Assessment Requirements for MSTAT6002

Design a garment range

Release: 1

Assessment Requirements for MSTAT6002 Design a garment range

Modification History

Release 1. Unit Code, Title and Application changed. Title changed to broaden application. Element 1 removed. Foundation Skills field populated. Range of Conditions removed with relevant information moved to Knowledge Evidence. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is equivalent to MSTFD6006 Develop a fashion range.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- design, cost and present concepts for a garment range of at least 10 pieces, with concepts to demonstrate cohesion in use of the elements and principles of design and respond to all of the following aspects of the design brief:
 - business goals
 - end-use requirements
 - ethical, sustainability and product stewardship considerations
 - supply chain management
 - marketing-related issues, including target market characteristics
 - concept style and feature requirements
 - financial considerations
 - production capability
 - quality standards
 - timelines.
 -

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- elements and principles of design and how they are used to create good garment design and a cohesive range
- wider industry context, considerations and inspirations for range development, including current and emerging local and global trends
- ethical, sustainability and product stewardship considerations
- copyright and intellectual property obligations
- components of a design brief and project parameters and how these impact the design process for a range

- garment production, materials and processes
- design and production costs and how these are calculated and presented, including:
 - time
 - labour
 - materials
 - trims and accessories
 - overheads
 - fabrics
- tools and techniques for presenting range concepts.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a design brief
 - information technology for research and communication
 - fabrics and materials for testing and experimentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
