# **MSTFD6009 Analyse fashion industry textiles to guide commercial development**

**Release: 1**

# MSTFD6009 Analyse fashion industry textiles to guide commercial development

## Modification History

Release 1. Supersedes and is equivalent to LMTFD6009B Analyse fashion industry textiles to guide commercial development

## Application

This unit of competency covers the skills and knowledge required to research and analyse textiles used in the fashion and clothing industries, and make recommendations to guide the commercial development of fashion products.

The unit of competency applies to individuals who need to make recommendations to guide commercial development of materials and products on aspects, such as quality, processing, finish, use, properties or performance. The unit of competency applies to working with raw materials, partially finished and finished fashion products.

Work is performed in line with a broad plan or strategy and workplace practices. Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fashion design and technology

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Determine job requirements</b>	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
    - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to analyse fashion industry textiles**
  - 2.1 Establish research objectives, criteria for research and develop a research plan
  - 2.2 Research textiles used in fashion products to determine properties, qualities, aesthetic and performance characteristics
  - 2.3 Investigate new and emerging textiles and textile processing techniques
  - 2.4 Research global and domestic trends in using textiles for fashion products
  - 2.5 Use a range of routine and non-routine tests to gather data on textiles
- 3 **Research fashion products**
  - 3.1 Identify fashion products or uses incorporating researched textiles
  - 3.2 Research quality and performance characteristics of a sample range of partially completed or finished fashion products
  - 3.3 Identify factors influencing quality of fashion products and examine product faults
  - 3.4 Research global and domestic implications for use of fashion products
  - 3.5 Use a range of routine and non-routine tests to gather data on fashion product quality
- 4 **Analyse findings of textile research**
  - 4.1 Analyse research findings against research objectives and criteria, and prioritise according to significance
  - 4.2 Review methodology to identify any potential influences on findings

- 4.3 Analyse findings to establish potential contributions to commercial developments
    - 4.4 Take into account intellectual property and ethical practice to select findings with most potential for further review
- 5 **Evaluate and finalise research into fashion industry textiles**
  - 5.1 Analyse features and benefits of selected findings
  - 5.2 Analyse disadvantages or risks associated with selected findings
  - 5.3 Develop recommendations on how findings can be used for commercial gain
  - 5.4 Document research findings and recommendations
  - 5.5 Check data for accuracy and relevance, and prepare a report for presentation

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping

- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Research criteria includes:**

- scope of research
- required documentation
- required research verification
- research methodologies
- timing
- commercial constraints or requirements

**Fashion textiles include one or more of the following:**

- natural fibres, such as cotton, wool, silk and linen
- synthetic fibres, such as polyamide and polyester, acrylic, lycra, rayon and acetate
- natural and synthetic single-yarn fabrics and blends, including:
  - knitted fabrics, such as weft knits and warp knits
  - woven fabrics, such as plain, twill, satin, dobby, jacquard and pile
  - non-woven fabrics, such as felts, nets, braids, bonded and composite
- emerging smart fabrics
- raw materials
- new and emerging textiles
- yarn

**Reports include one or more of the following:**

- report format that meets work requirements
- formal structure with relevant headings
- report content, including:
  - text
  - graphs
  - charts
  - tables
  - diagrams

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to LMTFD6009B Analyse fashion industry textiles to guide commercial development
