Assessment Requirements for MSTTX2003 Repair textile product

Release: 1

Assessment Requirements for MSTTX2003 Repair textile product

Modification History

Release 1. Supersedes and is equivalent to LMTTX2011B Repair textile product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- assessing textile product for repair, identifying faults and documenting repair requirements
- preparing tools and equipment
- repairing at least two (2) textile products to restore to the standard specified using a range of techniques and materials, as required
- checking textile product against specifications and appropriate quality standards, and make adjustments, as required
- preparing textile product for storage or transfer to the appropriate work section
- preparing required documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- construction of product being repaired
- characteristics of materials used in product construction
- repair equipment and techniques and their application
- quality standards and practices
- workplace procedures
- recording and reporting practices

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in repairing textile products, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
