MST Textiles, Clothing and Footwear

Release: 1.1

CONTENTS

MST20116 Certificate II in TCF Production Support	24
MST20216 Certificate II in TCF Production Operations	31
MST20316 Certificate II in Leather Production	38
MST20416 Certificate II in Laundry Operations	42
MST20516 Certificate II in TCF Services and Repair	46
MST20616 Certificate II in Applied Fashion Design and Technology	51
MST30116 Certificate III in Clothing and Textile Production	56
MST30216 Certificate III in Manufactured Textile Products	63
MST30316 Certificate III in Millinery	68
MST30416 Certificate III in Footwear	72
MST30516 Certificate III in Leather Production	77
MST30616 Certificate III in Laundry Operations	81
MST30716 Certificate III in Dry Cleaning Operations	86
MST30816 Certificate III in Applied Fashion Design and Technology	90
MST40116 Certificate IV in Textile Design, Development and Production	98
MST40216 Certificate IV in Clothing Production	103
MST40316 Certificate IV in Custom-Made Footwear	109
MST40416 Certificate IV in Millinery	114
MST40516 Certificate IV in Applied Fashion Design and Merchandising	118
MST50116 Diploma of Applied Fashion Design and Merchandising	125
MST50216 Diploma of Textile Design and Development	133
MST60116 Advanced Diploma of Applied Fashion Design and Merchandising	138
MST60216 Advanced Diploma of Textile Design and Development	146
AHCLSC308 Install metal structures and features	152
Assessment Requirements for AHCLSC308 Install metal structures and features	155
AURVTT004 Trim vehicle components	157
Assessment Requirements for AURVTT004 Trim vehicle components	161
AURVTT014 Fabricate and fit marine covers	163
Assessment Requirements for AURVTT014 Fabricate and fit marine covers	167
AURVTT019 Fabricate and install automotive and marine frames, canopies and side curtains	169
Assessment Requirements for AURVTT019 Fabricate and install automotive and marine frames, canopies and side curtains	173
AURVTT020 Select and use leather in automotive and marine trimming	176
Assessment Requirements for AURVTT020 Select and use leather in automotive and marine trimming	180
BSBCUS201 Deliver a service to customers	182
Assessment Requirements for BSBCUS201 Deliver a service to customers	185
BSBDES202 Evaluate the nature of design in a specific industry context	187
Assessment Requirements for BSBDES202 Evaluate the nature of design in a specific industry context	190
BSBDES301 Explore the use of colour	192
Assessment Requirements for BSBDES301 Explore the use of colour	195
BSBDES302 Explore and apply the creative design process to 2D forms	197
Assessment Requirements for BSBDES302 Explore and apply the creative design process to 2D forms	200
BSBINT301 Apply knowledge of the international trade environment to complete work	202
Assessment Requirements for BSBINT301 Apply knowledge of the international trade environment to complete work	205

BSBINT302 Apply knowledge of legislation relevant to international trade to complete work	207
Assessment Requirements for BSBINT302 Apply knowledge of legislation relevant to international trade to complete work.....	210
BSBINT405 Apply knowledge of import and export international conventions, laws and finance.....	212
Assessment Requirements for BSBINT405 Apply knowledge of import and export international conventions, laws and finance.....	215
BSBINT409 Plan for international trade.....	217
Assessment Requirements for BSBINT409 Plan for international trade	221
BSBMKG408 Conduct market research	223
Assessment Requirements for BSBMKG408 Conduct market research	227
BSBMKG413 Promote products and services.....	229
Assessment Requirements for BSBMKG413 Promote products and services	233
BSBMKG414 Undertake marketing activities	235
Assessment Requirements for BSBMKG414 Undertake marketing activities.....	238
BSBMKG415 Research international markets	240
Assessment Requirements for BSBMKG415 Research international markets.....	243
BSBMKG419 Analyse consumer behaviour.....	245
Assessment Requirements for BSBMKG419 Analyse consumer behaviour	248
BSBMKG507 Interpret market trends and developments	250
Assessment Requirements for BSBMKG507 Interpret market trends and developments.....	253
BSBMKG605 Evaluate international marketing opportunities	255
Assessment Requirements for BSBMKG605 Evaluate international marketing opportunities	259
BSBMKG606 Manage international marketing programs.....	261
Assessment Requirements for BSBMKG606 Manage international marketing programs.....	265
BSBMKG607 Manage market research	267
Assessment Requirements for BSBMKG607 Manage market research.....	270
BSBMKG608 Develop organisational marketing objectives	272
Assessment Requirements for BSBMKG608 Develop organisational marketing objectives.....	276
BSBSMB304 Determine resource requirements for the micro business.....	278
Assessment Requirements for BSBSMB304 Determine resource requirements for the micro business	281
BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business	283
Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business	286
CPCCCM2002A Carry out excavation.....	288
CPCCCO2013A Carry out concreting to simple forms	298
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry	309
CUAACD301 Produce drawings to communicate ideas.....	323
Assessment Requirements for CUAACD301 Produce drawings to communicate ideas	326
CUACMP301 Implement copyright arrangements	328
Assessment Requirements for CUACMP301 Implement copyright arrangements.....	331
CUADRA201 Develop drawing skills.....	333
Assessment Requirements for CUADRA201 Develop drawing skills	336
ICPPRN282 Produce and manage basic digital print.....	338
Assessment Requirements for ICPPRN282 Produce and manage basic digital print	342
ICPPRN284 Use colour management systems.....	345
Assessment Requirements for ICPPRN284 Use colour management systems	348
ICPPRN383 Prepare for personalised digital printing.....	350

Assessment Requirements for ICPPRN383 Prepare for personalised digital printing	353
ICPPRN385 Apply software applications to digital production	355
Assessment Requirements for ICPPRN385 Apply software applications to digital production	358
ICPPRN387 Use colour management for production.....	360
Assessment Requirements for ICPPRN387 Use colour management for production	364
ICPPRN388 Preflight and import complex images for digital devices	366
Assessment Requirements for ICPPRN388 Preflight and import complex images for digital devices	369
ICPPRN389 Manage digital files.....	371
Assessment Requirements for ICPPRN389 Manage digital files.....	374
ICPPRN390 Generate a proof for digital production.....	376
Assessment Requirements for ICPPRN390 Generate a proof for digital production	379
ICPPRN392 Set up and produce specialised digital print.....	381
Assessment Requirements for ICPPRN392 Set up and produce specialised digital print	385
ICPSUP281 Use computer systems.....	387
Assessment Requirements for ICPSUP281 Use computer systems	390
MEM05012C Perform routine manual metal arc welding.....	392
MEM05050B Perform routine gas metal arc welding	397
MEM07033B Operate and monitor basic boiler	403
MEM07034A Operate and monitor intermediate class boiler	410
MEM11010B Operate mobile load shifting equipment	419
MEM12023A Perform engineering measurements.....	426
MEM12024A Perform computations	432
MEM13003B Work safely with industrial chemicals and materials	439
MEM14004A Plan to undertake a routine task.....	445
MEM14005A Plan a complete activity	451
MEM16008A Interact with computing technology	458
MEM17003A Assist in the provision of on the job training.....	464
MEM18001C Use hand tools.....	469
MEM18002B Use power tools/hand held operations	475
MEM19006B Replace watch batteries	481
MEM19014B Perform hand engraving.....	487
MEM20001A Produce keys.....	493
MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements	500
MEM30032A Produce basic engineering drawings	507
MEM30033A Use computer-aided design (CAD) to create and display 3-D models.....	513
MSFSF3013 Provide technical advice to customers.....	518
Assessment Requirements for MSFSF3013 Provide technical advice to customers	521
MSMBLIC001 Licence to operate a standard boiler.....	523
Assessment Requirements for MSMBLIC001 Licence to operate a standard boiler	535
MSMENV272 Participate in environmentally sustainable work practices	538
Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices	542
MSMENV472 Implement and monitor environmentally sustainable work practices.....	544
Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices	548
MSMOPS101 Make measurements.....	550
Assessment Requirements for MSMOPS101 Make measurements	554
MSMSUP102 Communicate in the workplace.....	556
Assessment Requirements for MSMSUP102 Communicate in the workplace.....	560
MSMSUP106 Work in a team.....	562

Assessment Requirements for MSMSUP106 Work in a team	565
MSMSUP382 Provide coaching/mentoring in the workplace.....	567
Assessment Requirements for MSMSUP382 Provide coaching/mentoring in the workplace.....	571
MSMSUP390 Use structured problem-solving tools.....	573
Assessment Requirements for MSMSUP390 Use structured problem-solving tools	579
MSMWHS200 Work safely	581
Assessment Requirements for MSMWHS200 Work safely	587
MSMWHS503 Maintain WHS management system	589
Assessment Requirements for MSMWHS503 Maintain WHS management system.....	594
MSS402010 Manage the impact of change on own work	597
Assessment Requirements for MSS402010 Manage the impact of change on own work ..	602
MSS402030 Apply cost factors to work practices	604
Assessment Requirements for MSS402030 Apply cost factors to work practices.....	608
MSS402031 Interpret product costs in terms of customer requirements	610
Assessment Requirements for MSS402031 Interpret product costs in terms of customer requirements	615
MSS402051 Apply quality standards	617
Assessment Requirements for MSS402051 Apply quality standards.....	623
MSS402080 Undertake root cause analysis	625
Assessment Requirements for MSS402080 Undertake root cause analysis	629
MSTCL1001 Produce a simple garment.....	631
Assessment Requirements for MSTCL1001 Produce a simple garment	637
MSTCL2001 Use a sewing machine	639
Assessment Requirements for MSTCL2001 Use a sewing machine.....	643
MSTCL2002 Provide hand sewing and finishing support	645
Assessment Requirements for MSTCL2002 Provide hand sewing and finishing support ..	648
MSTCL2003 Perform basic maintenance of headwear	650
Assessment Requirements for MSTCL2003 Perform basic maintenance of headwear	653
MSTCL2004 Sew components	655
Assessment Requirements for MSTCL2004 Sew components.....	660
MSTCL2005 Use specialised machinery or processes to assist TCF production	663
Assessment Requirements for MSTCL2005 Use specialised machinery or processes to assist TCF production	668
MSTCL2006 Press work	670
Assessment Requirements for MSTCL2006 Press work	675
MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays	677
Assessment Requirements for MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays	682
MSTCL2008 Finish garment production.....	684
Assessment Requirements for MSTCL2008 Finish garment production	688
MSTCL2009 Despatch work.....	690
Assessment Requirements for MSTCL2009 Despatch work	694
MSTCL2010 Modify patterns to create basic styles	696
Assessment Requirements for MSTCL2010 Modify patterns to create basic styles.....	700
MSTCL2011 Draw and interpret a basic sketch.....	703
Assessment Requirements for MSTCL2011 Draw and interpret a basic sketch	707
MSTCL2012 Organise and plan own work in a home-based production environment....	710
Assessment Requirements for MSTCL2012 Organise and plan own work in a home-based production environment.....	714
MSTCL2013 Block and shape headwear by machine	716
Assessment Requirements for MSTCL2013 Block and shape headwear by machine.....	719
MSTCL2014 Access and use information resources for clothing production operations ..	721

Assessment Requirements for MSTCL2014 Access and use information resources for clothing production operations.....	725
MSTCL2015 Finish headwear	727
Assessment Requirements for MSTCL2015 Finish headwear.....	731
MSTCL2016 Trim headwear	733
Assessment Requirements for MSTCL2016 Trim headwear.....	737
MSTCL2017 Press work for production support	739
Assessment Requirements for MSTCL2017 Press work for production support.....	743
MSTCL2018 Perform bundling, ticketing and labelling in TCF operations.....	745
Assessment Requirements for MSTCL2018 Perform bundling, ticketing and labelling in TCF operations	749
MSTCL2019 Sew components, complex tasks	751
Assessment Requirements for MSTCL2019 Sew components, complex tasks	756
MSTCL2020 Lay up and mark uncomplicated fabrics and lays.....	758
Assessment Requirements for MSTCL2020 Lay up and mark uncomplicated fabrics and lays.....	762
MSTCL3001 Identify fabric performance and handling requirements.....	764
Assessment Requirements for MSTCL3001 Identify fabric performance and handling requirements	769
MSTCL3002 Prepare and produce a complex whole garment from specifications.....	772
Assessment Requirements for MSTCL3002 Prepare and produce a complex whole garment from specifications.....	777
MSTCL3003 Perform garment repairs and alterations	779
Assessment Requirements for MSTCL3003 Perform garment repairs and alterations	784
MSTCL3004 Press whole garments	786
Assessment Requirements for MSTCL3004 Press whole garments	790
MSTCL3005 Lay up and cut complicated fabrics and lays	792
Assessment Requirements for MSTCL3005 Lay up and cut complicated fabrics and lays.....	796
MSTCL3006 Assemble bra or swimwear	799
Assessment Requirements for MSTCL3006 Assemble bra or swimwear.....	804
MSTCL3007 Embellish garment by hand or machine	806
Assessment Requirements for MSTCL3007 Embellish garment by hand or machine	810
MSTCL3008 Set and produce digital embroidery	812
Assessment Requirements for MSTCL3008 Set and produce digital embroidery	816
MSTCL3009 Develop patterns from a block using basic patternmaking principles.....	819
Assessment Requirements for MSTCL3009 Develop patterns from a block using basic patternmaking principles	823
MSTCL3010 Sew woven and stretch knit garments.....	826
Assessment Requirements for MSTCL3010 Sew woven and stretch knit garments	831
MSTCL3011 Contribute to garment production process improvements	833
Assessment Requirements for MSTCL3011 Contribute to garment production process improvements.....	838
MSTCL3012 Make marker for complicated fabrics and lays	841
Assessment Requirements for MSTCL3012 Make marker for complicated fabrics and lays.....	846
MSTCL3013 Interpret patterns and apply pattern information.....	848
Assessment Requirements for MSTCL3013 Interpret patterns and apply pattern information.....	852
MSTCL3014 Interact and communicate with garment production personnel	854
Assessment Requirements for MSTCL3014 Interact and communicate with garment production personnel.....	859
MSTCL4001 Perform sample machining of advanced construction garments	861
Assessment Requirements for MSTCL4001 Perform sample machining of advanced construction garments	866

MSTCL4002 Assemble and fit commercially tailored or bespoke garments	870
Assessment Requirements for MSTCL4002 Assemble and fit commercially tailored or bespoke garments.....	874
MSTCL4003 Measure, lay up and cut custom-made garments.....	876
Assessment Requirements for MSTCL4003 Measure, lay up and cut custom-made garments	880
MSTCL4004 Determine and perform garment maintenance or repair	882
Assessment Requirements for MSTCL4004 Determine and perform garment maintenance or repair	885
MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise.....	887
Assessment Requirements for MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise	891
MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents.....	893
Assessment Requirements for MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents.....	898
MSTDC2003 Identify pre- and post-spotting requirements	900
Assessment Requirements for MSTDC2003 Identify pre- and post-spotting requirements	903
MSTDC2004 Operate dry cleaning machines	906
Assessment Requirements for MSTDC2004 Operate dry cleaning machines.....	910
MSTDC2005 Operate wet cleaning machines	912
Assessment Requirements for MSTDC2005 Operate wet cleaning machines.....	916
MSTDC2006 Operate finishing equipment	918
Assessment Requirements for MSTDC2006 Operate finishing equipment.....	922
MSTDC2007 Receive and sort articles for cleaning	924
Assessment Requirements for MSTDC2007 Receive and sort articles for cleaning	928
MSTDC2008 Carry out final inspection of articles.....	930
Assessment Requirements for MSTDC2008 Carry out final inspection of articles	933
MSTDC2009 Identify fabric and garment cleaning requirements.....	935
Assessment Requirements for MSTDC2009 Identify fabric and garment cleaning requirements	939
MSTDC3001 Perform spotting function in dry cleaning operations	943
Assessment Requirements for MSTDC3001 Perform spotting function in dry cleaning operations	948
MSTDC3002 Dry clean garments with special treatment requirements	951
Assessment Requirements for MSTDC3002 Dry clean garments with special treatment requirements	955
MSTDE3001 Apply hooping and fabric handling techniques	957
Assessment Requirements for MSTDE3001 Apply hooping and fabric handling techniques	961
MSTDE3002 Digitise artwork for computerised embroideries	964
Assessment Requirements for MSTDE3002 Digitise artwork for computerised embroideries.....	970
MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries	974
Assessment Requirements for MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries.....	979
MSTDE3004 Generate artwork for computerised embroideries	983
Assessment Requirements for MSTDE3004 Generate artwork for computerised embroideries.....	987
MSTDE3005 Replicate traditional hand craft techniques	990
Assessment Requirements for MSTDE3005 Replicate traditional hand craft techniques	995
MSTDE3006 Digitise text to produce embroidered lettering.....	998
Assessment Requirements for MSTDE3006 Digitise text to produce embroidered lettering	1004
MSTDE3007 Demonstrate features of digitised embroidery machines	1007

Assessment Requirements for MSTDE3007 Demonstrate features of digitised embroidery machines	1011
MSTDE3008 Produce embroidery from digitised images.....	1014
Assessment Requirements for MSTDE3008 Produce embroidery from digitised images	1018
MSTDE3009 Maintain computerised embroidery machines.....	1021
Assessment Requirements for MSTDE3009 Maintain computerised embroidery machines	1025
MSTFD2001 Design and produce a simple garment	1028
Assessment Requirements for MSTFD2001 Design and produce a simple garment.....	1032
MSTFD2002 Apply printing techniques to produce Indigenous textile designs	1034
Assessment Requirements for MSTFD2002 Apply printing techniques to produce Indigenous textile designs.....	1038
MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs.....	1040
Assessment Requirements for MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs.....	1044
MSTFD2004 Work within an Indigenous cultural framework	1046
Assessment Requirements for MSTFD2004 Work within an Indigenous cultural framework	1050
MSTFD2005 Identify design process for fashion designs.....	1052
Assessment Requirements for MSTFD2005 Identify design process for fashion designs	1056
MSTFD2006 Use a sewing machine for fashion design	1059
Assessment Requirements for MSTFD2006 Use a sewing machine for fashion design...	1064
MSTFD3001 Market design product to local outlets.....	1067
Assessment Requirements for MSTFD3001 Market design product to local outlets	1071
MSTFD3002 Design and produce indigenous printed textiles to a brief	1073
Assessment Requirements for MSTFD3002 Design and produce indigenous printed textiles to a brief.....	1078
MSTFD3003 Prepare design concept for a simple garment.....	1081
Assessment Requirements for MSTFD3003 Prepare design concept for a simple garment	1085
MSTFD3004 Draw a trade drawing for fashion design.....	1088
Assessment Requirements for MSTFD3004 Draw a trade drawing for fashion design ..	1092
MSTFD3005 Use skin, fur or leather to create fashion or textile products	1095
Assessment Requirements for MSTFD3005 Use skin, fur or leather to create fashion or textile products.....	1099
MSTFD4001 Apply design studio process	1102
Assessment Requirements for MSTFD4001 Apply design studio process	1107
MSTFD4002 Apply principles of colour theory to fashion design development	1111
Assessment Requirements for MSTFD4002 Apply principles of colour theory to fashion design development.....	1115
MSTFD4003 Assist in preparation of preliminary design concepts.....	1118
Assessment Requirements for MSTFD4003 Assist in preparation of preliminary design concepts.....	1122
MSTFD4004 Calculate cost estimates for fashion products.....	1125
Assessment Requirements for MSTFD4004 Calculate cost estimates for fashion products	1129
MSTFD4005 Communicate and sell design concepts	1132
Assessment Requirements for MSTFD4005 Communicate and sell design concepts.....	1136
MSTFD4006 Interact and network with fashion industry participants	1139
Assessment Requirements for MSTFD4006 Interact and network with fashion industry participants.....	1143
MSTFD4007 Conduct quality assurance for patterns and garments.....	1146
Assessment Requirements for MSTFD4007 Conduct quality assurance for patterns and garments	1150
MSTFD4008 Construct stock size block for garment to meet size and fit specifications	1153

Assessment Requirements for MSTFD4008 Construct stock size block for garment to meet size and fit specifications	1157
MSTFD4009 Create and edit digital embroidery designs	1160
Assessment Requirements for MSTFD4009 Create and edit digital embroidery designs	1164
MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles	1166
Assessment Requirements for MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles	1170
MSTFD4011 Cut fabrics for prototype designs	1174
Assessment Requirements for MSTFD4011 Cut fabrics for prototype designs	1178
MSTFD4012 Develop product specifications for fashion design	1180
Assessment Requirements for MSTFD4012 Develop product specifications for fashion design	1184
MSTFD4013 Grade 2-D patterns	1187
Assessment Requirements for MSTFD4013 Grade 2-D patterns	1191
MSTFD4014 Identify influences on contemporary fashion designs and construction techniques	1193
Assessment Requirements for MSTFD4014 Identify influences on contemporary fashion designs and construction techniques	1196
MSTFD4015 Create pattern from block to meet customer specifications	1199
Assessment Requirements for MSTFD4015 Create pattern from block to meet customer specifications	1203
MSTFD4016 Sew design prototypes	1206
Assessment Requirements for MSTFD4016 Sew design prototypes	1210
MSTFD4017 Source materials and resources for production of fashion designs	1212
Assessment Requirements for MSTFD4017 Source materials and resources for production of fashion designs	1216
MSTFD4018 Use and apply sizing systems appropriate for fashion design	1219
Assessment Requirements for MSTFD4018 Use and apply sizing systems appropriate for fashion design	1223
MSTFD4019 Use colourisation techniques on fabrics	1225
Assessment Requirements for MSTFD4019 Use colourisation techniques on fabrics	1229
MSTFD4020 Use electronic fashion design tools	1231
Assessment Requirements for MSTFD4020 Use electronic fashion design tools	1235
MSTFD4021 Drape fabrics to make patterns	1237
Assessment Requirements for MSTFD4021 Drape fabrics to make patterns	1242
MSTFD5001 Design bras and swimwear	1245
Assessment Requirements for MSTFD5001 Design bras and swimwear	1250
MSTFD5002 Develop and test patterns for bras and swimwear	1253
Assessment Requirements for MSTFD5002 Develop and test patterns for bras and swimwear	1258
MSTFD5003 Analyse fit model	1261
Assessment Requirements for MSTFD5003 Analyse fit model	1265
MSTFD5004 Develop marketing plans for fashion products	1268
Assessment Requirements for MSTFD5004 Develop marketing plans for fashion products	1273
MSTFD5005 Manipulate fabrics to create new finishes	1275
Assessment Requirements for MSTFD5005 Manipulate fabrics to create new finishes	1279
MSTFD5006 Evaluate fashion designs against set criteria	1281
Assessment Requirements for MSTFD5006 Evaluate fashion designs against set criteria	1285
MSTFD5007 Analyse influences on contemporary fashion designs	1288
Assessment Requirements for MSTFD5007 Analyse influences on contemporary fashion designs	1292
MSTFD5008 Conduct fashion design purchasing	1295

Assessment Requirements for MSTFD5008 Conduct fashion design purchasing	1299
MSTFD5009 Cost production of fashion or textile designs	1301
Assessment Requirements for MSTFD5009 Cost production of fashion or textile designs	1305
MSTFD5010 Develop and present design concepts within specific guidelines	1308
Assessment Requirements for MSTFD5010 Develop and present design concepts within specific guidelines.....	1313
MSTFD5011 Produce fashion illustrations to assist product visualisation.....	1316
Assessment Requirements for MSTFD5011 Produce fashion illustrations to assist product visualisation	1320
MSTFD5012 Perform contour draping	1322
Assessment Requirements for MSTFD5012 Perform contour draping	1326
MSTFD5013 Develop merchandising plans for fashion products	1329
Assessment Requirements for MSTFD5013 Develop merchandising plans for fashion products	1334
MSTFD5014 Construct complex blocks for fashion garments	1337
Assessment Requirements for MSTFD5014 Construct complex blocks for fashion garments	1342
MSTFD5015 Develop patterns for complex fashion garments	1345
Assessment Requirements for MSTFD5015 Develop patterns for complex fashion garments	1350
MSTFD5016 Grade complex patterns	1354
Assessment Requirements for MSTFD5016 Grade complex patterns	1358
MSTFD5017 Apply design studio processes to meet client brief	1360
Assessment Requirements for MSTFD5017 Apply design studio processes to meet client brief	1366
MSTFD5018 Determine and specify advanced construction processes	1370
Assessment Requirements for MSTFD5018 Determine and specify advanced construction processes	1375
MSTFD5019 Analyse individual fit and make pattern alterations.....	1378
Assessment Requirements for MSTFD5019 Analyse individual fit and make pattern alterations	1382
MSTFD5020 Assess impact of current fashion industry innovations and practices.....	1385
Assessment Requirements for MSTFD5020 Assess impact of current fashion industry innovations and practices.....	1390
MSTFD5021 Conduct digital patternmaking and grading	1393
Assessment Requirements for MSTFD5021 Conduct digital patternmaking and grading	1397
MSTFD5022 Develop digital costing markers.....	1400
Assessment Requirements for MSTFD5022 Develop digital costing markers	1404
MSTFD6001 Evaluate commercial viability of designs	1406
Assessment Requirements for MSTFD6001 Evaluate commercial viability of designs...	1410
MSTFD6002 Manage product development of fashion designs.....	1412
Assessment Requirements for MSTFD6002 Manage product development of fashion designs.....	1417
MSTFD6003 Manage fashion design process	1420
Assessment Requirements for MSTFD6003 Manage fashion design process.....	1425
MSTFD6004 Manage advanced patternmaking processes	1428
Assessment Requirements for MSTFD6004 Manage advanced patternmaking processes	1433
MSTFD6005 Drape structured over-garments	1435
Assessment Requirements for MSTFD6005 Drape structured over-garments.....	1440
MSTFD6006 Develop a fashion range.....	1442
Assessment Requirements for MSTFD6006 Develop a fashion range	1447
MSTFD6007 Implement specialised patternmaking technologies.....	1450

Assessment Requirements for MSTFD6007 Implement specialised patternmaking technologies	1455
MSTFD6008 Apply studio processes to create and produce designs for commercial production	1457
Assessment Requirements for MSTFD6008 Apply studio processes to create and produce designs for commercial production	1464
MSTFD6009 Analyse fashion industry textiles to guide commercial development	1467
Assessment Requirements for MSTFD6009 Analyse fashion industry textiles to guide commercial development.....	1472
MSTFP1001 Embellish footwear	1475
Assessment Requirements for MSTFP1001 Embellish footwear.....	1480
MSTFP2001 Identify materials used in footwear production.....	1482
Assessment Requirements for MSTFP2001 Identify materials used in footwear production	1486
MSTFP2002 Perform stuff cutting	1488
Assessment Requirements for MSTFP2002 Perform stuff cutting.....	1492
MSTFP2003 Cut printed materials by machine.....	1494
Assessment Requirements for MSTFP2003 Cut printed materials by machine	1498
MSTFP2004 Cut non-printed leather by machine.....	1500
Assessment Requirements for MSTFP2004 Cut non-printed leather by machine	1504
MSTFP2005 Operate machine to sew upper	1506
Assessment Requirements for MSTFP2005 Operate machine to sew upper.....	1510
MSTFP2006 Machine upper according to product requirements.....	1512
Assessment Requirements for MSTFP2006 Machine upper according to product requirements	1516
MSTFP2007 Last shoe by machine	1518
Assessment Requirements for MSTFP2007 Last shoe by machine	1522
MSTFP2008 Perform moulding operations.....	1524
Assessment Requirements for MSTFP2008 Perform moulding operations	1528
MSTFP2009 Perform footwear finishing operations.....	1530
Assessment Requirements for MSTFP2009 Perform footwear finishing operations	1534
MSTFP2010 Repair footwear product.....	1536
Assessment Requirements for MSTFP2010 Repair footwear product	1540
MSTFP2011 Perform table-based operations	1542
Assessment Requirements for MSTFP2011 Perform table-based operations.....	1545
MSTFP3001 Cut leather by hand.....	1547
Assessment Requirements for MSTFP3001 Cut leather by hand	1551
MSTFP3002 Hand last shoe	1553
Assessment Requirements for MSTFP3002 Hand last shoe.....	1557
MSTFP3003 Assemble shoe by hand.....	1559
Assessment Requirements for MSTFP3003 Assemble shoe by hand	1563
MSTFP3004 Contribute to footwear production improvement processes	1565
Assessment Requirements for MSTFP3004 Contribute to footwear production improvement processes.....	1569
MSTFP3005 Supervise footwear production operations.....	1572
Assessment Requirements for MSTFP3005 Supervise footwear production operations	1576
MSTFP3006 Apply foot anatomy principles to footwear production	1578
Assessment Requirements for MSTFP3006 Apply foot anatomy principles to footwear production	1581
MSTFP4001 Develop design for custom-made footwear.....	1584
Assessment Requirements for MSTFP4001 Develop design for custom-made footwear	1588
MSTFP4002 Make patterns for custom-made footwear	1590
Assessment Requirements for MSTFP4002 Make patterns for custom-made footwear	1594
MSTFP4003 Prepare, cut and sew custom-made shoe components.....	1596

Assessment Requirements for MSTFP4003 Prepare, cut and sew custom-made shoe components.....	1601
MSTFP4004 Assemble and finish custom-made shoe.....	1604
Assessment Requirements for MSTFP4004 Assemble and finish custom-made shoe	1609
MSTFP4005 Fit custom-made footwear	1611
Assessment Requirements for MSTFP4005 Fit custom-made footwear	1615
MSTFR2001 Assess and cost footwear repair job.....	1617
Assessment Requirements for MSTFR2001 Assess and cost footwear repair job	1621
MSTFR2002 Supply and fit new heel block	1623
Assessment Requirements for MSTFR2002 Supply and fit new heel block	1627
MSTFR2003 Attach non-slip sole or heel top piece	1629
Assessment Requirements for MSTFR2003 Attach non-slip sole or heel top piece.....	1633
MSTFR2004 Replace half leather sole	1635
Assessment Requirements for MSTFR2004 Replace half leather sole.....	1639
MSTFR2005 Sew or patch by machine	1642
Assessment Requirements for MSTFR2005 Sew or patch by machine	1646
MSTFR3001 Replace full sole and heel.....	1648
Assessment Requirements for MSTFR3001 Replace full sole and heel	1652
MSTFR3002 Operate sole stitcher	1655
Assessment Requirements for MSTFR3002 Operate sole stitcher	1659
MSTFR3003 Hand sew welt.....	1661
Assessment Requirements for MSTFR3003 Hand sew welt	1664
MSTFR3004 Re-cover footwear	1666
Assessment Requirements for MSTFR3004 Re-cover footwear	1669
MSTFR3005 Dye footwear or leather product.....	1671
Assessment Requirements for MSTFR3005 Dye footwear or leather product	1675
MSTFR3006 Undertake specialised footwear repair techniques.....	1677
Assessment Requirements for MSTFR3006 Undertake specialised footwear repair techniques	1682
MSTGN2001 Use steaming and pressing equipment in TCF production.....	1684
Assessment Requirements for MSTGN2001 Use steaming and pressing equipment in TCF production	1689
MSTGN2002 Package and handle TCF items for storage or despatch.....	1692
Assessment Requirements for MSTGN2002 Package and handle TCF items for storage or despatch	1697
MSTGN2003 Work in the TCF industry	1700
Assessment Requirements for MSTGN2003 Work in the TCF industry.....	1705
MSTGN2004 Work in a team environment.....	1708
Assessment Requirements for MSTGN2004 Work in a team environment	1712
MSTGN2005 Perform minor maintenance.....	1714
Assessment Requirements for MSTGN2005 Perform minor maintenance	1718
MSTGN2006 Perform test or inspection to check product quality	1720
Assessment Requirements for MSTGN2006 Perform test or inspection to check product quality	1724
MSTGN2007 Select, transfer and remove materials and products.....	1727
Assessment Requirements for MSTGN2007 Select, transfer and remove materials and products	1731
MSTGN2008 Coordinate work of team or section.....	1733
Assessment Requirements for MSTGN2008 Coordinate work of team or section	1737
MSTGN2009 Operate computing technology in a TCF workplace	1739
Assessment Requirements for MSTGN2009 Operate computing technology in a TCF workplace.....	1743
MSTGN2010 Perform tasks to support production.....	1745

Assessment Requirements for MSTGN2010 Perform tasks to support production	1749
MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry	1751
Assessment Requirements for MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry	1756
MSTGN2012 Work safely with chemicals in TCF operations	1759
Assessment Requirements for MSTGN2012 Work safely with chemicals in TCF operations	1765
MSTGN3001 Control production in a section of a TCF enterprise	1769
Assessment Requirements for MSTGN3001 Control production in a section of a TCF enterprise	1773
MSTGN3002 Organise and plan own work to achieve planned outcomes	1775
Assessment Requirements for MSTGN3002 Organise and plan own work to achieve planned outcomes	1779
MSTGN3003 Estimate and cost job	1781
Assessment Requirements for MSTGN3003 Estimate and cost job	1785
MSTGN3004 Supervise operations in a TCF enterprise	1787
Assessment Requirements for MSTGN3004 Supervise operations in a TCF enterprise	1792
MSTGN3005 Plan tasks to assist production operations	1794
Assessment Requirements for MSTGN3005 Plan tasks to assist production operations	1798
MSTGN3006 Draw 3-D designs	1800
Assessment Requirements for MSTGN3006 Draw 3-D designs	1804
MSTGN3007 Monitor and operate trade waste	1807
Assessment Requirements for MSTGN3007 Monitor and operate trade waste	1811
MSTGN4001 Coordinate or set up machines for product change	1813
Assessment Requirements for MSTGN4001 Coordinate or set up machines for product change	1817
MSTGN4002 Participate in product engineering	1819
Assessment Requirements for MSTGN4002 Participate in product engineering	1823
MSTGN4003 Install and commission process and machine control programs	1825
Assessment Requirements for MSTGN4003 Install and commission process and machine control programs	1829
MSTGN4004 Analyse TCF merchandising and marketing principles	1831
Assessment Requirements for MSTGN4004 Analyse TCF merchandising and marketing principles	1836
MSTGN4005 Plan and implement production within a work area	1839
Assessment Requirements for MSTGN4005 Plan and implement production within a work area	1844
MSTGN4006 Apply TCF market supply systems	1847
Assessment Requirements for MSTGN4006 Apply TCF market supply systems	1852
MSTGN4007 Contribute to the development of products or processes	1855
Assessment Requirements for MSTGN4007 Contribute to the development of products or processes	1859
MSTGN4008 Analyse product and determine machine settings	1861
Assessment Requirements for MSTGN4008 Analyse product and determine machine settings	1865
MSTGN4009 Design production tooling	1867
Assessment Requirements for MSTGN4009 Design production tooling	1871
MSTGN4010 Implement and monitor WHS and environmental systems in the workplace	1873
Assessment Requirements for MSTGN4010 Implement and monitor WHS and environmental systems in the workplace	1878
MSTGN4011 Coordinate the quality system and procedures	1881
Assessment Requirements for MSTGN4011 Coordinate the quality system and procedures	1886
MSTGN4012 Fabricate or machine tooling	1888

Assessment Requirements for MSTGN4012 Fabricate or machine tooling	1891
MSTGN4013 Manage technical processes	1893
Assessment Requirements for MSTGN4013 Manage technical processes.....	1898
MSTGN5001 Participate in production planning processes	1900
Assessment Requirements for MSTGN5001 Participate in production planning processes	1905
MSTGN5002 Coordinate quality assurance for TCF products and services	1907
Assessment Requirements for MSTGN5002 Coordinate quality assurance for TCF products and services.....	1911
MSTGN5003 Work with international TCF supply chains	1913
Assessment Requirements for MSTGN5003 Work with international TCF supply chains	1918
MSTGN5004 Manage installation and commissioning of equipment and systems.....	1920
Assessment Requirements for MSTGN5004 Manage installation and commissioning of equipment and systems.....	1925
MSTGN5005 Provide global operations support	1927
Assessment Requirements for MSTGN5005 Provide global operations support.....	1931
MSTGN5006 Plan and organise non-routine testing.....	1933
Assessment Requirements for MSTGN5006 Plan and organise non-routine testing.....	1937
MSTGN5007 Prepare procedures and specifications for TCF operations	1939
Assessment Requirements for MSTGN5007 Prepare procedures and specifications for TCF operations	1943
MSTGN5008 Identify opportunities in the TCF market.....	1945
Assessment Requirements for MSTGN5008 Identify opportunities in the TCF market	1950
MSTGN5009 Develop and test TCF products or processes	1953
Assessment Requirements for MSTGN5009 Develop and test TCF products or processes	1959
MSTGN6001 Develop and implement a sales or marketing strategy for fashion or textile items	1962
Assessment Requirements for MSTGN6001 Develop and implement a sales or marketing strategy for fashion or textile items.....	1966
MSTGN6002 Manage quality system and procedures	1968
Assessment Requirements for MSTGN6002 Manage quality system and procedures	1972
MSTGN6003 Research and evaluate processes and products	1974
Assessment Requirements for MSTGN6003 Research and evaluate processes and products	1979
MSTGN6004 Negotiate and manage contracts to produce finished design products.....	1981
Assessment Requirements for MSTGN6004 Negotiate and manage contracts to produce finished design products.....	1986
MSTGN6005 Manage production processes	1988
Assessment Requirements for MSTGN6005 Manage production processes	1992
MSTGN6006 Map and establish TCF supply chain process.....	1994
Assessment Requirements for MSTGN6006 Map and establish TCF supply chain process	1999
MSTHL2001 Undertake receipt, storage, handling and preservation of materials or products	2001
Assessment Requirements for MSTHL2001 Undertake receipt, storage, handling and preservation of materials or products.....	2005
MSTHL2002 Perform fellmongering processes	2007
Assessment Requirements for MSTHL2002 Perform fellmongering processes.....	2011
MSTHL2003 Operate machines to prepare hides or skins for tanning	2013
Assessment Requirements for MSTHL2003 Operate machines to prepare hides or skins for tanning	2018
MSTHL2004 Sort, grade or class hides, skins or leather	2020
Assessment Requirements for MSTHL2004 Sort, grade or class hides, skins or leather	2024
MSTHL2005 Trim hides, skins or leather	2026
Assessment Requirements for MSTHL2005 Trim hides, skins or leather.....	2030
MSTHL2006 Use drum or vessel to prepare or tan hides or skins.....	2032

Assessment Requirements for MSTHL2006 Use drum or vessel to prepare or tan hides or skins.....	2037
MSTHL2007 Operate machines to crust hides, skins or leather	2039
Assessment Requirements for MSTHL2007 Operate machines to crust hides, skins or leather	2044
MSTHL2008 Use drum or vessel to crust hides, skins or leather	2046
Assessment Requirements for MSTHL2008 Use drum or vessel to crust hides, skins or leather	2051
MSTHL2009 Perform drying operations.....	2053
Assessment Requirements for MSTHL2009 Perform drying operations	2057
MSTHL2010 Finish hides, skins or leather	2059
Assessment Requirements for MSTHL2010 Finish hides, skins or leather	2064
MSTHL3001 Determine suitability of hide, skin and leather for leather goods	2066
Assessment Requirements for MSTHL3001 Determine suitability of hide, skin and leather for leather goods	2070
MSTHL3002 Determine tanning requirements for hide, skin and leather.....	2073
Assessment Requirements for MSTHL3002 Determine tanning requirements for hide, skin and leather	2078
MSTLA2001 Apply infection control policies and procedures in laundry operations	2080
Assessment Requirements for MSTLA2001 Apply infection control policies and procedures in laundry operations	2085
MSTLA2002 Operate washing machines.....	2088
Assessment Requirements for MSTLA2002 Operate washing machines	2092
MSTLA2003 Control washing extractor operation	2094
Assessment Requirements for MSTLA2003 Control washing extractor operation.....	2098
MSTLA2004 Perform linen rewash	2100
Assessment Requirements for MSTLA2004 Perform linen rewash	2104
MSTLA2005 Operate hydro extractor.....	2106
Assessment Requirements for MSTLA2005 Operate hydro extractor	2110
MSTLA2006 Perform conditioning and drying processes	2112
Assessment Requirements for MSTLA2006 Perform conditioning and drying processes.....	2116
MSTLA2007 Finish products for despatch.....	2118
Assessment Requirements for MSTLA2007 Finish products for despatch	2122
MSTLA2008 Repair damaged laundry items.....	2124
Assessment Requirements for MSTLA2008 Repair damaged laundry items	2128
MSTLA2009 Inspect, fold and pack theatre linen	2130
Assessment Requirements for MSTLA2009 Inspect, fold and pack theatre linen.....	2134
MSTLA2010 Prepare products for storage or despatch	2136
Assessment Requirements for MSTLA2010 Prepare products for storage or despatch.....	2140
MSTLA3001 Perform advanced laundry operations	2142
Assessment Requirements for MSTLA3001 Perform advanced laundry operations	2146
MSTLA3002 Determine linen rental requirements	2148
Assessment Requirements for MSTLA3002 Determine linen rental requirements.....	2152
MSTLG2001 Cut by machine	2154
Assessment Requirements for MSTLG2001 Cut by machine.....	2159
MSTLG2002 Sew leather by machine.....	2161
Assessment Requirements for MSTLG2002 Sew leather by machine	2166
MSTLG2003 Perform table work.....	2168
Assessment Requirements for MSTLG2003 Perform table work	2172
MSTLG2004 Operate leather production machines.....	2174
Assessment Requirements for MSTLG2004 Operate leather production machines	2178
MSTLG2005 Split leather pieces	2180
Assessment Requirements for MSTLG2005 Split leather pieces.....	2184

MSTLG2006 Identify materials used in leather goods production	2186
Assessment Requirements for MSTLG2006 Identify materials used in leather goods production	2191
MSTLG2007 Skive leather pieces.....	2193
Assessment Requirements for MSTLG2007 Skive leather pieces	2197
MSTLG3001 Make a prototype.....	2199
Assessment Requirements for MSTLG3001 Make a prototype	2203
MSTLG3002 Cut leather by hand	2205
Assessment Requirements for MSTLG3002 Cut leather by hand.....	2209
MSTLG3003 Sew leather by hand.....	2211
Assessment Requirements for MSTLG3003 Sew leather by hand	2215
MSTLG3004 Apply finishes to leather products.....	2217
Assessment Requirements for MSTLG3004 Apply finishes to leather products	2222
MSTLG3005 Grade leather	2224
Assessment Requirements for MSTLG3005 Grade leather	2228
MSTLG3006 Apply pattern specifications to saddlery products	2230
Assessment Requirements for MSTLG3006 Apply pattern specifications to saddlery products	2234
MSTLG3007 Assemble saddle components.....	2236
Assessment Requirements for MSTLG3007 Assemble saddle components	2241
MSTMF4001 Select and adjust prefabricated footwear-related orthoses	2244
Assessment Requirements for MSTMF4001 Select and adjust prefabricated footwear-related orthoses.....	2248
MSTMF4002 Conduct medical grade footwear assessments for clients with footwear-related medical conditions	2250
Assessment Requirements for MSTMF4002 Conduct medical grade footwear assessments for clients with footwear-related medical conditions.....	2258
MSTMF4003 Modify medical grade footwear	2262
Assessment Requirements for MSTMF4003 Modify medical grade footwear	2266
MSTMF4004 Select and adjust prefabricated medical grade footwear and accessories	2268
Assessment Requirements for MSTMF4004 Select and adjust prefabricated medical grade footwear and accessories	2273
MSTML1001 Make a simple headpiece.....	2276
Assessment Requirements for MSTML1001 Make a simple headpiece	2280
MSTML2001 Identify materials used in millinery.....	2283
Assessment Requirements for MSTML2001 Identify materials used in millinery	2287
MSTML2002 Make flat patterns for millinery	2290
Assessment Requirements for MSTML2002 Make flat patterns for millinery	2294
MSTML2003 Produce and attach millinery trims.....	2296
Assessment Requirements for MSTML2003 Produce and attach millinery trims	2300
MSTML2004 Produce felt for millinery	2303
Assessment Requirements for MSTML2004 Produce felt for millinery	2307
MSTML2005 Place and cut millinery patterns	2309
Assessment Requirements for MSTML2005 Place and cut millinery patterns.....	2313
MSTML2006 Make millinery with flat pattern components	2316
Assessment Requirements for MSTML2006 Make millinery with flat pattern components.....	2320
MSTML2007 Block and shape millinery by hand	2322
Assessment Requirements for MSTML2007 Block and shape millinery by hand	2325
MSTML2008 Assemble simple blocked millinery components	2327
Assessment Requirements for MSTML2008 Assemble simple blocked millinery components.....	2330
MSTML2009 Apply millinery sewing and adhesion techniques	2332

Assessment Requirements for MSTML2009 Apply millinery sewing and adhesion techniques	2336
MSTML3001 Make flat patterns from hat blocks	2338
Assessment Requirements for MSTML3001 Make flat patterns from hat blocks.....	2342
MSTML3002 Block and shape complex millinery	2344
Assessment Requirements for MSTML3002 Block and shape complex millinery	2348
MSTML3003 Make millinery using patterns derived from hat block	2351
Assessment Requirements for MSTML3003 Make millinery using patterns derived from hat block	2356
MSTML3004 Identify performance and handling requirements of millinery materials	2359
Assessment Requirements for MSTML3004 Identify performance and handling requirements of millinery materials.....	2363
MSTML3005 Assemble complex blocked millinery components	2366
Assessment Requirements for MSTML3005 Assemble complex blocked millinery components.....	2370
MSTML4001 Undertake specific millinery construction techniques.....	2372
Assessment Requirements for MSTML4001 Undertake specific millinery construction techniques	2377
MSTML4002 Rejuvenate millinery	2380
Assessment Requirements for MSTML4002 Rejuvenate millinery	2384
MSTML4003 Present and display millinery.....	2386
Assessment Requirements for MSTML4003 Present and display millinery	2390
MSTML4004 Manage millinery procurement and cost millinery products.....	2392
Assessment Requirements for MSTML4004 Manage millinery procurement and cost millinery products.....	2397
MSTML4005 Undertake initial millinery consultation, subsequent fittings and finishing	2399
Assessment Requirements for MSTML4005 Undertake initial millinery consultation, subsequent fittings and finishing	2403
MSTML4006 Sketch and prepare millinery fashion designs.....	2406
Assessment Requirements for MSTML4006 Sketch and prepare millinery fashion designs	2410
MSTML4007 Make millinery patterns	2412
Assessment Requirements for MSTML4007 Make millinery patterns.....	2416
MSTML4008 Undertake couture millinery.....	2418
Assessment Requirements for MSTML4008 Undertake couture millinery	2422
MSTML4009 Modify millinery blocks to make new shapes	2424
Assessment Requirements for MSTML4009 Modify millinery blocks to make new shapes	2428
MSTML4010 Make couture trims.....	2430
Assessment Requirements for MSTML4010 Make couture trims	2434
MSTTD4001 Produce knitted textile samples	2436
Assessment Requirements for MSTTD4001 Produce knitted textile samples.....	2441
MSTTD4002 Prepare stencils and screens for textile printing	2443
Assessment Requirements for MSTTD4002 Prepare stencils and screens for textile printing	2448
MSTTD4003 Produce woven textile samples.....	2451
Assessment Requirements for MSTTD4003 Produce woven textile samples	2455
MSTTD4004 Produce woven tapestry samples	2458
Assessment Requirements for MSTTD4004 Produce woven tapestry samples	2463
MSTTD4005 Produce screen printed textiles.....	2465
Assessment Requirements for MSTTD4005 Produce screen printed textiles	2470
MSTTD4006 Source textile materials and resources.....	2473
Assessment Requirements for MSTTD4006 Source textile materials and resources	2478
MSTTD4007 Analyse textile design influences.....	2481
Assessment Requirements for MSTTD4007 Analyse textile design influences	2486

MSTTD4008 Present and promote textile design concepts	2490
Assessment Requirements for MSTTD4008 Present and promote textile design concepts	2495
MSTTD4009 Assist in the development of textile designs	2498
Assessment Requirements for MSTTD4009 Assist in the development of textile designs	2502
MSTTD4010 Apply manipulation techniques to create experimental textile samples	2504
Assessment Requirements for MSTTD4010 Apply manipulation techniques to create experimental textile samples	2509
MSTTD4011 Estimate costs for development of textile designs	2511
Assessment Requirements for MSTTD4011 Estimate costs for development of textile designs	2515
MSTTD4012 Analyse use of colour in textiles	2518
Assessment Requirements for MSTTD4012 Analyse use of colour in textiles	2522
MSTTD5001 Design and produce knitted textile products	2524
Assessment Requirements for MSTTD5001 Design and produce knitted textile products	2529
MSTTD5002 Design and produce woven tapestry products	2532
Assessment Requirements for MSTTD5002 Design and produce woven tapestry products	2537
MSTTD5003 Design and produce woven products	2540
Assessment Requirements for MSTTD5003 Design and produce woven products	2545
MSTTD5004 Design and produce experimental textiles	2548
Assessment Requirements for MSTTD5004 Design and produce experimental textiles.	2555
MSTTD5005 Design and produce printed textiles	2558
Assessment Requirements for MSTTD5005 Design and produce printed textiles	2562
MSTTD5006 Exhibit textile designs or products	2565
Assessment Requirements for MSTTD5006 Exhibit textile designs or products	2571
MSTTD5007 Develop textile designs using computer-based design programs	2574
Assessment Requirements for MSTTD5007 Develop textile designs using computer-based design programs	2578
MSTTD5008 Develop textile designs and specifications	2580
Assessment Requirements for MSTTD5008 Develop textile designs and specifications.	2585
MSTTD5009 Produce printed designs on woven and non-woven substrates	2588
Assessment Requirements for MSTTD5009 Produce printed designs on woven and non-woven substrates	2593
MSTTD5010 Produce computer-aided textile design folios	2596
Assessment Requirements for MSTTD5010 Produce computer-aided textile design folios	2600
MSTTD6001 Research commercial development of textiles	2602
Assessment Requirements for MSTTD6001 Research commercial development of textiles	2607
MSTTD6002 Apply electronic systems to textile design and production	2610
Assessment Requirements for MSTTD6002 Apply electronic systems to textile design and production	2615
MSTTD6003 Develop a textile product range	2617
Assessment Requirements for MSTTD6003 Develop a textile product range	2621
MSTTD6004 Create and produce textile designs for commercial production	2623
Assessment Requirements for MSTTD6004 Create and produce textile designs for commercial production	2628
MSTTF2001 Despatch products	2630
Assessment Requirements for MSTTF2001 Despatch products	2634
MSTTF2002 Cut, bend and shape metal	2636
Assessment Requirements for MSTTF2002 Cut, bend and shape metal	2641
MSTTF2003 Use canvas and sail production tools	2643
Assessment Requirements for MSTTF2003 Use canvas and sail production tools	2649
MSTTF2004 Add reinforcements and attachments	2652
Assessment Requirements for MSTTF2004 Add reinforcements and attachments	2657
MSTTF2005 Translate information into measurements or diagrams	2659

Assessment Requirements for MSTTF2005 Translate information into measurements or diagrams	2664
MSTTF2006 Measure and scale geometric shapes	2666
Assessment Requirements for MSTTF2006 Measure and scale geometric shapes	2670
MSTTF2007 Produce patterns for 2-D products	2672
Assessment Requirements for MSTTF2007 Produce patterns for 2-D products.....	2676
MSTTF2008 Use adhesives.....	2678
Assessment Requirements for MSTTF2008 Use adhesives	2682
MSTTF2009 Identify and select canvas and sail materials	2684
Assessment Requirements for MSTTF2009 Identify and select canvas and sail materials	2688
MSTTF2010 Lay out and mark out canvas or sail materials	2690
Assessment Requirements for MSTTF2010 Lay out and mark out canvas or sail materials	2694
MSTTF2011 Cut and shape canvas or sail materials	2696
Assessment Requirements for MSTTF2011 Cut and shape canvas or sail materials	2700
MSTTF2012 Stitch by hand	2702
Assessment Requirements for MSTTF2012 Stitch by hand.....	2706
MSTTF2013 Waterproof canvas products	2708
Assessment Requirements for MSTTF2013 Waterproof canvas products.....	2712
MSTTF2014 Weld plastic materials	2714
Assessment Requirements for MSTTF2014 Weld plastic materials	2718
MSTTF2015 Install products on and off site	2720
Assessment Requirements for MSTTF2015 Install products on and off site	2725
MSTTF2016 Inspect canvas or sail product	2727
Assessment Requirements for MSTTF2016 Inspect canvas or sail product	2731
MSTTF3001 Identify client and site requirements for installation of fabricated textile products	2733
Assessment Requirements for MSTTF3001 Identify client and site requirements for installation of fabricated textile products	2737
MSTTF3002 Gain customer acceptance of service proposal	2739
Assessment Requirements for MSTTF3002 Gain customer acceptance of service proposal	2743
MSTTF3003 Produce patterns for 3-D products	2745
Assessment Requirements for MSTTF3003 Produce patterns for 3-D products.....	2749
MSTTF3004 Perform advanced welding of plastic materials.....	2751
Assessment Requirements for MSTTF3004 Perform advanced welding of plastic materials	2756
MSTTF3005 Apply lofting skills to sail making	2758
Assessment Requirements for MSTTF3005 Apply lofting skills to sail making	2763
MSTTF3006 Cut and join sail panels.....	2765
Assessment Requirements for MSTTF3006 Cut and join sail panels	2771

MST20116 Certificate II in TCF Production Support

Modification History

Release 1. Supersedes:

- LMT20607 - Certificate II in Clothing Production (Intermediate)
- LMT20107 Certificate II in Textile Production (Intermediate)
- LMT21607 Certificate II in Technical Textiles and Non-wovens
- LMT20507 Certificate II in Textile Fabrication
- LMT20707 Certificate II in Clothing Production (Complex or Multiple Processes)
- LMT20907 Certificate II in Footwear Production (Intermediate)

Not equivalent.

Qualification Description

This qualification is intended for production workers who undertake vital production support roles in a textiles, clothing and footwear (TCF) manufacturing environment.

The worker would perform a limited range of operational support tasks directly related to the manufacture of TCF products. It provides the skills and knowledge required to work under supervision within a production environment.

The worker would apply a breadth and depth of knowledge to a defined range of situations and would be expected to apply this knowledge to solve a defined range of problems by applying known solutions to a limited range of predictable problems.

Elective units of competency should be chosen to meet the specialist skill needs of the area of application.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20116 Certificate II in TCF Production Support, competency must be achieved in **thirteen (13)** units of competency:

- **four (4)** core units of competency
- **nine (9)** elective units of competency, as described below.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units of competency can be chosen to meet the specialist skill needs of the following areas of application:

- Footwear production
- Textile production
- Textile fabrication
- Clothing production

Core units of competency	
<ul style="list-style-type: none"> • Select all four (4) units of competency from the following list. 	
MSMWHS200	Work safely
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
Elective units of competency	
<p>Select nine (9) elective units from Groups A and B as specified below.</p> <ul style="list-style-type: none"> • A minimum of four (4) units must be selected from Group A • A minimum of three (3) units must be selected from Group B • The remaining two (2) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Groups A or B • units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level or Certificate III level (maximum 1 unit). 	

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, select a minimum of **four (4)** units in any combination from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **four (4)** units from one of the specialist groups below.

Footwear production

MSTFP2001	Identify materials used in footwear production	
MSTFP2003	Cut printed materials by machine	
MSTFP2005	Operate machine to sew upper	
MSTFP2008	Perform moulding operations	
MSTFP2009	Perform footwear finishing operations	
MSTFP2011	Perform table-based operations	

Textile production

Unit code	Unit title	Prerequisites
MSTCL2001	Use a sewing machine	
MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTTX2002	Weigh and check textile materials and products	
MSTTX2004	Conduct packaging or folding for textile production	

MSTTX2005	Access and use information resources for textile production operations	
MSTTX2007	Operate machines for intermediate production support	
Textile fabrication		
Unit code	Unit title	Prerequisites
MSTLG2006	Identify materials used in leather goods production	
MSTTF2001	Despatch products	
MSTTF2003	Use canvas and sail production tools	
MSTTF2004	Add reinforcements and attachments	
MSTTF2009	Select and apply canvas and sail materials	
MSTTF2011	Cut and shape canvas or sail materials	
MSTTF2012	Stitch by hand	
MSTTF2013	Waterproof canvas product	
MSTTF2014	Weld plastic materials	
MSTTX2009	Perform industrial sewing on textile products	
Clothing production		
Unit code	Unit title	Prerequisites
MSTCL2001	Use a sewing machine	
MSTCL2002	Provide hand sewing and finishing support	

MSTCL2003	Perform basic maintenance of headwear	
MSTCL2004	Sew components	MSTCL2001
MSTCL2020	Lay up and mark uncomplicated fabrics and lays	
MSTCL2008	Finish garment production	MSTGN2011
MSTCL2011	Draw and interpret a basic sketch	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL2013	Block and shape headwear by machine	
MSTCL2014	Access and use information resources for clothing production operations	
MSTCL2017	Press work for production support	
MSTCL2018	Perform bundling, ticketing and labelling in TCF operations	
Group B - General electives		
Unit code	Unit title	Prerequisites
MEM18001C	Use hand tools	
MEM18002B	Use power tools/hand held operations	
MSMOPS101	Make measurements	
MSMSUP106	Work in a team	
MSTFD2005	Identify design process for fashion designs	

MSTFP1001	Embellish footwear	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTTX2001	Perform knitting operations	
MSTTX2006	Undertake carding operations	
TLIA2011	Package goods	
TLIA2013	Receive goods	
TLIA2020	Replenish stock	
TLIA2021	Despatch stock	
TLID2010	Operate a forklift	

Qualification Mapping Information

Release 1. Supersedes:

- LMT20607 - Certificate II in Clothing Production (Intermediate)
- LMT20107 Certificate II in Textile Production (Intermediate)

- LMT21607 Certificate II in Technical Textiles and Non-wovens
- LMT20507 Certificate II in Textile Fabrication
- LMT20707 Certificate II in Clothing Production (Complex or Multiple Processes)

- LMT21007 Certificate II in Footwear Production (Complex or Multiple Processes) - Not equivalent.
- LMT20707 Certificate II in Clothing Production (Complex or Multiple Processes) - Not equivalent.
- LMT21607 Certificate II in Technical Textiles and Non-wovens - Not equivalent.
- LMT20507 Certificate II in Textile Fabrication - Not equivalent.
-

Qualification Description

This qualification is intended for production workers who operate equipment and undertake complex operational tasks directly related to the manufacture of textile, clothing and footwear (TCF) products.

It provides the skills and knowledge required to work under supervision within a production environment. The worker should demonstrate initiative, judgement and discretion in their own work and would apply a breadth and depth of knowledge to a defined range of situations and then would be expected to apply this knowledge to solve a defined range of problems by applying known solutions to a limited range of predictable problems.

It provides the skills and knowledge required to work under supervision within a production environment.

Elective units of competency should be chosen to meet the specialist skill needs of the area of application.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

If packaging for an industry specialisation, select a minimum of **four (4)** units from one of the specialist groups below.

Footwear production

Unit code	Unit title	Prerequisites
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTFP2001	Identify materials used in footwear production	
MSTFP2002	Perform stuff cutting	
MSTFP2004	Cut non-printed leather by machine	
MSTFP2005	Operate machine to sew upper	
MSTFP2006	Machine upper according to product requirements	MSTFP2005
MSTFP2007	Last shoe by machine	
MSTFP2008	Perform moulding operations	
MSTFP2009	Perform footwear finishing operations	
MSTFP2010	Repair footwear product	

Textile production		
Unit code	Unit title	Prerequisites
MSTTX2003	Repair textile product	
MSTTX2004	Conduct packaging or folding for textile production	
MSTTX2005	Access and use information resources for textile production operations	
MSTTX2008	Operate machines for complex production operations	
MSTTX2009	Perform industrial sewing on textile products	
Textile fabrication		
Unit code	Unit title	Prerequisites
MSTTF2002	Cut, bend and shape metal	
MSTTF2003	Use canvas and sail production tools	
MSTTF2004	Add reinforcements and attachments	
MSTTF2005	Translate information into measurements or diagrams	
MSTTF2006	Measure and scale geometric shapes	MSTTF2005
MSTTF2009	Select and apply canvas and sail materials	
MSTTF2010	Lay out and mark out canvas or sail materials	
MSTTF2011	Cut and shape canvas or sail materials	
MSTTF2013	Waterproof canvas product	
MSTTF2014	Weld plastic materials	
MSTTF2015	Install products on and off site	

MSTTF2016	Inspect canvas or sail product	
Technical textiles and non-wovens		
Unit code	Unit title	Prerequisites
MSTTN2001	Set up and operate a dry laid web forming machine	
MSTTN2002	Set up and operate a spun bond web forming machine	
MSTTN2003	Use basic recognition techniques to identify technical and non-woven textiles	
MSTTN2004	Undertake web bonding processes	
MSTTN2005	Undertake web conversion and finishing	
MSTTN2006	Identify purpose and performance outcomes of technical textile product	MSTTN2003
MSTTN2007	Conduct technical textile mechanical finishing processes	
MSTTN2008	Conduct heat setting on technical textiles	
MSTTN2009	Apply surface coating to technical textiles	
MSTTN2010	Apply laminations or fusible interlinings to technical textiles	
MSTTN2011	Undertake fibre blending and feeding for non-woven technical production processes	
Clothing production		
Unit code	Unit title	Prerequisites
MSTCL2002	Provide hand sewing and finishing support	
MSTCL2003	Perform basic maintenance of headwear	

MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTCL2006	Press work	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	
MSTCL2008	Finish garment production	
MSTCL2010	Modify patterns to create basic styles	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL2013	Block and shape headwear by machine	
MSTCL2014	Access and use information resources for clothing production operations	
MSTCL2015	Finish headwear	
MSTCL2016	Trim headwear	
MSTCL2019	Sew components, complex tasks	
MSTGN2002	Package and handle TCF items for storage or despatch	
Group B – General electives		
Unit code	Unit title	Prerequisites
MEM18001C	Use hand tools	
MEM18002B	Use power tools/hand held operations	
MSMOPS101	Make measurements	
MSMSUP106	Work in a team	
MSTFD2005	Identify design process for fashion designs	
MSTFP1001	Embellish footwear	
MSTGN2003	Work in the TCF industry	

MSTGN2005	Perform minor maintenance	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2011	Identify fibres, fabric and textiles used in TCF industry	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTTX2001	Perform knitting operations	
MSTTX2006	Undertake carding operations	
TLID2010	Operate a forklift	

Qualification Mapping Information

Release 1. Supersedes:

- LMT20207 Certificate II in Textile Production (Complex or Multiple Processes)

MST20316 Certificate II in Leather Production

Modification History

Release 1. Supersedes and is equivalent to LMT21207 Certificate II in Leather Production

Qualification Description

This qualification is intended for those who require skills and knowledge for operations in a hide, skin and leather processing enterprise or an enterprise involved in the production of leather goods.

Work relates to a limited range of technical and operational tasks within a production environment. Work is generally supervised and may include some multi-skilled roles.

There are no specific licenses that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20316 Certificate II in Leather Production, competency must be achieved in **thirteen (13)** units of competency:

- five **(5)** core units of competency
- **eight (8)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units of competency can be chosen to meet the specialist skill needs of the following areas of application:

- Hide skin and leather
- Leather fabrication

Core units of competency

- Select all **five (5)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTGN2003	Work in the TCF industry
MSTGN2010	Perform tasks to support production

Elective units of competency

Select **eight (8)** units as specified below.

- A minimum of **four (4)** units must be chosen from Group A
- A minimum of one (**1**) unit must be chosen from Group B
- The remaining three (**3**) units may be selected from:
 - units not previously selected from Group A or B
 - a maximum of **two (2)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level or Certificate III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, select a minimum of **four (4)** units in any combination from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **four (4)** units from one of the specialist groups below.

Hide skin and leather

Unit code	Unit title	Prerequisites
MSTGN2012	Work safely with chemicals in TCF operations	
MSTHL2001	Undertake receipt, storage, handling and preservation of materials or products	
MSTHL2002	Perform fell mongering processes	
MSTHL2003	Operate machines to prepare hides or skins for tanning	
MSTHL2004	Sort, grade or class hides, skins or leather	
MSTHL2005	Trim hides, skins or leather	
MSTHL2006	Use drum or vessel to prepare or tan hides or skins	
MSTHL2007	Operate machine to crust hides, skins or leather	
MSTHL2008	Use drum or vessel to crust hides, skins or leather	
MSTHL2009	Perform drying operations	
MSTHL2010	Finish hides, skins or leather	
Leather production		
Unit code	Unit title	Prerequisites
MSTLG2001	Cut by machine	
MSTLG2002	Sew leather by machine	
MSTLG2003	Perform table work	
MSTLG2004	Operate leather production machines	
MSTLG2005	Split leather pieces	
MSTLG2006	Identify materials used in leather goods production	
MSTLG2007	Skive leather pieces	

Group B – General electives		
Unit code	Unit title	Prerequisites
MEM11010B	Operate mobile load shifting equipment	
MSMSUP106	Work in a team	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry

MST20416 Certificate II in Laundry Operations

Modification History

Release 1. Supersedes and is equivalent to LMT21410 Certificate II in Laundry Operations.

Qualification Description

This qualification describes the skills and knowledge to conduct operational and support functions within a laundry enterprise. Work outcomes covered by this qualification typically involve performing a limited range of tasks with known routines and procedures and some accountability for the quality of outcomes. Some multi-skilled roles can be accommodated in this qualification and work is generally supervised.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20416 Certificate II in Laundry Operations, competency must be achieved in **thirteen (13)** units of competency.

- **six (6)** core units of competency
- **seven (7)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core of competency	
• Select all six (6) units of competency from the following list.	
Unit code	Unit title
MSMWHS200	Work safely
MSMENV272	Participate in environmentally sustainable work practices

MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
MSTLA2001	Apply infection control policies and procedures in laundry operations
MSTLA2002	Operate washing machines

Elective units of competency

Select up to **seven (7)** elective units from Groups A and B as specified below.

- A minimum of **three (3)** units must be selected from Group A
- The remaining **five (4)** units may be selected from:
 - units not previously selected from Group A
 - units from Group B
 - a maximum of **two (2)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II or Certificate III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A

Unit code	Unit title	Prerequisites
MSTDC2001	Provide customer service in a dry cleaning or laundry enterprise	
MSTDC2007	Receive and sort articles for cleaning	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTLA2003	Control washing extractor operation	MSTLA2002
MSTLA2004	Perform linen rewash	MSTLA2002
MSTLA2006	Perform conditioning and drying processes	

MSTLA2007	Finish products for despatch	
MSTLA2008	Repair damaged laundry items	
MSTLA2009	Inspect, fold and pack theatre linen	
MSTLA2010	Prepare products for storage or despatch	
Group B		
Unit code	Unit title	Prerequisites
MSMOPS101	Make measurements	
MSMSUP106	Work in a team	
MSTCL2001	Use a sewing machine	
MSTCL2002	Provide hand sewing and finishing support	
MSTCL2004	Sew components	MSTCL2001
MSTCL2006	Press work	
MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2003	Work in the TCF industry	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	

Qualification Mapping Information

Release 1. Supersedes and is equivalent to LMT21410 Certificate II in Laundry Operations.

MST20516 Certificate II in TCF Services and Repair

Modification History

Release 1. Supersedes:

- LMT21510 Certificate II in Dry Cleaning
- LMT21107 Certificate II in Footwear Repair

Not equivalent

Qualification Description

This qualification is intended for workers who provide technical services in the repair, cleaning, alteration or maintenance of textiles, clothing or footwear (TCF) products.

Workers would apply a breadth and depth of knowledge to a defined range of situations and would be expected to apply this knowledge to solve a defined range of predictable problems.

This qualification is typically applied in small and medium sized enterprises that provide specialist services for repair and alteration of footwear and garments as well as dry cleaning.

Elective units of competency should be packaged to meet the specialist skill needs of the area of application.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20516 Certificate II in TCF Technical Services, competency must be achieved in **thirteen (13)** units of competency:

- **five (5)** core units of competency
- **eight (8)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units

required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units of competency can be chosen to meet the specialist skill needs of the following areas of application:

- Footwear repair
- Dry cleaning
- Garment alterations and repairs

Core units of competency	
<ul style="list-style-type: none"> • Select all five (5) units of competency from the following list. 	
Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry
<p>Elective units of competency</p> <p>Select up to eight (8) elective units of competency as specified below.</p> <ul style="list-style-type: none"> • A minimum of four (4) units must be selected from Group A • The remaining four (4) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A • units from Group B • up to three (3) units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II or Certificate III level. <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>	
<p>Group A – Specialist electives</p> <p>If packaging for a generic qualification, select a minimum of four (4) units in any combination</p>	

from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **four (4)** units from one of the specialist groups below.

Footwear repair

Unit code	Unit title	Prerequisites
MEM18001C	Use hand tools	
MEM19006B	Replace watch batteries	MEM18001C
MEM20001A	Produce keys	
MSTFP2001	Identify materials used in footwear production	
MSTFR2001	Assess and cost footwear repair job	
MSTFR2002	Supply and fit new heel block	
MSTFR2003	Attach non-slip sole and heel top piece	
MSTFR2004	Replace half leather sole	
MSTFR2005	Sew or patch by machine	
MSTLG2006	Identify materials used in leather goods production	

Dry cleaning

Unit code	Unit title	Prerequisites
MSTDC2001	Provide customer service in a dry cleaning or laundry enterprise	
MSTDC2003	Identify pre- and post-spotting requirements	
MSTDC2004	Operate dry cleaning machines	
MSTDC2005	Operate wet cleaning machines	
MSTDC2006	Operate finishing equipment	

MSTDC2007	Receive and sort articles for cleaning	
MSTDC2008	Carry out final inspection of articles	
MSTDC2009	Identify fabric and garment cleaning requirements	
Garment alterations and repairs		
Unit code	Unit title	Prerequisites
MSTCL2001	Use a sewing machine	
MSTCL2002	Provide hand sewing and finishing support	
MSTCL2004	Sew components	MSTCL2001
MSTCL2006	Press work	
MSTCL3003	Perform garment repairs and alterations	MSTCL2001 MSTCL2004 MSTGN2011
MSTCL2019	Sew components, complex tasks	
Group B – General electives		
Unit code	Unit title	Prerequisites
BSBCUS201	Deliver a service to customers	
MSMSUP106	Work in a team	
MSMOPS101	Make measurements	
MSTCL1001	Produce a simple garment	
MSTFP1001	Embellish footwear	
MSTGN2001	Use steaming and pressing equipment in TCF production	

MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTTX1001	Produce a simple textile fabric or product	

Qualification Mapping Information

Release 1. Supersedes:

- LMT21510 Certificate II in Dry Cleaning

MST20616 Certificate II in Applied Fashion Design and Technology

Modification History

Release 1.1. MSTCL2001 and MSTCL2004 removed from electives. Duplicated by MSTFD2006. Equivalent.

Release 1. Supersedes:

- LMT20807 Certificate II in Millinery
- LMT21707 Certificate II in Applied Fashion Design and Technology

Equivalent

Qualification Description

This qualification provides an introductory overview of skills applied in the fashion industry. It includes skills used in the design and production of garments and millinery, as well as in the development of unique fashion and textile designs used in Indigenous Australian culture.

The qualification is designed to apply in a highly supervised context, such as VET in Schools, or other equivalent introduction to fashion industry environments.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20616 Certificate II in Applied Fashion Design and Technology, competency must be achieved in **thirteen (13)** units of competency.

- **four (4)** core units of competency
- **nine (9)** elective units of competency as specified below.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency

Select all **four (4)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTCL2011	Draw and interpret a basic sketch

Elective units of competency

Select **nine (9)** units as specified below.

- A minimum of **four (4)** units must be selected from Group A
- The remaining **five (5)** units may be selected in any combination from:
 - units not previously selected from Group A
 - units from Group B
 - up to **three (3)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II and III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives**Applied fashion design**

Unit code	Unit title	Prerequisites
MSTCL2003	Perform basic maintenance of headwear	
MSTCL2005	Use specialised machinery to assist assembly production	

MSTCL2010	Modify patterns to create basic styles	
MSTCL2017	Press work for production support	
MSTCL2019	Sew components, complex tasks	
MSTCL2020	Lay up uncomplicated fabrics and lays	
MSTFD2001	Design and produce a simple garment	
MSTFD2002	Apply printing techniques to produce Indigenous textile designs	MSTGN2011
MSTFD2003	Apply dyeing techniques to produce Indigenous textile designs	MSTGN2011
MSTFD2004	Work within an Indigenous cultural framework	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	
Millinery		
Unit code	Unit title	Prerequisites
MSTML2001	Identify materials used in millinery	
MSTML2002	Make flat patterns for millinery	
MSTML2003	Produce and attach millinery trims	
MSTML2004	Produce felt for millinery	
MSTML2005	Place and cut millinery patterns	
MSTML2006	Make millinery with flat pattern components	
MSTML2007	Block and shape millinery by hand	
MSTML2008	Assemble simple blocked millinery components	
MSTML2009	Apply millinery sewing and adhesion techniques	

Group B – General electives		
Unit code	Unit title	Prerequisites
MSMSUP106	Work in a team	
MSTCL1001	Produce a simple garment	
MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTML1001	Make a simple headpiece	
MSTTX1001	Produce a simple textile fabric or product	

Qualification Mapping Information

Release 1.1. MSTCL2001 and MSTCL2004 removed from electives. Duplicated by MSTFD2006. Equivalent.

Release 1. Supersedes:

- LMT20807 Certificate II in Millinery
- LMT21707 Certificate II in Applied Fashion Design and Technology

Equivalent

MST30116 Certificate III in Clothing and Textile Production

Modification History

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes:

- LMT30107 Certificate III in Textile Production
- LMT30507 Certificate III in Clothing Production
- LMT31807 Certificate III in Technical Textiles and Non-wovens

Not equivalent

Qualification Description

This qualification covers the skills and knowledge required to perform specialised production or multi-skilled operations and supervision roles within the textiles and clothing production environment.

Work outcomes require the ability to operate equipment and take responsibility for specialist production machines or processes where the work is mostly repetitive and predictable and the emphasis is on safety, efficiency, process control and problem solving.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30116 Certificate III in Clothing and Textile Production, competency must be achieved in **nineteen (19)** units of competency:

- **five (5)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units can be chosen to meet the specialist skill needs of the following areas of application:

- Textile production
- Clothing production

Core units of competency

Select all **five (5)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
MSTGN3002	Organise and plan own work to achieve planned outcomes

Elective units of competency

Select up to **fourteen (14)** elective units as specified below.

- A minimum of **six (6)** units must be selected from Group A
- The remaining **eight (8)** units may be selected in any combination as below:
 - units not already selected from Group A
 - a minimum of **four (4)** units from Group B
 - a maximum of **four (4)** relevant units from other qualifications in this Training Package, other endorsed Training Packages and accredited courses where those units are available at Certificate II, III or IV.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, select a minimum of **six (6)** units in any combination from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **six (6)** units from one of the specialist groups below.

Textile production

Unit code	Unit title	Prerequisites
MSTTX3001	Identify quality and types of textile fibres, yarns and fabrics	MSTGN2011
MSTTX3002	Contribute to textile production process improvements	
MSTTX3003	Set up, adjust and maintain industrial sewing machine	
MSTTX3004	Set up textile production machines for product change	
MSTTX3005	Organise and interpret tests	
MSTTX3006	Ensure efficient operation of textile machines	
MSTTX3007	Prepare dyes for textile production	
MSTTX3008	Select raw materials	
MSTTX3009	Operate in a complex textile production environment	
MSTTX3010	Monitor textile production processes	
MSTTX3011	Set up, adjust and maintain machines for TCF production	
MSTGN3001	Control production in a section of a TCF enterprise	

Clothing production

Unit code	Unit title	Prerequisites
-----------	------------	---------------

MSTCL3001	Identify fabric performance and handling requirements	MSTGN2011
MSTCL3002	Prepare and produce a complex whole garment from specification	MSTGN2011 MSTFD2006
MSTCL3003	Perform garment repairs and alterations	MSTGN2011 MSTFD2006
MSTCL3004	Press whole garments	MSTCL2006
MSTCL3005	Lay up and cut complicated fabrics and lays	MSTCL2007
MSTCL3006	Assemble bra or swimwear	MSTFD2006 MSTGN2011
MSTCL3007	Embellish garment by hand or machine	MSTFD2005 MSTFD2006 MSTGN2011
MSTCL3008	Set and produce digital embroidery	
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTCL3010	Sew woven and stretch knit garments	MSTFD2006 MSTGN2011
MSTCL3011	Contribute to garment production process improvements	
MSTCL3012	Make marker for complicated fabrics and lays	MSTCL2007
MSTCL3013	Interpret patterns and apply pattern information	
MSTCL3014	Interact and communicate with garment production personnel	
MSTFD3003	Prepare design concept for a simple garment	MSTCL2011 MSTFD2005
MSTFD3004	Draw a trade drawing for fashion design	

MSTGN3001	Control production in a section of a TCF enterprise	
Group B – General electives		
Unit code	Unit title	Prerequisites
MEM18001C	Use hand tools	
MEM18002B	Use power tools/hand held operations	
MSMSUP106	Work in a team	
MSMSUP382	Provide coaching/mentoring in the workplace	
MSMENV472	Implement and monitor environmentally sustainable work practices	
MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTCL2006	Press work	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	
MSTCL2008	Finish garment production	
MSTCL2011	Draw and interpret a basic sketch	
MSTCL2012	Organise and plan own work in a home-based production	
MSTCL2019	Sew components, complex tasks	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	
MSTGN2001	Use steaming and pressing equipment in TCF production	

MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2005	Perform minor maintenance	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTGN3003	Estimate and cost job	
MSTGN3004	Supervise operations in a TCF enterprise	
MSTGN3005	Plan tasks to assist production operations	
MSTTN2003	Use basic recognition techniques to identify technical and non-woven textiles	
MSTTN2006	Identify purpose and performance outcomes of technical textile product	MSTTN2003
PMBWASTE302	Coordinate waste disposal	
TLID2010	Operate a forklift	

Qualification Mapping Information

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes:

- LMT30107 Certificate III in Textile Production
- LMT30507 Certificate III in Clothing Production
- LMT31807 Certificate III in Technical Textiles and Non-wovens

Not equivalent

MST30216 Certificate III in Manufactured Textile Products

Modification History

Release 1.1. Imported unit updated. Equivalent.

Release 1. Supersedes and is equivalent to LMT30407 Certificate III in Textile Fabrication

Qualification Description

This qualification provides trade-level technical skills to support the design, development, production and supply of fabricated textile products.

It relates to specialised technical, operational and supervisory skills within a manufacturing enterprise.

Application of this qualification would typically be suitable in small to medium sized enterprise work environments where specialised products such as yacht sails, shades, shade sails, PVC and canvas products, are designed and produced to meet specific customer needs.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30216 Certificate III in Manufactured Textile Products competency must be achieved in **twenty-five (25)** units of competency:

- **ten (10)** core units of competency
- **fifteen (15)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency

Select all **ten (10)** units of competency from the following list.

Unit code	Unit title
MEM16008A	Interact with computer technology
MSMENV272	Participate in environmentally sustainable work practices
MSMOPS101	Make measurements
MSMSUP102	Communicate in the workplace
MSMWHS200	Work safely
MSTTF2003	Use canvas and sail production tools
MSTTF2005	Translate information into measurements or diagrams
MSTTF2009	Identify and select canvas and sail materials
MSS402051	Apply quality standards
MSTTX2009	Perform industrial sewing on textile products

Elective units of competency

Select **fifteen (15)** units as specified below.

- A minimum of **six (6)** units must be chosen from Group A
- The remaining **nine (9)** units may be selected from:
 - units not previously selected from Group A
 - units from Group B
 - up to **five (5)** units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II, Certificate III or Certificate IV level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A

Unit code	Unit title	Prerequisites
AHCLSC308	Install metal structures and features	

AURVTT004	Trim vehicle components	
AURVTT014	Fabricate and fit marine covers	
AURVTT019	Fabricate and install automotive and marine frames, canopies and side curtains	
AURVTT020	Select and use leather in automotive and marine trimming	
MEM05012C	Perform routine manual metal arc welding	
MEM05050B	Perform routine gas metal arc welding	
MEM30031A	Operate computer-aided design (CAD) system to produce basic drawing elements	
MEM30032A	Produce basic engineering drawings	
MEM30033A	Use computer-aided design (CAD) to create and display 3-D models	MEM30031A
MSTLG3001	Make a prototype	
MSTTF3001	Identify client and site requirements for installation of fabricated textile products	
MSTTF3002	Gain customer acceptance of service proposal	
MSTTF3003	Produce patterns for 3-D products	MSTTF2007
MSTTF3004	Perform advanced welding of plastic materials	MSTTF2014
MSTTF3005	Apply lofting skills to sail making	
MSTTF3006	Cut and join sail panels	
MSTTF3007	Manufacture fabric structures	
Group B		
Unit code	Unit title	Prerequisites
CPCCCM2002A	Carry out excavation	CPCCOHS2001A
CPCCCO2013A	Carry out concreting to simple forms	CPCCOHS2001A

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	
MSMSUP106	Work in a team	
MSMSUP390	Use structured problem-solving tools	
MSFSF3013	Provide technical advice to customers	
MSTCL2001	Use a sewing machine	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2005	Perform minor maintenance	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN3001	Control production in a section of a TCF enterprise	
MSTGN3003	Estimate and cost job	
MSTGN3005	Plan tasks to assist production operation	
MSTTF2006	Measure and scale geometric shapes	MSTTF2005
MSTTF2007	Produce patterns for 2-D products	
MSTTF2008	Use adhesives	
MSTTF2012	Stitch by hand	
MSTTF2014	Weld plastic materials	
MSTTX3003	Set up, adjust and maintain industrial sewing machines

MST30316 Certificate III in Millinery

Modification History

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is equivalent to LMT30607 Certificate III in Millinery.

Qualification Description

This qualification is intended for those who apply a range of technical skills within a millinery production environment.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30316 Certificate III in Millinery, competency must be achieved in **nineteen (19)** units of competency:

- **nine (9)** core units of competency
- **ten (10)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency	
Select all nine (9) units of competency from the following list.	
Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSMSUP102	Communicate in the workplace

MSS402051	Apply quality standards	
MSTML2001	Identify materials used in millinery	
MSTML2002	Make flat patterns for millinery	
MSTML2007	Block and shape millinery by hand	
MSTML2008	Assemble simple blocked millinery components	
MSTML3004	Identify performance and handling requirements of millinery materials	
<p>Elective units of competency</p> <p>Select ten (10) units as specified below.</p> <ul style="list-style-type: none"> • A minimum of one (1) unit must be chosen from Group A • The remaining seven (9) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A • units from Group B • a maximum of three (3) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level (maximum 1 unit), Certificate III level or Certificate IV level (maximum 1 unit). <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>		
Group A		
Unit code	Unit title	Prerequisites
MSTFD3001	Market design product to local outlets	
MSTFD3005	Use skin, fur or leather to create fashion or textile products	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSTGN3006	Draw 3-D designs	

MSTML3001	Make flat patterns from hat blocks	MSTML2002 MSTML2007 MSTFD2006
MSTML3002	Block and shape complex millinery	MSTML2007 MSTML3004
MSTML3003	Make millinery using a pattern derived from a hat block	MSTML2005 MSTML3001
MSTML3005	Assemble complex blocked millinery components	MSTML3002
Group B		
Unit code	Unit title	Prerequisites
MSMSUP106	Work in a team	
MSTCL2003	Perform basic maintenance of headwear	
MSTCL2005	Use specialised machinery to assist assembly production	
MSTCL2011	Draw and interpret a basic sketch	
MSTFD2006	Use a sewing machine for fashion design	
MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2002	Pack, handle, store and despatch work in TCF production	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF	

	workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTML2003	Produce and attach millinery trims	
MSTML2004	Produce felt for millinery	
MSTML2005	Place and cut millinery patterns	
MSTML2006	Make millinery with flat pattern components	
MSTML2009	Apply millinery sewing and adhesion techniques	

Qualification Mapping Information

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is equivalent to LMT30607 Certificate III in Millinery.

MST30416 Certificate III in Footwear

Modification History

Release 1. Supersedes:

- LMT30707 Certificate III in Footwear Production
- LMT30807 Certificate III in Footwear Repair

Not equivalent

Qualification Description

This qualification is intended for those who perform multi-skilled operations within a work environment that produces or repairs footwear, where an in-depth knowledge of footwear materials and production or repair processes is required.

Suitable applications include manufacture or repair of footwear products.

Elective units of competency should be chosen to meet the specialist skill needs of the area of application.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30416 Certificate III in Footwear, competency must be achieved in **nineteen (19)** units of competency:

- **five (5)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units if competency can be chosen to meet the specialist skill needs of the following areas of application:

- Footwear production
- Footwear repair

Core units of competency	
<ul style="list-style-type: none"> • Select all five (5) units of competency from the following list. 	
Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
MSTFP2001	Identify materials used in footwear production
<p>Elective units of competency</p> <p>Select fourteen (14) units as specified below.</p> <ul style="list-style-type: none"> • A minimum of six (6) units must be chosen from Group A • The remaining eight (8) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A • units from Group B • a maximum of five (5) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II, Certificate III or Certificate IV level. <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>	
<p>Group A – Specialist electives</p> <p>If packaging for a generic qualification, select a minimum of five (5) units in any combination from the specialisation groups below.</p>	

If packaging for an industry specialisation, select a minimum of **five (5)** units from one of the specialist groups below.

Footwear production

Unit code	Unit title	Prerequisites
MSTFP3001	Cut leather by hand	
MSTFP3002	Hand last shoe	
MSTFP3003	Assemble shoe by hand	MSTFP2001
MSTFP3004	Contribute to footwear production improvement processes	MSS402051A
MSTFP3006	Apply foot anatomy principles to footwear production	
MSTGN3005	Plan tasks to assist production operations	
MSTLG3005	Grade leather	

Footwear repair

Unit code	Unit title	Prerequisites
MSTFR3001	Replace full sole and heel	
MSTFR3002	Operate sole stitcher	
MSTFR3003	Hand sew welt	
MSTFR3004	Re-cover footwear	
MSTFR3005	Dye footwear or leather product	
MSTFR3006	Undertake specialised footwear repair techniques	
MSTGN3001	Control production in a section of a TCF enterprise	

MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
Group B – General electives		
Unit code	Unit title	Prerequisites
MEM18001C	Use hand tools	
MEM19006B	Replace watch batteries	MEM18001C
MEM19014B	Perform hand engraving	MEM18001C
MEM20001A	Produce keys	
MSMSUP106	Work in a team	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN2012	Work safely with chemicals in TCF operations	

Qualification Mapping Information

Release 1. Supersedes:

- LMT30707 Certificate III in Footwear Production
- LMT30807 Certificate III in Footwear Repair

Not equivalent

MST30516 Certificate III in Leather Production

Modification History

Release 1. Supersedes and is equivalent to LMT30907 Certificate III in Leather Production

Qualification Description

This qualification provides the skills and knowledge required to perform supervision roles, specialised tasks or multi-skilled roles within a leather production environment.

Work relates to specialised technical, operational and supervisory roles in a hide, skin and leather processing enterprise or an enterprise involved in the production of leather goods.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30516 Certificate III in Leather, competency must be achieved in **nineteen (19)** units of competency:

- **four (4)** core units of competency
- **fifteen (15)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification..

Core units of competency	
• Select all four (4) units of competency from the following list.	
Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely

MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSS402051	Apply quality standards	
<p>Elective units of competency</p> <p>Select fifteen (15) units as specified below.</p> <ul style="list-style-type: none"> • A minimum of four (4) units must be chosen from Group A • The remaining eleven (11) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A • units from Group B • up to five (5) units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II, Certificate III or Certificate IV level. <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>		
Group A		
Unit code	Unit title	Prerequisites
MSTGN3001	Control production in a section of a TCF enterprise	
MSTGN3003	Estimate and cost job	
MSTGN3004	Supervise operations in a TCF enterprise	
MSTGN3005	Plan tasks to assist production operations	
MSTHL3001	Determine suitability of hide, skin and leather for specific requirements	
MSTHL3002	Determine tanning requirements for hide, skin and leather	
MSTLG3001	Make a prototype	
MSTLG3002	Cut leather by hand	

MSTLG3003	Sew leather by hand	
MSTLG3004	Apply finishes to leather products	
MSTLG3005	Grade leather	
MSTLG3006	Apply pattern specifications to saddlery operations	
MSTLG3007	Assemble saddle components	
Group B		
Unit code	Unit title	Prerequisites
MEM11010B	Operate mobile load shifting equipment	
MSMSUP106	Work in a team	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTHL2001	Undertake receipt, storage, handling and preservation of materials or products	
MSTHL2002	Perform fellmongering processes	
MSTHL2003	Operate machines to prepare hides or skins for tanning	

MSTHL2004	Sort, grade or class hides, skins or leather	
MSTHL2005	Trim hides, skins or leather	
MSTHL2006	Use drum or vessel to prepare or tan hides or skins	
MSTHL2007	Operate machine to crust hides, skins or leather	
MSTHL2008	Use drum or vessel to crust hides, skins or leather	
MSTHL2009	Perform drying operations	
MSTHL2010	Finish hides, skins or leather	
MSTLG2001	Cut by machine	
MSTLG2002	Sew leather by machine	
MSTLG2003	Perform table work	
MSTLG2004	Operate leather production machines	
MSTLG2005	Split leather pieces	
MSTLG2006	Identify materials used in leather goods production	
MSTLG2007	Skive leather pieces	
PMBWASTE302	Coordinate waste disposal

MST30616 Certificate III in Laundry Operations

Modification History

Release 1. Supersedes and is equivalent to LMT31110 Certificate III in Laundry Operations.

Qualification Description

This qualification is intended for those who perform supervision roles, specialised technical tasks or multi-skilled roles within a commercial laundry environment.

Work is usually performed in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the use of equipment or application of contingency measures and within known time constraints.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30616 Certificate III in Laundry Operations, competency must be achieved in **nineteen (19)** units of competency:

- **seven (7)** core units of competency
- **twelve (12)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency	
<ul style="list-style-type: none"> • Select all seven (7) units of competency from the following list. 	
Unit code	Unit title

MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSMSUP102	Communicate in the workplace	
MSS402051	Apply quality standards	
MSTDC2009	Identify fabric and garment cleaning requirements	
MSTLA2001	Apply infection control policies and procedures in laundry operations	
MSTLA2002	Operate washing machines	
<p>Elective units of competency</p> <p>Select twelve (12) units as specified below.</p> <ul style="list-style-type: none"> • A minimum of three (3) units must be selected from Group A • A minimum of five (5) units must be selected from Group B • The remaining four (4) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A or B • units from Group C • a maximum of three (3) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level (maximum 1 unit), Certificate III level or Certificate IV level (maximum 1 unit). 		
<p>Group A</p>		
Unit code	Unit title	Prerequisites

MST30816 Certificate III in Applied Fashion Design and Technology

Modification History

Release 1.1. Listed prerequisites adjusted to match corrected units. MSTCL2007 and MSTFD2001 added to Group B. electives. Equivalent.

Release 1. Supersedes and is equivalent to LMT31407 Certificate III in Applied Fashion Design and Technology

Qualification Description

This qualification provides the skills and knowledge required to work in applied design and production roles within the clothing and fashion industry.

This qualification is suitable for workers producing fashion products where a basic understanding of design and marketing as well as sewing skills for specialist machinists, support roles in patternmaking, production of digitally printed or embroidered fabrics or garments is needed.

Items to be produced would include a single or small range of products. This qualification is particularly suitable for those who are self-employed undertaking low volume production of items for local distribution outlets, for example, markets.

There are no specific licenses that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30816 Certificate III in Applied Fashion Design and Technology, competency must be achieved in **nineteen (19)** units of competency:

- **four (4)** core units of competency
- **fifteen (15)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units

required for achievement of the qualification.

Packaging for an industry specialisation

Elective units may be chosen to meet the specialist skill needs of the following areas of application:

- Fashion design
- Clothing technician
- Digital embroidery
- Digital printing.

Core units of competency

Select all **four (4)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry

Elective units of competency

Select **fifteen (15)** units as specified below.

- A minimum of **six (6)** units must be chosen from Group A specialist electives
- A minimum of **four (4)** units must be chosen from Group B general electives
- The remaining **five (5)** units may be selected from:
 - units not previously selected from Group A or B
 - units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level (maximum 1 unit), Certificate III level or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, choose a minimum of **six (6)** units in any combination

from the specialisation groups below.

If packaging for an industry specialisation, choose a minimum of **six (6)** units from one of the specialist groups below.

Fashion design

Unit code	Unit title	Prerequisites
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2011
MSTCL3002	Prepare and produce a complex whole garment from specifications	MSTFD2006 MSTGN2011
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTCL3013	Interpret patterns and apply pattern information	
MSTFD3001	Market design product to local outlets	
MSTFD3002	Design and produce Indigenous printed textiles to a brief	MSTFD2002 MSTFD2003 MSTFD2004
MSTFD3003	Prepare design concept for a simple garment	MSTCL2011 MSTFD2005
MSTFD3004	Draw a trade drawing for fashion design	

Clothing technician

Unit code	Unit title	Prerequisites
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2011
MSTCL3002	Prepare and produce a complex whole garment from specifications	MSTFD2006 MSTGN2011
MSTCL3003	Perform garment repairs and alterations	MSTFD2006

		MSTGN2011
MSTCL3005	Lay up and cut complicated fabrics and lays	MSTCL2007
MSTCL3006	Assemble bra or swimwear	MSTFD2006 MSTGN2011
MSTCL3007	Embellish garment by hand or machine	MSTFD2006 MSTFD2005 MSTGN2011
MSTCL3008	Set and produce digital embroidery	
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTCL3010	Sew woven and stretch knit garments	MSTFD2006 MSTGN2011
MSTCL3012	Make marker for complicated fabrics and lays	MSTCL2007
MSTCL3013	Interpret patterns and apply pattern information	
MSTTX3003	Set up, adjust and maintain industrial sewing machines	
Digital embroidery		
Unit code	Unit title	Prerequisites
CUACMP301	Implement copyright arrangements	
MSTDE3001	Apply hooping and fabric handling techniques	MSTGN2011
MSTDE3002	Digitise artwork for computerised embroideries	MSTDE3001 MSTGN2011
MSTDE3003	Apply advanced digitising techniques to produce computerised embroideries	MSTDE3001 MSTDE3002 MSTGN2011
MSTDE3004	Generate artwork for computerised embroideries	

MSTDE3005	Replicate traditional hand craft techniques	MSTDE3001 MSTDE3002 MSTDE3003 MSTGN2011
MSTDE3006	Digitise text to produce embroidered lettering	MSTDE3001 MSTDE3002 MSTGN2011
MSTDE3007	Demonstrate features of digitised embroidery machines	
MSTDE3008	Produce embroidery from digitised images	
MSTDE3009	Maintain computerised embroidery machines	
Digital printing		
Unit code	Unit title	Prerequisites
CUACMP301	Implement copyright arrangements	
ICPPRN284	Use colour management systems	
ICPPRN383	Prepare for personalised digital printing	
ICPPRN385	Apply software applications to digital production	ICPSUP281
ICPPRN387	Use colour management for production	ICPPRN284
ICPPRN390	Generate a proof for digital production	
ICPPRN392	Set up and produce specialised digital print	
ICPSUP281	Use computer systems	
Group B – General electives		
Unit code	Unit title	Prerequisites

BSBDES202	Evaluate the nature of design in a specific industry context	
BSBDES301	Explore the use of colour	
BSBDES302	Explore and apply the creative design process to 2D forms	
BSBSMB304	Determine resource requirements for the micro business	
BSBSMB305	Comply with regulatory, taxation and insurance requirements for the micro business	
ICPPRN282	Produce and manage basic digital print	
ICPPRN388	Preflight and import complex images for digital device	
ICPPRN389	Manage digital files	
MSMSUP382	Provide coaching/mentoring in the workplace	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	
MSTCL2009	Despatch work	
MSTCL2010	Modify patterns to create basic styles	
MSTCL2011	Draw and interpret a basic sketch	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTFD2001	Design and produce a simple garment	
MSTFD2002	Apply printing techniques to produce Indigenous textile designs	MSTGN2011
MSTFD2003	Apply dyeing techniques to produce Indigenous textile designs	MSTGN2011
MSTFD2004	Work within an Indigenous cultural framework	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	

MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2003	Work in the TCF industry	
MSTGN2004	Work in a team environment	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSS402010	Manage the impact of change on own work	
MSS402030	Apply cost factors to work practices	
MSS402031	Interpret product costs in terms of customer requirements	
MSS402080	Undertake root cause analysis	
SIRXPDK001	Advise on products and services

MST40116 Certificate IV in Textile Design, Development and Production

Modification History

Release 1. Supersedes:

- LMT40107 Certificate IV in Textile Technology and Production
- LMT41107 Certificate IV in Textile Design and Development.

