security screens

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- prepare and assemble the following in line the requirements of industry and Australian standards and workplace procedures:
  - one hinged security screen door in a residential or commercial building
  - one sliding security screen door in a residential or commercial building
  - one fixed window grille above ground level in a residential or commercial building, demonstrating the safe and correct use of safety and lifting equipment
  - one emergency egress security screen in a residential building
  - one non-security screen in any opening or building type.

In assembling the suite of non-security and security screens and grilles, the candidate must also demonstrate the ability to:

- interpret work order and locate and use materials, tools and equipment required for the assembly
- measure for windows and doors, and identify and select product materials to be used
- correctly select component hardware and fittings required for assembly:
  - door closures
  - hinges
  - lock guards
  - guides and lock mechanisms that comply with Australian Standards
  - wheels
- assemble screen and grille frame and components, optimising materials, and cutting, tooling, drilling and crimping in compliance with Australian standards
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures and inspection procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools equipment and products
  - maintain required production output and product quality
  - use hand and power tools safely

© Commonwealth of Australia, 2025 Skills Insight

  - use personal protective equipment (PPE)
  - use and dispose of waste sustainably
- identify and resolve routine problems and faults encountered
- avoid backtracking, work flow interruptions and wastage

# Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders relating to the performance evidence, and how to identify and interpret key information
- work instruction requirements, and industry-accepted quality indicators and requirements, relating to the assembly described in performance evidence:
  - key requirements of industry and Australian standards
  - work flow requirements
  - safety considerations and potential dangers associated with incorrect assembly
  - pattern and plan to be followed in assembly
- operation of range of non-security and security screens and grilles in performance evidence
- work health and safety (WHS) procedures, practices and regulations specific to assembly described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substance
  - using personal protective equipment:
    - aprons and overalls
    - gauntlets
    - gloves
    - hard hats
    - safety footwear
    - safety glasses
- workplace procedures relating to:
  - identifying equipment, processes and procedures to use when assembling non-security and security screens and grilles
  - calculating quantities of required materials:
    - from plans and work instructions
    - by measuring screen opening
  - manual handling, including lifting and carrying
  - safely assembling screens and grilles
  - reporting non-routine problems
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines

© Commonwealth of Australia, 2025 Skills Insight

    - cleaning and storing tools and equipment
    - storing surplus unused items
    - recording and reporting assembly information
- techniques for assembling non-security and security screens and grilles described in performance evidence that include processes that:
    - conform to quality requirements
    - comply with supplier instructions and manufacturer specifications
    - maximise the appearance of the finished work
    - provide for economical use of materials and labour
- types, characteristics, terminology of, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
    - framing material and in-fill material
    - tools and equipment:
        - assembly benches
        - bolt cutters or mechanical shears
        - copy routers
        - crimpers
        - drop and up-cut saws
        - electric and pneumatic powered drills and screwdrivers
        - end millers
        - fly screen spline rollers
        - knives
        - pneumatic and manual presses
        - pop rivet guns
        - soft rubber mallets
        - stamping and notching tools
    - materials:
        - anti-jemmy protection hardware
        - corner stakes
        - extruded door framing
        - fittings, fixing and fasteners, including screws and pop rivets
        - fly mesh
        - heavy-duty security mesh
        - interlocks
- uses of non-security and security screen and grille products produced

# Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

© Commonwealth of Australia, 2025 Skills Insight

Access is required to tools, materials, equipment and specifications for the assembly work described in the performance evidence above, including:

- non-security and security screens, grilles and work areas specified in the performance evidence requiring assembly
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- materials required in the assembly of screens and grilles:
  - aluminium or other framing material
  - aluminium or other sheeting
  - fittings, fixing and fasteners
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each assembly, including:
  - work orders, customer orders, job cards and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications

|---|---|
| Release 2 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0. |
| Release 1 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0. |

## Application

This unit of competency describes the skills and knowledge required to install metal structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Landscape (LSC)

# Assessment Requirements for AHCLSC308 Install metal structures and features

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0. |
| Release 1 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0. |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes.

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for metal structures and their construction methods.

# AHCLSC321 Install metal structures and features

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0. |

## Application

This unit of competency describes the skills and knowledge required to install metal structures and features as a component of landscape project works, including preparing for work, setting out site, preparing and cutting metal components, assembling and erecting structure, checking and cleaning up site.

The unit applies to individuals who install metal structures and features under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Landscape (LSC)

## Elements and Performance Criteria

# Assessment Requirements for AHCLSC321 Install metal structures and features

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0. |

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed metal structures or features on at least two occasions and has:

- interpreted site plans and specifications
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- estimated quantities
- selected, used and maintained tools and equipment required for installation of metal structures and features
- planned and prepared metal structures and features using site plans and specifications
- marked out a site for metal structures and features according to design drawings and specifications
- used surveying instruments
- established levels and prepare footings
- excavated footings
- measured and marked lengths of metal components
- used power tools efficiently and safely
- fixed, joined or assembled metal components
- applied surface finishes
- checked quality of work and cleaned up site
- reported unserviceable tools and equipment.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of installing metal structures and features, including:

© Commonwealth of Australia, 2025 Skills Insight

    - levelling principles and techniques
    - footings for metal structures and their construction methods
    - metal structure and component fixing, cutting, joining and assembly methods and hardware products
    - use of hand and power tools relevant to metal structures and features
    - surface finishes
- workplace requirements applicable to health and safety in the workplace for installation of metal structures and features, including appropriate use of PPE.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
    - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
    - workplace procedures applicable to installing metal structures and features
    - materials, tools and equipment applicable to installing metal structures and features
    - PPE applicable to installing metal structures and features
- specifications:
    - workplace requirements applicable to health and safety in the workplace for installing metal structures and features
    - site plans, design drawings and specifications applicable to installing metal structures and features
- timeframes:
    - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBADM311 Maintain business resources

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to determine, administer and maintain resources and equipment to complete a variety of tasks.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of business resources and their basic maintenance to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Administration – General Administration

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Advise on resource requirements | 1.1 Calculate estimates of future and present business resource needs in accordance with organisational requirements<br>1.2 Ensure advice is clear, concise and relevant to achieve organisational requirements<br>1.3 Provide information on the most economical and effective choice of equipment, materials and suppliers |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Identify resource shortages and possible impact on operations |
| 2 Monitor resource usage and maintenance | 2.1 Ensure resource handling is in accordance with established organisational requirements including occupational health and safety requirements<br>2.2 Use business technology to monitor and identify the effective use of resources<br>2.3 Use consultation with individuals and teams to facilitate effective decision-making on the appropriate allocation of resources<br>2.4 Identify and adhere to relevant policies regarding resource use in the performance of operational tasks<br>2.5 Routinely monitor and compare resource usage with estimated requirements in budget plans |
| 3 Acquire resources | 3.1 Ensure acquisition and storage of resources is in accordance with organisational requirements, is cost effective, and consistent with organisational timelines<br>3.2 Acquire resources within available timelines to meet identified requirements<br>3.3 Review resource acquisition processes to identify improvements in future resource acquisitions |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 2.4, 2.5, 3.3 | • Identifies and interprets information from a range of sources, including organisational policies and procedures |
| Writing | 1.1, 1.3, 2.2, 2.5, 3.3 | • Uses clear and succinct language and appropriate layout to provide information, advice and support materials |
| Oral Communication | 1.2, 1.3, 2.3 | • Presents information or advice choosing language appropriate to the context and needs of the audience<br>• Uses active listening and questioning to confirm |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | understanding |
| Numeracy | 1.1, 1.3, 1.4, 2.2, 2.4, 2.5, 3.1-3.3 | • Selects and uses appropriate tools to aid with estimation and other resource assessment requirements<br>• Uses a combination of mainly informal and some formal written mathematical equations to represent the outcomes of the resource allocation process |
| Navigate the world of work | 1.1, 1.2, 2.1, 2.4, 3.1, 3.2 | • Takes some personal responsibility for adherence to organisational procedures and protocols |
| Interact with others | 2.3 | • Uses collaborative techniques to engage personnel in consultations and negotiations |
| Get the work done | 1.1, 1.3, 1.4, 2.2, 2.5, 3.3 | • Plans a range of routine tasks and required resources, accepting goals and aiming to achieve them within allocated timeframes<br>• Recognises and takes responsibility for addressing predictable problems in familiar work contexts<br>• Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role<br>• Understands the purpose and some specific functions of some common digital tools used in work contexts<br>• Evaluates effectiveness of decisions in terms of how well they met stated goals |

# Assessment Requirements for BSBADM311 Maintain business resources

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- collect and record data on resource use
- observe resource use over defined and operational timeframes
- perform routine resource maintenance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the key provisions of relevant legislation
- identify the organisational resource acquisition policies, plans and procedures
- identify the organisational procedures for record keeping/filing systems, security and safe recording practices.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCRT311 Apply critical thinking skills in a team environment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes skills and knowledge required to apply critical thinking skills to generate solutions to workplace problems in a team environment.

The unit applies to individuals who are required to develop and extend their critical and creative thinking skills to different issues and situations. These individuals apply a range of problem solving, evaluation and analytical skills resolve workplace issues within a team context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to address workplace problem | 1.1 Identify and select workplace problem to address within scope of job role of team members<br>1.2 Identify organisational and legislative frameworks applicable to selected problem<br>1.3 Develop questions to identify key issues and challenges of selected problem<br>1.4 Consult key stakeholders using questions to gather information on selected problem |
| 2. Evaluate solutions for workplace problem | 2.1 Identify a range of critical thinking techniques to generate solutions to selected problem |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Develop solutions using knowledge and experience of team members<br>2.3 Explain development process for individual solutions generated to team members<br>2.4 Apply agreed criteria for selecting most suitable option in consultation with team members<br>2.5 Critically evaluate solutions generated and select solution to be implemented |
| 3. Finalise and review solution development process | 3.1 Present solution to relevant stakeholders with explanation of critical thinking processes involved<br>3.2 Respond to challenges and questions from stakeholders<br>3.3 Evaluate critical thinking processes with team members and using feedback received<br>3.4 Identify critical thinking learnings to apply to individual and team situations |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| Skill | Description |
|---|---|
| Learning | • Uses questioning as a strategy to expand knowledge<br>• Reflects on existing thinking and current practices to generate new ideas |
| Oral communication | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |
| Reading | • Comprehends textual information and integrates ideas and concepts from various sources |
| Writing | • Documents observations and experiences related to problem solving |
| Teamwork | • Collaborates with others to test, strengthen and explore new ideas and different ways of thinking |

# Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBCRT301 Develop and extend critical and creative thinking skills.

# Assessment Requirements for BSBCRT311 Apply critical thinking skills in a team environment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- generate and present solutions to a workplace problem on at least two occasions.

In the course of the above, the candidate must:

- identify and analyse workplace problems as part of a team
- develop questions on key challenges of a chosen problem
- consult relevant stakeholders to gather information on workplace problem
- use a range of creative thinking techniques as part of a team to generate ideas or responses to questions or issues
- use critical thinking processes to develop relevant questions and criteria for identified workplace issue
- present to relevant stakeholders and respond to answers
- assess feedback to identify key personal and team learnings.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and legislative frameworks
- advantages of different perspectives when asking questions
- critical thinking techniques
- applicable criteria to assess potential solutions to workplace issue
- boundaries to be considered when generating ideas and responses
- methods to develop individual critical and creative thinking skills.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to specific challenges and situations to which critical and creative thinking may be applied to workplace problems as part of a team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBCRT412 Articulate, present and debate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to articulate, present and debate ideas in a work or broader life context using creative techniques in order to provoke response, reaction and critical discussion.

The unit applies to individuals who contribute and present ideas that may be complex in nature and may relate to new products, services, processes or creative works. These individuals are required to communicate ideas persuasively.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish framework for communication | 1.1 Assess purpose of, and audience for communication according to task requirements<br>1.2 Evaluate advantages and disadvantages of various methods of communication according to task requirements<br>1.3 Research organisational or legislative frameworks applicable to communication |
| 2. Develop ideas for communication | 2.1 Assess persuasive communication techniques against objectives of communication<br>2.2 Identify specific ways to provoke and encourage response in individuals or groups in consultation with others |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Consider potential communication challenges and strategies for mitigation<br>2.4 Research and document selected key ideas for presentation according to objectives of communication |
| 3. Debate and discuss ideas | 3.1 Present substantiated communication to audience<br>3.2 Facilitate conversations that challenge existing, and explore new, approaches to idea generation<br>3.3 Respond to questions about communication with relevant information<br>3.4 Use feedback to refine communication |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| Skill | Description |
|---|---|
| Oral communication | • Articulates ideas and requirements clearly and creatively using techniques appropriate to audience and environment<br>• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning<br>• Uses a range of persuasive responses and makes comparisons which show an understanding of topics and concepts |
| Writing | • Presents clearly written formats, drawing on a range of communication practices to achieve goals |
| Initiative and enterprise | • Identifies opportunities to develop and apply new ideas and select ideas for implementation<br>• Identifies key themes and ideas to be explored and identifies ways to respond to and use diverse perspectives |
| Technology | • Uses features and functions of digital tools and technologies to store and present information |

| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop, refine and implement a solution to address a workplace issue on at least one occasion.

In the course of the above, the candidate must:

- consult with stakeholders to identify workplace issue to be addressed within scope of job role and organisational policy
- generate potential ideas that provide innovative solutions to identified issues
- evaluate viability of ideas
- present ideas and information to others and reflect on responses
- refine chosen solution in response to feedback.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques to generate innovative solutions to issues
- existing products, programs, processes or services to address selected issue
- factors affecting viability of possible solutions including:
  - commercial potential
  - suitability for the target audience or purpose
  - feasibility of implementing solution
- issues and requirements to commercialise the concept
- practical and operational issues to be considered in specific work or community context
- practical and operational issues that determine whether a concept can be implemented
- techniques for generating creative ideas and solutions, and for translating them into workable concepts.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- background information required to evaluate the operational factors that will affect the implementation of concepts
- opportunities to collaborate with others throughout the concept development process.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBCUE304 Provide sales solutions to customers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to process sales enquiries requiring complex solutions, and to follow up to ensure customer satisfaction.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgement and relevant theoretical knowledge, and who may provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Stakeholder Relations – Customer Engagement

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify customer needs | 1.1 Question customers in detail and listen actively to determine product and service requirements<br>1.2 Verify and agree customer needs with customer<br>1.3 Access existing customer records and offer technical and specialist advice to customer, where such advice is considered beneficial to closing of the sale and customer understanding and decision-making |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Identify customer's financial limitations<br>1.5 Discuss estimates and quotes with team and specialist staff if necessary, prior to submission to customer |
| 2 Respond to customer needs | 2.1 Prepare, present and discuss estimates and quotes with customer, as role permits<br>2.2 Fully explain benefits of various options and pricing structures to customer<br>2.3 Give customer opportunity to question options and quotes provided<br>2.4 Promote advantages of dealing with the organisation<br>2.5 Manage customer objections effectively by promoting specific benefits |
| 3 Close sales | 3.1 Agree on product or service to be purchased with customer<br>3.2 Establish customer's preferred purchase and payment arrangements<br>3.3 Finalise documentation relating to sale and forward to customer for agreement and signature<br>3.4 Negotiate and arrange payment method with customer<br>3.5 Conduct appropriate credit checks<br>3.6 Clearly record delivery/installation arrangements as agreed with customer<br>3.7 Comply with relevant legislation, codes, regulations and standards during engagement and sale |
| 4 Input sales records | 4.1 Fully record details of sale<br>4.2 Amend existing customer records where appropriate<br>4.3 Initiate invoices according to organisational policy<br>4.4 Organise delivery/installation according to organisational policy |
| 5 Provide sales support where required | 5.1 Verify customer satisfaction after delivery/installation<br>5.2 Identify additional action to satisfy customer needs<br>5.3 Initiate action in an efficient and timely manner |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3 | • Recognises and interprets textual information from relevant sources to determine customer requirements |
| Writing | 3.3, 3.6, 4.1-4.3 | • Prepares specific information, in formats required by organisation, to conduct and close sales |
| Oral Communication | 1.1-1.3, 2.1-2.3, 3.1, 3.2, 3.4, 3.6, 5.1 | • Articulates clearly using specific and relevant language suitable to audience to convey requirements, and listening and questioning to confirm understanding<br>• Elicits views and opinions of others by listening and questioning |
| Numeracy | 1.4, 2.1, 2.2, 3.4, 3.5 | • Interprets numerical information and applies basic mathematical calculations relating to estimates and quotes<br>• Extracts, evaluates and compares numerical information |
| Navigate the world of work | 3.7, 4.4 | • Takes personal responsibility for adherence to legal/regulatory requirements and organisational policy in planning and undertaking work |
| Interact with others | 1.1-1.5, 2.1-2.5, 3.1, 3.2, 3.4, 5.1, 5.2 | • Selects and uses appropriate conventions and protocols when communicating with customers and relevant authorities<br>• Recognises importance of establishing rapport to engage customers and provide effective service solutions in complex situations |
| Get the work done | 1.3, 2.1, 3.3, 3.5, 3.6, 4.1-4.4, 5.1-5.3 | • Plans and implements customer sales tasks, accepting stated goals and aiming to achieve them efficiently<br>• Uses systematic, analytical processes to gather relevant credit information<br>• Recognises and takes responsibility for anticipating and addressing predictable problems to achieve customer satisfaction promptly<br>• Uses familiar digital systems and tools to access, organise, analyse, record and display information relevant to customer sales activities |

# Assessment Requirements for BSBCUE304 Provide sales solutions to customers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- recommend product or service to match customer need with a clear explanation of price and payment options
- apply appropriate credit checks
- organise customer payment and delivery details
- record sales, payments and delivery arrangements
- provide after sales service.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain estimate and quote procedures
- outline marketing and sales principles and practices
- identify organisational pricing policies
- identify organisational protocols associated with customer service and sales
- identify statutory, regulatory and legislative requirements related to providing sales solutions to customers.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- relevant standards, guidelines and legislation, workplace information and data
- relevant office resources and equipment

© Commonwealth of Australia, 2025 Skills Insight

- a work environment or simulated customer contact centre to observe interaction with customers.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCUS301 Deliver and monitor a service to customers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Stakeholder Relations – Customer Service

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify customer needs | 1.1 Use appropriate interpersonal skills to accurately identify and clarify customer needs and expectations<br>1.2 Assess customer needs for urgency to determine priorities for service delivery according to organisational and legislative requirements<br>1.3 Use effective communication to inform customers about available choices for meeting their needs and assist in the selection |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | of preferred options<br>1.4 Identify limitations in addressing customer needs and seek appropriate assistance from designated individuals |
| 2 Deliver a service to customers | 2.1 Provide prompt service to customers to meet identified needs in accordance with organisational and legislative requirements<br>2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery<br>2.3 Sensitively and courteously handle customer complaints in accordance with organisational and legislative requirements<br>2.4 Provide assistance or respond to customers with specific needs according to organisational and legislative requirements<br>2.5 Identify and use available opportunities to promote and enhance services and products to customers |
| 3 Monitor and report on service delivery | 3.1 Regularly review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements<br>3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational and legislative requirements<br>3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements<br>3.4 Regularly seek customer feedback and use to improve the provision of products and services<br>3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2 2.1, 2.3, 2.4, 3.1, 3.5 | • Comprehends textual information to determine customer service requirements<br>• Proofreads texts for clarity of meaning and accuracy of grammar and punctuation |

# Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use communication skills to establish rapport and build relationships with customers in accordance with organisational requirements
- identify customer needs using appropriate questioning and active listening skills
- provide customer service in accordance with organisational requirements
- respond to and record customer feedback and action taken according to organisational standards, policies and procedures
- produce a report which identifies and recommends ways to improve service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise key provisions of relevant legislation from all levels of government that may affect aspects of business operations
- explain organisational policy and procedures for customer service, including handling customer complaints
- provide examples of verifiable evidence that could be used to review customer satisfaction
- outline the interpersonal skills needed for serving customers, including customers with specific needs.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service
- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCUS402 Address customer needs

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0<br><br>Version created to clarify assessment conditions |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Stakeholder Relations – Customer Service

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Assist customer to articulate needs | 1.1 Ensure customer needs are fully explored, understood and agreed<br>1.2 Explain and match available services and products to customer |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | needs<br>1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate |
| 2 Satisfy complex customer needs | 2.1 Explain possibilities for meeting customer needs<br>2.2 Assist customers to evaluate service and/or product options to satisfy their needs<br>2.3 Determine and prioritise preferred actions<br>2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner |
| 3 Manage networks to ensure customer needs are addressed | 3.1 Establish effective regular communication with customers<br>3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation<br>3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available<br>3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services<br>3.5 Maintain records of customer interaction in accordance with organisational procedures |

# Assessment Requirements for BSBDES302 Explore and apply the creative design process to 2D forms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce a range of samples or concept realisations which demonstrate creative thinking techniques and experimentation processes based on available resource materials
- review own work to determine future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify creative thinking techniques that can be used as part of the design process
- describe the elements and principles of design as applied to two-dimensional (2D) forms
- list materials, tools and equipment required for the design of 2D forms in the relevant work context
- describe the notion of individual interpretation and choice within the design process
- explain the particular challenges that may arise in the design of 2D forms.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to the materials, resources and equipment needed to apply design processes to 2D forms.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBDES303 Explore and apply the creative design process to 3D forms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce a range of samples or concept realisations which demonstrate creative thinking techniques and experimentation processes based on available resource materials for three-dimensional (3D) forms
- review own work to determine future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify creative thinking techniques that can be used as part of the design process
- describe the elements and principles of design as applied to 3D forms
- list materials, tools and equipment required for the design of 3D forms in the relevant work context
- describe the notion of individual interpretation and choice within the design process
- explain the particular challenges and issues in the design of 3D forms
- outline the relationships between form and space.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to the materials, resources and equipment needed to apply design processes to 3D forms.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES502 Establish, negotiate and refine a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Establish design requirements | 1.1 Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client<br>1.2 Identify and source information and references relevant to the design project<br>1.3 Undertake critical analysis of sources and extract key information to inform the design project |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project<br>1.5 Proactively seek, review and act on information needed to inform constructive communication with client<br>1.6 Build trust and respect between self and client through effective communication and demonstration of professional integrity |
| 2 Develop and refine design brief | 2.1 Develop concepts and ideas for inclusion in design brief, taking account of overall objectives and parameters<br>2.2 Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs<br>2.3 Present ideas in an appropriate format/medium and seek feedback from key stakeholders<br>2.4 Use effective communication techniques to generate discussion, debate and critical analysis<br>2.5 Re-evaluate and refine options based on own analysis and discourse with others<br>2.6 Establish and agree on final nature and scope of design brief with client and accurately document details |
| 3 Negotiate terms and conditions | 3.1 Negotiate and agree terms and conditions of brief in accordance with relevant organisational and professional standards<br>3.2 Clarify, agree and document roles and responsibilities of those involved in the project<br>3.3 Confirm agreements in writing in accordance with organisational requirements<br>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek appropriate assistance |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.3, 2.2, 2.5 | • Identifies and interprets textual information from |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | various sources to develop ideas and concepts |
| Writing | 1.1, 1.3-1.5, 2.1-2.3, 2.6, 3.1-3.3 | • Develops a range of documents using appropriate vocabulary, context and formatting for different audiences |
| Oral Communication | 1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.2 | • Participates in discussions to elicit views of others by asking questions and listening to responses<br>• Presents ideas and seeks feedback from others using appropriate tone, vocabulary and language structures |
| Numeracy | 1.2-1.4 | • Interprets and applies numeric information relevant to design brief |
| Navigate the world of work | 1.2, 1.3, 3.1, 3.3, 3.4 | • Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and design of design solution |
| Interact with others | 1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.4 | • Uses appropriate communication conventions and protocols to seek information from stakeholders<br>• Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others |
| Get the work done | 1.1-1.3, 1.5, 2.1, 2.2, 2.5, 3.2 | • Sequences and schedules complex activities, monitors implementation, and manages relevant communication<br>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process<br>• Makes a range of critical and non-critical decisions in relatively complex situations, taking client and organisational requirements and possible constraints into account<br>• Generates new or innovative ideas or concepts through exploration, analysis and critical thinking |

# Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

| | |
|---|---|
| Information and references relevant to the design brief must include consideration of: | • legislative and regulatory context<br>• financial/budgetary information<br>• organisational materials<br>• technical reports/data. |

# Assessment Requirements for BSBDES502 Establish, negotiate and refine a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop and finalise at least TWO design briefs for a specific industry purpose
- demonstrate highly-developed interpersonal skills, self-evaluation techniques and the ability to seek expert advice when required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the legal issues that affect negotiations and contracts in the relevant work context
- explain the design process within the specific industry context/design discipline
- compare and contrast the scope, nature and potential variations that occur within design briefs relevant to a specific context
- identify sources of information to assist the development of design concepts within a specific industry context.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- appropriate equipment and media to communicate and present ideas and concepts
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES601 Manage design realisation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage the process of taking a design from concept to final realisation or production. It has a strong focus on planning, implementation and monitoring skills, combined with a sound knowledge of design and production issues and challenges in a given context.

It applies to individuals working in any industry context or design discipline who take responsibility for turning design concept into reality – a product or service of value to the end-user. This person could be an individual designer-maker or a designer working as part of a larger design/production team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Plan realisation of design | 1.1 Collect, analyse and maintain relevant information on the design<br>1.2 Discuss and agree on standards of work and monitoring requirements with appropriate stakeholders<br>1.3 Develop clear plan and schedule for design realisation, |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | including key roles and responsibilities linked to timelines and budget |
| 2 Implement and monitor realisation of design | 2.1 Organise and/or allocate resources to achieve realisation of design within required standards, timeframes and budget<br>2.2 Liaise with others involved in design realisation to ensure obligations and quality standards are met within time, budget and technical resources<br>2.3 Maintain accurate, relevant and complete documentation in accordance with agreed standards<br>2.4 Monitor process to ensure integrity of design is maintained at all times, including through the process of challenging and interrogating own design work<br>2.5 Promptly identify difficulties or problems that arise in relation to realisation of design and take action to rectify situation |
| 3 Liaise and negotiate with stakeholders | 3.1 Establish and maintain appropriate communication channels with relevant stakeholders<br>3.2 Proactively seek and provide information to facilitate effective design realisation<br>3.3 Adhere to agreed terms and conditions or negotiate appropriate changes in light of changed circumstances<br>3.4 Negotiate and agree on revisions with relevant parties in a professional manner, to enhance quality of outcome |
| 4 Complete design process | 4.1 Finalise design outcomes in accordance with terms and conditions<br>4.2 Seek feedback from key stakeholders on finished design and make final adjustments as agreed<br>4.3 Evaluate completed design in relation to own work and overall process, to inform future practice |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Reading | 1.1, 2.3 | • Collates and analyses textual information from a range of sources relevant to the design realisation |
| Writing | 2.3, 3.1, 3.2, 4.3 | • Produces documentation using appropriate structure, language and context to articulate own ideas and positions |
| Oral Communication | 1.2, 3.2-3.4, 4.2 | • Articulates clearly using specific language and appropriate tone to convey information<br>• Uses active questioning and listening techniques to confirm understanding |
| Numeracy | 1.3, 2.1 | • Interprets and uses numeric information in budgets and to determine work schedules |
| Navigate the world of work | 2.3, 3.3, 4.1 | • Works independently and collectively within broad parameters, with a strong sense of responsibility and ownership of plans, decisions and outcomes<br>• Adheres to organisational policies and procedures |
| Interact with others | 1.2, 2.2, 3.1, 3.2, 3.4 | • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how<br>• Fosters a collaborative culture within own sphere of influence, facilitating a sense of cohesion and commitment |
| Get the work done | 1.1, 1.3, 2.1, 2.4, 2.5 | • Takes responsibility for planning and organising tasks to meet workplace deadlines, including those tasks that require liaison with other people<br>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the design process<br>• Uses each experience to reflect on how variables impact outcomes to inform future practices |

# Assessment Requirements for BSBDES601 Manage design realisation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce a design according to all brief requirements
- demonstrate highly-developed interpersonal and negotiation skills to deliver the finished product.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key responsibilities of relevant personnel in this context
- describe best practices when dealing with setbacks in the production process
- explain production processes in a particular industry context or discipline including required materials, tools and equipment.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- resources, tools, materials and equipment required for realising a design in a specific context
- a design concept that the candidate can take to realisation stage
- other people to reflect the collaborative nature of the work.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBESB303 Organise finances for new business ventures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to estimate start-up costs, financial viability and projected cash flow and budget for a new business venture. It involves assessing the need to access required finances based on calculations and estimates undertaken.

The unit applies to those establishing a business providing self-employment, as well as those establishing a new venture as part of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Business Competence – Entrepreneurship and Small Business

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to organise finances for new business venture | 1.1 Establish current financial situation, showing funds available and commitments already incurred<br>1.2 Identify equity finance and assets from available sources<br>1.3 Identify business mix and forecast expected business activity over a year |
| 2. Determine required finances for new business venture | 2.1 Estimate start-up costs for business venture according to established business activities<br>2.2 Estimate income and expenses for first year of operation<br>2.3 Project cash flow for first year of operation<br>2.4 Seek specialist financial advice as required according to |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | workplace procedures<br>2.5 Record cash flow and budget and required finances |
| 3. Plan to access finances for new business venture | 3.1 Investigate and source suitable types of finances<br>3.2 Establish methods of accessing finances and servicing any repayment schedule<br>3.3 Complete required documentation |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| Skill | Description |
|---|---|
| Reading | • Gathers, interprets and analyses a variety of textual information from a range of sources and identifies relevant and key information |
| Writing | • Uses information and industry-related terminology to complete required workplace documentation |
| Oral Communication | • Uses listening and questioning techniques to seek information and confirm understanding |
| Numeracy | • Analyses numerical information to complete required calculations and estimates |
| Initiative and enterprise | • Seeks input and expert advice when decisions involve unfamiliar issues<br>• Determines priorities and sequences steps involved in clearly defined familiar tasks, and identifies and assembles resources required |
| Technology | • Uses main features and functions of digital tools to complete work tasks and access information |

# Unit Mapping Information

Supersedes and is equivalent to BSBSMB303 Organise finances for the micro business.

# Assessment Requirements for BSBESB303 Organise finances for new business ventures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- organise finances for at least one new business venture.

In the course of the above, the candidate must:

- investigate financial position, commitments and needs
- determine projected cash flow and budget for business venture
- estimate finances needed to establish and operate the business venture.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sources of specialist financial advice relating to new business ventures, including Australian Taxation office (ATO)
- accounting software for use in the business venture described in performance evidence
- key financial terminology relevant to new business ventures
- relationship between finances and sales and marketing strategies
- workplace procedures for:
  - costing or pricing and preparing financial forecasts
  - estimating start-up costs, including cost of expenses and assets
  - seeking specialist financial advice
- income and costs to be considered when estimating operating budget, including:
  - monthly variable and fixed costs required for business activity
  - drawings needed for business venture to be financially viable
  - monthly income generated by business venture based on price per unit item or hourly charge rate for labour
  - goods and services tax

© Commonwealth of Australia, 2025 Skills Insight

- operating finance required for business.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business technology, including internet access
- finance documentation and resources relating to business described in performance evidence
- sources of specialist advice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBESB305 Address compliance requirements for new business ventures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to source advice and specialist services to assist in addressing business compliance relating to regulatory, taxation and insurance requirements.

The unit applies to those establishing a business providing self-employment, as well as those establishing a new venture as part of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Business Competence – Entrepreneurship and Small Business

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research compliance requirements of new business venture | 1.1 Identify regulatory, taxation and insurance requirements relevant to new business venture<br>1.2 Access information that assists in interpreting and explaining identified compliance requirements<br>1.3 Research relationships between legislation, regulations, codes of practice, associated standards and accessed information to determine compliance requirements of the business venture |
| 2. Seek specialist advice on compliance and risk minimisation | 2.1 Identify sources of specialist advice and services relevant to identified compliance requirements and business venture profile<br>2.2 Select and access identified specialist advice and services |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | according to business needs, available resources, and workplace procedures<br>2.3 Clarify and confirm compliance requirements and their appropriateness for business, and risk minimisation needs with advisors<br>2.4 Review and document advice and procedures |
| 3. Take action to support business compliance | 3.1 Arrange insurance cover for the business according to business needs, available resources, and workplace procedures<br>3.2 Implement compliance procedures according to specialist advice received<br>3.3 Seek feedback on implemented compliance procedures from required personnel |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| Skill | Description |
|---|---|
| Reading | • Identifies and interprets legislative and regulatory information relevant to business requirements |
| Oral communication | • Articulates clearly using specific and relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding |
| Numeracy | • Analyses numerical information to calculate specific business requirements<br>• Uses formal and informal mathematical language to discuss compliance |
| Self-management | • Takes some personal responsibility for ensuring business compliance with legal and regulatory requirements |
| Planning and organising | • Plans routine tasks with goals and outcomes, taking some responsibility for decisions regarding sequencing and timing<br>• Determines priorities and sequences steps involved in clearly defined tasks, and identifies and assembles resources required |

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Requirements for BSBESB305 Address compliance requirements for new business ventures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement procedures to address at least two different compliance requirements for a business or new business venture.

In the course of the above, the candidate must:

- identify, select and access sources of advice on compliance and risk minimisation procedures
- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- regulatory, taxation and insurance compliance information, and specialist advice and services in relation to operation of new business ventures, including:
  - industry codes of practice and standards
  - registration and licensing
  - work health and safety (WHS) requirements and responsibilities
  - required insurances
- workplace procedures that support compliance of new business venture, including for:
  - selecting and accessing specialist advice and services
  - arranging business insurance cover
- key components of compliance procedures:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance

© Commonwealth of Australia, 2025 Skills Insight

- monitoring provision of products and/or services
- taking corrective action where necessary.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business technology, including internet access for research
- legislation, regulations, codes of practice and standards relating to compliance requirements described in performance evidence
- workplace procedures and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | objectives and market needs<br>2.5 Analyse draft plan and identify, assess and prioritise internal and external risks according to workplace procedures<br>2.6 Research specialist services and sources of advice and cost according to available resources |
| 3. Create a business plan | 3.1 Identify costs associated with production and delivery of business products and/or services<br>3.2 Calculate prices based on costs and profit targets, as a charge-out rate for labour or unit price for products and/or services<br>3.3 Prepare cash flow projections to enable business operation according to business plan and legal requirements<br>3.4 Select budget targets to enable ongoing monitoring of financial performance<br>3.5 Identify sources of finance for required liquidity according to business goals and objectives and workplace procedures |
| 4. Finalise business planning and plan for risk | 4.1 Develop risk management strategies according to business goals and objectives, and legal and compliance requirements, and established business activities<br>4.2 Assess likelihood of non-conformance with each component of business plan<br>4.3 Develop a contingency plan to address possible areas of non-conformance according to workplace procedures<br>4.4 Identify specific interests and objectives of key stakeholders and confirm their support of planning outcomes |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| Skill | Description |
|---|---|
| Reading | • Identifies, analyses and evaluates information during planning process |
| Writing | • Prepares written documentation that communicates plan information clearly and effectively |
| Numeracy | • Interprets numerical information to determine prospective markets, resource allocations and business profits/losses |
| Self-management | • Identifies implications of legal and compliance requirements related to own work |

© Commonwealth of Australia, 2025 Skills Insight

| Skill | Description |
|---|---|
| | • Makes a range of critical and non-critical decisions, taking a range of constraints into account |
| Planning and organising | • Uses a combination of formal, logical planning processes to identify relevant information and to evaluate alternative strategies or methods |

# Unit Mapping Information

Supersedes and is equivalent to BSBSMB404 Undertake small business planning.

Supersedes but is not equivalent to:

- BSBSMB415 Refine and strengthen a small business
- BSBSMB422 Plan small business growth.

# Assessment Requirements for BSBESB401 Research and develop business plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least one business plan that addresses the goals and objectives of a business or business venture.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legal and compliance requirements relating to business operation to be included in plan, including:
  - environmental
  - work health and safety (WHS), including WHS responsibilities and procedures for identifying hazards relating to business profile
  - equal opportunity
  - industrial relations
- types of business planning, including:
  - feasibility studies
  - strategic, operational, financial and marketing planning
- factors affecting structure of business plan, including:
  - purpose of plan
  - target audience
  - desired outcomes
- key components of business plan, including:
  - sources and costs of finance to provide required liquidity and profitability for business
  - marketing strategies and methods to promote market exposure of business
  - methods or means of production or operation required for business

© Commonwealth of Australia, 2025 Skills Insight

  - staffing requirements to effectively produce or deliver products and services
  - contingency plan
- methodology for researching and preparing a business plan
- common business risks and risk management strategies
- workplace procedures for:
  - assessing and prioritising internal and external risks to business
  - establishing resource requirements aligned to business goals and objectives, including for calculating staffing requirements to produce or deliver products and/or services
  - developing a business contingency plan for unexpected events and situations

# Assessment Requirements for BSBESB402 Establish legal and risk management requirements of new business ventures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish legal and risk management requirements for at least one business or new business venture, and implement procedures for meeting them
- create at least one contract with a supplier of goods or services to business or new business venture
- identify, assess and treat at least three different risks specific to business or new business venture and prioritise risks with highest probability of occurrence and greatest negative impact.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory requirements relating to operation of new business ventures, including:
  - consumer legislation
  - environmental requirements and responsibilities
  - registration and licensing
  - industry codes of practice and standards
  - work health and safety (WHS) requirements and responsibilities
  - insurance products and requirements, including adequate coverage
- workplace procedures for:
  - negotiating, creating and terminating contractual arrangements, including seeking legal advice
  - investigating and securing procurement rights relating to products and/or services
  - identifying options for leasing or owning business premises
- legal rights and obligations of alternative ownership structures

© Commonwealth of Australia, 2025 Skills Insight

- key features of workplace record-keeping processes and procedures that:
  - meet minimum legal and taxation requirements
  - maintain records in a secure and accessible manner
- key components of compliance procedures:
  - following taxation and industrial relations principles and requirements
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and/or services
  - taking corrective action where necessary
- key steps in risk management process, including procedures for developing and implementing business risk treatment plan.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business technology, including internet access
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBESB407 Manage finances for new business ventures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement a financial strategy for at least one business or new business venture according to business plan and goals.

In the course of the above, the candidate must:

- adhere to legal requirements
- produce financial projections, including cash flow estimates
- develop a plan to negotiate and manage business assets and financial capital
- define strategies for debt collection and contingencies for debtors
- manage cash flow
- define key indicators for financial performance
- communicate with required people
- seek specialist services, where required
- monitor the financial performance of the business and make changes to strategy as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory financial requirements that apply to new business venture described in performance evidence
- key purposes of financial reports
- components of financial budgets or projections, including cash flow estimates
- workplace procedures for:
  - recording and communicating financial procedures to required personnel

© Commonwealth of Australia, 2025 Skills Insight

    - distributing financial budgets and projections
    - using digital technologies to monitor and report on financial performance targets and analyse data
    - assessing and changing financial plan
- forms, channels and modes of communication used in relation to managing business finances
- key features of business and industry benchmarking used to evaluate financial ratios
- key features of financial decision-making relevant to the business, including:
    - strategies that enable adequate financial provision for taxation
- components of client credit policies, including contingencies for debtors in default
- key features of significant financial indicators
- key features of balance sheet preparation and interpretation
- key features of debt collection procedures and strategies
- key features of profit and loss statement preparation and interpretation
- key features of stock records and stock control relevant to the business.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business equipment and resources, including business technology
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBFIN302 Maintain financial records

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling systems for debtors and creditors, preparing and maintaining a general ledger and trial balance. It also includes activities associated with monitoring cash control for accounting purposes.

The unit applies to individuals employed in a range of work environments with responsibility for simple accounting functions within an organisation. They may work as individuals providing administrative support within an enterprise or may be other members of staff with delegated responsibilities relating to maintenance of general financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Business Competence – Financial Literacy

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare journals required for posting to general ledger | 1.1 Identify transactions required to be included in journal entries<br>1.2 Identify general ledger accounts affected according to organisational policies, procedures and accounting standards<br>1.3 Prepare and document the journal entries according to organisational policies, procedures and accounting standards<br>1.4 Assess follow-up steps for journal entries |
| 2. Post journal entries and reconcile | 2.1 Post journal entries into general ledger system according to organisational policies, procedures and accounting standards |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| discrepancies | 2.2 Reconcile accounts payable and accounts receivable subsidiary ledger systems with general ledger<br>2.3 Rectify any discrepancies and escalate, where required if outside scope of individual authority<br>2.4 Prepare adjusted journal entries and closing entries for general ledger |
| 3. Maintain general ledger | 3.1 Prepare closing and post-closing trial balance from general ledger system of the organisation<br>3.2 Prepare trial balance<br>3.3 Check general ledger for accuracy of information and despatch to relevant stakeholders, where required<br>3.4 Check trial balance meets accounting equation requirements |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| Skill | Description |
|---|---|
| Numeracy | • Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals<br>• Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material<br>• Arranges and compares numerical information |
| Reading | • Recognises and interprets numerical and textual information to determine job requirements and complete required activities |
| Writing | • Uses factual and suitable financial language to refer issues and inconsistencies in data |
| Teamwork | • Recognises strengths and expertise of others and seeks their assistance as required |
| Planning and organising | • Identifies and monitors adherence to applicable industry standards, legislative and organisational requirements in undertaking own work |
| Self-management | • Selects appropriate practices and protocols when handling confidential information<br>• Recognises and addresses problems in the context of own work and seeks advice from others, as necessary |
| Technology | • Uses digital technologies to access, record, store, organise and |

# Assessment Requirements for BSBFIN302 Maintain financial records

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- record and process daily transactions for five different days, and identify and respond to discrepancies and errors, according to accounting principles.

In the course of the above, the candidate must:

- enter, transfer and record financial data.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of relevant legislation, codes of practice and national standards that may affect both:
  - financial record keeping
  - aspects of financial operations
- key components of organisational accounting systems and procedures
- procedures for checking for errors or discrepancies
- organisational policies and procedures relating to maintaining financial records
- types of financial entries including credits and debits
- tax records required to be kept by businesses
- principles of double entry bookkeeping and accrual accounting
- methods of presenting financial data
- processes for rectifying or referring discrepancies or errors in documentation or transactions to designated persons according to organisational and legislative requirements
- accounting software used in the maintenance of financial records.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- accounting software
- examples of source documents relating to financial record keeping including source journals and daily transactions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBFLM303 Contribute to effective workplace relationships

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to gather information and maintain effective relationships and networks, with particular regard to communication and representation.

