Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Timbers include:**

- spruce
- ebony
- beech
- birch
- hardwood
- softwood
- veneers
- chipboard
- medium density fibreboard (MDF)

**Metals include:**

- aluminium
- steel
- solders
- cast iron
- brass

**Felts include:**

- wool
- synthetic

**Synthetics include:**

- plastic (keys, bushings, damper head, damper flanges, hammer butt, jack, jack flange and capstone)

# Assessment Requirements for MSFPT3002 Select materials for piano repair and manufacture

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Locate, interpret and apply information relevant to selection and use of materials, fasteners, hardware and adhesives for piano repair and manufacture, including:
  - identifying, selecting and applying at least three (3) types of fasteners and adhesives to appropriate materials
  - identify surface coatings and finishes used in piano repair and manufacture
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for selecting materials for piano repair and manufacture
- Organisational and site standards, requirements, policies and procedures for selecting materials for piano repair and manufacture
- Reading and interpreting workplace documents including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types, characteristics, uses, limitations and preparation of materials and equipment used in piano repair and manufacture

© Commonwealth of Australia, 2025 Skills Insight

- Types of tools and equipment used to repair and manufacture pianos and procedures for their safe use, operation and maintenance
- Characteristics of hardware and materials and their use
- Relevant problem identification and resolution
- Set-up and operation of tools and equipment used to repair and manufacture pianos
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to hand and power tools used in the repair and manufacture of pianos, materials used in the repair and manufacture of pianos, safety and personal protective equipment, and holding and supporting equipment.

# MSFPT3003 Repair upright and grand piano actions, keys and pedals

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers repairing upright and grand piano actions, keys and pedals, and applies in a workplace and on-site environment conducted for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for repairing actions, keys and pedals | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to repairing pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel with written instructions followed |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| 2 | Prepare for repair | 2.1 | Tools and equipment are selected consistent with the needs of the job |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Selected tools and equipment are checked for service ability and safety and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| | | 2.4 | Materials required for the repair of piano actions, keys and pedals are selected |
| 3 | Repair piano actions, keys and pedals | 3.1 | Correct posture for repairing is demonstrated which minimises fatigue and promotes muscular control |
| | | 3.2 | Tools and equipment are applied in the repair process |
| | | 3.3 | Actions and keys are removed or dismantled, as required by the repairing process |
| | | 3.4 | Faulty or damaged parts are removed from actions, keys and pedals |
| | | 3.5 | Action parts are re-centred, as required |
| | | 3.6 | Materials for replacement felts and leathers are selected, cut and glued to action parts |
| | | 3.7 | Faulty or damaged parts are replaced in accordance with manufacturer recommendations and workplace practices |
| | | 3.8 | Quality of the repair process is continuously monitored in accordance with workplace practice and quality procedures |
| | | 3.9 | Correct posture for repairing is demonstrated which minimises fatigue and promotes muscular control |
| 4 | Clean up work area | 4.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 4.2 | Work area is cleared and waste removed |
| | | 4.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Tools and equipment include:**

- knives
- guillotine
- measuring equipment
- centering equipment
- glue brushes and sticks
- glue pots

**Correct posture includes:**

- standing or seated according to type of piano and height of individual
- evenly distributing body weight between both feet while standing to reduce fatigue
- resting arm, where available, to aid control during tuning and reduce tiredness

**Faulty or damaged parts include:**

- actions:
  - broken damper springs
  - faulty hammer heads and shanks
  - faulty hardware
- keys:
  - broken keys

© Commonwealth of Australia, 2025 Skills Insight

- discoloured keys
- faulty key leads

- pedals:
  - loose/worn pedal caps
  - worn pedal felt
  - damaged trap work
  - broken pedals

**Re-centering of action parts includes:**

- identify faulty centre pins
- extraction of faulty centre pins
- re-bushing flanges
- replacement of centre pins
- replacement of flanges

**Felts and leathers include:**

- felts:
  - box cloth
  - cushion felt
  - check felt
  - hammer-rest baize
  - backtouch baize
  - name board felt
  - celeste-rail felt
  - bushing felt
  - damper felts
- leathers:
  - doeskin
  - pigskin
  - sheepskin
  - kangaroo skin
  - split skin

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

# Assessment Requirements for MSFPT3003 Repair upright and grand piano actions, keys and pedals

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Repair a minimum of two (2) actions, keys and pedals in both upright and grand pianos
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for repairing upright and grand piano actions, keys and pedals
- organisational and site standards, requirements, policies and procedures for repairing upright and grand piano actions, keys and pedals
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types, characteristics, uses, limitations and preparation of materials and equipment used in piano repair and manufacture
- Types of tools and equipment used to repair actions, keys and pedals and procedures for their safe use, operation and maintenance
- Relevant problem identification and resolution
- Set-up and operation of tools and equipment used for repairing actions, keys and pedals

# MSFPT3004 Rebuild upright and grand piano actions, keys and pedals

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers rebuilding upright and grand piano actions, keys and pedals. It includes removing and rebuilding of keys and key leads; damaged or worn felts, leathers and action springs; and broken hammerheads. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for rebuilding actions, keys and pedals | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to rebuilding pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Prepare to rebuild | 2.1 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| | | 2.4 | Materials required for the repair of piano actions, keys and pedals are selected |
| 3 | Dismantle actions and keys | 3.1 | Correct posture for rebuilding is demonstrated which minimises fatigue and promotes muscular control |
| | | 3.2 | Actions are dismantled and all parts are named and numbered |
| | | 3.3 | Keys are removed from keyboard and named and numbered |
| | | 3.4 | Pedals are removed |
| 4 | Rebuild parts | 4.1 | Parts to be rebuilt or reconditioned are identified |
| | | 4.2 | Parts are measured and stripped of old materials in preparation for reconditioning |
| | | 4.3 | Parts are measured and reconfigured in preparation for rebuilding |
| | | 4.4 | Rebuilding or reconditioning of actions, key and pedals is carried out as required |
| | | 4.5 | Quality of the rebuilding process is continuously monitored in accordance with workplace practice and quality procedures |
| | | 4.6 | Piano actions, keys and pedals are re-assembled according to workplace practices |
| 5 | Clean up work area | 5.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 5.2 | Work area is cleared and waste removed |
| | | 5.3 | Workplace documentation is completed and filed |

# Assessment Requirements for MSFPT3004 Rebuild upright and grand piano actions, keys and pedals

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Rebuild a minimum of two (2) actions, keys and pedals in both upright and grand pianos
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for rebuilding actions, keys and pedals on upright and grand pianos
- Organisational and site standards, requirements, policies and procedures for rebuilding actions, keys and pedals on upright and grand pianos
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Terms used to describe components of an upright and grand piano
- Types, characteristics, uses, limitations and preparation of materials and equipment used in rebuilding actions, keys and pedals on upright and grand pianos
- Types of tools and equipment used to rebuild actions, keys and pedals, and procedures for their safe use, operation and maintenance

© Commonwealth of Australia, 2025 Skills Insight

- Relevant problem identification and resolution
- Set-up and operation of tools and equipment used for rebuilding actions, keys and pedals on upright and grand pianos
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to hand and power tools used in the rebuilding of actions, keys and pedals of upright and grand pianos, safety and personal protective equipment, holding and supporting equipment, and upright and grand pianos.

# MSFPT3005 Re-string and re-pin a piano

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers removing existing strings and pins from upright and grand pianos and replace them with new strings and pins, including disassembling and re-assembling the piano, assessing piano suitability for restringing, de-tuning piano, chipping up and measuring strings and pin positions for replacement. It applies in workplace and on-site environments for small to medium scale enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for re-stringing and re-pinning | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to repairing pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Prepare for repair | 2.1 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| | | 2.4 | Materials required for the re-stringing and re-pinning of piano are selected |
| 3 | Assess piano | 3.1 | Correct posture for repairing is demonstrated which minimises fatigue and promotes muscular control |
| | | 3.2 | Case parts are removed and stored |
| | | 3.3 | Measurements of all string sizes are taken throughout piano |
| | | 3.4 | Position of all pressure bars, duplex bars and under-stringing felts are noted |
| | | 3.5 | Base strings are inspected for tone and quality, noting those needing replacement |
| 4 | Prepare piano for re-stringing | 4.1 | Length of strings are measured and recorded |
| | | 4.2 | Piano is de-tuned |
| | | 4.3 | Pressure bars/agraffes are removed |
| | | 4.4 | Strings are removed by unwinding in order |
| | | 4.5 | Bass strings are tagged for identification purposes using a wire guide to store until needed |
| | | 4.6 | Tuning pins are removed and assessed for re-usability |
| | | 4.7 | Samples of tuning pins, felts and eye strings are retained |
| | | 4.8 | Size of new pins and drill holes are calculated for appropriate tension requirements |
| 5 | Re-pin and re-string piano | 5.1 | Stringing scale is re-calculated |
| | | 5.2 | Agraffes are replaced in accurate position, as required |
| | | 5.3 | Pins and treble strings are replaced in required order, with |

| | | | |
|---|---|---|---|
| | | | under-stringing felt inserted |
| | | 5.4 | Pins and base strings are replaced in required order |
| | | 5.5 | Pressure bars are replaced in accurate position |
| 6 | Chip up piano | 6.1 | Pitch standard is established |
| | | 6.2 | Strings are plucked and tuned individually against pitch standard |
| | | 6.3 | Strings are rubbed down and process repeated until strings stabilised |
| 7 | Re-assemble piano | 7.1 | Piano is re-assembled |
| | | 7.2 | Tools and equipment are maintained, cleaned and stored safely in designated location |
| | | 7.3 | Records are maintained in accordance with enterprise requirements or industry practice |
| 8 | Clean up work area | 8.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 8.2 | Work area is cleared and waste removed |
| | | 8.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. # Assessment Requirements for MSFPT3005 Re-string and re-pin a piano

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices and re-string and re-pin a minimum of two (2) pianos, one (1) upright and one (1) grand
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for re-stringing and re-pinning upright and grand pianos
- Organisational and site standards, requirements, policies and procedures for re-stringing and re-pinning upright and grand piano
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types, characteristics, uses, limitations and preparation of materials and equipment used in piano re-stringing and re-pinning
- Types of tools and equipment used to re-string and re-pin pianos and procedures for their safe use, operation and maintenance

© Commonwealth of Australia, 2025 Skills Insight

- Relevant problem identification and resolution
- Set-up and operation of tools and equipment used for re-stringing and re-pinning pianos
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to hand and power tools used to re-string and re-pin upright and grand pianos, safety and personal protective equipment, holding and supporting equipment, and upright and grand pianos.

# MSFPT3006 Regulate actions, keys and pedals of upright pianos

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers regulating upright piano actions, keys and pedals, including adjusting action rail, striking distance, hammer running alignment, key depth, lost motion and set off; checking distance, damper spoon bending, damper stop rail, jack stop rail and sustain, soft, mute and sostenuto pedals. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for regulating actions, keys and pedals | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to regulating pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient workflow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Prepare to regulate | 2.1 | Correct posture for regulating is demonstrated which minimises fatigue and promotes muscular control |
| | | 2.2 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.3 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.4 | Personal protective equipment is correctly fitted and used |
| 3 | Align action components | 3.1 | Alignment of action rail is checked and adjusted |
| | | 3.2 | Striking distance is adjusted to industry specifications |
| | | 3.3 | Hammer running alignment and angling is adjusted |
| | | 3.4 | Wippen alignment procedures are performed |
| 4 | Regulate keyboard | 4.1 | Lost motion is adjusted |
| | | 4.2 | Set off is adjusted |
| | | 4.3 | Checking distance is adjusted |
| | | 4.4 | Dampers are regulated to industry specifications |
| | | 4.5 | Damper spoon bending is adjusted to half striking distance |
| | | 4.6 | Damper stop rail and jack stop rail are adjusted to industry specifications |
| 5 | Adjust pedals | 5.1 | Sustain pedal is adjusted to lift when the pedal is one third through its motion |
| | | 5.2 | Soft pedal is adjusted to an acceptable lost motion |
| | | 5.3 | Mute pedal is adjusted for hammers to clear felt in rest position but strike felt in lockdown position |
| | | 5.4 | Sostenuto pedal is adjusted so relevant dampers are locked in position when note is played |
| 6 | Make final check and inspection | 6.1 | Upright piano is inspected for playability and performance |
| | | 6.2 | Adjustments to actions and pedals are made as required |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 7 | Clean up work area | 7.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 7.2 | Work area is cleared and waste removed |
| | | 7.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Correct posture includes:**

- standing or seated according to type of piano and height of individual
- evenly distributing body weight between both feet while standing to reduce fatigue
- resting arm where available to aid control during tuning and reduce tiredness

**Tools and equipment include:**

- capstan regulator
- set off regulator
- touch/dip block
- rule

© Commonwealth of Australia, 2025 Skills Insight

# MSFPT3009 Develop control of tuning hammers

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers controlling tuning hammers by moving the tuning pins in very small increments accurately. It applies in workplace and on-site environments for small to large scale enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for using tuning hammers | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to tuning pianos are verified and complied with |
| | | 1.2 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.3 | Written instructions are followed |
| 2 | Select tools and equipment | 2.1 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| 3 | Set pin in specified position | 3.1 | Correct posture for tuning is demonstrated which minimises fatigue and promotes muscular control |
| | | 3.2 | Pin is set at desired pitch utilising a pitch standard, within accuracy constraints to + or – 0.5 cents |
| | | 3.3 | Key is struck using stabilising blows |
| | | 3.4 | Coordinated motor and auditory reflexes are demonstrated throughout tuning |
| | | 3.5 | Strings are tuned and stabilised using appropriate techniques |
| 4 | Clean up work area | 4.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 4.2 | Work area is cleared and waste removed |
| | | 4.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Assessment Requirements for MSFPT3009 Develop control of tuning hammers

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Set pin and tune and stabilise strings on both upright and grand pianos a minimum of three (3) times using tuning hammers
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for tuning pianos
- Organisational and site standards, requirements, policies and procedures for tuning pianos
- Reading and interpreting workplace documents including work orders, work instructions and operator instructions
- Piano tuning process
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- Types of tools and equipment used to tune pianos and procedures for their safe use, operation and maintenance
- Relevant problem identification and resolution

© Commonwealth of Australia, 2025 Skills Insight

- Set-up and operation of tools and equipment used for tuning pianos
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials used in the tuning and repair of pianos, safety and personal protective equipment, holding and supporting equipment, and upright and grand pianos.

# MSFPT3010 Pitch raise a piano

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers pitch raising a piano prior to the tuning process by calculating and assessing the ability of an upright, grand and player piano to achieve the desired pitch, including assessment of overpull or stretch of strings. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for pitch raising | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to tuning pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |
| 2 | Prepare to tune | 2.1 | Tools and equipment are selected consistent with the needs |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | unisons | | of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| 3 | Assess suitability of piano for pitch raise | 3.1 | Components used in pitch raising are assessed for suitability |
| | | 3.2 | Distance from target pitch is determined |
| | | 3.3 | Overpull/stretch required to achieve target pitch is calculated |
| | | 3.4 | Pitch standard is established |
| 4 | Pitch raise piano | 4.1 | Correct posture for tuning is used which minimises fatigue and promotes muscular control |
| | | 4.2 | Strings are tuned according to required process |
| | | 4.3 | Pitch raise to achieve an accuracy of ± 5 cent per note |
| | | 4.4 | Correct tuning hammer technique is used |
| 5 | Clean up work area | 5.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 5.2 | Work area is cleared and waste removed |
| | | 5.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

© Commonwealth of Australia, 2025 Skills Insight

Range is restricted to essential operating conditions and any other variables essential to the work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate some discretion, judgement and problem solving |
| **Tools and equipment include:** | • tuning fork<br>• tuning lever/hammer<br>• temperament strip<br>• mutes and wedges<br>• tip wrench<br>• tuning tips and heads<br>• pitch standard |
| **Components include:** | • strings<br>• wrest plank/tuning plank<br>• frame<br>• soundboard<br>• bridges |
| **Pitch standards include:** | • piano<br>• electronic keyboard<br>• electronic tuning device (ETD)<br>• tuning fork |
| **Correct posture includes:** | • standing or seated according to type of piano and height of individual<br>• evenly distributing body weight between both feet while standing to reduce fatigue<br>• resting arm where available to aid control during tuning and reduce tiredness |
| **Pitch raising occurs:** | • when a piano is more than one cycle flat or sharp from desired standard |
| **Tuning process includes:** | • for a small pitch raise, normal tuning sequence is followed<br>• for a significant pitch raise, chromatic tuning from note #1 could be required |
| **Personal protective equipment includes:** | • that prescribed under legislation, regulations and enterprise policies and practices |
| **Information and** | • workplace procedures relating to the use of tools and |

# MSFPT3011 Tune unisons aurally to a beatless condition

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers tuning unisons aurally so they achieve an even and accurate pitch that may include the use of hammers and stabilisation techniques. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for tuning unisons aurally | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to tuning unisons are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |
| 2 | Prepare to tune unisons | 2.1 | Tools and equipment are selected consistent with the needs of the job |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Selected tools and equipment are checked for service ability and safety and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| 3 | Set a string | 3.1 | Correct posture for tuning is demonstrated which minimises fatigue and promotes muscular control. |
| | | 3.2 | The fundamental string is tuned aurally to a pitch standard |
| | | 3.3 | Given an external pitch standard, frequency of one string is matched to that pitch to within ± .5 cent |
| | | 3.4 | Tuned string is stabilised using correct hammer techniques |
| 4 | Tune an adjacent string in unison to the fundamental string | 4.1 | Pitch of unison string is adjusted to fundamental string, employing stabilisation techniques, to a beatless condition |
| | | 4.2 | Remaining strings are tuned according to above process |
| 5 | Clean up work area | 5.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 5.2 | Work area is cleared and waste removed |
| | | 5.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

# MSFPT3013 Tune a temperament octave to produce an equally tempered scale

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers tuning temperaments on both upright and grand pianos to produce an equally tempered scale and may involve the use of a pitch standard to establish the start note. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|
| 1 Plan for tuning temperaments | 1.1 Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to repairing pianos are verified and complied with |
| | 1.2 Customer requirements are received, analysed and confirmed with appropriate personnel |
| | 1.3 Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | 1.4 Written instructions are followed |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Prepare to tune temperaments | 2.1 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| 3 | Tune temperament | 3.1 | Correct posture for tuning is used which minimises fatigue and promotes muscular control |
| | | 3.2 | Start note in temperament octave is tuned from established pitch reference |
| | | 3.3 | Temperament octave is tuned using the 4th and 5th cycle, following a set order of notes |
| | | 3.4 | Correct positions are confirmed using the 3rd and 6th checks individually and chromatically |
| 4 | Clean up work area | 4.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 4.2 | Work area is cleared and waste removed |
| | | 4.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and

# Assessment Requirements for MSFPT3013 Tune a temperament octave to produce an equally tempered scale

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Tune a minimum of two (2) temperament octaves to produce an equally tempered scale on both one (1) upright and one (1) grand piano
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for tuning pianos
- Organisational and site standards, requirements, policies and procedures for tuning pianos
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- Types of tools and equipment used to regulate actions, keys and pedals and procedures for their safe use, operation and maintenance
- Relevant problem identification and resolution
- Set-up and operation of tools and equipment used for tuning pianos

© Commonwealth of Australia, 2025 Skills Insight

- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to hand tools used in the tuning of pianos, safety and personal protective equipment, and upright and grand pianos.

# MSFPT3014 Tune a piano aurally and electronically within time and accuracy constraints

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers tuning an upright and grand piano to a set level of accuracy within a specified timeframe and to an appropriate level of accuracy using aural or electronic tuning devises (ETD) that may include computer software or a hardware device. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

| | |
|---|---|
| MSFPT3007 | Regulate actions, keys and pedals of grand pianos |
| MSFPT3008 | Apply piano tuning theory and basic acoustics |
| MSFPT3009 | Develop control of tuning hammers |
| MSFPT3010 | Pitch raise a piano |

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Plan for tuning a upright or grand | 1.1 Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to repairing |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | piano | | pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |
| 2 | Prepare to tune a upright or grand piano | 2.1 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| 3 | Dismantle piano | 3.1 | Procedure for dismantling piano is determined |
| | | 3.2 | Piano is dismantled to allow access to internal components during the tuning process |
| | | 3.3 | Correct WHS procedures are followed throughout dismantling process |
| | | 3.4 | Safe storage of all piano parts while tuning is demonstrated |
| 4 | Tune piano | 4.1 | Correct posture for tuning is demonstrated which minimises fatigue and promotes muscular control |
| | | 4.2 | Start note is tuned accurately to a pitch standard |
| | | 4.3 | Temperament octave F33-F45 is tuned to desired standard |
| | | 4.4 | Octaves and unisons are tuned to desired standard in accordance with customer specifications |
| | | 4.5 | Interval checks are used to assess accuracy throughout tuning process |
| | | 4.6 | Stable tuning is achieved in an industry acceptable timeframe without damage to the piano components |
| 5 | Re-assemble piano | 5.1 | Case parts are identified and placed for re-assembly |
| | | 5.2 | Case parts are re-assembled according to workplace |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | practices |
| | | 5.3 | Correct WHS practices are followed throughout assembly process |
| 6 | Clean up work area | 6.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 6.2 | Work area is cleared and waste removed |
| | | 6.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Customer requirements include:**

- level of playing required:
  - standard of pianist
  - time piano is used
- environment
- location of piano
- pitch requirements

# MSFPT3015 Voice a piano

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers voicing a piano to change the tone from harsh to soft or soft to harsh, and making the tone even after tuning and may include needling, reshaping and hardening hammers to change the tone. It applies in workplace and on-site environments for small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for voicing a piano | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to voicing pianos are verified and complied with |
| | | 1.2 | Customer requirements are received, analysed and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| 2 | Prepare for voicing a piano | 2.1 | Tools, equipment and materials are selected consistent with the needs of the job |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Selected tools and equipment are checked for service ability and safety and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |
| | | 2.4 | Piano is tuned and regulated to industry standards and customer requirements before voicing is commenced |
| 3 | Voice a piano | 3.1 | Correct posture for tuning is demonstrated which minimises fatigue and promotes muscular control |
| | | 3.2 | Undesirable tonal qualities are identified using customer requirements |
| | | 3.3 | Surface felt is reshaped to ensure a clean and square striking surface |
| | | 3.4 | Hammers are needled, as required, to achieve particular tonal effects and to balance tonal response |
| | | 3.5 | Hammers are reshaped after needling to ensure correct shape and surface texture |
| | | 3.6 | Hammers are ironed or hardened, as necessary |
| | | 3.7 | Final tonal quality is assessed against customer requirements and any adjustments made |
| 4 | Clean up work area | 4.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location. |
| | | 4.2 | Work area is cleared and waste removed |
| | | 4.3 | Workplace documentation is completed and filed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Tools, equipment and materials include:**

- screwdrivers
- voicing needles
- voicing tools and blocks
- hammer iron
- lacquer and brush
- sandpaper
- hammer lifting tool
- tuning wedge
- string level tool
- string lifting tool

**Correct posture includes:**

- standing or seated according to type of piano and height of individual
- evenly distributing body weight between both feet while standing to reduce fatigue
- resting arm where available to aid control during tuning and reduce tiredness

**Undesirable tonal qualities include:**

- harsh/soft noise which may occur when there is a loose hammer head, loose centre pins or uneven level strings
- string noises
- false strings – string has its own beat
- nasal or metallic sound due to hard hammers

**Needling techniques include:**

- correct method of supporting the hammers to avoid damage to action centres
- selecting the appropriate needling zones to achieve particular tonal effects

**Hardening processes**

- lacquers

# MSFPT3016 Provide advice to customers on piano tuning and repair

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers providing advice to customers regarding the repair and tuning of pianos, including identifying any faults and repairs required, and calculating all costs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Piano Technology

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan for work | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to tuning and repairing pianos are verified and complied with |
| | | 1.2 | Customer requirements regarding suitable time and date for appointment are received and confirmed with appropriate personnel |
| | | 1.3 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.4 | Written instructions are followed |
| 2 | Identify customer | 2.1 | Questioning and active listening techniques are used to |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | requirements | | clarify customer requirements |
| | | 2.2 | Feedback is provided to customer to ensure correct interpretation of requirements |
| 3 | Assess piano for faults and relevant repairs | 3.1 | Piano case parts are removed and stored safely away from the instrument |
| | | 3.2 | Faults are identified and recorded according to workplace practices |
| | | 3.3 | Appropriate repairs required to rectify faults are determined |
| | | 3.4 | Piano case parts are re-assembled according to workplace practices |
| | | 3.5 | Work area is cleared and waste removed |
| | | 3.6 | Workplace documentation is completed |
| 4 | Assess piano tuning requirements | 4.1 | Frequency of tuning is determined, based on industry recommendations |
| | | 4.2 | Customer is advised on environmental conditions which may affect tuning stability |
| 5 | Provide customer with recommendations | 5.1 | Customer is advised both verbally and in writing of recommendations regarding tuning and repair of piano |
| | | 5.2 | Customer is given options regarding priority of repairs so they can give an informed decision |
| | | 5.3 | Options regarding materials used in repairs are explained to and discussed with the customer to facilitate customer understanding of available products and services |
| 6 | Present quotation to customer | 6.1 | Quotation is prepared for the tuning and repair of piano, including all costs |
| | | 6.2 | Customer is presented with quotation, which includes a breakdown of costs for all options for tuning and repair |
| | | 6.3 | Benefits of each option are explained to the customer to facilitate informed decision making |
| | | 6.4 | Customer commitment to agreed repairs and tuning is gained in accordance with workplace practices |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 6.5 | Customer is informed of rights and obligations regarding product or service |
| 7 | Finalise process | 7.1 | Documentation is completed and submitted to appropriate personnel following workplace practices |
| | | 7.2 | Contact is maintained with customer throughout the tuning and repair process |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Active listening includes:**
- maintaining eye contact
- asking questions to clarify meaning

**Feedback includes:**
- verbal or written response

**Faults include:**
- worn, loose or broken action parts or keyboards
- worn or broken pedal systems
- tuning instability
- cracks or delamination of bridges, ribs and soundboards
- case faults

# Assessment Requirements for MSFPT3016 Provide advice to customers on piano tuning and repair

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Conduct meetings with customer to determine piano requirements and assess and report on customer satisfaction
- Analyse sales and product development data to complete workplace documentation
- Advise customers and prepare a quotation on at least three (3) occasions involving tuning, repair and rebuilding options for an upright and a grand piano
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to providing advice to customers on piano tuning and repair
- Organisational and site standards, requirements, policies and procedures for providing advice to customers
- Options available to customers for tuning and repairing pianos
- Types, characteristics, uses, limitations and preparation of materials and equipment used in piano repair and manufacture
- Relevant problem identification and resolution
- Strategies for planning and monitoring activities
- Consultation methods, techniques and protocols

© Commonwealth of Australia, 2025 Skills Insight

- Terms used to describe components of pianos
- Terms used to describe the processes involved in tuning and repair
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

# Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required relevant workplace documentation required to provide advice to customers on piano tuning and repair.

# MSFSF1001 Produce basic soft furnishing accessories

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers producing basic soft furnishing accessories, such as basic cushions and other decorative items, following the requirements of patterns.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify work requirements | 1.1 | Job requirements are identified from work instructions and patterns |
| | | 1.2 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 1.3 | Pattern is interpreted to determine tool, equipment and material requirements |
| | | 1.4 | Instructions for sequencing of work and particular measurements or adjustments are interpreted |
| | | 1.5 | Work sequence is planned, including quality checkpoints |
| 2 | Prepare for work | 2.1 | Suitable work area is selected for the tasks |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Materials are selected to match customer requirements, suitability for the purpose and work instructions |
| | | 2.3 | Potential hazards are identified from observation of the tools, equipment, materials and workplace reference material |
| | | 2.4 | Required tools, equipment and materials are collected in the work area |
| 3 | Complete production | 3.1 | Soft furnishing accessories are produced following work instructions |
| | | 3.2 | Work is checked against patterns and worksheets at the identified checkpoints |
| | | 3.3 | Non-conformity with the required quality standards is rectified |
| 4 | Finalise operations | 4.1 | Completed work is checked against required quality standards |
| | | 4.2 | Documentation is completed following workplace procedures |
| | | 4.3 | Work area is cleaned, and tools and equipment are returned to storage |
| | | 4.4 | Unused materials are returned to storage and waste and scrap are dealt with following workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the

# Assessment Requirements for MSFSF1001 Produce basic soft furnishing accessories

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret patterns and produce at least one (1) type of soft furniture accessory
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses and limitations of basic soft furnishing materials
- Interpretation of patterns
- Identification of equipment, processes and procedures
- Work flow in relation to soft furnishing accessory production

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification

© Commonwealth of Australia, 2025 Skills Insight

  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to soft furnishing accessory patterns and materials.

# MSFSF2002 Machine sew materials

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using sewing machines for production of soft furnishings, mattresses and bases, and upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Identify sewing machine equipment controls and procedures | 1.1 Job requirements are identified from work instructions |
| | | 1.2 Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 1.3 Equipment components, equipment condition and controls are identified |
| | | 1.4 Operating procedures are checked to identify any approved adjustments |
| | | 1.5 Equipment operations and production procedures are identified |
| | | 1.6 The process for obtaining materials and moving products |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | to the next process is identified |
| 2 | Prepare for work | 2.1 | Work order or sample is checked to identify sewing specifications |
| | | 2.2 | Required materials, tools and equipment are assembled |
| | | 2.3 | Materials and equipment are inspected and any faults are identified and reported |
| | | 2.4 | Work sequence is planned to suit job, and materials are laid out |
| | | 2.5 | If required, naps, pattern direction and face side of materials are identified |
| | | 2.6 | Components are matched and secured with tacking, pins or adhesives as required |
| | | 2.7 | Any required supplementary equipment is identified for routine lubrication and adjustments |
| 3 | Set up and control sewing machine operations | 3.1 | Sewing machine is set up and adjusted |
| | | 3.2 | Sewing operation is according to workplace procedures and material characteristics |
| | | 3.3 | Required product quality and outputs are maintained |
| 4 | Maintain quality requirements | 4.1 | Machining process is monitored and conditions which may affect work quality are reported |
| | | 4.2 | Authorised changes in operating procedures are implemented |
| 5 | Finish and despatch work | 5.1 | Completed work is checked for required quality, finished as required, and repaired, where applicable, before moving to the next process |
| | | 5.2 | Material which is able to be re-used is collected and stored |
| | | 5.3 | Equipment and work area clean up and waste management are completed following workplace procedures |
| | | 5.4 | Workplace records are completed as required |

# Assessment Requirements for MSFSF2002 Machine sew materials

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify and operate three (3) types of industrial sewing machines, including set up of the sewing machine for operation and monitoring the quality of output
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses and limitations of sewing machines
- Characteristics of materials used and finished products
- Safety and environmental aspects of sewing machine operations
- Quality systems and standards for soft furnishings
- Work flow requirements for sewing process
- Operation of work systems and industrial sewing equipment
- Causes of faults and repair methods in soft furnishing machining
- Procedure for reporting damaged or imperfect products or interruptions to work flow

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate industrial sewing machines, operating procedures, materials and threads.

# MSFSF2003 Machine sew specialised sewn products

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using specific sewing machine techniques, with attachments, as required, to produce specialised sewn products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|
| 1 Identify sewing machine equipment controls and procedures | 1.1 Job requirements are identified from work instructions |
| | 1.2 Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | 1.3 Equipment operations, components and controls are identified |
| | 1.4 Operating procedures are checked to identify approved procedures and adjustments |
| | 1.5 Inspection procedure for materials quality and equipment condition is identified |
| | 1.6 The process for obtaining materials and moving products |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | to the next process is identified |
| 2 | Prepare for work | 2.1 | Work order or sample is checked to identify exact sewing specification |
| | | 2.2 | Materials are inspected before use and problems, including any materials or part constructed products which do not meet the job order requirements, are identified and reported |
| | | 2.3 | Work pieces are laid out in sequence in accordance with specifications and workplace procedures |
| | | 2.4 | Any required supplementary equipment is identified for routine lubrication and adjustments |
| 3 | Adjust and control sewing machine operations | 3.1 | Sewing machine (including attachments as required) set-up requirements and adjustments are identified and followed |
| | | 3.2 | Machine sewing maintains required product quality and outputs |
| | | 3.3 | Material which is able to be re-used is collected and stored, and waste and scrap is removed in accordance with workplace procedures |
| | | 3.4 | Equipment and work area clean-up are completed following workplace procedures |
| 4 | Maintain quality requirements | 4.1 | Sewing machine operations and fabrics are monitored and anything which may affect quality is reported |
| | | 4.2 | Finished products are checked for required quality and repaired, where applicable, before moving to the next process |
| | | 4.3 | Authorised changes in operating procedures and work requirements are implemented |
| 5 | Despatch completed work | 5.1 | Production records and/or packing slips are completed in accordance with workplace procedures |
| | | 5.2 | Completed work is directed to the next operation in accordance with workplace procedures |

# MSFSF2004 Hand sew soft furnishings

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers hand sewing hems and shaped components, and hand finishing work for soft furnishings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify materials and sewing requirements | 1.1 | Required materials are identified from work order |
| | | 1.2 | Special requirements for the stitching, including stitch type, length and end finishing requirements, are identified from work order |
| 2 | Assemble and organise materials to be sewn | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 2.2 | Materials to be sewn are collected and inspected for appropriate quality |
| | | 2.3 | Naps, direction of pattern and face side of the materials are |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | identified |
| | | 2.4 | Required shape or form of the finished item is made and secured using tacking stitches, pins, adhesives or fixtures to assist in sewing operations |
| | | 2.5 | Appropriate needle types are selected and threaded |
| 3 | Sew by hand | 3.1 | Materials are held to allow for sewing in the required direction |
| | | 3.2 | Hand sewing operations are completed to ensure finished components match work requirements |
| 4 | Finish work | 4.1 | Finished stitching, including sewn area, seam width, stitch length, end finishing, allowances, shape and finish, are checked |
| | | 4.2 | Top stitching or other decorative features are checked for required finish |
| | | 4.3 | Where required, stitching or seams are eased and work is pressed for the next stage |
| | | 4.4 | Raw edges are trimmed and any loose or untrimmed threads are removed |
| | | 4.5 | Any part of the work which does not comply with work order is repaired |
| | | 4.6 | Problems are notified following workplace procedures |
| 5 | Complete work for next process | 5.1 | Finished work is folded, protected and despatched to the next process following workplace procedures |
| | | 5.2 | Any required documentation is completed and stored following workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Assessment Requirements for MSFSF2004 Hand sew soft furnishings

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify materials used and any special sewing requirements for the materials to be sewn and hand sew at least five (5) different soft furnishing products or use five (5) different techniques
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Soft furnishing work requirements, including workplace standards
- Identification of techniques and procedures for hand sewing processes
- Fabric types, common faults and inspection procedures
- Sewing methods to be used with different fabric types
- Risks to health from repetitive actions and prevention strategies
- Design features of the articles sewn in relation to the methods and stitches to be used

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate sewing equipment, fabrics and work orders.

# MSFSF2005 Operate a steam press

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers applying knowledge of materials, product purpose and processes to the correct and efficient operation of steam pressing equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify work requirements | 1.1 | Work orders, care labels and equipment instructions are used to identify work requirements |
| | | 1.2 | Equipment, components and processes used for materials preparation and pressing process are identified |
| | | 1.3 | Operating requirements for the steam pressing equipment are identified |
| | | 1.4 | Workplace quality requirements for the final product are identified |
| 2 | Plan steam pressing operations | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Temperatures and any particular precautions are identified from care labels and workplace instructions |
| | | 2.3 | Work sequence is planned to suit job |
| | | 2.4 | Equipment emergency stops, gauges, guards and controls are identified |
| | | 2.5 | Task sequences are planned |
| 3 | Set up steam pressing equipment | 3.1 | Equipment information, required specifications and operating instructions are identified |
| | | 3.2 | Temperatures are set and equipment adjustments are checked against work plan |
| | | 3.3 | Fabric panels are checked for quality prior to pressing |
| | | 3.4 | Damaged or incomplete items are reported |
| 4 | Press fabrics | 4.1 | Materials are lifted and held onto the press using appropriate techniques |
| | | 4.2 | Pressing operations are conducted following the planned sequence |
| | | 4.3 | Adjustments are made to press settings to improve quality of work |
| | | 4.4 | Required quantity and quality of work is maintained |
| | | 4.5 | Pressed items are protected from dust and other contaminants and placed in workplace approved holding areas |
| | | 4.6 | Equipment is cleaned up and lubrications, adjustments and waste management processes are completed in accordance with workplace procedures |
| 5 | Maintain work quality | 5.1 | Pressing process is monitored and materials and equipment operating conditions which may affect product quality are reported |
| | | 5.2 | Authorised changes in operating procedures and temperatures are implemented |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate some discretion, judgement and problem solving |
| **Task planning includes:** | • required temperatures and warm up/cool down times<br>• key parts of the materials to be pressed which require checks for quality of work<br>• work area housekeeping requirements<br>• safe and suitable work area |
| **Materials to be pressed include:** | • plain and patterned fabrics<br>• lining materials and leather used in the manufacture of soft furnishing items |
| **Material lifting and holding will be impacted on by:** | • machine type<br>• personal right or left-hand preference of the operator<br>• manipulation requirements for the materials<br>• special pressing requirements for different parts of the pressed panels |
| **Personal protective equipment includes:** | • that prescribed under legislation, regulations and enterprise policies and practices |
| **Information and procedures include:** | • workplace procedures relating to the use of tools and equipment<br>• work instructions, including job sheets, cutting lists, plans, |

# Assessment Requirements for MSFSF2005 Operate a steam press

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Press at least five (5) different types of materials to quality standards
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses and limitations of steam presses
- Operating controls and principles which effect the steam pressing equipment
- Effects of steam on the range of materials which may be pressed
- Requirements for minimising damage to and maintaining contaminant-free pressed fabrics

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate materials, steam pressing equipment, care labels and work orders.

