MSMRV360 Service camper wind up systems

Release: 1

MSMRV360 Service camper wind up systems

Modification History

Release 1 - New unit.

Application

This unit of competency covers the skills and knowledge required to service the wind up system of a camper van. The work will be carried out in a recreational vehicle service and repair facility.

This unit of competency covers the preparation for, servicing of and clean-up after wind up servicing.

The operator will be required to work to procedures, and follow plans/specifications, insurance requirements and customer needs.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- | | | |
|------------------------|------------|--|
| 1 Plan the work | 1.1 | Review the requirements of the work, including insurance requirements and customer needs |
| | 1.2 | Examine wind up system and determine what needs to be done and how to do it |
| | 1.3 | Check required tools are available at the worksite |

- | | | | |
|---|---|-----|--|
| | | 1.4 | Check required materials and components are available at the worksite |
| | | 1.5 | Identify any hazards and the related hazard controls |
| | | 1.6 | Check that hazard controls are in place and operational |
| | | 1.7 | Query any items that are different to usual and clarify requirements |
| 2 | Service the wind up system in accordance with devised procedures | 2.1 | Use relevant hazard controls, including personal protective equipment (PPE) |
| | | 2.2 | Clean the wind up system as required |
| | | 2.3 | Lubricate the wind up system as required |
| | | 2.4 | Replace any components which need replacing |
| | | 2.5 | Make any required adjustments to the wind up system |
| | | 2.6 | Segregate and handle waste in accordance with procedures |
| 3 | Finish wind up system service | 3.1 | Check wind up system functions as intended and make any required adjustments |
| | | 3.2 | Clean up recreational vehicle and make ready for hand back to customer |
| | | 3.3 | Clean up work area, leaving it ready for the next job |
| | | 3.4 | Segregate and handle waste in accordance with procedures |
| | | 3.5 | Complete any required documentation/records |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards Hazards include one or more of the following:

- heat, dust or other atmospheric hazards
- electricity
- gas
- equipment failures
- industrial (machinery, equipment and product)
- noise, rotational equipment or vibration
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- other hazards that might arise

Routine Routine problems must be resolved by applying known solutions.

problems

Routine problems are predictable and include one or more of the following:

- equipment/plant/machine malfunction
- variations in process conditions
- variations in materials or contamination of materials
- equipment, tool, die or mould damage
- product faults
- tooling problems

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to relevant procedures.