This unit applies to individuals who use leadership skills including motivation, mentoring and coaching to develop efficient, effective and unified teams and facilitate communication between team members and management of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Frontline Management

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Seek, receive and communicate information and ideas | 1.1 Collect information associated with the achievement of work responsibilities from appropriate sources<br>1.2 Communicate ideas and information to diverse audiences in an appropriate and sensitive manner<br>1.3 Seek contributions from internal and external sources to develop and refine new ideas and approaches in accordance with organisational processes |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Facilitate consultation processes to allow employees to contribute to issues related to their work, and promptly communicate outcomes of consultation to the work team<br>1.5 Promptly deal with and resolve issues raised, or refer them to relevant personnel |
| 2 Encourage trust and confidence | 2.1 Treat people with integrity, respect and empathy<br>2.2 Encourage effective relationships within the framework of the organisation's social, ethical and business standards<br>2.3 Gain and maintain the trust and confidence of colleagues, customers and suppliers through competent performance<br>2.4 Adjust interpersonal styles and methods in relation to the organisation's social and cultural environment |
| 3 Identify and use networks and relationships | 3.1 Identify and utilise workplace networks to help build relationships<br>3.2 Identify and describe the value and benefits of networks and other work relationships for the team and the organisation |
| 4 Contribute to positive outcomes | 4.1 Identify difficulties and take action to rectify the situation within own level of responsibility according to organisational and legal requirements<br>4.2 Support colleagues in resolving work difficulties<br>4.3 Regularly review workplace outcomes and implement improvements in consultation with relevant personnel<br>4.4 Identify and resolve poor work performance within own level of responsibility and according to organisational policies<br>4.5 Deal constructively with conflict, within the organisation's established processes |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 1.4, 1.5, 4.3 | • Comprehends textual information to determine regulatory requirements and adhere to job processes |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | and internal policies |
| Writing | 1.1-1.5, 4.3, 4.4, 4.5 | • Uses appropriate language to record key information related to the outcomes of the job<br>• Varies writing style to meet requirements of audience and purpose |
| Oral Communication | 1.2-1.5, 2.1, 2.2, 2.4, 3.1, 4.2-4.5 | • Speaks clearly using tone and pace appropriate for the audience and purpose<br>• Uses appropriate techniques, including active listening and questioning, to clarify information and to confirm understanding |
| Navigate the world of work | 1.3, 2.1, 2.2, 2.4, 4.1, 4.4, 4.5 | • Takes personal responsibility for adherence to explicit and implicit organisational policies, procedures, standards and legislative requirements within own job role and in all interactions with others |
| Interact with others | 1.2, 1.3, 1.4, 1.5<br>2.1, 2.2, 2.3, 2.4<br>4.2, 4.3, 4.4, 4.5 | • Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to build rapport, establish networks, seek or share information,<br>• Adjusts personal communication style in response to a diverse range of individuals in the work context<br>• Uses collaborative techniques to engage team members in consultations and negotiations<br>• Implements strategies to respond appropriately to conflict and poor work performance |
| Get the work done | 1.1, 1.3, 1.4,1.5, 2.3, 3.1, 3.2, 4.1, 4.2, 4.3, 4.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for effective outcomes<br>• Uses formal analytical thinking techniques and broad ranging consultative processes to identify issues and implement a constructive approach to solutions and improvement opportunities<br>• Uses familiar digital technologies and systems to access, present and communicate information |

# Assessment Requirements for BSBFLM303 Contribute to effective workplace relationships

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.
- communicate ideas and information to diverse audiences
- develop networks and build team relationships.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team
- identify relevant legislation from all levels of government that affects business operation

© Commonwealth of Australia, 2025 Skills Insight

- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods
- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBFLM309 Support continuous improvement systems and processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to support the organisation's continuous improvement systems and processes. Particular emphasis is on actively encouraging the team to participate in the process, monitoring and reporting on specified outcomes and supporting opportunities for further improvements.

It applies to individuals with roles of responsibility who use initiative, organisational and communication skills to influence the ongoing development of the organisation.

At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Frontline Management

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Contribute to continuous improvement systems and processes | 1.1 Actively encourage and support team members to participate in decision-making processes and to assume responsibility and exercise initiative |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.2 Communicate the organisation's continuous improvement processes to individuals and teams<br>1.3 Effectively utilise mentoring and coaching to ensure that individuals/teams are able to support the organisation's continuous improvement processes |
| 2 Monitor and report specified outcomes | 2.1 Utilise the organisation's systems and technology to monitor team progress and to identify ways in which planning and operations could be improved<br>2.2 Apply continuous improvement techniques and processes to improve customer service |
| 3 Support opportunities for further improvement | 3.1 Communicate agreed recommendations for improvements in achieving the business plan to team members<br>3.2 Document and use work performance to identify opportunities for further improvement<br>3.3 Maintain records, reports and recommendations for improvement within the organisation's systems and processes |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.3 | • Contributes to ongoing organisational improvement by mentoring others to support continuous improvement processes |
| Reading | 2.1, 3.3 | • Interprets everyday workplace documentation |
| Writing | 1.2, 3.1-3.3 | • Uses appropriate vocabulary and grammatical structures to achieve precise meaning in a range of documentation |
| Oral Communication | 1.1-1.3, 3.1 | • Articulates information in a positive manner using appropriate terminology, tone and style appropriate to context and audience<br>• Uses questioning and listening techniques to exchange and clarify information |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Navigate the world of work | 1.2, 3.3 | • Understands the nature and purpose of own role and associated responsibilities and how own role meshes with others and contributes to broader work goals<br>• Takes responsibility for adherence to organisational processes and systems |
| Interact with others | 1.2, 1.3 | • Shares information and resources, offers assistance voluntarily and facilitates effective group interactions |
| Get the work done | 2.1, 2.2, 3.2, 3.3 | • Takes responsibility for routine low-impact decisions within familiar situations<br>• Evaluates effectiveness of decisions in terms of how well they meet stated goals<br>• Uses a range of digitally based technology and applications to organise, monitor, manage and communicate relevant information effectively |

# Assessment Requirements for BSBFLM309 Support continuous improvement systems and processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- perform actions to support continuous improvement including:
  - using work performance to identify improvement
  - adjusting plans to reflect changes
  - communicating effectively with all stakeholders
  - using technology to monitor operational progress
  - applying suitable recordkeeping processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques relating to:
  - continuous improvement systems and processes
  - benchmarking
  - best practice
- describe the benefits of continuous improvement
- list quality approaches which the organisation may implement
- explain methods that can be used in continuous improvement
- outline barriers to continuous improvement
- explain recording, reporting and recommendation processes to facilitate continuous improvement applied within the organisation.

# BSBINN201 Contribute to workplace innovation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to make a pro-active and positive contribution to workplace innovation.

It applies to individuals working in any industry or community context, in both small and large organisations who take a pro-active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, they apply discretion, judgement and effective interpersonal skills in order to contribute to workplace innovation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Creativity and Innovation – Innovation

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify opportunities to do things better | 1.1 Be aware of own role in workplace innovation<br>1.2 Proactively identify opportunities for improvement in own area of work<br>1.3 Gather and review information which may be relevant to ideas and which might assist in gaining support for ideas |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2 Discuss and develop ideas with others | 2.1 Identify people who could provide input into ideas for improvements<br>2.2 Select the best way of approaching people to begin sharing ideas<br>2.3 Seek feedback on improvement of ideas, and discuss and develop options and possible variations<br>2.4 Review and select ideas for follow up based on feedback and further review |
| 3 Address the practicalities of change | 3.1 Take action to implement routine changes in consultation with others and within scope of own responsibility<br>3.2 Identify and articulate issues and practical processes for implementing proposed ideas<br>3.3 Present ideas and practical suggestions to the appropriate people about how improvements could be made |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3, 2.4, 3.2 | • Categorises, interprets and reviews information from a range of sources to generate ideas relevant to the workplace |
| Writing | 3.2, 3.3 | • Communicates information using clear language and formats appropriate for the audience |
| Oral Communication | 2.3, 3.1, 3.2, 3.3 | • Actively participates in verbal exchanges of ideas and elicits the view and opinions of others by listening and questioning<br>• Uses clear and relevant language to clarify workplace issues and promote ideas |
| Numeracy | 1.3, 3.2 | • Performs basic mathematical calculations to estimate time and cost in relation to implementation of ideas |
| Navigate the world of work | 1.1, 1.2, 3.1 | • Understands responsibilities of own role |
| Interact with | 2.3, 3.1-3.3 | • Follows accepted communication practices and protocols when discussing or presenting ideas to others |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| others | | • Seeks and takes into account perspectives and opinions of others |
| Get the work done | 1.2, 1.3, 2.1, 2.2, 2.4, 3.1-3.3 | • Plans and implements routine tasks making limited decisions and seeking assistance, when necessary<br>• Uses analytical or lateral thinking processes to identify improvements or new ways of approaching tasks<br>• Identifies and anticipates operational problems and develops possible solutions |

# Assessment Requirements for BSBINN201 Contribute to workplace innovation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify ideas for improvements and use information from a range of sources including other people to review and select ideas to put forward for implementation
- communicate the ideas and seek input from others in order to identify how the ideas could be implemented
- implement routine changes within scope of responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the role of individuals in suggesting and making improvements and the importance of pro-active involvement
- list the positive impacts and the challenges of change and innovation
- provide examples of the types of changes that can occur as a result of effective individual participation within own scope of responsibility
- give examples of the types of changes that are within and outside own scope of responsibility
- list typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- explain how to prepare and communicate ideas for improvement to maximise likelihood of support.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBITU306 Design and produce business documents

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Information and Communications Technology – IT Use

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select and prepare resources | 1.1 Select and use appropriate technology and software applications to produce required business documents<br>1.2 Select layout and style of publication according to information and organisational requirements<br>1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Discuss and clarify format and style with person requesting document/publication |
| 2. Design document | 2.1 Identify, open and generate files and records according to task and organisational requirements<br>2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information<br>2.3 Use a range of functions to ensure consistency of design and layout<br>2.4 Operate input devices within designated requirements |
| 3. Produce document | 3.1 Complete document production within designated timelines according to organisational requirements<br>3.2 Check document produced to ensure it meets task requirements for style and layout<br>3.3 Store document appropriately and save document to avoid loss of data<br>3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production |
| 4. Finalise document | 4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output<br>4.2 Make any modifications to document to meet requirements<br>4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage<br>4.4 Print and present document according to requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1, 2.2, 3.2, 3.4, 4.1 | • Recognises and interprets textual information from a range of sources to determine and adhere to requirements<br>• Applies strategies to self-correct and verify clarity and conformity of information |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Writing | 2.2, 2.3, 3.1, 4.2, 4.3 | • Develops documents using required format, accurate spelling and grammar and terminology specific to requirements<br>• Organises content to support purposes and audience of material, using clear and logical language |
| Oral Communication | 1.4 | • Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques |
| Navigate the world of work | 1.2, 1.3, 2.1, 2.4, 3.1, 3.2, 4.2-4.4 | • Recognises and follows explicit and implicit protocols and meets expectations associated with own role |
| Interact with others | 1.4 | • Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts |
| Get the work done | 1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4 | • Uses basic features and functions within applications to access, store, organise data and perform routine work tasks |

# Assessment Requirements for BSBITU306 Design and produce business documents

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

© Commonwealth of Australia, 2025 Skills Insight

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBLDR413 Lead effective workplace relationships

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

The unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context. At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Social Competence – Leadership

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to lead workplace relationships | 1.1 Identify work team objectives according to organisational strategy<br>1.2 Collect and analyse information for the achievement of work task<br>1.3 Share ideas and information with relevant internal and external stakeholders according to work task<br>1.4 Develop strategy for completion of work task in collaboration with work team |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Lead workplace relationships | 2.1 Identify and implement methods to facilitate collaboration to complete work task<br>2.2 Support colleagues experiencing difficulties fulfilling work requirements<br>2.3 Manage conflict constructively within the organisation's processes and parameters of own role<br>2.4 Communicate work progress to relevant internal and external stakeholders |
| 3. Review leadership | 3.1 Seek feedback on relationship management for work task from relevant stakeholders<br>3.2 Analyse feedback on relationship management<br>3.3 Evaluate personal performance in leading workplace relationships<br>3.4 Identify areas of improvement for leading workplace relationships future work tasks |

# Foundation Skills

# Assessment Requirements for BSBLDR413 Lead effective workplace relationships

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- lead effective workplace relationships on at least four occasions with different individuals or groups.

In the course of the above, the candidate must:

- access and analyse information required to achieve planned outcomes
- collaborate with work team to develop and implement a work task strategy
- apply techniques for resolving problems and conflicts, and dealing with poor performance according to organisational and legislative requirements
- monitor and communicate work progress to relevant internal and external stakeholders
- seek and review feedback to improve workplace leadership.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- considerations for communicating information including audience cultural and social diversity
- consultation processes including internal and external sources of consultees
- impacts of relationships, cultural and social environment, in supporting or hindering the achievement of planned outcomes
- techniques for developing positive work relationships and building trust and confidence in a team, including:
  - interpersonal styles
  - communications
  - consultation
  - cultural and social sensitivity
  - networking

© Commonwealth of Australia, 2025 Skills Insight

- impact of legislation and organisational policies on workplace relationships
- techniques for communicating information and ideas to a range of stakeholders
- common methods to resolve workplace conflict
- common methods to manage poor work performance
- common methods to monitor, analyse and improve work relationships.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relevant to performance evidence
- workplace documentation and resources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBLDR414 Lead team effectiveness

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Social Competence – Leadership

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan team outcomes | 1.1 Lead team to identify and establish team objectives and work processes<br>1.2 Support team to document identified objectives and work processes according to organisational processes<br>1.3 Encourage team members to incorporate innovation and productivity measures in work plans<br>1.4 Lead and support team members to meet expected outcomes |
| 2. Promote team cohesion | 2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities<br>2.3 Provide feedback to team members on their efforts and contributions<br>2.4 Address or refer issues, concerns and problems identified by team members<br>2.5 Model expected behaviours and approaches |
| 3. Supervise team performance | 3.1 Encourage team members to participate in and take responsibility for team activities and communication processes<br>3.2 Support team to identify and resolve problems which impede performance<br>3.3 Ensure own contribution to work team serves as a role model for others |
| 4. Liaise with management | 4.1 Establish open communication with line management<br>4.2 Communicate information from line management to the team<br>4.3 Communicate unresolved issues, concerns and problems raised by the team to line management to action<br>4.4 Communicate issues raised by management to the team to action |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| SKILL | DESCRIPTION |
|---|---|
| Writing | • Prepares workplace plans that communicate intent and elicits feedback clearly and effectively |
| Oral communication | • Engages in discussions or provides information using structure and language appropriate to the audience and situation |
| Teamwork | • Selects and uses appropriate conventions and protocols when communicating with team members<br>• Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others<br>• Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| Planning and organising | • Develops, implements and monitors plans and processes to ensure team engagement and effectiveness<br>• Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others, as required |

# Unit Mapping Information

Supersedes and is equivalent to BSBLDR403 Lead team effectiveness.

Supersedes but is not equivalent to BSBSMB407 Manage a small team.

# BSBLEG525 Apply legal principles in intellectual property law matters

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to apply legal principles in intellectual property law matters. It covers maintaining control over the copyright owner's work, commercialising copyright material, preventing the unauthorised use of an original work and using other party's original work legitimately.

The unit applies to individuals who provide support in a range of legal service settings with a degree of responsibility to plan and complete investigations.

It also applies to people who may be authors, creators or other owners of works covered by copyright, as well as employees who have a role in ensuring that their organisational copyright is protected and/or that their organisation uses others' copyright appropriately to benefit the organisation without infringing the rights of copyright owners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Technical Skills – Legal Services

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to apply principles of intellectual property | 1.1 Identify task requirements<br>1.2 Identify key principles of intellectual property law according to task requirements<br>1.3 Identify key provisions of legislation and common law, policies or procedures relevant to task requirements |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Employ principles of intellectual property | 2.1 Apply principles of intellectual property law to relevant legal matters arising in the workplace<br>2.2 Analyse and evaluate key issues<br>2.3 Develop recommendations of legal and economic implications of copyright infringement according to task requirements |
| 3. Finalise application of intellectual property principles | 3.1 Review analysis with designated person<br>3.2 Obtain feedback from relevant personnel<br>3.3 Amend advice according to feedback<br>3.4 Store documents and data used according to organisational policies and procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Description |
|---|---|
| Reading | • Researches and analyses complex texts, including legislation, to identify relevant information<br>• Monitors and reviews organisational policies and procedures to ensure compliance with legislative requirements |
| Writing | • Records and maintains copyright documentation according to legislative and organisational requirements<br>• Reviews and updates organisational policies and procedures to ensure compliance with legislative requirements |
| Oral Communication | • Provides advice using language and terminology appropriate to audience<br>• Obtains information from others by listening and questioning |
| Initiative and enterprise | • Implements, monitors and reviews policies and procedures to ensure organisational compliance with legislative requirements |
| Self-management | • Follows accepted communication practices when seeking or providing advice about intellectual property<br>• Identifies and complies with legislative requirements associated with own role |
| Planning and organising | • Plans, organises and implements tasks needed to ensure compliance with legislative and organisational requirements<br>• Systematically gathers and analyses information to decide on action needed to prevent or address copyright infringements |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| Technology | • Uses digital technologies or tools to access and record information |

# Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBIPR301 Comply with organisational requirements for protection and use of intellectual property
- BSBIPR401 Use and respect copyright
- BSBIPR402 Protect and use new inventions and innovations
- BSBIPR403 Protect and use brands and business identity
- BSBIPR404 Protect and use innovative designs
- BSBIPR601 Develop and implement strategies for intellectual property management.

# Assessment Requirements for BSBLEG525 Apply legal principles in intellectual property law matters

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- apply principles of intellectual property law in at least four different matters.

In the course of the above, the candidate must:

- review and interpret information to determine how copyright applies in the organisation
- recommend actions to address risks and infringements
- communicate advice or recommendations about copyright to relevant stakeholders.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative framework for copyright and its application to the organisation including:
  - copyright owner of original works within or used by the organisation
  - policies and procedures for use of own copyright materials by other parties
  - policies and procedures for legitimate use of others' copyright materials
- sources of information and advice on copyright
- the types of works that attract copyright
- circumstances where a copyright notice is required
- regulations on selling copyright rights including:
  - commercialisation potential of copyright material
  - potential benefits for the firm
- intellectual property agreement documentation requirements
- further actions where intellectual pretty rights are breached
- methods to limit or deter unauthorised use of copyright material
- direct and indirect infringement of copyright
- when authorisation for use of copyright material is needed and how to obtain it

© Commonwealth of Australia, 2025 Skills Insight

- different types of licences and how they apply to the firm.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes relevant to intellectual property.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBMGT401 Show leadership in the workplace

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Skills Insight

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBMKG434 Promote products and services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Promote at least three products or services.

In the course of the above, the candidate must:

- identify the context for the promotional activities, including:
  - relevant legislation and regulations
  - organisation's goals, objectives, systems, policies and procedures
  - budget and timelines
  - marketing needs and, if defined, marketing plans
  - objectives of the promotional activities
- consult with relevant stakeholders to plan promotional activities to meet objectives, budget and timelines
- coordinate promotional activities including:
  - allocating roles and responsibilities
  - using communication channels to convey responsibilities
  - obtaining relevant resources and promotional products
- analyse feedback and data to evaluate the effectiveness of planning processes and promotional activities and make recommendations on future directions of promotional activities.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory context of the organisation as relevant to promotional activities
- content of action plans, including:
  - task steps

© Commonwealth of Australia, 2025 Skills Insight

  - costs
  - timeframe
  - resources and responsibilities
- internal and external stakeholders involved in coordinating promotional activities
- planning processes for organising promotional activities
- organisation's marketing objectives and how they support the overall business objectives
- common promotional activities that could be used to support the marketing objectives.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes for promoting products and services
- workplace documentation and resources for promoting products and services.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBOPS403 Apply business risk management processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to identify business risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the work role.

The unit applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or delegate aspects of these tasks to others. Risks applicable to own work responsibilities and area of operation may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Business Competence – Business Operations

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify risks | 1.1 Identify context for risk management<br>1.2 Undertake required steps to identify risks<br>1.3 Document identified risks according to relevant policies, procedures, legislation and standards |
| 2. Analyse and evaluate risks | 2.1 Analyse risks in consultation with relevant stakeholders<br>2.2 Undertake risk categorisation and determine level of risk<br>2.3 Document analysis processes and outcomes |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 3. Treat risks | 3.1 Identify control measures for risks<br>3.2 Assess strengths and weaknesses of control measures<br>3.3 Refer risks to relevant personnel, where required, according to policies and procedures<br>3.4 Select and implement control measures for personal area of operation and responsibilities |
| 4. Monitor and review effectiveness of risk treatments | 4.1 Review implemented treatments against measures of success<br>4.2 Use review results to improve the treatment of risks<br>4.3 Monitor and review management of risk in personal area of operation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Description |
|---|---|
| Learning | • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures<br>• Evaluates effectiveness of plans and results to inform improvement decisions |

# Assessment Requirements for BSBOPS403 Apply business risk management processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to apply organisational policies, procedures and processes to:

- treat at least three risks by:
  - identifying different types of organisational risks
  - consulting with stakeholders to analyse and evaluate risks
  - implementing control measures
  - referring risks that are beyond own area of responsibility to others
  - maintaining risk management documentation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory context of the organisation in relation to risk management
- techniques for identifying and evaluating risks
- organisational policies and procedures for risk management
- areas where risks are commonly identified in an organisation
- risks beyond scope of individual responsibility to be referred to relevant organisational personnel
- purpose and key elements of current risk management standards.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relating to business risk

© Commonwealth of Australia, 2025 Skills Insight

- workplace documentation on selected organisational risks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBPMG430 Undertake project work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- undertake project work on a minor project or a section of a larger project.

In the course of the above, the candidate must:

- confirm the quality of project outcomes according to expectations of the organisation
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project management tools
- types of documents and other sources of information commonly used in defining the parameters of a project
- mission, goals, objectives and operations of the organisation
- relevant legislation and regulations, including work health and safety (WHS) requirements, for project planning
- project management processes according to policies and procedures of the organisation and including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - risk management
  - recordkeeping

© Commonwealth of Australia, 2025 Skills Insight

- reporting.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBPRO301 Recommend products and services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to provide advice and information within an organisation about the development and distribution of its products and services.

It applies to individuals who apply a broad range of administrative competencies in varied work contexts, using some discretion and judgement and who may provide technical advice and support to a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry Capability – Product Skills and Advice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop and maintain knowledge of products and services | 1.1 Actively and regularly research knowledge and understanding of industry products and services using authoritative sources<br>1.2 Use available product and service documentation to identify and understand characteristics of products and services, and to make comparisons with other products and services<br>1.3 Accurately document and maintain information on products and services in a format consistent with organisational requirements |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Apply acquired knowledge to improve quality within personal work areas |
| 2. Recommend products and services | 2.1 Ensure that recommendations on products and services are in line with organisational requirements<br>2.2 Provide recommendations that emphasise product and service issues relevant to client needs<br>2.3 Ensure that evidence in support of recommendations is verifiable and presented in a suitable format<br>2.4 Structure recommendations to identify clear benefits to clients and the organisation |
| 3. Advise on promotional activities | 3.1 Provide advice that is clear, is supported by verifiable evidence and is compatible with organisational requirements<br>3.2 Ensure that promotional documentation and materials are appropriate to presentation of the organisation's products and services<br>3.3 Ensure that costs of promotional activities conform to budget resources<br>3.4 Estimate impact of promotional activities from verifiable customer feedback sources<br>3.5 Evaluate the benefits of promotional activities and incorporate in plans for future promotional activities |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 3.4 | • Interprets, understands and compares textual information about products and services from a range of sources |
| Writing | 1.2, 1.3, 2.2, 2.3, 2.4, 3.1, 3.2, 3.5 | • Uses clear and specific language to develop documents for different audiences in accordance with organisational requirements |
| Oral Communication | 3.1 | • Provides recommendations using language appropriate to the purpose and audience |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Numeracy | 3.3, 3.4 | • Extracts and evaluates meaning from data to calculate actual costs against budget and impact of promotional activities |
| Navigate the world of work | 1.3, 1.4, 2.1, 3.1 | • Understands and follows organisational policies and procedures relevant to own role |
| Get the work done | 1.1-1.3, 2.1-2.4, 3.1, 3.2, 3.5 | • Plans and implements tasks required to achieve required outcomes<br>• Analyses information in order to decide on appropriate advice or recommendations<br>• Evaluates outcomes of decisions to identify opportunities for improvement |

# Assessment Requirements for BSBPRO301 Recommend products and services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use appropriate sources to document accurate information about the organisation's products and services
- prepare and provide advice about products and services according to organisational requirements
- evaluate promotional activities including consideration of:
  - whether promotional materials meet organisational requirements
  - actual costs against budget
  - customer feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list authoritative sources of information about the organisation's products and services
- outline the organisation's products and services
- outline the policies and procedures that apply when providing advice or recommendations about products and services
- list and describe organisational promotional activities
- explain methods used to gather verifiable customer feedback about products and services
- explain how and why customer feedback is analysed.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- relevant organisational policies and procedures
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBPRO401 Develop product knowledge

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use valid and reliable sources to gather information about the organisation's products and competitors' products
- determine buyer needs and present key features and benefits of product to match needs, in accordance with organisational and legislative obligations
- compare competitors' products with own organisation's products and communicate differences to buyer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list sources of information for own organisation's products and competitors' products
- explain why it is important to discuss features, benefits, strengths and weaknesses when describing products
- summarise industry competitors, including products offered and potential buyer markets
- outline organisational policies and procedures, relevant to the sales process
- outline the key provisions of relevant legislation, regulations, standards and codes of practice that are relevant to the sales process.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- information sources regarding an organisation's and competitors' products, service or ideas
- office equipment and resources
- relevant organisational policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBSTR501 Establish innovative work environments

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish at least two different procedures and practices that foster innovation in areas of work practice, including at least three of the following:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas of innovation in work environment
  - celebrating and encouraging innovation
  - consulting with relevant stakeholders
  - changing physical work environment, including designing, fitting-out and decorating workspaces
  - communicating and sharing of ideas and feedback.

In the course of the above, the candidate must:

- reinforce the value of innovation to the vision and objectives of the organisation
- model behaviour, including:
  - being receptive to ideas
  - giving constructive advice
  - establishing and maintaining relationships based on mutual respect and trust
  - taking considered risks that provide opportunities for innovation
- support innovation and collaboration of ideas to make improvements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- concepts and theories of innovation

© Commonwealth of Australia, 2025 Skills Insight

- context for innovation in the workplace, including:
  - core business values
  - overall objectives
  - broader environmental context
  - value and benefit of innovative ideas and projects
- factors and tools that motivate individuals
- creative thinking and innovative work practices
- ways of celebrating and promoting innovation in the workplace
- approaches to management and leadership and how they support and hinder innovation
- challenges and barriers to innovation and ways of overcoming them, including:
  - rewarding and celebrating innovation
  - coaching and learning
  - modelling behaviour and managing the physical environment.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation and codes of practice
- relevant organisational policies and procedures
- workplace equipment and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBTEC101 Operate digital devices

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on digital devices.

The unit applies to those who perform a range of routine digital tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Digital Competence - Technology Use

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Activate digital device and access features | 1.1 Prepare workspace, furniture and equipment to suit user ergonomic requirements, where required<br>1.2 Activate digital device, and access or log on according to organisation policies and procedures<br>1.3 Identify basic functions and features of digital devices<br>1.4 Customise desktop or application configuration<br>1.5 Request assistance from relevant personnel for using digital device, where required<br>1.6 Access help functions, where required |
| 2. Navigate and organise file or application | 2.1 Open, close and access file or application by selecting correct desktop or menu icons |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| environment | 2.2 Create shortcuts onto the desktop or menu, and request assistance from relevant personnel, where required<br>2.3 Identify and apply keyboard functions for both alpha and numeric keyboard input devices<br>2.4 Create folders and subfolders with relevant names<br>2.5 Identify and access storage devices relevant to the digital device<br>2.6 Download new applications with assistance from relevant stakeholder<br>2.7 Use search functions to locate files or applications |
| 3. Edit and update stored information | 3.1 Rename and move folders and subfolders<br>3.2 Remove files or applications as required, with assistance from relevant stakeholder<br>3.3 Open relevant file, document, or application<br>3.4 Edit content of the file, document, application, or similar in accordance with simple instructions<br>3.5 Save changes in digital device |
| 4. Deactivate personal digital device | 4.1 Save and close all open files, documents or applications<br>4.2 Deactivate digital device according to user procedures |

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Recognises textual information within internal procedures and technical documents to determine and complete work requirements |
| Writing | • Inputs information using familiar text types and records numerical and textual information for file naming conventions |

## Unit Mapping Information

Supersedes and is equivalent to BSBITU111 Operate a personal digital device.

Supersedes but is not equivalent to:

- BSBITU112 Develop keyboard skills
- BSBITU307 Develop keyboarding speed and accuracy.

# Assessment Requirements for BSBTEC101 Operate digital devices

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least three occasions, activate, navigate, and deactivate a digital device.

In the course of the above, the candidate must:

- follow user procedures to power up and access a digital device
- follow user procedures and system information when using the basic functions on digital device, seeking assistance where required
- shut down applications and the device.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- user procedures for powering up and accessing a digital device
- key components of the digital system, including what each component does
- ergonomic issues that impact the use of digital devices
- key functions of the operating system
- organisational conventions for naming files.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- device user information
- different types of digital device.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# BSBTEC201 Use business software applications

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to select and use software and organise electronic information and data.

The unit applies to those who use a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Digital Competence - Technology Use

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select and prepare to use technology | 1.1 Identify task purpose, audience, format and presentation requirements, and clarify with relevant personnel, where required<br>1.2 Select relevant technology and software applications to achieve requirements of the task<br>1.3 Adjust workspace, furniture and equipment to suit own ergonomic requirements |
| 2. Input and process information or data | 2.1 Identify and open application, according to task and organisational requirements<br>2.2 Enter information or data into application according to organisational requirements |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Ensure information or data is checked and amended according to organisational and task requirements<br>2.4 Format information or data using appropriate application functions according to organisational and task requirements<br>2.5 Use relevant help functions to overcome simple issues |
| 3. Finalise and store document | 3.1 Review and edit final information or data, and prepare for storage in accordance with organisational and task requirements<br>3.2 Name and store document and exit application |

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Recognises and interprets information from familiar sources to determine job role and task requirements |
| Writing | • Produces and amends files to meet task and organisational requirements<br>• Completes required documentation using organisational formats |

## Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU211 Produce digital text documents
- BSBITU212 Create and use spreadsheets
- BSBWOR204 Use business technology.

Supersedes but is not equivalent to BSBCUE301 Use multiple information systems.

# BSBWHS311 Assist with maintaining workplace safety

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to assist with implementing and monitoring an organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have roles in assisting with maintaining workplace safety in an organisation. Individuals closely monitor aspects of work associated with the safe delivery of products and services, and they contribute to influencing safety in the workplace.

**NOTES**

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

# Assessment Requirements for BSBWHS311 Assist with maintaining workplace safety

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- assist with implementing and monitoring at least three different organisational work health and safety (WHS) policies or procedures into a work team's processes.

During the above, the candidate must:

- assist with implementing and monitoring consultation about each policy or procedure according to legislative and organisational requirements
- identify opportunities to encourage work team to contribute to implementing improvements to each policy or procedure based on feedback received through consultation
- complete WHS documentation.

## Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- characteristics and composition of the work team
- procedures related to the following:
  - identifying hazards
  - assessing and controlling risks to health and safety, including the hierarchy of control measures
- organisational WHS policies and procedures, including those relating to:
  - risk management
  - fire
  - emergencies
  - evacuation
  - incident investigation

© Commonwealth of Australia, 2025 Skills Insight

    - reporting
- relevant legislation, regulations and codes of practice from all levels of government that impact on business operations, including those relating to:
    - WHS and environmental issues
    - equal opportunity
    - industrial relations
    - anti-discrimination
- WHS aspects of other organisational systems and procedures.

## Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- standards, WHS laws and licensing requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package release 1.0 |

## Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the* | *Performance criteria describe the performance needed to* |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *essential outcomes.* | *demonstrate achievement of the element.* |
| 1. Provide information to the work team about WHS policies and procedures | 1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice<br>1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team<br>1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control |
| 2. Implement and monitor participation arrangements for managing WHS | 2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace<br>2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards<br>2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements<br>2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues |
| 3. Implement and monitor organisational procedures for providing WHS training | 3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements<br>3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals<br>3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs<br>3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans |
| 4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks | 4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements<br>4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements<br>4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements<br>4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response |
| 5. Implement and monitor organisational procedures for maintaining WHS records for the team | 5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements<br>5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 5.2 | • Interprets and analyses complex WHS legislative and organisational texts |
| Writing | 1.1-1.3, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1, 4.4, 5.1 | • Documents WHS legislative and organisational information using structure, layout and language suitable for audience<br>• Records WHS issues and actions taken according to reporting requirements<br>• Prepares and maintains required records using appropriate structure and vocabulary |
| Oral communication | 1.1-1.3, 2.1, 2.4, 3.2, 3.3, 4.1, 4.4 | • Provides WHS legislative and organisational information and advice using structure and language suitable for audience |
| Numeracy | 3.4, 5.2 | • Extracts, interprets and comprehends mathematical information in relation to training costs and risk management data |
| Navigate the world of work | 1.1,1.2, 2.3, 3.1, 4.1-4.5, 5.1 | • Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS<br>• Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures |
| Interact with | 2.2, 3.2, 3.3 | • Selects and uses appropriate conventions and protocols to facilitate consultation or provide feedback |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| others | | • Initiates and contributes to facilitating consultative role, responding, explaining, clarifying and expanding on ideas and information as required<br>• Collaborates with others to achieve individual and team outcomes |
| Get the work done | 2.2, 3.2, 3.3, 4.1-4.5, 5.1 | • Uses combination of formal, logical planning and intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies<br>• Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria<br>• Recognises and takes responsibility for reporting WHS risk control inadequacies<br>• Uses formal and informal processes to monitor implementations of WHS solutions and reflect on outcomes |

# Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025
Skills Insight

# Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS411 Implement and monitor WHS policies, procedures and programs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

The unit applies to those with supervisory responsibilities in a work area who have a broad knowledge of WHS policies and contribute well-developed skills in creating solutions to problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

**NOTES**

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for BSBWHS411 Implement and monitor WHS policies, procedures and programs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- implement and monitor the work health and safety (WHS) policies, procedures and programs for one work area in an organisation.

During the above, the candidate must:

- explain relevant WHS information clearly and accurately to work team
- provide work team with access to WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures, according to WHS legislative and organisational requirements, for:
  - consultation on and communication about WHS hazards and risks
  - WHS training needs and learning opportunities
  - WHS records
  - using WHS aggregate data relating to hazards and risk control.

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- key provisions of commonwealth and state/territory WHS laws that apply to the business, and procedures for their application in the work area
- organisational policies and procedures for:
  - consulting during WHS issue management
  - identifying hazards and managing risks, including using aggregate information and work area data
  - incident response, investigation and reporting

© Commonwealth of Australia, 2025 Skills Insight

- legal responsibilities and duties of managers, supervisors, persons conducting a business or undertaking (PCBUs) and workers in relation to WHS risk management in the workplace
- procedures for assessing implications of near misses in relation to incidents, injuries and illnesses in the work area
- effective consultation mechanisms in managing health and safety risks in the workplace
- features of effective workplace learning opportunities, including coaching and mentoring assistance that facilitates team and individual achievement of WHS training needs
- key principles and components of the hierarchy of control measures
- procedures for applying the hierarchy of control measures in own work area.

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- actual workplace or simulated environment
- workplace equipment and resources
- examples of documents about workplace safety, hazard identification and risk assessment
- WHS laws and organisational documentation required to demonstrate the performance evidence
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# BSBWRT411 Write complex documents

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to plan, draft and finalise complex documents.

The unit applies to individuals who work in a range of business environments and are skilled in the creation of documents that are more complex than basic correspondence, memos and/or forms and that require review and analysis of a range of information sources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Social Competence – Written Communication

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan complex document | 1.1 Determine audience, purpose and requirements of document according to organisation policies and procedures<br>1.2 Determine required format, style and structure for document<br>1.3 Establish method of communication<br>1.4 Develop content overview of document<br>1.5 Determine categories and logical sequence of information according to proposed structure, content and document requirements |
| 2. Draft complex document | 2.1 Confirm information is cohesive and satisfies document purpose and requirements<br>2.2 Develop draft document to communicate data, information and |

# Assessment Requirements for BSBWRT411 Write complex documents

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, draft and finalise three different complex documents that convey the required information in a format suitable for the intended audience and purpose according to organisational policies and procedures for document production.

In the course of the above, the candidate must:

- review and analyse a range of information sources
- use business technology to apply formatting and incorporate graphics
- apply organisation style guide/house style.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisation style guide/house style
- format and its impact on readability, cohesion and appearance of document
- categories and logical sequences of information
- rules and conventions for written English
- key features of word processing software
- key features of written communication methods, including:
  - general emails
  - procedures
  - business letters
  - meeting agendas
- organisational policies and procedures relating to written communication
- process for checking:
  - suitability of document for audience, purpose, format, and structure

© Commonwealth of Australia, 2025 Skills Insight

  - grammar, spelling and style for accuracy and punctuation
- key text elements including basic design elements.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of residential and low rise commercial buildings (low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

To successfully construct low rise buildings requires a thorough knowledge of the purpose and content of the Building Code of Australia (BCA), coupled with the ability to interpret other codes and standards related to a specific building.

## Application of the Unit

**Application of the unit**

This unit of competency supports builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards in the residential and commercial construction industry.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

**Prerequisite units**

Nil

© Commonwealth of Australia, 2025 Skills Insight

# Employability Skills Information

**Employability skills** This unit contains employability skills.

# Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 1. Access and interpret relevant code and standard requirements. | 1.1. Relevant performance requirements from the BCA that apply to individual projects (described as ***low rise***) are identified.<br>1.2. Requirements of relevant BCA deemed-to-satisfy (DTS) provisions are determined.<br>1.3. Requirements of relevant Australian standards referenced in the BCA are accessed and interpreted accordingly. |
| 2. Classify buildings. | 2.1. Nature of a building is determined according to its use and arrangement.<br>2.2. BCA criteria to determine the defined classification are applied.<br>2.3. BCA requirements for multiple classification are identified and interpreted. |
| 3. Analyse and apply a range of solutions to a construction problem for compliance with the | 3.1. Performance-based solutions are identified and documented in accordance with BCA requirements.<br>3.4. ***Assessment methods*** referenced in the BCA to determine whether a building solution complies with ***performance requirements*** or DTS provision of the BCA are analysed and applied.<br>3.5. Relevant documentation is identified and completed in accordance with BCA requirements. |
| 4. Apply fire protection requirements. | 4.1. Passive and active fire control elements for low rise building required by the BCA and other legislation are identified and applied.<br>4.2. Level of fire resistance required for the construction of various low rise buildings is determined.<br>4.3. Check of existing buildings for compliance with passive and active fire protection requirements is carried out in accordance with BCA requirements. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents
- application of design concepts and principles in accordance with BCA, namely:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction
- attention to detail in applying building codes and standards
- communication skills to:
  - discuss and propose alternative solutions
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

© Commonwealth of Australia, 2025 Skills Insight

### REQUIRED SKILLS AND KNOWLEDGE

- read and interpret:
  - documentation from a variety of sources, including BCA and referenced documents
  - drawings and specifications
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- written skills to complete documentation in accordance with BCA requirements
- numeracy skills to interpret and apply mathematical information included in building codes and standards.

### Required knowledge

Required knowledge for this unit is:

- basic design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- BCA performance hierarchy
- definitions and common technical terms or usage specified under general provisions of BCA
- general nature of materials and the effects of performance
- relevant Australian standards
- relevant legislative and OHS requirements, codes and practices
- types of working drawings and specifications
- understanding of the BCA relating to:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Overview of assessment** | This unit of competency could be assessed by the application of design principles and solutions specified in BCA performance requirements or DTS provisions applicable to a building project.<br><br>This unit of competency can be assessed in the |

## EVIDENCE GUIDE

modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing

|---|---|
| | supervisors, team leaders or specialist training staff. |

# Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| | |
|---|---|
| ***Low rise*** is described as falling within the BCA classes: | • Class 1 and 10<br>• Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction. |

# CPCCBC4002 Manage work health and safety in the building and construction workplace

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 2.4 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to inspect workplaces for hazards and conduct work health and safety (WHS) risk analyses. It includes the development and implementation of appropriate responses to mitigate risks to meet government legislation and regulations.

This unit of competency applies to builders, site managers and forepersons who are responsible for the management of risk in building and construction workplaces.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

Building and Construction

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. | |
|---|---|---|
| 1 Assess workplace risk. | 1.1 | Evaluate construction site safety and identify potential risk areas. |
| | 1.2 | Assess on site worker's health and safety. |
| | 1.3 | Identify hazards and determine control measures that comply with legislative requirements and organisational policies. |
| | 1.4 | Consult with workers to evaluate effectiveness of existing control measures and WHS experts, as necessary, to contribute to an inspection report. |
| | 1.5 | Complete a workplace inspection report with recommended actions to minimise workplace incidents and mitigate risk. |
| 2 Establish and implement safety plans. | 2.1 | Establish a workplace safety plan incorporating information from the workplace inspection report to raise safety awareness and support safe workplace practices. |
| | 2.2 | Implement processes to identify hazards, rate the risks and put control measures in place. |
| | 2.3 | Establish educational programs specific to the building and construction workplace to ensure workers carry out safe work practices. |
| | 2.4 | Negotiate and resolve safety issues and conflicts. |
| 3 Monitor workplace safety. | 3.1 | Monitor and audit workplace safety to ensure compliance with WHS regulations and workplace safety requirements. |
| | 3.2 | Record findings and recommend and implement actions to address non-compliance. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| 3.3 | Review effectiveness of educational programs to ensure all workers have been inducted and maintain safe work practices. |
| 3.4 | Monitor, review and document effectiveness of control measures to determine changes and improvements as required. |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCCBC4002A Manage occupational health and safety in the building and construction workplace

# Assessment Requirements for CPCCBC4002 Manage work health and safety in the building and construction workplace

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 2.4 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting a workplace safety audit for a construction worksite.

In doing this, a candidate must:

- access and interpret relevant government work health and safety (WHS) legislation and regulations
- identify faults, problems and non-compliances and their impact on workplace safety
- introduce safety systems allowing for ease of reporting safety issues, controlling hazards and maintaining worker safety and competence.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- current WHS Acts and regulations
- relevant safety codes, standards and guidelines
- organisation’s workplace safety policies and procedures:
  - workplace safety and reporting requirements
- inspection, auditing and investigation processes
- hazards arising from:
  - high-risk construction work:
    - crane operation
    - dogging and rigging
    - concrete pumping

© Commonwealth of Australia, 2025 Skills Insight

    - tilt-up panel construction
    - scaffolding
  - operation of plant and equipment
  - demolition
  - asbestos removal and exposure to asbestos fibres
  - exposure to silica
  - airborne contaminates
  - exposure to excessive noise
  - electrical work
  - working at heights
  - hazardous materials and substances
  - working in confined spaces
- safe work practices:
  - emergency, first aid and evacuation procedures
  - waste management and environmental practices
  - personal protective equipment (PPE)
- educational programs:
  - worker site-specific induction training
  - contractor detailed WHS induction
  - WHS induction for visitors
  - Health and Safety Representative (HSR) training
- mental health first aid and welfare of workers
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract, integrate and compile information.

# Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- WHS legislation and regulations
- safety codes, standards and guidelines
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- workplace incident data and incident reports
- business equipment to collect and record data, and produce reports

© Commonwealth of Australia, 2025 Skills Insight

- digital devices, applications and software to research, transmit and receive information electronically.