# MSFSF2006 Calculate fabric quantities for window coverings

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers calculating and documenting fabric quantities for a variety of window coverings, including curtains and blinds.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for calculations | 1.1 | Measuring and calculating equipment are collected |
| | | 1.2 | Mathematical processes and guide charts required are identified |
| | | 1.3 | Drape requirements, fabric types and lining/interlining requirements are noted from work order |
| 2 | Calculate drape fabric requirements | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Fabric repeats are measured for customer selected fabrics and recorded |
| | | 2.3 | Fabric width is checked taking note of any wider than usual selvages |
| | | 2.4 | Finished length of window covering is identified from order |
| | | 2.5 | Heading type is identified from order and fullness ratio is identified |
| | | 2.6 | Number of fabric drops per curtain is calculated |
| | | 2.7 | Length of each fabric drop is calculated based on finished length plus hem and heading allowances and pattern repeats |
| | | 2.8 | Allowances for seams, hems, headings, drape fullness or heading type are noted on the work order |
| 3 | Calculate lining and interlining quantities | 3.1 | Width of lining and, where required, interlining fabrics, is noted |
| | | 3.2 | Number of lining/interlining widths is calculated based on required number of drape drops |
| | | 3.3 | Length of lining/interlining drops is calculated, including hem allowances |
| | | 3.4 | Amount of lining/interlining fabric is calculated and marked on work order |
| | | 3.5 | Procedures for minimising waste fabric are identified and used |
| 4 | Complete documentation | 4.1 | Work orders for cutting and machining are completed following workplace procedures |
| | | 4.2 | Documentation is forwarded to appropriate work areas and filed as required |

# Assessment Requirements for MSFSF2006 Calculate fabric quantities for window coverings

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret work order and locate and apply relevant information and measure and accurately calculate fabric quantities to minimise waste and produce consistent quality drapes for at least five (5) different types of window coverings
- Identify materials used and any special marking out requirements and document calculations accurately
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Fabric types, common faults and inspection procedures
- Design features of the fabrics and finished curtains in relation to attractive draping requirements
- Work requirements, including workplace standards
- Measurement and calculation techniques for soft furnishing materials

## Assessment Conditions

- Assessors must:

# MSFSF2007 Construct unlined curtains and drapes

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers constructing and machine sewing unlined, pleated and gathered curtains and drapes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|
| 1 Establish work requirements and prepare for work | 1.1 Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | 1.2 Work order requirements are checked and confirmed |
| | 1.3 Heading type is recognised to identify personal work requirements for measuring, calculating, sewing, folding and finishing |
| | 1.4 Correct side of fabric, naps, direction of pattern and pattern matches are identified |
| | 1.5 Drapery panels are checked for faults |
| | 1.6 Appropriate needle types for the fabric are selected and |

| | | | |
|---|---|---|---|
| | | | threaded |
| 2 | Lay out work to be sewn | 2.1 | Top fabric is folded bringing edges to be seamed together to match any pattern and to maintain an appropriate finished length following workplace quality requirements |
| | | 2.2 | Fabric is held together and, where required, supported with pins or other workplace approved methods |
| 3 | Stitch seams and form corners | 3.1 | Curtain fabrics are held to allow for personal right-hand or left-hand preference of the sewer, and manipulation requirements for the bulk and slipperiness of the materials |
| | | 3.2 | Machine sewing operations are completed correctly |
| | | 3.3 | Corners are folded and formed to match work order requirements, inserting any required weight bags |
| | | 3.4 | Hems are completed using any required weights, stitch type and appropriate sewing method |
| | | 3.5 | Corners are stitched and finished, and any loose threads trimmed |
| 4 | Construct curtain headings | 4.1 | Curtain heading tape is attached according to workplace approved method and job instructions |
| | | 4.2 | Sewn pleat spaces are kept uniform within drops |
| | | 4.3 | Care labels are fixed to heading or hem of curtain according to workplace standards |
| 5 | Finish work | 5.1 | Finished curtain panels, including stitch length, end finishing and final length of finished curtain panels, are checked against work requirements |
| | | 5.2 | Work is pressed for the next work stage |
| | | 5.3 | Any parts of the work which do not comply with work order are repaired |
| 6 | Complete work for next process | 6.1 | Workplace required documentation is completed and stored following appropriate procedures |
| | | 6.2 | Finished work is folded, protected and despatched to next process following workplace procedures |

# Assessment Requirements for MSFSF2007 Construct unlined curtains and drapes

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret work order to manufacture the required curtains and identify materials used and any special sewing requirements for those materials
- Measure accurately and construct at least four (4) different types of pleated or gathered curtains/drapes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Identification of equipment, processes and procedures for the sewing operations
- Fabric types, common faults and inspection procedures
- Risks to health from repetitive actions and prevention strategies
- Design features of the heading styles sewn in relation to work requirements
- Soft furnishing work requirements, including workplace standards

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate sewing machine, fabrics, work order, work procedures and/or equipment instructions.

# MSFSF2008 Construct lined curtains and drapes

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers constructing and machine sewing lined curtains and drapes, including detached and sewn-in linings, and may include interlined loose-lined and bag-lined products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Establish work requirements and prepare for work | 1.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 1.2 | Work order requirements are checked and confirmed |
| | | 1.3 | Heading type is recognised to identify personal work requirements for measuring, calculating, sewing, folding and finishing |
| | | 1.4 | Correct side of fabric, naps, direction of pattern and pattern matches are identified |
| | | 1.5 | Lining attachment method is recognised to identify any attachments and fasteners, trims and sewing requirements |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Drapery panels are checked for faults |
| | | 1.7 | Appropriate needle types for the fabric are selected and threaded |
| 2 | Lay out work to be sewn | 2.1 | Top fabric is folded bringing edges to be seamed together to match any pattern and to maintain an appropriate finished length following workplace quality requirements |
| | | 2.2 | Linings and any interlining materials are laid out and folded ready for sewing |
| | | 2.3 | Fabric is held together and, where required, supported with pins or other workplace approved methods |
| 3 | Stitch seams and form corners | 3.1 | Curtain fabrics are held to allow for personal right-hand or left-hand preference of the sewer, and manipulation requirements for the bulk and slipperiness of the materials |
| | | 3.2 | Linings to be bagged are sewn in place |
| | | 3.3 | Machine sewing operations are completed correctly |
| | | 3.4 | Corners are folded and formed to match work order requirements, inserting any required weight bags |
| | | 3.5 | Hems are completed using any required weights, stitch type and appropriate sewing method |
| | | 3.6 | Corners are stitched and finished, and any loose threads trimmed |
| 4 | Construct curtain headings | 4.1 | Curtain heading tape is attached according to workplace approved method and job instructions |
| | | 4.2 | Attached lining and interlinings are sewn into heading |
| | | 4.3 | Sewn pleat spaces are kept uniform within drops |
| | | 4.4 | Linings and interlinings are attached to curtain backs by sewing or using appropriate fasteners |
| | | 4.5 | Care labels are fixed to heading or hem of curtain according to workplace standards |
| | | 4.6 | Separate linings are sewn using appropriate heading tape and attached to curtain |
| 5 | Finish work | 5.1 | Finished curtain panels, including stitch length, end finishing and final length of finished curtain panels are |

| | | | |
|---|---|---|---|
| | | | checked against work requirements |
| | | 5.2 | Work is pressed for the next work stage |
| | | 5.3 | Any parts of the work which do not comply with work order are repaired |
| 6 | Complete work for next process | 6.1 | Workplace required documentation is completed and stored following appropriate procedures |
| | | 6.2 | Finished work is folded, protected and despatched to next process following workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Machines include:**

- industrial sewing machines
- pressing equipment

**Tools and equipment include:**

- measuring and calculating equipment:
  - tapes
  - rulers

© Commonwealth of Australia, 2025 Skills Insight

- calculators
- computers

- fabric and general cutting and sewing tools:
  - scissors
  - sewing machines
  - hemming machines
  - overlockers
  - pleating machines

**Materials to be machined include:**

- lining
- interlining and curtain fabrics
- fasteners
- threads

**Work order requirements include:**

- widths and numbers of finished curtain panels, heading style, number and spacing of pleats
- finishing and any filling of curtain headings

**Marking out includes:**

- returns
- overlaps
- pleats
- spaces

**Machine sewing operations quality requirements include:**

- straight stitching along seam lines from the top to the lower edge of the material or vice versa
- securing of beginning and end of threads of the stitching with even and appropriate seam stitch type, length and visibility
- seams are flat
- the inclusion of care labels and fibre content labels where required
- finished components match work requirements

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

# Assessment Requirements for MSFSF2008 Construct lined curtains and drapes

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret work order to manufacture the required lined curtains and identify materials used and any special sewing requirements for those materials
- Measure accurately and construct at least two (2) different types of lined curtains/drapes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Identification of workplace standards, equipment and procedures for the sewing operations
- Fabric types, lining and interlining materials, including common faults and inspection procedures
- Prevention strategies for risks to health from lifting, stretching and repetitive actions
- How the design features of the curtains effect constructing the lined curtains

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate sewing machine, fabrics, work

# MSFSF2009 Construct padded pelmets

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers cutting, preparing and assembling timber components, attaching padding, fabric and trims to pelmets and where necessary, packaging, labelling and storing products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify pelmet and padding materials to be used | 1.1 | Type of pelmet to be padded is identified |
| | | 1.2 | Components of the pelmet requiring padding and specifications for the work are identified from work instructions |
| | | 1.3 | Quality and quantity requirements are identified |
| 2 | Prepare for work | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 2.2 | Required tools and materials to complete the work are |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | sourced, collected and checked for suitability |
| | | 2.3 | Fixing devices or adhesives are selected in accordance with specifications or type of padding and headboard |
| | | 2.4 | Required personal protection equipment is located |
| | | 2.5 | Work is planned to conform to quality requirements, minimise time, and economically use materials |
| | | 2.6 | Procedures are identified for checking the quality of the work |
| 3 | Cut timber and pad pelmet | 3.1 | Timber components are measured and cut to required specifications |
| | | 3.2 | Padding and other materials are laid out, and components are assembled and attached using appropriate fastenings, tools and equipment |
| | | 3.3 | Tools and equipment are operated in compliance with workplace procedures and WHS requirements |
| | | 3.4 | Work is monitored to ensure quality of product, including correct finish, operation of any moving parts, and number and fitting of fasteners/brackets |
| | | 3.5 | Problems occurring during work operations are identified and reported following workplace procedures |
| | | 3.6 | Waste quantities are minimised, and re-usable materials are collected and stored following workplace procedures |
| | | 3.7 | Routine maintenance of tools and equipment is carried out according to workplace and manufacturer instructions |
| | | 3.8 | Waste is removed and work area is cleaned following workplace procedures |
| 4 | Prepare pelmet for next process | 4.1 | Completed pelmets are packaged following work requirements |
| | | 4.2 | The package is secured, labelled and stored according to workplace procedures |
| | | 4.3 | Appropriate documentation is completed |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate some discretion, judgement and problem solving |
| **Tools and equipment include:** | • tapes<br>• rulers<br>• calculators<br>• computers<br>• scissors<br>• staplers<br>• sewing machines<br>• hammers<br>• staple guns<br>• jig saws<br>• drop saws |
| **Materials to be used include:** | • curtain fabric<br>• timber<br>• adhesives and padding material |
| **Padding materials include:** | • padding<br>• fabric<br>• linings and trims |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **Personal protective equipment includes:** | • that prescribed under legislation, regulations and enterprise policies and practices |
| **Information and procedures include:** | • workplace procedures relating to the use of tools and equipment<br>• work instructions, including job sheets, cutting lists, plans, drawings and designs<br>• workplace procedures relating to reporting and communication<br>• manufacturer specifications and operational procedures |

# Unit Mapping Information

Supersedes and is equivalent to LMFSF2009B Construct padded pelmets.

# Assessment Requirements for MSFSF2009 Construct padded pelmets

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret work order and locate and apply relevant information to select and make up appropriate timber frame
- Select and attach appropriate padding, fabric and trims and construct at least three (3) different types of padded pelmets
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Workplace standards and procedures related to the making up of padded pelmets
- Identification of equipment, materials, processes and procedures
- Operation of tools and equipment used in the padding process

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification

# MSFSF2011 Fit and adjust curtain hardware

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers fitting and adjusting tracking, rods, poles and other curtain hardware.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking curtain fitting work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify products, fittings and attachments to be used | 1.1 | Type of tracks, rods or poles to be fitted and work order requirements are identified |
| | | 1.2 | Attachments, required materials and tools are identified from work instructions and, where necessary, site inspection |
| | | 1.3 | The effect of the fitting process on overall finished window is identified |
| 2 | Plan process for fitting attachments to products | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | 2.2 Appropriate equipment is identified to minimise risks of damage to customers' premises or injuries to self |
| | | 2.3 Manufacturer information on products used is located and used to plan work |
| | | 2.4 Attachment process is planned to conform to quality requirements, minimise time, economically use materials and maximise appearance of the finished work |
| | | 2.5 Materials, tools and equipment are assembled and checked for suitability for purpose |
| | | 2.6 Track/pole/rod width and projection is set up to provide for stacking space, overlap, projection, return, and number of rings/hooks, guides/runners and other fittings in order to correctly match work order requirements |
| 3 | Complete fitting operations | 3.1 Work plan is followed ensuring compliance with workplace procedures and WHS requirements |
| | | 3.2 Ceiling and face-fitted tracks/rods/poles are installed and tested for correct operation |
| 4 | Clean work area and prepare products for the next process | 4.1 Worksite and any equipment used is cleaned and stored appropriately |
| | | 4.2 Unserviceable equipment is tagged, faults are identified and appropriate personnel are informed |
| | | 4.3 Completed work is inspected and compared to workplace quality requirements |
| | | 4.4 Fittings which do not meet quality specifications are repaired on-site or returned to the workroom for repair |
| | | 4.5 Appropriate documentation is completed |

# Foundation Skills

| | | | |
|---|---|---|---|
| | | | damage to customers' premises or injuries to self |
| | | 2.3 | Manufacturer information on products used is located and used to plan work |
| | | 2.4 | Decorator's specifications, if any, are used to plan work |
| | | 2.5 | Attachment process is planned to conform to quality requirements, minimise time, economically use materials and maximise appearance of the finished work |
| | | 2.6 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| 3 | Complete fitting operations | 3.1 | Backing is attached, where appropriate, to the curtain using appropriate fittings |
| | | 3.2 | Required number of glides are identified, matched between window finishing, and tracks added or removed as required |
| | | 3.3 | Curtains are attached to tracks and checked for smooth and even operation and hanging |
| | | 3.4 | Curtain height and floor clearance is checked and compared to work order requirement |
| | | 3.5 | Pelmets, valances, swags, pull-backs or tie-back holders are fitted using appropriate hardware and adjusted for fall, neatness and appearance |
| | | 3.6 | Where required, pleats are folded and tied to maintain required pleating |
| 4 | Clean work area | 4.1 | Worksite and any equipment used is cleaned and stored appropriately |
| | | 4.2 | Unserviceable equipment is tagged, faults are identified and appropriate personnel are informed |
| | | 4.3 | Completed work is inspected and compared to workplace quality requirements |
| | | 4.4 | Fittings and curtains which do not meet quality specifications are repaired on-site or returned to the workroom for repair |
| | | 4.5 | Appropriate documentation or reporting is completed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate some discretion, judgement and problem solving |
| **Window finishings include:** | • curtains<br>• sheers<br>• swags<br>• pelmets<br>• valances<br>• tie-backs and hold-backs |
| **Tools and equipment include:** | • hand or power operated tools<br>• drills<br>• hammers<br>• screwdrivers |
| **Personal protective equipment includes:** | • that prescribed under legislation, regulations and enterprise policies and practices |
| **Information and procedures include:** | • workplace procedures relating to the use of tools and equipment<br>• work instructions, including job sheets, cutting lists, plans, drawings and designs<br>• workplace procedures relating to reporting and communication |

# Assessment Requirements for MSFSF2013 Dress windows

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Install at least four (4) different types of window dressings, which must include curtains and tie-backs
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Window dressing and fitting materials and techniques
- Identification of equipment, processes and procedures
- Work flow in relation to fitting curtains, valances, swags and other window treatments

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to curtains, tracks, decorative window finishings, appropriate quality specifications and instructions.

# MSFSF2014 Use soft furnishing sector hand and power tools

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers selecting and using hand and power tools in applications relating to the soft furnishing sector of the furnishing industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify hand and power tools | 1.1 | Types of hand and power tools and their functions are identified |
| | | 1.2 | Sources of power supply are recognised |
| | | 1.3 | Work health and safety (WHS) requirements for using hand and power tools are recognised and adhered to |
| 2 | Select and use hand tools | 2.1 | Hand tools are selected consistent with the needs of the job |
| | | 2.2 | Tools are checked for serviceability and safety and any faults are corrected or processed for repair |
| | | 2.3 | Equipment is selected to hold or support material for hand tool application, where applicable |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.4 | Material is located and held in position for hand tool application |
| | | 2.5 | Hand tools are safely and effectively used according to their intended use |
| | | 2.6 | Hand tools are safely located when not in immediate use |
| 3 | Select and use power tools | 3.1 | Appropriate personal protective equipment is selected, correctly fitted and used |
| | | 3.2 | Power tools are selected consistent with the needs of the job in accordance with conventional work practice |
| | | 3.3 | Power tools are visually checked for serviceability/safety in accordance with WHS requirements and any faults are corrected or processed for repair |
| | | 3.4 | Equipment is selected to hold or support materials for power tool application, where applicable |
| | | 3.5 | Material is located and held in position for power tool application where applicable |
| | | 3.6 | Power tools are safely and effectively used in application processes |
| | | 3.7 | Power tools are safely located when not in use |
| 4 | Clean up work area and tools | 4.1 | All tools are cleaned, maintained and stored |
| | | 4.2 | Equipment is cleaned, maintained and stored |
| | | 4.3 | Work area is cleared and waste removed |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Hand tools include:**

- scissors
- cutting blades
- tape measures
- rulers
- hammers
- staple guns and screwdrivers

**Power tools include:**

- drills
- screwdrivers
- staple guns
- pressing equipment
- others as required by enterprises

**Fault reporting includes:**

- verbal or written reporting

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

# MSFSF3001 Operate drop cutting machines

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using drop cutting machines to machine synthetic or natural fabrics used for curtains, internal or external blinds, awnings and shade wings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify drop cutting machine controls, adjustments and work procedures | 1.1 | Job requirements are identified from workplace approved operating procedures |
| | | 1.2 | Equipment components, adjustment points and controls are identified |
| | | 1.3 | Operating procedures are checked to identify approved operating range and adjustments |
| | | 1.4 | Equipment operations and production procedures are identified |
| | | 1.5 | The process for obtaining materials and moving products to the next process is identified |
| 2 | Plan and prepare for | 2.1 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the |

| | | | |
|---|---|---|---|
| | work | | work, serviceable and in a safe condition |
| | | 2.2 | Inspection procedure for material quality and equipment condition is identified |
| | | 2.3 | Work sequence is planned to suit job |
| | | 2.4 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 2.5 | Equipment emergency stops and guards are identified |
| | | 2.6 | Machine checking procedures are identified |
| | | 2.7 | Any required supplementary equipment is identified for routine lubrication and adjustments of the equipment |
| 3 | Set and operate drop cutting machine | 3.1 | Fabric length and angle of cut are set on the drop cutting machine following work order |
| | | 3.2 | Fabric is fixed to the machine using appropriate hooks or other fasteners |
| | | 3.3 | Fabric is checked for flaws prior to cutting |
| | | 3.4 | Fabric use minimises waste materials |
| | | 3.5 | Cutting operations provide the required product quality standards, work outputs and minimisation of waste |
| | | 3.6 | Problems are identified and reported following workplace procedures |
| | | 3.7 | Cut lengths are checked for required quality and moved to the next process |
| | | 3.8 | Waste and scrap are dealt with following workplace procedures |
| | | 3.9 | Equipment and work area clean-up are completed following workplace procedures |
| 4 | Confirm quality requirements are met | 4.1 | Process is monitored and conditions which may affect quality standards are reported |
| | | 4.2 | Observed requirements for repairs or maintenance are identified and reported to appropriate personnel |

© Commonwealth of Australia, 2025 Skills Insight

4.3 Authorised changes to settings or operating procedures are implemented

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. # MSFSF3002 Use automated curtain pleating equipment

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using automated pleating equipment to construct curtain headings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify automated curtain pleating equipment controls and work procedures | 1.1 | Location and function of the equipment, including, equipment condition, components and controls, are identified |
| | | 1.2 | Work procedures and documentation are checked to identify that settings are within approved operating range |
| | | 1.3 | Inspection procedure for quality requirements for hemmed and seamed curtain drops is identified |
| | | 1.4 | Heading type is recognised to identify personal work requirements for measuring, calculating, folding and finishing |
| | | 1.5 | The process for obtaining materials and moving products to the next process is identified |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Prepare for work | 2.1 | Work order requirements are identified |
| | | 2.2 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 2.3 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| | | 2.4 | Work sequence is planned to suit job |
| | | 2.5 | Equipment on/off switches and guards are identified |
| | | 2.6 | Pleated width for the curtain order is calculated |
| | | 2.7 | Adjustments to equipment settings to match work order heading requirements and finished curtain width are made following workplace approved procedures |
| | | 2.8 | Any required supplementary equipment is identified for routine cleaning, lubrication and adjustments |
| 3 | Operate automated curtain pleating equipment | 3.1 | Lubrications and adjustments are made to the machine |
| | | 3.2 | Curtains are spread on work area and clamped in the automated equipment ensuring a smooth and square alignment with the machine guides |
| | | 3.3 | Curtain pleating is completed, monitoring equipment conditions and drape quality |
| | | 3.4 | Finished width of each curtain drop is measured and checked against work order and pleat size is adjusted, where required |
| | | 3.5 | Curtain headings are stapled or clipped within required heading area |
| | | 3.6 | Problems are identified and reported following workplace procedures |
| 4 | Complete work | 4.1 | Finished work is despatched to next process following workplace procedures |
| | | 4.2 | Equipment and work area clean up are completed following workplace procedures |

# MSFSF3003 Follow patterns to produce window toppings

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers producing window toppings following the requirements of patterns.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify work requirements | 1.1 | Job requirements are identified from work instructions and patterns |
| | | 1.2 | Pattern is interpreted to determine detail or work requirements |
| | | 1.3 | Instructions for sequencing of work and particular measurements or adjustments are interpreted |
| | | 1.4 | Work sequence is planned, including quality checkpoints |
| 2 | Prepare for work | 2.1 | Suitable work area is selected for the tasks |
| | | 2.2 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.3 | Materials are selected to match customer requirements, suitability for the purpose and work instructions |
| | | 2.4 | Potential hazards are identified from observation of the tools, equipment, materials and workplace reference material |
| | | 2.5 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| 3 | Complete construction | 3.1 | Window toppings are constructed following work instructions |
| | | 3.2 | Work is checked against patterns and worksheets at the identified checkpoints |
| | | 3.3 | Non-conformity with enterprise quality standards is rectified |
| 4 | Finalise operations | 4.1 | Completed work is checked against required quality standards |
| | | 4.2 | Documentation or reporting is completed following workplace procedures |
| | | 4.3 | Work area is cleaned, and tools and equipment are returned to storage |
| | | 4.4 | Unused materials are returned to storage and waste and scrap are dealt with following workplace procedures |

# Foundation Skills

# Assessment Requirements for MSFSF3003 Follow patterns to produce window toppings

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and patterns to locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret patterns correctly to identify the type of material specified, required tools and equipment for the task, number and type of window toppings to be produced, and quality requirements
- Interpret patterns and identify materials used and any special sewing or handling requirements to produce at least one (1) each of jabots, swags, tails, soft padded pelmets and bonded pelmets
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Type, characteristics, uses and limitations of window toppings
- Process for interpretation of patterns
- Identification of equipment, processes and procedures
- Work flow in relation to window topping production

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to patterns, materials and specifications.

# MSFSF3005 Construct Austrian festoon-style blinds

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers constructing and sewing Austrian festoon-style blinds.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Establish work requirements and prepare for work | 1.1 | Work order requirements are checked and confirmed |
| | | 1.2 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| | | 1.3 | Correct side of fabric, naps, direction of pattern and pattern matches are identified |
| | | 1.4 | Fabric is checked for flaws |
| | | 1.5 | Appropriate needle types for the fabric are selected and threaded |
| 2 | Lay out work to be sewn | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Linings and any interlining materials are laid out and folded ready for sewing |
| | | 2.3 | Lining materials are matched and secured |
| | | 2.4 | Face fabric is folded, bringing edges to be seamed together to match any pattern and to maintain an appropriate finished length |
| | | 2.5 | Pattern matches are kept uniform within drops and across matching sets of blinds |
| | | 2.6 | Fabric is held together and, where required, supported with pins or other workplace approved methods |
| 3 | Stitch seams and form corners | 3.1 | Curtain fabrics are held to allow for the personal right-hand or left-hand preference of the sewer, and manipulation requirements for the bulk and slipperiness of the materials |
| | | 3.2 | Machine sewing operations are completed correctly |
| | | 3.3 | Finished length and width of each panel are measured and checked against work order and adjusted, where required |
| | | 3.4 | Linings and interlinings are attached to back of blind |
| | | 3.5 | Corners are folded and formed to match work order or workplace requirements |
| | | 3.6 | Hems are completed using the appropriate stitch type and sewing method |
| | | 3.7 | Corners are stitched and finished and threads trimmed |
| | | 3.8 | Ring placement positions are measured and marked |
| 4 | Sew gathering materials | 4.1 | Headings and any stitching or slit along vertical gather lines are completed according to the work order |
| | | 4.2 | Ends of stitching are secured and any required weights are attached |
| 5 | Finish work | 5.1 | Finished blinds are checked ensuring stitch length, end finishing and size blinds match work requirements |
| | | 5.2 | Work is pressed |
| | | 5.3 | Parts of the work which do not comply with work order are repaired |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 5.4 | Rings are attached |
| | | 5.5 | Gather tapes and gathering lines are pulled up maintaining even fullness in gather and even tension in gathering lines |
| | | 5.6 | Headboard is painted, stained or covered with fabric fixed along the board length, corners are mitred and fixed, reducing bulk and ensuring a neat finish |
| | | 5.7 | Blinds are fitted to headboard or track and threading completed |
| 6 | Complete work for next process | 6.1 | Workplace required documentation or reporting is completed |
| | | 6.2 | Finished work is folded, protected and despatched following workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate some discretion, judgement and problem solving |

# Assessment Requirements for MSFSF3005 Construct Austrian festoon-style blinds

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify materials used and any special sewing requirements measure accurately and construct at least two (2) Austrian festoon-style blinds to required size and accuracy
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses and limitations of Austrian festoon-style blinds
- Design features of the Austrian festoon-style blinds
- Fabric types, common faults and inspection procedures
- Identification of equipment, processes and procedures for making Austrian festoon-style blinds
- Work requirements, including workplace standards
- Risks to health from repetitive actions and prevention strategies

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate sewing machine, fabrics, work procedures and/or equipment instructions.

# MSFSF3006 Chemically join textiles

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using specialised equipment and processes to bond or glue textiles for the manufacture of items, including bonded blinds and padded pelmets.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify the materials and process for joining | 1.1 | The process and materials to be used are identified |
| | | 1.2 | The effect of the joining process on the materials is determined |
| | | 1.3 | The effect of the chemical reactions on the materials is determined |
| | | 1.4 | Allowances for joining overlaps are checked in workplace documentation and manufacturer instructions |
| | | 1.5 | Curing times are identified for the materials and the process |
| 2 | Plan the joining process | 2.1 | Manufacturer instructions and workplace procedures for the joining task are used in the planning process |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 2.3 | Work sequence is planned noting appropriate curing/cooling times, efficient work sequence and quality requirements |
| 3 | Set up equipment and materials for the process | 3.1 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| | | 3.2 | Site is checked for appropriate ventilation, fume extraction and protection of other surfaces from contamination with screens and or covers |
| | | 3.3 | Adjustments and settings are made to suit materials, manufacturer instructions and workplace procedures |
| | | 3.4 | Appropriate personal protection equipment is selected and used |
| 4 | Follow workplace procedures to complete the joining process | 4.1 | Joining procedures are completed following the planned work sequence |
| | | 4.2 | Checks and tests of the process and the finished product are made |
| | | 4.3 | Appropriate adjustments are made to the process to maintain the quality of the finished product |
| | | 4.4 | Workplace documentation and records are completed as required |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

# Assessment Requirements for MSFSF3006 Chemically join textiles

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Locate, interpret and apply information relevant to the chemicals and textiles involved and apply safe handling practices for equipment, products and materials
- Select appropriate materials and joining process to match work requirements and conduct the joining process within workplace quality parameters to chemically join at least three (3) textiles, including plain and patterned fabric, vinyl and velvet
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, strengths and limitations of chemical joining processes and techniques
- Changes in materials during the chemical repair and joining of materials
- Testing for potential damage, including dye fastness for the adhesive and materials
- Requirements for ventilation and personal protection equipment for the adhesives
- Personal health effects of fumes, heat and other radiations

## Assessment Conditions

- Assessors must:

# MSFSF3007 Lay out patterns and cut fabrics

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers laying out patterns and cutting fabrics for construction of soft furnishings, upholstery products, and mattresses and bases.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan work operations | 1.1 | Specifications, patterns and/or plans are read and interpreted to identify required fabrics, number of items to be cut and required equipment |
| | | 1.2 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 1.3 | Cutting requirements, including bias or other instructions, are noted and required guides on the cutting table are identified |
| | | 1.4 | Suitable work area is selected, tidied and cleaned of any contaminants |
| | | 1.5 | Appropriate equipment and tools are selected for the |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | fabrics and type of materials |
| | | 1.6 | Suitable scissors and/or blades are selected for the fabrics to be cut |
| | | 1.7 | Scissors and any other cutting equipment are checked prior to use for appropriate sharpness, set operation and safe condition |
| | | 1.8 | Fabrics are selected in accordance with work order and laid out smooth and square |
| 2 | Prepare materials for cutting | 2.1 | Fabrics are inspected for flaws and appropriate finish |
| | | 2.2 | Naps, direction of pattern, pattern repeat and finished side of the materials are identified |
| | | 2.3 | Fabrics are squared up to the edges or guide markings on the cutting table |
| | | 2.4 | Patterns are laid out following work procedures and instructions using registration points on the pattern and other instructions to match required fabric pattern |
| | | 2.5 | Measurements are made and appropriate adjustments are made |
| | | 2.6 | Tools and equipment are checked for operation |
| 3 | Complete cutting operations | 3.1 | Required cutting operations are completed to cut out materials following work instructions |
| | | 3.2 | Fabrics are wrapped using appropriate protective covers and care label information is attached |
| | | 3.3 | Unused materials are stored as required |
| | | 3.4 | Workplace required documentation is completed and stored following appropriate procedures |
| | | 3.5 | Cut fabrics are folded, protected and despatched to next process following workplace procedures |
| | | 3.6 | Stock usage is reported as required by workplace procedures |
| | | 3.7 | Work area is cleaned and damaged tools tagged as required |

© Commonwealth of Australia, 2025 Skills Insight

3.8 Waste is collected and bundled for recycling/re-use as required

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# MSFSF3008 Measure up and calculate fabric quantities for window coverings

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers measuring up and calculating fabric and tracking quantities for window coverings during a site visit for subsequent use in job specifications and quotes/tenders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking windows coverings work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for calculations | 1.1 | Measuring and calculating equipment are collected |
| | | 1.2 | Mathematical processes and guide charts required are identified |
| | | 1.3 | Drape requirements, fabric types and lining/interlining requirements are noted from work order |
| 2 | Measure windows and calculate drape | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are |

# Assessment Requirements for MSFSF3008 Measure up and calculate fabric quantities for window coverings

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Measure up and accurately calculate fabric quantities for at least three (3) different window covering types
- Prepare quotation and/or work order and locate and apply relevant information
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Design features of the fabrics and finished curtains in relation to attractive draping requirements
- Fabric types, common faults and inspection procedures
- Work requirements, including workplace standards

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to work orders, measuring equipment, fabrics, including linings and interlinings, calculator and other relevant equipment.

# MSFSF3009 Manufacture bedspreads, bed linen and table cloths

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers producing bedspreads, bed linen and table cloths in a range of styles to specifications using industrial sewing machines and equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify work requirements | 1.1 | Job requirements are identified from work instructions and patterns |
| | | 1.2 | Pattern is interpreted to determine work specifications |
| | | 1.3 | Instructions for sequencing of work and particular measurements or adjustments are interpreted |
| | | 1.4 | Work sequence is planned, including quality checkpoints |
| 2 | Prepare for work | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work |
| | | 2.2 | Suitable work area is selected for the tasks |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.3 | Materials are selected to match customer requirements, suitability for the purpose and the work instructions |
| | | 2.4 | Potential hazards are identified from observation of the tools, equipment, materials and workplace reference material |
| | | 2.5 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| 3 | Complete manufacture | 3.1 | Fabric quantities are calculated, allowing for seams, joining pleats and gathers |
| | | 3.2 | Fabric is marked out and cut to size |
| | | 3.3 | Bedspreads, bed linen and table cloths are manufactured following work instructions |
| | | 3.4 | Work is checked against patterns and worksheets at the identified checkpoints |
| | | 3.5 | Non-conformity with the required quality standards is rectified |
| 4 | Finalise operations | 4.1 | Completed work is checked against required quality standard |
| | | 4.2 | Documentation or reporting is completed following workplace procedures |
| | | 4.3 | Work area is cleaned, tools and equipment are returned to storage |
| | | 4.4 | Unused materials are returned to storage and waste and scrap are dealt with following workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Bedspreads and bed linen include:**

- quilted, lined and unlined bedspread styles
- duvet covers, sheets, pillow cases and bed valances

**Tools and equipment include:**

- measuring and calculating equipment:
  - tapes
  - rulers
  - calculators
  - computers
- fabric cutting and sewing tools:
  - scissors
  - sewing machines
  - hemming machines
  - overlockers

**Materials include:**

- plain and patterned fabric
- decorative trims and fasteners

**Pattern interpretation is to determine:**

- type of materials specified
- decorative finishes to be applied
- required tools and equipment for the task
- number and size of bedspreads bed linen and table cloths to be produced
- quality requirements

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans,

drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is not equivalent to LMFSF3009B Manufacture bedspreads.

Supersedes and is not equivalent to LMFSF3010B Manufacture bed linen and table cloths.

- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify materials used in bedspread, bed linen and table cloths manufacture, and any special sewing or handling requirements, and produce at least three (3) different types of bed linen or table cloths which must include one (1) duvet cover and one (1) bed valance
- Manufacture at least one (1) quilted, one (1) lined, and one (1) unlined bedspread
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Interpretation of patterns
- Standard range of bedspread and basic bed linen sizes, styles and variations
- Range of fabrics and decorative finishes used in the making of bedspreads, bed linen and table cloths
- Identification of equipment, processes and procedures
- Work flow in relation to bedspread, bed linen and table cloth production

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

# MSFSF3010 Advise customers on interior decoration

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers advising customers on colour coordination, fabric selection and styles in relation to soft furnishings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify work requirements | 1.1 | Job requirements are identified from customer's initial instructions or enquiries and work instructions |
| | | 1.2 | Potential site problems or site-specific requirements are identified |
| | | 1.3 | Work sequence is planned, including quality checkpoints |
| 2 | Prepare for work | 2.1 | A range of materials and products are selected to match customer requirements, suitability for the purpose and work instructions |
| | | 2.2 | Sample materials, products and visual aids are collected |
| | | 2.3 | An appointment is arranged with the customer and an appropriate time plan is agreed |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 3 | Confirm customer requirements | 3.1 | Questioning and active listening techniques are used to clarify customer needs |
| | | 3.2 | Customer requirements are identified professionally, courteously, with tact and without presumptions |
| | | 3.3 | Customer requirements are fed back accurately using language that can be understood by the customer and enterprise staff |
| | | 3.4 | Customer requirements are documented in accordance with relevant industry, legal and/or enterprise standards and procedures |
| 4 | Provide advice on interior decoration options | 4.1 | Viable options for colour, fabric and design that are relevant to the customer's requirements are generated |
| | | 4.2 | Relevant suppliers are contacted to research alternative options, if required |
| | | 4.3 | Options for colour, fabric and design are explained to and discussed with the customer to facilitate customer understanding |
| | | 4.4 | Fabric or product samples and/or visual aids are made available to the customer, where appropriate, to facilitate customer understanding |
| | | 4.5 | Benefits and approximate costs of each option are explained to the customer to facilitate informed decision making |
| 5 | Confirm selection with customer | 5.1 | Customer preferred option, including agreed delivery timeframe, is determined |
| | | 5.2 | Customer commitment to agreed option is gained in accordance with workplace requirements |
| | | 5.3 | Documentation is completed following workplace procedures, including any required specification sheets for products selected |
| | | 5.4 | Assistance with any paperwork requiring completion by customer is provided, where appropriate |
| 6 | Finalise process | 6.1 | Sample products are returned to storage, as required |
| | | 6.2 | Contact is maintained with customer throughout |

# MSFSF3011 Install motorised curtains and blinds

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers installing motorised curtains and blinds in residential and commercial locations.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking motorised curtains and blinds installation work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify products, fittings and attachments to be used | 1.1 | Type of motorised curtain or blind to be installed is identified from work order |
| | | 1.2 | Required materials and tools are identified from work instructions and, where necessary, site inspection |
| | | 1.3 | Location of available power point is checked for suitability |
| | | 1.4 | Installation of power point in suitable location is arranged, if required |
| 2 | Plan process for fitting | 2.1 | Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | observed throughout the work |
| | | 2.2 | Appropriate equipment is identified to minimise risks of damage to customers' premises or injuries to self |
| | | 2.3 | Manufacturer information on products used is located and used to plan work |
| | | 2.4 | Attachment process is planned to conform to quality requirements, minimise time, economically use materials and maximise appearance of the finished work |
| | | 2.5 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| 3 | Complete fitting operations | 3.1 | Work plan is followed ensuring compliance with workplace procedures and WHS requirements |
| | | 3.2 | Tracks or blinds are installed and tested for correct operation |
| | | 3.3 | Curtains are attached to tracks and checked for smooth and even operation and hanging, including limits |
| | | 3.4 | Curtain or blind height and floor clearance is checked and compared to work order requirement |
| 4 | Clean work area | 4.1 | Worksite and any equipment used is cleaned and stored appropriately |
| | | 4.2 | Unserviceable equipment is tagged, faults are identified and appropriate personnel are informed |
| | | 4.3 | Completed work is inspected and compared to workplace quality requirements |
| | | 4.4 | Fittings, curtains and blinds which do not meet quality specifications are repaired on-site or returned to the workroom for repair |

# Assessment Requirements for MSFSF3012 Follow patterns to produce soft furnishing accessories

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Produce at least three (3) different types of soft furniture accessories, which are to include one (1) padded, piped and shaped tie back, one (1) piped cushion and one (1) bolster
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics and production requirements for soft furnishing accessories
- Process for the interpretation of patterns
- Features and use of relevant equipment, processes and procedures
- Work flow in relation to soft furnishing accessory production

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification

© Commonwealth of Australia, 2025 Skills Insight

  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to patterns, materials and work orders.

# MSFSF3013 Provide technical advice to customers

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers providing advice to customers on a range of technical issues that impact on soft furnishing types, uses and installation issues, including wall structures, interior design principles, motorisation, energy conservation and interpretation of architectural drawings.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking technical advisory work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Soft Furnishing

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Identify customer requirements | 1.1 | Questioning techniques are applied to determine the nature of customer requirements |
| | | 1.2 | Potential site problems or site-specific requirements are identified |
| 2 | Access and interpret information | 2.1 | All available information relating to customer-specific requirements is gathered, recorded and confirmed with the customer |
| | | 2.2 | Information on options that potentially meet the customer's |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | requirements is accessed and interpreted |
| 3 | Provide advice to customer | 3.1 | Viable options relating to products, techniques or solutions that are relevant to the customer's requirements are generated |
| | | 3.2 | Information on available options relating to products, techniques or solutions is provided to the customer |
| | | 3.3 | Features, benefits, limitations and safety implications relating to available options are explained to the customer |
| | | 3.4 | The customer is advised to seek specialist advice, where warranted |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Tools and equipment include:**

- measuring and calculating equipment:
  - tapes
  - rulers

# Assessment Requirements for MSFSF3013 Provide technical advice to customers

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Provide advice to customers on three (3) occasions with each involving a different central subject
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Interpretation of plans, drawings and worksheets
- Interior design principles
- Types of motorisation
- Energy conservation methods
- Types of wall and ceiling construction

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to sample products, visual aids and customer specifications.

# MSFSS2001 Rectify faults in product

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers identifying and rectifying faults in security screen and grille materials and products.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking security screens and grilles work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Security Screens and Grilles

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Plan and prepare | 1.1 Applicable work health and safety (WHS), legislative and organisational requirements relevant to rectifying faults in the manufacturing and installation of security screens and grilles are verified and complied with |
| | | 1.2 Tools and equipment are selected to carry out tasks, are consistent with the requirements of the job, checked for serviceability, and any faults are rectified or reported prior to commencement |
| | | 1.3 Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.4 | Workplace environment considerations are identified and measures to reduce noise, dust and obstacles are applied |
| 2 | Assess the fault to identify rectification issues | 2.1 | Faults are identified and inspected to confirm the extent and nature of the fault |
| | | 2.2 | Faults are assessed to determine whether it is a defect in workmanship, process or material |
| | | 2.3 | Verbal and/or written report on the nature of the defect and probable cause is provided |
| | | 2.4 | Faults found are assessed for remedial solutions |
| | | 2.5 | Solution to repair the fault is selected and planned |
| 3 | Rectify faults | 3.1 | Damage or defective area is prepared for repair |
| | | 3.2 | Specialist instruments and repair tools are applied to rectify the fault |
| | | 3.3 | Damage or defective area is finished to specification |
| | | 3.4 | Documentation is completed outlining the nature of the fault, work conducted and outcome, in accordance with enterprise requirements |
| | | 3.5 | Rectified parts are processed for inspection and returned to the production/installation sequence |
| 4 | Clean up work area | 4.1 | Work area is cleared and materials disposed of |
| | | 4.2 | Tools and equipment are cleaned |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# MSFSS2003 Undertake surface preparation

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing surfaces, by hand or machine, for protective coatings, under-coatings and finishes using solvents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Security Screens and Grilles

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Establish work requirements | 1.1 | Applicable work health and safety (WHS), legislative and organisational requirements relevant to surface preparation are verified and complied with |
| | | 1.2 | Instructions, plans and/or work instructions are read and interpreted to identify processes and materials to complete work tasks |
| | | 1.3 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| | | 1.4 | Where required, appropriate solvent and application method is selected to meet job specification |
| 2 | Prepare worksite | 2.1 | Worksite is prepared in accordance with surface cleaning |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | and set up equipment | | activity |
| | | 2.2 | Appropriate equipment and any required consumables are assembled, set up and prepared in accordance with manufacturer specifications and organisational procedures |
| | | 2.3 | Hazards are recognised and steps adopted to ensure safety |
| 3 | Prepare surfaces using solvents as required | 3.1 | Surfaces are prepared for procedures |
| | | 3.2 | Safe working environment for solvent use is established according to regulatory requirements and organisational procedures |
| | | 3.3 | Solvents are applied |
| | | 3.4 | Treated surface is neutralised and made safe to handle |
| | | 3.5 | The area is made safe in accordance with organisational procedures |
| 4 | Prepare surfaces using mechanical means | 4.1 | Safe working environment for mechanical surface preparation is established according to regulatory requirements and organisational procedures |
| | | 4.2 | Surfaces are prepared to specifications using mechanical means |
| | | 4.3 | Adjustments are made, as required, to meet specifications |
| | | 4.4 | Surface preparation faults are rectified as necessary |
| | | 4.5 | Equipment used is cleaned and checked for damage and operational faults in accordance with organisational procedures |
| 5 | Ensure surfaces are adequately prepared and clean up | 5.1 | Surface preparation is assessed for cleanliness and conformance with specification |
| | | 5.2 | Any faults in the surface preparation are identified and action taken to remedy them in accordance with procedures |
| | | 5.3 | Problems are reported to a designated person |
| | | 5.4 | Records and documentation are completed in accordance with organisational procedures |

© Commonwealth of Australia, 2025 Skills Insight

5.5 Work area is restored and waste disposed of in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. |---|---|---|---|
| | | 2.3 | Equipment is selected to hold or support material for hand tools application where applicable |
| | | 2.4 | Material is located and held in position for hand tool application |
| | | 2.5 | Hand tools are safely and effectively used according to their intended use |
| | | 2.6 | Hand tools are safely located when not in immediate use |
| 3 | Select and use power tools | 3.1 | Power tools are selected consistent with needs of the job in accordance with conventional work practice |
| | | 3.2 | Power tools are visually checked for serviceability/safety in accordance with WHS requirements and any faults reported to supervisor in accordance with enterprise procedures |
| | | 3.3 | Equipment is selected to hold or support materials for power tool application as applicable |
| | | 3.4 | Material is located and held in position for power tool application as applicable |
| | | 3.5 | Power tools are safely and effectively used in application processes |
| | | 3.6 | Power tools are switched off and positioned safely when not in use |
| 4 | Clean up work area and tools | 4.1 | All tools are cleaned, maintained and stored |
| | | 4.2 | Equipment is cleaned, maintained and stored |
| | | 4.3 | Documentation is completed in accordance with enterprise procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate skill, accuracy and dexterity in the application of tools to work tasks

**Hand tools for furniture upholstery include:**

- shears/scissors
- tape measure
- rulers
- staple remover
- pincers
- side cutters
- pliers
- hammer
- screwdrivers and magnetic tack hammer
- button press and cutters
- knife (retractable blade)
- needles (bag)
- buttoning
- regulator
- drills
- web strainer
- ripping chisel
- web pliers
- bolt cutters
- rotating hole punch
- saws
- hand planes
- files and rasps
- sockets
- adjustable spanners
- vices

© Commonwealth of Australia, 2025 Skills Insight

- clamps
- wood chisels
- nail punch
- wire bender
- seam stretcher
- pipe/tube bender
- stud press
- pop rivet gun
- no-sag spring benders (for shapes and ends)
- hand ventilation setter
- foam slicer
- white rubber mallet
- no-sag guillotine
- soft tipped mallet
- stuffing iron tack remover
- cross pane hammer and tin snips

**Power and pneumatic tools include:**

- spray adhesive system
- staple gun
- drills and screwdrivers
- fabric cutter
- nail gun
- hot melt glue gun
- buttoning machine
- circular saw
- drop saw
- band saw
- silicone cartridge gun
- drill press
- grinder
- hot knife
- electric iron
- lacquer spray gun
- knife fabric cutters (circular and straight)
- electric/pneumatic foam cutter
- planers and sanders

**Fault reporting includes:**

- verbal or written reporting in conformance with workplace procedures

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFUP2001B Use upholstery sector hand and power tools.

# Assessment Requirements for MSFUP2001 Use upholstery sector hand and power tools

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify each of the upholstery sector hand and power tools in the Range of Conditions and indicate their applications and limitations
- Effectively and safely use the tools in their appropriate role in the workplace environment and maintain and safely store them
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses, limitations and maintenance requirements of hand tools commonly used in furniture upholstery production
- Types, characteristics, uses, limitations and maintenance requirements of power tools commonly used in furniture upholstery production
- Workplace safety requirements and WHS legislation
- Work flow within the workplace

## Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to furniture upholstery sector hand and power tools and materials.

# MSFUP2002 Fit upholstery components

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers fitting upholstery components ready to assemble upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|
| 1 Prepare for component application | 1.1 Work instructions are used determine job requirements including design variations, tolerances, process, materials, finish and quality |
| | 1.2 Components to be fitted are identified |
| | 1.3 Fitting sequence is determined |
| | 1.4 Procedures are determined for checking the quality at each stage of the process |
| | 1.5 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | 1.6 Fixing devices are selected in accordance with work |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | instructions and the type of materials to be used |
| | | 1.7 | Suitable work area is selected for the task |
| | | 1.8 | Components, materials, fittings and attachments are collected |
| | | 1.9 | Tools and equipment suitable to the applicable fitting methods are selected and checked for safe operation |
| 2 | Fit components | 2.1 | Components are laid out and attached using appropriate fastenings |
| | | 2.1 | Hand and power tools and equipment are used, as required |
| | | 2.3 | Attached components are checked for compliance with specifications |
| | | 2.4 | Products which do not meet quality specifications are repaired or tagged for further processing or recycling/disposal in accordance with workplace practices |
| | | 2.5 | Finished products are organised and stored in holding area to enterprise requirements |
| 3 | Complete work | 3.1 | Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures |
| | | 3.2 | Waste and scrap are removed in accordance with workplace procedures |
| | | 3.3 | Tools and equipment used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures |
| | | 3.4 | Equipment is maintained and work area cleaned in accordance with workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

**Upholstery components include:**

- actions
- arms
- seats
- backs
- legs
- facings
- prefabricated polished timber components
- metal components
- plinths
- glides
- ceramic and plastic fittings

**Tools and equipment include:**

- measuring tapes or rulers
- staple gun
- air driver
- air drill and accessories
- scissors and mallets
- air wrench
- nail gun
- clip gun
- tack hammer
- ripping chisels and staple removers

**Materials include:**

- finished upholstery components
- frames
- glues
- screws
- nails and staples and other fixing devices

**Component checking**

- alignment and squareness
- correct fastening

© Commonwealth of Australia, 2025 Skills Insight

# MSFUP2003 Apply contemporary foundations to upholstered furniture

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers applying contemporary upholstery foundations to upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for work | 1.1 | Work order or instructions are used to confirm type of contemporary furniture foundations to be applied |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Attaching methods are identified and fitting sequence is determined |
| | | 1.4 | Suitable work area is selected and prepared |
| | | 1.5 | Tools and hardware for the application of the foundation are selected and checked for safe operation |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Contemporary foundation components are selected, as required |
| 2 | Attach contemporary foundation | 2.1 | Mounting points are measured and marked on the frame, as required |
| | | 2.2 | Contemporary foundation is positioned and appropriate fasteners are used to secure it to the item |
| | | 2.3 | The applied foundation is inspected for fit, finish and quality with those requiring reworking/refitting being tagged for further reprocessing or recycling/disposal in accordance with workplace practices |
| | | 2.4 | Process is monitored and conditions which may affect quality standards are noted |
| | | 2.5 | Variations to normal activities are reported in accordance with workplace procedures |
| | | 2.6 | Authorised changes in standard operating procedures and work order or instructions are implemented |
| 3 | Complete work | 3.1 | Workplace documentation, including stock usage, is completed in accordance with workplace procedures |
| | | 3.2 | Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures |
| | | 3.3 | Waste and scrap are removed in accordance with workplace procedures |
| | | 3.4 | Tools and equipment used are cleaned, inspected for serviceable condition and stored in accordance with workplace procedures |
| | | 3.5 | Equipment is maintained and work area is cleaned in accordance with workplace procedures |

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

**Contemporary foundations include:**

- elastic webbing
- nylon webbing
- no-sag springs
- conical springs
- pulma flex
- plastic and styrene edging
- foam and polyester fibre

**Tools and equipment include:**

- scissors
- upholstery hammer
- nail gun
- staple gun
- pincers
- long-nose pliers and tape measures

**Materials include:**

- elastic webbing
- nylon webbing
- coil springs
- spiral springs
- no-sag springs
- pulma flex
- plastic and styrene edging
- foam
- hessian and polyester fibre

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices:
  - safety glasses/goggle
  - hair nets
  - ear muffs/plugs

# MSFUP2005 Develop cutting plan and cut single layer upholstery fabric

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers developing a cutting plan, measuring out and cutting single layer upholstery fabrics.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Develop cutting plan | 1.1 | Required fabrics, number of items to be cut and required equipment are identified |
| | | 1.2 | Fabric sizes to be cut are identified from work order plus any required allowances |
| | | 1.3 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.4 | Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.5 | Work sequence is planned |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Prepare materials for cutting | 2.1 | Suitable scissors, cutting machines, knives and/or blades are selected and checked prior to use for appropriate sharpness, set, operation and safe condition |
| | | 2.2 | Fabrics are selected in accordance with work order and laid out smooth and square |
| | | 2.3 | Fabrics are inspected for flaws and appropriate finish |
| | | 2.4 | Nap/pile direction, pattern matches and face of the materials are identified |
| | | 2.5 | Tools and equipment are checked for operation |
| | | 2.6 | Fabric is measured and marked, including registration points, in accordance with workplace practices |
| | | 2.7 | Cutting plan is developed in accordance with workplace procedures |
| 3 | Cut fabric | 3.1 | Fabric is cut in accordance with manufacturer instructions and/or workplace procedures |
| | | 3.2 | Problems are notified following workplace procedures |
| | | 3.3 | Cut item is inspected against work requirement with unsatisfactory items being reprocessed in accordance with workplace procedures |
| 4 | Complete work | 4.1 | Cutting is completed with cut out materials top edge marked, wrapped, identified/labelled, handled and stored as required by workplace procedures |
| | | 4.2 | Workplace required documentation is completed in accordance with workplace procedures |
| | | 4.3 | Unused fabric and waste are collected for recycling/re-use in accordance with workplace procedures |
| | | 4.4 | Tools and equipment are maintained and work area is cleaned in accordance with workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

**Upholstery fabrics include:**

- plain or patterned fabrics:
  - velour
  - velvet
  - tapestry
  - damask
  - linen
  - cotton

**Tools and equipment include:**

- cutting equipment, including scissors, cutting machines, knives and/or blades
- hot knife (for acrylics)
- measuring and calculating equipment, including tapes, rulers and calculators
- computers and cutting table

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices:
  - safety glasses/goggle
  - hair nets
  - ear muffs/plugs
  - gloves
  - footwear and protective clothing

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **Information and procedures include:** | • workplace procedures relating to the use of tools and equipment<br>• work instructions, including job sheets, cutting lists, plans, drawings and designs<br>• workplace procedures relating to reporting and communication<br>• manufacturer specifications and operational procedures |

# Unit Mapping Information

# Assessment Requirements for MSFUP2005 Develop cutting plan and cut single layer upholstery fabric

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Develop cutting plan, measure accurately, mark out and cut upholstery fabric quantities, minimising waste and producing consistent quality items for at least five (5) different types of material or products (at least one (1) of which should be patterned)
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Work requirements, including workplace standards
- Work flow in relation to planning and cutting upholstery fabric
- Fabric types, common faults and inspection procedures
- Design features of the finished items in relation to attractive use of fabric patterns

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to work orders, fabrics, tape measure, cutting table, cutting machines, cutting knives, and blades and scissors.

# MSFUP2006 Dismantle and re-assemble furniture for upholstering

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers dismantling and re-assembling furniture and/or fittings for the purposes of fitting and/or refurbishing upholstery.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for work | 1.1 | Item to be dismantled is inspected and components identified |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Work required, including the process/order for dismantling according to the workplace procedures, is identified |
| | | 1.4 | Tools and equipment are selected and checked for safe and effective operation for the task |
| 2 | Dismantle furniture | 2.1 | Items to be dismantled are identified |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 2.2 | Items are dismantled to the extent required in the work instructions using appropriate tools and procedures |
| | | 2.3 | Any previous upholstery is noted for wear, condition and application techniques |
| | | 2.4 | Fasteners and attachments are removed and stored |
| | | 2.5 | Component parts are separated, tagged and stored following workplace procedures |
| | | 2.6 | Component parts are despatched to the next process according to workplace procedures |
| 3 | Re-assemble furniture | 3.1 | Items to be re-assembled are identified |
| | | 3.2 | Items are re-assembled to the extent required in the work instructions using appropriate tools and procedures |
| | | 3.3 | Upholstered components are noted for the security and condition of the upholstered fittings |
| | | 3.4 | Fasteners and attachments are selected and used according to workplace procedures |
| | | 3.5 | Assembled piece is despatched to the next process according to workplace procedures |
| 4 | Complete work | 4.1 | Equipment used is cleaned, inspected for serviceable condition and stored in accordance with workplace procedures |
| | | 4.2 | Equipment faults are identified, tagged and reported to appropriate personnel |
| | | 4.3 | Work area is cleaned and returned to operational condition |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Furniture and/or furnishings include:**

- chairs
- sofas
- settees
- footstools
- beds and their components

**Tools and equipment include:**

- measuring tapes or rulers
- hammers
- rubber mallet
- pincers
- screwdrivers
- shifting spanner
- spanners
- socket set
- hacksaw and blades
- clamps
- timber wedges
- wood chisels
- dowel drill
- long-nose pliers
- floor board lifter
- bricklayer's bolster
- power drill/screwdriver
- air compressor and hoses

**Materials include:**

- timber
- manufactured board
- veneer

# MSFUP3001 Apply traditional foundations to upholstered furniture

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers applying traditional upholstery foundations to upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan operation | 1.1 | Work order or instructions are used to confirm type of traditional furniture foundations to be applied |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Attaching methods are identified and fitting sequence is determined |
| | | 1.4 | Suitable work area is selected and prepared |
| | | 1.5 | Tools and hardware for the application of the foundation are selected and checked for safe operation |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Traditional foundation components are selected as required |
| 2 | Prepare and attach traditional foundation | 2.1 | Mounting points are measured and marked on the frame, as required |
| | | 2.2 | Traditional foundation is positioned and appropriate fasteners are used to secure it to the item |
| | | 2.3 | Appropriate fasteners are used to secure the traditional foundation, as required |
| | | 2.4 | The applied foundation is inspected for fit, finish and quality with those requiring reworking/refitting being tagged for further reprocessing or recycling/disposal in accordance with workplace practices |
| | | 2.5 | Process is monitored and conditions which may affect quality standards are noted |
| | | 2.6 | Variations to normal activities are reported in accordance workplace procedures |
| | | 2.7 | Authorised changes in standard operating procedures and work order or instructions are implemented |
| 3 | Complete work | 3.1 | Workplace documentation, including stock usage, is completed in accordance with workplace procedures |
| | | 3.2 | Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures |
| | | 3.3 | Waste and scrap are removed in accordance with workplace procedures |
| | | 3.4 | Tools and equipment used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures |
| | | 3.5 | Equipment is maintained and work area is cleaned in accordance with workplace procedures |

# MSFUP3002 Fit and apply final cover materials to furniture using basic techniques

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers fitting and applying plain and patterned materials as the final covering to upholstered furniture using basic techniques.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|
| 1 Prepare for work | 1.1 Specifications concerning design, fabrics, accessories and finish are confirmed with designer/customer/client, as required |
| | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | 1.3 Materials, work method and sequence are determined |
| | 1.4 Suitable work area is selected, prepared and cleaned of any contaminants |
| | 1.5 Appropriate equipment and tools are selected and checked for safe operation |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Furniture frames/foundations are checked for quality of construction, contaminants and appropriateness to specifications, and modified and/or repaired in accordance with workplace procedures |
| | | 1.7 | Material panels are checked in terms of quantity, quality, contaminants, size, pattern and consistency |
| | | 1.8 | Trims are selected and checked in terms of quantity, quality, contaminants, size, pattern and consistency |
| 2 | Fit and apply fabric | 2.1 | Work pieces are laid out in sequence according to specifications, construction process and workplace procedures |
| | | 2.2 | Materials are applied to furniture in accordance with enterprise and industry standards |
| | | 2.3 | Material is secured to the foundation, using appropriate fixing processes |
| | | 2.4 | Finish of applied material is checked against quality standards |
| 3 | Fit and apply fabric and trim | 3.1 | Trims are applied consistent with specifications and workplace procedures |
| | | 3.2 | Trims are checked against quality standards and reprocessed, if required, in accordance with workplace procedures |
| | | 3.3 | Final adjustments are made to ensure finish meets required quality standards |
| 4 | Complete work | 4.1 | Finished product is packaged, protected and stored, as required, consistent with workplace procedures |
| | | 4.2 | Workplace documentation is completed in accordance with procedures |
| | | 4.3 | Waste and scrap are collected for disposal/recycling in accordance with workplace procedures |
| | | 4.4 | Tools and equipment used are cleaned, inspected for serviceability and stored in accordance with workplace procedures |
| | | 4.5 | Equipment is maintained and work area is cleaned in accordance with workplace procedures |

# Assessment Requirements for MSFUP3003 Fit and apply final cover materials to furniture using decorative techniques

## Modification History

Release 1 - New unit of comeptency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- As a minimum, fit and apply a final material cover for:
  - a bedhead using diamond buttoning
  - a chair using other decorative finishes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Work requirements, including workplace standards
- Work flow in relation to applying final material covers to upholstered furniture using decorative techniques
- Cover material types and characteristics, common faults and inspection procedures
- Types of decorative techniques and their application
- Design features of the finished furnishing items

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to relevant process equipment and materials.

# MSFUP3004 Lay out patterns and cut leather

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers selecting leather hides, laying out patterns and cutting out leather by hand to the required shape or pattern.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for work | 1.1 | Specifications, patterns and/or plans are read and interpreted to identify required colour and quality of materials, number of items to be cut and tools and equipment required |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.4 | Pattern pieces are identified to match shapes to final wear characteristics of the furnishing component |
| | | 1.5 | Suitable scissors and/or blades are selected for the leather |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | to be cut |
| | | 1.6 | Scissors and any other tools and equipment are checked prior to use for appropriate sharpness, operation and safe condition |
| | | 1.7 | Hide is selected, spread out and inspected to identify flaws and harder and softer wearing parts |
| | | 1.8 | Direction of natural markings and finished side of the leather are identified |
| 2 | Lay out pattern | 2.1 | Patterns are laid out following workplace procedures and instructions using low wear parts of the hide on the less heavily used furniture components |
| | | 2.2 | Patterns are laid out to maximise use of the hide for the furniture design |
| | | 2.3 | Any registration points on the pattern and other instructions to match required pattern components are marked |
| | | 2.4 | Any required measurements are made and appropriate adjustments made |
| 3 | Cut leather | 3.1 | Required cutting operations are completed with cut-out leather components identified in accordance with work instructions and procedures |
| | | 3.2 | Cut work is inspected, any faults identified and appropriate action taken in accordance with workplace procedures to ensure cut pieces meet the required quality standards |
| | | 3.3 | The performance of the cutting equipment is regularly checked for signs of faulty operation, including evidence from the inspection of cut pieces |
| | | 3.4 | Where required, cut out components are wrapped using appropriate protective covers and care label information is attached |
| 4 | Complete work | 4.1 | Unused materials are stored as required |
| | | 4.2 | Cut components are folded, protected and despatched to next process following workplace procedures |
| | | 4.3 | Work area is cleaned and damaged tools tagged, as required |

© Commonwealth of Australia, 2025 Skills Insight

4.4 Waste is collected and bundled for recycling/reuse, as required

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

| | |
|---|---|
| **Unit context includes:** | • WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent<br>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements<br>• work requires individuals to demonstrate some discretion, judgement and problem solving |
| **Leather hide characteristics/qualities include:** | • suitable thickness and quality (may be a full hide or partial)<br>• natural markings<br>• finished and unfinished sides<br>• high and low wear<br>• direction of markings<br>• flaws and blemishes<br>• colour variation between hides<br>• flexibility |
| **Tools and equipment include:** | • scissors<br>• cutting blades and electric shears |
| **Personal protective equipment includes:** | • that prescribed under legislation, regulations and enterprise policies and practices:<br>  • safety glasses/goggle |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | • hair nets<br>• ear muffs/plugs<br>• gloves<br>• footwear and protective clothing |
| **Information and procedures include:** | • workplace procedures relating to the use of tools and equipment<br>• work instructions, including job sheets, cutting lists, plans, drawings and designs<br>• workplace procedures relating to reporting and communication<br>• manufacturer specifications and operational procedures |

# MSFUP3005 Machine sew complex upholstery final cover materials

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using specific sewing machine techniques, with attachments, as required, to sew upholstery final cover materials.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for work | 1.1 | Job requirements are identified from work instructions |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Machines, attachments, materials, work method and sequence are determined |
| | | 1.4 | Equipment, including any supplementary equipment, is identified and checked for safe operation, components and controls |
| | | 1.5 | Materials are identified and inspected and problems, including any materials or part-constructed products which |

| | | | |
|---|---|---|---|
| | | | do not meet the job order requirements, are identified and reported in accordance with workplace procedures |
| | | 1.6 | Work pieces are laid out in sequence in accordance with specifications and workplace procedures |
| 2 | Conduct sewing operation | 2.1 | Sewing machine, including attachments, is set up and adjusted for the work requirements |
| | | 2.2 | Machine is operated to maintain required product quality and outputs |
| | | 2.3 | Finished products are checked for required quality, repaired and moved to the next process |
| 3 | Complete work | 3.1 | Completed work is directed to the next operation in accordance with workplace procedures |
| | | 3.2 | Documentation, including production and/or stock records and/or packing slips, are completed in accordance with workplace procedures |
| | | 3.3 | Material which is able to be re-used is collected and stored, and waste and scrap removed in accordance with workplace procedures |
| | | 3.4 | Equipment maintenance and work area clean-up are completed following workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. # MSFUP3006 Fit and apply leather to furniture

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers the fitting and application of leather, pre-cut to pattern, to an upholstered item of furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Prepare for work | 1.1 Specifications concerning design, leather coverings, accessories and finish are confirmed with designer/customer/client, as required |
| | | 1.2 Work health and safety (WHS) requirements, including personal protective needs, are observed throughout the work |
| | | 1.3 Materials, work method and sequence are determined |
| | | 1.4 Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.5 Appropriate equipment and tools are selected and checked for safe operation |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Furniture frames/foundations are checked for quality of construction, contaminants and appropriateness to specifications, and modified and/or repaired in accordance with workplace practices |
| | | 1.7 | Leather panels are checked in terms of quantity, quality, grain, contaminants, size and wear stress |
| | | 1.8 | Trims are selected and checked in terms of quantity, quality, contaminants, size, pattern and consistency |
| 2 | Fit and apply leather | 2.1 | Work pieces are laid out in sequence according to specifications, construction process and workplace procedures |
| | | 2.2 | Leather pieces are applied to furniture ensuring that appropriate leather is fitted to high wear areas and a smooth and consistent finish of the leather over the furniture foundation |
| | | 2.3 | Decorative features, including pleats, are applied to the leather before fitting, as required |
| | | 2.4 | Leather is secured to the foundation using appropriate fixing processes |
| | | 2.5 | Finish of applied leather is checked against quality standards |
| 3 | Apply trim | 3.1 | Work pieces are laid out in sequence according to specifications and workplace procedures |
| | | 3.2 | Trims and decorative finishes are applied to the item consistent with specifications and workplace procedures |
| | | 3.3 | Trims and decorative finishes are checked against quality standards and modified and or repaired, as required |
| | | 3.4 | Final adjustments are made, as required, to ensure finish of completed item meets required quality standards |
| 4 | Complete work | 4.1 | Finished product is packaged, protected and stored in accordance with workplace procedures |
| | | 4.2 | Workplace documentation is completed in accordance with procedures |
| | | 4.3 | Waste and scrap are collected for disposal/recycling in accordance with workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

4.4 Tools and equipment used are cleaned, inspected for serviceability and stored in accordance with workplace procedures

4.5 Equipment is maintained and work area is cleaned in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

# MSFUP3007 Manufacture and fit loose covers

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers developing a pattern to meet a loose cover requirement, cutting from that pattern, and making and fitting loose covers to items of upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Prepare for work | 1.1 Specifications concerning design, fabrics, accessories and finish are confirmed with designer/customer/client, as required |
| | | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 Materials, work method and sequence are determined |
| | | 1.4 Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.5 Appropriate equipment and tools are selected and checked for safe operation |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 2 | Develop patterns | 2.1 | 3-D templates are developed from the surface of the existing furniture without undue distortion |
| | | 2.2 | Component shapes are marked out and/or cut out using appropriate technique |
| | | 2.3 | Standard 2-D patterns are produced in accordance with specifications and to accepted standards and construction tolerances |
| | | 2.4 | Patterns are reviewed against client specifications and production requirements |
| | | 2.5 | Consultation and clarification with client is undertaken, as required |
| 3 | Select and cut fabric | 3.1 | Fabrics are selected and inspected in accordance with work order and laid out smooth and square |
| | | 3.2 | Nap/pile, direction of pattern, pattern repeat and finished side of the materials are identified |
| | | 3.3 | Fabrics are squared up to the edges or guide markings on the cutting table |
| | | 3.4 | Patterns are laid out using registration points on the pattern and other instructions to match required fabric pattern ensuring maximum use of the fabric |
| | | 3.5 | Fabric is cut and cut components are inspected in accordance with workplace procedures |
| 4 | Sew panels | 4.1 | Sewing machine set-up requirements and adjustments are identified and followed |
| | | 4.2 | Machine sewing maintains required product quality and outputs |
| | | 4.3 | Finished loose covers are checked for required quality and reprocessed in accordance with workplace procedures |
| 5 | Fit and finish cover | 5.1 | Loose cover is applied to the upholstered furniture and checked for fit |
| | | 5.2 | Decorative accessories are applied, as required |
| | | 5.3 | Adjustments are made, as required, to ensure fit meets required quality standards and specifications |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| 6 | Complete work | 6.1 Workplace documentation is completed in accordance with procedures |
| | | 6.2 Waste and scrap are collected and disposed of/recycled in accordance with workplace procedures |
| | | 6.3 Tools and equipment used are cleaned, inspected for serviceability and stored in accordance with workplace procedures |
| | | 6.4 Equipment is maintained and work area is cleaned in accordance with workplace procedures |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

# Assessment Requirements for MSFUP3007 Manufacture and fit loose covers

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Develop two (2) patterns for loose covers for given items of furniture (one plain and one patterned)
- Measure and cut fabrics to required size and accuracy, matching any patterns, sew fabric and fit to items of furniture
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Work requirements, including workplace standards and work flow
- Fabric types and characteristics, common faults and inspection procedures
- Design features of the finished furnishing items in relation to laying out the pattern and cutting the fabrics

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to plain and patterned fabrics, sewing machines, furniture to be upholstered and a work order.

# MSFUP3008 Apply finishing techniques to upholstered furniture

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers hand finishing upholstered furniture by the application of concealed and decorative finishing techniques.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Prepare for work | 1.1 | Job requirement is identified from work order or other instructions, including any special requirements for finishing |
| | | 1.2 | Required materials, upholstered components to be finished, and appropriate tools and equipment are identified from work order |
| | | 1.3 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.4 | Items to be finished are assembled in an appropriate work area and inspected for appropriate quality |
| | | 1.5 | Appropriate tools, equipment and finishing materials and |

| | | | |
|---|---|---|---|
| | | | hardware are selected |
| 2 | Apply finishing techniques | 2.1 | Finishing techniques are applied in accordance with workplace procedures |
| | | 2.2 | Problems are notified following workplace procedures |
| | | 2.3 | Finished upholstered item is inspected against work requirement with unsatisfactory finish being redirected for re-working |
| 3 | Complete work | 3.1 | Finished work is package/stored/tagged and despatched to the next process following workplace procedures |
| | | 3.2 | Any required documentation is completed and processed following workplace procedures |
| | | 3.3 | Tools and equipment used are cleaned, maintained as required and stored in accordance with workplace procedures |
| | | 3.4 | Work area is cleaned with waste and scrap being removed/recycled in accordance with workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# MSFUP3009 Develop cutting plan and cut multiple layer upholstery fabric

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers developing a cutting plan and cutting multiple layer upholstery fabrics by hand or automatic method for upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Prepare for work | 1.1 Specifications, patterns and/or plans are read and interpreted to identify required fabrics, number and nature of items to be cut and required equipment |
| | | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 Fabrics, work method and sequence are determined |
| | | 1.4 Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.5 Appropriate equipment and tools are selected for the fabrics to be cut and checked for safe operation |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.6 | Fabric is selected and checked in terms of quantity, quality, contaminants, size, pattern and consistency in accordance with workplace procedures |
| | | 1.7 | Scissors and any other cutting equipment are checked prior to use for appropriate sharpness, set operation and safe condition |
| 2 | Develop cutting list and cutting plan | 2.1 | Cutting requirements, including bias or other instructions, are noted |
| | | 2.2 | Measurements for upholstered items are taken and listed |
| | | 2.3 | Cutting list is developed using appropriate format, abbreviations and terminology for cut sizes, names and number of pieces in accordance with workplace procedures |
| | | 2.4 | Cutting plan to ensure fabric is laid correctly to indicate run for each panel, the dimensions for each component part and to minimise fabric waste is developed in accordance with workplace procedures, noting if fabric is railroaded |
| 3 | Prepare materials for cutting | 3.1 | Fabrics are selected in accordance with work order and laid out and inspected for flaws and appropriate finish |
| | | 3.2 | Nap/pile direction, direction of pattern, pattern repeat and finished side of the materials are identified |
| | | 3.3 | Fabrics are squared up to the edges or guide markings on the cutting table |
| | | 3.4 | Patterns are laid out following work procedures and instructions using registration points on the pattern and other instructions to match required fabric pattern |
| 4 | Cut material | 4.1 | Measurements are confirmed and appropriate adjustments to the positioning of fabric are made |
| | | 4.2 | Tools and equipment are checked for correct operation |
| | | 4.3 | Required cutting operations are completed to cut out fabrics following work instructions |
| | | 4.4 | Cut fabric is inspected for quality and unsatisfactory items are processed in accordance with workplace instructions |
| | | 4.5 | Fabrics are folded, wrapped using appropriate protective covers and care label information attached prior to |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | despatch to next process following workplace procedures |
| 5 | Complete work | 5.1 | Unused materials are stored, as required |
| | | 5.2 | Workplace required documentation, including stock usage, is completed and processed following procedures |
| | | 5.3 | Work area is cleaned and damaged tools and equipment tagged, as required |
| | | 5.4 | Waste is collected for recycling/re-use as required by workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# MSFUP3010 Cut, sew and fit skirts to upholstered furniture

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers measuring, marking out, cutting and sewing skirts for items of upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | Plan work operations | 1.1 | Specifications concerning design, fabrics, accessories and finish for the skirts are confirmed with designer/customer/client, as required |
| | | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 | Fabrics, work method and sequence are determined |
| | | 1.4 | Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.5 | Appropriate equipment and tools are selected and checked for safe operation |

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Tools and equipment include:**

- cutting table
- cutting machines
- scissors
- sewing machines and cushion filling machines

**Sewing machines include:**

- flatbed
- walking foot and overlocker

**Sewing machine set-up and adjustments include:**

- threading machine and winding bobbin
- setting required tensions
- setting required machine settings
- lubricating and adjusting the machine
- testing operation for work order requirements

**Materials include:**

- fabric
- filling material:
  - foam
  - dacron
  - flock
  - crumbed foam
  - springs

# Assessment Requirements for MSFUP3011 Cut, sew and fit or fill cushions

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- As a minimum, cut, sew and fit or fill the following cushions:
  - piped border cushion
  - wrap around cushion
  - T-cushion
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Work requirements, including workplace standards and inspection procedures
- Work flow in relation to the cutting, sewing and fitting or filling of cushions
- Fabric types and characteristics, common faults and inspection procedures
- Design features of the finished furnishing items in relation to laying out the pattern and cutting the fabric

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2025 Skills Insight

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a cutting table, material, filling medium, sewing machines, cushion filling machine and a work order.