Equivalent

Qualification Description

This qualification provides the skills and knowledge required to work in occupations such as design, technical support and development, in the textiles industry, with roles such as product design, production planning and quality control.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST40116 Certificate IV in Textile Design and Development, competency must be achieved in **twenty-five (25)** units of competency:

- **six (6)** core units of competency
- **nineteen (19)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency		
• Select six (6) units of competency from the following list, as specified.		
Unit code	Unit title	Prerequisites

MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTTX3001	Identify quality and types of textile fibres, yarns and fabrics	MSTGN2011
MSS402051	Apply quality standards	
<ul style="list-style-type: none"> Select one (1) from these units 		
MSTGN3004	Supervise operations in a TCF enterprise	
MSTTD4007	Analyse textile design influences	
<p>Elective units of competency</p> <p>Select nineteen (19) units as specified below.</p> <ul style="list-style-type: none"> A minimum of five (5) units must be selected from Group A The remaining fourteen (14) units may be selected from: <ul style="list-style-type: none"> units not previously selected from Group A units from Group B a maximum of five (5) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate III, Certificate IV or Diploma level. <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>		
Group A		
Unit code	Unit title	Prerequisites
MSTFD4005	Communicate and sell design concepts	

MSTGN4002	Participate in product engineering	
MSTGN4004	Analyse TCF merchandising and marketing principles	
MSTGN4005	Plan and implement production within a work area	
MSTGN4006	Apply TCF market supply systems	MSTGN2011
MSTGN4007	Contribute to the development of products or processes	
MSTGN4009	Design production tooling	
MSTGN4013	Manage technical processes	
MSTTD4001	Produce knitted textile samples	
MSTTD4002	Prepare stencils and screens for textile printing	
MSTTD4003	Produce woven textile samples	
MSTTD4004	Produce woven tapestry samples	
MSTTD4005	Produce screen printed textiles	
MSTTD4006	Source textile materials and resources	
MSTTD4008	Present and promote textile design concepts	
MSTTD4009	Assist in the development of textile designs	
MSTTD4010	Apply manipulation techniques to create experimental textile samples	
MSTTD4011	Estimate costs for development of textile designs	
MSTTD4012	Analyse use of colour in textiles	MSTGN2011 MSTTD4002
MSTTX4001	Interpret and apply textile calculations and specifications	
MSTTX4002	Understand and apply textile science	MSTGN2011 MSTTX3001
MSTTX4003	Perform routine textile tests and analyse results	MSTTX4001

		MSTTX4002
MSTTX4004	Select dyes and develop dye specification and recipe for production	
MSTTX4005	Undertake textile colouration and finishing	MSTTX4002
Group B		
Unit code	Unit title	Prerequisites
CUAACD301	Produce drawings to communicate ideas	
CUADRA201	Develop drawing skills	
MSMENV472	Implement and monitor environmentally sustainable work practices	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTGN2003	Work in the TCF industry	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSTTD5010	Produce computer-aided textile design folios	
MSTTX2001	Perform knitting operations	
MSTTX2008	Operate a machine for complex production operations	
MSTTX3003	Set up, adjust and maintain industrial sewing machines	
MSTTX3011	Set up, adjust and monitor a machine for TCF production	
MEM12023A	Perform engineering measurements	

MEM12024A	Perform computations	
MEM13003B	Work safely with industrial chemicals and materials	
MEM14004A	Plan to undertake a routine task	
MEM14005A	Plan a complete activity	
MEM17003A	Assist in the provision of on the job training	
PMASUP420	Minimise environmental impact of process	

Qualification Mapping Information

Release 1. Supersedes:

- LMT40107 Certificate IV in Textile Technology and Production
- LMT41107 Certificate IV in Textile Design and Development.

Equivalent

MST40216 Certificate IV in Clothing Production

Modification History

Release 1.1. Data entry errors in Core units corrected - MSTCL2001 and MSTCL2004 replaced by MSTFD2006. Core remains equivalent. Numbers adjusted to 8 Core units and 17 Elective units. Equivalent workplace outcomes.

Release 1. Supersedes and is equivalent to LMT40307 Certificate IV in Clothing Production

Qualification Description

This qualification is intended for those who perform specialised production or multi-skilled operations and supervision roles, within the textiles and clothing production environment.

It covers skills and knowledge in the application of specialised technical and supervisory skills within clothing production enterprises.

It covers occupations such as supervisory roles in a production environment, patternmakers and sample machinists. It allows for a multi-skilled approach to clothing production and provides a basis for career progression to higher skills in the applied fashion design and technology area.

Work outcomes require workers to operate and take responsibility for specialist production machines or processes where the work is mostly repetitive and predictable and the emphasis is on safety, efficiency, process control and problem solving.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST40216 Certificate IV in Clothing Production, competency must be achieved in **twenty-five (25) units** of competency:

- **eight (8)** core units of competency
 - **seventeen (17)** elective units of competency.
-

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency		
Select all eight (8) units of competency from the following list.		
Unit code	Unit title	Prerequisites
MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2011
MSTCL3002	Prepare and produce a complex whole garment from specifications	MSTFD2006 MSTGN2011
MSTCL3013	Interpret patterns and apply pattern information	
MSTFD2006	Use a sewing machine for fashion design	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
Elective units of competency		
Select seventeen (17) elective units as specified below.		
<ul style="list-style-type: none"> • A minimum of six (6) units must be selected from Group A • The remaining eleven (11) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A • units from Group B • a maximum of five (5) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate III, Certificate IV or Diploma level. 		
Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.		

Group A		
Unit code	Unit title	Prerequisites
MSTCL4001	Perform sample machining of advanced construction garments	MSTCL3002 MSTFD2006 MSTGN2011
MSTCL4002	Assemble and fit commercially tailored or bespoke garments	
MSTCL4003	Measure, lay -up and cut commercially tailored garments	
MSTCL4004	Determine and perform garment maintenance repair	
MSTFD4002	Apply principles of colour theory to fashion design development	MSTFD2005 MSTGN2011
MSTFD4003	Assist in the preparation of preliminary design concepts	
MSTFD4006	Interact and network with fashion industry participants	
MSTFD4007	Conduct quality assurance for patterns and garments	
MSTFD4008	Construct stock size block for garment to meet size and fit specifications	
MSTFD4009	Create and edit digital embroidery designs	MSTGN2011 MSTCL3008
MSTFD4010	Create pattern to meet design specifications applying advanced patternmaking principles	MSTCL3009
MSTFD4011	Cut fabrics for prototype designs	
MSTFD4012	Develop product specifications for fashion designs	MSTFD3004
MSTFD4013	Grade 2D patterns	
MSTFD4015	Create pattern from block to meet customer specifications	MSTCL3009 MSTFD4010
MSTFD4016	Sew design prototypes	

MSTFD4017	Source materials and resources for production of fashion design	
MSTFD4018	Use and apply sizing systems appropriate for fashion design	
MSTGN4001	Coordinate or set up machine/s for product change	
MSTGN4002	Participate in product engineering	
MSTGN4003	Install and commission process and machine control programs	
MSTGN4005	Plan and implement production within a work area	
MSTGN4010	Implement and monitor WHS and environmental systems in the workplace	
MSTGN4011	Coordinate the quality system and procedures	
Group B		
Unit code	Unit title	Prerequisites
MSMENV472	Implement and monitor environmentally sustainable work practices	
MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTCL2006	Press work	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL3004	Press whole garments	MSTCL2006
MSTCL3005	Lay up and cut complicated fabrics and lays	MSTCL2007
MSTCL3006	Assemble bra or swimwear	MSTFD2006 MSTGN2011
MSTCL3007	Embellish garment by hand or machine	MSTFD2005

		MSTFD2006 MSTGN2011
MSTCL3008	Set and produce digital embroidery	
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTCL3010	Sew woven and stretch knit garments	MSTFD2006 MSTGN2011
MSTCL3012	Make marker for complicated fabrics and lays	MSTCL2007
MSTFD2005	Identify design process for fashion designs	
MSTFD3003	Prepare design concept for a simple garment	MSTCL2011 MSTFD2005
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3005	Plan tasks to assist production operations	
PMBWASTE3 02	Coordinate waste disposal	

Qualification Mapping Information

Release 1.1. Data entry errors in Core units corrected - MSTCL2001 and MSTCL2004 replaced by MSTFD2006. Core remains equivalent. Numbers adjusted to 8 Core units and 17 Elective units. Equivalent workplace outcomes.

Release 1. Supersedes and is equivalent to LMT40307 Certificate IV in Clothing Production

MST40316 Certificate IV in Custom-Made Footwear

Modification History

Release 1. Supersedes and is equivalent to LMT40407 Certificate IV in Custom-Made Footwear

Qualification Description

This qualification provides skills and knowledge to perform technical and production work in the design and development of custom-made footwear or footwear that involves small production quantities.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST40316 Certificate IV in Custom-Made Footwear, competency must be achieved in **twenty-five (25)** units of competency:

- **nine (9)** core units of competency
- **sixteen (16)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency	
<ul style="list-style-type: none"> • Select all nine (9) units of competency from the following list. 	
Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards

MSTFP2001	Identify materials used in footwear production	
MSTFP4001	Develop design for custom-made footwear	
MSTFP4002	Make patterns for custom-made footwear	
MSTFP4003	Prepare, cut and sew custom-made shoe components	
MSTFP4004	Assemble and finish custom-made shoe	
MSTFP4005	Fit custom-made footwear	
<p>Elective units of competency</p> <p>Select sixteen (16) units as specified below.</p> <ul style="list-style-type: none"> • A minimum of five (5) units must be selected from Group A • A minimum of three (3) units must be selected from Group B • The remaining eight (8) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A or B • units from Group C • a maximum of four (4) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate III level (maximum 1 unit), Certificate IV level or Diploma level (maximum 1 unit). <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>		
Group A		
Unit code	Unit title	Prerequisites
MSTFD4003	Assist in preparation of preliminary design concepts	
MSTFD4014	Identify influences on contemporary fashion designs and construction techniques	
MSTGN4001	Coordinate or set up machines for product change	
MSTGN4002	Participate in product engineering	

MSTGN4005	Plan and implement production within a work area	
MSTGN4007	Contribute to the development of products or processes	
MSTGN4010	Implement and monitor WHS and environmental systems in the workplace	
MSTGN4011	Coordinate quality system and procedures	
MSTGN4012	Fabricate or machine tooling	
MSTMF4001	Select and adjust prefabricated footwear-related orthoses	
MSTMF4002	Conduct medical grade footwear assessments for clients with footwear-related medical conditions	
MSTMF4003	Modify medical grade footwear	
MSTMF4004	Select and adjust prefabricated medical grade footwear and accessories	
Group B		
Unit code	Unit title	Prerequisites
MSTFP3001	Cut leather by hand	
MSTFP3002	Hand last shoe	
MSTFP3003	Assemble shoe by hand	MSTFP2001
MSTFP3004	Contribute to footwear production improvement processes	MSS402051
MSTFP3005	Supervise footwear production operations	
MSTFP3006	Apply foot anatomy principles to footwear production	
MSTGN3001	Control production in a section of a TCF enterprise	

MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSTLG3005	Grade leather	
Group C		
Unit code	Unit title	Prerequisites
MSMSUP106	Work in a team	
MSTCL3014	Interact and communicate with garment production personnel	
MSTFD3004	Draw a trade drawing for fashion design	
MSTFP2002	Perform stuff cutting	
MSTFP2003	Cut printed materials by machine	
MSTFP2004	Cut non-printed leather by machine	
MSTFP2005	Operate machine to sew upper	
MSTFP2006	Machine upper according to product requirements	MSTFP2005
MSTFP2007	Last shoe by machine	
MSTFP2008	Perform moulding operations	
MSTFP2009	Perform footwear finishing operations	
MSTFP2010	Repair footwear product	
MSTFP2011	Perform table-based operations	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	

MSTGN2008	Coordinate work of team or section	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2010	Perform tasks to support production	
MSTGN3006	Draw 3-D designs	
MSTLG2007	Skive leather pieces

MST40416 Certificate IV in Millinery

Modification History

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is equivalent to LMT40707 Certificate IV in Millinery.

Qualification Description

This qualification provides the skills and knowledge required to perform millinery design and construction roles. Work typically involves one-off or small run production within a small enterprise or self-employed operation.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST40416 Certificate IV in Millinery, competency must be achieved in **twenty-five (25)** units of competency:

- **nine (9)** core units of competency
- **sixteen (16)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency		
Select all nine (9) units of competency from the following list.		
Unit code	Unit title	Prerequisites
MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	

MSS402051	Apply quality standards	
MSTFD4006	Interact and network with fashion industry participants	
MSTML2001	Identify materials used in millinery	
MSTML2002	Make flat patterns for millinery	
MSTML2007	Block and shape millinery by hand	
MSTML2008	Assemble simple blocked millinery components	
MSTML3004	Identify performance and handling requirements of millinery materials	MSTML2001

Elective units of competency

Select **sixteen (16)** units as specified below.

- A minimum of **five (5)** units must be chosen from Group A
- The remaining **eleven (11)** units may be selected from:
 - units not previously selected from Group A
 - units from Group B
 - a maximum of **five (5)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate III, Certificate IV or Diploma level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A

Unit code	Unit title	Prerequisites
MSTML4001	Undertake specific millinery construction techniques	
MSTML4002	Rejuvenate millinery	
MSTML4003	Present and display millinery	

MSTML4004	Manage millinery procurement and cost millinery products	
MSTML4005	Undertake initial millinery consultation, subsequent fittings and finishing	
MSTML4006	Sketch and prepare millinery fashion designs	
MSTML4007	Make millinery patterns	
MSTML4008	Undertake couture millinery	
MSTML4009	Modify millinery blocks to make new shapes	
MSTML4010	Make couture trims	MSTCL2016 MSTML3004
Group B		
Unit code	Unit title	Prerequisites
MSMENV472	Implement and monitor environmentally sustainable work practices	
MSTCL2016	Trim headwear	
MSTFD2006	Use a sewing machine for fashion design	
MSTFD3001	Market design product to local outlets	
MSTFD3005	Use skin, fur or leather to create fashion or textile products	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSTGN3006	Draw 3-D designs	
MSTML2005	Press and cut millinery patterns	
MSTML3001	Make flat patterns from hat blocks	MSTML2002

		MSTML2007
MSTML3002	Block and shape complex millinery	MSTML2007 MSTML3004
MSTML3003	Make millinery using a pattern derived from a hat block	MSTFD2006 MSTML2005 MSTML3001
MSTML3005	Assemble complex blocked millinery components	MSTML3002

Qualification Mapping Information

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is equivalent to LMT40707 Certificate IV in Millinery.

Links

Companion Volume implementation guides are found in VETNet -

MST40516 Certificate IV in Applied Fashion Design and Merchandising

Modification History

Release 1.1. Listed prerequisites adjusted to match corrected units. BSBMKG402 denoted with # as a specialist elective in Packaging Rules. Equivalent.

Release 1. Supersedes:

- LMT41007 Certificate IV in Applied Fashion Design and Technology
- LMT41207 Certificate IV in Fashion and Textiles Merchandising.

Not equivalent.

Qualification Description

This qualification covers the skills and knowledge required to work as assistant designers, merchandising assistants and specialist production technicians, such as patternmakers and sewing machinists, who support design and production within the clothing and fashion industry.

It includes business and design outcomes which build on technical production skills and knowledge, to provide a basis for career progression to design, construction and merchandising management roles.

This qualification offers a generic MST40516 Certificate IV in Applied Fashion Design and Merchandising, as well as two pathways targeting the skill requirements of fashion designer and fashion business management.

The following additional qualification descriptors are approved for this qualification:

Pathway 1: MST40516 Certificate IV in Applied Fashion Design and Merchandising
(Design and Product Development)

Pathway 2: MST40516 Certificate IV in Applied Fashion Design and Merchandising
(Business and Merchandising)

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST40516 Certificate IV in Applied Fashion Design and Merchandising, competency must be achieved **in twenty-five (25)** units of competency:

- **seven (7)** core units of competency
- **eighteen (18)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry pathway

Elective units may be chosen to meet the specialist skill needs of the following areas of application:

- Design and Product Development
- Business and Merchandising

Core units of competency

Select all **seven (7)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTFD4004	Calculate cost estimates for fashion products
MSTFD4006	Interact and network with fashion industry participants
MSTGN2009	Operate computing technology in a TCF workplace
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry
<h4>Elective units of competency</h4> <p>Select eighteen (18) units as specified below:</p>	

- A minimum of eight (**8**) units must be chosen from Group A or B specialist electives.
- The remaining **ten (10)** units may be selected from:
 - units not previously selected from Groups A or B
 - units from Group C
 - a maximum of **five (5)** units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate III (maximum 2), Certificate IV or Diploma level (maximum 2).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Specialist electives

If packaging for a generic qualification, select a minimum of **eight (8)** units in any combination Groups A and B.

Design and Product Development specialisation – A minimum of **five (5)** units must be selected from Group A, including the **four (4)** units marked with #.

Business and Merchandising specialisation – A minimum of **five (5)** units must be selected from Group B, including the **four (4)** units marked with #.

Group A - Design and Product Development

Unit code	Unit title	Prerequisites
MSTCL4001	Perform sample machining of advanced construction garments	MSTFD2006 MSTCL3002 MSTGN2011
MSTCL4002	Assemble and fit commercially tailored or bespoke garments	
MSTCL4003	Measure, lay up and cut custom-made garments	
MSTFD4001 #	Apply design studio process	
MSTFD4002	Apply principles of colour theory to fashion design development	MSTGN2011 MSTFD2005

MSTFD4003	Assist in preparation of preliminary design concepts	
MSTFD4007	Conduct quality assurance for patterns and garments	
MSTFD4008	Construct stock size block for garment to meet size and fit specifications	
MSTFD4009	Create and edit digital embroidery designs	MSTGN2011 MSTCL3008
MSTFD4010 #	Create pattern to meet design specifications applying advanced patternmaking principles	MSTCL3009
MSTFD4011	Cut fabrics for prototype designs	
MSTFD4012 #	Develop product specifications for fashion design	MSTFD3004
MSTFD4013	Grade 2-D patterns	
MSTFD4014	Identify influences on contemporary fashion designs and construction techniques	
MSTFD4015 #	Create pattern from block to meet customer specifications	MSTCL3009 MSTFD4010
MSTFD4016	Sew design prototypes	
MSTFD4018	Use and apply sizing systems appropriate for fashion design	
MSTFD4019	Use colourisation techniques on fabrics	MSTGN2011 MSTCL3001
MSTFD4020	Use electronic fashion design tools	
MSTFD4021	Drape fabrics to make patterns	
Group B – Business and Merchandising		
BSBINT405 #	Apply knowledge of import and export international conventions, laws and finance	

BSBMKG402 #	Analyse consumer behaviour for specific markets	
BSBMKG408	Conduct market research	
BSBMKG413	Promote products and services	
BSBMKG414	Undertake marketing activities	
MSTFD4005	Communicate and sell design concepts	
MSTFD4017	Source materials and resources for production of fashion designs	
MSTGN4004 #	Analyse TCF merchandising and marketing principles	
MSTGN4005	Plan and implement production within a work area	
MSTGN4006 #	Apply TCF market supply systems	MSTGN2011
MSTTD4006	Source textile materials and resources	
MSTTD4008	Present and promote textile design concepts	
Group C – General electives		
Unit code	Unit title	Prerequisites
BSBINT301	Apply knowledge of the international trade environment to complete work	
BSBINT302	Apply knowledge of legislation relevant to international trade to complete work	
CUACMP301	Implement copyright arrangements	
MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTCL2006	Press work	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	

MSTCL2010	Modify patterns to create basic styles	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL2019	Sew components, complex tasks	
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2011
MSTCL3002	Prepare and produce sewn garment	MSTFD2006 MSTGN2011
MSTCL3004	Press whole garments	MSTCL2006
MSTCL3005	Lay up and cut complicated fabrics and lays	MSTCL2007
MSTCL3006	Assemble bra or swimwear	MSTFD2006 MSTGN2011
MSTCL3007	Embellish garment by hand or machine	MSTFD2005 MSTFD2006 MSTGN2011
MSTCL3008	Set and produce digital embroidery	
MSTCL3009	Develop patterns from a block using basic pattern making principles	
MSTCL3010	Sew woven and stretch knit garments	MSTFD2006 MSTGN2011
MSTCL3011	Contribute to garment production process improvements	
MSTCL3012	Make marker for complicated fabrics and lays	MSTCL2007
MSTCL3013	Interpret patterns and apply pattern information	
MSTCL3014	Interact and communicate with garment production personnel	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	
MSTFD3004	Draw a trade drawing for fashion design	

MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSTTX3003	Set up, adjust and maintain industrial sewing machines	
PMBWASTE302	Coordinate waste disposal	

Qualification Mapping Information

Release 1.1. Listed prerequisites adjusted to match corrected units. BSBMKG402 denoted with # as a specialist elective in Packaging Rules. Equivalent.

Release 1. Supersedes:

- LMT41007 Certificate IV in Applied Fashion Design and Technology
- LMT41207 Certificate IV in Fashion and Textiles Merchandising.

Not equivalent.

MST50116 Diploma of Applied Fashion Design and Merchandising

Modification History

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes:

- LMT50307 Diploma of Applied Fashion Design and Technology
- LMT50607 Diploma of Fashion and Textiles Merchandising.

Not equivalent.

Qualification Description

This qualification is intended for assistant design and product development roles in the fashion industry, as well as assistant roles associated with managing fashion product as part of a fashion enterprise. Skills include design and product development, as well as technical production skills to support management and fashion businesses.

Skills may be applied at various stages across the design, production and supply chain continuum, according to workplace roles and enterprise requirements. Outcomes allow for specialisation in fashion design and product development or business merchandising, as well as generalist roles.

Skills involve the use of both manual and digital design tools, and may be applied at various stages of the supply chain. Design outcomes build on technical production skills and provide a basis for career progression to design or business management roles.

This qualification offers a generic MST50116 Diploma of Applied Fashion Design and Merchandising, as well as two pathways targeting the skill requirements of fashion designer and fashion business management.

The following additional qualification descriptors are approved for this qualification:

Pathway 1: MST50116 Diploma of Applied Fashion Design and Merchandising
(Design and Product Development)

Pathway 2: MST50116 Diploma of Applied Fashion Design and Merchandising
(Business and Merchandising)

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST50116 Diploma of Applied Fashion Design and Merchandising, competency must be achieved in **thirty-five (35)** units of competency:

- **nine (9)** core units of competency
- **twenty-six (26)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

Elective units of competency may be chosen to meet the specialist skill needs of the following areas of application:

- Design and Product Development
- Business and Merchandising

Core units of competency		
Select all nine (9) units of competency from the following list.		
Unit code	Unit title	Prerequisites
MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2011
MSTFD4004	Calculate cost estimates for fashion products	
MSTFD4006	Interact and network with fashion industry participants	

MSTFD5010	Develop and present design concepts within specific guidelines	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
<p>Elective units of competency</p> <p>Select twenty-six (26) units from groups A, B and C as specified below.</p> <ul style="list-style-type: none"> • A minimum of eleven (11) units must be chosen from Group A or B specialist electives. • The remaining fifteen (15) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Groups A and/or B • units from Group C • a maximum of five (5) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate IV level (maximum 1 unit), Diploma level or Advanced Diploma level (maximum 1 unit). <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p> <p>Specialist electives</p> <p>If packaging for a generic qualification, select a minimum of eleven (11) units in any combination Groups A and B.</p> <p>Design and Product Development specialisation – A minimum of six (6) units must be selected from Group A, including the four (4) units marked with #.</p> <p>Business and Merchandising specialisation – A minimum of six (6) units must be selected from Group B, including the four (4) units marked with #.</p> <p>Group A – Design and Product Development</p>		
Unit code	Unit title	Prerequisites
MSTFD5001	Design bras and swimwear	MSTCL2010 MSTFD4003

MSTFD5002	Develop and test patterns for bras and swimwear	MSTGN2011 MSTCL3009
MSTFD5003	Analyse fit model	
MSTFD5005	Manipulate fabrics to create new finishes	MSTGN2011 MSTCL3001
MSTFD5008	Conduct fashion design purchasing	
MSTFD5011 #	Produce fashion illustrations to assist product visualisation	
MSTFD5012	Perform contour draping	MSTFD4021
MSTFD5014	Construct complex blocks for fashion garments	MSTFD4008
MSTFD5015 #	Develop patterns for complex fashion garments	MSTCL3009 MSTFD4010 MSTFD4015
MSTFD5016	Grade complex patterns	MSTFD4013
MSTFD5017 #	Apply design studio processes to meet client brief	
MSTFD5018	Determine and specify advanced construction processes	
MSTFD5019	Analyse individual fit and make pattern alterations	MSTCL3009 MSTFD4010
MSTFD5020 #	Assess impact of current fashion industry innovations and practices	
MSTFD5021	Conduct digital patternmaking and grading	
MSTFD5022	Develop digital costing markers	MSTFD5021
Group B – Business and Merchandising		
Unit code	Unit title	Prerequisites
BSBMKG507 #	Interpret market trends and development	

MSTFD5004	Develop marketing plans for fashion products	
MSTFD5006	Evaluate fashion designs against set criteria	
MSTFD5007	Analyse influences on contemporary fashion designs	MSTFD4014
MSTFD5009	Cost production of fashion or textile designs	
MSTFD5013 #	Develop merchandising plans for fashion products	
MSTGN5001	Participate in production planning processes	
MSTGN5002	Coordinate quality assurance for TCF products and services	
MSTGN5003 #	Work with international TCF supply chains	
MSTGN5004	Manage installation and commissioning of equipment and systems	
MSTGN5005	Provide global operations support	
MSTGN5007	Prepare procedures and specifications for TCF operations	
MSTGN5008 #	Identify opportunities in the TCF market	MSTGN4004
Group C		
Unit code	Unit title	Prerequisites
BSBINT301	Apply knowledge of the international trade environment to complete work	
BSBINT302	Apply knowledge of legislation relevant to international trade to complete work	
BSBINT405	Apply knowledge of import and export international conventions, laws and finance	
BSBINT409	Plan for international trade	
BSBMKG419	Analyse consumer behaviour	

BSBMKG408	Conduct market research	
BSBMKG413	Promote products and services	
BSBMKG414	Undertake marketing activities	
BSBMKG415	Research international markets	
CUACMP301	Implement copyright arrangements	
MSMWHS503	Maintain the workplace WHS management system	
MSTCL2010	Modify patterns to create basic styles	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL3002	Prepare and produce sewn garment	MSTFD2006 MSTGN2011
MSTCL3007	Embellish garment by hand or machine	MSTFD2005 MSTFD2006 MSTGN2011
MSTCL3008	Set and produce digital embroidery	
MSTCL3009	Develop patterns from a block using basic pattern making principles	
MSTCL3013	Interpret patterns and apply pattern information	
MSTCL4001	Perform sample machining of bespoke garments	MSTFD2006 MSTCL3002 MSTGN2011
MSTCL4002	Assemble and fit commercially tailored or bespoke garments	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	
MSTFD3004	Draw a trade drawing for fashion design	
MSTFD4001	Apply design studio process	

MSTFD4002	Apply principles of colour theory to fashion design development	MSTGN2011 MSTFD2005
MSTFD4003	Assist in preparation of preliminary design concepts	
MSTFD4005	Communicate and sell design concepts	
MSTFD4007	Conduct quality assurance for patterns and garments	
MSTFD4008	Construct stock size block for garment to meet size and fit specifications	
MSTFD4009	Create and edit digital embroidery designs	MSTGN2011 MSTCL3008
MSTFD4010	Create pattern to meet design specifications applying advanced patternmaking principles	MSTCL3009
MSTFD4011	Cut fabrics for prototype designs	
MSTFD4012	Develop product specifications for fashion design	MSTFD3004
MSTFD4013	Grade 2-D patterns	
MSTFD4014	Identify influences on contemporary fashion designs and construction techniques	
MSTFD4015	Create pattern from block to meet customer specifications	MSTCL3009 MSTFD4010
MSTFD4016	Sew design prototypes	
MSTFD4017	Source materials and resources for production of fashion design	
MSTFD4018	Use and apply sizing systems appropriate for fashion design	
MSTFD4019	Use colourisation techniques on fabrics	MSTGN2011 MSTCL3001
MSTFD4020	Use electronic fashion design tools	
MSTFD4021	Drape fabrics to make patterns	

MSTGN4004	Analyse TCF merchandising and marketing principles	
MSTGN4006	Apply TCF market supply systems	MSTGN2011
MSTTX2008	Operate machines for complex production operations	
PMBWASTE302	Coordinate waste disposal	
SIRXMER004A	Manage merchandise and store presentation	

Qualification Mapping Information

Release 1.1. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes:

- LMT50307 Diploma of Applied Fashion Design and Technology
- LMT50607 Diploma of Fashion and Textiles Merchandising.

Not equivalent.

MST50216 Diploma of Textile Design and Development

Modification History

Release 1. Supersedes and is equivalent to:

- LMT50407 Diploma of Textile Technology and Production Management
- LMT50507 Diploma of Textile Design and Development.

Qualification Description

This qualification provides skills and knowledge required to undertake specialised technical and design roles within textile enterprises.

It is intended for those involved in the design and production of textiles, such as screen printed, woven, knitted, tapestry and experimental fabrics and textile products.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST50216 Diploma of Textile Design and Development, competency must be achieved in **thirty-five (35)** units of competency:

- **ten (10)** core units of competency
- **twenty-five (25)** elective units of competency as specified below.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency		
<ul style="list-style-type: none"> • Select all ten (10) units of competency from the following list. 		
Unit code	Unit title	Prerequisites
MSMENV272	Participate in environmentally sustainable work practices	

MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN4010	Implement and monitor WHS and environmental systems in the workplace	
MSTTD4002	Prepare stencils and screens for textile printing	
MSTTD4007	Analyse textile design influences	
MSTTD4009	Assist in the development of textile designs	
MSTTD4012	Analyse use of colour in textiles	
MSTTD5007	Develop textile designs using computer-based design programs	
MSTTD5008	Develop textile designs and specifications	
MSTTX3001	Identify quality and types of textile fibres, yarns and fabrics	MSTGN2011
<p>Elective units of competency</p> <p>Select twenty-five (25) units as specified below.</p> <ul style="list-style-type: none"> • A minimum of eight (8) units must be selected from Group A • A minimum of six (6) units must be selected from Group B • The remaining eleven (11) units may be selected from: <ul style="list-style-type: none"> • units not previously selected from Group A or B • units from Group C • a maximum of six (6) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate IV, Diploma or Advanced Diploma level. <p>Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.</p>		
Group A

MST60116 Advanced Diploma of Applied Fashion Design and Merchandising

Modification History

Release 1.1. Elective unit missing from Group C included and listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes:

- LMT60307 Advanced Diploma of Applied Fashion Design and Technology
- LMT60507 Advanced Diploma of Fashion and Textiles Merchandising.

Not equivalent.

Qualification Description

This qualification is intended for design and product development roles in the fashion industry, as well as roles associated with managing fashion business as part of an enterprise. Skills include design and product development, as well as technical production skills and business.

Skills may be applied at various stages across the design, production and supply chain continuum, according to workplace roles and enterprise requirements. Outcomes allow for specialisation in fashion design or business, as well as generalist roles.

This qualification applies to management of textile, clothing and footwear (TCF) operations that requires knowledge of fashion design and technical production processes, the use of emerging technologies and TCF merchandising techniques that may be applied at various stages of the supply chain.

This qualification offers a generic MST60116 Advanced Diploma of Applied Fashion Design and Merchandising, as well as two pathways targeting the skill requirements of fashion designer and fashion business management.

The following additional qualification descriptors are approved for this qualification:

Pathway 1: MST60516 Advanced Diploma of Applied Fashion Design and Merchandising (Design and Product Development)

Pathway 2: MST60516 Advanced Diploma of Applied Fashion Design and Merchandising (Business and Merchandising)

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST60116 Advanced Diploma of Applied Fashion Design and Technology, competency must be achieved in **forty-five (45)** units of competency:

- **ten (10)** core units of competency
- **thirty-five (35)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

Elective units of competency may be chosen to meet the specialist skill needs of the following areas of application:

- Design and Product Development
- Business and Merchandising

Core units of competency	
Select all ten (10) units of competency from the following list.	
Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSTCL3001	Identify fabric performance and handling requirements
MSTFD4004	Calculate cost estimates for fashion products
MSTFD4006	Interact and network with fashion industry participants
MSTFD5010	Develop and present design concepts within specific guidelines

MSTFD5020	Assess impact of current fashion industry innovations and practices
MSTGN2009	Operate computing technology in a TCF workplace
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry
MSTGN6001	Develop and implement a sales or marketing strategy for fashion or textile items

Elective units of competency

Select **thirty-five (35)** units as specified below.

- A minimum of **eight (8)** units must be chosen from Group A or B specialist electives.
- The remaining **twenty-seven (27)** units may be selected from:
 - units not previously selected from Group A or B
 - units from Group C
 - a maximum of **seven (7)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Diploma level (maximum 3 units), or Advanced Diploma level

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Specialist electives

If packaging for a generic qualification, select a minimum of **eight (8)** units in any combination Groups A and B.

Design and Product Development specialisation – A minimum of **five (5)** units must be selected from Group A, including the **four (4)** units marked with #.

Business and Merchandising specialisation – A minimum of **five (5)** units must be selected from Group B, including the **four (4)** units marked with #.

Group A - Design and Product Development

Unit code	Unit title	Prerequisites
MSTFD6001	Evaluate commercial viability of designs	MSTFD4004 MSTFD5009
MSTFD6002 #	Manage product development of fashion	

	designs	
MSTFD6003 #	Manage fashion design process	
MSTFD6004	Manage advanced patternmaking processes	MSTFD4013 MSTFD5016
MSTFD6005	Drape structured over-garments	MSTFD4021 MSTFD5012
MSTFD6006 #	Develop a fashion range	
MSTFD6007	Implement specialised patternmaking technologies	
MSTFD6008 #	Apply studio processes to create and produce designs for commercial production	
MSTGN6005	Manage production processes	
MSTTD6003	Develop a textile product range	
Group B - Business and Merchandising		
BSBMKG605	Evaluate international marketing opportunities	
BSBMKG606	Manage international marketing programs	
BSBMKG607	Manage market research	
BSBMKG608 #	Develop organisational marketing objectives	
MSTFD6009	Analyse fashion industry textiles to guide commercial development	
MSTGN6002 #	Manage quality system and procedures	
MSTGN6003	Research and evaluate processes and products	
MSTGN6004 #	Negotiate and manage contracts to produce finished design products	
MSTGN6006 #	Map and establish TCF supply chain process	
MSTTD6001	Research commercial development of textiles	

MSTTD6002	Apply electronic systems to textile design and production	MSTTD5007
Group C		
Unit code	Unit title	Prerequisites
BSBMKG507	Interpret market trends and development	
CUACMP301	Implement copyright arrangements	
MSS402051	Apply quality standards	
MSTCL2010	Modify patterns to create basic styles	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	
MSTFD3004	Draw a trade drawing for fashion design	
MSTFD4001	Apply design studio process	
MSTFD4002	Apply principles of color theory to fashion design development	MSTGN2011 MSTFD2005
MSTFD4003	Assist in preparation of preliminary design concepts	
MSTFD4005	Communicate and sell design concepts	
MSTFD4007	Conduct quality assurance for patterns and garments	
MSTFD4008	Construct stock size block for garment to meet size and fit specifications	
MSTFD4010	Create pattern to meet design specifications applying advanced patternmaking principles	MSTCL3009

MSTFD4011	Cut fabrics for prototype designs	
MSTFD4012	Develop product specifications for fashion design	
MSTFD4013	Grade 2-D patterns	
MSTFD4014	Identify influences on contemporary fashion designs and construction techniques	
MSTFD4015	Create pattern from block to meet customer specifications	MSTCL3009 MSTFD4010
MSTFD4016	Sew design prototypes	
MSTFD4017	Source materials and resources for production of fashion designs	
MSTFD4018	Use and apply sizing systems appropriate for fashion design	
MSTFD4020	Use electronic fashion design tools	
MSTFD4021	Drape fabrics to make patterns	
MSTFD5001	Design bras and swimwear	MSTCL2010 MSTFD4003
MSTFD5002	Develop and test patterns for bras and swimwear	MSTFD2006 MSTCL3009
MSTFD5003	Analyse fit model	
MSTFD5004	Develop marketing plans for fashion products	
MSTFD5005	Manipulate fabrics to create new finishes	MSTGN2011 MSTCL3001
MSTFD5006	Evaluate fashion designs against set criteria	
MSTFD5007	Analyse influences on contemporary fashion designs	MSTFD4014
MSTFD5008	Conduct fashion design purchasing	
MSTFD5009	Cost production of fashion or textile designs	

MSTFD5011	Produce fashion illustrations to assist product visualisation	
MSTFD5012	Perform contour draping	MSTFD4021
MSTFD5013	Develop merchandising plans for fashion products	
MSTFD5014	Construct complex blocks for fashion garments	MSTFD4008
MSTFD5015	Develop patterns for complex fashion garments	MSTCL3009 MSTFD4010 MSTFD4015
MSTFD5016	Grade complex patterns	MSTFD4013
MSTFD5017	Apply design studio processes to meet client brief	
MSTFD5018	Determine and specify advanced construction processes	
MSTFD5019	Analyse individual fit and make pattern alterations	MSTCL3009 MSTFD4010
MSTFD5021	Conduct digital patternmaking and grading	
MSTFD5022	Develop digital costing markers	
MSTGN4004	Analyse TCF merchandising and marketing principles	
MSTGN4006	Apply TCF market supply systems	MSTGN2011
MSTGN5001	Participate in production planning processes	
MSTGN5002	Coordinate quality assurance for TCF products and services	
MSTGN5003	Work with international TCF supply chains	
MSTGN5004	Manage installation and commissioning of equipment and systems	
MSTGN5005	Provide global operations support	
MSTGN5007	Prepare procedures and specifications for TCF operations	

MSTGN5008	Identify opportunities in the TCF market	MSTGN4004
MSTTD5007	Develop textile designs using computer-based design programs	
PMBWASTE302	Coordinate waste disposal	
SIRXMER004A	Manage merchandise and store presentation	

Qualification Mapping Information

Release 1.1. Elective unit missing from Group C included and listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes:

- LMT60307 Advanced Diploma of Applied Fashion Design and Technology
- LMT60507 Advanced Diploma of Fashion and Textiles Merchandising.

Not equivalent.

MST60216 Advanced Diploma of Textile Design and Development

Modification History

Release 1.1. Minor typographical error corrected in Packaging Rules. Equivalent.

Release 1. Supersedes and is equivalent to LMT60407 Advanced Diploma of Textile Design and Development

Qualification Description

This qualification provides the skills and knowledge required to undertake specialised roles in commercial design and production of textile products, such as screen printed, woven, knitted, tapestry and experimental fabrics.

It includes the application of specialised technical, management and design skills within textile enterprises.

There are no specific licences that relate to this qualification. However, some units in this qualification may have licensing or regulatory requirements in some environments. Local regulations should be checked for details.

Entry Requirements

Release 1. Supersedes and is equivalent to LMT60407 Advanced Diploma of Textile Design and Development

Packaging Rules

To be awarded the MST60216 Advanced Diploma of Textile Design and Development, competency must be achieved in **forty-five (45)** units of competency.

- **fifteen (15)** core units of competency
- **thirty (30)** elective units of competency as specified below.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency

Select all **fifteen (15)** units of competency from the following list.

Unit code	Unit title	Prerequisites
MSMENV272	Participate in environmentally sustainable work practices	
MSTFD6009	Analyse fashion industry textiles to guide commercial development	
MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN4004	Analyse TCF merchandising and marketing principles	
MSTGN4010	Implement and monitor WHS and environmental systems in the workplace	
MSTGN5008	Identify opportunities in the TCF market	MSTGN4004
MSTGN6003	Research and evaluate processes and products	
MSTTD4002	Prepare stencils and screens for textile printing	
MSTTD4007	Analyse textile design influences	
MSTTD4009	Assist in the development of textile designs	
MSTTD4012	Analyse use of colour in textiles	MSTGN2011 MSTTD4002
MSTTD5007	Develop textile designs using computer-based design programs	
MSTTD5008	Develop textile designs and specifications	
MSTTD6001	Research commercial development of textiles	
MSTTX3001	Identify quality and types of textile fibres, yarns and fabrics	MSTGN2011

Elective units of competency

Select **thirty (30)** units from Groups A, B and C as specified below.

- A minimum of **three (3)** units must be selected from Group A
- A minimum of **nine (9)** units must be selected from Group B
- A minimum of **six (6)** units must be selected from Group C
- The remaining **twelve (12)** units may be selected from:

- units not previously selected from Group A or B
- units from Group C
- a maximum of **seven (7)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Diploma level (maximum 1 unit), or Advanced Diploma level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A

Unit code	Unit title	Prerequisites
MSTGN6001	Develop and implement a sales or marketing strategy for fashion or textile items	
MSTGN6002	Manage quality system and procedures	
MSTGN6004	Negotiate and manage design production contracts	
MSTGN6005	Manage production processes	
MSTTD6002	Apply electronic systems to textile design and production	MSTTD5007
MSTTD6003	Develop a textile product range	
MSTTD6004	Create and produce textile designs for commercial production	

Group B

Unit code	Unit title	Prerequisites
MSTFD4005	Communicate and sell design concepts	
MSTFD5009	Cost production of textile designs	
MSTGN4007	Contribute to the development of products or	

	processes	
MSTGN4008	Analyse product and determine machine settings	
MSTTD4001	Produce knitted textile samples	
MSTTD4003	Produce woven textile samples	
MSTTD4004	Produce woven tapestry samples	
MSTTD4005	Produce screen printed textiles	
MSTTD4006	Source textile materials and resources	
MSTTD4008	Present and promote textile design concepts	
MSTTD4010	Apply manipulation techniques to create experimental textile samples	
MSTTD4011	Estimate costs for development of textile designs	
MSTTD5001	Design and produce knitted textile products	MSTTD4001
MSTTD5002	Design and produce woven tapestry products	MSTTD4004
MSTTD5003	Design and produce woven products	MSTTD4003
MSTTD5004	Design and produce experimental textiles	
MSTTD5005	Design and produce printed textiles	
MSTTD5006	Exhibit textile designs or products	
MSTTD5010	Produce computer-aided textile design folios	MSTGN2009
MSTTD5009	Produce printed designs on woven and non-woven substrates	
MSTTX4001	Interpret and apply textile calculations and specifications	
MSTTX4002	Understand and apply textile science	MSTGN2011 MSTTX3001
MSTTX4003	Perform routine textile testing and analyse results	MSTTX4001 MSTTX4002

MSTTX4004	Select dyes and develop dye specification and recipe for production	
MSTTX4005	Undertake textile colouration and finishing	MSTTX4002
Group C		
Unit code	Unit title	Prerequisites
CUADRA201	Develop drawing skills	
CUAACD301	Produce drawings to communicate ideas	
MSMENV472	Implement and monitor environmentally sustainable work practices	
MSTFD3001	Market design product to local outlets	
MSTFD4006	Interact and network with fashion industry participants	
MSTGN2009	Operate computing technology in a TCF workplace	
MSTGN2012	Work safely with chemicals in TCF operations	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3006	Draw 3-D designs	
MSTGN5001	Participate in production planning processes	
MSTGN5002	Coordinate quality assurance for TCF products and services	
MSTGN5009	Develop and test TCF products or processes	
MSTTX2009	Perform industrial sewing on textile products	
MSTTX3008	Select raw materials	

Qualification Mapping Information

Release 1.1. Minor typographical error corrected in Packaging Rules. Equivalent.

Release 1. Supersedes and is equivalent to LMT60407 Advanced Diploma of Textile Design and Development

AHCLSC308 Install metal structures and features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install metal structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify hazards, assess risks and implement controls

Element	Performance criteria
	1.5 Select and use personal protective equipment (PPE)
2. Set out the site for the structure	2.1 Determine and locate services 2.2 Mark out the position of the structure or feature 2.3 Establish profiles to conform to nominated tolerances 2.4 Excavate and prepare footings according to the type of structure to be erected
3. Prepare and cut metal components	3.1 Lay components out for assembly 3.2 Mark the length of components and the positions of joins 3.3 Cut, check and join components in preparation for joining and assembly
4. Assemble and erect structure	4.1 Fix, join or assemble metal components into position and fix into place 4.2 Install remaining components and fix into position 4.3 Finish off structure to ensure all components are secure and complete 4.4 Apply coatings
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure they have met the required drawings and specifications standards 5.2 Clean debris from structure and site 5.3 Remove and dispose of all debris in a manner that minimises risk to the environment 5.4 Store unused metal components for future re-use 5.5 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC308A Install metal structures and features.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSC308 Install metal structures and features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for timber structures and their construction methods

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AURVTT004 Trim vehicle components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to calculate, mark, cut, sew and attach trim material to vehicle components. It involves preparing for the task, selecting and using specialist tools and equipment, selecting trim materials and checking their quality, developing material patterns, fabricating, assembling and attaching trim to components and checking trim against specifications, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.2 Trim materials are selected and inspected for quality 1.3 Safety data sheets (SDS) are sourced and interpreted 1.4 Hazards associated with the work are identified and risks are managed 1.5 <i>Trim tools and equipment</i> and personal protective equipment (PPE) are selected and checked for serviceability 1.6 Work is planned to minimise waste and use time efficiently
2. Measure, mark, cut and fabricate trim	2.1 Material patterns are developed and prepared for use 2.2 Trim materials are measured, marked and cut according to workplace instructions and prepared pattern 2.3 Trimming tools and equipment are used according to workplace procedures and <i>safety and environmental requirements</i> 2.4 Trim is fabricated according to work instructions and job requirements
3. Attach trim	3.1 Trim materials are fitted and checked for alignment, appearance and quality according to job specifications and workplace instructions 3.2 Trim materials are attached to vehicle component and checked against specifications
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable materials is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and subtraction, to calculate: <ul style="list-style-type: none"> fitting measurements quantities of required materials
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist trim tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Trim tools and equipment</i> must include:	<ul style="list-style-type: none"> sewing machines hand tools.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> selecting and using PPE using SDS for trim materials using specialist tools and equipment manual handling techniques environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTT004 Trim vehicle components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- manufacture and attach two different trim components.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to trimming vehicle components, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheets (SDS) for trim materials
 - using specialist tools and equipment
 - manual handling techniques
- environmental requirements, including procedures for storing and disposing of waste materials
- types and uses of trimming materials, including detection of faults and repair defects
- types and uses of specialist tools and equipment needed to manufacture and attach trim components
- techniques and procedures for trimming components, including:
 - measuring, marking and cutting
 - sewing techniques
 - trim removal and replacement
 - trim cleaning
- procedures for protecting vehicle and components when trimming components
- procedures for final inspection of trimmed component.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle components that they have trimmed, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to trim components
- SDS for trim materials
- vehicle or components for trimming
- tools, equipment and materials appropriate for trimming vehicle components.

AURVTT014 Fabricate and fit marine covers

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to fabricate and fit covers for different marine applications. It involves preparing for the task, selecting and using specialist tools and equipment, selecting materials and checking their quality, following manufacturer and customer instructions, inspecting final work, and completing workplace processes and documentation.

It applies to those working in the marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AURVTT019 Fabricate and install automotive and marine frames, canopies and side curtains

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate one automotive or marine frame, canopy and side curtain to specifications.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to fabricating and installing automotive and marine frames, canopies and side curtains, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using specialist tools and equipment
 - manual handling components
- environmental requirements, including procedures for storing and disposing of waste materials.
- types of frames, canopies and side curtains, including:
 - materials
 - methods of operation
 - component parts
- type, use and basic maintenance of sewing tools and equipment
- types of materials and consumables and their applications, including:
 - fabrics
 - fasteners
 - adhesives

- methods and techniques for fabricating and installing frames, canopies and side curtains hoods, including:
 - selecting material
 - planning
 - measuring
 - marking out
 - cutting
 - sewing, including:
 - seams
 - attachments
 - bindings, zippers and pockets
 - using adhesives
 - fabricating and assembling frames, canopies and side curtains
 - fitting and fastening
- quality standards relating to fabricating and installing frames, canopies and side curtains
- procedures for protecting vehicle, vessel and components when installing frames, canopies and side curtains
- procedures for final inspection of fabricated and installed frames, canopies and side curtains.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the frames, canopies and side curtains that they have fabricated and installed, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to fabricate and install a frame, canopy and side curtain

- materials to fabricate and install a frame, canopy and side curtain
- automotive or marine vessel or simulated jig requiring frame, canopy and side curtain to be fabricated and installed
- tools, equipment and materials appropriate for fabricating and installing frames, canopies and side curtains.

AURVTT020 Select and use leather in automotive and marine trimming

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to identify, select and use leather in the trimming of automotive and marine components. It involves preparing for the task, selecting and using specialist tools and equipment, checking leather quality, calculating required quantities, matching leather, fabricating and attaching covers and trim to manufacturer and customer instructions, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to use leather trimming	1.1 Job requirements are determined from workplace instructions 1.2 Adhesive safety data sheet (SDS) information is accessed and interpreted 1.3 Materials are selected and inspected for quality, and quantities are calculated 1.4 Hazards associated with the work are identified and risks are managed 1.5 Trimming tools and equipment and personal protective equipment (PPE) are selected and checked for serviceability 1.6 Work and cutting are planned to minimise waste and use time efficiently
2. Fabricate leather components	2.1 Leather features and characteristics are checked carefully prior to cutting and are matched against workplace instructions 2.2 Leather pieces are laid and marked out in sequence according to developed cutting plan and safety and environmental requirements 2.3 Leather pieces are cut according to cutting plan and using predetermined measurements or patterns 2.4 Leather is sewn to produce required range of trimming components
3. Attach leather to vehicle, vessel or component	3.1 Leather component is positioned and checked prior to being attached to ensure correct fit 3.2 Leather is attached using most appropriate method and according to workplace procedures and job requirement
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation.
Oral communication skills to:	<ul style="list-style-type: none"> clarify instructions and procedures clearly report quality issues and job outcomes.
Numeracy skills to:	<ul style="list-style-type: none"> use basic mathematical operations, including addition and subtraction, to calculate: <ul style="list-style-type: none"> fitting measurements in metric and imperial systems quantities of leather and materials.
Planning and organising skills to:	<ul style="list-style-type: none"> plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	<ul style="list-style-type: none"> use specialist equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Materials</i> must include:	<ul style="list-style-type: none"> leather hides patterns trimming materials cleaning materials adhesives.
<i>Trimming tools and equipment</i> must include:	<ul style="list-style-type: none"> sewing machines trimming hand and power tools.
<i>Leather features and characteristics</i> must include:	<ul style="list-style-type: none"> natural markings colour variation flexibility

	<ul style="list-style-type: none"> • corrected grain • quality • wear quality and stress.
<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> • work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> • selecting and using PPE • using SDS information relating to adhesives • using specialist tools and equipment • manually handling leather materials • environmental requirements, including procedures for storing and disposing of waste materials.

Unit Mapping Information

Equivalent to AURVTT3020 Select and use leather in trimming

Links

Assessment Requirements for AURVTT020 Select and use leather in automotive and marine trimming

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate one leather seat cover and one trim component for a vehicle or vessel.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to selecting and using leather in automotive and marine trimming, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using safety data sheet (SDS) information relating to adhesives
 - using specialist tools and equipment
 - manually handling leather materials
- environmental requirements, including procedures for storing and disposing of waste materials
- technical characteristics and features of leather and criteria for their selection
- procedures for tanning leather
- type, use and basic maintenance of sewing and trimming tools and equipment
- methods and techniques for fabricating leather, including:
 - selecting and preparing leather hide
 - planning
 - measuring and calculating leather quantities
 - marking out and using patterns
 - cutting

- sewing
- using adhesives
- fitting and fastening
- procedures for cleaning leather
- procedures for protecting vehicle, vessel and components when using trimming
- procedures for final inspection of leather trimming components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the automotive and marine trimming they have made using leather, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to fabricate leather components
- leather and materials to carry out trimming activities
- component of one vehicle or vessel requiring leather trim
- tools, equipment and materials appropriate for selecting and using leather in automotive and marine trimming.

BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Establish contact with customers	1.1 Acknowledge and greet customer in a professional, courteous and concise manner according to organisational and legislative requirements 1.2 Maintain personal dress and presentation in line with organisational requirements 1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Maintain sensitivity to customer specific needs and any cultural, family and individual differences</p> <p>1.5 Establish rapport/relationship with customer and express a genuine interest in customer needs/requirements</p>
2 Identify customer needs	<p>2.1 Use appropriate questioning and active listening to determine customer needs</p> <p>2.2 Assess customer needs for urgency to identify priorities for service delivery</p> <p>2.3 Provide customer with information about available options for meeting customer needs and assist customer to identify preferred option/s</p> <p>2.4 Identify personal limitations in addressing customer needs and seek assistance from designated persons where required</p>
3 Deliver service to customers	<p>3.1 Provide prompt customer service to meet identified needs according to organisational requirements</p> <p>3.2 Provide information regarding problems and delays, and follow-up within appropriate timeframes as necessary</p> <p>3.3 Communicate with customers in a clear, concise and courteous manner</p> <p>3.4 Identify opportunities to enhance the quality of service and products, and take action to improve the service whenever possible</p>
4 Process customer feedback	<p>4.1 Promptly recognise customer feedback and handle sensitively according to organisational and legislative requirements</p> <p>4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures and legislative requirements</p> <p>4.3 Identify any unmet customer needs and discuss suitability of other products/services</p> <p>4.4 Support customers to make contact with other services according to organisational policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> Understands requirements in organisational policy and procedure documents Interprets product and service information in a range of formats to provide customer advice
Writing	4.2	<ul style="list-style-type: none"> Records customer information according to organisational requirements
Oral Communication	1.1, 1.3, 1.4, 1.5, 2.1-2.4, 3.2, 3.3, 4.3	<ul style="list-style-type: none"> Provides information or advice using structure and language to suit the audience Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> Follows organisational procedures and practices relevant to own role
Interact with others	1.1, 1.3-1.5, 2.1-2.4, 3.1, 3.2, 3.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Uses accepted communication practices to establish connections, build rapport and develop professional working relationships Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	3.2, 3.4, 4.1- 4.3	<ul style="list-style-type: none"> Addresses routine problems in familiar work contexts Recognises opportunities to enhance work practices and outcomes

Assessment Requirements for BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- greet customer and establish rapport/relationship in accordance with organisational requirements
- identify customer needs using appropriate interpersonal skills
- provide prompt service to address customer needs in accordance with organisational requirements
- identify and follow up opportunities to increase the quality of service and products
- respond to and record all customer feedback according to organisational standards, policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and briefly describe key provisions of relevant legislation from all forms of government that apply to provision of customer services
- identify and explain workplace organisational policies and procedures relating to customer service and the customer service process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service

- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES202 Evaluate the nature of design in a specific industry context

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to examine and consider the design process in a particular industry.

It applies to individuals working in any context, who need to develop a basic appreciation and knowledge of the way design works in a particular industry, and of its potential impacts on industry and individual work practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Source information on design in given industry context	1.1 Investigate the nature, history, role and importance of design in the industry 1.2 Evaluate roles played by designers and other contributors in design process 1.3 Source information on impact of technology on design in the industry

ELEMENT	PERFORMANCE CRITERIA
2 Examine links between design and own work	2.1 Investigate impact of design on own work 2.2 Consider role of individual workers across the industry in affecting future design directions
3 Keep up-to-date with industry design trends	3.1 Identify and access opportunities to maintain currency of knowledge about industry design trends 3.2 Evaluate how design trends affect the overall industry and how it operates 3.3 Share information and proactively discuss emerging trends with work colleagues 3.4 Identify trends that will impact on own work and seek opportunities to develop appropriate skills

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.4	<ul style="list-style-type: none"> Identifies and uses opportunities to maintain and improve skills and knowledge
Reading	1.1, 1.3, 3.1	<ul style="list-style-type: none"> Reviews textual information from a range of sources to identify relevant information
Writing	3.3	<ul style="list-style-type: none"> Prepares specific information using clear and appropriate language to present to other personnel
Oral Communication	3.3	<ul style="list-style-type: none"> Participates in verbal exchanges using vocabulary, style and tone appropriate to audience Uses listening techniques to clarify understanding
Interact with others	3.3	<ul style="list-style-type: none"> Collaborates with others to achieve shared goals
Get the work done	1.1-1.3, 2.1, 2.2, 3.2, 3.4	<ul style="list-style-type: none"> Plans routine tasks with familiar goals and outcomes Takes responsibility for routine low-impact decisions within familiar situations Identifies ideas in use in other contexts and considers how they might be applied in own context with minimal adjustment Recognises and applies some general design and

		operating principles of digital tools to inform design work

Assessment Requirements for BSBDES202 Evaluate the nature of design in a specific industry context

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and interpret a range of information sources on design and apply concepts to own work
- seek opportunities to maintain currency of industry trends and design skills and share information with colleagues.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- investigate and explain consumer/end-user expectations
- explain current and emerging technologies and their effects on design in the industry
- identify influential designers, both past and present
- describe major design trends in the industry
- explain and describe the role of design in a given industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- office equipment and resources
- sources of information on design in a specific industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES301 Explore the use of colour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore the use of colour and to apply colour theory.

It applies to individuals whose work involves understanding and applying the effective use of colour.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Source information on colour and colour theory	1.1 Identify and access sources of information on colour and colour theory 1.2 Evaluate and collate information to build knowledge of colour and its application in different contexts
2 Experiment with colour	2.1 Test different colours and colour-combinations through experimentation 2.2 Use own ideas as a way of testing, challenging or confirming colour theory

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure safe use of materials, tools and equipment during experimentation with colour
3 Communicate concepts and ideas through use of colour	<p>3.1 Investigate how colour might be used to communicate a particular idea or concept</p> <p>3.2 Select materials, tools and equipment relevant to the idea or concept</p> <p>3.3 Apply colour to communicate the concept or idea based on own knowledge of colour and colour theory</p> <p>3.4 Review and reflect on own use of colour and what it communicates</p> <p>3.5 Seek and obtain feedback from others about the way colour has been used and its success in communicating the concept or idea</p> <p>3.6 Present and store work any samples in a way which takes account of the need for professional presentation and potential relevance for future work</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.1	<ul style="list-style-type: none"> Evaluates and integrates facts and descriptions of colour from a range of texts including text embedded in visual media
Writing	1.2, 3.6	<ul style="list-style-type: none"> Produces a range of text types using appropriate vocabulary, grammatical structure and conventions Applies basic referencing and sequencing of professional and archival resources
Oral Communication	1.1, 3.5	<ul style="list-style-type: none"> Presents ideas, asks questions and listens, to seek feedback or generate ideas
Numeracy	2.1	<ul style="list-style-type: none"> Selects and uses mathematical information for measurement and volume
Navigate the world of work	2.3	<ul style="list-style-type: none"> Takes some personal responsibility for adherence to legal and regulatory requirements with specific reference to safety

Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.4, 3.6	<ul style="list-style-type: none"> Plans, sequences and implements tasks required to achieve outcomes Takes responsibility for routine low-impact decisions within familiar situations Evaluates effectiveness of decisions on how well they meet stated goals Contributes to the design of new approaches within immediate work environment Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role
-------------------	----------------------------------	--

Assessment Requirements for BSBDES301 Explore the use of colour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research information on colour and colour theory to inform work
- experiment with different colours and techniques to communicate a concept or idea
- review completed work and present and store samples for future reference.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain colour attributes and colour relationships
- describe and interpret different colour theories and their applications in different contexts
- describe individual interpretation and choice in relation to the use of colour, and the potential limitations of theory
- identify different materials, tools and equipment required to experiment with colour
- describe ways other practitioners use colour in their work.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- office equipment and resources
- materials, resources and equipment needed to apply colour in the relevant work context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES302 Explore and apply the creative design process to 2D forms

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore and creatively apply the design process to the development of two-dimensional (2D) forms.

It applies to individuals who apply the creative design process to the development of 2D forms. The unit underpins many other specialised design units.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Source information on 2D design	1.1 Identify and access relevant sources of information on 2D design 1.2 Evaluate and collate information to build knowledge of 2D design
2 Explore the creative design process for 2D forms	2.1 Use creative thinking techniques to generate a range of ideas and options 2.2 Use experimentation to explore and challenge a range of

ELEMENT	PERFORMANCE CRITERIA
	<p>different ideas</p> <p>2.3 Challenge assumptions, reflect on ideas and refine approaches</p> <p>2.4 Consciously change perspective, and evaluate ideas and situations in new ways</p>
3 Communicate concepts or ideas through application of design processes to 2D forms	<p>3.1 Investigate and reflect on how a particular concept or idea might be communicated in 2D</p> <p>3.2 Select materials, tools and equipment relevant to the realisation of the concept or idea</p> <p>3.3 Apply a creative design process to produce a range of 2D concept realisations</p> <p>3.4 Reflect on own application of design process and success in communicating the concept or idea</p> <p>3.5 Seek and obtain feedback from others about the 2D form and its success in communicating the concept or idea</p> <p>3.6 Present and store concept realisations or samples in a format which takes account of the need for professional presentation and the work's potential value for future jobs</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1	<ul style="list-style-type: none"> Interprets textual information from relevant sources to determine and adhere to requirements
Writing	2.1, 3.6	<ul style="list-style-type: none"> Produces a range of text types using appropriate vocabulary, grammatical structure and referencing conventions
Oral Communication	2.1, 2.2, 2.3, 3.5	<ul style="list-style-type: none"> Participates in verbal exchanges using vocabulary, style and tone appropriate to audience Uses listening techniques to clarify understanding
Numeracy	3.1, 3.3, 3.5	<ul style="list-style-type: none"> Performs mathematical calculations to produce 2D designs
Get the work done	1.1, 1.2, 2.1-2.4, 3.1-3.4, 3.6	<ul style="list-style-type: none"> Plans and organises tasks required to achieve required outcomes

		<ul style="list-style-type: none"> • Identifies ideas in use in other contexts and considers how they might be applied in own context • Selects new ideas that may improve a process in immediate work context • Takes responsibility for routine low-impact decisions within familiar situations • Evaluates effectiveness of decisions on how well they meet stated goals

Assessment Requirements for BSBDES302 Explore and apply the creative design process to 2D forms

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a range of samples or concept realisations which demonstrate creative thinking techniques and experimentation processes based on available resource materials
- review own work to determine future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify creative thinking techniques that can be used as part of the design process
- describe the elements and principles of design as applied to two-dimensional (2D) forms
- list materials, tools and equipment required for the design of 2D forms in the relevant work context
- describe the notion of individual interpretation and choice within the design process
- explain the particular challenges that may arise in the design of 2D forms.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to the materials, resources and equipment needed to apply design processes to 2D forms.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT301 Apply knowledge of the international trade environment to complete work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to complete work in an international trade context based on a demonstrated knowledge of the international trade environment.

It applies to individuals who work under the supervision of a more experienced colleague in various international work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge accessed from a variety of sources both internal and external to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify international and Australian regulatory bodies and their roles and responsibilities	1.1 Assess personal knowledge of relevant international and Australian regulatory bodies, their roles and responsibilities, and the required skills in applying this knowledge, to determine currency and adequacy 1.2 Identify knowledge and skill gaps

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Seek assistance as required to identify relevant bodies, their roles and responsibilities and their impact on own work</p> <p>1.4 Undertake learning to ensure currency and adequacy of knowledge and skills concerning regulatory bodies, their roles and responsibilities and their impact on own work</p>
2. Identify significant trade routes and modes of transport	<p>2.1 Assess personal knowledge of significant trade routes and modes of transport and the required skills in applying this knowledge, to determine currency and adequacy</p> <p>2.2 Identify knowledge and skills gaps</p> <p>2.3 Seek assistance as required to identify significant trade routes and modes of transport, and their impact on own work</p> <p>2.4 Undertake learning to ensure currency and adequacy of knowledge and skills concerning significant trade routes and modes of transport, and their impact on own work</p>
3. Investigate available sources of information on international trade	<p>3.1 Determine specific needs for information</p> <p>3.2 Access organisation's resources to meet information requirements</p> <p>3.3 Use information to address specific work needs and to identify further information requirements</p> <p>3.4 Access external information resources to meet further information requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1, 1.2, 1.4, 2.1, 2.2, 2.4	<ul style="list-style-type: none"> Assesses personal knowledge and identifies opportunities to update knowledge and skills to improve own work practices
Reading	1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.1-3.4	<ul style="list-style-type: none"> Identifies and comprehends relevant information from a range of texts to aid in determining needs and requirements
Writing	1.1, 1.4, 2.1, 2.4, 3.3	<ul style="list-style-type: none"> Documents results of research and learning activities for future reference

Oral Communication	1.3, 1.4, 2.3, 2.4	<ul style="list-style-type: none"> • Uses appropriate vocabulary and non-verbal features during learning activities • Uses listening and questioning skills to seek and clarify information
Navigate the world of work	1.1, 1.3, 1.4	<ul style="list-style-type: none"> • Builds knowledge of regulatory framework within own work context and to achieve desired outcomes
Interact with others	1.3, 1.4, 2.3, 2.4	<ul style="list-style-type: none"> • Interacts effectively when seeking assistance and advice from relevant personnel and industry bodies • Collaborates with other more experienced work colleagues to supplement knowledge and achieve outcomes
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1-3.4	<ul style="list-style-type: none"> • Plans, organises and implements tasks required to achieve required outcomes • Uses analytical skills to evaluate knowledge or skill gaps and decide on appropriate methods to address these gaps

Assessment Requirements for BSBINT301 Apply knowledge of the international trade environment to complete work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine information needs as assigned by senior members of the organisation using a variety of internal and external sources to gather information
- submit examples of completed tasks that apply knowledge of international and Australian regulatory bodies, their roles and responsibilities and significant trade routes and modes of transport
- carry out self-assessment to address gaps in knowledge or skills.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify significant trade routes and modes of transport
- outline relevant international and Australian regulatory bodies, their roles and responsibilities
- explain the historical and contemporary context of trade, particularly as this affects Australian trade
- outline internal and external information sources related to regulatory bodies, trade routes and transport modes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources

- relevant documentation
- case studies or scenarios relating to international trade.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBINT302 Apply knowledge of legislation relevant to international trade to complete work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- maintain compliance with regulatory and policy requirements
- report possible incidents of non-compliance
- seek assistance to clarify compliance requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and provide an overview of key provisions of relevant legislation, codes of practice and national standards that affect international trade
- outline organisational policies and procedures relating to compliance
- explain the implications of non-compliance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources
- relevant documentation
- case studies or scenarios relating to international trade.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT405 Apply knowledge of import and export international conventions, laws and finance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain currency of knowledge and skills on international conventions, laws and finance to apply these to import and export responsibilities.

It applies to individuals with a broad knowledge of international trade who need to maintain relevant knowledge and skills by recognising the limits of their own experience and knowledge, and organise learning to collect, analyse, apply and review information required for specific complex tasks or projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Maintain currency of knowledge and skills	1.1 Assess personal knowledge of relevant international conventions, laws and finance and the required skills in applying this knowledge to determine currency and adequacy 1.2 Identify skills and knowledge gaps 1.3 Undertake learning to ensure currency and adequacy of knowledge

ELEMENT	PERFORMANCE CRITERIA
	and skills in applying international conventions, laws and finance to own work
2 Identify information requirements and access available information	2.1 Determine specific needs for information 2.2 Access organisation's resources to meet information requirements 2.3 Use information to address specific work needs and to identify further information requirements 2.4 Access external information resources to meet further information requirements
3 Interpret, analyse and apply available information	3.1 Collect and collate available information for analysis 3.2 Interpret, analyse and process available information to obtain required knowledge 3.3 Seek assistance of specialist experts, if required, to interpret, analyse and synthesise required information 3.4 Use information and knowledge to facilitate import and export of goods in compliance with relevant Australian and overseas legislation, trade conventions and agreements, and international financing arrangements
4 Review research and analysis process	4.1 Use and review information and knowledge to facilitate import and export of goods for effectiveness 4.2 Document review findings for future use in import and export of goods 4.3 Identify skill and knowledge gaps and undertake further learning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1, 1.2, 1.3, 4.3	<ul style="list-style-type: none"> Extends own professional development to ensure adequacy and currency of skills and knowledge
Reading	1.1-1.3, 2.2-2.4, 3.1, 3.2, 3.4, 4.1, 4.3	<ul style="list-style-type: none"> Gathers, interprets and analyses complex textual information to contextualise it to requirements
Writing	1.2, 1.3, 2.1, 2.3,	<ul style="list-style-type: none"> Takes notes for personal use

	3.1, 3.2, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> • Uses clear and specialised language to accurately document requirements and outcomes
Oral Communication	3.3	<ul style="list-style-type: none"> • Participates in verbal exchanges using appropriate language and non-verbal features • Elicits the views and opinions of others by listening and questioning
Navigate the world of work	1.1, 1.3, 2.2, 2.3 2.4, 3.4	<ul style="list-style-type: none"> • Appreciates the implications of legal and regulatory responsibilities related to own work
Interact with others	3.3	<ul style="list-style-type: none"> • Seeks guidance and expertise of others when required
Get the work done	1.1-1.3, 2.2, 2.4, 3.1, 3.2, 4.2	<ul style="list-style-type: none"> • Uses logically sequenced steps to plan and implement tasks related to own work • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary • Uses review processes to reflect on ways practices may be improved in the future

Assessment Requirements for BSBINT405 Apply knowledge of import and export international conventions, laws and finance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify ongoing learning needs in relation to international conventions, laws and financial matters that impact on import/export responsibilities
- identify processes or opportunities to gain the necessary information
- use and manage opportunities to gain the necessary information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the types of learning opportunities available in the organisation and how to access them
- explain the key provisions of legislation, codes of practice, standards or conventions relevant to international transactions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- resource collections
- office equipment and resources
- relevant workplace documents.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT409 Plan for international trade

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively plan for the international trade of goods.

It applies to individuals with the skills and knowledge to evaluate options when planning for the international trade of goods. The planning activity will usually be in the context of providing a preliminary quotation, a quotation, supplementary advice on a quotation, or when evaluating a freight contract received from a buyer or seller.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Evaluate the most appropriate transport method, route and protection/security options according to cargo and delivery requirements	1.1 Ascertain business context of cargo movement 1.2 Examine factors to be considered in route/mode selection 1.3 Evaluate conditions and risks of different routes in relation to delivery requirements 1.4 Utilise resources that provide information on the current service status of particular transport routes
2 Review shipping and airfreight services available for transporting cargo	2.1 Identify airlines and air cargo services operating in and out of Australia 2.2 Compare configuration and carrying capacity of different types of aircraft

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3 Identify shipping services and types of ocean vessels operating in and out of Australia</p> <p>2.4 Compare different types of shipping services</p> <p>2.5 Compare configurations and carrying capacities of different types of ocean vessels</p>
<p>3 Evaluate packing, marking and stowage requirements for a variety of cargo</p>	<p>3.1 Analyse and prepare protection, presentation and preservation requirements</p> <p>3.2 Analyse range of containers available for international cargo and evaluate for use</p> <p>3.3 Evaluate marking requirements and prepare correct marking advice</p> <p>3.4 Identify risk factors in relation to packing and storing of goods for transportation, and select appropriate options</p>
<p>4 Calculate international freight and other shipment costs</p>	<p>4.1 Examine and apply types of rates, volume-to-weight ratio factors, volume rules including rounding off and allowable projections, principles and methods of rating cargo for international carriage by sea</p> <p>4.2 Take into account, variations in calculating shipping charges caused by surcharges and other variants</p> <p>4.3 Calculate and compare costs of shipping a variety of goods by several types of ocean service</p> <p>4.4 Examine and apply types of rates, volume-to-weight ratio factors, volume rules including rounding off, principles and methods of rating cargo for international carriage by air</p> <p>4.5 Explain variations in calculating airfreight charges caused by the applicability of TACT rates, fuel surcharges, other variants, and exchange rates</p> <p>4.6 Calculate and compare costs of shipping a variety of goods by different air cargo services</p> <p>4.7 Investigate and communicate postal and courier freight rates and size/weight factors and limitations</p> <p>4.8 Investigate and communicate rates and costs associated with chartering vessels and aircraft</p> <p>4.9 Investigate and communicate rating principles and methods used in domestic, sea, road, rail and air transport</p> <p>4.10 Investigate all standard and extraordinary ancillary shipment costs on a door-to-door basis applicable in each mode</p> <p>4.11 Investigate and communicate the total cost concept and other</p>

ELEMENT	PERFORMANCE CRITERIA
	factors that may determine whether cargo is carried by air or sea, or a combination of both (multimodal transport)
5 Identify cargo insurance and claim requirements for goods	<p>5.1 Evaluate the need for cargo insurance</p> <p>5.2 Investigate the standard types of cover arrangements used by underwriters</p> <p>5.3 Identify documents to be lodged with carriers, forwarders, insurance underwriters and customs in cargo loss or damage situations and complete for a hypothetical situation</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.4, 4.1, 4.2, 4.4, 4.7, 4.8, 4.10, 4.11, 5.1-5.3	<ul style="list-style-type: none"> Interprets textual information from a range of sources to determine how content may be applied when planning for international trade
Writing	3.1, 3.3, 4.7-4.9, 4.11, 5.3	<ul style="list-style-type: none"> Produces documentation for particular purposes using clear and specific language and required structure Completes forms and other documents required for international trade
Oral Communication	4.5, 4.7-4.9, 4.11	<ul style="list-style-type: none"> Explains complex information using language appropriate to audience and environment
Numeracy	1.1, 1.2, 2.2, 2.5, 4.1-4.11, 5.1	<ul style="list-style-type: none"> Analyses numerical information and calculates costs associated with international trade of goods
Interact with others	4.5, 4.7-4.9, 4.11	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.4, 4.1-4.11, 5.1-5.3	<ul style="list-style-type: none"> Uses logically sequenced steps to plan and coordinate tasks required to achieve outcomes Uses problem-solving processes in complex situations, gathering and evaluating relevant information before deciding on transport options

Assessment Requirements for BSBINT409 Plan for international trade

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- choose appropriate transport modes, routes and securing options
- demonstrate successful preparation for international transport for different types of general cargo
- document completed quotations, supplementary quotations, budget or expressions of interest prepared for an external client or own workplace.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and standards relevant to international trade
- outline organisational policies and procedures relating to international trade
- outline risk factors in relation to packing and storing of goods for transportation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources
- relevant workplace documents
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG408 Conduct market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct market research using interview and survey methodologies (excluding specialist statistical design and analysis) and report on findings.

It applies to individuals who undertake data and information gathering and analysis as a major part of their role and are required to conduct market research. These individuals often work in areas such as marketing, communications, strategic planning and organisational development.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Conduct desk research to gather background market information	1.1 Conduct initial desk research using appropriate sources to gather background market information 1.2 Identify options for information collection and collation tools and methods 1.3 Determine and seek approval for reporting formats for market research documentation 1.4 Report initial research findings in approved formats in

ELEMENT	PERFORMANCE CRITERIA
	accordance with organisational procedures
2. Develop research methodology and objectives	2.1 Develop hypotheses and research objectives for market research 2.2 Identify options for quantifying data 2.3 Identify market research methodology and determine, develop, test and amend required survey tools 2.4 Determine and test methods of data extraction, collation and analysis
3. Recruit respondents	3.1 Interpret market research plans to identify potential respondents and their requirements 3.2 Identify respondents in line with research and organisational requirements 3.3 Recruit respondents in line with agreed research methodology and organisational requirements
4. Gather data and information from respondents	4.1 Prepare and arrange resources for data gathering 4.2 Gather data and information using survey tools 4.3 Record data and information gathered in approved formats, in accordance with organisational procedures 4.4 Store and safeguard survey information and data in accordance with organisational procedures
5. Analyse research information	5.1 Conduct checks on quality of data and information collected 5.2 Select appropriate techniques to summarise data and information 5.3 Design software files for entering data and information 5.4 Process data using a method appropriate to research design 5.5 Interpret and aggregate data and information, including categorisation, to provide observations relevant to research objectives
6. Prepare research reports	6.1 Collate and assess findings for relevance and usefulness to research objectives 6.2 Prepare research reports 6.3 Communicate research findings to relevant personnel and stakeholders in accordance with organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1-2.4, 3.1-3.3, 4.1-4.4, 5.1, 5.4, 5.5, 6.1-6.3	<ul style="list-style-type: none"> Interprets and analyses text from a range of sources and identifies relevant and key information
Writing	1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.3, 4.1, 4.3, 5.3, 6.2, 6.3	<ul style="list-style-type: none"> Organises content that incorporates results of research logically, using correct grammatical structure, clear language and required organisational format
Oral Communication	1.3, 3.3, 4.2, 6.3	<ul style="list-style-type: none"> Presents information using suitable tone, language and syntax Gathers information through active listening and questioning
Numeracy	1.1, 1.4, 2.4, 3.1, 4.2, 5.1-5.5, 6.1	<ul style="list-style-type: none"> Extracts and evaluates mathematical information and uses a variety of techniques to interpret data and analyse trends
Navigate the world of work	1.4, 3.2, 3.3, 4.3, 4.4, 6.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit organisational protocols and procedures, and meets expectations associated with own role
Interact with others	1.3, 3.3, 6.3	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1, 1.3, 2.1-2.4, 3.1, 3.2, 4.1, 4.2, 4.4, 5.1-5.5, 6.1, 6.2	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option Uses digital technologies and systems safely and ethically to access, enter, organise, store and share information

Assessment Requirements for BSBMKG408 Conduct market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement a market research survey tool
- accurately record and securely store survey data in accordance with organisational procedures
- utilise a range of methodologies to analyse market research information
- document market research activities and findings in a research report.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify key provisions of legislation, codes of practice and national standards relevant to marketing roles
- outline relevant marketing communications concepts and processes
- explain relevant market research principles and practices including:
 - data processing methods and data analysis techniques
 - design of samples
 - development and use of hypotheses
 - research reporting formats
 - roles and uses of qualitative and quantitative research
 - use of survey instruments
- outline typical information contained in a market research report, as well as requirements of a house or other style manuals or protocols for written communication.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- Interaction with others.

Assessment Requirements for BSBMKG413 Promote products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the context for the promotional activities including:
 - relevant legislation/regulations
 - organisation's goals, objectives, systems, policies and procedures
 - budget and timelines
 - marketing needs and, if defined, marketing plans
 - objectives of the promotional activities
- consult with relevant stakeholders to plan promotional activities to meet objectives, budget and timelines
- coordinate promotional activities including:
 - allocation of personnel, roles and responsibilities
 - sourcing other resources and promotional products as appropriate
 - use of networks and relationships
- analyse feedback and data to evaluate the effectiveness of planning processes and promotional activities and make recommendations on future directions of promotional activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation as relevant to the marketing plan
- outline the planning processes for organising promotional activities

- explain the organisation's marketing objectives and how they support the overall business objectives
- explain how common promotional activities could be used to support the marketing objectives with reference to
 - advertising
 - client functions
 - employee functions
 - media announcements
 - product launches
 - web pages.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBMKG414 Undertake marketing activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research marketing practices of the organisation
- plan and implement a marketing activity
- record activities and processes used in marketing activity
- review effectiveness of marketing plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic foundations of marketing practices
- describe organisational policies and procedures on marketing
- outline specific product knowledge related to products and services being marketed.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- examples of products or services to be marketed
- marketing plans, policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG415 Research international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to undertake market research to select international markets to pursue.

It applies to individuals working with minimal supervision but with support and assistance of a more senior person within the organisation.

The activities focus on the target market and involve communication and executing tasks across cultural and geographic barriers.

The tasks involved in marketing goods and services internationally include selecting and implementing appropriate marketing activities, and monitoring and reviewing marketing performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information	1.1 Identify target markets to research as new international markets

ELEMENT	PERFORMANCE CRITERIA
about target markets	from brief or manager 1.2 Confirm information requirements for market research 1.3 Seek assistance as required, with sourcing and accessing required information 1.4 Identify and access sources of required information
2. Investigate trends in target markets	2.1 Collate required information from information sources 2.2 Apply statistical analysis tools to information to identify trends 2.3 Seek assistance as required, with analysing required information 2.4 Investigate causal influences 2.5 Document and report identified trends and causal influences to relevant personnel within organisation
3. Utilise data in decision-making	3.1 Base decision-making on available data 3.2 Check consistency of decision-making against data, and document rationale for decision-making on markets to pursue 3.3 Document and report recommendations to relevant personnel within organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.1, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> Interprets textual information obtained from a range of sources and determines how content may be applied to organisational requirements
Writing	1.2, 1.3, 2.1, 2.5, 3.2, 3.3	<ul style="list-style-type: none"> Integrates information from a number of sources to develop material that supports purposes and format of documentation using suitable grammatical structure and clear, logical language
Oral Communication	1.1-1.3, 2.3, 2.5, 3.3	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges using suitable language and non-verbal features Uses active listening and questioning techniques to confirm requirements and understanding

Numeracy	2.2, 2.5	<ul style="list-style-type: none"> Collates and interprets numeric information and analyses trend data relevant to marketing activities
Interact with others	1.3, 2.3, 2.5, 3.3	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role Seeks assistance and guidance from others as required
Get the work done	1.1, 1.2, 1.4, 2.2, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> Takes responsibility for planning, organising, confirming and completing tasks to achieve required outcomes Takes responsibility for outcomes of routine decisions related directly to own role Evaluates effectiveness of decisions in terms of how well they meet stated goals Initiates standard procedures when responding to familiar problems within immediate context Uses digital tools to complete tasks

BSBMKG419 Analyse consumer behaviour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse consumer behaviour for markets and specific needs.

It applies to individuals who need to analyse consumer behaviour to examine factors that impact decisions to purchase products or services. They conduct a thorough analysis of consumer attitudes and behaviour, and make recommendations on marketing strategies to increase consumption of the product or service being marketed.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm product or service market	1.1 Gather information on market or market segment for a product or service in accordance with a marketing plan 1.2 Identify consumer attributes for market or market segment from market profile or existing customer data 1.3 Identify and test features of product or service in accordance with a marketing plan

ELEMENT	PERFORMANCE CRITERIA
2. Assess reasons for existing levels of consumer interest	2.1 Investigate consumer need for the product or service through analysis of trends and past performance 2.2 Review past marketing or positioning of product or service in relation to effectiveness of its focus of appeal 2.3 Assess, estimate and test impact of individual, social and lifestyle influences on consumer behaviour for a product or service 2.4 Analyse consumer responses to previous marketing communications 2.5 Review relevant data to determine consumer digital footprints, engagement journeys and expectations 2.6 Assess organisational capability to respond quickly to consumer demand for products or services in accordance with marketing plan
3. Recommend focus of appeal for marketing strategies for product or service	3.1 Ensure marketing strategies address innate and acquired needs of consumers and appeal to motives that influence decision-making 3.2 Present a rationale for focus of appeal that outlines how influences on consumer behaviour will be used to target effective marketing strategies 3.3 Clarify the role of the consumer in the digital marketing environment and model engagement conversations and interventions 3.4 Ensure focus of appeal meets legal and ethical obligations and budgetary requirements of marketing plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.6, 3.1, 3.3	<ul style="list-style-type: none"> Interprets and analyses text from a range of sources to identify relevant and key information
Writing	1.1-1.3, 2.1, 2.3, 2.5, 3.1-3.3	<ul style="list-style-type: none"> Prepares strategic business documentation incorporating appropriate vocabulary, grammatical structure and conventions appropriate to purpose and

		audience
Oral Communication	1.1, 3.2	<ul style="list-style-type: none"> Gathers information through active listening and questioning Presents information using suitable words and non-verbal features
Numeracy	1.2, 1.3, 2.1, 2.3, 2.5	<ul style="list-style-type: none"> Uses mathematical skills and techniques to interpret and process data and analyse trends
Navigate the world of work	1.1, 1.3, 2.6, 3.4	<ul style="list-style-type: none"> Complies with implicit and explicit organisational procedures and processes Adheres to ethical, legal and regulatory responsibilities relevant to own work context
Interact with others	3.2	<ul style="list-style-type: none"> Selects and applies appropriate form and mode of communication for a specific purpose and audience
Get the work done	1.1-1.3, 2.1-2.6, 3.1-3.4	<ul style="list-style-type: none"> Develops plans to manage relatively complex tasks with an awareness of how they may contribute to longer-term operational and strategic goals Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option

Assessment Requirements for BSBMKG507 Interpret market trends and developments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply statistical and qualitative analysis techniques to identify:
 - current business performance
 - competitor performance
 - potential threats and opportunities
- apply qualitative and forecasting techniques to identify:
 - success of marketing activities
 - over and under-performing products and services
 - existing and emerging market needs
- document the analysis of market data including visual presentation of findings.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline internal and external sources of information relevant to forecasting market trends including:
 - business and strategic objectives
 - marketing and other business performance
 - comparative market information
 - changes in technology
 - demographic changes
 - social and cultural factors
 - economic trends

- government activities and legislative changes
- industry trends
- supplier data
- outline the legislative and regulatory context as it applies to marketing
- identify software applications that are commonly used in quantitative and qualitative analysis and outline their key features
- outline statistical concepts, methods, techniques and reporting formats commonly used in marketing including:
 - conversion rate of leads to sales
 - measures of central tendency
 - measures of dispersion
 - nature and degree of relationship between variables
 - net response rate
 - normal distribution probability curve
 - sampling
 - speed of response curve
 - recency or frequency grids
 - lifetime value of customers
 - net present value of customers.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBMKG606 Manage international marketing programs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document and present
 - international marketing objectives
 - selected marketing approach
 - creation of operational structure
- effectively manage international marketing activities
- monitor and evaluate international marketing performance, and make any necessary adjustments as required
- formulate suggestions on how marketing activities could be affected in future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant Australian and international standards, models policies and guidelines, including those covering:
 - environmental matters
 - human rights
 - labour relations
 - packaging
 - risk management
 - electronic commerce
- identify and explain key provisions of relevant legislation and codes of practice affecting aspects of marketing operations

- explain the role of the Organisation for Economic Co-operation and Development (OECD)
- identify and describe key features of the country or countries being considered for market entry or penetration, including:
 - cross-cultural communication and negotiation styles
 - global and country specific economic, social and industry directions, trends, practices and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- organisational strategic and marketing plans, and other relevant documents.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG607 Manage market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prepare for, manage and evaluate market research projects across an organisation.

It applies to senior marketing professionals who are responsible for preparing market research plans for implementation, engaging external consultants, managing market research activity, and evaluating research processes and findings across an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare market research plans for implementation	1.1 Determine research policies and procedures 1.2 Develop or commission and review market research project plan and detailed work plans to point of finalisation 1.3 Execute processes to obtain required resources to implement market research project plan and work plans
2. Engage external consultants or service	2.1 Identify requirements for external consultants from market research project plan

ELEMENT	PERFORMANCE CRITERIA
providers	<p>2.2 Specify goods and services required to implement plans, and detail criteria for selection</p> <p>2.3 Identify, evaluate and select potential consultants or other providers of required goods and services</p> <p>2.4 Contract selected consultants or providers of goods and services</p>
3. Manage market research activity	<p>3.1 Monitor work plan activity to ensure adherence to market research project plan and work plans, and consistency with organisational market research policy and procedures</p> <p>3.2 Manage external consultants or service providers to ensure performance is in line with expectations and contractual requirements</p>
4. Evaluate research processes and findings	<p>4.1 Confirm validity of information and data obtained by market research</p> <p>4.2 Review relevance and usefulness of findings against research objectives outlined in market research project plan</p> <p>4.3 Assess performance of project against all relevant elements of market research project plan and work plans</p> <p>4.4 Measure stakeholder satisfaction with research process and findings</p> <p>4.5 Prepare reports for future improvements to research process</p> <p>4.6 Implement revised policy and practices in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1, 4.1	<ul style="list-style-type: none"> Accesses complex information from a range of sources and accurately analyses data relevant to marketing activities
Writing	1.2, 2.2, 2.4, 4.5	<ul style="list-style-type: none"> Prepares a range of workplace documentation, using clear language and required format, to convey priorities and critical strategic information

Oral Communication	2.4, 3.2	<ul style="list-style-type: none"> Actively participates in verbal exchanges using suitable language and non-verbal features Uses active listening and questioning techniques to confirm understanding
Numeracy	4.4	<ul style="list-style-type: none"> Measures and analyses complex numeric information during evaluation process
Navigate the world of work	1.1, 3.1, 3.2, 4.6	<ul style="list-style-type: none"> Understands and adheres to organisational policies and objectives Is highly autonomous, taking responsibility and ownership for most or all aspects of own work
Interact with others	2.4, 3.2	<ul style="list-style-type: none"> Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.2, 1.3, 2.1-2.3, 4.1-4.3	<ul style="list-style-type: none"> Uses logical planning processes, and an increasingly intuitive understanding of context, to gather relevant information Systematically analyses and evaluates information to assess performance and identify opportunities for improvement Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account Recognises potential of new approaches to enhance work practices and outcomes

Assessment Requirements for BSBMKG607 Manage market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a market research plan
- develop specifications for research components, outsourced to external consultants as appropriate
- manage market research activities in accordance with organisational market research policy and procedures
- evaluate research processes and findings against relevant market research project plan and work plans
- prepare and present a report on market research findings.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline principles and practices of market research including:
 - data processing methods and data analysis techniques
 - project design to meet given budgets and other resource constraints
 - qualitative and quantitative research
 - design of samples
 - development and application of hypotheses
 - role of research in enterprise development
 - use of survey instruments
- compare and contrast project management principles and practices, including:
 - consultation and stakeholder involvement
 - development of policies and procedures

- methods of action to ensure performance
- monitoring of timelines, budgets and other implementation plans
- organisational procedures for engagement of consultants
- provide an overview of key provisions of relevant legislation, codes of practice and national standards affecting marketing operations
- discuss the impact of economic, social and industry directions, trends, and practices on marketing functions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- previous market research plans and exemplars of market research project specifications
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG608 Develop organisational marketing objectives

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct a strategic analysis to develop organisational marketing objectives. This involves reviewing the organisation's internal and external environments, evaluating past and current marketing performance, and exploring and evaluating new marketing opportunities.

It applies to senior marketing professionals who are responsible for providing strategic direction to the marketing function of an organisation. Their responsibilities include analysing information on internal and external business and marketing environment; examining current marketing performance; identifying new marketing opportunities arising from emerging trends; and devising strategies to achieve overall business objectives.

Individuals operating at this level generally conduct these activities using information gathered by people working under their direct and indirect supervision at lower levels of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Identify strategic direction	<p>1.1 Confirm organisation's mission, vision, purpose and values from current organisational materials or from owners, directors or senior management</p> <p>1.2 Analyse strategic organisational documents to identify organisational directions and targets</p> <p>1.3 Complete a situational analysis identifying factors impacting the direction and performance of the business</p> <p>1.4 Identify legal and ethical requirements for the organisation</p> <p>1.5 Document and confirm strategic direction of the organisation with owners, directors or senior management, and identify its impact on marketing activities</p>
2. Review marketing performance	<p>2.1 Evaluate effectiveness of previous marketing and positioning strategies to identify lessons learned</p> <p>2.2 Analyse current key products or services and major markets for strengths, weaknesses, opportunities and threats</p> <p>2.3 Evaluate previous marketing opportunities captured by the organisation, and examine and document their profitability</p> <p>2.4 Evaluate marketing performance against previous objectives, targets to identify critical success factors, and areas for improvement</p>
3. Scope marketing opportunities	<p>3.1 Identify and analyse marketing opportunities for viability and likely contribution to the business</p> <p>3.2 Use an assessment of external factors, costs, benefits, risks and opportunities to determine scope of each marketing opportunity</p> <p>3.3 Analyse opportunities for likely fit with organisational goals and capabilities</p> <p>3.4 Evaluate each opportunity to determine its likely impact on current business and customer base</p>
4. Formulate marketing objectives	<p>4.1 Develop objectives in consultation with key internal stakeholders that are attainable and measurable, and that identify nature and extent of what is to be achieved</p> <p>4.2 Ensure objectives are consistent with forecast needs of the business and market</p> <p>4.3 Ensure objectives are compatible with the organisation's projected capabilities, resources and financial position</p> <p>4.4 Ensure objectives are compatible with the organisation's direction and purpose, and meet legal and ethical requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.5 Formulate long-term strategic objectives and related key performance indicators by product or service, market segment and overall</p> <p>4.6 Develop a risk management strategy to identify risks and manage contingencies, and to ensure marketing objectives are met in accordance with overall organisational requirements</p> <p>4.7 Document marketing objectives</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1-2.4, 3.1-3.3, 4.3, 4.4, 4.6	<ul style="list-style-type: none"> Accesses, analyses and evaluates information from a range of sources relating to the marketing process
Writing	1.3, 1.5, 2.3, 4.1, 4.5-4.7	<ul style="list-style-type: none"> Uses a range of writing styles to articulate complex concepts Revises and edits documents based on feedback Uses appropriate formats and grammatical structures to present information logically for different audiences
Oral Communication	1.1, 1.5, 4.1	<ul style="list-style-type: none"> Uses appropriate language and non-verbal features to explain and present information to a range of personnel Uses active listening and questioning to elicit feedback and clarify or confirm understanding
Numeracy	1.2, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> Analyses complex numerical information on trend data, targets and budgets
Navigate the world of work	1.1, 1.2, 1.4, 3.3, 4.4, 4.6	<ul style="list-style-type: none"> Works autonomously making high-level decisions to ensure organisational objectives and regulatory requirements are met Understands own legal and ethical rights and responsibilities
Interact with others	1.1, 1.5, 4.1	<ul style="list-style-type: none"> Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how Fosters a collaborative culture within own sphere of

		influence, facilitating a sense of commitment to shared goals
Get the work done	1.3, 2.1-2.4, 3.1-3.4, 4.2, 4.3, 4.5, 4.6	<ul style="list-style-type: none"> • Uses logical planning processes, and an increasingly intuitive understanding of context, to extract relevant details when conducting strategic analysis • Systematically analyses information to formulate and evaluate alternative strategies • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account

BSBSMB304 Determine resource requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select options for resource acquisition, develop procedures and systems for efficient installation, and use and maintain resources.

