Assessment Requirements for MSMOPS363 Organise on-site work

Release: 1

Assessment Requirements for MSMOPS363 Organise on-site work

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS363A Organise on site work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify job requirements and site conditions and plan the work
- sequence and schedule work tasks and stages to maximise efficiency and meet quality specifications
- select and arrange all equipment and materials for the site and set up tools, equipment and materials on site
- identify hazards and apply relevant hazard controls
- read and interpret work specifications, work orders, job sheets and material labels
- communicate effectively with team/work group and other personnel at the site
- apply operational knowledge to non-routine problems.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including:
 - work permit systems
 - safety, emergency and hazard control
 - relevant organisation standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
 - their possible causes
 - potential consequences
 - appropriate risk controls
- hierarchy of controls
- work flow sequences and materials demand
- factors and potential effects of variations in raw materials and equipment operation in relation to quality of product
- planning process, including breaking the work down into steps and stages
- products, materials and material characteristics.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
 - The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.