# MSFUP3012 Apply marine sewing and installation techniques

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers using marine sewing techniques in the completion of upholstery products/items used in marine applications, such as covers, and fitting the required attachments and fixing devices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Prepare for work | 1.1 Job requirements are identified from work instructions |
| | | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 Machines, attachments, materials, work method and sequence are determined |
| | | 1.4 Equipment, including any supplementary equipment, is identified and checked for safe operation, components and controls |
| | | 1.5 Materials are identified and inspected and problems, including any materials or part-constructed products which |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | do not meet the job order requirements, are identified and reported in accordance with workplace procedures |
| | | 1.6 | Work pieces are laid out in sequence in accordance with specifications and workplace procedures |
| 2 | Conduct sewing operation | 2.1 | Sewing machine, including attachments, as required, set-up requirements and adjustments are observed in accordance with workplace procedures |
| | | 2.2 | Appropriate thread type and size is fitted to machine |
| | | 2.3 | Machine is operated to maintain required product quality and outputs |
| | | 2.4 | Reinforcing/protective measures, fittings/attachments and fixing devices are attached in accordance with workplace procedures |
| | | 2.5 | Finished products, including covers, are inspected for quality with unacceptable items being reprocessed in accordance with workplace instructions |
| 3 | Complete work | 3.1 | Unused materials are stored, as required |
| | | 3.2 | Workplace required documentation, including stock usage, is completed and processed following workplace procedures |
| | | 3.3 | Work area is cleaned and damaged tools and equipment tagged, as required |
| | | 3.4 | Waste is collected and bundled for recycling/reuse as required by workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

# Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential

# MSFUP3013 Cut and sew canvas and acrylics

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers measuring, cutting and sewing canvas and acrylic materials, and applying fixtures and fittings for upholstery applications and for other uses, such as automotive and marine applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | Prepare for work | 1.1 Specifications, patterns and/or plans are read and interpreted to identify required material, number and nature of items to be cut and the equipment to be used |
| | | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.3 Machines, attachments, tools, materials, work method and sequence are determined |
| | | 1.4 Suitable work area is selected, prepared and cleaned of any contaminants |
| | | 1.5 Equipment, including any supplementary equipment, is |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | identified and checked for safe operation, components and controls |
| | | 1.6 | Scissors and any other cutting equipment are selected for the material to be cut and checked for appropriate sharpness, operation and safe condition |
| | | 1.7 | Materials to be cut and sewn are identified and inspected and problems, including any materials which do not meet the job order requirements, are identified and reported in accordance with workplace procedures |
| 2 | Develop cutting plan | 2.1 | Cutting requirements are identified |
| | | 2.2 | Measurements for item are confirmed, noting locations of high wear/chafing, fittings/attachments and fixing devices |
| | | 2.3 | If appropriate, cutting list is developed using appropriate format, abbreviations and terminology for cut sizes, and number of pieces in accordance with workplace procedures |
| | | 2.4 | Cutting plan is developed in accordance with workplace procedures |
| 3 | Prepare materials for cutting | 3.1 | Material is selected in accordance with work order and laid out and inspected for flaws |
| | | 3.2 | Finished side of the materials are identified and positioned on cutting table for marking/pattern lay out |
| | | 3.3 | Material is marked out/patterns are laid out following work procedures and instructions |
| 4 | Cut material | 4.1 | Measurements are confirmed and appropriate adjustments to the positioning of fabric are made |
| | | 4.2 | Tools and equipment are checked for operation |
| | | 4.3 | Required cutting operations are completed to cut material following work instructions |
| | | 4.4 | Cut material is inspected for quality and unsatisfactory items are processed in accordance with workplace instructions |
| | | 4.5 | Cut materials are labelled and despatched to next process in accordance with workplace procedures |
| 5 | Conduct sewing operation | 5.1 | Items to be sewn are inspected for quality and dimensions |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 5.2 | Sewing machine, including attachments, as required, is set up in accordance with workplace instructions |
| | | 5.3 | Machine is operated in accordance with manufacturer instructions and workplace procedures to maintain required product quality and output |
| | | 5.4 | Reinforcing/protective measures, fittings/attachments and fixing devices are attached in accordance with workplace procedures |
| | | 5.5 | Finished items are inspected for quality with unacceptable items being reprocessed in accordance with workplace procedures |
| 6 | Complete work | 6.1 | Workplace documentation, including stock usage, is completed and processed following workplace procedures |
| | | 6.2 | Equipment maintenance and work area clean-up are completed following workplace procedures |
| | | 6.3 | Waste is collected and bundled for recycling/re-use as required by workplace procedures |

# MSMENV272 Participate in environmentally sustainable work practices

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

## Application

This unit describes the skills and knowledge required to comply with environmental regulations, identify environment issues and minimise the risks of negative impact on work and carry out improvements in own work area.

This unit applies to operators and team members who are required to follow procedures to work in an environmentally sustainable manner.

This unit applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be contextualised for the industry sector, organisation and section.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

## Pre-requisite Unit

Nil

## Unit Sector

HSE

## Elements and Performance Criteria

# Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- followed environmental policies and identified potential breaches of environmental regulations and suggested improvements within the limit of own authority.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- environmental sustainability issues relevant to organisation
- resource use and impact of inefficiencies associated with own work role
- environmental and resource efficiency policies and procedures for own work role
- environmental regulations and guidelines and their impact on own work role
- the environmental issues, hazards and risks associated with own work role
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - environmental regulations, guidelines and procedures
  - workplace incident reporting procedures and forms.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMENV472 Implement and monitor environmentally sustainable work practices

## Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

## Application

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Unit Sector

# Elements and Performance Criteria

| Elements describe the essential outcomes | | Performance criteria describe the performance needed to demonstrate achievement of the element | |
|---|---|---|---|
| 1 | **Investigate current practices in relation to resource usage** | 1.1 | Identify environmental regulations applying to the enterprise |
| | | 1.2 | Assess procedures for assessing compliance with environmental regulations |
| | | 1.3 | Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required |
| | | 1.4 | Measure and record current resource usage by members of the work group |
| | | 1.5 | Analyse and record current purchasing strategies |
| | | 1.6 | Analyse current work processes to access information and data, and assist in identifying areas for improvement |
| 2 | **Set targets for improvements** | 2.1 | Seek input from stakeholders, key personnel and specialists |
| | | 2.2 | Access external sources of information and data as required |
| | | 2.3 | Evaluate alternative solutions to workplace environmental issues |
| | | 2.4 | Set efficiency targets |
| 3 | **Implement performance** | 3.1 | Source and use techniques/tools to assist in achieving targets |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | **improvement strategies** | 3.2 | Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management |
| | | 3.3 | Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them |
| | | 3.4 | Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate |
| | | 3.5 | Implement costing strategies to fully value environmental assets |
| 4 | **Monitor performance** | 4.1 | Document outcomes and communicate reports on targets to key personnel and stakeholders |
| | | 4.2 | Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance |
| | | 4.3 | Set new targets and investigate and apply new tools and strategies |
| | | 4.4 | Promote successful strategies and reward participants where possible |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

© Commonwealth of Australia, 2025 Skills Insight

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

# Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

## Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
  - contribution to climate change and other macro threats that can arise from materials and work processes used
  - regulated environmental issues
  - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - will typically include the use of appropriate tools, equipment and documents

© Commonwealth of Australia, 2025 Skills Insight

  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMENV672 Develop workplace policy and procedures for environmental sustainability

## Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

## Application

This unit of competency covers the skills and knowledge required to develop and implement a workplace sustainability policy, including the modification of the policy to suit changed circumstances.

This unit of competency applies to team leaders/supervisors/managers who are required to develop approaches to environmental sustainability within workplaces, including the development and implementation of policy.

It includes communicating with relevant stakeholders, developing and monitoring sustainability policies and reviewing and improving sustainability policies.

This unit of competency applies to all sectors of the manufacturing industry. It may also be applied to all sections of an organisation, including the office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of

# Assessment Requirements for MSMENV672 Develop workplace policy and procedures for environmental sustainability

## Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- scope and develop an integrated sustainability policy and procedure within an enterprise
- raise awareness among stakeholders and those involved in implementing the policy of expected outcomes
- develop a workable implementation strategy
- ensure policy implementation is monitored, reviewed and modified where

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant policy development and implementation processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMOPS101 Make measurements

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements

## Application

This unit describes the skills and knowledge required to use physical and/or chemical measuring equipment to make or take routine measurements and keep records related to the measurements.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

This unit applies to all routine measurements within manufacturing and similar environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

# Assessment Requirements for MSMOPS101 Make measurements

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed and recorded at least 1 of the following workplace measurements:
  - extent
  - dimension
  - quantity
  - mass
  - capacity
  - capability
- responded to routine and non-routine measuring problems in accordance with organisation procedures
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic units of measurement, including
  - kilogram
  - metre
  - second
- types of measuring devices, including how, when and why they are used
- purpose of equipment calibration and methods of checking equipment is within calibration
- routine problems that may arise in the work environment and corrective action and reporting procedures appropriate to the problem cause.
-

# MSMOPS212 Use organisation computers or data systems

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS212A Use organisation computers or data systems

## Application

This unit of competency covers the skills and knowledge required to use organisation computers or data systems in order to work effectively.

The operator will be required to select correct programs, save and retrieve data, and produce documents and spreadsheets relevant to operational or administrative functions within the organisation.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

| | | 1.2 | Identify data from work role which needs to be entered in the system |
| 2 | **Use the computer or data system** | 2.1 | Adjust workstation equipment to meet ergonomic requirements and use appropriate posture |
| | | 2.2 | Log on according to procedures |
| | | 2.3 | Navigate system |
| | | 2.4 | Input data or make changes as required |
| | | 2.5 | Check entered or edited data is correct |
| | | 2.6 | Access required data/information |
| | | 2.7 | Output data as required |
| | | 2.8 | Apply system/security procedures |
| | | 2.9 | Use 'Help' as needed |
| 3 | **Save file and exit system** | 3.1 | Identify the need to save data and, if required, save and store data in appropriate directory or folder |
| | | 3.2 | Close file and/or exit applications programs without loss of data |
| | | 3.3 | Back-up data if required in accordance with procedures |
| 4 | **Respond to routine problems with the system** | 4.1 | Recognise routine problems that occur during the operation |
| | | 4.2 | Identify and take action on causes of routine problems |
| | | 4.3 | Log problems as required |
| | | 4.4 | Identify non-routine process and quality problems and take appropriate action |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- privacy and intellectual property (IP)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- organisation procedures relevant to data systems, data security, record keeping, privacy, internet usage and IP
- manufacturers' manuals
- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the organisation

© Commonwealth of Australia, 2025 Skills Insight

**Computers or data systems**

Computers or data systems are used for one or more of the following:

- electronic documents (typically Word, Excel, email and similar)
- safety, safety data and injury reporting
- orders, purchasing, stock levels and scheduling
- stock control, stores, warehousing and logistics
- materials hazards, labelling, materials identification and material safety data sheets (MSDSs)
- batch data, schedules, production planning and operations planning
- product quality, statistical control, production trends and quality control
- maintenance, maintenance planning, procedures and spare parts

**Equipment**

Equipment includes one or more of the following:

- computers and stationary terminals/kiosks (stand alone and/or networked)
- mobile terminals and handheld devices
- smartphones and tablets
- printers
- mouse and keyboard
- facsimile equipment
- onboard terminals
- scanners
- bar coders

**Software applications**

Software applications include one or more of the following:

- email
- internet or intranet
- word processing, database and/or spreadsheet programs
- company/process-specific software

**Documents**

Documents include one or more of the following:

- work orders
- work instructions/SOPs
- email
- faxes
- memos
- tables
- standard letters

© Commonwealth of Australia, 2025 Skills Insight

- standard reports

**Hazards**

Hazards include one or more of the following:

- ergonomics and posture
- repetition strain injuries
- glare from monitor screens
- damaged cables or connections
- strains or injuries moving computer equipment
- other hazards that might arise in the job/work environment

**Routine problems**

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of:

- software problems, such as unable to access file, find correct page, send mail or input data
- loose or disconnected cables
- 'frozen' screens
- faulty monitors
- keyboard problems

Known solutions are drawn from one or more of:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to relevant procedures.

# Assessment Requirements for MSMOPS212 Use organisation computers or data systems

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS212A Use organisation computers or data systems

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- use computers or data systems to locate and access information and/or data to meet job requirements
- edit information and/or input data electronically using one or more of:
  - keyboard
  - mouse
  - stylus
  - touchscreen
- check that edits/data entry are accurate and complete
- locate files (in file directory) or generate reports (within software) relevant to job
- apply procedures, as required, for:
  - log in/log out (and password protection)
  - back-up
  - security (e.g. anti-virus)
  - intellectual property (IP)/security
- apply known solutions to routine problems.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including those covering:
  - data systems and data security
  - record keeping
  - privacy
  - IP
  - use of internet
  - safety, emergency and hazard control
  - relevant organisation standard operating procedures (SOPs)
- ergonomics of using computers and related equipment

© Commonwealth of Australia, 2025 Skills Insight

- scope and range of available data relevant to work role
- routine problems that may arise and how to identify causes
- types and application of software relevant to work role.

# Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations and provide for demonstration of responding to problems
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment, data and documentation
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

© Commonwealth of Australia, 2025 Skills Insight

- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMOPS363 Organise on-site work

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS363A Organise on site work

## Application

This unit of competency covers the skills and knowledge required to organise and prepare for on-site work in a field situation, such as a remote mine site or large industrial complex where extensive permit or clearance systems exist.

The operator will be required to plan the work, ensure permits and other arrangements are in place to allow the on-site work to proceed safely, and set-up the tools, equipment and materials at the site.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Elements and Performance Criteria

| Elements describe the essential outcomes | | Performance criteria describe the performance needed to demonstrate achievement of the element | |
|---|---|---|---|
| 1 | Plan the work | 1.1 | Review the requirements of the work |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.2 | Arrange all necessary permits and permissions for site inspections and work |
| | | 1.3 | Examine the site where the work will take place |
| | | 1.4 | Identify plant and equipment isolations |
| | | 1.5 | Identify hazards and risk controls |
| | | 1.6 | Plan to minimise downtime, economically use materials and meet quality specifications |
| | | 1.7 | Plan work, including sequences, times, process stages, engineering controls and personal protective equipment (PPE) requirements |
| | | 1.8 | Prepare all necessary documentation and finalise the permissions and approvals for conducting the work |
| 2 | Prepare equipment, tools and materials | 2.1 | Identify equipment, tools and materials required |
| | | 2.2 | Arrange for supply of all tools, equipment and materials |
| | | 2.3 | Arrange for transport to site of all equipment, tools and materials |
| 3 | Set up work location | 3.1 | Assemble and check materials and tools for suitability for purpose |
| | | 3.2 | Establish required communication with site personnel |
| | | 3.3 | Establish a safe work area |
| | | 3.4 | Establish isolations and tag/lock out as required |
| | | 3.5 | Check tools, equipment and materials against site situation and conditions |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work permits
- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Work requirements**

Work requirements are determined from one or more of the following:

- work orders
- specifications
- job descriptions
- designs

© Commonwealth of Australia, 2025 Skills Insight

- other documents

**On-site work**

On-site work is done in situ, not in a factory or workshop, and includes one or more of the following:

- conveyor belt splicing and repairs
- rubber lagging of conveyor drums
- rubber lining of tanks
- polymer piping systems installation or repairs
- polymer constructions (e.g. fume cupboards or signs)
- refractory lining
- concrete casting

**Isolations**

Isolations include one or more of the following:

- power supply
- tag locations
- process materials
- energy sources and
- equipment isolation system

**Safe work area**

Safe work area includes areas for one or more of the following:

- scaffolding
- lifting gear
- lay down area
- work area
- other equipment in appropriate locations

**Tools and equipment**

Tools and equipment include one or more of the following:

- manual handling aids
- hand winches
- portable power generators and vulcanising equipment
- knives and other cutting instruments
- portable hoists/lifting equipment not requiring any special permits or licences
- spanners, wrenches and hammers
- power operated hand tools, such as drills, cutting disks and sanders
- specialised tools for the job
- relevant PPE

© Commonwealth of Australia, 2025 Skills Insight

**Hazards**

Hazards include one or more of the following:

- manual handling hazards
- hand tools and handheld power tools (e.g. knife, cutting and grinding disk hazards)
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

**Non-routine problems**

Routine problems must be resolved by applying known solutions.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

© Commonwealth of Australia, 2025 Skills Insight

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of:

- lack of accessibility
- equipment isolations
- logistics of materials and equipment to work site
- variations in materials and/or contamination of materials

Operational knowledge includes one or more of:

- procedures
- training
- technical information such as journals, engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

# Assessment Requirements for MSMOPS363 Organise on-site work

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS363A Organise on site work

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify job requirements and site conditions and plan the work
- sequence and schedule work tasks and stages to maximise efficiency and meet quality specifications
- select and arrange all equipment and materials for the site and set up tools, equipment and materials on site
- identify hazards and apply relevant hazard controls
- read and interpret work specifications, work orders, job sheets and material labels
- communicate effectively with team/work group and other personnel at the site
- apply operational knowledge to non-routine problems.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including:
  - work permit systems
  - safety, emergency and hazard control
  - relevant organisation standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- hierarchy of controls
- work flow sequences and materials demand
- factors and potential effects of variations in raw materials and equipment operation in relation to quality of product
- planning process, including breaking the work down into steps and stages
- products, materials and material characteristics.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
  - The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMPCI101 Adapt to work in industry

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI101A Adapt to work in industry

## Application

This unit covers the fundamental knowledge and skills needed to adapt to the workplace when taking up employment within the manufacturing industry. It includes following industry and workplace guidelines and procedures in a day-to-day work context, as well as appropriate work behaviour.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

The unit has application in qualifications for all occupations in the manufacturing industry and it should be regarded as an integrating unit. When delivered/assessed as part of a qualification, this unit must be customised to ensure its relevance to the real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Elements and Performance Criteria

| Elements describe the essential outcomes | | Performance criteria describe the performance needed to demonstrate achievement of the element | |
|---|---|---|---|
| 1 | Manage own learning | 1.1 | Consider and articulate own personal goals or vision |
| | | 1.2 | Identify opportunities for learning new ideas and techniques in relation to personal goals |
| | | 1.3 | Recognise personal learning needs and skill gaps |
| | | 1.4 | Identify opportunities for skills development activities in liaison with relevant personnel |
| | | 1.5 | Access and apply learning tools and practices to the job |
| | | 1.6 | Take advantage of on-the-job and off-the-job learning opportunities |
| 2 | Adapt to and demonstrate appropriate work practice | 2.1 | Identify and interpret work requirements with advice from appropriate persons |
| | | 2.2 | Use appropriate dress and behaviour in the workplace |
| | | 2.3 | Identify and balance work and personal priorities |
| | | 2.4 | Apply time management strategies to work duties |
| | | 2.5 | Tailor interactions with others to take into account different backgrounds, cultures and languages |
| 3 | Work within organisational requirements | 3.1 | Identify organisational requirements and key activities of the workplace |
| | | 3.2 | Identify and apply relevant workplace policies and guidelines to work undertaken, including work health and safety (WHS) requirements |
| | | 3.3 | Interpret the range of organisational values and cultural norms |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 3.4 | Discuss and clarify any uncertainties with key personnel |
| 4 | Identify the sectors of the industry | 4.1 | Identify the main sectors of the manufacturing industry, their key activities and the way in which they interrelate |
| | | 4.2 | Clarify the roles and responsibilities of the manufacturing industry |
| | | 4.3 | Identify key industry representatives and their roles |
| | | 4.4 | Identify current issues or events impacting on the industry |
| 5 | Identify industry sector products and services | 5.1 | Identify the products provided by the industry sector |
| | | 5.2 | Identify the services provided by the industry sector |
| | | 5.3 | Identify appropriate standards of service across the industry sector |
| | | 5.4 | Clarify quality standards for products and services as identified by the industry |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| | |
|---|---|
| Skill gaps | Skills gaps relevant to work place requirements include one or more of the following:<br>• physical capacity skills |

© Commonwealth of Australia, 2025 Skills Insight

- workplace technology skills, such as business equipment, computer technology, machinery, hand tools, and security systems
- numeracy and literacy skills
- customer service skills
- communication skills, such as listening and understanding, speaking clearly/directly, reading and writing
- technical skills

**Skill development activities**

Skill development activities include one or more of the following:

- information technology (IT) courses
- human resources programs
- coaching and mentoring programs
- having the chance to learn a new task or to operate a new piece of equipment or workplace technology
- participating in external or internal training programs
- guided workplace experience

**Learning tools and practices**

Learning tools and practices include one or more of the following:

- note taking
- reviewing manuals and training guides
- discussion
- practice
- observation
- trial and error
- a combination of any of these

**On-the-job opportunities**

On-the-job opportunities include one or more of the following:

- filling in for a co-worker in a new area
- attending talks or seminars arranged by the workplace
- shadowing another co-worker in a different area
- receiving on-the-job training and supervised practice

**Off-the-job opportunities**

Off-the-job opportunities include one or more of the following:

- taking a course with a training provider
- attending conferences or seminars

© Commonwealth of Australia, 2025 Skills Insight

- attending site visits with a supervisor
- participating in workplace social events
- participating in community events

Appropriate **dress and behaviour**

Appropriate dress and behaviour includes:

- personal dress and presentation
- demeanour and attitude displayed to customers and fellow employees

**Time management strategies**

Time management strategies include one or more of the following:

- being punctual
- goal setting
- balancing work and personal priorities or agendas
- prioritisation of required tasks or activities
- planning daily or weekly work
- overcoming procrastination
- dealing with interruptions (contingency planning)
- organising own work environment

**Organisational requirements**

Organisational requirements include:

- organisational policies and guidelines
- common organisational practices
- performance plans
- WHS policies, procedures and programs

**Workplace policies and guidelines**

Workplace policies and guidelines include, but are not limited to:

- attendance
- punctuality
- standards for health and fitness
- obeying orders
- confidentiality
- dress codes
- alcohol and drug restrictions
- personal safety and duty of care related to WHS
- terms and conditions of employment

© Commonwealth of Australia, 2025 Skills Insight

**Organisational values**

Organisational values include one or more of the following:

- innovation
- community responsibility
- environment responsibility

**Cultural norms**

Cultural norms include:

- manners
- meanings specific to the language of the workplace
- history
- workplace etiquette

**Main sectors** of the industry

Main sectors of industry include:

- textiles, clothing and footwear
- furniture
- chemical manufacturing
- plastics and rubber products manufacturing
- maintenance and engineering
- manufacture of glass or concrete products

**Roles and** responsibilities of the industry

The roles and responsibilities of the industry include:

- providing quality products and services
- providing quality customer service
- providing proper training to those in the industry

**Key industry representatives**

Key industry representatives include:

- industry associations
- enterprises
- unions
- legislative bodies

**Current issues or events** include

Current issues or events include:

- economic
- environmental
- political

© Commonwealth of Australia, 2025 Skills Insight

- technological
- supply and demand

**Industry products**

Industry products are the outcomes of manufacturing processes and include one or more of the following:

- clothing and footwear
- concrete and glass products
- tyres and plastic car components
- electronic components
- metal products

**Industry services**

Industry services include one or more of:

- customer support
- product advice
- health and diet advice
- delivery services
- consulting services
- warrantees and/or guarantees

**Service standards**

Service standards include one or more of the following:

- developing and maintaining product and service knowledge
- identifying customer needs and expectations correctly
- meeting reasonable needs and request of customers within acceptable time frames
- taking opportunities to enhance the quality of products and services
- dealing with conflict situations
- responding to customer complaints
- maintaining a positive and cooperative manner
- establishing relationships with customers
- following appropriate hygiene and safety procedures
- referring difficult complaints to appropriate persons

**Quality standards**

Quality standards include one or more of the following:

- consistency standards
- quality specifications
- time requirements
- meeting customer requirements

# Assessment Requirements for MSMPCI101 Adapt to work in industry

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI101A Adapt to work in industry

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and demonstrate the ability to:

- consistently apply required knowledge and skills when adapting to different workplace requirements, contexts and environments
- follow workplace work health and safety (WHS) and environmental protection procedures and responsibilities
- consistently follow relevant workplace procedures, policies, instructions and regulations, including relevant manufacturer's guidelines relating to the operation and use of equipment
- complete work systematically with required time management and attention to detail without damage to goods, equipment or personnel
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures
- take prompt action to report and/or rectify any workplace problems in accordance with workplace procedures
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others
- identify and interpret information on sectors in the manufacturing industries
- articulate own goals and vision and identify skills gaps and ways they may be addressed
- identify and interpret information on the range of products and services produced by manufacturing industries
- identify and take advantage of learning opportunities in the workplace
- use literacy skills in regard to written and verbal communication in the workplace
- use basic interpersonal and communication skills, including listening and questioning and receiving feedback
- use workplace technology skills where appropriate or required.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- current events, activities, products and services of the manufacturing industry
- workplace policies, procedures and guidelines
- time management strategies and appropriate workplace etiquette

© Commonwealth of Australia, 2025 Skills Insight

- workplace equipment, tools and other technologies used in the manufacturing industry and where and how to obtain information and instructions on their safe use and basic care and servicing
- sources of information on the industry sector and skills development activities.

## Assessment Conditions

- Assessment must occur in a simulated environment or a workplace.
- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time and for a range of manufacturing contexts.
- Assessors must:
  - satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

# MSMPCI103 Demonstrate care and apply safe practices at work

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI103A Demonstrate care and apply safe practices at work

## Application

This unit of competency covers the knowledge and skills needed to understand, apply and satisfy safe work practices in an industry. It includes identifying and following work procedures for hazards and risks, monitoring and maintaining cleanliness and tidiness at work, and reporting hazards and risks in appropriate ways. It applies to work health and safety (WHS) requirements and internal workplace policies and procedures.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

The unit has application in qualifications for all occupations in the manufacturing industry and it should be regarded as an integrating unit. When delivered/assessed as part of a qualification, the unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Elements and Performance Criteria

| Elements describe the essential outcomes | | Performance criteria describe the performance needed to demonstrate achievement of the element | |
|---|---|---|---|
| 1 | Follow workplace OHS procedures | 1.1 | Identify, interpret and apply relevant WHS, workplace hazard control procedures and safe work practices |
| | | 1.2 | Identify and adhere to workplace procedures for reporting hazards promptly and efficiently |
| | | 1.3 | Undertake all work activities in a safe manner according to WHS guidelines, enterprise policies and procedures |
| | | 1.4 | Assess the work area regularly and follow procedures to report, remove or minimise potential hazards |
| | | 1.5 | Use personal protective equipment (PPE) correctly in accordance with established safety and workplace procedures |
| 2 | Maintain personal wellbeing in the workplace | 2.1 | Identify risks to personal wellbeing which may affect safe performance in the workplace and use strategies to prevent and manage them |
| | | 2.2 | Identify, interpret and follow procedures for maintaining a tidy and clean personal work area |
| 3 | Identify and report on safety of self and others | 3.1 | Identify and correct or report situations which may endanger self or other workers |
| | | 3.2 | Report incidents and injuries to self or others on the job to appropriate persons and deal with them in a timely manner |
| | | 3.3 | Contribute to participative arrangements to foster safe working practices, as appropriate |
| 4 | Take action in | 4.1 | Recognise emergency situations and take action within |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| emergency situations | | scope of individual responsibility |
| | 4.2 | Follow emergency procedures in accordance with organisational procedures |
| | 4.3 | Seek assistance from colleagues and/or other authorities, where appropriate |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Hazard control procedures**

Hazard control procedures include one or more of the following:

- emergency, fire and accident procedures
- hazard identification and removal or, if this is not possible, establish a hazard control
- use of PPE
- relevant manufacturer guidelines relating to the operation and use of equipment
- WHS regulations
- safe use of mechanical, pneumatic, hydraulic and/or electrical equipment
- safe use of chemicals and toxic substances

**Workplace hazards**

Workplace hazards include, but are not limited to, one or more of the following:

- untidy work conditions, including poor and unnecessary obstacles and equipment in work areas
- sharp instruments or equipment
- excessive noise
- hot substances and equipment

© Commonwealth of Australia, 2025 Skills Insight

- electricity and water
- electrical equipment
- being careless when using cutting equipment or dealing with heat or hot surfaces
- damaged equipment
- moving machinery
- materials handling
- gases and liquids under pressure
- working at heights
- confined spaces
- inappropriate lifting practices
- dangerous floor surfaces
- movements of equipment, goods and vehicles
- chemicals and other harmful substances, including fumes and dust
- toxic substances
- damaged packing material and containers
- inflammable materials and fire hazards
- unavailable waste management and disposal procedures
- extremes in weather conditions
- unsuitable lighting levels
- water hazards
- dangerous storage areas

**Safe work practices**

Safe work practices include, but are not limited to, one or more of the following:

- manual handling procedures
- correct posture
- safe lifting and bending
- using appropriate PPE

**Risks to personal wellbeing**

Risk to personal wellbeing include, but are not limited to, one or more of the following:

- smoking, alcohol and drug use
- lack of sleep
- poor diet
- lack of exercise
- stress
- not using appropriate methods when lifting or moving heavy objects

© Commonwealth of Australia, 2025 Skills Insight

- not wearing proper PPE

**PPE**

PPE includes, but is not limited to, one or more of the following:

- gloves
- masks
- uniform
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

**Appropriate persons**

Appropriate persons include one or more of the following:

- workplace personnel
- supervisors
- team leaders
- management
- WHS personnel
- other persons authorised or nominated by the organisation

**Emergency situations**

Emergency situations include, but are not limited to, one or more of the following:

- accidents
- overheating equipment
- injuries, such as cuts, scalds and burns
- health conditions, such as fainting, asthma attacks and allergic reactions
- spills and leakages of harmful gas and liquids
- structural failures and breakages
- robbery
- fire
- flooding
- power failures or shorts

**Participative arrangements**

Participative arrangements include one or more of the following:

- workplace meetings
- suggestion schemes
- regular communications with team leaders
- information sessions

# Assessment Requirements for MSMPCI103 Demonstrate care and apply safe practices at work

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI103A Demonstrate care and apply safe practices at work

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- follow relevant workplace procedures, policies, instructions and regulations, including work health and safety (WHS) regulations and hazard prevention policies and procedures, environment protection, and manufacturer guidelines relating to the operation and use of equipment
- follow workplace procedures for hazard identification and risk control
- use relevant personal protective equipment (PPE)
- complete work systematically with required attention to detail without damage to goods, equipment or personnel
- use appropriate written and verbal communication in the workplace
- use basic interpersonal and communication skills, including listening and questioning, and receiving feedback
- promptly report workplace hazards and WHS incidents and take appropriate action
- solve or report problems identified when dealing with safety hazards and applying appropriate hazard control procedures
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- procedures related to WHS to be followed in the work area concerned
- workplace hazards and ways to minimise or remove them
- workplace equipment, materials, housekeeping equipment and the processes and precautions for their use
- PPE relevant to the job and job context
- appropriate hygiene and safety standards.

## Assessment Conditions

- Assessment must occur in a simulated environment or a workplace.

© Commonwealth of Australia, 2025 Skills Insight

- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time.
- Assessors must:
  - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
- Be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

# MSMPER200 Work in accordance with an issued permit

## Modification History

Release 1. Supersedes and is equivalent to MSAPMPER200C Work in accordance with an issued permit

## Application

This unit of competency covers the skills and knowledge required to work in accordance with an issued permit. It aims to ensure that people working under a permit to work understand the system, know the limitations of the permit under which they are working and comply with all the requirements of the permit. The people to whom this unit applies may be called 'permit recipients' or 'permit holders' by some organisations. Some organisations call 'permits' 'clearances'.

This unit of competency applies to persons who are required to conduct work activities under the authority of an issued permit to work and within the context and requirements of that permit. This typically applies to all work done by maintenance staff and contractors and also to any other non-process work performed on the plant.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other team members, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Elements and Performance Criteria

| Elements describe the essential outcomes | Performance criteria describe the performance needed to demonstrate achievement of the element |
|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 1 | **Apply for permit** | 1.1 | Confirm the scope and location of the work to be done |
| | | 1.2 | Identify the need for a work permit for the work to be carried out |
| | | 1.3 | Identify the type of work permit required |
| | | 1.4 | Collate information required for the issue of the permit |
| | | 1.5 | Apply for the permit following the organisation's requirements |
| 2 | **Identify the scope of the permit** | 2.1 | Check that work to be done complies with the permit type |
| | | 2.2 | Check that the scope and location of work comply with the permit issued |
| | | 2.3 | Identify hazards and check that the hazard controls specified on the permit are consistent with the hazard analysis |
| | | 2.4 | Check that preparations specified on the permit have been completed |
| | | 2.5 | Sign onto/receive the permit |
| 3 | **Prepare for permitted work** | 3.1 | Maintain safe working conditions and environment by using available isolation procedures and safety equipment |
| | | 3.2 | Monitor plant conditions and hazards to ensure work under the permit remains safe |
| | | 3.3 | Ensure that appropriate personal protective equipment (PPE) is selected and worn, and emergency equipment is available, as required by the permit and relevant procedures |
| | | 3.4 | Inspect work area to ensure safety and compliance with permit requirements and procedures |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 4 | **Work in accordance with an issued permit** | 4.1 | Use required hazard reduction/control measures |
| | | 4.2 | Comply with requirements of the permit, including safety observer if required |
| | | 4.3 | Display issued permit on work site as required |
| | | 4.4 | Ensure compliance with scope, location and timeframe specified in the permit. |
| | | 4.5 | Seek variation to permit/new permit if job or work environment vary from that specified in the permit |
| | | 4.6 | Suspend job and make worksite safe before leaving job |
| | | 4.7 | Formally seek and receive authorised extensions to the permit when required |
| | | 4.8 | Give end-of-day status report to permit issuer |
| 5 | **Complete permit to work** | 5.1 | Obtain new permit or have existing permit revalidated before work is recommenced |
| | | 5.2 | Check the work conducted against the issued permit to ensure that all the nominated work requirements have been satisfied |
| | | 5.3 | Monitor general housekeeping to ensure that the site has been left in a clean and safe condition |
| | | 5.4 | Ensure personal lock outs/tag outs/isolations are removed in accordance with procedures |
| | | 5.5 | Communicate status of the work conducted and the results of the permit to relevant personnel |
| | | 5.6 | Complete documentation as required and have permit signed off when job is completed |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided

**Work permits**

Work permits include one or more of the following:

- cold work/general permit to work
- excavation
- hot work
- vehicle entry
- minor repairs
- working at heights
- confined space entry
- other special permits where there is an appropriate sign-off as required

**Information required for**

Information required for the issue of the permit includes one or more of

© Commonwealth of Australia, 2025 Skills Insight

**permit**

the following:

- work description
- tools to be used
- process/methods of work/SOPs

Where hazardous materials are being used relevant material safety data sheets (MSDS) will also be required.

**Hazards**

Hazards include one or more of the following:

- slips and trips
- emergency equipment is unavailable
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- work where a fall by a person from one level to another is reasonably likely to cause injury
- working in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions, swarf and scrap
- spills or leaks
- extreme weather
- other hazards that might arise
- unsafe conditions developing through failure to conform with the provisions of a work permit
- hazards created by the nature or location of the work
- hazards created by the proximity of the work to other work or normal operations

**Display issued**

The permit holder must keep the issued permit with them on site. It must

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **permit** | be displayed or ready to be shown as required by the site/job requirements, including one or more of the following:<br>• displayed in a mounting provided by the site<br>• accessible in a folder which is on the worksite<br>• carried in overall pockets in a manner which allows it to be readily shown on request |

# Assessment Requirements for MSMPER200 Work in accordance with an issued permit

## Modification History

Release 1. Supersedes and is equivalent to MSAPMPER200C Work in accordance with an issued permit

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- identify type and scope of permit relevant to the job
- interpret and implement permit conditions
- identify changes to conditions which may lead to the permit being revoked before the job is completed
- monitor hazards and hazard controls.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- different types of permits and the work they cover, including three (3) or more of:
  - cold work/general permit to work
  - excavation
  - hot work
  - vehicle entry
  - minor repairs
  - working at heights
  - confined space entry
  - other permit types as used on site
- the impact of the regulatory framework and organisation procedures under which the permit operates upon the particular job requiring the permit
- hazards associated with tasks covered by the permit and related hazard controls
- types of tests/inspections required for the issue of work permits including one (1) or more of:
  - atmospheric, oxygen/breathability
  - temperature
  - humidity
  - combustibles, oxygen, enriched or reduced
  - electricity
  - stored pressure/energy

© Commonwealth of Australia, 2025 Skills Insight

- flammability/explosivity
- toxicity
- electricity
- stored energy/pressure.

