# **Assessment Requirements for MSMWHS205 Control minor incidents**

**Release: 1**

# Assessment Requirements for MSMWHS205 Control minor incidents

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS205A Control minor incidents

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- recognise an incident
- evaluate the incident and select an appropriate response
- check equipment and apply correct follow-up procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- classification of fires and other incidents relevant to job/site
- types and application of first response equipment and personal protection equipment (PPE)
- limitations of first response equipment
- situations that must not be responded to because of the risk to life
- scope and limitations of own role and responsibilities
- appropriate personnel for referral and reporting.

## Assessment Conditions

- Competency must be achieved before performing this work unsupervised. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - must include the use and actual deployment of appropriate tools, equipment (e.g. fire-extinguishers and spill kits) and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use simulated fires, losses of containment or other incidents
  - is not expected to require the use of a fire ground or similar.

- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.