# CPCCBC4003 Select, prepare and administer a construction contract

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 3.3 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes but is not equivalent to CPCCBC4003A Select and prepare a construction contract. Combines CPCCBC4003A Select and prepare a construction contract and CPCCBC4016A Administer a construction contract. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to select, prepare and administer contracts for commercial and residential construction projects. It includes contract selection, administration of a range of documents related to the contract and identifying causes of breach of contract.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

It applies to builders, estimators and project and site managers who interpret complex documents and communicate clearly and succinctly during contract negotiations.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for selecting and preparing construction contracts.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Identify and analyse business contracts. | 1.1 Recognise various types of building and construction contracts, their legal requirements and application. |
| | 1.2 Analyse the importance of the intention to create legal relations. |
| | 1.3 Read and interpret essential contract elements, terms, sections and clauses of a valid construction contract. |
| | 1.4 Evaluate rights, obligations and liabilities of all parties. |
| | 1.5 Identify and analyse circumstances that constitute a breach of contract. |
| | 1.6 Identify factors involved in the termination of contracts. |
| | 1.7 Identify legislative requirements and procedures. |
| 2 Select appropriate contract. | 2.1 Communicate clearly and directly with all parties to confirm the capacity to form a binding agreement. |
| | 2.2 Prepare and compile the range of documents that collectively make up the contract. |
| | 2.3 Establish factors and special conditions associated with the parties' consent to a contract. |
| | 2.4 Recognise and apply the requirements associated with an offer and acceptance of a contract. |
| | 2.5 Select a contract appropriate to the type of construction. |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| 3 Prepare the contract. | 3.1 | Draft appropriate contract accurately incorporating all details, including definitions of unreasonable or vexatious notice, repudiation of a contract by either party, conditions for completion at the cost of the contractor, ousting the contractor from the building or construction site and abandonment of a contract. |
| | 3.2 | Assess and schedule progress payments, including processes for applying for extension of time. |
| | 3.3 | Ensure any discrepancies or disagreements are resolved prior to contract preparation. |
| | 3.4 | Ensure legality and validity of draft contract in consultation with relevant persons. |
| | 3.5 | Prepare final contract in accordance with the organisation's legal process. |
| 4 Administer the contract. | 4.1 | Process progress payments accurately as due under the contract. |
| | 4.2 | Process applications for extension of time in accordance with organisational policies and contract conditions. |
| | 4.3 | Identify, negotiate and document variations to contract. |
| | 4.4 | Act to minimise liquidated damages or penalties nominated in the contract. |
| | 4.5 | Administer contract and resolve contractual disputes in accordance with contract and relevant legislation and regulations. |
| | 4.6 | Assess conditions for issuing a final certificate. |
| 5 Finalise a contract. | 5.1 | Apply process for practical completion of contract. |
| | 5.2 | Finalise defects liability under a building or construction contract. |
| | 5.3 | Finalise contract in accordance with relevant legislation and contract provisions. |
| | 5.4 | Issue appropriate certificate upon completion of the |

© Commonwealth of Australia, 2025 Skills Insight

contract work.

5.5 Complete and secure documentation arising from finalisation of a contract for records purposes.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

- Supersedes and is not equivalent to CPCCBC4003A Select and prepare a construction contract

# Assessment Requirements for CPCCBC4003 Select, prepare and administer a construction contract

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 3.3 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes but is not equivalent to CPCCBC4003A Select and prepare a construction contract. Combines CPCCBC4003A Select and prepare a construction contract and CPCCBC4016A Administer a construction contract. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting, preparing and administering one contract for a construction project.

In doing this, the candidate must:

- select the correct contract by analysing identified legislative requirements and construction type
- prepare the construction contract specifying requirements for contract termination and special conditions agreed by all parties
- administer the contract following government legal and regulatory requirements and to the organisation’s standards
- monitor price and time variations and negotiate with various parties to resolve contract anomalies
- collect all related construction contract and final inspection documentation and issue completion certificate.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian legal system and its relevance to contracts
- various types of housing and construction industry contracts and the circumstances they cover
- definitions and interpretations commonly applied to contracts
- Australian Standards

© Commonwealth of Australia, 2025 Skills Insight

  - *AS2124 General conditions of contract,* and
  - *AS4000 General conditions off contract* series
- relationships between the organisation and its clients
- range of documents associated with a contract:
  - equipment, site accommodation and services information
  - human resource projections
  - materials lists
  - construction drawings and specifications
  - project timelines
  - schedules
- digital tools and devices to communicate and collaborate effectively with others
- range of digitally-based technology and applications to access, extract, integrate and compile information.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction and contract legislation
- current building and construction codes and standards
- relevant construction industry contracts
- construction drawings and specifications
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to transmit and receive information electronically.

# CPCCBC4004 Identify and produce estimated costs for building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to establish estimated costs associated with the acquisition of materials and labour for building and construction projects. It includes factoring in relevant overhead costs and margins.

This unit of competency applies to estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Establish project requirements. | 1.1 Read and interpret construction drawings and specifications in conjunction with relevant building and construction regulations, codes and standards. |
| | 1.2 Identify building site features, type of building and method of construction, and specified building materials. |
| | 1.3 Establish site facilities, and communication and temporary boundary fencing requirements. |
| | 1.4 Identify waste removal requirements and apply waste management site fees. |
| | 1.5 Identify additional project-specific statutory, approvals or compliance costs. |
| 2 Calculate materials and labour costs. | 2.1 Produce a materials and consumables quantity list and obtain a price from supplier. |
| | 2.2 Identify and estimate off-site production costs, including delivery. |
| | 2.3 Identify numbers of contractors, sub-contractors and employees appropriate for the project and work rates. |
| | 2.4 Estimate labour hours and calculate labour costs, including on-costs and worker insurance costs. |
| 3 Identify type and cost of physical resources. | 3.1 Identify physical resources required for the project. |
| | 3.2 Determine limitations, conditions, operational costs and timeframes for hire of physical resources. |
| | 3.3 Obtain supplier prices, including transport of physical resources. |
| | 3.4 Identify, itemise and cost plant, equipment and machinery. |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| 4 | Produce estimated project costs. | 4.1 Review and compile materials, consumables and off-site production costs and delivery charges. |
| | | 4.2 Compile labour costs inclusive of rates and entitlements. |
| | | 4.3 Compile costs of physical resources. |
| | | 4.4 Apply organisational overhead recovery and margins. |
| | | 4.5 Produce estimated project costs for inclusion in a tender or bill. |
| | | 4.6 Manage and mitigate risks associated with estimating project costs. |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCCBC4004A Identify and produce estimated costs for building and construction projects.

# Assessment Requirements for CPCCBC4004 Identify and produce estimated costs for building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by estimating the cost of one residential or commercial building and construction project.

In doing this, the candidate must:

- estimate project costing from construction drawings, specifications and written information
- list physical resources appropriate for the construction of the project
- produce project cost using an appropriate software program.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction regulations
- building and construction standards and codes
- the National Construction Code (NCC)
- organisational policies and procedures
- organisational scope, processes and requirements for using employee and subcontractor labour
- Environmental Protection Authority (EPA) regulations
- construction drawings and specifications
- relevant physical resources and requirements for their operations:
  - earth moving and excavation equipment
  - hoists and lifting equipment
  - mobile cranes
  - compressors
  - generators
  - pumps

© Commonwealth of Australia, 2025 Skills Insight

- calculating unit costs:
  - construction cost per square metre
  - laying of foundation per metre
  - laying of slabs per square metre
  - masonry walls per square metre
  - laying of steel tray roofing per square metre
  - installation of pipes per metre
  - installation of sanitary ware per unit
  - tiling per square metre
  - painting per square metre
- a range of digitally-based technology and applications to estimate quantities, calculate costs and maintain records
- workplace procedures, workplace safety and environmental requirements.

# Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- building and construction standards and codes
- government building and construction regulations
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- calculating technology, online applications and software to produce building and construction costs.

# CPCCBC4005 Produce labour and material schedules for ordering

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4005A Produce labour and material schedules for ordering. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to produce schedules for physical and human resources and materials for residential or commercial projects. It includes monitoring project schedules and tracking and recording costs as they are incurred.

This unit of competency applies to site managers and forepersons, estimators, project managers and builders in the construction industry with responsibility for producing schedules for ordering materials and allocating labour.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Building and Construction

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Assess physical and human resource requirements. | 1.1 Check conditions of approval from local government and regulatory bodies and project commencement dates. |
| | 1.2 Identify variations to scope of works and contractual terms and arrangements by the client. |
| | 1.3 Compile a list of nominated and approved suppliers and contractors and develop channels for effective communication. |
| | 1.4 Confirm availability of materials with suppliers and labour with contractors. |
| | 1.5 Enter critical project information into project schedule. |
| 2 Produce schedules. | 2.1 Prepare electronic call forward sheet and site files containing necessary site documentation. |
| | 2.2 Break down project into stages and tasks and set milestones and timeframes for commencement and completion. |
| | 2.3 Itemise materials and labour required for the stages of construction. |
| | 2.4 Sequence material delivery dates and commencement times for labour. |
| | 2.5 Factor in unplanned delays. |
| 3 Monitor project costs and maintain project files. | 3.1 Monitor construction stage progression costs and approved variation costs against estimated project cost. |
| | 3.2 Manage and monitor project progress against scheduled timelines. |

© Commonwealth of Australia, 2025 Skills Insight

3.3 Record unscheduled and approved variations, changes to the approved plan and specifications and delays to the project.

3.4 Resolve issues, within scope of responsibilities, and maintain a cost analysis against final estimated project cost.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital devices to communicate and collaborate effectively with suppliers, contractors and others
  - use equipment and programs to prepare and access electronic call forward sheets and files.

## Unit Mapping Information

Supersedes and is equivalent to CPCCBC4005A Produce labour and material schedules for ordering

# Assessment Requirements for CPCCBC4005 Produce labour and material schedules for ordering

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4005A Produce labour and material schedules for ordering. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by producing a schedule for the ordering of materials and allocation of labour for a residential or commercial building and construction project.

In doing this, the candidate must:

- produce a labour and materials schedule across the life of the project
- develop and manage efficient communications between staff, contractors and suppliers
- monitor, maintain and record project progress and variations, estimated and increased costs and changes to construction drawings and specifications.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation and regulations
- building and construction codes and standards
- construction drawings and specifications
- building and construction contractor and supplier contracts
- local authority building application processes, approval and conditions
- organisational policies and procedures:
  - costing and ordering materials
  - selecting and engaging suppliers
  - approving and contacting contractors

© Commonwealth of Australia, 2025 Skills Insight

- projects costs:
  - organisational and subcontractor labour
  - organisation overheads
  - public liability, professional indemnity and workers' compensation
  - temporary electrical, plumbing and draining services
  - temporary site facilities, storage facilities and boundary fencing
  - communications
  - project administration
- workplace procedures, workplace safety and environmental requirements.

# Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- relevant organisational policies and procedures
- various construction industry contracts
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to set up electronic call forward sheets, compile site files and create channels of communication with internal and external stakeholders.

# CPCCBC4008 Supervise site communication and administration processes for building and construction projects

## Modification History

Release 5 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.

Changes to Foundation Skills, Knowledge Evidence and Performance Evidence.

Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to version release numbering.

Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.0.

Typographical error in Element 4 corrected.

Element 4.2 corrected from; Conduct onsite inspections for project monitoring according to schedule using relevant inspection checklists to:

4.2 Conduct onsite project monitoring and inspection of work quality

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical corrections in Performance Evidence.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4008B Conduct on-site supervision of building and construction projects. Title change for clarity purposes. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to supervise site communications, monitor and maintain compliance with codes and standards and implement project administration processes on a building and construction project.

It is strongly recommended that the site, as specified in the performance evidence, is ‘live’ (see Companion Volume for guidance).

© Commonwealth of Australia, 2025 Skills Insight

This unit of competency specifies the skills and knowledge required to supervise the administration of quality control compliance and the use of site communications and record keeping systems; and conduct onsite inspections to complete the required project administration processes.

This unit applies to National Construction Code (NCC) classifications:

- Residential - Class 1 buildings to a maximum of two storeys
- Commercial - NCC Class 2 to 9, Type C only constructions.

This unit of competency is suitable for builders, site managers, forepersons and other construction industry professionals using specialised knowledge and skills to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program, specified in the model Code of Practice for Construction Work, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work* safely *in the construction industry* meets this requirement.

## Pre-requisite Unit

| | |
|---|---|
| | of construction. |
| 2 Supervise the administration of projects. | 2.1 Identify project administration requirements. |
| | 2.2 Authorise payment of material and contractor invoices, drawing against contract allowances and back-charges, as required. |
| | 2.3 Authorise variations to contracts and take corrective action as required. |
| | 2.4 Process insurance claims for site loss or damage. |
| 3 Supervise the use of site communications and record keeping systems. | 3.1 Develop and implement systems for effective communication between onsite and offsite staff, contractors and suppliers that systematically gather onsite information. |
| | 3.2 Develop and implement construction project recording systems to capture relevant project details. |
| | 3.3 Maintain a daily communications diary and key events. |
| | 3.4 Record information relating to certifier inspections, union and legislative matters. |
| 4 Conduct onsite project monitoring and inspection of work quality | 4.1 Apply workplace safety requirements and project administration procedures during onsite visit. |
| | 4.2 Conduct onsite project monitoring and inspection of work quality. |
| | 4.3 Inspect and record quality of work, notify relevant people of defects and issue rectification notice. |
| | 4.4 Develop systems to monitor rectified work to ensure compliance with organisational quality control requirements, building standards and client satisfaction. |
| 5 Complete project administration processes. | 5.1 Record work defects notified by external parties, establish liabilities and remedial action required, and develop inspection checklist. |

© Commonwealth of Australia, 2025 Skills Insight

5.2 Notify client of rectification, and record client's response to completed work.

5.3 Instigate procedures that will result in client approval and acceptance where this was not the client's initial response.

5.4 Confirm contract requirements are fulfilled with relevant company personnel and client.

5.5 Arrange for local authority completion inspection.

5.6 Prepare certificates and appropriate client handover information, including all guarantees, warranties and termite protection forms.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria, including:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation

## Unit Mapping Information

Supersedes and is equivalent to CPCCBC4008B Conduct on-site supervision of building and construction projects.

# Assessment Requirements for CPCCBC4008 Supervise site communication and administration processes for building and construction projects

## Modification History

Release 5 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.

Changes to Foundation Skills, Knowledge Evidence and Performance Evidence.

Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to version release numbering.

Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.0.

Typographical error in Element 4 corrected.

Element 4.2 corrected from; Conduct onsite inspections for project monitoring according to schedule using relevant inspection checklists to:

4.2 Conduct onsite project monitoring and inspection of work quality

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical corrections in Performance Evidence.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4008B Conduct on-site supervision of building and construction projects. Title change for clarity purposes. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by:

1. Developing a plan to supervise the administration processes for one building and construction project which is either a:
    - Class 1 to a maximum of two storeys, or

© Commonwealth of Australia, 2025
Skills Insight

- Class 2 to 9, Type C building

In doing this, the candidate must:

a. Create a plan to implement, administer, maintain and monitor site quality control.

b. Read and understand thoroughly the Site Safety Plan used on site.

c. Outline the communication systems that will be used on site.

d. Outline how systematic gathering of onsite information will be recorded.

e. Develop a progress inspection checklist for at least two trades for a section of building.

2. Conducting at least one site inspection to evaluate safety, project progress and work quality for at least one section of a building. This worksite must be for a building and construction project which is either a:

- Class 1 to a maximum of two storeys, or
- Class 2 to 9, Type C building

In doing this, the candidate must submit the following two documents:

a. The inspection checklist used

b. The rectification plan which outlines:

i. What must be rectified

ii. Why it must be rectified (with reference to appropriate standard, code or plan specification, etc)

iii. The recommended order in which rectifications should be done

iv. Expected duration of each rectification and when they are expected to be rectified by

v. Who will carry out the rectification and how they will be notified

vi. Will any rectifications affect the work remaining schedule, if yes - who did you notify.

# Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- construction methodologies

© Commonwealth of Australia, 2025
Skills Insight

- workplace procedures
- work health and safety (WHS):
  - hierarchy of control
  - duty of care
  - risk assessment
- organisational quality management systems related to:
  - communicating with regulatory authorities
  - worker and contractor payment systems
  - issuing of completion certificates and appropriate documentation
  - finalising project contractual agreements
- onsite communication:
  - emails
  - face-to-face verbal communication
  - telephone contacts
  - site diaries
  - written reports and memoranda

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated workplace is one that fully replicates the resources, environment and any time and productivity pressures that exist in the actual workplace, and which meets industry standards for safety and environmental practices. The simulated workplace environment must be developed in consultation with industry stakeholders. (see Companion Volume for guidance).

Candidates must have access to:

- relevant jurisdictional safety legislation and regulations
- building and construction codes and standards
- relevant project plans and specifications
- organisational quality control documentation relevant to supervising the administration of quality control compliance, communications and recording systems, and work progress and quality
- business and safety equipment and materials to supervise administration processes for a building and construction project onsite.

# CPCCBC4009 Apply legal requirements to building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4009B Apply legal requirements to building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to apply legal requirements to residential and commercial building and construction projects. It includes meeting licensing requirements, complying with financial and insurance laws and meeting the conditions of building contracts.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial --Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, forepersons, estimators and other construction industry personnel responsible for applying legal requirements to residential or commercial building and construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to legal requirements of building and construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

# Unit Sector

Building and Construction

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Identify legislation relating to the construction project. | 1.1 Identify legal requirements from relevant government Acts and regulations appropriate to the type of building and construction project. |
| | 1.2 Identify legal requirements for building contracts, construction insurance, industrial relations obligations and payroll systems. |
| | 1.3 Determine class of building for the project and check for limitations of builder's registration and licence. |
| | 1.4 Identify any construction activity restrictions, limitations and conditions from building approvals and permits for the project. |
| | 1.5 Check licensing requirements or competencies for subcontractors, site supervisors and managers. |
| | 1.6 Identify sustainability, environmental and waste management legislated requirements. |
| | 1.7 Identify work health and safety (WHS) legislation and requirements of Construction work Code of Practice. |
| 2 Apply site safety requirements. | 2.1 Apply all the relevant requirements of WHS regulations that apply to the project. |
| | 2.2 Adapt organisation's workplace procedures and workplace safety requirements to align with the project. |
| | 2.3 Implement strategies to ensure all workers are inducted, informed and regularly updated of their on-site safety responsibilities. |
| 3 Apply legal | 3.1 Apply contract law in accordance with common law principles, relevant state or territory laws and |

| | | |
|---|---|---|
| | requirements. | regulations, and fair trading legislation. |
| | | 3.2 Apply the contract agreements and meet all the conditions during construction of the project. |
| | | 3.3 Confirm all mandatory building, subcontractor and worker's compensation insurances are current and applied to comply with legal requirements. |
| | | 3.4 Administer payroll system which incorporates employee and contractor payments, deduction of taxes, including goods and services tax (GST), tracking of transactions and calculating wages. |
| 4 | Apply industrial relations. | 4.1 Apply workplace and subcontractor agreements and relevant awards to comply with industrial relations legislation. |
| | | 4.2 Identify and apply provisions for training agreements and make information available to all workers. |
| | | 4.3 Take proactive measures to ensure discrimination and harassment are not practiced in the workplace. |
| 5 | Resolve disputes and complaints. | 5.1 Apply dispute resolution processes following organisational policies. |
| | | 5.2 Address complaints promptly, consult with complainant and resolve issue with the best solution for all. |
| | | 5.3 Record dispute outcome and maintain documentation. |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for CPCCBC4009 Apply legal requirements to building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4009B Apply legal requirements to building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying legal requirements to one residential or commercial building and construction project.

In doing this, the candidate must:

- identify and apply relevant legislative requirements applicable to the building and construction project
- apply legal obligations for:
  - insurance covering workers, materials and building
  - industrial relations, financial transactions, payment of wages and payment of subcontractor and supplier invoices
  - contractual agreements
- apply building and construction standards and codes during construction.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- builder registration and licensing
- Construction work Code of Practice
- appropriate government legislation:
  - business registration and licensing
  - industrial relations
  - work health and safety (WHS)
  - taxation and financial transactions
  - insurance
  - waste management and environmental protection

- organisational policies and procedures.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction legislation
- current building and construction codes and standards
- relevant construction industry contracts
- organisational policies and procedures, insurance, industrial relations and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to obtain legal and building and construction information and record outcomes of disputes.

# CPCCBC4012 Read and interpret plans and specifications

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4012B Read and interpret plans and specifications. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to read and interpret plans and specifications applicable to residential and commercial projects. It includes identifying site characteristics, features of the proposed building and details of the construction.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

The unit of competency applies to site managers, forepersons, estimators, builders, managers and other building and construction industry personnel who read and interpret plans and specifications for quantity surveying, costing and tendering and construction of building and construction projects.

This unit is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Identify types of plans. | 1.1 Confirm plans, specifications and amendments are the current version. |
| | 1.2 Identify types of plans and aspects of the drawings specific for the intended purpose. |
| | 1.3 Confirm details on plans comply with the specifications. |
| 2 Read and interpret the plan. | 2.1 Distinguish key features on the plans. |
| | 2.2 Identify building location from site plan. |
| | 2.3 Identify building layout, spaces and dimensions from floor plan. |
| | 2.4 Examine detail drawings to determine sizes, thickness and methods of construction. |
| | 2.5 Identify internal linings, external cladding and roof materials from plans and specifications. |
| 3 Identify structural details. | 3.1 Identify concrete footing and slab sizes and position and type of reinforcing. |
| | 3.2 Identify load bearing points of the building. |
| | 3.3 Identify wind bracing and tie-down requirements. |
| 4 Identify non-structural details. | 4.1 Identify provisional sum (PS) and prime cost (PC) items. |
| | 4.2 Locate installation and connection points of services to the building. |
| | 4.3 Identify location of fixtures from plans and details of finishes from specifications. |

# Assessment Requirements for CPCCBC4012 Read and interpret plans and specifications

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4012B Read and interpret plans and specifications. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by identifying and interpreting building and construction information from a set of plans and specifications.

In doing this, the candidate must:

- identify orientation of structures, site contours, datum and reduced levels, and site features to be removed or retained
- identify structural load bearing information of the building and compare information from specification
- check wind bracing materials and tie-down methods for accuracy against the wind bracing table
- interpret essential elements from two-dimensional to three-dimensional format, and apply to estimation, planning and supervisory tasks.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- types of plans:
  - concept drawing/sketches
  - architectural
  - structural
  - civil
  - mechanical
  - electrical
  - plumbing and draining
- parts of a plan:
  - site plan
  - floor plan

© Commonwealth of Australia, 2025 Skills Insight

  - elevations
  - sections
  - details
- drawing conventions:
  - datum and reduced levels (RL)
  - title block
  - scale
  - dimensions
  - abbreviations
- utilities and services plans and specifications
- isometric drawings, oblique drawings, perspective drawings and orthographic drawings
- computer-aided design (CAD) drawings
- building and construction regulations, standards and codes
- classes of buildings
- the NCC
- building information modelling (BIM)
- building and construction methods and terminology
- workplace processes, workplace safety and environmental requirements.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- plans and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- relevant government building and construction and contract legislation
- current building and construction codes and standards
- National Construction Code
- computers, applications and software to access CAD.

# CPCCBC4013 Prepare and evaluate tender documentation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4013A Prepare and evaluate tender documentation. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to evaluate project and contract requirements and prepare and formalise tender documentation in the building and construction industry. It includes interpreting, compiling and documenting essential project information and demands into a final tender document.

It applies to builders, estimators and managers in the building and construction industry who have a responsibility for evaluating and preparing tenders for residential and commercial projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 1 | Research project requirements. | 1.1 | Gather relevant information for tender preparation from current and approved project plans, specifications and project documentation. |
| | | 1.2 | Select appropriate contracts and tender documents. |
| | | 1.3 | Identify and record risks during evaluation of contracts and tender documents. |
| 2 | Prepare tender documentation. | 2.1 | Collate all information for tender preparation and check for accuracy. |
| | | 2.2 | Prepare tender documentation to correspond with selected contracts and organisational processes and procedures. |
| 3 | Attach supporting documentation. | 3.1 | Select and accurately complete relevant documentation required to submit with the tender. |
| | | 3.2 | Attach vital information, drawings, specifications or other supporting evidence to the tender document. |
| | | 3.3 | Prepare and attach client acceptance forms and any amendments and conditions to the tender or contract. |
| 4 | Obtain tender approval or endorsement. | 4.1 | Conduct final evaluation of completed tender documentation. |
| | | 4.2 | Complete appropriate client contract for the project. |
| | | 4.3 | Provide tender documentation to the appropriate staff member for approval or endorsement. |

# Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to:
  - extract and comprehend relevant information from complex document text
- technology skills to:

© Commonwealth of Australia, 2025 Skills Insight

- use tools and devices to communicate and collaborate effectively with others
- use equipment and programs to access and extract information and develop relevant documentation.

# Unit Mapping Information

Supersedes and is equivalent to CPCCBC4013A Prepare and evaluate tender documentation

# Links

Companion volumes to this training package are available at the VETNet website - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad

# Assessment Requirements for CPCCBC4013 Prepare and evaluate tender documentation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC4013A Prepare and evaluate tender documentation. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing tender documents for two contracts, with one being for a residential project and one for a commercial project.

In doing this, the candidate must:

- source and check relevant plans, specifications and tender documentation for currency and amendments
- evaluate risk associated with the tender process.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction regulations, codes and standards
- structure and operations of the organisation's costing, tendering and contracting system
- tender documents and supporting documentation:
  - artist’s impressions
  - building information modelling (BIM)
  - product information
  - promotional materials
  - reports and findings beneficial to the organisation
- project risks associated with tendering:
  - breach of contract
  - project delays
  - payment disputes
  - delays in progress payments
  - circumstances, such as:
    - delivery delays that extend project completion dates
    - labour shortages

© Commonwealth of Australia, 2025 Skills Insight

    - weather
    - exposure through clauses that work against the organisation
    - failure to adequately anticipate labour or materials costs
    - inappropriate funding levels and funding shortfalls
    - industrial disputes through misunderstandings or overt action
    - risk of default or non-performance of key players
- types of building and construction drawings and specifications
- types, scope and usage of labour through the employee and subcontractor systems
- using appropriate costing software programs.

# Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant government legislation
- current relevant building and construction codes and standards
- construction contracts and associated tender documentation
- organisational policies, procedures and other quality documentation to undertake the performance criteria and evidence requirements
- business technology, applications and software to produce tender documentation.

# CPCCCA3010 Install windows and doors

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3010A Install and replace windows and doors. Title change. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to plan, prepare and install window and door units, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Carpentry and Joinery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Plan and prepare. | 1.1 Read and interpret work instructions and plan sequence of work. |
| | 1.2 Plan all work to comply with laws and regulations, the |

# Assessment Requirements for CPCCCA3010 Install windows and doors

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3010A Install and replace windows and doors. Title change. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing in wall frames:
  - a standard window
  - a sliding cavity door unit and door
- constructing and fitting a standard external rebated door frame
- fitting and hanging one door, including door furniture, privacy set and door stops
- fitting and hanging a pair of doors.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards, relevant to installing windows and doors, including *AS2688 Timber and composite doors* and *AS2047 Windows and external glazed doors in buildings*, and *Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors*
- workplace quality policies and standards relevant to installing windows and doors
- safety requirements for installing windows and doors
- flashing requirements and installation techniques relevant to installing windows and doors
- plans, specifications and drawings for installing windows and doors
- types of tools and equipment required to install windows and doors, their characteristics, uses and limitations
- processes for setting out windows and doors
- processes for calculating material requirements for installing windows and doors
- materials relevant to installing windows and doors
- various types of doors:
  - flush panel, framed and panelled, and glazed

© Commonwealth of Australia, 2025 Skills Insight

  - hinged door units including standard doors, sliding, flywire, combination window and door units, door sidelight units (glazed or unglazed) and internal doors
  - jambs, stiles and sills
  - flashing
- door furniture, including flush pulls, latches and deadlocks, push plates and closers, handles and locks
- window, door installation including flashing and fixing
- types of windows and doors, materials used and their characteristics and uses.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

# CPCCCM2002 Carry out hand excavation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCCM2002A Carry out excavation. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to undertake hand excavation tasks to form excavations for footings and the provision of services.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Common

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Plan and prepare for hand excavation. | 1.1 Read and interpret work instructions and plan sequence of work. |
| | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications. |
| | 1.3 | Select and use personal protective equipment (PPE) for each part of the task. |
| | 1.4 | Select tools and equipment, check for serviceability and report any faults. |
| 2 Prepare excavation site and erect safety equipment. | 2.1 | Inspect work site to locate above ground services and assess hazards and determine risk controls. |
| | 2.2 | Locate service markers or taped areas to ensure underground services are avoided and free from interference. |
| | 2.3 | Establish line and depth using site pegs/profiles to mark excavation limits. |
| | 2.4 | Establish required signage and barricades and other risk controls. |
| | 2.5 | Establish temporary drainage system to divert surface and sub-surface water from excavation. |
| 3 Dig excavations. | 3.1 | Dig excavations with hand tools to route, line and depth, following procedures to minimise risk to self and others. |
| | 3.2 | Install basic trench/excavation support. |
| | 3.3 | Use hand tools to remove loose material from excavation. |
| 4 Check and store tools and equipment. | 4.1 | Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling. |
| | 4.2 | Check, maintain and store tools and equipment and report any faults. |

© Commonwealth of Australia, 2025 Skills Insight

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and equivalent to CPCCCM2002A Carry out excavation.

# Assessment Requirements for CPCCCM2002 Carry out hand excavation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCCM2002A Carry out excavation. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by excavating, by hand, a 3 metre trench with a right angle, .5 metres deep and .5 metres wide.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the Commonwealth and state or territory legislation relevant to carrying out excavations
- workplace quality policies and standards for carrying out excavations
- safety requirements for carrying out excavations
- environmental requirements for carrying out excavations
- types and uses of hand tools and equipment required for carrying out excavations
- locating services on construction sites
- use and types of service markers
- processes for establishing trench line and depth
- temporary drainage systems to divert surface and sub-surface water from excavations
- types of basic trench excavation support.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

© Commonwealth of Australia, 2025 Skills Insight

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

# CPCCCM2006 Apply basic levelling procedures

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent unit CPCCCM2006B Apply basic levelling procedures.

## Application

This unit of competency specifies the outcomes required to carry out levelling in a single plane for the purpose of establishing correct and accurate set-out of building components. It includes the set-up, testing and use of levelling devices, and establishing and transferring heights using a range of levelling equipment.

The unit supports workers in the construction industry who use a variety of common methods and equipment when working with others and as a member of a team. It applies to levelling work on residential and commercial work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions. |
|---|---|---|
| 1. | Plan and prepare. | 1.1. Job requirements are obtained, confirmed with relevant personnel, and applied to planning. |
| | | 1.2 Work site is inspected, and conditions and hazards are identified within scope of own role and reported according to workplace procedures. |
| | | 1.3. ***Health and safety requirements*** for levelling procedures are confirmed and applied to planning. |
| | | 1.4. ***Levelling tools and equipment*** are selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work. |
| | | 1.5. Team roles and verbal and non-verbal communication signals are confirmed, as required. |
| 2. | Set up and use levelling device. | 2.1. Required heights or levels are identified from work instructions. |
| | | 2.2. Levelling device is set up, and ***levelling device tolerance is checked*** according to manufacturer specifications. |
| | | 2.3. Levels are shot and heights are transferred to required location and ***marked*** according to job requirements. |
| | | 2.4. Results of ***levelling activities*** are documented according to organisational requirements. |
| 3. | Clean up. | 3.1. Work area is cleared and materials sorted and removed or recycled according to statutory and regulatory authority requirements. |
| | | 3.2. Tools and equipment are cleaned, checked, maintained and stored according to manufacturer specifications. |

# Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

| Skill | Performance feature |
|---|---|
| Numeracy skills to: | • interpret and calculate levelling readings and measurements. |
| Reading skills to: | • read and interpret documentation from a variety of sources, including drawings and specifications. |
| Writing skills to: | • enter routine data associated with levelling procedures legibly into workplace documentation. |
| Planning and organising skills to: | • plan and schedule work in a logical sequence. |

# Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Health and safety requirements*** must include:

- emergency procedures, including:
  - evacuation
  - first aid
- hazard identification and risk control procedures
- safe operating procedures for levelling, including:
  - manufacturer specifications
  - safe work method statements (SWMS)
  - safety data sheets (SDS)
- selection, correct fitting, and use of personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices
- selection and use of tools and equipment.

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| ***Levelling tools and equipment* must include:** | • each of the following:<br>  • laser levels and targets<br>  • marking equipment<br>  • measuring tapes and rules<br>  • spirit levels and straight edges<br>• two of the following:<br>  • automatic/optical levels<br>  • plumb bobs<br>  • water levels. |
| ***Levelling device tolerance checks*** must include one or more of the following: | • reverse readings for spirit level<br>• two peg test for automatic level. |
| ***Marks*** for heights or levels must include: | • chalk or nail mark<br>• mark on vertical surface<br>• datum or survey peg<br>• drawing or sketch. |
| ***Levelling activities*** must include three or more of the following: | • measuring and recording heights for the installation of signage<br>• positioning offsets and recovery pegs for construction projects<br>• recording ground levels at respective critical set-out points<br>• recording heights or level and the transfer of data points<br>• recording or checking levels in drainage<br>• recording slab or pad levels for placement of steel columns or masonry piers<br>• setting up levelling devices<br>• shooting levels for concrete slabs<br>• transferring levels and heights for formwork. |

# Assessment Requirements for CPCCCM2006 Apply basic levelling procedures

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent unit CPCCCM2006B Apply basic levelling procedures.

## Performance Evidence

A person who demonstrates competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also transfer levels and record differences in height for three different projects as required by job specifications, using at least three of the following levelling devices:

- a spirit level and straight edge
- automatic/optical levelling device
- levelling with water technique
- laser levelling device.

In doing the above work, the person must:

- conduct a two peg test with an automatic/optical level to confirm that the instrument meets manufacturer tolerances
- locate, interpret and apply relevant information in job specifications to the levelling task
- comply with site safety plan, and health and safety regulations applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others, including using agreed communication signals
- confirm accuracy of the readings taken, including set-up and movement of device in two locations
- accurately record results of each levelling procedure according to organisational requirements.

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- characteristics, technical capabilities and limitations of different types of levelling devices
- methods of performing calculations associated with levelling
- processes for setting out levelling tasks
- requirements for line, level and plumb in construction projects
- site and equipment safety requirements relevant to basic levelling procedures
- symbols and construction terminology used when interpreting construction plans
- techniques used when applying basic levelling procedures
- contents of and terms used in job safety analyses (JSA) and safe work method statements (SWMS) and the use of this documentation when levelling.

# Assessment Conditions

Suitable assessment of performance requires:

- equipment and tools:
  - as listed in the range of conditions and assessment requirements
- specifications:
  - job requirements
  - health and safety requirements
  - manufacturer specifications
  - safety data sheets (SDS)
  - SWMS
  - workplace and relevant work site procedures
- relationships with team members and supervisor:
  - work must be completed as part of a team and under direct supervision and observation
- timeframe:
  - according to job requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPCCCM2010 Work safely on scaffolding higher than two metres

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

## Application

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above two metres from ground level and where fall protection measures are required. It covers safe methods for accessing the work site; and safe methods of moving or passing tools, equipment and materials to heights above two metres, including handling methods that avoid excessive bending or twisting.

The unit supports construction workers operating from scaffolding over two metres in height that has already been constructed with signage and exclusion barriers in place, in order to reach upper storeys or roofs of buildings. It applies to workers who need to control the risk of falling and of falling objects when working on site or removing scaffold components.

It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Competency Field

Common

## Unit Sector

Construction

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions. |
|---|---|
| 1. Identify work requirements. | 1.1. Site of proposed work at heights is identified from relevant information. |
| | 1.2. Tasks to be completed are identified from work orders and supervisor instructions. |
| | 1.3. Personal protective equipment (PPE) suitable to the job is selected and checked for serviceability. |
| | 1.4. Method of accessing work area is identified according to ***safe work method statement*** (SWMS). |
| | 1.5. Safe work methods for moving tools, equipment and materials to work area are identified to minimise risks. |
| | 1.6. Verbal and non-verbal communication signals are confirmed with team members, supervisor and other personnel working on site, as required. |
| 2. Access work area. | 2.1. Work site is inspected and conditions and ***hazards*** are assessed and reported, as required, and risk controls selected according to SWMS. |
| | 2.2. ***Safety of scaffolding*** is checked and faults are reported to relevant personnel. |
| | 2.3. Arrangements are made to install required access equipment according to SWMS. |
| | 2.4. Access equipment is inspected for defects and issues are reported and rectified according to health and safety requirements. |
| | 2.5. Safe work methods are used to access work area and to move tools, equipment and materials to required locations on the work site. |
| | 2.6. Tools and materials are placed to eliminate or reduce the risk of items falling. |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 3. | Conduct work tasks. | 3.1. | Work is conducted following workplace-approved procedures and SWMS. |
| | | 3.2. | Communication with team members and other site personnel is maintained as required to progress work tasks according to required timelines. |
| | | 3.3. | Fall protection equipment is kept in place and adjusted to cater for movement during work. |
| | | 3.4. | Scaffold components and fall barriers are kept in place during work. |
| 4. | Finalise work processes. | 4.1. | Egress from work area is completed following SWMS and work site supervisor approved methods for moving self, tools and materials to ground level. |
| | | 4.2. | Tools, equipment and materials returned to ground level are cleaned, checked, maintained and stored according to manufacturer specifications. |

# Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

| Skill | Performance feature |
|---|---|
| Numeracy skills to: | • perform measurements relating to checking safety of scaffolding. |
| Oral communication skills to: | • report faults in scaffolding construction or materials<br>• report non-routine hazards to a supervisor. |
| Reading skills to: | • interpret safe work methods and risk control strategies in the SWMS relating to job tasks. |
| Planning and organising skills to: | • plan and schedule work in a logical sequence. |
| Initiative and enterprise | • identify standard controls for routine hazards. |

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Safe work method statement*** must include:

- establishing exclusion areas using signage and barricades
- identifying hazards and assessing risks associated with work site and job tasks
- health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures
- identifying risk control measures to be implemented for job tasks
- safe operating procedures for:
  - accessing, moving within, and leaving work site
  - moving and placing tools, equipment and materials
- using tools and equipment, including PPE, prescribed by legislation, regulations, and work site and workplace requirements
- using tools and equipment at heights.

***Hazards*** to be considered must involve:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials
- light
- manual handling
- moisture
- noise
- stationary and moving plant
- working at heights.

***Safety of scaffolding***

- access gate

# Assessment Requirements for CPCCCM2010 Work safely on scaffolding higher than two metres

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also identify, assess and manage risks while completing three different work tasks on scaffolding higher than two metres at different locations and in different conditions.

The work tasks conducted must involve transporting tools, equipment and materials to the work site; completing the task using the tools, equipment and materials; and then returning them to ground level.

In doing the above work, the person must:

- locate, interpret and apply relevant job task information, standards and specifications
- comply with site safety plan and safe work method statements (SWMS) for access to the work site and completion of the job tasks at heights
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use height access work methods, including inspecting scaffold for faults
- apply knowledge of construction materials to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment to work safely at heights
- use safe handling requirements, based on information provided for equipment, products and materials.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- construction terminology relevant to working at heights

© Commonwealth of Australia, 2025 Skills Insight

- contents of and terms used in job safety analyses (JSA) and SWMS for accessing work sites at heights and for completing job tasks while working at heights
- contents of and terms used in safety data sheets (SDS) relevant to the use of tools, equipment and materials
- emergency procedures relevant to working on scaffolding higher than two metres
- quality requirements relating to the set-up of equipment for accessing heights, and for job tasks completed while working at heights
- requirements of Australian standards and codes of practice governing work at heights, including:
  - AS 6001 Working platforms for housing construction
  - AS/NZS 1576 Scaffolding – General requirements
  - AS/NZS 4576 Guidelines for scaffolding
  - Safe Work Australia Model Code of Practice – Preventing Falls in Housing Construction
- types, characteristics, uses and limitations of plant, tools and equipment, including personal protective equipment (PPE), used for accessing work sites over two metres, and for applying safe work methods to complete job tasks while working at heights
- common faults in scaffolding and access equipment
- workplace and work site health and safety requirements relevant to working at heights.

# Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - scaffolding erected for access to a construction work site higher than two metres
  - access equipment to move self, tools, equipment and materials to working platforms, including ladders and hoists
  - tools, equipment and materials to conduct the work tasks specified in the performance evidence
  - PPE relevant to task
- materials:
  - materials required to perform three work tasks at height
- contingencies:
  - faults in scaffolding construction and access equipment
- specifications:
  - AS 6001 Working platforms for housing construction
  - AS/NZS 1576 Scaffolding – General requirements
  - AS/NZS 4576 Guidelines for scaffolding
  - diagrams or sketches relating to work at heights
  - instructions issued by authorised organisational or external personnel
  - JSA, SWMS and SDS relating to the work to be conducted at heights

© Commonwealth of Australia, 2025 Skills Insight

  - Safe Work Australia Model Code of Practice – Preventing Falls in Housing Construction
  - schedules, plans and specifications for working at heights
  - signage at the work site
  - verbal, written and graphical instructions relating to work to be conducted at heights
- physical conditions:
  - different weather conditions, such as wet or windy weather
- relationships with team members and supervisor:
  - work must be completed as part of a team and under direct supervision and observation
- timeframe:
  - according to job specification.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPCCCM2012 Work safely at heights

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM2010B Work safely at heights. Updated to meet the Standards for Training Packages 2012.

## Application

This unit specifies the skills and knowledge required to work safely on construction sites where the worker has the potential to fall from one level to another.

This unit of competency does not cover the erection of scaffold or work platforms, but it does include identifying and reporting common faults with scaffold or work platform systems.

Work at heights is undertaken in a range of construction work, including new construction, renovation, refurbishment and maintenance.

This unit also applies to workers in other industries who need to control the two separate risks associated with people and objects falling from heights.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the Performance criteria describe what needs to be done to

© Commonwealth of Australia, 2025 Skills Insight

| essential outcomes. | demonstrate achievement of the element. | |
|---|---|---|
| 1 Identify task requirements. | 1.1 | Read work order and associated drawings and consult with relevant persons to determine the proposed work-at-heights task, including where and how work is to be carried out, and the equipment or plant to be used. |
| | 1.2 | Participate in the development of the safe work method statement (SWMS) for the specified task. |
| | 1.3 | Select appropriate work-at-heights control measures including required fall restraint devices and/or fall arrest devices in accordance with workplace and regulatory requirements. |
| | 1.4 | Determine location of anchor points for harness-based work to safely access required work area. |
| | 1.5 | Review completed SWMS and clarify issues with relevant persons. |
| 2 Access and assess work area. | 2.1 | Select personal protective equipment (PPE), check for serviceability and report problems. |
| | 2.2 | Identify unstable, fragile or brittle work surfaces and implement control measures to prevent a fall from height. |
| | 2.3 | Check fall protection equipment, including required fall restraint and fall arrest devices to ensure serviceability and report problems. |
| | 2.4 | Identify, select and install signage and barricade equipment in accordance with SWMS or relevant safe work procedure. |
| | 2.5 | Install/fit fall protection equipment, including fall restraint devices and fall arrest devices as appropriate, within the limitations of licensing requirements, level of authority and SWMS. |
| | 2.6 | Ensure required fall protection, scaffold and barriers have been adequately installed and where necessary certified, in accordance with regulatory and workplace requirements. |
| | 2.7 | Connect to fall protection equipment, including temporary anchor points, without being exposed to a risk |

| | | |
|---|---|---|
| | | of a fall from height. |
| | 2.8 | Consult with relevant persons to confirm fall protection equipment and safety systems are correctly fitted, adjusted and installed, and are appropriate to the task. |
| | 2.9 | Access work area safely and move and place tools, equipment and materials using methods that eliminate or minimise the risk of falling objects. |
| 3 Conduct work tasks. | 3.1 | Undertake work tasks in compliance with the SWMS and workplace requirements. |
| | 3.2 | Traverse between anchor points while remaining connected to the fall prevention system and protected from a risk of a fall from height. |
| | 3.3 | Use PPE appropriate to the task and in accordance with manufacturer requirements. |
| | 3.4 | Maintain communication with relevant persons while working at height. |
| | 3.5 | Keep fall protection equipment in place and adjust to allow for movement during work. |
| | 3.6 | Keep fall prevention equipment adjusted to prevent falling off or through a structure using the restraint technique. |
| | 3.7 | Keep scaffold/work platform components and fall barriers in place during work. |
| | 3.8 | Monitor control measures and consult with relevant persons to respond to changing work practices or site conditions. |
| | 3.9 | Exit from work area removing tools and materials in compliance with worksite procedures, safety and environmental requirements. |

# Assessment Requirements for CPCCCM2012 Work safely at heights

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM2010B Work safely at heights. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by working safely at heights above 2 m on three occasions, using different fall protection equipment/devices on each occasion.