## Assessment Conditions

- Competency must be achieved before performing this work unsupervised. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMSUP102 Communicate in the workplace

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

## Application

This unit describes the skills and knowledge required to receive, relay and record written and oral messages and to provide relevant information in response to requests within timelines.

This unit applies to personnel who are required to communicate clearly and accurately to record messages, seek clarification, access needed information, relay information to other people and complete workplace documentation.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

# Assessment Requirements for MSMSUP102 Communicate in the workplace

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- received, recorded and relayed messages, including:
  - listening attentively and asking questions to confirm understanding
- responded to at least one request for information in accordance with procedures, including:
  - using clear and concise language in both verbal and written communication
- completed workplace forms legibly and accurately

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information
- communication equipment
- organisation procedures, including:
  - telephone and communications protocols and/or procedures
  - documentation and record keeping
- types and meaning of workplace codes, numbers, symbols, signs and colours typically used in the work environment
- types, purpose and importance of workplace documentation
- workplace expectations for acceptable language and tone, including swearing, level of formality, courteousness and respect for diversity
- challenges in communicating with people from culturally and linguistically diverse (CALD) backgrounds in the workplace and possible strategies
- communication problems and corrective actions relevant to own role
-

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace documentation and/or information
  - workplace forms.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMSUP106 Work in a team

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team.

## Application

This unit describes the skills and knowledge required to organise own activities within a team to fit with work schedules and to meet operational guidelines.

This unit applies to team members who are required to use interpersonal and communication skills to plan, organise and complete their work activities according to instructions and with limited discretionary powers.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

## Modification History

Release 2. Equivalent. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP240A Undertake minor maintenance.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken at least 1 minor maintenance activity, including:
  - using available data and records to recognise fault and no-fault conditions in standard and non-standard situations
  - applying operational guidelines and known solutions to correct variations and/or irregularities
  - applying approved hazard control, work permit and safety procedures.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults
- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- factors that may affect product quality or production output and appropriate remedies.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

# MSMSUP273 Handle goods

## Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP273A Handle goods

## Application

This unit of competency covers the skills and knowledge required to receive and despatch products and/or materials from either internal or external sources as an adjunct to the job of making product.

It applies to operators who are required to receive and process orders, maintain records, identify and select goods to be despatched and ensure they are despatched to the correct location.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency focuses on processing goods to be despatched and/or received. The person undertaking this role may require additional competencies to cover the operation of forklift trucks or other regulated load shifting devices.

This competency is NOT intended for people who, as a major function, operate a store or warehouse. For these people warehousing units of competency should be used.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| | | 4.3 | Complete other paperwork and records as required |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

© Commonwealth of Australia, 2025 Skills Insight

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Documentation and records**

Documentation and records include:

- any information and data in relation to despatch, receipt, movement and storage of goods whether it is manual, paper-based, electronic or verbal, either in person or by phone/radio, and includes one or more of the following:
  - order requests
  - invoices
  - picking slips
  - labels
  - transportation requirements
  - bills of materials
  - inventory lists
  - databases

**Tools and equipment**

Tools and equipment include one or more of the following:

- mobile plant/fork lifts
- manual handling equipment
- hand tools
- shrink wrappers
- tape machine labellers
- loose bulk packing equipment
- computers and bar code readers
- bag filling equipment
- pallets
- wrapping machines
- personal protective equipment (PPE)
- distribution equipment, such as A-frames, stillages, containers, elevated platforms and communication equipment

**Hazards**

Hazards include one or more of the following:

© Commonwealth of Australia, 2025 Skills Insight

- inappropriate movements and postures
- manual handling hazards
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

**Routine problems** Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- special storage requirements, including moisture and contamination control
- compatibility of goods in loads and in storage
- handling of incomplete loads (either in or out)
- handling of materials which do not meet specifications
- conflicting priorities
- incomplete or incorrect paperwork
- product requirements
- job priority
- product/material variations

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

# Assessment Requirements for MSMSUP273 Handle goods

## Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP273A Handle goods

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify and select goods to be moved in accordance with documentation
- apply known solutions to routine problems
- prepare and organise goods to be moved to fit with schedules
- select and use handling equipment
- read and interpret product specifications, job sheets, procedures, material labels and safety information
- complete documentation and records
- apply appropriate safety precautions and procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
  - safety, emergency and hazard control
  - inventory and ordering systems
- types and application of handling equipment and any licensing requirements
- manual handling techniques and ergonomics
- safe storage of dangerous goods and hazardous materials
- transport requirements and restrictions for products/materials
- production workflow requirements.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use industry-based simulation for part but not all of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMSUP390 Use structured problem-solving tools

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

## Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Assessment Requirements for MSMSUP390 Use structured problem-solving tools

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
  - specific, measurable, achievable, relevant, timed (SMART) objectives
  - resource requirements
  - methods for reaching objectives
  - timelines
  - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMWHS100 Follow WHS procedures

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS100A Follow OHS procedures

## Application

This unit of competency covers the skills and knowledge required to recognise hazards commonly occurring at the workplace and follow work health and safety (WHS) instructions and procedures.

It covers recognising known hazards, such as those identified in procedures or training, and identifying the underlying causes of these identified hazards.

This unit of competency applies to people on-site who are required to follow WHS instructions and procedures relating to the activity being undertaken. They will be aware of the importance of maintaining their own health and safety and the health and safety of others in the workplace and will also be capable of dealing with incidents and emergencies within their own scope of responsibility and under the direction of their supervisor for the site activity.

While the instructions and procedures must be derived from the relevant organisation WHS policies, the person is not required to understand or interpret these policies. This interpretation should be undertaken by their supervisor for the site activity when informing them of the WHS requirements.

This unit of competency applies to an individual who will be accompanied or directly supervised while on-site.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Unit Sector

# Elements and Performance Criteria

| Elements describe the essential outcomes | | Performance criteria describe the performance needed to demonstrate achievement of the element | |
|---|---|---|---|
| 1 | Recognise hazards | 1.1 | Identify hazards commonly found in the workplace |
| | | 1.2 | Check work area routinely before and during work |
| | | 1.3 | Describe causes of identified hazards |
| 2 | Follow procedures for hazard control | 2.1 | Follow procedures to remove or minimise hazards, within the scope of responsibilities and competencies |
| | | 2.2 | Use required personal protective and other safety equipment (PPE) |
| | | 2.3 | Describe the potential consequences of failing to follow these procedures and instructions |
| 3 | Follow emergency procedures | 3.1 | Recognise emergency/emergency alarm |
| | | 3.2 | Go to muster point following procedure |
| | | 3.3 | Follow instructions related to the emergency |
| 4 | Report problems | 4.1 | Report to appropriate people in accordance with workplace procedures when hazards or other problems arise |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Hazards**

Hazards include one or more of the following:

- slip/trip hazards
- PPE not available or not functional
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- equipment in unsafe condition with hazard controls not functional
- noise, rotational equipment or vibration
- fire and explosion

© Commonwealth of Australia, 2025 Skills Insight

- flammability and explosivity
- hazardous products and materials
- sharp edges, protrusions or obstructions, swarf and scrap
- extreme weather
- other hazards that might arise

**Problems**

Problems must be reported and corrective action taken according to relevant procedures.

Problems include one or more of the following:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- observation of an injury and/or incident which occurred in the workplace
- clarification of understanding of WHS policies and procedures

**Appropriate personnel**

Appropriate personnel include one or more of the following:

- employer
- supervisor
- employees elected as WHS representatives
- other personnel with WHS responsibilities

**Reporting methods**

Reporting methods include one or more of the following:

- verbal
- written

# Assessment Requirements for MSMWHS100 Follow WHS procedures

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS100A Follow OHS procedures

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- recognise hazards
- use required personal protective equipment (PPE)
- take the action specified in the procedures
- report the situation as specified in the procedures

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- the rights and responsibilities of personnel under the WHS legislation
- hazard and emergency signs, labels and alarms
- hazards that may arise in the job/work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- types and application of PPE
- procedures for reporting WSE problems and taking action
- emergency procedures.

## Assessment Conditions

- Competency must be achieved before performing this activity. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems

© Commonwealth of Australia, 2025 Skills Insight

  - may use industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# Assessment Requirements for MSMWHS200 Work safely

## Modification History

Release 3. Equivalent. Mapping information updated.

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified hazards relevant to work area and followed procedures to:
  - assess risks associated with the hazards
  - identify and apply standard controls
  - check that controls are in place and operational.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational work health and safety (WHS) procedures, including procedures for reporting WHS problems and corrective actions
- duties, rights and obligations of employees and employers under the relevant WHS legislation as they relate to the job role
- hazards that may arise in the work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- hierarchy of control
- types and application of personal protective equipment (PPE)
- hazard and emergency signs, labels and alarms
- appropriate responses to non-standard situations.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 Skills Insight

- use of suitable facilities, equipment and resources, including:
  - WHS procedures, incident reporting documentation and safety data sheets (SDS).
  - personal protective equipment (PPE)

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMWHS300 Facilitate the implementation of WHS for a work group

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

## Application

This unit of competency covers the skills and knowledge required to implement and monitor defined work health and safety (WHS) policies and procedures for a work group or area.

This unit of competency applies to people in a team leader or similar role and to people who are on a WHS committee.

It covers the ability to provide clear directions, information, instruction, training and appropriate supervision regarding the relevant state/territory WHS legislation, codes of practice, industry standards, workplace procedures and work instructions. It also covers the ability to coach team members to participate and contribute to WHS management issues.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

MSMWHS200 Work safely

## Competency Field

HSE

© Commonwealth of Australia, 2025 Skills Insight

# Unit Sector

# Elements and Performance Criteria

| Elements describe the essential outcomes | | Performance criteria describe the performance needed to demonstrate achievement of the element | |
|---|---|---|---|
| 1 | Communicate WHS information for co-workers in team | 1.1 | Accurately and clearly explain to the work group basic WHS rights, responsibilities and requirements |
| | | 1.2 | Provide, in a readily accessible manner, information on the relevant organisation WHS policies, procedures and programs, and accurately and clearly explain them to the work group |
| | | 1.3 | Regularly provide relevant information about identified hazards and the outcomes of risk assessment and risk control procedures, and accurately and clearly explain them to the work group |
| 2 | Coach co-workers in team | 2.1 | Establish mutual support groups, e.g. buddy system, to encourage effective development of individual and group competencies in WHS |
| | | 2.2 | Provide personal encouragement and assistance to team members to contribute to the management of WHS at the workplace |
| 3 | Facilitate the consultative process | 3.1 | Deal with, and promptly resolve, issues raised through consultation or refer to the appropriate personnel for resolution in accordance with workplace procedures |
| | | 3.2 | Seek input from work group on WHS issues and proposed changes to process, procedures or work place |
| | | 3.3 | Encourage and use feedback from individuals and teams to identify and initiate improvements in the management of WHS |
| | | 3.4 | Promptly inform the work group of the outcomes of consultation over WHS issues |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 4 | Implement and monitor organisation procedures for identifying hazards, and assessing and controlling risk | 4.1 | Implement and monitor WHS policies and procedures as defined by organisation |
| | | 4.2 | Monitor existing risk control measures and report results regularly |
| | | 4.3 | Access internal and external sources of relevant WHS information |
| | | 4.4 | Evaluate and identify inadequacies in existing risk control measures in accordance with the hierarchy of control, and report to designated personnel |
| | | 4.5 | Identify inadequacies in resource allocation for implementation of risk control measures and report to designated personnel |
| | | 4.6 | Identify actual/potential inadequacies in procedures and report to designated personnel |
| | | 4.7 | Identify actual/potential inadequacies in individual or team competency and report to designated personnel |
| 5 | Maintain and use WHS records | 5.1 | Accurately and legibly complete WHS records for work area, in accordance with workplace requirements for WHS records and legal requirements for the maintenance of records of workplace injury and disease |
| | | 5.2 | Use aggregated information from the area WHS records to identify hazards and monitor risk control procedures within work area according to procedures and within scope of responsibilities and competencies |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Hazards**

Hazards include one or more of the following:

- smoke, darkness and heat
- electricity
- gas and
- gases and liquids under pressure
- structural hazards

© Commonwealth of Australia, 2025 Skills Insight

- structural collapse
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- limited head spaces or overhangs
- unauthorised personnel
- other hazards that might arise

**Appropriate personnel**

Appropriate personnel include one or more of the following:

- employer
- supervisor
- employees elected as WHS representatives
- other personnel with WHS responsibilities

**WHS records**

WHS records include one or more of the following:

- hazard and incident reports
- logs/logs sheets
- inspection/start up/shut down checklists
- injury reports
- maintenance records

**WHS information sources**

WHS information sources include one or more of the following:

- WHS legislation, codes of practice and Australian and International standards
- WHS regulators
- WorkSafe Australia Guides
- industry bodies
- internet sites, journals and newsletters
- manufacturer manuals
- material safety data sheets (MSDS) and registers
- organisation WHS policies and procedures
- internal risk assessments, job safety analyses (JSAs) and workplace inspections

© Commonwealth of Australia, 2025 Skills Insight

- internal hazard and incident reports

# Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

# Links

# Assessment Requirements for MSMWHS300 Facilitate the implementation of WHS for a work group

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include the ability to:

- communicate using appropriate style and format for a range of stakeholders to:
  - promote and facilitate consultation and participation in the WHS processes
  - provide WHS information to work group
  - explain WHS procedures to work team members
  - report to designated personnel
  - seek input and feedback on WHS issues
  - undertake WHS issue resolution
- implement and monitor defined WHS activities for a work group or area
- encourage and assist the development of work group members
- evaluate and report on WHS procedures and practices
- participate in decisions which impact on WHS for the workgroup
- recognise a situation requiring action, including hazards, and take specified action to rectify or seek assistance as appropriate.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including:

- assessment of risk and implementation of risk control measures
- rights and responsibilities of employees under WHS legislation
- obligations of employers under the WHS legislation, including duty of care
- regulatory requirements for WHS information and consultation and processes and arrangements to meet these obligations
- regulatory requirements for WHS record keeping and reporting
- regulatory requirements for training and licensing relevant to WHS
- the hierarchy of control
- counselling, disciplinary and issue resolution processes.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

- Where the candidate does not currently possess evidence of competency in MSMWHS200 Work safely, it may be co-assessed with this unit.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include a demonstration of communication of WHS information to a group and the use of appropriate consultation and participation from within that group
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSS015022 Develop strategies for more sustainable use of resources

## Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to identify strategies for more sustainable uses of resources. The unit includes the identification of waste (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability.

Where the carbon footprint (or water footprint or similar) of an organisation or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint. A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Sustainable operations

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Quantify** | 1.1 | Identify all significant resources used by process |

© Commonwealth of Australia, 2025 Skills Insight

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| | **resource consumption** | 1.2 | Identify consumption measurements available for each resource |
| | | 1.3 | Quantify consumption for each resource |
| 2 | **Quantify resource loss** | 2.1 | Determine theoretical consumption of each resource |
| | | 2.2 | Compare theoretical consumption with actual consumption |
| | | 2.3 | Quantify loss (emission) for each resource |
| 3 | **Recommend strategies for reducing muda (waste)** | 3.1 | Short-list high emission process steps |
| | | 3.2 | Analyse process to identify emission steps or locations |
| | | 3.3 | Determine root cause of emission |
| | | 3.4 | Investigate methods for reducing emission |
| | | 3.5 | Develop strategies and recommendations for improvement |
| 4 | **Prepare resources use audit report** | 4.1 | Identify purpose of report and key stakeholders |
| | | 4.2 | Compile data, implications and recommendations |
| | | 4.3 | Consult with stakeholders |
| | | 4.4 | Write and present report |

# Assessment Requirements for MSS015022 Develop strategies for more sustainable use of resources

## Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- quantified significant resource consumption and emission using materials balancing for at least 1 organisation or value chain, including developing strategies for reducing emissions and preparing and presenting a resources use audit report.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the concept of muda (waste) and muda categories
- muda reduction methods and strategies
- methods and uses of material balancing
- methods and uses of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping processes and resources consumed
- methods of measuring actual resource usage
- AS/NZS ISO 14001 Environmental Management Systems or its authorised replacement.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | **Define parameters of new or improved product** | 1.1 Consult with stakeholders to determine required function, performance and aesthetics of new product |
| | | 1.2 Identify market, expected time to market and cost constraints of product and production process |
| | | 1.3 Identify requirements with possible high sustainability impacts |

© Commonwealth of Australia, 2025 Skills Insight

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| | | 1.4 | Negotiate requirements to achieve desired sustainability impacts |
| | | 1.5 | Develop agreed definition of product requirements |
| 2 | **Develop alternative product and process designs** | 2.1 | Identify alternative resource requirements |
| | | 2.2 | Identify alternative processes |
| | | 2.3 | Determine the possible sustainability impacts of different combinations of resources and processes |
| | | 2.4 | Test alternative product and process designs against original product requirement definitions |
| | | 2.5 | Identify product requirements which may be causing significant sustainability impacts |
| | | 2.6 | Renegotiate product requirements to lessen sustainability impacts |
| | | 2.7 | Short-list preferred resources and processes |
| 3 | **Evaluate life cycle impacts** | 3.1 | Estimate life cycle sustainability impacts for each short-listed alternative |
| | | 3.2 | Identify process steps with greatest sustainability impact |
| | | 3.3 | Evaluate process steps for alternatives and modifications with lower impact |
| | | 3.4 | Select alternative which best meets requirements and has the lowest sustainability impact |
| 4 | **Confirm design** | 4.1 | Develop selected design |
| | | 4.2 | Confirm life cycle sustainability impacts |
| | | 4.3 | Review design against product requirements |
| | | 4.4 | Obtain required authorisations |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
| | 4.5 | Document design in the required form |
| 5 **Prepare for implementation** | 5.1 | Consult with key stakeholders |
| | 5.2 | Identify key measures for monitoring implementation of design |
| | 5.3 | Identify data sources required by key measures |
| | 5.4 | Organise for data to be captured and manipulated |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSS015023 Design sustainable product or process

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- redesigned an existing, or designed a new, product or process for optimal sustainability outcomes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sustainability impacts from using different materials and different processes and to produce products of different specifications and life cycle outcomes
- alternative sources of materials and components and the sustainability differences of each
- alternative processes and the sustainability differences of each, including expression in terms of carbon equivalence
- product and process design
- new product parameters
- design documentation
- methods of monitoring of product development and manufacture.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS402001 Apply competitive systems and practices

## Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

## Application

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

| essential outcomes. | | demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Identify own place in the value chain** | 1.1 | Identify customers relevant to own work and their needs/requirements. |
| | | 1.2 | Identify suppliers for own work. |
| | | 1.3 | Identify value contributions along the chain. |
| | | 1.4 | Identify and recommend methods of increasing own contribution to the value chain. |
| 2 | **Improve the product and process value** | 2.1 | Identify customer features/benefits in the product and process. |
| | | 2.2 | Identify aspects of product and process which contribute to customer features/benefits. |
| | | 2.3 | Identify aspects of product and process which do not contribute to customer benefits/features. |
| | | 2.4 | Recommend methods of reducing waste and increasing features/benefits. |
| 3 | **Use competitive systems and practices** | 3.1 | Identify competitive systems and practices used in organisation and own work area. |
| | | 3.2 | Apply practices appropriate for the job or process. |
| | | 3.3 | Monitor the job/process and make adjustments to improve it in accordance with procedures. |
| | | 3.4 | Identify own skill requirements and seek skill development, if required. |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Customers include one or more of:**

- internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable
- final customers used as the basis for the identification of value and waste.

**Suppliers include one or more of:**

- internal suppliers
- external suppliers sufficiently close to the individual's work as to be easily identifiable.

**Procedures (written, verbal, visual, computer based, etc.) include one or more of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions

© Commonwealth of Australia, 2025 Skills Insight

- any similar instructions provided for the smooth running of the plant.

# Assessment Requirements for MSS402001 Apply competitive systems and practices

## Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to always apply competitive systems and practices to their own job to:

- identify own place in the value chain relevant to their job
- use competitive systems and practices tools and thinking
- recommend improvements in product and/or process.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- customer requirements and their role in fulfilling them
- the value chain for products they make and their place in it
- identification of muda (waste) and its reduction.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of competitive systems and practice in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402002 Sustain process improvements

## Modification History

Release 1. Supersedes and is equivalent to MSS402002A Sustain process improvements

## Application

This unit of competency covers the skills and knowledge required by an individual to prevent process improvements in their own work from slipping back to former practices or digressing to less efficient practices.

This unit applies to organisations implementing competitive systems and practices and continuous improvement. It covers the skills needed to ensure that process improvements are sustained and opportunities taken to suggest further improvements.

Improvement initiatives can be made by any of a number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known to employees.

The unit can be applied to all areas of an organisation, including production, maintenance, logistics and office functions.

This unit requires the application of skills associated with problem solving, initiative and enterprise and self-management in order to understand implement and monitor improvement practices. It also requires the ability to identify and address personal skill gaps in order to manage own ability to implement change.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Assessment Requirements for MSS402002 Sustain process improvements

## Modification History

Release 1. Supersedes and is equivalent to MSS402002A Sustain process improvements

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to examine three (3) or more previous improvements, including one (1) or more where improvement objectives have not been met, and to:

- identify corrective actions that can be taken by self
- implement those corrective actions
- check whether the claimed improvements have occurred
- check for further improvements.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- muda (waste)
- indicators of processes not delivering claimed improvements
- baka-yoke and poka-yoke techniques.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include actions to sustain process improvements in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402010 Manage the impact of change on own work

## Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

## Application

This unit of competency covers the skills and knowledge required by an individual to effectively manage the changes in their own work resulting from their organisation's implementation of competitive systems and practices.

This unit applies to an individual in an organisation implementing competitive systems and practices that affect the individual's own work. The unit includes the skills required to positively participate in ongoing and continuous change as it affects their work. The individual will be expected to deal with these changes as part of a team and to give feedback from their own perspective.

This unit requires the application of skills associated with problem solving, planning and organising and self-management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Examine the impact of change on own work practices** | 1.1 | Identify competitive systems and practices relevant to changes in own work. |
| | | 1.2 | Examine changes to work flow. |
| | | 1.3 | Examine changes to equipment/process/physical environment. |
| | | 1.4 | Examine changes to work relationship with team members and other teams. |
| | | 1.5 | Examine changes to data collection needs. |
| | | 1.6 | Examine changed work for impacts on health, safety and environment (HSE). |
| | | 1.7 | Examine changes to quality requirements. |
| | | 1.8 | Identify any additional individual skill needs. |
| | | 1.9 | Identify other areas requiring assistance. |
| 2 | **Implement change** | 2.1 | Review changes which may have an adverse impact with team leader. |
| | | 2.2 | Adopt changes to individual work practice. |
| | | 2.3 | Seek assistance in gathering/processing data, as required. |
| | | 2.4 | Implement the data collection/processing and take actions on resulting information in accordance with procedures. |
| | | 2.5 | Seek assistance/training to meet needs caused by change. |
| 3 | **Implement continuous improvement** | 3.1 | Critically examine all changes. |
| | | 3.2 | Identify impacts of changes both up and down the immediate value stream. |

© Commonwealth of Australia, 2025 Skills Insight

3.3 Identify areas for improvement.

3.4 Make recommendations for improvement in accordance with procedures.

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

# Assessment Requirements for MSS402010 Manage the impact of change on own work

## Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices used in their own workplace
- identify change and its impact on own work practices in relation to implementation of competitive systems and practices
- adopt change and seek any required assistance
- identify areas for improvement.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision:

- features of common competitive systems and practices in use in own workplace
- sources of data on the process/plant
- methods of determining own skill needs
- health, safety and environment (HSE) principles relevant to own job
- change implementation contacts and procedures
- employee assistance mechanisms within organisation.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include evidence of responding to change in own workplace

© Commonwealth of Australia, 2025 Skills Insight

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including, relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402020 Apply quick changeover procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

## Application

This unit of competency covers the skills and knowledge required to apply quick changeover procedures in an organisation implementing competitive systems and practices.

This unit applies to individuals in an organisation which is implementing competitive systems and practices and is pursuing quick changeover as one of its competitive operations tools. The unit can apply to quick changeovers of equipment, processes, batches or product type. It requires the application of skills associated with applying quick changeover procedures, including the planning and organising of own work, identifying problems and making suggestions for improvement of procedures.

Particular technical skills may also be required in some operations sectors and for some jobs. These skills should be gained from the Training Package relevant to the individual's industry and occupation.

This unit may not be applicable to a totally continuous operation producing only the one product, or simultaneous range of products. The unit is also not applicable to a maintenance/PVI shutdown as experienced by continuous process manufacturers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Prepare for changeover** | 1.1 | Determine when changeover will be required. |
| | | 1.2 | Review plans and instructions for quick changeover. |
| | | 1.3 | Identify role of others in quick changeover. |
| | | 1.4 | Obtain all required tools/parts/materials for changeover. |
| | | 1.5 | Organise process and tools/parts/materials ready for changeover. |
| 2 | **Make quick changeover** | 2.1 | Plan changeover according to quick changeover principles. |
| | | 2.2 | Liaise and work with relevant people in quick changeover. |
| | | 2.3 | Complete changeover according to procedures. |
| | | 2.4 | Check output meets specification. |
| | | 2.5 | Debrief with all relevant stakeholders. |
| | | 2.6 | Note any steps which cause a problem. |
| | | 2.7 | Recommend changes to problematic steps. |
| 3 | **Improve work health and safety (WHS)** | 3.1 | Identify hazards to self or others in all steps/actions. |
| | | 3.2 | Determine risks from each hazard. |
| | | 3.3 | Identify actions which may be performed in a more ergonomic manner. |
| | | 3.4 | Recommend changes to improve WHS. |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| | |
|---|---|
| **Competitive systems and practices include one or more of:** | • lean operations<br>• agile operations<br>• preventative and predictive maintenance approaches<br>• monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems<br>• statistical process control systems, including six sigma and three sigma<br>• Just in Time (JIT), kanban and other pull-related operations control systems<br>• supply, value, and demand chain monitoring and analysis<br>• 5S<br>• continuous improvement (kaizen)<br>• breakthrough improvement (kaizen blitz)<br>• cause/effect diagrams<br>• overall equipment effectiveness (OEE)<br>• takt time<br>• process mapping<br>• problem solving<br>• run charts<br>• standard procedures<br>• current reality tree. |
| **Changeover may include one or more of:** | • an exchange of equipment (often dies or tools (traditional))<br>• a change between products/batches or between campaigns or processes. It may be any quantum change to produce a different product or undertake a different process. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **Set-up can be divided into two types:** | • internal set-up (requires work to stop, work that can be done only when the machine or process is not actively engaged in production, computers etc. need to be reset and restarted)<br>• external set-up (work can continue during the changeover, work can be done concurrently with the machine or process performing production duties). |
| **Set-up time includes:** | • the work time required to change over a machine or process from one item or operation to the next item or operation. |
| **Procedures (written, verbal, visual, computer based, etc.) include one or more of:** | • work instructions<br>• standard operating procedures (SOPs)<br>• safe work method statements<br>• formulas/recipes<br>• batch sheets<br>• temporary instructions<br>• any similar instructions provided for the smooth running of the plant. |

# Assessment Requirements for MSS402020 Apply quick changeover procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more quick changeovers, to:

- identify the scope and equipment to be used in a quick changeover implemented in their own workplace
- plan and complete changeover
- identify problems in quick changeovers
- contribute suggestions for improvement.

## Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision and to solve routine problems, including knowledge of:
- principles of quick changeover, including:
  - setting of target time for changeover
  - conversion of internal set-up time to external set-up time, where appropriate
  - simplification of changeover steps
  - monitoring and continuous improvement of changeovers
- purpose and requirements of changeover
- minimisation of changeover waste (e.g. scrap and energy)
- quality requirements for products and purposes
- relevant operational procedures
- health, safety and environment (HSE) principles relevant to own job.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include actual quick changeovers, the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402021 Apply Just in Time procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402021A Apply Just in Time procedures

## Application

This unit of competency covers the skills and knowledge required to work in an organisation implementing and/or utilising Just in Time (JIT) procedures.

This unit applies to an individual working in an organisation following JIT who will need to follow procedures which are specific to JIT, such as the controlled flow of material (e.g. the use of kanban and elimination of waste). This will involve the individual in the application of the pull system to their job and the authorisation of product/material flows in accordance with procedures and their level of authority.

This unit requires the application of skills associated with planning and organising and self-management to deliver product on demand using necessary tools, equipment and processes to meet production requirements. The unit also requires an ability to recognise and act on problems that may interfere with meeting production demands.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 1 | **Respond to indicator of demand** | 1.1 | Identify pull of product through work role. |
| | | 1.2 | Recognise indicator of flow authorisation. |
| | | 1.3 | Identify production or service required. |
| 2 | **Make products or deliver service to demand** | 2.1 | Make product or deliver service as required by ticket. |
| | | 2.2 | Identify any factors likely to prevent demand being satisfied in own work or work of the team. |
| | | 2.3 | Take action in accordance with procedures. |
| 3 | **Update demand information as required** | 3.1 | Record information on ticket to procedures, as required. |
| | | 3.2 | Facilitate operation of flow authorisation as part of work. |
| 4 | **Recommend improvements** | 4.1 | Examine the operation of the JIT system as it relates to own work. |
| | | 4.2 | Identify areas for improvement. |
| | | 4.3 | Identify any additional personal skill requirements to implement JIT procedures. |
| | | 4.4 | Recommend improvements. |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect

# Assessment Requirements for MSS402021 Apply Just in Time procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402021A Apply Just in Time procedures

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more JIT procedures, to:

- identify the indicators of demand and the flow authorisation system in their own workplace
- relate products and services supplied by suppliers and customers to the flow authorisation system
- interpret received indicators of demand correctly for quantity, quality and time of delivery
- contribute suggestions for improvement.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- JIT methods relevant to own job
- relevant indicator of demands for own job
- own role in flow authorisation
- faults and other issues that may threaten the JIT delivery of own product or service
- procedures for recommending improvements.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include JIT procedures in own workplace

© Commonwealth of Australia, 2025 Skills Insight

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402031 Interpret product costs in terms of customer requirements

## Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

## Application

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to *MSS402082 Apply cost factors to work practices*, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Identify cost components deriving from customer benefit and other costs** | 1.1 | Identify customer features/benefits in product or process being undertaken. |
| | | 1.2 | Identify cost components which deliver customer features/benefits and those which do not. |
| 2 | **Compare required performance of product or process steps with actual performance** | 2.1 | Identify performance required to meet customer needs in own work and that of team. |
| | | 2.2 | Identify actual performance. |
| | | 2.3 | Compare cost components of products or process with current customer-related targets. |
| | | 2.4 | Separate costs components into those that contribute to customer features/benefits and those that do not. |
| | | 2.5 | Determine non-contributing cost components which are under control of the individual or team. |
| 3 | **Minimise waste** | 3.1 | Recommend changes to eliminate or reduce waste. |
| | | 3.2 | Adopt changes which minimises waste. |
| | | 3.3 | Monitor effect of changes to ensure gains are made against customer features/benefits. |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect

© Commonwealth of Australia, 2025 Skills Insight

performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just In Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Customer features/ benefits include all of:**

- characteristics of the product or service which the customer perceives as meeting their need
- characteristics of the product or service which the customer perceives as adding value
- financial or features items which the customer perceives and a benefit.

**Performance includes all of:**

- takt - the allowable time to produce one product at the rate and quality customers are demanding it
- the rate of output of the plant compared to the takt time.

**Customer-related targets includes all of:**

- internally set financial targets that contribute to meeting customer features/benefits
- operational targets that contribute to meeting customer features/benefits
- other targets that contribute to meeting customer features/benefits.

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **Contributing cost components include all of:** | • costs that make a direct contribution to customer features/benefits.<br>• costs that need to be incurred (although they may be minimised) in order to gain the customer feature/benefit. |
| **Non-contributing cost components include all of:** | • costs that do not contribute to customer features/benefits<br>• costs that must be maintained, such as regulatory compliance costs which do not contribute to customer features and so should be minimised<br>• costs that neither contribute to customer features/benefits nor must be maintained (muda) and so should be eliminated if possible. |
| **Muda (waste) includes all of:** | • any activity which does not contribute to customer or organisation benefit/features in the product<br>• activities which do not yield any benefit to the organisation or any benefit to the organisation's customers<br>• excess production and early production<br>• delays<br>• movement and transport<br>• poor process design<br>• inventory<br>• inefficient performance of a process<br>• making defective items. |

# Assessment Requirements for MSS402031 Interpret product costs in terms of customer requirements

## Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, on **one (1)** or more occasions to recommend muda reduction related to their workplace, and to:

- identify and distinguish between cost components leading to customer benefit or otherwise
- take steps to minimise muda in their workplace.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- contributions towards customer perceived benefit
- concepts of expense, income and capital
- fixed and variable cost components relevant to own work:
  - power/energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- relative impact of each of these
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:

© Commonwealth of Australia, 2025 Skills Insight

  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402040 Apply 5S procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Duplicated performance Criteria removed. Equivalent outcome.

## Application

This unit of competency covers the skills and knowledge required by an individual to apply 5S procedures to their own job and work area. The unit assumes the individual has a particular job and an allocated work area and that processes in the work area are known by the individual.

This unit applies to an individual in an organisation who works in an operational position as part of production, maintenance, logistics, etc. The unit can also apply to individuals in other organisations who have a discrete role and responsibility for individually managed processes.

This unit applies where an organisation has decided to embark on a competitive systems and practices strategy and as part of this has adopted the philosophy of 5S as one of the tools to improve performance. The employee needs to apply 5S to their job and work area and maintain the housekeeping and other standards set by 5S.

This unit requires the application of skills associated with planning and organising, problem solving and self-management, in order to identify and implement 5S housekeeping practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

| | | | |
|---|---|---|---|
| 1 | **Sort needed items from unneeded** | 1.1 | Identify all items in the work area. |
| | | 1.2 | Sort items to achieve deliverables and value expected by downstream and final customers. |
| | | 1.3 | Sort items required for regulatory or other required purposes. |
| | | 1.4 | Place any non-essential item in an appropriate place other than the workplace. |
| | | 1.5 | Regularly check that only essential items are in the work area. |
| 2 | **Set the workplace in order** | 2.1 | Identify the best location for each essential item. |
| | | 2.2 | Place each essential item in its assigned location. |
| | | 2.3 | After use immediately return each essential item to its assigned location. |
| | | 2.4 | Regularly check that each essential item is in its assigned location. |
| 3 | **Shine the work area** | 3.1 | Keep the work area clean and tidy at all times. |
| | | 3.2 | Conduct regular housekeeping activities during shift. |
| | | 3.3 | Ensure the work area is neat, clean and tidy at both beginning and end of shift. |
| 4 | **Standardise activities** | 4.1 | Follow procedures. |
| | | 4.2 | Follow checklists for activities, where available. |
| | | 4.3 | Keep the work area to specified standard. |
| 5 | **Sustain the 5S system** | 5.1 | Clean up after completion of job and before commencing next job or end of shift. |
| | | 5.2 | Identify situations where compliance to standards is unlikely and take actions specified in procedures. |

© Commonwealth of Australia, 2025 Skills Insight

5.3 Inspect work area regularly for compliance to specified standard.

5.4 Recommend improvements to lift the level of compliance in the workplace.

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**5S includes all of:**

- sort

© Commonwealth of Australia, 2025 Skills Insight

- set in order
- shine
- standardise
- sustain.

**Sort includes all of:**

- separating necessary from unnecessary items (equipment and supplies)
- keeping only what is absolutely necessary for the work processes that comprise the job
- disposing of (or relocating) all other items.

**Set in order includes all of:**

- assigning required equipment and materials appropriate locations in the work area
- consideration of frequency of use, ergonomics and work health and safety (WHS)
- provision of facilities to maintain the locations.

**Shine includes one or more of:**

- keeping the work area clean at all times which should be carried out to a regular daily schedule against allowed time, usually at the end of the day or of a particular process
- keeping work area organised
- noting any signs of wear, damage, leakage, safety risks or other issues that require immediate attention.

**Best location includes one or more of:**

- changes to the layout of furniture
- arrangement of equipment
- provision of services
- location of personnel.

**Standardising includes one or more of:**

- activities that help maintain the order and the housekeeping standards
- using procedures and checklists developed from a procedure.

**Sustain includes one or more of:**

- making sure that daily activities are completed every day regardless of circumstance
- cleaning up after a job
- undertaking inspections, including:
- informal inspections carried out often, at least weekly
- formal inspections carried out at least monthly

© Commonwealth of Australia, 2025 Skills Insight

- generating continuous improvement actions from daily activities
- following up specific actions to generate continuous improvement.

