

**Australian Government**

**MSSSS00010 SS10 Improve energy usage  
for a process or organisation**

**Release 1**

## **MSSSS00010 SS10 Improve energy usage for a process or organisation**

### **Modification History**

New Skill Set. Unit codes updated. Supersedes MSSSS00003 SS3 Improve energy usage for a process or organisation.

### **Description**

This Skill Set provides the skills to make improvements to energy usage. It is intended to build on technical or operational qualifications or equivalent vocational experience relevant to business operations.

### **Pathways Information**

These units can provide credit towards the MSS50118 Diploma of Sustainable Operations. These units may also be applied where other aspects of sustainability are identified as the priority issues in which case a Statement of Attainment will be issued instead of the Skill Set.

### **Licensing/Regulatory Information**

Not applicable.

### **Skill Set Requirements**

MSS405086	Develop sustainable energy practices
MSS015022	Develop strategies for more sustainable use of resources

### **Target Group**

This Skill Set targets people who need to make energy improvements, based on available data, and to ensure that improvements are embedded in day-to-day work.

### **Suggested words for Statement of Attainment**

These competencies from the MSS Sustainability Training Package meet the minimum industry requirements for improving energy usage for a process or organisation.