One occasion must include a restraint technique (anchor point) system with a minimum of three anchor points.

The candidate must access the work area, traverse between anchor points and exit from the work area.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for working safely at heights under applicable Commonwealth, state or territory work health and safety (WHS) legislation, Australian Standards and codes of practice:
  - hazard identification and risk control
  - job safety and environmental analyses (JSEAs)
  - safe work method statements (SWMSs)
  - safety data sheets (SDSs)
  - safety manuals and instructions for plant, tools and equipment:
    - operation manuals
    - manufacturer specifications
    - safety signs and load charts for plant
  - signage and barricades
  - selection, fitting and use of personal protective equipment (PPE)
  - environmental and worksite safety plans
  - reporting problems
- processes for planning to work safely at heights:

© Commonwealth of Australia, 2025 Skills Insight

    - assessment of weather and ground conditions that may affect safety while working at heights
    - assessment of conditions and hazards
    - determination of work requirements
    - identification of equipment defects
    - inspection of worksites
- methods for identifying common faults with scaffold or work platform systems
- types, characteristics, uses and limitations of equipment used when working safely at heights:
    - air compressors and hoses
    - anchor points
    - edge protection
    - elevated work platforms (EWPs)
    - fall arrest anchors
    - fall arrest inertia reels
    - guard rails
    - hand and power tools including nail guns
    - ladders
    - power leads
    - rescue equipment
    - ropes
    - safety harnesses, lanyards and attachments such as snap hooks and carabiners
    - scaffolding
    - shock absorbers
    - stairways
    - static line systems
    - temporary anchor systems
    - trestles
- safe methods for accessing work area, traversing between anchor points and exiting from work area including removing tools and materials when working at heights.
-

# Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

© Commonwealth of Australia, 2025 Skills Insight

- industry-standard equipment required to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.

# CPCCCM3001 Operate elevated work platforms up to 11 metres

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent CPCCCM3001C Operate elevated work platforms.

## Application

This unit of competency specifies the outcomes required to operate specific types of elevated work platforms (EWPs) safely and effectively in different locations, including on uneven terrain. The unit includes locating, setting up, operating and shutting down scissor lifts and self-propelled boom lifts with a boom length under 11 metres.

The unit supports construction workers in the safe and effective operation of electrical, hydraulic and mechanical EWPs.

The unit does not cover truck-mounted EWPs, powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more.

It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions. |
|---|---|---|
| 1. | Plan and prepare. | 1.1. Job requirements are obtained, confirmed and applied to planning. |
| | | 1.2. Work site is inspected and terrain level checked to determine stabilising and safe working area requirements. |
| | | 1.3 Work site conditions and hazards are assessed and site health and safety requirements confirmed and applied to planning. |
| | | 1.4 ***Safe work method statement*** (SWMS) for the type of EWP and job and work site requirements is reviewed with relevant personnel and confirmed. |
| | | 1.5. Plant, tools and equipment, including personal protective equipment (PPE), are selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work. |
| | | 1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use. |
| | | 1.7. Verbal and non-verbal communication signals are confirmed with team members, supervisor, and other personnel working on site, as required. |
| | | 1.8. Rescue plan, including use of fall arrest system, is established and practised before using EWP. |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2. | Conduct routine checks of EWP. | 2.1. | Power source is connected to platform equipment according to manufacturer specifications. |
| | | 2.2. | Routine pre-operational equipment checks are carried out according to operator manual or manufacturer specifications, and logbooks for defect checks and EWP maintenance schedules. |
| | | 2.3. | Equipment is switched on in line with start-up procedures, and controls are checked for correct operation and ease of movement. |
| | | 2.4. | EWP is checked to ensure that ***emergency safety devices*** specified in operator manual are present and operating correctly. |
| 3. | Locate EWP in place. | 3.1. | Platform is positioned for work application and stabilisers, if fitted, are engaged to set equipment base level into place according to safe operating procedures. |
| | | 3.2. | Tools, equipment and materials are placed into bucket or on platform according to job application requirements. |
| 4. | Elevate platform to work location. | 4.1. | Fall arrest harness is fitted securely and lanyard is connected to attachment point. |
| | | 4.2. | EWP controls are operated according to manufacturer recommendations and platform is elevated to work position. |
| | | 4.3. | Power is switched off where specified and locking devices are engaged according to operator manual. |
| | | 4.4. | Work is carried out according to job specification, operator manual, and health and safety requirements. |
| 5. | Lower platform and shut down. | 5.1. | Controls are operated according to manufacturer recommendations and platform is lowered to down position. |
| | | 5.2. | Shut-down procedures are carried out according to operator manual instructions and equipment is switched |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | off. |
| 6. | Clean up. | 6.1. Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice, and job specifications. |
| | | 6.2. EWP, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices. |
| | | 6.3. ***Work completion procedures*** are applied and relevant personnel notified that work is finished. |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

| **Skill** | **Performance feature** |
|---|---|
| Numeracy skills to: | • interpret safe working load of EWP from manufacturer specifications<br>• calculate the load to be put on EWP. |
| Oral communication skills to: | • provide work site personnel with key safety information when elevating and lowering an EWP<br>• use listening and questioning to clarify job and health and safety requirements. |
| Reading skills to: | • interpret operator manual instructions for using different controls of EWPs and operating on different types of terrain. |
| Writing skills to: | • legibly complete required documentation, including:<br>  • equipment inspection and handover documents that form part of work completion procedures<br>  • faulty equipment or workplace incident reports. |
| Planning and organising | • plan and schedule work in a logical sequence. |

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Safe work method statement*** must include:

- assessing terrain at work site
- identifying location of overhead power lines directly above or within specified clearance distances as set out in documentation, such as WorkSafe Victoria's 'No Go Zones For Overhead Electrical Power Lines'
- reference to permission to operate EWP from the power authority, if required
- identifying hazards and assessing risks for type of EWP, work site and job tasks, including existence of underground pits
- health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures
- establishing exclusion areas using signage and barricades
- identifying risk control measures to be implemented for job tasks
- safe operating procedures for type of EWP
- safe working load of the EWP
- using tools and equipment, including PPE, prescribed by legislation, regulations, and work site and workplace requirements.

***Emergency safety devices*** must be applicable to the EWP and include three or more of the following:

- bleed valves
- electronic override
- emergency electric hydraulic pump
- emergency or controlled descent device
- ground controls
- manual hydraulic pump.

***Work completion procedures*** must include:

- completing logbook
- completing post-operational checks
- safely and securely storing safety equipment.

# Assessment Requirements for CPCCCM3001 Operate elevated work platforms up to 11 metres

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent CPCCCM3001C Operate elevated work platforms.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also set up and operate each of the following types of elevated work platforms (EWPs) at two different locations on the site, including moving the plant around the work site safely:

- self-propelled boom lift (BL)
- scissor lift (SL).

The following functions and controls must be performed while operating both BL and SL:

- boom up and down
- operate attachments
- operate outriggers, where fitted.

- The following functions and controls must be performed while operating the BL:
- slew left and right
- telescope in and out.

At least one EWP must be set up and operated on uneven terrain, using outriggers as required.

In doing the above, when working above six metres, the person must fit harnesses and attach lanyards as follows:

- energy or shock absorbers, which must be used with all fall arrest equipment

© Commonwealth of Australia, 2025 Skills Insight

- lanyards, which must be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is two metres.

In doing the above, the person must also:

- establish and apply a rescue plan
- apply safe operating procedures, including conducting operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights up to 11 metres
  - working in proximity to others
  - working with dangerous materials
- locate, interpret and apply information relating to job requirements, including:
  - diagrams and sketches
  - environmental requirements, including:
    - clean-up protection
    - noise and dust management
    - vibration management
    - waste management
  - quality requirements relevant to EWP work
  - instructions issued by authorised organisational and external personnel
  - manufacturer specifications, operator manual, and instructions where specified
  - signage
  - industry standards and job specifications
  - verbal, written and graphical instructions
  - work schedules, plans and specifications
- comply with site safety plan and health and safety legislation, regulations and codes of practice applicable to workplace operations
- safely and effectively use tools, plant and equipment relevant to EWP work
- ensure safe working load of EWP is not exceeded
- communicate with others on the work site using verbal and non-verbal communication and communication technology
- work effectively and safely with others on the work site.

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- functions and operational limitations of EWP equipment
- types of EWP equipment and health and safety authority certification of competency requirements
- controls and techniques for using EWP
- health and safety requirements for construction work sites, including:
  - procedures relating to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements, and evacuation procedures
  - hazard identification and risk control procedures, including for handling hazardous materials and dangerous goods
  - selection and use of personal protective equipment (PPE)
  - location and use of firefighting equipment
  - selection and use of tools and equipment
- processes for identifying equipment faults
- general construction terminology relevant to operating EWPs
- safe operating procedures for operating EWPs, including contents of and terms used in:
  - job safety analyses (JSA)
  - safe work method statements (SWMS)
  - safety data sheets (SDS)
- processes for calculating load mass requirements
- quality requirements relevant to operating EWPs
- regulatory and legislative requirements relevant to operating EWPs
- AS 2550 Set: Cranes, hoists and winches - Safe use
- relevant Acts, regulations and codes of practice relevant to working safely at heights on construction sites
- procedures for working safely at heights
- signalling methods and communications relevant to operating EWPs
- types, characteristics, use and limitations of plant, tools and equipment relevant to operating EWPs
- use and limitations of fall rescue systems.

# Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - EWPs
  - extension leads
  - safety harnesses and lanyards
  - special attachments for the EWP when shifting equipment

© Commonwealth of Australia, 2025 Skills Insight

    - PPE prescribed under legislation, regulations, codes of practice and workplace policies and practices
- materials:
    - logbooks
    - service manuals
    - operator manuals
- contingencies:
    - uneven terrain
- specifications:
    - AS 2550 Set: Cranes, hoists and winches - Safe use
    - job specifications
    - manufacturer specifications
    - SWMS
- physical conditions:
    - different weather conditions
- relationship with team members and supervisor:
    - work is conducted as part of a team
- timeframe:
    - according to job requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# CPCCCO2013 Carry out concreting to simple forms

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms. Updated to meet the Standards for Training Packages.

## Application

This unit of competency specifies the skills and knowledge required to safely install formwork, reinforcement and place and finish concrete for the construction of minor slabs, pathways and other minor works to a specified design finish, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Concreting

© Commonwealth of Australia, 2025 Skills Insight

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Plan and prepare. | 1.1 Read and interpret work instructions and plan sequence of work. |
| | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications. |
| | 1.3 Select tools and equipment, check for serviceability and report any faults. |
| | 1.4 Select and use personal protective equipment (PPE) for each part of the task. |
| | 1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades. |
| | 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use. |
| 2 Erect simple formwork. | 2.1 Prepare substrate. |
| | 2.2 Review formwork design from drawings. |
| | 2.3 Erect formwork. |
| | 2.4 Install vapour barrier. |
| 3 Place and tie reinforcement. | 3.1 Handle, cut and position reinforcing components. |
| | 3.2 Position reinforcing bars and mesh. |
| | 3.3 Position bar chairs and spacers with minimum edge cover. |
| 4 Place concrete. | 4.1 Clean formwork or excavation of excess material and |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | debris before concrete placement. |
| | 4.2 | Transport concrete by wheelbarrow. |
| | 4.3 | Place concrete in formwork to specified depth. |
| | 4.4 | Screed concrete to the alignment of formwork and specified datums. |
| | 4.5 | Finish surface of concrete to specifications. |
| 5 Strip simple formwork. | 5.1 | Denail timber components following stripping of formwork. |
| | 5.2 | Clean and stack components and store for reuse or bundle for removal. |
| | 5.3 | Remove formwork components from site. |
| 6 Clean up. | 6.1 | Clean up, meeting all legislative and workplace requirements for safety, waste disposal, materials handling and protection of the environment. |
| | 6.2 | Check, maintain and store tools and equipment and report any faults. |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Unit Mapping Information

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms.

# Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad

# Assessment Requirements for CPCCCO2013 Carry out concreting to simple forms

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by carrying out concreting to a simple form slab of at least 1 square metre and 100 mm in depth by:

- preparing substrate
- erecting formwork
- cutting, placing and tying reinforcement
- placing and hand-screeding concrete to the required finished level and job specification.

All work must be planned and performed using appropriate tools and equipment to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to concreting to simple forms
- workplace quality policies and standards relevant to concreting to simple forms
- safety requirements for concreting to simple forms
- types and uses of tools and equipment required for concreting to simple forms
- uses of concreting materials, including:
  - bar chairs
  - bracing

© Commonwealth of Australia, 2025 Skills Insight

  - edge form and boards
  - fabric sheet mesh
  - pegs
  - spacers
  - reinforcing bars
  - vapour barriers
- concreting techniques, including:
  - placing
  - screeding
  - finishing
  - floating
- simple forms of concrete, including:
  - beam thickeners
  - channels
  - garden edges
  - pathways
  - post holes
  - simple concrete aprons and slabs
- finishing, including:
  - broomed
  - trowelled
  - trowelling machine finish
  - wood-floated
- properties and use of concrete relevant to concreting to simple forms, including:
  - uses and limitations at differing strength levels
  - ingredients and proportions
  - maintaining design strength during placement
  - mixing techniques
  - curing techniques
  - vibrating and over-vibration
- levelling techniques for concreting to simple forms
- materials storage and environmentally friendly waste management
- plans, drawings and specifications for concreting to simple forms
- processes for the calculation of material requirements for concreting to simple forms, including volume of concrete
- quality requirements for concreting to simple forms
- simple formwork and reinforcing componentry.

# Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 1. Plan and prepare. | 1.1. Work instructions and operational details are obtained using relevant ***information***, confirmed and applied for ***planning and preparation*** purposes.<br>1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies.<br>1.3. Signage and barricade requirements are identified and implemented.<br>1.4. ***Tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability and any faults are rectified or reported prior to commencement.<br>1.5. Sealant material quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***.<br>1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.<br>1.7. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** requirements, and are applied. |
| 2. Prepare surface to receive sealants. | 2.1. Surface is cleaned free of contaminants such as oil, grease, dust or moisture.<br>2.2. Surface is prepared by sanding and/or cleaning in accordance with preparation specifications. |
| 3. Apply sealant. | 3.1. ***Sealant materials*** are ***applied*** to manufacturer recommendations and specifications.<br>3.2. Care is taken to ensure no air is trapped within |

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | applied sealant. |
| | 3.3. Surfaces are aligned and fixings correctly installed to specifications. |
| 4. Install sealant devices. | 4.1. ***Sealant devices*** are fitted securely to specified positions. |
| | 4.2. Assistance is provided to secure installation of fixtures, assuring level and plumb to line. |
| 5. Clean up. | 5.1. Excessive sealant is removed from joints and surrounding surfaces, and cartridge nozzle or container is sealed securely. |
| | 5.2. Sealants are promptly removed from tools and equipment. |
| | 5.3. Work area is cleared and ***waste material and debris*** are disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specifications. |
| | 5.4. Tools and equipment are cleaned, routinely maintained and returned to store. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action

© Commonwealth of Australia, 2025 Skills Insight

### REQUIRED SKILLS AND KNOWLEDGE

- numeracy skills to apply measurements and calculations relevant to surface areas
- problem solving skills to recognise and take action to rectify minor faults and problems
- teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities.

### Required knowledge

Required knowledge for this unit is:

- AS1940 The storage and handling of flammable combustible liquids
- behaviour of sealant materials used in structures
- job safety analysis (JSA) and safe work method statements
- measurement and calculation techniques relevant to surface areas
- safe materials handling techniques and requirements, including hazardous materials relevant to sealant application work
- safe use of scaffolding and working platforms
- types and performance of sealants used in buildings
- types and use of hand tools and equipment relevant to sealant application and installation work
- workplace and equipment safety requirements.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Overview of assessment** | This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures. |
| **Critical aspects for assessment and evidence required to demonstrate competency in this** | A person who demonstrates competency in this unit must be able to handle and use all the sealant materials and application devices listed in the |

© Commonwealth of Australia, 2025 Skills Insight

## EVIDENCE GUIDE

| | |
|---|---|
| **unit** | range statement, providing evidence of the ability to:<br>• comply with OHS regulations and state and territory legislation applicable to workplace operations<br>• comply with organisational policies and procedures, including quality assurance requirements<br>• select and use appropriate processes, tools and equipment to carry out tasks<br>• adopt and carry out correct procedures prior to and during handling and application of materials<br>• demonstrate safe and effective operational use of tools and equipment<br>• demonstrate safe application in the process of cleaning up application area and cleaning equipment<br>• communicate with others to ensure safe and effective operations. |
| **Context of and specific resources for assessment** | This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.<br>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.<br>Assessment is to comply with relevant regulatory or Australian standards' requirements.<br>Resource implications for assessment include:<br>• sealants and sealant devices appropriate to application tasks<br>• plant and equipment appropriate to application processes<br>• hand tools appropriate to application processes<br>• work location appropriate to activity processes<br>• MSDS information.<br>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. |

© Commonwealth of Australia, 2025 Skills Insight

## EVIDENCE GUIDE

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm a reasonable inference that competency is not only verified under the particular assessment circumstance, but is able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

© Commonwealth of Australia, 2025 Skills Insight

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Information*** includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- material safety data sheets (MSDS)
- memos
- regulatory and legislative requirements pertaining to application of sealants and sealant devices
- relevant Australian standards
- safe work procedures relating to application of sealants and sealant devices
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

***Planning and preparation*** include:

- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.

***Safety*** (***OHS***) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling hazardous materials where applicable in accordance with AS1940 The storage and handling of flammable combustible liquids
- hazard control
- hazardous materials and substances
- organisational first aid

# CPCCWHS1001 Prepare to work safely in the construction industry

## Modification History

| Release | Comment |
|---|---|
| Version 1 | Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry. |

## Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

Construction

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions. |
|---|---|---|
| 1. | Identify health and safety legislative requirements of construction work. | 1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to ***jurisdictional health and safety legislative requirements***. |
| | | 1.2. Duty of care requirements are identified. |
| | | 1.3. Construction safe work practices are identified and explained. |
| 2. | Identify construction hazards and risk control measures. | 2.1. Basic principles of risk management are identified. |
| | | 2.2. Construction hazards are identified and discussed. |
| | | 2.3. Purpose and use of PPE are identified and demonstrated. |
| | | 2.4. Measures for controlling hazards are identified. |
| 3. | Identify health and safety communication and reporting processes. | 3.1. Health and safety documents are identified and discussed. |
| | | 3.2. Roles of designated health and safety personnel are identified and explained. |
| | | 3.3. Safety signs and symbols are identified and explained. |
| | | 3.4. Procedures for reporting hazards, incidents and injuries are identified. |
| 4. | Identify incident and emergency response | 4.1. Procedures for responding to incidents and emergencies are identified and explained. |
| | | 4.2. Procedures for accessing first aid are identified. |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| procedures. | 4.3. | Types and purpose of fire safety equipment are identified and discussed. |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

| Skill | Performance feature |
|---|---|
| Numeracy skills to: | • locate and recognise numbers commonly used in safety signs. |
| Oral communication skills to: | • ask questions to clarify instructions<br>• listen to instructions to identify key safety information<br>• tell another person about a construction problem or hazard. |
| Reading skills to: | • follow simple pictorial safety instructions<br>• follow simple safety instructions that are written in English. |
| Problem-solving skills to: | • select risk control measures. |

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

| | |
|---|---|
| ***Jurisdictional health and safety legislative requirements*** must include at least one of the following state and territory Acts or their equivalent: | • Australian Capital Territory: Work Health and Safety Act 2011<br>• New South Wales: Work Health and Safety Act 2011<br>• Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011<br>• Queensland: Work Health and Safety Act 2011<br>• South Australia: Work Health and Safety Act 2012<br>• Tasmania: Work Health and Safety Act 2012<br>• Victoria: Occupational Health and Safety Act 2004<br>• Western Australia: Occupational Safety and Health Act 1984. |

# Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry

## Modification History

| Release | Comment |
|---|---|
| Version 1 | Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry. |

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- orally explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- orally explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety representatives
  - work health and safety committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat

© Commonwealth of Australia, 2025 Skills Insight

- high visibility retro reflective vest.

# Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments
  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet radiation
  - working at heights, including scaffolding
- construction work that requires a high risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and ultraviolet (UV) protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission

© Commonwealth of Australia, 2025 Skills Insight

    - vehicle or mobile plant accident
- construction incidents, including:
    - incidents resulting in personal injury or damage to property
    - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
    - accessing and using site amenities for drinking water, hand washing and toilets
    - following safety procedures when performing work tasks and using equipment
    - identifying and reporting hazards, incidents and injuries in the workplace
    - keeping the work area clean, tidy and free from debris
    - not using or being affected by drugs and/or alcohol while at work
    - preventing bullying and harassment in the workplace
    - selecting and using required PPE
    - smoking only in designated areas
    - storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
    - emergency information signs: exits, emergency equipment and first aid
    - fire signs: location of fire alarms and firefighting equipment
    - hazard signs and symbols: danger and warning
    - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
    - safety and lockout tags: danger and out-of-service tags.

# Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
    - all of the PPE listed in the performance evidence
- specifications:
    - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must hold the unit *CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry*, or its successor.

# CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

## Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

## Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

# CPCCWP3002 Apply waterproofing process to internal wet areas

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Changes to Performance Evidence and Unit Sector.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCWP3002A Apply waterproofing process to internal wet areas. Updated to meet the Standards for Training Packages 2012.

## Application

This unit specifies the skills and knowledge required to apply waterproofing to internal wet areas, meeting all relevant requirements of Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

It includes identification of the appropriate waterproofing system to be used, its preparation and its application.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Plan and prepare to apply waterproofing process to internal wet areas. | 1.1 Read and interpret work instructions and plan sequence of work. |
| | 1.2 Select and use personal protective equipment (PPE) as required for each stage of the task. |
| | 1.3 Plan all work to comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications. |
| | 1.4 Follow requirements of job safety analyses and safety data sheets. |
| | 1.5 Inspect work site, assess hazards and apply risk controls, including required signage and barricades. |
| | 1.6 Select tools and equipment, check for serviceability and report any faults. |
| | 1.7 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use. |
| 2 Select waterproofing system. | 2.1 Locate internal structure to be waterproofed from drawings and specifications. |
| | 2.2 Check area for soundness and surface defects. |
| | 2.3 Select waterproofing systems suitable for and compatible with site conditions and substrate. |
| 3 Prepare for waterproofing installation. | 3.1 Set out internal wet area and check alignment, fixtures and finished levels for conformity with drawings and specifications, and report defects. |
| | 3.2 Test moisture content in substrate for compatibility with system and report defects. |
| | 3.3 Check adequacy of drainage and report defects. |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | 3.4 | Prepare flashings and termination seals and make ready for installation to manufacturers' specifications. |
| | 3.5 | Check that substrate has a uniform finish to manufacturers' instructions. |
| | 3.6 | Clean and prepare substrate ready for waterproofing. |
| | 3.7 | Prime substrate ready for waterproofing. |
| 4 Apply waterproofing. | 4.1 | Apply waterproofing system to prepared surface to manufacturers' specifications. |
| | 4.2 | Detail and terminate waterproofing membrane in accordance with system requirements. |
| | 4.3 | Check completed waterproofing installation for conformity to manufacturers' specifications. |
| | 4.4 | Document movement joints for subsequent trades. |
| | 4.5 | Perform final inspection and completion activities. |
| | 4.6 | Protect waterproofing membrane. |
| 5 Apply sealants to construction joints. | 5.1 | Select sealant for compatibility with application, substrate and finishes. |
| | 5.2 | Install backing rods and/or release agents to prevent three-sided adhesion. |
| | 5.3 | Apply sealant manufacturers' specifications, tool to required finish and allow to cure. |
| | 5.4 | Perform final inspection and completion activities. |
| | 5.5 | Protect sealant, in accordance with manufacturers' specifications. |
| 6 Clean up. | 6.1 | Clear work area, dispose of materials, and reuse or recycle in compliance with legislation, regulations and codes of practice. |
| | 6.2 | Clean, check, maintain and store tools and equipment in |

© Commonwealth of Australia, 2025 Skills Insight

accordance with manufacturers' recommendations.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and equivalent to CPCCWP3002A Apply waterproofing process to internal wet areas.

# Assessment Requirements for CPCCWP3002 Apply waterproofing process to internal wet areas

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Changes to Performance Evidence and Unit Sector.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCWP3002A Apply waterproofing process to internal wet areas. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by waterproofing an internal wet area, including:

- one shower area, a minimum 1800 millimetres high, 900 millimetres x 900 millimetres wide, incorporating:
  - a niche
  - tap penetrations
  - draining connection
  - water stop/hob
- surrounds for an inserted bath with periphery barrier or water stop.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- requirements of Australian Standards for waterproofing internal wet areas
- safety requirements for waterproofing internal wet areas, including:
  - job safety analyses and/or safe work method statements in accordance with Safe Work Australia Code of Practice for Construction Work or state and/or territory equivalent
  - safety data sheets (SDS)
  - personal protective equipment (PPE)
- manufacturers' specifications for waterproofing systems and materials

© Commonwealth of Australia, 2025 Skills Insight

- assessment and appreciation of moisture content in substrate materials for waterproofing internal wet areas
- waterproofing around fixtures:
  - vanities
  - toilets
  - shower screens
  - taps
  - penetrations
- waterproofing materials, processes and systems for internal wet areas:
  - waterproofing systems/materials:
    - cementitious
    - water-based
    - moisture-cured
    - sealants
    - sprayed material membranes
    - sheet:
      - butyl
      - ethylene propylene diene monomer rubber (EPDM)
      - polyvinyl chloride (PVC)
      - decoupling
  - ancillary materials:
    - adhesives
    - sealants
    - drainage flanges
    - penetration flashings
    - water stops
- internal waterproofing materials, processes and techniques
- types and uses of materials storage and environmentally friendly waste management
- types and uses of plans, drawings and specifications for waterproofing internal wet areas
- types and uses of tools and equipment for waterproofing internal wet areas
- principles and considerations of water exclusion
- processes for the calculation of material requirements for waterproofing internal wet areas
- quality requirements for waterproofing internal wet areas
- termination and flashing principles.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

© Commonwealth of Australia, 2025 Skills Insight

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

# CPCWHS1001 Prepare to work safely in the construction industry

## Modification History

| Release | Comment |
|---|---|
| Release 1 | This version first released with CPC Construction, Plumbing and Services Training Package Release 7.0.<br><br>Supersedes and is equivalent to CPCCWHS1001 Prepare to work safely in the construction industry.<br><br>Amended Foundations Skills:<br>• Included 'written skills' category to the Foundations Skills to support the inclusion of 'written reporting' requirement in the Assessment Conditions.<br><br>Amended Performance Evidence:<br>• Removed the word 'orally' in four instances<br>• Removed reference to 'retro reflective'<br>• Added reference to 'shirt of jacket'<br>• Inclusion of WHS abbreviation.<br><br>Knowledge Evidence:<br>• Inclusion of ultraviolet abbreviation.<br><br>Amended Assessment Conditions:<br>• Added following statement: 'assessment must reflect a range of methods including practical demonstration, oral and written reporting'.<br>• Updated unit reference to CPCCWHS2001 *Apply WHS requirements, policies and procedures in the construction industry*<br>• Changed the word 'done' to 'conduct.' |

## Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

© Commonwealth of Australia, 2025 Skills Insight

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

## Pre-requisite Unit

Nil

| | | | |
|---|---|---|---|
| | construction hazards and risk control measures. | 2.2. | Construction hazards are identified and discussed. |
| | | 2.3. | Purpose and use of PPE are identified and demonstrated. |
| | | 2.4. | Measures for controlling hazards are identified. |
| 3. | Identify health and safety communication and reporting processes. | 3.1. | Health and safety documents are identified and discussed. |
| | | 3.2. | Roles of designated health and safety personnel are identified and explained. |
| | | 3.3. | Safety signs and symbols are identified and explained. |
| | | 3.4. | Procedures for reporting hazards, incidents and injuries are identified. |
| 4. | Identify incident and emergency response procedures. | 4.1. | Procedures for responding to incidents and emergencies are identified and explained. |
| | | 4.2. | Procedures for accessing first aid are identified. |
| | | 4.3. | Types and purpose of fire safety equipment are identified and discussed. |

# Foundation Skills

| This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria. | |
|---|---|
| **Skill** | **Performance feature** |
| Numeracy skills to: | • locate and recognise numbers commonly used in safety signs. |
| Oral communication skills to: | • ask questions to clarify instructions<br>• listen to instructions to identify key safety information<br>• tell another person about a construction problem or hazard. |
| Reading skills to: | • follow simple pictorial safety instructions<br>• follow simple safety instructions that are written in English. |
| Problem-solving skills to: | • select risk control measures. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| Written skills to: | • complete a basic form. |

# Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Jurisdictional health and safety legislative requirements*** must include at least one of the following state and territory Acts or their equivalent:

- Australian Capital Territory: Work Health and Safety Act 2011
- New South Wales: Work Health and Safety Act 2011
- Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011
- Queensland: Work Health and Safety Act 2011
- South Australia: Work Health and Safety Act 2012
- Tasmania: Work Health and Safety Act 2012
- Victoria: Occupational Health and Safety Act 2004
- Western Australia: Occupational Safety and Health Act 1984.

# Unit Mapping Information

Supersedes and is equivalent to CPCCWHS1001 Prepare to work safely in the construction industry.

|---|---|
| Release 1 | This version first released with CPC Construction, Plumbing and Services Training Package Release 7.0.<br><br>Supersedes and is equivalent to CPCCWHS1001 Prepare to work safely in the construction industry.<br><br>Amended Foundations Skills:<br>• Included 'written skills' category to the Foundations Skills to support the inclusion of 'written reporting' requirement in the Assessment Conditions.<br><br>Amended Performance Evidence:<br>• Removed the word 'orally' in four instances<br>• Removed reference to 'retro reflective'<br>• Added reference to 'shirt of jacket'<br>• Inclusion of WHS abbreviation.<br><br>Knowledge Evidence:<br>• Inclusion of ultraviolet abbreviation.<br><br>Amended Assessment Conditions:<br>• Added following statement: 'assessment must reflect a range of methods including practical demonstration, oral and written reporting'.<br>• Updated unit reference to CPCCWHS2001 *Apply WHS requirements, policies and procedures in the construction industry*<br>• Changed the word 'done' to 'conduct.' |

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk

© Commonwealth of Australia, 2025 Skills Insight

- explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire-extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety (WHS) representatives
  - WHS committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat
- high visibility vest, shirt or jacket.

# Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments

© Commonwealth of Australia, 2025 Skills Insight

  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet (UV) radiation
  - working at heights, including scaffolding
- construction work that requires a high-risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and UV protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission
  - vehicle or mobile plant accident
- construction incidents, including:
  - incidents resulting in personal injury or damage to property
  - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
  - accessing and using site amenities for drinking water, hand washing and toilets
  - following safety procedures when performing work tasks and using equipment
  - identifying and reporting hazards, incidents and injuries in the workplace
  - keeping the work area clean, tidy and free from debris
  - not using or being affected by drugs and/or alcohol while at work
  - preventing bullying and harassment in the workplace
  - selecting and using required PPE
  - smoking only in designated areas
  - storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
  - emergency information signs: exits, emergency equipment and first aid
  - fire signs: location of fire alarms and firefighting equipment
  - hazard signs and symbols: danger and warning
  - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
  - safety and lockout tags: danger and out-of-service tags.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - all of the PPE listed in the performance evidence
- specifications:
  - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment must reflect a range of methods including practical demonstration, oral and written reporting.

The assessment of performance evidence must be conducted by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

**Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Assessors must hold the unit *CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry*, or its successor.

# CPPBDN4001 Research and evaluate construction materials and methods for building design projects

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Application

This unit of competency specifies the outcomes required to research and evaluate existing and emerging construction materials and methods for residential, commercial and industrial buildings, as defined in the Building Code of Australia (BCA), including for new buildings, additions and renovations to existing structures, and heritage restorations.

Research and evaluation are undertaken to develop an understanding of the range of contemporary construction materials and methods available; and their application, performance and interaction.

The unit supports drafters who work under the supervision and instruction of architects and building designers, ensuring that accurate and current information and data on construction materials and methods are identified and applied across building design projects.

Licensing, legislative, regulatory or certification requirements apply to building design drafting in some states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements

## Pre-requisite Unit

Nil

## Competency Field

Drafting

## Unit Sector

Building design

© Commonwealth of Australia, 2025 Skills Insight

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions. |
|---|---|---|
| 1. | Review project brief and determine requirements. | 1.1. Project brief is reviewed and information relating to work requirements, BCA class, and type of building to be researched is identified. |
| | | 1.2. Requirements for research are confirmed, as required, with architect or building designer. |
| | | 1.3. ***Compliance requirements*** relevant to project building class and type and research scope are identified. |
| 2. | Research materials and methods for structural elements of specified building. | 2.1. ***Features*** and ***applications of materials used for structural elements*** are researched and evaluated. |
| | | 2.2. Compliance requirements ***for materials used for structural elements*** are researched and interpreted. |
| | | 2.3. Construction methods and systems for ***structural elements*** are researched and evaluated. |
| 3. | Research materials and methods for building envelope of specified building. | 3.1. Characteristics and applications of ***materials used for building envelope*** are researched and evaluated. |
| | | 3.2. Construction methods for building envelope and their compliance requirements are researched and interpreted. |
| 4. | Research systems and components for services of specified building. | 4.1. Features of systems and components for ***services*** are evaluated for costs and benefits according to client requirements for the building project. |
| | | 4.2. Compliance requirements for services are researched and interpreted. |
| | | 4.3. Installation methods for services are researched in relation to different types of systems and components. |
| 5. | Document and maintain research findings. | 5.1. Draft research findings with collated data, recommendations and supporting evidence are produced. |
| | | 5.2. Input into draft research findings is sought according to agreed procedures. |
| | | 5.3. Research findings are finalised and distributed to |

© Commonwealth of Australia, 2025 Skills Insight

appropriate stakeholders.

5.4. Research findings are updated as required.

# Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

| Skill | Performance feature |
|---|---|
| Learning skills to: | • evaluate the validity and reliability of information relating to existing and emerging building materials and methods<br>• independently navigate and find specific information in the National Construction Code (NCC)<br>• use systems for ordering, classifying and storing familiar reference materials and research information for easy retrieval. |
| Numeracy skills to: | • extract and interpret numerical information relating to building materials and methods, including:<br>  • fractions, decimals and percentages, ratio, rates and proportions<br>  • routine formulas and building design mathematical representations and conventions<br>  • two-dimensional and three-dimensional shapes, including compound shapes<br>  • statistical data in complex tables, spreadsheets and graphs<br>• measure, estimate and calculate in order to recommend cost-effective solutions for building design projects. |
| Oral communication skills to: | • listen to and clarify instructions and information relating to building materials and methods received from architect, building designer or manufacturer<br>• consider audience when arguing for or against specific building materials and methods being used in a building project<br>• respond to specific enquiries regarding own research findings, and clarify as necessary. |

© Commonwealth of Australia, 2025 Skills Insight

| Skill | Performance feature |
|---|---|
| Reading skills to: | • use different reading strategies to locate at times complex information about material characteristics and construction methods<br>• understand specialised NCC terminology. |
| Writing skills to: | • record data about building materials in text, table and diagram format<br>• integrate information and ideas from a range of sources and document associated recommendations, using support materials such as photographs, diagrams and graphs. |

# Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

| | |
|---|---|
| ***Compliance requirements*** must include: | • ccurrent Australian standards applicable to the building design<br>• federal, state or territory, and local authority legislation and regulations applicable to the building design<br>• NCC. |
| ***Features*** must include: | • acoustic properties<br>• aesthetic properties<br>• availability<br>• cost<br>• defects<br>• durability<br>• energy efficiency<br>• fire resistance properties<br>• health and safety issues<br>• interaction with other materials<br>• limitations due to manufacturing process<br>• maintenance requirements<br>• structural safety<br>• sustainability features<br>• thermal properties<br>• tolerance. |
| ***Applications of materials used for*** | • coatings required<br>• compatibility with other elements |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| ***structural elements*** must include: | • fixings required<br>• structural application<br>• substructural application<br>• use in specific construction methods or systems. |
| ***Materials used for structural elements*** must include three or more of the following: | • existing and emerging materials<br>• bricks<br>• clay<br>• composite materials<br>• concrete<br>• glass<br>• glass blocks<br>• metals<br>• stone<br>• timber and timber products. |
| ***Structural elements*** must include: | • footings<br>• floors<br>• slabs<br>• walls<br>• roofs. |
| ***Materials used for building envelope*** must include three or more of the following: | • existing and emerging materials<br>• bricks<br>• clay<br>• composite materials<br>• concrete<br>• glass<br>• glass blocks<br>• metals<br>• stone<br>• timber and timber products. |
| ***Services*** must include: | • energy<br>• fire suppression<br>• heating, ventilation and air conditioning (HVAC)<br>• telecommunications<br>• water |

# Assessment Requirements for CPPBDN4001 Research and evaluate construction materials and methods for building design projects

## Modification History

Release 1. New unit.

This version first released with CPP Property Services Training Package Version 1.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also be able to provide evidence of the ability to develop and maintain current research findings to support the building design process for the following three different types of building design projects, as defined in the Building Code of Australia (BCA). At least one of the building design projects must include a Class 10 component:

- one Class 1 building
- one Class 2 building
- one building selected from Classes 3 to 9.

At least one of the above building projects must be two storeys and one building project must be three storeys or more.

The person must produce research findings, with recommendations and supporting evidence for each of the above buildings, based on an evaluation of:

- features and applications of a range of at least three materials suitable for the structural elements and building envelope of each building project
- different construction methods and systems applicable to structural elements and building envelope for each building project
- systems and components for services, having considered:
  - relevant compliance requirements for each building project
  - installation methods for each building project.

The person must also be able to demonstrate a process for:

- seeking feedback on and distributing findings from each of the building projects
- maintaining the currency of research findings.

© Commonwealth of Australia, 2025 Skills Insight

# Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of the sections of the BCA relevant to the classes and types of buildings specified in the performance evidence, including knowledge of the following:

- performance features of building materials detailed in the range of conditions, and the cost benefits of their application
- building construction methods used for different materials that form structural elements and the building envelope
- construction and design terminology to describe the features and applications of materials and construction methods used.

In addition, evidence of the following knowledge must be demonstrated relevant to the classes and types of buildings specified in the performance evidence:

- sources of reliable information on existing and emerging uses of construction materials and methods
- workplace procedures for handling, storing and retrieving research information and outcomes.

# Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance requires:

- equipment:
  - computer with internet access and software currently used in architectural and building design practices
  - telephone
- relationships with team members and supervisor:
  - tasks may be completed as an individual and as a team member, under the direction of an architect, building designer or other relevant person
- specifications – access to:
  - BCA and Australian standards applicable to the buildings specified in the performance evidence
  - manufacturer specifications relating to construction materials and methods used in the buildings specified in the performance evidence.

### Assessor requirements

As a minimum, assessors must satisfy SNR/AQTF assessor requirements.

# CPPSEC2022 Install electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPPSEC2022A Install mechanical lock and locking system. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to install a range of electronic locks and locking systems for door and window applications. It includes upgrading or strengthening hollow doors to increase security, and fitting door control devices and locks to windows, doors and jams.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

This unit may form part of the licensing requirements for people who sell, supply, advise on, install, maintain, monitor, repair or service security equipment and systems in those states and territories where these are regulated activities.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe what needs to be done to demonstrate achievement of the element. |
|---|---|
| 1 Prepare to install electronic lock and locking systems. | 1.1 Review work instructions to confirm installation timeframes, client needs, site location and equipment requirements, and clarify issues with relevant persons. |
| | 1.2 Identify and obtain electronic lock and locking system to be installed following workplace procedures. |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | 1.3 | Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks. |
| 2 Plan and organise installation operation. | 2.1 | Plan and prioritise work tasks allowing sufficient time to meet work instructions. |
| | 2.2 | Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation. |
| | 2.3 | Select and organise required materials and hardware for product installation suitable to the specific installation surfaces and procedures. |
| | 2.4 | Inspect installation area to identify and control or report risks and hazards. |
| 3 Conduct installation procedures. | 3.1 | Use safe work practices when carrying out installation procedures according to WHS requirements. |
| | 3.2 | Fit locks to windows, doors and jams in accordance with manufacturers' instructions. |
| | 3.3 | Fit door control devices to allow correct operation of doors in accordance with manufacturers' instructions. |
| | 3.4 | Upgrade or strengthen hollow doors to increase security. |
| | 3.5 | Identify problems impacting the installation and obtain approval from relevant persons to vary the installation plan if required. |
| | 3.6 | Inspect installed electronic locks and locking and system to confirm correct operation and ensure no damage or distortion to the surrounding environment or services. |
| 4 Complete installation and documentation. | 4.1 | Notify installation completion to relevant persons. |
| | 4.2 | Complete installation documentation according to workplace requirements. |
| | 4.3 | Check tools and equipment for faults, wear or damage |

© Commonwealth of Australia, 2025 Skills Insight

and rectify or report problems.

4.4 Restore work area to original condition and remove waste caused by installation operation.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of:
  - plans when locating installation sites for electronic locks and locking systems
  - Australian standards and manufacturers' instructions
- numeracy skills to calculate measurements to accurately position and fix door control devices and locks.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2022A Install mechanical lock and locking system.

## Links

Companion volumes to this training package are available at the VETNet website - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b

# Assessment Requirements for CPPSEC2022 Install electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPPSEC2022A Install mechanical lock and locking system. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing electronic locks and locking systems involving:

- upgrading or strengthening two hollow doors
- fitting three door control devices
- fitting locks to three windows, doors and jams.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing electronic locks and locking systems:
  - licensing requirements and limits of own authority
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- basic carpentry techniques used when installing electronic locks and locking systems
- documentation to be completed when installing electronic locks and locking systems to ensure compliance with licensing and warranty requirements
- general principles of locksmithing
- installation methods and procedures for electronic locks and locking systems
- materials, hardware, tools and equipment including personal protective equipment (PPE) used when installing electronic locks and locking systems
- types, functions and features of electronic locks and locking systems
- types of doors and windows suitable for electronic lock applications
- typical hazards encountered when installing electronic locks and locking systems and the control measures for each:
  - confined spaces

© Commonwealth of Australia, 2025 Skills Insight

  - electrical
  - ground glass
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
- welding and drilling techniques used when installing electronic locks and locking systems.

# Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, electronic locks and locking systems, PPE, tools, materials and hardware required to achieve the performance evidence
- product information and manufacturers' instructions for locks and locking systems being installed.

# CUAACD101 Use basic drawing techniques

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to create a basic visual representation of objects or ideas. It does not relate to drawing as an art form.

It applies to individuals in any context where a basic sketch or drawing of objects, ideas or layouts is required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – art, craft and design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for drawing | 1.1 Clarify purpose of drawings with appropriate people<br>1.2 Identify tools and materials required for basic drawing techniques<br>1.3 Select appropriate tools and materials for basic drawing techniques |
| 2. Produce basic drawings | 2.1 Apply a limited range of techniques to represent objects or ideas<br>2.2 Follow safety instructions when handling tools and materials<br>2.3 Seek feedback on drawings from relevant people and refine |

# Assessment Requirements for CUAACD101 Use basic drawing techniques

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- identify tools, materials and techniques required to produce drawings
- use a range of basic drawing techniques to produce and refine drawings that represent objects or ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list materials and tools commonly used for drawing and explain how to use them safely
- describe different types of drawing techniques.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to materials and tools used in drawing work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD301 Produce drawings to communicate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form.

It applies to individuals who use drawings, either electronic or hand drawn, for personal use or in response to a project or brief. Drawings may include design concepts for objects, processes or spaces, movement sequences for performances or screen productions, exhibitions, tenders, proposals or publications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – art, craft and design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan drawing work | 1.1 Identify drawing requirements from reference material and confirm with appropriate people if required<br>1.2 Identify factors, including contractual, legal and ethical factors, that may impact on how drawing work is undertaken<br>1.3 Gather information about drawing techniques, materials and equipment from a range of sources and determine how they may be used to communicate ideas |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Evaluate information for its application to specific drawing briefs |
| 2. Experiment to represent ideas | 2.1 Explore the capabilities of techniques, materials and equipment<br>2.2 Follow safety procedures for particular techniques, materials and equipment<br>2.3 Select approaches that best suit the purpose of drawings and their presentation context |
| 3. Create drawings | 3.1 Organise materials, tools and equipment for selected techniques<br>3.2 Produce preliminary drawings and discuss their effectiveness with relevant people<br>3.3 Confirm intellectual property and other relevant legislative requirements are met<br>3.4 Finalise drawings, incorporating feedback on work in progress as required<br>3.5 Prepare drawings for the presentation context |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.4 | • Interprets information from familiar sources to determine drawing production requirements and legal and safety constraints |
| Oral Communication | 1.1, 1.2, 3.2 | • Uses questioning and active listening to gather information and opinions from others |
| Navigate the world of work | 1.2, 2.2, 3.3 | • Complies with legal, ethical and safety requirements associated with creative work |
| Interact with others | 3.2 | • Uses accepted practices and protocols in discussions of work progress with others |
| Get the work done | 1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.4, 3.5 | • Identifies and organises relevant information and resource requirements<br>• Analyses drawing requirements and tests the |

# Assessment Requirements for CUAACD301 Produce drawings to communicate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- identify and analyse drawing requirements
- explore techniques, materials and equipment safely
- produce a series of drawings that:
  - show a command of selected techniques
  - successfully communicate the required ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used in drawing
- identify sources of information about different approaches to drawing
- identify work health and safety issues associated with tools and materials used for drawing
- explain intellectual property issues and other legislation relevant to drawing.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment and materials required to produce drawings
- information sources.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD303 Produce technical drawings

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to apply a range of techniques to produce technical drawings that meet required standards and conventions.

It applies to individuals who use technical drawings in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – art, craft and design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for technical drawing work | 1.1 Clarify drawing requirements by referring to project documentation and consulting with appropriate people<br>1.2 Identify factors that may impact on technical drawing work<br>1.3 Select techniques to fit the purpose of the drawings<br>1.4 Prepare equipment and materials according to workplace procedures and safety requirements |
| 2. Create technical drawings | 2.1 Apply appropriate conventions and standards to technical drawings<br>2.2 Prepare and review preliminary drawings in consultation with |

# Assessment Requirements for CUAACD303 Produce technical drawings

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- produce technical drawings which:
  - show a command of selected techniques
  - adhere to technical drawing standards and conventions
  - satisfy specified drawing purposes and concepts
- follow workplace procedures and safety requirements
- use feedback from others to refine and produce final drawings
- meet deadlines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- explain technical drawing techniques and their application to a range of contexts and subject matter
- explain current standards and conventions for technical drawing
- describe work health and safety requirements for preparation of technical drawing materials and equipment.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

© Commonwealth of Australia, 2025 Skills Insight

- equipment and materials required to produce technical drawings
- documented technical drawing requirements
- workplace documentation
- relevant people.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD311 Produce drawings to communicate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form. It involves planning drawing work, experimenting with ideas and producing drawings.

The unit applies to those who use drawings, either digital or hand drawn, for personal use or in response to a project or brief. They allow for visual communication and are used as visual representation tools. Drawings may include design concepts for objects, layout planning, illustrations, processes, sequences or spaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Art, Craft and Design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan drawing work | 1.1 Identify drawing requirements from reference material and confirm with applicable personnel<br>1.2 Identify factors that may impact on how drawing work is undertaken<br>1.3 Gather information about drawing techniques, materials and equipment from different sources<br>1.4 Evaluate information for application to communicating ideas and specific drawings |
| 2. Experiment to represent | 2.1 Explore different drawing techniques with identified materials |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| ideas | and equipment<br>2.2 Select approaches that best suit the purpose of drawings and their presentation context |
| 3. Create drawings | 3.1 Organise materials, tools and equipment for selected techniques<br>3.2 Produce preliminary drawings and compare with drawing requirements in consultation with required personnel<br>3.3 Confirm intellectual property and other applicable legislative requirements are met<br>3.4 Finalise drawings, incorporating feedback on work in progress as required<br>3.5 Prepare drawings for presentation context |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets information from familiar sources to determine drawing production requirements and legal and safety constraints |
| Oral Communication | • Gathers information and opinions from others using questioning and active listening techniques |
| Self-management | • Complies with safety requirements associated with creative work |
| Teamwork | • Uses accepted practices and protocols in discussions of work progress with others |
| Initiative and enterprise | • Analyses drawing requirements and tests the capabilities of materials, tools and equipment when determining the approach for final production that meets drawing requirements |

# Unit Mapping Information

Supersedes and is equivalent to CUAACD301 Produce drawings to communicate ideas.

# Assessment Requirements for CUAACD311 Produce drawings to communicate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce drawings to communicate at least three different ideas.

In the course of the above, the candidate must:

- identify and analyse drawing requirements
- explore techniques, materials and equipment according to required safety procedures
- determine intellectual property requirements
- produce drawings that:
  - show a command of selected techniques
  - successfully communicate the required ideas.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- properties and capabilities of the range of materials, tools and equipment used in drawing digitally and by hand
- sources of information about different approaches to drawing
- work health and safety requirements associated with tools and materials used for drawing
- intellectual property and copyright requirements and other legislation related to own drawing work.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

© Commonwealth of Australia, 2025 Skills Insight

- equipment, tools and materials required to produce drawings
- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD312 Produce computer-aided drawings

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to use different computer-aided design and drafting (CADD) program functions to produce drawings and documentation. It involves preparing to undertake the work, understanding the object or project brief parameters and measurements and finalising drawings according to requirements. The focus of this unit is on the technical skills required to operate CADD, not on design skills.

The unit applies to those who use computer-aided drawing skills in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Art, Craft and Design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for computer-aided drawing work | 1.1 Clarify drawing requirements and objectives in concept or project information<br>1.2 Identify hardware, software, tools and equipment required for computer-aided design and drafting projects<br>1.3 Set up hardware and software according to operating instructions and organisational procedures as required<br>1.4 Identify and retrieve digitised information required for projects |
| 2. Gather object parameters and measurements | 2.1 Establish and record critical dimensions and data for required designs |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Identify requirements in relation to accuracy, tolerances and other information according to drawing requirements |
| 3. Prepare plots or drawings | 3.1 Access and use CADD functions and features according to operating instructions<br>3.2 Access and use peripheral equipment required for projects<br>3.3 Prepare and review preliminary drawings in consultation with required personnel |
| 4. Finalise drawings | 4.1 Check designs against project objectives and specifications and mark up documentation according to organisational procedures<br>4.2 Identify and make required adjustments to designs in consultation with required personnel<br>4.3 Store data files according to operating instructions and organisational procedures<br>4.4 Submit final drawings within agreed time parameters |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets and evaluates detailed information, instructions and technical specifications in different formats when preparing for and producing computer aided drawings<br>• Reviews accuracy of drawings against specifications and project information |
| Writing | • Records key design information using industry standard conventions and terminology |
| Oral Communication | • Elicits information and opinions from others using questioning and careful listening |
| Numeracy | • Identifies and records measurements and other numerically expressed specifications required for drawings<br>• Operates numerical functions of computer aided drawing equipment and produces drawings to scale and measurements that meet drawing requirements |
| Self-management | • Takes responsibility for following necessary organisational procedures when planning and undertaking work |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Teamwork | • Participates in review of work progress with required personnel |
| Planning and organising | • Plans and organises required equipment, software and data in logical steps according to workplace and project requirements<br>• Prepares preliminary drawings for evaluation by others and makes recommended refinements<br>• Manages time to complete final drawings within established timeframes |
| Technology | • Produces, edits, stores and retrieves drawings using features of digital systems and tools |

# Unit Mapping Information

Supersedes and is equivalent to CUAACD302 Produce computer-aided drawings.

# Assessment Requirements for CUAACD312 Produce computer-aided drawings

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use features and functions of a computer-aided design and drafting (CADD) program to produce at least three different computer-aided drawings that meet project objectives.

In the course of the above, the candidate must:

- select CADD hardware and software to suit project requirements
- follow operating instructions and organisational procedures
- use feedback from others to refine and produce final drawings within specified timelines.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- software, peripheral equipment and tools used for CADD
- ways in which CADD is used within the specific workplace situation
- typical features and functions of CADD programs, including:
  - drawing tools to support methods for drawing lines, arcs, polylines, texts, dimensions
  - view displays
  - edit functions
  - working with layers
  - plotting and printing.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Skills Insight

This includes access to:

- CADD equipment and software
- project or concept information
- operating instructions and organisational procedures
- required personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD314 Make scale models

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to make three-dimensional (3-D) physical scale models in response to specifications. It does not cover the use of 3-D digital software. It involves preparing to make scale models, completing construction of the models and finalising the model construction process according to scale model requirements.

The unit applies to those who work in many industries and use any 3-D form to make scale models as an essential part of the design process for a range productions or events.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Art, Craft and Design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to make scale models | 1.1 Clarify scale model requirements according to documentation, verbal briefs and consultation with required personnel<br>1.2 Identify potential challenges and plan work to minimise risk in consultation with required personnel<br>1.3 Select techniques for model making according to project requirements<br>1.4 Confirm presentation requirements and timelines for final scale models<br>1.5 Confirm equipment, materials and work space requirements for model construction |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.6 Set up work space and equipment according to safety considerations and organisational procedures |
| 2. Complete model construction | 2.1 Make preliminary models representing core dimensions in line with specifications<br>2.2 Review preliminary models against objectives and specifications in consultation with required personnel<br>2.3 Confirm intellectual property and other relevant legislative requirements are met<br>2.4 Make adjustments to models as required<br>2.5 Complete models according to project requirements |
| 3. Finalise model construction process | 3.1 Present models to required personnel according to project and organisational requirements<br>3.2 Follow organisational storage and inventory procedures post-construction<br>3.3 Seek and use feedback from others to improve own skills |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Assesses information from different sources and identifies key objectives of scale model projects, and construction and presentation details |
| Oral Communication | • Elicits information and opinions from others and presents scale model solutions using selected strategies |
| Numeracy | • Interprets and applies numerical specifications and scale requirements to accurate construction and adjustment of scale models |
| Self-management | • Complies with intellectual property and other legislative requirements within the scope of own role and responsibility when planning and undertaking work |
| Teamwork | • Collaborates and cooperates with colleagues to determine design requirements and plan work processes to achieve effective and compliant design outcomes |
| Planning and organising | • Organises tasks in a logical sequence to enable completion within prescribed timeframe<br>• Analyses task requirements to select applicable techniques |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | • Determines production resources required with input from others |

# Unit Mapping Information

Supersedes and is equivalent to CUAACD304 Make scale models.

# Assessment Requirements for CUAACD314 Make scale models

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- make scale models according to at least two different project requirements.

In the course of the above, the candidate must:

- identify appropriate equipment and materials to make three-dimensional (3-D) models
- establish a safe work space for the use of equipment and materials
- use selected techniques and processes to make models that meet project requirements
- use safe work practices at all times
- communicate with others during preparation, construction and presentation of 3-D models.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common model making methods, processes and techniques, including the physical properties and capabilities of equipment, tools and materials used
- ways to present finished scale models
- work space requirements for producing scale models, including set-up of work space for particular types of work
- issues and challenges that arise in making scale models
- intellectual property requirements and legislation associated with making scale models
- work health and safety requirements that apply to scale model making.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Skills Insight

This includes access to:

- documented scale model requirements and organisational procedures
- tools, materials and equipment required to construct scale models
- interaction with appropriate people.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD412 Experiment with moulding and casting techniques

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to develop technical skills in moulding and casting through experimentation. It involves developing different ideas based on own knowledge and existing ideas, extending moulding and casting skills through experimentation and producing moulds and casts.

The unit applies to those who work on the design and production of three-dimensional projects in industrial and creative contexts. In the creative industries this includes ceramic artists, sculptors and prop makers.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Art, Craft and Design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop ideas and designs for moulds and casts | 1.1 Research, adapt and use applicable ideas and approaches from own knowledge of different casting and moulding techniques and other practitioners to inform ideas and designs<br>1.2 Explore ideas and techniques at the same time to strengthen potential outcomes<br>1.3 Consider market potential, required techniques and access to materials, tools and equipment when developing ideas for work<br>1.4 Refine and confirm ideas based on experimentation, research and collaboration with others |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Extend moulding and casting skills | 2.1 Evaluate potential for new approaches to moulding and casting based on capabilities of techniques already used<br>2.2 Adapt or introduce new materials, tools and equipment to achieve different outcomes<br>2.3 Extend capabilities of moulding and casting through experimentation |
| 3. Make moulds and casts | 3.1 Set up or coordinate resources according to safety or other workplace requirements<br>3.2 Create moulds and casts using techniques and media selected from research and experimentation<br>3.3 Review and refine ideas and approaches based on ongoing experiences with the production of work |
| 4. Evaluate own work | 4.1 Review own work in terms of conceptual development and technical execution<br>4.2 Identify areas for future improvement, especially in terms of own skill development<br>4.3 Discuss completed work with required personnel and respond positively to feedback |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets information from different sources and determines applicable moulding techniques |
| Oral communication | • Elicits opinions and feedback form others using detailed and clear language |
| Numeracy | • Determines resource requirements using simple mathematical formulae |
| Self-management | • Takes responsibility for compliance with legal, safety and sustainability practices associated with moulding and casting techniques |
| Teamwork | • Seeks collaborative relationships with others and discusses own ideas, elicits feedback on completed work and identifies skill development opportunities |
| Planning and | • Plans and organises requirements for casting production |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| organising | |
| Initiative and enterprise | • Achieves different results and extends skills and experience using research, exploration and experimentation |

# Unit Mapping Information

Supersedes and is equivalent to CUAACD402 Experiment with moulding and casting techniques.

# Assessment Requirements for CUAACD412 Experiment with moulding and casting techniques

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Produce at least one finished moulded item and one cast item using techniques selected from experimentation.

In the course of the above, the candidate must:

- develop ideas and techniques using research and experimentation and considering intellectual property requirements
- adapt, extend and combine the capabilities of different moulding materials and techniques
- apply techniques using safe and sustainable work practices throughout the moulding, casting and production process
- evaluate own work through self-reflection and collaboration with others.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- physical properties and capabilities of different materials and tools used in moulding and casting
- characteristics of different materials under different treatments and their potential to achieve different effects
- research methodologies used by artists who experiment with moulding and casting techniques
- suppliers of moulding and casting resources needed in a professional practice
- intellectual property requirements and other applicable legislation if using or adapting ideas from other practitioners
- work health and safety and sustainability requirements for the set-up and operation of moulding and casting work space.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- casting and mould-making materials, tools and equipment
- a workspace in which items can be constructed safely
- research tools and information sources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD508 Refine model making skills

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the, skills and knowledge required to refine techniques for the development of three-dimensional (3-D) physical models.

It applies to individuals working across a range of media and industry contexts who use well developed technical and creative skills to build 3-D models independently or as part of a team. The model could be used as a way of testing or presenting ideas. In some cases the model may be a finished work or artistic piece.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – art, craft and design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Maintain professional practice | 1.1 Comply with workplace expectations, and ethical and legal obligations in professional activities<br>1.2 Update information about creative approaches, techniques, materials and equipment relevant to model making<br>1.3 Identify techniques from other industries that could be applied to the development of scale models and make connections in own work<br>1.4 Source new ideas and trends through regular review of the work |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | of others<br>1.5 Use feedback from others to improve own skills in design<br>1.6 Seek opportunities to develop technical and conceptual skills |
| 2. Refine and consolidate own technique | 2.1 Experiment with new techniques, materials and equipment when developing model making ideas<br>2.2 Identify strengths and weaknesses of various approaches through practice and play<br>2.3 Identify and select approaches best suited to own practice<br>2.4 Develop and document a design process that reflects own style and approach |
| 3. Make models to professional standard | 3.1 Interpret ideas, problem-solving tasks or briefs with creativity, accuracy and efficiency<br>3.2 Develop a clear plan and schedule for model making work<br>3.3 Select and assemble appropriate model making materials, tools, techniques and equipment consistent with specifications<br>3.4 Develop precise and accurate scale models as required<br>3.5 Identify opportunities for refinement and re-thinking and make adjustments as required<br>3.6 Communicate the design process and the final solution using detailed work documentation<br>3.7 Present maquettes and models that meet project requirements to key people |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.4, 3.1, 3.3 | • Interprets and evaluates a range of visual and textual information to generate ideas, clarify design project requirements and maintain awareness of industry trends and practices |
| Writing | 2.4, 3.2, 3.6 | • Develops and refines a range of detailed textual and visual documents using clear language and industry |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | specific terminology |
| Oral communication | 1.5, 3.7 | • Uses detailed and clear language to present information to others<br>• Uses active listening and questioning techniques to elicit information and confirm understanding |
| Numeracy | 3.4 | • Interprets measurements for the production of models |
| Navigate the world of work | 1.1, 1.2, 1.6 | • Meets workplace expectations and takes responsibility for compliance with legal and ethical requirements associated with design work<br>• Updates and maintains knowledge of model making practice in order to perform role |
| Get the work done | 1.3, 1.4, 1.5, 1.6, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 3.4 3.5, 3.7 | • Sequences work to a plan, managing resource selection and assembly and the development and refinement of scale model designs and production processes to meet requirements<br>• Selects practical strategies to enhance and support industry expertise including peer feedback, self-directed inquiry and review<br>• Uses experimentation with new materials and techniques and critical analysis of outcomes to inform decisions<br>• Presents resolved solutions that meet all requirements |

# Unit Mapping Information

# Assessment Requirements for CUAACD508 Refine model making skills

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- identify and explore new techniques, resources and materials and integrate into model making
- develop and refine models that meet project specifications and professional standards
- document the design process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify ways in which model making is used in a range of industry contexts
- describe the basic principles and techniques for model making
- outline physical properties and capabilities of the range of materials, tools and equipment used for model making
- describe presentation methods for finished models
- describe work space requirements for the production of models, including work space set-up for particular types of model making work
- describe typical issues and challenges that arise in the context of making scale models
- outline the ethical, organisational and legislative requirements associated with model making.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

© Commonwealth of Australia, 2025 Skills Insight

- projects that require construction of models
- tools, equipment and other resources required for constructing models.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD511 Make moulds and casts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to create moulds and casts for a range of artistic and other purposes.

It applies to individuals who work independently in industrial and creative contexts and use well-developed technical skills for the chosen methods of casting or moulding. Individuals typically work as ceramic artists, glass artists, sculptors or prop makers, but the unit is relevant to others working with the design and production of any three-dimensional object.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – art, craft and design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate mould-making and casting approaches | 1.1 Research historical and contemporary theories and practices of mould-making and casting in the context of own work<br>1.2 Evaluate the ways in which casting and moulding may be used in different contexts and for different purposes<br>1.3 Investigate current materials, technologies and options for mould making and casting |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Design and make models for the mould-making and casting process | 2.1 Evaluate the design and production limitations of a variety of models<br>2.2 Design a variety of forms suitable for the mould-making and casting process<br>2.3 Make a variety of forms based on own designs<br>2.4 Evaluate forms to assess aesthetic, functional and technical issues<br>2.5 Make patterns or models suitable for reproduction by mould making and casting<br>2.6 Prepare patterns or models for mould making and casting |
| 3. Select mould-making and casting resources | 3.1 Establish the mould-making and casting needs of specific work projects, including technical specifications, in consultation with relevant people<br>3.2 Select appropriate materials, tools and equipment for the project<br>3.3 Consider the particular safety issues that affect mould-making and casting work<br>3.4 Calculate correct quantities of materials, avoiding wastage where possible |
| 4. Complete construction process | 4.1 Use mould-making and casting materials to meet specific work needs<br>4.2 Select and use different techniques and equipment to achieve desired outcomes<br>4.3 Fabricate one-piece and multi-piece moulds that meet technical specifications<br>4.4 Achieve different outcomes and effects through experimentation with various materials<br>4.5 Determine and allow required curing and drying time<br>4.6 Recognise and resolve technical and design issues in the mould-making and casting process<br>4.7 Apply safe strategies for the use, maintenance and storage of mould-making and casting materials, tools and equipment |
| 5. Evaluate work | 5.1 Review items produced in terms of durability and quality of finish<br>5.2 Assess the work in terms of its creative and aesthetic objectives<br>5.3 Identify and act on the potential for adjustment and refinement in future work |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.3 | • Evaluates and integrates facts and ideas from a range of sources to inform work practice |
| Writing | 1.1, 1.3, 3.1 | • Records facts, information, project requirements and specifications accurately using industry terminology and simple vocabulary |
| Oral communication | 3.1 | • Participates in exchanges with others to elicit required information and establish understanding |
| Numeracy | 3.4, 4.5 | • Calculates resource and material requirements and production time requirements |
| Navigate the world of work | 3.3, 4.7 | • Meets obligations to follow safe practices for mould-making and casting work<br>• Follows required safety practice for the use, maintenance and storage of tools and equipment |
| Get the work done | 1.1, 1.2, 2.1- 2.6, 3.2,<br>4.1- 4.6, 5.1, 5.2, 5.3 | • Plans and organises work in a logical sequence in response to needs of specific projects<br>• Makes a series of analytical decisions in relatively complex situations considering design options for moulds, appropriate casting processes and required resources for projects<br>• Applies systematic, intuitive and experimental approaches to mould construction tasks and recognises and resolves problems encountered in the process<br>• Evaluates the technical properties of products from mould and cast production processes, and their visual and creative qualities and identifies future improvement opportunities |

# Assessment Requirements for CUAACD511 Make moulds and casts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- assess and use information about mould-making and casting in own work
- develop a range of design models suited to reproduction
- produce multiple items using mould-making and casting techniques that meet specified technical and design requirements
- apply safe work practices to the preparation and completion of moulding and casting construction processes
- assess the quality of final work and document future improvement opportunities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- briefly outline historical and contemporary theories and practices of mould-making and casting, relevant to own area of work
- describe in detail how mould-making and casting are used in own area of work
- identify current technologies and equipment used for mould-making and casting and outline their application to different purposes
- list the properties and applications of materials commonly used for mould-making and casting in the relevant work context
- explain reasons for the use of particular materials and techniques to achieve particular effects
- identify common technical problems that arise in the creation of moulds and casts
- detail the workplace health and safety requirements for making moulds or casts in the relevant work context.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- casting and mould-making materials, tools and equipment
- a work space in which items can be made safely.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD537 Refine 3-D design ideas and processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to extend understanding and use of three-dimensional (3-D) design ideas and processes for the production of work at a professional level.

The unit applies to those who work with a wide and potentially complex range of ideas about 3-D design.

No licensing, legislative or certification requirements apply to this unit at time of publication.

## Unit Sector

Visual Communication – Art, Craft and Design

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Originate ideas for 3-D design | 1.1 Obtain design brief from required personnel<br>1.2 Research and explore information and generate ideas for design concepts<br>1.3 Develop initial design concepts consistent with aim of the work or specifications of the brief<br>1.4 Evaluate and explore options and materials that meet design brief requirements<br>1.5 Refine options and select approach that best meets design brief requirements |
| 2. Plan design process | 2.1 Develop clear plan and schedule for design realisation<br>2.2 Organise and allocate resources to meet design brief requirements |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Discuss design process with others involved in design realisation as required<br>2.4 Monitor process and confirm purpose and quality of the design is maintained<br>2.5 Identify difficulties or problems and take action to rectify as required<br>2.6 Maintain documentation according to organisational policies and procedures |
| 3. Refine and consolidate process | 3.1 Develop 3-D designs and design processes that meet design brief requirements<br>3.2 Develop and document design process that reflects own style and approach<br>3.3 Identify opportunities for refinement and review and make adjustments as required<br>3.4 Communicate the design process and final solution according to design brief requirements and organisational policies and procedures<br>3.5 Prepare and present 3-D design solutions to required personnel |
| 4. Maintain expertise | 4.1 Improve own design skills using feedback from others<br>4.2 Maintain currency of industry standards and seek opportunities to further develop technical and conceptual skills<br>4.3 Source new ideas and trends through regular review of the work of others<br>4.4 Keep informed about new creative approaches**,** techniques, materials and equipment for 3-D design |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets and evaluates different visual and textual information to generate ideas, identify requirements of design projects and maintain awareness of industry trends and practices |
| Writing | • Develops and refines different detailed textual and visual documents using clear language and industry specific terminology |
| Oral Communication | • Presents and shares information with others using detailed and clear language |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | • Elicits information and confirms understanding using active listening and questioning techniques |
| Numeracy | • Performs mathematical calculations to schedule work activities and allocate resources within budget requirements |
| Self-management | • Takes responsibility for compliance with legal, ethical and organisational requirements associated with design work |
| Teamwork | • Selects and uses appropriate conventions and techniques when liaising with colleagues to provide information, present designs, seek feedback and gather current industry information |
| Planning and organising | • Develops a structured plan for the design process incorporating scheduling, resource allocation and required communication<br>• Independently manages the development and refinement of the design process in documents that reflects personal style and originality |
| Problem-solving | • Monitors progress and determines solutions to problems as they are encountered |
| Initiative and enterprise | • Develops ideas in response to parameters of a brief using independent research and experimentation |

# Unit Mapping Information

Supersedes and is equivalent to CUAACD507 Refine 3-D design ideas and processes.

# Assessment Requirements for CUAACD537 Refine 3-D design ideas and processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, develop and document effective 3-D design solutions and design processes that meet project requirements.

In the course of the above, the candidate must:

- originate and refine concept for three-dimensional (3-D) designs
- apply applicable ethical, organisational and legislative requirements to design activities
- use feedback and own initiative to extend proficiency and practice in 3-D design work.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- techniques for creating 3-D designs in the particular area of work
- basic principles of 3-D design
- physical properties and capabilities of different equipment, tools and materials used for 3-D design
- common presentation methods for finished 3-D designs
- work space requirements for producing 3-D design, including set-up of work space for particular types of 3-D work
- typical issues and challenges that arise in the context of making 3-D designs
- ethical and organisational requirements associated with 3-D designs.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Skills Insight

This includes access to:

- work specifications and/or design brief
- information sources
- equipment and tools and appropriate work space to produce design work
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAANM302 Create 3D digital animations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to animate simple 3D models and create 3D animations, which may include audio components. The models are for inclusion in interactive media products, short stand-alone animated sequences and basic games.

It applies to individuals who plan and create 3D animated sequences in consultation with relevant personnel in a wide variety of contexts in the digital content industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Animation and Digital Effects

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Clarify animation requirements | 1.1 Clarify 3D animation requirements documented in design briefs with relevant personnel<br>1.2 Examine models to be animated to determine appropriate animation techniques<br>1.3 Identify file formats and delivery platform for animated sequences<br>1.4 Identify factors that may influence animation design approach |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Clarify work flow sequences with relevant personnel to ensure production schedule deadlines are met |
| 2. Plan approach | 2.1 Research animations, artworks and other creative sources that may inspire ideas<br>2.2 Generate a range of ideas for animations that are technically feasible, respond to briefs and provide creative solutions to all design issues<br>2.3 Present ideas to relevant personnel using appropriate design techniques<br>2.4 Adjust approach to incorporate feedback and agree on final design concept<br>2.5 Discuss and select 3D animation software with relevant personnel to ensure animated sequences meet technical and creative requirements<br>2.6 Identify audio assets to support animations as required |
| 3. Produce animated sequences for review | 3.1 Create 3D animations using software and animation techniques to suit design requirements<br>3.2 Adopt safe ergonomic practices when using equipment for long periods of time<br>3.3 Apply basic animation, screen, visual design and communication principles to produce animations<br>3.4 Apply real world camera techniques to virtual cameras used in 3D animation as required<br>3.5 Confirm with relevant personnel that models have not infringed copyright<br>3.6 Render completed animated sequences using appropriate output file formats<br>3.7 Save and store animated sequences using standard naming conventions and version control protocols<br>3.8 Demonstrate 3D animated sequences to relevant personnel for evaluation by agreed deadlines |
| 4. Finalise animated sequences | 4.1 Review animated sequences to assess creative solutions to design briefs, appropriateness to users or audience, and technical feasibility<br>4.2 Discuss and confirm additional requirements or modifications with relevant personnel, and complete changes as required for signoff |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 1.5, 2.1, 2.2, 3.5, 4.1 | • Interprets production documentation and design specifications in relation to own duties and copyright issues |
| Writing | 3.6, 3.7, 4.2 | • Generates and records information for the design of 3D animations in required format<br>• Uses standard naming conventions and version control protocols when saving and storing files |
| Oral Communication | 1.1, 1.5, 2.3-2.5, 4.2 | • Obtains information by listening and questioning<br>• Uses clear language to discuss ideas, contribute information, and express requirements |
| Navigate the world of work | 3.2, 3.5 | • Understands and complies with legislative requirements relevant to role |
| Interact with others | 1.1, 1.5, 2.3-2.5, 3.8, 4.2 | • Responds to and draws on others' perspectives when negotiating design of 3D animations<br>• Collaborates to achieve joint outcomes in the design process, playing an active role in facilitating effective group interaction |
| Get the work done | 1.1-1.5, 2.1-2.3, 2.5, 2.6, 3.3-3.8, 4.1, 4.2 | • Organises and completes animation requirements in line with specifications, arranging consultations at key design points<br>• Takes responsibility for decisions directly related to own tasks<br>• Uses digital software to create drawings and animations and to manage files |

# Assessment Requirements for CUAANM302 Create 3D digital animations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- interpret design specifications and generate a range of creative ideas and concepts that respond to the brief
- collaborate with others to clarify requirements, discuss ideas, select final design concept and review final animations
- use animation software to create 3D animations that meet requirements of design briefs within production deadlines
- correctly name and store animations in appropriate file formats.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain basic animation techniques and principles
- describe screen, visual design and communication principles as they apply to animations
- outline intellectual property considerations if using images from external sources
- outline work health and safety requirements as they apply to using screens and keyboards for extended periods of time.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- production documents and briefs
- resources, equipment and software required for 3D animations

© Commonwealth of Australia, 2025 Skills Insight

- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAANM313 Create 3D digital models

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 5.0. |

## Application

This unit describes the skills and knowledge required to create 3D digital models that are produced primarily for online and mobile device application, and meet technical and design specifications.

The unit applies to those who clarify production requirements and produce 3D models under supervision, but they may have responsibility for planning their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – Animation and digital effects

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Clarify work requirements | 1.1 Clarify requirements and purpose for 3D digital models with reference to production documents<br>1.2 Confirm workflow sequences and production schedule deadlines in consultation with required personnel<br>1.3 Clarify modelling technique that suits production requirements with required personnel<br>1.4 Discuss and select digital modelling software that suits production delivery platform and modelling techniques, with required personnel<br>1.5 Gather and analyse reference materials for visualising 3D models |
| 2. Develop 3D digital | 2.1 Block out models based on reference materials using software |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| models | features and modelling principles<br>2.2 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time<br>2.3 Apply different effects to shape models according to design requirements using software features and geometry<br>2.4 Perform basic rigging to an animated skeleton to test models' topology allows for required deformation<br>2.5 Refine and check integrity of models progressively until they meet design requirements<br>2.6 Confirm with required personnel that models have not infringed copyright<br>2.7 Test and identify model faults, and modify as required<br>2.8 Apply models to required personnel for feedback, and adjust as required |
| 3 Finalise 3D digital models | 3.1 Review 3D models to ensure creative solutions meet design specifications<br>3.2 Discuss and confirm with required personnel additional requirements or modifications to 3D models and undertake necessary amendments<br>3.3 Render and output models in required format and submit to required personnel by agreed deadlines<br>3.4 Make back-up copies of files, and save and store 3D models using standard naming conventions |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Numeracy | • Performs required adjustments to models using knowledge of shapes, symmetry and solids |
| Oral communication | • Explains ideas and requirements clearly and listens carefully to verbal instructions<br>• Confirms understanding using questioning and listening skills |
| Reading | • Analyses textual information from production documents and reference materials to confirm design requirements |
| Writing | • Clarifies requirements and prepares work-related documentation using specific language required for audience |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Planning and organising | • Plans, organises and implements tasks required to meet requirements within deadlines |
| Self-management | • Applies legislative requirements relevant to own role |
| Teamwork | • Responds to and draws on others' perspectives when negotiating design of 3D digital models<br>• Collaborates to achieve joint outcomes in the design process, playing an active role in facilitating effective group interaction<br>• Makes aesthetic and technical decisions in collaboration with others |
| Technology | • Uses digital software to create models and manage files |

# Unit Mapping Information

Supersedes and is equivalent to CUAANM303 Create 3D digital models.

# Assessment Requirements for CUAANM313 Create 3D digital models

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create at least two 3D digital models that meet design requirements and production deadlines.

In the course of the above, the candidate must:

- collaborate with others to clarify requirements, discuss techniques, select modelling software and review models
- use 3D modelling software proficiently to build models and apply various modelling effects
- adopt safe ergonomic practices when using screens and keyboards for extended periods of time
- correctly store 3D models in appropriate file formats using industry naming conventions.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- stages in the production process from initial design through to finished product
- basic modelling principles used to build 3D digital models
- methods of using geometry to create scale, form, weight and volume in 3D models
- standard file naming conventions for saving and storing 3D models
- concept of integrity as it applies to 3D modelling
- relationship between topology and deformation
- processes of rendering as it applies to 3D modelling
- processes for using digital modelling software
- intellectual property and copyright considerations if using images from external sources
- work health and safety requirements relating to using screens and keyboards for extended periods of time.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- production documentation
- software for producing 3D digital models
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAANM512 Create 3D digital environments

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 5.0. |

## Application

This unit describes the skills and knowledge required to create 3D digital environments using appropriate software, reference material and established designs.

The unit applies to those who follow technical and design specifications to produce 3D environments to scale. As members of a production team they must consider how later production stages rely on, and therefore influence, the creation of their work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – Animation and digital effects

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Clarify work requirements | 1.1 Determine requirements and purpose for 3D digital environments with reference to production documentation<br>1.2 Identify workflow sequences and production deadlines in consultation with required personnel<br>1.3 Select software that best suits the type of production and delivery platform for which 3D digital environments are being created<br>1.4 Gather and analyse reference materials for visualisation of 3D environments |
| 2. Create 3D digital environments | 2.1 Build a previsualisation of environments in relation to reference materials using software features, and submit to required personnel for approval |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Build realistically detailed environment models and progressively refine them until they meet design requirements<br>2.3 Check integrity of models and ensure spatial relationship meets design requirements<br>2.4 Apply texture coordinates according to design requirements<br>2.5 Create and incorporate matte paintings according to design requirements<br>2.6 Apply lighting and shaders according to design requirements<br>2.7 Experiment with different lighting rigs and select a rig that meets design requirements<br>2.8 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time<br>2.9 Continuously refine all aspects of 3D digital environments until required creative effect is achieved<br>2.10 Submit environments to required personnel for feedback on whether production requirements have been met and make final adjustments as required |
| 3. Finalise projects | 3.1 Render and output environments and submit to required personnel by agreed deadlines<br>3.2 Make back-up copies of files, and save and store animations using appropriate output file formats and standard naming conventions<br>3.3 Participate in project evaluations and contribute ideas and suggestions about ways to improve future projects |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Oral communication | • Uses clear language to explain and discuss task requirements<br>• Confirms understanding using questioning and listening techniques |
| Reading | • Interprets and analyses textual information from different sources for idea development and confirmation of job parameters |
| Planning and organising | • Plans and manages workflow processes to ensure design and production requirements are satisfied<br>• Documents task requirements and workflow sequences |
| Self-management | • Follows organisational procedures when managing files and directories<br>• Adheres to work health and safety requirements |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Teamwork | • Uses appropriate communication practices and protocols to present drafts<br>• Refines ideas and discusses project outcomes in collaboration with others |
| Technology | • Uses digital tools to develop refined, technically accurate 3D digital environments for different productions and delivery platforms using digital tools |

# Unit Mapping Information

Supersedes and is equivalent to CUAANM502 Create 3D digital environments.

# Links

Companion Volume Implementation Guide is found on VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5

# Assessment Requirements for CUAANM512 Create 3D digital environments

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create detailed 3D digital environments that meet design requirements and production deadlines for at least two different productions.

In the course of the above, the candidate must:

- apply a range of modelling techniques to achieve creative and realistic effects
- select and proficiently use required animation software to achieve product outcomes
- store 3D environments in required file formats using industry naming conventions
- participate productively in project evaluation for improvement
- adopt safe ergonomic practices when using screens and keyboards for extended periods of time
- work collaboratively with others in a production team to achieve project outcomes.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- strategies to address typical challenges when creating digital environments
- digital modelling techniques used in development of 3D environments
- the realistic construction of 3D environments using spatial relationship elements including scale, form, weight and volume
- strategies to evaluate projects to improve future projects
- concept of integrity in modelling 3D environments
- different 3D animation software
- following concepts and their application to developing 3D environments:
  - texture coordinates
  - matte paintings
  - lighting and shaders

© Commonwealth of Australia, 2025 Skills Insight

- required file formations and industry naming conventions
- work health and safety requirements relating to working with computers and keyboards for extended periods of time.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- production documentation
- interaction with others required to demonstrate the performance evidence
- animation software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUACAL311 Produce calligraphy

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to explore and use different techniques to produce finished calligraphic works. Works are informed by design concepts which are reviewed and adjusted during the work in progress.

It applies to individuals who are developing their expertise in design and technique. They work under supervision but have some independence and use discretion and judgement within defined guidelines.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – calligraphy

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan calligraphy work | 1.1 Discuss ideas and techniques for own calligraphic work in consultation with required personnel<br>1.2 Research historical and contemporary calligraphic practices to apply to own work<br>1.3 Consider intellectual property requirements for own work<br>1.4 Select calligraphy strategies and techniques for own work |
| 2. Create calligraphy work | 2.1 Calculate, select and organise type and quantity of calligraphic equipment, tools and materials based on the requirements of chosen work<br>2.2 Use combined calligraphy techniques, and elements and design |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | principles when creating desired effects<br>2.3 Handle equipment, tools and materials safely and minimise waste throughout all processes<br>2.4 Review work in progress and make adjustments as required to produce final work |
| 3. Finalise and evaluate calligraphy work | 3.2 Dispose of equipment, tools and materials according to workplace safety and sustainability requirements as required<br>3.3 Clean and store equipment, tools and materials according to specific requirements of different items<br>3.4 Seek feedback from relevant personnel on proficiency of work and success in communicating ideas<br>3.5 Evaluate own work using feedback from relevant personnel |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets and evaluates complex and unfamiliar information for supporting design ideas |
| Writing | • Documents comprehensive records of production using clear, industry relevant terminology |
| Oral Communication | • Shares ideas for designs and techniques using industry relevant terminology<br>• Uses questioning and active listening techniques to elicit information and feedback, and confirm understanding |
| Numeracy | • Determines quantities of equipment, tools and materials and measures dimensions of art pieces using basic calculations |
| Self-management | • Follows defined guidelines for legal, safety and sustainability practices |
| Teamwork | • Seeks perspective and guidance from others to inform design ideas |
| Planning and organising | • Organises processes to set up work, assess techniques and produce creative work with guidance from others<br>• Makes routine decisions directly related to own role |
| Problem solving | • Uses trial and error processes to solve technique problems |

# Assessment Requirements for CUACAL311 Produce calligraphy

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create at least two pieces of calligraphic work that adapt and combine calligraphy techniques and show technical proficiency in chosen techniques.

In the course of the above, the candidate must:

- discuss ideas and techniques from historical and contemporary calligraphic practice
- review and document the work process.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- techniques for achieving different effects in calligraphic works
- historical and contemporary principles of calligraphic practice and how they can inform own design ideas
- key characteristics and interrelationships used in calligraphic work to inform elements and principles of design
- tools and equipment used for producing calligraphic work, including:
  - physical features and uses
  - maintenance techniques
  - storage requirements
- physical properties and capabilities of different materials and techniques used to produce calligraphic work
- typical workspace requirements for producing calligraphic work including ways of organising space and equipment for efficient work operation
- procedures for working safely with calligraphy materials, tools and equipment
- copyright, moral rights and intellectual property requirements with reference to calligraphy

© Commonwealth of Australia, 2025 Skills Insight

- techniques, workplace health safety requirements, and sustainability requirements for disposing of calligraphy resources.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, tools, materials and information sources required for producing calligraphic work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUADES201 Follow a design process

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to follow a design process at a basic level, incorporating an element of problem solving to identify and resolve challenges that may hinder the process. It involves establishing the challenges faced in the design process, exploring different ideas for solutions and solving the associated challenges through implementation of solutions.