It applies to individuals who are establishing or operating a micro business providing self-employment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify resources needed in the business	1.1 Use the business profile to determine types of resources that may be required

ELEMENT	PERFORMANCE CRITERIA
	1.2 Gather information regarding resource requirements from appropriate sources 1.3 Investigate digital technology options, benefits and challenges 1.4 Determine resource quantities in accordance with business activity levels and financial position
2. Select appropriate sources for resources required in the business	2.1 Investigate different options for acquiring resources needed in the business in terms of business profile and stakeholder needs 2.2 Determine reliability, risks and costs associated with these options in line with business projections 2.3 Determine ease of access to sources of service and support 2.4 Select suitable options as investigated 2.5 Establish relationships with suppliers and other key people
3. Prepare for use of resources in the business	3.1 Design procedures and systems to allow effective and efficient introduction, use and maintenance of resources 3.2 Negotiate and review arrangements for supply of resources to ensure the business profile is met 3.3 Design procedures for monitoring use of resources 3.4 Develop procedures for maintenance, support, repair and replacement of business machinery, equipment and software

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 3.1	<ul style="list-style-type: none"> Gathers, interprets and analyses textual and numerical information from a range of sources and identifies relevant and key information
Writing	1.1, 1.3, 2.5, 3.1-3.4	<ul style="list-style-type: none"> Uses factual information and industry related terminology to complete simple instructional documentation
Oral Communication	2.1, 2.5, 3.2	<ul style="list-style-type: none"> Uses relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding

Numeracy	1.3, 2.2, 3.1	<ul style="list-style-type: none"> Analyses numerical information to calculate resource and equipment expenditure
Interact with others	2.5	<ul style="list-style-type: none"> Uses a range of communication strategies to establish a connection with others
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.4	<ul style="list-style-type: none"> Uses a range of digitally based technology and applications to access and filter data, and then extract, organise, integrate and share relevant information in increasingly effective ways Invests some time in looking for new ideas and opportunities, selecting appropriate options as required Considers effectiveness of a solution in terms of how well it meets business goals Takes responsibility for planning and organising own and others workload, identifying ways of sequencing and combining elements for greater efficiency

Assessment Requirements for BSBSMB304 Determine resource requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine appropriate resource levels in line with micro business profile and desired profit
- identify, assess and select digital technologies
- select options for resource acquisition suited to the micro business and financial position, including stakeholder needs
- establish relationship with suppliers including negotiating and reviewing supplies to suit profile of micro business
- develop procedures and systems to allow for efficient and effective installation and use of resources, including monitoring and maintenance as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify legislative requirements relating to micro business operations
- describe the functions of key digital technologies and their benefits and challenges to micro business
- list functions of a range of business equipment and machinery
- outline the micro business profile and structure
- describe procedures and systems for use of and routine maintenance of resources

- summarise types of resources required as per the micro business profile.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources including maintenance manuals
- business technology including internet access
- relevant workplace documentation and resources including a business profile sample
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs of the business
- identify, select and access sources of advice on compliance and risk minimisation procedures for the business
- complete a development and review of procedures for compliance and risk minimisation (with assistance from advisors).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify micro business registration and licensing requirements
- list government legislative requirements relating to business operation
- categorise the nature of legal responsibility
- pinpoint relevant industry codes of practice
- list relevant WHS responsibilities and procedures
- name sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues
- outline taxation requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology including internet access for research
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CPCCCM2002A Carry out excavation

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake hand excavation tasks and excavations requiring the assistance of plant machinery to form excavations for footings, and the provision of services. It includes excavation to new and existing sites, and new services or the diversion of existing services.

Application of the Unit

Application of the unit

This unit of competency supports achievement of skills to safely and efficiently undertake basic excavation on a construction site, which includes working with others and as a member of a team.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

CPCCOHS2001A

Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained, confirmed and applied from relevant <i>information</i> for <i>planning and preparation</i>.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. <i>Tools and equipment</i> selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.</p> <p>1.5. Material quantity requirements are calculated in accordance with plans and specifications.</p> <p>1.6. <i>Materials</i> appropriate to the work application and <i>quality requirements</i> are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and <i>statutory and regulatory authority</i> obligations, and are applied.</p>
2. Locate excavation site and erect safety equipment.	<p>2.1. Excavation route is located, and line and depth are established from site plans and instructions.</p> <p>2.2. Site pegs/profiles are used to identify service</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>markers and to <i>set out</i> service points and the excavation limits are marked.</p>
	<p>2.3. Safety barricades and signs appropriate to the project are erected in positions as required by site safety plan.</p>
	<p>2.4. Temporary drainage system is established to divert surface and sub-surface water from excavation.</p>
	<p>2.5. Service markers or taped areas are identified and damage or interference with underground services avoided.</p>
<p>3. Dig excavations.</p>	<p>3.1. <i>Excavations</i> are safely dug with hand tools to ensure correct route, line and depth, and that procedures are used to minimise risk to self and others.</p>
	<p>3.2. Machine operator is assisted with excavation to ensure correct route, line and depth, and that correct procedures are used to minimise risk to self and others.</p>
	<p>3.3. Trench/excavation support is installed where specified by job specifications and regulations.</p>
	<p>3.4. Excavation is cleaned free from loose material with hand tools and according to job requirements and instructions.</p>
<p>4. Clean up.</p>	<p>4.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p>
	<p>4.2. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:

REQUIRED SKILLS AND KNOWLEDGE

- assist machine operator
- determine requirements
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- follow instructions
- read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
- report faults
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- commonly used in-ground services and identification by relevant markers
- construction terminology
- excavation materials
- excavation techniques
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- regulatory requirements for excavation support for safe access
- safe work with common plant used on construction industry sites
- types, characteristics, uses and limitations of tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- determine from an existing set out, a mark out and then excavate site as part of an overall project to job specifications without damaging services.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

EVIDENCE GUIDE

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and

EVIDENCE GUIDE

separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- maps
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications

RANGE STATEMENT

Planning and preparation include:

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- regulatory and legislative requirements pertaining to carrying out excavations
- relevant Australian standards
- safe work procedures related to carrying out excavations
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.
- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment

RANGE STATEMENT

- Tools and equipment*** include:
- use of tools and equipment
 - workplace environment and safety.
 - automatic levels
 - brooms
 - buckets
 - crow bars
 - hammers
 - hoses
 - laser levels
 - levels
 - measuring tapes and rules
 - picks
 - profiles
 - saws
 - set out pegs
 - shovels
 - staff
 - straight edges
 - string lines
 - wheelbarrows.
- Materials*** include:
- nails
 - pegs
 - sheet material shoring (timber and metal)
 - timber.
- Quality requirements*** include relevant regulations, including:
- Australian standards
 - internal company quality policy and standards
 - manufacturer specifications, where specified
 - workplace operations and procedures.
- Environmental requirements*** include:
- clean-up management
 - noise and dust
 - vibration
 - waste management.
- Statutory and regulatory authorities*** include:
- federal, state and local authorities administering applicable Acts, regulations and codes of practice.
- Set out*** includes:
- identification of services that can be damaged or impede excavation
 - marking out of the project.
- Excavations*** include:
- extension of existing structures, to provide provisions for new services and to modify or

RANGE STATEMENT

- repair existing services
- provisions for footings/slabs to new structures
 - shoring (timber, metal or piling)
 - those being undertaken on sloping ground, flat ground, wet ground, dry ground, loose ground or any type of foundation material, with mechanical assistance possibly required for rock
 - trench/excavation support using sheet material.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained using relevant <i>information</i>, confirmed and applied for <i>planning and preparation</i> purposes.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. Plant, <i>tools and equipment</i> selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.</p> <p>1.5. Materials quantity requirements are calculated in accordance with plans, specifications and <i>quality requirements</i>.</p> <p>1.6. <i>Materials</i> appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and regulatory obligations and applied.</p>
2. Erect and strip simple	2.1. Subgrade is prepared.

ELEMENT	PERFORMANCE CRITERIA
formwork.	2.2. Formwork design is identified from drawings. 2.3. Formwork is erected safely on commencement. 2.4. Form release agent is applied to erected formwork where specified. 2.5. Timber components are de-nailed following stripping of formwork. 2.6. Components are cleaned, stacked and stored for reuse or bundled for removal. 2.7. Formwork components are removed from site.
3. Place and tie reinforcement.	3.1. Reinforcing components are handled and positioned safely. 3.2. Reinforcing bars and mesh are positioned. 3.3. Bar chairs and spacers are positioned, with minimum edge cover.
4. Place concrete.	4.1. Formwork or excavation is cleaned of excess material and debris prior to concrete placement. 4.2. Concrete is safely transported by wheelbarrow. 4.3. Pump line/chute is controlled and concrete placed. 4.4. Concrete is placed in formwork to specified depth. 4.5. Concrete is screeded to the alignment of formwork and project specified datums. 4.6. Surface of concrete is finished in accordance with specifications.
5. Clean up.	5.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations and codes of practice and job specification. 5.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- evaluating own actions and making judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- concrete materials
- concreting techniques
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- levelling techniques
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, drawings and specifications
- processes for the calculation of material requirements
- quality requirements
- simple formwork and reinforcing componentry

REQUIRED SKILLS AND KNOWLEDGE

- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- safely and effectively operate and use tools, plant and equipment
- communicate and work effectively and safely with others
- prepare subgrade; erect formwork; cut, place and tie reinforcement; place and hand screed concrete for a slab of (4 square metres is recommended) and a minimum depth of 100mm to the required finished level and job specification.

Context of and specific resources

This competency is to be assessed using standard and authorised work practices, safety requirements

EVIDENCE GUIDE

for assessment

and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

EVIDENCE GUIDE

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions,

RANGE STATEMENT

where specified

- MSDS
- memos
- regulatory and legislative requirements pertaining to concreting
- relevant Australian standards
- safe work procedures relating to concreting
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.
- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights

Planning and preparation include:

Safety (OHS) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

RANGE STATEMENT

- working in confined spaces
 - working in proximity to others
 - use of firefighting equipment
 - use of tools and equipment
 - workplace environmental requirements and safety.
- Tools and equipment:***
- include:
 - brooms
 - chutes
 - edging tools
 - shovels
 - trowels
 - wheelbarrows
 - may include:
 - bull floats
 - hand floats
 - kibbles
 - line pumps
 - stipple devices
 - trowelling machines.
- Quality requirements*** include:
- internal company quality policy and standards
 - manufacturer specifications where specified
 - relevant regulations, including Australian standards
 - workplace operations and procedures.
- Materials:***
- include:
 - bar chairs
 - bracing
 - edge form/boards
 - fabric sheet mesh
 - pegs
 - spacers
 - may include reinforcing bars.
- Environmental requirements*** include:
- clean-up management
 - dust and noise
 - stormwater management
 - vibration
 - waste management.

RANGE STATEMENT

- Simple *formwork* includes:
- timber or steel edge form to a maximum of 100mm in depth.
- Simple *reinforcing*:
- includes:
 - bar chairs
 - fabric sheet mesh
 - spacers
 - may include:
 - reinforcing bars
 - trench mesh.
- Simple forms of *concrete*:
- include slabs (not requiring internal beams and piers)
 - may include:
 - beam thickeners
 - channels
 - garden edges
 - pathways
 - post holes
 - simple concrete aprons.
- Concreting* includes:
- finishing of concrete
 - floating of the concrete
 - placing of concrete
 - screeding, limited to include a hand screed.
 - includes:
 - chutes
 - wheelbarrows
 - may include:
 - kibbles
 - pump lines.
- Placing of concrete* involves movement of concrete from the truck to the work and:
- includes:
 - chutes
 - wheelbarrows
 - may include:
 - kibbles
 - pump lines.
- Finishing of concrete* includes:
- broomed
 - hand floating
 - power floating
 - sponged
 - stipple device finish
 - trowelled
 - trowelling machine finish
 - wood floated
 - other project specified finish.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1. Identify and assess risks. | 1.1. <i>Hazards</i> in the work area are identified, assessed and reported to <i>designated personnel</i> .
1.2. Safety risks in the work area are identified, assessed and reported to designated personnel.
1.3. <i>Safe work practices, duty of care</i> requirements and safe work instructions are followed for controlling risks.
1.4. OHS, hazard, accident or <i>incident</i> reports are contributed to according to workplace procedures and <i>Australian government and state or territory OHS legislation</i> and relevant <i>information</i> . |
| 2. Identify hazardous materials and other | 2.1. <i>Hazardous materials</i> on a work site are correctly identified and, if appropriate, handled and used |

ELEMENT	PERFORMANCE CRITERIA
hazards on work sites.	according to company and legislated procedures. 2.2. Measures for controlling risks and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate signs and symbols . 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct personal protective equipment and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of tools, equipment and materials , and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. Prohibited tools and equipment in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet environmental requirements .
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

ELEMENT

PERFORMANCE CRITERIA

various *types of fire* and other emergencies are followed, including identification or use, if appropriate, of *fire equipment* within scope of responsibilities.

5.3. *Emergency response and evacuation procedures* are known, practised and carried out effectively when required.

5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
 - determine and report hazards and risks
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - MSDS, JSA and safe work method statements
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

EVIDENCE GUIDE

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

RANGE STATEMENT

Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:

- working at heights.
- designated safety officers, determined by the enterprise, who have undertaken specific safety response training
- managers or other senior personnel
- personnel competent and/or licensed in the safe handling of asbestos
- supervisors.

Safe work practices:

- include:
 - day to day observation of OHS policies and procedures
 - emergency procedures
 - risk assessment
 - use of basic firefighting equipment
- relate to:
 - access to site amenities, such as drinking water and toilets
 - general requirements for safe use of plant and equipment
 - general requirements for use of personal protective equipment and clothing
 - housekeeping to ensure a clean, tidy and safer work area
 - no drugs and alcohol at work
 - preventing bullying and harassment
 - smoking in designated areas
 - storage and removal of debris.

Duty of care requirements:

- relate to:
 - legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
 - relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
- may relate to:
 - own responsibilities to comply with safe work practices, including activities that

RANGE STATEMENT

require licences, tickets or certificates of competency.

Incidents include:

- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
 - breathing apparatus malfunctioning to the extent that the user's health is in danger
 - collapse of the floor, wall or ceiling of a building being used as a workplace
 - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
 - collapse or partial collapse of a building or structure
 - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
 - damage to or malfunction of any other major plant
 - electric shock
 - electrical short circuit, malfunction or explosion
 - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
 - any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- JSA and safe work method statements
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards

RANGE STATEMENT

Information includes:

- OHS and welfare Acts and regulations
- safety codes of practice.
- diagrams or sketches
- emergency situation contacts
- evacuation plans
- instructions issued by authorised organisational or external personnel
- labels
- manufacturer specifications and instructions
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements, such as Acts, regulations and codes of practice
- relevant Australian standards
- reports of near misses or accidents
- safe work procedures or equivalent documentation
- safety meeting minutes
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Hazardous materials include:

- ACM
- cleaning chemicals, including those in pressurised containers
- glues
- insulation materials
- solvents
- treated timber products.

Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

Signs and symbols include:

- emergency information signs (exits, equipment, first aid)
- fire signs (location of fire alarms and

RANGE STATEMENT

	<ul style="list-style-type: none">firefighting equipment)hazard identification, facility or location signsregulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning)safety tags and lockout (danger tags, out of service tags)site safety, directional, traffic and warning signs and symbols.
<i>Asbestos-containing materials are identified:</i>	<ul style="list-style-type: none">includes recognising common types of ACM that may be found in construction materials and buildingscovers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
Asbestos-containing materials are <i>reported</i> to:	<ul style="list-style-type: none">person in control of the workplace as set out in the relevant Asbestos Management Code.
<i>Personal protective equipment</i> is to include:	<ul style="list-style-type: none">apronsarm guardscapsdust mask/respiratorsear muffs/plugsgloveshard hatshigh visibility retro reflective vestsjacketsoverallssafety glasses/gogglessteel capped bootsUV protective clothing and sunscreen.
<i>Tools and equipment</i> include:	<ul style="list-style-type: none">firefighting equipmentfirst aid kitladders and work platformspersonal protective equipment.
<i>Materials</i> include:	<ul style="list-style-type: none">first aid materials suitable for emergency first aid treatment of minor injuries.
<i>Prohibited tools and equipment</i> that cannot be used near identified	<ul style="list-style-type: none">high-speed abrasive power and pneumatic tools, high pressure water cleaners, compressed

RANGE STATEMENT

- ACM include:
- air or abrasive blasting
 - any vacuum cleaning equipment not specifically designed for safe work with asbestos.
- Environmental requirements* are to cover workplace quality management and include:
- clean-up protection
 - stormwater protection
 - waste management.
- Types of fire* includes:
- electrical, chemical, gas, mechanical, paper, wood or natural fire.
- Fire equipment* includes:
- breathing apparatus
 - fire extinguishers
 - fire hydrant and hoses
 - fire reel
 - fire truck
 - manual firefighting instruments, such as fire blankets.
- Emergency response and evacuation procedures* include:
- emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel
 - extinguishing fires, organisational first aid requirements and evacuation.

CUAACD301 Produce drawings to communicate ideas

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form.

It applies to individuals who use drawings, either electronic or hand drawn, for personal use or in response to a project or brief. Drawings may include design concepts for objects, processes or spaces, movement sequences for performances or screen productions, exhibitions, tenders, proposals or publications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan drawing work	1.1 Identify drawing requirements from reference material and confirm with appropriate people if required 1.2 Identify factors, including contractual, legal and ethical factors, that may impact on how drawing work is undertaken 1.3 Gather information about drawing techniques, materials and equipment from a range of sources and determine how they may be used to communicate ideas

ELEMENT	PERFORMANCE CRITERIA
	1.4 Evaluate information for its application to specific drawing briefs
2. Experiment to represent ideas	2.1 Explore the capabilities of techniques, materials and equipment 2.2 Follow safety procedures for particular techniques, materials and equipment 2.3 Select approaches that best suit the purpose of drawings and their presentation context
3. Create drawings	3.1 Organise materials, tools and equipment for selected techniques 3.2 Produce preliminary drawings and discuss their effectiveness with relevant people 3.3 Confirm intellectual property and other relevant legislative requirements are met 3.4 Finalise drawings, incorporating feedback on work in progress as required 3.5 Prepare drawings for the presentation context

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4	<ul style="list-style-type: none"> Interprets information from familiar sources to determine drawing production requirements and legal and safety constraints
Oral Communication	1.1, 1.2, 3.2	<ul style="list-style-type: none"> Uses questioning and active listening to gather information and opinions from others
Navigate the world of work	1.2, 2.2, 3.3	<ul style="list-style-type: none"> Complies with legal, ethical and safety requirements associated with creative work
Interact with others	3.2	<ul style="list-style-type: none"> Uses accepted practices and protocols in discussions of work progress with others
Get the work done	1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.4, 3.5	<ul style="list-style-type: none"> Identifies and organises relevant information and resource requirements Analyses drawing requirements and tests the

		<p>capabilities of materials, tools and equipment to determine the most appropriate approach for final production</p> <ul style="list-style-type: none"> • Refine drawings in response to feedback and presentation requirements

Assessment Requirements for CUAACD301 Produce drawings to communicate ideas

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- identify and analyse drawing requirements
- explore techniques, materials and equipment safely
- produce a series of drawings that:
 - show a command of selected techniques
 - successfully communicate the required ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used in drawing
- identify sources of information about different approaches to drawing
- identify work health and safety issues associated with tools and materials used for drawing
- explain intellectual property issues and other legislation relevant to drawing.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment and materials required to produce drawings
- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUACMP301 Implement copyright arrangements

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to implement individual or collaborative copyright arrangements including sourcing copyright information, gaining clearance to use other people's material, protecting material from unauthorised use and applying copyright notices for creative works.

It applies to individuals who work under supervision with some responsibility regarding the planning and completion of work tasks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source information on copyright	1.1 Identify sources of information on copyright, to determine what is and what is not protected by copyright 1.2 Identify and determine the role of copyright collection societies 1.3 Identify and discuss copyright laws and regulations with relevant personnel
2. Obtain permission to	2.1 Identify copyright owner's exclusive rights to creative works

ELEMENT	PERFORMANCE CRITERIA
use copyright material	<p>2.2 Determine need for copyright clearance and identify potential for fair use of copyright material</p> <p>2.3 Discuss and confirm copyright clearance issues with relevant personnel</p> <p>2.4 Determine if moral rights or performer's rights need to be credited</p> <p>2.5 Obtain and accurately record copyright clearance permissions</p>
3. Protect material from unauthorised use	<p>3.1 Confirm original work as being the result of individual or collaborative effort</p> <p>3.2 Discuss and formally record copyright ownership or proportional ownership with relevant personnel</p> <p>3.3 Identify and confirm individual or collaborative copyright responsibilities</p> <p>3.4 Identify potential infringements to copyright claims</p> <p>3.5 Apply copyright notices on creative works in a correct manner</p> <p>3.6 Prepare, date and store documentation to track copyright notices</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1	<ul style="list-style-type: none"> Interprets documentation to assist with copyright requirements
Writing	2.5, 3.2, 3.6	<ul style="list-style-type: none"> Completes workplace documentation accurately and legibly using technically specific language
Oral Communication	1.3, 2.3, 3.2	<ul style="list-style-type: none"> Obtains information by listening and questioning Uses clear language to contribute information and express requirements
Navigate the world of work	1.1-1.3, 2.1-2.5, 3.1, 3.6	<ul style="list-style-type: none"> Understands and complies with relevant legislation to assist with copyright arrangements
Interact with others	1.3, 2.3, 3.2	<ul style="list-style-type: none"> Works collaboratively to determine and complete requirements

Get the work done	1.1-1.3, 2.2, 2.4, 2.5, 3.1, 3.3-3.6	<ul style="list-style-type: none"> Plans and organises routine tasks, taking some responsibility for identifying and confirming copyright issues Recognises and responds to predictable routine problems seeking assistance when problems are beyond immediate responsibilities or experience Uses technology to track and download material
-------------------	--------------------------------------	---

Assessment Requirements for CUACMP301 Implement copyright arrangements

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- source information and seek assistance to organise copyright permission and clearance for creative works
- correctly apply copyright notices on creative works
- recognise infringements of copyright
- correctly document and store copyright clearances claims and notices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts of exclusive rights, fair use, moral rights and performer's rights
- describe procedures to determine copyright ownership
- identify the range of sources of copyright information
- identify Australian organisations responsible for holding copyright collections
- identify laws and regulations that govern copyright in Australia.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- information sources on definitions, laws and regulations about copyright
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADRA201 Develop drawing skills

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to use a limited range of basic drawing techniques to produce fundamental drawings from simple ideas. This unit relates to drawing as an art form and differs from units that focus on drawing as a visual representation tool.

It typically applies to individuals who have developed some general design or drawing skills and who are now embarking on a career in visual arts. They have little or no experience in drawing and work under close supervision and with guidance from others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – drawing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare drawing resources	1.1 Calculate and obtain type and quantity of drawing equipment, tools and materials according to own selected ideas for the work 1.2 Prepare equipment, tools and materials according to procedures for workplace safety, cost control and waste minimisation 1.3 Set up a safe work space with guidance from key people
2. Use and test drawing	2.1 View a range of drawings in different styles, and discuss with

ELEMENT	PERFORMANCE CRITERIA
techniques	<p>key people how effects are achieved</p> <p>2.2 Match potential techniques to ideas for own drawings with assistance from key people</p> <p>2.3 Test a range of techniques to determine the effects they achieve through experimentation with samples, practice pieces or work in progress</p> <p>2.4 Use selected techniques to produce fundamental drawings, considering and applying elements and principles of design</p> <p>2.5 Clean and store equipment, tools, and materials according to specific needs of different items</p> <p>2.6 Handle equipment, tools and materials safely and minimise waste throughout all processes</p>
3. Review work to develop skills	<p>3.1 Review own drawings and note areas for future improvement</p> <p>3.2 Seek and consider feedback from key people to identify areas for improvement</p> <p>3.3 Review different opportunities to build own skills and select suitable options</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.3	<ul style="list-style-type: none"> Plans a learning process to build own skills
Reading	1.2	<ul style="list-style-type: none"> Interprets detailed information from familiar procedural documents to determine production and safety requirements
Oral Communication	1.3, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> Clearly explains ideas for designs and techniques using relevant industry language Uses questioning and active listening techniques to gain information and feedback and confirm understanding
Numeracy	1.1, 1.3, 2.4	<ul style="list-style-type: none"> Uses basic calculations to determine quantities of materials, measure dimensions of work space and drawings

Navigate the world of work	1.2, 1.3, 2.4, 2.6	<ul style="list-style-type: none"> Follows defined procedures and legislative requirements, understands boundaries of own work and skill, and seeks clarification and guidance on all issues
Interact with others	1.3, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> Seeks guidance and cooperates with instructions and advice from others to achieve best outcomes for own creative work
Get the work done	1.1-1.3, 2.1-2.4	<ul style="list-style-type: none"> Organises all processes to set up work space, test techniques and produce creative work with close guidance from others Makes routine decisions using procedures to guide activities Makes decisions about appropriate techniques by evaluating and testing a limited range of known options with assistance from others Resolves problems with technique through trial, error and practice

Unit Mapping Information

Assessment Requirements for CUADRA201 Develop drawing skills

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- produce multiple fundamental drawings where the materials and techniques support own ideas for work
- document a basic plan to build own skills, outlining own selected skill development options.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general features of major styles of drawing and the work of key practitioners relevant to individual area of interest
- outline, for the elements and principles of design, the fundamental characteristics, primary interrelationships and use in fundamental drawings
- outline, for a range of equipment and tools used to produce drawings, key physical features and uses, cleaning techniques and storage requirements
- outline the general features and use of a basic range of materials and techniques used to produce fundamental drawings
- outline typical work space requirements for producing fundamental drawings including ways of organising space and equipment for efficient work operation
- outline procedures for working safely with drawing materials, tools and equipment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce drawings
- relevant information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

ICPPRN282 Produce and manage basic digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to construct a range of electronic data files, perform basic colour management techniques and produce and manage a print run to achieve maximum productivity.

It applies to individuals working in the printing and graphic arts industry who perform a range of mainly routine tasks, work under direct supervision and use limited practical skills and knowledge in a defined context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Troubleshoot and maintain operations of digital print system	<p>1.1 Errors in operation of hardware and consumable components in the printing module of a digital printing system are identified and rectified</p> <p>1.2 Source of errors related to electronic data file, digital front-end, workstation or industry software or hardware printing systems is located and rectified and/or technical assistance is coordinated according to manufacturer's specifications</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Preventive maintenance is performed according to manufacturer's specifications to ensure digital print system functions at optimum productivity with minimum downtime and wastage</p> <p>1.4 Incompatibilities between versions of hardware and software used in digital printing are identified and rectified</p>
2. Liaise with clients	<p>2.1 Print service and quality expectations are clearly communicated to client according to enterprise procedures</p> <p>2.2 Advice is provided to clients on how to set up electronic data files for digital printing according to enterprise procedures, manufacturer's specifications and digital print equipment capabilities</p> <p>2.3 Advice is provided to clients on appropriate substrates and document finishing methods for digital printing jobs, according to client's budget and job specifications</p>
3. Perform basic electronic document impositions	<p>3.1 Electronic file imposition using a range of industry software is completed according to job specifications</p> <p>3.2 Document finishing requirements for an imposed digital print job are finalised with co-workers or external services, if required, according to equipment availability and enterprise procedures</p>
4. Perform basic digital colour management	<p>4.1 Red Green Blue (RGB), Cyan Magenta Yellow Black (CMYK) and PMS colour charts are outputted and differences between computer monitor colour and digitally printed colour are adjusted</p> <p>4.2 Common problems of colour digital printing are rectified and communicated to clients according to job specifications</p>
5. Access and verify electronic data files	<p>5.1 Workstation computer and industry software are used to locate and retrieve electronic data files according to job specifications</p> <p>5.2 Digital front-end processor is used to locate and retrieve electronic data files according to job specifications</p> <p>5.3 Preview or pre-flight check of electronic data files is performed to verify correct job set-up according to job specifications</p> <p>5.4 Basic troubleshooting methods are applied to identify unverified data files, file errors and job requirement inconsistencies according to manufacturer's specifications</p>
6. Submit data files to digital print system	<p>6.1 Job priority is determined according to job specifications and production schedules</p>

ELEMENT	PERFORMANCE CRITERIA
	6.2 Data files are submitted to print and image quality checks, and machine productivity checks are performed
7. Produce digital proof and run print job	7.1 Proof run is conducted to confirm proof conforms to job specifications and/or for client approval 7.2 Print run is conducted according to job specifications ensuring machine productivity and quality are monitored and rectified throughout the print job
8. Coordinate and/or perform document finishing and client delivery	8.1 Steps required for document finishing are determined, if not performed on in-line finishing units, on a web or sheet-fed system according to enterprise procedures 8.2 Finished print work is packaged to prevent damage and to conform to delivery requirements according to job specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 3.1, 4.2, 5.1-5.4, 6.1, 7.1, 7.2, 8.2	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	2.1-2.3	<ul style="list-style-type: none"> Communicates relationships between ideas and information in a style appropriate to audience and purpose
Oral Communication	1.2, 1.3, 2.1-2.3, 3.1, 3.2, 4.2, 5.1-5.3, 6.1, 7.1, 7.2, 8.2	<ul style="list-style-type: none"> Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies Determines client and stakeholder requirements to inform a design or technical brief
Numeracy	2.2	<ul style="list-style-type: none"> Interprets and analyses a range of mathematical information used in familiar and routine tasks
Navigate the world of work	1.2, 1.3, 2.1-2.3, 3.1, 3.2, 4.2, 5.1-5.4, 6.1, 6.2, 7.1, 7.2, 8.1, 8.2	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Complies with work health and safety (WHS), legislative requirements and follows organisational policies and procedures relevant to own role
Interact with	1.2, 1.3, 2.1-2.3, 3.1,	<ul style="list-style-type: none"> Cooperates with others as part of familiar routine

others	3.2, 4.2, 5.1-5.3, 6.1, 7.1, 7.2, 8.2	<p>activities, and contributes to specific activities requiring joint responsibility and accountability</p> <ul style="list-style-type: none"> • Understands what to communicate, with whom and how in routine work situations, identifying relevant information and ideas
Get the work done	1.1-1.4, 3.1, 3.2, 4.1, 4.2, 5.1-5.4, 6.1, 6.2, 7.1, 7.2, 8.1, 8.2	<ul style="list-style-type: none"> • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Recognises and anticipates an increasing range of familiar problems, actively looking for early warning signs and implementing contingency plans • Plans, identifies and assembles resources required to complete tasks • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems

Assessment Requirements for ICPPRN282 Produce and manage basic digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- accurately produce a flowchart that demonstrates FOUR examples of digital print workflows for digital printing (one basic document file, one variable data document file, one colour document file and one electronically imposed document file)
- conduct and manage a digital print run according to client specifications and work health and safety (WHS) requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- name safety devices that need to be in place when working on the machine
- explain a paper misfeed, how to access and clear it
- explain potential problems with front to back registration, and if substrate weight and machine specifications do not match
- outline problems that can occur when downloading files from a digital front-end and how can they be solved, including distinguishing between problems with downloading from a digital front-end, and with the printing module
- describe action if a digital front-end loses communication with the printing module
- outline precautions to maintain fit, proportion and position of printed images, and how to ensure the machine has been calibrated to manufacturer's specifications
- outline the process if image colour is not consistent
- outline the process for ensuring correct dimensions and measurements have been set up in the pre-press stage
- identify quality issues if improper substrate handling procedures are not performed

- identify machine manuals, safety and other documentation relevant to machine operation and maintenance, where they are kept, and how to find information relating to industry software applications and other relevant sources of information
- describe the process if the incorrect version of software is loaded or needs an update
- outline actions if vital information is missing from the job ticket (manual or electronic)
- outline checks undertaken prior to set-up (availability of material, maintenance)
- outline the process if a file does not transfer correctly and what to do to correct the problem
- outline checks to ensure data is in a format that can be used in digital printing, and benefits of using electronic data rather than scanning hardcopy
- describe ways to submit a PDF file to the digital printer
- describe the process to ensure clients have correct procedures for providing electronic files
- describe the process of explaining to a client differences in colour displayed on a computer monitor compared to printed output
- outline recommendations to a client who has created an electronic file in an incompatible software application
- describe the process for estimating turnaround time for a client with a tight deadline
- describe steps for client approval of the print
- proofing and adjustment and circumstances where a job would be modified before printing
- outline situations where margins would be changed when the job reaches the printer
- name what the proof is checked against
- describe the final approval process for basic jobs
- describe the process for adjusting colour, toner/ink coverage or dealing with density problems
- outline the process if required substrate were unavailable
- name the maximum and minimum weight of substrate that can be printed on a specific machine, and maximum feeding and delivery quantities for the machine
- explain possible problems with incorrect feeding and delivery
- explain OHS procedures to follow when setting up in-line processes
- outline in-line options and on-line finishing options available on the machine
- describe the process for document finishing and client delivery
- describe various types of binding, and procedures, if the binding method required by the client is not available at your site
- outline options if the document size is too thick to staple
- describe importance of packaging of finished print work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to special purpose tools, equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN284 Use colour management systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and apply fundamental theory of colour including terminology, colour modes and analysis of light and colour.

It applies to individuals who generally work under direct supervision and assist with digital production workflow.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify need for colour management	1.1 Varied colour representations across devices are recognised and recorded according to job requirements 1.2 Colour inconsistencies between input, display and output devices, and printed products are identified and addressed 1.3 Components of colour management systems are identified and correctly used
2. Use colour modes and libraries	2.1 Colour modes and libraries are used according to job specifications

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Images are converted between colour modes using processes that ensure best reproduction according to job specifications</p> <p>2.3 Colour libraries are selected and used within software applications according to job specifications</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1-2.3	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	1.1, 1.3	<ul style="list-style-type: none"> Completes job documentation in a style appropriate to audience and purpose
Oral Communication	1.3, 2.1-2.3	<ul style="list-style-type: none"> Receives and passes on straightforward messages
Navigate the world of work	1.3, 2.1-2.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols associated with own role including appropriate work health and safety (WHS) requirements associated with immediate role
Interact with others	1.3, 2.1-2.3	<ul style="list-style-type: none"> Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.1-1.3, 2.1-2.3	<ul style="list-style-type: none"> Takes responsibility for planning and organising own workload including identifying and rectifying familiar problems

Assessment Requirements for ICPPRN284 Use colour management systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- recognise variations and inconsistencies in colour representation across devices
- identify and use components of a colour management system
- select and convert images to appropriate colour modes
- select colour libraries that comply with specific job specifications
- locate and use information relevant to the task from a variety of information sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify components of a colour management system and their application
- explain terminology associated with colour management
- identify standard lighting conditions for matching colour
- describe effects of different lighting conditions on monitors, proofing and printing
- explain measurement of light intensity and colour temperature
- identify differences between red, blue, green (RGB), cyan, magenta, yellow, black (CMYK), lab colour and spot colour
- list different rendering intents and their application
- describe under-colour removal (UCR) and grey component replacement (GCR) and the effect they have on an image
- explain different pantone libraries and their application
- identify work health and safety (WHS) issues to consider when managing colour for digital production.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages used for colour management production.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN383 Prepare for personalised digital printing

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to set up a digital printing press for personalised data printing.

This unit applies to individuals who possess a sound theoretical knowledge base and who typically provide leadership in the production of personalised digital print runs that involve setting data files and ensuring correct sequence.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify job specifications	1.1 Job details are checked and confirmed against job specifications 1.2 Correct materials are checked and are available for the job 1.3 Printing equipment is checked for efficiency and safely 1.4 Post-printing requirements are accurately identified according to job specifications 1.5 Correct data files are accessed and data conforms to job

ELEMENT	PERFORMANCE CRITERIA
	specifications
2. Set data requirements	<p>2.1 Data files are set up to ensure required dynamic links operate correctly and settings conform to job specifications</p> <p>2.2 Data is in correct sequence required for the run</p> <p>2.3 Data is checked to ensure it is uncorrupted</p>
3. Set machine quality	<p>3.1 Work area is safe and ready for production</p> <p>3.2 Digital printing machine is set to run efficiently and safely</p> <p>3.3 Image is complete, sharp, of the required strength, free from contamination and in register</p> <p>3.4 Output can be achieved at required quality standard and at required speed</p> <p>3.5 Sample from the machine is produced and checked for conformance to job specifications</p> <p>3.6 Adjustments are made where specifications are not met</p> <p>3.7 If adjustments involve changes to materials, costs or time, supervisor or client are informed and approval secured</p> <p>3.8 Set up is complete before deadline for the start of production</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.1-2.3, 3.5, 3.6	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	3.7	<ul style="list-style-type: none"> Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 1.5, 2.1, 2.2, 3.5-3.7	<ul style="list-style-type: none"> Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the world of work	1.1-1.5, 2.1, 2.2, 3.1-3.8	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Recognises and follows all procedures for set-up, cleaning and maintenance of equipment, incorporating

		regulatory requirements and enterprise procedures
Interact with others	1.1, 1.5, 2.1, 2.2, 3.5-3.7	<ul style="list-style-type: none"> • Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability • Understands what to communicate, with whom and how, in routine work situations
Get the work done	1.1-1.5, 2.1-2.3, 3.2, 3.3, 3.5-3.8	<ul style="list-style-type: none"> • Determines priorities and sequences steps involved in clearly defined, familiar tasks • Recognises and takes responsibility for addressing predictable, and some less predictable problems in familiar work contexts • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems

Assessment Requirements for ICPPRN383 Prepare for personalised digital printing

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- manage and adjust digital data to conform to print requirements prior to digital printing and produce personalised digital print runs that involve setting data files and ensuring correct sequence.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss how job requirements are established
- identify various information sources
- discuss appropriate set up required to run the printing machines safely and efficiently
- describe result prediction
- explain data interpretation
- outline data retrieval.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- digital printer.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN385 Apply software applications to digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to correctly select and use a variety of software applications to efficiently produce a standard job.

It applies to skilled individuals working in digital production who are responsible for digital production workflow and who apply a broad range of competencies in a varied work context. They use some discretion and judgement, and relevant technical knowledge, and provide technical advice and support to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

ICPSUP281	Use computer systems

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and assess	1.1 Publication requirements of layout brief are determined to

ELEMENT	PERFORMANCE CRITERIA
software	align with digital production processes and feasibility 1.2 Range of software applications is selected according to job specifications 1.3 Appropriate software applications are used to complete components of the job according to manufacturer's specifications and enterprise standards
2. Arrange elements on page	2.1 Client copy and images are assembled to conform to the design brief 2.2 Text is prepared and required fonts and font size are applied 2.3 Basic elements and images are created and arranged on the page to conform to the design brief 2.4 Image resolution and colour mode are determined according to job specifications, help function is accessed, if required, and solutions to queries found 2.5 Document set-up is completed to conform to the design brief and job specifications
3. Check quality	3.1 Text is reviewed for possible errors and omissions, and errors are discussed with client or supervisor 3.2 Basic elements are arranged to adhere with design principles 3.3 Copy is proofed and rechecked for errors, omissions and overall layout design 3.4 Necessary changes are made and reviewed and re-proofed as required 3.5 Job is saved according to enterprise procedures
4. Use RIP to output job	4.1 Layout is imported into a raster image processor (RIP) or front-end processor according to workplace procedures 4.2 Layout is produced according to job specifications and enterprise standards

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1-1.3, 2.1, 2.3-2.5, 3.1, 4.2	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications

Assessment Requirements for ICPPRN385 Apply software applications to digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly use TWO software applications to prepare and produce two different sets of layouts according to enterprise standards and job specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list different processes used in digital production
- describe colour modes and how they affect output
- outline how image resolution is governed by output resolution and/or viewing distance
- describe various software applications and their usages in relation to digital production
- identify how job specifications determine typeface selection and the effect typefaces have on readability
- explain design principles, such as hierarchy, emphasis, contrast, alignment, repetition and flow
- describe how to select and manipulate type within a layout application, and image manipulation techniques including basic colour correction
- describe how to create basic vector shapes with an application
- outline different colour modes and their uses
- outline preflighting procedures and various ways to import a job into a RIP
- identify location of manuals, safety and other documentation relevant to high-end software applications for digital production.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- RIP or front-end processor.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN387 Use colour management for production

Modification History

Release	Comments
Release 2	This version released with ICP Printing and Graphic Arts Training Package Version 2.0. Version created to correct typographical error.
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to obtain an acceptable match across colour devices, including the correct use of colour profiles and calibration of monitors and output devices.

It applies to skilled individuals who set up, operate and monitor equipment and machinery, and who may have to prepare material and apply solutions to problems. They may also provide leadership and guidance to others, with limited responsibility for the output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

ICPPRN284	Use colour management systems
-----------	-------------------------------

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify colour requirements	1.1 Publication conditions are determined to identify colour management requirements 1.2 Requirements are established to guide provision and use of colour profiles
2. Calibrate digital devices	2.1 Digital devices in the workflow are calibrated to produce accurate colour reproductions 2.2 Device profiles created during calibration are correctly used and stored 2.3 Digital devices are checked regularly to ensure they are still within calibration 2.4 Profiles or equipment parameters are adjusted to bring devices back into calibration, when required 2.5 Records are stored to ensure calibration occurs regularly
3. Use colour profiles	3.1 Source and destination profiles are identified within the workflow 3.2 Profiles are used to ensure colour on monitors, proofs and final product match as closely as possible 3.3 Images are converted to correct profile if incorrect profile is embedded 3.4 Correct rendering intent is used to ensure accurate colour conversion
4. Configure software within workflow	4.1 In the workflow, software applications with colour management features are determined 4.2 Software applications with colour management features are configured to meet output condition 4.3 Range of colour management presets are configured, saved and correctly used for various output conditions
5. Maintain colour management workflow	5.1 Colour management system is checked regularly to ensure consistent colour match 5.2 Monitors are calibrated regularly to ensure accurate reproduction of colour 5.3 Digital devices are re-calibrated regularly or when conditions

ELEMENT	PERFORMANCE CRITERIA
	change from initial calibration

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.5	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	2.5	<ul style="list-style-type: none"> Enters routine data associated with production processes and enterprise procedures
Navigate the world of work	1.1, 1.2, 2.1-2.5, 3.1-3.4, 4.2, 4.3, 5.1-5.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Complies with work health and safety (WHS) and legislative requirements and follows organisational policies and procedures relevant to own role
Get the work done	1.1, 1.2, 2.1-2.4, 3.1-3.4, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> Takes responsibility for planning and organising own workload, and assembles required resources Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts Utilises a broad range of features within applications to improve personal productivity, optimising software functions for specific purposes

Assessment Requirements for ICPPRN387 Use colour management for production

Modification History

Release	Comments
Release 2	This version released with ICP Printing and Graphic Arts Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly produce THREE jobs with final product on varied media, including both print and digital platforms
- apply colour management system maintenance procedures according to enterprise procedures and job specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify work health and safety (WHS) issues related to managing colour for digital production
- define densitometric and spectrophotometric measurement
- define International Colour Consortium (ICC) profiles, their use and the effects they can have on output
- explain device independent colour and profile connection spaces
- outline use of colour space conversions and rendering intents
- describe factors that influence selection of highlight and shadow aim points
- explain grey balance requirements in relation to colour correction and the process of determining grey balance requirements
- describe ink/toner light errors – ‘ideal’ versus ‘actual’ inks/toners

- explain viewing light conditions and metamerism
- outline factors determining requirements for colour correction and how different stocks affect colour
- describe effects different inks have on colour reproduction for proofing and final production, and how dot gain affects colour
- identify type of press and what printing process is being used for final output
- describe solutions to common problems of colour management
- describe effects of using the wrong profile on output
- identify sources of information on colour management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICPPRN388 Preflight and import complex images for digital devices

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to confirm that digital files required for the printing process are all present, valid, correctly formatted and of the desired format to be imported into a digital device. It includes the application of preflight procedures and importation of files into raster image processors (RIPs).

It applies to individuals who use specialised knowledge and follow organisational processes to ensure product quality meets requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Access and preflight electronic files	<p>1.1 Electronic data files are located and retrieved using a workstation computer and industry software according to job specifications</p> <p>1.2 Preflight check of electronic data files is performed to verify correct job set-up according to job specifications, and problems associated with files are identified</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Troubleshooting methods are applied to identify file errors and job requirement inconsistencies</p> <p>1.4 Solutions are implemented to rectify errors according to job specifications</p> <p>1.5 Preflight presets are configured for various job specifications</p>
2. Import file to RIP or job queue	<p>2.1 Correct output profile is selected according to job specifications</p> <p>2.2 Most productive submission workflow is selected and documented based on data file format, quantity and file size, and document finishing</p> <p>2.3 Job priority is determined according to job specifications and production schedules</p> <p>2.4 Print driver and/or job download software is correctly installed and set up on workstation computer and/or digital front-end processor</p> <p>2.5 Manufacturer's installation instructions are located and/or software installation is coordinated according to enterprise procedures</p> <p>2.6 Data file is submitted to output device, image quality and machine productivity checks are performed, and adjustments made to correct any problems</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.5	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications

Assessment Requirements for ICPPRN388 Preflight and import complex images for digital devices

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- import electronic files that are error-free and meet job specifications into rips or output queues
- find and use information relevant to the task from a variety of information sources
- preflight and import TWO complex jobs according to manufacturer's specifications and enterprise procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe key digital printing processes
- outline required resolution for various output conditions
- describe different colour modes and how they affect output
- explain trapping and overprint requirements
- identify and describe different screen types and angles
- outline bleed amounts required for various jobs
- explain the impact font types and licensing can have on output
- describe preflighting tools available in various applications
- compare different file types and how they can affect output
- outline factors that influence processing speed of a job during ripping
- explain how the ripping speed of a job can be increased.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- high-end computers
- raster image processors (RIPs)
- output devices
- layout software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN389 Manage digital files

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to store and retrieve electronic files for efficient access.

It applies to individuals who work under limited supervision in the application of digital file management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Save digital files	1.1 Logical digital file system of folders and sub-folders is created and files are named using enterprise format 1.2 Files are saved using appropriate format into digital file system 1.3 Version control is used to ensure the most recent files can be accessed
2. Retrieve and manage digital files	2.1 Required files are retrieved and opened from digital file system 2.2 Computer search functions are used to find incorrectly stored files

ELEMENT	PERFORMANCE CRITERIA
	2.3 Files are sent to required location and any naming errors are amended
3. Archive digital files	3.1 Archive system is created according to enterprise protocols 3.2 Consistent, regular backup strategies are undertaken to allow for retrieval of files if there is a data loss event 3.3 Files are retrieved from archive system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.3, 3.1-3.3	<ul style="list-style-type: none"> Uses a number of reading strategies to identify and interpret relevant information within familiar text types
Writing	1.1-1.3, 3.1	<ul style="list-style-type: none"> Enters routine data associated with production processes and enterprise procedures
Navigate the world of work	1.1, 1.2, 2.1, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role evaluating effectiveness of decisions on how well they met stated goals
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3	<ul style="list-style-type: none"> Determines priorities and sequences steps involved in clearly defined, familiar tasks Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts Utilises a broad range of features within applications to improve personal productivity, optimising software functions for specific purposes Manages and maintains files securely in a variety of storage media and formats

Unit Mapping Information

Assessment Requirements for ICPPRN389 Manage digital files

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- store, retrieve and archive various file types
- find and use information relevant to the task from a variety of information sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list work health and safety (WHS) factors for using a computer
- point out the location of manuals, safety and other documentation relevant to digital file management procedures and discuss the contained information
- explain elementary computer operating system functions
- discuss file hierarchy
- outline advantages and disadvantages of different file systems
- explain file size and how it impacts on hard drive space
- identify different file types and how this relates to file size
- explain how to rename a file
- outline version control procedures
- discuss operating systems' search function
- explain backup processes
- outline how to achieve different formats.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- high-end computers
- network hard drives
- external hard drives
- DVDs
- BluRay discs.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN390 Generate a proof for digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate a proof on the printing device to be used for final production.

It applies to individuals who generate and approve proof in the digital sector.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Produce proof on printing device	1.1 Printing device is calibrated according to manufacturer's specifications 1.2 Appropriate colour profiles are selected to ensure consistent colour output 1.3 The same substrate or product is used to generate a proof for the final production run 1.4 Proof is produced according to job specifications and workflow procedures 1.5 Proof is used to make a mock-up to simulate the finishing of

ELEMENT	PERFORMANCE CRITERIA
	the final product according to job specifications
2. Assess proof against specifications	<p>2.1 Proof is checked against job specifications to confirm validity and identify and rectify any defects</p> <p>2.2 Proofing process is repeated if proof does not meet job specifications and enterprise standards</p>
3. Communicate proof with client	<p>3.1 Proof is labelled with appropriate information according to enterprise standards</p> <p>3.2 Feedback is gained from client for sign off</p> <p>3.3 Amendments are made if required, and resubmitted to client for sign off</p> <p>3.4 Proof is stored according to workplace procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.1, 2.2, 3.4	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	3.1-3.4	<ul style="list-style-type: none"> Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2,3.2	<ul style="list-style-type: none"> Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the world of work	1.1-1.5, 2.1, 2.2, 3.1-3.4	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Recognises and follows all procedures for regulatory requirements including work health and safety (WHS) and enterprise procedures
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability Understands what to communicate, with whom and how, in routine work situations
Get the work	1.1-1.5, 2.1, 2.2, 3.1,	<ul style="list-style-type: none"> Determines priorities and sequences steps involved in

done	3.3, 3.4	<p>clearly defined, familiar tasks</p> <ul style="list-style-type: none"> • Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems

Assessment Requirements for ICPPRN390 Generate a proof for digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- safely calibrate a digital device to ensure consistent colour output
- produce a proof that gains client approval and matches the final production run
- find and use information relevant to the task from a variety of information sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list work health and safety (WHS) issues related to digital proofing for digital production
- explain colour theory, including additive and subtractive colours, red, green, blue (RGB) and cyan, magenta, yellow, black (CMYK)
- outline varying colour gamuts between colour modes
- discuss colour management workflow set-up procedures
- describe use of output profiles in relation to simulation
- explain how regular calibration helps ensure consistent colour output
- describe quality control systems used in proofing
- outline techniques used to control quality
- explain how to use standard viewing conditions to assess colour output
- describe how to use colour evaluation charts
- outline criteria for evaluating a colour proof
- explain differences between preliminary proofs and a contract proof
- identify types of substrates used in proofing
- name the inks, toners and coatings used in digital printing
- describe how to handle and store materials to ensure quality

- identify types of finishing techniques used in digital production
- point out the location of relevant manuals, safety and other documentation relevant to digital printing, and discuss the information in these documents
- discuss where other available sources of information are.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- high-end colour output devices
- raster image processors (RIPs) with colour management features.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN392 Set up and produce specialised digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to set up for and produce specialised, digitally printed products. This unit includes the use of non-standard substrates and raster image processor (RIP) settings.

It applies to individuals who evaluate job specifications, set up raster image processor (RIP) settings and produce specialised print jobs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm specialised job specifications	1.1 Job requirements are read and interpreted from job documentation or production control system 1.2 Availability of all job related components is checked and recorded
2. Plan and carry out specialised set-up	2.1 Specialised job specifications are identified and analysed 2.2 Specialised set-up requirements are determined 2.3 Specialised set-up is completed in minimum time and with

ELEMENT	PERFORMANCE CRITERIA
	minimum wastage
3. Set up RIP for specialised digital printing	<p>3.1 RIP functions are analysed to determine appropriate settings according to specialised job requirements</p> <p>3.2 Experimentation is undertaken with RIP functions to determine settings according to specialised job requirements</p> <p>3.3 Problems are solved effectively to minimise waste and excess costs</p> <p>3.4 Documentation and other forms of information are accessed to determine source of any problems</p> <p>3.5 Most productive way to complete the job is determined</p>
4. Test and select substrate	<p>4.1 Substrate specifications are investigated to determine print feasibility</p> <p>4.2 Test print run is conducted to confirm substrates appropriateness with job requirements</p> <p>4.3 Appropriate substrate is selected based on print feasibility and job requirements</p>
5. Conduct specialised proof run	<p>5.1 Material to be used for specialised proof is organised correctly</p> <p>5.2 Machine is operated according to manufacturer's specifications and enterprise procedures to produce a specialised proof</p> <p>5.3 Specialised proof is visually inspected to enterprise procedures</p> <p>5.4 Client approval or authority is sought prior to production run where appropriate</p> <p>5.5 Results are interpreted and adjustments are carried out according to product and machine specifications</p>
6. Refine and document specialised print process	<p>6.1 Corrective or preventive action is recommended and implemented where appropriate</p> <p>6.2 Changes are communicated to relevant personnel in a logical and easily understood manner</p> <p>6.3 Changes are monitored to confirm improvement to production efficiency</p> <p>6.4 Ongoing problems are reported according to enterprise procedures, and process is documented according to enterprise standards</p> <p>6.5 Documentation is filed so it can be easily retrieved and used as a reference for future, similar jobs</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 3.1, 3.2, 4.1, 5.2, 5.5, 6.5	<ul style="list-style-type: none"> Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	1.2, 5.4, 6.4	<ul style="list-style-type: none"> Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 2.1, 2.2, 3.1, 3.2, 4.1, 5.2, 5.4, 5.5, 6.2, 6.4	<ul style="list-style-type: none"> Speaks clearly using appropriate vocabulary, tone and pace to communicate
Numeracy	4.1	<ul style="list-style-type: none"> Interprets and analyses a range of mathematical information used in familiar and routine tasks
Navigate the world of work	1.1, 2.1-2.3, 3.1-3.3, 4.1-4.3, 5.2-5.5, 6.3, 6.4	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role Complies with WHS, legislative requirements and follows organisational policies and procedures relevant to own role
Interact with others	1.1, 2.1, 2.2, 3.1, 3.2, 4.1, 5.2, 5.4, 5.5, 6.2, 6.4	<ul style="list-style-type: none"> Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability Understands what to communicate, with whom and how, in routine work situations
Get the work done	1.2, 2.3, 3.1-3.5, 4.2, 4.3, 5.1-5.3, 5.5, 6.1, 6.3	<ul style="list-style-type: none"> Determines priorities and sequences steps involved in clearly defined, familiar tasks Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems Enters key words into a search engine to find information

Assessment Requirements for ICPPRN392 Set up and produce specialised digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse job specifications and develop practical solutions to printing a non-standard product
- safely set up and use a raster image processor (RIP) and digital printing machine for a specialised job on TWO occasions according to manufacturer's and job specifications and enterprise procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- name who to discuss any production problems with
- describe all functions and settings available on a particular RIP or front-end processor
- explain advanced RIP settings, such as dynamic variables to select stock
- explain where to source information on complex raster image processor RIP usage
- discuss types of substrates suitable for various digital processes
- explain the theory behind several digital processes and how this impacts substrate usage
- outline problem-solving methodologies, including empirical, ishikawa and brainstorming
- name online forums and networks which might be useful points of reference for this role
- list work health and safety (WHS) issues in relation to each digital process
- show where documentation or other information can be found on specialised digital processes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- full colour production digital presses or specialised wide format printers.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPSUP281 Use computer systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to perform basic functions on a computer.

It applies to individuals who perform a range of mainly routine tasks in various sectors of the printing and graphic arts industry, using limited practical skills and fundamental knowledge in a defined context. They generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use a stand-alone computer/terminal correctly	1.1 Correct posture at the keyboard is adopted according to work health and safety (WHS) requirements 1.2 Data is correctly accessed to ensure no loss of data 1.3 Data is manipulated correctly to ensure access, retrieval and storage of data
2. Perform computer/terminal	2.1 Data is accessed, saved and retrieved for reference and amendment

ELEMENT	PERFORMANCE CRITERIA
functions	<p>2.2 Appropriate program is selected for the job to be undertaken</p> <p>2.3 Mouse and/or keyboard functions are used correctly to operate the computer systems used in the printing industry</p> <p>2.4 Features of applications are used correctly to deliver a specified output</p> <p>2.5 Data is saved in correct format and file location</p> <p>2.6 Master pages, templates and style sheets, as appropriate, are used consistently to ensure data is the same after exchange or transfer</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 2.5, 2.6	<ul style="list-style-type: none"> Recognises text within job specifications and follows written instructions
Writing	1.3, 2.4	<ul style="list-style-type: none"> Records key information related to outcomes of the job
Navigate the world of work	1.1	<ul style="list-style-type: none"> Understands rights and responsibilities and complies with legal and regulatory requirements
Get the work done	1.2, 1.3, 2.1-2.6	<ul style="list-style-type: none"> Understands purpose and some specific functions of some common digital tools used in work contexts

Assessment Requirements for ICPSUP281 Use computer systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly and safely perform basic functions on a stand-alone computer/terminal using industry software
- use a stand-alone computer/terminal with at least TWO software applications relevant to the printing industry to create or access files, perform various computing functions, and save files in required format and location.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the work health and safety requirements when performing keyboarding tasks

Starting, operating and shutting down the computer

- Explain when computer power should be turned off
- describe how to start or stop using the computer
- explain appropriate procedures for using and sharing a password
- outline how to access alternative file storage devices

Basic typing skills

- show base finger positions on the keyboard
- explain benefits of typing at an even and consistent pace

Use of applications

- explain how to produce a compressed file
- list and briefly describe the functions of master pages, templates, style sheets and macros
- describe the workplace requirements for saving files.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Support field of work and include access to a stand-alone computer or terminal.

Assessors must satisfy NVR/AQTF assessor requirements.

MEM05012C Perform routine manual metal arc welding

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers preparing the materials and carrying out routine manual metal arc welding (MMAW).
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels.</p> <p>Where welding is required to AS 1554 General Purpose or equivalent codes, occupational health and safety regulations and/or licensing requirements, Unit MEM05015D (Weld using manual metal arc welding process) should be selected.</p> <p>Band: A</p> <p>Unit Weight: 2</p>
--------------------------------	---

Licensing/Regulatory Information

Refer to Application of the Unit

Pre-Requisites

Prerequisite units	

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Correct electrodes are selected to suit application and settings.
4. Perform routine welding using MMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials and electrodes
- setting up welding equipment
- welding with MMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- performing measurements for joint preparation and routine MMAW

Required knowledge

Look for evidence that confirms knowledge of:

- material and equipment preparation
- properties and characteristics of materials and consumables
- weld characteristics
- equipment set-up and settings
- MMAW processes and properties
- post-welding treatments
- safe welding practices
- use and application of personal protective equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials and carry out routine manual metal arc welding (MMAW).

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both. Where assessment occurs off the job, i.e. the candidate is not in productive work, then appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine manual metal arc welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Low and mild carbon steel or similar
Prepared	Cleaning, setting up jigs, fixtures, clamps, joint preparation
Welding equipment	Welding leads, welding machines, electrode holder etc.
Cleaned	Slag and spatter, cleaning, using files and grinders

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Locations of welds are identified in according to standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected to suit application.
4. Perform routine welding using GMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with GMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction
- using measurement skills relating to joint preparation and routine GMAW

Required knowledge

Look for evidence that confirms knowledge of:

- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations.
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post-welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GMAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with preparing the materials and carrying out routine gas metal arc welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Materials	Mild and low carbon steel
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, welding leads, gas shrouds, gas regulators, liners, contact tips
Consumables	Filler wire, shielding gas
Cleaned	Slag and spatter

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use personnel protective equipment	1.1. Personal protective clothing and equipment is selected and used correctly and in accordance with standard workplace procedures.
2. Carry out pre-operational checks	2.1. Pre-operational checks of boiler are undertaken correctly to plant operating procedures. 2.2. Maintenance requirements and visual faults are reported according to standard workplace procedures.
3. Maintain health and safety standards in work area	3.1. Hazards and potential hazards are identified and reported according to standard workplace procedures. 3.2. Hazard prevention/control measures are selected and used as required.
4. Start boiler	4.1. Boiler is started and brought on line safely, consistent with workplace procedures and production

ELEMENT	PERFORMANCE CRITERIA
	requirements.
5. Conduct hand-over/take-over procedures	5.1. Operating status of boiler is confirmed. 5.2. Operating log is maintained and boiler status/operation is communicated according to workplace procedures.
6. Operate and monitor boiler	6.1. Boiler is operated and monitored consistent with production and safety requirements. 6.2. Boiler water quality tests are conducted to manufacturer's recommendations and workplace procedures. 6.3. Boiler water quality is adjusted as required to manufacturer's recommendations and workplace procedures. 6.4. Boiler failures/emergencies are acted on according to workplace procedures and downstream users are notified, if necessary.
7. Carry out boiler operational shut-down	7.1. Boiler is shut down consistent with workplace procedures, production and safety requirements.
8. Carry out boiler shut-down for an internal inspection	8.1. Boiler is shut down for internal inspection according to manufacturer's recommendations and workplace procedures. 8.2. Boiler is cleaned internally and externally to manufacturer's recommendations and workplace procedures.
9. Store boiler in shut-down mode	9.1. Required storage mode is identified. 9.2. Boiler is stored to manufacturer's recommendations and workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- selecting and using personal protective clothing and equipment

REQUIRED SKILLS AND KNOWLEDGE

- performing pre-operational checks of boiler
- identifying and reporting maintenance requirements
- identifying and reporting hazards and potential hazards in work area
- responding to boiler failures/emergencies
- applying hazard prevention/control measures
- starting boiler and bringing on line
- confirming operating status of boiler
- maintaining operating log
- communicating boiler status information
- monitoring boiler
- conducting boiler water quality tests
- adjusting boiler water quality
- shutting down boiler
- cleaning boiler internally and externally
- storing boiler

Required knowledge

Look for evidence that confirms knowledge of:

- personal protective clothing and equipment use and applications
- pre-operational checks such as feed water supply, boiler water level, fuel supply/heat source, boiler valves their operation and position, combustion air supply and combustion equipment
- procedures for identifying and reporting maintenance
- statutory requirements and workplace procedures for identifying and reporting hazards in the work area
- hazard prevention and control measures
- processes for starting a boiler, such as heat input, warm up of the reticulation system, steam traps and steam line purge, systems operation, reticulation line pressure, steam usage and supply
- processes for confirming operational status of boiler
- procedures for maintaining operating log
- procedures for communicating boiler status and operation
- principles of boiler operation
- boiler fittings
- preparing boiler for inspection
- procedures for monitoring a boiler, such as steam reticulation line pressure, usage, supply and quality of steam, combustion/heat source system, feed water system, fuel system combustion air supply, water level, boiler steam pressures and operation of control/safety devices etc.
- location of inspection and explosion doors
- procedures for conducting boiler water quality tests

REQUIRED SKILLS AND KNOWLEDGE

- feed water systems and treatment
- emergency procedures such as identification of emergency, isolation of heat source, selection and application of appropriate fire fighting equipment and notification of down stream users etc.
- processes and procedures such as confirming water level, cooling down, boiler pressure/vacuum and fuel/heat source isolation etc. when operationally shutting down a boiler
- processes and procedures such as confirming boiler cooling down, vacuum/pressure, fuel/heat source isolation, removal of combustion equipment and water from boiler, isolation from any common connection and the opening of all access points required for inspection etc.
- procedures for cleaning the boiler internally and externally
- the various modes of boiler storage
- procedures for storing the boiler in open or closed condition

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to operate and monitor a basic boiler. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment

EVIDENCE GUIDE	
	<p>should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with operating and monitoring a basic boiler or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>

6. Shut down boiler and associated equipment	<p>6.1.Operational shut-downs of boiler and associated equipment are carried out in accordance with work-place procedures, production and safety requirements.</p> <p>6.2.Shut-downs of boiler and associated equipment for internal inspection are carried out in accordance with workplace procedures, production and safety</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements.</p> <p>6.3. Boiler is isolated in accordance with statutory requirements, manufacturer's recommendations and workplace procedures.</p> <p>6.4. Boiler is cleaned internally and externally to manufacturer's recommendations and workplace procedures.</p>
7. Store boiler in shut-down mode	<p>7.1. Appropriate storage mode is identified</p> <p>7.2. Boiler and associated equipment is stored in shut-down mode to manufacturer's recommendations and workplace procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- following, standard operating procedures and statutory requirements
- performing preoperational checks of boiler
- performing maintenance checks
- orally reporting routine information
- identifying hazards, hazardous situations and control measures
- using personal protective clothing and equipment
- selecting the most appropriate prevention/control measure for a given situation
- starting up boilers, including those fitted with associated equipment such as superheaters and economisers
- monitoring boilers, including checks of combustion management system and superheater and economiser operation
- checking operating status
- recording routine and familiar information in operating log and other standard workplace forms
- performing water quality tests to manufacturer's recommendations and workplace procedures
- using testing equipment
- adjusting water quality

REQUIRED SKILLS AND KNOWLEDGE

- responding to typical emergency situations
- notifying downstream users
- performing operational and inspection shut-down, including procedures for associated equipment, such as superheaters and economisers
- isolating boiler from any common connection between the boiler and other boilers on line and all access points required for inspection

Required knowledge

Look for evidence that confirms knowledge of:

- pre-operational checks
- procedures for identifying and reporting maintenance requirements
- statutory requirements and workplace procedures for identifying and reporting hazards in the work area
- use and application of personal protective equipment
- safe work practices and procedures
- prevention and control measures
- the processes for starting a boiler such as heat input, warm up of the reticulation system, steam traps and steam line purge, systems operation, reticulation line pressure, steam usage and supply, associated equipment such as superheaters and economisers
- the process for confirming operational status of boiler
- procedures for maintaining an operating log and communicating boiler status
- procedures for communicating boiler status and operation
- principles of intermediate boiler operation - single and battery
- boiler fittings
- preparing boiler for inspection
- feed water systems and treatment, including de-aerator function and purpose
- procedures for monitoring an intermediate class boiler, such as steam reticulation line pressure, usage, supply and quality of steam, combustion/heat source system, feed water system, fuel system, combustion air supply, water level, boiler steam pressures and operation of control/safety devices, combustion management system, associated equipment such as superheaters and economisers
- function, purpose and location of associated equipment:
 - superheater
 - economiser
 - air heater
 - feed water heater
 - attemperator
 - superheater safety valves
 - economiser relief valves
 - main steam stop valve

REQUIRED SKILLS AND KNOWLEDGE

- procedures for conducting boiler water quality tests
- procedures for adjusting boiler water quality
- procedures such as identification of emergency isolation of heat source, operation of boiler, selection and application of fire fighting equipment and notification of downstream users
- operational shut-down processes and procedures such as confirming water level, cooling down, boiler pressure/vacuum and fuel/heat source isolation
- shut-down processes and procedures for internal inspection, such as confirming boiler cooling down, vacuum/pressure, fuel/heat source isolation, removal of combustion equipment and water from boiler
- isolation procedures and safety issues
- procedures for cleaning boiler internally and externally
- various modes of boiler storage, which may include integral associated equipment such as superheaters and economisers
- the reasons for selecting particular storage mode
- procedures for storing a boiler in shut-down mode

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to operate and monitor intermediate class boilers. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to shift loads	<p>1.1. Work area is inspected to identify hazards, and appropriate prevention/control measures are implemented to avoid hazards.</p> <p>1.2. Routine pre-operational checks are undertaken in accordance with manufacturers' specifications and regulatory safety requirements.</p> <p>1.3. Attachments and/or equipment are inspected.</p>
2. Check controls and equipment	<p>2.1. Pre-operational and post start-up equipment checks are carried out in accordance with manufacturers' specifications and/or operating manual.</p> <p>2.2. Defects and damage are reported according to site procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Shift loads	3.1. The most appropriate load shifting device is selected to suit load and shifting requirements. 3.2. Load shifting device is operated within design specifications and safe working load in accordance with standard operating procedures. 3.3. Load is lifted, ensuring balance, vision of operation and protection of load. 3.4. The safe and efficient path of movement is selected and used. 3.5. Path of movement is checked and monitored for obstacles and hazards and safety are maintained.
4. Place loads	4.1. Loads are placed ensuring safety, stability, protection of material and avoidance of hazards on site.
5. Shut down equipment and secure site	5.1. Machinery is parked avoiding equipment hazards. 5.2. Shut-down is conducted in accordance with manufacturers' specification to isolate vehicles. 5.3. Post-operational check is completed in accordance with operational procedures. 5.4. Machinery is parked in accordance with standard operating procedures, avoiding site hazards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- interpreting and following routine information on standard operating procedures. May include simple drawings, tables and figures, written documents
- performing routine safety, basic service and maintenance procedures
- calculating load masses and safe working loads
- selecting appropriate load shifting device
- following oral instructions
- safely operating load shifting devices and shifting loads
- working with others
- interpreting communication signals and instructions

REQUIRED SKILLS AND KNOWLEDGE

- determining load masses and equipment requirements
- determining mass of irregular shaped loads
- demonstrating emergency operating procedures
- communicating faults, malfunctions and workplace hazards, reports and maintenance of operational records

Required knowledge

Look for evidence that confirms knowledge of:

- pre-operational checks
- design specifications of load shifting device
- load chart
- licensing requirements
- load protection
- safe load placement
- operational environment
- appropriate permits
- hazards and control measures associated with load shifting and equipment
- use and application of personal protective equipment
- safe work practices and procedures
- workplace communication procedures
- manufacturers' specifications

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to operate load sifting equipment to move and place loads.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select appropriate device or equipment	1.1.Measurement requirements are determined from specifications. 1.2.Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome.
2. Obtain measurements using a range of measuring devices	2.1. Correct and appropriate measuring technique is used. 2.2. Measurements are accurately obtained .

ELEMENT	PERFORMANCE CRITERIA
	2.3. Dimensions are determined or verified using basic calculations, where required.
3. Maintain measuring devices	3.1. Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures. 3.2. Routine adjustments to devices are made and checked.
4. Communicate measurements as required	4.1. Measurements are accurately recorded, where required. 4.2. Freehand sketch which depicts required information is prepared, as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Look for evidence that confirms knowledge of:

- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit
- procedures for handling and storing a range of measuring devices
- procedures for adjusting and zeroing a range of measuring devices
- methods of communicating measurements by drawings, as required
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform engineering measurements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication,

EVIDENCE GUIDE	
	materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Specifications	Drawings, sketches, job instructions, schematics, diagrams, technical manuals
Range of measuring devices	Protractors, combination squares, set squares, dial indicators, thermometers, tapes, rules, micrometers, vernier-scaled measuring equipment
Basic calculations	Calculations needed to assist in determining measurements where a reading of the graduated device is not sufficient, for example subtracting one measurement from another to give a third

RANGE STATEMENT	
	measurement. Examples of calculations needed are addition, subtraction, multiplication, division, fractions and decimals. Calculations may be made using a calculator
Routine adjustments	Validating the device using simple zeroing or scale adjustment
Measurements	Measuring length, squareness, flatness, angle, roundness, clearances or any other measurements that can be read off analog, digital or other measuring device
Information	Dimensions, instructions, base line or datum points

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine work requirement	1.1. Required outcomes are established from job instructions. 1.2. Data is obtained from relevant sources and interpreted correctly. 1.3. Required calculation method is determined to suit the application, including selection of relevant arithmetic operations and/or formulae. 1.4. Expected results are estimated, including rounding off, as appropriate.
2. Perform calculations	2.1. Calculation method is applied correctly. 2.2. Correct answer is obtained. 2.3. Answer is checked against estimation.

ELEMENT	PERFORMANCE CRITERIA
3. Produce charts and graphs from given information	3.1.Data is transposed accurately to produce charts or graphs. 3.2.Charts or graphs accurately reflect data on which they are based.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- performing calculations involving whole numbers using all four basic rules
- performing calculations involving length, perimeter, area and volume
- checking calculated answers for accuracy
- rounding off estimated answers
- expressing information presented in fractional or decimal format as a percentage
- selecting appropriate formulae for the given application
- substituting the correct values for each term in the relevant formulae
- using appropriate mathematical operations
- performing calculations involving ratios or proportions
- determining required information from appropriate charts or graphs
- producing simple charts or graphs from given information or observations made
- selecting appropriate scales and using them in the production of charts and graphs
- marking appropriate limits clearly on the graph or chart
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations, geometry and calculations/formulae within the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- formula applicable to the determination of perimeter, area and volume of simple

REQUIRED SKILLS AND KNOWLEDGE

- geometric shapes
- techniques for estimating approximate answers
- reasons for using dimensions with the same units when calculating length, perimeter, area and volume
- concepts of perimeter, area and volume
- procedures for rounding off figures when estimating approximate answers
- mixed numbers, decimals, fractions and whole numbers
- concept of percentage
- procedures to be followed in converting a decimal to a percentage
- procedures for carrying out calculations involving fractions and using each of the four basic rules
- procedures to be followed on converting a fraction to a percentage
- sources of appropriate formulae
- reasons for ensuring that the units of each term are consistent with the formulae selected
- procedures for converting given units to those required for use in formulae
- concepts of ratio and proportion
- given ratios and proportions can be expressed in terms of whole numbers, fractions and decimal fractions
- scales applicable to the axes of the graphs or charts
- three types of charts and/or graphs used in the individual's field of work
- where appropriate, upper and lower limits of acceptability applicable to data entered on a graph or chart
- where appropriate, the trends indicated by the slope or gradient of a graph
- where appropriate, the action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- the trends indicated by the graphs or charts drawn
- hazards and control measures associated with performing computations, including housekeeping
- safe work practices and procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use personal protective equipment	1.1. Correct and appropriate safety clothing including personal protective equipment is selected and used correctly based on information in relevant material safety data sheet (MSDS).
2. Identify emergency procedures	2.1. Emergency procedures and plan relevant to the particular work environment are documented, understood and demonstrated as laid down in approved safety instructions.

ELEMENT	PERFORMANCE CRITERIA
3. Observe safe working practices	3.1. Hazardous areas and materials are identified and special handling procedures are identified and understood. 3.2. Permits to work (if necessary) are obtained. 3.3. All equipment and hazardous materials are used in accordance with relevant OHS legislation, manufacturers' instructions and standard operating procedures. 3.4. All site-specific safety policies, safety signs, symbols and labels are correctly identified and understood. 3.5. Material safety data sheets are understood and applied. 3.6. Safe manual handling procedures (including equipment) are used. 3.7. Decanted chemicals and storage is to State/Territory dangerous goods and OHS legislation and requirements. 3.8. Housekeeping duties are performed according to standard operating procedures to maintain a safe working environment.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- undertaking risk assessment
- communicating with others
- performing proper manual handling techniques
- interpreting safety signage, labelling and placarding

Required knowledge

Look for evidence that confirms knowledge of:

- dangerous goods classification and labelling/placarding
- testing, use and maintenance of PPE

REQUIRED SKILLS AND KNOWLEDGE

- inherent hazardous properties of the chemicals to be used
- interpretation of the relevant MSDS
- basic fire fighting procedures
- site-specific emergency plan procedures
- chemical spill confinement procedures
- dangerous occurrence (near miss) reporting procedures
- hierarchy of control

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to work safely and efficiently with various chemicals.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with working safely with industrial chemicals and materials or other units requiring the exercise of the skills and knowledge covered by this unit.

EVIDENCE GUIDE	
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Personal protective equipment	Personal protective may include appropriate: <ul style="list-style-type: none"> • goggles/face shields • respirators • air supplied or self-contained helmets • safety boots, gloves and appropriate clothes/garments
Safe working practices	<ul style="list-style-type: none"> • Environment is inspected • Hazards (and chemical reactive hazards) are assessed and controlled using hierarchy of hazard control • Properly maintained PPE is available • Emergency management plan is documented/understood

RANGE STATEMENT	
	<ul style="list-style-type: none"> Work to be undertaken in safe 'thermal' environments and all possible ignition sources are to be identified and controlled
Storage	All storage containers (minor quantities and in consumer packages) are suitable for chemical exposure and are properly labelled and/or placarded. Chemical manifests are updated at completion of work activity
State or Territory legislative requirements	Appropriate OHS, dangerous goods acts and regulations, Australian standards, Australian Code for the Transport of Dangerous Goods by Road and Rail (ADGC), NOHSC codes of practice

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify task requirements	1.1. Instructions and procedures are obtained, understood and where necessary clarified. 1.2. Relevant specifications for task outcomes are obtained, understood and where necessary clarified. 1.3. Task outcomes are identified. 1.4. Task requirements such as completion time and quality measures are identified.
2. Plan steps required to complete task	2.1. Based on instructions and specifications provided, the individual steps or activities required to undertake the task are understood and where necessary clarified. 2.2. Sequence of activities is identified.

ELEMENT	PERFORMANCE CRITERIA
	2.3. Plan is checked to ensure it complies with specifications and task requirements.
3. Review plan	3.1. Effectiveness of plan is reviewed against specifications and task requirements. 3.2. If necessary, plan is revised to better meet specifications and task requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- obtaining instructions for tasks from correct source of information (job card, supervisor, work colleagues and others)
- clarifying tasks and required outcomes with appropriate personnel where necessary
- identifying relevant specifications from documentation, job cards, or other information source
- preparing plans for tasks
- sequencing activities
- comparing planned steps against specifications and task requirements
- communicating and interpreting information appropriate to the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- correct sources of information for a particular task
- procedures for obtaining instructions and clarification
- specifications for the task
- hazards and established control measures associated with the routine task, including housekeeping
- safe work practices and procedures

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify activity requirements	1.1. Activity outcomes and objectives are identified and clarified with appropriate persons. 1.2. Activity requirements, including resources, overall timeframe, quality requirements and criteria for acceptable completion are identified and clarified. 1.3. Relevant specifications and procedures are obtained

ELEMENT	PERFORMANCE CRITERIA
	and clarified.
2. Plan process to complete activity	2.1. The individual components of the activity are identified and prioritised. 2.2. Planning tools and techniques are selected and used according to the needs of the activity. 2.3. The plan is checked for accuracy and conformance to instructions and requirements.
3. Modify plan	3.1. The plan is referred to and modified as necessary to overcome unforeseen difficulties or developments that occur as work progresses. 3.2. The results of the activity are reviewed against the plan, and possible future improvements to plan are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- obtaining, reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawing and other applicable reference documents
- preparing a plan including sequential steps that will enable the activity to be completed
- modifying the plan where appropriate, to take account of difficulties or developments that occur while following the prepared plan
- planning and sequencing activities
- checking and clarifying task-related information
- checking for conformance to specifications
- using numerical operations, geometry and calculations/formulae within the scope of this unit
- using planning techniques such as scheduling, time management, brainstorming, setting of goals and defined outcomes, prioritising, review and evaluation strategies

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Look for evidence that confirms knowledge of:

- tasks to be performed
- person/s who can clarify the objectives, requirements and specifications
- specifications relevant to the tasks to be performed
- outcomes to be achieved
- timeframe for activity completion
- quality requirements of the product or service
- priority of each step in the plan
- reasons for the relative priority of each step
- modifications to the plan to overcome a range of unforeseen situations
- hazards and control measures associated with planning the complete activity, including housekeeping
- safe work practices and procedures

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job requirements	1.1. Nature and scope of task requirement are identified. 1.2. Information/data required to be accessed, input or stored is identified. 1.3. Source of information/data is identified.
2. Access information/data	2.1. Access procedures are followed. 2.2. Technology is navigated to find the required information/data. 2.3. Relevant software application menus, functions and commands are used to locate required information/data. 2.4. Information/data is retrieved using organisational procedures. 2.5. Information/data is checked for relevance to job requirements.
3. Input information/data	3.1. Relevant software menus, functions and commands are used to manipulate information/data. 3.2. Information/data is entered, changed, or removed as required.
4. Store	4.1. Data/files are saved following standard procedures

ELEMENT	PERFORMANCE CRITERIA
information/data	<p>prior to exiting the application.</p> <p>4.2.Data output is produced as required.</p> <p>4.3.Procedures for shutting down/logging off/exiting computing technology are followed.</p>
5. Access assistance as required	<p>5.1.Appropriate personnel are identified and consulted as required.</p> <p>5.2.Manuals, online help and other reference materials are identified and used as required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- ability to enter or retrieve data using appropriate software applications
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task-related information
- using numerical operations within the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- functions and capabilities of various types of computing technology used in the workplace
- functions of software applications
- hazards and control measures associated with using computing technology, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>A person who demonstrates competency in this unit must be able to interact with computing technology to achieve workplace outcomes.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with interacting with computing technology or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>

assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Access procedures	Logging on and security procedures, virus checks, start-up routines, application start-up
Technology	Hand held data recording devices, screen based equipment, personal computers, bar coders
Applications	<ul style="list-style-type: none"> • Word processing spreadsheets and databases • Customised engineering and manufacturing applications • Material Resource Planning (MRP) • Warehousing inventory applications • Predictive reliability and maintenance applications • Production data management applications
Data output	Report, email, chart, graph, printout, data transfer, labels

MEM17003A Assist in the provision of on the job training

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers assisting in the provision of on the job training to others while undertaking normal duties.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit may involve the replacement of normal duties with training duties for limited periods of time. The individual would not be expected to be solely responsible for the assessment or reporting of a trainee's progress.</p> <p>Typical applications could include the provision of on the job guidance by a tradesperson to apprentices/trainees or by a production worker to other production workers/trainees.</p> <p>Where development of training programs is involved see Unit MEM17001B (Assist in development and deliver training in the workplace).</p> <p>Band: A</p> <p>Unit Weight: 2</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine role of on the job training	1.1. Objectives of training and role of on the job training are identified in consultation with team leaders or other appropriate personnel.
2. Provide on the job training	2.1. Training is conducted using learning methods appropriate to the training objectives and learner. 2.2. Trainee progress is monitored and feedback is provided appropriate to the learning outcomes.
3. Report on trainee performance	3.1. Trainee's progress is reported according to standard operating procedure.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- obtaining all relevant information with respect to the training to be provided
- applying suitable training methods
- providing feedback to the trainee throughout the training process
- reporting on the trainee's progress
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task-related information

Required knowledge

Look for evidence that confirms knowledge of:

- training to be delivered
- personnel to be consulted with respect to the training to be provided
- the individual's role in the provision of training
- objectives of the training
- the person(s) to be trained
- procedures to be followed when training individuals
- training location(s)
- tools, equipment, procedures, materials and resources
- training delivery methods, their applications, advantages and disadvantages
- feedback techniques
- reasons for monitoring trainee progress
- reporting procedures
- hazards and control measures associated with assisting in the provision of on the job training, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to assist in the provision of on the job training.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with assisting in the provision of on the job training or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting power tools appropriate to the task
- using power tools safely
- using clamping/securing devices
- identifying power tool defects
- maintaining power tools using appropriate techniques
- sharpening tools/tool bits within the scope of this unit
- storing power tools according to manufacturers'/ standard operating procedures.

Required knowledge

Look for evidence that confirms knowledge of:

- application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements of a range of power tools
- tool sharpening techniques for a range of power tools
- storage location and procedures of a range of power tools
- hazards/control measures associated with power tools
- use and application of personal protective equipment
- safe work practices and procedures

MEM19006B Replace watch batteries

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers selecting and replacing digital/analogue watch power cells.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to the selection and replacement of digital/analogue watch power cells whilst operating in a jewellery/watch workshop environment with access to the appropriate equipment.</p> <p>Some knowledge of watch glasses and seals is required, however specific replacement functions for these are not covered by this unit. Testing functions relate only to the measurement of voltage, consumption and resistance.</p> <p>This competency does not apply to diver and other water-resistant watch types. Water resistance and pressure testing is not covered by this unit, however identification of watches requiring testing as well as procedures for arranging testing are a requirement of this unit.</p> <p>Where power cell replacements in these two categories are of common practice with associated testing, and/or identification/cleaning/supply/fitting of waterproofing/water resistance components, the appropriate horological units should be selected.</p> <p>Band: A</p> <p>Unit Weight: 1</p>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify watch case construction	1.1. Case material and construction is identified. 1.2. Case types and their functions are identified. 1.3. Associated parts and consumables are identified.
2. Open and close watches	2.1. Workshop tools and equipment are selected and used appropriately. 2.2. Watch cases are opened and closed correctly. 2.3. Parts are inspected and results are reported and/or

ELEMENT	PERFORMANCE CRITERIA
	recorded.
3. Select power cells	3.1. Appropriate batteries/power cells are selected.
4. Replace power cells	4.1. General inspection of surface/contact areas is performed. 4.2. Appropriate batteries/power cells are selected and installed. 4.3. Voltage, consumption and resistance are measured. 4.4. Power cells are handled and stored correctly.
5. Arrange water resistance and pressure testing	5.1. Watches requiring water resistance and/or pressure testing are identified. 5.2. Water resistance and pressure testing is arranged.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- handling case, movement and other watch parts
- cleaning case and watch parts
- opening/closing watch cases
- inspecting for obvious damage/wear and/or moisture intrusion.
- inserting and removing batteries
- interpreting charts and information sheets
- measuring voltage/ resistance/consumption
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings

Required knowledge

Look for evidence that confirms knowledge of:

- applicable horological terminology
- design of case types and their functions
- types of batteries/power cells and their functions
- battery cell construction

REQUIRED SKILLS AND KNOWLEDGE

- cases including water resistant, dustproof and diver's
- analog, digital, multi-function and mechanical watch functions
- wear and the possible effects on glass and adjustors
- the watch-specific tools and equipment
- manufacturers' information/specifications/procedures
- location and cause of moisture and corrosion effects
- handling/cleaning/adjustment procedures
- OH&S issues for mercury and lithium batteries
- appropriate symbols and other identifying relevant standards information and their location
- relevant internal and/or external water resistance and pressure testing bodies/personnel
- arrangements/procedures for dispatch and receipt of watches
- battery features and identification codes
- parts associated with power cell function
- location and cause of moisture and corrosion effects
- watch functions
- procedures to confirm power cell status

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify engraving requirements	1.1. Engraving requirements are identified from applicable documents. 1.2. Sequence of procedures is correctly identified.
2. Select and maintain engraving equipment and accessories	2.1. Appropriate equipment is selected for use. 2.2. Gravers are prepared to industry standards.
3. Perform hand engraving	3.1. Item is measured and marked out for engraving as required. 3.2. Work piece is positioned and held/clamped effectively and without damage to the work piece. 3.3. Work is undertaken according to standard work

ELEMENT	PERFORMANCE CRITERIA
	procedures and workplace/industry standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- identifying the engraving sequence
- selecting and using gravers, scorpers and other applicable tools
- controlling engraving tools
- machining and sharpening graver shape and cutting angles
- using datum lines/points
- handling and securing work pieces
- maintaining points/cutting edges/polished faces

Required knowledge

Look for evidence that confirms knowledge of:

- engraving terminology
- sources of task-related information
- securing methods and limitations
- different gravers, scorpers and other tools and their applications
- techniques for producing and maintaining cutting edges
- equipment used for maintaining gravers
- required industry standards
- tool maintenance
- basic hand engraving techniques
- hazards and control measures, including housekeeping
- use and application of personal protective equipment
- safe work practices and procedures

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers producing and duplicating keys for mechanical locking devices and systems - by hand, code and duplicating machine, computer code machines and read/write transponder programming.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to production and duplication of keys in a store/workshop, mobile workshop or on-site. It applies to the production of keys across a range of locksmithing areas, including automotive, domestic, commercial, security containers and ancillaries.</p> <p>Key tasks are identifying blank type, obtaining blank, selecting cutting method, preparing tools and equipment, cutting/duplicating keys, checking finished product.</p> <p>If electronically stored data is accessed and recorded (where program knowledge and judgement is not required), Unit MEM16006A (Organise and communicate information) should also be selected.</p> <p>This unit applies to identification of transponder keys and programming read/write transponder keys only. Where other programming of high-security transponders is required, Unit MEM20013A (Service automotive transponder systems) should be selected.</p> <p>Band: A</p> <p>Unit Weight: 4</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify requirements for key production	1.1. Appropriate method for cutting/duplicating is selected according to key type and system, and other applicable factors. 1.2. Requirements for key production are identified from instructions, documentation and existing samples. 1.3. Signatories are confirmed.
2. Prepare materials and equipment	2.1. Appropriate tools and equipment are selected. 2.2. Correct key blank is selected for the given application. 2.3. Equipment and accessories are set up correctly for cutting/duplicating.

ELEMENT	PERFORMANCE CRITERIA
3. Produce and duplicate keys	3.1. Key correctly fits and operates lock. 3.2. Key dimensions meet manufacturer specifications. 3.3. Hand tools and equipment are used safely and correctly. 3.4. Key is finished according to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- selecting appropriate cutting/duplicating method
- using and interpreting conversion charts, reference books, and samples to identify blank requirements
- accessing and using computer and book code programs
- measuring key dimensions
- identifying key types and features
- identifying faults in samples
- selecting tools and equipment
- setting up and safely using cutting and duplicating equipment
- testing and adjusting key operation
- checking calibration
- key finishing

Required knowledge

Look for evidence that confirms knowledge of:

- different techniques for cutting and duplicating
- tools and equipment for hand and machine cutting
- key systems and blanks
- spacings, depths, angles, shapes and other measurements relevant to cutting keys
- terminology for key production
- workplace method for confirming signatory to key order
- tools, equipment and accessories for cutting keys by hand and machine

REQUIRED SKILLS AND KNOWLEDGE

- key blank storage and classification systems
- housekeeping procedures
- safe operation of equipment and safe work practices
- identification marking procedures
- key storage and packaging procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to produce and duplicate various keys across a range of locksmithing areas.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with producing keys, or other units requiring the exercise of the skills and knowledge covered by this unit.

Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct

EVIDENCE GUIDE	
	observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Appropriate method for cutting/duplicating	Hand, machine, computer and book code equipment, programming of read/write transponders
Key types	Inline pin tumbler, single and double sided wafer, 2 and 4 track, lever (pin, pipe, mortice, flat steel, double bitted), warded, pre-cut, rotating pin, rotating disc, axial pin (dimple), tubular, cruciform
Key systems	Restricted, semi-restricted and non-restricted system numbers, manufacturer restricted, factory restricted, locksmith restricted/managed, association restricted
Requirements for key production	Specific client requirements and quantities, completion times and dates, job requirements and tasks, signature authorities, OHS requirements, company requirements, compliance with relevant

RANGE STATEMENT	
	manufacturer requirements, warranties and service information
Documentation	Materials used, identified faults, warranties and recommendations, costs
Tools and equipment	<ul style="list-style-type: none"> Manual and computerised code machines, milling machines, tubular machines, duplicating machines, crimpers, hand files, bridge support. Measuring equipment includes standard gauges and vernier callipers
Safely and correctly	<ul style="list-style-type: none"> OHS policies and procedures include hazardous and risk assessment mechanisms, implementation of safety regulations, safety training, safety, systems incorporating use of protective equipment, use of codes of practice, emergency procedures, first aid Safety and personal protective equipment includes safety glasses, support devices and rests, guarding

MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply functions of computer-aided design (CAD) software programs that are typically used in the production of detail drawings.

Application of the Unit

This unit is suitable for those working within a CAD or drafting work environment and may be applied across engineering and manufacturing environments. It covers competent use of a CAD program to perform basic drawing tasks used in the development of detail drawings. Drawings may include plans, diagrams, charts, circuits, systems or schematics.

This unit includes using computer equipment and selecting software functions in order to generate basic drawing elements.

Work is conducted under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---------------------------------------|-----|---|
| 1 | Confirm drawing requirements | 1.1 | Confirm purpose, scope, and information and presentation requirements for drawing |
| | | 1.2 | Review available information relevant to project and work requirements, and identify and address further information needs |
| | | 1.3 | Identify computing equipment and software used in the organisation |
| | | 1.4 | Identify work flow and procedures for work supervision |
| | | 1.5 | Examine requirements for presentation of drawings |
| 2 | Identify key features of CAD software | 2.1 | Describe types of CAD software used for detail drafting, their key features and suitability for producing specific drawing outcomes |
| | | 2.2 | Describe types of CAD software used for design drafting, their key features and suitability for producing specific drawing outcomes |
| | | 2.3 | Identify differences in CAD process to generate 2-D drawings and 3-D models, and reasons for each presentation |
| | | 2.4 | Identify differences in CAD process to generate single and multiple view drawings, and reasons for each presentation |
| | | 2.5 | Identify CAD software used in the organisation and confirm compatibility with other software programs and peripheral equipment |
| | | 2.6 | Identify software features for linked specifications, catalogues or materials ordering |
| 3 | Access software and set up for | 3.1 | Open software and navigate organisational filing and library system |

	drawing work	3.2	Identify organisational and software templates and determine uses
		3.3	Identify organisational symbols, codes and standards to be applied in drafting work and how these are accessed and applied
		3.4	Apply workplace procedures to retrieve and manipulate required information and navigate computing technology
		3.5	Set up working environment
4	Produce basic drawing elements	4.1	Use CAD functions to produce basic drawing elements
		4.2	Use editing and transfer tools and methods to modify drawing elements
		4.3	Apply dimensions, text and symbols to drawing elements
		4.4	Import and export files into/out of working space
		4.5	Generate different views and perspectives
		4.6	Organise presentation of work
5	Complete CAD operations	5.1	Save and file drawing elements according to organisational procedures
		5.2	Print drawing elements and evaluate presentation
		5.3	Evaluate work and identify areas for improvement
		5.4	Close applications, perform CAD housekeeping and maintain organisational filing system

Required Skills and Knowledge

Required skills

Required skills include:

- literacy skills sufficient to read instructions for drawings work

- using computer technologies and navigating software
- numeracy skills sufficient to interpret technical information and determine scaling and layout issues
- navigating software to:
 - manipulate drawing entities
 - modify dimension styles
 - create and use layers
 - manipulate the drawing origin
 - define and utilise symbol libraries
 - utilise grids/grid snaps and object snaps
 - display views at multiple scales
 - add title blocks/frame to layout a drawing for printing
 - prepare advanced drawings in plane orthogonal or equivalent
 - set up prototype drawings
 - define and extract attribute data
 - create bills of materials (BOM) utilising attribute data and third-party application software

Required knowledge

Required knowledge includes:

- general knowledge of different approaches to drawing
- awareness of copyright and intellectual property issues and legislation in relation to drawing
- environmental and occupational health and safety (OHS) issues associated with the tools and materials used for drawing
- quality assurance procedures
- CAD program capabilities and processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to use CAD software to produce graphics commonly used in drafting work.
Critical aspects for assessment and evidence required to demonstrate competency in this	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required

<p>unit</p>	<p>knowledge, and be capable of applying the competency in new and different situations and contexts.</p> <p>Specifically the candidate must be able to:</p> <ul style="list-style-type: none"> • work within typical site/teamwork structures and methods • apply worksite communication procedures • comply with organisational policies and procedures, including quality requirements • participate in work meetings • comply with quality requirements • use industry terminology • apply appropriate safety procedures • identify drawing work requirements and determine appropriate software functions and features • identify features and uses of CAD software used in detail and design drafting • access and use computing equipment and CAD software functions to produce drawing elements.
<p>Context of and specific resources for assessment</p>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with drafting or other units requiring the exercise of the skills and knowledge covered by this unit.</p>

Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways, including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

MEM30032A Produce basic engineering drawings

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers producing drawings or similar graphical representations where the critical dimensions and associated tolerances and design specifications are predetermined.

