**Assessment Requirements for MSTCL2005
Use specialised machinery or processes to
assist TCF production**

Release: 1

Assessment Requirements for MSTCL2005 Use specialised machinery or processes to assist TCF production

Modification History

Release 1. Supersedes:

- LMTCL2005B Use specialised machinery or processes to assist assembly production
- LMTTX2014B Use specialised machinery to assist textile production

Not equivalent

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing operations
- checking work against job specifications and workplace standards
- operating one (1) or more specialised machines to assist textile, clothing and footwear (TCF) production on at least two (2) occasions
- applying machine operation techniques according to machine specifications and workplace requirements to complete work
- carrying out minor machine maintenance according to workplace procedures
- assessing production outputs to check work complies with quality standards and production specifications
- identifying, reporting and recording any machine or production faults
- applying workplace procedures
- providing oral or written reports according to workplace requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specialised machinery, such as:
 - moulding machine
 - fusing machine
 - gluing machine
 - ticket or label printer
 - button holing machine

- cuff turner and fuser
- pocket setting
- button sewer
- operating and routine maintenance procedures for specialised machines
- characteristics of textiles, fabrics, threads and other materials used in TCF operations and product assembly
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in using specialised machinery or processes to assist assembly production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