**Items in work area include one or more of:**

- tools
- jigs/fixtures
- materials/components
- plant and equipment
- manuals
- personal items (e.g. bags, lunch boxes and posters)
- safety equipment and personal protective equipment (PPE)
- other items which happen to be in the work area.

**Procedures (written, verbal, visual, computer based, etc.) include one or more of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

# Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Equivalent to MSS402040 Apply 5S procedures Release 1.

# Assessment Requirements for MSS402040 Apply 5S procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Duplicated performance Criteria removed. Equivalent outcome.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, in one (1) or more allocated areas, to:

- implement and sustain 5S in own workplace
- identify own tasks and responsibilities
- contribute suggestions for improvement.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- purpose of 5S in the workplace
- meaning and application of 5S steps to own workplace and job
- principles of efficient workplace organisation
- identifying waste (muda)
- procedures for recommending improvements.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of 5S procedures in a work area where 5S has not previously been undertaken, or, demonstration of sustaining 5S principles in a work area that has already undergone prior 5S procedures
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402050 Monitor process capability

## Modification History

Release 1. Supersedes and is equivalent to MSS402050A Monitor process capability

## Application

This unit of competency covers the skills and knowledge required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.

This unit applies to an individual in an organisation adopting specific competitive systems and practices, usually either six sigma or statistical process control/three sigma, as a means of determining and improving the capability of their process to customer requirements. The individual is involved in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a nominated computer program). The information is typically presented to team members in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.

This unit requires the application of skills associated with entering and monitoring operational data and information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Collect and process data** | 1.1 | Take specified measurements/readings/observations, as required. |
| | | 1.2 | Enter data in log, computer or other record. |
| | | 1.3 | Manipulate and/or chart data as required by procedures. |
| 2 | **Identify variations that are not random and take action** | 2.1 | Examine chart and/or reliability information. |
| | | 2.2 | Distinguish between random variations and those with an identifiable cause. |
| | | 2.3 | Take action specified in procedures when a variation with an identifiable cause occurs. |
| 3 | **Assist in process improvement** | 3.1 | Collect data for process capability improvement trials. |
| | | 3.2 | Make recommendations for improvement. |
| | | 3.3 | Implement revised capability monitoring procedures. |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

# Assessment Requirements for MSS402050 Monitor process capability

## Modification History

Release 1. Supersedes and is equivalent to MSS402050A Monitor process capability

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to assist in one (1) or more process improvements and to routinely:

- collect and process data
- identify non-random variations and take the action specified in the procedures
- make recommendations for improvements.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- defects and defective product
- variation and the related statistical distribution
- control charting (or similar) methods
- analysis of information to identify trends or other non-random results
- determination of identifiable causes from variation information
- process capability determination from variation data.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include routine collection of data and identification of non-random variation in own workplace
  - must include participation in a process capability improvement project

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include the use of appropriate statistical tools, aids and apps.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402051 Apply quality standards

## Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

## Application

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

| essential outcomes. | | demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Assess own work** | 1.1 | Continuously check completed work against workplace standards relevant to the operation being undertaken. |
| | | 1.2 | Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned. |
| | | 1.3 | Identify and isolate faulty components, products or processes. |
| | | 1.4 | Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures. |
| 2 | **Assess quality of received components, parts or materials** | 2.1 | Continuously measure/check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance. |
| | | 2.2 | Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service. |
| | | 2.3 | Identify and isolate faulty components, parts, materials or information that relate to the operator's work. |
| | | 2.4 | Record and/or report faults and any identified causes in accordance with workplace procedures. |
| | | 2.5 | Identify causes of any identified faults and take corrective action as specified in workplace procedures. |
| 3 | **Investigate causes of quality deviations** | 3.1 | Record information on quality and other indicators of process performance. |
| | | 3.2 | Investigate and report causes of deviations from specified quality standards for components. |
| | | 3.3 | Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials. |

# Assessment Requirements for MSS402051 Apply quality standards

## Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more products/processes, to:

- check and measure relevant quality parameters
- interpret results of quality checks in terms of specifications, patterns and work standards
- take required action where standards of materials, component parts, final product or work processes are found to be unacceptable
- maintain accurate records.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- relevant measurement techniques and quality checking procedures
- reporting procedures.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of quality standards to own workplace

© Commonwealth of Australia, 2025 Skills Insight

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402061 Use SCADA systems in operations

## Modification History

Release 1. Supersedes and is equivalent to MSS402061A Use SCADA systems in operations

## Application

This unit of competency covers the skills and knowledge required by an individual to interact with a System Control and Data Acquisition (SCADA) system as part of their job.

This unit applies to an individual in an organisation using a SCADA system and the individual must interface with that system. The individual will need to access this system as part of their routine and take actions based on the information they obtain from the SCADA system in accordance with procedures.

This unit requires the application of skills associated with using communication tools and technology for management of own work, planning and problem solving.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|---|
| 1 | **Use operator interface** | 1.1 Identify SCADA terminals relevant to own workstation and functions. |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 1.2 | Use keyboards, track ball, monitor and/or stand-alone controllers to access/interrogate system. |
| | | 1.3 | Use correct level of access and find all relevant screens and information. |
| | | 1.4 | Access message section and acknowledge messages. |
| | | 1.5 | Input and output information correctly according to program and organisation requirements. |
| 2 | **Use information** | 2.1 | Obtain data and information from SCADA, as required, including process, supply and product chain data. |
| | | 2.2 | Interpret data and information as required by own job. |
| | | 2.3 | Find and use relevant historical data and information. |
| | | 2.4 | Use manufacturer manuals or specifications, as required, to expand knowledge of SCADA system relevant to own work. |
| | | 2.5 | Determine and prioritise required actions. |
| 3 | **Make required changes in accordance with procedures** | 3.1 | Adjust production/process in response to SCADA information. |
| | | 3.2 | Record adjustments and variations to specifications/schedules and report to appropriate personnel. |
| | | 3.3 | Seek feedback and information on adjustments to further improve procedures, where required. |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Procedures (written, verbal, visual, computer based, etc.) include one or more of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

# Assessment Requirements for MSS402061 Use SCADA systems in operations

## Modification History

Release 1. Supersedes and is equivalent to MSS402061A Use SCADA systems in operations

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more adjustments to production/process utilising SCADA information, to:

- identify scope and relevance of SCADA system to own work
- access correct levels of SCADA system
- enter and retrieve data, including normal performance and variations
- use SCADA system to assist in own work.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- hierarchy of SCADA system and operation
- available information from, and controls exercised by, SCADA system.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include use of SCADA systems in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).

© Commonwealth of Australia, 2025 Skills Insight

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402080 Undertake root cause analysis

## Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

## Application

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA). This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

This unit applies to individuals working in an organisation that is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 1 | **Recognise problems** | 1.1 | Identify features or occurrences indicative of a problem. |
| | | 1.2 | Use appropriate tools, techniques and charts to define the problem. |
| 2 | **Implement quick fix** | 2.1 | Recommend a quick fix within the scope of competency and authority. |
| | | 2.2 | Use technology or processes relevant to the problem to implement quick fix. |
| 3 | **Determine root cause** | 3.1 | Identify a range of possible causes. |
| | | 3.2 | Gather data and other information to eliminate or confirm possible causes. |
| | | 3.3 | Use available data and information to link causes and effects. |
| | | 3.4 | Seek assistance to obtain additional information if problem is beyond own competency/authority. |
| | | 3.5 | Identify root cause. |
| 4 | **Develop permanent solution** | 4.1 | Identify a range of methods to eliminate the root cause or break the cause tree. |
| | | 4.2 | Select the most appropriate solution. |
| | | 4.3 | Liaise with relevant people. |
| | | 4.4 | Recommend or implement solution within the limits of competency and authority. |
| | | 4.5 | Monitor impact of solution and make further recommendations, as required. |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Problems include one or more of:**

- variation to normal plant or equipment operation
- unplanned or non-conforming process or operations outcomes
- out of specification products
- excess scrap
- accidents and emergencies
- regulatory breaches
- customer returns and complaints
- reduction or loss of sales.

**Techniques/charts include one or more**

- control charts
- Pareto charts

© Commonwealth of Australia, 2025 Skills Insight

**of:**

- run charts
- flow charts
- cause and effect diagrams
- tree diagrams
- 5 Whys analysis
- organisation specified/mandated methods.

# Assessment Requirements for MSS402080 Undertake root cause analysis

## Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more problems, to:

- undertake problem identification
- use appropriate processes to achieve root cause identification
- recommend solutions and implementation procedures to problems within own area
- monitor implementation of solutions.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- methodology of root cause analysis, including:
  - difference between quick fix and root cause elimination
  - breaking of causal tree
- indicators of problems and variances to normal operation
- relevant analysis tools (e.g. Pareto charts, 5 Whys).

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include a root cause analysis in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402081 Contribute to the application of a proactive maintenance strategy

## Modification History

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

## Application

This unit of competency covers the skills and knowledge required by an individual to make a positive contribution to proactive maintenance strategies, including actions that contribute to equipment uptime and overall equipment effectiveness (OEE). This unit applies in an organisation which is following a predictive, preventative or reliability-centred maintenance strategy and which requires commitment from all employees. The employee should 'own' their equipment/plant and take an active part in the implementation of the strategy within the scope of their authority.

This unit requires the application of skills associated with accessing and maintaining equipment/plant documentation. It also requires problem solving, initiative and enterprise to continually monitor and maintain operational performance of equipment/plant used in work role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

| essential outcomes. | | demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Maintain equipment/plant** | 1.1 | Keep equipment/plant within area of responsibility clean. |
| | | 1.2 | Ensure equipment/plant is serviced and adjusted, as required, in accordance with procedures and own level of responsibility. |
| | | 1.3 | Access manufacturer manuals and specifications, where required, to expand knowledge on the maintenance of equipment/plant. |
| | | 1.4 | Access and update documentation on equipment/plant operation and maintenance in accordance with workplace procedures. |
| 2 | **Monitor operation of equipment/plant** | 2.1 | Regularly check key conditions of the equipment/plant as defined in workplace procedures. |
| | | 2.2 | Regularly check equipment/plant OEE. |
| | | 2.3 | Note any deviation from conditions specified in procedures. |
| 3 | **Identify deviations and patterns** | 3.1 | Identify any previous occurrences of a deviation. |
| | | 3.2 | Identify any related deviations which have occurred. |
| | | 3.3 | Identify any unusual occurrence which may be related to a deviation. |
| 4 | **Take action appropriate to competency and authority on deviation** | 4.1 | Liaise with relevant people regarding the deviation and the solution. |
| | | 4.2 | Implement solution and/or assist with the implementation of the solution, as appropriate. |

# Assessment Requirements for MSS402081 Contribute to the application of a proactive maintenance strategy

## Modification History

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to monitor equipment/plant in one (1) or more areas, and to:

- maintain the equipment/plant to the required standard
- identify deviations in OEE requiring action
- take the action required by the procedures.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- interpretation of trends or other non-random variation
- determining OEE (availability x performance x quality rate) and uptime metrics
- principles of operation of plant/equipment and factors likely to cause deviations in performance
- identifying deviations requiring action
- appropriate actions for dealing with deviations.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of proactive maintenance in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

# MSS402082 Apply cost factors to work practices

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to identify cost components in work practices and determine, in general terms, the cost impacts of alternative actions.

The unit applies to assessing the relative costs of the alternatives and using this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

Employees are required to use problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

# Assessment Requirements for MSS402082 Apply cost factors to work practices

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified cost factors and cost implications of at least 1 product or process in own work and applied cost-effective practices.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of expense, income and capital
- relative impact of fixed and variable cost components relevant to own work, including:
  - power and energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS402083 Use planning software systems in operations

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to access planning software (often known as Enterprise Resource Planning (ERP), Materials Resource Planning (MRP and MRPII), and often by a proprietary name, to make routine business decisions required of the person as a regular part of their job.

This unit applies to an individual in an organisation using a planning software system and who must interface with that system. The unit applies to both accessing information from the planning software system and using it as an aid to decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

# Assessment Requirements for MSS402083 Use planning software systems in operations

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and:

- used planning software systems for at least 3 different purposes, utilising outcomes to aid decision making.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- planning software system and operation, including:
  - terminal locations and types
  - security and access arrangements
  - information held in planning software relevant to own work
  - data collection methods for operations in work area
  - assistance arrangements for users of planning software
  - business activities exercised with the planning software system
- procedures for recommending improvements
- data and information sources.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
  - planning software systems.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS403021 Facilitate a Just in Time system

## Modification History

Release 1. Supersedes and is equivalent to MSS403021A Facilitate a Just in Time system

## Application

This unit of competency covers the skills and knowledge required to facilitate the implementation/operation of a Just in Time (JIT)/kanban system in a team or work area.

This unit applies to a person who needs to monitor the operation of a JIT system and facilitate its working in a team or work area. This will involve liaison with stakeholders as well as examining the data generated and being alert to potential problems and areas for improvement.

This unit requires the application of skills associated with gathering, analysing and communicating information to facilitate implementation of the JIT system. It requires planning and organising skills and has a strong emphasis on communication and teamwork skills to ensure the JIT system is being effectively implemented. This unit also requires the ability to problem solve and take the initiative to consider performance issues and learn from experience to improve future performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for MSS403021 Facilitate a Just in Time system

## Modification History

Release 1. Supersedes and is equivalent to MSS403021A Facilitate a Just in Time system

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more JIT related improvements, to:

- identify the JIT system and practices used in own work area
- identify and monitor JIT key measures
- solve JIT-related problems to root cause
- communicate effectively with stakeholders
- facilitate and monitor JIT-related changes to operations and practices.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- JIT methods relevant to own work area
- production data generated by the process and its application to JIT
- methods of gathering data against key performance indicators (KPIs)
- facilitation techniques to encourage work group development and improvement.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating the implementation of a Just in Time (JIT) system in in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Skills Insight

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS403087 Mistake proof an operational process

## Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to analyse a process that a team is responsible for and determine methods of mistake proofing it. This includes determining, implementing and sustaining improvement activities.

The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Analyse process** | 1.1 | Identify sources of variability and non-conformance in the process |
| | | 1.2 | Identify critical control points in process |
| | | 1.3 | Analyse causes of variability and non-conformance |

© Commonwealth of Australia, 2025 Skills Insight

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 2 | **Develop preventative options** | 2.1 | Liaise with team members and other people to develop mistake proof options for performing operation |
| | | 2.2 | Test and validate mistake proofing options |
| 3 | **Implement permanent fix** | 3.1 | Liaise with relevant people to have systems and procedures changed to implement solution |
| | | 3.2 | Liaise with relevant people to implement the solution |
| | | 3.3 | Liaise with relevant people to ensure self and others in the team or work area have appropriate skills |
| | | 3.4 | Follow through to ensure implementation occurs |
| 4 | **Monitor implementation** | 4.1 | Critically observe the implementation |
| | | 4.2 | Compare the results of the implementation against the expected outcomes |
| | | 4.3 | Modify solution to improve outcomes |
| | | 4.4 | Confirm procedures reflect change |
| | | 4.5 | Confirm training and assessment reflects change |
| | | 4.6 | Audit change at agreed period or cycle |
| | | 4.7 | Address any observed deviation |
| 5 | **Seek improvements** | 5.1 | Observe and monitor changes |
| | | 5.2 | Analyse process again to ensure improvements are sustained |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSS403087 Mistake proof an operational process

## Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mistake proofed (applied baka yoke or poka yoke) to at least 1 operational process.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- baka yoke and poka yoke approaches
- factors causing variability in the process and methods of controlling it
- error causes and control options
- cost benefit analysis, feasibility, regulatory compliance and perceived value to the customer
- validation of baka yoke and poka yoke proposals.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS404054 Apply statistics to operational processes

## Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

## Application

This unit describes the skills and knowledge required to gather and analyse process data to support the control of processes and operations. It includes interpretation of sampling procedures, frequency distributions, random and non- random variations in data/control charts; use of control limits to determine whether monitored processes are in control; and communicating this information to others.

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil.

## Competency Field

Competitive systems and practices

# Assessment Requirements for MSS404054 Apply statistics to operational processes

## Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- gathered, analysed and interpreted process data to monitor and control at least 2 operational processes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose of sampling and measurement
- sampling methods to be used
- methods of calculating mean and standard deviation and their purpose in statistical control
- concept of limits, including 1, 2, 3 and 6 sigma limits
- types of control charts and their applications to different types of process and product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process causes of variation
- stable and unstable processes
- causes of stability and instability in the process
- calculation of control limits and process capability and the applications of different control limits
- standard distribution curve and confidence limits.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS404084 Undertake process capability improvements

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes and then implementing actions.

This unit applies to a person who reviews a range of process capability data and information and makes (or arranges for) changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

# Assessment Requirements for MSS404084 Undertake process capability improvements

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and implemented at least 1 process capability improvement.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- data collection and manipulation techniques
- variability, normal distribution and three and six sigma limits
- type of variations:
  - random variation (no assignable cause)
  - non-random variation (which has an assignable cause).
- causes of non-random variation in the process
- approaches to reducing variability.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS405022 Design a process layout

## Modification History

Release 1. Supersedes and is equivalent to MSS405022A Design a process layout

## Application

This unit of competency covers the skills and knowledge required to design a process layout, typically a cellular flow, for either a jobbing shop or a continuous process manufacturer. This unit provides the skill for a technical expert to apply the principles of competitive systems and practices to process design layout as distinct from volume production layout. While the application of the unit may be for an initial layout, in many cases it is likely to be for the redesign of an existing layout.

The unit is written on the assumption that there is an existing process. Where this is not the case, then additional competency in equipment/process design and selection will also be required through units from an appropriate technical qualification or Training Package.

This unit requires the application of skills associated with problem solving, initiative, enterprise, planning and organising in order to design a process for the manufacture of enterprise products that incorporates team operations, product flow, infrastructure and the layout of the physical environment and related technology. This unit has a strong emphasis on gathering, analysing and applying information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Identify the products and processes used in the organisation** | 1.1 | Obtain or develop a process map of the existing process. |
| | | 1.2 | Identify all/main products/classes of products. |
| | | 1.3 | Obtain forecast sales and sales pattern of products/classes. |
| | | 1.4 | Obtain profiles of products/classes. |
| | | 1.5 | Group the products/classes into compatible families. |
| 2 | **Engineer the process** | 2.1 | Make a preliminary selection of required equipment/technology/ process for each process or product family. |
| | | 2.2 | Estimate required resource times for each family. |
| | | 2.3 | Calculate total resourcing required for each family. |
| | | 2.4 | Estimate appropriate lot size. |
| | | 2.5 | Determine viability of proposed families. |
| | | 2.6 | Examine draft proposal for possible improvements in process consistent with the competitive systems and practices strategy of the organisation. |
| 3 | **Design the infrastructure** | 3.1 | Consult on layout needs with all stakeholders. |
| | | 3.2 | Identify physical infrastructure required by system. |
| | | 3.3 | Identify information and control infrastructure required. |
| | | 3.4 | Identify work organisation required. |
| | | 3.5 | Identify work health and safety (WHS) and other regulatory requirements to be taken into account. |
| | | 3.6 | Identify workforce development and training requirements. |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 3.7 | Check the availability of required infrastructure and compatibility with requirements. |
| 4 | **Lay out the process** | 4.1 | Draft proposed process flow map. |
| | | 4.2 | Draft proposed configuration diagram. |
| | | 4.3 | Draft proposed space plan/layout. |
| | | 4.4 | Check availability of services/structural suitability, as appropriate. |
| | | 4.5 | Validate proposed layout with all relevant stakeholders. |
| | | 4.6 | Layout the process/work cell. |
| | | 4.7 | Develop implementation plan in liaison with relevant stakeholders. |
| | | 4.8 | Review layout after implementation. |

# Assessment Requirements for MSS405022 Design a process layout

## Modification History

Release 1. Supersedes and is equivalent to MSS405022A Design a process layout

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to design a layout for one (1) or more processes and to:

- identify products and processes
- engineer the process
- design the infrastructure
- lay out the process.

## Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to design a process layout, including knowledge of:

- customer requirements in terms of order size and order pattern
- processing requirements for products
- equipment capabilities and reliability
- workforce capabilities and reliability
- business requirements from layout
- work health and safety (WHS) and other regulatory requirements
- principles of process layout.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real process layout project for an operational workplace.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS405075 Facilitate the development of a new product

## Modification History

Release 2. Updated pre-requisite code

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

## Application

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

This unit applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel.

The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Confirm design brief of new product in consultation with relevant people** | 1.1 | Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements. |
| | | 1.2 | Determine any regulatory, industry code/intellectual property (IP) requirements for product. |
| | | 1.3 | Identify any required tooling, process or equipment needs. |
| | | 1.4 | Confirm design brief, including relevant drawings, to meet needs. |
| | | 1.5 | Determine design brief conforms to organisation objectives and capability. |
| | | 1.6 | Obtain approval on total design brief from all relevant personnel. |
| 2 | **Determine material requirements for product** | 2.1 | Select appropriate materials or combination of materials/ components in liaison with key stakeholders. |
| | | 2.2 | Determine material/component testing and evaluation regime required to meet product end use requirements, including regulatory/industry code requirements. |
| | | 2.3 | Arrange for testing and evaluation of trial materials/ components. |
| | | 2.4 | Guide material trial process and interpret material trial results. |
| | | 2.5 | Determine final materials/components specifications and details of value chain. |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 3 | **Determine process requirements for product** | 3.1 | Select appropriate process to make product in liaison with key stakeholders and based on relevant factors. |
| | | 3.2 | Determine any special process/equipment requirements for this product. |
| | | 3.3 | Communicate with production personnel to determine any concerns and/or training or other needs. |
| | | 3.4 | Adjust the design, as required, to satisfy customer and production needs. |
| 4 | **Ensure process needs for new product have been met** | 4.1 | Liaise with equipment design/procurement personnel. |
| | | 4.2 | Interpret hardware specifications and ensure they are appropriate for the job required. |
| | | 4.3 | Liaise with process personnel to ensure appropriate draft procedures for new product have been developed. |
| | | 4.4 | Validate product cost and design meets organisation requirements and capability. |
| 5 | **Trial new product through the process** | 5.1 | Design trialling procedure to deliver required information. |
| | | 5.2 | Liaise with relevant stakeholders. |
| | | 5.3 | Ensure health, safety and environment (HSE) requirements are observed. |
| | | 5.4 | Coordinate the trialling of the new product. |
| | | 5.5 | Interpret product trial results and guide product trial process. |
| | | 5.6 | Tune process to optimise production of new product. |
| 6 | **Determine process capability** | 6.1 | Plot appropriate statistical process control charts. |
| | | 6.2 | Determine confidence limits. |
| | | 6.3 | Compare confidence limits with product specification. |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 7 | **Coordinate product trials** | 7.1 | Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements. |
| | | 7.2 | Arrange for testing and evaluation of trial product/prototype. |
| | | 7.3 | Interpret product trial results and guide product trial process. |
| | | 7.4 | Determine final product specification in liaison with key stakeholders. |
| | | 7.5 | Make required changes to materials, process and equipment. |
| 8 | **Implement standard procedures for new product** | 8.1 | Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements. |
| | | 8.2 | Ensure process specifications are updated and reflect the optimised operation developed. |
| | | 8.3 | Ensure standard operating procedures (SOPs) are correct for the new product. |
| | | 8.4 | Ensure equipment and other hardware records are updated to reflect additions/changes. |
| | | 8.5 | Ensure project records are complete and all required reports have been completed and submitted. |
| | | 8.6 | Archive records according to company procedure. |

# Foundation Skills

# Assessment Requirements for MSS405075 Facilitate the development of a new product

## Modification History

Release 2. Updated pre-requisite code

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to facilitate the development of one (1) or more new/modified products and to:

- confirm the design brief
- determine material and process requirements
- ensure process needs have been met
- trial the new product and determine process capability
- conduct product trials
- standardise the new product.

## Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to facilitate the development of a new product, including knowledge of:

- appropriate types of materials/components and criteria for choosing between them
- alternative processes/plant/equipment for making the new product and criteria for choosing between them
- determination of process capability
- appropriate sampling and testing for materials/components and products
- determination of processing time, product cost, benefit cost of the new product
- interpretation of trial/field test results.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
    - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

© Commonwealth of Australia, 2025 Skills Insight

  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real new/modified product development project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSTGN2005 Perform minor maintenance

## Modification History

Release 1. Supersedes and is equivalent to LMTGN2005B Perform minor maintenance

## Application

This unit of competency covers skills and knowledge to provide minor maintenance of production machines.

The unit of competency applies to checking machine performance and undertaking minor adjustments to production machines.

Work involves limited discretion, initiative and judgement on the job in own work, including liaison with specialist mechanics and technicians.

Work may be conducted in a variety of environments, such as operational workplace activities, restricted space and hazardous, controlled or exposed conditions.

Work may be undertaken on a range of machines that may include microprocessor or computer controls.

This unit of competency is applicable to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Determine job requirements** | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | **Operate machine and assess performance** | 2.1 | Start and stop machine according to manufacturer requirements |
| | | 2.2 | Monitor machine operation and production readings to ensure correct procedures are assessed and product meets quality standards |
| | | 2.3 | Identify and report problem with machine |
| 3 | **Rectify minor machine fault** | 3.1 | Identify, address and report minor tool faults in machine and associated equipment, where necessary, to meet specified requirements |
| | | 3.2 | Identify, document and report major machine or product faults and inform appropriate personnel |
| | | 3.3 | Complete machine maintenance records and other documentation accurately |
| 4 | **Maintain effective machine operation** | 4.1 | Clean machine according to WHS practices and schedules, workplace procedures and manufacturer cleaning instructions |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| 4.2 | Lubricate machine according to workplace requirements and schedules, workplace procedures and manufacturer lubricating instructions |
| 4.3 | Check machine to ensure correct operation |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| | |
|---|---|
| **Workplace procedures include one or more of the following:** | • requirements prescribed by legislation, awards, agreements and conditions of employment<br>• SOPs<br>• work instructions<br>• oral, written and visual communication<br>• quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output<br>• housekeeping<br>• tasks related to environmental protection, waste disposal, pollution control and recycling<br>• WHS practices |
| **Australian Standards include:** | • the relevant industry or Australian Standards that are current at the time this unit is being undertaken |

# Assessment Requirements for MSTGN2005 Perform minor maintenance

## Modification History

Release 1. Supersedes and is equivalent to LMTGN2005B Perform minor maintenance

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- starting and stopping machines and undertaking machine maintenance according to specifications, on at least two (2) occasions
- recognising fault conditions
- monitoring operating performance of machine, including machine production readings, against machine specifications
- making minor adjustments to rectify minor machine faults or problems
- completing all required tasks within job role for maintaining machine operations
- applying workplace procedures
- recording and reporting machine or product faults.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- procedures and guidelines for safe operation and maintenance of machines
- typical fault conditions and related fault-finding procedures
- basic machine maintenance and repair techniques
- cleaning and lubricating techniques
- technical specifications manuals
- quality standards and practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2025 Skills Insight

  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in performing minor machine maintenance, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.

# MSTGN3016 Plan tasks to assist production operations

## Modification History

Release 1. Supersedes **and is equivalent to** MSTGN3005 Plan tasks to assist production operations**.**

## Application

This unit of competency describes the skills and knowledge required to assist in production planning by performing specific planning tasks. Tasks may include the development of rosters, work health and safety practices, workplace procedures, documentation practices and organisational systems.

This unit applies to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

| **Elements**<br>*Elements describe the* essential *outcomes.* | **Performance Criteria**<br>*Performance criteria describe the performance needed to demonstrate achievement of the element.* |
|---|---|
| 2. Conduct planning task | 2.1 Communicate with team, section or individuals and key personnel to seek support for planning task requirements<br>2.2 Assess and apply relevant criteria from previous and current work practices, organisational guidelines, documentation systems and quality standards to planning task<br>2.3 Use planning tools and techniques to coordinate and sequence tasks and integrate work health and safety practices to develop plan that meets workplace requirements<br>2.4 Test plan with key personnel and adjust based on feedback |
| 3. Implement plan | 3.1 Communicate all plan information in an effective way to work team, section and individuals<br>3.2 Seek feedback from team, section members and individuals to support effective operation of team or section<br>3.3 Monitor implementation of plan, and identify and apply required changes to improve outcomes<br>3.4 Document plan and implementation practices in accordance with workplace procedures |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Reading skills to interpret work instructions, standard operating procedures (SOPs), specifications and key requirements of industry standards
- Initiative and enterprise skills to organise the work of others to meet customer deadlines and quality requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

# Assessment Requirements for MSTGN3016 Plan tasks to assist production operations

## Modification History

Release 1. Supersedes **and is equivalent to** MSTGN3005 Plan tasks to assist production operations**.**

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned 2 tasks to assist production operations, covering at least 1 of the following:
  - work rosters
  - work health and safety practices
  - workplace procedures
- communicated effectively about the development of the plan to work team, section and individuals
- monitored the plan and made changes to improve outcomes
- documented the plan.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards, industry regulations and codes of practice that govern the control of chemicals, relevant to the workplace (such as *Australian/New Zealand Standard™ AS/NZS 4146:2000 Laundry practice*, applicable to a laundry workplace)
- production and work flow system in the workplace
- factors and constraints that negatively impact on effective work flow and how they can be controlled
- effective work methods to achieve production objectives and timelines
- effective communication strategies
- planning tools and techniques
- quality standards and procedures relevant to enterprise
- scheduling techniques
- resourcing policies, relevant to enterprise
- general staffing levels, capabilities and application of standard times
- workplace recording and reporting practices.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a TCF production environment set up with relevant standard operating procedures (SOPs), safety information and equipment
  - access to team members.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSTTF2002 Cut, bend and shape metal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

## Application

This unit of competency covers the skills and knowledge required to cut prescribed lengths of metal bar stock and to bend the lengths into various shapes by hand or with the aid of formers.

Work may involve interaction with other people in the workplace, including supervisors and production personnel. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces and hazardous or exposed conditions

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Determine job requirements** | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | | requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | **Prepare for cutting, bending and shaping metal** | 2.1 | Read and interpret workplace procedures and instructions |
| | | 2.2 | Establish safe working environment |
| | | 2.3 | Obtain specifications of material to be used and shape to be formed |
| | | 2.4 | Plan sequence of task operations and calculate required length of material |
| | | 2.5 | Select appropriate section material to meet specification, and choose suitable length of material stock for cutting to minimise waste |
| | | 2.6 | Move material to be cut to work area |
| | | 2.7 | Prepare appropriate hand and power tools |
| 3 | **Prepare for cutting process** | 3.1 | Mark out cutting points on material and select appropriate cutting equipment |
| | | 3.2 | Check area to ensure equipment doesn’t become entangled or damaged during operation |
| | | 3.3 | Secure material to prevent movement |
| 4 | **Cut material and informally check product** | 4.1 | Use safety equipment in accordance with WHS requirements when using cutting equipment |
| | | 4.2 | Select and install appropriate consumables as to manufacturers requirements |
| | | 4.3 | Set and operate equipment in accordance with accepted industry and WHS practices |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 4.4 | Cut material to correct length and remove burrs or rough edges by brushing, grinding or filing |
| | | 4.5 | Inspect cut sections to verify that their size and condition meets specifications and relevant workplace and industry quality standards |
| 5 | **Prepare for forming process** | 5.1 | Plan sequence of forming operations and select appropriate forming equipment |
| | | 5.2 | Check forming equipment for damage or operating defects |
| | | 5.3 | Select and set appropriate formers |
| 6 | **Form material and informally check product** | 6.1 | Place metal section in former and secure, as necessary |
| | | 6.2 | Heat metal section to facilitate bending, as necessary |
| | | 6.3 | Hot or cold bend the metal section around formers or hand form to required specification |
| | | 6.4 | Descale or otherwise finish formed product after forming |
| | | 6.5 | Inspect formed product to verify that it meets specifications and relevant workplace and industry quality standards |
| 7 | **Maintain work area and equipment** | 7.1 | Clean work area and stow tools and electrical equipment away safely |
| | | 7.2 | Comply with environmental regulations to reuse, recycle or dispose of materials as required |
| | | 7.3 | Clean and maintain cutting and forming equipment in accordance with workplace requirements and manufacturer specifications |
| | | 7.4 | Perform programmed maintenance which is within the operator’s area of responsibility |
| | | 7.5 | Inform supervisor of any abnormal conditions needing maintenance or repair |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| | |
|---|---|
| **Workplace procedures include one or more of the following:** | • requirements prescribed by legislation, awards, agreements and conditions of employment<br>• SOPs<br>• work instructions<br>• oral, written and visual communication<br>• quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output<br>• housekeeping<br>• tasks related to environmental protection, waste disposal, pollution control and recycling<br>• WHS practices |
| **Australian Standards include:** | • the relevant industry or Australian Standards that are current at the time this unit is being undertaken |
| **Hand tools include one or more of the following:** | • hammers<br>• punches<br>• vices<br>• clamps<br>• jigs<br>• formers<br>• hand drills<br>• hacksaws<br>• files<br>• tongs |

- wire brushes plus gloves
- goggles and other safety equipment

**Power tools include one or more of the following:**

- power hacksaws
- portable electric drills
- portable sanders and wire brushes
- guillotine
- abrasive disk cutting equipment
- gas cutting equipment

**WHS practices**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

# Assessment Requirements for MSTTF2002 Cut, bend and shape metal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements applicable to the safe use of cutting and bending equipment
- interpreting work orders
- interpreting equipment and materials specifications and instructions needed for the cutting and forming processes
- setting up cutting and forming equipment
- performing cutting process using at least three (3) different tools or equipment according to workplace procedures, on at least three (3) different products
- performing forming processes according to workplace procedures on at least three (3) products
- inspecting completed work to assess quality
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- documenting and communicating work related information including reporting faults and other problems
- applying workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with cutting and heating equipment
- common metals and basic sections used in fabrication work
- metal cutting processes
- metal grinding and dressing processes
- metal forming processes

© Commonwealth of Australia, 2025 Skills Insight

- the range of cutting and forming equipment, hand tools and power tools used in cutting and forming processes and their appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- operating principles of tools and equipment used in cutting, dressing and forming metals, including abrasive cutting wheels, gas equipment, grinding wheels, guillotines and power hacksaws
- hazards associated with powered machinery and gas equipment
- materials and equipment specifications
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in cutting, bending and shaping metal, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF2005 Translate information into measurements or diagrams

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2005A Translate information into measurements or diagrams

## Application

This unit of competency covers the skills and knowledge required to translate information received orally and by other means on customer requirements into hard copy form for costing and production purposes.

Work may include interaction with enterprise clients either individually or in collaboration with other personnel from the operator's enterprise.

Work may be conducted in operational indoor or outdoor workplaces

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

# Assessment Requirements for MSTTF2005 Translate information into measurements or diagrams

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2005A Translate information into measurements or diagrams

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- locating and interpreting technical information about products, materials, equipment and operating procedures
- complying with all relevant safety requirements, including safe use of measuring tools (including laser devices) and other equipment
- conceptualising customer needs from customer information
- interpreting specifications and instructions for products and materials offered to customers, and translating ideas into basic 3-D sketches and drawings for at least three (3) products
- clarifying customer instructions and providing feedback to customer
- making calculations and allowances as required to create accurate final drawings and diagrams for at least two (2) products, using manual or computer-aided design (CAD) programs to produce drawings, where possible
- documenting and communicating work related information
- applying workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of common products and services offered by the workplace
- general operating principles of common products and equipment on offer
- common types of materials used in the industry and their applications
- limitations of canvas and other materials used
- common types of strengthening and fastenings
- measuring instruments and techniques
- mathematical processes

© Commonwealth of Australia, 2025 Skills Insight

- plane geometry and plane geometrical shapes
- mathematical formulae (e.g. areas and volumes)
- engineering drawing principles and practices
- environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- work health and safety (WHS) practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in translating information into measurements or diagrams, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF2009 Identify and select canvas and sail materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2009A Identify and select canvas and sail materials

## Application

This unit of competency covers the skills and knowledge required to identify and select appropriate materials to use in the manufacture of canvas or sail products.

This unit of competency applies to identifying, selecting and handling materials, and checking stock availability. Work may involve interaction with other people in the workplace including supervisors and production personnel. Work may be conducted in operational indoor or outdoor workplaces

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Determine job** | 1.1 | Follow standard operating procedures (SOPs) |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | **requirements** | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | **Identify materials** | 2.1 | Identify materials by appearance, texture, density, stock labels and product codes |
| | | 2.2 | Check stock labels or tags against product codes and manufacturer specifications to confirm correct identification |
| | | 2.3 | Read and apply workplace procedures and instructions |
| 3 | **Select materials** | 3.1 | Select materials in accordance with job specifications, fitness for purpose and work order instructions |
| | | 3.2 | Check materials stocks to ensure sufficient quantities of materials are available to meet job requirements |
| | | 3.3 | Check materials to ensure they conform to specifications, descriptions and relevant quality standards |
| 4 | **Handle and store materials** | 4.1 | Follow appropriate WHS practices and work procedures when examining stock in racks or shelves |
| | | 4.2 | Follow safe working practices when handling or moving stock |
| | | 4.3 | Use appropriate lifting equipment to lift heavy or awkward loads |
| | | 4.4 | Use appropriate posture and lifting techniques for manual handling of materials |
| | | 4.5 | Seek assistance in handling materials when necessary |
| | | 4.6 | Store materials in accordance with workplace procedures and manufacturer recommendations |

# MSTTF2014 Weld plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2014A Weld plastic materials

## Application

This unit of competency covers the skills and knowledge required to weld plastic materials within the safe operating parameters of the equipment used.