Application of the Unit

This unit applies to any of the full range of engineering disciplines. All work is carried out under supervision and all specifications, dimensions and tolerances are predetermined. The unit covers application of introductory drafting skills to select and apply drawing protocols.

Manual drafting or computer-aided design (CAD) drawing equipment may be used.

If CAD skills are required, MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements, should be selected.

Drawings are completed to Australian Standard (AS) 1100.101–1992 Technical drawing – General principles.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|-------------------------------|-----|---|
| 1 | Identify drawing requirements | 1.1 | Identify information requirements for work and obtain all relevant job requirements and design specifications in accordance with workplace procedures |
| | | 1.2 | Identify, interpret and analyse drawing requirements, specifications and relevant workplace information |
| | | 1.3 | Interpret and apply industry terminology for drawing work |
| | | 1.4 | Confirm communication practices required during drawing work |
| | | 1.5 | Estimate time requirements for completing work |
| 2 | Select drawing features | 2.1 | Set up drawing list or register |
| | | 2.2 | Determine level of detail and numbers of drawings required for work |
| | | 2.3 | Plan presentation and layout, and determine drawing sheets, text style and size, and scales, appropriate for drawing work |
| | | 2.4 | Identify features and applications of line types and thicknesses and select for drawing work |
| | | 2.5 | Establish datums and dimensions |
| 3 | Prepare and detail drawings | 3.1 | Prepare drawings in plane orthogonal, isometric projection or equivalent |
| | | 3.2 | Detail drawings in third angle projection, including auxiliary views, sections and assemblies |
| | | 3.3 | Draw sections through engineering components incorporating correct use of cutting plane symbols and conventions |

		3.4	Include appropriate symbols for limits and fits, surface texture and geometric tolerances
		3.5	Resolve problems in consultation with a supervisor
		3.6	Check drawing compliance with work instructions and specifications
4	Select physical dimensions and produce engineering parts list	4.1	Where required, select components and/or materials from supplier/manufacturer catalogues using predetermined design specifications
		4.2	Produce an engineering parts list in accordance with workplace procedures
5	Complete drawing documentation	5.1	Obtain approval for drawings and/or parts list
		5.2	Store approved drawings and/or parts lists
		5.3	Catalogue and issue drawing and documentation in accordance with workplace procedures

Required Skills and Knowledge

Required skills

Required skills include:

- correctly using and maintaining equipment, including CAD
- manual drafting, filing and printing
- reading and interpreting specifications
- communicating with supervisor to confirm work requirements and outcomes
- visualising components
- preparing a drawing in plane orthogonal, isometric projection or equivalent
- determining drawing protocols required to complete drawing to industry standard
- selecting and locating text to support presentation
- establishing datums and dimensions for drawings
- drawing sections through an engineering component incorporating correct use of cutting plane symbols and conventions

Required knowledge

Required knowledge includes:

- drafting media, including cartridge paper, tracing paper, drafting film and plain printing paper
- layout conventions
- effective use of blank space, location of notes and symbols
- sectioning
- overview of graphical techniques
- assembly drawings and explosion drawings
- schematics/line drawings, graphs and pictorials
- standard engineering drawing symbols, references and terminology
- application of surface finish symbols to drawings
- uses of different scales in industry applications
- uses and types of line weights
- uses and types of drawing sheets
- type of information provided with drawings

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

MEM30033A Use computer-aided design (CAD) to create and display 3-D models

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers using a computer-aided design (CAD) program to produce and plot basic 3-D view drawings.

Application of the Unit

This unit applies to the production of 3-D models using CAD software and associated equipment. This will include the use of region and solid modelling techniques, section views and pre-drawn library files. Work also includes extraction of properties and application of basic rendering techniques.

All work is conducted under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm drawing requirements	1.1	Confirm purpose, scope and information and presentation requirements for drawing
		1.2	Identify, interpret and analyse available information relevant to project and work requirements, and identify and address further information needs
		1.3	Identify computing equipment and software used in the organisation
		1.4	Identify work flow and procedures for work supervision and confirm communication requirements through project
		1.5	Examine requirements for presentation of drawings
2	Create and display 3-D views	2.1	Set up a 3-D environment on the screen to allow multiple viewing
		2.2	Create 3-D views on the screen by manipulation of drawing planes and insertion of 3-D geometric shapes
		2.3	Draw on any plane of the 3-D view
		2.4	Use editing functions to modify 3-D geometric shapes in creating 3-D views
		2.5	Produce wire line, surface and solid face displays in isometric, perspective and orthographic projections
3	Detail 3-D model	3.1	Extract the mass and surface area of a given solid model made from a nominated material
		3.2	Apply basic rendering techniques to render solid model to a specified set of criteria
4	Save completed	4.1	Save file in an appropriate format to enable retrieval and

drawing file in
various formats

use in a CAD system

- 4.2 Save file in other formats to enable retrieval in other software applications

Required Skills and Knowledge

Required skills

Required skills include:

- reading and interpreting engineering specifications
- organising information
- using computer and peripherals
- using CAD program
- saving 3-D models in various file formats
- preparing drawings in plane orthogonal, isometric projection or equivalent

Required knowledge

Required knowledge includes:

- region modelling techniques
- solid modelling techniques
- development of sectioned models
- use of cutting plane
- use of cross hatching
- use of pre-drawn library files and primitives to produce a 3-D model
- use of third level software to produce 3-D models
- how to extract mass and area properties
- how to extract area properties from region models
- application of basic rendering techniques to a 3-D model

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

MSFSF3013 Provide technical advice to customers

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers providing advice to customers on a range of technical issues that impact on soft furnishing types, uses and installation issues, including wall structures, interior design principles, motorisation, energy conservation and interpretation of architectural drawings.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking technical advisory work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

Pre-requisite Unit

Competency Field

Unit Sector

Soft Furnishing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify customer requirements	1.1	Questioning techniques are applied to determine the nature of customer requirements
		1.2	Potential site problems or site-specific requirements are identified
2	Access and interpret information	2.1	All available information relating to customer-specific requirements is gathered, recorded and confirmed with the customer
		2.2	Information on options that potentially meet the customer's

- requirements is accessed and interpreted
- 3 Provide advice to customer
- 3.1 Viable options relating to products, techniques or solutions that are relevant to the customer's requirements are generated
- 3.2 Information on available options relating to products, techniques or solutions is provided to the customer
- 3.3 Features, benefits, limitations and safety implications relating to available options are explained to the customer
- 3.4 The customer is advised to seek specialist advice, where warranted

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

Tools and equipment include:

- measuring and calculating equipment:
 - tapes
 - rulers

- calculators
 - computers
- Materials include:**
- product and fabric samples
 - visual aids:
 - photographs
 - magazines
 - trade brochures
 - sketches
 - technical drawings
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
 - work instructions, including job sheets, cutting lists, plans, drawings and designs
 - workplace procedures relating to reporting and communication
 - manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFSF3014B Provide technical advice to customers.

Assessment Requirements for MSFSF3013 Provide technical advice to customers

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Provide advice to customers on three (3) occasions with each involving a different central subject
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Interpretation of plans, drawings and worksheets
- Interior design principles
- Types of motorisation
- Energy conservation methods
- Types of wall and ceiling construction

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to sample products, visual aids and customer specifications.

MSMBLIC001 Licence to operate a standard boiler

Modification History

Release 1. Supersedes and is equivalent to MSABLIC001 Licence to operate a standard boiler.

Application

This unit specifies the outcomes required to operate a standard boiler safely. This includes boiler start-up, handover, monitoring, shutdown and storage of a boiler that uses a single fuel source and does not have an air pre-heater, feed water heater, superheater, attempurator or desuperheater, simultaneous dual fuel firing capability or economiser attached.

This unit also covers the preparation for inspection procedures as specified in manufacturer recommendations, identification of maintenance requirements and relevant risk control measures.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, High Risk Work, and meets Commonwealth, state and territory high risk work licensing requirements. Any alteration to the unit content or outcomes would result in a unit that is not acceptable to WHS/Occupational Health and Safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Nil

Competency Field

Unit Sector

Boiler operation (licensed)

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1 **Plan and prepare** 1.1 Follow standard operating procedures (SOPs)

- for work**
- 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Identify potential workplace hazards and appropriate risk control measures consistent with appropriate standards to ensure the safety of personnel and equipment
 - 1.4 Locate and review appropriate records to prepare for boiler operation
 - 1.5 Identify the type of boiler and plan boiler operations according to procedures
 - 1.6 Identify appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.7 Identify suitable communication methods and confirm with appropriate personnel
- 2 Start up boiler**
- 2.1 Apply risk prevention and risk control measures to the work area according to procedures
 - 2.2 Select communication equipment and inspect for serviceability
 - 2.3 Select all necessary equipment and inspect for operational effectiveness according to procedures, including establishing water level
 - 2.4 Check boiler visually for any damage or defects and report and record any found according to procedures with appropriate action taken
 - 2.5 Vent boiler to atmosphere prior to start-up, as required
 - 2.6 Carry out pre-start up checks on the boiler and bring the boiler online safely according to procedures
 - 2.7 Start up boiler according to procedures
 - 2.8 Identify maintenance requirements and any visual faults and report according to procedures
 - 2.9 Confirm, complete and log all maintenance and/or repairs and associated isolations and make the equipment serviceable

- 3 **Monitor boiler operation**
- 3.1 Diagnose operating status of the boiler
 - 3.2 Maintain operating log clearly and accurately according to procedures
 - 3.3 Monitor boiler, valves, fittings and pressure gauges according to procedures
 - 3.4 Blow boiler water level gauges through both steam and water sides
 - 3.5 Test standby plant and equipment according to procedures
 - 3.6 Conduct boiler water quality tests, where required, and record the results according to procedures
 - 3.7 Adjust boiler water chemicals after tests, where appropriate and required according to procedures and notify downstream users, if necessary
 - 3.8 Activate the automatic blowdown and, where required, boiler is blown down to adjust total dissolved solids (TDS) levels to recommendations
 - 3.9 Communicate handover information regarding boiler status and operation clearly to relevant personnel according to procedures
 - 3.10 Respond immediately to any boiler emergency in accordance with procedures
- 4 **Shut down boiler**
- 4.1 Shut down the boiler for inspection according to procedures, as required
 - 4.2 Identify maintenance requirements and report any visual faults according to procedures
 - 4.3 Complete isolations associated with in-service maintenance according to procedures
 - 4.4 Clean boiler internally and externally to manufacturer recommendations and procedures, where required
 - 4.5 Complete boiler operating log for shutdown

- | | | | |
|---|--------------------------------------|-----|---|
| 5 | Store boiler in shutdown mode | 5.1 | Identify storage time and condition of storage, where required |
| | | 5.2 | Store boiler in safe condition for access in accordance with manufacturer recommendations and procedures |
| | | 5.3 | Test stored boiler water and chemicals, where required, and handle in accordance with procedures, where storage is for extended periods |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Boiler includes: Fixed and modulating combustion controls and a single heat source. Operation includes a battery of boilers and boilers that have a single thermal or solar heat source.

Note: Boilers meeting the definition of ‘advanced boiler’ are excluded.

- Standard boiler includes:**
- vessel or an arrangement of vessels and interconnecting parts in which steam and vapour is generated or in which water or other liquid is heated above that of the atmospheric pressure by the application of:
 - fire
 - the products of combustion
 - electrical power
 - similar means
 - fixed and modulating combustion controls, fixed and

modulated air supply, a single fuel source and will have:

- boiler piping
- supports
- mountings
- valves
- gauges
- fittings
- controls
- boiler settings and directly associated equipment

Type of boiler includes one or more of the following:

- fire tube
- water tube
- once through boilers
- waste heat
- electrically heated
- novel or unique

Hazards include one or more of the following:

- asbestos lagging
- chemical hazards
- thermal hazards
- manual handling hazards
- machinery guard requirements
- hot exposed steam pipe
- leakage of steam
- leakage of fuel
- odour of gas
- fumes from a liquid chemical spill
- faulty/broken ladder or hand rail
- working at heights
- flammable liquids
- fire and explosion
- electrical hazards
- work area, including:
 - illumination
 - excessive noise from machinery
 - spillage of oil
 - rubbish and combustibles
 - obstruction

Risk control methods include:

Risk control methods refer to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls.

It includes the application of the hierarchy of control:

- elimination
- substitution
- isolation
- engineering controls
- administrative controls
- personal protective equipment (PPE)

Appropriate standards include one or more of the following:

- legislation
- codes of practice
- manufacturer specifications
- Australian Standards
- technical standards (International)
- industry standards (where applicable)

Procedures include one or more of the following:

- manufacturer guidelines (e.g. instructions, specifications or checklists)
- industry operating procedures
- workplace procedures (e.g. work instructions, operating procedures or checklists)

Equipment includes one or more of the following:

- gas monitoring equipment
- water testing equipment
- fire-fighting equipment
- workplace first aid equipment
- work platform and associated gear, including walkways

Communication methods include one or more of the following:

- verbal and non-verbal language
- written instructions
- signage
- hand signals
- listening
- questioning to confirm understanding
- appropriate worksite protocol

Appropriate personnel includes one or more of the following:

- production workers
- maintenance workers
- supervisors and managers
- other boiler operators
- suppliers
- colleagues

Records include one or more of the following:

- operating log books
- maintenance records
- records of faults and potential faults
- isolation procedures
- safe operating procedures
- daily operating inspections
- repairs carried out according to manufacturer recommendations and operating procedures
- workplace record keeping requirements
- details of any daily or periodic maintenance work
- details of yearly programmed or additional maintenance work

Risk control measures include one or more of the following:

- barricades and controls
- machine guarding
- fall prevention
- pedestrian controls
- adequate illumination
- noise controls
- signage
- PPE

PPE includes one or more of the following:

- thermally insulated gloves
- hard hat protection
- ear protection (muffs or plugs)
- chemical resistant gloves and apron
- respiratory devices
- eye protection
- working protective gloves
- whole body fire-resistant clothing

Communication equipment includes one or more of the

- two-way radios
- mobile phones

following:

- intercoms
- landline telephones
- pagers
- satellite phones
- computers

Pre-start up checks include:

- testing warning lamps or visual warning indicators
- control panel checks
- checks of feedwater supply system
- fuel supply/heat source system
- operation and position of boiler valves
- combustion air supply system
- boiler water level
- essential fittings and gauges
- selection of PPE
- inspection and location of inspection and explosion doors (where applicable)
- identification of hazards and management of risks and maintenance problems
- fire-fighting equipment
- manufacturer recommendations and checklists
- relevant records and logs

Start-up includes:

- purge boiler furnace
- heat input
- warm-up reticulation system
- venting the boiler of air, where required
- steam traps and steam line purge system operations
- reticulation line pressure
- steam usage and supply

Maintenance includes:

- leaking steam pipe
- pressure gauge accuracy
- exposed electrical wiring
- defective illumination in the workplace
- leaking fuel pump gland
- leaks in high pressure feed line
- leaking gauge glass mounting
- leaking safety valve
- isolation procedures, hardware and equipment

Faults include one or more of the following:

- abnormal operating conditions
- boiler tube failure
- feedwater supply and/or other major auxiliary loss
- wet steam
- high dissolved oxygen
- pH of water
- high conductivity
- actuator or valve mechanical or electrical fault/failure
- instrument failure
- steam leak

Diagnosed includes one or more of the following:

- senses, including:
 - audio
 - smell
 - touch
 - visual
- remote or local indicators and recorders
- computers and alarms, including:
 - visible
 - audible

Operating log includes:

- date and time of checking
- each check, examination and results
- printed and signed name of person who performed the checks
- date and time of any lockout or equipment malfunction
- results of tests on boiler or feedwater
- changes in operation

Valves and fittings include one or more of the following:

- safety valves
- gauge glasses
- main steam stop valve
- feedwater stop valve
- feed check valve
- blowdown valve
- steam side/line drain valves
- flame failure detection device
- water level controller

- boiler steam pressure gauge
- Monitored includes:**
- water supply system
 - checks of steam reticulation line pressure
 - usage and supply of steam
 - quality of steam
 - combustion/heat source system and management
 - feedwater system
 - fuel system
 - combustion air supply
 - water level
 - boiler steam pressure
 - boiler and steam manifold valves (where fitted)
 - soot blowers (where fitted)
 - operation of control/safety devices, including control panels
- Tested includes one or more of the following:**
- response checks
 - standby plant 'cut in' tests
 - valve operating checks
 - hydrostatic tests
 - performance tests
 - alarm and protection tests
- Tests include one or more of the following:**
- pH levels
 - conductivity
 - oxygen
 - TDS
 - hardness
 - other contaminants
- Chemicals include one or more of the following:**
- oxygen scavenger
 - feedwater additives
 - other chemicals
 - hardness
 - condensate chemicals
 - pH buffers
- Handover includes:**
- previous load requirements

- maintenance issue, including equipment isolated for maintenance
- operational incidences
- read operating log
- general inspection of boiler to detect any defects
- accept responsibility of boiler
- noted equipment malfunctions
- required equipment tests

Emergencies include one or more of the following:

- tube failure
- loss of water level
- power failure
- inadequate housekeeping
- explosion
- fire
- bomb threat
- terrorism
- personal accidents
- chemical spills
- major steam leaks
- major water leaks and flooding
- natural disasters
- oil spills

Appropriate emergency response measures include one or more of the following:

- identification of emergency
- isolation of heat source
- selection and application of appropriate fire-fighting equipment and PPE
- notification of downstream users
- operation of boiler only when safe to do so
- notification of appropriate regulatory authorities, including Commonwealth, state, territory and boiler manufacturer

Shutdown includes:

- checks of water level
- cooling down process
- valve settings
- equipment isolation
- boiler pressure/vacuum
- fuel/heat source isolation in accordance with manufacturer recommendations

- boiler post-purge

Storage mode includes:

- wet and dry storing
- open or closed position

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSABLIC001 Licence to operate a standard boiler.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMBLIC001 Licence to operate a standard boiler

Modification History

Release 1. Supersedes and is equivalent to MSABLIC001 Licence to operate a standard boiler.

Performance Evidence

Evidence of competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include demonstration of:

- following work instructions, SOPs and safe work practices
- complying with Commonwealth, state and territory work health and safety (WHS) legislation and regulations
- complying with Australian and industry standards, organisation workplace standards, policies and relevant codes of practice requirements at all times
- planning and preparing for work, including identifying potential hazards and implementing appropriate risk control measures
- identifying the type of standard boiler
- reading and interpreting maintenance records, operating logs and safety data sheets (SDS)
- conducting the appropriate pre-start up checks, including identifying all maintenance requirements and visual faults
- using appropriate tools, equipment and PPE in accordance with procedures
- completing all maintenance and rectification requirements in accordance with manufacturers' and workplace procedures, including recording/reporting requirements
- completing the start-up procedures and bringing the boiler online
- monitoring the boiler, including conducting relevant tests and activities and adjusting boiler water quality in accordance with procedures
- interpreting boiler operation tables and figures
- communicating handover of boiler status to appropriate personnel
- demonstrating emergency operating procedures
- identifying all boiler energy sources required to be isolated and made safe for maintenance, inspection and repairs
- applying boiler cleaning and storage techniques.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of PPE
- Commonwealth, state and territory WHS/OHS legislation and approved codes of practice relevant to standard boiler operation

- Australian and industry standards relevant to standard boiler operation
- basic principles of heat transfer and thermodynamics in relation to boiler operations
- boiler steam equipment operating principles and operating methods
- types and characteristics of feedwater systems and treatment
- types and use of equipment and fittings for operation and maintenance of boilers
- function, purpose and operation of main steam stop valve
- boiler auxiliary equipment characteristics and capabilities
- essential fittings required where more than one boiler is installed (e.g. battery of boilers)
- processes for confirming operational status of a boiler
- workplace communication techniques and procedures
- responsibilities for checking and testing boilers
- location and inspection procedures and techniques for inspection and explosion doors
- steam and boiler hazards for cold start and handover
- hierarchy of risk control
- type and limitations of corrective action and/or adjustments that can be made in response to routine boiler operation problems and emergencies
- various harmful energy sources in boiler operation and the means to effectively isolate these energy sources and make them safe
- modes of boiler storage and procedures for storing boiler in open or closed condition
- SDS and safe chemical handling and storage methods for boiler operation and cleaning
- procedures for cleaning boilers internally and externally, as required
- procedures for recording, reporting and maintenance of workplace records and information.

Assessment Conditions

- Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessments must be conducted in the English language.
- Where possible, assessment of performance should be undertaken in the workplace and/or under realistic workplace conditions that typically reflect:
 - the use of full-scale equipment
 - performing tasks/activities within timelines that would be expected in a workplace
 - standard and authorised work practices, safety requirements and environmental constraints.
- Where this is not possible or where personal safety, plant operation or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

- Accredited assessors are responsible for ensuring that candidates have access to all tools, equipment, PPE, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively find out current resource use and carry out improvements, in own work area, including those that reduce the negative environmental impacts of work practices.

This unit of competency applies to operators/team members who are required to follow procedures to work in an environmentally sustainable manner. This maximises the environmental performance of the process and the organisation, ensures regulatory compliance, and aims to minimise environmental risks and impacts.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be contextualised for the industry sector, organisation and section.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

HSE

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify current resource use and environmental issues	1.1	Identify workplace environmental and resource efficiency issues
		1.2	Identify resources used in own work role
		1.3	Find out current usage of resources
2	Comply with environmental regulations	2.1	Read and follow environmental policies and procedures to ensure compliance with federal, state/territory and local government laws, by-laws, regulations and mandated codes of practice, and codes and standards that the organisation applies voluntarily
		2.2	Ask questions and seek clarification relating to environmental work requirements
		2.3	Identify incidents, including breaches or potential breaches of environmental regulations and occurrences outside of standard procedures, and report to appropriate personnel
		2.4	Report environmental incidents using workplace forms and procedures
3	Seek opportunities to improve environmental practices and resource efficiency	3.1	Follow workplace procedures to improve environmental practices and resource efficiency
		3.2	Make suggestions for improvements to environmental workplace practices and work plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Environmental and resource efficiency issues

Environmental and resource efficiency issues include minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient

production and consumption of natural resources. They include one or more of the following:

- minimisation of waste through implementation of the waste management hierarchy
- contribution to climate change and other macro threats that can arise from materials and work processes used
- efficient and effective use of energy and other resources
- seeking alternative sources of energy
- efficient use of materials and appropriate disposal of waste
- use of controls to minimise the risk of environmental damage from hazardous substances
- efficient water use
- reducing emissions
- life cycle analysis applied to issues, such as energy supply, materials, transport and production

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and must include the ability to:

- find out resources used in own job, including one or more of:
 - making simple measurements, consistent with the job
 - counting the number of items entering/leaving a work area
 - reading indicators in the work area
 - obtaining relevant information from support personnel
- follow environmental policies and identify potential breaches of environmental regulations
- suggest improvements within the limit of own authority.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- a basic understanding of:
 - sustainability
 - the contribution to climate change and other macro threats that can arise from materials and work processes used
- the environmental hazards/risks, resource use and inefficiencies associated with own workplace and job
- the relevant environmental and resource efficiency policies and procedures for own work area
- the impact of laws and regulations at a level relevant to the work context.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor /third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- will typically include the use of appropriate tools, equipment and documents
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Investigate current practices in relation to resource usage	1.1	Identify environmental regulations applying to the enterprise
		1.2	Assess procedures for assessing compliance with environmental regulations
		1.3	Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required
		1.4	Measure and record current resource usage by members of the work group
		1.5	Analyse and record current purchasing strategies
		1.6	Analyse current work processes to access information and data, and assist in identifying areas for improvement
2	Set targets for improvements	2.1	Seek input from stakeholders, key personnel and specialists
		2.2	Access external sources of information and data as required
		2.3	Evaluate alternative solutions to workplace environmental issues
		2.4	Set efficiency targets
3	Implement performance	3.1	Source and use techniques/tools to assist in achieving targets

	improvement strategies	3.2	Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management
		3.3	Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them
		3.4	Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate
		3.5	Implement costing strategies to fully value environmental assets
4	Monitor performance	4.1	Document outcomes and communicate reports on targets to key personnel and stakeholders
		4.2	Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance
		4.3	Set new targets and investigate and apply new tools and strategies
		4.4	Promote successful strategies and reward participants where possible

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Links

Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
 - contribution to climate change and other macro threats that can arise from materials and work processes used
 - regulated environmental issues
 - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - will typically include the use of appropriate tools, equipment and documents

- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMOPS101 Make measurements

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements

Application

This unit of competency covers the skills and knowledge required to use physical and/or chemical measuring equipment to make or take routine measurements and keep records related to the measurements.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all routine measurements within manufacturing and similar environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Operations

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- | | | | |
|---|-----------------------------|-----|---|
| 1 | Identify appropriate | 1.1 | Select appropriate measuring equipment |
| | | 1.2 | Identify units of measurement to be used and the detail |

	measurements		required
		1.3	Check measuring equipment is in calibration
2	Perform measurements	2.1	Identify and take account of relevant external factors
		2.2	Perform measurements using appropriate techniques
		2.3	Compare measurements against the range of expected results
		2.4	Self-check numerical information for accuracy and correctness
3	Record measurements as required	3.1	Accurately record the result in the appropriate format
		3.2	Record the result to the appropriate level of detail
4	Respond to routine problems in accordance with procedures	4.1	Recognise known problems that occur during the measurement
		4.2	Identify and take action on causes of routine problems
		4.3	Log problems as required
		4.4	Identify non-routine problems and report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Measuring equipment

Measuring equipment includes one or more of the following:

- gauges
- dip-sticks
- thermometers
- weighing scales
- length/thickness measuring devices

Measurements

Measurements include one or more of the following:

- extent
- dimension
- quantity
- mass
- capacity
- capability

Routine problems

Routine problems must be reported and corrective action taken according to relevant procedures.

Routine problems include one or more of the following:

- measuring instrument not fit for use (e.g. not within calibration)
- appropriate measuring device not available
- deviations from normal range of readings
- effect of temperature on material properties

Corrective actions Corrective actions include one or more of the following:

- reporting to an appropriate person
- taking action specified in the procedure

Appropriate personnel Appropriate personnel includes one or more of the following:

- supervisor
- more senior operator
- other designated personnel

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMOPS101 Make measurements

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- select appropriate measuring device
- check equipment is within calibration
- take accurate measurements
- check accuracy of own work and complete workplace forms
- report routine problems and take corrective action, where appropriate.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- basic units of measurement, such as
 - kilogram
 - metre
 - second
- types and application of measuring devices, including range of results that may be obtained
- the need for calibration
- methods of checking equipment is within calibration
- routine problems that may arise in the job/work environment and corrective action appropriate to the problem cause.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP102 Communicate in the workplace

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace

Application

This unit of competency covers the skills and knowledge required to receive, relay and record written and oral messages and to provide relevant information in response to requests within timelines.

This unit of competency applies to personnel who are required to communicate clearly and accurately to record messages, seek clarification, access needed information, relay information to other people and complete workplace documentation.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Receive and relay messages	1.1	Confirm understanding of the message is correct
		1.2	Accurately record the message

- | | | | |
|---|---|-----|---|
| | | 1.3 | Relay message accurately to appropriate person or section within designated timelines |
| 2 | Interpret messages | 2.1 | Clarify message if necessary |
| | | 2.2 | Take appropriate action |
| | | 2.3 | Respond to communication problems |
| 3 | Respond to request for information | 3.1 | Acknowledge and understand the request for information |
| | | 3.2 | Access information from appropriate sources |
| | | 3.3 | Relay information to appropriate person or section in a manner appropriate for the receiver |
| 4 | Complete workplace forms | 4.1 | Select appropriate form |
| | | 4.2 | Assemble information required for form |
| | | 4.3 | Complete workplace forms as required |
| | | 4.4 | Submit workplace forms as required |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Messages

Messages may be in any format, including:

- written
- oral
- electronic

Messages may be any combination of simple:

- words
- numbers
- workplace signs

Equipment

Equipment includes one or more of the following:

- telephone
- two-way radio
- computer, tablet, Smartphone or similar

Sources of information

Sources of verbal information include one or more of the following:

- toolbox talks
- team meetings and production meetings
- shift handover
- planning sessions
- discussion with technical experts, supervisors and work health and safety (WHS) officers

Sources of written material include one or more of the following:

- standard operating procedures (SOPs)
- work instructions
- incident procedures
- operating manuals
- quality procedures
- training program contents/materials
- material safety data sheets (MSDS)
- job cards
- maintenance logs
- non-compliance reports
- incidence and accident reports
- permits
- schematics, process flows and engineering drawings

Routine problems Routine problems must be reported and corrective action taken according to relevant procedures.

Routine problems include one or more of the following:

- missing/lost messages
- required information not available
- required equipment not available
- conflict of work priorities

Corrective actions Corrective actions include one or more of the following:

- reporting to an appropriate person
- taking action specified in the procedure

Appropriate personnel Appropriate personnel include one or more of the following:

- supervisor
- more senior operator
- other designated personnel

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMSUP102 Communicate in the workplace

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- listen attentively
- formulate questions to clarify work requirements or instructions
- read and interpret workplace information
- complete workplace forms
- write legibly and/or use electronic keyboard
- record and interpret numbers, codes and symbols
- use clear and concise language in verbal and written communication.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
 - telephone and communications protocols and/or procedures
 - documentation and record keeping
 - safety, emergency and hazard control
- types and meaning of workplace codes, numbers, symbols, signs and colours typically used in the job/work environment
- types, purpose and importance of workplace documentation
- workplace expectations for acceptable language and tone (swearing, level of formality, courteousness, respect for diversity, and so on)
- challenges in communicating with people from culturally and linguistically diverse (CALD) backgrounds in the workplace and possible strategies.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will use one or a combination of:

- totally off the job, in which case it will use case studies and role plays as well as questions
- evidence drawn totally from performance in the workplace
- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP106 Work in a team

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team

Application

This unit of competency covers the skills and knowledge required to organise own activities within a team to fit with work schedules and to meet operational guidelines.

This unit of competency applies to team members who are required to use interpersonal and communication skills to plan, organise and complete their work activities according to instructions and with limited discretionary powers.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify work activities	1.1	Identify task requirements of the team
		1.2	Identify own tasks that are part of the team requirement

- | | | | |
|---|---------------------------------|-----|---|
| | | 1.3 | Prioritise team and individual activities as directed |
| 2 | Organise daily work plan | 2.1 | Break work activities down into small achievable components |
| | | 2.2 | Record activities as required by procedures |
| | | 2.3 | Seek assistance from other team members when difficulties in achieving allocated tasks arise |
| 3 | Participate in a team | 3.1 | Use communication and interpersonal skills appropriate to the effective teamwork of the shift/crew/section within the workplace |
| | | 3.2 | Acknowledge information and feedback provided by other team members in work group |
| | | 3.3 | Acknowledge team roles and support team members in achieving their role |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Communication and interpersonal skills

Communication and interpersonal skills include one or more of the following:

- listening and seeking clarification
- seeking assistance if needed
- accepting feedback
- providing information and support
- acknowledging team roles
- giving constructive feedback
- respecting the views and needs of others
- negotiating agreement on roles, tasks and plans

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMSUP106 Work in a team

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- identify own tasks within team requirements
- identify components of tasks
- plan, prioritise and organise activities in accordance with instructions
- use communication and interpersonal skills with team members, team leaders and supervisors
- complete workplace records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
 - relevant procedures
 - record keeping requirements
- own role in team and meeting team requirements and the role of other team members, team leaders and supervisors
- company work standards and how the team contributes to them
- interpersonal/communication techniques that promote effective teamwork.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will use one or a combination of:
 - totally off the job, in which case it will use case studies and role plays as well as questions
 - evidence drawn totally from performance in the workplace

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP382 Provide coaching/mentoring in the workplace

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP382A Provide coaching/mentoring in the workplace

Application

This unit of competency covers the skills and knowledge required to establish and provide one-to-one coaching/mentoring in the workplace and evaluate its effectiveness.

This unit of competency applies to senior operators, team leaders and similar who have significant workplace experience and who are required to provide coaching and mentoring within their area of expertise. They are required to use interpersonal skills to assist an employee to identify and meet their development needs.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments in manufacturing and related industries and their supply chain and includes the coaching/mentoring for any skills required within these environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Establish coaching/mentoring relationship	1.1	Identify areas for development in line with organisation and individual's requirements
		1.2	Use effective communication styles to develop trust, confidence and rapport
		1.3	Discuss and clarify expectations and goals
		1.4	Agree together on how the relationship will be conducted
		1.5	Seek input from other relevant personnel, if required
2	Provide coaching/mentoring support	2.1	Assist the individual to identify and evaluate opportunities to achieve agreed goals/development activities
		2.2	Share personal experiences and knowledge with the individual to assist in progress to agreed goals/development
		2.3	Provide a supportive environment to allow the individual to develop towards the achievement of goals
		2.4	Encourage the individual to make decisions and take responsibility for the courses of actions or solutions under consideration
		2.5	Monitor the relationship and progress of the individual
		2.6	Provide assistance and guidance in a manner which allows the individual to retain responsibility for achievement in their goals
		2.7	Identify problems inhibiting the individual from achieving their goals and take appropriate action

- | | | | |
|---|--|-----|---|
| 3 | Evaluate effectiveness of coaching/mentoring | 3.1 | Recognise and openly discuss changes in the coaching/mentoring relationship |
| | | 3.2 | Make adjustments to the relationship to take account of the needs of both the mentor/coach and the individual |
| | | 3.3 | Seek feedback from individual and other relevant personnel to identify and implement improvements |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Relationship Agreement on the conduct of the relationship includes consideration and resolution of:

- the amount of time involved for both parties
- confidentiality of information
- identification of development opportunities
- development plan towards achieving goals

Problems Problems inhibiting the individual from achieving their goals includes consideration and resolution of:

- interpersonal skills
- communication skills
- technical skills
- foundation skills

Assessment Requirements for MSMSUP382 Provide coaching/mentoring in the workplace

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP382A Provide coaching/mentoring in the workplace

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:
- use interpersonal skills to:
 - build rapport, trust and respect with individuals who have diverse work styles, aspirations, cultures and perspectives
 - facilitate identifying the individual's development goals
 - facilitate identifying solutions and actions
 - encourage and support the individual to develop towards the achievement of goals
 - assist the individual to make decisions about achieving goals
- select and use skills development techniques appropriate to individual's needs to convey workplace knowledge and experience
- evaluate outcomes of process to ensure the individual is achieving goals
- explain workplace knowledge and experience clearly and concisely.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- types of interpersonal skills and application to coaching/mentoring, including:
 - building rapport, trust and respect
 - verbal and non-verbal communications
 - questioning, listening and reflecting
 - self-disclosure
 - giving and accepting feedback
 - establishing a safe environment for open communication
- relevance and application of skills development techniques, including:
 - one-on-one training using explanation and demonstration
 - use of supporting materials in written, visual or other format
 - facilitation/guidance of self-directed learning
 - identifying needs and setting goals
- sources of information for self-directed learning, including:
 - networking

- industry journals
- internet
- organisation knowledge/learning systems/databases
- relevant career paths and competency standards in the organisation.

Assessment Conditions

MSMSUP390 Use structured problem-solving tools

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem solving tools

Application

This unit of competency covers the skills and knowledge required to use structured process improvement tools to solve process and other problems.

This unit of competency applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit/equipment.

A 'problem' in this context should be interpreted as 'an opportunity for improvement', not just something causing faulty product, product faults or process irregularities/breakdowns.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

Problem-solving techniques are often applied as group processes. Where the competency is achieved in a group context the individual being assessed must meet all aspects of the competency.

This competency does NOT cover the planning and facilitation of group problem-solving activities.

Other units of competency, including MSMOPS units, may include a problem-solving element where problems specific to that competency are to be resolved. However, this unit of competency requires structured problem-solving techniques to be applied more broadly and/or with greater depth and rigour than is implied by the problem-solving element of the other units.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify the problem	1.1	Identify variances from desired operating/output parameters and quality
		1.2	Define the extent, cause and nature of the problem by observation and investigation
		1.3	State and specify the problem clearly
2	Determine fundamental cause of problem	2.1	Select problem-solving tool appropriate to the problem and the context
		2.2	Identify possible causes based on experience and the use of problem-solving tools/analytical techniques
		2.3	Develop possible cause statements
		2.4	Determine fundamental cause
3	Determine corrective action	3.1	Consider all possible options for resolution of the problem
		3.2	Consider strengths and weaknesses of possible options

- 3.3 Determine corrective action to remove the problem and possible future causes
 - 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures
 - 3.5 Develop recommendations for ongoing monitoring and testing
- 4 **Communicate recommendations**
- 4.1 Prepare report on recommendations
 - 4.2 Present recommendations to appropriate personnel
 - 4.3 Follow up recommendations if required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Problem-solving tools/ analytical techniques

Problem-solving tools/analytical techniques include one or more of:

- basic techniques:
 - 5 why's
 - brainstorming
 - 6 hats (Edward de Bono)
 - similarity/difference analysis
- visual techniques:
 - Ishikawa/fishbone diagrams
 - logic tree
 - histograms/Pareto analysis
 - scattergrams
- process-based tools:
 - flow charts
 - process logic/process requirements
 - cause and effect diagrams/charts
 - divide and conquer
 - control charts and run charts (Shewhart charts)
- business/interpersonal techniques:
 - force field analysis
 - strengths, weaknesses, opportunities, threats (SWOT) analysis
 - plan, do, check, act (PDCA)/define, measure, analyse, improve, control (DMAIC)
- other structured processes defined in organisation procedures, (e.g. TapRoot)

- Corrective actions** Corrective actions will include one or more of the following:
- consideration of at least two alternative solutions
 - benefit-cost analysis (at least semi-quantitative, need not be in \$ terms)
 - health, safety and environment (HSE) impacts and controls
 - risk assessment (HSE, business and project)
 - determination of the preferred solution or a priority ranked shortlist
- Implementation plans** Implementation plans to solve problems will include:
- specific, measurable, achievable, relevant, timed (SMART) objectives
 - resource requirements (people, finances, plant/equipment, materials/consumables, time, skills and knowledge)
 - methods for reaching objectives
 - timelines
 - methods of checking and adjusting adherence to plan (e.g. communication and follow-up)
- Problems** A ‘problem’ in this context should be interpreted as ‘an opportunity for improvement’, not just something causing faulty product, product faults or process irregularities/breakdowns and will include one or more of the following:
- intractable process difficulty
 - observed process waste/inefficiency (‘Muda’)
 - issue with materials/components
 - procedures/practices/process conditions which might be improved

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem solving tools

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMSUP390 Use structured problem-solving tools

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem solving tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- identify at least one (1) problem
- analyse problem using at least one (1) analysis tool drawn from each of two (2) different groups of tools (basic, visual, process, business and organisation specific)
- select the preferred solution
- develop and use an implementation plan
- communicate effectively with other personnel.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools/analytical techniques
- relevant equipment and operational processes.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on the significance of the problem being addressed. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMWHS200 Work safely

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely

Application

This unit of competency covers the skills and knowledge required to apply workplace policies and procedures to maintain a safe work environment for self and others.

The unit of competency covers identifying work health and safety (WHS) hazards, assessing risk and following safety procedures in the workplace with minimal supervision.

Compliance with legislative requirements and duty of care are embedded in this unit through workplace instructions and procedures. Workers will be provided with clear directions, information, instruction, training and appropriate supervision regarding the relevant state/territory WHS legislation, codes of practice, relevant industry standards, workplace procedures and work instructions.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No other licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Work health and safety

Unit Sector

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes	demonstrate achievement of the element
1 Identify hazards and assess risk	<ul style="list-style-type: none"> 1.1 Identify hazards in the work area before and during work 1.2 Access and apply relevant material safety data sheets (MSDS) 1.3 Assess risks for the identified hazards 1.4 Identify controls for these hazards from procedures 1.5 Review effectiveness of controls within the scope of authority 1.6 Identify and report remaining risk
2 Follow procedures for risk control	<ul style="list-style-type: none"> 2.1 Control risks when working under minimal supervision by following workplace procedures 2.2 Follow safety signs and other safety indicators/zones 2.3 Select, use and maintain relevant personal protective equipment (PPE) 2.4 Handle and store items/materials relevant to job safely
3 Follow emergency procedures	<ul style="list-style-type: none"> 3.1 Recognise emergency situations 3.2 Take appropriate initial emergency action 3.3 Follow procedures for dealing with a range of site/plant emergencies
4 Initiate suggestions to enhance task/job-specific safety	<ul style="list-style-type: none"> 4.1 Raise WHS issues with designated personnel in accordance with workplace procedures and relevant requirements of WHS legislation 4.2 Contribute to participative arrangements for WHS management in the workplace within organisation procedures and the scope of responsibilities and competencies

- | | | |
|---|--|---|
| | 4.3 | Provide input to minimise hazards in work area in line with organisation WHS procedures |
| | 4.4 | Provide input to opportunities for development of work group's competencies in relation to WHS |
| | 4.5 | Support the implementation of procedures to control risks using the hierarchy of control and in accordance with organisation procedures |
| | 4.6 | Report to appropriate people in accordance with workplace procedures when non-routine hazards arise |
| 5 | Apply knowledge of WHS legislation and the organisation WHS policies and procedures | |
| | 5.1 | Follow workplace procedures to achieve a safe working environment in accordance with all relevant WHS legislation/regulation, including codes of practice relating to particular hazards within the workplace or industry |
| | 5.2 | Identify the rights and responsibilities of employees and employers under the relevant WHS legislation |
| | 5.3 | Complete (personally or with assistance) hazard, accident or incident reports as required by workplace procedures and relevant sections of WHS legislation/regulation |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the

- framework** local regulatory authority, must be used, and include one or more of the following:
- legislative requirements, including work health and safety (WHS)
 - industry codes of practice and guidelines
 - environmental regulations and guidelines
 - Australian and other standards
 - licence and certification requirements
- Procedures** All operations must be performed in accordance with relevant procedures.
- Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:
- emergency procedures
 - work instructions
 - standard operating procedures (SOPs)
 - safe work method statements (SWMS)
 - temporary instructions
 - any similar instructions provided for the smooth running of the plant
- Hazards** Hazards include one or more of the following:
- smoke, darkness and heat
 - heat, smoke, dust or other atmospheric hazards
 - electricity
 - gas
 - gases and liquids under pressure
 - structural hazards
 - structural collapse
 - equipment failures
 - industrial (machinery, equipment and product)
 - equipment or product mass
 - noise, rotational equipment or vibration
 - limited head spaces or overhangs
 - working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
 - fire and explosion
 - flammability and explosivity
 - hazardous products and materials
 - unauthorised personnel
 - sharp edges, protrusions or obstructions

- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Equipment and PPE

Equipment and PPE include one or more of the following:

- hard hats
- goggles/glasses/face shields
- hearing protection (ear muffs and plugs)
- dusk masks/canister masks/self-contained breathing apparatus(SCBA)/ long-range breathers
- gloves/gauntlets
- safety boots
- antistatic equipment
- overalls/aprons/acid jackets/pants
- handling aids
- other safety equipment

Appropriate personnel

Appropriate personnel include one or more of the following:

- employer
- supervisor
- employees elected as WHS representatives
- other personnel with WHS responsibilities

Recognising emergency situation

Emergency situations will be recognised from one or more of the following:

- visual (e.g. flashing lights)
- auditory (e.g. alarms)
- communication systems (e.g. radios and announcements)
- any other obvious mechanisms used in the workplace

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMWHS200 Work safely

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- identify hazards
- follow procedures to:
 - assess risks associated with the hazards
 - identify and apply standard controls
 - check that controls are in place and operational
 - select and use personal protective equipment (PPE)
- identify and interpret signs and symbols, including emergency alarms
- correctly handle and store items/materials relevant to job
- interpret and apply relevant material safety data sheets (MSDS).

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational work health and safety (WHS) procedures, including procedures for reporting WHS problems and taking action
- rights and responsibilities of employees and employers under the relevant WHS legislation
- hazards that may arise in the job/work environment, including:
 - their possible causes
 - potential consequences
 - appropriate risk controls
- hierarchy of control
- types and application of PPE
- hazard and emergency signs, labels and alarms
- appropriate responses to non-standard situations.

Assessment Conditions

- Competency must be achieved before performing this work unsupervised. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
 - must include the use of appropriate safety gear and systems requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMWHS503 Maintain WHS management system

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS503A Maintain the workplace OHS management system

Application

This unit of competency covers the skills and knowledge required to maintain and improve an established work health and safety (WHS) management system.

The WHS management system will already have been developed by persons with the relevant specialist knowledge and skills.

This unit of competency applies to personnel with a specialised responsibility for maintaining the WHS management system. Depending on the organisation this might be an owner, manager, team leader, WHS officer/manager, a technician with particular WHS responsibilities, or someone in a similar role. The competency applies within the area of managerial responsibility, which may be an entire organisation or department of an organisation.

The work will be carried out with the support of other team members.

Management must be aware that, while employees have WHS responsibilities, line managers are ultimately responsible, under both WHS legislation and common law duty of care, for the safety of the workplace, including ensuring that employees comply with documented work procedures. This legislation includes general WHS legislation as well as that for hazardous substances, dangerous goods and major hazard sites.

No other licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Work health and safety

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element
1 Manage WHS information in the workplace	1.1 Take action to ensure that requirements for WHS record keeping and reporting are implemented according to workplace procedures and legislative requirements 1.2 Access sources of WHS information and evaluate for application to the workplace 1.3 Collect and collate data and information to provide information to managers and stakeholders on WHS requirements, trends and risk controls
2 Support implementation of WHS management system	2.1 Determine WHS priorities in consultation with appropriate managers and stakeholders 2.2 Identify WHS training needs for implementation and maintenance of the WHS management system 2.3 Develop action plans taking account of priorities and training needs 2.4 Monitor achievement of action plans and update plans accordingly
3 Support WHS participative arrangements	3.1 Ensure WHS information and documentation is understandable and accessible to all 3.2 Promptly address WHS issues that may arise within area of authority or refer to appropriate person 3.3 Provide information about the outcomes of WHS consultation in a manner that is accessible to all
4 Collect data to evaluate currency	4.1 Identify, in consultation with stakeholders and, as required expert advisors, internal data and information

	of WHS management system		that provides relevant and reliable information on the performance of the WHS management system
		4.2	Conduct workplace inspections on a regular basis.
		4.3	Identify workplace WHS implications of any changes to legislation
		4.4	Identify any WHS implications to proposed changes to the workplace
		4.5	Take action to arrange a WHS management system audit
5	Analyse data and information to identify areas for improvement	5.1	Assess compliance of WHS management system with WHS legislation
		5.2	Analyse information collected to identify areas for improvement.
		5.3	Consult with stakeholders, key personnel and, as required, WHS advisors
		5.4	Document and communicate outcomes of analysis to key personnel and stakeholders in an easily understood format
		5.5	Recognise limits of own expertise and seek appropriate advice
6	Initiate and maintain improvements	6.1	Determine priorities for WHS in consultation with stakeholders
		6.2	Develop a WHS plan with responsibilities and timeframes and validate the plan with stakeholders
		6.3	Identify and source resources required for implementation of plan
		6.4	Monitor achievement against plan
		6.5	Monitor effectiveness of modifications to WHS management system on an ongoing basis incorporating feedback from stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

WHS records WHS records include one or more of the following:

- hazard and incident reports
- logs/logs sheets
- inspection/start-up/shutdown checklists
- injury reports
- maintenance records

**WHS
information
sources**

WHS information sources include one or more of the following:

- WHS legislation, codes of practice and Australian and International standards
- WHS regulators
- Safe Work Australia Guides
- industry bodies
- internet sites, journals and newsletters
- manufacturer manuals
- material safety data sheets (MSDS) and registers
- organisation WHS policies and procedures
- internal risk assessments, job safety analyses (JSAs) and workplace inspections
- internal hazard and incident reports

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOHS503A Maintain the workplace OHS management system

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMWHS503 Maintain WHS management system

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS503A Maintain the workplace OHS management system

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to:

- communicate using appropriate style and format for a range of stakeholders to:
 - evaluate the WHS management system
 - provide information on the effectiveness of the WHS management system in minimising risk
 - identify, plan, implement and monitor improvements
 - convey WHS and other complex/technical information
 - consult and seek input/feedback
 - interact with the workforce to maintain the process that comprise the WHS management system
- analyse WHS data to identify areas for improvement
- create and manage documentation, including:
 - WHS records
 - minutes of meetings and consultations
 - workplace inspection checklists, audits and reports
- write clearly and unambiguously, including:
 - reports
 - policies and procedures
 - WHS information
- develop WHS management system improvement plans
- apply a quality improvement process to implement and monitor improvements
- identify WHS training needs.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to fulfil their job role, including:

- WHS responsibilities of employers, employees, supervisors and contractors, including duty of care responsibilities

- regulatory requirements for WHS information and consultation and processes and arrangements to meet these obligations
- regulatory requirements for WHS record keeping and reporting
- regulatory requirements for training and licensing relevant to WHS
- elements of a WHS management system and principles and practices of effective WHS management and risk control
- barriers to implementation of WHS, including language and literacy, cultural diversity of workforce and workplace culture in relation to WHS
- sources and types of information that provide realistic information on the performance of the WHS management system
- techniques for analysing WHS data, including simple statistical analysis and graphing of trends
- types of internal and external change that may impact on WHS and WHS compliance
- audit and inspection processes.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS402010 Manage the impact of change on own work

Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Application

This unit of competency covers the skills and knowledge required by an individual to effectively manage the changes in their own work resulting from their organisation's implementation of competitive systems and practices.

This unit applies to an individual in an organisation implementing competitive systems and practices that affect the individual's own work. The unit includes the skills required to positively participate in ongoing and continuous change as it affects their work. The individual will be expected to deal with these changes as part of a team and to give feedback from their own perspective.

This unit requires the application of skills associated with problem solving, planning and organising and self-management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Examine the impact of change on own work practices	<p>1.1 Identify competitive systems and practices relevant to changes in own work.</p> <p>1.2 Examine changes to work flow.</p> <p>1.3 Examine changes to equipment/process/physical environment.</p> <p>1.4 Examine changes to work relationship with team members and other teams.</p> <p>1.5 Examine changes to data collection needs.</p> <p>1.6 Examine changed work for impacts on health, safety and environment (HSE).</p> <p>1.7 Examine changes to quality requirements.</p> <p>1.8 Identify any additional individual skill needs.</p> <p>1.9 Identify other areas requiring assistance.</p>
2	Implement change	<p>2.1 Review changes which may have an adverse impact with team leader.</p> <p>2.2 Adopt changes to individual work practice.</p> <p>2.3 Seek assistance in gathering/processing data, as required.</p> <p>2.4 Implement the data collection/processing and take actions on resulting information in accordance with procedures.</p> <p>2.5 Seek assistance/training to meet needs caused by change.</p>
3	Implement continuous improvement	<p>3.1 Critically examine all changes.</p> <p>3.2 Identify impacts of changes both up and down the immediate value stream.</p>

- 3.3 Identify areas for improvement.
- 3.4 Make recommendations for improvement in accordance with procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Impact of change

- elements being undertaken individually or as part of a team

- may include one or more of:**
- seeking assistance from team leaders for areas outside the employee's range of responsibility and authority.
- Procedures (written, verbal, visual, computer based, etc.) include one or more of:**
- work instructions
 - standard operating procedures (SOPs)
 - safe work method statements
 - formulas/recipes
 - batch sheets
 - temporary instructions
 - any similar instructions provided for the smooth running of the plant.
- Gathering and monitoring performance data include one or more of:**
- manual gathering by individual employees through charts, tally sheets or keypad/board entry
 - automatic collection through software, such as SCADA software, ERP systems, MRP and proprietary systems.
- Continuous improvement (kaizen) includes evaluation of one or more of:**
- time required
 - resources used
 - resultant quality
 - other aspects relevant to the process.
- Stages where value stream actions may occur include one or more of:**
- sales outlet/representative
 - information gathering, data analysis and research
 - product design
 - raw material sourcing
 - intermediate processing
 - final assembler/collation/preparation
 - support services (e.g. accounting, finance and legal)
 - storage and delivery to customer
 - after market support.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSS402010 Manage the impact of change on own work

Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices used in their own workplace
- identify change and its impact on own work practices in relation to implementation of competitive systems and practices
- adopt change and seek any required assistance
- identify areas for improvement.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision:

- features of common competitive systems and practices in use in own workplace
- sources of data on the process/plant
- methods of determining own skill needs
- health, safety and environment (HSE) principles relevant to own job
- change implementation contacts and procedures
- employee assistance mechanisms within organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include evidence of responding to change in own workplace

- will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including, relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402030 Apply cost factors to work practices

Modification History

Release 1. Supersedes and is equivalent to MSS402030A Apply cost factors to work practices

Application

This unit of competency covers the skills and knowledge required by an individual to identify cost components in their work and to be able to determine, in general terms, the cost impacts of alternative actions.

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

The unit covers the skills to be able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify the major cost components of product or process in own work area	1.1	Identify cost components in the product or process in own work area.
		1.2	Recognise the impact of current or alternative actions on costs.
2	Identify constraints to cost-efficiency	2.1	Identify required production/process rate and major costs.
		2.2	Identify costs factors under individual or team control.
		2.3	Relate identified costs factors to impact on overall cost of production/process.
		2.4	Identify cost factors that are a constraint to cost-efficiency in own work area.
3	Apply cost-efficient work practices	3.1	Identify and explain to relevant people the implications of possible actions/changes to improve cost-efficiency in simple financial terms.
		3.2	Identify non-financial implications of proposed changes in discussion with relevant people.
		3.3	Select actions which minimise overall costs.
		3.4	Monitor actions to ensure cost-efficiency in own work area is maintained.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just in Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving
 - run charts
 - standard procedures
 - current reality tree.
- Cost components include all of:**
- fixed and variable costs, such as power/energy, materials, plant and equipment, production or process time, including impact of salary and wages
 - office expenses, such as telephone and internet
 - government taxes and charges.
- Process includes one or more of:**
- production
 - maintenance
 - logistics
 - office
 - other support processes in an organisation.
- Overall cost includes all of:**
- the assessment of negative and positive financial implications
 - negative long-term issues, such as work health and safety (WHS), environmental and regulatory issues.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402030A Apply cost factors to work practices

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSS402030 Apply cost factors to work practices

Modification History

Release 1. Supersedes and is equivalent to MSS402030A Apply cost factors to work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, on one (1) or more occasions to use cost factors in making a decision related to their workplace, and to:

- identify major cost components
- distinguish components which they can control from those they can't
- make decisions which minimise overall cost and explain these to stakeholders.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- concepts of expense, income and capital
- fixed and variable cost components relevant to own work:
 - power/energy
 - materials, plant and equipment
 - production or process time, including impact of salary and wages
 - office expenses
 - government taxes and charges
- relative impact of each of these
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment will use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402031 Interpret product costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements

Application

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to *MSS402030 Apply cost factors to work practices*, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify cost components deriving from customer benefit and other costs	1.1	Identify customer features/benefits in product or process being undertaken.
		1.2	Identify cost components which deliver customer features/benefits and those which do not.
2	Compare required performance of product or process steps with actual performance	2.1	Identify performance required to meet customer needs in own work and that of team.
		2.2	Identify actual performance.
		2.3	Compare cost components of products or process with current customer-related targets.
		2.4	Separate costs components into those that contribute to customer features/benefits and those that do not.
		2.5	Determine non-contributing cost components which are under control of the individual or team.
3	Minimise waste	3.1	Recommend changes to eliminate or reduce waste.
		3.2	Adopt changes which minimises waste.
		3.3	Monitor effect of changes to ensure gains are made against customer features/benefits.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just In Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving
 - run charts
 - standard procedures
 - current reality tree.

- Customer features/benefits include all of:**
- characteristics of the product or service which the customer perceives as meeting their need
 - characteristics of the product or service which the customer perceives as adding value
 - financial or features items which the customer perceives and a benefit.

- Performance includes all of:**
- takt - the allowable time to produce one product at the rate and quality customers are demanding it
 - the rate of output of the plant compared to the takt time.

- Customer-related**
- internally set financial targets that contribute to meeting customer

- targets includes all of:**
- features/benefits
 - operational targets that contribute to meeting customer features/benefits
 - other targets that contribute to meeting customer features/benefits.
- Contributing cost components include all of:**
- costs that make a direct contribution to customer features/benefits.
 - costs that need to be incurred (although they may be minimised) in order to gain the customer feature/benefit.
- Non-contributing cost components include all of:**
- costs that do not contribute to customer features/benefits
 - costs that must be maintained, such as regulatory compliance costs which do not contribute to customer features and so should be minimised
 - costs that neither contribute to customer features/benefits nor must be maintained (muda) and so should be eliminated if possible.
- Muda (waste) includes all of:**
- any activity which does not contribute to customer or organisation benefit/features in the product
 - activities which do not yield any benefit to the organisation or any benefit to the organisation's customers
 - excess production and early production
 - delays
 - movement and transport
 - poor process design
 - inventory
 - inefficient performance of a process
 - making defective items.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements

Links

Assessment Requirements for MSS402031 Interpret product costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, on one (1) or more occasions to recommend muda reduction related to their workplace, and to:

- identify and distinguish between cost components leading to customer benefit or otherwise
- take steps to minimise muda in their workplace.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- contributions towards customer perceived benefit
- concepts of expense, income and capital
- fixed and variable cost components relevant to own work:
 - power/energy
 - materials, plant and equipment
 - production or process time, including impact of salary and wages
 - office expenses
 - government taxes and charges
- relative impact of each of these
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

- multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402051 Apply quality standards

Modification History

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

Application

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Assess own work**
 - 1.1 Continuously check completed work against workplace standards relevant to the operation being undertaken.
 - 1.2 Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned.
 - 1.3 Identify and isolate faulty components, products or processes.
 - 1.4 Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures.

- 2 **Assess quality of received components, parts or materials**
 - 2.1 Continuously measure/check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance.
 - 2.2 Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service.
 - 2.3 Identify and isolate faulty components, parts, materials or information that relate to the operator's work.
 - 2.4 Record and/or report faults and any identified causes in accordance with workplace procedures.
 - 2.5 Identify causes of any identified faults and take corrective action as specified in workplace procedures.

- 3 **Investigate causes of quality deviations**
 - 3.1 Record information on quality and other indicators of process performance.
 - 3.2 Investigate and report causes of deviations from specified quality standards for components.
 - 3.3 Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Quality parameters include one or more of:

- finish
- size
- durability
- product or process variations
- materials
- alignment
- colour
- damage and imperfections

- time
- is complete/contains all required information/data
- complies to template
- uses the correct styles and formats.

Quality checks include one or more of:

- visual inspection
- physical measurements
- chemical tests
- checks against patterns, templates, styles, formats and guides
- processing time.

Materials include one or more of:

- physical raw materials
- orders, forms and other documentation
- services required for undertaking an operation (e.g. power, water, compressed air and fuel).

Procedures (written, verbal, visual, computer based, etc) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Indicators of production performance include one or more of:

- number of items/production rate
- delays and causes of delays (where known)
- other information as specified in the procedures.

Data entry/recording includes one or more of:

- keyboard
- written (including ticks or signs)
- verbal.

Sources of information/documents include one or more of:

- quality and Australian Standards and procedures
- work instructions, patterns, designs and recipes
- organisation work procedures
- manufacturer instructions for materials and equipment
- organisational or external personnel

- customer requirements.
- Investigate and report requires following set procedures which include one or more of:**
- verbal instructions
 - documented procedures
 - other quality procedures as implemented within an organisation or work environment.
- Workplace context includes one or more of:**
- work organisation procedures and practices relating to the manufacture and quality outcomes for products
 - conditions of service, legislation and industrial agreements, including:
 - workplace agreements and awards
 - federal or state/territory legislation
 - standard work practice.
- Reporting/communication includes one or more of:**
- verbal and written communication in accordance with organisational policies and procedures
 - oral, written or visual communication, including simple data.
- Being responsible for the maintenance of own work quality includes one or more of**
- contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures
 - following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation.
- Applicable regulations and legislation include one or more of**
- work health and safety (WHS) legislation relevant to workplace activities
 - workers compensation legislation.

Unit Mapping Information

Assessment Requirements for MSS402051 Apply quality standards

Modification History

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more products/processes, to:

- check and measure relevant quality parameters
- interpret results of quality checks in terms of specifications, patterns and work standards
- take required action where standards of materials, component parts, final product or work processes are found to be unacceptable
- maintain accurate records.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- relevant measurement techniques and quality checking procedures
- reporting procedures.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
 - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the application of quality standards to own workplace
 - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402080 Undertake root cause analysis

Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Application

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA). This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

This unit applies to individuals working in an organisation that is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|---|
| 1 | Recognise problems | 1.1 | Identify features or occurrences indicative of a problem. |
| | | 1.2 | Use appropriate tools, techniques and charts to define the problem. |
| 2 | Implement quick fix | 2.1 | Recommend a quick fix within the scope of competency and authority. |
| | | 2.2 | Use technology or processes relevant to the problem to implement quick fix. |
| 3 | Determine root cause | 3.1 | Identify a range of possible causes. |
| | | 3.2 | Gather data and other information to eliminate or confirm possible causes. |
| | | 3.3 | Use available data and information to link causes and effects. |
| | | 3.4 | Seek assistance to obtain additional information if problem is beyond own competency/authority. |
| | | 3.5 | Identify root cause. |
| 4 | Develop permanent solution | 4.1 | Identify a range of methods to eliminate the root cause or break the cause tree. |
| | | 4.2 | Select the most appropriate solution. |
| | | 4.3 | Liaise with relevant people. |
| | | 4.4 | Recommend or implement solution within the limits of competency and authority. |
| | | 4.5 | Monitor impact of solution and make further recommendations, as required. |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Problems include one or more of:

- variation to normal plant or equipment operation
- unplanned or non-conforming process or operations outcomes
- out of specification products
- excess scrap
- accidents and emergencies
- regulatory breaches
- customer returns and complaints
- reduction or loss of sales.

Techniques/charts include one or more

- control charts
- Pareto charts

- of:**
- run charts
 - flow charts
 - cause and effect diagrams
 - tree diagrams
 - 5 Whys analysis
 - organisation specified/mandated methods.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSS402080 Undertake root cause analysis

Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more problems, to:

- undertake problem identification
- use appropriate processes to achieve root cause identification
- recommend solutions and implementation procedures to problems within own area
- monitor implementation of solutions.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- methodology of root cause analysis, including:
 - difference between quick fix and root cause elimination
 - breaking of causal tree
- indicators of problems and variances to normal operation
- relevant analysis tools (e.g. Pareto charts, 5 Whys).

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
 - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include a root cause analysis in own workplace
 - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSTCL1001 Produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTCL1001B Produce a simple garment

Application

This unit of competency covers the skills and knowledge to assemble garment components using a domestic machine and operation techniques.

The unit of competency applies to selecting fabrics, laying up pattern pieces, and cutting and assembling garments in a non-commercial environment.

This unit of competency is designed for particular application in a highly supervised environment and is suitable for selection in vocational education and training (VET) in schools programs or where access to volume production and commercial machines and processes are not an option.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|--|-----|---|
| | requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to produce a simple garment | 2.1 | Select pattern according to size and style required |
| | | 2.2 | Select fabric to suit purpose and design of garment |
| | | 2.3 | Determine sequencing of garment assembly operations according to pattern requirements |
| | | 2.4 | Calculate fabric amount according to fabric width, pattern size and pattern requirements and document |
| | | 2.5 | Prepare workstation, tools and equipment |
| 3 | Prepare components | 3.1 | Lay out pattern pieces and pin or tack to make best use of fabric length and to match fabric pattern, nap and weave |
| | | 3.2 | Cut fabric according to seam allowances and pattern markings |
| | | 3.3 | Check cut pattern pieces against garment requirements and fabric characteristics, and make any required corrections |
| | | 3.4 | Lay out garment components according to sequence of assembly operations |
| 4 | Assemble garment components | 4.1 | Sew components according to workplace procedures, garment requirements and accepted quality standards |
| | | 4.2 | Control machine speed and work handling for type of sewing operations, fabrics and garment complexity |
| | | 4.3 | Check garment for correct fit and assembly quality |
| | | 4.4 | Sew components according to workplace procedures, |

garment requirements and accepted quality standards

- | | | | |
|---|----------------------|-----|---|
| 5 | Complete work | 5.1 | Complete any required hand sewing according to pattern requirements and accepted standards of sewing quality |
| | | 5.2 | Inspect sewn garment, identify any faults and take appropriate action to ensure it meets quality standards and pattern requirements |
| | | 5.3 | Press garment according to fabric requirements and garment construction details |
| | | 5.4 | Record outcome |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE requirements
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

- Simple garment includes one or more of the following:**
- accessories
 - straight seamed, draw string skirt
 - t-shirt
 - smock dress
 - headwear
 - other garments that require a small range of sewing techniques using domestic machines
- Prepare workstation tools and equipment includes the following:**
- setting up workbench and seating according to WHS practices
 - cleaning and checking machine to ensure correct operation
 - setting up and adjusting machine according to specifications
 - checking needles, attachments and parts
 - identifying, reporting and replacing worn needles or parts
 - regularly checking performance of machine for signs of faulty operation
 - taking required action according to defined procedures to address faults
 - identifying and preparing other equipment for production
- Fabric includes one or more of the following:**
- a range of fabric types, including cottons, woollens, synthetics, velvets, lace, stretch and single knits
 - single and multi-directional prints
 - interfacings and linings
- Patterns include one or more of the following:**
- commercially available patterns
 - stock patterns
 - individually drafted patterns
- Pattern markings include:**
- notches
 - darts
- Components include one or more of the following:**
- sleeves
 - waistbands (straight or shaped)

- collars
- cuffs
- plackets
- facings (neck and armhole)
- binds
- zips (dress, skirt, trouser and invisible)
- buttons and buttonholes
- hems (double fold, rolled, blind and stitched hem)

Machines include the following:

- domestic sewing machine
- overlocker

Set-up includes the following:

- correct thread, needle size and type, needle guard, tension setting and attachments

Other equipment includes one or more of the following:

- pins
- scissors
- needle and thread
- marker or chalk

Sewing operations include:

- positioning, feeding and handling of work pieces involving contouring, stopping or handling skills required to accommodate fabric variations
- gathering, easing and tucking

Hand sewing includes one or more of the following:

- attaching buttons and other closures
- attaching embellishments, such as beading, trims and badges
- hemming and overstitching
- embroidery

Unit Mapping Information

Assessment Requirements for MSTCL1001 Produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTCL1001B Produce a simple garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- preparing workstation, materials, tools and equipment
- interpreting commercially produced patterns to select appropriate fabric length and type
- laying up pattern piece and pinning or tacking to make best use of fabric length and to match fabric pattern, nap and weave
- cutting fabric according to seam allowances and pattern markings
- operating domestic sewing or overlocking machines to sew components to produce at least two (2) simple garments, according to workplace procedures, garment requirements and accepted quality standards
- completing any required hand sewing according to pattern requirements and accepted standards of sewing quality
- inspecting sewn garment, identifying any faults and taking appropriate action to ensure it meets quality standards and pattern requirements
- pressing garment according to fabric requirements and garment construction details
- recording outcome.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- techniques in using and maintaining domestic sewing machine and overlocker
- commercial pattern instructions and markings
- characteristics of a range of fabrics, including lace, woven and knitted fabrics and threads, such as denim, single knits, tricot and gabardine
- quality standards and practices
- sizing requirements
- sequence of operations for garment assembly
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in producing a simple garment, at least to the level being assessed, with relevant industry knowledge and experience.
- Where possible assessment must occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2001 Use a sewing machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2001B Use a sewing machine

Application

This unit of competency covers the skills and knowledge required to use a sewing machine to align and sew work pieces.

The unit of competency applies to sewing techniques where the positioning of the work is controlled by guide bars, sensor lights or other such guiding devices, or where there is uncomplicated feeding of the fabric.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to use sewing machine**
 - 2.1 Receive work pieces, check specification sheets and plan follow-up action
 - 2.2 Check that the bundle matches ticket information and that previous operations, such as pressing and cutting, have been successfully completed
 - 2.3 Lay out work pieces in sequence
 - 2.4 Set up workbench and seating according to workplace procedures
 - 2.5 Clean, check, set up and adjust machines according to specifications for work
 - 2.6 Identify poor machine performance and adjust as required

- 3 **Sew work pieces**
 - 3.1 Sew pieces according to product requirements and quality standards
 - 3.2 Use machine according to requirements for speed of work
 - 3.3 Control machine speed and work handling according to type of operations, fabrics and product type

- 4 **Assess quality of sewn pieces**
 - 4.1 Inspect sewn pieces against quality standards
 - 4.2 Identify any faults or pieces that do not meet quality standards and report
 - 4.3 Record results of quality inspection

- 4.4 Complete production records or packing slips as required
- 4.5 Direct work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include:

Automatic machines used to perform basic machining tasks where feeding and positioning of fabric is guided by the machine, including one or more of the following:

- plain lockstitch machine

- three thread overlocker
 - zigzag sewing machine
- Fabrics include one or more of the following**
- stable woven and knitted fabrics, such as cotton drill, calico, double knit, rugby knit and poplin
- Set-up includes the following:**
- ensuring correct thread, needle size and type, needle guard, tension setting and attachments
- Identify poor machine performance includes the following:**
- identifying worn or damaged parts, and reporting or replacing according to manufacturer specifications
 - identifying tension faults
 - identifying poor thread performance or incorrect thread selection
 - identifying incorrect foot or needle for sewing
 - identifying impact of poor machine performance on sewing
 - checking and replacing worn or damaged needles and attachments (feet)
- Sewing operations include the following:**
- aligning and sewing straight seams
 - joining flat pieces of stable fabric together
 - top stitch, edge stitch, open seams, closed seams and lapped seams

Assessment Requirements for MSTCL2001 Use a sewing machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2001B Use a sewing machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- checking work against ticket information or specification sheets
- preparing workstation tools and equipment
- performing basic machining tasks where feeding and positioning of fabric is guided by the machine, using at least two (2) different fabrics, to sew at least one (1) sample of each of the following operations:
 - aligning and sewing straight seams
 - joining flat pieces of stable fabric together
 - top stitch, edge stitch, open seams, closed seams and lapped seams
- sewing and doing routine maintenance on at least one (1) of the following machines:
 - plain lockstitch machine
 - three thread overlocker
 - zigzag machine
- inspecting completed work to check quality and production output requirements, and identifying and correcting faults
- recording results of quality inspection and completing production records or packing slips as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- garment assembly processes and machines where the positioning of the work may be controlled by guide bars, sensor lights or other such guiding devices, or where there is uncomplicated feeding of the fabric
- techniques in using and maintaining one or more automatic machines:
 - plain lockstitch machine
 - three thread overlocker
 - zigzag machine
- characteristics of stable woven and knitted fabrics and threads, such as cotton drill, calico, double knit, rugby knit and poplin

- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in using a sewing machine, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. MSTCL2002 Provide hand sewing and finishing support

Modification History

Release 1. Supersedes and is equivalent to LMTCL2002B Provide hand sewing and finishing support

Application

This unit of competency covers the skills and knowledge required to conduct support tasks to assist in the production of garments or other associated articles.

The unit of competency applies to activities associated with production support such as hand sewing and finishing activities performed under supervision.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

		requirements at all times
	1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
	1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare work pieces and workstation	2.1 Set up workbench and seating according to workplace procedures
		2.2 Identify work requirements and clarify as required
		2.3 Prepare work pieces
3	Perform hand sewing tasks	3.1 Conduct hand sewing tasks according to workplace standards
		3.2 Submit work to supervisor for quality checking
4	Perform finishing tasks	4.1 Perform finishing tasks according to workplace direction
		4.2 Check work for compliance with quality standards and job specifications
		4.3 Submit work for final quality checking.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Hand sewing tasks include two or more of the following:

- sewing on buttons
- sewing hems
- sewing on fasteners or hooks
- sewing on labels and tags

Finishing tasks include two or more of the following:

- sorting
- attaching tickets and labels
- ironing on transfers
- cutting loose threads
- checking quality of product against specifications

MSTCL2003 Perform basic maintenance of headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2018B Perform basic maintenance of headwear

Application

This unit of competency covers the skills and knowledge to perform basic maintenance of headwear.

The unit of competency applies to activities associated with the restoration, maintenance and alteration of headwear, including cleaning or refinishing.

Work may be conducted under some supervision in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for MSTCL2003 Perform basic maintenance of headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2018B Perform basic maintenance of headwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- assessing condition of headwear, confirming instructions for maintenance and clarifying instructions or specifications
- developing sequence of practical steps
- applying a range of methods related to maintaining or repairing headwear
- operating machines and equipment, including heat and steam equipment
- cleaning or refinishing at least three (3) different examples of headwear with different styles or fabrics
- checking to ensure work meets quality standards
- recording and reporting non-conformance or faults
- maintaining accurate maintenance records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- characteristics of headwear fibres, fabrics and other materials
- basic alteration techniques
- maintenance and repair processes, such as:
 - basic restoration
 - basic alteration
 - standard repair processes
 - refinishing processes
 - cleaning of headwear
 - basic repairs

- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in maintaining headwear, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. MSTCL2004 Sew components

Modification History

Release 1. Supersedes and is equivalent to LMTCL2004B Sew components

Application

This unit of competency covers the skills and knowledge required to undertake sewing to assemble and sew garment components or textile products using one or more machines for intermediate sewing operations. Operations include feeding and handling of work involving directional changes, contouring or critical stopping points or requiring feeding and handling skills because of fabric or material variation.

The unit of competency applies to sewing work using a machine such as a plain lockstitch sewing machine, a three, four or five thread overlocker, a blind hemming machine or a zigzag sewing machine.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2001 Use a sewing machine

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to sew components	<p>2.1 Prepare to use sewing machine</p> <p>2.2 Check needles, attachments and parts, and identify worn needles and parts, and report or replace, according to manufacturer instructions</p> <p>2.3 Receive work and check that the bundle matches ticket information and that previous operations have been successfully completed</p>
3	Sew components	<p>3.1 Complete required sewing operations to sew work pieces using machine according to specifications and workplace procedures</p> <p>3.2 Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces</p> <p>3.3 Take required action to address poor performance</p>
4	Review and complete work	<p>4.1 Inspect sewn components or textile products, identify any faults, take appropriate action and check finished pieces against quality standards</p> <p>4.2 Record results of inspection of finished component</p> <p>4.3 Record action taken to either reject or correct faulty components</p>

- 4.4 Record preventative action taken to avoid recurrence of defective pieces
- 4.5 Complete production records or packing slips
- 4.6 Direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Prepare to use sewing machine

- receive work pieces, check specification sheets and plan follow-up action

includes the following:

- lay out work pieces in sequence
- set up workbench and seating according to workplace procedures
- clean, check, set up and adjust machines according to specifications for work
- identify poor machine performance and adjust as required
-

Sew work pieces includes the following:

- sew pieces according to product requirements and quality standards
- use machine according to requirements for speed of work
- control machine speed and work handling according to type of operations, fabrics and product type
-

Fabrics include the following:

- woven and knitted fabrics, such as denim, single knits, tricot and gabardine

Components include one or more of the following:

- sleeves
- waistbands (straight or shaped)
- collars
- cuffs
- plackets
- facings (neck and armhole)
- binds
- zips (dress, skirt, trouser and invisible)
- buttons and buttonholes
- pockets (cut away, patch and in seam)

Textile products include one or more of the following:

- finished textile products
- components of textile products
- faulty textile products

Machines include one or more of the following:

- plain lockstitch sewing machine
- three, four or five thread overlocker
- zigzag sewing machine
- blind hemming machines

Set-up includes the following:

- correct thread
- needle size and type: a variety of size and types, such as standard and ball point
- needle guard

- tension setting
- attachments

Sewing operations include the following:

- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points
- sewing techniques involving the special handling skills required to accommodate fabric variations
- gathering, easing, tucking and stitching curves
- hems (double fold, rolled, blind and stitched hem)
- darts and pleats

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTCL2004B Sew components

Assessment Requirements for MSTCL2004 Sew components

Modification History

Release 1. Supersedes and is equivalent to LMTCL2004B Sew components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- demonstrating intermediate sewing techniques using one (1) or more fabrics to sew at least five (5) different garment or textile components
- completing at least five (5) examples of the following operations:
 - feeding and handling work involving directional changes, contouring or critical stopping points
 - feeding and handling skills required because of fabric or material variation
- sewing and doing routine maintenance on at least one (1) of the following machines:
 - three, four and five thread overlocker
 - zigzag machine
 - blind hemming machine
 - plain lockstitch sewing machine
- inspecting sewn components or textile products, identifying any faults, taking appropriate action and checking finished pieces against quality standards
- recording results of inspections to identify faulty components and preventative action
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- characteristics of woven and knitted fabrics, such as denim, single knits, tricot and gabardine
- range of components:
 - sleeves
 - waistbands (straight or shaped)

- collars
- cuffs
- plackets
- facings (neck and armhole)
- binds
- zips (dress, skirt, trouser and invisible)
- buttons and buttonholes
- pockets (cut away, patch and in seam)
- work for sewing, such as:
 - pieces of material or fabric components
 - yarns and threads
 - finished textile products
 - components of textile products
 - faulty textile products
 - labels and tickets
 - finishing components and accessories
 - fusing or pressing station
- machine operation and maintenance
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in sewing components, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2005 Use specialised machinery or processes to assist TCF production

Modification History

Release 1. Supersedes:

- LMTCL2005B Use specialised machinery or processes to assist assembly production
- LMTTX2014B Use specialised machinery to assist textile production

Not equivalent

Application

This unit of competency covers the skills and knowledge required to use specialised machinery to assist in assembly production and completion of garments textiles and other textile products.

The unit of competency applies to the skills needed to operate production machinery which is not covered by other textile, clothing or footwear (TCF) production units, such as cutting, button holing, stud, fusing or gluing or backing machines, and others.

It does not include:

- materials handling equipment, such as forklifts
- machines for weaving, spinning, knitting, tufting, creeling, dyeing, packing, folding and finishing operations
- the set-up or maintenance of machinery where such tasks are normally performed by textile mechanics, fitters or electricians.

The unit of competency applies to work that may be repetitive and require a limited range of operations. Tasks may be pre-set and the operator must be able to work accurately to achieve required specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to use specialised machinery	2.1	Prepare work area and check work against ticket information or workplace specifications
		2.2	Lay out work pieces or materials in sequence
		2.3	Prepare ancillary work according to workplace procedures and set up machine or process
		2.4	Prepare and adjust specialised machine according to the specifications for the work
		2.5	Report and record any problems
3	Operate specialised	3.1	Operate specialised machine to complete production tasks according to workplace procedures

	machine	3.2	Assess work to check it complies with quality standards and production specifications
		3.3	Check machine during production and adjust to ensure optimum performance
		3.4	Perform routine checks and carry out minor maintenance according to workplace procedures
4	Complete work	4.1	Assess production outputs to check work complies with quality standards, production specifications and workplace procedures
		4.2	Identify, report and record any machine or production faults
		4.3	Despatch completed items to next operation
		4.4	Report outcomes or complete documentation, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality

- improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Prepare to use specialised machines includes the following:

- receive work pieces, check specification sheets and plan follow-up action
- lay out work pieces in sequence
- set up workbench and seating according to workplace procedures
- perform routine minor maintenance according to manufacturer specifications
- report and record any problems

Equipment includes one or more of the following:

- moulding machine
- fusing machine
- gluing machine
- ticket or label printer
- button holing machine
- stud machine
- fusing or gluing or backing machine
- labelling machine
- bevelling machine
- cutting machine
- cuff turner and fuser
- pocket setting machine

Production tasks include one or more of the following:

- cutting
- gluing
- fusing
- moulding
- making tickets or labels
- bundling cut work
- placing tickets and labels with cut work
- loading and unloading machines

Unit Mapping Information

Release 1. Supersedes:

MSTCL2006 Press work

Modification History

Release 1. Supersedes and is equivalent to LMTCL2006B Press work

Application

This unit of competency covers the skills and knowledge required to press work as part of the garment production process.

The unit of competency applies to pressing work where the position and handling of work are under the control of the operator and operator skills may contribute to the final appearance and finish of the work. The operator uses skills in positioning and shaping of the garment which makes a significant contribution to the final appearance of the garment.

Work to be pressed may include stable woven and knitted natural and synthetic fabrics.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| | | 3.2 | Identify faults, spots and marks and take appropriate action |
| | | 3.3 | Select and use appropriate attachments |
| | | 3.4 | Sequence pressing |
| | | 3.5 | Position work on pressing equipment according to product requirement |
| | | 3.6 | Apply heat, steam, vacuum, pressure and time according to product requirements and fabric specifications |
| | | 3.7 | Control equipment and work handling for variations in work type and construction and pressing requirements |
| | | 3.8 | Position and shape the garment to contribute to the final appearance |

- | | | | |
|---|------------------------------|-----|--|
| 4 | Despatch pressed work | 4.1 | Inspect pressed work and compare against workplace pressing standards |
| | | 4.2 | Record results of inspection and report and record subsequent action to either reject or correct faulty work |
| | | 4.3 | Determine and record preventative action to avoid any recurrence of faulty work |
| | | 4.4 | Pass pressed work to next operation, or hang or pack it and direct to required despatch area, despatch storage or packing sections |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include: • the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Fabrics include one or more of the following:

- woven cottons
- denim
- single knits
- tricot
- gabardine
- cotton drill
- calico
- double knit
- rugby knit
- poplin

Pressing equipment includes one or more of the following:

- irons
- presses
- industrial steam irons
- suction boards
- sleeve board
- sleeve roll

Routine minor maintenance includes one or more of the following:

- washing out or replacing cover and padding
- shaking out rubber mat
- brushing and air blowing wire mesh
- applying sole-cleaning compounds to hand irons

Report and record includes one or more of the following:

- written records
- shown by the attachment of a ticket
- oral or written reports

Assessment Requirements for MSTCL2006 Press work

Modification History

Release 1. Supersedes and is equivalent to LMTCL2006B Press work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or pressing instructions
- preparing pressing equipment and work before commencing pressing operations
- applying pressing techniques for positioning and shaping of the garment, for a range of different fabric types and at least two (2) work pieces according to workplace procedures and quality requirements
- controlling equipment and handling work for variations in work type and construction and pressing requirement, including positioning and shaping the garment to contribute to the final appearance
- inspecting pressed work and comparing against workplace pressing standards
- recording results of inspection, reporting and recording subsequent action to either reject or correct faulty work
- determining and recording preventative action to avoid any recurrence of faulty work
- finalising pressing operation for storage, packing or despatch operations, according to workplace requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- pressing requirements and characteristics of typical fabrics and other materials used in garment assembly
- sewing techniques, such as pleats, tucks, gathers, darts and hems, and how pressing impacts on the finish
- quality standards and practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in pressing work, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL2007B Lay up, mark and cut uncomplicated fabrics and lays

Application

This unit of competency covers the skills and knowledge required to lay up, mark and cut uncomplicated fabrics and lays.

The unit of competency applies to situations where single garments or only a couple of layers of fabric are to be cut. The marker may be developed directly on the fabric lay or planned separately and applied.

Manual or computer-aided techniques may be used.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Uncomplicated articles include one or more of the following:

- t-shirts
- straight or A-line skirts
- shift dresses
- tracksuits

- section crowns
- brims
- tips
- side bands
- berets

Cutting equipment includes one or more of the following:

- dressmaker's shears
- cutting mats
- straight-blade cutter

Lay-up and marking equipment includes one or more of the following:

- computers and required software
- digital camera
- smartphone
- patterns
- fabric
- marker card or paper
- weights
- clamps

Fabrics include one or more of the following:

- woven fabrics, such as:
 - poplin
 - drill
 - flannelette
- knitted fabrics, such as:
 - rugby knit
 - double knit
- designs such as:
 - stripes
 - one-way designs
 - plaids

Assessment Requirements for MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL2007B Lay up, mark and cut uncomplicated fabrics and lays

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or cutting order
- setting up manual or computer drafting equipment before commencement of marker-making operations
- making markers involving patterns, uncomplicated fabrics and lays, using manual or computer techniques on at least two (2) occasions
- preparing cutting table and work before commencing cutting operations
- using lay-up techniques
- using cutting techniques
- monitoring work quality and checking for faults
- directing cut work to next operation, cleaning work area and preparing for next job
- storing master copy of lay marker in filing drawer or computer as appropriate.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- set up of work area:
 - setting up workstation, cutting table and seating according to workplace procedures and specifications for work
 - cleaning cutting equipment, checking and assessing servicing according to manufacturer instructions
 - preparing cutting table to suit correct lay length
 - setting up lay-up and marking equipment and preparing for use
- characteristics of fabrics and other materials used in garment assembly, such as woven fabrics (poplin, drill, flannelette) and knitted fabrics (rugby knit, double knit)
- assessing fabric:

- checking fabric width and quality with lay-up instructions
- laying-up fabric and adjusting fabric tension to match fabric performance
- checking fabric for faults
- taking required action to cut out faults or other appropriate techniques
- pattern identification
- computer operations involved in marker-making, copying and storage
- quality standards and practices:
 - inspecting cut work
 - identifying any faults
 - taking appropriate action to ensure cut pieces meet required quality standards
 - taking preventative action to avoid any recurrence of defective pieces
 - recording preventative action
 - regularly checking performance of cutting equipment for signs of faulty operation, including evidence from inspection of cut pieces, and taking any required action
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in laying up, marking and cutting uncomplicated fabrics and lays, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2008 Finish garment production

Modification History

Release 1. Supersedes and is equivalent to LMTCL2008B Finish garment production

Application

This unit of competency covers the skills and knowledge required to finish completed work in the production of garments or other associated articles.

The unit of competency applies to hand or machine tasks. Work performed may require some decision making within defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Assessment Requirements for MSTCL2008 Finish garment production

Modification History

Release 1. Supersedes and is equivalent to LMTCL2008B Finish garment production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing work area, materials and equipment, and specifications for sequence of operations
- checking garment or article against specifications to ensure correct sizing and attention to loose threads, and missing buttons and attachments on at least two (2) occasions
- attaching correct components to at least two (2) garments and articles
- completing finishing operations
- ensuring finished garment meets specifications
- identifying and reporting faults, and returning to appropriate section for repair according to quality standards
- completing production and other records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of typical fabrics and other materials used in garment production
- quality standards and practices
- correct sequencing of components
- required finishing procedures
- industry and product processes and equipment
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in finishing garment production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2009 Despatch work

Modification History

Release 1. Supersedes and is equivalent to LMTCL2009B Despatch work

Application

This unit of competency covers the skills and knowledge required to prepare finished works for despatch to customers or storage.

The unit of competency includes labelling and packing of items and completion of documentation.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- | | | | |
|---|--------------------------------|-----|---|
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare workstation | 2.1 | Set up workbench and seating according to workplace procedures |
| | | 2.2 | Lay out components in correct proximity and sequence according to specifications |
| 3 | Package work | 3.1 | Check garment or article against specifications to ensure item is correct and ready for despatch |
| | | 3.2 | Attach tickets, labels and swing tags as required |
| | | 3.3 | Perform boxing, packing, bagging, folding and hanging in accordance with environmental guidelines |
| | | 3.4 | Identify faults, report and return to appropriate section for repair according to quality standards |
| 4 | Despatch completed work | 4.1 | Direct or transfer completed garments or articles to required storage or despatch area |
| | | 4.2 | Complete production and other records |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Components include one or more of the following:

- tags
- swing tickets
- labels
- completed garments
- packaging materials
- coat hangers
- tape
- plastic clothes covers

Specifications include one or more of the following:

- construction specifications
- quality standards
- customer order
- despatch documentation

Unit Mapping Information

Assessment Requirements for MSTCL2009 Despatch work

Modification History

Release 1. Supersedes and is equivalent to LMTCL2009B Despatch work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- ensuring finished garment meets specifications
- attaching correct components to garments and articles
- preparing and packaging items for despatch or storage according to requirements, on at least two (2) occasions
- identifying faults and reporting and returning to appropriate section for repair according to quality standards
- directing or transferring completed garments or articles to required storage or despatch area according to workplace procedures
- completing production and other records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- quality standards and practices
- correct sequencing of components
- required packing and despatch procedures
- folding techniques
- industry and product processes and equipment
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in despatching work, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2010 Modify patterns to create basic styles

Modification History

Release 1. Supersedes and is equivalent to LMTCL2010B Modify patterns to create basic styles

Application

This unit of competency covers the skills and knowledge required to modify patterns to create basic styles.

The unit of competency applies to the modification of existing styled patterns to create new styles with minimal modification.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to modify patterns**
 - 2.1 Identify pattern pieces, markings and required style modifications
 - 2.2 Check pattern components against pattern specification sheet
 - 2.3 Confirm garment requirements
 - 2.4 Identify fabric performance characteristics that may affect style modifications
 - 2.5 Select and prepare patternmaking tools and equipment
 - 2.6 Prepare basic sketch of required modification

- 3 **Modify and finalise pattern**
 - 3.1 Apply basic patternmaking principles to make modifications on identified pattern pieces
 - 3.2 Cut modified pattern pieces and check for accuracy
 - 3.3 Label pattern pieces, including grain lines, notches and pattern information
 - 3.4 Prepare cutting instructions

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Style modifications include one or more of the following:

- changing neckline
- adding opening or closure
- lengthening or shortening
- adding flat seaming
- applying pockets and flaps

Modify pattern includes one or more of the following:

- appropriate seam allowance
- ease allowance
- notching
- pattern information (size, style number, cutting instructions and identity)
- darts
- drill holes
- grain line
- cutting line
- stitching line

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTCL2010B Modify patterns to create basic styles

Assessment Requirements for MSTCL2010 Modify patterns to create basic styles

Modification History

Release 1. Supersedes and is equivalent to LMTCL2010B Modify patterns to create basic styles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- identifying pattern pieces, markings and required style modifications, and checking pattern components against pattern specification
- drawing at least two (2) basic sketches of pattern modifications
- identifying, selecting and using appropriate tools and equipment for patternmaking
- identifying fabric requirements and characteristics
- using basic patternmaking principles to make modifications of relevant pattern pieces for at least two (2) different style patterns
- cutting out and labelling pattern pieces accurately with all required markings
- checking pattern pieces for accuracy
- preparing cutting instructions.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking and design terminology
- basic patternmaking principles:
 - dart manipulation
 - square blocking
- pattern specification:
 - number of pattern pieces
 - style details
 - fabric swatches
 - trade sketch
 - special pattern information

- cutting instructions
- pattern markings:
 - notches
 - straight of grain
 - seam lines
 - drill holes
 - darts
 - cutting instructions
 - style number
 - size
- style features
- fabric performance characteristics
- sequence of operations
- checking accuracy of modification:
 - seam allowances
 - ease allowance
 - seam match
 - hems
 - functional openings
- fabric performance characteristics
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in modifying patterns to create basic styles, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2011 Draw and interpret a basic sketch

Modification History

Release 1. Supersedes and is equivalent to LMTCL2011B Draw and interpret a basic sketch

Application

This unit of competency covers the skills and knowledge required to draw and interpret a two-dimensional sketch of a garment, and to identify construction features.

The unit of competency applies to interpreting and drawing basic trade sketches used by patternmakers and designers. Basic sketches or working drawings are two-dimensional, accurate drawings and may be drawn freehand or with the use of measuring devices and templates.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to draw a basic sketch**
 - 2.1 Prepare drawing tools, equipment and workstation
 - 2.2 Identify basic styles and pattern pieces
 - 2.3 Identify and follow specifications and use correct terminology to identify garment components

- 3 **Draw sketches**
 - 3.1 Select appropriate template to draw a sketch and draw accurate lines as required to complete sketch of garment
 - 3.2 Complete freehand sketches to correctly represent pattern pieces of garment
 - 3.3 Identify and label relevant parts of sketch

- 4 **Interpret sketch and complete work**
 - 4.1 Identify features of design from sketch
 - 4.2 Interpret specifications, where used, from sketch
 - 4.3 Check work against quality standards
 - 4.4 Carry out any changes or adjustments to sketch as required.
 - 4.5 Complete documentation relating to sketch according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Pattern pieces include one or more of the following:

- any components of the basic styles that need to be clarified, such as:
- waistbands
- pockets
- skirt front and back
- sleeves

Templates include one or more of the following:

- front and back full body view (ladies', men's and children's)
- upper torso or lower torso
- swimwear or lingerie

Lines on pattern include the

- straight
- angled

- following:**
- curved
 - pointed
 - circled

Assessment Requirements for MSTCL2011 Draw and interpret a basic sketch

Modification History

Release 1. Supersedes and is equivalent to LMTCL2011B Draw and interpret a basic sketch

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standard
- preparing workstation, tools and equipment
- identifying basic styles, pattern pieces and components of identified garment
- using at least two (2) different appropriate templates to draw a sketch and draw accurate lines as required to complete sketch
- completing a freehand sketch to correctly represent required pattern pieces, garment or style
- identifying and labelling relevant parts of sketch
- showing accurate details of at least three (3) pattern pieces and garment construction
- applying quality criteria in completion of sketch
- conveying all necessary instructions/information by the appropriate use of notes on the sketch
- completing documentation relating to sketch according to workplace procedures.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of fabrics used for garment construction
- basic pattern styles:
 - straight and A-line skirt
 - shift dress
 - blouse
 - pants
 - trousers
- features of design:

- pattern pieces
- construction requirements
- garment style
- basic pattern shapes
- drawing tools and equipment:
 - A3 layout pad
 - pencils with HB leads
 - pencil sharpener
 - kneadable eraser
 - templates
- sequence of operations
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - fabric performance
 - detailing
 - neatness
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in drawing and interpreting a basic sketch, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2012 Organise and plan own work in a home-based production environment

Modification History

Release 1. Supersedes and is equivalent to LMTCL2012B Organise and plan own work in a home-based production environment

Application

This unit of competency covers the skills and knowledge required to organise and plan own work in a home-based production environment.

