Assessment Requirements for MSTLG2001 Cut by machine

Release: 1

Assessment Requirements for MSTLG2001 Cut by machine

Modification History

Release 1. Supersedes and is equivalent to LMTLG2001A Cut by machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, industry codes and standards
- applying relevant standards
- preparing workstation and work prior to commencing operations
- operating at least two (2) machines in accordance with procedures
- applying cutting techniques on at least five (5) different pieces using at least three (3) types of material or leather
- undertaking maintenance of machines to manufacturer specifications
- interpreting work specifications and patterns
- · selecting colour or grain pieces to match workplace quality standards
- · cutting pieces and panels to achieve best yield according to appropriate allowance
- identifying distortions and defects on press cutting boards and taking appropriate action.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- fabric range and general qualities of leather
- · characteristics of different leathers and other materials
- relevant cutting machines, including swing beam press, travelling head press, full beam press and automated presses
- quality standards and handling procedures
- work health and safety (WHS) and environmental aspects of relevant product assembly processes
- relevant federal and state or territory legislative or regulatory requirements
- recording and reporting procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in cutting by machine, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
