Assessment Requirements for MSTGN2010

Perform tasks to support production

Release: 1

Assessment Requirements for MSTGN2010 Perform tasks to support production

Modification History

Release 1. Supersedes and is equivalent to LMTGN2010B Perform tasks to support production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- safely using and disposing of chemical used in production
- interpreting and applying established workplace procedures
- preparing and organising required tools and equipment
- performing tasks to meet requirements and comply with record keeping and workplace procedures
- using correct manual handling techniques to provide assistance in transfer or removal of materials or products
- documenting and transferring information
- clarifying and checking task-related information
- carrying out work according to work health and safety (WHS) practices and facilitating environmental protection, safe waste disposal, pollution control and recycling.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- procedures and requirements for cleaning and housekeeping
- use of relevant products and materials
- maintenance planning and workplace practices
- manual handling techniques
- manual tools and equipment
- procedures for handling, storage and disposal of cleaning chemicals
- quality standards and practices
- WHS practices, including hazard identification and control measures
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in performing tasks to support production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.