The unit of competency applies to machine operations, such as sewing, where responsibility is taken for collection and despatch, quality and timely production and documentation.

Work is conducted according to defined procedures in a home-based or outside a factory environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- requirements**
- 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to organise home-based production**
- 2.1 Identify and contact relevant personnel in client organisation
 - 2.2 Confirm drop-off and pick-up arrangements with relevant personnel
 - 2.3 Identify timelines and work requirements, and confirm steps required to complete work with appropriate personnel
 - 2.4 Confirm and interpret quality requirements of client organisation and assess work according to agreed steps and quality criteria
 - 2.5 Check work against specifications and quality standards and take action to rectify work that is not according to requirements
- 3 **Set up home-based workplace**
- 3.1 Set up workbench and seating according to workplace procedures
 - 3.2 Clean, check, set up and adjust machines according to standard home-based work practices and all specifications
 - 3.3 Identify problems with machines and equipment and either fix or refer to maintenance personnel
 - 3.4 Establish home-based work record system according to standard home-based work practice and relevant industrial award.
 - 3.5 Keep records according to record system requirements.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Personnel in client organisation include one or more of the following:**
- production manager
 - pattern maker
 - delivery personnel
 - finance personnel
 - designer

Assessment Requirements for MSTCL2012 Organise and plan own work in a home-based production environment

Modification History

Release 1. Supersedes and is equivalent to LMTCL2012B Organise and plan own work in a home-based production environment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- clarifying and confirming drop-off and pick-up arrangements for work
- handling, receiving and assembling garments
- confirming and interpreting work specifications and quality requirements
- applying required quality procedures and required work steps
- organising home-based workplace and maintaining home-based machines and equipment
- establishing home-based work record system according to standard home-based work practice and relevant industrial award
- keeping records according to record system requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- garment assembly processes
- operating procedures for sewing machines
- relevant personnel and requirements of client organisation
- characteristics of typical fabrics, threads and other materials used in garment production
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in organising and planning own work in a home-based environment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2013 Block and shape headwear by machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2013B Block and shape headwear by machine

Application

This unit of competency covers the skills and knowledge required to perform blocking and shaping of headwear by machine.

The unit of competency applies to the production of headwear from specialist millinery foundation materials and standard textile products in a commercial environment where multiple units of styles are produced. It includes selecting the block where applicable.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|-----------------------------------|---|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | |
| 2 | Prepare to block headwear | 2.1 Interpret design specification and confirm blocking and shaping requirements |
| | | 2.2 Select materials required for design. |
| | | 2.3 Assemble selected materials in readiness for shaping hat |
| | | |
| 3 | Block headwear | 3.1 Select block, where necessary, to suit design and ensure correct application |
| | | 3.2 Prepare fibre/materials for blocking process |
| | | 3.3 Set up machine and equipment to meet requirements |
| | | 3.4 Process by steam |
| | | 3.5 Assess blocking using appropriate machine according to manufacturer specifications and workplace procedures |
| | | 3.6 Identify and rectify non-conforming outcomes |
| | | 3.7 Document process and outcomes according to workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include one or more of the following:

- hat blocking press
- cord
- steam applicator
- hot block
- hat stretcher
- cutting tools

Assessment Requirements for MSTCL2013 Block and shape headwear by machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2013B Block and shape headwear by machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting design specifications
- preparing and handling materials
- manipulating materials to produce required shapes for at least two (2) types of headwear
- using blocks according to specifications
- operating machines or equipment used in shaping headwear
- recognising and rectifying non-conforming outcomes
- documenting process and outcomes according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- textiles and millinery foundation materials and their composition, and the effects of temperature and steam
- the stretch quality of fabrics
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in blocking and shaping headwear by machine, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2014 Access and use information resources for clothing production operations

Modification History

Release 1. Supersedes and is equivalent to LMTCL2017B Access and use information resources for clothing production operations

Application

This unit of competency covers the skills and knowledge required to access and use information resources for clothing production operations.

The unit of competency applies to the identifying and using relevant industry information that may be used to assist in carrying out clothing production work activities.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify and	1.1	Identify information needs and confirm with appropriate
---	---------------------	-----	---

	locate clothing production information resources		personnel
		1.2	Identify and locate workplace information resources to assist in clothing production operations
		1.3	Seek direction from appropriate personnel, where required, in locating and obtaining information
		1.4	Check currency and authenticity of information resources
2	Access and interpret clothing production information	2.1	Use a range of reading techniques and simple search techniques to locate relevant information
		2.2	Interpret symbols, codes, legends, abbreviations and clothing production terminology
		2.3	Interpret working drawings to guide work
		2.4	Read, interpret and follow information on work specifications, standard operating procedures (SOPs), work instructions and other reference material
		2.5	Seek assistance to explain or clarify information, as required
		2.6	Note information and summarise, if necessary, for subsequent use
3	Use and store information resources	3.1	Use information resources to assist and improve clothing production operations
		3.2	Apply information to own work activities
		3.3	Store relevant information resources appropriately
		3.4	Update and maintain documentation to ensure it is current and easy to access

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Information resources include one or more of the following:

- SOPs
- safety procedures
- job lists
- manufacturer manuals
- specifications
- patterns
- machine settings
- Australian and International Standards
- quality system documentation
- customer requirements
- workplace procedures and manuals
- industry manuals
- codes of practice
- awards
- legislation
- plans

- diagrams
- log books
- working drawings
- hard and soft copy
- key personnel, supervisors, trainers and colleagues

Location of information resources includes one or more of the following:

- reference libraries
- workplace storage areas
- internet
- database records
- site supervisor
- manager or other personnel

Working drawings include the following:

- trade drawings
- accurate analytical drawings of garments that are detailed to show how the garment is constructed and finished
- sketches used by designers and patternmakers to inform production - part of specification sheets

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTCL2017B Access and use information resources for clothing production operations

Assessment Requirements for MSTCL2014 Access and use information resources for clothing production operations

Modification History

Release 1. Supersedes and is equivalent to LMTCL2017B Access and use information resources for clothing production operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standard
- locating and accessing at least three (3) different sources of information relevant to clothing production
- accessing at least five (5) different information resources and applying the information to own work
- interpreting clothing production terminology, symbols, codes, legend, abbreviations and data relevant to work requirements for at least two (2) different clothing production operations
- interpreting at least two (2) working drawings to guide work
- reading, interpreting and following information on work specifications, SOPs, work instructions for at least two (2) garments
- applying skimming and scanning reading techniques to locate required information
- seeking assistance and making notes if required
- storing, updating and maintaining relevant information resources and documentation to ensure it is current and easy to access.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- information resources available in the workplace relevant to work role
- range of formats that information can be presented
- organisation of information by classification and cataloguing systems
- simple search techniques:
 - using index, table of contents, numbering and classification systems
 - computer database search or look-up, questioning and cross referencing

- basic techniques to identify relevant information, including skimming and scanning, and identifying key words/ideas
- own work role and activities
- operating procedures for production machines or processes
- expertise of key personnel
- location of information resources
- quality standards and practices
- reading techniques
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in accessing and using information resources for clothing production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2015 Finish headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2015B Finish headwear

Application

This unit of competency covers the skills and knowledge required to perform the tasks associated with finishing of headwear and related articles, and involves final inspection.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for MSTCL2015 Finish headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2015B Finish headwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- applying finishing techniques, as required, on at least two (2) different forms of headwear
- identifying and selecting relevant labels and instructions
- carrying out inspection processes on different headwear products
- labelling, attaching elastic and finishing headwear to required standard
- operating machines and equipment required to finish headwear
- recognising non-conforming outcomes
- maintaining records of finished articles and any non-conformance.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- finishing processes and their application to different fabrics
- inspection and checking procedures
- quality standards and practices
- the importance of ventilation and lighting
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in finishing headwear, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2016 Trim headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2016B Trim headwear

Application

This unit of competency covers the skills and knowledge required to perform the tasks associated with trimming headwear.

The unit applies to multiple units of repetitive styles, such as sports caps, sun protective headwear, soft hats and adventure wear, sewn from textile products. It involves selecting or making simple trims.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Prepare to trim headwear | 2.1 | Confirm requirements for trimming headwear and determine sequence for trimming |
| | | 2.2 | Select appropriate materials to reflect requirements of design and quality |
| | | 2.3 | Prepare materials by cutting, stiffening or shaping, as required, according to design requirements |
| | | | |
| 3 | Trim headwear | 3.1 | Form, sew, staple or glue trims in preparation for attachment to headwear |
| | | 3.2 | Attach trim to hat, as required, to reflect design |
| | | 3.3 | Check trimmed or finished article for safety, including potentially dangerous items |
| | | 3.4 | Document process and outcomes according to workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Trims include one or more of the following:

- ribbon
- braid
- fabric
- flowers
- badges
- buttons
- studs
- eyelets
- fastenings
- elastic
- cords
- feathers

Potentially dangerous items include one or more of the following:

- wiring
- pins
- staples
- flower or trim wires
- dyes
- hat elastic

MSTCL2017 Press work for production support

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to press components as part of the garment production process.

The unit applies to pressing work to provide support to production operations. Pressing requires limited operator control of equipment and performance of basic and intermediate tasks that are routine. Positioning of fabric is uncomplicated and operations involve a limited range of fabrics and standard adjustments to equipment.

Work to be pressed may include stable woven and knitted natural and synthetic fabrics. Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - personal protective equipment (PPE)
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Fabric range includes one or more of the following:**
- woven cottons
 - denim
 - cotton drill
 - calico
 - polyesters
 - interfacings
 - trims and attachments

- Preparations for pressing includes the following:**
- checking that water reservoirs are filled to the designated levels in relevant equipment
 - checking condition of electrical cords

- cleaning contact surfaces of steaming and pressing equipment
- filling steam equipment with distilled water
- setting thermostats at appropriate temperature
- checking equipment operational procedures

Pressing equipment includes two or more of the following:

- irons
- presses
- industrial steam irons
- suction boards
- sleeve board
- sleeve roll

Routine minor maintenance includes one or more of the following:

- washing out or replacing cover and padding
- shaking out rubber mat
- brushing and air blowing wire mesh
- applying sole-cleaning compounds to hand irons

Report faulty work includes one or more of the following:

- written records
- shown by the attachment of a ticket
- oral or written reports

Assessment Requirements for MSTCL2017 Press work for production support

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or pressing instructions
- preparing pressing equipment and work before commencing pressing operations
- using at least two (2) types of pressing equipment and applying pressing techniques for garment components on at least two (2) occasions
- inspecting pressed work and comparing against workplace pressing standards
- reporting faulty work and taking follow up action to avoid any recurrence of faulty work, according to workplace procedures
- forwarding pressed work to next operation according to workplace requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- pressing requirements and characteristics of typical fabrics and other materials used in garment assembly
- pressing equipment, such as:
 - irons
 - presses
 - industrial steam irons
 - suction boards
 - sleeve board
 - sleeve roll
- quality standards and practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in pressing work, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2018 Perform bundling, ticketing and labelling in TCF operations

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to uncomplicated bundle cut work, make tickets and labels and place tickets and labels on the cut work in production support role according to workplace procedures.

This unit of competency applies to bundling, ticketing and labelling operations in the textile, clothing and footwear (TCF) sector. Work is conducted according to defined procedures to meet workplace requirements.

Work may be conducted in a variety of environments, including operational workplace activities, restricted space and hazardous, controlled or exposed conditions.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

workplace procedures

4.5 Complete workplace records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Ticketing and labelling includes the following:

- bundling
- making of tickets
- making of labels
- placing of tickets on cut work
- placing of labels on cut work

**Equipment and tools
include:**

- ticket and labelling printing machine
- one or more of:
 - hand tools
 - pallet truck
 - hand trolleys

Assessment Requirements for MSTCL2018 Perform bundling, ticketing and labelling in TCF operations

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting and applying established workplace procedures
- checking and sorting component parts
- bundling work on at least two (2) occasions according to specifications
- using a ticket labelling machine on at least two (2) occasions in accordance with workplace procedures
- entering information accurately
- detecting errors in labels and tickets
- placing tickets and bundles accurately
- communicating appropriately with relevant personnel to deal with damaged or inferior products and resolve problems
- completing relevant documentation.
- carrying out work to defined procedures in a production support work roles
- making of tickets labels, and the placing of the tickets and labels on cut work, that requires the use of discretion, initiative and judgement within the defined procedures

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- procedures and requirements for bundling, ticketing and labelling
- manual handling techniques
- operation of ticketing and labelling equipment
- quality standards and practices
- work health and safety (WHS) practices, including hazard identification and control measures
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in performing bundling, ticketing and labelling tasks to support TCF production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2019 Sew components, complex tasks

Modification History

Release 1. New Unit

Application

This unit of competency covers the skills and knowledge required to perform complex tasks to align and sew the sections of a garment because of the complexity of combining parts, or because of frequent variation in fabrics and materials.

This unit of competency covers the skills and knowledge required to assemble or sew components in situations that involve the use of either single industrial machines for advanced fabric manipulations and demonstrated shaping of the end product, or the operation of three or more different industrial machine types, that require feeding and handling skills, directional changes, and contouring as well as critical stopping points.

Machine types may include a plain lockstitch sewing machine, a three, four or five thread overlocker, a blind hemming machine or a zigzag sewing machine.

Work is conducted according to defined procedures and requires discretion, initiative and judgement.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to perform complex tasks	<p>2.1 Prepare to use sewing machines</p> <p>2.2 Check needles, attachments and parts and identify worn needles and parts and report or replace, according to manufacturer instructions</p> <p>2.3 Receive work and check that the bundle matches ticket information and that that previous operations have been successfully completed</p>
3	Perform complex sewing tasks	<p>3.1 Sew complex work pieces or manipulate fabric to ensure correct shaping of the end result, using machine according to workplace procedures</p> <p>3.2 Perform complex sewing operations demonstrating different operations or for advanced fabric manipulation</p> <p>3.3 Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces</p> <p>3.4 Take required action to address poor performance</p>

- | | | | |
|---|---------------------------------|-----|---|
| 4 | Review and complete work | 4.1 | Inspect sewn complex work, identify any faults, take appropriate action and check finished pieces against quality standards |
| | | 4.2 | Record results of inspection of finished component |
| | | 4.3 | Record action taken to either reject or correct faulty components |
| | | 4.4 | Record preventative action taken to avoid recurrence of defective pieces |
| | | 4.5 | Complete production records or packing slips |
| | | 4.6 | Direct completed work to next operation or packing section |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

- WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Prepare to use sewing machine includes the following:
- receive work pieces, check specification sheets and plan follow-up action
 - lay out work pieces in sequence
 - set up workbench and seating according to workplace procedures
 - clean, check, set up and adjust machines according to specifications for work
 - identify poor machine performance and adjust as required
 -
- Sew work pieces includes the following:
- sew pieces according to product requirements and quality standards
 - use machine according to requirements for speed of work
 - control machine speed and work handling according to type of operations, fabrics and product type
 -
- Fabrics include one or more of the following:**
- woven and knitted fabrics, such as denim, single knits, tricot and gabardine
- Components include one or more of the following:**
- sleeves
 - waistbands (straight or shaped)
 - collars
 - cuffs
 - plackets
 - facings (neck and armhole)
 - binds
 - zips (dress, skirt, trouser and invisible)
 - buttons and buttonholes
 - pockets (cut away, patch and in seam)
- Industrial machines include one or more of the following:**
- plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine
 - blind hemming machines
 - buttonholers
 - pocket and collaring machines

- elasticators
 - binders
- Set-up includes the following:**
- correct thread
 - needle size and type: a variety of size and types such as standard, ball point
 - needle guard
 - tension setting
 - attachments
- Complex sewing operations include following:**
- Manipulation of various components to deal with frequent variation of fabrics and materials to ensure correct shaping of end result
 - Sewing techniques needed to address fabric variations as well as awkward positioning, feeding and handling which require contouring or stopping points sewing stretch knit fabric to non-stretch fabric
- Complex tasks include one or more of the following:**
- lycra sportswear with panels
 - gathering, easing, tucking and stitching curves
 - hems (double fold, rolled, blind and stitched hem)
 - darts and pleats

Unit Mapping Information

Release 1. New Unit

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTCL2019 Sew components, complex tasks

Modification History

Release 1. New Unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- demonstrating techniques to complete complex sewing operations on at least five (5) occasions which involve
 - performing a sequence of different operations on a single sewing machine or on multiple machines to complete the majority of a complex task
 - exercising fabric manipulation skills to handle and align sections and ensure correct shaping of the end result, because of fabric variations or complexity of combining parts
- inspecting sewn components, identifying any faults, taking appropriate action and checking finished pieces against quality standards
- recording results of inspections to identify faulty components and preventative action
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- characteristics of woven and knitted fabrics such as denim, single knits, tricot, gabardine
- techniques to use a single sewing machine to align and sew work pieces
- range of components:
 - sleeves
 - waistbands (straight or shaped)
 - collars
 - cuffs
 - plackets
 - facings (neck and armhole)

- binds
- zips (dress, skirt, trouser and invisible)
- buttons and buttonholes
- pockets (cut away, patch and in seam)
- machine operation and maintenance, such as:
 - plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine
 - blind hemming machines
 - buttonholers
 - pocket and collaring machines
 - elasticators and binders
- handling frequent variations in fabrics
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in sewing components, complex tasks, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2020 Lay up and mark uncomplicated fabrics and lays

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to lay up and mark uncomplicated fabrics and lays.

The unit of competency applies to production support roles or situations where single garments or only a couple of layers of fabric are to be cut.

Manual or computer-aided techniques may be used.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare for lay-up	2.1	Set up working area
		2.2	Interpret lay-up instructions for uncomplicated articles
		2.3	Collect and check fabric
		2.4	Interpret cutting order for marking requirements, such as fabric type, width, quantity and garment sizes
3	Perform lay-up	3.1	Collect required pattern pieces and check manually or by computer
		3.2	Manipulate pattern pieces and position manually on paper or by computer for most efficient fabric use
		3.3	Draw up lay marker manually or by computer
		3.4	Prepare lay-up instructions according to requirements
		3.5	Check marker against requirements and copy marker either manually or by computer
4	Finalise work	4.1	Direct work to next operation, according to workplace procedures
		4.2	Clean work area and prepare for next job

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - personal protective equipment (PPE)
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Uncomplicated articles include one or more of the following:**
- t-shirts
 - straight or A-line skirts
 - shift dresses
 - section crowns
 - brims
 - tips
 - side bands
 - berets
- Lay-up and marking equipment includes one or more of the following:**
- computers and required software
 - patterns
 - fabric
 - marker card or paper
 - weights
 - clamps

Set up working area includes the following:

- setting up workstation, according to workplace procedures and specifications for work
- cleaning cutting equipment, checking and assessing servicing according to manufacturer instructions
- preparing cutting table to suit correct lay length
- setting up lay-up and marking equipment and preparing for use

Check fabric includes the following:

- checking fabric width and quality with lay-up instructions
- laying-up fabric and adjusting fabric tension to match fabric performance
- checking fabric for faults
- taking required action to cut out faults according to workplace procedures or other appropriate techniques

Monitor work quality includes the following:

- inspecting cut work
- identifying any faults
- taking appropriate action to ensure cut pieces meet required quality standards
- taking preventative action to avoid any recurrence of defective pieces
- recording preventative action

Assessment Requirements for MSTCL2020 Lay up and mark uncomplicated fabrics and lays

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or cutting order
- setting up manual or computer drafting equipment
- using lay-up techniques for uncomplicated fabrics or lays on at least two (2) occasions
- complying with quality processes
- finalising work according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of fabrics and other materials used in garment assembly, such as woven fabrics (poplin, drill and flannelette) and knitted fabrics (rugby knit and double knit)
- working with woven fabrics, such as:
 - poplin
 - drill
 - flannelette
- working with knitted fabrics, such as:
 - rugby knit
 - double knit
- designs, such as:
 - stripes
 - one-way designs
 - plaids
- fabric faults
- pattern identification
- quality standards and practices

- workplace procedures
- reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in laying up, marking and cutting uncomplicated fabrics and lays, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3001 Identify fabric performance and handling requirements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3001B Identify fabric performance and handling requirements

Application

This unit of competency covers the skills and knowledge required to identify fabric performance and handling requirements.

The unit of competency applies to fabrics used to produce garments and accessories and includes sourcing information from reference material and industry specialists, as well as conducting simple tests to identify fabric types and properties. Identification methods and tests covered by this unit are those where the procedure has already been determined and the range of outcomes established.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Fabric types include the following:

- natural and synthetic single yarn fabrics and blends
- knitted fabrics, including weft knits and warp knits
- woven fabrics, including plain, twill, satin, dobby, jacquard and pile
- non-woven fabrics, such as felts, nets, braids, bonded and composite
- emerging smart fabrics

Performance characteristics include one or more of the

- stretch
- abrasion
- wearability

following:

- absorbency
- durability
- elasticity
- heat sensitivity
- shrink resistance
- ease of care
- drape quality
- colour fastness
- strength

Performance testing includes five or more of the following:

- light
- heat
- chemical reaction
- absorbency
- abrasion
- pill
- wash
- fabric finish

Finishes includes four or more of the following:

- crease resistance
- fire retardency
- waterproofing or water resistance
- colouration for structural or applied design such as printing or dyeing
- surface finishes for aesthetics, stability or serviceability
- interlacing and interloping

Handling fabrics includes one or more of the following:

- cutting
- dyeing
- printing
- pressing
- lining
- assembling
- sewing
- packaging and storage

Implications for production include one or more of the following:

- sewing requirements such as needle size and type, machine type, thread type
- binding, joining, fusing requirements
- lining, reinforcement

- seam types

Assessment Requirements for MSTCL3001 Identify fabric performance and handling requirements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3001B Identify fabric performance and handling requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- locating and interpreting information in Australian Standard AS/NZ 1957:1998 Textiles – Care labelling
- using a range of identification methods to identify key performance characteristics of at least two (2) different examples of each identified fabric type (at least ten (10) fabrics)
- conducting and keeping record of a broad range of performance tests on a variety of fabrics, including at least five (5) different performance tests on five (5) fabric types
- identifying fabric quality of at least ten (10) different fabrics using established quality indicators
- preparing a table to summarise performance characteristics, common problems and faults, appropriate uses, care requirements in handling products, and implications for production, of at least ten (10) different fabrics
- collecting at least two (2) fabric samples to demonstrate at least four (4) different finishes, identifying their application and implications for handling
- identifying care, cleaning and labelling requirements of a sample of at least ten (10) different fabrics or products, to comply with Australian Standards
- recording outcomes according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- fibre identification:
 - natural fibres, such as cotton, wool, silk, linen
 - man-made, such as rayon and acetate
 - synthetic, such as nylon and polyester
- fabric identification methods:

- identifying physical properties and features and other characteristics determined by clients or markets
- checking of specifications and manuals
- consultation with specialists
- visual inspection
- tactile analysis
- acetone
- burn test
- performance characteristics
- performance testing
- care and cleaning requirements:
 - dry cleaning
 - hand washing
 - washing
 - drying
 - ironing
 - special requirements (e.g. hanging)
 - bleaching
- quality indicators:
 - straight grain
 - even or uneven weave
 - slippage
 - length of fibres
 - pilling
 - even print or dye colour
 - print alignment or sizing
 - fabric resilience
 - workability
 - wash testing
- fabric finishes
- information resources on fibres and fabrics
- workplace procedures
- recording and reporting practices.
-

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in identifying fabric performance and handling, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3002 Prepare and produce a complex whole garment from specifications

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3002B Prepare and produce sewn garment

Application

This unit of competency covers the skills and knowledge required to prepare, align and sew a complex whole garment.

The unit of competency applies to sample machining involving all operations in the assembly of a garment from written specifications.

Work may be self-directed and unsupervised, and may include carrying out a work plan to specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to construct complex garment	2.1	Identify garment requirements from production specifications
		2.2	Determine machining requirements and develop plan for garment construction
		2.3	Check and lay out work pieces in sequence according to construction plan
		2.4	Prepare workstation, machines and equipment
3	Sew complex garment	3.1	Sew complex garment according to product requirements, quality standards and required operations
		3.2	Perform operations to produce whole garment according to workplace procedures
		3.3	Control machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
		3.4	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces, and take required action

- | | | | |
|---|----------------------|-----|--|
| 4 | Complete work | 4.1 | Inspect and check garment against quality standards, identify any faults and take appropriate action |
| | | 4.2 | Record results of inspection and action taken to either reject or correct faulty garment |
| | | 4.3 | Record preventative action taken to avoid any recurrence of defective garment |
| | | 4.4 | Complete manual or digital production records or packing slips |
| | | 4.5 | Direct completed work to next operation or packing section |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

- WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Garment requirements include one or more of the following:**
- work pieces, accessories and trims
 - pattern
 - production or delivery time requirements
- Prepare workstation, machines and equipment includes the following:**
- setting up workbench and seating according to ohs practices
 - cleaning and checking machines
 - maintaining records
 - setting up and adjusting machines according to specifications for work
 - checking needles, attachments and parts
 - identifying, reporting or replacing worn needles and parts according to manufacturer instructions
- Garment includes one or more of the following:**
- any complex whole garment that includes multiple pieces, such as sleeves, collars and trims, and which is made to production specifications (for example shirts, trousers, dresses, unstructured jackets, stretch knits, skirts, bras and swimwear)
- Machines include one or more of the following:**
- plain lockstitch sewing machine
 - a three, four or five thread overlocker
 - a zigzag sewing machine
 - blind hemmers
 - buttonholers
 - pocket and collaring machines
 - elasticators
 - binders
- Set-up includes one or more of the following:**
- correct thread
 - needle size and length
 - needle guard
 - tension setting
 - attachments

Operations include the following:

- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points
- special handling skills required to accommodate fabric variations
- production of whole garment from specifications or patterns
- sample machining
- all operations required to complete whole garment construction

Unit Mapping Information

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3002B Prepare and produce sewn garment

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTCL3002 Prepare and produce a complex whole garment from specifications

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3002B Prepare and produce sewn garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- performing a range of sewing operations, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, and where special handling skills are required to accommodate fabric variations
- completing all operations to sew at least two (2) complex whole garments that include multiple pieces, such as sleeves, collars and trims, bras or swimwear, according to garment requirements, quality standards and required operations
- applying the range of sewing techniques required for complex garment operations to construct a whole garment
- providing routine checks and maintenance of machines
- controlling machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
- inspecting sewn garment, identifying any faults, taking appropriate action and checking finished work against quality standards
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- production machine operation and maintenance, such as:
 - plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine

- blind hemming machines
- buttonholers
- pocket and collaring machines
- elasticators
- binders
- characteristics of a variety of fabrics, threads and other materials used in garment assembly
- range of sewing techniques required to construct complex whole garment
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in sewing garments, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3003 Perform garment repairs and alterations

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3003B Perform garment repairs and alterations

Application

This unit of competency covers the skills and knowledge required to repair and alter finished garments based on client needs.

The unit of competency applies to repairing garments that have been damaged, either during the production process or during normal wear. It also applies to the alteration of garments following production, where they do not fit an individual.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
<p>1 Determine job requirements</p>	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
<p>2 Prepare for repairs and alterations</p>	<p>2.1 Identify type of garment damage or alteration required</p> <p>2.2 Determine repair or alteration work requirements, take measurements and develop plan</p> <p>2.3 Lay out work in sequence according to repair or alteration plan</p> <p>2.4 Prepare workstation, machines and equipment</p>
<p>3 Sew minor alterations or repairs by machine or hand</p>	<p>3.1 Repair or alter product according to product requirements, quality standards and required operations</p> <p>3.2 Control machine speed and work handling for type of operations, fabrics and product type, and workplace procedures</p> <p>3.3 Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces, and take required action</p>
<p>4 Complete work</p>	<p>4.1 Inspect product and check against quality standards, identify any faults and take appropriate action</p> <p>4.2 Record results of inspection of finished product and complete client records</p>

4.3 Direct completed work to finish section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Repair process includes:

- planning the deconstruction of the garment so the repair can be achieved

Alterations include one or more of the following:

- hems
- letting out, or taking in, seams for fit
- reshaping garment with dart and seams

- Measurements include one or more of the following:**
- depth of hem take-up or let-down
 - sleeve length
 - waist, bust or hip measurement
- Repair equipment includes one or more of the following:**
- blind hemmers
 - buttonholers
 - elasticators
 - binders
 - plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine
 - needles
 - darning tools
- Set-up includes one or more of the following:**
- correct thread
 - needle size and length
 - needle guard
 - tension setting
 - attachments
- Operations include the following:**
- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points
 - the special handling skills required to accommodate fabric variations
 - all operations required to complete repair and alteration in construction

Unit Mapping Information

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3003B Perform garment repairs and alterations

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTCL3003 Perform garment repairs and alterations

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3003B Perform garment repairs and alterations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- planning process for repairs or alterations to occur
- checking work pieces against specifications for repairs or alterations
- preparing workstation and work before commencing sewing operations
- repairing or altering at least four (4) products according to product requirements, quality standards and required operations
- applying range of sewing techniques as required to repair or alter products
- operating and monitoring equipment required for repairs and alterations to identify faulty operation
- inspecting product and checking against quality standards, identifying any faults and taking appropriate action
- recording results of inspection of finished product and completing client records
- directing completed work to finish section.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- techniques in using and maintaining production machines
- hand sewing techniques
- characteristics of fabrics, threads and other materials used in garments
- repair requirements, such as:
 - replacing zips, buttons or other fasteners by hand or machine
 - reinserting or attaching elastic
 - darning holes by hand or machine

- garment damage:
 - holes, tears or rips
 - broken zips
 - worn elastic
 - broken seams or hems
 - lost buttons, hooks and eyes
- preparing workstation and work before commencing sewing operations:
 - setting up workbench and seating according to work health and safety (WHS) practices
 - cleaning and checking machines
 - maintaining records
 - setting up and adjusting machines according to specifications for work
 - checking needles, attachments and parts
 - identifying, reporting or replacing worn needles and parts according to manufacturer
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in performing garment repairs and alterations, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3004 Press whole garments

Modification History

Release 1.1. Correction of typographical errors in Application of the unit.

Release 1. Supersedes and is equivalent to LMTCL3004B Press whole garments

Application

This unit of competency covers the skills and knowledge required to press whole garments.

The unit of competency applies to pressing of whole garments, which may include many components, complex seams and fabrics. Operator skills may contribute to the final appearance and finish of the work. Fabrics could include wool suiting, satin, velvet, chiffon, silks, linen, and lace.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2006 Press work

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to press garment**
 - 2.1 Prepare work area and pressing equipment
 - 2.2 Clean, check and perform routine maintenance on pressing equipment
 - 2.3 Lay out work in correct proximity and sequence
 - 2.4 Quality check garment, identify faults, spots and marks and take appropriate follow-up action

- 3 **Press garment**
 - 3.1 Select and use appropriate attachments
 - 3.2 Sequence and position work on pressing equipment according to product requirements
 - 3.3 Apply heat, steam, vacuum, pressure and time according to product requirements and fabric specifications
 - 3.4 Control equipment and handle work to suit variations in fabric, work type, construction and pressing requirements

- 4 **Despatch pressed garment**
 - 4.1 Inspect pressed garment and compare against workplace pressing standards
 - 4.2 Report and record results of inspection and subsequent action to correct faulty work
 - 4.3 Record any preventative action taken to avoid any recurrence of faulty work
 - 4.4 Hang, pack and direct pressed garment to required despatch area, despatch storage or packing sections

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Pressing equipment includes three or more of the following:

- irons
- presses
- industrial steam irons
- suction boards
- sleeve board
- sleeve roll
- tailor's ham
- tailor's mitt
- velvet pin board

Routine minor maintenance includes one or more of the following:

- washing out or replacing cover and padding
- shaking out rubber mat
- brushing and air-blowing wire mesh
- applying sole-cleaning compounds to hand irons

Garment includes three or more of the following:

- shirts
- trousers
- dresses
- skirts
- tailored jackets
- evening wear

Fabric includes two or more of the following:

- wool suiting
- satin
- velvet
- chiffon
- silks
- linen
- lace

Report and record includes one or more of the following:

- written records
- shown by the attachment of a ticket
- oral or written reports

MSTCL3005 Lay up and cut complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3005B Lay up and cut complicated fabrics and lays

Application

The unit of competency covers the skills and knowledge required to lay up fabric and cut work as part of the garment production process in situations involving complex patterns and a variety of fabrics and lays.

It applies to situations where multiple garments and layers of fabric are to be laid up and cut according to a marker, and may include two-way markers and step layers.

Work involves discretion, initiative and judgement within defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|----------|--|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to cut complicated fabrics and lays | 2.1 | Set up working area |
| | | 2.2 | Interpret lay-up instructions for complicated articles |
| | | 2.3 | Collect and check fabric |
| | | 2.4 | Check lay height and position of fabric according to cutting equipment and work specifications |
| | | 2.5 | Use layering with calico or paper for delicate or difficult-to-manage fabrics to assist lay-up according to job card and workplace practices |
| 3 | Cut work | 3.1 | Use cutting equipment according to requirements for operation |
| | | 3.2 | Inspect cut work, identify any faults and take appropriate action to avoid fault or join pieces to ensure cut pieces meet required quality standards |
| | | 3.3 | Take and record preventative action to avoid any recurrence of defective pieces |
| | | 3.4 | Regularly check performance of cutting equipment for signs of faulty operation, including evidence from inspection of cut pieces |
| | | 3.5 | Perform routine maintenance, including changing blades and drill bits, on cutting equipment |

- | | | | |
|---|----------------------|-----|---|
| 4 | Complete work | 4.1 | Bundle work according to job card |
| | | 4.2 | Direct cut work to next operation and clean work area and prepare for next job |
| | | 4.3 | Store master copy of lay marker in filing drawer or computer, according to workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Check fabric includes the following:

- checking fabric width and quality with lay-up instructions
- laying-up fabric and adjusting fabric tension to match fabric performance
- checking fabric for faults
- taking required action to cut out faults or other appropriate techniques

Lay-up instructions include one or more of the following:

- job cards
- cutting orders
- customer order breakdown
- marker

Bundled includes one or more of the following:

- by fabric shade
- whole garments
- same pattern pieces
- with notions (e.g. threads)

Unit Mapping Information

Assessment Requirements for MSTCL3005 Lay up and cut complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3005B Lay up and cut complicated fabrics and lays

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, lay-up instructions
- applying relevant standards
- preparing cutting table and work before commencing operations
- using appropriate lay-up and cutting techniques to match pattern pieces and fabric
- using cutting equipment safely and according to manufacturer guidelines
- cutting a variety of complicated pattern pieces for at least two (2) garments
- inspecting cut work to identify any faults and taking appropriate action to ensure cut pieces meet required quality standards
- inspecting equipment and performing routine maintenance
- directing cut work to next operation, cleaning work area and preparing for next job
- storing master copy of lay marker in filing drawer or computer according to workplace procedures.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- safety and environmental aspects of lay-up and cutting processes, including safe storage and disposal of excess fabrics and rolls
- equipment set up and preparation:
 - setting up cutting table and seating according to workplace procedures and specifications for work
 - setting up lay-up and marking equipment and preparing for use
 - cleaning cutting equipment, checking and assessing servicing according to manufacturer instructions
 - preparing cutting table to suit lay length
 - cleaning, checking for faults and assessing servicing against manufacturer instructions

- positioning of cutting table
- changing cutting blades
- lay-up equipment:
 - weights
 - clamps
 - spreading table
- cutting equipment:
 - round blade cutter
 - straight knife cutter
 - drills
 - metal die
 - computerised cutting machine
- quality standards and practices
- lay-up techniques, including the appropriate use of fabric and paper layers
- stretching techniques for fabrics
- applications of cutting machinery
- cutting machinery components requiring routine maintenance
- range of woven fabrics, such as:
 - denim
 - wool suiting
 - corduroy
 - satins
 - chiffon
 - rayons
- range of knits, such as:
 - polar fleece
 - double knits
 - single knits
 - tricot
- characteristics of fabrics and other materials used in garment assembly
- common fabric faults
- complicated garments with a number of pieces and a variety of shapes, such as:
 - shirts/blouses
 - trousers
 - jackets
 - dresses
 - skirts
 - fabrics with directional patterns
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in layup and cut complicated fabric, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3006 Assemble bra or swimwear

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3006B Assemble bra or swimwear

Application

This unit of competency covers the skills and knowledge required to plan, align and assemble a bra or swimwear garment from specifications or patterns using a variety of machines and processes.

The unit of competency applies to assembling a bra or swimwear garment and may apply to sample machining involving all operations in the assembly of a garment to specifications. It involves being able to work quickly and accurately with expensive and delicate fabrics, to tight tolerances.

Work may be self-directed and unsupervised.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to assemble bras or swimwear	<p>2.1 Set up workbench and seating, and clean, set up and adjust machines and check oil levels</p> <p>2.2 Check needles, attachments and parts, and identify, report or replace worn items according to manufacturer instructions</p> <p>2.3 Check work bundle, determine any follow-up action and lay out components in sequence</p> <p>2.4 Maintain records</p> <p>2.5 Determine specifications and machining requirements and develop plan for bra or swimwear construction</p>
3	Assemble bra or swimwear	<p>3.1 Assemble bra or swimwear according to product requirements and quality standards</p> <p>3.2 Assemble bra or swimwear according to workplace procedures and requirements for speed of work</p> <p>3.3 Control machine speed and work handling for type of operations, fabrics and product type</p> <p>3.4 Regularly check performance of machine for signs of faulty operation, including evidence from inspection of</p>

		finished pieces, and take required action
	3.5	Check all work for compliance with specifications, including tolerances, and take remedial action where non-compliance is detected
4	Complete work and production records	
	4.1	Inspect finished garment, check against quality standards, identify any faults and take appropriate action
	4.2	Record results of inspection of finished garment to either reject or correct faulty garment
	4.3	Record preventative action to avoid any recurrence of defective garment
	4.4	Complete production records or packing slips and direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping

- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include one or more of the following:

- plain lockstitch sewing machine
- three thread overlocker
- zigzag sewing machine
- blind hemming machines
- buttonholers
- pocket and collaring machines
- elasticators
- binders
- three-step, twin needle with binding, channelling, single needle and bar rack
- fusing, moulding, gluing and ultrasonic machine

Set-up includes one or more of the following:

- correct thread
- needle size and type: a variety of size and types, such as standard and ball point
- needle guard
- tension setting
- attachments correct heat and pressure
- correct foot

Operations include the following:

- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points
- special handling skills required to accommodate fabric variations
- production of whole garment from specifications or patterns
- sample machining
- all operations required to complete whole garment construction

Assemble includes one or more of the following:

- gluing
- fusing

- sewing

Unit Mapping Information

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Assessment Requirements for MSTCL3006 Assemble bra or swimwear

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3006B Assemble bra or swimwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- determining specifications and machine requirements and planning for assembling of bra or swimwear
- performing a range of sewing operations, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, and where special handling skills are required to accommodate fabric variations
- using one or more machines required for completing all operations to sew at least two (2) bras or swimwear according to garment requirements, quality standards and required operations
- operating and maintaining machine/s required for complete operations
- controlling machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
- inspecting sewn garment, identifying any faults, taking appropriate action and checking finished work against quality standards
- recording results of inspections to identify faulty components and preventative action
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- machine operations and maintenance
- characteristics of fabrics, threads and other materials used in garment assembly
- quality standards and practices
- sequence of operations

- acceptable tolerances and other quality standards
- appropriate components for bras and swimwear:
 - straps
 - hooks
 - elastic
 - fasteners
 - ribbon
 - underwire
 - foam padding
 - oil-filled straps
 - rings
 - fine lace and delicate fabrics
- performance and properties of one-way and two-way stretch fabrics
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in assembling bra or swimwear, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3007 Embellish garment by hand or machine

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected -MSTCL2005 removed as incorrect unit and MSTCL2001 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3007B Embellish garment by hand or machine

Application

This unit of competency covers the skills and knowledge required to embellish a garment using hand or machine techniques.

The unit of competency applies to selecting and applying an embellishment on garments, either at the completion of production, or during the production stage. The embellishments may be added by either hand or machine, as determined by the design brief.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--------------------------------------|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Prepare to embellish garments | 2.1 | Interpret design brief and identify specifications, type of embellishment and methods of embellishing by hand and machine |
| | | 2.2 | Identify garment considerations, machine requirements and appropriate attachments |
| | | 2.3 | Identify criteria for selection of threads and types of decorations to be attached |
| | | 2.4 | Set up work area, equipment and materials and adjust to specifications for work |
| | | 2.5 | Perform routine minor maintenance according to manufacturer specifications |
| | | 2.6 | Report and record any problems |
| | | | |
| 3 | Embellish garment or piece | 3.1 | Lay out work pieces |
| | | 3.2 | Complete hand and machine embellishment |
| | | 3.3 | Assess work to comply with quality standards and production specifications |
| | | 3.4 | Check machine and adjust to ensure optimum performance |

- | | | | |
|---|--------------------------------|-----|--|
| 4 | Despatch completed work | 4.1 | Check garments or articles against quality standards |
| | | 4.2 | Identify any faults, report and record, and take necessary action to repair or discard |
| | | 4.3 | Direct completed garments or articles to next operation |
| | | 4.4 | Complete work documentation as required |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Specifications include one or**
- content

more of the following:

- colour
- size, including width and length
- stitch type and size

Garment considerations include the following:

- type of fabric
- colour of fabric
- positioning of design
- purpose of garment
- suitability of size, design and colour

Embellishing methods include three or more of the following:

- beading
- smocking
- embroidery stitches
- fabric manipulation
- quilting
- pintucking
- shirring
- machine embroidery
- appliqué
- lace insertion

Maintenance of equipment includes one or more of the following:

- checking and replacement of needles, attachments or parts used for embellishment
- maintaining equipment to supplier requirements

Unit Mapping Information

Release 1.1. Data entry errors re listed prerequisites corrected -MSTCL2005 removed as incorrect unit and MSTCL2001 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3007B Embellish garment by hand or machine

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTCL3007 Embellish garment by hand or machine

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected -MSTCL2005 removed as incorrect unit and MSTCL2001 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3007B Embellish garment by hand or machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance, criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and planning work sequence
- performing embellishment by hand or machine using at least three (3) methods
- carrying out minor maintenance on embellishment equipment according to suppliers requirements or workplace practices
- identifying, reporting and recording any faults, and taking necessary action to repair or discard
- directing completed garments or articles to next operation
- completing work documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- principles of design
- characteristics of fibres, threads, fabrics and other material
- criteria for selection of threads:
 - colour
 - thickness
 - shine
 - texture
 - stability
 - strength
- forms of manual and machine embellishment

- equipment and materials:
 - sewing machine and attachments, such as feet
 - garment
 - scissors
 - tape measures
 - hand sewing needles, such as beading and crewel
 - embroidery hoop
- garment considerations, such as:
 - type of fabric
 - colour of fabric
 - positioning of design
 - purpose of garment
 - suitability of size, design and colour
- embellishment procedures
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in embellishing garments by hand or machine, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3008 Set and produce digital embroidery

Modification History

Release 1. Supersedes and is equivalent to LMTCL3008B Set and produce digital embroidery

Application

The unit of competency covers the skills and knowledge required to set and use digital embroidery programs and machines to produce embroidered lettering, monograms and motifs on simple garments.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs

- 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to produce digital embroidery**
 - 2.1 Determine specifications for embroidery, required program features and machine requirements
 - 2.2 Identify garment considerations and select motif or lettering from stock designs
 - 2.3 Edit designs to achieve specifications and set program for operation
 - 2.4 Set up work area, equipment and materials and adjust to specifications for work
- 3 **Produce digital embroidery**
 - 3.1 Lay out work pieces and select backing pieces to suit fabric
 - 3.2 Operate embroidery equipment according to workplace procedures to produce digital embroidery on simple garments
 - 3.3 Assess work for compliance with quality standards and production specifications
 - 3.4 Check machine and adjust to ensure optimum performance
 - 3.5 Manage production problems, such as thread breaks, and report and record any problems
 - 3.6 Perform routine minor maintenance according to manufacturer specifications
- 4 **Despatch completed work**
 - 4.1 Check completed work against quality standards
 - 4.2 Identify any faults, report and record and take necessary action to repair or discard
 - 4.3 Direct completed work to next operation
 - 4.4 Complete work documentation as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Program features include one or more of the following:

- file formats
- image catalogues
- program tools

Garment considerations include one or more of the following:

- type of fabric
- colour of fabric
- positioning of design
- suitability of size, design and colour

Edit includes one or more of

- manipulation of height

the following:

- scale
- skew
- rotation
- width
- length
- fonts
- fill
- baseline
- envelopes
- borders
- spacing
- needle penetration
- stitch size and type
- colour

Minor routine maintenance includes one or more of the following:

- checking and replacement of needles, attachments and/or parts
- oiling of machine parts

Assessment Requirements for MSTCL3008 Set and produce digital embroidery

Modification History

Release 1. Supersedes and is equivalent to LMTCL3008B Set and produce digital embroidery

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- planning work tasks to achieve specifications
- preparing workstation and work
- using required machine, computer and program functions
- selecting and editing a variety of stock lettering and motif designs and monograms to produce digitised embroidery effects on garments, such as hats, t-shirts and other simple garments
- producing at least six (6) different embroidery examples using different stock designs and at least two (2) different fabrics
- carrying out minor machine maintenance according to manufacturer specifications
- checking completed work against quality standards
- identifying, reporting and recording any faults, and taking necessary action to repair or discard
- directing completed work to next operation and completing work documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- digital embroidery program features
- embroidery specifications:
 - content
 - colour
 - size, including width and length
 - stitch type and size
 - font
 - fill

- editing tools and procedures
- operating procedures for digitising machines
- characteristics of typical fabrics, threads and other materials
- backing requirements for a range of fabrics and simple garments
- stock lettering and motif designs and monograms
- equipment and materials:
 - digital embroidery machine
 - computer
 - garment
 - threads
 - scissors
 - tape measures
- machine requirements:
 - thread type
 - needle type
 - stitch settings
 - spool requirements
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in setting and producing digital embroidery, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3009 Develop patterns from a block using basic patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTCL3009B Develop patterns from a block using basic patternmaking principles

Application

This unit of competency covers the skills and knowledge required to develop patterns from a block using basic patternmaking principles.

The unit of competency applies to the development of a variety of pattern styles utilising the basic principles of patternmaking, including dart manipulation and square blocking.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

Work is conducted according to defined procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for MSTCL3009 Develop patterns from a block using basic patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTCL3009B Develop patterns from a block using basic patternmaking principles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting and applying correct pattern and garment terminology
- taking measurements
- identifying, selecting and using the appropriate tools and equipment for patternmaking
- selecting the appropriate block and developing a pattern to demonstrate a variety of pattern styles
- applying the patternmaking principles of square block and dart manipulation in developing at least two (2) patterns according to the specifications
- checking pattern pieces for accuracy, including seam and ease allowances, seam match, hems and functional openings
- labelling all pattern pieces, including grain lines, notches, pattern information and cutting instructions
- making toile to test fit and accuracy of pattern and assessing against design specifications
- making any necessary alterations to finalise pattern and check it is accurate, complete and complies with design specifications
- cutting out and labelling pattern pieces accurately
- documenting alterations to patterns
- completing pattern specification sheets and attaching to patterns for storage
- filing finished patterns in storage system.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking principles and design terminology
- patternmaking tools and equipment:
 - pattern blocks

- scissors
- ruler
- square rule
- marker pens
- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- tape measure
- pattern markings:
 - appropriate seam allowance
 - notching
 - pattern information (size, style number, cutting instructions and identity)
 - darts
 - drill holes
 - grain line
 - stitching line
- style features
- fabric performance characteristics
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in developing patterns from a block, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3010 Sew woven and stretch knit garments

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3010B Sew woven and stretch knit garments

Application

This unit of competency covers the skills and knowledge required to sew woven and stretch knit garments.

The unit of competency applies to sewing complete stretch and woven fabric garments or products and may apply to sample machining involving all operations in the assembly of a garment to specification. It covers the skills and knowledge to plan, align and sew complete stretch and woven fabric garments from specifications or patterns using a variety of machines and processes.

Work may be self-directed and unsupervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to sew woven and stretch knit garments	<p>2.1 Identify garment requirements from production specifications</p> <p>2.2 Determine machining requirements and develop a plan for garment construction</p> <p>2.3 Check and lay out work pieces in sequence according to construction plan</p> <p>2.4 Prepare work station, machines and equipment</p>
3	Sew garment	<p>3.1 Sew garment according to requirements for sewing woven and stretch knit fabrics, quality standards and workplace procedures</p> <p>3.2 Sew garment according to requirements for speed of work</p> <p>3.3 Control machine speed and work handling for type of operations, fabrics and product type</p> <p>3.4 Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces, and take required action</p>
4	Complete work	<p>4.1 Inspect garment and check against quality standards, identify any faults and take appropriate action</p>

- 4.2 Record results of inspection of finished garment and take action to either reject or correct faulty garment and record
- 4.3 Record preventative action taken to avoid any recurrence of defective garment
- 4.4 Complete production records and packing slips
- 4.5 Direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

include:

- Garments include one or more of the following:**
- clothing which includes multiple pieces, such as sleeves, collars and trims
 - clothing which is made to production specifications, for example shirts, trousers, dresses, unstructured jackets, skirts, lingerie and briefs

- Prepare workstation, machines and equipment includes the following:**
- setting up workbench and seating according to WHS practices
 - cleaning and checking machines
 - maintaining records
 - setting up and adjusting machines according to specifications for work
 - checking needles, attachments and parts
 - identifying, reporting or replacing worn needles and parts according to manufacturer instructions

- Machines include one or more of the following:**
- plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine
 - blind hemmers
 - buttonholers
 - pocket and collaring machine
 - elasticators
 - binders
 - flat seaming machines

- Set-up includes one or more of the following:**
- correct thread, needle size and length needle guard, tension setting and attachments
 - setting machine tension specific to woven and stretch knit fabrics

- Operations include one or more of the following:**
- sewing techniques specific to stretch and woven fabrics, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points or involving the special handling skills required to accommodate fabric variations
 - production of whole garment from specifications or patterns
 - sample machining
 - processes required to complete whole garment construction

Unit Mapping Information

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3010B Sew woven and stretch knit garments

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTCL3010 Sew woven and stretch knit garments

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3010B Sew woven and stretch knit garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, production specifications
- applying relevant standards
- planning and preparing for product construction
- checking work pieces against pattern or specifications
- preparing workstation and work before commencing sewing operations
- applying appropriate sewing techniques required to construct whole garment form stretch or woven fabric
- sewing at least two (2) garments according to requirements for sewing woven and stretch knit fabrics, quality standards and workplace procedures
- operating one or more machines required for complete operations
- inspecting garment and checking against quality standards, identifying any faults and taking appropriate action to either reject or correct faulty garment and record
- recording preventative action taken to avoid any recurrence of defective garment
- completing production records and packing slips
- directing completed work to next operation or packing section.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of a stretch and woven fabrics
- threads and other materials used in garment assembly
- quality standards and practices
- use and maintenance of production machines, including:
 - plain lockstitch sewing machine
 - three, four or five thread overlocker

- zigzag sewing machine
- blind hemmers
- buttonholers
- button sewers
- pocket and collaring machines
- elasticators
- binders
- garment requirements:
 - work pieces, accessories and trims
 - pattern
 - production or delivery time requirements
 - stitch finishes
- range of sewing techniques required to construct woven and stretch knit garments
- impact of incorrect sewing techniques on stretch and woven fabrics garment construction
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in sewing woven and stretch knit garments, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3011 Contribute to garment production process improvements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3011B Contribute to garment production process improvements

Application

This unit of competency covers the skills and knowledge required to review production processes in garment production and contribute to identifying and implementing improvements.

The unit of competency applies to providing input to improvements in the range of clothing production environments, including volume and custom production.

Improvement contributions may be made to any part of the production process. Work may be self-directed and unsupervised.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to contribute to process improvements	<p>2.1 Identify key elements of production requirements</p> <p>2.2 Review production processes and workplace procedures</p> <p>2.3 Identify methods of monitoring production outcomes</p> <p>2.4 Assess garment production outcomes against production goals</p>
3	Identify improvement opportunities	<p>3.1 Identify opportunities for improvement</p> <p>3.2 Make suggestions for improvement</p> <p>3.3 Test improvement with appropriate personnel</p> <p>3.4 Provide reports, records and recommendations for improvement</p> <p>3.5 Identify implications of improving aspects of production process</p>
4	Implement improvement	<p>4.1 Identify desired result of improvement and establish method of measuring outcome</p> <p>4.2 Identify methods of addressing any possible negative implications and implement</p> <p>4.3 Consult with relevant personnel to communicate</p>

improvement

- 4.4 Implement improvement and monitor outcome to review if it is effective in achieving desired result
- 4.5 Make adjustments to improvement as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Garment production processes include one or more of the following:

- receiving and processing of fibres or fabric
- identification of fibre and fabric quality
- lay-up and cutting of fabric

- making marker
- pressing
- specialist machine use, such as binding, moulding and embroidery
- pattern design, modification and development
- sewing, and machine processes
- repairs and alterations
- blocking and shaping
- trimming and finishing
- testing and inspecting
- despatch, storage and packing
- finishing processes
- WHS
- housekeeping
- waste minimisation and disposal

Value chain includes:

- the entire chain of production from raw materials to distribution of final product

Suppliers include one or more of the following:

- suppliers of fibres, fabrics, trims, buttons, zips, thread and components used in garment production
- personnel, specialist support and contractors
- despatch, warehousing and transport operators
- publicity and promotional suppliers
- machinery and equipment suppliers, and repair contractors

Production waste includes one or more of the following:

- unusable materials and off-cuts
- delays
- movement and transport
- poor process design
- inventory
- inefficient performance of a process
- making defective items

Tests include one or more of the following:

- trial
- verify
- pilot
- measure against research

Appropriate personnel include one or more of the following:

- managers
- supervisors
- colleagues
- specialist staff

Opportunities for improvements include one or more of the following:

- production practice
- documentation
- supply
- despatch
- operator practices
- safety
- quality
- housekeeping

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTCL3011B Contribute to garment production process improvements

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTCL3011 Contribute to garment production process improvements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3011B Contribute to garment production process improvements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- reviewing production processes for garments
- identifying methods of monitoring production outcomes
- assessing garment production outcomes against production goals
- identifying and assessing improvement opportunities for at least two (2) elements of the production process
- testing improvements with appropriate personnel and identifying implications of improving aspects of production process
- providing reports, records and recommendations for improvement
- evaluating implications of improvement
- communicating process improvement options
- implementing improvement and monitoring outcome to review if it is effective in achieving desired result
- making adjustments to improvements as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- the range of garment production processes
- key elements of garment production process:
 - key customers and their needs and expectations
 - garment production processes and how they contribute to the value chain
 - key suppliers their role in the value chain
 - enterprise quality standards for critical points of production process
 - enterprise production requirements

- garment production tools, materials and equipment
- production requirements:
 - timing requirements
 - quantity
 - quality
 - specific order requirements
 - procedural requirements
 - work health and safety (WHS) practices
 - personnel
 - resource use
- quality standards applying to garment handling procedures, construction processes and finished product
- improvement relevant to any part of the production process, including production practices, documentation, supply, despatch, operator practices, safety, quality and housekeeping
- impact of incorrect production techniques on garment construction
- workplace communication procedures
- sequence of operations in the production process
- production suppliers and value chain concepts
- quality standards and practices relevant to garment production
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in contributing to garment production process improvements, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3012 Make marker for complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3012B Make marker for complicated fabrics and lays

Application

This unit of competency covers the skills and knowledge required to make markers for complicated fabrics and lays.

The unit of competency applies to marker-making for multiple garments and layers of fabric before lay-up and cutting, in situations involving complex patterns and a variety of fabrics and lays, using computer-aided or manual processes. It may include two-way markers.

It may include directional fabrics and a number of pattern pieces with a variety of shapes, such as shirts, blouses, trousers, jackets, dresses and skirts.

Work involves discretion, initiative and judgement within defined procedures. Manual or computer-aided techniques may be used.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to make marker	<p>2.1 Set up and prepare work area and equipment according to workplace procedures</p> <p>2.2 Identify marker requirements</p> <p>2.3 Collect required pattern pieces and check manually or by computer</p>
3	Draft lay marker	<p>3.1 Manipulate pattern pieces and position for most efficient use of fabrics</p> <p>3.2 Check pattern grain indication against grain of material</p> <p>3.3 Draw up lay marker according to pattern requirements</p> <p>3.4 Prepare laying-up instructions according to requirements</p>
4	Position marker	<p>4.1 Check marker against order requirements and copy marker either manually or by computer</p> <p>4.2 Place marker on lay</p> <p>4.3 Check marker and lay alignment and take appropriate</p>

action according to job specification

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Work area includes one or more of the following:

- computer workstation
- air flow and flotation tables
- cutting table
- seating

Equipment includes one or more of the following:

- computers and required software
- patterns
- marker card or paper

- fabric
- marker card or paper
- weights
- clamps

Marker requirements include the following:

- fabric type
- fabric width
- product quantity
- garment sizes
- wastage allowances

Manipulate and position includes one or more of the following:

- manually onto paper
- manually directly onto the fabric
- using appropriate computer software

Fabric includes one or more of the following:

- wovens, such as:
 - denim
 - wool suitings
 - corduroy
 - satins
 - chiffon
 - rayons
- knits such, as:
 - polar fleece
 - double knits
 - single knits
 - tricot
 - directional and checked patterned fabrics

Assessment Requirements for MSTCL3012 Make marker for complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3012B Make marker for complicated fabrics and lays

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting work or job specifications and cutting order as it applies to marker-making
- setting up manual or computer drafting equipment before commencement of marker-making operations
- collecting required pattern pieces and checking manually or by computer
- manipulating pattern pieces using manual or computer techniques to make at least two (2) markers that make most efficient use of fabric involving complex patterns, a variety fabrics and lays
- checking marker against order requirements and copying marker either manually or by computer
- placing marker on lay
- checking marker and lay alignment and taking appropriate action according to job specification.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- marker-making techniques
- garment components
- pattern features
- characteristics of fabrics and other materials used in garment assembly, such as woven fabrics (denim, wool suitings, corduroy, satins, chiffon and rayons) and knits (polar fleece, double knits, single knits and tricot)
- impact on marker of directional fabrics
- computer operations for marker-making, copying and storage
- quality standards and practices

- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in making marker for complicated fabrics and lays, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. MSTCL3013 Interpret patterns and apply pattern information

Modification History

Release 1. Supersedes and is equivalent to LMTCL3013B Interpret patterns and apply pattern information

Application

This unit of competency covers the skills and knowledge required to interpret patterns and apply pattern information.

The unit of competency applies to interpreting a variety of pattern styles, using patternmaking terminology and applying the basic principles of pattern making. It includes applying pattern information and specifications to the relevant processes of garment construction.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|---|-----|---|
| | requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Analyse patternmaking process | 2.1 | Identify patternmaking terminology and principles of patternmaking |
| | | 2.2 | Identify block construction as required |
| | | 2.3 | Identify and analyse patternmaking and pattern-modification processes |
| | | 2.4 | Analyse impact of patternmaking on production |
| 3 | Interpret patterns | 3.1 | Identify pattern pieces and check against pattern chart |
| | | 3.2 | Identify and interpret pattern markings |
| | | 3.3 | Identify garment style features, interpret garment requirements and clarify where necessary |
| | | 3.4 | Interpret pattern information and specifications |
| 4 | Apply pattern information and specifications | 4.1 | Apply pattern information and specifications to garment production |
| | | 4.2 | Check pattern pieces, information and specifications for accuracy throughout garment production process |
| | | 4.3 | Identify and report garment production faults relating to pattern or pattern information and specifications |
| | | 4.4 | Complete production documentation as required |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Patternmaking principles include the following:**
- dart manipulation
 - adding fullness
 - contouring

- Pattern chart includes one or more of the following:**
- details of pattern pieces
 - style details
 - fabric swatches
 - trade drawing
 - special pattern information

- Garment style features include three or more of the following:**
- garment type
 - collar
 - sleeves
 - yoke
 - sides
 - openings
 - neckline
 - buttons
 - seams
 - zips
 - gathers
 - pleats
 - panels
 - tucks

Unit Mapping Information

Assessment Requirements for MSTCL3013 Interpret patterns and apply pattern information

Modification History

Release 1. Supersedes and is equivalent to LMTCL3013B Interpret patterns and apply pattern information

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures and safe work practices, pattern charts
- applying relevant standards
- interpreting and using pattern and garment terminology
- identifying pattern pieces and checking against pattern chart
- identifying and interpreting all pattern markings
- identifying garment style features, interpreting garment requirements and clarifying, where necessary
- applying patternmaking principles to construct patterns for at least two (2) garments according to specifications and workplace quality standards
- checking pattern pieces, information and specifications for accuracy throughout garment production process
- identifying and reporting garment production faults relating to pattern or pattern information and specifications
- completing production documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking and design terminology
- impact of patternmaking on production
- pattern markings:
 - notches
 - grain line
 - seam lines
 - drill holes
 - darts
 - cutting instructions

- style number
- size
- seam allowance
- cutting line
- stitching line
- style features
- fabric performance characteristics
- quality standards and practices
- sequence of pattern operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in interpreting patterns and applying pattern information, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3014 Interact and communicate with garment production personnel

Modification History

Supersedes and is equivalent to LMTCL3014B Interact and communicate with garment production personnel

Application

This unit of competency covers the skills and knowledge required to interact and communicate with others in the garment production process to ensure production outcomes are achieved.

The unit applies to implementing techniques to interact and communicate effectively with others, including applying knowledge of the information requirements of other production personnel.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to implement workplace communication practices**
 - 2.1 Identify roles of different production personnel
 - 2.2 Identify routine workplace communication channels and tools, and apply workplace procedures
 - 2.3 Identify communication protocols of different garment production personnel
 - 2.4 Identify workplace interaction and communication practices and quality standards

- 3 **Communicate production-related information**
 - 3.1 Identify objectives and benefits of communicating production-related information effectively
 - 3.2 Use appropriate communication tools
 - 3.3 Routinely use language and terminology that is appropriate to production process when interacting with work team, to ensure required meaning is accurately communicated
 - 3.4 Seek and respond to feedback to ensure communication in relaying production concepts and requirements is effective
 - 3.5 Seek assistance from appropriate personnel to resolve any difficulties that arise in communication
 - 3.6 Document outcomes of communication and information received according to workplace procedures and maintain records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Production personnel include one or more of the following:

- patternmakers
- designers
- cutters
- pressers
- despatch personnel
- machinists
- supervisors

Communication channels and tools

- sketches, drawings, illustrations and photographs

include one or more of the following:

- samples of fabrics and garments
- written descriptions and instructions
- specification sheets
- storyboards
- meetings
- computers, internet and email
- databases

Protocols include one or more of the following:

- specific formats
- timing and content of communication required by others performing related garment production processes

Quality standards include one or more of the following:

- accepted formats for presenting ideas and concepts
- standards of presentation for drafts and final versions
- layout and content

Objectives of effective communication for production include one or more of the following:

- clarify production processes
- suggest improvements to processes, patterns or designs
- convey information about production
- report difficulties or problems
- handover production to next process

Interacting and communicating includes one or more of the following:

- face to face
- by telephone
- writing

Appropriate personnel includes one or more of the following:

- supervisor
- work colleagues
- colleagues with specific and relevant expertise

Unit Mapping Information

Assessment Requirements for MSTCL3014 Interact and communicate with garment production personnel

Modification History

Supersedes and is equivalent to LMTCL3014B Interact and communicate with garment production personnel

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- using appropriate industry terminology and language
- interacting with production personnel to achieve agreed outcomes
- applying an understanding of the objectives of effective communication on production, and roles and information needs of different production personnel on at least two (2) occasions
- using different communication tools and channels as appropriate
- seeking and responding to appropriate feedback to ensure communication in relaying production concepts and requirements is effective
- seeking assistance from appropriate personnel to resolve any difficulties that arise in communication
- documenting outcomes of communication and information received according to workplace procedures, and maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- workplace communication practices and quality standards
- benefits of effective communication
- accepted ways of communicating information in the workplace
- roles of different production personnel
- ways to effectively manage information
- uses of a variety of communication tools
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in interacting and communicating with garment production personnel, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL4001 Perform sample machining of advanced construction garments

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL4001A Perform sample machining of bespoke garments

Application

This unit of competency covers the skills and knowledge required to interpret design and advanced construction pattern specifications, and perform sewing operations to complete sample garments.

This unit of competency applies to sample machining of garments involving all sewing operations required to sew a complete design sample featuring advanced construction, and assemble complete garments to design specifications.

Work is independent, with the operator being responsible for own outcomes and may have some responsibility for the work of others.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3002 Prepare and produce a complex whole garment from specifications

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to machine advanced construction garment	2.1	Analyse design specifications to identify advanced construction requirements
		2.2	Prepare workstation tools and equipment
		2.3	Examine garment components to ensure that they comply with pattern specifications and make any adjustments as required
		2.4	Determine advanced construction requirements and plan sequence of operations
3	Sew garment	3.1	Conduct sewing operations according to requirements of pattern, component detail and design
		3.2	Use all machines required to produce a complete design sample
		3.3	Control machine speed and work handling for type of operations, fabrics and product

- 3.4 Regularly check performance of machine for signs of faulty operation
 - 3.5 Perform garment embellishment, where necessary, to meet design specifications
 - 3.6 Finish garment and inspect against design and pattern specifications
 - 3.7 Record results of inspection of finished garment
- 4 **Review design and production processes**
- 4.1 Identify garment construction problems, provide feedback to designers and patternmakers, and document
 - 4.2 Review production processes to assess timing and task requirements and identify alternative processes to achieve more efficient or effective outcomes
 - 4.3 Use appropriate communication tools to review sample garment and production with appropriate personnel
 - 4.4 Document outcomes of communication and maintain records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions

- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Garments include one or more of the following:

- commercially tailored garments, such as:
 - suits
 - coats
 - jackets
 - trousers
 - skirts
 - dresses
 - evening wear

Determine construction requirements include the following:

- analysing pattern to determine machining and assembly requirements
- examining fabrics, trims and accessories and preparing items for attachment
- clarifying construction or design details with the designer or pattern maker as required
- developing plan for garment construction and sequence of operations

Machines include three or more of the following:

- plain lockstitch sewing machine
- three, four or five thread overlocker
- zigzag sewing machine
- blind hemmers
- buttonholers
- pocket and collaring machines
- elasticators
- binders
- specialist machines, such as binding, moulding and

embroidery

Unit Mapping Information

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL4001A Perform sample machining of bespoke garments

Assessment Requirements for MSTCL4001 Perform sample machining of advanced construction garments

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL4001A Perform sample machining of bespoke garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, design specifications
- applying relevant standards
- preparing and setting up machines and determining all construction requirements
- operating and maintaining at least three (3) types of machines required for complete operations
- performing a range of sewing operations, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, and where special handling skills are required to accommodate fabric variations
- completing all operations to sew at least two (2) complex whole advanced construction garments that include multiple pieces, such as sleeves, collars and trims according to garment requirements, quality standards and required operations
- controlling machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
- performing embellishment, where required, and finishing garment to meet design specifications
- inspecting garment construction problems, providing feedback to designers and patternmakers and documenting
- reviewing production processes, identifying alternative processes to achieve more efficient or effective outcomes, and using appropriate communication tools to review sample garment and production with appropriate personnel
- documenting outcomes of communication and maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards

- characteristics of a variety of fabrics, threads and other materials used in garment assembly
- design specifications for advanced construction garments, such as:
 - type of garment
 - style requirements
 - fit model specifications
 - sizing
 - design restrictions or conditions
 - trims and accessories
 - fabric
- sequence of operations to produce a completed sample product
- operation of variety of production machines required to complete garment assembly
- construction specifications, such as:
 - multiple interfacings
 - tailored collars
 - cut-in pockets
 - vents
 - linings
 - wide range of commonly used and specialised fabrics
- machine set-up:
 - clean machines
 - set up and adjust machines according to specifications for work
 - check needles, attachments and parts
 - identify worn needles and parts and report or replace according to manufacturer instructions
- hand embellishment techniques, such as:
 - beading
 - smocking
 - embroidery stitches
 - fabric manipulation
- machine embellishment, such as:
 - quilting
 - pintucking
 - shirring
 - machine embroidery
 - appliqué
 - lace insertion
- garment finishing, such as:
 - trimming loose threads
 - checking

- spotting
- sorting
- hand or machine sewing buttons or fasteners
- hand or machine sewing hems
- securing lining
- sewing and cutting buttonholes
- attaching accessories or trims
- attaching tickets and labels
- bundling
- communication with appropriate personnel:
 - managers
 - colleagues
 - specialist staff
 - designers
 - patternmakers
 - production supervisors
- quality practices
- workplace procedure
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in performing sample machining of advanced construction items, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL4002 Assemble and fit commercially tailored or bespoke garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4002A Assemble and fit commercially tailored or bespoke garments

Application

This unit of competency covers the skills and knowledge required to assemble and fit commercially tailored or bespoke garments.

The unit applies to work that requires discretion and judgement, for both self and others, in planning and selecting processes, procedures and outcomes in response to a tailored or bespoke garment brief. It includes pinning and sewing of fabric pieces, initial assembly, sewing whole garment, fitting and modifying the garment as required to meet customer requirements. It also involves hand sewing, completing trims and undertaking alterations as required to confirm correct sizing, look and wearer comfort.

Degree of complexity may vary depending on the characteristics of the fabrics being used and intricacy of design.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to fit bespoke garments	<p>2.1 Pin and sew together fabric pieces and linings, as required, and hang appropriately in readiness for assembly</p> <p>2.2 Conduct first fitting with the client and make changes, as required</p> <p>2.3 Use effective communication strategies to interact with client and respond to client feedback with discretion</p>
3	Assemble garment	<p>3.1 Sew together pieces to form the whole garment in accordance with pattern specifications and workplace procedures</p> <p>3.2 Press garment in accordance with requirements</p> <p>3.3 Assess second fitting of garment with client</p> <p>3.4 Determine any modifications needed in consultation with the client</p>
4	Finish garment	<p>4.1 Undertake alterations, where relevant</p>

- and conduct final fitting**
- 4.2 Assess hand sewing and apply trims in accordance with design requirements and quality criteria
 - 4.3 Finish garment to meet specifications and attach appropriate labels
 - 4.4 Conduct final fitting to ensure client satisfaction and to confirm correct sizing, look and wearer comfort
 - 4.5 Prepare all relevant paperwork and documentation in accordance with workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Tailored garments include one or more of the following:

- suits
- coats
- jackets
- trousers
- skirts
- dresses

Communication strategies include the following:

- effective verbal and non-verbal communication
- oral, written and visual communication
- active listening
- positive language
- recognising and adapting to cultural differences
- negotiation and conflict resolution skills

Garment assembly includes the following:

- using appropriate machine, such as:
 - plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine
- hand sewing
- applying trims

Quality criteria includes the following:

- proportion
- perspective
- symmetry and balance
- detailing
- neatness

Assessment Requirements for MSTCL4002 Assemble and fit commercially tailored or bespoke garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4002A Assemble and fit commercially tailored or bespoke garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- preparing and assembling pieces for at least two (2) types of garment
- conducting first, second and final fittings to meet client specifications and correct fit on at least two (2) occasions
- performing alterations
- hand and machine sewing and applying trims to achieve quality criteria
- communicating effectively with clients
- finishing garment to meet specifications and attaching appropriate labels
- conducting final fitting to ensure client satisfaction and to confirm correct sizing, look and wearer comfort
- preparing all relevant paperwork and documentation in accordance with workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- garment construction
- assembly methods using machining and hand sewing
- fabric properties and their characteristics
- quality practices
- interpersonal communication
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in assembling and fitting tailored or bespoke garments, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL4003 Measure, lay up and cut custom-made garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4003A Measure, lay-up and cut custom-made garments

Application

This unit of competency covers the skills and knowledge required to perform cutting to order for one-off single lays within the clothing industry.

This unit applies to measuring, laying-up and cutting material to produce custom-made garments. The unit includes skills and knowledge to assess all relevant body characteristics and determine, measure and interpret relevant body measurements. Discretion and judgement may be required, for both self and others, in planning and selecting processes, procedures or outcomes.

The degree of complexity may vary depending on characteristics of the fabrics being used and intricacy of design. Measuring and laying up tasks may be associated with operations where size, shape and cost of fabric are significant. The unit includes skills and knowledge to select or modify the pattern and perform cutting to meet design requirements and any special needs of the client.

Measuring, cutting and pattern selection or alteration may be combined in made to measure specialist order cutting.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1 Follow standard operating procedures (SOPs) 1.2 Comply with work health and safety (WHS) requirements at all times 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to cut custom-made garments	2.1 Obtain relevant body measurements of client 2.2 Interpret garment measurements to suit special body characteristics of client 2.3 Consult client to confirm design and pattern requirements 2.4 Determine preferred fabric and incorporate special needs of the client into the design, where required 2.5 Chalk design into the pattern or select/modify the pattern to meet the requirements
3	Lay up and cut material	3.1 Check material for quality, faults, width, selvages, dye lot and marking requirements 3.2 Lay up material and check alignment to ensure conformance to specifications 3.3 Cut material to meet design requirements and measurements of the pattern 3.4 Prepare all relevant paperwork and documentation in accordance with workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Body measurements include one or more of the following:

- height and weight
- reference points, such as nape, waist point, seat vertex, abdomen vertex, carpus, neck base, upper sternum, bust point and pelvic bone
- levels, such as crown, shoulder, armscye, bust or chest, waist, hip, crotch and knee
- girth measurements, such as waist, bust or chest, hip, high hip, upper and under bust, head circumference, upper arm, wrist, thigh, calf, ankle, heel/instep
- horizontal measurements, such as shoulder, shoulder breadth,

- across front, across back and bust point to bust point
 - vertical measurements, such as nape to centre back waist, nape to neck base, nape to bust or chest, nape to waist, nape to wrist, centre front waist to floor, centre back waist to floor, right-hand side waist to floor, left-hand side waist to floor, waist to hip, inside leg, body rise, arm length, and neck length
 - cup size
 - shoe size
 - seat prominence
 - thigh
 - knee
 - instep
 - calf
 - posture
- Body characteristics include one or more of the following:**
- genetic, developmental and structural influences
 - shape classifications, such as hourglass, rectangular, pea and inverted triangle
 - anthropometric classifications (somatotypes)
 - shoulder slope (raised, normal and sloping)
 - body sway and postural asymmetry (according to lower and upper body)
 - proportions (tall, short or average, short or long-waisted and mid-body shortness)
- Lay-up and cut material includes the following:**
- laying-up tasks associated with laying-up operations where size, shape and cost of fabric are significant
 - measuring, cutting and pattern selection or alteration combined in custom-made specialist order cutting

Unit Mapping Information

Assessment Requirements for MSTCL4003 Measure, lay up and cut custom-made garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4003A Measure, lay-up and cut custom-made garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- obtaining accurate measurements from at least two (2) clients
- interpreting garment measurements to suit special body characteristics of client, on at least two (2) occasions
- determining preferred fabric and incorporating special needs of the client into the design, where required
- consulting and communicating effectively with the client for the presentation of ideas and designs and ensuring design is suitable for client
- chalking design into the pattern or selecting/modifying the pattern to meet the requirements
- checking material for quality, faults, width, selvages, dye lot and marking requirements
- laying-up and aligning material with pattern
- cutting material to meet design requirements and measurements of the pattern
- preparing all relevant paperwork and documentation in accordance with workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- garment construction
- assembly methods
- fabric properties such as weight, shrinkage, pile, grain and pattern shapes
- the importance of the selvedge and bias of fabrics and their characteristics
- interpersonal communication
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in measure, lay-up and cut custom-made garments, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. MSTCL4004 Determine and perform garment maintenance or repair

Modification History

Release 1. Supersedes and is equivalent to LMTCL4004A Determine and perform garment maintenance or repair

Application

This unit of competency covers the skills and knowledge required to assess garments for maintenance or repair and to undertake the required maintenance and repairs.

This unit of competency applies to the range of repairs that typically apply in specialised garment repair situations, where the complexity and degree of responsibility will be dependent on the size of the enterprise and internal work organisation.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for MSTCL4004 Determine and perform garment maintenance or repair

Modification History

Release 1. Supersedes and is equivalent to LMTCL4004A Determine and perform garment maintenance or repair

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- assessing at least ten (10) garments or fabric types and determining required maintenance or repair
- calculating costs
- assessing or organising cleaning or laundering of garment, where necessary
- repairing and restoring at least ten (10) garments or fabric types to optimum condition, using a range of maintenance and repair techniques, in accordance with workplace procedures
- preparing garment for storage, where appropriate

maintaining records and preparing reports, where necessary, in accordance with workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of fibres and fabrics
- variety of fabrics/materials and how they react to laundering, dry cleaning or spot cleaning
- appropriate testing procedures
- cleaning agents and the effect they have on a range of fabrics/materials, including those that are fragile and easily damaged
- garment repair techniques and their application
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in garment maintenance and repair, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise

Modification History

Release 1. Supersedes and is equivalent to LMTDC2001A Provide customer service in a dry cleaning or laundry enterprise

Application

This unit of competency covers the skills and knowledge required to provide service to dry cleaning or laundry customers. It applies to interacting with customers to identify and satisfy customer requirements, including referral to appropriate personnel where applicable.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Establish customer requirements**
 - 2.1 Seek information from customer to determine the service they require
 - 2.2 Outline available services with the customer and discuss specific options for dry cleaning or laundry needs, where necessary
 - 2.3 Identify situations that need additional assistance and refer customer to appropriate service
 - 2.4 Determine service charges and confirm with customer
- 3 **Interact with customer to process required service**
 - 3.1 Identify or confirm article, fabric and dry cleaning or laundry requirements
 - 3.2 Complete instructions, including special attention tags, to identify article and cleaning requirements
 - 3.3 Process customer records and reference docketts, including record of damage and missing trim
 - 3.4 Hang articles or store, ready for dry cleaning or laundry
 - 3.5 Retrieve cleaned article and do a final check to ensure customer requirements have been met
 - 3.6 Present article to customer and process transaction through point of sale equipment according to workplace practices
 - 3.7 Use effective interpersonal communication skills
- 4 **Handle customer complaints**
 - 4.1 Acknowledge any customer complaints and clarify specific difficulties
 - 4.2 Propose options to resolve complaints and negotiate a suitable solution with customer

- 4.3 Notify relevant staff and identify strategies to avoid or resolve complaints
- 4.4 Use effective communication skills to demonstrate respect for cultural differences in the workplace
- 4.5 Refer customer to other sources if they need further assistance

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Unit Mapping Information

Assessment Requirements for MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise

Modification History

Release 1. Supersedes and is equivalent to LMTDC2001A Provide customer service in a dry cleaning or laundry enterprise

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- greeting customer and determining dry cleaning or laundry requirements
- dealing with customer to complete transactions, including operating associated equipment on at least two (2) occasions
- conducting final check of articles
- identifying other sources of assistance
- negotiating solutions to problem situations, service complaints and enquiries
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- workplace or store policies and procedures
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- care and maintenance procedures for articles
- point of sale techniques
- quality practices
- effective communication skills
- problem solving and negotiation strategies
- workplace practices
- practices for recording and reporting
- federal and state or territory legislative or regulatory requirements.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in providing customer service in a laundry or dry cleaning enterprise, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents

Modification History

Release 1. Supersedes and is equivalent to LMTDC2012A Conduct safe handling of dry cleaning chemicals and solvents

Application

This unit of competency covers the skills and knowledge required to handle and work with dry cleaning chemicals and solvents commonly used in dry cleaning operations.

This unit of competency applies to operators who prepare, use and store dry cleaning chemicals and solvents when performing dry cleaning operations.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning operations and laundry operations

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to use dry cleaning chemicals and solvents	2.1	Access information on dry cleaning chemicals and solvents
		2.2	Identify personal responsibilities in working with cleaning chemicals
		2.3	Interpret common terminology in safety data sheets (SDS) for cleaning chemicals
		2.4	Identify procedures for using chemicals in a cost-effective manner
3	Identify chemical control measures	3.1	Identify risks associated with cleaning chemicals and operator use
		3.2	Identify measures for controlling risks
		3.3	Implement correct procedures for calculating quantities and measuring cleaning chemicals
		3.4	Identify local procedures to document procedures and respond to environmental considerations
4	Apply safe handling of dry cleaning chemicals and solvents	4.1	Ventilate work area and eliminate ignition sources
		4.2	Identify cleaning chemicals, measure, handle and store according to WHS practices and workplace procedures
		4.3	Safely operate machinery and equipment associated with use of cleaning chemicals
		4.4	Report WHS issues, faults or emergencies to relevant personnel
		4.5	Demonstrate procedures to act upon accidents and

emergencies according to procedures for the cleaning chemical

- 4.6 Maintain work area and dispose of cleaning chemicals according to regulatory requirements, environmental considerations and SDS recommendations

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Access information on dry cleaning chemicals and solvents includes the following:

- identifying relevant regulations and codes of practice relating to the control of hazardous substances
- assessing workplace information and workplace procedures regarding the safe handling of cleaning

chemicals

- identifying chemicals and their characteristics
- differentiating between toxic agents, corrosives, reactives, and flammables and combustibles

Dry cleaning chemicals and solvents include one or more of the following:

- perchlorethylene
- white spirit
- hydrocarbon
- liquid silicon
- detergent
- chlorine bleach
- oxybleach
- builder
- starch
- fabric conditioner
- laundry sour
- caustic alkali

Workplace information includes the following:

- SDS for hazardous substances
- workplace procedures
- signage and labelling
- verbal instruction

Risks include one or more of the following:

- mixing of chemicals
- spills and leaks in the workplace
- chemical fires
- exposure to perchlorethylene or other cleaning chemicals via absorption
- inhalation or ingestion

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTDC2012A Conduct safe handling of dry cleaning chemicals and solvents

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents

Modification History

Release 1. Supersedes and is equivalent to LMTDC2012A Conduct safe handling of dry cleaning chemicals and solvents

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- identifying risks and control measures
- complying with industry regulations and codes of practice that govern the control of chemicals in the workplace
- differentiating between toxic agents, corrosives, reactives, and flammables and combustibles
- locating and interpreting safety data sheets (SDS) and other available safety information on dry cleaning chemicals
- identifying procedures for responding to accidents, incidents and emergencies according to procedures for the cleaning chemical
- accurately identifying and measuring dry cleaning chemicals for at least five (5) different garment types
- using personal protective equipment (PPE)
- demonstrating procedures to act upon accidents and emergencies according to procedures for the cleaning chemical
- transferring, storing and disposing of cleaning chemicals safely and with respect to environmental considerations
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of PPE
- Australian Standards, industry regulations and codes of practice that govern the control of chemicals in the workplace
- characteristics of different chemicals and solvents used in the dry cleaning industry: toxic agents, corrosives, reactives, and flammables and combustibles
- workplace procedures relating to dry cleaning chemical use
- personal responsibilities in the control of dry cleaning chemicals in the workplace:
 - following work health and safety (WHS) procedures

- following workplace procedures
- following environmental procedures
- reporting incidents
- using PPE
- risks of exposure to chemicals by absorption, inhalation and ingestion
- health risks arising from exposure to cleaning chemicals
- the meaning of common SDS terms
- risks associated with operating machinery or equipment that use cleaning chemicals
- procedures for the safe and cost-effective measuring and mixing of chemicals and other agents
- workplace procedures for reporting emergencies or WHS issues, control of chemical spills and fires, hazard identification and control measures
- reporting and documentation requirements.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in conducting safe handling of dry cleaning chemicals and solvents, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2003 Identify pre- and post-spotting requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC2011A Identify pre- and post-spotting requirements

Application

This unit of competency covers the skills and knowledge required to recognise and identify types of stains and other marks on articles or garments, and determine and document spotting treatment requirements.

This unit of competency applies to operators who are responsible for identifying types of stains and other marks that require spotting prior to and after dry cleaning, and determining the required spotting procedure. This unit does NOT cover skills required for implementing spotting procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning operations and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Determine spotting requirements | 2.1 | Follow required steps to identify the type of stain or mark |
| | | 2.2 | Identify fabric characteristics and type of stain |
| | | 2.3 | Read and interpret relevant workplace procedures and instructions |
| | | 2.4 | Determine spotting agents and procedures that are appropriate to the stain, fibre and fabric, and dye and colour characteristics |
| | | | |
| 3 | Communicate spotting requirements | 3.1 | Document spotting requirements and communicate to customer or work personnel |
| | | 3.2 | Label article and forward it for spotting treatment |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Types of stain include one or more of the following:

- organic or non-organic
- dye stains
- albumin stains
- protein stains
- vegetable adhesives
- mustard
- tomato sauce
- wine

Procedures for identifying the type of stain include the following:

- considering the information provided by the customer
- identifying the colour of the stain
- identifying the feel or odour of the stain

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTDC2011A Identify pre- and post-spotting requirements

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTDC2003 Identify pre- and post-spotting requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC2011A Identify pre- and post-spotting requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- recognising fibres, fabric types, dyes and colour categories
- recording non-removable stains and defects
- identifying at least five (5) different kinds of stains and marks on a variety of common fabrics, and their appropriate removal procedures to suit the stain, fibre and fabric, and dye and colour characteristics
- maintaining quality requirements for each stage of the process
- communicating and documenting spotting requirements to customer and work personnel
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- characteristics of fibres, fabrics, dyes or colours and the effects of the spotting procedure
- stain identification procedures, including steps to be followed
- types of special spotting agents
- wet-side and dry-side agents:
 - sodium thiosulphate
 - formic acid
 - oxalic acid
 - iodine
 - acetone
 - methyl alcohol
 - oxidising and reducing bleaches
 - digestion agents

- solvents
- detergents
- spotting techniques
- environmental aspects related to workplace and machine or equipment operation and manual handling
- quality practices
- workplace practices
- processes to communicate and document spotting requirements to customer and work personnel
- federal and state or territory legislative or regulatory requirements.

Assessment Conditions

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- characteristics of fibres, fabrics, dyes or colours and the effects of the spotting procedure
- stain identification procedures, including steps to be followed
- types of special spotting agents
- wet-side and dry-side agents:
 - sodium thiosulphate
 - formic acid
 - oxalic acid
 - iodine
 - acetone
 - methyl alcohol
- oxidising and reducing bleaches

MSTDC2004 Operate dry cleaning machines

Modification History

Release 1. Supersedes and is equivalent to LMTDC2004A Operate dry cleaning machines

Application

This unit of competency covers the skills and knowledge required to load articles into machines, monitor procedures and process articles according to specifications and quality requirements.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs

- 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare for dry cleaning**
 - 2.1 Identify production schedule and work load priorities to plan work
 - 2.2 Determine dry cleaning machine loads by counting, weight, volume or classification
 - 2.3 Determine correct load size or weight by reading indicator scales
 - 2.4 Follow dry cleaning machine operator instructions and schedules for a given process or article
 - 2.5 Complete records according to workplace practices
- 3 **Operate dry cleaning machine**
 - 3.1 Load machine with correct weight for machine according to garment classification, manufacturer specifications, workplace procedures and WHS practices
 - 3.2 Select program for load type or classification
 - 3.3 Select additive dispensing and prepare for dosing system, where relevant
 - 3.4 Operate machine in accordance with operating instructions
 - 3.5 Monitor additives and dosing for correct operation and report faults, where appropriate
 - 3.6 Monitor machine operation and dry cleaning procedures
 - 3.7 Unload garments using correct manual handling techniques
 - 3.8 Complete records
- 4 **Finalise and review dry cleaning**
 - 4.1 Check dry cleaning machine operation for correct operation
 - 4.2 Report machine operational faults

- 4.3 Review processes to optimise environmental protection, waste disposal, pollution control and recycling
- 4.4 Hang articles or sort and inspect for stains or further treatment, according to finishing requirements and quality standards
- 4.5 Direct garments to correct area for finishing

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Dry cleaning machines include one or more of the following:

- microprocessor
- computer-controlled

Assessment Requirements for MSTDC2004 Operate dry cleaning machines

Modification History

Release 1. Supersedes and is equivalent to LMTDC2004A Operate dry cleaning machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities
- selecting appropriate program and monitoring operations and equipment on at least two (2) occasions
- determining dry cleaning machine loads by counting, weight, volume or classification on at least two (2) occasions
- loading machine appropriately and selecting appropriate additives on at least two (2) occasions
- using correct manual handling techniques
- using and handling additives and chemicals safely
- optimising environmental protection, waste disposal, pollution control and recycling
- hanging articles, sorting and inspecting for stains or further treatment, according to finishing requirements and quality standards, and directing garments to correct area for finishing
- maintaining records
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- workplace or store policies and procedures
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- care and maintenance procedures for articles
- safe handling and use of additives and chemicals:
 - perc spirit
 - hydrhlorethylene
 - whiteocarbon

- liquid silicon
- detergent
- chlorine bleach
- oxybleach
- builder
- starch
- fabric conditioner
- laundry sour
- caustic alkali
- machine operation, program selection and monitoring procedures
- level of operator maintenance for between load servicing
- characteristics and hazards of additives and dosing systems
- environmental aspects related to workplace, and machine or equipment operation
- practices for recording and reporting
- federal and state or territory legislative or regulatory requirements.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in operating dry cleaning machines, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs

- | | | | |
|---|---|-----|--|
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare for wet cleaning | 2.1 | Identify production schedule and work load priorities to plan work |
| | | 2.2 | Determine machine and equipment loads by weight or classification |
| | | 2.3 | Determine size of load by weighing and reading indicator scales |
| | | 2.4 | Follow wet cleaning machine operator instructions and schedules for a given process or article |
| | | 2.5 | Complete records according to workplace procedures and instructions |
| 3 | Operate wet cleaning machine | 3.1 | Load machine with correct weight for machine according to product classification manufacturer specifications, workplace procedures and WHS practices |
| | | 3.2 | Determine wet cleaning program for type of wash |
| | | 3.3 | Select water levels and temperature for load type |
| | | 3.4 | Add appropriate additives to machine |
| | | 3.5 | Operate machine in accordance with operating instructions |
| | | 3.6 | Prepare additives and dosing system and monitor for correct operation and report faults |
| | | 3.7 | Unload articles using correct manual handling techniques |
| | | 3.8 | Complete records |
| 4 | Finalise and review wet cleaning | 4.1 | Check machine operation for correct water, temperature and additives levels, and program operation |
| | | 4.2 | Report washing machine operational faults |

- 4.3 Monitor discharge from washing machine to optimise environmental protection and waste disposal
- 4.4 Hang articles or sort and inspect for stains or further treatment, according to finishing requirements and quality standards
- 4.5 Direct articles to correct area for finishing, drying or further processing

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machine and equipment includes one or more of the

- microprocessor
- computer controlled

following:

- small wet cleaning machines in the 2.5 to 25 kg capacity range
- weighing machines

MSTDC2006 Operate finishing equipment

Modification History

Release 1. Supersedes and is equivalent to LMTDC2006A Operate finishing equipment

Application

This unit of competency covers the skills and knowledge required to finish dry cleaned articles ready for despatch.

This unit of competency applies to finishing dry cleaned articles, machine operation, monitoring and inspection procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Operate finishing equipment**
- 2.1 Perform procedures for start-up and stopping of finishing equipment
 - 2.2 Check schedules to ensure finishing operations meet workplace requirements for quality and quantity
 - 2.3 Classify, sort and prepare articles according to finishing and re-work requirements
 - 2.4 Place articles into or on finishing equipment and operate equipment in accordance with workplace requirements for quality and quantity
 - 2.5 Monitor machines and adjust for correct operation in accordance with manufacturer specifications, WHS practices and environmental protection
 - 2.6 Report machine problems or faults outside area of responsibility to relevant personnel
- 3 **Finalise and review finishing**
- 3.1 Inspect articles against quality standards
 - 3.2 Return articles not meeting quality standards for re-processing
 - 3.3 Identify damaged or torn articles for repair or return in accordance with workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Operate includes one or more of the following:

- manual handling techniques
- safe use of machines and related equipment
- reporting procedures for faults and safety checks
- production requirements

Finishing equipment includes one or more of the following:

- air operated
- microprocessor controlled
- finishing equipment
- steam tunnel
- trouser topper
- trouser legger
- puff iron
- air and steam finisher
- hand iron
- hot head press
- utility press

Unit Mapping Information

Assessment Requirements for MSTDC2006 Operate finishing equipment

Modification History

Release 1. Supersedes and is equivalent to LMTDC2006A Operate finishing equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities
- selecting, operating and monitoring at least two (2) types of finishing equipment for two (2) different types of garments
- maintaining quality requirements for each stage of the process
- identifying articles that are damaged, torn, or require reprocessing
- using correct manual handling techniques
- using and handling additives and chemicals safely
- checking garments for quality
- complying with relevant federal and state or territory legislative or regulatory requirements

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- finishing equipment and their applications
- machine operation, monitoring, and adjustment procedures
- fibres and fabrics and the effects of heat and steam
- level of operator maintenance
- inspection processes
- environmental aspects of related to workplace and machine, or equipment operation and manual handling
- quality practices
- federal and state or territory legislative or regulatory requirements.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in operating finishing equipment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2007 Receive and sort articles for cleaning

Modification History

Release 1. Supersedes and is equivalent to LMTDC2007A Receive and sort articles for cleaning

Application

This unit of competency covers the skills and knowledge required to receive and sort articles, such as garments and linen, and ensure that no foreign object or contaminant is included.

