Assessment Requirements for MSTTF2016 Inspect canvas or sail product

Release: 1

Assessment Requirements for MSTTF2016 Inspect canvas or sail product

Modification History

Release 1. Supersedes and is equivalent to LMTTF2019A Inspect canvas or sail product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- performing inspection procedures on at least four (4) non-complex 2-D canvas or sail products and identifying faults or substandard work
- interpreting work instructions and inspection procedures
- interpreting workplace and customer specifications and relevant quality standards
- complying with all relevant safety requirements, including safe use of hand and power tools and electrical equipment
- documenting inspection results to verify that it meets job specifications and relevant workplace and industry quality standards, and reporting faults or abnormalities and rectification measures in accordance with workplace procedures
- labelling and tagging inspected product and folding or otherwise prepare products for storage or transport
- performing normal operator maintenance of work area and inspecting equipment to enable inspections to be conducted safely and efficiently
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- operating principles of measuring devices and other inspection equipment
- the range of materials, attachments and other components used by the workplace
- sail and canvas products produced by the workplace
- production processes, including forms of stitching and plastic welding
- power sources, such as single phase, three phase and weather-protected outlets
- materials, equipment and product specifications
- work health and safety (WHS) and environmental requirements of relevant industry and enterprise procedures
- general housekeeping policies and procedures

- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in inspecting canvas and sail products, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
