

MSMRV352 Remove and replace a recreational vehicle sidewall cladding

Release: 1

MSMRV352 Remove and replace a recreational vehicle sidewall cladding

Modification History

Release 1 - New unit.

Application

This unit of competency covers the skills and knowledge required to remove and replace the side wall cladding of a recreational vehicle. The same cladding may be replaced, or the removed cladding may be replaced with a different cladding. This unit includes the removal and replacement of a single strip of cladding up to an entire sidewall cladding. The work will be carried out in a recreational vehicle service and repair facility.

This unit of competency covers the preparation for, removal of, replacement of, and clean-up after the removal and replacement of a floor.

The operator will be required to work to procedures, and follow plans/specifications, insurance requirements and customer needs.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

required

sidewall frame as

	devised procedures		devised procedure
		4.3	Trim as required
		4.4	Ensure cladding is attached as required
5	Finish removal and replacement of sidewall cladding	5.1	Check sidewall cladding has been refitted correctly and make any required adjustments
		5.2	Clean up recreational vehicle and make ready for hand back to customer
		5.3	Clean up work area, leaving it ready for the next job
		5.4	Segregate and handle waste in accordance with procedures
		5.5	Complete any required documentation/records

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- · Australian and other standards
- licence and certification requirements

Approved Page 4 of 6

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- · temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards

Hazards include one or more of the following:

- heat, dust or other atmospheric hazards
- electricity
- gas
- equipment failures
- industrial (machinery, equipment and product)
- · noise, rotational equipment or vibration
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- other hazards that might arise

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- equipment/plant/machine malfunction
- variations in process conditions
- variations in materials or contamination of materials
- · equipment, tool, die or mould damage
- · product faults
- tooling problems

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Approved Page 5 of 6

Non-routine problems must be reported according to relevant procedures.
