MSMSS00010 Trade Measurement Verification (Liquid Measuring Instrument Using Volume Measures)

Release 1

MSMSS00010 Trade Measurement Verification (Liquid Measuring Instrument Using Volume Measures)

Modification History

Release 1. Supersedes and is equivalent to MSASS00009 Trade Measurement Verification (Liquid Measuring Instrument Using Volume Measures)

Description

This Skill Set provided the units required to work under a servicing license to verify liquid measuring instruments using volume measures.

Pathways Information

These units can provide credit towards qualifications within the Manufacturing Training Package. If verifiers seek employment as trade measurement inspectors, these competencies may provide recognition towards the relevant Certificates IV in the PSP Public Service Training Package.

Licensing/Regulatory Information

This Skill Set reflects the minimum requirements for licensing. However, the regulator or individual traders may impose additional requirements before a verifier can start work on some sites.

Skill Set Requirements

MSMTMVER402 Verify liquid measuring instruments using volume measures

MSMTMREF301 Use and maintain reference standards

Target Group

This Skill Set is appropriate for experienced personnel such as fitters, mechanics, instrument manufacturers or importers and software developers who wish to work under a servicing licence to verify liquid measuring instruments used in trade measurement. Examples of liquid measuring instruments using volume measures include, fuel dispensers other than LPG dispensers, bulk flowmetering systems for liquid hydrocarbons other than LPG and milk flowmeters.

Suggested words for Statement of Attainment

These units are taken from the Manufacturing Training Package and provide competencies that meet the minimum requirements for licensing as a verifier of a liquid measuring instrument using volume measures.