The unit applies to those who work under direct supervision and respond to specific issues or changes which may relate to product and service requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1.Clarify the challenge | 1.1 Confirm nature and scope of challenge with stakeholders<br>1.2 Agree on specific objectives with stakeholders<br>1.3 Identify constraints that may impact the design process<br>1.4 Identify and source applicable supporting information and assistance |
| 2. Explore different ideas and select solutions | 2.1 Generate different ideas according to challenge requirements<br>2.2 Explore different options and ideas for meeting requirements and discuss with stakeholders |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Analyse different ideas and feedback and select preferred solution<br>2.4 Summarise key ideas and present to stakeholders in required format<br>2.5 Obtain required approvals to progress solution |
| 3. Implement solution | 3.1 Schedule key tasks and organise resources required for implementation<br>3.2 Carry out testing, prototyping or trialling of proposed solution<br>3.3 Maintain any required documentation<br>3.4 Identify problems and seek advice and guidance from others |
| 4. Evaluate solution | 4.1 Check success of solution based on original objectives<br>4.2 Seek feedback from required stakeholders<br>4.3 Review both the solution and the process undertaken and record for future reference |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Reviews own work and identifies improvement opportunities |
| Reading | • Reviews and interprets textual information from different sources to scope job requirements and generate ideas |
| Writing | • Produces meeting summaries using simple language and structure |
| Oral Communication | • Gains information, confirms understanding and seeks feedback using questioning and listening techniques<br>• Presents ideas using correct pronunciation and vocabulary |
| Numeracy | • Recognises and interprets numerical information relating to timeframes and dates |
| Teamwork | • Cooperates with others in immediate work context |
| Planning and organising | • Plans routine tasks with familiar goals and outcomes |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Self-management | • Seeks assistance when problems are beyond immediate responsibilities or experience<br>• Takes responsibility for routine low-impact decisions within familiar situations |
| Initiative and enterprise | • Identifies ideas in use in other contexts and considers how they might be applied in own context with minimal adjustment |

# Unit Mapping Information

Supersedes and is equivalent to BSBDES201 Follow a design process.

# Assessment Requirements for CUADES201 Follow a design process

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- follow the design process for at least two challenges.

In the course of the above, the candidate must:

- determine project objectives, possible constraints and required support materials
- collaborate with others to generate ideas, solve problems and seek approvals and feedback
- schedule tasks and create project documentation that support proposed solutions
- review work and identify at least one area for future improvement.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques used to generate ideas
- key steps in the design process as a way of thinking and solving problems
- sources of information for new ideas, applicable to specific context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment required to implement solutions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES202 Evaluate the nature of design in a specific industry context

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to examine and consider the design process in a specific industry context. It involves exploring industry specific designs, establishing links between designs and own work and retaining knowledge on industry design trends.

The unit applies to those who, in any context, need to develop a basic appreciation and knowledge of the way design works in a particular industry, and of its potential impacts on industry and individual work practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Explore design in given industry context | 1.1 Investigate the nature, history, role and importance of design in one's own industry context<br>1.2 Evaluate roles played by designers and other contributors in design process<br>1.3 Source information on impact of technology on design in the industry |
| 2. Examine links between design and own work | 2.1 Investigate impact of design on own work<br>2.2 Determine role of individual workers across the industry |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | in affecting future design directions |
| 3. Keep up-to-date with industry design trends | 3.1 Identify and access opportunities and maintain currency of knowledge about industry design trends<br>3.2 Evaluate how design trends affect the overall industry and how it operates<br>3.3 Share information and discuss emerging trends with work colleagues<br>3.4 Identify trends that will impact own work and seek opportunities to develop applicable skills |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Identifies and uses opportunities to maintain and improve skills and knowledge |
| Reading | • Reviews textual information from different sources and identifies applicable information |
| Writing | • Prepares specific information using clear and appropriate language to present to other personnel |
| Oral Communication | • Participates in verbal exchanges using vocabulary, style and tone applicable for audience<br>• Clarifies understanding using listening techniques |
| Teamwork | • Achieves shared goals in collaboration with others |
| Planning and organising | • Plans routine tasks with familiar goals and outcomes |
| Initiative and enterprise | • Identifies ideas in use in other contexts and considers how they might be applied in own context with minimal adjustment<br>• Identifies and applies some general design and operating principles of digital tools to inform design work |
| Self-management | • Takes responsibility for routine low-impact decisions within familiar situations |

# Assessment Requirements for CUADES202 Evaluate the nature of design in a specific industry context

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- evaluate the nature of design in at least one industry context.

In the course of the above, the candidate must:

- identify design concepts from different information sources on design and identify how they can be applied to own work.
- identify one or more opportunities to maintain currency of industry trends and design skills
- identify and share information on emerging design trends with colleagues.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- consumer/end-user expectations of design in the chosen industry context
- current and emerging technologies and their effects on design in the chosen industry context
- influential designers, both past and present, in the chosen industry context
- major design trends in chosen industry context
- role of design in chosen industry context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources

© Commonwealth of Australia, 2025 Skills Insight

- sources of information on design in a specific industry context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES301 Explore the use of colour

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to explore the use of colour and to apply colour theory. It involves researching colour and colour theory, experimenting with different colours and colour-combinations and communicating different ideas using colour.

It applies to individuals whose work involves understanding and applying the use of colour according to colour requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Source information on colour and colour theory | 1.1 Identify and access sources of information on colour and colour theory<br>1.2 Evaluate and collate information on colour and its application in different contexts |
| 2. Experiment with colour | 2.1 Develop ideas on testing, challenging or confirming colour theory<br>2.2 Test different colours and colour-combinations through experimentation with different ideas<br>2.3 Confirm safe use of materials, tools and equipment during experimentation with colour |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 3. Communicate ideas through use of colour | 3.1 Investigate how colour communicates particular ideas<br>3.2 Select materials, tools and equipment applicable to idea<br>3.3 Apply colour to communicate idea based on own knowledge of colour and colour theory<br>3.4 Review own use of colour and what it communicates<br>3.5 Seek and obtain feedback from others on way colour has been used and its success in communicating idea<br>3.6 Present and store work samples as required for future use |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Evaluates and integrates facts and descriptions of colour from different texts including text embedded in visual media |
| Writing | • Produces different text types using applicable vocabulary, grammatical structure and conventions<br>• Applies basic referencing and sequencing of professional and archival resources |
| Oral Communication | • Presents ideas, asks questions and listens, seeks feedback and generates ideas |
| Numeracy | • Selects and uses mathematical information for measurement and volume |
| Self-management | • Takes some personal responsibility for adherence to legal and regulatory requirements with specific reference to safety<br>• Takes responsibility for routine low-impact decisions within familiar situations |
| Planning and organising | • Plans, sequences and implements tasks required to achieve outcomes |
| Initiative and enterprise | • Evaluates decisions on how well they meet stated goals<br>• Contributes to design of new approaches within immediate work environment |
| Technology | • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role |

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Requirements for CUADES301 Explore the use of colour

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- communicate at least two different ideas using colour.

In the course of the above, the candidate must:

- research information on colour and colour theory to inform work
- develop ideas through experimentation with different colours and techniques.
- review completed work and gain feedback on the effectiveness of the way colour has been used.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- colour attributes and colour relationships related to communicating ideas
- colour theories and their application in different contexts
- limitations of colour theory
- materials, tools and equipment required to experiment with colour
- ways other practitioners use colour in communicating ideas.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources
- materials, resources and equipment needed to apply colour in the applicable work context.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES302 Explore and apply the creative design process to 2D forms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to explore and creatively apply the design process to the development of two-dimensional (2D) forms. It involves exploring ideas and the creative design process, and communicating different ideas through application of design processes to 2D forms.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Source information on 2D design | 1.1 Identify and access applicable sources of information on 2D design<br>1.2 Evaluate and collate information on features of 2D design |
| 2. Explore the creative design process for 2D forms | 2.1 Generate different ideas and options for use of 2D design using creative thinking techniques<br>2.2 Explore and challenge different ideas using experimentation of different 2D designs<br>2.3 Challenge assumptions, evaluate ideas and refine approaches<br>2.4 Consciously change perspective, and evaluate |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | ideas and situations in new ways |
| 3. Communicate ideas through application of design processes to 2D forms | 3.1 Investigate and examine how a particular idea might be communicated in 2D<br>3.2 Select materials, tools and equipment applicable to the realisation of idea<br>3.3 Apply a creative design process to produce different 2D idea realisations<br>3.4 Examine own application of design process and success in communicating the idea<br>3.5 Seek and obtain feedback from others about the 2D form and its success in communicating idea<br>3.6 Present and store concept realisations and work samples as required |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets textual information from applicable sources to determine and adhere to requirements |
| Writing | • Produces different text types using applicable vocabulary, grammatical structure and referencing conventions |
| Oral Communication | • Participates in verbal exchanges using vocabulary, style and tone applicable to audience<br>• Clarifies understanding using listening techniques |
| Numeracy | • Performs mathematical calculations to produce 2D designs |
| Planning and organising | • Plans and organises required tasks |
| Initiative and enterprise | • Identifies ideas in use in other contexts and considers how they might be applied in own context<br>• Selects new ideas that may improve a process in immediate work context<br>• Evaluates decisions on how well they meet stated goals |
| Self-management | • Takes responsibility for routine low-impact decisions within familiar situations |

# Assessment Requirements for CUADES302 Explore and apply the creative design process to 2D forms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- realise at least two different ideas using creative design processes on two-dimensional (2D) forms.

In the course of the above, the candidate must:

- apply creative thinking techniques and experimentation processes based on available resource materials
- review own work and identify one or more areas for future improvements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques that can be used as part of the design process
- elements and principles of design as applied to 2D forms
- materials, tools and equipment required for the design of 2D forms
- ways an individual can interpret and choose ideas within the design process
- common challenges that arise in the design of 2D forms.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, resources and equipment needed to apply design processes to 2D forms.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES304 Source and apply design industry knowledge

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to source, apply and update general knowledge of the design industry based on problem solving, aesthetics, materials and processes appropriately used within the design industry. It involves researching information on different features of the industry, applying it to one's own work practice, and remaining up-to-date on industry practices.

It applies to individuals who work under supervision and support the professional design process such as evaluating the nature of design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Source and apply information on the structure and operation of design industry | 1.1 Identify and analyse information on the design industry and professional design practice<br>1.2 Inform own design practice and work using knowledge of the design industry<br>1.3 Obtain information on employment obligations and opportunities in the design industry<br>1.4 Apply knowledge of employment obligations and opportunities within day-to-day work activities |
| 2. Seek information on new design | 2.1 Identify sources of information on new technology |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| technology | affecting different areas of design practice<br>2.2 Investigate applicable technologies to assist required work performance |
| 3. Update industry knowledge | 3.1 Identify and use opportunities to update knowledge of the design industry and monitor current issues of concern to the industry<br>3.2 Share updated knowledge with colleagues and peer group as required, and incorporate into day-to-day work activities |
| 4. Apply information on ethical and legal work practices | 4.1 Source information on ethical and legal work practices in the context of design<br>4.2 Share updated knowledge on ethical and legal work practice in day-to-day work activities |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Evaluates different texts to determine legislative and regulatory requirements, and current industry practices |
| Writing | • Produces different text types using applicable vocabulary, grammatical structure and referencing conventions |
| Oral Communication | • Presents information using vocabulary, style and tone appropriate to audience |
| Numeracy | • Identifies and comprehends numerical information in different familiar texts |
| Self-management | • Takes some personal responsibility for adherence to legal, ethical and regulatory requirements<br>• Takes responsibility for routine low-impact decisions within familiar situations |
| Planning and organising | • Plans and organises required tasks<br>• Contributes to design of new approaches within immediate work environment |
| Technology | • Completes routine tasks using common digital systems and tools |

# Assessment Requirements for CUADES304 Source and apply design industry knowledge

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify the following for working in the design industry and its application to own work:
  - employment obligations and opportunities
  - new technology
  - ethical and legal work practices.
- participate in at least one open information sharing session with peers
- investigate one or more new technologies and identify how they can affect and assist design output
- identify and participate in at least one activity to maintain currency in design industry trends and practices.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- relationship between design and allied industries design industry
- impact of legislation, including intellectual property, on the design industry
- ethical work practices in the design industry
- current and emerging technologies used within the design industry
- obligations of employers and employees in the design industry
- key organisations that may provide advice or information about the design industry
- sources of information on the design industry and ways of maintaining current industry knowledge.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sources of information on industry structure, business practices, technologies, and ethical, legal and intellectual property requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES305 Source and apply information on the history and theory of design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to source information on design history and theory, and to apply that information in the individual's design work.

It applies to individuals who work in design and need to develop and maintain a general knowledge of design history and theory.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Collect information on design history and theory | 1.1 Identify and access applicable sources of information on design history and theory<br>1.2 Organise research material and findings for use in design practice, facilitating easy access and cross-referencing |
| 2. Apply information to own area of work | 2.1 Evaluate information in the context of current design practice<br>2.2 Assess which aspects of information on design history and theory could be used or adapted to inform current practice<br>2.3 Apply understanding of own area of work using applicable information in culturally appropriate way |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 3. Update and maintain knowledge of design trends | 3.1 Identify and use opportunities to update and expand knowledge of design trends and developments<br>3.2 Incorporate and integrate knowledge into design activities |

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Identifies, interprets and evaluates information on historical and current design trends from different sources |
| Writing | • Notes findings and sources of information for design knowledge, trends and developments<br>• Documents information for colleagues and peers as requested |
| Oral Communication | • Asks questions and clarifies information, listens to responses and shares ideas with others |
| Self-management | • Understands main tasks, responsibilities and boundaries of own role<br>• Takes responsibility for routine low-impact decisions within familiar situations |
| Planning and organising | • Plans and implements required tasks |
| Initiative and enterprise | • Contributes to new approaches within immediate work environment |
| Technology | • Follows routine procedures for using digital technology to enter, store and retrieve information directly applicable to role |

# CUADES411 Generate design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to generate design solutions in response to a particular design need.

The unit applies to those who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Define the design challenge | 1.1 Determine and evaluate stakeholder needs<br>1.2 Clarify specifications, parameters and constraints of the design challenge in consultation with required personnel<br>1.3 Articulate essence of the design challenge in a format that meets stakeholder requirements |
| 2 Undertake research to inform the design solution | 2.1 Source and evaluate information that may assist in responding to the design challenge<br>2.2 Determine historical, current and future perspectives and trends that might inform design solutions<br>2.3 Identify applicable social, economic, environmental, |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | ethical and cultural issues that may impact design solutions<br>2.4 Analyse, distil and collate information to inform the development of the design solution |
| 3 Communicate and collaborate with others | 3.1 Establish and develop working relationships with required personnel<br>3.2 Seek and integrate input and ideas from others during design process<br>3.3 Inform key stakeholders about progress of the design and related implications<br>3.4 Negotiate and agree on any changed requirements or modifications |
| 4 Generate ideas and responses to the design challenge | 4.1 Examine and integrate ideas generated from research and consultation<br>4.2 Generate different options and ideas using creative thinking techniques |
| 5 Select a design solution | 5.1 Evaluate different options and ideas using developed criteria<br>5.2 Select a solution based on agreed criteria and in consultation with required personnel<br>5.3 Adjust and refine proposed design solution based on research, testing and reflection<br>5.4 Present proposed design solution with applicable supporting documentation according to project requirements |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Researches, collates and analyses textual information from different sources |
| Writing | • Documents ideas, sources and concepts using applicable formats and specific language<br>• Refines and edits work |
| Oral Communication | • Participates in verbal exchanges of ideas and elicits views and opinions of others using listening and questioning techniques |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | • Clarifies, explains or presents information relating to design solution using clear and specific language applicable for audience |
| Numeracy | • Interprets numeric data and applies mathematical calculations applicable to design solution |
| Self-management | • Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in immediate work context<br>• Selects the applicable form, channel and mode of communication for a specific purpose required for own role |
| Teamwork | • Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability |
| Planning and organising | • Takes responsibility for planning and implementing required tasks |
| Problem-solving | • Analyses and evaluates information systematically to aid in decision making and problem solving |
| Initiative and enterprise | • Applies some basic principles of lateral thinking to generate new or innovative ideas |

# Assessment Requirements for CUADES411 Generate design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- generate design solutions according to at least two different stakeholder needs.

In the course of the above, the candidate must:

- develop and document a design solution through research, reflection, and generation and refinement of ideas
- apply principles of functionality, ergonomics, aesthetics and sustainability to the development of ideas
- communicate effectively in collaboration with others in the design process.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- elements and principles of design and their application in the applicable design context
- key features of the wider industry, and the economic, social and historical context design solutions are being generated in
- design trends and technologies, including other designs and the work of other design practitioners in the relevant industry context
- sources of information that support the development of technical and other knowledge
- materials, tools, equipment, techniques and processes used in the generation of design solutions in the applicable industry context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Skills Insight

This includes access to:

- interaction with others for the collaborative nature of the design process
- sources of information on design for the applicable industry context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES412 Interpret and respond to a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief.

The unit applies to those who work in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Work is carried out independently, although guidance is available if required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Interpret design brief | 1.1 Analyse the specifications of design brief<br>1.2 Establish client for the proposed product/service<br>1.3 Identify and clarify specifications, parameters or constraints of design brief in consultation with required personnel<br>1.4 Source and evaluate information pertinent to design brief |
| 2 Explore and develop design concept | 2.1 Generate ideas for design concept through research, exploration and experimentation<br>2.2 Develop initial design concept consistent with design brief parameters<br>2.3 Evaluate and explore options for refining concept that meets |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | design brief parameters<br>2.4 Refine options and select approach which best meets design brief requirements |
| 3 Liaise with client | 3.1 Agree on communication process and frequency of communication with client<br>3.2 Present concepts for work at required stages during design process<br>3.3 Present and explore different options and creative ideas with client when required<br>3.4 Reach agreement on concept for work which complies with design brief |
| 4 Plan production of work | 4.1 Assess specific design production risks<br>4.2 Identify all components required to produce a prototype<br>4.3 Assess technical requirements for production against specified guidelines<br>4.4 Identify and consult with support services required for production<br>4.5 Produce a prototype and evaluate against design brief requirements<br>4.6 Analyse prototype and determine any further adjustments to production requirements<br>4.7 Finalise production specifications supported by required documentation |
| 5 Complete production of work | 5.1 Collect and organise required components for the work<br>5.2 Produce or monitor the production of work and confirm all parameters of design brief are met<br>5.3 Document work progress in format required for the nature of the design and requirements of design brief<br>5.4 Seek client approval for work as required |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Analyses textual information and interprets job specifications |
| Writing | • Develops, documents and amends workplace documentation using |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | specific industry-related terminology |
| Oral Communication | • Participates actively in verbal exchanges of ideas and elicits the views and opinions of others using listening and questioning techniques<br>• Clarifies, explains and presents information using clear language |
| Numeracy | • Interprets numeric data and applies mathematical calculations to produce prototype according to design specification |
| Teamwork | • Identifies the requirements of important communication exchanges, selecting applicable channels, format, tone and content to suit purpose and audience<br>• Collaborates and negotiates with others to achieve joint outcomes |
| Self-management | • Takes responsibility for planning and implementing required tasks |
| Problem-solving | • Analyses and evaluates information systematically to aid in decision making and problem solving |
| Initiative and enterprise | • Applies some basic principles of lateral thinking to generate new or innovative ideas<br>• Understands and explicitly applies some basic principles of lateral thinking to generate new or innovative ideas |

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- interpret and respond to at least two different design briefs.

In the course of the above, the candidate must:

- articulate and document the process of developing own design practice
- adjust work processes via peer feedback and self-evaluation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current and emerging trends and technologies in the design discipline related to the brief described in the performance evidence, and the opportunities and challenges they represent
- sources of information relating to work opportunities and career planning.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, design briefs, resources and equipment used in the development of technical and conceptual skills in the design context described in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES413 Develop and extend design skills and practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer. It involves obtaining and developing conceptual and technical skills, developing an individual style in these skills and evaluating the use of these skills in own work tasks. Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

The unit applies to those who work as a designer, in any industry context, either independently or employed by an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Acquire and develop technical skills | 1.1 Plan strategies for development of applicable technical skills in design practice<br>1.2 Plan and use opportunities to develop and assess technical skills<br>1.3 Identify and use practice, feedback, discussion and evaluation opportunities to continuously improve technical skills<br>1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment<br>1.5 Identify and use applicable media to stimulate technical and professional development |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2 Develop conceptual skills and ideas | 2.1 Engage in ongoing experimentation and exploration of different ideas and techniques<br>2.2 Discuss ideas with others and apply knowledge gained to own work<br>2.3 Stimulate conceptual and technical skills development using studies of others work<br>2.4 Research and share ideas across different design disciplines<br>2.5 Identify and use different opportunities to develop own skills and keep informed about current design practice |
| 3 Develop own voice | 3.1 Explore and experiment with new ideas in making and interpreting design work<br>3.2 Develop own voice and expand practice using technology where required |
| 4 Evaluate own work | 4.1 Seek and apply constructive criticism from others<br>4.2 Evaluate own work against planned strategy for own practice<br>4.3 Evaluate own work in the context of work by others4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes |
| 5 Research work opportunities | 5.1 Identify sources of information relating to work opportunities for designers<br>5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities<br>5.3 Incorporate research results and information into own work and career planning |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Identifies and implements improvements in own creative and technical design skills and practice |
| Reading | • Researches and evaluates a variety of textual information from different sources |
| Writing | • Documents ideas, feedback and research results using clear and specific language |
| Oral | • Participates in different verbal exchanges and presentations using applicable tone and vocabulary to suit the audience |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Communication | • Clarifies and confirms understanding using active listening techniques |
| Self-management | • Determines importance of developing technical skills and of learning from feedback and self-reflection<br>• Broadens areas of interest and focus, seeks new challenges and understands expertise can be adapted and applied in diverse contexts |
| Teamwork | • Cultivates relationships with people with the knowledge, skills and influence to provide collaborative support |
| Planning and organising | • Takes responsibility for planning and implementing required tasks |
| Initiative and enterprise | • Applies basic principles of lateral thinking to generate new or innovative ideas<br>• Recognises potential of new approaches to enhance work practices and outcomes<br>• Evaluates effectiveness of decisions on how well they meet stated goals |
| Problem-solving | • Analyses and evaluates information to aid in decision making and problem solving |
| Technology | • Understands principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology |

# Assessment Requirements for CUADES413 Develop and extend design skills and practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and use strategies to develop or extend skills, ideas and a unique voice.

In the course of the above, the candidate must:

- identify adjustments to work processes as a result of peer feedback and self-evaluation
- research work options, networking and promotional opportunities and identify how to incorporate information into own work and career development.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current and emerging designers in the applicable design discipline
- current and emerging trends and technologies in the applicable design discipline, and the opportunities and challenges they represent
- professional development information and resources available to designers in the applicable design discipline
- sources of information relating to work opportunities and career planning.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, resources and equipment used in the development of technical and conceptual skills in the design context.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES423 Research and apply techniques in spatial design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to test and apply techniques for the production of models or maquettes for spatial designs. It involves planning resources required to meet the design brief, testing different approaches based on research and developing prototypes of products that meet brief requirements.

It applies to individuals who generate ideas and solutions for the layout of spaces. Spatial design solutions are required for exhibitions, fit-outs for exterior spaces or environments, and fit-outs for building foyers and offices, special events and theatre sets.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – design process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan and organise requirements | 1.1 Interpret requirements of design briefs in consultation with required personnel<br>1.2 Research financial, physical and human resources required for developing design concept to prototype stage<br>1.3 Investigate environmental, ethical and technical factors that impact on selection and use of resources<br>1.4 Select and prepare resources based on research into designs and approaches used for similar spaces |
| 2. Test design approaches | 2.1 Produce preliminary visuals according to design brief |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | requirements<br>2.2 Experiment and test design approaches using different techniques<br>2.3 Evaluate, challenge and refine testing processes<br>2.4 Critique own work and seek feedback as required<br>2.5 Document outcomes of testing according to organisational policies and procedures<br>2.6 Select final design approach based on outcomes of testing and input from others |
| 3. Make spatial design models | 3.1 Scope work and determine requirements for object fabrication<br>3.2 Select and organise materials, tools and equipment for fabrication according to design approach<br>3.3 Make models consistent with design concepts and briefs<br>3.4 Respond to feedback and refine work as required<br>3.5 Present models or maquettes within agreed timeframes |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Evaluates detailed textual and visual information and determines conceptual and production requirements, including applicable legislation and standards |
| Writing | • Documents resources information and outcomes from idea development and testing processes using clear, specific language and industry-related terminology |
| Oral Communication | • Elicits feedback and confirms understanding using questioning and active listening techniques<br>• Selects and uses applicable strategies to respond to feedback and present sample designs to others |
| Numeracy | • Identifies financial needs from information that may be embedded in texts and calculates resource requirements |
| Self-management | • Understands purpose of own role and related responsibility for compliance with applicable legal and ethical requirements and design standards when planning and undertaking design work |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Interact with others | • Collaborates with others and discusses work process and outcomes, elicits feedback and identifies improvements<br>• Selects and uses applicable communication conventions and techniques to respond to feedback and present prototypes to others |
| Planning and organising | • Plans, organises and completes tasks required to meet project and time requirements<br>• Makes a series of analytical decisions about design options and applicable resources required for different design outcomes and their representation, using input from others when required |
| Initiative and enterprise | • Directs own exploration of techniques and processes, and critically evaluates test samples |

# Unit Mapping Information

Supersedes and is equivalent to CUADES403 Research and apply techniques in spatial design.

# Assessment Requirements for CUADES423 Research and apply techniques in spatial design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design two products according to at least two different researched spatial design techniques.

In the course of the above, the candidate must:

- interpret requirements in a design brief in consultation with required personnel
- identify and prepare resources required to respond to the design brief
- test and use different approaches and techniques for the design of products, and document the results of testing
- create a prototype based on selected design approach
- adhere to applicable standards and legislative requirements for spatial design.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- factors that impact on the selection and use of resources when researching and applying techniques in spatial design
- materials, tools and equipment, and their capabilities and application to spatial design and manufacture
- role of experimentation and testing in the design process
- techniques and processes used to test design approaches
- legislation and standards relevant to spatial design.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- spatial design briefs
- equipment, tools and materials used to produce models or maquettes of spatial designs
- a suitable work space.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES511 Implement design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. It involves confirming the proposed solution, gathering resources required to implement the solution, testing the solution and developing a prototype, and presenting the prototype to required personnel.

The unit applies to those who work as a designer, in any industry context, either independently or employed by an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Organise resources for realising the design solution | 1.1 Confirm nature and scope of the proposed design solution<br>1.2 Research resources required for developing the design concept to implementation stage<br>1.3 Investigate different factors impacting the selection and use of resources<br>1.4 Select and prepare resources based on research and other legislative or organisational requirements |
| 2. Test the design solution | 2.1 Experiment with the design solution using different techniques and processes<br>2.2 Evaluate, challenge and refine testing processes |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Gain input and feedback from required personnel during testing<br>2.4 Document outcomes of testing according to organisational and design solution requirements<br>2.5 Select final design solution based on outcomes of testing and input from others |
| 3. Develop prototype | 3.1 Create prototype based on agreed approaches<br>3.2 Select and organise materials, tools and equipment according to chosen design solution as required<br>3.3 Expose model to quality checks and ongoing analysis, enhancement and refinement<br>3.4 Compare completed prototype against identified needs and other considerations and make adjustments as required |
| 4. Present prototype or model | 4.1 Identify required personnel design should be presented to<br>4.2 Select format for presentation based on nature of audience and design<br>4.3 Present prototype and optimise clarity, conciseness and appeal |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Researches and interprets textual information from different sources |
| Writing | • Documents research, resource requirements and testing outcomes using applicable language and formats |
| Oral Communication | • Participates in different verbal exchanges and presentations using tone and vocabulary to suit audience<br>• Gains input and feedback using active listening and questioning techniques |
| Numeracy | • Interprets and applies numeric information applicable to design solution<br>• Compares numerical data gathered from testing |
| Self-management | • Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Teamwork | • Takes audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how |
| Planning and organising | • Sequences and schedules routine and complex activities, monitors implementation, and manages required communication |
| Initiative and enterprise | • Makes different critical and non-critical decisions in relatively complex situations, taking client requirements and different into account<br>• Creates new and innovative ideas through exploration, analysis and critical thinking |
| Problem-solving | • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process |

# Unit Mapping Information

# Assessment Requirements for CUADES511 Implement design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement solutions according to at least two different designs.

In the course of the above, the candidate must:

- undertake critical analysis, testing and development of a prototype or aspect of a design solution to meet an identified need
- present prototype to required personnel using applicable best practice methods.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- elements and principles of design and their application in the applicable design context
- key features of the wider industry, with economic, social and historical context for the design solution
- design trends and technologies including other designs and the work of other design practitioners in the applicable design context
- sources of information that support the development of technical and other knowledge in the applicable design context
- technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

© Commonwealth of Australia, 2025 Skills Insight

- other people to discuss the collaborative nature of the design process
- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES512 Establish, negotiate and refine a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief. It involves determining design requirements with stakeholders, developing and refining the design brief and finalising the terms and conditions of the brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish design requirements | 1.1 Identify and make contact with required stakeholders for the design project, in addition to the client<br>1.2 Identify and source information and references required for design project<br>1.3 Undertake critical analysis of sources and extract key information to inform the design project<br>1.4 Determine overall objectives and parameters for design project in |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | collaboration with client and other key stakeholders<br>1.5 Seek, review and act on information needed to inform constructive communication with client |
| 2. Develop and refine design brief | 2.1 Develop concepts and ideas for inclusion in design brief<br>2.2 Undertake own analysis of concept and challenge ideas and approaches taken<br>2.3 Present ideas in applicable format/medium and discuss, debate and critically analyse in collaboration with key stakeholders<br>2.4 Re-evaluate and refine options based on own analysis and discourse with others<br>2.5 Establish and agree on final nature and scope of design brief with client and document details according to organisational policies, procedures and standards |
| 3. Negotiate terms and conditions | 3.1 Negotiate and agree terms and conditions of brief in accordance with applicable organisational and professional standards<br>3.2 Clarify, agree and document roles and responsibilities of those involved in the project<br>3.3 Confirm agreements in writing in accordance with organisational policies and procedures<br>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek required assistance |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Identifies and interprets textual information from various sources |
| Writing | • Develops different documents using applicable vocabulary, context and formatting for different audiences |
| Oral Communication | • Participates in discussions and elicits views of others using questions and listening techniques<br>• Presents ideas and seeks feedback from others using applicable tone, vocabulary and language structures |
| Numeracy | • Interprets and applies numeric information applicable to design brief |
| Self-management | • Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | design of design solution |
| Teamwork | • Seeks information from stakeholders using applicable communication conventions and protocols<br>• Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others<br>• Clarifies and refines ideas and negotiates agreeable outcomes with others using different collaborative techniques |
| Planning and organising | • Sequences and schedules complex activities, monitors implementation, and manages required communication |
| Problem-solving | • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process |
| Initiative and enterprise | • Makes different critical and non-critical decisions in complex and non-complex situations, taking client and organisational requirements and possible constraints into account<br>• Generates new and innovative ideas and concepts through exploration, analysis and critical thinking |

# Assessment Requirements for CUADES512 Establish, negotiate and refine a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and finalise at least two different design briefs for a specific industry purpose.

In the course of the above, the candidate must:

- identify and establish brief requirements with client and key stakeholders.
- determine and include the following information and references to the design brief:
  - legislative and regulatory context
  - financial and budgetary information
  - organisational materials
  - technical reports and data
  - schedules and timelines
- participate in a discussion to clarify, negotiate and agree on terms and conditions.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legal issues that affect negotiations and contracts in the applicable work context
- the design process within the specific industry context/design discipline
- scope, nature and potential variations that occur within design briefs applicable to a specific context
- sources of information to assist the development of design concepts within a specific industry context.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required equipment and media to communicate and present ideas
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES611 Manage design realisation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to manage the process of taking a design from concept to final realisation or production. It involves planning the realisation of designs, managing the implementation of the design and managing different stakeholders throughout the completion of the realisation process.

It applies to individuals working in any industry context or design discipline who take responsibility for turning design concept into reality – a product or service of value to the end-user. This person could be an individual designer-maker or a designer working as part of a larger design/production team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan realisation of design | 1.1 Collect, analyse and maintain required information on the design<br>1.2 Discuss and agree on standards of work and monitoring requirements with required personnel<br>1.3 Develop plan and schedule realisation that meets design requirements<br>1.4 Incorporate key roles and responsibilities linked to timelines and budget in plan |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Implement and monitor realisation of design | 2.1 Organise and allocate resources according to design requirements<br>2.2 Confirm obligations and quality standards are met according to design requirements<br>2.3 Maintain accurate, applicable and complete documentation in accordance with agreed standards<br>2.4 Monitor process through challenging and interrogating own design work<br>2.5 Confirm integrity of design is maintained at all times<br>2.6 Identify difficulties and problems that arise in relation to realisation of design and take action to rectify situation |
| 3. Liaise and negotiate with stakeholders | 3.1 Establish and maintain applicable communication channels with required personnel<br>3.2 Seek and provide information to required personnel according to design requirements<br>3.3 Assess adherence to agreed terms and conditions and negotiate changes in light of changed circumstances as required<br>3.4 Negotiate and agree on revisions with required parties according to organisational policies and procedures |
| 4. Complete design process | 4.1 Finalise design outcomes in accordance with terms and conditions<br>4.2 Seek feedback from required personnel on finished design and make final adjustments as agreed<br>4.3 Evaluate completed design in relation to own work and overall process |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Collates and analyses textual information from different sources applicable to the design realisation |
| Writing | • Produces documentation using applicable structure, language and context to articulate own ideas and positions |
| Oral Communication | • Articulates clearly using specific language and applicable tone to convey information |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | • Confirms understanding using active questioning and listening techniques |
| Numeracy | • Interprets and uses numeric information in budgets and to determine work schedules |
| Self-management | • Works independently and collectively within broad parameters, with a sense of responsibility and ownership of plans, decisions and outcomes<br>• Adheres to organisational policies and procedures |
| Teamwork | • Takes audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how<br>• Fosters a collaborative culture within own sphere of influence, facilitating a sense of cohesion and commitment |
| Planning and organising | • Takes responsibility for planning and organising tasks to meet workplace deadlines, including those tasks that require liaison with other people |
| Initiative and enterprise | • Analyses how variables impact outcomes using different experiences |
| Problem-solving | • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the design process |

# Assessment Requirements for CUADES611 Manage design realisation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the realisation of at least two different designs.

In the course of the above, the candidate must:

- adhere and monitor brief requirements that include:
  - standards, timeframes and budgets
  - technical feasibility
- develop a plan and schedule for design realisation
- participate in a discussion to clarify, negotiate and agree on terms and conditions of design realisation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key responsibilities of required personnel in the design realisation context
- best practices when dealing with setbacks in the production process
- organisational policies and procedures applicable to realising designs
- production processes in a particular industry context or discipline including required materials, tools and equipment.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

© Commonwealth of Australia, 2025 Skills Insight

- resources, tools, materials and equipment required for realising a design in a specific context
- a design concept that the candidate can take to realisation stage
- other people to reflect the collaborative nature of the work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADES612 Research global design trends

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to research and critically evaluate global design trends. It involves research and analysis of information and ideas at a complex level, and the evaluation and extension of the individual's professional skills.

It applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Although predominantly for designers, this unit may also be applicable to those who work in related management, marketing and production areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research design trends | 1.1 Analyse and select formal and informal research strategies and source information on global design trends<br>1.2 Identify and explore new and alternative sources of information<br>1.3 Evaluate the credibility of information gathered and confirm research scope is sufficiently broad |
| 2. Analyse design trends to inform own practice | 2.1 Challenge and extend own perspectives and ways of thinking using researched information<br>2.2 Examine and assess implications and consequences of |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | design trends on own work<br>2.3 Identify creative and commercial opportunities presented by emerging trends and technologies using critical analysis<br>2.4 Develop systems to identify and respond to opportunities |
| 3. Develop and articulate positions and ideas | 3.1 Develop substantiated positions and ideas on global design trends<br>3.2 Generate informed discussion, debate and critical analysis with peers and colleagues<br>3.3 Challenge and refine own positions using debate and feedback |
| 4. Extend own design skills | 4.1 Identify and use opportunities presented by research to extend own design skills<br>4.2 Re-evaluate and refine approaches to work in the context of current and emerging trends<br>4.3 Improve skills continuously using practice, discussion and ongoing evaluation |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Plans and implements strategies to improve and extend own knowledge and skills |
| Reading | • Analyses and synthesises complex and varied information from different sources |
| Writing | • Documents methods for identifying future opportunities using vocabulary and structure applicable to context and purpose |
| Oral Communication | • Elicits the views others by participating in critical discourse and debate on conceptual and technical design trends<br>• Gains input and feedback using active listening techniques |
| Self-management | • Keeps abreast of trends and issues<br>• Appreciates the world of work is dynamic, with changing needs and priorities, and that career development is not a linear process that can be closely controlled |
| Planning and organising | • Takes responsibility for planning and organising tasks required to conduct required research, including how to link with the work of others |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Initiative and enterprise | • Keeps abreast of innovations and good practice beyond own context, borrowing, adapting, combining and redesigning for own purposes<br>• Evaluates outcomes using reflection and feedback from others |
| Technology | • Identifies digital systems, devices and applications with potential to meet current and future needs |

# Unit Mapping Information

Supersedes and is equivalent to BSBDES602 Research global design trends

# Assessment Requirements for CUADES612 Research global design trends

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- conduct research on at least three different global design trends.

In the course of the above, the candidate must:

- document the analysis, critique and synthesis of complex sources to develop own positions and ideas
- collaborate with others at least once during the research process to present and refine own positions and ideas
- identify at least two opportunities to refine own design skills in the context of current and emerging trends.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- broad global design trends that apply to all design disciplines
- business implications and consequences of adopting trends and emergent technologies
- research methodologies and options applicable to researching global design trends
- sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- current and emerging design technologies and trends at a global level in at least one area of design.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Skills Insight

This includes access to:

- sources of information required to research global design trends
- technology required to conduct research
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# CUADIG303 Produce and prepare photo images

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to prepare photo images for integration into an interactive media sequence or product.

It applies to individuals who produce a variety of photo images for production of virtual worlds, from digital still composition to panoramas. They work closely with a programmer or interactive media author and may offer technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Digital Content and Imaging

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Use scanner to capture photo images | 1.1 Source and identify appropriate photographic images according to requirements of photographic project brief<br>1.2 Discuss selection of images with relevant personnel, and check compliance with copyright conditions<br>1.3 Assess scanner features to confirm quality outcomes will meet brief requirements<br>1.4 Operate scanner according to manufacturer’s specifications |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Use appropriate scanner settings to ensure image output meets production requirements<br>1.6 Transfer and store photographic image files to a computer using standard naming conventions |
| 2. Use digital camera to create photo images | 2.1 Clarify photographic project brief with relevant personnel<br>2.2 Assess digital camera features to ensure outcome will meet requirements of brief<br>2.3 Plan camera shots, taking into account lighting, framing, composition and other relevant factors<br>2.4 Load and operate digital camera according to manufacturer's specifications<br>2.5 Consider digital camera focus, exposure and shutter speed to ensure image capture meets production requirements<br>2.6 Check photographic images meet brief requirements<br>2.7 Transfer and store photographic image files to a computer using standard naming conventions |
| 3. Edit photo images | 3.1 Load digital imaging software and import photo image source files<br>3.2 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time<br>3.3 Manipulate and save digital images using designated digital imaging software<br>3.4 Create photo images that incorporate visual design and communication principles<br>3.5 Evaluate outcome for visual impact, effectiveness and fitness for purpose<br>3.6 Confirm images meet project requirements with relevant personnel |
| 4. Prepare photo image assets | 4.1 Save files in appropriate output format to meet platform requirements<br>4.2 Assign metadata tags if required<br>4.3 Group files logically in a folder system using standard naming conventions<br>4.4 Store files in share drive or repository for production team access |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4-1.6, 2.4-2.7, 4.1, 4.3 | • Interprets textual information to follow equipment operation and project requirements |
| Writing | 1.6, 2.7, 4.1-4.3 | • Selects the vocabulary and conventions appropriate to text for naming files |
| Oral Communication | 1.2, 2.1, 3.6 | • Uses listening and questioning techniques to discuss project brief and to confirm outcomes<br>• Uses descriptive and technical language to participate in oral exchanges |
| Navigate the world of work | 1.2, 3.2 | • Complies with legislative requirements |
| Interact with others | 1.2, 2.1, 3.6 | • Uses appropriate communication practices and protocols to confirm requirements and present images |
| Get the work done | 1.1, 1.3-1.6, 2.2-2.7, 3.1, 3.3-3.6, 4.1-4.4 | • Takes responsibility for logically planning and producing photo images according to design briefs and visual design principles<br>• Makes decisions directly related to task completion<br>• Utilises a range of features within digital cameras, scanners and digital imaging software to create and store photo images |

# Unit Mapping Information

| Code and title current version | Code and title previous version | Comments | Equivalence status |
|---|---|---|---|

# Assessment Requirements for CUADIG303 Produce and prepare photo images

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- use a scanner and digital camera to capture images that satisfy project briefs
- use digital imaging software and techniques, design and communication principles to produce images that meet project requirements
- save and store files according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the features of a digital camera that are essential for creating images to the required standard
- outline the basic techniques used to compose camera shots
- explain how visual design and communication principles are are relevant to photography
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a scanner and digital camera
- digital imaging software
- project briefs
- information or manuals about operating equipment.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUADIG304 Create visual design components

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to create visual designs for interactive media components that can be integrated into a range of media products.

It applies to individuals who generate and assess ideas to create visual design components in response to specifications under supervision in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Digital Content and Imaging

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Clarify work requirements | 1.1 Clarify visual design components required in the project brief, in consultation with relevant personnel<br>1.2 Identify project timelines and discuss factors that may determine or affect visual design concepts<br>1.3 Clarify, in discussion with relevant personnel, the target user or audience, and determine format and delivery platform |
| 2. Generate and assess ideas | 2.1 Research media products, designs, images, artwork and other creative sources that may inspire visual design ideas |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Develop a range of visual design ideas that are technically feasible, respond to project specifications and provide creative solutions to design issues<br>2.3 Present and review visual design ideas with relevant personnel |
| 3. Develop design concept | 3.1 Experiment with traditional and digital methods to create required visual design components<br>3.2 Explore a range of typographical and visual design elements to create components<br>3.3 Evaluate initial design ideas with relevant personnel to select final design concept<br>3.4 Confirm design concept complies with copyright laws<br>3.5 Check output format meets delivery platform requirements<br>3.6 Adopt safe ergonomic practices when using equipment for long periods of time |
| 4. Produce components | 4.1 Develop components based on the final design concept using various design techniques<br>4.2 Apply visual design principles and communication principles to produce components that have high visual impact<br>4.3 Save components in an appropriate format according to project specifications |
| 5. Finalise visual design components | 5.1 Review visual design components against design and technical specifications<br>5.2 Discuss and confirm additional requirements or modifications with relevant personnel, and make amendments as required<br>5.3 Save and archive visual design components using industry or enterprise naming conventions and version control protocols |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1, 3.1, 3.2, 3.3, | • Reviews and researches creative source material to generate ideas |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | 4.1, 4.3, 5.1, 5.2, 5.3 | • Checks that output meets requirements<br>• Locates correct folders for storing electronic data |
| Writing | 2.2, 3.1, 3.2, 4.1, 4.3, 5.2, 5.3 | • Prepares information to accompany design components<br>• Names files according to requirements |
| Oral Communication | 1.1-1.3, 2.3, 3.3, 4.3, 5.2 | • Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding |
| Navigate the world of work | 3.4, 3.6 | • Complies with legislative requirements |
| Interact with others | 1.1-1.3, 2.3, 3.3, 4.3, 5.2 | • Collaborates with relevant personnel to ensure that end result meets requirements |
| Get the work done | 1.1-1.3, 2.1-2.3, 3.1-3.3, 3.5, 4.2, 4.3, 5.1-5. | • Takes responsibility for planning and producing design components according to project requirements and design principles<br>• Makes decisions directed related to completion of tasks<br>• Uses experimentation to develop new or innovative design approaches<br>• Selects and uses appropriate software to conceive, produce, store and present visual design components |

# Assessment Requirements for CUADIG304 Create visual design components

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- explore and experiment with design techniques and visual design and communication principles to produce ideas and concepts for visual design components
- use design techniques to create visual design components that respond effectively to a project brief
- present and discuss ideas, concepts and designs with relevant personnel
- save and archive files using standard industry or enterprise naming conventions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe differences between traditional and digital methods in creating visual images, and advantages and disadvantages of each
- describe visual design, typographic and communication principles used to construct visual design components
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- project briefs
- relevant software

© Commonwealth of Australia, 2025 Skills Insight

- manuals and information to support software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUADIG517 Design digital simulations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 5.0. |

## Application

This unit describes the skills and knowledge required to research, plan and design drafts for digital simulations of real-world environments and processes.

