MSSSS00030 Determine energy usage

Release: 1

MSSSS00030 Determine energy usage

Modification History

Release 1. Unit code/s updated. Unit title/s updated. Supersedes and is not equivalent to MSSSS00009 Determine energy usage.

Description

This Skill Set provides the skills to determine energy usage and make recommendations for improvements. It is intended to build on technical or operational qualifications or equivalent vocational experience relevant to business operations.

Pathways Information

These units can provide credit towards the MSS50122 Diploma of Sustainable Operations.

Licensing/Regulatory Information

Nil

Skill Set Requirements

Unit Code	Unit Title
MSS015040	Conduct a sustainability energy audit
MSS015042	Measure and report carbon footprint

Target Group

This Skill Set targets those who need to measure and calculate the energy consumption of an organisation or part of its value chain in order to determine priority areas for activity that will increase sustainability.

Suggested words for Statement of Attainment

These competencies from the MSS Sustainability Training Package meet the minimum industry requirements for determining energy usage and recommending improvements.
