**Release: 1**

# MSMRV363 Complete pre-delivery check of a recreational vehicle

## Modification History

Release 1 - New unit.

## Application

This unit of competency covers the skills and knowledge required to complete the pre-delivery checks on a recreational vehicle. The work will be carried out in a recreational vehicle service and repair facility.

The operator will be required to work to procedures, and follow plans/specifications, insurance requirements and customer needs.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- |   |                                 |     |   |
|---|---------------------------------|-----|---|
| 1 | <b>Identify required checks</b> | 1.1 | Identify the work which was to be done, including insurance requirements and customer needs |
|   |                                 | 1.2 | Check that the work has been completed  |
|   |                                 | 1.3 | List all checks/tests which need to be undertaken as a result of that work                  |

- |   |   |  |
|---|---|--|
|   | 1.4   | Identify any hazards and the related hazard controls                                   |
|   | 1.5   | Check that hazard controls are in place and operational                                |
|   | 1.6   | Query any items that are different to usual and clarify requirements                   |
| 2 | <b>Undertake checks in accordance with procedures</b> |  |
|   | 2.1   | Use relevant hazard controls, including personal protective equipment (PPE)            |
|   | 2.2   | Complete all checks/tests arising from the work which was done                         |
|   | 2.3   | Check the recreational vehicle is clean and tidy inside and out                        |
|   | 2.4   | Make any adjustments/arrange for re-work as required                                   |
|   | 2.5   | Check all other appliances and features function as intended                           |
|   | 2.6   | Compile a list of any items requiring attention  |
| 3 | <b>Finish pre-delivery check</b>                      |  |
|   | 3.1   | Complete any required documentation/records  |
|   | 3.2   | Advise that the work has been completed  |
|   | 3.3   | Advise of work required to address items requiring attention                           |
|   | 3.4   | Seek agreement to undertake additional work, or note that it is required in the future |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework** The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures** All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Hazards** Hazards include one or more of the following:

- heat, dust or other atmospheric hazards
- electricity
- gas
- equipment failures
- industrial (machinery, equipment and product)
- noise, rotational equipment or vibration
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- other hazards that might arise

**Routine problems** Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- equipment/plant/machine malfunction
- variations in process conditions
- variations in materials or contamination of materials
- equipment, tool, die or mould damage
- product faults
- tooling problems

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to relevant procedures.