The unit of competency applies to hot air and hot wedge welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces, and in hazardous or exposed conditions.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

# Assessment Requirements for MSTTF2014 Weld plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2014A Weld plastic materials

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements, including safe use of plastic welding equipment, hand and power tools and electrical equipment
- following work orders
- interpreting equipment and materials specifications and instructions needed for the plastic welding process
- preparing material to be welded and setting up welding equipment
- performing at least two (2) forms of welding of plastic materials to industry standards, quality and consistency, and testing for correct fusion of materials, on at least five (5) occasions
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- labelling or tagging materials, and documenting and communicating work-related information, including reporting of faults and other problems, according to workplace procedures

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with hot air and hot wedge welding
- hazards associated with heated plastics
- plastic welding principles and techniques
- general operating principles of plastic welding equipment
- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process and their appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds

© Commonwealth of Australia, 2025 Skills Insight

- WHS and environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

# MSTTF2015 Install products on and off site

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2016A Install products on and off site

## Application

This unit of competency covers the skills and knowledge required to install canvas and sail products both on site and off site.

The unit of competency applies to the installation, operation and maintenance of canvas and sail products and equipment both on and off site. Work may be conducted in a variety of environments, such as operational indoor, outdoor workplaces or on site

Work may require independence, discretion, judgement and acceptance of responsibility for overall work outcomes. Work may involve planning and coordination of tasks and processes, interaction with other enterprise personnel, enterprise clients, manufacturer representatives and other external personnel.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Determine job requirements** | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | **Prepare for installation** | 2.1 | Read and interpret workplace procedures and instructions, including interpreting drawings and technical information to guide installation |
| | | 2.2 | Plan task operation sequence, identify suitable electrical power outlets and equipment to work above ground, as required |
| | | 2.3 | Arrange additional assistance, if required |
| | | 2.4 | Select and prepare appropriate tools and prepare site |
| 3 | **Prepare to work above ground** | 3.1 | Select, secure and adequately support ladders or other devices, such as steps or bosun's chair, as required for the tasks |
| | | 3.2 | Erect appropriate barriers and signs when working overhead |
| | | 3.3 | Obtain assistance, as necessary, when working above the ground or deck |
| 4 | **Fit products** | 4.1 | Use appropriate marking tools and measuring equipment to mark out fitting positions |
| | | 4.2 | Check products to be installed to ensure they meet specifications and are fit for their intended purpose |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 4.3 | Use appropriate ladders or other devices to gain height advantage |
| | | 4.4 | Sequence all operations according to specifications and workplace procedures ,as required, to complete a normal installation |
| | | 4.5 | Apply appropriate WHS precautions and environmental practices during all phases of the installation |
| | | 4.6 | Work in cooperation with other team members, as required, to fit products |
| 5 | **Inspect and check quality** | 5.1 | Inspect completed work to verify that the products and installation work meet job specifications and relevant workplace and industry quality standards |
| | | 5.2 | Check that installation is correct, and that products fit and operate correctly |
| | | 5.3 | Determine if any re-work or rectification is required, undertake re-work or take other appropriate action |
| 6 | **Provide customer information and finalise work** | 6.1 | Supply customer with information on how to use product, as required |
| | | 6.2 | Demonstrate product to customer and answer questions within scope of own responsibility |
| | | 6.3 | Clean work area, clean and return tools to safe storage, and perform normal basic maintenance, in accordance with workplace procedures |
| | | 6.4 | Clean and stow away ladders, bosun's chair or other equipment |
| | | 6.5 | Complete project documentation and obtain customer signature, if required |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Products include one or more of the following:**

- blinds
- awnings
- annexes
- sails

**Tools include one or more of the following:**

- hand tools:
  - hammers
  - punches
  - hand drills
  - saws
  - hacksaws
  - rasps
  - wire brushes
  - pop-rivets
  - expanding bolts

© Commonwealth of Australia, 2025 Skills Insight

- power tools:
- portable electric drills
- routers
- portable sanders
- abrasive disk cutting equipment
- electric punches

**Normal installation includes one or more of the following**

- using appropriate tools to drill and prepare locating holes
- safely lifting or lowering products into position
- using appropriate fastenings to attach or anchor product
- fitting pulleys or sheave blocks
- threading or attaching ropes or cables, as necessary
- fitting stays or other fastenings
- cleaning up work area after fitting

**WHS practices**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

# Assessment Requirements for MSTTF2015 Install products on and off site

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2016A Install products on and off site

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements, including safe use of ladders, bosun's chair, load hoisting equipment and electrical equipment
- interpreting work orders, drawings and installation instructions
- complying with product and equipment specifications during installation
- performing normal installation and setting of products and equipment on at least two (2) occasions
- using relevant hand and power tools safely
- inspecting and testing operation of installed products and equipment
- specifying any rectification necessary
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- communicating effectively with client on installation process and product operation
- demonstrating products to customer, answering questions, completing project documentation and obtaining customer signature, if required, according to workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- electrical and general workplace hazards and means of identifying them
- operating principles of products and associated equipment to be installed
- the range of hand tools, power tools, measuring devices and other equipment used in the installation process, and their operating principles and appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- format of product and equipment specifications

© Commonwealth of Australia, 2025 Skills Insight

- setting and adjustment principles and processes for products and equipment being installed
- typical problems of products and associated equipment and their rectification procedures
- relevant product quality standards for products and equipment installed
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures, including use of equipment for working aloft
- general housekeeping policies and procedures
- mathematical processes used in the installation and checking processes
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in installing products on and off site, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF3001 Identify client and site requirements for installation of fabricated textile products

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3001A Identify client requirements (on site)

## Application

This unit of competency covers the skills and knowledge required to establish and document client and site requirements for the installation of fabricated textile products.

The unit includes identifying client requirements and WHS and environmental issues from site inspection, using discretion, initiative and judgement on the job. Work may be conducted in a variety of environments, such as large to small scale enterprises, including indoor or outdoor operations.

All elements of this unit of competency are performed under the general guidance and review of a supervisor.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

# Assessment Requirements for MSTTF3001 Identify client and site requirements for installation of fabricated textile products

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3001A Identify client requirements (on site)

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing tools and equipment for inspection, arranging visit on site, and conducting at least twp (2) on-site inspections safely and efficiently to determine work requirements
- greeting client in an appropriate manner, identifying and confirming client needs, and demonstrating product knowledge
- taking measurements and noting site requirements likely to affect installation of products or their performance in service
- asking appropriate questions, clarifying information and providing feedback to client
- documenting and communicating work-related information including costs, measurements, specifications, client details and requirements
- complying with all relevant safety requirements, including safe use of ladders, steps, measuring tools (including laser devices), and other equipment
- concluding inspection on site according to workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- hazards associated with working at heights
- range of products and services offered by the workplace
- principles of operating products and equipment
- types of materials and their applications
- limitations of canvas and other materials used
- types of strengthening and fastenings
- the service life of different materials
- instruments and techniques for measuring
- mathematical processes

© Commonwealth of Australia, 2025 Skills Insight

- mathematical formulae for areas and volumes
- labour rates and approximate costs of products and materials
- power sources, such as single phase, three phase and weather-protected outlets
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- client communication
- quality practices
- workplace practices
- practices for recording and reporting.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in identifying client requirements on site, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF3002 Gain customer acceptance of service proposal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

## Application

This unit of competency covers the skills and knowledge required to gain customer acceptance of a proposal to provide a product and service.

The unit of competency applies to establishing and documenting a proposal to meet customer requirements and obtaining agreement for work to proceed. Interaction with the customer is usually performed individually but may involve collaborative approach with other personnel from the operator's workplace.

Work may be conducted in a variety of environments, such as operational indoor, outdoor workplaces or on site.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

# Elements and Performance Criteria

| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
|---|---|---|---|
| 1 | **Develop customer proposal** | 1.1 | Review documentation to confirm all required information is available |
| | | 1.2 | Establish customer requirements and determine products, processes and service for customer |
| | | 1.3 | Identify alternatives and determine material and production costs |
| | | 1.4 | Calculate costs for proposed service |
| | | 1.5 | Assess timing, costs and service against customer requirements |
| | | 1.6 | Develop proposal and document for customer |
| 2 | **Present proposal to customer** | 2.1 | Contact customer and present proposal in person, or by using digital technology or by other arranged means |
| | | 2.2 | Provide customer with detailed information regarding products, processes and alternative solutions, which could satisfy customer requirements |
| | | 2.3 | Discuss features and benefits of proposal with the customer |
| 3 | **Seek customer acceptance** | 3.1 | Respond to any customer concerns, seek customer approval and acceptance, and confirm agreement |
| | | 3.2 | Identify any required changes to the proposal and modify proposal accordingly |
| | | 3.3 | Obtain customer acceptance |
| 4 | **Confirm service to be provided** | 4.1 | Confirm customer address and contact details |
| | | 4.2 | Establish agreement with the customer and obtain signature |

© Commonwealth of Australia, 2025 Skills Insight

4.3 Confirm time, product and service to be provided and arrange delivery

4.4 Provide duplicate of proposal and agreement to customer for future reference

4.5 Obtain deposit, where applicable, or arrange other payment from customer

4.6 Provide customer receipt and record form of payment

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- work health and safety (WHS) practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

# Assessment Requirements for MSTTF3002 Gain customer acceptance of service proposal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least three occasions and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- establishing customer requirements and determining products, processes and services for customer, on at least three (3) occasions
- calculating costs and identifying details of proposed products and services
- providing customer with detailed proposal in person, or electronically or other appropriate method
- answering customer queries to clarify or amend proposal if required
- developing written proposal for customer approval, incorporating all required details, including costs, products and services and timeframe
- establishing agreement with the customer and obtaining signature and deposit or arranging other payment
- completing required documentation for customer and own workplace according workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- workplace documentation and procedures for establishing agreements to provide services
- hazards associated with working at heights
- range of products and services offered by the enterprise
- principles of operating products and equipment
- types of materials and their applications
- limitations of canvas and other materials used
- types of strengthening and fastenings
- service life of different materials
- instruments and techniques for measuring

© Commonwealth of Australia, 2025 Skills Insight

- mathematical processes
- mathematical formulas for area and volume
- labour rates and approximate costs of products and materials
- power sources such as single phase, three phase, and weather protected outlets
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- practices for documenting agreements and recording and reporting provision of products and services.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in gaining customer acceptance of service proposal, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF3004 Perform advanced welding of plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3004A Perform advanced welding of plastic materials

## Application

This unit of competency covers the skills and knowledge required to perform high frequency welding of plastic materials using equipment within the safe operating parameters of the equipment used.

The unit of competency applies to the welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces, and hazardous or exposed conditions.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

MSTTF2014 Weld plastic materials

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| 1 | **Determine job requirements** | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | **Prepare for welding** | 2.1 | Read and interpret workplace procedures and instructions |
| | | 2.2 | Determine nature of material to be welded and select an appropriate welding process |
| | | 2.3 | Establish a safe working environment, identify suitable electrical power outlets and plan work to maximise safety and productivity |
| | | 2.4 | Select appropriate hand-held or stationary manual welding equipment, check serviceability and follow correct ‘on’ procedures |
| | | 2.5 | Select and prepare appropriate supplementary hand and power tools for the job |
| 3 | **Perform high frequency welding** | 3.1 | Prepare surfaces of material for welding |
| | | 3.2 | Lay out material on working table or other suitable surface and anchor material to prevent movement |
| | | 3.3 | Adjust equipment temperature or operating frequency to prescribed settings |
| | | 3.4 | Lower screens or barriers, where fitted, prior to welding process |
| | | 3.5 | Keep operator and bystanders at an appropriate distance or suitably protected when high frequency welding is being undertaken |
| | | 3.6 | Operate welding equipment in accordance with WHS and workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | 3.7 | Examine weld area or test for correct fusion of materials, and remove work piece |
| | | 3.8 | Identify and address problems or faults |
| 4 | **Check quality of weld and finalise work** | 4.1 | Inspect completed weld to verify that it meets the required standard |
| | | 4.2 | Label or tag completed product and complete any necessary documentation in accordance with workplace procedures |
| | | 4.3 | Clean work area, clean and return tools and equipment to safe storage, and perform normal basic maintenance, in accordance with workplace requirements and manufacturer specifications |

# Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Materials include the following:**

- PVC
- vinyls
- clear plastics

**Hand and power tools include the following:**

- hammers
- rasps
- files
- portable sanders
- high frequency welder

**WHS practices**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

# Assessment Requirements for MSTTF3004 Perform advanced welding of plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3004A Perform advanced welding of plastic materials

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- complying with all relevant safety requirements, including safe use of plastic welding equipment, hand and power tools and electrical equipment
- following work orders
- interpreting equipment and materials specifications and instructions needed for the plastic welding process
- preparing material to be welded and setting up welding equipment
- using high frequency welder on at least five (5) products and performing welds, according to workplace requirements, with a satisfactory degree of quality consistency
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- documenting and communicating work-related information including reporting of faults and other problems
- labelling or tagging completed product and completing any necessary documentation in accordance with workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with hot air and hot wedge welding
- hazards associated with heated plastics
- plastic welding principles and techniques
- operations of a high frequency welder
- general operating principles of plastic welding equipment

© Commonwealth of Australia, 2025 Skills Insight

- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process, and their appropriateness for particular applications
- operations of a high frequency welder
- power sources, such as single phase, three phase and weather-protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds
- WHS and environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

# Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in performing advanced welding of plastic materials, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTX2014 Perform industrial sewing on textile products

## Modification History

Release 1. Supersedes and is equivalent to MSTTX2009 Perform industrial sewing on textile products.

## Application

This unit of competency describes the skills and knowledge required to identify work requirements and sew textile products to specifications using industrial sewing machines.

This unit applies to operators working in accordance with defined procedures in any textile manufacturing context. Machines and tasks are preset.

Areas of work may include automotive trimming, blinds and awnings, clothing manufacture, leatherwork, marine trimming, sailmaking, upholstery or specialised textile manufacture.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil.

## Competency Field

Textile production.

## Elements and Performance Criteria

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to perform industrial sewing | 1.1 Identify job requirements from work documentation<br>1.2 Identify and comply with work health and safety requirements in accordance with workplace procedures<br>1.3 Receive and check work and determine any follow-up action<br>1.4 Lay out work in sequence<br>1.5 Prepare and check workstation and machine in accordance with workplace procedures<br>1.6 Follow procedures for minimising waste |

© Commonwealth of Australia, 2025 Skills Insight

| **Elements** | **Performance Criteria** |
|---|---|
| *Elements describe the* essential *outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 2. Sew textile product | 2.1 Sew products to meet specifications, quality standards and speed of operations<br>2.2 Control machine speed and work handling according to the type of operations, fabrics and product type<br>2.3 Check machine performance regularly and inspect finished work for signs of faulty operation<br>2.4 Take required action to rectify faults during the sewing process in accordance with workplace procedures |
| 3. Complete work | 3.1 Inspect completed sewn components against quality standards, identify any faults and take appropriate action<br>3.2 Accurately record results of inspection and any action to correct or reject faulty work<br>3.3 Take and keep a record of preventative action to avoid recurrence of defective work<br>3.4 Complete production records in accordance with workplace procedures<br>3.5 Direct completed work to the next operation or packing section |

# Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to:
  - interpret numerical information on machines and in job requirements
  - measure and compare work against production and quality requirements
- Oral communication skills to share and report job information to colleagues and supervisors
- Reading skills to interpret job requirements and workplace procedures
- Writing skills to complete quality forms and production records

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSTTX2014 Perform industrial sewing on textile products

## Modification History

Release 1. Supersedes and is equivalent to MSTTX2009 Perform industrial sewing on textile products**.**

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed sewing to required specifications on 5 different jobs, with all of the following to be included in any combination:
  - operation of 2 different industrial sewing machines
  - positioning, feeding and handling of work pieces with some discretionary changes, contouring or critical stopping points
  - gathering
  - easing
  - tucking
  - stitching curves
- responded appropriately to 2 different sewing problems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- existence of any Australian Standards requirements for materials or products being sewn
- techniques for use and basic maintenance of two types of industrial sewing machine
- main types and sizes of needles and their applications
- basic characteristics of fabrics and threads used in different types of textile products, including how they perform and required tensions
- workplace practices and procedures for:
  - quality assurance
  - recording and reporting of information
  - identification and rectification of problems
  - safety and hazard control, including use of product-specific personal protective equipment (PPE) and manual handling
  - waste management and sustainability.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - industrial sewing machines (minimum 2 types)
  - textile products to be sewn
  - work specifications
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# SIRRINV002 Control stock

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Inventory

## Unit Sector

Retail

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Monitor stock receipt and dispatch. | 1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.<br>1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | correctly.<br>1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.<br>1.4. Act on variations to quantity and quality of delivered stock.<br>1.5. Supervise safe stock handling and storage. |
| 2. Maintain stock records. | 2.1. Monitor stock and maintain stock at required levels.<br>2.2. Maintain, monitor and adjust stock reorder cycles as required.<br>2.3. Provide clear information to team members about individual stock recording responsibilities.<br>2.4. Maintain stock storage and movement records.<br>2.5. Record and report stock discrepancies.<br>2.6. Monitor stock performance and identify and report fast and slow-selling items. |
| 3. Process and follow up orders. | 3.1. Process and raise stock orders according to organisational procedures.<br>3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.<br>3.3. Liaise with suppliers to ensure continuity of supply.<br>3.4. Resolve routine supply problems or refer to appropriate personnel for action.<br>3.5. Distribute stock within the organisation according to required allocations.<br>3.6. Handle routine supply problems or refer to management as required by store policy. |
| 4. Minimise stock losses. | 4.1. Regularly check storage of stock and ensure its protection.<br>4.2. Identify, record and report stock losses.<br>4.3. Identify avoidable losses and establish reasons for them.<br>4.4. Recommend solutions and implement procedures to prevent future losses. |
| 5. Coordinate stocktake or cyclical count. | 5.1. Explain procedures for stocktake and cyclical counts to team members.<br>5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.<br>5.3. Provide team members with clear directions for performance of each task.<br>5.4. Produce accurate reports for management on stocktake data, including discrepancies. |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

| SKILLS | DESCRIPTION |
|---|---|
| Reading skills to: | • interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control. |
| Numeracy skills to: | • calculate:<br>  • supplier costs and complex order costs<br>  • complex details of stock on hand and stock losses and produce complex numerically-based reports<br>• reconcile incoming stock and invoices against purchase orders. |
| Technology skills to: | • use business technology for inventory management. |

# Assessment Requirements for SIRRINV002 Control stock

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)

© Commonwealth of Australia, 2025 Skills Insight

  - manual handling
  - licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

## Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SIRRMER004 Develop visual merchandising creative concepts

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop visual merchandising concepts in response to a design brief or organisational strategy. It requires the ability to generate a range of creative ideas and present these ideas to stakeholders for feedback and approval.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Determine visual merchandising | 1.1. Access and interpret a visual merchandising design brief.<br>1.2. Identify and confirm visual merchandising objectives, |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| requirements. | specifications and constraints. |
| | 1.3. Clarify budgetary and time requirements with relevant personnel. |
| | 1.4. Review existing visual merchandising activity and performance results to identify strengths and weaknesses. |
| | 1.5. Research local and global visual merchandising trends and draw inspiration to inform concept development. |
| | 1.6. Review competitor and market activity to identify trends and creative opportunities. |
| 2. Generate options for visual merchandising concept. | 2.1. Apply principles and elements of design to generate creative concept options that meet design brief or reflect organisational merchandise strategy. |
| | 2.2. Ensure concept options reflect visual merchandising objectives, specifications and constraints. |
| | 2.3. Challenge assumptions and traditional ways of working to generate concept options that promote diverse and innovative approaches to visual merchandising. |
| | 2.4. Consider the need for scalability and generate concept options accordingly. |
| | 2.5. Consider the need for consistency across channels and locations and generate concept options accordingly. |
| | 2.6. Assess commercial and creative feasibility of concept options and make any required adjustments. |
| | 2.7. Document visual and written representations of concept options. |
| 3. Present creative options. | 3.1. Prepare materials and documentation that support the presentation of concept options and aid audience visualisation. |
| | 3.2. Use visual and verbal communication techniques to present creative options to relevant stakeholders. |
| | 3.3. Promote preferred concept option demonstrating alignment to design brief or organisational merchandise strategy. |
| | 3.4. Seek feedback from stakeholders and make any required adjustments to creative options. |
| | 3.5. Agree on preferred concept options and ensure consistent understanding and expectations of all relevant stakeholders. |
| 4. Finalise the visual merchandising concept. | 4.1. Document detailed visual and written representations of the finalised and agreed visual merchandising concept. |
| | 4.2. Seek final approval. |
| | 4.3. Communicate finalised visual merchandising concept to |

© Commonwealth of Australia, 2025 Skills Insight

relevant personnel for implementation.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

| SKILLS | DESCRIPTION |
|---|---|
| Oral communication skills to: | • adapt communication techniques and styles to meet the needs of a target stakeholder audience when presenting visual merchandising concept options. |
| Numeracy skills to: | • determine financial feasibility of visual merchandising design options in line with budgetary requirements. |
| Technology skills to: | • access, document and communicate information using digital technologies. |

# Assessment Requirements for SIRRMER004 Develop visual merchandising creative concepts

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- review a visual merchandising design brief and develop two different visual merchandising concept options that reflect:
  - target audience
  - brand and product objectives
  - commercial objectives
  - resourcing specifications and constraints
  - implementation specifications and constraints
  - use elements and principles of design
- research local and global visual merchandising trends and use findings to inform concept development
- present one of the above concept options using:
  - visual and verbal communication techniques
  - digital and non-digital representations of concept option
- document one finalised visual merchandise creative concept.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key aspects of legal and ethical considerations as they relate to visual merchandising concept development:
  - copyright
  - intellectual property
- role of a design brief in visual merchandising concept development
- role of an organisational merchandise strategy in visual merchandising concept development
- principles of visual merchandising and their application in visual merchandising concept development
- current visual merchandising trends
- sources of creative influence

© Commonwealth of Australia, 2025 Skills Insight

- key considerations made in visual merchandising concept development and common types of:
  - objectives
  - specifications
  - constraints
- creative concept development and application of:
  - design processes
  - creative thinking techniques
  - innovative approaches
- scalability and its role in visual merchandising concept development
- techniques to determine commercial and creative feasibility of visual merchandising concepts
- elements and principles of design and their application in visual merchandising:
  - elements of design:
    - texture
    - form
    - colour
    - space
    - line
  - principles of design:
    - harmony
    - rhythm
    - balance
    - dominance
    - scale
    - proportion
    - light
    - contrast
- visual and written techniques for representing visual merchandising creative concepts
- digital and non-digital methods for creating visual representations of design ideas
- presentation techniques for:
  - story-telling
  - increased sensory engagement
  - aiding visualisation
  - communicating concept options:
    - visual
    - verbal
  - communicating to a range of audiences
  - managing feedback and critiquing
  - gaining agreement.

# Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising design briefs
- sources of information on current local and global visual merchandising trends
- digital and non-digital tools for creating visual representation of design ideas
- stakeholders with whom the individual can interact. These can be:
  - stakeholders in an industry workplace, or
  - stakeholders who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER005 Implement visual merchandising concepts

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan the implementation of a visual merchandising concept. It requires the ability to accurately interpret a concept, arrange resourcing, monitor concept implementation and determine the effectiveness of the concept.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Develop concept implementation plan. | 1.1. Access and review visual merchandising concept and determine implementation requirements and constraints. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.2. Determine internal and external resource requirements including available budget. |
| | 1.3. Access and review organisational visual merchandising guidelines and standards to inform implementation plan development. |
| | 1.4. Identify opportunities to create cost-efficiencies and maximise use of resources. |
| | 1.5. Identify potential risks to be managed throughout the implementation process and develop contingency plans. |
| | 1.6. Identify key activities and plan the allocation of roles, responsibilities and timelines. |
| | 1.7. Plan product selection and inventory management. |
| | 1.8. Plan internal and external communication strategies for communicating implementation roles, responsibilities and timelines. |
| | 1.9. Develop performance criteria to evaluate the effectiveness of the concept. |
| | 1.10. Document an implementation plan and seek any required approval. |
| 2. Implement the concept. | 2.1. Communicate concept implementation plan to relevant personnel. |
| | 2.2. Monitor the implementation of visual merchandising concept and respond to issues as they arise. |
| | 2.3. Provide support and coaching to team members throughout the implementation process. |
| | 2.4. Photograph and document concept implementation. |
| | 2.5. Finalise concept according to implementation plan. |
| 3. Review concept. | 3.1. Seek feedback from stakeholders about concept effectiveness. |
| | 3.2. Evaluate concept implementation against predetermined performance criteria. |
| | 3.3. Review and assess effectiveness of concepts in achieving desired performance outcomes. |
| | 3.4. Use findings to make suggestions for future improvements. |

© Commonwealth of Australia, 2025 Skills Insight

# Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

| SKILLS | DESCRIPTION |
|---|---|
| Numeracy skills to: | • interpret diverse components of budgets and develop resource specifications within budgetary parameters. |
| Technology skills to: | • access, document and communicate information using digital technologies. |

# Assessment Requirements for SIRRMER005 Implement visual merchandising concepts

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a visual merchandising implementation plan for one visual merchandising concept, detailing:
  - objectives
  - resource requirements
  - budgeting
  - product selection
  - inventory management
  - key activities and timelines
  - allocation of roles and responsibilities
  - risk considerations and contingency plans
  - communication strategy
  - performance criteria
  - exit strategy
- oversee the implementation of one concept, by:
  - communicating implementation plan to others
  - ensuring objectives and standards are met
  - managing risks and issues
- review visual merchandising concept performance against performance criteria to determine effectiveness and make recommendations for future improvements.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key aspects of visual merchandising implementation planning:
  - steps in the planning process
  - technologies that support effective implementation planning
  - stakeholder involvement
  - managing implementation and consistency across multiple channels and locations

© Commonwealth of Australia, 2025 Skills Insight

  - alignment to organisational visual merchandising guidelines and standards
  - implementation plan formats and key considerations:
    - objectives
    - resource requirements
    - budgeting
    - product selection and availability
    - inventory management
    - key activities and timelines
    - allocation of roles and responsibilities
    - risk considerations and contingency plans
    - communication strategy
    - performance criteria
    - exit strategy
- internal and external factors impacting on the successful implementation of visual merchandising concepts and strategies to minimise impacts:
  - availability of resources and product
  - scalability
  - communication issues
  - budget overruns
  - feedback
  - consistency and quality across multiple channels and locations
- techniques to evaluate and determine the effectiveness of a visual merchandising campaign:
  - profitability
  - operational efficiency
  - success in meeting objectives.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising concept
- visual merchandising concept performance data.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

© Commonwealth of Australia, 2025 Skills Insight

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER007 Design and install visual merchandising displays

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to design and create visual merchandising displays for promotional purposes. It requires the ability to review a visual merchandising concept to identify display objectives, and to build displays using a range of construction methods and materials.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Determine display requirements. | 1.1. Access and review a visual merchandising concept to determine display requirements. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.2. Determine display purpose and desired messaging. |
| | 1.3. Identify scaling and spatial specifications and constraints that will impact display design. |
| | 1.4. Access creative sources of information and research display trends to draw inspiration to inform display design. |
| 2. Design displays. | 2.1. Design displays that reflect organisational merchandise strategy, style guidelines and standards. |
| | 2.2. Plan display structure and positioning that reflects customer traffic flow and visual paths. |
| | 2.3. Incorporate multi-sensory elements into display design to enhance customer engagement and interaction with product. |
| | 2.4. Design displays that promote cross-selling and generate commercial benefit. |
| | 2.5. Design displays that are structurally sound and meet work, health and safety requirements. |
| | 2.6. Apply principles and elements of design to display designs. |
| | 2.7. Identify resources, materials and construction techniques required to build displays. |
| | 2.8. Identify opportunities to create cost-efficiencies and maximise use of resources. |
| | 2.9. Produce visual representations of display designs. |
| | 2.10. Seek approval for display designs and make any required adjustments. |
| 3. Install displays. | 3.1. Source materials and resources required to create displays. |
| | 3.2. Select appropriate time to build displays that minimises disruption to customers. |
| | 3.3. Apply construction techniques and use power tools to build displays. |
| | 3.4. Ensure product availability at primary location. |
| | 3.5. Consider product grouping based on key features, price, size and type. |
| | 3.6. Handle stock and equipment according to safe manual handling and work health and safety requirements to prevent injury to self. |
| | 3.7. Finalise displays and adjust as required to ensure visual appeal is maximised. |
| | 3.8. Ensure finalised displays meet display design and work, health and safety requirements. |

© Commonwealth of Australia, 2025 Skills Insight

3.9. Clean and tidy work area and remove excess materials and stock.

3.10. Dispose of waste to minimise environmental impacts.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

| SKILLS | DESCRIPTION |
|---|---|
| Numeracy skills to: | • perform accurate measurements for use in the design and installation of visual merchandising displays. |
| Initiative and enterprise skills to: | • ensure product selection and placement is managed according to the commercial needs of the business. |

# Assessment Requirements for SIRRMER007 Design and install visual merchandising displays

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- review a visual merchandising concept to design and create three of the following visual merchandising displays:
  - window display
  - lifestyle display
  - bulk stack display
  - event installation
  - promotional display
  - pop-up shop display
  - exhibition display
  - food display
- create visual representations of the above display designs using digital software on at least one occasion
- use common construction techniques and power tools to work with materials to create visual merchandising displays
- create the above displays:
  - applying the elements and principles of design
  - following work, health and safety requirements
  - within typical workplace time constraints
  - that align with visual merchandising style guidelines and standards
- incorporate the following sensory elements, on at least one occasion, in the above displays:
  - sound
  - smell
  - touch
  - sight.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

© Commonwealth of Australia, 2025 Skills Insight

- types of visual merchandising displays:
  - purpose
  - benefits
  - limitations
- key aspects and considerations of visual merchandising display design:
  - creating alignment with organisational merchandise strategy
  - display purpose and desired messaging
  - scaling
  - spatial specifications
  - product styling
  - customer traffic flow
  - customer visual paths
  - materials
  - construction methods
- current visual merchandising display trends
- sources of creative influence
- tools used creating visual representation of displays
- techniques to achieve the following through visual merchandising displays:
  - increased customer engagement
  - sales generation
  - cross-selling
  - cost-efficiencies
- common types of material and construction methods used in visual merchandising displays:
  - benefits
  - limitations
- elements and principles of design and their application in visual merchandising display design:
  - elements of design:
    - texture
    - form
    - colour
    - space
    - line
  - principles of design:
    - harmony
    - rhythm
    - balance
    - dominance
    - scale

© Commonwealth of Australia, 2025 Skills Insight

    - proportion
    - light
    - contrast
- use of multi-sensory elements in visual merchandising displays:
    - sound
    - smell
    - touch
    - sight
- key aspects of work, health and safety as it relates to visual merchandising displays.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising style guidelines and standards
- visual merchandising concept
- display space
- display supplies:
    - materials
    - power tools
    - product
    - display equipment
    - equipment
    - fixtures.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER009 Plan and organise display lighting

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan and organise lighting for visual merchandising installations. It requires the ability to determine lighting requirements, assess suitable lighting options that enhance visual merchandising, and ensure lighting use is sustainable and efficient.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Determine lighting requirements. | 1.1. Access and review visual merchandising concept and plans to determine functional and ambient lighting requirements. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.2. Identify lighting specifications, budget and constraints. |
| | 1.3. Evaluate suitability of existing lighting and identify required changes. |
| | 1.4. Review existing site layout to determine feasible lighting options. |
| | 1.5. Access creative sources of information and research lighting trends to draw inspiration for display lighting. |
| | 1.6. Research and compare the features, costs and benefits of lighting options. |
| 2. Develop lighting plans. | 2.1. Select lighting solutions that best meet lighting requirements. |
| | 2.2. Take opportunities to create cost-efficiencies and maximise use of resources. |
| | 2.3. Identify the need for professional contractors to carry out lighting installation work. |
| | 2.4. Document lighting costings and ensure plan meets budgeting requirements. |
| | 2.5. Incorporate safety and environmental sustainability considerations into the planning process. |
| | 2.6. Document lighting plan lighting plan and seek any required approval. |
| 3. Organise lighting installation. | 3.1. Communicate lighting plan and desired outcomes to relevant personnel. |
| | 3.2. Source materials and resources required for lighting installation. |
| | 3.3. Select appropriate time to install lighting that minimises disruption to customers. |
| | 3.4. Install lighting according to work, health and safety requirements and manufacturer’s instructions. |
| | 3.5. Monitor the work of contractors as required to ensure lighting plan requirements are met. |
| | 3.6. Finalise lighting installation and adjust to ensure visual appeal is maximised and lighting objectives are met. |
| | 3.7. Clean and tidy work area and remove excess materials. |

# Assessment Requirements for SIRRMER009 Plan and organise display lighting

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- review a visual merchandising concept to develop a lighting plan to achieve three of the following:
  - creation of ambience
  - gain attention and recognition
  - product enhancement
  - influence perception of space
  - emotional engagement
  - decorative purpose
- document the above lighting plan specifying:
  - objectives
  - costings
  - lighting equipment and resource requirements
  - energy usage
  - lighting placement
- monitor the installation of one lighting plan by:
  - communicating key responsibilities
  - evaluating lighting installation against lighting plan.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of lighting in visual merchandising:
  - creation of ambience
  - gain attention and recognition
  - product enhancement
  - influence perception of space
  - emotional engagement
  - decorative purpose

© Commonwealth of Australia, 2025 Skills Insight

- common lighting systems and solutions:
  - purpose
  - benefits
  - limitations
  - installation requirements
  - functionality
- key aspects and considerations of lighting planning:
  - objectives
  - budgets and costings
  - lighting equipment and resource requirements
  - energy usage
  - lighting placement
  - store layout and design
  - use of external contractors
  - access to power supply
  - interrelationship with other sensory devices
- colour of light, effects and common uses:
  - warm white
  - cool white
  - daylight
- typical running of lighting:
  - costs
  - energy usage
- key bulb types:
  - efficiency
  - light distribution
  - lifetime
  - colour rendering
  - quantity of light
- key aspects of work, health and safety as it relates to installation of lighting
- environmental sustainability considerations that impact lighting planning.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising concept

© Commonwealth of Australia, 2025 Skills Insight

- space to install lighting
- lighting equipment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

| | |
|---|---|
| 1. Determine signage requirements. | 1.1. Determine signage purpose and desired messaging and seek any required clarification. |
| | 1.2. Identify and confirm signage specifications, budget and constraints. |
| | 1.3. Access and review organisational style guidelines and standards to inform signage design. |
| 2. Design signage. | 2.1. Access creative sources of information and identify signage trends to draw inspiration to inform design. |
| | 2.2. Test and experiment with forms of imagery, typography and language that meet purpose, desired messaging and organisational styling requirements. |
| | 2.3. Determine the relevance and use of digital and non-digital signage types. |
| | 2.4. Identify resources required to produce signage and confirm feasibility and alignment with budget. |
| | 2.5. Determine internal and external resourcing and production requirements. |
| | 2.6. Identify opportunities to create cost-efficiencies and maximise use of resources. |
| | 2.7. Identify and action measures for achieving resourcing efficiencies in signage production. |
| | 2.8. Develop a production brief to provide external parties with clear and detailed signage brief. |
| 3. Produce signage. | 3.1. Provide a signage production brief to internal and external signage producers. |
| | 3.2. Review signage samples and provide feedback for improvements. |
| | 3.3. Produce signage using digital and non-digital signage production techniques. |
| | 3.4. Monitor signage production to ensure timelines are met. |
| | 3.5. Ensure finalised signage meets signage design. |
| 4. Install signage. | 4.1. Install signage and adjust as required to ensure visual appeal is maximised. |
| | 4.2. Monitor signage to ensure currency and accuracy of information. |
| | 4.3. Dispose of unwanted signage, minimising environmental impacts. |
| | 4.4. Correctly store unused signage to prevent damage. |

# Assessment Requirements for SIRRMER011 Design and install merchandise signage

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- design three of the following types of signage:
  - price signage
  - promotional signage
  - decal signage
  - production information signage
  - directory signage
- design the above signage using the following on at least one occasion:
  - hand drawing
  - digital design software
- prepare a design brief and arrange the external production of one of the above signage types
- use digital and non-digital techniques for the production of one of the above signage types
- install signage on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of signage in merchandising:
  - promotional
  - pricing
  - information and communication
- common signage types and formats of signage, both digital and non-digital:
  - purpose
  - benefits
  - limitations
- common signage materials and production methods
- key aspects and considerations of signage design and planning:
  - budget

© Commonwealth of Australia, 2025 Skills Insight

    - materials
    - sizing
    - time-frame
    - imagery
    - quantity
    - finishing
- typography and its role in signage:
    - digital typography
    - font styles
    - font sourcing
    - use and applicability of various fonts
- imagery and its role in signage
- digital design and its application in signage production
- print production processes as related to the production of signage:
    - print sizes and formats
    - techniques to achieve efficiencies
    - printing methods
    - print finishes.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational style guidelines and standards
- space for signage installation
- signage production supplies:
    - materials
    - design tools:
        - digital
        - non-digital.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRXCEG001 Engage the customer

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to interact and communicate with a diverse range of customers to assist with basic enquiries and contribute to a service culture.

