# **MSTTX3004 Set up textile production machines for product change**

**Release: 1**

# MSTTX3004 Set up textile production machines for product change

## Modification History

Release 1. Supersedes and is equivalent to LMTTX3004B Set up textile production machines for product change

## Application

This unit of competency covers the skills and knowledge required to perform or coordinate the setting up of machines for production changes.

The unit of competency applies to the work involved with the setting of machines for product change, usually working independently and being accountable for own results, including carrying out assigned tasks, coordinating processes and setting and working to deadlines.

Work may be conducted in a variety of environments, such as operational workplace activities, restricted space, hazardous, controlled or exposed conditions.

Work may be self-directed and unsupervised. Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile production

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                     |                                                                               |
|-------------------------------------|-------------------------------------------------------------------------------|
| <b>1 Determine job requirements</b> | <b>1.1</b> Follow standard operating procedures (SOPs)                        |
|                                     | <b>1.2</b> Comply with work health and safety (WHS) requirements at all times |

- |   |                                                         |     |                                                                                                                      |
|---|---------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------|
|   |                                                         | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs                                          |
|   |                                                         | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions                             |
| 2 | <b>Prepare to set up or organise setting of machine</b> | 2.1 | Interpret product specifications for correct machine setting requirements and to suit work environment               |
|   |                                                         | 2.2 | Convey specifications to appropriate personnel, where required                                                       |
|   |                                                         | 2.3 | Set machine according to product specifications and manufacturer instructions and use cleaning agents and lubricants |
| 3 | <b>Conduct sample or trial runs</b>                     | 3.1 | Obtain or arrange materials or products to be used for sampling or trialling                                         |
|   |                                                         | 3.2 | Operate machine according to manufacturer requirements and workplace procedures                                      |
|   |                                                         | 3.3 | Produce specified sample and check to ensure it meets quality standards                                              |
|   |                                                         | 3.4 | Assess or organise quality testing, as required                                                                      |
| 4 | <b>Re-adjust or confirm machine settings</b>            | 4.1 | Interpret test results to determine adjustment requirements                                                          |
|   |                                                         | 4.2 | Complete adjustment changes according to product and machine specifications                                          |
|   |                                                         | 4.3 | Document process and outcomes                                                                                        |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Machines include one or more of the following:**

- knitting:
  - circular, straight bar and flat bed knitting machines
  - warp knitting and slitting machines
  - embroidering and multi-needle quilting machines
- dyeing and finishing:
  - batch preparation, dyeing and drying finishing
  - continuous preparation, dyeing and drying finishing
  - garment dyeing, drying and pressing
- hosiery:
  - circular knitting and sewing machines
  - presses
  - packaging and slitting machines
- spinning:
  - cotton (cleaning, blending, carding, combing, drawing, roving, spinning, twisting and winding)
  - worsted (combing, gilling, drawing, roving, spinning, twisting and winding)
  - woollen (blending, carding, spinning, twisting and winding)

- textile printing and finishing:
  - colour mixing equipment
  - printing table machine
  - garment printing machines/equipment
  - automated flat screen, rotary screen and carpet printing machines
  - heat transfer printing equipment
  - screen preparation and manufacturing equipment
  - slitting machines
  - steaming and washing equipment
  - finishing equipment
- non-woven:
  - extruders
  - winders
  - carding, needling, bonding, lay-down, slitting and texturing and multi-needle quilting machines
- tufting:
  - tufting machines, including creels and mending frames, winding and beaming machines
- weaving:
  - weaving machines
  - looms
  - gaiting trucks and frames
  - accumulators tying-in, sizing, beaming, warping, slitting, drawing-in automatic and spool matching machines
- batching machines
- tufting: yarns for tufting
- spinning: spun cotton, worsted and woollen yarns
- knitting: finished knitted garments
- hosiery: finished hosiery garments
- non-woven: non-woven fabrics
- textile printing and finishing: finished fabrics used in textile printing
- dyeing and finishing: fabrics used in weaving, dyeing and finishing

**Materials or products include one or more of the following:**