This unit of competency applies to recording and classifying articles for dry cleaning or laundry purposes and may include garments, linen or other fabric products.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Work should comply with Australian Standard *AS/NZS 4146:2000 Laundry practice*.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning operations and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Receive and classify articles**
 - 2.1 Receive articles, record and identify according to industry procedures
 - 2.2 Record any existing damage, missing components or other related detail
 - 2.3 Interpret and apply product handling procedures and instructions
 - 2.4 Identify articles to be processed from manufacturer labels and care labelling or workplace testing procedures
 - 2.5 Classify articles according to their colour, care requirements and fabric type
 - 2.6 Provide customer service and use related equipment for stock management and financial transaction processes, as required, according to workplace procedures

- 3 **Prepare articles for cleaning**
 - 3.1 Identify, safely remove and dispose of foreign objects and lost property according to environmental protection, waste disposal, recycling and workplace procedures
 - 3.2 Apply preparation procedures for the correct handling of articles
 - 3.3 Note any special requirements and take these into account during the preparation
 - 3.4 Transfer relevant information to appropriate people
 - 3.5 Use machinery and equipment to prepare articles, including special requirements, and operate correctly

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Articles for cleaning include one or more of the following:

- clothing, garments or fabric accessories
- kitchen linen
- hospitality linen
- other fabric products

Industry procedures include one or more of the following:

- receiving and sorting according to requirements in *AS/NZS 4146:2000 Laundry practice*
- handling procedures for hospital linen, heavily soiled or contaminated industrial items and other item requiring special care

Product handling procedures:

- handling of foreign objects
- dealing with lost property
- manual handling of garments
- processing of payments
- handling of damaged and missing components
- safety procedures, including the use of protective clothing

Machines and equipment include one or more of the following:

- towel unwinding machines
- tying machines
- marking equipment
- overhead rail and bagging systems
- conveyor systems
- automatic bin counting systems
- stock management and financial transaction equipment

Assessment Requirements for MSTDC2007 Receive and sort articles for cleaning

Modification History

Release 1. Supersedes and is equivalent to LMTDC2007A Receive and sort articles for cleaning

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- reading care labels and recognising colours, fabric types and fragility of fabrics to identify correct classification and care requirements
- preparing a range of articles and fabric types with different care needs for dry cleaning or laundering on at least two (2) occasions
- completing work systematically with attention to detail without damage to goods and equipment
- using related equipment and providing customer service and stock management and financial transaction processes according to workplace procedures, as required
- identifying, safely removing and disposing of foreign objects and lost property according to environmental protection, waste disposal, recycling and workplace procedures
- operating machinery and equipment to prepare articles, including special requirements
- maintaining accurate records
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- range of processes available
- care and maintenance procedures for articles:
 - clothing, garments or fabric accessories
 - kitchen linen
 - hospitality linen
 - other fabric products
- customer service and cash handling procedures
- environmental aspects related to workplace operation and manual handling

- infection control procedures
- classifying processes
- fabric characteristics and care requirements
- quality practices
- workplace practices
- practices for recording and reporting
- *AS/NZS 4146:2000 Laundry practice.*

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in receiving and sorting articles for cleaning, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2008 Carry out final inspection of articles

Modification History

Release 1. Supersedes and is equivalent to LMTDC2008A Carry out final inspection of articles

Application

This unit of competency covers the skills and knowledge required for final checking and inspection of articles to ensure customer requirements and quality has been met.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs

		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Inspect articles for quality outcomes	2.1	Inspect articles against quality and workplace standards
		2.2	Rectify minor problems, such as lint removal
		2.3	Return articles not meeting quality standards for spotting, repressing or repair
		2.4	Rectify articles requiring minor repair, report or otherwise attend to
3	Inspect articles for special requirements	3.1	Check special attention tags and inspect article conforms with requirements
		3.2	Inspect special articles to ensure they meet quality requirements
		3.3	Inspect articles to ensure they are correctly packaged
		3.4	Return articles not meeting required standards for further attention
		3.5	Inform team members of quality issues

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures

- requirements prescribed by legislation, awards,

include one or more of the following:

- agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Articles for inspection include one or more of the following:

- clothing, garments or fabric accessories
- kitchen linen
- hospitality linen
- other fabric products

Assessment Requirements for MSTDC2008 Carry out final inspection of articles

Modification History

Release 1. Supersedes and is equivalent to LMTDC2008A Carry out final inspection of articles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- inspecting a range of articles of different types and materials to check compliance with standards on at least two occasions
- interpreting special attention tags
- determining procedure to complete a range articles (e.g. spotting, repressing and repair) to standards
- communicating with team members to report quality issues as needed
- complying with environmental protection, waste disposal, pollution control and recycling requirements
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- inspection processes and requirements
- procedures for finishing and completion of articles:
 - clothing, garments or fabric accessories
 - kitchen linen
 - hospitality linen
 - other fabric products
- problem-solving techniques
- safety and environmental aspects of workplace operation and manual handling
- quality practices
- workplace practices
- practices for recording and reporting
- *AS/NZS 4146:2000 Laundry practice.*

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in laundry and dry cleaning checking, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2009 Identify fabric and garment cleaning requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC2010A Identify fabric and garment cleaning requirements

Application

This unit of competency covers the skills and knowledge required to identify fabric handling requirements from care labelling instructions.

The unit of competency applies to interpreting care labelling instructions on fabric and garments and determining implications for cleaning and handling.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

Care labelling practices and procedures followed in this unit are in accordance with current standards published by the Australian Standards, and are mandatory under the Competition and Consumer Act 2010.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

<p>3 Identify fabric or garment cleaning requirements</p>	<p>3.1 Identify fabrics, fabric finishes, trims and embellishments that may affect handling</p> <p>3.2 Identify care requirements of garments</p> <p>3.3 Determine measures to control fabric problems according to fabric handling requirements and WHS practices</p>

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Information on care labelling includes the following:

- country of origin
- fibre content (e.g. 80% wool 20% polyester)
- care instructions for:
 - hand washing
 - washing
 - drying
 - ironing
 - special requirements (e.g. hanging)
 - dry cleaning
- prohibitions against specific actions, such as "do not bleach"

Care considerations include one or more of the following:

- fibre used
- fabric construction
- trimming, interfacing, lining, decorations and buttons
- design of article
- dyes used

- special treatments (e.g. waterproofing)
- normal care treatment

Fabric problems include two or more of the following:

- differential shrinkage
- heat shrinkage
- chafing
- light fading and fume fading
- hardening of printed fabrics
- loss of body, lustre and sheen
- holes, yarn slippage and fraying
- discoloration or rings
- loss of embossed design
- relaxation shrinkage
- distortion of bias cut fabrics
- yarn slippage
- separation of bonded fabric
- garment failures

Assessment Requirements for MSTDC2009 Identify fabric and garment cleaning requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC2010A Identify fabric and garment cleaning requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- identifying fabrics and fabric problems for at least five (5) different articles
- identifying fibre and fabric finishes, trims and embellishments that may affect handling procedures
- using correct manual handling techniques
- interpreting meanings of care labelling information
- identifying care requirements and control measures for a range of garments and fabrics requiring different care considerations
- determining measures to control fabric problems according to fabric handling requirements and work health and safety (WHS) practices
- maintaining records
- complying with Australian Standards for care labelling.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- common and fragile fabric types
- fabric care considerations
- main causes of fabric problems
- common fabric problems
 - differential shrinkage
 - heat shrinkage
 - chafing
 - light fading and fume fading
 - hardening of printed fabrics
 - loss of body, lustre and sheen

- holes, yarn slippage and fraying
- discoloration or rings
- loss of embossed design
- relaxation shrinkage
- distortion of bias cut fabrics
- yarn slippage
- separation of bonded fabric
- garment failures
- care categories:
 - general instructions and warnings
 - washing

 - ironing
- care instructions:
 - machine wash
 - hand wash
 - iron
 - hot
 - warm
 - cold
 - dry clean
 - tumble dry
 - high
 - low
 - medium
 - bleach
 - steam
 - press
- Australian Standards for care labelling
- control measures for the prevention of fabric problems
- consequences of improper care:
 - customer dissatisfaction
 - customer claims
- articles fail to return to original appearance
 - information resources on cleaning requirements
- natural and synthetic single yarn fabrics and blends:
 - knitted fabrics, including weft knits and warp knits
 - woven fabrics, including plain, twill, satin, dobby, jacquard and pile
 - non-woven fabrics, such as felts, nets, braids, bonded and composite
 - emerging smart fabrics

- common fabrics:
 - cotton
 - wool
 - flax
 - silk
 - viscose
 - acetate
 - nylon
 - polyester
 - acrylic
 - elastomeric
- special fabrics:
 - satin weave fabrics
 - taffeta fabric
 - rib fabrics
 - jacquard fabrics
 - velvets
 - sheer fabrics
 - specialty woollens
- fibre and fabric finishes, trims and embellishments
 - waterproofing
 - dyes
 - preservatives
 - tannins
 - finishes used for crease resistance
 - fire retarders
 - waterproofing or water-resisting finishes
 - coloration for structural or applied design, such as printing or dyeing
 - surface finishes for aesthetics, stability or serviceability
 - interlacing and interloping
 - trimming
 - interfacing
 - lining
 - decorations
 - buttons
 - embossing
 - embroidery
 - other
- quality standards and practices
- practices for recording and reporting

- *AS/NZS 4146:2000 Laundry practice.*

Assessment Conditions

MSTDC3001 Perform spotting function in dry cleaning operations

Modification History

Release 1. Supersedes and is equivalent to LMTDC3003A Perform spotting function in dry cleaning operations

Application

This unit of competency covers the skills and knowledge required to perform spotting techniques on articles received for dry cleaning. It includes identifying a wide range of stains on a variety of fabrics, determining spotting requirements and suitable spotting agents, and carrying out spotting procedures.

This unit of competency applies to operators who are responsible for implementing spotting procedures within a dry cleaning operation. It requires skill in spotting all types of stains on common as well as special fabrics, and involves the use of standard and specialist spotting agents.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

| 4 | Carry out spotting procedure | 4.1 | Prepare spotting agents and mix according to manufacturer instructions and workplace procedures |
| | | 4.2 | Handle fabrics or materials according to fabric requirements |
| | | 4.3 | Operate machine or equipment in accordance with manufacturer instructions and workplace procedures |
| | | 4.4 | Apply spotting technique in accordance with workplace procedures and spotting agent directions |
| | | 4.5 | Dry, hang or store article correctly, label and take to the correct area for dry cleaning |
| | | 4.6 | Record and report non-removable stains and defects according to workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping

- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Types of special spotting agents include one or more of the following:

- wet-side and dry-side agents:
- sodium thiosulphate
- formic acid
- oxalic acid
- iodine
- acetone
- methyl alcohol
- oxidising and reducing bleaches
- digestion agents
- solvents
- detergents

Safety and handling requirements include one or more of the following:

- PPE
- procedures for use of certain types of container materials (e.g. plastic and metal)
- flammability
- solubility
- sample testing requirements
- requirements for mixing and diluting

Fabric requirements include one or more of the following:

- tamping requirements
- brushing requirements
- special needs for keeping fabric flat or not
- rinsing needs
- procedures for use of certain equipment and chemicals
- susceptibility to breaks and creasing
- side of fabric upon which to apply spotting

Advanced spotting processes and procedures include one or more of the following:

- digestion
- bleaching
- steam treatment

- synthetic detergent treatment
- ammonia action
- chemical action
- oxidising
- reducing

Relevant documentation includes one or more of the following:

- information about the procedure employed
- record of non-removable stains and defects
- customer invoicing
- customer pick-up information

Assessment Requirements for MSTDC3001 Perform spotting function in dry cleaning operations

Modification History

Release 1. Supersedes and is equivalent to LMTDC3003A Perform spotting function in dry cleaning operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- identifying and classifying types of spotting agents, determining applications of spotting agents to specific types of stains, and their application procedures
- identifying particular stains and their removal procedures
- identifying special fabrics, fabric characteristics and care requirements prior to selection of spotting procedure
- selecting spotting agents and conducting procedure appropriate to the type of stain, fibre and fabric, and dye and colour characteristics, for a range of at least (10) ten articles, with different spotting requirements and common fabric types
- conducting spotting procedures with a variety of at least five (5) special fabrics, with a variety of stains or marks
- documenting spotting agents and procedure applied
- preparing and mixing spotting agents accurately and safely, using related measuring and other dispensing or dosing equipment
- drying, hanging, storing, labelling and transferring article according to workplace practices to meet quality requirements
- recording and reporting non-removable stains and defects according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- the range of spotting agents and their application to specific stains
- spotting resource requirements:
 - spotting board
 - drying cabinet
 - tumbler

- spotting brushes
- spatula
- towel
- cheesecloth
- blotters
- relevant machines and equipment
- application procedures for spotting agents
- the differences between oxidising and reducing bleaches
- rules for bleaching
- acceleration processes
- safety and handling and storage requirements of spotting agents
- procedures for stain identification
- types of stains and their characteristics:
 - organic or non-organic
 - dye stains
 - albumin stains
 - protein stains
 - vegetable adhesives
 - mustard
 - tomato sauce
 - wine
- the characteristics and qualities of special fabrics:
 - taffeta
 - satin
 - crepe
 - chiffon
 - moire fabrics
 - embossed fabrics
 - pile fabrics
 - velvet
 - metallic fabric
 - pigment print
 - flock prints
 - acetate sharkskin
 - sequins
 - wools and silks
 - smooth silks and cottons
- requirements for handling and care of fabrics during the spotting process
- characteristics of fibres, fabrics, and dyes or colours, and the effects of the spotting procedure

- procedures for identifying the type of stain:
 - considering the information provided by the customer
 - identifying the colour of the stain
 - identifying the feel or odour of the stain
- machinery and equipment requirements of spotting techniques
- factors affecting the spotting process:
 - time
 - temperature
 - moisture
 - ph concentration
- measuring equipment and numeracy relevant to preparing solutions
- workplace procedures for mixing and preparing spotting agents and procedures for operating machines and equipment
- environmental aspects related to workplace and machine or equipment operation and manual handling
- quality practices
- workplace practices
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in conducting spotting functions in dry cleaning operations, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC3002 Dry clean garments with special treatment requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC3002A Dry clean garments with special treatment requirements

Application

This unit of competency covers the skills and knowledge required to determine and conduct dry cleaning of garments that require special treatment and handling.

This unit of competency applies to the dry cleaning of leather, suede, wedding gowns and vintage clothes or other fabrics and garments, which require special treatment and handling.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work may be self-directed and unsupervised.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | |
|--|-----|--|
| requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 Prepare to dry clean garments | 2.1 | Analyse garments to determine dry cleaning requirements |
| | 2.2 | Confirm customer requirements |
| | 2.3 | Determine dry cleaning processes for garment |
| | 2.4 | Seek information to support skill development when garment dry cleaning requirements are difficult to identify |
| | 2.5 | Document dry cleaning requirements and communicate with team members, where required |
| | 2.6 | Tag garment for identification |
| 3 Perform dry cleaning | 3.1 | Prepare machine and solvents for dry cleaning |
| | 3.2 | Conduct spotting and select program for garment requirements |
| | 3.3 | Select additive dispensing and prepare for dosing system, where relevant |
| | 3.4 | Operate machine and monitor machine operation in accordance with operating instructions and workplace procedures |
| | 3.5 | Monitor additives and dosing system for correct operation and report faults where appropriate |
| | 3.6 | Unload garment using correct manual handling techniques and complete records |
| 4 Inspect garment | 4.1 | Inspect garment to determine if further cleaning or |

and complete operations

- finishing is required to meet quality standards
- 4.2 Conduct further cleaning or finishing
 - 4.3 Complete documentation and prepare garment for customer to collect

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Determine dry cleaning requirements include the following:

- identifying fabric, trim and features that require special processing
- interpreting garment labelling
- identifying spotting requirements of garment

Dry cleaning processes include one or more of the following:

-
- selection of solvents
- spotting processes
- checking of garment cleaning requirements
- timing of dry cleaning processes
- use of machines and equipment
- drying and pressing processes

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTDC3002A Dry clean garments with special treatment requirements

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTDC3002 Dry clean garments with special treatment requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC3002A Dry clean garments with special treatment requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, include:

- reading and following work instructions, standard operating procedures and safe work practices
- determining cleaning requirements for at least five (5) different types of complex garments
- using and handling additives and chemicals safely
- preparing machine and solvents for dry cleaning, conduct spotting, and selecting program for garment requirements
- selecting and monitoring additive dispensing and dosing system, where relevant
- operating and monitoring machine in accordance with operating instructions and workplace procedures, for at least five (5) special or complex garments
- unloading garment using correct manual handling techniques, inspect for stains or further work, and complete records
- monitoring and completing dry cleaning operation and inspecting articles to maintain quality requirements
- documenting, assessing and reporting faults
- completing documentation and preparing garment for customer to collect.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- cleaning requirements of special fibres and fabrics
- handling and cleaning procedures for complex garments, such as:
 - wedding gowns
 - vintage clothes
 - leather
 - suede
 - other garments that require special treatment and handling
- machine operation, program selection, and monitoring procedures for complex garments

- use of solvents for complex garments:
 - perchlorethylene
 - white spirit
 - hydrocarbons
- environmental aspects related to workplace, and machine or equipment operation and manual handling, including consumable or hazardous materials
- quality practices
- workplace practices
- effective communication
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in conducting safe handling of dry cleaning chemicals and solvents, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3001 Apply hooping and fabric handling techniques

Modification History

Release 1. Supersedes and is equivalent to LMTDE3001A Apply hooping and fabric handling techniques

Application

This unit of competency covers the skills and knowledge required to prepare fabric for final stitching on an embroidery machine. It includes hoop selection and use.

Work may be conducted in small to large scale enterprises, such as operational workplace activities, or home-based activities. Work is performed within defined procedures under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- | | | | |
|---|--|-----|--|
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to apply hooping and fabric handling techniques | 2.1 | Select digitised design file, of not more than six colours, and establish specific requirements of the article to be embroidered |
| | | 2.2 | Confirm work requirements |
| | | 2.3 | Assess stabiliser requirements and select stabiliser |
| | | 2.4 | Establish the need for additional toppings and backings and select |
| | | 2.5 | Combine stabilisers and fabric and hoop to meet machine recommendations |
| 3 | Stitch embroidery and finalise work | 3.1 | Mount hoop onto the machine according to manufacturer recommendations |
| | | 3.2 | Consider fabric properties when handling garment |
| | | 3.3 | Stitch embroidery and inspect against job specifications |
| | | 3.4 | Embroider pieces using woven, non-woven, knitted, lightweight and heavyweight fabrics |
| | | 3.5 | Minimise waste and dispose of according to environmental guidelines and workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Work requirements include:**
- determining and accessing material and equipment
 - establishing any special requirements to complete the embroidery
 - determining embroidery dimensions and selecting appropriate hoop type
 - selecting fabric to be embroidered and checking properties for suitability to work requirements
 - selecting thread and needle types to be used to create the embroidery and loading for machine use

- Hoop types include one or more of the following:**
- tubular
 - sash
 - screw
 - cap
 - square
 - round
 - spring

- Fabrics include the following:**
- woven
 - non-woven

- knitted
- lightweight
- heavyweight

Needle types include one or more of the following:

- standard
- metalfil
- embroidery eye
- stretch
- specialist needles for microfibres, knits or metallic fabric/threads

Stabilisers, toppings and backings include one or more of the following:

- water soluble
- tear away
- iron on
- cut away
- black
- white
- varying weights

Unit Mapping Information

Assessment Requirements for MSTDE3001 Apply hooping and fabric handling techniques

Modification History

Release 1. Supersedes and is equivalent to LMTDE3001A Apply hooping and fabric handling techniques

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- applying basic sewing machine skills
- using computer basic operations
- selecting correct hoop and applying hooping techniques
- using hooping accessories
- using and loading needles
- selecting and loading thread
- identifying fabric properties
- selecting stabilisers, toppings and backings
- stitching at least two (2) embroidery pieces according to specifications
- using an embroidery machine for final stitching sample pieces using woven, non-woven, knitted, lightweight and heavyweight fabrics
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- computer basic operations
- access to embroidery designs
- hooping techniques
- hooping accessories
- fabric types

- wovens
- non-wovens
- knits
- lightweight
- heavyweight
- fabric properties:
 - density
 - stretchability
 - stretch direction
- hoop types and uses
 - tubular
 - sash
 - screw
 - cap
 - square
 - round
 - spring
- needle types and uses
 - standard
 - metalfil
 - embroidery eye
 - stretch
 - specialist needles for microfibres, knits or metallic fabric/threads
- thread types and uses
 - polyester
 - metallic
 - rayon
 - cotton
- stabiliser types and uses
 - water soluble
 - tear away
 - iron on
 - cut away
 - black
 - white
 - varying weights
- environmental aspects related to workplace and machine or equipment operation and manual handling.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in applying hooping and fabric handling techniques, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3002 Digitise artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3002A Digitise artwork for computerised embroideries

Application

This unit of competency covers the skills and knowledge required to apply fundamental digitising techniques to artwork for computerised embroidery production.

The unit of competency applies to a range of digitising techniques using industry standard software to convert artwork from images to production of embroideries to industry standard. It includes use of manual and automatic digitising techniques, documenting and storing images, and producing samples to confirm result meets artwork specifications.

Work involves liaison with specialist embroiderers and digitisers. Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to digitise artwork for computerised embroideries	2.1	Use computer basic operations, installing and navigating software to source and import selected artwork
		2.2	Prepare materials and equipment for digitising according to design specifications
		2.3	Digitise shapes using manual techniques
		2.4	Apply automated digitising techniques
3	Develop digitised artwork	3.1	Select and apply a range of fill and outline stitch types, and save design to library
		3.2	Complete image to stitch conversion, adding complex fills to selected designs, and make colour selections
		3.3	Adjust embroidery designs and optimise embroidery stitch quality
		3.4	Finalise design to optimise productivity and quality
		3.5	Prepare for export and save to library
		3.6	Prepare designs for output to printer and machine
4	Complete embroidery sample and	4.1	Select fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements

- finalise work**
- 4.2 Complete a range of embroidery pieces, according to specifications to test design specifications
 - 4.3 Minimise and dispose of waste according to environmental guidelines and workplace procedures
 - 4.4 Seek feedback and integrate into outcomes
 - 4.5 Maintain records according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Software includes:**
- any software classed as a digitising software (as

opposed to customising or editing software)

Import selected work includes the following:

- opening software and exploring workspace functionality, elements and icons
- setting defaults to machine requirements
- determining image importation requirements
- processing images as necessary in preparation for automated and semi-automated digitising techniques
- recognising and selecting file types
- importing image into working area

Prepare materials and equipment includes the following:

- selecting machine format and confirming capability to meet image requirements
- selecting fabric type
- selecting workspace/canvas and adjusting colour
- identifying colour blocks and colour thread changes and adjusting
- setting up thread palette
- determining and planning optimum digitising sequence
- manually adjusting stitching order and making colour changes to selected areas

Manual digitising techniques include one or more of the following:

- identifying and applying basic stitch types
- creating free shapes with fixed angle stitching, with and without holes
- creating free shapes with turning stitching, with and without holes
- creating borders, runs and details

Automated digitising techniques include one or more of the following:

- converting file types and manipulating for application
- converting design objects and shapes to embroidery and digitising using semi-automated and fully automated techniques

Fills and outlines include one or more of the following:

- modifying basic property options, including design size, to meet specific design requirements
- selecting and altering fill stitch pattern properties (single and multiple areas) and direction

- selecting and altering outline properties
 - creating a realistic computer representation (3-D view)
- Adjust embroidery designs and optimise stitch quality includes one or more of the following:**
- adjusting image inclusions and objects to support design effects
 - introducing machine hoop, for output sizing, and integrating into design
 - adjusting stitch densities and lengths and eliminating small stitches
 - optimising corner stitching and long satin stitches
 - minimising stitch bunching
 - stabilising fabric with automatic underlays
 - stitching design
 - assessing and adjusting pull compensation
- Finalise design includes one or more of the following:**
- assessing stitch sequence, stitch entry and exit points, and start/end of design and confirming optimal quality outcome
 - assessing and revising insertion and deletion of trim functions, where possible, to optimise productivity
 - assessing and revising colour sequencing, where possible, to optimise productivity
 - making adjustments to digitising specifications to ensure optimal quality outcome of embroidery
- Output to printer and machine includes the following:**
- creating template and worksheet, printing and checking to ensure design requirements are achieved
 - exporting completed design to the machine ready for stitching according to manufacturer specifications and save for later access
 - printing design reports
- File types includes one or more of the following:**
- Bitmap:
- .jpeg
 - .gif
 - .tiff
 - .bmp.
 - png

Vector:

- .wmf
- .emf
- .eps/.ps
- .ai
- .cdr

Optimum digitising sequence includes the following:

- minimising registration problems caused by fabric distortion
- planning colour sequence

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTDE3002A Digitise artwork for computerised embroideries

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTDE3002 Digitise artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3002A Digitise artwork for computerised embroideries

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- using computer basic operations, installing and navigating software to source and import selected artwork
- preparing materials and equipment for digitising according to design specifications
- applying a range of automatic, semi-automatic and manual digitising techniques to process embroidery design
- selecting and applying a range of fill and outline stitch types, and saving design to library
- completing image to stitch conversion, adding complex fills to selected designs, and making colour selections
- finalising design to optimise productivity and quality, prepare for export and save to library
- preparing designs for output to printer and machine
- demonstrating ability in digitising techniques through production of a variety of at least five (5) embroidery pieces, according to specifications
- maintaining records according to work practices.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- workplace functionality:
 - tool bar
 - navigations

- icons
- menus
- basic stitch types:
 - run stitching
 - satin stitching
 - tatami stitching
 - outline
 - fill
- computer basic operations
- access to embroidery designs
- hooping techniques
- hooping accessories
- fabric types and properties:
 - woven
 - non-woven
 - knits
 - lightweight
 - heavyweight
- hoop types and uses:
 - tubular
 - sash
 - screw
 - cap
 - square
 - round
 - spring
- needle types and uses:
 - standard
 - metalfil
 - embroidery eye
 - stretch
- thread types:
 - polyester
 - metallic
 - rayon
 - cotton
- artwork sources
- process images:
 - removal of 'noise'
 - dithering

- clean up
- embroidery adjustments:
 - flip
 - rotate
 - mirror image
 - angle
 - copy
 - paste
 - resize
 - reshape
 - proportion
 - position
 - align
 - scale
 - skew
- range of digitising techniques
- fills:
 - contour
 - radial
 - cross-stitch
 - arc
 - spiral
 - satin
 - embossed
 - motifs
- stabilisers, toppings and backings:
 - water soluble
 - tear away
 - iron on
 - cut away
 - varying weights
- design reports:
 - worksheets
 - approval sheets
 - appliqué patterns
 - templates.

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in digitising artwork for computerised embroideries, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3003A Apply advanced digitising techniques to produce computerised embroideries

Application

This unit of competency covers the skills and knowledge required to apply advanced digitising techniques to a range of items.

The unit of competency applies to advanced level digitising techniques to produce computerised embroideries.

Work involves liaison with specialist embroiderers and digitisers.

Work may be conducted in small to large scale enterprises such as operational workplace activities or home-based activities, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTDE3002 Digitise artwork for computerised embroideries

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Prepare advanced digitising techniques | 2.1 | Prepare materials and equipment for digitising |
| | | 2.2 | Use a range of advanced stitching techniques |
| | | 2.3 | Identify colour blocks and colour thread changes, and adjust to meet design specifications. |
| | | 2.4 | Manually adjust stitching order and make colour changes to selected areas, as required |
| | | 2.5 | Create new thread charts, modify existing thread charts and mix thread colours to meet design requirements |
| | | 2.6 | Create alternative stitch-out options for different colourways, fabrics and placements |
| | | 2.7 | Adjust outline nodes to create different shapes |
| | | 2.8 | Use a range of advanced editing techniques to modify designs and create and enhance design effects |
| | | | |
| 3 | Complete embroidery sample | 3.1 | Select fabric, stabiliser, toppings and backings, needles, thread and hoop types and use according to the design production requirements |
| | | 3.2 | Complete embroidery in an efficient manner and inspect against design specifications |
| | | 3.3 | Minimise waste and dispose of according to |

environmental guidelines

- | | | | |
|---|---|-----|---|
| 4 | Create and manage files and design libraries | 4.1 | Establish styles and properties for designs and fabrics |
| | | 4.2 | Create thread charts and customise according to design requirements |
| | | 4.3 | Create templates for different styles of work |
| | | 4.4 | Define machine formats and hoops for designs |
| | | 4.5 | Convert design collections, catalogue and archive according to workplace requirements |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Prepare materials and equipment includes the following:

- selecting machine format and confirming capability to meet image requirements
- manipulating file types and convert for digitising
- selecting fabric type
- selecting workspace/canvas and adjusting colour
- setting up thread palette
- determining and planning optimum digitising sequence

Advanced stitching techniques include one or more of the following:

- creating and stitching a variety of gradient patterns
- creating and stitching an embossed area
- creating texture effects using tatami offsets and pattern splits
- creating and stitching a variety of single and dual motifs
- creating and stitching a variety of stamp fill patterns
- creating and stitching a range of decorative fills and outlines according to design requirements
- creating stitch patterns with carving stamps
- creating user-defined splits according to design requirements
- creating and adjusting a stable underlay on new or existing embroidery design

Optimum digitising sequence includes the following:

- minimising registration problems caused by fabric distortion
- planning colour sequence

Stamp fill patterns include one or more of the following:

- existing (pre-programmed)
- individually created
- placement
- size
- direction
- repetition
- spacing
- layout

Files and design libraries include one or more of the

- styles and properties for designs and fabrics
- thread charts

following:

- templates for different styles of work
- machine formats and hoops for designs
- catalogue of design collections

Unit Mapping Information

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3003A Apply advanced digitising techniques to produce computerised embroideries

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- preparing, converting and editing images for digitising
- creating alternative stitch-out options for different colour ways, fabrics and placements
- using a range of advanced editing techniques to modify designs and create and enhance design effects
- introducing texture techniques
- demonstrating ability in advanced digitising techniques through production of at least five (5) embroidery pieces, according to specifications
- creating design library by saving and filing images, templates and design catalogues according to the workplace procedures and archive requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- software functionality
- computer basic operations
- computer navigation to access and manipulate an image
- suitability of images to be digitised and limitations of software
- artwork sources
- access to embroidery designs
- advanced editing techniques:
 - adding and adjusting stitch angles

- smoothing object outlines
- converting between embroidery objects
- reinforcing outlines
- removing unwanted underlying stitching
- creating outlines and fill holes
- editing stitches
- editing machine functions
- creating manual stitching
- digitising boring holes
- adding stitches
- feather stitching, such as:
 - positive stitch length
 - negative stitch length
 - side A
 - side B
- pre-programmed patterns
- use of customised patterns
- reshaping, cutting, splitting and breaking design objects
- gradient:
 - single colour with a variety of:
 - density settings
 - stitch directions
 - dual and multi-colour with varying:
 - density settings
 - stitch directions
 - stitch types
- hooping techniques
- hooping accessories
- fabric types and properties:
 - woven
 - non-woven
 - knits
 - lightweight
 - heavyweight
- hoop types and uses:
 - tubular
 - sash
 - screw
 - cap
 - square

- round
- spring
- needle types and uses:
 - standard
 - metalfil
 - embroidery eye
 - stretch
- thread types:
 - polyester
 - metallic
 - rayon
 - cotton
- stabilisers, toppings and backings:
 - water soluble
 - tear away
 - iron on
 - cut away
 - varying weights
- stable underlay:
 - edge run
 - centre run
 - tatami
 - grid
 - zigzag
 - double zigzag
- range of digitising techniques
- motifs:
 - existing (pre-programmed)
 - individually created
 - placement
 - size
 - direction
 - repetition
 - spacing
 - layout
 - managed sets
- decorative fills and outlines:
 - backstitch
 - stemstitch
 - zigzag

- E-stitch (blanket) fills and borders
- contour
- radial
- cross-stitch
- arc
- spiral
- satin
- motif
- tatami offsets
- pattern splits
- carving stamps
- user-defined splits
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in advanced digitising techniques, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3004 Generate artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3004A Generate artwork for computerised embroideries

Application

This unit of competency covers the skills and knowledge required to obtain and create images suitable for computerised embroidery production.

The unit of competency includes scanning, creating and obtaining images; importing into digitising software for embroidery production; and producing a sample to confirm image suitability.

Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to generate artwork	2.1	Identify design and embroidery considerations for image selection
		2.2	Establish software and technology requirements to obtain images
		2.3	Source images and download from internet sources
		2.4	Source hard copy images and scan into digital format
		2.5	Assess image quality and identify opportunity for improvements or alterations
		2.6	Confirm copyright status of selected images
		2.7	Assess suitability of images for digitising and confirm capacity of software
3	Create or edit artwork	3.1	Create artwork and convert into digital format
		3.2	Navigate software to edit and alter images
		3.3	Make alterations and/or improvements and save file in suitable file types
		3.4	Import image into digitising software
		3.5	Enter artwork specifications into digitising software
4	Complete embroidery and review outcomes	4.1	Select fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements
		4.2	Create embroidery and inspect against design specifications

- 4.3 Confirm digitising specifications and process as appropriate to achieve embroidery outcomes in a simple and fully automated manner
- 4.4 Minimise and dispose of waste according to environmental guidelines
- 4.5 Seek feedback and integrate into outcomes
- 4.6 Save and file artwork according to the workplace filing requirements

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design and embroidery considerations include one or more of the following:

- size
- shape
- quality
- use of colour
- editing options
- image inclusions
- compatibility with client profile
- complexity/simplicity
- production cost

Artwork includes one or more of the following:

- clipart
- wingdings
- text
- borders
- pictures

File types include one or more of the following:

- .jpeg
- .gif
- .tiff
- .bmp
- .wmf
- .emf
- .png

Unit Mapping Information

Assessment Requirements for MSTDE3004 Generate artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3004A Generate artwork for computerised embroideries

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- setting up and using a scanner
- accessing and obtaining a range of images from internet sources
- complying with copyright obligations for using images
- importing selected artwork into digital format
- creating or editing artwork using suitable software
- applying creativity to use of colour, texture, shape, balance and composition
- converting images into digital format
- creating at least five (5) embroidery samples on different fabrics that comply with design specifications
- saving and filing artwork according to the workplace procedures.

Knowledge Evidence

- Evidence must be provided that demonstrates knowledge of:
- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- software functionality
- computer basic operations
- computer navigation to access and manipulate an image
- suitability of images to be digitised and limitations of software
- artwork sources
- access to embroidery designs
- fabric types and properties:

- woven
- non-woven
- knits
- lightweight
- heavyweight
- hoop types and uses:
 - tubular
 - sash
 - screw
 - cap
 - square
 - round
 - spring
- needle types and uses:
 - standard
 - metalfil
 - embroidery eye
 - stretch
- thread types:
 - polyester
 - metallic
 - rayon
 - cotton
- stabilisers, toppings and backings:
 - water soluble
 - tear away
 - iron on
 - cut away
 - varying weights
- range of digitising techniques
- copyright
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in generating artwork for computerised embroideries, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3005 Replicate traditional hand craft techniques

Modification History

Release 1. Supersedes and is equivalent to LMTDE3005A Replicate traditional hand craft techniques

Application

This unit of competency covers the skills and knowledge required to apply specialised digitising techniques to replicate traditional hand craft techniques on a computerised embroidery machine.

The unit of competency applies to using industry standard software to specify design properties and convert artwork for the computerised production of a range of traditional embroidery techniques.

Work may be conducted in small to large scale enterprises, such as operational workplace activities or home-based activities.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTDE3002 Digitise artwork for computerised embroideries

MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to replicate traditional hand craft techniques	<p>2.1 Confirm work requirements and prepare workspace</p> <p>2.2 Source and select images, import into software and edit, as required</p> <p>2.3 Save artwork in appropriate file type</p>
3	Digitise for embroidery techniques	<p>3.1 Identify application and characteristics of traditional hand craft techniques and confirm suitability for design requirements</p> <p>3.2 Select traditional hand craft technique and determine properties in digitised image</p> <p>3.3 Apply creativity to use of colour, texture, shape, balance and composition</p> <p>3.4 Save finished design to library</p> <p>3.5 Create template and worksheet, print and check to ensure design requirements are met</p> <p>3.6 Export completed design to the machine ready for stitching according to manufacturer specifications</p>

- | | | | |
|---|---|-----|--|
| 4 | Complete embroidery pieces and finalise work | 4.1 | Select suitable fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements |
| | | 4.2 | Create embroideries to replicate traditional hand craft techniques on different fabric types suitable for each of the techniques |
| | | 4.3 | Minimise waste and dispose of according to workplace procedures and environmental guidelines |
| | | 4.4 | Seek feedback and integrate into outcomes |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

File types include one or more of the following:

- .jpeg
- .gif
- .tiff
- .bmp
- .wmf
- .emf
- .png

Traditional hand craft techniques include the following:

- blanket stitch
- redwork
- cross-stitch
- appliqué
- quilting
- stippling
- chain stitch
- crazy quilting
- lace
- candlewick

Properties in digitised image include one or more of the following:

- underlay
- fill pattern
- outline
- colour
- density
- pull compensation
- stabilisation
- stitch points and corners
- size

Assessment Requirements for MSTDE3005 Replicate traditional hand craft techniques

Modification History

Release 1. Supersedes and is equivalent to LMTDE3005A Replicate traditional hand craft techniques

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- identifying application and characteristics of traditional hand craft techniques and confirm suitability for design requirements
- selecting traditional hand craft technique and determine properties in digitised image
- applying creativity to use of colour, texture, shape, balance and composition
- saving finished design to library and exporting completed design to the machine ready for stitching according to manufacturer specifications
- selecting fabric, needles, thread, stabiliser and hoop to meet design specifications
- digitising and sewing separate embroideries on different fabric types using ten (10) traditional hand craft techniques
- seeking and applying feedback to enhance outcomes
- complying with workplace procedures
- documenting and storing artwork.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- software functionality
- computer basic operations
- basic machine embroidery techniques
- colour, texture, shape, balance and composition theory
- traditional hand craft techniques and uses:

- blanket stitch
- redwork
- cross-stitch
- appliqué
- quilting
- stippling
- chain stitch
- crazy quilting
- lace
- candlewick
- stabilisers, toppings and backings:
 - water soluble

MSTDE3006 Digitise text to produce embroidered lettering

Modification History

Release 1. Supersedes and is equivalent to LMTDE3006A Digitise text to produce embroidered lettering

Application

This unit of competency covers the skills and knowledge required to digitise and produce embroidered lettering.

The unit of competency applies to creating a range of pre-digitised fonts and digitising techniques using industry standard software to produce embroidered lettering. Work involves liaison with specialist embroiderers and digitisers. Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTDE3002 Digitise artwork for computerised embroideries

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Create basic lettering and complex text paths**
 - 2.1 Confirm work requirements, prepare work area and open software
 - 2.2 Create basic lettering
 - 2.3 Transfer files to machine data library for stitching according to manufacturer specifications
 - 2.4 Introduce complex text paths and use with an existing embroidery file
 - 2.5 Select existing embroidery and combine with text paths
 - 2.6 Save file to library and export to machine for stitching according to manufacturer specifications

- 3 **Create artistic fonts**
 - 3.1 Create text embroidery and shadows, fill techniques and colour options to create effects
 - 3.2 Use variations in font style, size and effects for shaping words and achieving precise replication of existing printed material
 - 3.3 Use windings/webdings or equivalent, both as a font and individually as a picture
 - 3.4 Combine windings/webdings with other fonts
 - 3.5 Save file to library and export to machine for stitching according to manufacturer specifications

- 4 **Create a monogram**
 - 4.1 Select letters and font and adjust for single, double and triple letter monograms

- 4.2 Use fill techniques and colour options to create effects
 - 4.3 Select appropriate underlay
 - 4.4 Use outline options with and without fill stitches to create effects
 - 4.5 Use tools to adjust images as required
 - 4.6 Save file to library and export to machine for stitching according to manufacturer specifications
- 5 **Complete embroidery**
- 5.1 Select fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements
 - 5.2 Create embroidery to demonstrate a range of digitised text techniques and inspect against design specifications
 - 5.3 Minimise waste and dispose of according to workplace procedures and environmental guidelines
 - 5.4 Seek feedback and integrate into outcomes
 - 5.5 Document and store artwork

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs

- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Digitised text techniques include the following:

- basic lettering
- complex text paths
- artistic fonts using variation in style, size, colour, windings, fill, outline and effects
- monograms

Basic lettering includes one or more of the following:

- introducing stitched letters using basic fonts
- creating text on a straight line path
- using bold and italic options
- adjusting font size to create various size options
- creating multi-line text embroidery

Text paths include one or more of the following:

- arc
- freehand
- ellipse
- angle
- rotation

Complex text paths include one or more of the following:

- creating and adjusting upper and lower arc paths
- creating and adjusting an ellipse path
- creating and adjusting a freehand path
- using above, on and below the line settings with the different paths
- adjusting individual letter positions (on all above paths)
- selecting different font styles and using on different paths
- reviewing effects for suitability to meet design brief

- Fills include one or more of the following:**
- stamp pattern
 - motif fill
 - contour
 - radial
 - cross-stitch

- Underlay includes one or more of the following:**
- edge run
 - centre run
 - tatami
 - grid
 - zigzag
 - double zigzag
 - complex grid
 - complex edge

- Adjusting font size includes one or more of the following:**
- flip
 - rotate
 - mirror image
 - angle
 - copy
 - paste
 - resize
 - reshape
 - proportion
 - position
 - align
 - scale
 - skew

Unit Mapping Information

Assessment Requirements for MSTDE3006 Digitise text to produce embroidered lettering

Modification History

Release 1. Supersedes and is equivalent to LMTDE3006A Digitise text to produce embroidered lettering

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- applying creativity to use of colour, texture, shape, balance and composition to create basic lettering and complex text paths
- creating text embroidery and shadows, fill techniques and colour options to create effects
- using variations in font style, size and effects and for shaping words and achieving precise replication of existing printed material
- using a range of techniques to create monograms
- selecting fabric, needles, thread, stabiliser and hoop to meet design specifications
- producing basic digitised lettering, complex text paths, monograms and artistic text
- saving files to library and exporting to machine for stitching according to manufacturer specifications
- demonstrating digitising text techniques through production of at least two (2) embroidered lettering pieces using different fabrics to meet artwork specifications
- seeking and applying feedback to enhance outcomes
- complying with workplace procedures
- documenting and storing artwork.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- computer navigation to use basic software functions
- machine embroidery techniques
- text path:
 - arc

- freehand
- ellipse
- angle
- rotation
- stabilisers, toppings and backings:
 - water soluble
 - tear away
 - iron on
 - cut away
 - varying weights
- fabric types and properties:
 - woven
 - non-woven
 - knits
 - lightweight
 - heavyweight
- hoop types and uses:
 - tubular
 - sash
 - screw
 - cap
 - square
 - round
 - spring
- needle types and uses:
 - standard
 - metalfil
 - embroidery eye
 - stretch
- thread types:
 - polyester
 - metallic
 - rayon
 - cotton
- workplace policies and procedures
- environmental aspects related to workplace and machine or equipment operation and manual handling
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in digitising text to produce embroidery, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3007 Demonstrate features of digitised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3007A Demonstrate features of digitised embroidery machines

Application

This unit of competency covers the skills and knowledge required to demonstrate features of digitising and computerised embroidery equipment in a retail, commercial or industry setting.

The unit of competency includes the demonstration of program and machine features and working requirements to customers. It typically applies in a retail, commercial or industry environment where the worker is responsible for sales advice and service of specialised digitising and computerised embroidery equipment. It requires skills to be able to demonstrate features and options available for the user.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------------|-----|---|
| 1 | Determine job | 1.1 | Follow standard operating procedures (SOPs) |
|---|----------------------|-----|---|

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to demonstrate features of digitised embroidery machines	2.1	Identify intended uses and priorities for equipment and match to machine selection
		2.2	Establish customer requirements
		2.3	Access and select information resources
3	Explain features and demonstrate machines and digitising functions	3.1	Identify and describe machine features, typical problems and their remedies
		3.2	Demonstrate machine preparation, basic care and maintenance requirements
		3.3	Demonstrate digitising and software functions
4	Demonstrate embroidery production	4.1	Select image and digitise for production
		4.2	Demonstrate relevant software options to digitise and edit images and text
		4.3	Demonstrate embroidery procedures
		4.4	Produce embroidery sample and explain process to customer
5	Confirm customer understanding	5.1	Seek feedback to confirm customer understanding of key features of the equipment and process
		5.2	Use effective communication skills to invite and respond to questions
		5.3	Provide customer with support information or documentation, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Software includes:

- any software classed as a digitising software and includes customising and editing software

Digitising functions include one or more the following:

- software functions
- characteristics of suitable images for digitising, and software limitations in processing designs
- the range of embroidery outcomes and effects
- examples of samples or images
- typical problems, software limitations and their solutions

Embroidery procedures include the following:

- stitch conversion process, fills, colours and outlines
- file saving and documentation, and exporting completed design to the machine ready for stitching
- preparation of machine
- selecting and using fabric, stabiliser, toppings and backings, needles, thread and hoop types according to the sample requirements

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTDE3007A Demonstrate features of digitised embroidery machines

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTDE3007 Demonstrate features of digitised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3007A Demonstrate features of digitised embroidery machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- demonstrating the range of features, functions and procedures, of a digitised embroidery machine on at least two (2) occasions
- reading and following work instructions, standard operating procedures and safe work practices and other reference material
- applying relevant standards
- explaining information on standard operating procedures (SOPs), work instructions and other reference material
- identifying and describing machine features, typical problems and their remedies
- maintain machine and equipment to suppliers requirements
- producing embroidery sample and explaining process to customer
- seeking feedback to confirm customer understanding of key features of the equipment and process
- using effective communication skills to invite and respond to questions
- providing customer with support information or documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic care and maintenance requirements
- computer navigation to access and manipulate an image
- software functionality
- basic machine embroidery techniques
- types and properties of fabric
- colour, texture, shape, balance and composition theory
- hoop types
- needle types and uses:

- standard
- metalfil
- embroidery eye
- stretch
- thread types:
 - polyester
 - metallic
 - rayon
 - cotton
- stabilisers, toppings and backings:
 - water soluble
 - tear away
 - iron on
 - cut away
 - varying weights
- workplace or store policies and procedures
- environmental aspects related to workplace and machine or equipment operation and manual handling
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in demonstrating features of digitised embroidery machines, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3008 Produce embroidery from digitised images

Modification History

Release 1. Supersedes and is equivalent to LMTDE3008A Produce embroidery from digitised images

Application

This unit of competency covers the skills and knowledge required to set machine operations and produce embroidery from digitised images.

The unit of competency applies to computerised embroidery machine operation skills where the image and digitised file has been provided.

Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to produce embroidery**
- 2.1 Confirm embroidery work requirements and artwork specifications
 - 2.2 Access artwork file and import into working area and navigate software to direct production
 - 2.3 Select embroidery materials and prepare according to fabric and work requirements
 - 2.4 Perform routine minor maintenance according to manufacturer specifications
 - 2.5 Assess and adjust needle sequence, thread tension and speed, and hoop
- 3 **Produce embroidery**
- 3.1 Check machine operation and adjust to ensure optimum performance
 - 3.2 Manage production problems, such as thread breaks
 - 3.3 Complete a range of images, including embroidered lettering, monograms and motifs on items such as hats, T-shirts and other simple garments, according to work specifications
 - 3.4 Assess production efficiencies and identify areas for improvement
 - 3.5 Minimise waste and dispose of according to environmental guidelines
- 4 **Check and finalise work**
- 4.1 Inspect embroidery against work requirements and artwork specifications
 - 4.2 Finish work and prepare for despatch

4.3 Complete documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Embroidery work requirements include the following:

- checking machine functionality to confirm capacity for work
- confirming material requirements
- assessing garment or item and fabric to be embroidered

Artwork specifications include one or more of the

- content
- colour

following:

- size, including width and length
- stitch type and size
- font
- fill

Software includes:

- any software classed as a digitising software (as opposed to customising or editing software)

Minor maintenance includes the following:

- checking and replacement of needles, attachments and/or parts
- oiling of machine parts
- removal of lint or fabric

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTDE3008A Produce embroidery from digitised images

MSTDE3009 Maintain computerised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3009A Maintain computerised embroidery machines

Application

This unit of competency covers the skills and knowledge required to set up and maintain computerised embroidery machines to ensure efficient operation.

The unit of competency applies to maintenance work on embroidery machines and responding to production problems. It targets the operator or assigned personnel who address common performance problems that do not require specialised sewing machine mechanic skills.

Work involves liaison with operators, if required.

Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Prepare to maintain computerised embroidery machines | 2.1 | Identify type of machine and determine maintenance requirements and schedule |
| | | 2.2 | Inspect componentry of equipment, assess for wear and identify any need for maintenance |
| | | 2.3 | Operate machine to assess performance and identify impact of fabric and needles |
| | | 2.4 | Identify and adjust possible faults in software application or digitised file |
| | | | |
| 3 | Conduct basic maintenance | 3.1 | Identify performance problems and determine root cause |
| | | 3.2 | Assess timing and adjust according to manufacturer specifications |
| | | 3.3 | Assess and adjust positioning and timing of cutters, as required |
| | | 3.4 | Assess and address other operational problems |
| | | 3.5 | Identify electronic or major operational problems and refer to suitable personnel |
| | | 3.6 | Document maintenance work according to workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Software includes:

- any software classed as a digitising software (as opposed to customising or editing software)

Performance problems include one or more of the following:

- needle breaking
- thread breaking
- missing stitches
- stoppage

Root cause includes one or more of the following:

- incorrect timing
- electrical faults
- sharp or worn edges or components
- incorrect needle or positioning
- incorrect thread or material components
- machine needs oiling or cleaning
- incorrect tension

- blockages or clogging in components
- lack of operator skill

Assessment Requirements for MSTDE3009 Maintain computerised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3009A Maintain computerised embroidery machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- maintain at least two (2) computerised embroidery machines
- reading and following work instructions, standard operating procedures, safe work practices, manufacturer specifications
- applying relevant standards
- assessing operational performance of machine
- determining impacts of materials and componentry on performance
- identifying performance problems and determining root cause
- identifying and adjusting possible faults in software application or digitised file
- assessing timing and adjusting according to manufacturer specifications
- assessing and adjusting positioning and timing of cutters, as required
- identifying electronic or major operational problems and referring to suitable personnel
- documenting maintenance work according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- computer navigation to use basic software functions
- machine embroidery techniques
- common performance problems, typical causes and related adjustments
- stabilisers, toppings and backings:
 - water soluble
 - tear away
 - iron on
 - cut away
 - varying weights

- fabric types and properties:

MSTFD2001 Design and produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD2001B Design and produce a simple garment

Application

The unit of competency covers the skills and knowledge required to design, plan and produce a simple garment. Production of the garment involves the use of a domestic sewing machine or plain lockstitch machine. Designs involve modification of existing blocks or patterns.

Work is conducted according to defined procedures and would not be applied in a large scale production environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in

			accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	Plan and prepare to produce garment	2.1	Identify and explore influences and inspirations for design concept
		2.2	Produce storyboard or sketches to assist in the development of ideas
		2.3	Discuss ideas and design concepts with appropriate personnel for review and development of design
		2.4	Select and modify pattern or blocks to suit design and garment size requirements
		2.5	Select, check and prepare materials, tools and equipment
3	Produce garment	3.1	Use a machine to produce garment according to pattern
		3.2	Assess garment against design and pattern, and rectify garment faults
		3.3	Finish garment according to design requirements
4	Review garment production process	4.1	Review production techniques and design to identify future improvements
		4.2	Clean work area and equipment, and store tools and equipment

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Garments include one or more of the following:

- accessories
- straight seamed, draw string skirt
- t-shirt
- smock dress
- other garment requiring a small range of sewing techniques and use of a domestic machine and overlocker

Fabrics include one or more of the following

- stable woven and knitted fabrics, such as cotton drill, calico, double knit, rugby knit and poplin

Appropriate personnel include one or more of the following:

- trainer
- co-worker
- mentor

Tools and equipment include one or more of the following:

- pins
- scissors
- needle and thread
- marker or chalk

Machines include one or more of the following:

- domestic sewing machine
- plain lockstitch machine
- overlocker

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD2001B Design and produce a simple garment

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTFD2001 Design and produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD2001B Design and produce a simple garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- producing storyboard or sketches to demonstrate design ideas and developing design concept
- developing a pattern to suit design and size requirements
- selecting and preparing fabric, materials, tools and equipment
- using a machine to produce at least two (2) simple garments, using the same or different, fabrics, patterns or blocks
- producing simple garments to meet identified pattern and size requirements
- rectifying garment faults and finishing garment to meet design requirements
- identifying improvements in garment production techniques for future production
- cleaning work area and storing materials, tools and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- components of the design process:
 - sketches
 - pictures
 - storyboard
 - fabric samples
 - sharing and reviewing ideas
- techniques to modify blocks and patterns
- techniques in using a sewing machine and overlocker
- sizing requirements
- materials for simple garment:

- fabric
- thread
- buttons
- characteristics of fabrics affecting fabric suitability
- typical fault conditions and related fault-finding procedures:
 - holes
 - inconsistent sewing
 - broken thread
- characteristics of types and styles of threads
- simple equipment maintenance techniques

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in designing and producing a simple garment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2002 Apply printing techniques to produce Indigenous textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2002B Apply printing techniques to produce indigenous textile designs

Application

This unit of competency covers the skills and knowledge required to apply printing techniques to produce Indigenous textile designs

The unit of competency applies to Aboriginal and Torres Strait Islander students that use stencil, lino cut, block, stamp or silk screen printing techniques to produce culturally-specific designs and artworks for fabrics.

The unit of competency should be customised to accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare for printing Indigenous textile designs | 2.1 | Identify and apply protocols for developing culturally-specific designs |
| | | 2.2 | Identify suitable fabric and printing technique |
| | | 2.3 | Develop single or two colour design suitable for cultural context and chosen fabric and printing technique |
| | | 2.4 | Prepare fabric, tools and equipment |
| 3 | Print fabric | 3.1 | Apply printing technique to fabric according to WHS practices |
| | | 3.2 | Use tools and equipment effectively and safely to achieve desired result |
| | | 3.3 | Complete work systematically with attention to detail |
| 4 | Review design and printing process | 4.1 | Assess outcome of printing |
| | | 4.2 | Modify design and technique, as required |
| | | 4.3 | Clean and store materials and equipment |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Protocols includes the following:

- the set of rules applying to behaviour/practices in a specific cultural context
- cultural protocols for image use, design and printing techniques
- recognising and adapting to cultural differences
- communication with individuals and community

Fabrics for printing include one or more of the following:

- fabrics to be used for garments, textile products or accessories
- fabrics in completed products
- fabrics for artwork

Printing techniques include one or more of the following:

- stencil
- lino cut
- block
- stamp
- silk screen

Printing tools and equipment include one or more of the following:

- screens and carousel for printing
- blocks
- lino
- brushes
- knives
- bucket, sink or container
- mixers
- dyes and inks

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD2002B Apply printing techniques to produce indigenous textile designs

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTFD2002 Apply printing techniques to produce Indigenous textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2002B Apply printing techniques to produce indigenous textile designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- applying protocols for developing culturally-specific designs
- identifying elements and principles of design in identified Aboriginal and Torres Strait Islander artwork
- developing design suitable for cultural context and chosen fabric and printing technique
- preparing fabric, tools and equipment
- using tools and equipment effectively with attention to detail to achieve desired result
- printing a single or two colour design on at least three (3) fabric samples
- reviewing and modifying design and technique as required
- cleaning and storing materials and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- cultural protocols for using images, designs and printing techniques
- examples of works of identified Aboriginal and Torres Strait Islander artists and textile designers
- elements and principles of design in identified Aboriginal and Torres Strait Islander artwork
- printing processes and practices used by the identified community
- printing techniques:
 - stencil
 - lino cut
 - block
 - stamp
 - silk screen

- principles and elements of design for printed fabrics
- effects of printing on fabrics
- printing tools and equipment:
 - screens and carousel
 - blocks
 - lino
 - brushes
 - knives
 - bucket, sink or container
 - mixers
 - dyes and inks
- printing techniques to achieve design effects
- characteristics of fabrics
- information resources on fibres and fabrics
- safe practices and procedure

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in textile printing techniques, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2003B Apply dyeing techniques to produce indigenous textile designs

Application

This unit of competency covers the skills and knowledge required to apply dyeing techniques to produce Indigenous textile designs.

The unit of competency applies to the use of tie dye and silk dyeing techniques to produce culturally-specific designs and artworks for fabrics.

The unit of competency should be customised to accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Prepare for dyeing | 2.1 | Identify and apply protocols for developing culturally-specific designs |
| | | 2.2 | Develop single or two colour dyeing design suitable for cultural context and chosen fabric and dyeing technique |
| | | 2.3 | Identify and prepare suitable fabric, dyeing technique and dye type |
| | | 2.4 | Select dye formula, and measure and mix dyes to achieve desired result |
| | | 2.5 | Prepare tools and equipment |
| | | 2.6 | Use swatches of dyed fabric to experiment with and confirm dye recipe |
| | | | |
| 3 | Dye fabrics | 3.1 | Apply dyeing technique to fabric according to WHS practices |
| | | 3.2 | Use tools and equipment effectively and safely to achieve desired result |
| | | 3.3 | Complete work systematically with attention to detail |
| | | | |
| 4 | Review dyeing process | 4.1 | Assess outcome of dyeing |
| | | 4.2 | Modify dyeing techniques as required |

4.3 Clean and store materials and equipment

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Protocols include the following:

- the set of rules applying to behaviour/practices in a specific cultural context
- cultural protocols for image use, design and printing techniques
- recognising and adapting to cultural differences
- communication with individuals and community

Fabrics include one or more of the following:

- fabrics to be used for garments, textile products or accessories
- fabrics in completed products
- fabrics for art works

Dyeing techniques include one or more of the following:

- tie dye
- batik
- silk dyeing

Dye types include one or more of the following:

- silk dyes
- natural dyes
- reactive dyes

Tools and equipment include the following:

- gloves
- bucket, sink or container
- mixers
- dyes and inks

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD2003B Apply dyeing techniques to produce indigenous textile designs

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2003B Apply dyeing techniques to produce indigenous textile designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following information on work specifications, standard operating procedures (SOPs), work instructions and safe practices
- applying relevant standards
- applying protocols for developing culturally-specific designs
- identifying elements and principles of design in Aboriginal and Torres Strait Islander artwork
- applying design concepts to fabric dyeing
- selecting dye formula, and measuring and mixing dyes to achieve desired result
- preparing fabric, tools and equipment
- using tools and equipment effectively with attention to detail to achieve desired result
- dyeing a single or two colour design on at least three (3) fabric samples
- modifying design and technique as required
- cleaning and storing materials and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- cultural protocols for using images, designs and printing techniques
- examples of works of identified Aboriginal and Torres Strait Islander artists and textile designers
- elements and principles of design in identified Aboriginal and Torres Strait Islander artwork
- dyeing techniques and processes used by the identified community
- principles and elements of design for dyed fabrics
- effects of dyeing on fabrics
- dyeing tools and equipment:
 - gloves
 - bucket, sink or container

- mixers
- dyes and inks
- dyeing techniques to achieve design effects
- information resources on fibres and fabrics
- characteristics of fabrics
- safe practices and procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency textile dyeing techniques, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2004 Work within an Indigenous cultural framework

Modification History

Release 1. Supersedes and is equivalent to LMTFD2004B Work within an indigenous cultural framework

Application

This unit of competency covers the skills and knowledge required to work within an Indigenous cultural framework.

The unit of competency applies to Aboriginal and Torres Strait Islander students who wish to produce culturally-specific textile products and identify business opportunities. It applies to key cultural practices and processes used for the design and development of textile works, garments and accessories.

The unit of competency should be customised according to the customs and protocols of the relevant communities. Work should accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Access information on cultural influences	1.1	Identify sources of information on local cultures relevant to individual
		1.2	Use appropriate cultural practices to access cultural information
		1.3	Identify cultural influences, ethics and law relating to production of cultural works
2	Apply relevant work and cultural practices to design and develop textile products	2.1	Identify relevant procedures and materials common to design and development of textile works, garments and accessories
		2.2	Identify customary structure, organisation and business procedures of relevant Aboriginal and Torres Strait Islander community
		2.3	Determine production processes for converting materials into textile products
		2.4	Comply with cultural protocols, personal rights, responsibilities and legal obligations to design and produce culturally-specific textile products
3	Investigate business opportunities for cultural works	3.1	Identify significant people to support design and development of textile works, garments and accessories
		3.2	Identify opportunities for production and sale of cultural textile products
		3.3	Identify potential supply chain components

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Information sources include one or more of the following:

- community elders
- family members
- artworks and artists
- stories
- community members
- government agencies and services
- written, electronic and audio visual material
- art centres and galleries

Cultural information includes one or more of the following:

- stories
- creative processes and practices
- symbols
- themes
- processes and practices
- protocols and procedure
- region, environment
- cultural rites
- artworks
- economic systems

Design and development procedures include one or more of the following:

- sourcing and uses of raw materials
- dyeing
- printing
- use of tools and equipment
- use of culturally significant themes and stories
- involvement and endorsements from significant people
- respect for traditional laws and values

Protocols include the following:

- the set of rules applying to behaviour/practices in a specific cultural

context

- cultural protocols for image use, design and printing techniques
- recognising and adapting to cultural differences
- communication with individuals and community

Materials include one or more of the following:

- natural, man-made and synthetic fibres and fabrics
- animal hides
- componentry such as buttons and zips
- ochres and other sources of natural dyes
- acrylic colours and dyes
- objects used for print designs

Significant people include one or more of the following:

- community and family members
- people with skills in design, production, marketing or business
- trainers, educators, mentors
- customers
- funders or business supporters

Assessment Requirements for MSTFD2004 Work within an Indigenous cultural framework

Modification History

Release 1. Supersedes and is equivalent to LMTFD2004B Work within an indigenous cultural framework

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- using appropriate sources and cultural practices to access cultural information
- applying protocols for developing culturally-specific designs
- identifying relevant procedures and materials common to design and development of textile works, garments and accessories
- identifying customary structure, organisation and business procedures of relevant Aboriginal and Torres Strait Islander community
- complying with cultural protocols, personal rights, responsibilities and legal obligations to develop textile products
- identifying at least two (2) opportunities for production and sale of textile products
- identifying potential supply chain components.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- protocols on access to culturally specific information
- safe work practices and procedures
- cultural protocols for using images, designs and printing techniques
- procedures and materials common to design and development of textile works, garments and accessories
- supply chains:
 - product flow
 - raw material
 - production
 - distribution
 - marketing
 - customers
 - business support and administrators
- people to support design and development of textile works, garments and accessories
- production processes:

- textile printing and dyeing
- making patterns
- marking and cutting fabric
- sewing
- finishing
- colour mixing
- potential opportunities for product sales
- supply chain components.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in Indigenous cultural knowledge, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2005 Identify design process for fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2005B Identify design process for fashion designs

Application

This unit of competency covers the skills and knowledge required to identify design process for fashion designs.

The unit of competency applies to identifying the criteria for a fashion design brief, and how they impact on the process of producing fashion items. It includes the impact of colour on the design process in a production environment.

Work is conducted according to defined procedures, in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|---|-----|---|
| | requirements | 1.2 | comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Determine job requirements from specifications, job sheets or work instructions |
| 2 | Prepare for fashion design process | 2.1 | Identify the elements and principles of fashion design |
| | | 2.2 | Identify the criteria of an identified fashion design brief |
| | | 2.3 | Investigate colour dimensions and colour combinations for fabrics, accessories and components |
| | | 2.4 | Identify commercial considerations in producing a design |
| | | 2.5 | Prepare tools, equipment and work space |
| 3 | Prepare colour design | 3.1 | Identify relationship between value and intensity and prepare a colour chart for a design brief |
| | | 3.2 | Use appropriate tools and equipment to prepare a colour wheel and shade scale according to colour mixing principles |
| | | 3.3 | Colour match all garment components with identified fabric to prepare colour design for production |
| 4 | Review colour design | 4.1 | Check that colour charts satisfy specifications and quality criteria |
| | | 4.2 | Carry out any changes or adjustments as required |
| | | 4.3 | Document and record design |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS requirements

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Criteria for a fashion design brief include three or more of the following:**
- subject matter/garment
 - style
 - effects
 - colour
 - size
 - fabric
 - quantity
 - timeframe

- Tools and equipment include**
- digital equipment
 - software

- one of more of the following:**
- fabrics
 - hand tools
 - pencils, crayons, pens, brushes and paints
 - paper and cardboard

Assessment Requirements for MSTFD2005 Identify design process for fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2005B Identify design process for fashion designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- interpreting the criteria of a given fashion design brief
- investigating colour dimensions and colour combinations for a variety of fabrics, accessories and components in response to a design brief
- preparing a colour wheel and shade scale according to colour mixing principles
- preparing a colour chart for a design brief
- colour matching all garment accessories and components with identified fabric to prepare colour design for production
- checking colour chart against design brief and quality criteria, and making adjustments, as required
- documenting and recording design.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- elements and principles of design:
 - repetition
 - gradation
 - rhythm
 - radiation
 - harmony
 - contrast
 - dominance
 - proportion
 - balance
 - unity
- role of colour in fashion design

- colour wheels
- dimensions of colour:
 - value/tone
 - hue
 - chroma/intensity/clarity/saturation
- attributes of colour:
 - mood
 - emotion
 - positive or negative
 - cool, warm or neutral
- colour combinations:
 - complementary or contrasting
 - analogous or harmonious
 - triad
 - monochromatic
- specifications of a design brief:
 - subject matter
 - style
 - effects
 - colour
 - size
 - fabric
 - quantity
 - timeframe
 - colour mixing principles
- components and accessories:
 - zips
 - buttons
 - thread
 - linings
 - trims
- materials, tools and equipment to experiment with colour
- commercial considerations in producing a design:
 - fabric quality
 - cost of fabrics, trims accessories
 - cost of components and accessories
 - single, small run or volume production
 - size range
 - overheads
 - labour

- transport
- marketing and distribution
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion design at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2006 Use a sewing machine for fashion design

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to use a sewing machine to align and sew pattern pieces and sew components.

The unit of competency applies to aligning and sewing straight seams, joining flat pieces of stable fabric together, sewing components and stitching hems, using basic stitching.

Work is conducted according to defined procedures and would not be applied in a large scale production environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to use sewing machine**
 - 2.1 Determine materials and machining requirements and develop plan for sewing operations
 - 2.2 Clean, check, set up and adjust machine according to specifications for work
 - 2.3 Identify poor machine performance and adjust, as required
 - 2.4 Check and lay out fabric pieces in sequence according to production operations
- 3 **Use sewing machine**
 - 3.1 Sew pieces according to pattern requirements and quality standards
 - 3.2 Use machine according to requirements for efficient work
 - 3.3 Perform a range of sewing operations to align and sew pattern pieces and sew components.
 - 3.4 Control machine and handle work according to type of operations, fabrics and product type
- 4 **Assess quality of sewn work**
 - 4.1 Inspect sewn work against specifications, workplace procedures and quality standards
 - 4.2 Identify any faults or pieces that do not meet quality standards and take appropriate action
 - 4.3 Record results of quality inspection and store work ready for next operation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include one or more of the following:

- domestic sewing machine
- commercial sewing machine
- plain lockstitch sewing machine
- overlocker

Materials include one or more of the following:

- fabric
- thread
- zips
- buttons
- trims

Fabrics include one or more of the following

- stable woven and knitted fabrics, such as cotton drill, calico, double knit, rugby knit and poplin
- denim, single knits, tricot and gabardine

Components include three or more of the following:

- sleeves
- waistbands (straight or shaped)
- collars
- cuffs
- plackets
- facings (neck and armhole)
- binds
- zips (dress, skirt, trouser and invisible)
- buttons and buttonholes
- pockets (cut away, patch and in seam)

Set-up includes the following:

- correct thread
- needle size and type: a variety of size and types, such as standard and ball point
- tension setting
- attachments

Identify poor machine performance includes:

- identifying worn or damaged parts, and reporting or replacing according to manufacturer specifications
- identifying tension faults
- identifying poor thread performance or incorrect thread selection
- identifying incorrect foot or needle for sewing
- identifying impact of poor machine performance on sewing
- checking and replacing worn or damaged needles and attachments (feet)

Actions to respond to faults or poor quality include one or more of the following:

- correcting and re-doing work
- discarding and recycling fabric and starting again
- adjusting machine settings, threading, tension, foot and needle
- revising choice of fabric, thread or stitching
- seeking advice or further training

Sewing operations include

- aligning and sewing straight seams

one or more of the following:

- joining flat pieces of stable fabric together
- top stitch, edge stitch, open seams, closed seams and lapped seams
- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points or involving the special handling skills required to accommodate fabric variations
- gathering, easing, tucking and stitching curves
- hems (double fold, rolled, blind and stitched hem)
- darts and pleats

Unit Mapping Information

Assessment Requirements for MSTFD2006 Use a sewing machine for fashion design

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against specifications and preparing machine and materials
- demonstrating sewing techniques on a domestic or commercial machine
- using at least two (2) different fabrics, to sew at least three (3) samples of the following operations:
 - aligning and sewing straight seams
 - joining flat pieces of stable fabric together
 - top stitch, edge stitch, open seams, closed seams and lapped seams
- demonstrating sewing techniques using one (1) or more fabrics, to sew at least three (3) different components, and include three (3) of the following operations:
 - gathering, easing, tucking and stitching curves
 - hems (double fold, rolled, blind and stitched hem)
 - darts and pleats
- doing routine maintenance on identified sewing machine
- inspecting completed work to check it complies with workplace procedures and quality, and identifying and correcting faults
- recording results of quality inspection and storing work ready for next stage.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- sewing operations, such as:
 - aligning and sewing straight seams
 - joining flat pieces of stable fabric together
 - top stitch, edge stitch, open seams, closed seams and lapped seams

- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points or involving the special handling skills required to accommodate fabric variations
- gathering, easing, tucking and stitching curves
- hems (double fold, rolled, blind and stitched hem)
- darts and pleats
- techniques in using and maintaining identified sewing machine
- characteristics of fabrics:
 - stable woven and knitted fabrics and threads, such as cotton drill, calico, double knit, rugby knit and poplin
 - denim, single knits, tricot and gabardine
- materials, including:
 - fabric
 - buttons
 - zippers
 - trims
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in using a domestic or commercial sewing machine for fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3001 Market design product to local outlets

Modification History

Release 1. Supersedes and is equivalent to LMTFD3001B Market design product to local outlets

Application

This unit of competency covers the skills and knowledge required to market design product to local outlets.

The unit of competency applies to the presentation and sale of a single or small range of fashion design products to local outlets, such as markets, galleries, shops and art centres, or direct to the customer.

Work may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

		requirements at all times
	1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
	1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to market design product	2.1 Identify features and benefits of design product
		2.2 Identify key customers and purchasing requirements
		2.3 Identify potential product range and suitable sales outlets
3	Prepare design product for sale	3.1 Explore pricing options for similar products and sales outlets and determine price
		3.2 Select presentation to maximise appearance.
		3.3 Prepare promotional tools to support sales
		3.4 Negotiate promotional costings and price of product with outlet or customer as required
		3.5 Prepare documentation to confirm supply arrangements and sale conditions
4	Review marketing of design product	4.1 Determine process and format to record marketing and sales outcomes
		4.2 Explore opportunities for varying product design and promotional tools to enhance market for product

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS procedures

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Sales outlets include one or more of the following:

- markets
- galleries
- shops
- art centres
- websites

Promotional tools include three or more of the following:

- display props
- gimmicks
- websites
- labelling
- special offers
- packaging
- product information
- fliers
- signage
- social media

Sale conditions include two

- selling period

or more of the following:

- commission
- bulk purchase
- discounts
- pre-purchase
- on consignment
- sale or return
- damaged or faulty products
- insurance

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD3001B Market design product to local outlets

Links

Assessment Requirements for MSTFD3001 Market design product to local outlets

Modification History

Release 1. Supersedes and is equivalent to LMTFD3001B Market design product to local outlets

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- determining design product or products to be marketed and identifying features and benefits of product
- identifying key customers, purchasing behaviours and potential sales outlets
- exploring pricing options for similar products and sales outlets and determining proposed sale price
- preparing and costing three (3) promotional tools and materials highlighting features and benefits of design products for sale
- negotiating promotional costings and price of product with outlet or customer, as required
- preparing documentation confirming supply arrangements and sale conditions
- developing a process and format to record marketing and sales outcomes
- listing at least one (1) opportunity for varying product design and promotional tools to enhance market for product.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- location of sales outlets and sales practices in local community
- features and benefits of identified products
- purchasing options and sales processes:
 - location of sales outlet
 - purchasing times
 - cash or credit payment options
 - acceptable price range
 - expectations of product performance
 - opportunity to try garments on

- need to return or exchange items
- promotional tools and practices:
 - display props
 - gimmicks
 - websites
 - labelling
 - special offers
 - packaging
 - product information
 - fliers
 - signage
 - social media
- recording and reporting practices
- work instructions, standard operating procedures and safe work practices.

Assessment Conditions

- Assessors must:
- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in marketing design products, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3002 Design and produce indigenous printed textiles to a brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD3002B Design and produce indigenous printed textiles to a brief

Application

This unit of competency covers the skills and knowledge required to design and produce printed textiles that reflect Indigenous Australian cultures, in response to a brief.

The unit of competency applies to Indigenous Australians and the use of culturally-specific designs, artworks and production processes and techniques for printed fabrics or textile products. Textile products may involve more than one printing technique.

The unit of competency should be customised to accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2002 Apply printing techniques to produce Indigenous textile designs

MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs

MSTFD2004 Work within an Indigenous cultural framework

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare for producing Indigenous printed textiles	2.1	Interpret design brief and consult with relevant people to identify key requirements
		2.2	Identify and apply protocols for developing culturally-specific designs
		2.3	Identify and experiment with techniques and develop design concept to obtain desired effects
		2.4	Confirm design and review against requirements of the brief
		2.5	Prepare chosen textile, tools and equipment for printing
3	Print textiles	3.1	Apply printing technique according to WHS practices
		3.2	Use tools and equipment effectively and safely to achieve desired result
		3.3	Complete work systematically with attention to detail
4	Review design	4.1	Review process to assess outcome in relation to brief

- | | | |
|-----------------------------|-----|--|
| and printing process | 4.2 | Modify printing techniques and design elements, as required |
| | 4.3 | Comply with workplace procedures and clean and store materials and equipment |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- (PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS procedures

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design brief includes three or more of the following:

- subject matter
- style
- effects

- colour
- size
- fabric
- quantity
- timeframe

Relevant people include one or more of the following:

- clients
- elders, traditional owners and others with cultural and social authority
- supervisors
- co-workers

Protocols include the following:

- the set of rules applying to behaviour/practices in a specific cultural context
- cultural protocols for image use, design and printing techniques
- recognising and adapting to cultural differences
- communication with individuals and community

Textiles include one or more of the following:

- fabrics used for garments, textile products or accessories
- fabrics in completed products

Indigenous printed textiles include one or more of the following:

- culturally-specific designs
- artworks
- production processes and techniques for printed fabrics or textile products
- image use and design protocols and techniques specific to an identified Aboriginal or Torres Strait Islander community

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD3002B Design and produce indigenous printed textiles to a brief

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD3002 Design and produce indigenous printed textiles to a brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD3002B Design and produce indigenous printed textiles to a brief

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- applying protocols for developing culturally-specific designs
- identifying requirements of the design brief and confirming with relevant people
- experimenting with techniques and developing a design concept to achieve desired effects
- preparing and using fabric, tools and equipment to print at least three (3) preliminary samples to experiment with technique
- reviewing process and applying printing technique to print a design as specified in the design brief on at least three (3) fabric samples
- completing work systematically with attention to detail
- modifying design and technique as required
- cleaning and storing materials and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- cultural protocols for using images, designs and printing techniques
- examples of works of Aboriginal and Torres Strait Islander artists and textile designers
- elements and principles of design in Aboriginal and Torres Strait Islander artwork
- printing processes and practices used by the identified community
- principles and elements of design for printed fabrics
- specifications of a design brief:
 - subject matter /function of printed textile
 - style
 - effects
 - colour

- size
- fabric
- quantity
- timeframe
- characteristics of fabrics and effects of printing on fabrics
- printing tools, equipment and techniques to achieve design effects:
 - screens and carousel for printing
 - blocks
 - lino
 - brushes
 - knives
 - bucket, sink or container
 - mixers
 - dyes, inks
- printing processes and practices:
 - stencil
 - lino cut
 - block
 - stamp
 - silk screen
 - uses of natural and acrylic paints
 - uses of natural items for stamps
- information resources on fibres and fabrics
- safe practices and procedures

Assessment Conditions

- Assessors must:
- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in designing textiles, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3003 Prepare design concept for a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD3003B Prepare design concept for a simple garment

Application

This unit of competency covers the skills and knowledge required to prepare design concept for a simple garment.

The unit of competency applies to individuals working with the patternmaker or designer to create a design concept for production of a simple garment. The concept is based on historical influences and trends from the 20th Century. Work is supervised, may be conducted in small to large scale enterprises, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2011 Draw and interpret a basic sketch

MSTFD2005 Identify design process for fashion designs

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	Prepare to develop design concept	2.1	Identify significant events of the 20th Century and fashion trends related to them
		2.2	Identify fashion cycles and garments that contain different design principles
		2.3	Prepare tools, equipment and work space
		2.4	Draw a series of trade sketches to illustrate design principles
3	Develop design concept	3.1	Determine garment type and specifications
		3.2	Prepare sketches to illustrate design concept and develop storyboard
4	Check and review design concept	4.1	Review sketches and assess against quality criteria
		4.2	Complete documentation relating to storyboard
		4.3	Carry out any changes or adjustments, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Drawing tools and equipment include one or more of the following:

- A3 layout pad
- digital equipment
- software
- fabrics
- hand tools
- pencils, crayons, pens and paints
- paper and cardboard

Significant events include one or more of the following:

- wars
- female emancipation
- rock and roll
- hippy era
- technological developments (e.g. plastics and manufactured textiles)
- space age

Garments include one or more of the following:

- skirts
- trousers/pants

- shirts/blouses
- dresses

Unit Mapping Information

Assessment Requirements for MSTFD3003 Prepare design concept for a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD3003B Prepare design concept for a simple garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and illustrating selected features of fashion trends related to significant 20th Century events or periods
- drawing a series of trade sketches to illustrate design principles for at least two (2) garment features that represent fashion trends related to a significant 20th Century event or periods
- developing a storyboard and documentation to represent design concept for one (1) simple garment that reflects fashion trends related to a significant 20th Century event
- checking design concept and making required changes, as required to meet relevant industry or Australian Standards that are current at the time this unit is being undertaken

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant industry or Australian Standards that are current at the time this unit is being undertaken
- significant events of the 20th Century that have impacted on fashion trends
- fashion trends relating to garment features, such as:
 - skirt hem lengths
 - sleeve shapes
 - trousers widths
 - lycra
 - hipsters
- design principles and features of fashion trends associated with 20th Century events
- principles of design:
 - repetition
 - gradation
 - rhythm
 - radiation

- harmony
- contrast
- dominance
- proportion
- balance
- unity
- elements of a storyboard:
 - fabrics
 - colours
 - sketches
 - illustrations
 - shapes
 - textures
 - specifications
 - fabric swatches
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- work instructions, SOPs and safe work practices.

Assessment Conditions

- Assessors must:
- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in preparing a design concept for a simple garment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3004 Draw a trade drawing for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD3004B Draw a trade drawing for fashion design

Application

This unit of competency covers the skills and knowledge required to draw an accurate trade or technical drawing based on specifications and a design.

The unit of competency applies to the patternmaking or design room, where accurate trade or technical drawings are required to interpret and clarify a garment design.

Work is supervised and may be conducted in small to large scale enterprises. Work may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

		requirements at all times
	1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
	1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to produce a trade drawing	2.1 Identify all garment characteristics, components and specifications
	2.2	Select and prepare drawing tools, equipment and workstation
	2.3	Select appropriate templates to prepare trade drawing
3	Produce a trade drawing	3.1 Use quality criteria to create a working drawing that correctly represents a pattern piece or garment
	3.2	Draw lines accurately to represent garment specifications
	3.3	Identify and label relevant parts of drawing and include notes relating to construction and design features
4	Check and complete work	4.1 Assess trade drawing against design specifications and quality criteria
	4.2	Make changes or adjustments to trade drawing, as required
	4.3	Complete and store documentation relating to trade drawing

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Garments include one or more of the following:

- skirts
- trousers/pants
- shirts/blouses
- dresses
- coats
- lingerie

Garment features include one or more of the following:

- fitting and seam lines
- style lines
- yokes, gores and panels
- necklines
- sleeves
- collars
- zips and buttons
- pockets
- waistbands

Details and special effects include one or more of the following:

- top stitching and edge stitching
- pin tucks and tucks
- frills and gathers
- pleats
- drapes
- fabric effects (lace, fur and knitwear)
- bows and ties
- quilting
- elasticsation

Templates for trade drawings include one or more of the following:

- front and back full body view
- ladies, men's and children's
- upper torso/lower torso
- swimwear/lingerie
- full body with arms and legs extended from torso
- 3/4 turned

Unit Mapping Information

Assessment Requirements for MSTFD3004 Draw a trade drawing for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD3004B Draw a trade drawing for fashion design

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- using appropriate tools and equipment to produce working drawings
- using templates to produce drawings that are in proportion and technically correct, showing all details, including front and back view, and incorporating all quality criteria
- completing accurate trade drawings of at least two (2) garments that meet all requirements of the design brief or specification
- drawing lines accurately to represent garment specifications
- identifying and labelling relevant parts of drawing, and including notes relating to construction and design features
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- drawing tools and equipment:
 - paper
 - layout pad
 - pencils, various grades
 - pencil sharpener
 - kneadable eraser
 - ruler
 - black felt tip pens
 - portfolios
 - templates
 - computer with drawing software

- patternmaking and design terminology
- fabric performance characteristics
- garment styles, features, special effects and detailing options
- quality criteria for trade drawings:
 - proportion
 - perspective
 - symmetry and balance
 - fabric performance
 - detailing
 - neatness
- sequence of operations
- lines to represent garment specifications:
 - straight
 - angled
 - curved
 - pointed
 - dotted
 - dashed
 - circled
- recording and reporting practices

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in technical or trade drawing for fashion design at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3005 Use skin, fur or leather to create fashion or textile products

Modification History

Release 1. Supersedes and is equivalent to LMTML3005A Use skin, fur or leather in millinery products

Application

This unit of competency covers the skills and knowledge to use skin, fur or leather to create or embellish fashion, textiles or textile products, such as simple garments, accessories and millinery.

Skills and knowledge in design and production will include the required dimensions of the animal skin or pelt, the techniques and resources required to carry out production according to the design, the intended purpose of the finished product, and the views of the customer in using particular animal skins or pelts.

Skin, fur and leather may be incorporated by hand or simple machining. Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

The unit does not include working with footwear.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to use skin, fur or leather	<p>2.1 Determine requirements of design brief</p> <p>2.2 Draft pattern or select existing pattern according to design and performance requirements</p> <p>2.3 Select materials according to design and production requirements</p> <p>2.4 Select materials according to legal and environmental regulations and considerations</p> <p>2.5 Identify production resource requirements and prepare work area and equipment</p>
3	Produce components	<p>3.1 Make up pattern as a toile for testing, as required</p> <p>3.2 Prepare materials according to the requirements for the type of material and the production requirements</p> <p>3.3 Dampen animal materials, stretch, thin, block and dry, as appropriate</p> <p>3.4 Cut materials to selected pattern</p> <p>3.5 Comply with relevant workplace procedures</p>
4	Produce product and finalise	<p>4.1 Join pieces, sew or bond appropriately for design and material</p>

production	4.2	Trim and finish product
	4.3	Check product against design and production requirements
	4.4	Produce product ready for packaging, storage or despatch
	4.5	Complete production process, including housekeeping and required documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Australian Standards include:

Performance requirements

- purpose of textile product, including utility, decoration,

include one or more of the following:

artistic creation, protection, warmth, durability and embellishment

- purpose of garments or millinery items, including sportswear, fashion, theatre, work-wear, sun protection, wet weather protection and warmth
- the durability/wearability and social sensitivity of various skins and pelts
- how the material will perform in various situations, such as heat, wet, cold and sun
- how the selected material will respond to dampening, cutting, stretching, drying, sewing and other production processes

Resource requirements include one or more of the following:

- well-ventilated and lit work area
- facilities and equipment for:
 - measuring and cutting
 - dampening
 - stretching
 - blocking
 - dyeing and working with chemicals
 - drying
 - sewing and bonding
- PPE

Unit Mapping Information

Assessment Requirements for MSTFD3005 Use skin, fur or leather to create fashion or textile products

Modification History

Release 1. Supersedes and is equivalent to LMTML3005A Use skin, fur or leather in millinery products

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- selecting materials and processes to make fashion or textile products that incorporate fur, skin or leather
- developing designs and/or patterns for fashion or textile products that incorporate fur, skin or leather, according to design and performance requirements
- conducting handling and production operations and processes on selected fur, skin or leather and complying with relevant legal and environmental regulations
- applying relevant procedures to produce at least two (2) products using skin, fur or leather
- checking products meet specifications and production requirements
- applying workplace procedures
- completing required documentation

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- production techniques for identified product
- patternmaking and cutting for accessories, simple garments or millinery
- performance requirements of various finished products
- performance and handling requirements of two (2) or more treated and processed animal skins and pelts, such as:
 - leather
 - suede
 - chamois
 - fur
 - feather
 - reptile

- fish
- man-made alternatives with similar handling/characteristics (such as faux fur and vinyl)
- resource requirements for a range of design, preparation and production techniques using animal skins and pelts
- legal requirements and obligations related to the use of animal skins and pelts, such as:
 - quarantine, importation and exportation issues relating to the use of furs, skins and hides
 - treatment and preservation requirements of animal pelts
 - social sensitivity
 - animal protection
- required documentation, such as:
 - item or batch number and date of finished item
 - customer order information
 - dispatch information
 - customer invoicing
- safety and environmental aspects of related to workplace operation and handling
- quality standards
- workplace procedures
- recording and reporting procedures

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in using skin, fur or leather in fashion or textile production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4001 Apply design studio process

Modification History

Release 1. Supersedes and is equivalent to LMTFD4001B Apply design studio process

Application

This unit of competency covers the skills and knowledge required to apply design studio processes when interpreting and responding to a specified brief to produce a fashion design product.

The unit of competency applies to the integration of skills across the design process and focuses on experimentation of design studio processes to result in the production of a fashion design product. The design brief may be contextualised to a particular context within the fashion industry and includes clear specifications for the product design.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare for design and production	2.1	Identify specifications of design brief, end-user expectations and purposes of the product
		2.2	Research relevant information to guide design and production process
		2.3	Analyse information, clarify brief, as required, and identify any additional expertise needed for project
		2.4	Identify preliminary design concept
3	Undertake design and production processes	3.1	Implement design processes to experiment with and develop design concepts
		3.2	Use appropriate communication tools to seek feedback on design concept from appropriate personnel and modify concept in line with design brief
		3.3	Use selection processes to evaluate and refine concept options and develop design
		3.4	Identify production requirements and make preparations for production according to Australian Standards
		3.5	Identify sequence of operations and complete requirements to develop and confirm design pattern
		3.6	Complete required actions to produce finished fashion product
4	Review design and production processes	4.1	Assess finished product against quality criteria, design specifications and design brief
		4.2	Evaluate design to identify opportunities for improvement

- 4.3 Analyse and evaluate production process to identify opportunities for improvement
- 4.4 Document process and improvements

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Specifications for design include three or more of the

- budget
- price point
- type of garment

- following:**
- range
 - style requirements
 - fit model specifications
 - size range
 - timeline
 - design restrictions or conditions
- Relevant information to guide design and production process includes one or more of the following:**
- trends
 - fabrics
 - production and construction processes
 - target market
 - characteristics of target market
 - resource availability
 - costs
- Selection processes include two or more of the following:**
- checking against design brief
 - discussing with supervisor
 - testing with target market
 - testing with production team
 - discussing with patternmaker
 - testing with sales and marketing professionals
- Preparations for production include the following:**
- identifying all components required for production
 - identifying technical aspects of production
 - completing specification sheet to guide production
 - identifying and sourcing resources and production requirements
 - developing production plan to guide production
- Sequence of operations includes the following:**
- selecting blocks to meet design brief
 - modifying blocks to create patterns that meet design requirements and specifications
 - making pattern according to industry standards, including industry markings and lay plans
 - creating toile to test accuracy of pattern
 - confirming pattern against design specifications
- Produce finished fashion product includes the**
- preparing workplace according to WHS practices
 - preparing materials and resources
 - cutting fabric according to pattern directions

following:

- sewing product according to specifications
- finishing product according to specifications

Assessment Requirements for MSTFD4001 Apply design studio process

Modification History

Release 1. Supersedes and is equivalent to LMTFD4001B Apply design studio process

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and meet the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- determining specifications of design brief, end-user expectations and purposes of the product, and researching relevant information to guide design and production process
- implementing design processes to experiment with and develop design concepts
- using appropriate communication tools seek feedback on design concept from appropriate personnel and modify or refine concept in line with design brief
- confirming production requirements, design pattern, sequence of operations and preparations for production
- producing at least two (2) fashion design products that meet the design brief specifications and Australian Standards
- evaluating completed product design and production processes to identify possible improvements
- documenting design process and possible improvements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- aspects of the design process:
 - applying elements and principles of design
 - developing inspiration boards and storyboards
 - assessing fibres and fabrics
 - reviewing relevant products such as garment sample designs
- design, patternmaking and fashion production tools, equipment and processes:
 - blocks
 - dress form
 - scissors

- square rule
- marker pens
- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- tape measure
- characteristics of target market:
 - age
 - gender
 - size, body characteristics
 - economic and social expectations
 - purchase pattern
- communication tools:
 - inspiration board
 - storyboard
 - research information
 - multimedia tools
 - print and audio tools
 - demonstration or exhibition
- communication skills and strategies:
 - effective verbal and non-verbal communication
 - oral, written and visual communication
 - active listening
 - positive language
 - recognising and adapting to cultural differences
 - negotiation and conflict resolution skills
- elements and principles of design and how they are used to create good design in the clothing industry:
 - repetition
 - gradation
 - rhythm
 - radiation
 - harmony
 - contrast
 - dominance
 - proportion
 - balance

- unity
- information sources and requirements for design and production
- structural anatomy impacting on design:
 - skeletal development
 - muscle development
- body morphology:
 - shape
 - form
 - fat distribution
- garment construction
- fabrics, fibres, trims and accessories, and their properties and characteristics
- personnel who can contribute to design brief and studio processes:
 - supervisor
 - trainer/mentor
 - designers
 - patternmakers
 - production supervisors
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion design studio processes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4002 Apply principles of colour theory to fashion design development

Modification History

Release 1. Supersedes and is equivalent to LMTFD4002B Apply principles of colour theory to fashion design development

Application

This unit of competency covers the skills and knowledge required to apply principles of colour theory to fashion design development.

The unit of competency applies to identifying the elements and principles of colour theory, and how they impact on the design process when developing fashion products. It includes the development of a colour wheel and a colour chart for an identified design concept. It applies to using colour in any area of the fashion design process, to create visual effects, influence mood and develop design directions based on colour choices.

Work is supervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTFD2005 Identify design process for fashion designs

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Determine job requirements from specifications, job sheets or work instructions |
| 2 | Investigate colour and colour theory | 2.1 | Identify sources of information on colour and colour theory |
| | | 2.2 | Identify the attributes and dimensions of colour |
| | | 2.3 | Identify the application of colour theory to the fashion design process |
| 3 | Experiment with colour for fashion design | 3.1 | Identify the criteria of an identified fashion design brief |
| | | 3.2 | Investigate colour combinations and relationships for use in fashion design |
| | | 3.3 | Identify visual or optical effects of colour and colour schemes |
| | | 3.4 | Investigate colour forecasting options |
| | | 3.5 | Mix colours to create new combinations or schemes |
| | | 3.6 | Use appropriate tools and equipment to prepare a colour wheel and shade scale or chart according to colour mixing principles |
| | | 3.7 | Identify fabric and colour-match all components for production |
| 4 | Use colour to | 4.1 | Identify different uses of colour and compare impact on |

**communicate
concept or idea**

concept or idea

- 4.2 Apply colour to fashion templates and use colour to develop fashion storyboards and reflect design concept
- 4.3 Check colour chart complies with design brief and quality criteria
- 4.4 Document and store colour investigations for future reference

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS requirements

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Visual or optical effects include two or more of the following:

- size
- density
- value
- visual mixing
- simultaneous contrast
- motion
- texture

Criteria for a fashion design brief include two or more of the following:

- subject matter/garment
- style
- effects
- colour
- size
- fabric
- quantity
- timeframe

Tools and equipment include two or more of the following:

- digital equipment
- software
- fabrics
- hand tools
- pencils, crayons, pens, brushes and paints
- paper and cardboard

Assessment Requirements for MSTFD4002 Apply principles of colour theory to fashion design development

Modification History

Release 1. Supersedes and is equivalent to LMTFD4002B Apply principles of colour theory to fashion design development

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- creating a portfolio of fashion pictures and illustrations that reflect different visual or optical effects, moods and colour schemes
- interpreting the criteria of a given fashion design brief
- identifying at least two (2) colour forecasting sources
- preparing a colour wheel and shade scale according to colour mixing principles
- preparing a colour chart for a story board for a design concept
- colour matching all garment accessories and components with identified fabric to prepare colour design for production
- checking colour chart against design brief and quality criteria, and making adjustments if required
- documenting and recording design.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- sources of information on colour and colour theory
- role of colour in fashion design
- colour wheels
- dimensions of colour:
 - value/tone
 - hue
 - chroma/intensity/clarity/saturation
- attributes of colour:
 - mood

- emotion
 - positive or negative
 - cool, warm or neutral
- colour combinations:
 - complementary or contrasting
 - analogous or harmonious
 - triad
 - monochromatic
- role of colour in fashion design
- specifications of a design brief:
 - subject matter
 - style
 - effects
 - colour
 - size
 - fabric
 - quantity
 - timeframe
- colour mixing principles
- components and accessories:
 - zips
 - buttons
 - thread
 - linings
 - trims
- materials, tools and equipment to experiment with colour
- components of a storyboard:
 - fabrics
 - colours
 - sketches
 - illustrations
 - shapes
 - textures
 - specifications
 - fabric swatches
- commercial considerations in producing a design
 - fabric quality
 - cost of fabrics, trims and accessories
 - cost of components and accessories
 - single, small run or volume production

- size range
- overheads
- labour
- transport
- marketing and distribution
- colour forecasting
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
- neatness.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in colour design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4003 Assist in preparation of preliminary design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4003B Assist in preparation of preliminary design concepts

Application

This unit of competency covers the skills and knowledge required to assist in the preparation of preliminary design concepts.

The unit of competency applies to preparing preliminary design concepts for garments, for self or others, using generally basic stable fabrics.