The unit applies to those who work closely with subject experts to develop virtual environments for fields including architecture, science and engineering, medicine, conservation and manufacturing. They may also collaborate with programmers and software authors so the simulation is technically achievable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – Digital content and imaging

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify project requirements | 1.1 Confirm objectives and desired outcomes of project brief in consultation with required personnel<br>1.2 Identify target audience and determine format and delivery platform of simulations in discussion with required personnel |
| 2. Research and plan approach | 2.1 Investigate real world environment to be simulated and determine technical parameters that may be required<br>2.2 Evaluate designs and other information that may assist modelling real world environment<br>2.3 Determine performance objectives, task complexity and user skill levels |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.4 Determine required depth of physical and functional fidelity that meets production requirements<br>2.5 Research and identify applicable simulation authoring tools<br>2.6 Discuss ideas and solutions in collaboration with required personnel |
| 3. Draft simulation design documents | 3.1 Identify processes that determine functional behaviour of simulation and specify how this behaviour is represented by control objects<br>3.2 Define underlying functionality in model that specifies essential settings, states, conditions and parameters<br>3.3 Specify user interface controls that enable user interaction with simulation<br>3.4 Identify critical impacts, alerts or costs for incorrect user operation<br>3.5 Specify sequencing of difficulty levels, if required<br>3.6 Confirm proposed simulation is technically feasible in consultation with required personnel<br>3.7 Present clear and detailed draft simulation design specifications for discussion and feedback with required personnel<br>3.8 Outline positive and negative feedback from user responses when interacting with simulations, and adjust as required |
| 4. Finalise simulation design documents | 4.1 Review designs against desired project outcomes and objectives<br>4.2 Review designs against creative, technical and intellectual property requirements<br>4.3 Adjust design specifications as necessary after discussions with required personnel<br>4.4 Archive user interface controls |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Oral communication | • Participates effectively in spoken interactions using language and features applicable to audience<br>• Confirms project requirements and elicits feedback using questioning and listening strategies<br>• Communicates with audience using industry standard practices and protocols |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets and comprehends familiar and unfamiliar technical, descriptive, and legal textual information |
| Writing | • Documents information using correct formatting procedures, and uses specialised vocabulary when drafting design documents<br>• Accurately incorporates modifications and user feedback in specification documentation |
| Initiative and enterprise | • Integrates prior knowledge with new technical research and feedback from required personnel<br>• Ensures design integrity remains and continually generates and evaluates design ideas<br>• Makes decisions that impact on entire project |
| Planning and organising | • Takes responsibility, coordinates and plans tasks and ensures project requirements met<br>• Ensures project is continually assessed and evaluated |
| Self-management | • Adheres to legislative requirements related to intellectual property |
| Teamwork | • Works collaboratively with production personnel throughout all stages of project |
| Technology | • Assists with design tasks using digital tools |

# Unit Mapping Information

Supersedes and is equivalent to CUADIG507 Design digital simulations.

# Assessment Requirements for CUADIG517 Design digital simulations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design at least two examples of digital simulations according to different project briefs.

In the course of the above, the candidate must:

- research and generate ideas for technically feasible simulations that meet target audience requirements
- develop draft design specifications for digital simulations that are clear, detailed and technically feasible
- review and seek feedback from required personnel and produce final design specifications.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- typical formats and documentation for presenting simulation designs
- strategies to evaluate designs and respond to feedback to improve designs
- technical parameters of digital simulations, including:
  - algorithms
  - rules
  - laws
  - physical & mathematical formulae
- authoring tools used for digital simulations
- user interfaces used for digital simulations
- ways that technical parameters represent real world processes
- common delivery platforms of simulations
- how intellectual property rights are managed in design of digital simulations.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- briefs for digital simulations on which designs can be based
- access to real-world environments to be simulated
- facilities and resources to develop design simulations
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUADIG519 Investigate technologies for the creation of digital art

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to further application of technologies in own creative practice. It involves researching different technologies, exploring them in-depth and applying different technologies to one's own work.

The unit applies to those who produce creative digital media work or integrate digital and traditional media. Their technology exploration is conducted independently with mentoring and guidance as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Digital Content and Imaging

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research digital technologies | 1.1 Evaluate current, emerging and experimental digital technologies and equipment applicable to artistic practice<br>1.2 Research the capabilities of different digital technologies and equipment to achieve different effects<br>1.3 Determine cost and supply issues for different technologies and equipment |
| 2 Select digital technologies for in-depth exploration | 2.1 Assess the creative and professional opportunities offered by different technologies<br>2.2 Determine limitations and constraints of different |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | technologies<br>2.3 Discuss the characteristics and opportunities of different digital art technologies with required personnel<br>2.4 Select technologies that suit own artistic practice and apply according to safety requirements |
| 3 Integrate technologies into own work | 3.1 Experiment with technologies to challenge and extend their capabilities for use in own artistic works<br>3.2 Develop own ways of working with technologies to achieve desired outcomes |
| 4 Manage digital technologies in professional practice | 4.1 Establish systems to maintain currency of knowledge of digital art technologies<br>4.2 Maintain the quality and life of equipment and consumables through required handling and storage procedures |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Reading | • Interprets technical information and specifications for application to creative work |
| Writing | • Records technical and numerical information related to job requirements and outcomes |
| Oral Communication | • Participates in detailed discussions about digital technologies with required personnel using clear language and related industry terminology<br>• Gathers information and confirms understanding using careful listening and questioning techniques |
| Numeracy | • Assesses costs of digital resources |
| Self-management | • Maintains industry knowledge required to perform role<br>• Meets workplace expectations to use equipment and consumables responsibly to minimise waste, repair or replacement |
| Initiative and enterprise | • Evaluates research findings to inform analytical decisions about selection of digital technologies for exploration |
| Technology | • Implements organisational systems to keep up with changes in digital technologies |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | • Recognises the potential of new approaches in use of digital systems and tools and incorporates exploratory and experimental strategies into own work to achieve desired outcomes |

# Unit Mapping Information

Supersedes and is equivalent to CUADIG509 Investigate technologies for the creation of digital art.

# Assessment Requirements for CUADIG519 Investigate technologies for the creation of digital art

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- investigate at least two different technologies for the creation of digital art.

In the course of the above, the candidate must:

- research, experiment with and integrate technologies to create at least two individual styles of digital art
- use and adapt technologies in ways that support coherence of own creative works.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- ways in which different digital technologies and processes are used, adapted, combined and challenged by professional artists in contemporary practice
- cost and supply parameters issues for different technologies and types of equipment to support professional practice
- storage requirements and options for different materials used in digital work
- ways to remain informed of changes in digital art technologies
- key safety requirements for digital technologies in an art context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- tools, equipment and materials required for exploring technologies for the creation of digital art

© Commonwealth of Australia, 2025 Skills Insight

- applicable information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUADRA201 Develop drawing skills

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to use a limited range of basic drawing techniques to produce fundamental drawings from simple ideas. This unit relates to drawing as an art form and differs from units that focus on drawing as a visual representation tool.

It typically applies to individuals who have developed some general design or drawing skills and who are now embarking on a career in visual arts. They have little or no experience in drawing and work under close supervision and with guidance from others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – drawing

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare drawing resources | 1.1 Calculate and obtain type and quantity of drawing equipment, tools and materials according to own selected ideas for the work<br>1.2 Prepare equipment, tools and materials according to procedures for workplace safety, cost control and waste minimisation<br>1.3 Set up a safe work space with guidance from key people |
| 2. Use and test drawing | 2.1 View a range of drawings in different styles, and discuss with |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| techniques | key people how effects are achieved<br>2.2 Match potential techniques to ideas for own drawings with assistance from key people<br>2.3 Test a range of techniques to determine the effects they achieve through experimentation with samples, practice pieces or work in progress<br>2.4 Use selected techniques to produce fundamental drawings, considering and applying elements and principles of design<br>2.5 Clean and store equipment, tools, and materials according to specific needs of different items<br>2.6 Handle equipment, tools and materials safely and minimise waste throughout all processes |
| 3. Review work to develop skills | 3.1 Review own drawings and note areas for future improvement<br>3.2 Seek and consider feedback from key people to identify areas for improvement<br>3.3 Review different opportunities to build own skills and select suitable options |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 3.3 | • Plans a learning process to build own skills |
| Reading | 1.2 | • Interprets detailed information from familiar procedural documents to determine production and safety requirements |
| Oral Communication | 1.3, 2.1, 2.2, 3.2 | • Clearly explains ideas for designs and techniques using relevant industry language<br>• Uses questioning and active listening techniques to gain information and feedback and confirm understanding |
| Numeracy | 1.1, 1.3, 2.4 | • Uses basic calculations to determine quantities of materials, measure dimensions of work space and drawings |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Navigate the world of work | 1.2, 1.3, 2.4, 2.6 | • Follows defined procedures and legislative requirements, understands boundaries of own work and skill, and seeks clarification and guidance on all issues |
| Interact with others | 1.3, 2.1, 2.2, 3.2 | • Seeks guidance and cooperates with instructions and advice from others to achieve best outcomes for own creative work |
| Get the work done | 1.1-1.3, 2.1-2.4 | • Organises all processes to set up work space, test techniques and produce creative work with close guidance from others<br>• Makes routine decisions using procedures to guide activities<br>• Makes decisions about appropriate techniques by evaluating and testing a limited range of known options with assistance from others<br>• Resolves problems with technique through trial, error and practice |

# Assessment Requirements for CUADRA201 Develop drawing skills

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- produce multiple fundamental drawings where the materials and techniques support own ideas for work
- document a basic plan to build own skills, outlining own selected skill development options.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general features of major styles of drawing and the work of key practitioners relevant to individual area of interest
- outline, for the elements and principles of design, the fundamental characteristics, primary interrelationships and use in fundamental drawings
- outline, for a range of equipment and tools used to produce drawings, key physical features and uses, cleaning techniques and storage requirements
- outline the general features and use of a basic range of materials and techniques used to produce fundamental drawings
- outline typical work space requirements for producing fundamental drawings including ways of organising space and equipment for efficient work operation
- outline procedures for working safely with drawing materials, tools and equipment.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce drawings
- relevant information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAILL401 Develop and refine illustrative work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to work with a brief to create illustrations through a process of testing design approaches and illustration techniques.

It applies to illustrators who are still developing a full repertoire of professional skills and an individual style. They work with limited supervision and guidance as required. Illustrators may be employees or work on a freelance basis.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – illustration

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Interpret briefs for illustrative work | 1.1 Interpret the specifications of illustration briefs<br>1.2 Discuss and clarify issues about specifications, parameters and constraints with relevant people as required<br>1.3 Evaluate client requirements to make decisions about style and content of illustrative work<br>1.4 Source and evaluate information pertinent to briefs |
| 2. Organise resources | 2.1 Calculate, select and organise equipment, tools and materials |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | based on the requirements of the work<br>2.2 Set up a safe and efficient workspace<br>2.3 Prepare, maintain, store and dispose of all resources according to each item's needs and according to workplace procedures |
| 3. Test design approaches for illustrative work | 3.1 Produce preliminary visual representations that take account of intellectual property requirements<br>3.2 Identify possible illustrative approaches and establish criteria, in line with the brief, for selecting final approach<br>3.3 Experiment with different illustrative techniques to test a range of approaches that will best communicate ideas required by the brief<br>3.4 Evaluate testing processes against criteria and select approach that best meets requirements of briefs<br>3.5 Critique own work for conceptual success and technical execution and seek feedback, as required<br>3.6 Refine and accurately document the illustrative approach based on testing processes |
| 4. Produce finished illustrative work | 4.1 Create illustrations using techniques selected from experimentation and testing, considering and applying elements and principles of design<br>4.2 Review and refine ideas and approaches based on ongoing experience with production of own work<br>4.3 Seek and consider feedback from key people to refine illustrative work as required<br>4.4 Present finished work within agreed work parameters |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4 | • Interprets and evaluates complex and unfamiliar information in briefs |
| Writing | 3.6 | • Uses clear, specific and industry related terminology to document a comprehensive record of illustrative approaches to a design brief |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Oral Communication | 1.2, 3.5, 4.3 | • Uses questioning and active listening techniques to elicit information about job requirements and confirm understanding |
| Numeracy | 2.1 | • Performs basic calculations required to identify quantities of resources |
| Navigate the world of work | 2.1, 2.2, 2.3, 3.1 | • Understands and complies with legislative requirements and defined workplace procedures |
| Interact with others | 1.2, 3.5, 4.3 | • Seeks the perspective and guidance of others to inform design ideas and achieve best outcomes for own creative work<br>• Seeks and considers feedback from peers and others to enhance future performance |
| Get the work done | 1.3, 1.4, 2.1, 3.2-3.4, 4.1, 4.2, 4.4 | • Organises and implements processes to set up work, assess techniques and produce creative work within set parameters<br>• Manages own decisions about appropriate techniques by testing a range of explored options<br>• Resolves problems with technique through experimentation an testing<br>• Reviews work in progress, resolving problems with technique through refinement of approach |

# Unit Mapping Information

# Assessment Requirements for CUAILL401 Develop and refine illustrative work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- organise workspace and resources needed to meet requirements of illustrative work, according to workplace and legislative requirements
- experiment with illustration techniques to create multiple illustrations that:
  - meet the requirements of associated briefs
  - show technical proficiency in chosen techniques
  - indicate review and refinement of own ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe intellectual property requirements relevant to producing illustrations
- describe the role of experimentation in developing and refining ideas for illustrations
- explain how the elements and principles of design are used to inform illustrative work
- list and briefly describe the resources required to produce illustrations, including key physical features, cleaning and maintenance techniques, and storage requirements
- discuss typical workspace requirements for producing illustrations including ways of organising space and equipment for safe and efficient work operation
- describe practices and procedures for working safely and sustainably with materials, tools and equipment for producing illustrations.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce illustrations
- briefs on which to base illustrations
- relevant information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAPPR502 Develop own sustainable professional practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to establish goals for own professional practice and to determine how one's practice can be developed in a sustainable way, taking account of all aspects of sustainability – individual, social, environmental and economic.

It applies to individuals who must consider the sustainability of their practice in any sector or area of expertise.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

## Unit Sector

Industry capability – professional practice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research and develop goals for own practice | 1.1 Identify own professional goals and aspirations in the context of chosen area of practice<br>1.2 Identify and consult with key people to support identified goals and aspirations<br>1.3 Evaluate factors that affect contemporary practice in chosen area, including specific opportunities<br>1.4 Question self and others about future directions for practice |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Identify and review opportunities and ideas in a range of new and emerging disciplines and contexts<br>1.6 Develop goals for overall practice direction, based on research, review and individual personal circumstances |
| 2. Identify key sustainability issues in own practice | 2.1 Identify and investigate key components of sustainable professional practice in chosen area of work<br>2.2 Evaluate current practice and determine opportunities to enhance sustainability<br>2.3 Research and synthesise information to support future professional practice |
| 3. Take action to implement sustainable individual practice | 3.1 Develop practical and innovative strategies to enhance sustainability of practice<br>3.2 Develop and nurture own professional networks, and engage in ongoing collaboration with peers and others<br>3.3 Engage in sustainable work practices in all areas of activity<br>3.4 Integrate practices that support own lifelong learning in chosen field<br>3.5 Challenge and refine own ideas and strategies for developing professional practice<br>3.6 Evaluate constraints and limitations, and take action to address them as appropriate |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.1, 3.4 | • Identifies and analyses completed work through self-appraisal<br>• Enhances professional development through the ongoing accumulation of knowledge |
| Reading | 2.3 | • Comprehends and evaluates a broad range of sometimes complex information in a variety of forms |
| Oral | 3.2 | • Actively participates in discussions of a range of business sustainability issues with informed peers, |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Communication | | using listening and questioning skills to elicit others' views |
| Numeracy | 2.1, 2.2 | • Gathers and interprets financial information relating to own practice to confirm and maintain its financial viability |
| Navigate the world of work | 1.1, 1.3, 1.6 | • Identifies career goals and develops career pathways to enable ongoing professional development<br>• Makes judgements and decisions in response to complex factors in contemporary practice in chosen area |
| Interact with others | 1.2, 1.4, 3.2 | • Participates in a collaborative verbal exchange of ideas and trends<br>• Recognises the importance of building rapport to establish effective relationships |
| Get the work done | 1.5, 1.6, 2.1, 2.2, 3.1, 3.3, 3.5, 3.6 | • Takes responsibility for own workload discussing some key aspects with others<br>• Uses systematic, analytical processes in a variety of situations to set goals, gather relevant information, and identify and evaluate options against agreed criteria<br>• Recognises the potential of new approaches to enhance work practices and outcomes, and accepts the need to consider fundamental and incremental changes that lead to longer term goals |

# Assessment Requirements for CUAPPR502 Develop own sustainable professional practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- research and collaborate with informed others to identify development ideas and issues relevant to own practice
- develop realistic goals for own practice based on research and review
- identify opportunities to enhance sustainability in own practice and implement strategies to harness them
- develop and implement professional development activities that enhance the sustainability of own practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the professional context for a given area of practice in terms of opportunities and constraints
- describe how the following factors affect contemporary practice:
  - buying trends
  - economic considerations
  - impacts of technology on practice
  - lifestyle trends
  - location of practice
  - social issues
  - intellectual property considerations
- summarise the tools, techniques and strategies used by practitioners to build sustainable practice

© Commonwealth of Australia, 2025 Skills Insight

- explain key aspects of individual, social, economic, environmental sustainability, and how they impact on a particular area of practice.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- sources of information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAPPR513 Present a body of own creative work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to use creative, technical and project management skills to produce a professional and innovative presentation of own creative work.

The unit applies to individuals who maintain an up-to-date presentation package or portfolio of creative work. This unit involves the use of digital formatting in the design and delivery of the presentation or portfolio.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry capability – Professional Practice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate and select presentation ideas | 1.1 Research presentation ideas using required information sources<br>1.2 Explore new and innovative ideas for digitally presenting work using ideas from other disciplines<br>1.3 Develop presentation ideas in consultation with required personnel<br>1.4 Select presentation idea based on intended purpose and requirements<br>1.5 Evaluate production requirements and content implications of selected presentation idea |
| 2. Plan presentation | 2.1 Develop presentation concept using critical thinking techniques |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Refine presentation concept considering explicit and implicit messages required for intended audience<br>2.3 Develop production budget, timeframes and workflow plan<br>2.4 Support key communication messaging using design templates and prototypes |
| 3. Create presentation | 3.1 Develop presentation within required timeframe, selecting and integrating content that supports identified objectives and messages<br>3.2 Obtain and record clearance of copyright and intellectual property rights on sourced content<br>3.3 Address conceptual and technical challenges as required<br>3.4 Review projected and actual budget outcomes, adjusting process as required |
| 4. Deliver and evaluate presentation | 4.1 Present own creative work in format and style required for intended audience and purpose<br>4.2 Evaluate presentation based on identified objectives and feedback from required personnel<br>4.3 Identify opportunities for updating and refining presentation |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Numeracy | • Performs calculations or estimates of requirements, timeframe and costs<br>• Selects, totals and orders required resources within budgetary and time constraints |
| Oral communication | • Explains own ideas for presentation to required personnel using language required for audience<br>• Participates in abstract discussions of ideas and solutions using listening and questioning skills to elicit feedback<br>• Uses required communication practices and protocols in discussions and presentations |
| Reading | • Gathers, interprets and analyses information from different sources and identifies required information |
| Writing | • Completes presentation using accurate, specific and industry-related terminology |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | • Completes required supporting documentation using clear and technically specific language |
| Teamwork | • Gains insight into current practices and ideas for change using perspectives of others |
| Initiative and enterprise | • Manages complex tasks and understands their contribution to longer term goals<br>• Recognises potential of developing and applying new ideas for improvements in work practices and outcomes |
| Planning and organising | • Sets goals, gathers required information, and evaluates and selects options |
| Problem solving | • Uses systematic and analytical processes in different situations |
| Self-management | • Takes responsibility for compliance with legal and regulatory responsibilities |
| Technology | • Considers purpose, needs and limitations when selecting and using different technologies and applications |

# Unit Mapping Information

Supersedes and is equivalent to CUAPPR503 Present a body of own creative work.

# Assessment Requirements for CUAPPR513 Present a body of own creative work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- complete at least one presentation for a selected creative product that reflects proposed purpose, objectives and messages and meets requirements of intended audience.

In the course of the above, the candidate must:

- research and identify at least one or more new or innovative ways for presenting portfolios of creative work
- use digital formatting in design and delivery of presentation
- apply copyright and intellectual property requirements to presentation of creative product
- design a presentation concept that includes key proposed objectives and messages
- realise the presentation concept within required budget and timeframes
- evaluate presentation and document ways to respond to future presentation opportunities.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common techniques used for presenting portfolios of work in creative practices
- techniques for digitally formatting presentation design and delivery
- professional trends related to presentation ideas and technologies for area of work, including design, layout, typography, interactivity and accessibility
- critical thinking techniques that inform presentation concept developments
- elements of cohesive and coherent presentations
- copyright and intellectual property issues and legislation associated with professional creative practice, including ways of identifying requirements related to:
  - information in professional presentations
  - self-promotion

© Commonwealth of Australia, 2025 Skills Insight

- contracts.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- technology and sources of information required for researching presentation methodologies
- presentation tools
- information sources required to present creative work described in performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAPPR514 Establish and maintain environmentally sustainable creative practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to integrate environmentally sustainable approaches into creative art or design practice in order to reduce own ecological footprint across all areas of operation. It involves evaluating environmental sustainability of current practices, ensuring resources are used in a sustainable way and making sustainable decisions to ensure continuous sustainability in the practice.

The unit applies to those who work as artists or designers. Sustainability considerations apply both to activities within the practice and to the design of products and services that might be made, operated or used by others. The practitioner applies a self-directed approach to ensuring the sustainability of own creative practice.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

## Unit Sector

Industry capability – Professional practice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate environmental sustainability of current practice | 1.1 Assess source of materials used in current practice, taking account of their origin and abundance<br>1.2 Investigate and evaluate resource use and sustainability issues in current practice<br>1.3 Identify and evaluate applicable legislation, codes of practice and national standards that impact on workplace sustainability and |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | confirm compliance<br>1.4 Analyse and address existing and potential environmental risks and hazards in the workplace |
| 2. Use resources sustainably in own practice | 2.1 Use sustainable work practices across all areas of activity<br>2.2 Explore use of alternative sources of materials, including recycled products where possible<br>2.3 Source and use more sustainable approaches in work, including sustainable materials in preference to materials in short supply<br>2.4 Maximise use of waste products arising from the creative process<br>2.5 Monitor and measure use of resources in own practice, and make changes that reduce usage where practicable |
| 3. Make sustainable design decisions | 3.1 Evaluate choice and use of materials in design briefs, whether generated by self or others<br>3.2 Assess impact of user needs and preferences on sustainable design options<br>3.3 Assess environmental impact of intended production processes<br>3.4 Enhance sustainability by asking pertinent questions<br>3.5 Positively influence the sustainability of design process within scope of own responsibility<br>3.6 Include explicit reference to sustainability issues in design and production documentation |
| 4. Maintain currency of sustainability issues and options | 4.1 Maintain currency of specialised knowledge of sustainability issues applicable to own area of expertise<br>4.2 Proactively identify sources of information and professional development to build own sustainability skills<br>4.3 Integrate current and emerging ideas into own practice |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Identifies and analyses sustainability aspects of completed work through self-appraisal and positively enhances practice<br>• Enhances professional development through ongoing accumulation of information about contemporary and developing methodologies |
| Numeracy | • Prepares detailed resource specifications, making adjustments based on sustainability considerations relating to availability and usage |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Oral communication | • Articulates clearly and conveys sustainability requirements using specific and applicable language suitable to audience<br>• Confirms and clarifies understanding using listening and questioning techniques |
| Writing | • Accurately records applicable sustainability issues and approaches in workplace documentation using clear and specialised language |
| Initiative and enterprise | • Sets sustainability goals, gathers applicable information and identifies and evaluates options against agreed criteria using systematic and analytical processes in different situations<br>• Recognises the potential to develop and apply new ideas and enhance sustainable work practices and outcomes |
| Self-management | • Keeps up to date with legislation, codes of practice, and national standards applicable to own rights and responsibilities and considers implications of these for own work practice<br>• Takes responsibility for own work practices negotiating some key sustainability aspects with others |

# Unit Mapping Information

Supersedes and is equivalent to CUAPPR504 Establish and maintain environmentally sustainable creative practice.

# Assessment Requirements for CUAPPR514 Establish and maintain environmentally sustainable creative practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish and maintain at least two environmentally sustainable creative practices.

In the course of the above, the candidate must:

- develop new ideas for developing sustainable practices within own creative work
- develop a set of actions that enhance the environmental sustainability of individual practice
- work with others and positively influence the sustainability of the design process where applicable
- apply varied knowledge of key aspects of sustainability to those areas of creative practice that can be made more sustainable
- monitor, measure and reduce, where practicable, use of resources in own practice.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sources of raw materials used in the applicable area of creative practice
- specific sustainability issues that impact on the applicable area of creative practice in terms of both design and production
- ways to positively influence sustainability in the design and production of own work
- tools, techniques and strategies used by practitioners to build sustainable practice
- legislation, codes of practice and standards about sustainability in the relevant areas of practice.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- information relating to sustainable practices and materials
- scenarios requiring the establishment and maintenance of environmentally sustainable creative practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAPPR515 Establish and maintain safe creative practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to determine and respond effectively to broad and specific safety requirements in a professional practice. It involves determining work health and safety (WHS) requirements, identifying hazards, managing risks, and monitoring and enhancing safety of the practice.

The unit applies to those who are sole practitioners or working in collaborative teams across all sectors and areas of expertise, who are responsible for managing safety. The practitioner applies a self-directed approach to ensuring safety. The unit could apply to a range of internal and external work environments, including workshops, studios, offices, field locations and performance venues. The unit does not apply to individuals employed by organisations to manage the safety of a practice.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

## Unit Sector

Industry capability – Professional practice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine WHS requirements for professional practice | 1.1 Research key features of legislation that apply to professional practice<br>1.2 Source and evaluate practice-specific codes, standards and guidelines that affect the management of safety in the applicable work environment<br>1.3 Develop systems and procedures that respond to WHS requirements and effectively integrate those responses into |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | practice management<br>1.4 Evaluate the role of others in practice safety and involve them as required |
| 2. Identify hazards and assess and manage risks | 2.1 Identify existing and potential hazards specific to the area of practice using applicable methods, templates and tools<br>2.2 Assess and manage risks associated with those hazards in line with established processes and according to WHS legislation and codes of practice<br>2.3 Implement and monitor developed systems and procedures in response to identified requirements for hazard control measures and risk assessment in the workplace<br>2.4 Develop and maintain current and accurate documentation that supports hazard identification and risk management in workplace practices<br>2.5 Address hazard identification and risk assessment and management at the planning, design and evaluation stages of any change in the workplace and confirm that new hazards are not created |
| 3. Monitor and enhance safety of the practice | 3.1 Maintain currency of WHS knowledge applicable to own area of practice<br>3.2 Seek feedback from colleagues on workplace safety practices and potential issues, and integrate improvements into systems and procedures as required<br>3.3 Proactively identify other sources of information and professional development opportunities relating to safety<br>3.4 Integrate current and emerging ideas and technologies that support workplace safety into own practice |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Numeracy | • Collects and interprets numerical information relating to workplace hazards, identifying issues and responding by amending workplace systems and procedures as required<br>• Calculates, measures and estimates in relation to probability and the likelihood of specific types of risks, and develops their control measures |
| Oral communication | • Listens to and notes specific information relating to practice safety and confirms and clarifies requirements using listening and questioning |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| | skills<br>• Participates in an oral exchange requiring some negotiation regarding safety procedures and practices |
| Reading | • Reads and evaluates a series of complex texts and determines how general and specific legislative, regulatory and work requirements relate to the safety of practice |
| Writing | • Writes detailed procedural text based on the needs of the practice, providing clear plain English information about systems and procedures required to address workplace safety and meet reporting obligations |
| Initiative and enterprise | • Reflects on the way in which variables impact on decision outcomes and contributes to refinement of decision-making processes in the future using past experiences |
| Planning and organising | • Develops plans and manages complex tasks with an awareness of how they may contribute to long-term goals<br>• Gathers applicable information and identifies and evaluates options against established criteria using systematic, analytical processes in different situations |
| Problem solving | • Recognises different problems and responds intuitively to those requiring immediate attention, quickly drawing on current knowledge and past experience to devise solutions |
| Self-management | • Keeps abreast of applicable legislative requirements and considers their implications when negotiating, planning and undertaking work relating to improving practice safety |
| Teamwork | • Collaborates with others and achieves joint outcomes, playing an active role in influencing practice safety and sometimes taking a leadership role |

# Assessment Requirements for CUAPPR515 Establish and maintain safe creative practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish and maintain at least two safe creative practices.

In the course of the above, the candidate must:

- analyse the needs of a particular practice and develop a set of systems, procedures and practices that support safety in that context
- identify key safety issues, including specific hazards and risks in the applicable area of practice
- apply general work health and safety (WHS) legislation and specific codes, standards or guidelines relevant to own practice.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- essential components of work health and safety (WHS) legislation, regulations and codes of practice applicable to the specific area of practice
- essential WHS responsibilities of employers, manufacturers, suppliers, employees and other parties with legal responsibilities
- applicable industry or process-specific safety guidelines that apply to particular fields of work and particular work environments
- hazards and their associated risks that exist in the specific professional practice
- potential impact of not addressing hazards and risks in the specific area of practice
- organisational systems, procedures and practices that support WHS management and regulatory compliance for a professional practice, including those relating to:
  - business planning, especially new technology and organisational change
  - purchasing policies and procedures
  - reporting on financial, technical and other resource needs

© Commonwealth of Australia, 2025 Skills Insight

- maintenance of WHS systems and procedures.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to general and practice-specific (WHS) information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAPPR612 Collaborate in professional creative projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to collaborate with other creative practitioners to establish, realise and evaluate a creative project.

The unit applies to those who are independent creative practitioners working together in a collaborative team on commercial or community creative projects in physical or virtual environments. They may work on individual pieces of creative work or on thematically connected works in the broader context of a work brief, exhibition, competition or themed event. The unit applies to self-generated projects as well as those developed in response to opportunities presented by others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry capability – Professional Practice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for collaborative project | 1.1 Establish sustainable and productive creative relationships<br>1.2 Engage with collaborative communities and partnerships based on potential benefits for self and others<br>1.3 Identify factors inhibiting potential collaboration and address as required<br>1.4 Identify and pursue collaboration opportunities |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Establish collaborative project | 2.1 Establish collaborative project and contribute to project objectives and parameters<br>2.2 Agree ways of working that acknowledges different contributions of required personnel<br>2.3 Determine ethical considerations, copyright and intellectual property requirements<br>2.4 Identify professional and practical project requirements<br>2.5 Organise and allocate work activities with clear and agreed outcomes |
| 3. Realise collaborative project | 3.1 Contribute own technical and creative expertise from idea generation to project realisation<br>3.2 Extend own expertise and learn from others as project progresses<br>3.3 Monitor project progress against agreed objectives<br>3.4 Challenge, test and share ideas with project team<br>3.5 Suggest ideas and solutions for technical, creative and organisational challenges<br>3.6 Meet established personal responsibilities for creative work and overall project |
| 4. Evaluate collaborative project | 4.1 Engage in review and evaluation with others involved in project<br>4.2 Evaluate own contribution based on collaborative effort and professional relationships with others<br>4.3 Identify and seek opportunities for refining and expanding own expertise |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Identifies strengths and weaknesses and opportunities for improvement using self-appraisal and feedback |
| Oral communication | • Shares and explores abstract creative concepts and ideas using required language and communication methods |
| Reading | • Interprets information from project documentation |

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Writing | • Documents roles and project requirements using language and format required for context and intended audience |
| Teamwork | • Establishes and maintains professional working relationships<br>• Achieves joint outcomes using and enhancing skills and knowledge related to complex issues, ideas and creative challenges<br>• Recognises and responds to explicit and implicit meanings in communication, seeking clarification where misinterpretation might create difficulties |
| Initiative and enterprise | • Achieves goals of professional standard using diverse practices<br>• Works autonomously and takes responsibility and ownership for complex project work<br>• Explores new ideas with understanding of importance for viability and effectiveness of own role<br>• Gathers required information and identifies, evaluates and refines options against agreed understanding using systemic and analytical processes |
| Planning and organising | • Develops plans for managing complex tasks and incorporates contribution of own and others' practice |
| Problem solving | • Identifies different problems and responds to difficulties by drawing on current knowledge and past experience to devise solutions within required timeframes |
| Self-management | • Complies with legal, regulatory and ethical responsibilities |

# Assessment Requirements for CUAPPR612 Collaborate in professional creative projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- realise at least one creative work of professional standard in collaboration with required personnel, involving:
  - contributing to agreed objectives and parameters
  - contributing to technical, creative and organisational expertise according to agreed team approaches
  - modelling due diligence and professionalism
  - establishing and maintain sustainable professional relationships
  - evaluating and resolve complex technical, creative or organisational problems.

In the course of the above, the candidate must:

- apply copyright and intellectual property requirements to creative work.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- types of face-to-face and virtual communities, networks and groups required for own professional creative practice
- benefits of collaboration for individuals, businesses and communities, including value of collaboration as problem-solving tool
- behaviours and factors supporting professional relationships and collaboration in context of creative projects
- common problems in collaborative process and how to avoid or resolve them
- project management processes and procedures required for creative projects
- ways of evaluating success of projects and collaborative undertakings, including benefits of alternative evaluation approaches:

© Commonwealth of Australia, 2025 Skills Insight

  - formal reporting
  - professional critique
  - reviewing peer feedback
- copyright and intellectual property issues and legislation associated with professional creative practice, including ways of identifying requirements related to:
  - shared intellectual property
  - self-promotion
  - contracts.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- opportunities to collaborate with other individuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAPPR613 Engage in the business of creative practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to approach the business aspects of working as a creative practitioner in a professional manner. It involves developing professional work practices, evaluating different business practices, investigating financial and legal aspects of creative practice and evaluating own professional opportunities.

The unit applies to those who, depending on the creative practice, operate as sole practitioners, in artist cooperatives, or as freelance or contract workers. Regardless of the business model, all practitioners earning income from their practice engage with the professional business requirements for a sustainable creative practice. Independent creative practitioners sometimes work as employees in small and large organisations.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

## Unit Sector

Industry capability – Professional practice

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop and apply professional work practices | 1.1 Develop a professional work ethic when practicing creatively<br>1.2 Collaborate and communicate with other professionals about the business aspects of creative practice<br>1.3 Determine the skills and knowledge needed to operate as a successful creative practitioner<br>1.4 Evaluate own current skills and knowledge and the need for related professional development |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Identify own skills and knowledge and assess potential for using specialist expertise |
| 2. Evaluate different business practices | 2.1 Investigate different ways that creative practitioners do business<br>2.2 Investigate different business practices, systems and procedures that need to be considered as part of professional creative practice<br>2.3 Assess relevance and implications of particular business structures<br>2.4 Identify physical resources required by own creative practice and how they might be accessed<br>2.5 Develop an overall approach to business aspects of own practice based on evaluation of applicable information<br>2.6 Evaluate all aspects of own practice as a key component of business and personal growth |
| 3. Address financial aspects of creative practice | 3.1 Investigate financial considerations for creative practice<br>3.2 Research and assess different ways of commercialising work and ideas<br>3.3 Evaluate different ways of costing and selling creative work<br>3.4 Assess broader financial management requirements and their application to own practice<br>3.5 Develop and apply individual approaches to financial management of practice |
| 4. Analyse the rights and obligations of creative practitioners | 4.1 Evaluate legal and moral rights and obligations of professional creative practice<br>4.2 Practise work and business in ways that meet legal and moral obligations<br>4.3 Pursue own rights as a creative practitioner consistent with own professional and ethical standards<br>4.4 Establish and maintain sound approaches to safety and sustainability in professional practice |
| 5. Evaluate and pursue professional opportunities | 5.1 Evaluate work opportunities within and beyond the creative sector<br>5.2 Identify and pursue potential work opportunities beyond established patterns of work<br>5.3 Identify and access sources of professional advice<br>5.4 Evaluate local and global opportunities for own practice<br>5.5 Identify and evaluate opportunities offered by current and emerging trends in the consumption of culture and creative products<br>5.6 Analyse the experiences of others as a way of discovering different opportunities |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Demonstrates commitment to an ongoing process of professional development |
| Numeracy | • Interprets numerical information and manages financial aspects of the professional practice business |
| Oral communication | • Interacts effectively with different professional practitioners, choosing language to share and explore potentially abstract creative concepts and ideas |
| Reading | • Identifies, analyses and evaluates often complex information from different sources and identifies practices, systems and procedures that could enhance own professional creative practice |
| Writing | • Prepares documentation of work that incorporates synthesis of knowledge and ideas using appropriate terminology and cohesive language in a format applicable to purpose |
| Initiative and enterprise | • Gathers applicable information and identifies, evaluates and refines options against agreed criteria using systematic and analytical processes<br>• Identifies the way in which variables impact on decision outcomes and refines decision-making processes using experiences<br>• Identifies the critical importance of the ongoing exploration of new ideas to the viability and effectiveness of own role |
| Problem solving | • Articulates and challenges the values, beliefs and assumptions that may shape thinking and routinely reframes and redefines problems when generating new ideas and fresh perspectives<br>• Identifies different problems and responds intuitively to difficulties by quickly drawing on current knowledge and past experience to devise solutions |
| Self-management | • Works with a high degree of autonomy, taking responsibility and ownership for all aspects of work, including compliance with legal and regulatory rights and responsibilities<br>• Keeps abreast of trends and issues in a dynamic world and readily adapts to changing needs and priorities<br>• Identifies innovative ways of developing and sharing skills and knowledge with others |
| Teamwork | • Contributes to a collaborative culture, collaborating with others on practice development issues, facilitating a sense of commitment and cohesion, and highlighting and using the strengths of those involved<br>• Invests time and energy in building rapport with other creative and business professionals as an integral part of addressing management and development issues |

# Assessment Requirements for CUAPPR613 Engage in the business of creative practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least two cohesive approaches and strategies, that are grounded in research and analysis, for developing and managing own practice.

In the course of the above, the candidate must:

- research and evaluate different complex and varied business information, including business structures, financial considerations, and legal rights and obligations
- interact with other professionals on management and development issues
- identify professional work opportunities within and beyond the creative sectors, including new and emerging opportunities
- apply legal and moral rights and obligations relevant to own practice.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- types of behaviour, skills and practice that constitute a professional way of working in the specific area of creative practice
- professional development opportunities for the specific area of creative practice
- types and sources of external expertise and professional advice for creative practitioners that could be used in professional practice, including different industry organisations
- general business structures, practices, systems and procedures that apply to all professional practitioners, as well as typical ways that business is done in the specific area of creative practice
- physical resources needed for different types of professional practice and different ways they may be set up or accessed
- financial management practices that apply to all professional practitioners, including financial models and structures that apply to the specific area of creative practice

© Commonwealth of Australia, 2025 Skills Insight

- factors to consider when costing and selling work and methods of selling work, including commissions
- trends in the consumption of culture and creative products and their impact on professional creative practice
- legal and moral obligations of creative practitioners, including intellectual property, work health and safety, and sustainability considerations.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- interaction with others required to demonstrate the performance evidence
- general business information required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUARES301 Apply knowledge of history and theory to own arts practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to assess the relevance of historical and theoretical information for application to own arts practice.

It applies to individuals working in any area of arts practice who use analytical skills and apply some judgement and autonomy to the research process.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

## Unit Sector

Knowledge management – research

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Maintain and develop knowledge of history and theory | 1.1 Monitor relevant sources of industry information based on areas of interest, work and learning<br>1.2 Develop processes to review and maintain knowledge of history and theory relevant to own arts practice in consultation with appropriate people |
| 2. Evaluate information | 2.1 Evaluate information from range of sources<br>2.2 Extract and evaluate key ideas relevant to own arts practice |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Use information in compliance with intellectual property requirements and in culturally appropriate way |
| 3. Apply information to own arts practice | 3.1 Determine own ideas about ways information is used<br>3.2 Integrate ideas into development of own arts practice<br>3.3 Discuss application of knowledge of history and theory with appropriate people and incorporate feedback and ideas as required |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 2.2 | • Identifies useful information sources and evaluates visual and textual content to select information relevant to own practice |
| Oral Communication | 1.2, 3.3 | • Participates in exchanges of ideas and information with others<br>• Uses listening and questioning to clarify and confirm understanding of other opinions |
| Navigate the world of work | 2.3 | • Understands responsibility to follow legal requirements and cultural protocols when using information in own practice |
| Get the work done | 1.1, 1.2, 3.1, 3.2 | • Plans and organises a range of routine tasks required to inform own practice<br>• Determines simple organisational processes to keep up with information relevant to own practice<br>• Analyses theoretical information to decide how it will be used in own practice |

# Assessment Requirements for CUARES301 Apply knowledge of history and theory to own arts practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- review a range of information and evaluate its relevance to current arts practice
- maintain information for application to own creative practice
- participate in discussions about art practice and demonstrate how feedback and ideas are used in own arts practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify sources of information on history and theory relevant to own arts practice
- describe theoretical and historical contexts relevant to own arts practice
- outline ways information assists the development of own arts practice
- describe information maintenance methods that enhance own arts practice
- outline intellectual property issues and legislation relevant to the use of information and ideas in own work.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a range of relevant and current information services and sources
- interaction with others.

© Commonwealth of Australia, 2025 Skills Insight

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUASCU411 Experiment with techniques to produce sculpture

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to proactively experiment and innovate with various sculptural techniques and design concepts to develop professional practice, form an individual style and produce finished sculptures.

