Assessment Requirements for MSTGN6011 Map and establish TCF supply chain process

Assessment Requirements for MSTGN6011 Map and establish TCF supply chain process

Modification History

Release 1. Prerequisite unit removed. Minor changes to Performance Criteria. Foundation Skills field populated. Range of Conditions removed with relevant information moved to Knowledge Evidence. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is not equivalent to MSTGN6006 Map and establish TCF supply chain process.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- complete the following for one organisation:
  - prepare a map of components and personnel in textiles, clothing or footwear (TCF) supply chain systems confirming resources, supply requirements, and availability of machines and personnel
  - prepare a map of supply needs, identifying internal processes that ensure receipt and supply of TCF products meet corporate social responsibility requirements (CSR), other organisational conditions, quality standards and resource requirements
  - use appropriate TCF industry terminology and technology to prepare a database, spreadsheet or table to record details of relationships and supply chain
  - analyse import and export rules and regulations for international sources to determine effect on supply conditions
  - establish monitoring arrangements for the supply chain
  - conduct research to assess new trends, conditions and relationships that may influence supply and demand.
  -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- components of the TCF supply chain, their roles, processes and interrelationships, including:
  - business support and administrators
  - customers
  - distribution
  - marketing
  - product flow and flow rates
  - production

- raw material
- import and export rules and regulations for international sources and how they affect supply conditions
- principles underpinning CSR and ethical, sustainable supply chain management
- current and emerging trends in the digital TCF supply chain
- typical issues and problems that arise with, or impact on, the supply chain, including:
  - design changes
  - equipment maintenance requirements
  - faults
  - material or resource availability
  - production schedule changes
  - varying demand levels
- types of business conditions involved in supply chain arrangements, including:
  - contract conditions
  - supply priorities
  - communication channels
  - authority protocols
  - verification
  - payment
- information resources on fibres and fabrics and broader TCF trends and conditions
- test procedures to assess quality of materials and products.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - organisation for which supply chain is mapped and established
  - information technology for research and documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