It applies to individuals working in frontline customer service roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Customer Engagement

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Engage customers. | 1.1. Greet customers in a polite and friendly manner within designated response times and make them a priority over other workplace duties. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication. |
| | 1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds. |
| 2. Assist customers. | 2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed. |
| | 2.2. Question and actively listen to customers to determine their needs. |
| | 2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures. |
| | 2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner. |
| 3. Contribute to a service culture. | 3.1. Act in line with organisational service standards to ensure quality customer service. |
| | 3.2. Show interest in customer's needs and maintain a welcoming customer environment free of complacency. |
| | 3.3. Seek assistance from relevant personnel when customer's needs are beyond scope of own responsibility. |
| | 3.4. Identify and take opportunities to improve customer service standards. |
| | 3.5. Refer customer service issues and feedback to relevant personnel for action. |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for SIRXCEG001 Engage the customer

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
  - customers from diverse backgrounds
  - resolution of two routine customer problems
  - provision of accurate information to address two general customer enquiries
  - referral of unresolved customer enquiry
  - use of effective communication techniques and positive body language.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
  - designated customer service response times
  - interacting with customers
  - solving routine customer problems
  - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
  - positive customer service
  - poor customer service

© Commonwealth of Australia, 2025 Skills Insight

- organisational information and sources of information to assist customer with customer enquiries.

## Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational service standards and procedures for:
    - designated customer service response times
    - interacting with customers
    - solving routine customer problems
    - providing information to customers
- customers from a diverse range of backgrounds; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SIRXSLS001 Sell to the retail customer

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Sales

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Establish customer needs. | 1.1. Connect with the customer within designated response times and establish rapport.<br>1.2. Use questioning and active listening to facilitate effective two-way communication. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.<br>1.4. Determine and clarify customer preferences, needs and expectations. |
| 2. Provide advice on products and services. | 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.<br>2.2. Clearly explain and promote product and service features and benefits where relevant.<br>2.3. Advise on promotional events where relevant.<br>2.4. Provide additional information to address customer questions and objections.<br>2.5. Offer comparisons to competitor product or service range as required.<br>2.6. Collaborate with the customer to determine product or service option most suited to their needs.<br>2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale. |
| 3. Facilitate the sale of products and services. | 3.1. Select and use appropriate techniques to close sale.<br>3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.<br>3.3. Farewell customer on leaving, and invite to return.<br>3.4. Provide any required after sales service according to organisational procedures. |

# Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

| | |
|---|---|
| Reading skills to: | • interpret:<br>  • detailed in-house and supplier product information documents<br>  • plain English documents that outline organisational customer service policy and procedures. |
| Numeracy skills to: | • interpret basic fee information from in-house documents and complete basic pricing calculations. |
| Problem-solving skills to: | • respond to customer objections and provide appropriate solutions to satisfy customer needs. |
| Technology skills to: | • use technologies equipped with search functionality and information systems to source product and service information. |

# Assessment Requirements for SIRXSLS001 Sell to the retail customer

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques

© Commonwealth of Australia, 2025 Skills Insight

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
  - professional service standards and protocols for retail industry personnel
  - attitudes and attributes expected by the retail industry to work with customers
  - different customer service needs and expectations
- for the particular retail organisation:
  - product and service knowledge:
    - product and service range offering
    - product specifications, features and benefits
  - designated response times for providing customer service
  - customer service procedures including recording of and storing customer details.

## Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for:
    - customer service
    - sale of products and services
    - resolving customer complaints
    - collection and storage of customer details
  - organisational product information and price lists
  - supplier brochures, information sheets and price lists
  - promotional activity information
  - current plain English regulatory documents distributed by government regulators for:
    - consumer protection law
    - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

© Commonwealth of Australia, 2025 Skills Insight

- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SITXMPR003 Plan and implement sales activities

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan and implement sales activities. It requires the ability to identify and analyse market and customer needs, proactively target current and new customers, plan the operation of sales calls, make calls and prepare sales reports.

The unit applies to all industry sectors, and to those responsible for coordinating sales activities within the parameters of an established sales strategy. Individuals working independently with limited supervision undertake this role. This could include sales and marketing personnel or managers and owner-operators of small businesses.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Marketing and Public Relations

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Plan sales activities. | 1.1. Plan sales activities for existing and potential customers according to marketing plan or other organisational systems. |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | 1.2. Identify, analyse and incorporate organisation, customer and market information into sales planning process.<br>1.3. Source prospects and create profiles.<br>1.4. Proactively seek and evaluate innovative sales opportunities and take advantage of new technologies and media.<br>1.5. Estimate potential revenue, based on analysis of information and in consultation with appropriate colleagues.<br>1.6. Plan activities and practical sales call patterns that maximise opportunities to meet individual and team targets and are consistent with legal, ethical and sustainability requirements. |
| 2. Prepare for sales calls. | 2.1. Make sales call appointments in advance where appropriate.<br>2.2. Develop sales call strategies and tactics based on market knowledge, current sales focus and consultation with colleagues.<br>2.3. Gather information and support materials to support sales calls. |
| 3. Make sales calls. | 3.1. Make sales calls according to agreed call patterns.<br>3.2. Build relationships with customers through use of effective interpersonal communication styles.<br>3.3. Develop customer trust and confidence through demonstration of personal and professional integrity.<br>3.4. Proactively identify and resolve customer issues and problems.<br>3.5. Use selling techniques to maximise opportunities to meet or exceed sales targets.<br>3.6. Provide current, accurate and relevant information on product features and benefits according to current marketing focus.<br>3.7. Encourage feedback from customers and proactively seek market intelligence. |
| 4. Review and report on sales activities. | 4.1. Review activities according to agreed evaluation methods and incorporate results into future sales planning.<br>4.2. Prepare sales reports according to organisational policy and required timeframes.<br>4.3. Present current and clear market intelligence to those responsible for sales and marketing planning. |

# Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

| SKILLS | DESCRIPTION |
|---|---|
| Oral communication skills | • establish and conduct positive business relationships. |

# Assessment Requirements for SITXMPR003 Plan and implement sales activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and implement sales activities according to organisational requirements for at least two different operations, products or services, including conducting at least one sales call as part of the activities for each operation, product or service
- use effective communication skills during sales calls that are part of above sales activities
- prepare a report on each of the above sales activities.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of selling, sales communication and relationship building
- industry structures and interrelationships, industry networks and information sources
- industry and market knowledge appropriate to the sector and organisation:
  - distribution and marketing networks, especially those that support the product or service being promoted
  - commission structures
  - current customer and market trends
  - links between sales and other areas of organisational operations
- structure and content of marketing plans and the role of sales in the overall marketing mix
- information inputs into sales planning process:
  - competitive activity
  - current sales figures for nominated periods
  - financial statistics
  - market trends
  - sales and marketing reports
- sales call strategies and tactics:
  - focus on specific products or offers
  - response to competitive activity
  - use of individual customer history
- legal issues that impact on sales activities and sales personnel:

© Commonwealth of Australia, 2025 Skills Insight

  - Australian consumer law
  - work health and safety obligations
- ethical considerations for sales personnel:
  - honesty in sales
  - targeting particular groups in the community
- sustainability considerations for sales activities:
  - reducing waste of printed materials
  - sustainability as a sales tool.

## Assessment Conditions

Skills must be demonstrated in an operational business operation or activity for which the individual can conduct sales activities for products or services. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current information and communications technology used by industry to manage sales activities
- marketing plans, operational sales documents, sales reports and sales support materials
- other people with whom the individual can interact; these can be:
  - those in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# Assessment Requirements for TAEDEL301 Provide work skill instruction

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with *TAE Training and Education Training Package Version 2.0.* |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

© Commonwealth of Australia, 2025 Skills Insight

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with *TAE Training and Education Training Package Version 2.0.* |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways
- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks

© Commonwealth of Australia, 2025 Skills Insight

- safe use and maintenance of relevant equipment
- emergency procedures
- sources of WHS information.
-

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

# TAEDEL404 Mentor in the workplace

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with *TAE Training and Education Training Package Version 2.0.* |

## Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Delivery and facilitation

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop a mentoring plan | 1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures<br>1.2 Document mentoring plan in accordance with organisational requirements<br>1.3 Establish ground rules and negotiate realistic expectations<br>1.4 Establish and maintain confidentiality of the relationship in |

© Commonwealth of Australia, 2025 Skills Insight

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | accordance with legislation, policy and procedures |
| 2. Facilitate mentoring relationship | 2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship<br>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives<br>2.3 Support the person being mentored to develop and use skills in problem solving and decision making<br>2.4 Use personal and professional networks to assist the person being mentored<br>2.5 Provide information, and guidance to enhance engagement in the workplace<br>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures |
| 3. Monitor mentoring relationship | 3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements<br>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process<br>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders<br>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met |
| 4. Evaluate effectiveness of mentoring | 4.1 Establish and discuss benefits gained from the mentoring process<br>4.2 Reflect on and articulate the personal benefits gained from providing mentoring<br>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Skills Insight

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4 | • Sources and interprets texts relevant to mentoring context, including organisational policies and learner information |
| Writing | 1.1, 1.3, 2.5, 3.1, 3.2, 4.3 | • Develops content and documents information relevant to mentoring plan |
| Oral Communication | 2.4, 3.3, 4.1, 4.2, 4.3 | • Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback |
| Navigate the world of work | 1.1, 1.4, 2.6, 4.3 | • Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring |
| Interact with others | 1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4 | • Builds rapport using collaboration with others to achieve joint outcomes and effective interaction<br>• Provides mentoring and role modelling to achieve agreed outcomes<br>• Cooperates and consults with others to clarify understanding and seek feedback |
| Get the work done | 1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3 | • Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes<br>• Identifies and responds to problems, considering options for different approaches |

# Assessment Requirements for TAEDEL404 Mentor in the workplace

## Modification History

| Release | Comments |
|---|---|
| Release1 | This version first released with *TAE Training and Education Training Package Version 2.0.* |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
-

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

© Commonwealth of Australia, 2025 Skills Insight

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# TLIA0019 Despatch stock

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to despatch stock.

It includes analysing orders to identify work requirements, following workplace processes to prepare goods for despatch, and completing despatch tasks in accordance with workplace procedures and schedules.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS | | PERFORMANCE CRITERIA | |
|---|---|---|---|
| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
| **1** | **Review order to identify work requirements** | **1.1** | Order request, pick request and consignment note are reviewed for completion and despatch instruction |
| | | **1.2** | Required schedules for despatch are identified |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | **1.3** | Products ordered are located and verified |
| | | **1.4** | Despatch schedule, storage location and product knowledge are used to plan sequence of work |
| | | **1.5** | Appropriate material handling equipment is selected within required work health and safety (WHS)/occupational health and safety (OHS) regulations and timeframe for the despatch |
| **2** | **Follow workplace processes to prepare goods for despatch** | **2.1** | Goods for despatch are selected and checked against labels and other identification systems |
| | | **2.2** | Products are sorted, assembled and consolidated |
| | | **2.3** | Orders are secured and placed in storage or despatch zones in accordance with schedule |
| **3** | **Complete despatch following workplace procedures and schedules** | **3.1** | Records are completed, and labels and appropriate documentation are attached |
| | | **3.2** | Load labels and documentation are checked and loading is organised in accordance with workplace procedures and dangerous goods codes as required |
| | | **3.3** | Final check of load labels and despatch and transfer documentation is completed in accordance with workplace procedures and statutory requirements |
| | | **3.4** | Goods are confirmed as available for despatch and appropriate reporting is undertaken |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for TLIA0019 Despatch stock

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when organising despatch operations
- completing documentation related to organising despatch operations
- completing tasks within work health and safety (WHS)/occupational health and safety (OHS) guidelines and workplace procedures
- modifying activities depending on operational contingencies, risk situations and environments
- interpreting and following instructions, procedures and labels relevant to organising despatch operations
- selecting and using relevant equipment and communications technology when organising despatch operations
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and recording requirements for despatch operations
- equipment used during despatch operations and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for despatching goods
- potential problems and possible solutions relating to despatching goods
- relevant legislation, regulations, codes of practice and industry guidelines for despatching operations
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout, obstacles and specialised zones
- workplace procedures and policies for organising despatch operations.

# Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# TLIA0020 Package goods

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to package goods.

It includes selecting materials, packing, and labelling packaged goods to the required labelling standards and regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS | | PERFORMANCE CRITERIA | |
|---|---|---|---|
| Elements describe the essential outcomes. | | Performance criteria describe the performance needed to demonstrate achievement of the element. | |
| **1** | **Select materials and pack goods** | **1.1** | Packaging specifications and order packaging documentation are obtained and interpreted |
| | | **1.2** | Packaging equipment suitable for the goods to be packed is selected and checked for safe operational use |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | | **1.3** | Packaging materials are identified and matched to specifications |
| | | **1.4** | Work plan is followed, materials are used economically, and appropriate packaging is used and secured to minimise loss and damage in transit or storage |
| | | **1.5** | Work is conducted in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements |
| | | **1.6** | Completed packed goods are stacked to minimise damage in accordance with workplace procedures |
| | | **1.7** | Hazards and control measures are identified and implemented prior to commencing work |
| **2** | **Label packaged goods** | **2.1** | Workplace labelling standards are identified and followed |
| | | **2.2** | Appropriate goods handling, labelling and other identification symbols are used |
| | | **2.3** | Relevant documentation is attached in accordance with workplace procedures |
| | | **2.4** | Workplace documentation is completed according to workplace procedures |

# Assessment Requirements for TLIA0020 Package goods

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, and performance criteria on at least one occasion and include:

- applying safety precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- attaching and completing relevant documentation to goods
- checking and monitoring equipment performance
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when conducting work
- completing documentation related to work activities when packaging goods
- following work activities in terms of planned schedule
- reading and interpreting instructions, procedures and labels
- selecting and using relevant materials
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- differences in equipment
- documentation requirements for packaging goods such as a workplan
- housekeeping standards and procedures
- operational work systems and equipment for packaging goods problems associated with packaging goods and appropriate action to resolve these problems
- potential problems and possible solutions relating to packaging goods
- relevant legislation, regulations, codes of practice, industry guidelines and workplace policies and procedures for packaging goods
- relevant WHS/OHS and environmental protection procedures and guidelines

# TLIA0025 Assess and monitor optimum stock levels

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to assess and monitor optimum stock levels.

It includes assessing projected demand, assessing variables impacting on optimum stock levels, and determining and monitoring optimum inventory levels.

Work is performed in accordance with workplace requirements and relevant regulations. There is the need to exercise discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock.

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
|---|---|
| **1 Assess projected demand** | **1.1** Current inventory levels are monitored and recorded following workplace procedures and regulatory requirements |
| | **1.2** Immediate inbound and outbound inventory levels are considered in analysis |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | **1.3** Information and data from sales plan and stock movement history are analysed, as required |
| | **1.4** Projected high and low volume periods are determined from the analysis of sales plan and historical stock movement data, as required |
| | **1.5** Seasonal nature of stock demand is determined from the analysis of sales plan and stock movement data |
| | **1.6** Required inventory levels are determined from the analysis of production and vendor supply cycle stages |
| **2 Assess variables that impact on optimum stock levels** | **2.1** Stock supply and consignment delivery lead times are determined |
| | **2.2** Internal processing and distribution times are determined |
| | **2.3** Spoilage, obsolescence times and shelf life are calculated, as required |
| | **2.4** Maximum stock carrying capacity is assessed |
| | **2.5** Physical and human resources are assessed in relation to projected stock requirements |
| | **2.6** Contingencies are developed for abnormal distribution disruptions to supply chain |
| **3 Determine optimum inventory levels** | **3.1** Supply and distribution lead times are considered |
| | **3.2** Optimum stock levels are calculated, and risk assessed against business activities |
| | **3.3** Optimum inventory levels are confirmed with appropriate personnel and outcomes of previous analysis |
| **4 Monitor optimum inventory levels** | **4.1** Inventory benchmarks are continually compared to current and future sales and turnover requirements |
| | **4.2** Adjustments to inventory levels are undertaken in consultation with relevant personnel, workplace processes and within scope of authority |
| | **4.3** Changes and requests for adjustments to inventory levels are documented in accordance with workplace procedures |
| | **4.4** Physical and human resources are identified and used to maintain and monitor optimum inventory levels |

# Assessment Requirements for TLIA0025 Assess and monitor optimum stock levels

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- assessing and modifying activities depending on operational contingencies, risk situations and environments
- communicating and working effectively with others
- completing relevant documentation utilising workplace systems and procedures
- considering projected demand, contingencies and stock level variables, including:
  - cultural
  - external storage capacity
  - seasonal
  - supplier activity
- determining and monitoring optimum inventory levels and adjustments
- interpreting and following relevant instructions, procedures and policies
- planning and organising resource availability, including the competencies of individuals in a team or group
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and applying relevant data analysis using available technology
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- data and documentation requirements when assessing and monitoring optimum stock levels
- impact of failing to maintain optimum stock levels on the business
- national codes and regulations, business policies, plans and workplace procedures for maintaining stock levels
- problems when assessing and monitoring optimum stock levels and appropriate solutions
- purpose and use of key information required when optimising stock levels
- supply arrangements, resources, management and workplace operating systems to optimise stock levels
- worksite layout and organisational structure.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently (PPE) used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# TLIA0031 Organise transport of freight or goods

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to organise the transport of freight or goods.

It includes planning transport operations, organising freight transport, completing the required documentation, finalising organisational processes in compliance with relevant codes of practice and regulations, and applying policies and procedures to organise the transport of freight or goods.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock.

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| **1 Plan transport operations** | **1.1** Product knowledge of goods and workplace procedures are applied to the transportation analysis process |
| | **1.2** Domestic and international regulations, codes and procedures for |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | transporting freight are identified |
| | **1.3** Hazards are identified, risks are assessed and control measures are implemented |
| | **1.4** Resources are identified to match the task |
| | **1.5** Work processes are planned to meet agreed timelines |
| | **1.6** Types of transportation required for the freight or goods are identified to match customer requirements, freight type and delivery time |
| | **1.7** Goods transfer methods between modes of transport are selected, as required |
| **2 Organise freight transport** | **2.1** Personnel are informed of work requirements and timelines |
| | **2.2** Handling methods suitable to the goods and transport method are selected |
| | **2.3** Personnel, equipment, temporary storage areas and contingencies, are allocated and supervised, as required |
| | **2.4** Discrepancies in freight are noted and appropriate action is undertaken in accordance with workplace procedures |
| | **2.5** Freight is secured to minimise damage to contents |
| | **2.6** Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace and work health and safety (WHS)/occupational health and safety (OHS) requirements |
| **3 Complete organisational processes** | **3.1** Monitoring processes to track freight movement are implemented |
| | **3.2** Reporting requirements are communicated to appropriate personnel |
| | **3.3** Workplace documents and records are checked for completion and stored in accordance with workplace procedures |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for TLIA0031 Organise transport of freight or goods

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying, monitoring and managing resources for transport of freight or goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- planning own work, prioritising work activities, predicting consequences and identifying improvements
- planning transport operations of freight or goods
- reading, interpreting and following relevant instructions, procedures and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- securing freight in accordance with regulations
- selecting and using required communication systems
- using suitable handling methods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- possible problems and appropriate solutions
- procedures for assessing storage and transport requirements and options
- procedures for calculating/estimating weight, volumes and dimensions
- procedures for coordinating the transfer and storage of goods, including multi-modal transport
- procedures for identifying and evaluating information needed to facilitate the transport of freight
- procedures for organising required permits and for completing transport documentation
- procedures for selecting transport/storage equipment and systems
- relevant legislative requirements and codes of practice
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- sources of information and documentation for organising the transport of freight and goods.

# Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# TLIA3016 Use inventory systems to organise stock control

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts and reporting discrepancies or variances.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| **1 Identify inventory** | 1.1 Workplace inventory and stock control equipment, software |

© Commonwealth of Australia, 2025 Skills Insight

| | | | |
|---|---|---|---|
| | **and stock control systems in use in the workplace** | | and systems are identified |
| | | 1.2 | Reasons for common database approach to inventory records and documentation in the warehouse are explained |
| | | 1.3 | Procedures for identifying and reporting discrepancies or variances are identified |
| **2** | **Use re-order procedures to maintain stock levels** | 2.1 | Stock level maintenance checking is conducted |
| | | 2.2 | Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures |
| | | 2.3 | Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures |
| **3** | **Organise cyclical stock counts and report discrepancies or variances** | 3.1 | Process for cyclical stock count is planned and work is allocated to team members |
| | | 3.2 | Clear directions on tasks to be performed are given |
| | | 3.3 | Stocktake activities are conducted in accordance with workplace procedures |
| | | 3.4 | Types and causes of record discrepancies are identified |
| | | 3.5 | Procedures for noting and correcting minor discrepancies are used |
| | | 3.6 | Major discrepancies are reported in accordance with workplace procedures |
| | | 3.7 | Workplace documentation is completed |
| **4** | **Produce reports on record keeping and inventory functions** | 4.1 | Types of reports to be produced from inventory records systems are identified |
| | | 4.2 | Reports are produced in accordance with workplace procedures and relevant regulatory requirements |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for TLIA3016 Use inventory systems to organise stock control

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and using relevant communications, computing and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- applications of different types of inventory systems and stock management approaches
- Australian codes and regulations relevant for organising stock control
- computer records and documentation requirements for stock control, including forms, checklists and inventory reports
- housekeeping standards and procedures
- operational inventory systems, equipment, management and site operating systems for controlling stock
- principles of operation and functions of inventory systems
- workplace procedures and policies for using inventory systems to organise stock control
- workplace processes for records management and producing inventory reports.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Resources for assessment include:

# TLID0019 Shift loads using manually-operated equipment

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to shift loads using manually-operated equipment.

It includes assessing the risks associated with relocating the load, planning the relocation process, carrying out the relocation with the aid of the equipment in accordance with the plan, and refurbishing the equipment and worksite in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations within the transport and logistics industry.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

D - Load Handling

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| **1 Assess risks associated with** | **1.1** Products, goods or materials to be relocated are identified and assessed for the appropriate relocation method |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **relocating loads** | **1.2** Storage location is determined |
| | **1.3** Routes to be followed are identified |
| | **1.4** Points of balance are estimated |
| | **1.5** Risks in potential routes are considered |
| | **1.6** Lifting equipment to minimise potential risks is identified |
| | **1.7** Appropriate personal protective equipment (PPE) is identified and used |
| | **1.8** Tools, load shifting equipment and other materials are selected and checked for serviceability and defects are reported to appropriate personnel |
| **2 Plan relocation of loads** | **2.1** Load is examined to determine condition, length, bulk and weight |
| | **2.2** Load shifting equipment is selected in accordance with workplace procedures |
| | **2.3** Safe procedures for using lifting equipment are identified, including the calculation of safe working load (SWL) and/or working load limit (WLL), for weight of goods to be moved |
| | **2.4** Process for relocating load is proposed, including predicting and planning for potential difficulties |
| | **2.5** Proposed process is checked against relevant code of practice and workplace procedures for compliance |
| | **2.6** Lifting equipment and accessories are checked for safe operation in accordance with manufacturer instructions and workplace procedures |
| **3 Relocate loads** | **3.1** Unsafe equipment is reported to appropriate personnel in accordance with workplace procedures |
| | **3.2** Load is broken down, where applicable, to allow handling and moving a number of single items to ensure the maximum weight is not exceeded in accordance with manufacturer instructions |
| | **3.3** Mechanical aids and field machines are constructed, when required, by the approved shifting method, so the load can be shifted in accordance with job instructions |
| | **3.4** Safe working limits for lifting equipment are identified and |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| | maintained |
| | **3.5** Planned process and route are followed using equipment within necessary range of limitations |
| | **3.6** Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability |
| | **3.7** Relocation is checked to ensure it meets work requirements and variances are reported to appropriate personnel |
| **4 Maintain equipment and worksite** | **4.1** Worksite is cleaned and cleared of debris and unwanted material |
| | **4.2** Field machines, tools and equipment are cleaned, inspected, maintained and stored in accordance with workplace procedures |
| | **4.3** Documentation is completed in accordance with workplace procedures |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLID1002 Shift a load using manually-operated equipment.

# Assessment Requirements for TLID0019 Shift loads using manually-operated equipment

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with workplace procedures
- applying precautions and required actions to minimise, control or eliminate hazards that may exist when shifting loads using manually-operated equipment
- communicating and working effectively with others when using manually-operated equipment to shift loads
- completing documentation related to work activities
- identifying load limits for lifting
- identifying manually-operated equipment and their capabilities
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading and interpreting instructions, procedures, information and signs relevant to shifting loads using manually-operated equipment
- relocating loads safely in accordance with workplace policies and procedures
- reporting and/or rectifying identified problems in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- effects of moving contents, which may be loose, liquid, dangerous or hazardous
- housekeeping standards and procedures
- problems when using manually-operated equipment to shift loads, and solutions
- relevant WHS/OHS procedures and guidelines concerning the use of manually-operated equipment to shift loads
- risks when using manually-operated equipment to shift loads, and related precautions to control these risks
- safe working load (SWL)
- site layout and obstacles
- workplace procedures and policies for shifting goods and materials using manually-operated equipment.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# TLID0021 Store and handle dangerous goods and hazardous substances

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to store and handle dangerous goods and hazardous substances.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

D – Load Handling

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| **1** | **Identify requirements for working with dangerous goods and/or hazardous substances** | **1.1** Dangerous goods and/or hazardous substances are identified from information, including class labels, manifests and other documentation |
| | | **1.2** Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards |
| | | **1.3** Storage requirements for dangerous goods and/or hazardous substances are identified and applied |
| | | **1.4** Legislative requirements for dangerous goods and/or hazardous substances are used to plan work activities |
| | | **1.5** Handling procedures for different classes and characteristics of goods are identified |
| | | **1.6** Confirmation is sought from relevant personnel where dangerous goods and/or hazardous materials do not appear to be appropriately marked |
| **2** | **Confirm site incident procedures** | **2.1** Incident reporting processes are identified |
| | | **2.2** Emergency equipment is identified and checked in accordance with workplace procedures and statutory regulations |
| | | **2.3** Emergency procedures are identified and confirmed |
| **3** | **Select handling techniques** | **3.1** Load handling and shifting techniques are identified in accordance with particular goods and workplace procedures |
| | | **3.2** Handling equipment is checked for conformity with workplace requirements and manufacturer guidelines |
| | | **3.3** Suitable signage or placards are checked for compliance with workplace procedures, as required |

# Assessment Requirements for TLID0021 Store and handle dangerous goods and hazardous substances

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- completing relevant documentation
- estimating weights and dimensions of loads and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods and/or hazardous substances
- identifying and selecting safety requirements for handling dangerous goods and/or hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport and/or for storage selected, as required
- identifying dangerous goods/hazardous substances using labels, Globally Harmonized System of Classification and Labelling of Chemicals (GHS), International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- maintaining workplace records and documentation
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and workplace procedures
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- recognising hazards and applying precautions and required action to minimise, control or

© Commonwealth of Australia, 2025 Skills Insight

eliminate recognised hazards
- relevant regulations, codes and signage concerning handling dangerous goods and hazardous substances including:
  - Australian Dangerous Goods (ADG) Code
  - Australian Standards
  - GHS
  - HAZCHEM signs
  - IMDG Code
- risks when handling dangerous goods and hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods and hazardous substances

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, current ADG Code, codes of practice, workplace procedures and operation manuals.

# Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

© Commonwealth of Australia, 2025 Skills Insight

requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment, and personal protective equipment currently used in industry.

# TLILIC0003 Licence to operate a forklift truck

## Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

## Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

## Pre-requisite Unit

Not applicable

## Competency Field

# Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| **1 Plan work/task** | **1.1** Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures |
| | **1.2** Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures |
| | **1.3** Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures |
| | **1.4** Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures |
| | **1.5** Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures |
| | **1.6** Traffic management plan implementation is confirmed in accordance with workplace procedures |
| | **1.7** Appropriate communication procedures are identified with relevant people in accordance with workplace procedures |
| | **1.8** All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| **2 Prepare for work/task** | **2.1** | Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures |
| | **2.2** | Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures |
| | **2.3** | Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures |
| | **2.4** | Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures |
| | **2.5** | Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures |
| | **2.6** | Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements |
| | **2.7** | Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures |
| | **2.8** | Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures |
| | **2.9** | Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures |
| **3 Perform work/task** | **3.1** | Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | **3.2** | Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures |
| | **3.3** | Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures |
| | **3.4** | Unplanned and unsafe situations are responded to in accordance with safe work procedures |
| | **3.5** | Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures |
| | **3.6** | Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures |
| **4 Pack Up** | **4.1** | Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures |
| | **4.2** | Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

# Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
  - maintaining safe operating speed
  - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
  - battery charge as required by manufacturer requirements
  - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
  - checking for signs of paint separation and stressed welds indicating potential structural weakness
  - document evidence of damage
  - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
  - ensuring availability of correct forklift truck logbook and updating records as required
  - ensuring forklift truck tynes or other attachment/s are securely fitted
  - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
  - fluid leaks
  - lights are working effectively
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
  - insufficient lighting
  - other specific hazards including dangerous goods
  - overhead hazards and fixed structures, roof beams and doorways
  - restricted and poorly ventilated areas

© Commonwealth of Australia, 2025 Skills Insight

  - surface suitability based on forklift truck and task requirements
  - the risk of collision with people, moving plant and fixed structures
  - weather conditions
- complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
- conducting operational checks, which must ensure:
  - all controls are located, identified and tested for functionality
  - all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. reversing beepers, lights and horns) are functional
  - recording and maintaining accurate information relating to forklift truck operations
  - safety devices as fitted
  - start-up is in accordance with manufacturer requirements
  - steering, transmission and brake functions comply with operating requirements
  - there are no unusual noises
- confirming and following traffic management plan procedures relevant to their role in the work area
- conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
- determining relevant lifting attachment to perform work/task
- determining lift requirements including:
  - positioning of unusually balanced/shaped loads
  - centre of gravity
  - dynamic nature of load
  - tyne/attachment positioning
  - weight
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various environmental conditions
- maintaining communication with other workplace personnel through using worksite procedures including:
  - audible and visual warning devices
  - signage
  - two-way radio
  - verbal instructions
  - written instructions
- maintaining three points of contact whilst accessing and egressing forklift truck and ensuring

© Commonwealth of Australia, 2025 Skills Insight

rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
  - aligning tynes/attachment to load
  - carrying out a lift to 75% of the maximum height
  - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
  - correctly using horns and mirrors in workplace
  - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
  - driving applicable to conditions and moving loads safely
  - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
    - an 'S' bend with a minimum 90 degrees left and right turn
    - ensuring load/s remains stable through pick up, transport and placement
    - forklift truck speed is appropriate to load and surroundings
    - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
  - tilting mast (or forks if applicable) to ensure balance of load
  - using gluts/dunnage appropriately and lowering load safely
  - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
- reporting to relevant person/s on site risk control measures that are not in place or are deficient
- setting up an exclusion zone
- securely parking forklift truck and isolating in appropriate position including:
  - minimising possible access by unauthorised person/s
  - tynes/attachment lowered to required position in accordance with manufacturer requirements
  - park brake applied
  - switching off, isolating fuel/power source and removing key according to workplace procedures
- shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

# Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
- communication procedures including:
  - audible and visual warning devices
  - hand signals
  - questioning techniques
  - signage
  - traffic warning systems
  - two-way radio
  - written instructions
- forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
- impact of the following on the operation of the forklift truck including:
  - failure/loss of control including brakes and steering
  - failure of equipment during forklift truck operations
  - forklift truck instability causes including:
    - deterioration of ground condition
    - overloading
    - pick up and placement of load
    - irregular loads
  - operating on ramps and uneven surfaces and in restricted spaces
  - use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
    - labels on the actual load
    - markings on the actual load
    - paperwork such as consignment notes, running sheets and weighbridge dockets
    - weighing a carton and calculating load
- manufacturer requirements, instructions and operator's manual
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
  - wind
  - lightning
  - water/ice impacted surface/ground
  - rain
  - extreme heat
  - Ultra violet (UV) exposure
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
  - lock out and tag out procedures
- relevant procedures for refuelling and recharging forklift truck using appropriate PPE

© Commonwealth of Australia, 2025 Skills Insight

including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling

- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
  - bale clamps
  - carpet spike for carpet rolls
  - drum carrier
  - jib attachment
  - paper roll clamps
  - personnel work platforms
  - rotators
  - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
  - backfilled ground
  - bitumen (damaged, cracked)
  - concrete (damaged, cracked)
  - hard compacted soil
  - potholes
  - railway tracks
  - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
  - soft soils
  - trench covers
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety

© Commonwealth of Australia, 2025 Skills Insight

and Health (OSH) requirements, safe work and workplace procedures

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

# UEEEC0072 Troubleshoot microcontroller-based hardware systems

## Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

## Application

This unit involves the skills and knowledge required to troubleshoot microcontroller-based hardware systems.

It includes solving microcontroller hardware and firmware problems by determining correct operation of microcontroller system, and providing solutions derived from measurements and calculations to predictable faults in microcontroller hardware.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Electronics and Communications

## Unit Sector

Electrotechnology

## Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|---|---|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| **1 Prepare to work on microcontroller hardware** | **1.1** Work health and safety (WHS)/occupational health and safety (OHS) requirements and workplace procedures for a given work area are obtained and applied |
| | **1.2** WHS/OHS risk control work preparation measures and |

© Commonwealth of Australia, 2025 Skills Insight

| | | |
|---|---|---|
| | | procedures are followed |
| | **1.3** | Nature of microcontroller hardware problems is obtained from documentation or from work supervisor to establish the scope of work to be undertaken |
| | **1.4** | Advice is sought from the work supervisor to ensure the work is coordinated effectively with others |
| | **1.5** | Sources of materials required for the work are established in accordance with workplace procedures |
| | **1.6** | Tools, equipment and testing devices needed to carry out the work are obtained and checked for correct operation and safety |
| **2 Solve microcontroller hardware and firmware problems** | **2.1** | WHS/OHS risk control work measures and procedures are followed |
| | **2.2** | Need to test or measure live work is determined in strict accordance with WHS/OHS requirements and, as required, conducted within established safety procedures |
| | **2.3** | Circuits are checked as being isolated, as necessary, in strict accordance with WHS/OHS requirements and workplace procedures |
| | **2.4** | Established methods are used to solve problems from measured and calculated values as they apply to microcontroller hardware |
| | **2.5** | Unplanned situations are responded to in accordance with workplace procedures in a manner that minimises risk to personnel and equipment |
| | **2.6** | Problems are solved without unnecessary damage to apparatus, circuits, the surrounding environment or services using sustainable energy practices |
| **3 Complete work and document problem-solving activities** | **3.1** | WHS/OHS work completion risk control measures and procedures are followed |
| | **3.2** | Worksite is cleaned and made safe in accordance with established procedures |
| | **3.3** | Justification for solutions used to solve circuit problems are documented |

© Commonwealth of Australia, 2025 Skills Insight

| | |
|---|---|
| **3.4** | Work completion is documented and appropriate person/s notified in accordance with workplace procedures |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UEE Electrotechnology Training Package Companion Volume Implementation Guide.

| | |
|---|---|
| Troubleshooting must include at least two of the following types of microcontroller hardware problems: | • determining the operating parameters of an existing circuit<br>• altering an existing circuit to comply with specified operating parameters<br>• developing circuits to comply with a specified function and operating parameters |

## Unit Mapping Information

This unit replaces and is equivalent to UEENEEH166A Troubleshoot microcontroller based hardware systems.

# Assessment Requirements for UEEEC0072 Troubleshoot microcontroller-based hardware systems

## Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (WHS/OHS) requirements, workplace procedures and practices, including using risk control measures
- applying sustainable energy principles and practices
- calculating parameters correctly and accurately
- dealing with unplanned events/situations in accordance with workplace procedures in a manner that minimises risk to personnel and equipment
- providing solutions to microcontroller component/circuit problems
- providing written justification for the solutions to problems
- taking measurements correctly and accurately
- using an industry standard programming environment to load, test and debug code
- using methodical problem-solving methods
- using a microcontroller’s internal communications peripherals to communicate with a secondary device, including microcontroller, computer and/or sensor.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- dealing with intermittent faults
- electronic fault-finding techniques and fault identification techniques
- fault-finding methods, including visual inspection, sectional testing, split-half tests and component isolation
- input/output (I/O) ports: analogue/digital
- integrated peripherals, including timers, interrupts, hardware multiplier, internal oscillators, comparators, analogue to digital converter's (ADC’s) and digital to analogue converter's (DAC’s), pulse width modulation (PWM) modules and serial ports
- interfacing different logic level voltages in a microcontroller circuit

© Commonwealth of Australia, 2025 Skills Insight

- microcontroller-based systems troubleshooting
- microcontroller internal peripheral communication circuitry and associated hardware and protocols (examples include but not limited to recommended standard 232 (RS-232), I²C, SPI, and 1 wire
- microcontroller systems, including:
  - digital systems concepts associated with microcontroller-based systems
  - microcontroller architecture
  - microcontroller instruction set
  - microcontroller manufacturers
  - microcontroller system block diagram
- relevant data storage types
- relevant job safety assessments or risk mitigation processes
- relevant logic level standards
- relevant manufacturer specifications
- relevant WHS/OHS legislated requirements
- relevant workplace documentation
- relevant workplace policies and procedures
- reset circuit
- system clock circuitry.

# Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in suitable simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry
- resources that reflect current industry practices in relation to fault finding microcontroller-based hardware
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
