MSS025031 Assess the environmental risk and impact of a project activity or process

Release: 1

MSS025031 Assess the environmental risk and impact of a project activity or process

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Supersedes and is equivalent to MSS025018 Assess the environmental risk and impact of a project activity or process.

Application

This unit describes the skills and knowledge required to assess the environmental risks and impacts of specific activities and determine appropriate responses.

This unit applies to environmental technicians and similar roles who are required to work within the environmental management system to determine the impact of activities across the physical, biological and social aspects of the local environment (including positive and negative impacts), assess risks and liaise with others to recommend solutions. They work under the supervision of environmental managers, scientists, engineers and/or planners.

This unit applies in a range of sectors including but not limited to environmental monitoring and sampling; occupational hygiene monitoring; groundwater and clean water; water treatment, storm and wastewater management; solid and hazardous waste management; site remediation or rehabilitation; management of contaminated sites; geotechnical services and civil engineering; natural resource management; resource efficiency.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

MSS024027 Participate in environmental field work

Competency Field

Environmental monitoring and technology

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Clarify the project activity or process and environmental	1.1 Review the history of the project activity or process and scope of the required risk and impact assessment

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
management framework	1.2 Identify legislative, regulatory and licensing requirements relevant to site 1.3 Access, read and interpret information about the site relevant to environmental issues and environmental management 1.4 Write a detailed description of all phases of the project or process and the site or project environment 1.5 Confirm project or process details, risk assessment procedure and risk assessment criteria with supervisor
2. Identify environmental issues for project activity or process	2.1 Consult with organisational personnel to identify actual and potential environmental issues for the organisation 2.2 Liaise with supervisor to identify and seek input from community representatives and/or environmental specialists 2.3 Identify significant hazards and short- and long-term risks associated with the process or project activity 2.4 Analyse each part of the process or project to determine positive and negative impacts on the physical, biological and social components of local environment and ecological linkages operating at the site
3. Assess environmental risks and impacts	3.1 Use agreed assessment criteria to evaluate activities and negative impacts to determine significant risks and impacts 3.2 Summarise significant environmental risks and impacts and the evidence used to justify the assessment
4. Develop response to risks and impacts	4.1 Read and interpret organisation environmental management documents to identify specified methods for controlling risks and minimising impacts at the site 4.2 Work with relevant personnel and experts to determine alternative solutions 4.3 Identify amendments to project activities, alternative processes or improved environmental management actions to minimise risks and impacts 4.4 Evaluate options to identify feasible and economically viable solutions, and document the case for adopting them
5. Report findings	5.1 Report the assessment of environmental risks and impacts in the required format and expected time frame 5.2 Brief supervisor and stakeholders about the environmental

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	assessment process and outcomes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret complex workplace documents and legislative, regulatory and licensing requirements
- Writing skills to report on assessment process and outcomes
- Oral communication skills to liaise with supervisor, specialists and stakeholders
- Numeracy skills to interpret environmental data.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS025018 Assess the environmental risk and impact of a project activity or process.