It applies to original creation or adaptation of designs or interpretation of sketches for single or multiple production styles and ranges, made-to-measure and theatre costuming.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design brief details include one or more of the following:

- garment or range details
- target market
- end uses of product
- cost point
- production requirements
- timelines
- client requirements
- workplace requirements
- quality requirements
- style and feature requirements

Design concept includes one or more of the following:

- single or multiple production styles and ranges
- made-to-measure
- theatre costuming
- own use
- client use

Relevant people include one or more of the following:

- designer
- sales team
- management
- client
- supervisor

Assessment Requirements for MSTFD4003 Assist in preparation of preliminary design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4003B Assist in preparation of preliminary design concepts

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- collaborating with others to generate ideas in response to a design brief
- contributing to selecting and preparing appropriate preliminary design concept for development
- preparing storyboard themes manually or using computer-aided design (CAD) systems related to styles, fabrics and colours
- contributing positively to ideas and discussion with team members and to the development and presentation of the design concept to enhance success of project
- preparing and rehearsing own contribution to a presentation to the client that meets all requirements of the brief and outlines features and benefits
- presenting features and benefits of designs in a positive manner that encourages approval
- reviewing performance and identifying areas for improvement.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- elements and principles of design and how they are used to create good design in the fashion industry
- fashion industry context such as codes of practice, global and local trends, copyright obligations and resource sources
- garment construction, marker making and cutting procedures, including:
 - seam finishes, such as flat seam, blind hem and French seam
 - allocation of seam allowance
 - stitches, such as straight, zigzag, overlock and buttonholes
 - stitch requirements
 - notching

- pattern information (size, style number, cutting instructions and identity)
- darts
- drill holes
- slits
- job seams
- grain line
- cutting line
- stitching line
- colour/colour mix and interpretation
- properties and characteristics of basic stable fabrics, fibres, trims and accessories
- Australian Standards
- suitability of fabrics:
 - trends
 - performance
 - colour
 - availability
 - care and maintenance requirements
- storyboard components:
 - trade sketches of new garment designs
 - illustrations
 - magazine extracts
 - fabric swatches
 - trim or accessory samples
 - colour palette
 - specifications
- parameters of the project:
 - team members and their roles
 - chain of command
 - timelines
 - budget constraints
 - reporting processes
 - workplace practices
 - technical requirements of production
 - constraints
 - project plan and critical path
 - additional expertise
 - influence of previous projects
- presentation to client:
 - use effective oral and/or written communication tools to present design concept
 - use positive language

- emphasise features and benefits of design concepts
- encourage and promote acceptance of design concept
- assess and respond to client response
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4004 Calculate cost estimates for fashion products

Modification History

Release 1. Supersedes and is equivalent to LMTFD4004B Calculate cost estimates for fashion products

Application

This unit of competency covers the skills and knowledge required to calculate cost estimates for fashion products.

The unit of competency applies to cost estimating for products developed for the fashion industry, including sample production.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions
- 2 **Prepare to calculate cost estimates**
- 2.1 Identify factors and market forces to consider when costing fashion products
 - 2.2 Identify hidden costs in sample production
 - 2.3 Identify and compare different methods of utilising labour in the fashion industry
 - 2.4 Identify differences in costs for sample and bulk production garments
- 3 **Calculate costs involved in producing fashion products**
- 3.1 Compare fabric and trim of similar garments from different price points within fashion industry and identify any production differences
 - 3.2 Estimate costs of selected fabric and trims for sample garments and bulk production
 - 3.3 Consider quality standards and desired garment finish to determine labour source
 - 3.4 Calculate labour costs to produce sample garment and for bulk production
 - 3.5 Review and adjust chosen fabric, trims and labour, if necessary, and calculate revised costs
- 4 **Develop costing sheets to industry standards**
- 4.1 Identify components of costing sheets to meet fashion industry standards
 - 4.2 Complete a costing sheet for a sample garment
 - 4.3 Develop a quotation for bulk production

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Factors to consider when costing include one or more of the following:**
- variable costs (e.g. fabric and labour)
 - fixed costs (e.g. overheads)
 - single or small runs
 - bulk production
 - profit margin

- Costs include the following:**
- fabrics
 - trims and accessories
 - materials
 - time
 - labour
 - overheads

Different methods of utilising labour include one or more of the following:

- cut, make and trim (CMT)
- subcontractors
- offshore production

Assessment Requirements for MSTFD4004 Calculate cost estimates for fashion products

Modification History

Release 1. Supersedes and is equivalent to LMTFD4004B Calculate cost estimates for fashion products

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- estimating costs of selected fabric and trims for sample garments and bulk production
- calculating labour costs to produce sample garment and for bulk production
- completing a costing sheet with relevant details, including costings of all relevant components, for a sample garment to industry standard
- developing a quotation for a fashion product with details of all relevant costings of all relevant components for bulk production.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practices
- relevant Australian Standards
- industry standards for costing specifications
- factors and market forces to consider when costing fashion products:
 - market demand for fashion labels
 - known versus unknown designer
 - trends
 - price range
- hidden costs:
 - sample garments not being included in costing of bulk garments
 - wastage of fabric and materials
 - transport and delivery
 - time delay in client response or payment
- range of typical garment fabrics, including weight and other characteristics
- different methods of utilising labour in the fashion industry
 - designers

- machinists
- sample machinists
- cutters
- marker makers
- patternmakers
- quality controllers
- pressers
- packaging
- marketing and sales
- transportation
- components of a costing sheet, including:
 - date
 - style/design number
 - size
 - fabrics/linings
 - trims
 - extras (e.g. pleating and embroidery)
 - labour/cut make and trim (CMT)
 - freight/shipping
 - packaging
 - overheads
 - labels
 - fabric swatch
 - flat trade sketch.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in costing fashion products, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4005 Communicate and sell design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4005B Communicate and sell design concepts

Application

This unit of competency covers the skills and knowledge required to communicate and sell design concepts.

The unit of competency applies to the use of design tools, such as storyboards and inspiration boards, to communicate and sell design concepts to other fashion industry professionals.

The unit of competency applies to work in a production environment where design decisions impact on the work and where design concepts must be communicated to other fashion industry professionals in order to gain agreement for further development.

The unit of competency includes the application of the elements and principles of design, and how they impact on the process of producing fashion items. It includes impact of colour on the design process.

Work is supervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare to communicate design concepts	<p>2.1 Interpret and respond to the design brief</p> <p>2.2 Identify key requirements for design concept and sources of design ideas</p> <p>2.3 Identify target market and its influence on design process</p> <p>2.4 Apply principles of design to identify, collect and collate inspirational items</p> <p>2.5 Identify and prepare key elements of a storyboard</p>
3	Create design tools to communicate design concepts	<p>3.1 Develop an inspiration board to communicate sources of inspiration for design brief</p> <p>3.2 Develop and illustrate garment concepts based on design brief and inspiration board</p> <p>3.3 Select suitable fabrics and colour palette and produce storyboard to reflect design brief</p> <p>3.4 Seek feedback on design concepts and tools, and make any modifications or additions as required</p>
4	Sell design concepts	<p>4.1 Identify and emphasise the interests of fashion industry professionals in a presentation to promote design concept</p>

- 4.2 Explain and promote benefits and features of design concept and link to design brief
- 4.3 Use effective presentation skills with design tools to sell the concept
- 4.4 Seek acceptance of design concept and commitment to further development

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Key requirements of design

- budget
- type of garment

concept include the following:

- style requirements
- target market

Interests of fashion industry personnel include one or more of the following:

- appealing to target market
- price range
- market position
- construction strategies
- promotion opportunities
- themes
- corporate goals
- timing
- international fashion influences
- use in mass media

Garments include one or more of the following:

- skirts
- trousers/pants
- shirts/blouses
- dresses
- coats
- lingerie

Fashion industry professionals include one or more of the following:

- senior designers and patternmakers
- clients
- management
- buyers
- media

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4005B Communicate and sell design concepts

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD4005 Communicate and sell design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4005B Communicate and sell design concepts

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant Australian standards
- researching target market and preparing an inspiration board to source ideas for design concept
- applying the elements and principles of design
- developing design concepts for at least two (2) garments based on design brief and inspiration board
- developing a storyboard to respond to the design brief
- using effective communication skills in a presentation to sell the features and benefits of the design concept.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- design concept development processes:
 - research
 - purchasing trips
 - teamwork
 - event participation
 - attendance at fashion shows
 - experimentation with fabrics, materials and designs
 - draping
 - adaptation of designs
 - storyboards
 - inspiration boards
- requirements of the design brief:

- garment or range details
- target market
- end uses of product
- cost point
- production requirements
- timelines
- client requirements
- workplace requirements
- quality requirements
- style and feature requirements
- elements and principles of design:
 - repetition
 - gradation
 - rhythm
 - radiation
 - harmony
 - contrast
 - dominance
 - proportion
 - balance
 - unity
- sources of design information and concept inspiration
- components of inspiration boards:
 - shapes
 - textures
 - images
 - photos
 - magazine extracts
 - objects
- components of storyboards:
 - trade sketches of new garment designs
 - illustrations
 - magazine extracts
 - fabric swatches
 - trim or accessory samples
 - colour palette
 - specifications
- characteristics and effects of colour
- characteristics of fabrics and fibres
- presentation skills:

- effective verbal and non-verbal communication
- active listening
- use of appropriate communication tools
- positive language
- clear statement of main points
- interpersonal communication skills
- seeking and responding to feedback
- encouraging questions
- responding effectively to questions.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion design at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4006 Interact and network with fashion industry participants

Modification History

Release 1. Supersedes and is equivalent to LMTFD4006B Interact and network with fashion industry participants

Application

This unit of competency covers the skills and knowledge required to interact and network with fashion industry participants.

This unit of competency applies to communication and networking with people who work along the fashion industry supply chain.

The unit of competency applies to industry appropriate communication and relationship building techniques to maintain effective industry networks, and to ensure design and production processes meet requirements.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|----------|--|---|
| 1 | Prepare to interact with others in the fashion industry | 1.1 Identify roles of different fashion industry participants and the routine industry communication channels and tools that are appropriate |
| | | 1.2 Identify the information needs of fashion industry participants for design, procurement, production and marketing processes |
| | | 1.3 Identify communication protocols, workplace practices and quality standards of different industry participants |
| | | 1.4 Follow work instructions, standard operating procedures (SOPs) and safe work practices |
| 2 | Communicate design concepts and production requirements | 2.1 Use industry appropriate language and terminology to interact and communicate with fashion industry participants |
| | | 2.2 Identify objectives and processes for communicating design concepts effectively and apply appropriate communication channels and tools |
| | | 2.3 Apply knowledge of roles and information needs of different industry participants to communicate production requirements |
| | | 2.4 Seek and respond to feedback to assess if communication of design concept and production requirements is effective, and incorporate feedback into future communication |
| | | 2.5 Seek assistance from appropriate personnel with specific and relevant expertise to deal with any communication difficulties or barriers |
| | | 2.6 Document information and outcomes of communication, and maintain records |
| 3 | Develop and maintain effective | 3.1 Apply understanding of scope and role of different industry participants to develop networks for relevant |

**industry
networks**

areas of operation

- 3.2 Develop and maintain cooperative working relationships with relevant industry participants
- 3.3 Gather and store up-to-date information about key industry participants to maintain business intelligence and sustain networks

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Communication channels and tools include three or more of the following:

- sketches, drawings, illustrations and photographs
- samples of fabrics and specifications
- written descriptions and rationale
- multimedia forms, such as DVD
- charts, diagrams and specification sheets
- storyboards and inspiration boards
- meetings
- electronic communication tools
- displays, demonstrations and events
- mass media channels
- social media

Information needs include one or more of the following:

- details for production or marketing purposes
- size, style, features and colours
- timing, costs, distribution and availability
- layout and content
- goals and strategies

- roles and expectations
- priorities and limitations

Protocols include one or more of the following:

- specific formats
- timing
- content of communication required by different industry participants
- mechanism for dealing with communication difficulties or complaints

Communication includes one or more of the following:

- face to face
- telephone
- correspondence
- email
- digital media

Unit Mapping Information

Assessment Requirements for MSTFD4006 Interact and network with fashion industry participants

Modification History

Release 1. Supersedes and is equivalent to LMTFD4006B Interact and network with fashion industry participants

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- using industry appropriate language and terminology to interact and communicate with fashion industry participants, using at least three (3) different communication channels or tools
- applying knowledge of roles and information needs of at least four (4) different industry participants to communicate about design concepts and production requirements
- applying appropriate communications skills to maintain cooperative working relationships
- documenting information and outcomes of communication, and maintaining records according to workplace procedures and industry standards
- establishing and maintaining up-to-date information about at least ten key industry participants to maintain business intelligence and sustain networks.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, standard operating procedures (SOPs) and safe work practices
- roles of various fashion industry participants
- routine industry communication channels and tools
- information needs of fashion industry participants for design, procurement, production and marketing processes
- communication protocols, workplace practices and quality standards
- communication strategies:
 - effective verbal and non-verbal communication
 - oral, written and visual communication
 - active listening
 - positive language
 - recognising and adapting to cultural differences
 - negotiation and conflict resolution skills
- fashion industry language and terminology

- scope and information needs of different industry participants:
 - designers
 - patternmakers
 - suppliers
 - merchandising and marketing professionals
 - buyers
 - media
 - importers and exporters
 - production personnel
- fashion industry networks:
 - industry bodies
 - professional associations
 - design studios
 - industry professionals providing specific services
 - production companies
 - professional development networks
- documentation and record keeping requirements
- quality standards:
 - accepted formats for presenting ideas and concepts
 - standards of presentation for drafts and final versions
 - layout and content.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion networking, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4007 Conduct quality assurance for patterns and garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD4007B Conduct quality assurance for patterns and garments

Application

This unit of competency covers the skills and knowledge required to conduct quality assurance for patterns and garments.

This unit of competency applies to quality assurance standards that patternmakers and others who work in the patternmaking industry need to meet. The quality assurance process is required to ensure that the garment produced from the pattern meets all requirements of the design specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to conduct quality assurance**
 - 2.1 Identify all steps of the quality process for development of patterns and garment production according to Australian Standards
 - 2.2 Analyse specification document and check information is complete
 - 2.3 Identify input and output requirements and check garment measurement table
 - 2.4 Assess integrity and validity of base pattern to ensure seams match and darts are proved
 - 2.5 Check if block and pattern is appropriate for design and identify construction and finishing methods
 - 2.6 Prepare tools and equipment and prepare garment for measuring

- 3 **Implement quality assurance practices**
 - 3.1 Take accurate garment measurements and compare to specifications in measurement table
 - 3.2 Verify garment sizing and identify and record any problems, faults or deviations
 - 3.3 Report problems to designer, patternmaker and sample machinist
 - 3.4 Obtain fabric performance and testing information and verify against label information
 - 3.5 Identify faults or production problems for garment construction or patterns, and recommend suitable preventative or corrective action

- | | | | |
|---|---|-----|---|
| 4 | Conclude quality assurance process | 4.1 | Check garment or article against specifications and attach tickets, labels and swing tags, as required, according to Australian Standards |
| | | 4.2 | Prepare for despatch according to industry standards, environmental considerations and sustainable practice |
| | | 4.3 | Despatch completed garments and complete and store quality assurance, production and other records |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Construction and finishing methods include one or more of the following:

- seam finishes, such as flat seam, blind hem and French seam
- allocation of seam allowance
- stitches, such as straight, zigzag, overlock and buttonholes
- stitch requirements
- pressing, such as steam, heat and iron

Verify garment sizing includes the following:

- identifying different sizes
- comparing body measurements to garment sizing
- identifying grading increments/growth in measurement at nominated points on pattern and across different styles
- verifying body measurements of base size
- developing a size chart, where required

Faults and quality deviations include one or more of the following:

- material faults, such as weak spots, pilling and bleeding
- construction process faults, such as broken thread, inappropriate seams, seam finishing, seam puckering and needle damage
- labelling and specifications faults, such as incorrect care label and instructions, and incorrect size
- production problems for garment construction or patterns

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4007B Conduct quality assurance for patterns and garments

Assessment Requirements for MSTFD4007 Conduct quality assurance for patterns and garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD4007B Conduct quality assurance for patterns and garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting specifications, assessing integrity and validity of base pattern and checking if block and pattern is appropriate
- taking accurate garment measurements and comparing to specifications in measurement table
- implementing relevant quality assurance assessments on at least two (2) occasions
- identifying, recording and reporting faults, deviations from specifications or production problems to relevant people
- taking action, as required, where quality assurance has not been met
- preparing garments for despatch according to industry standards, environmental considerations and sustainable practice
- maintaining accurate quality assurance, production and other records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- measures required to undertake quality assurance assessment
- garment construction and finishing methods
- garment measurements:
 - circumference and linear measurements
 - measuring across the top of the shoulder of the garment
 - sleeve
 - underarm to side seam
 - neck circumference
 - waist circumference
- patternmaking tools and equipment:

- tape measure
- pen/pencil
- measurement or size chart or table
- eraser
- Australian Standard Chart
- body sciences:
 - structural anatomy
 - morphology
 - anthropometry
- garment faults, quality deviations and production problems:
 - material faults, such as weak spots, pilling and bleeding
 - construction process faults, such as broken thread, inappropriate seams, seam finishing, seam puckering and needle damage
 - labelling and specifications faults, such as incorrect care label and instructions, and incorrect size
 - production problems for garment construction or patterns
- preparation for despatch:
 - boxing
 - packing
 - bagging
 - folding
 - hanging
- environmental considerations and sustainable practices
- documentation and recording practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in quality assurance in fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4008 Construct stock size block for garment to meet size and fit specifications

Modification History

Release 1. Supersedes and is equivalent to LMTFD4008B Construct stock size block for garment to meet size and fit specifications

Application

The unit of competency covers the skills and knowledge required to construct blocks to meet size and fit specifications in garment production. Blocks are used as the basis for patternmaking to develop new styles.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to construct block**
 - 2.1 Interpret and clarify size and fit specifications and Australian Standards with designer or relevant personnel
 - 2.2 Identify base size to be constructed and check for compatibility with fit model
 - 2.3 Evaluate and record size and fit model specifications, body movement and comfort requirements
 - 2.4 Select appropriate drafting principles and methods for block construction
- 3 **Construct initial block**
 - 3.1 Analyse measurements of fit model and enter data into block drafting formulas and methodology
 - 3.2 Determine ease allowance
 - 3.3 Construct block using patternmaking technical skills and ensure compliance with safe work practices and industry requirements
 - 3.4 Document methods and formulas
 - 3.5 Cut and construct toiles to check accuracy
- 4 **Complete final block**
 - 4.1 Transfer information from toiles to blocks, including any minor adjustments
 - 4.2 Label final blocks and check all necessary information is accurate and complete and complies with specifications
 - 4.3 File and store blocks according to appropriate criteria and complete all required documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Fit model includes one or more of the following

- male
- female
- child

Garments include one or more of the following:

- skirts
- trousers/pants
- shirts/blouses
- dresses
- coats
- lingerie

Measurement of fit model includes the following:

- accurate assessment of body measurement positions (reference points, such as bust, waist and hip levels)
- accurate taking of body measurements, including girth, and vertical and horizontal measurements
- reference to Australian Standard measurements
- age
- sex
- assessment of physical characteristics, including body characteristics and unique features, as aligned with standard representation

Construct toiles includes the following:

- confirming correct proportion, fit and balance
- fitting and making necessary minor adjustments
- evaluating accuracy of toiles in relation to fit, comfort and base size specifications

MSTFD4009 Create and edit digital embroidery designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4009B Create and edit digital embroidery designs

Application

This unit of competency covers the skills and knowledge required to create and edit digital embroidery designs using specialised software programs.

This unit of competency applies digital embroidery effects on a wide range of garments and fabrics.

This unit requires the use of computers.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTCL3008 Set and produce digital embroidery

Competency Field

Unit Sector

Not applicable

Elements and Performance Criteria

| | | 2.3 | Identify machine requirements and garment considerations |
| | | | |
| 3 | Create original embroidery design | 3.1 | Create design concept and prepare for presentation to client |
| | | 3.2 | Review design concept against brief and modify as required to gain approval for development |
| | | 3.3 | Develop design using appropriate tools and equipment |
| | | 3.4 | Develop design specifications to guide production |
| | | | |
| 4 | Edit embroidery design | 4.1 | Select suitable designs or images for editing |
| | | 4.2 | Import designs into software programs |
| | | 4.3 | Edit designs and adjust characteristics to achieve design objectives |
| | | 4.4 | Determine production specifications |
| | | | |
| 5 | Review and store | 5.1 | Seek feedback and check design satisfies design |

embroidery design		objectives
	5.2	Modify design and improve where possible
	5.3	Store, organise and protect designs

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Embroidery specifications include one or more of the following:

- content
- colour
- dimensions
- stitch type and size
- font

- fill

Garment considerations include one or more of the following:

- type of fabric
- fabric characteristics
- colour of fabric
- positioning of design
- suitability of size, design, colour

Equipment include one or more of the following:

- desk top computer
- ipad
- laptop
- notebook computer

Embroidery tools and equipment include the following:

- software programs and templates
- hardware peripherals, such as scanners and printers
- paper and pens

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4009B Create and edit digital embroidery designs

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD4009 Create and edit digital embroidery designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4009B Create and edit digital embroidery designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting design brief
- using equipment and appropriate software in conjunction with other embroidery tools as to workplace procedures to achieve design specification
- creating at least two (2) original embroidery designs
- editing at least two (2) existing embroidery designs
- communicating effectively to confirm satisfactory performance
- storing, organising and protecting digital designs.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- digital embroidery characteristics:
 - height
 - scale
 - skew
 - rotation
 - width
 - length
 - font
 - fill
 - baseline
 - envelopes
 - borders
 - spacing

- needle penetration
- stitch size and type
- colour
- content
- style
- finish
- characteristics of typical fabrics, threads and other materials
- features of digital embroidery programs
- machine requirements:
 - thread type
 - needle type
 - stitch settings
 - spool requirements
- operating procedures for digitiser machines
- storage and recording of designs.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in digital embroidery, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTFD4010B Create pattern to meet design specifications applying advanced pattern-making principles

Application

The unit of competency covers the skills and knowledge required to create a pattern from an existing block, using advanced patternmaking principles, including contouring, square blocking and pivoting.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009 Develop patterns from a block using basic patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|--|-----|---|
| | requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to create pattern to meet design specifications | 2.1 | Select and prepare patternmaking tools, equipment, additional materials, if required, and workstation |
| | | 2.2 | Interpret and clarify design drawings and specifications, and identify design lines and style features |
| | | 2.3 | Clarify design requirements |
| | | 2.4 | Determine ease allowance and obtain details of base size |
| 3 | Create pattern | 3.1 | Select appropriate block to develop pattern and retrieve from storage system |
| | | 3.2 | Apply advanced patternmaking principles to develop pattern from existing block to specified design |
| | | 3.3 | Document methods and formulas used |
| | | 3.4 | Check pattern pieces, label and complete markings |
| 4 | Check and finalise pattern for production | 4.1 | Test toile or garment segments and assess against design specifications |
| | | 4.2 | Make any necessary alterations to finalise pattern and check it is accurate, complete and complies with design specifications |
| | | 4.3 | Select sizing system for pattern and base size |
| | | 4.4 | Prepare spreadsheet and grade table of full size range with essential measurements |
| | | 4.5 | Complete pattern specification sheets with trade drawings, attach to patterns for storage and file appropriately |

4.6 Prepare work order for sizing labels as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Advanced patternmaking principles include the following:

- pivoting
- square blocking
- contouring
- advanced dart manipulation

Garments include one or more of the following:

- skirts
- trousers/pants

- shirts/blouses
- dresses
- coats
- lingerie

Methods and formulas include one or more of the following:

- deviations from standard patterns
- sources of pattern components
- pattern derivation methods and formulas
- block construction methods and formulas
- application of current industry practice

Unit Mapping Information

Assessment Requirements for MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTFD4010B Create pattern to meet design specifications applying advanced pattern-making principles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- interpreting and clarifying design drawings and specifications and selecting appropriate block to develop pattern
- applying relevant industry standards for pattern and garment construction
- using patternmaking tools and equipment
- applying advanced patternmaking principles to develop at least two (2) patterns from existing block to specified design
- documenting methods and formulas used, checking pattern pieces, and labelling and completing markings
- testing toile or garment segments, assessing against design specifications, and making any necessary alterations to finalise pattern and check it is accurate, complete and complies with design specifications
- selecting and detailing appropriate base sizing system, and preparing spreadsheet and grade table of full size range with essential measurements
- completing pattern specification sheets with trade drawings, attaching to patterns for storage and filing appropriately
- preparing work order for sizing labels, as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
 - blocks
 - dress form
 - scissors
 - square rule

- marker pens
- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- tape measure
- design specifications and procedures
- style features:
 - garment type
 - collar
 - sleeves
 - yoke
 - sides
 - openings
 - neckline
 - buttons
 - seams
 - zips
 - gathers
 - pleats
 - panels
 - tucks
- advanced patternmaking principles and procedures
- design requirements and style features:
 - fabric characteristics and performance
 - trim details and finishings
 - special construction methods
- customer and workplace fit requirements
- fabric characteristics:
 - type of fabric
 - finish
 - colour of fabric
 - positioning of design
 - suitability of size, design and colour
- garment features:
 - fitting and seam lines
 - style lines
 - yokes, gores and panels

- necklines
- sleeves
- collars
- zips and buttons
- pockets
- waistbands
- pattern markings:
 - appropriate seam allowance
 - notching
 - pattern information (size, style number, cutting instructions and identity)
 - darts
 - drill holes
 - grain line
 - stitching line
- marker making procedures
- cutting and garment construction
- pattern pieces:
 - accuracy of seam allowances
 - ease allowance
 - seam match
 - hems
 - functional openings
- body sciences:
 - structural anatomy
 - morphology
 - anthropometry
- sizing systems
- maintaining accurate records.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in patternmaking, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4011 Cut fabrics for prototype designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4011B Cut fabrics for prototype designs

Application

This unit of competency covers the skills and knowledge to lay up, make marker and cut work for sample designs where only a couple of garments would be cut out at a time, as required by the designer to test design or pattern.

The unit of competency applies to situations where single garments or only a couple of layers of fabric may be cut. The marker may be developed directly on the fabric lay or planned separately and applied. Cutting tools and equipment would include dress maker's shears, electric cutting tools and rotary cutters.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- requirements**
- 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to cut fabrics for prototype design**
- 2.1 Prepare work space and ensure all tools and equipment are clean and serviced according to manufacturer instructions
 - 2.2 Prepare cutting table to suit correct lay length and set-up, lay-up and marking equipment
 - 2.3 Check fabric width and quality with laying-up instructions
 - 2.4 Lay up fabric and adjust tension to match fabric performance
 - 2.5 Inspect fabric for faults and cut out faults using splicing (overlap joining) or other appropriate repair techniques
- 3 **Cut fabrics for design prototypes**
- 3.1 Interpret cutting order for marking requirements and collect pattern pieces
 - 3.2 Check pattern pieces and manipulate for most efficient fabric use
 - 3.3 Draw up lay marker manually or by computer and prepare laying-up instructions according to order requirements
 - 3.4 Check marker against order requirements and copy marker manually or by computer
 - 3.5 Place marker on lay, check alignments and adjust, as required
 - 3.6 Use cutting equipment to cut lay according to operating requirements

- | | | | |
|---|---------------------------------|-----|--|
| 4 | Review and finalise work | 4.1 | Check cut fabric and assess quality of the product and equipment performance |
| | | 4.2 | Direct cut work to next operation |
| | | 4.3 | Clean work area and prepare for next job |
| | | 4.4 | Store master copy of lay marker in filing drawer or computer |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- SOPs
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Cutting equipment includes

- dressmaker's shears

one or more of the following:

- electric rotary and upright cutters
- cutting mats

Fabrics include one or more of the following:

- woven fabrics
- knitted fabrics
- fabrics with a variety of finishes

Manipulate includes one or more of the following:

- positioned manually on paper
- by computer

Assess quality includes one or more of the following:

- inspecting fabric, tools and equipment to ensure optimum performance
- inspecting cut work, identify any faults
- taking appropriate action to ensure cut pieces meet quality standards
- taking preventive action to avoid any recurrence of defective pieces and record
- checking performance of cutting equipment regularly for signs of faulty operation, and taking appropriate action

Unit Mapping Information

Assessment Requirements for MSTFD4011 Cut fabrics for prototype designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4011B Cut fabrics for prototype designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- checking work against work specification or cutting order, and workplace practices and setting up equipment
- making markers involving patterns, fabrics and lays using manual or computer techniques
- preparing cutting table and work before commencing cutting operations
- using, lay-up, marking and cutting tools and equipment to cut at least two (2) different fabrics to meet required specifications
- checking cut fabric and assessing quality of the product and equipment performance
- responding appropriately to imperfections or faults
- storing master copy of lay marker in filing drawer or computer.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking principles and procedures
- lay-up and marking equipment:
 - computers and required software
 - patterns
 - fabric
 - marker card or paper
 - weights
 - clamps
- computer operations involved in marker making, copying and storage
- marking requirements:
 - fabric type
 - width

- quantity
- garment sizes
- pattern identification
- fabric characteristics and prototype faults
- quality standards and fabric/garment handling procedures
- maintaining accurate records

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in cutting fabrics for prototype designs, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. MSTFD4012 Develop product specifications for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4012B Develop product specifications for fashion design

Application

This unit of competency covers the skills and knowledge required to develop product specifications for fashion design.

The unit of competency applies to patternmaking or design, where accurate specifications are required to communicate, interpret and clarify a garment design to ensure production achieves the requirements of the design brief.

Specification documentation may include standard forms, trade drawings and use of industry standards, according to workplace practices and procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD3004 Draw a trade drawing for fashion design

Competency Field

Unit Sector

| | | 4.3 Revise specification sheets as required and record and store documentation. |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
-

Types of specification sheet include one or more of the following:

- make
- cut
- size
- design
- pattern

Key features of specification sheet include the following:

- pattern identification
- pictures
- production instructions
- cutting instructions
- trim and finishing requirements

Set deviations include one or more of the following:

- seam allowance
- size

Quality criteria include the following:

- proportion
- perspective
- symmetry and balance
- fabric performance
- detailing
- neatness

Assessment Requirements for MSTFD4012 Develop product specifications for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4012B Develop product specifications for fashion design

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
 - applying relevant standards
 - assessing instructions and completing all required information on specification sheets
 - using appropriate tools and equipment
 - producing drawings on specification sheets that are in proportion and technically correct, showing all details, including front and back view, and incorporating all quality criteria
 - completing specification sheet with all relevant information and recording set deviations for at least two (2) garments
 - comparing finished product against specifications and correcting deviations
- revising specification sheets as required and record and store documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- key features of different types of specification sheet
- common faults and discrepancies and their causes
- drawing techniques, tools and equipment for specification sheets
- documentation including standard forms, trade drawings and use of industry standards, according to workplace practices and procedures
- industry standards in relation to sizing and the impact of industry sizing deviations
- specification sheet information:
 - style number
 - fabric types and quantity
 - fabric quality standards
 - suppliers
 - cutting and making instructions

- designer name
- garment features
- special effects
- production details
- garment quality criteria
- trade sketch
- rear, side, front views
- printing and artwork requirements
- finishing details
- client testing requirements
- any special packaging requirements
- patternmaking and design terminology to interpret instructions
- fabric performance characteristics
- garment styles ,features, special effects and detailing options
- quality criteria for trade drawings:
 - proportion
 - perspective
 - symmetry and balance
 - fabric performance
 - detailing
 - neatness
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in developing product specifications for fashion products, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4013 Grade 2-D patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD4013B Grade 2D patterns

Application

This unit of competency covers the skills and knowledge to grade flat or 2-D patterns used for garment production.

The unit of competency applies to production of a basic style garment where discretion and judgement may be required in planning and selecting processes, procedures or outcomes.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to grade patterns**
 - 2.1 Select and prepare workstation and/or equipment according to WHS practices
 - 2.2 Identify grading system used in workplace
 - 2.3 Identify measurements of base size and subsequent spread
 - 2.4 Calculate number of sizes in grading and establish grade increments between sizes
 - 2.5 Set up base pattern of a basic style
 - 2.6 Identify style and fabric characteristics which influence grading and check queries with patternmaker
 - 2.7 Select appropriate grade plan and construct grade rule table
- 3 **Grade pattern**
 - 3.1 Determine stacking or outlay requirements, including direction
 - 3.2 Grade pattern manually using patternmaking technical skills or by computer
 - 3.3 Identify stack points or lines if stacking is used
 - 3.4 Preserve integrity of pattern attributes during grading
 - 3.5 Accurately label all pattern pieces with pattern marking symbols
 - 3.6 Check pattern for accuracy and rectify or address faults as required
- 4 **Finalise grading**
 - 4.1 Maintain records and complete documentation, as required

4.2 File patterns

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Grading system includes the following:

- flat, 2-D patterns
- position of constant or stack point

Basic styles of garments include two or more of the following:

- A-line skirt
- straight skirt
- t-shirt
- shirt

- pants
- shorts (elastic waisted)
- blouses
- lingerie

Set up base pattern includes the following:

- identifying base pattern and pattern pieces
- establishing constant or '0' position
- assigning grade points with corresponding values
- checking base size pattern for correct information, balance points and pattern fit
- seeking clarification, as required

Release 1. Supersedes and is equivalent to LMTFD4013B Grade 2D patterns

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying required grading system, measurements of base size and subsequent spread
- calculating number of sizes in grading and establishing grade increments between sizes
- setting up base pattern of a basic style and identifying style and fabric characteristics which influence grading
- selecting appropriate grade plan and constructing grade rule table
- using computer-aided design (CAD) or manual grading system to grade at least two (2) flat, 2-D patterns of at least two (2) basic style garments
- checking patterns for accuracy and rectifying faults
- correctly marking and labelling pattern pieces
- communicating effectively with individuals, work groups and supervisors
- maintaining accurate records, completing documentation and filing patterns.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian size standards
- workplace and customer size charts
- grading systems
- marker making
- pattern marking symbols and labelling:
 - appropriate seam allowance
 - notching
 - darts
 - drill holes
 - grain line
 - cutting line
 - stitching line

- pattern information (size, style number, cutting instructions and identity)
- cost efficiency in patternmaking
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in pattern making, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4014 Identify influences on contemporary fashion designs and construction techniques

Modification History

Release 1. Supersedes and is equivalent to LMTFD4014B Identify influences on contemporary fashion designs and construction techniques

Application

This unit of competency covers the skills and knowledge to identify influences of the 20th Century on fashion design and construction techniques.

The unit of competency applies to the analysis of the most important economic, social, political and technological factors in the 20th Century that have had an impact on fashion development and demand.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

-
- | | | | |
|---|---|-----|---|
| 1 | Identify the function of clothing | 1.1 | Identify the purposes of clothing and the factors which influence the way people dress |
| | | 1.2 | Identify characteristics represented in clothing |
| | | 1.3 | Identify how the function of clothing relates to fashion design |
| | | | |
| 2 | Analyse 20th Century influences on role of designers | 2.1 | Identify significantly influential fashion designers of the 20th Century throughout the world |
| | | 2.2 | Identify fashion trends from the 20th Century |
| | | 2.3 | Identify significant events of the 20th Century and their relationship to fashion changes |
| | | 2.4 | Use information sources to identify design and construction features of 20th Century garments and their desired effects |
| | | | |
| 3 | Assess fashion influences on current practice | 3.1 | Compare the role of fashion designers as change agents through the 20th Century to current practices |
| | | 3.2 | Investigate design influences on current styling and trends |
| | | 3.3 | Analyse how designers use construction techniques to create design features in contemporary designs |
| | | 3.4 | Identify influences of new and emerging practices |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Australian Standards includes:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Significant 20th Century events include one or more of the following:

- wars
- historical events (e.g. space age)
- society developments (e.g. female emancipation and hippy era)
- music trends (e.g. rock 'n roll and hip-hop)
- technological developments (e.g. plastics and manufactured textiles)

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4014B Identify influences on contemporary fashion designs and construction techniques

Assessment Requirements for MSTFD4014 Identify influences on contemporary fashion designs and construction techniques

Modification History

Release 1. Supersedes and is equivalent to LMTFD4014B Identify influences on contemporary fashion designs and construction techniques

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching information to identify the factors which influence the way people dress and the characteristics represented in clothing
- identifying at least three (3) significantly influential fashion designers of the 20th Century throughout the world and fashion trends associated with them
- demonstrating the relationship of at least three (3) fashion changes to significant events of the 20th Century
- presenting research on a decade from the 20th Century to identify influences on fashion development and demand
- identifying design and construction features of 20th Century garments and their desired effects
- outlining current and emerging fashion design and construction trends.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- functions of clothing:
 - social
 - psychological
 - cultural
 - economic
 - environmental
- characteristics represented by dress:
 - gender
 - age group
 - nationality

- religious affiliation
- career
- social, economic and marital status
- personal achievement
- loyalties
- beliefs
- family connections
- factors that influence the way people dress:
 - political events
 - music
 - fads
 - myths
 - economics ups and downs
 - sexual mores
 - social movements
 - climate
 - health and safety
 - changes in work/leisure time
 - image
 - self esteem
 - happiness
 - stimulation
 - incentive
 - expression of fantasies
- distinctive characteristics of fashion in selected 20th Century decades, such as:
 - skirt hem lengths
 - sleeve shapes
 - trousers widths
 - lycra
 - hipsters
- historical features and trends of the 20th Century
- current and emerging fashion design and construction trends
- construction techniques
- research and presentation skills.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in fashion design history, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4015 Create pattern from block to meet customer specifications

Modification History

Release 1. Supersedes and is equivalent to LMTFD4015B Create pattern from block to meet customer specifications

Application

This unit of competency covers the skills and knowledge required to create a pattern from an existing block for an individual size, and to meet the styling requirements of the customer.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009 Develop patterns from a block using basic patternmaking principles

MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to create pattern to meet customer specifications**
 - 2.1 Select and prepare pattern-making tools, equipment, additional materials, if required, and workstation
 - 2.2 Interpret and clarify design drawings and specifications, and identify design lines and style features
 - 2.3 Clarify design requirements
 - 2.4 Determine ease allowance

- 3 **Create pattern**
 - 3.1 Measure client, select appropriate block and make size adjustments
 - 3.2 Plan pattern production according to quality standards and workplace procedures
 - 3.3 Proportion design lines on dress form
 - 3.4 Apply patternmaking principles to develop pattern from existing block to customer design and fit
 - 3.5 Document methods and formulas used
 - 3.6 Check pattern pieces, label and complete markings

- 4 **Check and finalise pattern**
 - 4.1 Test toile or garment segments for proportioning and fit
 - 4.2 Fit prototype to ensure that pattern is satisfactory to customer
 - 4.3 Complete any pattern alterations and assess pattern meets fit and design requirements

- 4.4 Finalise pattern and check it is accurate, complete and complies with design specifications
- 4.5 Complete pattern specification sheet, attach to patterns for storage and file appropriately
- 4.6 Direct final patterns to next production process

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design requirements include the following:

- fabric characteristics and performance
- trim details and finishings
- special construction methods

Methods and formulas include the following:

- deviations from standard patterns
- sources of pattern components
- pattern derivation methods and formulas
- block construction methods and formulas
- application of current industry practice

Check prototype or pattern pieces includes the following:

- accuracy of seam allowances
- ease allowance
- seam match
- hems
- functional openings

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4015B Create pattern from block to meet customer specifications

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD4015 Create pattern from block to meet customer specifications

Modification History

Release 1. Supersedes and is equivalent to LMTFD4015B Create pattern from block to meet customer specifications

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting and clarifying design drawings and specifications
- using patternmaking tools and equipment and applying industry standards for pattern and garment construction
- measuring client, selecting appropriate block and making size adjustments to produce pattern from an existing block for an individual size and to meet the styling requirements of the customer
- applying patternmaking principles to develop at least two (2) patterns from existing block to customer design and fit
- checking pattern pieces, labelling and completing markings, and documenting methods and formulas used
- fitting toile, prototype or garment segments to check for correct fit, and adjusting patterns to suit customer and design requirements
- finalising pattern, checking it is accurate, complete and complies with design specifications, and completing pattern specification sheet to attach to patterns
- filing patterns according to workplace procedures and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
 - blocks
 - dress form
 - scissors
 - square rule
 - marker pens

- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- tape measure
- design specifications and procedures
- patternmaking principles and procedures:
 - dart manipulation
 - adding fullness
 - contouring
- pattern markings:
 - appropriate seam allowance
 - notching
 - pattern information (size, style number, cutting instructions and identity)
 - darts
 - drill holes
 - grain line
 - stitching line
- design requirements and style features:
 - garment type
 - collar
 - sleeves
 - yoke
 - sides
 - openings
 - neckline
 - buttons
 - seams
 - zips
 - gathers
 - pleats
 - panels
 - tucks
- customer and workplace fit requirements
- fabric characteristics
- marker making procedures
- cutting and garment construction
- maintaining accurate records.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in patternmaking at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4016 Sew design prototypes

Modification History

Release 1. Supersedes and is equivalent to LMTFD4016B Sew design prototypes

Application

This unit of competency covers the skills and knowledge required to assemble a prototype garment using commercial machines.

The unit of competency applies to producing a garment that is not designed to be worn but will be used for the purposes of confirming elements of design and production requirements.

This unit covers sewing and assembly skills only.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|-------------------------------------|-----|--|
| | requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare for garment assembly | 2.1 | Collect and organise relevant information on design concept |
| | | 2.2 | Prepare work pieces according to design concept |
| | | 2.3 | Lay out pattern pieces and pin or tack to the fabric to match fabric pattern, nap and weave |
| | | 2.4 | Lay out garment components according to sequence of assembly operations |
| | | 2.5 | Set up workbench and seating and adjust machines according to specifications for work |
| 3 | Assemble garment components | 3.1 | Assemble components according to WHS practices and accepted garment assembly techniques |
| | | 3.2 | Check garment for sizing and appearance |
| | | 3.3 | Adjust garment to better display design characteristics and correct fabric alignment, garment fitting and other features |
| 4 | Complete prototype | 4.1 | Complete required hand sewing and finishing according to design concept requirements |
| | | 4.2 | Press garment according to fabric requirements and garment construction details |
| | | 4.3 | Check quality and impact of finished garment against original design concept |
| | | 4.4 | Note any assembly issues and inform appropriate personnel |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Work pieces include one or more of the following:**
- pieces of fabric which have been cut according to the pattern requirements
 - a range of fabric types, including cottons, woollens, synthetics, velvets, lace, stretch and knitted
 - single and multi-directional prints
 - interfacings and linings
- Fabric includes one or more of**
- lace
 - woven and knitted fabrics and threads, such as denim

- the following:**
- single knits
 - tricot
 - gabardine
- Garment components include the following:**
- sleeves
 - waistbands (straight/shaped)
 - collars
 - cuffs
 - plackets
 - facings (neck and armhole)
 - binds
 - zips (dress, skirt, trouser and invisible)
 - buttons and buttonholes
- Machines include one or more of the following:**
- commercial sewing machine
 - three thread overlocker
 - zigzag sewing machine
- Appropriate personnel include one or more of the following:**
- patternmakers
 - designers
 - production personnel
 - sample machinists

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4016B Sew design prototypes

Assessment Requirements for MSTFD4016 Sew design prototypes

Modification History

Release 1. Supersedes and is equivalent to LMTFD4016B Sew design prototypes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- operating a commercial sewing machine or overlocking machine to assemble a prototype garment
- preparing and laying out pattern pieces for at least two (2) garments, and attaching to the fabric to match fabric pattern, nap and weave
- laying out garment components according to sequence of assembly operations and sequencing operations as specified
- sewing and finishing at least two (2) garments according to specifications
- adjusting garment to better display design characteristics and correct fabric alignment, garment fitting and other features
- completing required hand sewing and finishing, and pressing garment according to fabric requirements and garment construction details
- checking prototype satisfies quality criteria and original design concept and advising appropriate people of assembly issues.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- techniques in using and maintaining three thread overlocker and commercial sewing machines:
 - correct thread, needle size and type, needle guard, tension setting and attachments
 - checking for worn components that may impact on sewing operations
 - routine cleaning and oiling
- characteristics of a range of commercially available fabrics
- methods of assembling garment pieces for the purposes of prototype production
- the impact of adjustments to garment components or seams
- embellishments that are used in garment assembly
- garment assembly issues:

- complex or time-consuming assembly
- quality
- difficulty in following pattern or design concepts
- problems arising from material selection
- issues relating to sizing or fabric cuts
- hand sewing and finishing techniques:
 - attaching buttons and other closures
 - attaching embellishments such as trims, badges
 - hemming and overstitching
 - gluing and bonding trims
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in sewing design prototypes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4017 Source materials and resources for production of fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4017B Source materials and resources for production of fashion designs

Application

This unit of competency cover the skills and knowledge required to source materials and resources to produce garments and accessories. It applies to locating and comparing required products and services from local and overseas suppliers/contractors.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions
- 2 **Prepare to source materials**
 - 2.1 Identify and research all materials and resources required for production
 - 2.2 Use computer and web-based technologies to locate and communicate with fashion industry suppliers/contractors in Australia and overseas
 - 2.3 Identify materials and services available from different suppliers
 - 2.4 Compare costs and identify minimum order requirements
 - 2.5 Identify the role of shipping and customs agents, shipping costs and mechanisms for purchasing overseas and minimising costs
- 3 **Research purchasing costs**
 - 3.1 Identify and compare cost options of different suppliers/contractors
 - 3.2 Identify all costs, including hidden costs, for purchasing materials and resources from selected suppliers/contractors
 - 3.3 Identify costs of purchasing direct from overseas suppliers, contractors or manufacturers, and compare with purchasing from local suppliers
 - 3.4 Identify and apply appropriate communication practices and identify potential communication barriers
- 4 **Finalise and review purchasing**
 - 4.1 Compare sources against required specifications and select suppliers/contractors based on their ability to meet required specifications
 - 4.2 Place and monitor progress of orders, and check orders when they are received

- 4.3 Prepare documentation and establish protocols for handling goods received
- 4.4 Apply quality standards for goods and services used in fashion industry
- 4.5 Complete documentation and identify opportunities to improve processes

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards includes:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Materials and resources include the

- types of fabric
- suppliers/contractors specifications

- following:**
- trims
 - services required
 -
- Fabric suppliers/contractors include one or more of the following:**
- wholesalers
 - importers
 - mills
 - jobbers
 - converters
- Services include one or more of the following:**
- patternmaking
 - embroidery
 - dyers
 - knitting
 - cut make trim
 - pleaters
- Cost options include the following:**
- lead times
 - payment requirements
 - payment options
 - suppliers' capacity to meet delivery requirements
 - capacity to satisfy price and quality requirements
 - shipping and freight
- Specifications include the following:**
- price
 - quality
 - quantity
 - time requirements
 - special features

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4017B Source materials and resources for production of fashion designs

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD4017 Source materials and resources for production of fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4017B Source materials and resources for production of fashion designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- using computer and web-based technologies to research at least three (3) domestic and three (3) overseas potential sources
- preparing a table or spreadsheet identifying all cost options, including hidden costs, for purchasing materials and resources from selected suppliers/contractors
- comparing purchasing direct from overseas suppliers, contractors or manufacturers with purchasing from local suppliers
- analysing performance characteristics and making judgements on preferred and less suitable purchase options
- selecting suppliers/contractors based on their ability to meet required specifications
- placing and monitoring progress of orders, preparing documentation, checking orders and establishing protocols for handling goods received
- communicating effectively with others in Australia and overseas
- completing and maintaining relevant documentation
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practice
- Australian Standards for garment constructions
- information sources for materials, resources and suppliers
- cost options
- criteria for making cost comparisons
- workplace practices and procedures for purchasing and receiving
- sources for suppliers:
 - yellow pages
 - web

- trade directories
- trade shows
- networking
- agents
- trade magazines
- quality practices
- characteristics of fabrics and materials
- hidden costs:
 - minimum order requirements
 - sample garments not being included in costing of bulk garments
 - wastage of fabric and materials
 - transport and delivery
 - time delay in client response or payment
 - tariffs/duties/taxes
 - quality
- international purchasing procedures
- communication strategies:
 - effective verbal and non-verbal communication
 - oral, written and visual communication
 - active listening
 - positive language
 - recognising and adapting to cultural differences
 - negotiation and conflict resolution skills
- communication barriers:
 - time zone/time of day differences
 - cultural differences
 - oral language skills
 - written language skills
 - differences in language
 - different work practices
- workplace practices
- fashion materials and resources
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in sourcing materials for fashion production, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4018 Use and apply sizing systems appropriate for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4018B Use and apply sizing systems appropriate for fashion design

Application

This unit of competency covers the skills and knowledge required to use and apply sizing systems appropriate for designing garments.

The unit of competency applies to sizing standards that are required in the design, production and retailing of garments. Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	Prepare to use and apply sizing system	2.1	Identify Australian approaches to sizing standards and identify features of sizing systems
		2.2	Identify international sizing systems and determine advantages and disadvantages of different sizing systems
		2.3	Establish intended purpose of the garment design
3	Develop size chart	3.1	Analyse sizing requirements of garment and determine sizing system
		3.2	Read and interpret design specifications and clarify the brief with designer, where necessary
		3.3	Analyse body measurements and body characteristics and their effect on sizing
4	Develop size chart	4.1	Identify appropriate sizes from sizing system for the design
		4.2	Identify effects of inappropriate sizing for the design
		4.3	Take necessary body measurements and record distinctive body characteristics
		4.4	Develop and store size chart, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Sizing system includes one or more of the following:**
- women's sizes, such as 10, 12, 14, 16, and so on
 - men's sizes, such as 92, 95, 95, and so on
 - women's bra sizes, such as 12A, 12B, 12C, 12D, 12DD, and so on
 - children's sizes, such as 1-7, 8-12, and so on
 - babies' sizes, such as 0000, 000, 00, 0, and so on
- Body measurements include one or more of the following:**
- all measurements as required for labelling according to legislation requirements, such as:
 - height and weight
 - reference points, such as nape, waist point, seat vertex, abdomen vertex, carpus, neck base, upper sternum, bust point and pelvic bone
 - levels, such as crown, shoulder, armscye, bust or chest, waist, hip, crotch and knee
 - girth measurements, such as waist, bust or chest, hip, high hip, upper and under bust, head circumference, upper arm, wrist, thigh, calf, ankle and heel/instep

- horizontal measurements, such as shoulder, shoulder breadth, across front, across back, and bust point to bust point
- vertical measurements, such as nape to centre back waist, nape to neck base, nape to bust or chest, nape to waist, nape to wrist, centre front waist to floor, centre back waist to floor, right-hand side waist to floor, left-hand side waist to floor, waist to hip, inside leg, body rise, arm length and neck length
- cup size
- shoe size
- seat prominence
- knee
- instep
- posture

Body characteristics include one or more of the following:

- genetic, developmental and structural influences
- shape classifications, such as hourglass, rectangular, pear and inverted triangle
- anthropometric classifications (somatotypes)
- shoulder slope (raised, normal and sloping)
- body sway and postural asymmetry (according to lower and upper body)
- proportions (tall, short or average, short or long-waisted, and mid-body shortness)

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4018B Use and apply sizing systems appropriate for fashion design

Assessment Requirements for MSTFD4018 Use and apply sizing systems appropriate for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4018B Use and apply sizing systems appropriate for fashion design

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- reading and interpreting design specifications and Australian and international sizing systems
- analysing body measurements and body characteristics and their effect on sizing
- taking necessary body measurements and recording distinctive body characteristics
- analysing sizing requirements of at least two (2) garments, determining sizing system, and identifying appropriate sizes from sizing system for the design
- taking necessary body measurements and recording distinctive body characteristics
- identifying effects of inappropriate sizing for the design
- developing and storing size charts based on at least two (2) sizing systems.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- quality standards and garment handling procedures
- sequence of operations
- Australian Standards for sizing
- body measurements and body characteristics and their effect on sizing
- body science:
 - structural anatomy
 - morphology
 - anthropometry
- sizing systems
- recording and reporting practices.

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in fashion sizing systems, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4019 Use colourisation techniques on fabrics

Modification History

Release 1. Supersedes and is equivalent to LMTFD4019B Use colourisation techniques on fabrics

Application

This unit of competency covers the skills and knowledge required to use fabric colourisation techniques to create new finishes for design effects.

The unit of competency applies to using a variety of colourisation techniques, such as dyeing or printing on a range of fabrics, for garments and accessories. Colourisation techniques would be specified in the design process.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3001	Identify fabric performance and handling requirements

Competency Field

Fashion design and technology

Unit Sector

 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Fabric colourisation techniques include one or more of the following:**
- dyeing (shibori and resist (batik))
 - printing (block, silk screen, transfer, roller and stencilling)
- Fabrics include one or more of the following:**
- knitted fabrics, including weft knits and warp knits
 - woven fabrics, including plain, twill, satin, dobby and jacquard
 - non-woven fabrics, such as felts, nets, braids and bonded
- Uses of colour include one or more of the following:**
- dyeing fabrics to match others
 - over-printing fabrics to create a new print design
 - mixing colours to create something different
 - removing colour to create print design
 - emphasising texture and patterns

Unit Mapping Information

Assessment Requirements for MSTFD4019 Use colourisation techniques on fabrics

Modification History

Release 1. Supersedes and is equivalent to LMTFD4019B Use colourisation techniques on fabrics

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying the effects of colourisation techniques on at least five (5) different fabrics
- experimenting with at least three (3) different colourisation techniques on a range of fabrics
- assessing outcome and modifying techniques and/or fabrics, as required
- applying knowledge of fabric characteristics to identify effects of colourisation on the design
- applying a range of colourisation techniques to create design effects and satisfy quality criteria
- documenting and storing information to record the processes.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practices
- relevant Australian Standards
- uses and performance characteristics of fabrics
- information resources on fibres and fabrics
- characteristics of fibres and fabrics
- recording and reporting practices
- uses of colour to create design effects
- colourisation techniques:
 - dyeing (shibori and resist (batik))
 - printing (block, silk screen, transfer, roller and stencilling)
- quality criteria:
 - proportion
 - perspective

- symmetry and balance
- detailing
- neatness
- maintaining records.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in colourisation techniques, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4020 Use electronic fashion design tools

Modification History

Release 1. Supersedes and is equivalent to LMTFD4020B Use electronic fashion design tools

Application

This unit of competency covers the skills and knowledge required to use a range of electronic design programs and equipment, such as software programs and computing technology.

The unit of competency applies to the creation of designs, patterns or production specifications using electronic programs and equipment, such as graphic and design software, computers and peripherals, and specialised equipment.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

			requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	Prepare to use electronic design tools	2.1	Interpret the specifications of the design brief and identify production requirements
		2.2	Identify garment factors that need to be considered
		2.3	Prepare suitable programs and equipment
3	Use design tools	3.1	Use design programs and equipment to create required designs, patterns and/or production specifications
		3.2	Test designs, patterns or production specifications and modify, as required
		3.3	Assess outputs generated using electronic design programs against design specifications and production requirements
4	Check and finalise designs	4.1	Present outputs to appropriate personnel to assess accuracy and completeness
		4.2	Make adjustments or improvements, as required
		4.3	Create final products and protect, organise and store them according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Design programs and equipment include two or more of the following:**
- computer
 - software programs (e.g. computer-aided design (CAD), Illustrator and Photoshop)
 - hardware peripherals, such as scanners and printers
 - specialised equipment

- Garments include one or more of the following:**
- skirts
 - trousers/pants
 - shirts/blouses
 - dresses
 - coats
 - lingerie

- Garment considerations include one or more of the following:**
- type of fabric
 - colour of fabric
 - purpose of garment
 - quality standards
 - distinctive features

Production requirements include the following:

- timeline
- available resources
- instructions
- documentation

Appropriate personnel include one or more of the following:

- supervisor
- trainer/mentor
- designers
- patternmakers
- production supervisors
- clients

Assessment Requirements for MSTFD4020 Use electronic fashion design tools

Modification History

Release 1. Supersedes and is equivalent to LMTFD4020B Use electronic fashion design tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying requirements for at least two (2) garments or products
- selecting appropriate software program
- using design programs and equipment to create designs, patterns and production specifications for at least two (2) garments
- testing designs, patterns or production specifications and modifying, as required
- assessing outputs generated using electronic design programs against specifications of design brief
- seeking feedback from appropriate people and making adjustments, as required
- creating final products and protecting, organising and storing them according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practices
- relevant Australian Standards
- principles of design
- electronic equipment and program features
- editing tools and procedures
- operating procedures
- garment production requirements
- design specifications:
 - visual content and presentation
 - style details
 - fabric types and quantities
 - production requirements
 - special effects or features

- quality criteria
- finishing details
- sizing
- designs, patterns and production requirements
- quality standards
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in electronic fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. MSTFD4021 Drape fabrics to make patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD4021B Drape fabrics to make patterns

Application

This unit of competency covers the skills and knowledge to drape fabrics to make patterns.

This unit of competency applies to using draping techniques to create a basic fitted foundation. This applies to the creation of fitted blocks, such as a bodice and a skirt and does not include draping of set-in sleeves. Draping is conducted on a body form, such as a mannequin or model.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to drape fabrics**
 - 2.1 Select and prepare draping tools and equipment
 - 2.2 Prepare body form for draping
 - 2.3 Identify and mark reference points on body form and make any other necessary preparations
 - 2.4 Select and prepare fabric for draping
 - 2.5 Prepare the drape plan
- 3 **Transfer drape to make pattern**
 - 3.1 Pin fabric on model form and perform draping operations
 - 3.2 Remove drape from model form and draw or rule lines on drape at pin positions
 - 3.3 Use drape as a template to create paper pattern or block
 - 3.4 True and mark pattern
- 4 **Check and finalise pattern**
 - 4.1 Check pattern pieces for all requirements, label pieces and complete markings
 - 4.2 Finalise pattern and check it is accurate, complete and complies with design specifications
 - 4.3 Complete pattern specification sheet, attach to patterns for storage and file appropriately

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Body form includes one or more of the following:

- mannequin
- model
-

Body reference points include the following:

- bust
- waist
- hips
- centre front
- centre back
- side seam

Prepare fabric for draping includes the following:

- estimate dimensions of fabric piece required for each section/piece to be draped
- identify warp, weft and bias of fabric
- identify and assess fabric handling qualities

Fabric includes one or more of the following:

- toile fabric
- sample fabric

Pieces to be draped include one or more of the following:

- front bodice
- back bodice
- front skirt
- back skirt
- other pieces to be draped:
 - front extended line
 - back extended line

Drape plan includes one or more of the following:

- adding fullness (pleats, tucks and gathers)
- seam positioning
- adding wearing ease for movement
- multiple darts/division of darts
- manipulating dart excess
- symmetric and/or asymmetric design features
- cowls, twists and knots

Draping operations include one or more of the following:

- relating body reference points and fabric grains
- moulding and manipulating fabric to fit model form according to working drawing, fit and design lines
- adding ease to allow for movement
- incorporating fullness or volume if required
- smoothing or manipulating fabric over contours of model form
- forming and pinning darts and seams to create pattern or construct garment
- preparing drape for truing

Check pattern pieces includes the following:

- accuracy of seam allowances
- ease allowance
- seam match
- hems
- functional openings
- flow through

Assessment Requirements for MSTFD4021 Drape fabrics to make patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD4021B Drape fabrics to make patterns

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- preparing tools, equipment and fabric pieces
- marking reference points on model
- pinning fabric on model form and performing at least two (2) draping operations
- removing drape from model form and drawing or ruling lines on drape at pin positions
- transferring the drape to paper
- using drape as a template to create at least two (2) paper pattern or block
- finalising pattern and checking it is true, accurate, complete and complies with design specifications
- checking pattern pieces for all requirements, labelling pieces and completing markings
- completing pattern specification sheet, attaching to patterns for storage and filing appropriately.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- draping tools and equipment:
 - model form
 - narrow tape/ribbon
 - tape measure
 - pen/pencil
 - scissors
 - square rule
 - marker pens
 - hole punch
 - pins

- fashion triangle
- French curve
- pattern notcher
- weights
- draping processes and plans
- body science:
 - structural anatomy
 - morphology
 - anthropometry
- fabric handling characteristics:
 - fall
 - stretch
 - stability
 - drape
- required details for pattern pieces
- pattern markings:
 - appropriate seam widths
 - notches
 - dart lines
 - drill holes
 - grain line
 - cutting instructions
 - stitching lines
- pattern specification sheets
- maintaining accurate records.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in draping fabrics to make patterns, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5001 Design bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5001B Design bras and swimwear.

Application

This unit of competency covers the skills and knowledge to design structured bras and swimwear for production.

The unit of competency applies to designs which include structured foundations. Bras and swimwear that do not include these components are covered in other fashion design units.

The unit of competency applies to a variety of fabrics and garments which may be produced by an individual or design team. The extent and nature of product design will depend on the products individual workplace.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2010 Modify patterns to create basic styles

MSTFD4003 Assist in preparation of preliminary design concepts

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|----------|---|---|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to develop bras and swimwear | 2.1 Research and analyse current national and international fashion trends, components, specialised needs and quality and special construction practices for structured foundations |
| | | 2.2 Analyse market and develop story themes to outline options |
| | | 2.3 Research and record appropriate production information |
| 3 | Develop design concept | 3.1 Consider design requirements for design brief and develop preliminary design concepts |
| | | 3.2 Consult team members to assess and improve design |
| | | 3.3 Develop design concept to meet client brief |
| | | 3.4 Prepare artwork, drawings, specifications and any additional documentation that may be required, in appropriate format |
| | | 3.5 Include fit and performance standards in design concepts |
| 4 | Present and document the design | 4.1 Prepare a presentation of the design concept |
| | | 4.2 Use appropriate communication tools and presentation skills to target needs of the audience |

- 4.3 Convey features and benefits of the design and promote acceptance and approval
- 4.4 Prepare documentation to record the process and outcomes and maintain records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Structured foundations include one or more of the following:

- boning
- underwire
- corsetry

- Specialised needs include one or more of the following:**
- styling features relating to health effects of bra and swimwear construction
 - appropriate bra and swimwear structure for special client groups, including maternity, mastectomy, junior and costume wear
 - sports and fuller figure bras and swimwear and the need for extra support
 - use of specialist materials and trims
- Developing story themes include one or more of the following:**
- fashion magazines
 - samples
 - swatches
 - trims
 - colour palette
- Production information includes the following:**
- clarifying design parameters, in consultation with production manager, sales team, management and client, as required
 - researching trends in fabrics and components for performance, colour, availability, care and maintenance requirements and suitability to design
 - assessing technical requirements associated with production within specified guidelines
 - identifying any additional expertise required for design
- Fabrics include two or more of the following:**
- one-way stretch
 - two-way stretch
 - no-stretch (bias cut fabrics)
- Specifications include the following:**
- budget
 - type of garment
 - style requirements
 - fit model specifications
 - size range
 - timeline
 - design restrictions or conditions
- Audience includes one or more of the following:**
- management
 - client
 - patternmaker

- sample machinist
- fitting and grading specialist

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5001B Design bras and swimwear

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTFD5001 Design bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5001B Design bras and swimwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching local and overseas fashion trends and specialised construction for bras or swimwear
- researching and assessing production information and technical requirements for structured garments
- developing preliminary design concepts for structured garment designs, in response to design briefs for at least two (2) different target groups or specialised needs
- communicating effectively with team members to assess and improve design
- developing design concepts to meet client brief, using two (2) different types of fabric: one-way stretch, two-way stretch or no stretch fabric
- preparing artwork, drawings, specifications, fit and performance standards, and any additional documentation that may be required, in appropriate format
- using communication and presentation skills to promote the design concept and target needs of audience
- documenting the process and outcomes, and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for garment production
- discretion and judgement in planning and selecting processes
- elements and principles of quality design in the bra or swimwear industry
- industry, global and local trends
- fashion trends:
 - colour
 - fabrics
 - styles
 - trims

- components
- garment construction
- specifications for structured garment production:
- budget
 - type of garment
 - style requirements
 - fit model specifications
 - size range
 - timeline
 - design restrictions or conditions
- components of structured garments:
 - straps
 - hooks
 - elastic
 - fasteners
 - ribbon
 - underwire
 - foam padding
 - oil filled straps
 - rings
 - fine lace and delicate fabrics
- characteristics of one-way, two-way and no-stretch fabrics
- research sources
- colour or colour mix and interpretation
- current practices and special construction methods for bras and swimwear with structured foundations :
 - fusing
 - gluing
 - moulding
 - sewing requirements
 - seam allowances
 - stitch requirements
- seam finishes, such as flat seam, blind hem and French seam
- fabrics, fibres, trims, components, accessories and their properties and characteristics
- quality practices
- communication tools:
 - inspiration board
 - storyboard
 - personal presentation
 - multimedia tools

- print and audio tools
- demonstration or exhibition
- presentation skills:
 - effective verbal and non-verbal communication
 - active listening
 - use of appropriate communication tools
 - positive language
 - clear statement of main points
 - interpersonal communication skills
- body science:
 - structural anatomy
 - morphology
 - anthropometry
- workplace practices
- recording and reporting practices.
-

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in designing bras and swimwear at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5002 Develop and test patterns for bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5002B Develop and test patterns for bras and swimwear

Application

This unit of competency covers the skills and knowledge to develop and test patterns for bra and swimwear production using an existing block and applying patternmaking principles.

The unit of competency applies to patterns which include structured foundations. Bras and swimwear that do not include these components are covered in other patternmaking units.

This unit of competency applies to working as an individual or as part of a production team to develop and test a pattern from an existing block, using advanced principles of patternmaking.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTCL3009 Develop patterns from a block using basic patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to develop patterns for bras and swimwear | 2.1 | Select and prepare patten-making tools, equipment, additional materials, if required, and workstation |
| | | 2.2 | Interpret and clarify design drawings and specifications, and identify design lines and style features |
| | | 2.3 | Confirm fabric characteristics and performance, trims, components and finishings specified in the design |
| | | 2.4 | Consider current practices, specialised needs and special construction methods for bras and swimwear with structured foundations |
| | | 2.5 | Determine size standards for fit |
| 3 | Create pattern for bras and swimwear | 3.1 | Plan pattern production according to quality and workplace standards |
| | | 3.2 | Select appropriate block for developing bra or swimwear pattern |
| | | 3.3 | Make necessary adjustments to seams to create silhouette to match design brief |
| | | 3.4 | Produce pattern using advanced patternmaking principles and document methods and formulas used |
| | | 3.5 | Check pattern pieces, label and complete markings |
| | | 3.6 | Identify and document any construction problems and |

check pattern meets Australian Standards

- | | | | |
|---|-----------------------------------|-----|---|
| 4 | Check and finalise pattern | 4.1 | Construct segments and assess the pattern is compatible with design |
| | | 4.2 | Complete any pattern alterations and assess pattern meets fit and design requirements |
| | | 4.3 | Finalise pattern and check it is accurate, complete and complies with design specifications |
| | | 4.4 | Complete pattern specification sheet, attach to patterns for storage and file appropriately |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Structured foundations include one or more of the following:**
- boning
 - underwire
 - corsetry
- Fabrics include one or more of the following:**
- one-way stretch
 - two-way stretch
 - no-stretch (bias cut fabrics)
- Specialised needs include one or more of the following:**
- styling features relating to health effects of bra and swimwear construction
 - appropriate bra and swimwear structure for special client groups, including maternity, mastectomy, junior and costume wear
 - sports and fuller figure bras and swimwear and the need for extra support
 - use of specialist materials and trims
- Advanced principles of patternmaking include one or more of the following:**
- pivoting
 - square blocking
 - contouring
- Check pattern pieces includes one or more of the following:**
- accuracy of seam allowances
 - ease allowance
 - seam match
 - hems
 - functional openings
 - flow through
- Methods and formulas include one or more of the following:**
- deviations from standard patterns
 - sources of pattern components
 - pattern derivation methods and formulas
 - block construction methods and formulas
 - application of current industry practice
- Specification documents**
- number of pattern pieces

include:

- what the pattern consists of (e.g. 2 bodice, 1 sleeve)
- measurement table
- size table
- technical drawing
- details of types of materials (fabric, lining, fusing, elastic, closures and trims)
- sign-off
- recommendations for stitching

Unit Mapping Information

Assessment Requirements for MSTFD5002 Develop and test patterns for bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5002B Develop and test patterns for bras and swimwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- interpreting and clarifying design drawings and specifications
- applying industry standards to create patterns to meet client briefs for at least two (2) different target groups or specialised needs, using two (2) different types of fabric: one-way stretch, two-way stretch or no stretch fabric
- using patternmaking tools and equipment according to industry practices and choosing appropriate existing block to develop at least two (2) patterns for bras or swimwear
- producing patterns that meet Australian Standards, using advanced patternmaking principles and documenting methods and formulas used
- checking pattern pieces, labelling and completing markings, and documenting any construction problems
- constructing segments, completing any pattern alterations, finalising pattern and assessing pattern meets fit and design requirements
- completing pattern specification sheet, attaching to patterns for storage and filing appropriately.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
 - scissors
 - square rule
 - marker pens
 - hole punch
 - pins
 - fashion triangle
 - French curve

- pattern notcher
- weights
- tape measure
- computer-aided design (CAD) terminal and program
- design specifications and procedures
- patternmaking principles and procedures
- components of structured garments :
 - straps
 - hooks
 - elastic
 - fasteners
 - ribbon
 - underwire
 - foam padding
 - oil filled straps
 - rings
 - fine lace and delicate fabrics
- current practices and special construction methods for bras and swimwear with structured foundations :
 - fusing
 - gluing
 - moulding
 - sewing requirements
 - seam allowances
 - stitch requirements
 - seam finishes, such as flat seam, blind hem and French seam
- design requirements and style features:
 - garment type (bra and swimwear)
 - number of panels
 - sleeves
 - sides
 - openings
 - neckline
 - seams
 - gathers
 - pleats
 - panel tucks
- customer and workplace fit requirements
- fabric characteristics of one-way, two-way and no-stretch fabrics
- marker making procedures

- pattern markings:
 - appropriate seam allowance
 - notching
 - pattern information (size, style number, cutting instructions and identity)
 - darts
 - drill holes
 - grain line
 - cutting line
 - stitching line
- cutting and garment construction
- maintaining accurate records.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in developing patterns for bras and swimwear at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5003 Analyse fit model

Modification History

Release 1. Supersedes and is equivalent to LMTFD5003B Analyse fit model

Application

This unit of competency covers the skills and knowledge required to analyse and select the fit model used to present sample garments and derive garment fit and size standard.

The unit of competency applies to representations that are required in the design, manufacture and retail of fashion garments to ensure that the targeted customer population is addressed in size range and appropriate data is obtained from research. This data also provides a solid basis for design, pattern derivation and garment construction for a sizing system.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|-------------------------------------|-----|---|
| | requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Plan to analyse fit model | 2.1 | Obtain profile of target market |
| | | 2.2 | Identify characteristics of market population |
| | | 2.3 | Establish intended purpose of the design |
| | | 2.4 | Interpret design brief and select appropriate sizing system and fit model to represent target population |
| | | 2.5 | Communicate with relevant people to confirm plans |
| 3 | Measure fit model | 3.1 | Obtain tools and equipment and prepare fit model for measurement and image capture |
| | | 3.2 | Establish and mark body reference points |
| | | 3.3 | Take and record body measurements |
| | | 3.4 | Consult designer and product development team to analyse measurements |
| | | 3.5 | Assess body characteristics and compare to standard body |
| | | 3.6 | Identify unique features, assess for potential problems in fit and record all information |
| 4 | Finalise and check fit model | 4.1 | Identify types of dress forms or 3-D avatars available to designers and technicians and evaluate options according to resources |
| | | 4.2 | Compare to fit model and select appropriate representation |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Target market includes one or more of the following:

- plus sizes
- petit sizes
- teen
- mature age
- baby
- toddler

Sizing system includes one or more of the following:

- women's sizes, such as 10, 12, 14, 16, and so on
- men's sizes, such as 92, 95, 98, and so on
- women's bra, sizes such as 12A, 12B, 12C, 12D, 12DD, and so on
- children's sizes, such as 5, 6, 7, 8, 9, 10, and so on

- babies' sizes such, as 0000, 000, 00, 0, and so on
- Confirm plans includes the following:**
- clarify design brief with designer, if required
 - gain approval of stakeholders for selected fit model
 - liaise with fit model to develop schedule for measurement taking, fittings and presentation of garments
- Standard body includes one or more of the following:**
- Australian Standards, international standards and recommended size charts
 - proprietary data developed in-house or through external sources which define the figure as proportional, aligned and falling within appropriate weight for age parameters for target population
- Unique features include one or more of the following:**
- common postural faults, such as forward head, rounding of shoulders, anterior/posterior pelvic tilts, sway back and flat back
 - prominent features, such as protruding abdomen, bust or seat
 - spinal and pelvic rotation
 - foot alignment, such as supinated or pronated foot
 - arm types, such as very thin or heavy
 - leg types, such as bow legs or knock knees
 - neck length, such as long or short

Unit Mapping Information

Assessment Requirements for MSTFD5003 Analyse fit model

Modification History

Release 1. Supersedes and is equivalent to LMTFD5003B Analyse fit model

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- scoping and interpreting target market and characteristics of market population
- interpreting design brief and selecting appropriate sizing system and fit model to represent target population on at least two (2) occasions
- analysing and assessing physical characteristics
- recording measurements and consulting with design and production team members to analyse measurements
- assessing body characteristics, comparing to standard body and identifying unique features, to assess for potential problems in fit
- recording measurements, body characteristics and unique features
- selecting appropriate representation of fit model to use in product development
- maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- sizing systems
- characteristics of target market:
 - age
 - gender
 - size, body characteristics
 - economic and social expectations
 - purchase pattern
- tools and equipment:
 - manual or electronic tape measure
 - image capturing devices
 - pen/pencil

- measure chart
- tape, cord or elastic
- eraser
- Australian Standard chart
- body characteristics:
 - posture
 - genetic, developmental and structural influences
 - shape classifications, such as hourglass, rectangular, pear and inverted triangle
 - anthropometric classifications (somatotypes)
 - shoulder slope (raised, normal and sloping)
 - body sway and postural asymmetry (according to lower and upper body)
 - proportions (short or long-waisted and mid-body shortness)
- body measurements:
 - height and weight
 - body reference points, such as nape, acromion, waist point, seat vertex, abdomen vertex, carpus, neck base, upper sternum, bust point and pelvic bone
 - levels, such as crown, shoulder, scye, bust or chest, waist, hip, crotch and knee
 - girth measurements, such as waist, bust or chest, hip, high hip, upper and under bust, head circumference, upper arm, wrist, thigh, calf, ankle and heel/instep
 - horizontal measurements, such as shoulder, shoulder breadth, across front, across back, and bust point to bust point
 - vertical measurements, such as nape to centre back waist, nape to neck base, nape to bust or chest, nape to waist, nape to wrist, centre front waist to floor, centre back waist to floor, right-hand side waist to floor, left-hand side waist to floor, waist to hip, inside leg, body rise, arm length and neck length
 - cup size
 - shoulder angle
 - seat prominence
- body science:
 - structural anatomy
 - morphology
 - anthropometry
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in analysing fit models, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5004 Develop marketing plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to LMTFD5004B Develop marketing plans for fashion products

Application

This unit of competency covers the skills and knowledge required to plan marketing and promotional activities to support the sales of fashion products.

The unit of competency applies to local or international marketing activities typical to the promotion and sale of fashion products. Development of marketing plans may be central to the work role or completed as part of the overall sale of design concepts to clients. All proposed marketing activities must be appropriate to the price point of the fashion design and the overall objectives of the client.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to develop marketing plans**
 - 2.1 Identify key features and benefits of the selected fashion design
 - 2.2 Research target market and identify fashion design needs and expectations
 - 2.3 Identify price point and marketing budget
 - 2.4 Identify any other relevant details that may affect marketing activities
 - 2.5 Establish marketing objectives with client

- 3 **Research and determine marketing options**
 - 3.1 Determine appropriate media to reach target market and select appropriate strategies
 - 3.2 Explore marketing event options and promotional activities, and assess their effectiveness in marketing the selected fashion design.
 - 3.3 Explore timing of marketing activities and determine costings for marketing options

- 4 **Develop and finalise marketing plan**
 - 4.1 Identify the fashion product marketing cycle and develop marketing plan which details marketing activities
 - 4.2 Assess marketing plan to determine if it will be effective in meeting marketing objectives, timing and budget requirements
 - 4.3 Present marketing plan to client and integrate client response into further marketing proposals

4.4 Document marketing plan according to industry practices

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Marketing details include one or more of the following:

- packaging or distribution requirements
- production timelines or requirements
- distribution outlets
- designer reputation
- style characteristics
- budget

- international regulations
- pricing structures
- import/export factors
- production times
- quality assurance factors

Promotional activities include one or more of the following:

- gimmicks
- point of sale and merchandising
- special offers
- product branding activities
- packaging features, such as labelling
- display and presentation

Industry practices include one or more of the following:

- formatting and structure
- inclusion of pictures and style and design details
- promotion of features and benefits
- reporting verbally or in writing
- oral, written or visual communication
- inclusion of marketing objectives
- inclusion of adequate detail

Market plan includes one or more of the following:

- details for events, such as fashion design launches, fashion parades or shows and exhibitions
- target strategies, such as advertising and promotional campaigns

Personnel include one or more of the following:

- supervisor
- trainer/mentor
- designers
- patternmakers
- production supervisors
- clients

Unit Mapping Information

Assessment Requirements for MSTFD5004 Develop marketing plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to LMTFD5004B Develop marketing plans for fashion products

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria for at least two products and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching target market and identifying fashion design needs and expectations
- determining marketing objectives and identifying features and benefits of fashion designs according to needs and expectations of the target market
- accessing, interpreting and using data from a range of sources
- determining appropriate media and appropriate strategies to reach target market
- exploring and assessing marketing event options and promotional activities to market the selected fashion design
- developing a marketing plan for at least two (2) fashion products and determining if it will be effective in meeting marketing objectives, timing and budget requirements
- documenting marketing plan according to industry practices
- recording reports on marketing opportunities and strategies and presenting them to appropriate personnel.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- marketing details
- marketing objectives:
 - client position
 - range of fashion products in marketplace
 - marketing objectives and sales targets
 - product pricing strategy
 - position in market
 - packaging and distribution requirements
- marketing practices in the fashion industry

- concepts of marketing cycle and product life cycle
- marketing tools and media for the fashion industry:
 - print (e.g. magazines, and regional and metropolitan newspapers)
 - audio (e.g. radio)
 - visual (e.g. video, television and DVD)
 - electronic (e.g. email, websites and social media)
 - features of media (e.g. editorials, advertising, photos and testimonials)
- marketing events and promotional activities:
 - launches
 - fashion parades
 - exhibitions
 - shows
 - demonstrations
 - press conferences
 - media events
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in developing marketing plans for fashion products, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5005 Manipulate fabrics to create new finishes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5005B Manipulate fabrics to create new finishes

Application

This unit of competency covers the skills and knowledge required to use manipulation techniques to create decoration for fabric design effects.

The unit of competency applies to manipulating a range of textiles that are used in the production of garments and accessories.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTCL3001 Identify fabric performance and handling requirements

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|---|--|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | |
| 2 | Prepare to manipulate fabrics | 2.1 Identify a range of fabric manipulation techniques |
| | | 2.2 Identify effects of manipulation on different textiles |
| | | 2.3 Identify processes to achieve different manipulations |
| | | 2.4 Investigate how uses of manipulation inform and inspire design |
| | | 2.5 Identify the role of manipulation as a production tool and its effect on design |
| | | |
| 3 | Manipulate textiles to produce work sample | 3.1 Apply manipulation techniques to a variety of textiles |
| | | 3.2 Assess outcome and modify manipulation as required to provide quality outcomes |
| | | 3.3 Produce samples of manipulated textiles |
| | | 3.4 Document techniques and their effects for future reference |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Fabric manipulation includes three or more of the following:

- crushing
- heat application
- tucking
- pleating
- shrinking
- dyeing

Textiles include one or more of the following:

- knitted fabrics, including weft knits and warp knits
- woven fabrics, including plain, twill, satin, dobby and jacquard
- non-woven fabrics, such as felts, nets, braids and bonded
- raw materials
- yarns
- man-made materials

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5005B Manipulate fabrics to create new finishes

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTFD5005 Manipulate fabrics to create new finishes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5005B Manipulate fabrics to create new finishes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- providing at least ten (10) illustrations that demonstrate a range of fabric manipulation techniques on a variety of fabrics
- identifying and illustrating three (3) examples of how uses of manipulation inform and inspire design
- experimenting with at least three (3) manipulation techniques on different fabrics to determine their effects
- assessing outcomes and modifying manipulation as required to enhance effects
- documenting manipulation techniques and their effects for future reference.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- uses and performance characteristics of textiles, fibres and fabrics
- Australian Standards for garment production and use of chemicals
- manipulation techniques:
 - crushing
 - heat application
 - tucking
 - pleating
 - shrinking
 - dyeing
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in manipulating fabrics, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5006 Evaluate fashion designs against set criteria

Modification History

Release 1. Supersedes and is equivalent to LMTFD5006B Evaluate fashion designs against set criteria

Application

This unit of competency covers the skills and knowledge required to evaluate fashion designs against set criteria.

The unit of competency applies to evaluation techniques applied to ensure a design meets specifications and client needs.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to evaluate fashion designs**
- 2.1 Source and interpret specifications and design brief
 - 2.2 Identify purpose of design and characteristics of target market
 - 2.3 Research current industry design trends
 - 2.4 Research workplace and industry standards for communicating and presenting fashion design concepts
 - 2.5 Identify quality criteria and evaluation criteria that apply to design processes
- 3 **Apply evaluation criteria**
- 3.1 Critically evaluate design and individual features against original design concept, design brief and specifications
 - 3.2 Evaluate how well design principles and have been applied
 - 3.3 Assess design against relevant evaluation criteria
 - 3.4 Identify possible adjustments to increase ability to meet design brief
- 4 **Suggest design improvements**
- 4.1 Apply technical design skills to reflect evaluation and identify improvements
 - 4.2 Identify potential design improvements and test for viability
 - 4.3 Use industry appropriate communication and presentation skills to communicate improvements
 - 4.4 Comply with intellectual property (IP) and copyright requirements when incorporating ideas sourced elsewhere

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MSTFD5006 Evaluate fashion designs against set criteria

Modification History

Release 1. Supersedes and is equivalent to LMTFD5006B Evaluate fashion designs against set criteria

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- demonstrating research on current industry design trends
- identifying workplace and industry standards for communicating and presenting fashion design concepts
- identifying quality and evaluation criteria that apply to design processes
- critically evaluating at least two (2) designs against a client brief, design concept and specifications
- evaluating designs to assess how well they reflect current industry trends, commercial considerations, client briefs, innovation in design and quality considerations
- identifying potential design improvements and testing for viability
- using industry appropriate communication and presentation skills
- observing copyright and intellectual property (IP) requirements
- maintaining records

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- quality standards that apply to design processes
- Australian Standards for garment construction
- history and theory of design in relation to fashion design
- principles of design:
 - repetition
 - gradation
 - rhythm
 - radiation
 - harmony

- contrast
- dominance
- proportion
- balance
- unity
- current fashion industry design trends
- accepted ways and associated techniques of communicating ideas in the fashion industry:
 - sketches
 - diagrams
 - illustrations
 - photographs
 - models
- information technology and software programs
- ways of presenting fashion concepts:
 - written descriptions and rationale
 - samples of fabrics
 - production specifications charts, diagrams and data sheets
- contents of client brief
- quality practices
- workplace criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- copyright and IP requirements
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in evaluating fashion designs, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5007 Analyse influences on contemporary fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD5007B Analyse influences on contemporary fashion designs

Application

This unit of competency covers the skills and knowledge required to research and analyse significant influences that determine current individual preferences and future fashion trends.

The unit of competency applies to the analysis of the fashion theories on adoption and dissemination of new trends, as well as investigating fashion cycles. The skills covered in this unit will be applied in the development of designs to meet specific design briefs and current market demands.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4014 Identify influences on contemporary fashion designs and construction techniques

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Identify significant influences on contemporary fashion	1.1 Investigate significant influences on contemporary fashion
	1.2 Identify what role these influences play on contemporary fashion preferences
2 Use fashion reference sources	2.1 Identify current theories of fashion adoption and dissemination
	2.2 Identify changes in fashion cycles within contemporary fashion scene and predict future cycles
	2.3 Research a current fashion trend and identify its theory of fashion adoption
	2.4 Identify the role of media available in 21st Century and what role media play in the process of adoption and dissemination
	2.5 Research a current fashion trend and analyse the role of a specified media type on its adoption and dissemination
3 Investigate fashion forecasting	3.1 Identify the purposes of fashion forecasting
	3.2 Identify and compare different methods of predicting future fashion directions
	3.3 Identify a possible future trend and provide illustrations with evidence to support why it could be adopted
	3.4 Use communication tools and presentation skills appropriate to the fashion industry

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

- Significant influences include one or more of the following:**
- social
 - economic
 - gender and sexuality
 - demographics
 - age
 - politics
 - aspirations
 - environment
 - work

- Purpose of fashion forecasting includes one or more of the following:**
- to assist designers in planning for next season
 - economic (for buyers to know what will sell)
 - to enable textile mills to plan production

- Methods of predicting future trends include one or more of the following:**
- market research
 - consumer feedback
 - analysis of sales
 - records of consumer buying patterns
 - image library

- analysis of socioeconomic trends
- web forums/blogs

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5007B Analyse influences on contemporary fashion designs

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTFD5007 Analyse influences on contemporary fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD5007B Analyse influences on contemporary fashion designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- researching and accessing relevant information from a range of sources
- applying relevant standards
- identifying significant influences on fashion and the role these influences play on contemporary fashion preferences
- identifying changes in fashion cycles within contemporary fashion scene and predicting future cycles
- investigating a current fashion trend and presenting information on its theory of fashion adoption
- presenting information on a current fashion trend, and the role and influence of a media type on its adoption and dissemination
- identifying a possible future trend and presenting evidence with illustrations to support why it could be adopted, using industry relevant communication and presentation skills
- comparing at least four (4) different methods of predicting future fashion directions and their effectiveness.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- theories of fashion adoption and dissemination:
 - trickle-down effect
 - trickle-up effect (street fashion)
- role of media in the adoption and dissemination of fashion:
 - print (e.g. magazines, and regional and metropolitan newspapers)
 - audio (e.g. radio)
 - visual (e.g. video, television and DVD)
 - electronic (e.g. email, websites, blogs and social media)
- style features
- Australian Standards for garment production
- reference sources:
 - photographs

- magazines
- fashion books
- websites
- fashion influences
- fashion cycles:
 - fads
 - trends
 - classics
- fashion cycles in 20th and 21st Centuries
- fashion forecasting
- communication tools:
 - inspiration board
 - storyboard
 - personal presentation
 - multimedia tools
 - print and audio tools
 - demonstration or exhibition
- presentation skills:
 - effective verbal and non-verbal communication
 - active listening
 - use of appropriate communication tools
 - positive language
 - clear statement of main points
 - interpersonal communication skills
- work procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in analysing influences on contemporary fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5008 Conduct fashion design purchasing

Modification History

Release 1. Supersedes and is equivalent to LMTFD5008B Conduct fashion design purchasing

Application

This unit of competency covers the skills and knowledge required to research and purchase fashion products for use in the development of fashion designs.

The unit of competency applies to the research of national or international fashion themes and styles, and identifying sources for purchasing products to help develop designs and fashion directions.

The unit of competency applies to purchases that can inspire new designs or assist in demonstrating ideas to meet a client design brief or the design needs of a product range or label.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Determine job requirements from specifications, job sheets or work instructions</p>
2 Prepare for fashion design purchasing	<p>2.1 Research national or international styles, themes and trends to identify development opportunities</p> <p>2.2 Clarify purchasing objectives, establish criteria for selecting design purchases and confirm purchasing budget</p> <p>2.3 Identify fashion design outlets and suppliers and purchasing location/s</p> <p>2.4 Determine suitable purchasing strategy and identify potential communication barriers</p> <p>2.5 Investigate and prepare to deal with currency, language and purchasing practices of selected location, as required</p>
3 Purchase fashion products	<p>3.1 Investigate fashion design products according to the design needs of a product range or label</p> <p>3.2 Test themes, styles and trends during purchasing</p> <p>3.3 Identify and apply appropriate communication practices</p> <p>3.4 Assess production and supply opportunities and make purchases to meet purchasing objectives</p> <p>3.5 Identify and respond to any additional design opportunities outside of set objectives</p>
4 Present design purchases to	<p>4.1 Prepare purchases for presentation to client or appropriate enterprise personnel</p>

- client**
- 4.2 Develop and use appropriate communication tools to convey themes and design concepts
 - 4.3 Use positive language and communication skills to encourage adoption of ideas and concepts for further development
 - 4.4 Document findings and outcomes of purchasing trips

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design needs and

- fabric style

- interests include the following:**
- colours
 - themes
 - season range
 - target market
 - emerging trends
 - cost points
 - ability to be replicated
 - appropriateness for design label

- Purchasing strategy includes one or more of the following:**
- visiting domestic outlets and suppliers
 - visiting overseas outlets and suppliers
 - investigating electronic or physical product catalogues and samples
 - liaising with agents or representative
 - attending industry or trade shows or events

- Communication barriers include one or more of the following:**
- time zone/time of day differences
 - cultural differences
 - oral language skills
 - written language skills
 - differences in language
 - different work practices

- Communication tools include one or more of the following:**
- inspiration board
 - storyboard
 - personal presentation
 - multimedia tools
 - print and audio tools
 - demonstration or exhibition

Unit Mapping Information

Assessment Requirements for MSTFD5008 Conduct fashion design purchasing

Modification History

Release 1. Supersedes and is equivalent to LMTFD5008B Conduct fashion design purchasing

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- determining national or international style and theme trends and identifying development opportunities, purchasing objectives and criteria for selecting design purchases
- identifying at least (5) five potential national or international fashion design outlets and suppliers at suitable purchasing locations
- confirming purchasing budget, and preparing to deal with currency, language and purchasing practices of selected location according to requirements of purchasing strategy
- researching and testing themes, styles and trends, and assessing production and supply opportunities
- identifying communication barriers and applying appropriate communications techniques
- selecting fashion design products according to the design needs of a product range or label, and making purchases to meet purchasing objectives
- using appropriate communication tools and presentation skills to present purchases to client or appropriate enterprise personnel and convey themes and design concepts
- documenting findings and outcomes of purchasing trips.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practice
- principles and concepts of design
- Australian Standards for garment production
- characteristics of target market
- enterprise purchasing procedures and criteria
- characteristics of fabrics and materials
- research tools for locating fashion outlets
- emerging styles and themes
- development opportunities
- design needs of a product range or label

- purchasing strategies relevant to product or enterprise
- international business transaction procedures where required
- document and record keeping.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion design purchasing, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5009 Cost production of fashion or textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD5009B Cost design production

Application

This unit of competency covers the skills and knowledge required to analyse and calculate production costs of fashion or textile designs to determine the most cost-effective production mechanism.

The unit of competency applies to costing domestic and offshore production options. The unit applies to workplace practices and procedures applying at the point of production.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to cost fashion or textile production**
- 2.1 Analyse production requirements to determine scale of production
 - 2.2 Identify features of different production options in line with target market and product specifications
 - 2.3 Identify and analyse costs associated with each production option
 - 2.4 Compare cost benefits and cost negatives of each option
 - 2.5 Review previous production records and consult appropriate personnel to determine cost efficiency of production options
- 3 **Assess influences on production costs**
- 3.1 Determine factors that may affect cost of production
 - 3.2 Identify quality and industry standards for design and/or production and assess implications
 - 3.3 Consider production options in line with workplace procedures
 - 3.4 Identify and assess variables which impact on production costs
 - 3.5 Identify and compare differences between short-run or design production and large scale volume production
 - 3.6 Review production options in line with additional information and refine most suitable options
- 4 **Develop and analyse costing sheets for**
- 4.1 Develop costing sheets for selected production options
 - 4.2 Check calculations and collate data

production

- 4.3 Interpret data from costing sheets to assess most cost efficient option for production, in line with design and quality requirements
- 4.4 Document cost analysis and present to appropriate personnel to review suitability of options
- 4.5 Assess options for adjusting variables to modify production costs
- 4.6 Finalise cost analysis and complete all documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Unit Mapping Information

Assessment Requirements for MSTFD5009 Cost production of fashion or textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD5009B Cost design production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- accessing and applying relevant industry standards
- researching and analysing options for fashion or textile production
- analysing and assessing influences affecting production costs
- developing at least two (2) costing sheets
- comparing costs with data
- reviewing and assessing data
- analysing findings with appropriate personnel to review options
- determining final costings
- applying workplace procedures
- maintaining documentation and accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- structure and format of costing sheets
- industry standards for costing specifications
- options and scale of production:
 - in-house production
 - off-shore production
 - cut, make and trim (CMT) suppliers
 - short-run or design production
 - large scale volume production
- design terminology
- production costs:
 - freight
 - tariffs and duties

- wastage
- wages or labour
- materials
- equipment usage and maintenance
- costing variables:
 - labour availability
 - availability of materials and equipment
 - transportation reliability
 - exchange rate changes
 - complexity of design production
 - market forces
 - work health and safety (WHS)
- costing benefits:
 - reduced wastage
 - greater control over production schedule
 - reduced overheads
 - flexible use of labour
 - cheaper labour
 - greater flexibility
- costing negatives:
 - high overheads
 - freight and shipping
 - lack of quality control
 - longer lead times
 - larger minimum orders
- factors affecting costs:
 - style
 - design features
 - choice of fabric
 - choice of yarns
 - choice of trims
 - extras (e.g. pleating and embroidery)
 - embellishment
 - machinery and equipment requirements including re-tooling
- materials characteristics
- style features
- characteristics of identified target market
- quality standards
- sequence of operations
- workplace procedures

recording and reporting practices

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in costing production of fashion or textile designs, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5010 Develop and present design concepts within specific guidelines

Modification History

Release 1. Supersedes and is equivalent to LMTFD5010B Develop and present design concepts within specific guidelines

Application

The unit of competency covers the skills and knowledge required to develop and present fashion design concepts to the client, in response to a brief. It applies to a garment or small range for adult or children's market which includes some distinctive style and features. Work is conducted according to workplace practices and procedures as a member of a team or under supervision.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------------|-----|---|
| 1 | Determine job | 1.1 | Follow standard operating procedures (SOPs) |
|---|----------------------|-----|---|

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	Prepare to develop design concepts	2.1	Identify and confirm design brief details and relevant design information, and clarify parameters of the project
		2.2	Research principles of good fashion design, design trends, availability of materials and other relevant information
		2.3	Identify a range of possible design concepts and prepare storyboard themes related to fabrics and colours
		2.4	Consult with other members of the design team to modify ideas and select appropriate concepts for development
3	Develop design concepts	3.1	Determine appropriate styles and trims or accessories
		3.2	Research and confirm production feasibility
		3.3	Prepare artwork and provide specifications in appropriate format, and include any additional documentation required
		3.4	Prepare design concepts and relevant support materials for presentation according to agreed presentation strategy
4	Estimate production costs	4.1	Collaborate with team to check and confirm all items and resources required for the designs
		4.2	Obtain costs for all materials from relevant sources, compare where necessary, and identify preferred suppliers
		4.3	Calculate total design costs

- | | | | |
|---|--------------------------------|-----|---|
| | | 4.4 | Negotiate amendments or modifications as required to ensure design concept is within budget |
| 5 | Present design concepts | 5.1 | Prepare materials and equipment to create an effective presentation |
| | | 5.2 | Outline features and benefits of designs in a positive manner that encourages approval |
| | | 5.3 | Include all client brief and workplace requirements in the presentation |
| | | 5.4 | Document process and costings and store documentation according to workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design brief details include:

- garment or range details
- target market
- end uses of product
- cost point
- fabrics and materials
- size
- production requirements
- timelines
- client requirements
- workplace requirements
- quality requirements
- style and feature requirements

Garments include one or more of the following:

- skirts
- trousers/pants
- shirts/blouses
- dresses
- coats
- lingerie

Style features include one or more of the following:

- garment type
- collar
- sleeves
- yoke
- sides
- openings
- neckline
- buttons
- seams
- zips
- gathers
- pleats
- panels
- tucks

Parameters of the project include:

- team members and their roles
- chain of command
- timelines
- budget constraints
- reporting processes
- workplace practices
- technical requirements of production
- constraints
- project plan and critical path
- additional expertise
- influence of previous projects

Storyboards include:

- trade sketches of new garment designs
- illustrations
- magazine extracts
- fabric swatches
- trim or accessory samples
- colour palette
- specifications

Prepare artwork includes one or more of the following:

- manually
- computer-aided design (CAD) system

Presentation strategy includes one or more of the following:

- illustrated talk
- digital presentation
- meeting with client
- fashion event
- trade display

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5010B Develop and present design concepts within specific guidelines

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD5010 Develop and present design concepts within specific guidelines

Modification History

Release 1. Supersedes and is equivalent to LMTFD5010B Develop and present design concepts within specific guidelines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures and safe work practices
- applying relevant standards
- generating ideas in response to a design brief, identifying at least three possible design concepts and preparing storyboard themes related to fabrics and colours
- consulting with team members to determine appropriate concept for development
- incorporating distinctive style and features, trims or accessories, and confirming production feasibility
- preparing artwork manually or using computer-aided design (CAD) systems and detailing specifications and other relevant documentation as required, in appropriate format
- researching potential sources and suppliers, comparing costs and identifying preferred option
- calculating total design costs and preparing detailed costings sheets, and estimating of all costs for at least three (3) garments or a small range
- negotiating amendments or modifications as required to ensure design concept is within budget
- creating an effective presentation to present design concept, for at least three (3) garments or a small range, that meets all requirements of the brief and outline features and benefits
- preparing and storing completed documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- elements and principles of design and how they are used to create good design in the fashion industry:
 - repetition
 - gradation
 - rhythm

- radiation
- harmony
- contrast
- dominance
- proportion
- balance
- unity
- design information:
 - customer requirements
 - work specifications
 - fashion reports and trade journals
 - stock records
 - summaries of materials, labour and overhead costs
 - organisation work procedures
 - organisational or external personnel
 - quality
 - Australian Standards and procedures
- design costs:
 - time
 - labour
 - materials
 - trims and accessories
 - overheads
 - fabrics
- fashion industry context, such as codes of practice, global and local trends, copyright obligations and resource sources
- range of typical garment fabrics, including weight and other characteristics
- detailed knowledge of garment construction, marker making and cutting procedures
- colour/colour mix and interpretation
- properties and characteristics of fabrics, fibres, trims and accessories
- fashion costing processes
- presentation, recording and reporting practices.

