

MSTGN4011 Coordinate the quality system and procedures

Release: 1

MSTGN4011 Coordinate the quality system and procedures

Modification History

Release 1. Supersedes:

- LMTGN4011A Coordinate the quality system and procedures Equivalent
- LMTLA4001A Monitor compliance with industry standards and regulations Not equivalent

•

Application

This unit of competency covers the skills and knowledge required to coordinate the implementation of quality procedures and a quality assurance system within a work area of a textiles, clothing and footwear (TCF) enterprise.

The unit of competency applies to coordinating quality practices, maintaining work quality, and contributing to quality improvement of team/section output.

This unit of competency is applicable to all sectors of the TCF industry.

Work requires initiative and judgement to take appropriate action and may be conducted in large scale production or small business.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Quality assurance systems include, but are not limited to, one or more of the following:

- identification and elimination of hazards and other WHS risk factors
- setting the procedures to eliminate faults and variation
- setting procedures to achieve set standards of quality and efficiency
- testing of textiles, fabrics, dyes, colour fastness finishes, yarns or other materials or finished TCF products

Developing a quality system framework includes, but is not limited to, one or more of the following:

- developing sampling techniques which reflect the needs of the work area
- establishing or maintaining quality circles or other relevant aspects of quality assurance systems for the work area

Approved Page 4 of 6

- organising facilitation for monitoring of work teams to ensure compliance with standards
- establish strategies for communicating quality information with work teams

•

Preparing a quality implementation plan includes, but is not limited to, the following:

- identifying quality documentation requirements, including records of improvement plans and initiatives
- preparing and maintaining documentation relating to process improvement, quality outcomes and standards
- establishing and maintaining document control system

•

WHS practices

WHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other WHS practices relevant to the job and enterprise

Unit Mapping Information

Release 1. Supersedes:
