**Assessment Requirements for
MSMPMC301 Store materials for
production**

Release: 1

Assessment Requirements for MSMPMC301 Store materials for production

Modification History

Release 1. New unit. Supersedes and is equivalent to PMC561072 Store materials for production

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- stored materials for production on at least 1 occasion, including:
 - performing checks and measurements to store materials and maintain quantity, quality, physical and chemical state
 - recognising possible causes of the following routine problems:
 - equipment failure, faults and abnormalities
 - raw material variations
 - procedure errors.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of safe and efficient storage
- types of materials commonly stored in the work environment and their characteristics
- impact of contamination
- principles of operation of transfer system and equipment
- testing procedures
- manual handling techniques and ergonomics
- safe storage of dangerous goods and hazardous materials
- transport requirements and restrictions for products and materials
- routine problems, their probable causes and relevant corrective actions
- storage hazards and:
 - their possible causes
 - potential consequences
 - risk control procedures.
 -

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - storage equipment and ancillary equipment
 - materials to be stored
 - specifications, procedures and job sheets
- modelling of industry operating conditions, including:
 - routine and non-routine problems.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
