MSMPER201 Monitor and control work permits

Release: 1

MSMPER201 Monitor and control work permits

Modification History

Release 1. Supersedes and is equivalent to MSAPMPER201A Monitor and control work permits

Application

This unit of competency covers the skills and knowledge required to monitor a work situation in which the activity is conducted under a permit to work. The individual will be required to monitor the work situation for conformance to the permit and immediately intervene if the parameters of the permit are not met or work proceeds outside the boundaries set by the permit.

This role is typically carried out by the plant operator for that area or other suitably qualified person.

The role of 'hole watcher' and 'fire watcher' are covered by MSMPER202 Observe permit work

This unit of competency carries a high level of responsibility and the level and area of responsibility of the role is typically prescribed by the permit process.

This unit of competency applies to the activities and functions associated with work carried out in a hazard controlled environment.

Not all sites/plants will have all permits. Some sites will call permits by other names, e.g. clearances.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- | | | | |
|---|--|-----|---|
| 1 | Identify and monitor permit conditions | 1.1 | Identify permit requirements |
| | | 1.2 | Monitor conditions to ensure that the work being conducted conforms to the issued permit requirements |
| | | 1.3 | Identify and communicate changes in the operating conditions or requirements of the permit to permit holders to ensure they are kept aware of any hazards |
| 2 | Control work permit systems | 2.1 | Check and verify the permit holder's knowledge of the issued permit and its requirements before allowing any work to be undertaken |
| | | 2.2 | Control work activities to comply with the work permit system and safety procedures |
| | | 2.3 | Undertake site inspections to ensure that the work to be undertaken is in sequence and completed in a safe and coordinated manner |
| | | 2.4 | Identify hazards, and confirm with those undertaking the permitted work that control measures, as defined in the permit, are established |
| 3 | Identify and action non-compliance | 3.1 | Identify conditions of active permits |
| | | 3.2 | Take corrective action upon incidences of non-compliance with permit conditions through the withdrawal or suspension of the issued permit |
| | | 3.3 | Report and record incidents of non-compliance according to procedures |
| 4 | Confirm compliance with permit | 4.1 | Complete checklists in accordance with standard procedures |
| | | 4.2 | Document and communicate findings to appropriate personnel |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirement
- Dangerous Goods regulations
- Hazardous substances regulations
- Hazardous Substances Information System
- Major hazard facility requirements, if relevant
- Australian Standard AS 2865-2009 Confined spaces
- Australian Standard AS 1674 Set-2007 Safety in welding and allied processes (covers all hot work)
- Australian Standard AS 4024.1-2014 Series - Safety of machinery
- Australian Standard AS/NZ 1715:2009 Selection use and maintenance of respiratory protective equipment
- National Standard for Plant [NOHSC:1010 (1994)]
- National exposure standards for atmospheric contaminants in the occupational environment [NOHSC:1003 (1995)]

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- permit control system

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Work permits

Work permits include one or more of the following:

- cold work
- excavation
- vehicle entry
- minor repairs
- working at heights
- hot work
- confined space
- electrical
- increased hazard
- permits covering a single plant item or plant area, such as might be an operator's scope of responsibility
- other relevant permits

The work control (permit) system

The work permit system includes:

- types of permits
- legislative/regulatory/standards framework
- roles and responsibilities of parties under the permit system
- specifications for undertaking the work covered by a permit
- alternative ways of conducting a job

Work specifications

Work specifications include one or more of the following:

- any requirements for testing of atmospheric conditions and ventilation
- safety structures and control measures
- communications
- incident response
- equipment which can and cannot be used

Safety structures and control

Safety structures and control measures include one or more of the following:

measures

- isolations
- lockout/tag out
- barriers and signage
- emergency response
- gas testing/atmosphere monitoring
- standby person
- other measures specified in the permit

Monitor

Monitor includes observing conditions of the workplace at a frequency appropriate to the risk and work practices, and includes one or more of the following:

- supervision/monitoring of contractors and/or employees
- verification of permits, licences and tests
- document control
- checking work activities against permit conditions, site-specific safety procedures and requirements and relevant legislation/codes
- identifying non-compliances
-

Tools and equipment

Tools and equipment include one or more of the following:

- locks and tags
- blinds/blanks
- blind/blank list
- gas testers and monitors
- barricades
- signage
- communications equipment
- process and equipment drawings
-

Hazards

Hazards include one or more of:

- process isolations incomplete
- mechanical and electrical isolations not in place
- atmospheric testing incomplete and atmosphere not safe
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass

- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working where a fall is reasonably likely, in restricted or confined spaces, or in environments subjected to heat, noise, dusts, smoke, darkness, vapours or other atmospheric hazards
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMPER201A Monitor and control work permits