The unit applies to those who have well developed skills in design and technique and who often produce work at a pre-professional level for sale in a range of settings. They work independently with limited supervision and guidance as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Sculpture

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop proficiency with a range of sculptural techniques and media | 1.1 Evaluate potential for new approaches to sculpture based on capabilities of known techniques<br>1.2 Achieve different effects by introducing and adapting new equipment, tools and materials<br>1.3 Extend own capability with sculptural techniques through experimentation on samples, practice pieces or a work in progress<br>1.4 Assess safety and sustainability issues for different techniques and media |
| 2. Develop ideas for sculptures | 2.1 Research, adapt and use relevant ideas and approaches |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | from other practitioners and comply with intellectual property requirements<br>2.2 Use knowledge of different sculptural techniques to inform ideas and discuss with required personnel<br>2.3 Evaluate how different techniques and ideas can best work together<br>2.4 Assess the professional potential and presentation requirements of own work<br>2.5 Refine and confirm ideas based on research, experimentation and collaboration with others |
| 3. Organise sculpture resources | 3.1 Identify specific resource requirements for sculpture work<br>3.2 Research potential sources of supply for sculpture resources<br>3.3 Evaluate cost and other constraints that impact on development of the work<br>3.4 Evaluate and respond to presentation considerations for finished sculptures<br>3.5 Coordinate required resources and set up according to safety requirements |
| 4. Create finished sculptures | 4.1 Create sculptures using techniques and media selected from research and experimentation<br>4.2 Review and refine ideas and approaches based on ongoing experience with production of own work<br>4.3 Handle equipment, tools and materials safely; minimise and safely dispose of waste throughout all processes<br>4.4 Document development of own work and the research and ideas that informed it |
| 5. Evaluate own sculptural work | 5.1 Reflect on own conceptual development and technical execution of work<br>5.2 Identify areas for future skill development and options to learn<br>5.3 Discuss completed work with others and consider all feedback |

# Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

© Commonwealth of Australia, 2025 Skills Insight

| SKILL | DESCRIPTION |
|---|---|
| Learning | • Formulates a learning plan when attempting to fill skill gaps |
| Reading | • Interprets and evaluates complex and unfamiliar information when considering design ideas |
| Writing | • Uses clear, specific and industry related terminology when documenting a comprehensive record of research, conceptual idea development and production |
| Oral Communication | • Represents clear ideas for designs and techniques using required industry and conceptual language<br>• Uses questioning and active listening techniques to elicit different perspectives about creative ideas and feedback and to confirm understanding |
| Numeracy | • Uses basic calculations to measure and record dimensions of display areas and appropriate size of art pieces to suit<br>• Uses basic calculations to determine and record quantities of equipment, tools and materials<br>• Interprets budgetary constraints and supplier prices and calculates sometimes complex order costs |
| Teamwork | • Assess design ideas and review own work through the perspective and guidance of others<br>• Engages in an open conversation to elicit and consider the merit of feedback from peers and others |
| Self-management | • Takes responsibility for compliance with legal, safety and sustainability practices associated with creative work<br>• Manages own decisions about appropriate design ideas and techniques by experimentation with a range of explored options<br>• Reviews work in progress, resolving problems through refinement of approach<br>• Creates opportunities to use a more innovative approach and personal style |

# Assessment Requirements for CUASCU411 Experiment with techniques to produce sculpture

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- experiment with at least two different sculpture techniques and apply findings to sculpture works.

In the course above, the candidate must:

- confirm ideas for own work using a process of thorough research and experimentation
- identify and acquire resources required to complete chosen work
- adapt and use a range of sculptural techniques to create a single major work or multiple pieces of sculpture that:
  - shows technical proficiency
  - incorporates understanding of elements and principles of design
  - demonstrates innovation and the emergence of an individual style
- review and document the research and development process.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key contemporary conceptual frameworks in sculpture
- intellectual property requirements relevant to producing sculptural works.
- methods used to research creative and technical approaches to sculptural work
- how the works of other practitioners may be used to inform individual practice
- role of experimentation in developing and refining ideas for sculptures and how it relates to the development of an individual style
- ways to adapt, extend and combine the capabilities of a wide range of sculptural techniques
- elements and principles of design, including:

© Commonwealth of Australia, 2025 Skills Insight

  - detailed design characteristics
  - key interrelationships
  - use in sculptures and how they may be challenged
- tools and equipment used to produce sculpture:
  - key physical features and uses
  - cleaning and maintenance techniques
  - storage requirements
- physical properties and capabilities of a range of materials and techniques used to produce sculptures
- suppliers of resources for professional sculpture practice, including raw, part-processed and processed sculpture materials
- practices and procedures for working safely and sustainably with materials, tools and equipment for producing sculpture.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, tools and materials used to produce sculptures
- credible information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAWOO401 Experiment with techniques to produce wood objects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Application

This unit describes the skills and knowledge required to proactively experiment and innovate with various woodworking techniques and design concepts to develop professional practice and an individual style.

It applies to individuals who have well developed skills in design and technique and who often produce work at a pre-professional level for sale in outlets such as markets and fairs. They work independently with limited supervision and guidance as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – wood

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop proficiency with a range of woodworking techniques and media | 1.1 Evaluate potential for new approaches to woodwork based on capabilities of known techniques<br>1.2 Adapt or introduce new equipment, tools and materials to achieve different effects<br>1.3 Extend own capability with woodworking techniques through experimentation on samples, practice pieces or a work in progress |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Assess safety and sustainability issues for different techniques and media |
| 2. Develop ideas for wood objects | 2.1 Discuss, with key people, creative and other goals for own wood objects<br>2.2 Research, adapt and use relevant ideas and approaches from other practitioners and comply with intellectual property requirements<br>2.3 Use knowledge of different woodworking techniques to inform ideas<br>2.4 Consider how different techniques and ideas can best work together<br>2.5 Assess the professional potential and presentation requirements of own work to inform ideas<br>2.6 Refine and confirm ideas based on research, experimentation and collaboration with others |
| 3. Organise woodworking resources | 3.1 Identify specific resource requirements for the chosen work<br>3.2 Research potential sources of supply for woodworking resources<br>3.3 Evaluate cost and other constraints that impact on development of the work<br>3.4 Evaluate and respond to presentation considerations for finished wood objects<br>3.5 Coordinate required resources and set up according to safety requirements |
| 4. Create finished wood objects | 4.1 Create wood objects using techniques and media selected from research and experimentation, considering and applying elements and principles of design<br>4.2 Review and refine ideas and approaches based on ongoing experience with production of own work<br>4.3 Handle equipment, tools and materials safely; minimise and safely dispose of waste throughout all processes<br>4.4 Document development of own work and the research and ideas that informed it |
| 5. Evaluate own wood objects | 5.1 Reflect on own conceptual development and technical execution of the work<br>5.2 Identify areas for future skill development and options to learn<br>5.3 Discuss completed work with others and consider all feedback |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 5.2 | • Identifies own skill gaps and future learning options |
| Reading | 2.2, 3.2 | • Interprets and evaluates complex and unfamiliar information to support design ideas and to identify key information about resources |
| Writing | 4.4 | • Uses clear, specific and industry related terminology to document a comprehensive record of research, conceptual idea development and production |
| Oral Communication | 2.1, 5.3 | • Clearly represents ideas for designs and techniques using relevant industry and conceptual language<br>• Uses questioning and active listening techniques to elicit different perspectives about creative ideas and feedback and to confirm understanding |
| Numeracy | 2.5, 3.1-3.3 | • Uses basic calculations to measure and record dimensions of display areas and appropriate size of wood objects to suit<br>• Uses basic calculations to determine and record quantities of equipment, tools and materials<br>• Interprets budgetary constraints and supplier prices and calculates sometimes complex order costs |
| Navigate the world of work | 1.4, 2.2, 3.5, 4.3 | • Takes responsibility for compliance with legal, safety and sustainability practices associated with creative work |
| Interact with others | 2.1, 5.3 | • Discusses design concepts and collaborates with other artists to generate new ideas and solutions to achieve best outcomes for own creative work<br>• Engages in an open conversation to elicit and consider the merit of feedback from peers and others to enhance future performance |
| Get the work done | 1.1-1.3, 2.2-2.6, 3.1, 3.5, 4.1, 4.2 | • Takes responsibility for completing own creative works from design inception to realisation, efficiently and logically sequencing the stages of preparation and production<br>• Manages own decisions about appropriate design ideas and techniques by experimentation with a range of |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | explored options<br>• Resolves problems with technique through experimentation and analysis<br>• Reviews work in progress resolving problems through refinement of approach<br>• Creates opportunities to use a more innovative approach and personal style. |

# Assessment Requirements for CUAWOO401 Experiment with techniques to produce wood objects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with CUA Creative Arts and Culture Training Package version 2.0. |

## Performance Evidence

Evidence of the ability to:

- use a process of thorough research and experimentation to confirm ideas for own work
- identify and acquire resources required to complete chosen work
- adapt and use a range of woodworking techniques to create a single major work or multiple wood objects that:
  - shows technical proficiency in chosen techniques
  - reflects understanding of elements and principles of design
  - demonstrates innovation and the emergence of an individual style
- review and document the research and development process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe intellectual property requirements relevant to producing wood objects
- summarise methods used to research creative and technical approaches to woodworking
- explain how the works of other practitioners may be used to inform individual practice
- describe the role of experimentation in developing and refining ideas for wood objects and how it relates to the development of an individual style
- explain ways to adapt, extend and combine the capabilities of a wide range of woodworking techniques
- describe, for the elements and principles of design, the detailed characteristics, key interrelationships, use in wood objects and how they may be challenged
- summarise, for a range of tools and equipment used to produce wood objects, key physical features and uses, cleaning and maintenance techniques and storage requirements

© Commonwealth of Australia, 2025 Skills Insight

- describe the physical properties and capabilities of a range of materials and techniques used to produce wood objects
- list suppliers of resources for professional woodworking practice with particular emphasis on raw, part-processed and processed woodworking materials
- describe practices and procedures for working safely and sustainably with materials, tools and equipment for producing wood objects.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce wood objects
- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# HLTAID011 Provide First Aid

## Modification History

Not applicable.

## Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

*Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Respond to an emergency situation. | 1.1. Recognise and assess an emergency situation.<br>1.2. Ensure safety for self, bystanders and casualty.<br>1.3. Assess the casualty and recognise the need for first aid response.<br>1.4. Seek assistance from emergency services. |
| 2. Apply appropriate first aid procedures. | 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines.<br>2.2. Provide first aid in accordance with established first aid principles.<br>2.3. Display respectful behaviour towards casualty.<br>2.4. Obtain consent from casualty where possible.<br>2.5. Use available resources and equipment to make the casualty as comfortable as possible.<br>2.6. Operate first aid equipment according to manufacturers' instructions.<br>2.7. Monitor the casualty's condition and respond in accordance with first aid principles. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| 3. Communicate details of the incident. | 3.1. Accurately convey incident details to emergency services.<br>3.2. Report details of incident in line with appropriate workplace or site procedures.<br>3.3. Complete applicable workplace or site documentation, including incident report form.<br>3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies. |
| 4. Review the incident. | 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.<br>4.2. Contribute to a review of the first aid response as required. |

## Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

## Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705

# Assessment Requirements for HLTAID011 Provide First Aid

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

© Commonwealth of Australia, 2025 Skills Insight

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

# Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

© Commonwealth of Australia, 2025 Skills Insight

  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

# Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

© Commonwealth of Australia, 2025 Skills Insight

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

# ICPPRN3840 Set up and produce basic digital print

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 4.0. |

## Application

This unit describes the skills and knowledge required to set up for and produce basic digitally printed product incorporating the use of raster image processor (RIP) technology when outputting to digital devices including wide format.

It applies to individuals working as print machinists in the printing and graphic arts industry who may set up, operate and monitor equipment and machinery and who may have to prepare material and apply solutions to problems. They may also provide leadership and guidance to others with some limited responsibility for the output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Printing

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Check components and functions of digital print system | 1.1 Check user-replaceable consumables and replacement as required<br>1.2 Check substrate feeding mechanisms and transport units and clear of misfeeds as required<br>1.3 Complete set up for data and electrical power<br>1.4 Perform shutdown and restart procedures according to manufacturer specifications<br>1.5 Install and set up required print driver and job download |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | software |
| 2. Perform digital printing system maintenance | 2.1 Perform routine maintenance tasks according to manufacturer specifications and work health and safety (WHS) requirements<br>2.2 Clean substrate transport and inking systems<br>2.3 Check temperature and humidity conditions and substrate registration mechanisms<br>2.4 Perform ink density calibration<br>2.5 Implement basic maintenance solutions to minimise ink residue, substrate misfeed, paper particle dust, uncalibrated systems and ink coverage |
| 3. Undertake substrate handling procedures | 3.1 Develop and maintain paper handling and storage system for digital print environment according to requirements for substrate integrity and digital image quality<br>3.2 Check machine status, review print counters and consumable levels and estimate time requirements for reordering, servicing and reporting purpose |
| 4. Confirm job specifications | 4.1 Identify job specifications<br>4.2 Confirm availability of all job components<br>4.3 Check finishing requirements and coordinate internal workflow and outsource arrangements according to enterprise procedures<br>4.4 Calculate run time and completion time of job |
| 5. Set up reel system | 5.1 Adjust unwind reel<br>5.2 Set up and adjust rewind reel<br>5.3 Set up and adjust minor in-line processes |
| 6. Set up sheet transportation system on sheet-fed machine | 6.1 Load substrate into feeding mechanism and specify substrate properties in the user control interface<br>6.2 Identify and make adjustments to the delivery unit using the user control interface<br>6.3 Adjust on-line finishing unit using the user control interface |
| 7. Use processor to set up job | 7.1 Locate and retrieve electronic data files<br>7.2 Set processor parameters according to job specifications<br>7.3 Perform required preview and preflight checks of electronic data files<br>7.4 Apply basic troubleshooting methods to identify and rectify |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | unverified data files, file errors and job requirement inconsistencies according to manufacturer specifications |
| 8. Submit data files to digital print machine | 8.1 Determine job priority according to job specifications and production schedules<br>8.2 Submit data file to print and image quality, and perform machine productivity checks |
| 9. Produce digital proof and run digital print job | 9.1 Conduct proof run and confirm proof conforms to job specifications and client requirements according to enterprise procedures<br>9.2 Conduct print run is according to job specifications<br>9.3 Monitor quality throughout print job and make adjustments as required |
| 10. Perform document finishing | 10.1 Identify and perform required document finishing<br>10.2 Package finished print according to delivery requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Description |
|---|---|
| Writing | • Enters routine data associated with production processes and enterprise procedures |
| Numeracy | • Interprets and analyses a range of mathematical information used in familiar and routine tasks |
| Self-management | • Identifies and follows explicit and implicit protocols and meets expectations associated with own role, taking some responsibility for decisions regarding when and how to complete tasks, co-ordinate with, or delegate to others<br>• Complies with work health and safety and enterprise procedures relevant to own role |
| Teamwork | • Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability<br>• Identifies what to communicate, with whom and how, in routine work situations |
| Planning and | • Determines priorities and sequences steps involved in clearly defined, |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| organising | familiar tasks |
| Problem solving | • Responds to predictable problems and implements standard or logical solutions related to role in immediate work environment |
| Technology | • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems |

# Assessment Requirements for ICPPRN3840 Set up and produce basic digital print

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 4.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- set up and print four basic digital printing jobs according to manufacturer specifications, enterprise procedures and work health and safety (WHS) requirements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- enterprise procedures, manufacturer specifications and work health and safety (WHS) requirements for:
  - setting up and operating in-line processes
  - the rewind function
- workplace job ticket procedures and pre-printing set-up checks and procedures
- procedures for:
  - file transfer actions and problem solving
  - selecting inks/toners for varied printed products and ensuring ink/toner quality
  - setting up on-line processes
  - obtaining client approval of the print and final approval of a basic job
  - proof checking
  - circumstances where client’s required binding method is unavailable
  - packaging finished print work
- common problems and faults arising from:
  - printing on lightweight paper
  - incorrect feeding and delivery
- the process if required substrate is unavailable
- the range of substrate weights that can be printed on a specific machine

© Commonwealth of Australia, 2025 Skills Insight

- the availability of pre-prepared substrates for a specific machine
- the maximum delivery quantity for a specific machine
- the function of the raster image processor (RIP) in the job
- data formats used in digital print
- common troubleshooting methods required in the job
- required calculations for run and completion time of job
- the benefits of electronic data over scanning hardcopy, and ways to submit a PDF file to a digital printer
- in-line options and on-line finishing options available on a specific machine
- circumstances where a job would be modified before printing
- various types of binding
- alternative options if document size is too thick to staple
- quality criteria to check in proof
- the purpose of packing finished print work
- manufacturer manuals, enterprise procedures and work health and safety documentation, including their location and purpose.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- digital print machinery
- RIP or front-end processor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for ICPSUP455 Supervise and schedule work of others

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- effectively schedule and supervise a team or individuals
  - create a portfolio of documents showing:
  - planning, implementing and monitoring schedules
  - monitoring and reporting on the performance of others
  - providing support and feedback on performance to others
  - determining safety requirements in the work area
  - monitoring work health and safety and environmental standards. (Suitable documents for the portfolio include rosters, schedules, quality-related documentation and testimonials from superiors and workers being supervised.)

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

**WHS standards**

- explain who is responsible for work health and safety (WHS) standards in the workplace
- explain reporting procedures for WHS incidents

**Planning and implementing work schedules**

- explain how priority of jobs is determined
- describe work scheduling procedures used within the organisation
- explain why changes to scheduling might be needed

**Standards monitoring**

- outline information reported in performance monitoring

© Commonwealth of Australia, 2025 Skills Insight

- identify who is responsible for providing instruction to achieve the required standard

**Staff and workforce development**

- describe how often teams or individuals should be monitored on performance
- outline changes that can be made to enhance individual performance
- outline changes that can be made to enhance team performance
- list advantages of providing written reports to management.

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Support field of work and include access special purpose tools, equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.

# MEM05007C Perform manual heating and thermal cutting

## Modification History

Not Applicable

## Unit Descriptor

| | |
|---|---|
| **Unit descriptor** | This unit covers performing manual heating, thermal cutting and gouging including the assembly and disassembly and operation of the equipment on a range of materials (ferrous, non-ferrous and non-metallic) using a variety of methods. |

## Application of the Unit

| | |
|---|---|
| **Application of the unit** | This unit applies to manual, straight line cutting standards. Manual or automatic processes are used to cut and heat to specifications. Cutting may include flame gouging by hand. All work is carried out to legislative and regulatory requirements. Predetermined standards of quality and safety are observed and work is carried out following standard operating procedures.<br><br>**Band**: **A**<br>**Unit Weight**: **2** |

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

| | | |
|---|---|---|
| **Prerequisite units** | | |
| | | |

## Employability Skills Information

| **Employability skills** | This unit contains employability skills. |
|---|---|

## Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

## Elements and Performance Criteria

| **ELEMENT** | **PERFORMANCE CRITERIA** |
|---|---|
| 1. Assemble/disassemble plant and equipment | 1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting. |
| 2. Operate heating and thermal cutting equipment | 2.1. Cutting process and/or procedure appropriate for material is selected.<br>2.2. All safety procedures are observed.<br>2.3. Equipment start-up procedures are followed correctly to standard operating procedures.<br>2.4. Equipment adjustments are made correctly using standard operating procedures.<br>2.5. Appropriate cutting allowances are made.<br>2.6. Material is used in the most economical way.<br>2.7. Defects are identified and corrective action is taken to standard operating procedures.<br>2.8. Material is heated and cut to specification. |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.9. Shape/size/length is to accepted workplace standards. |

# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

**Required knowledge**

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment

© Commonwealth of Australia, 2025 Skills Insight

| **REQUIRED SKILLS AND KNOWLEDGE** |
|---|
| • cutting allowances and reasons for applying them<br>• procedures for minimising waste material<br>• reasons for minimising waste material<br>• cutting defects and their causes<br>• procedures for correcting cutting defects<br>• tools, equipment and techniques required to correct cutting defects<br>• use and application of personal protective equipment<br>• safe work practices and procedures |

# Evidence Guide

| **EVIDENCE GUIDE** | |
|---|---|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. | |
| **Overview of assessment** | A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting. |
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. |
| **Context of and specific resources for assessment** | This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.<br><br>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit. |

© Commonwealth of Australia, 2025 Skills Insight

| **EVIDENCE GUIDE** | |
|---|---|
| **Method of assessment** | Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials. |
| **Guidance information for assessment** | |

# Range Statement

| **RANGE STATEMENT** | |
|---|---|
| The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included. | |
| **Cutting** | Use of hand held and self-propelled straight line cutters |
| **Process** | Fuel gas, oxy fuel gas and air fuel gas |
| **Material** | Various thicknesses and types including ferrous, non-ferrous and non-metallic materials |

# MEM05012C Perform routine manual metal arc welding

## Modification History

Not Applicable

## Unit Descriptor

| | |
|---|---|
| **Unit descriptor** | This unit covers preparing the materials and carrying out routine manual metal arc welding (MMAW). |

## Application of the Unit

| | |
|---|---|
| **Application of the unit** | This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels.<br><br>Where welding is required to AS 1554 General Purpose or equivalent codes, occupational health and safety regulations and/or licensing requirements, Unit MEM05015D (Weld using manual metal arc welding process) should be selected.<br><br>**Band**: **A**<br><br>**Unit Weight**: **2** |

# Employability Skills Information

| | |
|---|---|
| **Employability skills** | This unit contains employability skills. |

# Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 1. Determine job requirements | 1.1. Nature and scope of task requirement are identified.<br>1.2. Information/data required to be accessed, input or stored is identified.<br>1.3. Source of information/data is identified. |
| 2. Access information/data | 2.1. Access procedures are followed.<br>2.2. Technology is navigated to find the required information/data.<br>2.3. Relevant software application menus, functions and commands are used to locate required information/data.<br>2.4. Information/data is retrieved using organisational procedures.<br>2.5. Information/data is checked for relevance to job requirements. |
| 3. Input information/data | 3.1. Relevant software menus, functions and commands are used to manipulate information/data.<br>3.2. Information/data is entered, changed, or removed as required. |
| 4. Store | 4.1. Data/files are saved following standard procedures |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| information/data | prior to exiting the application.<br>4.2. Data output is produced as required.<br>4.3. Procedures for shutting down/logging off/exiting computing technology are followed. |
| 5. Access assistance as required | 5.1. Appropriate personnel are identified and consulted as required.<br>5.2. Manuals, online help and other reference materials are identified and used as required. |

# Required Skills and Knowledge

| REQUIRED SKILLS AND KNOWLEDGE |
|---|
| This section describes the skills and knowledge required for this unit. |
| **Required skills** |
| Look for evidence that confirms skills in:<br>• ability to enter or retrieve data using appropriate software applications<br>• reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents<br>• planning and sequencing operations<br>• checking and clarifying task-related information<br>• using numerical operations within the scope of this unit |
| **Required knowledge** |
| Look for evidence that confirms knowledge of:<br>• functions and capabilities of various types of computing technology used in the workplace<br>• functions of software applications<br>• hazards and control measures associated with using computing technology, including housekeeping<br>• safe work practices and procedures |

# Evidence Guide

| **EVIDENCE GUIDE** | |
|---|---|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. | |
| **Overview of assessment** | A person who demonstrates competency in this unit must be able to interact with computing technology to achieve workplace outcomes. |
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. |
| **Context of and specific resources for assessment** | This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.<br><br>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with interacting with computing technology or other units requiring the exercise of the skills and knowledge covered by this unit. |
| **Method of assessment** | Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials. |

# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- measuring and marking out with tape measures, rules, squares and templates
- identify existing fixtures and fittings (if any) including type and quality of construction
- establishing customer requirements such as location, product type/colour/function, compatibility with existing hardware
- communicating product information
- interpreting fitting instructions/templates/terminology
- planning stages/steps for installation or upgrade and suitable timeframe for installation
- checking tools for serviceability
- selecting appropriate tools for the type of products, materials and conditions
- identifying and assessing hazards
- using safety and personal protective equipment
- safely using tools and equipment
- drilling, filing, fixing
- applying safe work practices
- assessing the potential for unforeseen problems and incidents to affect the installation
- testing and confirming function of locks and hardware
- completing and processing documentation

**Required knowledge**

Look for evidence that confirms knowledge of:

- utility and application of locks/hardware/accessories
- fixtures (doors, frames, windows etc.) and their type of construction, such as foam fill, hollow, clad, steel, aluminium and other materials
- types and functions of locks, hardware and accessories to suit different fixtures and materials
- factors for determining customer requirements
- factors affecting suitable options including intended use, cost, compatibility with existing hardware
- installation procedures for locks/hardware/accessories
- terminology relating to lock products and installation
- tools and equipment for installing locks, hardware and lock furniture

© Commonwealth of Australia, 2025 Skills Insight

| **REQUIRED SKILLS AND KNOWLEDGE** |
|---|
| • use of specialised tools, such as morticers, routers, jigs, cherry centre<br>• materials, parts and components for installation of locks and lock furniture<br>• hazards and risks to installer, client and public<br>• applicable legislation, local regulations<br>• safety and emergency measures and safe work practices to avoid or minimise potential and actual hazards<br>• individual responsibilities and duty of care<br>• types and uses of personal protective equipment<br>• access and installation factors, such as site safety issues, night access, disruption to client work routines, installation environment, building codes<br>• procedures for measuring and marking lock and lock furniture positions<br>• installation procedures for locks and lock furniture<br>• effects of incorrect installation<br>• common installation problems<br>• troubleshooting and lock testing methods<br>• potential installation problems and incidents, including breakdowns, environmental, physical, time and cost restrictions, product supply problems<br>• strategies for resolving problems and incidents<br>• procedures and industry standards for site clean-up<br>• organisational requirements for final inspection<br>• organisational requirements for client acceptance<br>• manufacturer specifications, uses, limitations and warranties for relevant product/s<br>• procedures to complete and process relevant documentation, including installation details, costings, materials used, records of faults and damage, installation problems and factors, testing and inspection results<br>• environmentally safe disposal procedures for packaging and other waste<br>• procedures for client notification and acceptance of job completion |

## Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

## Elements and Performance Criteria

| **ELEMENT** | **PERFORMANCE CRITERIA** |
|---|---|
| 1. Prepare for installation and service | 1.1. Work order is reviewed and clarified with appropriate person(s) as required in accordance with organisational requirements.<br>1.2. Tools, equipment and materials are selected appropriate to job requirements and checked for operational effectiveness in accordance with manufacturers' specifications.<br>1.3. Faulty or unsafe tools are identified and segregated for repair or replacement in accordance with organisational procedures.<br>1.4. Potential and existing risks and hazards associated with maintenance activities are identified and controlled in accordance with OHS policies and procedures and organisational requirements.<br>1.5. Suitable personal protective equipment is selected |

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | and maintained in accordance with OHS and organisational requirements. |
| 2. Install door control devices/systems | 2.1. All work is conducted using safe operating practices in accordance with OHS and organisational requirements.<br>2.2. The appropriate door control device/systems are selected for the given door type and specifications.<br>2.3. Door control devices/systems are installed in accordance with manufacturers' specifications, work order and OHS requirements legislative and organisational requirements.<br>2.4. Door control devices/systems are checked for correct operation and adjusted as necessary. |
| 3. Service door control device | 3.1. Checks are conducted on door control devices/systems and/or components to identify any damage, friction or sticking in accordance with manufacturers' specifications.<br>3.2. Assessment of viability for continued operation or replacement of door control device.<br>3.3. Door control devices/systems and/or components are adjusted in accordance with manufacturers' specifications, work order and OHS requirements legislative and organisational requirements. |
| 4. Complete installation or service | 4.1. Notification of work completion is made to appropriate person(s) in accordance with organisational procedures.<br>4.2. Documentation is promptly and accurately completed and processed in accordance with industry, legislative and organisational requirements.<br>4.3. Work area, tools and equipment are cleaned and stored in accordance with OHS and organisational requirements.<br>4.4. Malfunctions, faults, wear or damage to tools is reported for repair or replacement in accordance with organisational policy and procedures.<br>4.5. Waste from service and repair activities is collected, treated and disposed or recycled in accordance with organisational and environmental requirements. |

# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- communicating in a clear and concise manner
- using appropriate tools and equipment
- lubricating mechanical locks and locking systems
- demonstrating basic logic and lateral thinking processes
- disassembling/reassembling mechanical locks/locking systems
- identifying faults
- reading and interpreting specifications, charts and diagrams
- methodically organising and prioritising work tasks
- solving routine problems
- working in confined spaces
- accurately estimating materials, tools and equipment requirements
- applying safe and environmentally aware workplace practices

**Required knowledge**

Look for evidence that confirms knowledge of:

- types, functions and specifications of door control devices/systems
- correct selection of door control devices
- operational principles of door control devices/systems
- common door control devices/systems faults
- maintenance requirements of door control devices/systems
- tests to confirm door control devices/systems operation
- procedures to disassemble/reassemble
- technical terminology
- types of doors and windows and mechanical system applications
- maintenance risks and hazards
- working in confined space procedures
- duty of care

© Commonwealth of Australia, 2025 Skills Insight

# Evidence Guide

| **EVIDENCE GUIDE** | |
|---|---|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. | |
| **Overview of assessment** | A person who demonstrates competency in this unit must be able to install and maintain door control devices/systems across a range of areas. Competency in this unit cannot be claimed until all prerequisites have been satisfied. |
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. |
| **Context of and specific resources for assessment** | This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.<br><br>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with installing and maintaining door control systems/devices, or other units requiring the exercise of the skills and knowledge covered by this unit. |
| **Method of assessment** | Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials. |

| **EVIDENCE GUIDE** | |
|---|---|
| **Guidance information for assessment** | |

# Range Statement

| **RANGE STATEMENT** | |
|---|---|
| The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included. | |
| **Work order** | Work schedules, completion dates, job requirements and tasks, specific client requirements, access to site and specific site requirements, resource requirements, OHS requirements, compliance with relevant legislation, budget allocations, warranties and service information |
| **Appropriate person(s)** | Installer, sub contractor, technician, supervisor, manager, director, client |
| **Organisational requirements** | Legal and organisational operational policies and procedures, operations manuals, induction and training materials, insurance policy agreements, client and organisational confidentiality requirements, organisational goals/objectives/plans/systems/ processes, employer and employee rights and responsibilities, own role, responsibility and delegation, quality and continuous improvement processes and standards, client service standards, defined resource parameters, OHS policies/procedures/programs, emergency and evacuation procedures, duty of care, code of conduct, code of ethics, access and equity policy, principles and practice, records and information systems and processes, communication channels and reporting procedures |

© Commonwealth of Australia, 2025 Skills Insight

| **RANGE STATEMENT** | |
|---|---|
| **Tools and equipment** | Hand tools, fixing tools, strippers, router, file, drill, power saw, spirit level, soldering iron, welder, ladder, hoist, drop sheet, batteries, master key plans, personal protective equipment, communications equipment |
| **Materials** | Solder, insulation tape, springs, pins, graphite powder, oil, silicon, dry lube, grease, lockease, glue, paint, patch materials, electronic components, cleaning compounds, key blanks |
| **Risks and hazards** | Non-compliance with building codes and regulations, exposed electrical wiring, manual handling, exposure to asbestos, dust, noise, live power, vermin, water, glass fibre, building debris, natural and other gas build-up |
| **Maintenance** | Cleaning, inspection, lubrication, routine repairs, identification of worn parts, confirming operation, adjustments, key cutting, replacement of worn parts |
| **OHS policies and procedures** | Hazardous and risk assessment mechanisms, implementation of safety regulations, safety training, safety systems incorporating - work clearance procedures, isolation procedures, gas and vapour, monitoring/testing procedures, use of protective equipment and clothing, use of codes of practice |
| **Personal protective clothing and equipment** | Masks, safety glasses, head protection, ear muffs, safety boots, knee pads, gloves, warning signs and tapes, first aid kit |
| **Door control devices/systems** | Surface mounted door closers, semi concealed door closers, concealed closers, semi automatic/automatic door control devices, exit devices |
| **Safe operating practices** | Working safely around electrical wiring, cables and overhead power lines, working safely around tools and equipment, hazard recognition, emergency procedures, awareness of electrical hazards, following confined spaces procedures, administering first aid |

© Commonwealth of Australia, 2025 Skills Insight

| **RANGE STATEMENT** | |
|---|---|
| **Applicable legislation**, **codes and national standards** | Compliance with Australian building codes and regulations, compliance with Australian Communications Authority (ACA) cabling standards, EPA noise control regulations, relevant Commonwealth/State/Territory legislation which affect organisational operation - OHS and safe work practices, environmental issues, equal employment opportunity, industrial relations, anti-discrimination and diversity, licensing arrangements, Australian standards, quality assurance and certification requirements, relevant industry codes of practice, trade practices, award and enterprise agreements, privacy requirements and privacy related legislation |
| **Documentation** | Completion of work log, mechanical lock/locking system problems/faults, warranty conditions and allowances, recommendation for repairs, operational checks and maintenance conducted, testing and commissioning results, parts and components replaced, materials used, recommendations for future operation and maintenance, costings |

# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- conducting root cause analysis
- identifying mean time between failures
- basic analysis of the effects of failures
- conducting condition monitoring
- analysing
- assessing
- communicating
- problem solving
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking for conformance to specifications
- checking and clarifying task-related information

**Required knowledge**

Look for evidence that confirms knowledge of:

- characteristics and strengths of different types of strategies
- characteristics and strengths of different types of techniques and tools
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them
- hazard and control measures associated with using basic preventative maintenance techniques and tools, including housekeeping
- use and application of personal protective equipment
- safe work practices and procedures

# MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

## Modification History

Release 1 - New unit of competency

## Unit Descriptor

This unit of competency covers the skills and knowledge required to apply functions of computer-aided design (CAD) software programs that are typically used in the production of detail drawings.

## Application of the Unit

This unit is suitable for those working within a CAD or drafting work environment and may be applied across engineering and manufacturing environments. It covers competent use of a CAD program to perform basic drawing tasks used in the development of detail drawings. Drawings may include plans, diagrams, charts, circuits, systems or schematics.

This unit includes using computer equipment and selecting software functions in order to generate basic drawing elements.

Work is conducted under supervision.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of |

© Commonwealth of Australia, 2025 Skills Insight

performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| | | | |
|---|---|---|---|
| 1 | Confirm drawing requirements | 1.1 | Confirm purpose, scope, and information and presentation requirements for drawing |
| | | 1.2 | Review available information relevant to project and work requirements, and identify and address further information needs |
| | | 1.3 | Identify computing equipment and software used in the organisation |
| | | 1.4 | Identify work flow and procedures for work supervision |
| | | 1.5 | Examine requirements for presentation of drawings |
| 2 | Identify key features of CAD software | 2.1 | Describe types of CAD software used for detail drafting, their key features and suitability for producing specific drawing outcomes |
| | | 2.2 | Describe types of CAD software used for design drafting, their key features and suitability for producing specific drawing outcomes |
| | | 2.3 | Identify differences in CAD process to generate 2-D drawings and 3-D models, and reasons for each presentation |
| | | 2.4 | Identify differences in CAD process to generate single and multiple view drawings, and reasons for each presentation |
| | | 2.5 | Identify CAD software used in the organisation and confirm compatibility with other software programs and peripheral equipment |
| | | 2.6 | Identify software features for linked specifications, catalogues or materials ordering |
| 3 | Access software and set up for | 3.1 | Open software and navigate organisational filing and library system |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | drawing work | 3.2 | Identify organisational and software templates and determine uses |
| | | 3.3 | Identify organisational symbols, codes and standards to be applied in drafting work and how these are accessed and applied |
| | | 3.4 | Apply workplace procedures to retrieve and manipulate required information and navigate computing technology |
| | | 3.5 | Set up working environment |
| 4 | Produce basic drawing elements | 4.1 | Use CAD functions to produce basic drawing elements |
| | | 4.2 | Use editing and transfer tools and methods to modify drawing elements |
| | | 4.3 | Apply dimensions, text and symbols to drawing elements |
| | | 4.4 | Import and export files into/out of working space |
| | | 4.5 | Generate different views and perspectives |
| | | 4.6 | Organise presentation of work |
| 5 | Complete CAD operations | 5.1 | Save and file drawing elements according to organisational procedures |
| | | 5.2 | Print drawing elements and evaluate presentation |
| | | 5.3 | Evaluate work and identify areas for improvement |
| | | 5.4 | Close applications, perform CAD housekeeping and maintain organisational filing system |

# Required Skills and Knowledge

### Required skills

Required skills include:

- literacy skills sufficient to read instructions for drawings work

© Commonwealth of Australia, 2025 Skills Insight

- using computer technologies and navigating software
- numeracy skills sufficient to interpret technical information and determine scaling and layout issues
- navigating software to:
  - manipulate drawing entities
  - modify dimension styles
  - create and use layers
  - manipulate the drawing origin
  - define and utilise symbol libraries
  - utilise grids/grid snaps and object snaps
  - display views at multiple scales
  - add title blocks/frame to layout a drawing for printing
  - prepare advanced drawings in plane orthogonal or equivalent
  - set up prototype drawings
  - define and extract attribute data
  - create bills of materials (BOM) utilising attribute data and third-party application software

**Required knowledge**

Required knowledge includes:

- general knowledge of different approaches to drawing
- awareness of copyright and intellectual property issues and legislation in relation to drawing
- environmental and occupational health and safety (OHS) issues associated with the tools and materials used for drawing
- quality assurance procedures
- CAD program capabilities and processes

# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Overview of assessment** | A person who demonstrates competency in this unit must be able to use CAD software to produce graphics commonly used in drafting work. |
| **Critical aspects for assessment and evidence required to demonstrate competency in this** | Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required |

# MSAPMSUP201A Receive or despatch goods

## Modification History

Not applicable.

## Unit Descriptor

### Unit descriptor

This competency covers the handling of materials by an operator as an adjunct to the job of making product. It applies to a limited range of materials. It is NOT intended to be an alternative warehousing competency.

This competency is typically performed by operators working either independently or as part of a work team.

## Application of the Unit

### Application of this unit

This competency applies to operators who receive, process despatch orders, despatch products/materials and maintain records. The key factors are correctly identifying and selecting the goods to be despatched and ensuring they are despatched to the correct location.

It includes:

- checking order requests/consignment note documentation for products/materials to be despatched
- identifying and selecting the correct products/materials
- organising products/materials to be moved into the right place by the right time, using the appropriate handling equipment
- preparing products/materials for despatch
- completing and checking all documentation
- updating records.
-

## Licensing/Regulatory Information

| despatch. | assembling and completing orders.<br>3.2 Select and check goods for despatch. against product/material knowledge, labels and other identification systems.<br>3.3 Sort, assemble and consolidate products as necessary.<br>3.4 Secure order and place in storage areas, in accordance with schedule.<br>3.5 Check order against despatch schedule and order form. |
| 4. Complete materials movement records. | 4.1 Complete materials movement records (in or out).<br>4.2 Update records as required.<br>4.3 Complete other paperwork and records as required. |

# Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the materials handling processes and requirements sufficient to recognise non-standard situations and then determine appropriate action which is consistent with operating guidelines is required.

Knowledge is required of the product/material, its properties and uses sufficient for correct receipt, storage and despatching. Knowledge of the relevant OHS and environmental requirements is required along with an ability to implement them in a manner which is relevant to the materials handled.

Competence includes the ability toapply and/or describe:

- product/material knowledge
- inventory and ordering systems
- transport requirements and restrictions for products/materials
- correct OHS procedures
- storage/handling principles and procedures
- material hazard properties and their implications for safe handling and storage
- significance of material to customers; transport requirements and restrictions for materials
- plan own work, including predicting consequences and identifying improvements

© Commonwealth of Australia, 2025 Skills Insight

- identify and describe own role and role of others involved directly in the processing of orders and despatching of products
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task
- distinguish between causes of problems such as product requirements and job priority as relevant to the practical completion of the job.

**Language**, **literacy and numeracy requirements**

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, e.g. to determine that two 25 kg bags are needed to make up a requirement for 50 kg.

# Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

**Overview of assessment**

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

It is essential that competence is demonstrated in the ability torecognise and analyse potential situations requiring action and then in implementing appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that:

- packaging standards are met consistently
- procedures and work instructions are read and interpreted correctly
- potential problems are recognisedand action is taken (ie, the problem is fixed or reported)
- action is taken to ensure problems are dealt with in a timely manner
- problems caused by product/material issues are recognised and an appropriate contribution made to a solution
- items initiated are followed through until final resolution has occurred.
- effective communication between team members, supervisors and other staff is maintained.

Competence must be demonstrated in the operation of all ancillary equipment to the level required for this competency unit.

### Assessment method and context

Assessment will occur using industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by observation over time on a processing plant
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

### Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

### Context

This competency covers the handling of a limited range of products/materials and their moving into and out of a plant/storage. It is NOT intended for people who, as a major function, operate a warehouse. The appropriate Transport and Distribution competencies should be used here.

This competency may require the operation of forklift trucks or other regulated load shifting devices which are NOT included in this competency, and so would be a co-requisite competency.

© Commonwealth of Australia, 2025 Skills Insight

The terms order request, documentation, labels, transportation requirements 'paperwork' and 'records' mean any and all relevant information and data whether it is manual, paper based, electronic or verbal, either in person or by phone/radio.

This competency does not imply that moving materials into and from storage/plant are conducted equally, or even using similar techniques. Customers may be internal or external and the loading/unloading of products/materials may mean getting them onto/off a truck or simply from/to the next department.

**Procedures**

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

**Tools and equipment**

This competency includes use of equipment and tools such as:

- mobile plant/fork lifts
- manual handling equipment
- hand tools
- shrink wrappers
- tape machine labellers
- loose bulk packing equipment.
- computers, bar code readers
- bag filling equipment
- pallets
- wrapping machines
- personal protective equipment (PPE)
- distribution equipment, including A-frames, stillages, containers, elevated platforms and communication equipment.

**Hazards**

Typical hazards include:

- inappropriate movements and postures
- physical and atmospheric hazards of materials
- height or depth of storage receptacles
- stationary and moving machinery, parts or components
- noise, light, energy sources
- humidity, air temperature, radiant heat
- manual handling hazards.

**Problems**

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- special storage requirements including moisture and contamination control
- handling of incomplete loads (either in or out)

© Commonwealth of Australia, 2025 Skills Insight

- handling of materials which do not meet specifications
- conflicting priorities
- incomplete or incorrect paperwork.
- product requirements
- job priority
- product/material variations.

**Variables**

Key variables to be monitored include:

- types of products or materials to be received/despatched
- handling heights
- types of equipment
- types of workplace documentation
- atmospheric conditions.

# MSFBA1001 Construct a basic roll-up blind

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers constructing a basic roll-up blind ready for installation.

Applications may include a variety of employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for work | 1.1 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.2 | Work orders are checked and confirmed with appropriate personnel |
| | | 1.3 | Tools and equipment suitable for construction are identified and checked for safe and effective operation |
| | | 1.4 | Materials are selected and checked |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.5 | Hardware is selected according to work instructions |
| 2 | Complete construction | 2.1 | Allowances for hardware, joins and hems are calculated and recorded |
| | | 2.2 | Material is laid out laid out flat and square on a cutting table large enough to take full width of material and marked using chalk, markers or pencil according to work instructions |
| | | 2.3 | Fabric is cut according to work order |
| | | 2.4 | Bottom and side hems are finished |
| | | 2.5 | Spline is selected, cut and attached to top of blind |
| | | 2.6 | Roller is cut to length and attached to spline |
| | | 2.7 | Control mechanism and pin end are attached |
| | | 2.8 | Lath and pull ring are attached |
| | | 2.9 | Child safety mechanisms are selected and attached |
| 3 | Apply quality checks | 3.1 | Finished blind is checked against work order and tested within limits of normal operation for correct operation |
| | | 3.2 | Parts of the work that do not comply with work order are repaired or re-worked |
| 4 | Finalise operation and maintain equipment | 4.1 | Completed work is cleaned, packaged and stored |
| | | 4.2 | Tools and equipment are cleaned, maintained and stored and any faulty tools and equipment are reported to supervisor |
| | | 4.3 | Work area is cleaned and waste is disposed of according to workplace practices |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.
