MSMSS00011 Trade Measurement Verification (Simple Measuring Instrument)

Release 1

MSMSS00011 Trade Measurement Verification (Simple Measuring Instrument)

Modification History

Release 1. Supersedes and is equivalent to MSASS00010 Trade Measurement Verification (Simple Measuring Instrument)

Description

This Skill Set provided the units required to work under a servicing license to verify a simple measuring instrument.

Pathways Information

These units can provide credit towards qualifications within the Manufacturing Training Package. If verifiers seek employment as trade measurement inspectors, these competencies may provide recognition towards the relevant Certificates IV in the PSP Public Service Training Package.

Licensing/Regulatory Information

This Skill Set reflects the minimum requirements for licensing. However, the regulator or individual traders may impose additional requirements before a verifier can start work on some sites.

Skill Set Requirements

MSMTMVER302	Verify simple measuring instruments
MSMTMREF301	Use and maintain reference standards

Target Group

This Skill Set is appropriate for experienced personnel such as quality assurance technicians, instrument manufacturers or importers and software developers who wish to work under a servicing licence to verify simple measuring instruments used in trade measurement.

Examples of simple measuring instruments include, beverage measuring instruments, protein measuring instruments, length measuring instruments, area measuring instruments' dimensional measuring instruments, vehicle tanks and milk tanks.