Assessment Conditions

- Assessors must:
- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in developing design concepts, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5011 Produce fashion illustrations to assist product visualisation

Modification History

Release 1. Supersedes and is equivalent to LMTFD5011B Produce fashion illustrations

Application

This unit of competency covers the skills and knowledge required to produce fashion illustrations that will visually communicate the fashion figure in a variety of poses and silhouettes.

The unit of competency applies to producing fashion illustrations using stylised drawing and rendering techniques.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	Prepare to produce fashion illustrations	2.1	Set up and prepare workspace, drawing tools and equipment
		2.2	Select reference source appropriate to illustration requirements and collage to assist illustration process
		2.3	Analyse figure details, compositional balance, scale and perspective
		2.4	Select illustration techniques and media that are appropriate to communicate a variety of fabrics and textures
3	Produce fashion illustrations	3.1	Select proportion, scale and stylisation relevant to fashion illustration
		3.2	Use clean, confident and stylised lines to present representations of fashion figure
		3.3	Illustrate a variety of silhouettes and poses of clothed fashion figures
4	Review and finalise illustrations	4.1	Inspect illustration against quality standards and make any required changes or adjustments
		4.2	Complete and store documentation relating to fashion illustration

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Reference sources include one or more of the following:

- photographs
- magazines
- fashion books
- websites

Figure details include one or more of the following:

- full or partial body drawings
- hands
- feet
- head
- hair
- eyes
- nose
- mouth
- waist
- bust
- hips

- legs
- arms

Illustration techniques include one or more of the following:

- flat paint application
- wash (paint application)
- rendering
- air brushing

Fabrics include one of more or the following:

- fur
- velvet
- suede
- silk
- sheer fabrics
- denim
- brocade
- sequin
- leather
- lace

Assessment Requirements for MSTFD5011 Produce fashion illustrations to assist product visualisation

Modification History

Release 1. Supersedes and is equivalent to LMTFD5011B Produce fashion illustrations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching fashion illustrations in a range of reference sources
- analysing figure details, compositional balance, scale and perspective
- using appropriate manual or digital drawing tools, materials and techniques to produce a range of fashion illustrations to depict at least three (3) garments on the human form
- using illustration techniques and media that are appropriate to communicate a variety of fabrics and textures
- selecting proportion, scale and stylisation relevant to fashion illustration
- using clean, confident and stylised lines to present representations of clothed fashion figures and figure details in a variety of silhouettes and poses
- completing and storing documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- drawing tools and equipment:
 - coloured pencils
 - digital equipment
 - software
 - aquarelle pencils
 - pencil sharpener
 - felt tip markers
 - pen
 - ink
 - pastel
 - crayon

- flat paint
- washed paint
- air brush
- eraser
- ruler
- slanted drawing table
- illustration techniques
- examples of typical representations of fashion figures
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in fashion illustration at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5012 Perform contour draping

Modification History

Release 1. Supersedes and is equivalent to LMTFD5012B Perform contour draping

Application

This unit of competency covers the skills and knowledge required to perform contour draping for styled garments that are worn against the body.

The unit of competency applies to draping fabric to the contours of the figure incorporating working design drawings. Draping may be for a one-off garment that goes from drape to garment or a prototype that goes from drape to flat pattern for small volume production. Draping is performed on a body form, such as a mannequin or model.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4021 Drape fabrics to make patterns

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|---|--|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | |
| 2 | Prepare to perform contour draping | 2.1 Select and prepare draping tools and equipment |
| | | 2.2 Plot design lines from working drawings onto body form, using narrow tape |
| | | 2.3 Check measurements against specifications |
| | | 2.4 Prepare fabric for draping |
| | | |
| 3 | Plan drape | 3.1 Identify requirements for adding ease and manipulating dart excess |
| | | 3.2 Plan seam positioning and develop drape plan |
| | | 3.3 Prepare cover designs if a fitted foundation to support volume draping or layering is required |
| | | |
| 4 | Perform and finalise drape | 4.1 Pin fabric on model form and perform draping operations |
| | | 4.2 Remove drape from model |
| | | 4.3 Finalise drape and direct to next production process |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Fabric includes one or more of the following:

- fabric of the final garment
- a fabric that has the same handle or drape

Prepare fabric for draping includes the following:

- estimating dimensions of fabric pieces required for each section/piece to be draped
- identifying warp, weft and bias of fabric
- identifying and assessing fabric handling qualities

Drape plan includes one or more of the following:

- adding fullness (pleats, tucks and gathers)
- multiple darts/division of darts
- symmetric and/or asymmetric design features
- cowls, twists and knots

Draping operations include the following:

- relating body reference points and fabric grains
- moulding and manipulating fabric to fit model form according to working drawing, fit and design lines

- adding ease to allow for movement
- incorporating fullness or volume, if required
- smoothing or manipulating fabric over contours of model form
- forming and pinning darts and seams to create pattern or construct garment
- preparing drape for truing and performing truing

Assessment Requirements for MSTFD5012 Perform contour draping

Modification History

Release 1. Supersedes and is equivalent to LMTFD5012B Perform contour draping.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- preparing tools, equipment and fabric pieces
- plotting design lines from working drawings onto body form, using narrow tape
- checking measurements against specifications
- identifying requirements for adding ease and manipulating dart excess
- planning seam positioning and developing drape plan
- preparing cover designs if a fitted foundation to support volume draping or layering is required
- carrying out all required draping operations on model form on at least two (2) occasions
- finalising the drape for next process.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- principles and concepts of patternmaking
- customer and workplace requirements
- cost efficiency in relation to patternmaking
- range of typical garment fabrics, including weight and other characteristics
- draping tools and equipment:
 - model form
 - narrow tape/ribbon
 - tape measure
 - pen/pencil
 - scissors
 - square rule
 - marker pens

- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- draping processes and plans
- body science:
 - structural anatomy
 - morphology
 - anthropometry
- fabric handling characteristics:
 - fall
 - stretch
 - stability
 - drape
- required details for pattern pieces
- pattern markings:
- appropriate seam widths
 - notches
 - dart lines
 - drill holes
 - grain line
 - cutting instructions
 - stitching lines
- cutting and garment construction
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in contour draping, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5013 Develop merchandising plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to LMTFD5013B Develop merchandising plans for fashion products

Application

This unit of competency covers the skills and knowledge required to develop merchandising plans for fashion products.

The unit of competency applies to merchandising activities involving the presentation, sale and promotion of fashion design products. It applies to merchandising of high-volume and low-volume fashion products and accessories to the appropriate market sectors.

Developing merchandising plans may be central to the work role or completed as part of the overall sale of design concepts to clients. Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to develop merchandising plans	2.1	Analyse merchandising opportunities
		2.2	Establish merchandising objectives
		2.3	Analyse current merchandising practices and trends for relevance to fashion product
		2.4	Determine merchandising budget for fashion design product
3	Develop merchandising plan	3.1	Determine in-store presentation of fashion design
		3.2	Determine advertising and promotion of fashion design
		3.3	Develop a merchandising plan which details presentation, promotional and advertising activities
4	Assess, document and store merchandising plan	4.1	Assess how effective merchandising plan is in meeting marketing objectives, timing and budget requirements
		4.2	Present merchandising plan to client and integrate client response into proposals
		4.3	Document merchandising plan according to industry practices
		4.4	Document reports on merchandising opportunities and strategies, and present to relevant persons in the workplace, as appropriate

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Merchandising opportunities include the following:

- analysing features of fashion product to identify promotional strengths
- researching target market
- identifying buying patterns in relation to fashion product
- analysing distribution outlets for fashion product and their product range, location, target market and merchandising activities

Merchandising objectives include the following:

- determining client position and range of fashion products in marketplace
- establishing merchandising objectives and sales

targets with client

- establishing product pricing strategy and position in market
- establishing distribution requirements of fashion design

Current merchandising practices include one or more of the following:

- point of sale tracking
- instant communication of sales back to manufacturers
- overnight replenishment
- just in-time (JIT) systems
- point of sale documentation and communication systems
- sale tracking systems
- practices of the workplace and merchandising outlet
- appropriate to the price point of the fashion design and the overall objectives of the client

In-store presentations include one or more of the following:

- store layout, display spaces and customer flow
- fixtures, fittings and mannequins for display of fashion designs, as appropriate to store and the design
- presentation visuals and arrangements for optimal display of fashion design products
- folding and packaging requirements
- information to assist sales staff in selling fashion designs
- timing of release to store and customers
- documentation of sales records to monitor effectiveness of merchandising activities
- pricing policies and procedures

Advertising and promotion of fashion design include one or more of the following:

- promotional activities to support sales of fashion design
- promotional and advertising materials appropriate to fashion design product and client marketing objectives
- photography and visual representations, as required
- assessing responses to promotional and advertising activities
- agreeing on a marketing plan with client

Presentation visuals and arrangements include one or more of the following:

- colour and theme arrangements
- pricing, sizing and styles arrangements
- total look or accessory arrangements
- placement of stock on fixtures, fittings and mannequins
- use of additional props
- location within the store
- signage

Pricing policies and procedures include one or more of the following:

- marking down of slow moving stock
- soiled or damaged goods
- goods close to use-by date
- end of season stock
- long term and short term
- internal and external considerations
- pricing policies
- goods and services tax (GST) requirements

Unit Mapping Information

Assessment Requirements for MSTFD5013 Develop merchandising plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to LMTFD5013B Develop merchandising plans for fashion products

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- complying with relevant standards
- analysing current merchandising practices and trends and determining opportunities and relevant practices for identified fashion products
- determining merchandising objectives for at least two (2) fashion products
- developing a merchandising plan which details presentation, budget, and promotional and advertising activities
- documenting merchandising plan according to industry practices
- using effective communication and documenting reports on merchandising opportunities and strategies, and presenting to relevant persons in the workplace, as appropriate.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- merchandising practices in the fashion industry
- characteristics and purpose of merchandising
- the role of merchandising in the retail industry
- concepts of product and pricing life cycle
- characteristics and purchasing styles of target market
- range and availability of merchandising products and services
- promotional and advertising materials, such as:
 - brochures, fliers and posters
 - photos
 - labels, and tickets
 - print, audio visual or electronic advertisements
- promotional activities, such as:

- gimmicks
- point of sale incentives
- special offers
- price reductions
- advertising
- product branding activities
- packaging features such as labelling
- demonstrations
- fashion parades
- international regulations, pricing structures, import/export factors, production times, quality assurance factors and production arrangements (where appropriate)
- regulatory requirements and codes of practice
- characteristics and purchasing styles of target market
- goods and services tax (GST) requirements
- quality practices
- workplace practices
- industry practices for documenting merchandising plan, such as:
 - formatting and structure
 - inclusion of pictures and presentation details
 - promotion of design features and benefits
 - reporting verbally or in writing
 - oral, written or visual communication
 - inclusion of merchandising objectives
 - inclusion of adequate detail.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in developing merchandising plans, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5014 Construct complex blocks for fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5014B Construct complex blocks for fashion garments

Application

This unit of competency covers the skills and knowledge required to construct complex blocks for fashion garments.

The unit of competency applies to the construction of blocks to develop patterns for fashion garments that require advanced styling, such as label house, couture, designer label, made-to-measure, bridal or corsetry production.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4008 Construct stock size block for garment to meet size and fit specifications

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to construct complex blocks**
 - 2.1 Confirm garments in range and obtain profile of target market
 - 2.2 Interpret and clarify design sketches and drawings, specifications and intended purpose of the design with designer
 - 2.3 Evaluate and record size and fit model specifications, body movement and comfort requirements
 - 2.4 Consider fabric characteristics and performance, trims and finishing of the design

- 3 **Construct complex blocks**
 - 3.1 Select blocks and block drafting principles and methods for selected fashion garments
 - 3.2 Analyse measurements and characteristic of fit model and enter data into block drafting formulas and methodology
 - 3.3 Construct block using patternmaking technical skills and check to ensure compliance with requirements, design specifications and standards
 - 3.4 Document methods and formulas used

- 4 **Verify blocks for accuracy and suitability**
 - 4.1 Check block either manually, by computer or by constructing a toile
 - 4.2 Construct toiles from block, where required
 - 4.3 Verify correct proportion, fit and balance and suitability of garment, and make minor adjustments, where

		required
	4.4	Label final blocks and check for accuracy and completeness of all necessary information to ensure compliance with specifications
5	Develop block portfolio for fashion label	
	5.1	Present blocks in preparation for development of style patterns according to workplace requirements and cost efficiency
	5.2	File and store blocks on appropriate media according to appropriate criteria and complete all required documentation
	5.3	Maintain records and prepare reports where necessary

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Garment range with advanced styling includes one or more of the following:**
- tailored suits
 - eveningwear
 - bridal wear
 - couture
 - stretch trousers
 - corsetry
 - raglans
 - kimonos
 - overcoats
 - jackets
 - capes
- Profile includes one or more of the following:**
- age
 - ethnicity
 - gender
 - size, body characteristics
 - economic and social expectations
- Measurement and characteristics of fit model include:**
- accurate assessment of body measurement positions (landmark points, such as nape; and levels, such as waist level)
 - accurate taking of body measurements, including girth, vertical and horizontal measurements
 - age
 - sex
 - ethnicity
 - assessment of physical characteristics, including body characteristics and unique features as aligned with standard representation
- Media includes one or more of the following:**
- cardboard
 - computer file
 - tissue paper

Unit Mapping Information

Assessment Requirements for MSTFD5014 Construct complex blocks for fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5014B Construct complex blocks for fashion garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting designs for label garment range and determining appropriate fabric characteristics and performance, trims and finishing of the design
- recording size and fit model specifications, body movement and comfort requirements
- analysing measurements and entering data into block drafting formulas
- constructing, checking and verifying blocks, for at least two (2) different specified garments or small garment range, with advanced styling
- constructing and adjusting toiles or prototypes, and modifying block as required
- presenting blocks in preparation for development of style patterns according to workplace requirements and cost efficiency
- labelling final blocks and checking all necessary information is accurate and complete and complies with specifications
- filing and storing blocks according to appropriate criteria and maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for the fashion industry
- principles, concepts and processes of block construction
- industry, global and local trends
- detailed knowledge of garment construction
- fabric characteristics and performance
- cost efficiency in relation to block construction and patternmaking
- garments or small garment range with advanced styling, such as:
 - tailored suits
 - eveningwear
 - bridal wear

- couture
- stretch trousers
- corsetry
- raglans
- kimonos
- overcoats
- jackets
- capes
- patternmaking technical skills
- computer aided design skills relevant to block construction
- block making methods and formulas:
 - deviations from standard patterns
 - sources of pattern components
 - pattern derivation methods and formulas
 - block construction methods and formulas
 - application of current industry practice
- toile construction
- block filing criteria:
 - date
 - category
 - label
 - location
 - gender
 - age
- documentation and recording practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in complex block construction at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5015 Develop patterns for complex fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5015B Develop patterns for complex fashion garments

Application

This unit of competency covers the skills and knowledge required to develop patterns for the production of complex fashion garments with advanced styling requirements.

The unit of competency applies to the development of patterns using an existing block and applying advanced patternmaking principles.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009	Develop patterns from a block using basic patternmaking principles
MSTFD4010	Create pattern to meet design specifications applying advanced patternmaking principles
MSTFD4015	Create pattern from block to meet customer specifications

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to create patterns | 2.1 | Select and prepare patternmaking tools, equipment, additional materials, if required, and workstation |
| | | 2.2 | Interpret and clarify design drawings and specifications, and identify design lines and style features |
| | | 2.3 | Confirm garments in range, intended purpose and target market with designer |
| | | 2.4 | Obtain profile of target market, check sketches or drawings and interpret specifications with designer, as required |
| | | 2.5 | Evaluate and record all design and advanced styling requirements |
| 3 | Create pattern for complex garments | 3.1 | Plan pattern production according to quality standards and workplace procedures |
| | | 3.2 | Select blocks for block portfolio and check they are accurate and appropriate |
| | | 3.3 | Make necessary adjustments to seams to create silhouette to match design brief |
| | | 3.4 | Produce pattern using advanced patternmaking principles and document methods and formulas used |
| | | 3.5 | Check pattern pieces, label and complete markings |

- | | | | |
|---|------------------------------------|-----|---|
| 4 | Check and finalise patterns | 4.1 | Test toile or garment segments for proportioning and fit |
| | | 4.2 | Fit prototype to ensure that pattern is satisfactory to customer |
| | | 4.3 | Complete any pattern alterations and assess pattern meets fit and design requirements |
| | | 4.4 | Finalise pattern and check it is accurate, complete and complies with design specifications |
| | | 4.5 | Complete pattern specification sheet, attach to patterns for storage and file appropriately |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design requirements include :

- fabric characteristics and performance
- trim details and finishings
- special construction method
- ease allowances
- identification of fabrics not suitable to the design
- budget constraints
- specification of fit model
- body movement
- comfort

Style features include one or more of the following:

- garment type
- collar
- sleeves
- yoke
- sides
- openings
- neckline
- buttons
- seams
- zips
- gathers
- pleats
- panels
- tucks

Advanced styling includes one or more of the following

- label house
- couture
- designer label
- made-to-measure
- bridal
- corsetry

Complex garments include one or more of the following:

- tailored suits
- eveningwear
- bridal wear
- couture

- trousers
- pants
- suits
- corsetry

Advanced patternmaking methods and formulas include the following:

- deviations from standard patterns
- sources of pattern components
- pattern derivation methods and formulas
- block construction methods and formulas
- application of current industry practice

Check pattern pieces includes the following:

- accuracy of seam allowances
- ease allowance
- seam match
- hems
- functional openings
- flow through

Specification documents include the following:

- number of pattern pieces
- what the pattern consists of (e.g. 2 bodice, 1 sleeve)
- measurement table
- size table
- technical drawing
- details of types of materials (fabric, lining, fusing, elastic, closures and trims)
- sign-off
- recommendations for stitching

Assessment Requirements for MSTFD5015 Develop patterns for complex fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5015B Develop patterns for complex fashion garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting and clarifying design drawings and specifications, design lines and style features
- confirming garments in range, intended purpose and target market with designer
- obtaining profile of target market, checking sketches or drawings, interpreting specifications with designer, as required
- recording all design and advanced styling requirements
- using patternmaking tools and equipment and applying industry standards for advanced patternmaking and complex garment construction
- choosing appropriate block portfolio to develop a complex pattern to suit work specifications
- producing a pattern using advanced patternmaking principles for at least two (2) complex garments with advanced styling, and documenting methods and formulas used
- checking pattern pieces, labelling and completing markings
- fitting toile, prototype or garment segments to check for correct fit, and adjusting patterns to suit customer and design requirements
- finalising pattern, checking it is accurate, complete and complies with design specifications, and completing pattern specification sheet to attach to patterns
- filing patterns according to workplace procedures and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
 - blocks
 - dress form

- scissors
- square rule
- marker pens
- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- tape measure
- design specifications and procedures
- target market profile:
 - age
 - ethnicity
 - gender
 - size
 - body characteristics
 - economic and social expectations
- advanced patternmaking methods and formulas:
 - deviations from standard patterns
 - sources of pattern components
 - pattern derivation methods and formulas
 - block construction methods and formulas
 - application of current industry practice
- advanced patternmaking procedures:
 - dart manipulation
 - adding fullness
 - pivoting
 - square blocking
 - contouring
 - advanced dart manipulation
- advanced styling requirements, such as:
 - label house
 - couture
 - designer label
 - made-to-measure
 - bridal
 - corsetry
- design requirements and style features:
 - garment type

- collar
- sleeves
- yoke
- sides
- openings
- neckline
- buttons
- seams
- zips
- gathers
- pleats
- panels
- tucks
- customer and workplace fit requirements
- fabric characteristics
- marker making procedures
- pattern markings:
 - appropriate seam allowance
 - notching
 - pattern information (size, style number, cutting instructions and identity)
 - darts
 - drill holes
 - grain line
 - cutting line
 - stitching line
- cutting and garment construction
- maintaining accurate records.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in pattern making, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5016 Grade complex patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD5016B Grade shaped patterns

Application

This unit of competency covers the skills and knowledge required to conduct allometric grading of shaped or 3-D patterns for fashion garments.

The unit of competency applies to grading patterns where the focus is on taking into account differences in body growth for a specialised fit. Allometric grading must consider the relative growth rate of different parts of the body. Discretion and judgement may be required in planning and selecting processes.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4013 Grade 2-D patterns

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|--|---|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to grade complex patterns | 2.1 Research target market and collect data of target market for measurement table |
| | | 2.2 Clarify design brief and confirm target market and intended purpose of design with designer |
| | | 2.3 Analyse measurement table |
| | | 2.4 Identify growth of circumference and length increments and construct size table |
| | | 2.5 Identify base pattern pieces, allocate grade points and construct grade rule table |
| 3 | Grade complex patterns | 3.1 Determine stacking or outlay requirements, including direction |
| | | 3.2 Grade pattern manually using patternmaking technical skills or by computer |
| | | 3.3 Identify stack points or lines if stacking is used |
| | | 3.4 Preserve integrity of pattern attributes during grading |
| | | 3.5 Accurately label all pattern pieces with pattern marking symbols |
| | | 3.6 Check pattern for accuracy and rectify or address faults as required |
| 4 | Finalise and store complex patterns | 4.1 Prepare shaped patterns and markers and present in preparation for production |

- 4.2 Prepare specification documents required
- 4.3 Maintain records and complete documentation as required
- 4.4 File patterns according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Research target market includes the following:

- analyse target market
- identify averages and differences
- analyse body growth
- record relevant data

Body growth includes the following:

- change in shape
- increase in dimension of the neck, torso and limbs which is independent of growth in stature

Grading methodology includes the following:

- allometric or 3-D apportion of grade increments
- positioning of constant or stack point through growth areas of body

Shaped grading includes the following:

- a construction-based method of grading
- reduces or grows a base pattern in height, girth and shape
- distributes grade increments at points and in values that reflect a third dimension to a flat 2-D pattern
- must consider the relative growth rate of different parts of the body

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5016B Grade shaped patterns

Assessment Requirements for MSTFD5016 Grade complex patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD5016B Grade shaped patterns

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching target market, clarifying design brief and confirming target market and intended purpose of design with designer
- analysing measurement table, identifying growth of circumference and length increments and constructing size table
- identifying base pattern pieces, allocating grade points and constructing grade rule table
- determining stacking or outlay requirements, including direction
- using computer-aided design (CAD) or manual grading system to grade at least two (2) shaped or 3-D patterns
- preserving integrity of pattern attributes during grading and correctly marking and labelling pattern pieces
- checking pattern for accuracy, rectifying faults as required, finalising pattern for production and preparing specification documents
- completing documentation, maintaining records and filing patterns according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian size Standards
- workplace and customer size charts
- allometric grading processes
- pattern attributes:
 - darts
 - notches
 - shape
 - design proportion
- marker making

- pattern marking symbols and labelling:
 - grain lines
 - darts
 - notching
 - all necessary slits
 - job seams
 - seam allowance
 - cutting line
 - stitching line
- correct written information and instructions
- cost efficiency in patternmaking
- documentation, specifications and recording practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in grading complex patterns, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5017 Apply design studio processes to meet client brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD5017B Apply design studio processes to meet client brief

Application

This unit of competency covers the skills and knowledge required to apply design studio processes when working to a client brief to design and produce fashion garments.

The unit of competency applies to integrating skills across the design and production process and focuses on experimentation and continuous improvement in order to achieve desired design effects and meet a client brief for individual garments or a small range.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- requirements**
- 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare for design and production**
- 2.1 Identify and confirm specifications of design brief, client needs and objectives and establish the purpose and parameters of the design with client
 - 2.2 Identify characteristics of target market and review relevant products previously developed by the enterprise in terms of similar specifications
 - 2.3 Establish communication requirements and channels with client
 - 2.4 Research relevant information to guide design and production process
 - 2.5 Analyse information, clarify brief, as required, and identify any additional expertise required for project
 - 2.6 Access and apply information on design techniques and processes used to achieve desired effects, as required throughout design and development processes to improve product
- 3 **Undertake design and production process**
- 3.1 Identify preliminary concept options, discuss with client or workplace design team and evaluate options against design brief specifications
 - 3.2 Apply principles and elements of design to experiment with design concepts
 - 3.3 Use selection processes to evaluate and refine concept options and scope out preliminary design concepts to present to client
 - 3.4 Present design concept to client and apply client's feedback to modify and improve design

- | | | | |
|---|---|-----|---|
| | | 3.5 | Scope production requirements and make preparations for production |
| | | 3.6 | Identify sequence of operations and complete requirements to develop and confirm design pattern |
| | | 3.7 | Complete required actions to produce finished fashion product |
| 4 | Review design and production processes | 4.1 | Assess finished product against quality criteria, design specifications and design brief |
| | | 4.2 | Evaluate design to identify opportunities for improvement |
| | | 4.3 | Analyse and evaluate production process to identify opportunities for improvement |
| | | 4.4 | Document process and improvements |
| | | 4.5 | Plan to present final product to client |
| 5 | Present finished product to client | 5.1 | Prepare finished product for presentation |
| | | 5.2 | Select accessories, fabric examples and components to convey range and style options of design |
| | | 5.3 | Select model as required |
| | | 5.4 | Organise presentation of finished product |
| | | 5.5 | Seek client response and assess for improvement possibilities |
| | | 5.6 | Assess further production and business opportunities |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Specifications includes the following:

- budget
- price point
- type of garment
- fabric type and quantity
- range
- style requirements
- fit model specifications
- size range
- timeline
- special effects or features
- quality criteria
- finishing details
- design restrictions or conditions

Relevant

- trends

- information includes one or more of the following:**
- fabrics
 - production and construction processes
 - target market
 - resource availability
 - costs
- Selection processes include one or more of the following:**
- checking against design brief
 - discussing with client
 - testing with target market
 - testing with production team
 - discussing with patternmaker
 - testing with sales and marketing professionals
- Experiment with design concepts includes one or more of the following:**
- scoping out preliminary concepts using sketches, illustrations, models, samples, fibres and fabrics
 - using selected criteria and processes to evaluate design concepts by self and others
 - assessing feedback and analysis for potential to improve design concept
 - using further experimentation to develop design concepts
 - selecting concepts for presentation and testing with appropriate personnel
- Present design concept to client includes the following:**
- using communication tools to present design concept
 - emphasising features and benefits of design concepts
 - encouraging and promoting acceptance of design concept
 - assessing and responding to client response
 - modifying design concept and improving it where possible
- Communication tools include one or more of the following:**
- inspiration board
 - storyboard
 - research information
 - multimedia tools
 - print and audio tools
 - demonstration or exhibition
- Presentation skills include one or more of the following:**
- effective verbal and non-verbal communication
 - active listening
 - use of appropriate communication tools

- positive language
- clear statement of main points
- interpersonal communication skills
- seeking and responding to feedback
- encouraging questions
- responding effectively to questions

Preparations for production include the following:

- identifying all components required for production
- identifying technical aspects of production
- completing specification sheet to guide production
- identifying and sourcing resources and production requirements
- developing production plan to guide production
- confirming production plan with client

Sequence of pattern operations includes the following:

- selecting pattern base to meet design brief
- modifying blocks to create patterns that meet design requirements and specifications
- making pattern according to industry standards, including industry markings and lay plans
- creating toile to test accuracy of pattern
- confirming pattern against design specifications

Produce finished fashion product includes the following:

- preparing workplace according to WHS practices
- preparing materials and resources
- cutting fabric according to pattern directions
- sewing product according to specifications
- finishing product according to specifications

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5017B Apply design studio processes to meet client brief

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD5017 Apply design studio processes to meet client brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD5017B Apply design studio processes to meet client brief

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- confirming specifications of design brief, client needs and objectives and establishing the purpose and parameters of the design with client
- determining target market and preliminary concept options, discussing with client or workplace design team and evaluating options against design brief specifications
- applying principles and elements of design to experiment with design concepts and presenting design concept to client, using client's feedback to modify and improve design
- producing at least three (3) fashion design products or a small range that meets the client design brief specifications and Australian Standards
- presenting finished garment to client, to convey range and style options of design, and seeking client response
- evaluating completed product design and production processes to identify possible improvements
- preparing all relevant documentation and identifying further production and business opportunities.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- aspects of the design process:
 - applying elements and principles of design
 - developing inspiration boards and storyboards
 - assessing fibres and fabrics
 - reviewing relevant products, such as garment sample designs
- design, patternmaking and fashion production tools, equipment and processes:
 - blocks
 - dress form

- scissors
- square rule
- marker pens
- hole punch
- pins
- fashion triangle
- French curve
- pattern notcher
- weights
- tape measure
- characteristics of target market:
 - age
 - gender
 - size and body characteristics
 - economic and social expectations
 - purchase pattern
- communication tools:
 - inspiration board
 - storyboard
 - research information
 - multimedia tools
 - print and audio tools
 - demonstration or exhibition
- communication skills and strategies:
 - effective verbal and non-verbal communication
 - oral, written and visual communication
 - active listening
 - positive language
 - recognising and adapting to cultural differences
 - negotiation and conflict resolution skills
- elements and principles of design and how they are used to create good design in the clothing industry:
 - repetition
 - gradation
 - rhythm
 - radiation
 - harmony
 - contrast
 - dominance
 - proportion

- balance
- unity
- information sources and requirements for design and production
- structural anatomy impacting on design:
- skeletal development
- muscle development
- body morphology:
 - shape
 - form
 - fat distribution
- garment construction
- fabrics, fibres, trims and accessories, and their properties and characteristics
- personnel who can contribute to design brief and studio processes:
 - supervisor
 - trainer/mentor
 - designers
 - patternmakers
 - production supervisors
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in applying design studio processes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills,
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5018 Determine and specify advanced construction processes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5018B Determine and specify advanced construction processes

Application

This unit of competency covers the skills and knowledge required to determine and specify advanced construction processes to achieve desired design details.

The unit of competency applies to design details which achieve specific effects in the production of garments to give a garment a more unique, individual appearance. It also applies to producing samples and developing construction specifications and standard operating procedures (SOPs) to guide the production of garments which incorporate design detail.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

- | | | |
|---|---|--|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | |
| 2 | Produce design details | 2.1 Determine design details and their position on the garment |
| | | 2.2 Prepare artwork/drawings/specifications and any additional documentation in appropriate format |
| | | 2.3 Plan advanced garment construction processes and determine advanced machine or equipment requirements |
| | | 2.4 Select appropriate fabric, components and equipment and use advanced construction processes to produce sample design detail |
| | | |
| 3 | Develop advanced construction process plan | 3.1 Evaluate sample to assess results and modify sample and process plan, as required |
| | | 3.2 Consult with production team to determine requirements and assign tasks according to available expertise and production requirements |
| | | 3.3 Communicate with team members to clarify advanced construction process plan |
| | | 3.4 Analyse design specification sheet, drawings, samples and patterns with team |
| | | 3.5 Apply quality criteria and copyright/intellectual property (IP) obligations |
| | | |
| 4 | Confirm and document | 4.1 Establish relevant technical, monitoring and reporting procedures |

advanced construction process	4.2	Prepare reports and maintain records, as required
	4.3	File and store records according to work procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	<ul style="list-style-type: none"> requirements prescribed by legislation, awards, agreements and conditions of employment SOPs work instructions PPE oral, written and visual communication quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output housekeeping tasks related to environmental protection, waste disposal, pollution control and recycling WHS requirements
Australian Standards include:	<ul style="list-style-type: none"> the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Design details to achieve specific effects include one or more of the following:	<ul style="list-style-type: none"> printing dyeing fraying cutting fabric on bias painting

- beading
- embroidery

Advanced garment construction processes include three or more of the following:

- cut-in and applied pockets and tabs
- contoured and layered insets
- intricate closures and seaming
- requirements of unique fabrics and components
- quilting
- drawn thread work
- applique
- rouleau

Quality criteria include one or more of the following:

- proportion
- perspective
- symmetry and balance
- detailing
- neatness

Machines/equipment include one or more of the following:

- three, four or five thread overlocker
- zigzag sewing machine
- blind hemmers
- buttonholers
- button sewers
- pocket and collaring machines
- elasticators and binders
- printing and stencilling equipment
- hoops
- hand sewing and machine accessories and attachments

Advanced construction process plan includes one or more of the following:

- SOPs
- constraints
- preferred processes
- designs
- advanced construction process
- roles
- schedule/timeframe

Assessment Requirements for MSTFD5018 Determine and specify advanced construction processes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5018B Determine and specify advanced construction processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- developing specifications for at least two (2) design details and the process to achieve them, ensuring copyright and quality criteria are applied
- using required equipment to demonstrate at least three (3) advanced garment construction processes
- developing advanced construction specifications and process plan, including details of advanced machines or equipment
- communicating effectively with construction team to finalise plans and assign tasks for at least two (2) garments with special design effects and advanced construction processes
- documenting processes and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- design details to achieve special effects, such as:
 - printing
 - dyeing
 - fraying
 - cutting fabric on bias
 - painting
 - beading
 - embroidery
- garment construction
- advanced construction processes, such as:
 - cut-in and applied pockets and tabs

- contoured and layered insets
- intricate closures and seaming
- requirements of unique fabrics and components
- quilting
- drawn thread work
- applique
- rouleau
- characteristics of garment fabrics, components and design details
- advanced construction tools and equipment:
 - plain lockstitch sewing machine
 - three, four or five thread overlocker
 - zigzag sewing machine
 - blind hemmers
 - buttonholers
 - button sewers
 - pocket and collaring machines
 - elasticators and binders
 - printing and stencilling equipment
 - hoops
 - hand sewing and machine accessories and attachments
- communication skills and processes
- copyright obligations and codes of practice
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in advanced fashion construction processes at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5019 Analyse individual fit and make pattern alterations

Modification History

Release 1. Supersedes and is equivalent to LMTFD5019B Analyse individual fit and make pattern alterations

Application

This unit of competency covers the skills and knowledge required to analyse the fit of a garment or toile on the individual body, make necessary adjustments and alter the pattern.

The unit of competency applies to fitting a garment or toile, making size and fit alterations on the garment or toile, then transferring these alterations to the pattern.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009 Develop patterns from a block using basic patternmaking principles

MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

- | | | |
|---|---|--|
| 1 | Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | |
| 2 | Assess body characteristics | 2.1 Prepare tools and equipment for altering patterns |
| | | 2.2 Assess body characteristics to identify individual and unique features that may create fit problems |
| | | 2.3 Record information on individual body characteristics and potential fit issues |
| | | |
| 3 | Fit garment or toile on individual | 3.1 Place garment or toile on the individual and check comfort and fit |
| | | 3.2 Reach agreement with individual and make necessary adjustments to garment or toile |
| | | 3.3 Develop work schedule with individual for future and final fittings |
| | | |
| 4 | Make pattern alterations | 4.1 Record details of required alterations and transfer garment or toile alterations to the pattern |
| | | 4.2 Finalise pattern with alterations and check it is accurate, complete and complies with design specifications |
| | | 4.3 Complete pattern specification sheet, attach to pattern for storage and file appropriately |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Body characteristics include one or more of the following:

- genetic, developmental and structural influences
- shape classifications, such as hourglass, rectangular, pear and inverted triangle
- anthropometric classifications (somatotypes)
- shoulder slope (raised, normal and sloping)
- body sway and postural asymmetry (according to lower and upper body)
- proportions (short or long-waisted and mid-body shortness)

Unique body features include

- common postural faults, such as forward head, rounding

- one or more of the following:** of shoulders, anterior/ posterior pelvic tilts, sway back and flat back
- prominent features, such as protruding abdomen, bust or seat
 - spinal and pelvic rotation
 - foot alignment, such as supinated or pronated foot
 - arm types, such as very thin or heavy
 - leg types, such as bow legs or knock knees
 - neck length

Assessment Requirements for MSTFD5019 Analyse individual fit and make pattern alterations

Modification History

Release 1. Supersedes and is equivalent to LMTFD5019B Analyse individual fit and make pattern alterations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- recording information on individual body characteristics and unique features that may create fit problems
- fitting at least two (2) garments or toiles on the individual, checking comfort and fit, and reaching agreement with individual on necessary adjustments to garment or toile
- keeping a record of alterations needed to allow for individual differences, transferring garment or toile alterations to the pattern and producing final adjusted pattern that complies with design specifications
- completing pattern specification sheet, attaching to pattern for storage and filing appropriately.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking principles and practices
- sizing and fitting practices
- tools and equipment for pattern alterations, such as:
 - manual or electronic tape measure
 - image capturing devices
 - pen/pencil
 - measure chart
 - tape, cord or elastic
 - eraser
 - Australian Standard Chart
- structural anatomy impacting on design:
 - skeletal development

- muscle development
- body morphology:
 - shape
 - form
 - fat distribution
- body characteristics
- unique body features
- pattern alterations required to respond to individual differences, such as:
 - skirt:
 - length
 - circumference/width
 - waist and hips
 - full high hips
 - sway back
 - large bottom
 - flat bottom
 - high rounded stomach
 - prominent hip bones
 - bodice:
 - length
 - circumference/width
 - waist
 - bust/bust darts
 - shoulders
 - bottle neck
 - chest
 - back
 - basic fitted dress
 - sleeve:
 - length
 - circumference/width
 - pants:
 - length
 - circumference/width
 - waist and hips
 - full high hips
 - sway back
 - large bottom
 - flat bottom
 - high rounded stomach

- prominent hip bones
- related alterations, such as full stomach/thick front waist, one high hip
- pronounced rounded back/hollow chest
- workplace procedures
- record keeping.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in individual fit and pattern making, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5020 Assess impact of current fashion industry innovations and practices

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to conduct research to determine current industry practices and assess the impact of these on own practice.

Work may be conducted in small to large-scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Review industry trends and assess impacts on practice	1.1	Use research methods to identify key industry organisations and information resources
		1.2	Examine the impact of globalisation on the fashion industry and determine implications for work practice
		1.3	Examine key trends affecting production and work flows

			in the fashion industry and the implications for work practice
		1.4	Examine key trends affecting supply in the fashion industry and the implications for work practice
		1.5	Determine implications for own work
		1.6	Comply with work health and safety (WHS) requirements at all times
2	Analyse supply chain for fashion product or service	2.1	Identify key components of supply chain for product or service
		2.2	Explain concepts of value and identify value added within the supply chain
		2.3	Identify risks within the supply chain
		2.4	Determine implications of extended supply chains on fashion sourcing, production and distribution
		2.5	Determine implications for own work
3	Determine impact of digital processes on production	3.1	Identify digital processes engaged in the design and production of fashion items
		3.2	Identify specialised industry software programs and their use in fashion industry practice
		3.3	Identify other commonly used software programs and their use in fashion industry practice
		3.4	Determine implications for own work
4	Determine impact of digital processes on supply	4.1	Identify digital processes engaged in the supply and distribution of fashion items
		4.2	Determine implications for own work
5	Determine	5.1	Examine sustainability drivers for the fashion industry

implications of sustainability on work practice	5.2	Determine risks and potential sustainability impacts in the fashion industry
	5.3	Identify implications for work practice
	5.4	Identify implications for own work

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Research methods include one of more of the following:

- conduct internet searches
- review journals and books
- follow media reports

- interview stakeholders
- attend meetings and industry forums
- review industry reports and publications
- attend networking events
- attend conferences

Key trends include one or more of the following:

- overseas outsourcing
- customisation
- customer driven
- customer designed
- online markets
- digital and electronic design tools
- digital and electronic production tools
- quality assurance
- intellectual property (IP) protection
- online retail
- sustainability
- outsourcing standards
- customer demand for transparency
- organisational integrity
- collaboration
- other emerging trends impacting the fashion industry

Digital processes used in design and production include one of more of the following:

- laser scanners
- online customising tools
- graphic design software programs
- digital yardage printing
- digital engineered placement printing
- digital software tools used in patternmaking
- digital software tools used in marking
- spreadsheet software
- other industry-focused, electronic design tools

Sustainability drivers include one or more of the following:

- carbon emissions
- environmental impact
- fair work practices
- fair trade
- waste reduction
- pollution and use of toxic chemicals

- sustainable design
- disposal and whole of life impacts
- whole of life impact
- ethical practice
- global impacts
- safe work practices
- use of sustainable materials

Assessment Requirements for MSTFD5020 Assess impact of current fashion industry innovations and practices

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance, criteria and include:

- conducting research using variety of research methods to identify key industry organisations and information resources
- applying relevant standards
- identifying impact of globalisation on the fashion industry and at least two (2) examples that impact on own work practice
- analysing industry information and determining implications for the fashion industry and at least two (2) examples that impact on own work
- determining key trends affecting supply, production and work flows
- analysing fashion industry supply chains, identifying risks and value added
- determining impacts of industry trends on work practice and provide at least two (2) examples that impact on own work
- identifying at least two (2) digital design and production tools and software programs used in the fashion industry and determining impact on work practice and own work
- identifying at least two (2) digital supply and distribution tools and software programs used in the fashion industry and determining impact on work practice and own work
- determining risks and impacts of sustainability drivers on work practice and own work.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- information resources for fashion industry
- relevant Australian Standards
- digital patternmaking and grading processes
- trends and impacts on fashion industry practices
- impact of globalisation on the fashion industry
- key components of supply chain for product or service
- concepts of value in supply chains
- risks within the supply chain
- effect of extended supply chains on fashion sourcing, production and distribution
- digital processes used in supply and distribution, such as:
 - electronic communication systems

- internet search engines
- online shops, retail and wholesale outlets
- e-commerce systems
- e-sourcing systems
- e-procurement systems
- electronic inventory systems
- distribution tracking systems
- specialised industry software programs used in fashion design and production, such as:
 - Gerber Technology
 - Optitex
 - StyleCAD
 - Lectra Systems
 - other fashion design programs
- commonly used software, such as:
 - Adobe Illustrator
 - Adobe Photoshop
 - Adobe InDesign
 - Microsoft Excel
 - other graphics and multimedia programs
- sustainability drivers in the fashion industry
- supply and sustainability risks for the fashion industry.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in current fashion industry practice, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5021 Conduct digital patternmaking and grading

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to use digital technologies to produce patterns and conduct grading for fashion designs.

The unit of competency applies to the use of specialised electronic programs and computing equipment to digitise patterns and access existing pattern block libraries to create and grade pattern styles for a set size range.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with standard SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions
- 2 **Prepare to use electronic design tools**
 - 2.1 Interpret measurements and pattern requirements from technical drawings and specifications sheets
 - 2.2 Identify garment factors that need to be considered
 - 2.3 Select and prepare suitable software programs and computing equipment
 - 2.4 Access and prepare digital working space
- 3 **Digitise and modify patterns**
 - 3.1 Input manual pattern into program
 - 3.2 Prepare final pattern pieces for grading and marking
 - 3.3 Print pattern and assess against design and production specifications
- 4 **Access and modify library patterns**
 - 4.1 Access pattern block from library
 - 4.2 Modify patterns to create design features
 - 4.3 Produce style from block to meet design requirements
 - 4.4 Print pattern and assess against design and production specifications
- 5 **Grade patterns using digital techniques**
 - 5.1 Grade pattern according to sizing system for identified target group
 - 5.2 Check all pattern points in preparation for grading
 - 5.3 Grade block to meet size specifications requirements
 - 5.4 Use block to make pattern and grade

- | | | | |
|---|-----------------------------------|-----|---|
| 6 | Check and finalise pattern | 6.1 | Produce graded pattern |
| | | 6.2 | Assess accuracy and completeness |
| | | 6.3 | Make adjustments or improvements as required |
| | | 6.4 | Create final products and protect, organise and store them according to workplace practices |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Specifications include one of more of the following:

- type of fabric
- width and length of fabric
- size and garment measurements
- pattern details with specific measurements for proportion guidelines
- seam allowance for seams, waist, pocket and hem
- design and make instructions
- base size and size range
- clear, detailed technical drawings

Input manual pattern into program includes the following:

- creating straight and curved seams
- creating extensions for button fastenings
- manipulating darts and edge pivoting to create fullness
- adding simple pleats, tucks and gathers
- creating simple collars
- adding seam and hem allowances to all pattern pieces

Unit Mapping Information

Release 1. New unit

Assessment Requirements for MSTFD5021 Conduct digital patternmaking and grading

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting measurements and pattern requirements from technical drawings and specifications sheets
- identifying garment patternmaking and grading requirements
- selecting appropriate software programs
- inputting manual pattern into digitising program
- accessing pattern block library
- using digital techniques to modify patterns
- using digital techniques to grade patterns according to sizing system for identified target group
- producing graded pattern for at least three (3) items or a small range, such as pants, shirt, bodice, sleeve and skirt
- checking outputs against specifications of design brief and making adjustments according to workplace procedures.
- protecting, organising and storing graded patterns according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, standard operating procedures and safe work practices
- relevant Australian Standards
- principles of design
- use of technical drawings and specifications sheets
- sizing systems for men, women and children
- use of digital programs and computer hardware
- software programs, such as:
 - computer-aided design (CAD)
 - Gerber Technology
 - StyleCAD

- Lectra Systems
- Optitex
- Adobe Illustrator
- use of grade rule libraries
- use of x and y coordinates
- digitised patternmaking tools and procedures
- seams, including:
 - straight seams
 - curved seams
 - waist
 - pocket
 - hem
 - leg
- operating procedures
- garment production requirements
- designs, patterns and production requirements
- quality standards
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in digital pattern making and grading, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5022 Develop digital costing markers

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to use digital technologies for estimating garment yields for costing. It involves translating graded pattern pieces onto a cutting lay plan, to minimise fabric waste and optimise cutting accuracy.

The unit of competency applies to the use of specialised electronic programs and computing equipment to digitise patterns.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD5021 Conduct digital patternmaking and grading

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- requirements**
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions

- 2 **Determine yield from fabric**
 - 2.1 Examine measurements and identify marker requirements from specification
 - 2.2 Determine the impact of fabric features and specifications on marker
 - 2.3 Identify pattern width and size scale and estimate material utilisation
 - 2.4 Select and prepare suitable software programs and computing equipment
 - 2.5 Access pattern/style libraries and enter fabric and sizing information
 - 2.6 Generate an order for pattern/style marker
 - 2.7 Determine optimal layout configuration to minimise fabric waste
 - 2.8 Ensure lay requirements meet design specifications
 - 2.9 Confirm garment yield from fabric

- 3 **Prepare costing markers**
 - 3.1 Generate digital costing marker
 - 3.2 Determine preliminary costing and assess commercial viability of production
 - 3.3 Identify need for and make adjustments to improve viability
 - 3.4 Create marker to maximise utilisation
 - 3.5 Determine piece count, marker length and fabric utilisation

- | | | | |
|---|-------------------------------|-----|---|
| | | 3.6 | Ensure measurements and requested specifications are accurately documented |
| | | 3.7 | Print scaled marker and assess against design and production specifications |
| 4 | Prepare marker for use | 4.1 | Prepare marker for use and determine distribution or storage requirements |
| | | 4.2 | Prepare marker for email distribution |
| | | 4.3 | Store marker according to workplace procedures |
| | | 4.4 | Print scaled marker and prepare for processing |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

- WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Markers include one of more of the following:**
- costing yield markers
 - sample marker
 - volume markers
- Requested specifications include the following:**
- style number
 - required sizes
 - bundle codes
 - piece descriptions
 - spreading instructions
- Fabric specifications include the following:**
- types of fabrics
 - width and length of fabric
 - measurements
 - pattern/style

Assessment Requirements for MSTFD5022 Develop digital costing markers

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying marker requirements
- selecting appropriate software programs
- accessing pattern/style libraries
- preparing order for pattern/style marker
- using digital techniques to determine and modify layout
- determining optimal fabric yield
- using digital techniques to cost fabric
- producing costing markers for at least two (2) complete set of graded patterns
- checking outputs against specifications of brief
- assessing commercial viability of patterns
- storing marker according to workplace procedures
- printing scaled marker and preparing for processing.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying marker requirements
- selecting appropriate software programs
- accessing pattern/style libraries
- preparing order for pattern/style marker
- using digital techniques to determine and modify layout
- determining optimal fabric yield
- using digital techniques to cost fabric
- producing costing markers for at least two (2) complete set of graded patterns

- checking outputs against specifications of brief
- assessing commercial viability of patterns
- storing marker according to workplace procedures
- printing scaled marker and preparing for processing.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in electronic fashion design and costing, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6001 Evaluate commercial viability of designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD6001B Evaluate commercial viability of designs

Application

This unit of competency covers the skills and knowledge required to evaluate the commercial viability of the mass production and sale of fashion designs.

The unit of competency applies to evaluating the ability of fashion design concepts and proposals to assist in achieving business goals and financial targets. Skills covered by this unit are used to assist in making decisions about which fashion designs to select for commercial production and sale.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4004	Calculate cost estimates for fashion products
MSTFD5009	Cost design production

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Determine job requirements from specifications, job sheets or work instructions</p>
2	Prepare to evaluate commercial viability	<p>2.1 Analyse current business plan and identify business objectives and financial targets to review business position</p> <p>2.2 Review business practices, past products and records of commercial success to assess relevance for future developments</p> <p>2.3 Identify workplace criteria for measuring commercial success of products</p> <p>2.4 Identify potential designs and assess their ability to meet client or target market needs and expectations</p> <p>2.5 Analyse costing and production strategies of designs and assess alignment of designs to business goals and practices</p>
3	Select designs for commercial development	<p>3.1 Identify workplace criteria for selection of designs</p> <p>3.2 Analyse designs against selection criteria</p> <p>3.3 Consult senior management in selection of designs</p> <p>3.4 Determine which designs will be developed for commercial production</p>
4	Establish	<p>4.1 Establish financial targets for design production</p>

evaluation mechanism	4.2	Implement monitoring systems to measure progress of design production and return
	4.3	Evaluate design selection against commercial targets
	4.4	Document findings and file according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	<ul style="list-style-type: none"> • requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • PPE • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS requirements
Australian Standards include:	<ul style="list-style-type: none"> • the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Current business practices include one	<ul style="list-style-type: none"> • use of in-house; cut, make and trim (CMT) and offshore production suppliers

or more of the following:

- use of expertise external to organisation
- development of organisational image and market position
- pricing and budget strategies
- marketing and sales strategies

Commercial success criteria include two or more of the following:

- potential financial return
- alignment with business goals and corporate image
- client acceptance
- availability of materials and resources for production
- suitability of production processes
- marketing potential
- place in the market and product life cycle
- production costs and timelines

Assessment Requirements for MSTFD6001 Evaluate commercial viability of designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD6001B Evaluate commercial viability of designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- reviewing business position, business practices, past products and records of commercial success to assess relevance for future developments
- identifying potential designs and assessing their ability to meet client or target market needs and expectations
- analysing costing and production strategies of designs to check if they align to business goals and workplace procedures
- following established communication protocols to consult senior management to select at least two (2) designs that are suitable to be developed for commercial production
- establishing and monitoring financial targets and evaluating design selection process and outcomes against commercial targets
- documenting findings and filing according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- specifications for commercial viability
- relevant Australian Standards
- business goals and strategies
- business practices
- costing and production strategies
- commercial success criteria
- practices and procedures for costing design production
- industry trends and market practices
- financial monitoring system
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in evaluating commercial viability of fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6002 Manage product development of fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD6002B Manage product development of fashion designs

Application

This unit of competency covers the skills and knowledge required to manage the development and production processes for fashion designs.

The unit of competency applies to management of the development of fashion designs to production and completion of final product.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions
- 2 **Prepare to manage product development**
- 2.1 Review organisation systems, processes and outcomes of previous business activities to inform planning
 - 2.2 Identify and confirm design requirements, timelines and budget
 - 2.3 Consult key personnel to assist in production plan development, as required, and identify quality standards
 - 2.4 Use planning techniques and tools to develop production plan and schedule, including critical path, timeline and key outcomes
 - 2.5 Develop design production plan
 - 2.6 Select key personnel and consult with project team to communicate product development requirements
- 3 **Manage product development**
- 3.1 Maintain ongoing communication with team members to ensure all project requirements and quality assurance checks comply with design specifications
 - 3.2 Review problems and advise designer and patternmaker of any revisions and changes to design specifications
 - 3.3 Monitor production process and work flow to ensure efficient production techniques and systems are maintained, and identify process improvements
 - 3.4 Facilitate meetings or discussions to resolve work flow problems, and document and facilitate recommended resolutions
- 4 **Manage process improvement**
- 4.1 Monitor improvements/variations to production to ensure outcome meets specifications and production schedule

- 4.2 Collate and analyse data to evaluate effectiveness of production improvements or variations
 - 4.3 Make decisions on improvements or variations to production within limits of management responsibility
 - 4.4 Monitor costs and identify budget implications of any production changes
 - 4.5 Assemble information on development and assess product outcome against specifications
- 5 **Evaluate and finalise product development**
- 5.1 Identify and evaluate results in consultation with others, as necessary, and draft plans for future action
 - 5.2 Review production outcomes with project team to identify strengths and weaknesses of process
 - 5.3 Determine actual development costs, compare costs to budget estimates and explain inconsistencies
 - 5.4 Consider the impact of costing inconsistencies on product sale cost
 - 5.5 Maintain production and monitoring records and prepare reports where necessary
 - 5.6 Document pattern and design production processes and findings
 - 5.7 Report on production performance and developments according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design requirements include one or more of the following:

- expertise
- human resources
- materials and equipment
- specifications

Key personnel include one or more of the following:

- senior management
- production supervisors
- patternmakers
- fashion designers
- production personnel
- contractors

Critical paths include the following:

- resource availability
- timelines
- achieving delivery
- supply chain
- skill levels
- identifying constraints

- budget constraints
- production turnaround
- logistics (shipping and distribution)
- reporting

Product development requirements include the following:

- assigning tasks according to available expertise and production requirements
- conveying information relating to standards, constraints, preferred processes, designs and techniques to team
- analysing design specification sheet, drawings, samples and patterns with team
- establishing relevant technical, monitoring and reporting procedures
- checking pattern, sizing, materials and construction comply with design specifications

Project requirements include one or more of the following:

- obligations
- quality
- timelines
- budget
- costs
- technical constraints
- compliance with WHS practices

Unit Mapping Information

Assessment Requirements for MSTFD6002 Manage product development of fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD6002B Manage product development of fashion designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading, following and managing compliance with work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- exercising high-level judgement in planning and selecting organisation systems, planning techniques and procedures, project requirements and determining critical paths
- monitoring product development requirements and changes to improve production outcomes for at least two (2) fashion products or a small range
- monitoring production to check quality and efficiency standards and checking compliance with specified design requirements
- communicating effectively with team members and key personnel, identifying problems and encouraging cooperative problem solving
- supporting process improvement and efficient systems to respond to inefficiencies or work flow problems
- reviewing and evaluating development costs, outcomes, causes of differences from budget and implications for product sale costs
- maintaining accurate records of production, monitoring, pattern and design production processes and findings in appropriate formats according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- high-level judgement in planning and selecting appropriate processes or procedures for self and others
- planning techniques and tools, such as:
 - scheduling
 - time management
 - brainstorming
 - setting goals and defined outcomes

- prioritising
- review and evaluation strategies
- process improvement and efficient production techniques/systems, such as:
 - just in time (JIT)
 - VAM systems
 - quick response
 - quality systems
 - team processes
 - benchmarking
- patternmaking principles and processes
- fashion design principles and processes
- planning tools and procedures
- production control and efficiency processes
- quality assurance processes relating to:
 - pattern
 - sizing
 - materials
 - construction
- production processes
- relevant work health and safety (WHS) legislation, Australian Standards, regulatory requirements and codes of practice
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in managing product development, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6003 Manage fashion design process

Modification History

Release 1. Supersedes and is equivalent to LMTFD6003B Manage fashion design process

Application

This unit of competency covers the skills and knowledge required to develop fashion design briefs and manage the development of design concepts for commercial production.

The unit of competency applies to skills associated with guiding the development of fashion product designs to meet client and business goals and strategies. Work may be applied for own processes or to direct activities of others.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions
- 2 **Prepare to manage fashion design process**
- 2.1 Research global fashion trends and identify emerging themes
 - 2.2 Review product range and previous designs developed by the business to assess relevance to current design directions
 - 2.3 Identify business and client goals and relate these to design objectives
 - 2.4 Identify production capacity and processes of the business
 - 2.5 Research key criteria according to the needs of the design
- 3 **Develop and confirm design brief**
- 3.1 Determine key criteria and confirm requirements with client
 - 3.2 Facilitate the development of the design brief so it clearly conveys all guidelines for development of design concepts
 - 3.3 Encourage interchange of ideas and consult design development personnel to confirm design brief is feasible and appropriate
 - 3.4 Use sketches, drawings and samples to illustrate design requirements and finalise design brief
- 4 **Facilitate design process**
- 4.1 Specify design concept development processes
 - 4.2 Specify communication protocols and determine monitoring procedures and checking points
 - 4.3 Identify, select and brief all design development

- personnel required for the design process
- 4.4 Brief design personnel to develop design concepts and monitor development to ensure budget and time constraints are met
 - 4.5 Promote a cooperative approach to identify and address problems or inconsistencies in the development of the design concept
- 5 **Evaluate and finalise design development process**
 - 5.1 Evaluate design concepts against design brief and seek suggestions to modify or improve concepts
 - 5.2 Finalise design concept and gain client 's agreement to develop design
 - 5.3 Evaluate design development processes to assess their effectiveness in achieving design brief
 - 5.4 Document design brief, development processes and outcomes
 - 5.5 File and store documentation according to workplace practices

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs
 - work instructions

- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Key criteria for managing design brief include the following:

- business goals
- quality standards for designs
- target market
- intended uses
- design themes
- style requirements
- budget
- cost points
- timing constraints
- fabrics and materials
- suppliers
- production processes
- marketing materials

Design concept development processes include one or more of the following:

- research
- purchasing trips
- teamwork
- event participation
- attendance at fashion shows
- experimentation with fabrics, materials and designs
- draping
- adaptation of designs
- inspiration boards
- storyboards
- use of models for original creation
- adaptation of designs
- interpretation of sketches within contexts related to single or multiple production styles and ranges

- made-to-measure
- theatre costuming

- Design brief includes one of the following:**
- two or more specialised garments with advanced styling
 - a small range of 3–5 items, including at least one advanced styling garment and one complex garment
 - three or more complex garments
 -

- Specialised garments includes two or more of the following**
- special purpose garments (e.g. wetsuits and corsetry)
 - garments with advanced styling, such as:
 - tailored suit
 - eveningwear
 - bridal wear
 - couture
 - stretch trousers
 - corsetry
 - raglans
 - kimonos
 - overcoats
 - jackets
 - theatrical costumes
 - capes

- Design development personnel include one or more of the following:**
- patternmakers
 - designers
 - design assistants
 - production personnel

Modification History

Release 1. Supersedes and is equivalent to LMTFD6003B Manage fashion design process

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching and generating ideas to generate a design brief for one (1) of the following:
 - at least two (2) specialised garments
 - a small range, of 3–5 items, including at least one (1) specialised garment and one (1) complex garment
 - at least three (3) complex garments
- consulting with team members and facilitating process to determine appropriate concept for development
- coordinating and facilitating development of the design brief so it clearly conveys all guidelines for development of design concepts
- specifying communication protocols, determining monitoring procedures and checking points, and briefing design personnel to develop design concepts
- monitoring development to ensure budget and time constraints are met
- encouraging interchange of ideas/designs, facilitating development of design concepts, and assessing design process and outcomes
- communicating effectively with design and production personnel and client
- evaluating and finalising design concepts and gaining client 's agreement to develop design
- documenting design brief, development processes and outcomes, and filing and storing documentation according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for garment construction
- elements and principles of design and how they are used to create good design in the fashion industry:
 - repetition

- gradation
- rhythm
- radiation
- harmony
- contrast
- dominance
- proportion
- balance
- unity
- fashion industry context, such as codes of practice, and global and local trends
- copyright obligations
- resource sources
- range of typical garment fabrics, including weight and other characteristics
- detailed knowledge of garment construction, marker making and cutting procedures
- detailed knowledge of a range of fabrics
- design concept development techniques and processes:
 - research
 - purchasing trips
 - teamwork
 - event participation
 - attendance at fashion shows
 - experimentation with fabrics, materials and designs
 - draping
 - adaptation of designs
 - inspiration boards
 - storyboards
 - use of models for original creation
 - adaptation of designs
 - interpretation of sketches within contexts related to single or multiple production styles and ranges
 - made-to-measure
 - theatre costuming
- expertise of personnel
- colour/colour mix and interpretation
- properties and characteristics of fabrics, fibres, trims and accessories
- fashion costing processes
- quality criteria and processes
- communication channels and tools:
 - sketches, drawings, illustrations and photographs
 - samples of fabrics and specifications

- written descriptions and rationale
- multimedia forms, such as DVD
- charts, diagrams and specification sheets
- storyboards and inspiration boards
- meetings
- electronic communication tools
- displays, demonstrations and events
- mass media channels
- communication strategies:
 - effective verbal and non-verbal communication
 - oral, written and visual communication
 - active listening
 - positive language
 - recognising and adapting to cultural differences
 - negotiation and conflict resolution skills
- presentation, recording and reporting practices
- workplace procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in managing fashion design process, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6004 Manage advanced patternmaking processes

Modification History

Release 1. Supersedes and is equivalent to LMTFD6004B Manage advanced pattern making processes

Application

This unit of competency covers the skills and knowledge required to manage processes for patternmaking in high-volume production of complex or specialised garments.

The unit of competency applies to the development and implementation of patternmaking plans for complex or specialised production.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4013 Grade 2-D patterns

MSTFD5016 Grade complex patterns

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Manage preparations for patternmaking process**
 - 2.1 Identify patternmaking methodologies
 - 2.2 Analyse critical measurements to derive patterns for unique body shapes, features and specialised garments
 - 2.3 Interpret design brief and specifications
 - 2.4 Determine patternmaking requirements and grading methodologies that will be applied
 - 2.5 Analyse critical paths
 - 2.6 Develop plan for implementing patternmaking process, and manage it according to design requirements

- 3 **Manage development of patterns**
 - 3.1 Make preparations for the development of patterns and present patterns for implementation
 - 3.2 Confirm patterns for sampling and product development
 - 3.3 Implement and monitor all aspects of the patternmaking plan to ensure production and quality meet required standards

- 4 **Review and document patternmaking process**
 - 4.1 Communicate with production team to finalise and assess the patternmaking process against the design brief
 - 4.2 Document all changes to patterns and describe formulas and methods
 - 4.3 Assemble all necessary documentation and prepare reports, where necessary

4.4 Maintain records according to work procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards includes:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Specialised garments includes two or more of the following:

- special purpose garments (e.g. wetsuits and corsetry)
- garments with advanced styling, such as:
 - tailored suit
 - eveningwear
 - bridal wear
 - couture
 - stretch trousers

- corsetry
- raglans
- kimonos
- overcoats
- theatrical costumes
- jackets
- capes

Patternmaking methodologies include one or more of the following:

- block methodologies (national and international)
- computer technologies
- pattern grading
- flat and draped patternmaking methodologies
- marker making

Critical measurements include one or more of the following:

- relevant for block and style development
- relevant for grading
- taken or calculated on the body
- taken or calculated on the garment

Critical paths include one or more of the following:

- resource availability
- timelines
- achieving delivery
- supply chain
- skill levels
- identifying constraints
- budget constraints
- production turnaround
- logistics (shipping and distribution)
- reporting

Monitor patternmaking plan includes one or more of the following:

- monitoring quality work practices
- identifying and rectifying production problems, faults and quality issues
- making changes and adjustments to patterns where necessary
- obtaining sign-off for patterns from authorised personnel
- completing or confirming grades, markers and instructions for manufacture
- managing observance of WHS requirements

- Methods and formulas include one or more of the following:**
- deviations from standard patterns
 - sources of pattern components
 - pattern derivation methods and formulas
 - block construction methods and formulas
 - application of current industry practice

Unit Mapping Information

Assessment Requirements for MSTFD6004 Manage advanced patternmaking processes

Modification History

Release 1. Supersedes and is equivalent to LMTFD6004B Manage advanced pattern making processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting design brief and specifications for two (2) or more two specialised garments
- determining patternmaking requirements and grading methodologies that will be applied, and analysing critical paths
- managing collection of all appropriate data and communicating effectively with others to plan and implement patternmaking process
- implementing and monitoring all aspects of the patternmaking plan to ensure production and quality meet required standards
- communicating with production team to finalise and assess the patternmaking process against the design brief
- documenting all changes to patterns, describing formulas and methods, assembling all necessary documentation and preparing reports, where necessary
- maintaining records according to work procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- industry applications of patternmaking methodologies
- Australian size Standards
- workplace and customer size charts
- patternmaking methodologies:
 - block methodologies (national and international)
 - computer technologies
 - pattern grading
 - flat and draped patternmaking methodologies
 - marker making
- pattern development processes:

- selecting or developing suitable blocks
- selecting or developing suitable style patterns for sampling and production
- selecting or developing grade plans for the range
- confirming specifications for blocks, style patterns and grade plans
- preparing patterns
- communication processes
- cost efficiency in patternmaking
- computer-aided design (CAD) or manual grading systems
- marker making
- relevant work health and safety (WHS) legislation and codes of practice
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in managing advanced pattern making processes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6005 Drape structured over-garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD6005B Drape structured over-garments

Application

This unit of competency covers the skills and knowledge required to perform structured draping for tailored over-garments, such as jackets and overcoats.

The unit of competency applies to work which requires special considerations to fit balance and inter-construction requirements of the jacket as an over-garment. Work includes partial flat pattern construction or blocks to complement the drape, such as with the development of sleeves and collars.

Draping may be for a one-off garment that goes from drape to garment, or a prototype that goes from drape to flat pattern for small volume production. Draping is performed on a body form, such as a mannequin or model.

Work is supervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4021 Drape fabrics to make patterns

MSTFD5012 Perform contour draping

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	Prepare drape structured over-garments	<p>2.1 Select and prepare draping tools and equipment and prepare work area</p> <p>2.2 Select body form that is one size larger than actual size and prepare by applying additional padding required of the design (e.g. shoulder pads)</p> <p>2.3 Mark body reference points with tape on body form</p> <p>2.4 Plot design lines from working drawings onto body form, using narrow tape</p> <p>2.5 Develop working drawings and check measurements</p>
3	Plan drape	<p>3.1 Prepare fabric for draping</p> <p>3.2 Identify requirements for adding ease and for manipulating dart excess</p> <p>3.3 Plan seam position and develop drape plan</p>
4	Perform structured draping operations	<p>4.1 Pin fabric on body, relating reference points and fabric grains</p> <p>4.2 Perform sequential structured draping operations</p> <p>4.3 Remove drape from model</p>

- 4.4 Consult with appropriate personnel, as required, and ensure quality work practices
- 4.5 Finalise drape and direct to next production process

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Structured over-garments include one or more of the following:

- collar
- lining
- creative and intricate styling
- jackets/overcoats with cut-on collars

- jackets/overcoats with set-in sleeves
 - jackets/overcoats with volume-draped panels
 - jackets/overcoats with cut-on sleeves, such as raglans and kimonos
- Fabric includes one or more of the following:**
- fabric of the final garment
 - a fabric that has the same handle or drape
- Prepare fabric for draping includes the following:**
- estimating dimensions of fabric pieces required for drape according to chosen design
 - identifying warp, weft and bias grain of fabric
 - identifying and assessing fabric handling qualities
- Fabric handling qualities include the following:**
- fall
 - stretch
 - stability
 - drape
- Drape plan includes one or more of the following:**
- adding fullness (pleats, tucks and gathers)
 - multiple darts/division of darts
 - symmetric and/or asymmetric design features
 - cowls, twists and knots
- Structured draping operations include:**
- moulding and manipulating fabric on body form according to the design, fit and design schematic
 - adding ease to allow for movement
 - incorporating fullness or volume, if required
 - smoothing and manipulating fabric over contours of over-garments and along sketch design lines
 - forming and pinning darts and seams to create pattern or construct garment
 - draping collars or built-up necklines according to the design
 - partially flat-constructing or designing cut-on or set-in sleeves then placing on the drape
 - pinning reference points
 - incorporating sleeve design into drape
 - preparing front, back and sleeve drapes for truing
 - performing truing

Unit Mapping Information

Assessment Requirements for MSTFD6005 Drape structured over-garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD6005B Drape structured over-garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- plotting design lines from working drawings onto body form, using narrow tape, developing working drawings and checking measurements
- preparing fabric for draping, identifying requirements for adding ease and for manipulating dart excess
- planning seam position and developing drape plan
- pinning fabric on body, relating reference points and fabric grains and performing sequential structured draping operations for a one-off garment that goes from drape to garment, and a prototype that goes from drape to flat pattern for small volume production
- removing drape from model, consulting with appropriate personnel as required and ensuring quality work practices
- finalising drape and directing to next production process.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- principles and concepts of patternmaking
- customer and workplace requirements
- cost efficiency in relation to patternmaking
- range of typical garment fabrics, including weight and other characteristics
- partial flat pattern construction or blocks to complement the drape, such as with the development of sleeves and collars
- design schematics:
 - the design lines as depicted in the fashion illustration
 - design lines transferred onto the dress form using narrow tape
- marker making procedures
- cutting and garment construction

- draping tools and equipment:
 - body form
 - narrow tape
 - shoulder pads
 - tape measure
 - pen/pencil
 - scissors
 - square rule
 - marker pens
 - hole punch
 - pins
 - fashion triangle
 - French curve
 - pattern notcher
 - weights
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in structured draping, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6006 Develop a fashion range

Modification History

Release 1. Supersedes and is equivalent to LMTFD6006B Develop a fashion range

Application

This unit of competency covers the skills and knowledge required to develop and present a fashion range of at least ten items to the client.

This unit of competency applies to design development and presentation of a fashion range based on an occasion, theme or storyline. Design concept development processes will be conducted according to workplace practices and procedures.

The fashion range developed must consist of at least ten garments.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Determine job requirements from specifications, job sheets or work instructions

- 2 **Prepare to develop a fashion range**
 - 2.1 Review and check fashion range development brief and establish parameters of the project
 - 2.2 Clarify roles of the design team and research fashion range trends and relevant information, including availability of materials
 - 2.3 Analyse styles, colours, stories or themes of fashion ranges, and fabric selection availability and performance characteristics
 - 2.4 Identify supply chains for range development
 - 2.5 Obtain profile of target market, identify demographics and purpose of fashion range, and analyse current styles and fashion trends

- 3 **Develop initial concepts**
 - 3.1 Develop concepts to identify range of possibilities
 - 3.2 Prepare a range of storyboard themes related to fabrics, theme, stories and colours
 - 3.3 Plan fashion range accessorising
 - 3.4 Select appropriate concepts for development in consultation with design team

- 4 **Develop fashion range**
 - 4.1 Determine appropriate styles, trims and accessories for target market
 - 4.2 Research and confirm production feasibility
 - 4.3 Prepare artwork and provide drawings, specifications

- and samples in appropriate format, and include any additional documentation required
- 4.4 Prepare fashion range concepts and relevant support materials for presentation according to agreed presentation strategy
- 5 **Cost fashion range**
- 5.1 Check and confirm all items and resources required for range
- 5.2 Calculate accumulated time to ascertain labour cost
- 5.3 Obtain material costs from relevant sources and compare, where necessary, and then calculate total range design costs
- 5.4 Negotiate amendments or modifications to range, as required, to ensure design is within budget
- 6 **Present fashion range**
- 6.1 Prepare materials and equipment to create an effective presentation
- 6.2 Outline features and benefits of designs in a positive manner that encourages approval
- 6.3 Include all development brief and workplace requirements in the presentation
- 6.4 Produce records of sample and range development, including details of style, construction, fabrics, patterns, costs and grading
- 6.5 Include all development brief details and workplace requirements in the presentation
- 6.6 Maintain records, prepare reports and store completed documentation according to work practices

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design brief details for a fashion range include the following:

- occasion, theme or storyline
- garment and range details
- target market
- end uses of product
- cost point
- production requirements
- timelines
- client requirements
- workplace requirements
- quality requirements
- style and feature requirements
- accessories

Parameters of the project include one or more of the following:

- occasion, theme or storyline
- team members
- chain of command

- timelines
- budget constraints
- reporting processes

Relevant information for developing a fashion range includes one or more of the following:

- customer requirements
- work specifications
- fashion reports and trade journals
- stock records
- summaries of materials, labour and overhead costs
- organisation work procedures
- organisational or external personnel
- quality and Australian Standards and procedures

Purpose of fashion range includes one or more of the following:

- occasion
- theme
- style

Prepare artwork includes one or more of the following:

- manually
- computer-aided design (CAD) system

Presentation strategy includes one or more of the following:

- illustrated talk
- digital presentation
- meeting with client
- fashion event
- trade display

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD6006B Develop a fashion range

Links

Assessment Requirements for MSTFD6006 Develop a fashion range

Modification History

Release 1. Supersedes and is equivalent to LMTFD6006B Develop a fashion range

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching fashion range trends and other relevant information and generating ideas in response to a design brief
- developing concepts and storyboard themes, preparing artwork manually or using computer-aided design (CAD) systems, and detailing specifications and other relevant documentation, as required, in appropriate format
- determining appropriate styles, trims and accessories for target market, and researching and confirming production feasibility
- preparing detailed costings sheets, estimating all costs for garments in range and comparing to budget
- preparing and presenting range concepts, including at least ten (10) pieces, that meet all requirements of the design brief, and outlining features and benefits
- creating an effective presentation of the range, including records of sample and range development, details of style, construction, fabrics, patterns, costs and grading, and workplace requirements
- maintaining records, preparing reports and storing completed documentation according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- elements and principles of design and how they are used to create good design in the fashion industry
- fashion industry context, such as:
 - Australian Standards
 - codes of practice
 - global and local trends
 - copyright obligations

- resource sources
- range of typical garment fabrics, including weight and other characteristics
- garment construction, marker making and cutting procedures
- colour/colour mix and interpretation
- properties and characteristics of fabrics, fibres, trims and accessories
- identified demographics:
 - age
 - ethnicity
 - gender
- fashion costing processes
- design costs:
 - time
 - labour
 - materials
 - trims and accessories
 - overheads
 - fabrics
- accessories:
 - hats
 - scarfs
 - jewellery
 - shoes
 - bags
- presentation, recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in developing a fashion range at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6007 Implement specialised patternmaking technologies

Modification History

Release 1. Supersedes and is equivalent to LMTFD6007B Implement specialised pattern-making technologies

Application

This unit of competency covers the skills and knowledge required to analyse and implement specialised patternmaking technologies.

The unit of competency applies to analysing workplace requirements to introduce or upgrade specialised patternmaking technologies, assess and implement appropriate technologies into the workplace, and manage the change process associated with the implementation.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- requirements**
- 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to implement specialised patternmaking technologies**
- 2.1 Analyse and assess patternmaking technologies to prepare for future requirements
 - 2.2 Determine staff skills for implementation of new technologies
 - 2.3 Identify risks and obstacles relating to the proposed change
 - 2.4 Identify changes to current patternmaking principles and practices
 - 2.5 Confirm suppliers of patternmaking technologies and identify the initial and ongoing training and support they will provide
 - 2.6 Develop a patternmaking technology implementation plan, including objectives, timeframes, training and budget
- 3 **Implement patternmaking technologies**
- 3.1 Implement patternmaking technologies and adjust workplace practices according to implementation plan
 - 3.2 Delegate responsibilities and provide learning and development opportunities according to implementation plan
 - 3.3 Develop specifications and workplace practices for block development, patternmaking and pattern grading using the new technology
 - 3.4 Make support available to the workplace affected by implementation of the patternmaking technology
 - 3.5 Ensure WHS is observed during implementation of new technologies

4	Assess and finalise implementation process	4.1	Monitor and supervise implementation of plan to ensure production and quality meet required standards of compliance
		4.2	Identify and rectify any production problems, faults and quality issues, and make changes and adjustments to procedures, where required
		4.3	Maintain records and prepare reports, where necessary
		4.4	Document all processes and technology outcomes and store according to workplace practices

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Assess patternmaking technologies includes one or more of the following:

- identifying and assessing national and international pattern-making technologies
- analysing current workplace applications to assess efficiency and appropriateness of technologies
- conducting software audits
- assessing opportunities for upgrading current technologies
- identifying future and unmet requirements for pattern-making technologies

Patternmaking technologies includes one or more of the following:

- computer-aided design (CAD) systems
- body scanners
- specification and technical drawing software
- grading and size table development software
- 3-D avatars and fitment software
- Icon technology

Software audits include one or more of the following:

- key audits
- systems management audits

New technologies include one or more of the following:

- technology which is new to the workplace
- new aspects of currently used technology (i.e. upgraded technologies)
- hardware or software components

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD6007B Implement specialised pattern-making technologies

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFD6007 Implement specialised patternmaking technologies

Modification History

Release 1. Supersedes and is equivalent to LMTFD6007B Implement specialised pattern-making technologies

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- assessing patternmaking technologies, workplace requirements for new technologies, staff training requirements and risks, and obstacles and challenges relating to the proposed change
- developing a patternmaking technology implementation plan, including objectives, timeframes, training and budget
- managing change and implementation of new patternmaking technologies, and monitoring process to achieve quality and production output requirements, on at least two (2) occasions
- ensuring work health and safety (WHS) practices in work operations and providing support to the workplace affected by implementation of the patternmaking technology
- rectifying any production problems, faults and quality issues and making changes and adjustments to procedures, where required
- maintaining records and preparing reports, where necessary
- document all processes and technology outcomes and storing according to workplace practices.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- change management
- Australian size Standards
- workplace and customer size charts
- patternmaking and the development of a pattern
- cost-efficiency in patternmaking
- patternmaking principles and methodologies
- patternmaking technologies, such as:

- CAD systems
- body scanners
- specification and technical drawing software
- grading and size table development software
- 3-D avatars and fitment software
- icon technology
- grading of patterns
- block construction
- new patternmaking technologies
- relevant work health and safety (WHS) legislation and codes of practice
- problem solving
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in implementing specialised pattern making technologies, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6008 Apply studio processes to create and produce designs for commercial production

Modification History

Release 1. Supersedes and is equivalent to LMTFD6008B Apply studio processes to create and produce designs for commercial production

Application

This unit of competency covers the skills and knowledge required to apply studio processes to identify and explore commercial opportunities for the design and development of fashion designs.

The unit of competency applies to integrating skills across the design and production process, and focuses on the development and production of a fashion design to achieve commercial and design objectives.

Studio processes are to be applied in an iterative manner to accommodate experimentation and continual improvement in order to achieve desired design effects.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|----------|---|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare for commercial design and production | 2.1 | Research national and international fashion trends, production trends and industry practices to guide design directions |
| | | 2.2 | Determine commercial and design objectives of the workplace and analyse commercial success of previous fashion products to assess relevance for design directions |
| | | 2.3 | Conduct and analyse market research to inform development of design directions |
| | | 2.4 | Access and apply information on design techniques and processes used to achieve desired effects, as required throughout design and development processes to improve product |
| 3 | Create design brief | 3.1 | Identify and scope commercial opportunities for fashion designs |
| | | 3.2 | Explore and clarify design directions with appropriate personnel |
| | | 3.3 | Develop design brief as an iterative process to generate ideas and design direction. |
| | | 3.4 | Conduct initial testing with appropriate personnel and market research activities to confirm design brief and specifications for development |

-
- | | | | |
|---|--|-----|---|
| | | 3.5 | Conduct ongoing testing and review design brief through development of sample products |
| 4 | Undertake design and production process | 4.1 | Identify preliminary concept options, discuss with client or workplace design team and evaluate options against design brief specifications |
| | | 4.2 | Apply principles and elements of design to experiment with design concepts |
| | | 4.3 | Use selection processes to evaluate and refine concept options and scope out preliminary design concepts to present to client |
| | | 4.4 | Present design concept to client and apply client's feedback to modify and improve design |
| | | 4.5 | Scope production requirements and make preparations for production |
| | | 4.6 | Identify sequence of operations and complete requirements to develop and confirm design pattern |
| | | 4.7 | Complete required actions to produce finished fashion product |
| 5 | Review design and production processes | 5.1 | Assess finished product against quality criteria, design specifications and design brief |
| | | 5.2 | Evaluate design to identify opportunities for improvement |
| | | 5.3 | Analyse and evaluate production process to identify opportunities for improvement |
| | | 5.4 | Document process and improvements |
| | | 5.5 | Plan to present final product to client or appropriate personnel |
| 6 | Present finished product to client | 6.1 | Prepare finished product for presentation |
| | | 6.2 | Select accessories, fabric examples and components to convey range and style options of design |

- 6.3 Select model, as required
- 6.4 Organise presentation of finished product
- 6.5 Seek client response and assess for improvement possibilities
- 6.6 Assess further production and business opportunities

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Market research includes one or

- analysis of target market characteristics

more of the following:

- sample testing
- discussions with retailers and suppliers
- discussions with staff and management
- review of media portrayals
- review of fashion shows
- review of current pricing strategies and price points of products

Scoping includes one or more of the following:

- target market
- features and benefits
- timing
- economic and social expectations
- scale of production

Appropriate personnel include one or more of the following:

- managers and directors
- trainer/mentor
- designers
- patternmakers
- production supervisors
- business development staff
- marketing and sales staff
- retailers and suppliers
- clients
- end users/target market

Design studio iterative process to develop ideas and design direction includes the following:

- generation
- development
- testing
- analysis
- improvement

Design brief includes one or more of the following:

- two or more specialised garments
- a small range of 3–5 items, including at least one advanced styling garment and one complex garment
- three or more complex garments
-

Selection processes include one or more of the following:

- checking against design brief
- discussing with appropriate personnel
- testing with target market

- testing with production team
- discussing with patternmaker
- testing with sales and marketing professionals

Experiment with design concepts includes one or more of the following:

- scope out preliminary concepts using sketches, illustrations, models, samples, fibres and fabrics
- use selected criteria and processes to evaluate design concepts by self and others
- assess feedback and analysis for potential to improve design concept
- use further experimentation to develop design concepts
- select concepts for presentation and testing with appropriate personnel

Present design concept includes the following:

- using communication tools to present design concept
- emphasising features and benefits of design concepts
- encouraging and promoting acceptance of design concept
- assessing and responding to client response
- modifying design concept and improving where possible

Preparations for production include the following:

- identifying all components required for production
- identifying technical aspects of production
- completing specification sheet to guide production
- identifying and sourcing resources and production requirements
- developing production plan to guide production
- confirming production plan with client

Sequence of pattern operations includes the following:

- selecting pattern base to meet design brief
- modifying pattern base to create patterns that meet design requirements and specifications
- making pattern according to industry standards, including industry markings and lay plans
- creating toile to test accuracy of pattern and design effect
- confirming pattern against design specifications

Produce finished fashion product includes the following:

- preparing workplace according to WHS practices
- preparing materials and resources
- cutting fabric according to pattern directions
- sewing product according to specifications
- finishing product according to specifications

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD6008B Apply studio processes to create and produce designs for commercial production

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTFD6008 Apply studio processes to create and produce designs for commercial production

Modification History

Release 1. Supersedes and is equivalent to LMTFD6008B Apply studio processes to create and produce designs for commercial production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- researching national and international fashion trends, production trends and industry practices, and conducting and analysing market research, to inform development of design directions
- developing design brief for one (1) of the following:
 - two (2) or more specialised garments
 - a small range of 3–5 items, including at least one (1) advanced styling garment and one (1) complex garment
 - three (3) or more complex garments
- developing design brief and iterative process to generate ideas and design direction, and conducting initial testing with appropriate personnel and market research activities to confirm design brief and specifications for development
- identifying preliminary concept options, using selection processes to evaluate and refine concept options, and scoping out preliminary design concepts to present to client
- identifying sequence of operations, developing and confirming design pattern, and completing required actions to produce finished fashion product
- assessing finished product against quality criteria, design specifications and design brief, and identifying opportunities for improvement
- analysing and evaluating production process and documenting process and improvements
- organising presentation to client, including all necessary materials to present fashion product, seek client response and assess future commercial opportunities
- documenting processes and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)

- Australian Standards for patterns and garment construction
- design, pattern making and fashion production tools, equipment and processes
- communication skills and tools
- elements and principles of design and how they are used to create good design in the clothing industry
- information sources and requirements for design and production
- garment construction
- fabrics, fibres, trims and accessories, and their properties and characteristics
- communication tools:
 - inspiration board
 - storyboard
 - research information
 - multimedia tools
 - print and audio tools
 - demonstration or exhibition
- quality criteria:
 - proportion
 - perspective
 - symmetry and balance
 - detailing
 - neatness
- commercial practices in fashion design development
- presentation skills:
 - effective verbal and non-verbal communication
 - active listening
 - use of appropriate communication tools
 - positive language
 - clear statement of main points
 - interpersonal communication skills
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in design studio processes, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD6009 Analyse fashion industry textiles to guide commercial development

Modification History

Release 1. Supersedes and is equivalent to LMTFD6009B Analyse fashion industry textiles to guide commercial development

Application

This unit of competency covers the skills and knowledge required to research and analyse textiles used in the fashion and clothing industries, and make recommendations to guide the commercial development of fashion products.

The unit of competency applies to individuals who need to make recommendations to guide commercial development of materials and products on aspects, such as quality, processing, finish, use, properties or performance. The unit of competency applies to working with raw materials, partially finished and finished fashion products.

Work is performed in line with a broad plan or strategy and workplace practices. Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

| 5 | Evaluate and finalise research into fashion industry textiles | 5.1 | Analyse features and benefits of selected findings |
| | | 5.2 | Analyse disadvantages or risks associated with selected findings |
| | | 5.3 | Develop recommendations on how findings can be used for commercial gain |
| | | 5.4 | Document research findings and recommendations |
| | | 5.5 | Check data for accuracy and relevance, and prepare a report for presentation |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the**
- requirements prescribed by legislation, awards, agreements and conditions of employment
 - SOPs

- following:**
- work instructions
 - PPE
 - oral, written and visual communication
 - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
 - housekeeping
 - tasks related to environmental protection, waste disposal, pollution control and recycling
 - WHS requirements
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Research criteria includes:**
- scope of research
 - required documentation
 - required research verification
 - research methodologies
 - timing
 - commercial constraints or requirements
- Fashion textiles include one or more of the following:**
- natural fibres, such as cotton, wool, silk and linen
 - synthetic fibres, such as polyamide and polyester, acrylic, lycra, rayon and acetate
 - natural and synthetic single-yarn fabrics and blends, including:
 - knitted fabrics, such as weft knits and warp knits
 - woven fabrics, such as plain, twill, satin, dobby, jacquard and pile
 - non-woven fabrics, such as felts, nets, braids, bonded and composite
 - emerging smart fabrics
 - raw materials
 - new and emerging textiles
 - yarn
- Reports include one or more of the following:**
- report format that meets work requirements
 - formal structure with relevant headings
 - report content, including:
 - text

- graphs
- charts
- tables
- diagrams

Assessment Requirements for MSTFD6009 Analyse fashion industry textiles to guide commercial development

Modification History

Release 1. Supersedes and is equivalent to LMTFD6009B Analyse fashion industry textiles to guide commercial development

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- researching textiles used in fashion products to determine properties, qualities, aesthetic and performance characteristics
- investigating new and emerging textiles and textile processing techniques, and global and domestic trends in using textiles for fashion products
- using a range of routine and non-routine tests to gather data on at least ten (10) different textiles, including smart fabrics and new and emerging textiles
- using a range of routine and non-routine tests to gather data on fashion product quality and performance of at least five (5) partially completed or finished fashion products
- analysing features and benefits, disadvantages or risks associated with selected findings
- identifying opportunities and making recommendations on how findings can be used for commercial gain, taking account of intellectual property and ethical practice requirements
- documenting research findings and recommendations, and presenting a report, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- sources of information
- qualities of textiles:
 - firmness
 - softness
 - hand
 - weight
 - grain or gauge
 - drape

- porosity
- covering power
- count
- light penetration
- environmental safety
- range of material for testing:
 - raw materials
 - partially finished fashion products
 - finished fashion products
- performance characteristics of textiles:
 - stretch
 - abrasion
 - wearability
 - absorbency
 - durability
 - elasticity
 - heat sensitivity
 - flammability
 - shrink resistance
 - ease of care
 - drape quality
 - colour fastness
 - creep
 - strength
 - recycling
- commercial relevance or objectives for research
- research methodology
- routine testing procedures:
 - visual checking
 - colour matching
 - weighing
 - height/weight/thickness measuring
 - moisture measuring
 - measuring rubbing fastness
 - stretch
 - wear
 - cracking
 - colour
 - gloss
 - softness

- handle
- texture
- light and colour fastness
- heat fastness
- tensile characteristics
- flexibility
- non-routine testing procedures:
 - tests performed in a laboratory environment to laboratory level standards
 - destructive testing
- relevant work health and safety (WHS) legislation, codes of practice, copyright obligations, policies and procedures
- intellectual property (IP) and ethical practice
- quality practices
- workplace practices
- recording and report writing practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in textile analysis and research for commercial development, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP1001 Embellish footwear

Modification History

Release 1. Supersedes and is equivalent to LMTFP1001B Embellish footwear

Application

This unit of competency covers the skills and knowledge required to embellish footwear using a variety of hand and machine techniques.

The unit of competency applies to work in a supervised environment and is suitable for use in a VET in Schools program or where access to volume production and commercial machines and processes is not an option.

The unit of competency requires the application of skills associated with problem solving and planning and organising to prepare for and undertake embellishment of footwear. Ability to use simple technology will also be required. Self-management skills are required to meet quality standards.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | |
|--|-----|--|
| requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 Prepare to embellish footwear | 2.1 | Select footwear and type of embellishment |
| | 2.2 | Determine embellishment specifications |
| | 2.3 | Identify methods of embellishing by hand or machine and determine sequencing of operations |
| | 2.4 | Identify and prepare required materials, tools and equipment |
| | 2.5 | Set up work area and seating according to WHS practices |
| 3 Embellish footwear | 3.1 | Embellish footwear by hand or machine |
| | 3.2 | Use and maintain tools and equipment according to WHS practices |
| | 3.3 | Identify any faults and take appropriate action to comply with quality standards |
| | 3.4 | Finish footwear according to specifications and workplace procedures |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Types of embellishment include three or more of the following:

- decorative finishes that add to the design and create features, such as:
 - buttons
 - sequins
 - rhinestones
 - diamantes
 - bows
 - buckles
 - puff paint
 - punch work on leather
 - feathers

Specifications include one or more of the following:

- size, including length and width
- colour
- stitch type and size
- types and use of adhesives

Materials include one or more of the following:

- adhesives, such as:
 - polyurethane adhesives

- solvent-based spray finishes
- fabrics, such as satin, silk, taffeta and lace
- ribbons
- beads
- buckles
- leather

Finishing includes one or more of the following:

- trimming loose threads
- checking
- spraying
- cleaning
- polishing
- hand or machine sewing buckles
- inserting heel cushion pads
- attaching labels
- pairing up
- boxing

WHS practices

WHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, including one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other WHS practices relevant to the job and enterprise

Assessment Requirements for MSTFP1001 Embellish footwear

Modification History

Release 1. Supersedes and is equivalent to LMTFP1001B Embellish footwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- identifying materials and specifications to embellish footwear
- sequencing embellishment operations
- embellishing footwear using at least three (3) types of embellishment according to specifications
- using materials, tools and equipment safely and according to workplace procedures
- checking and rectifying faults
- finishing footwear and checking embellishment meets quality standards.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- materials used, including fabrics adhesives, solvents, abrasives and safety requirements for their use
- embellishment tools and equipment:
 - cutting board
 - scissors
 - knives
 - sewing machines
 - paintbrushes
 - hole punches
 - leather tool making equipment
- types of embellishment
- finishing procedures
- quality standards and practices
- component handling procedures
- workplace procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in embellishing footwear, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2001 Identify materials used in footwear production

Modification History

Release 1. Supersedes and is equivalent to LMTFP2001B Identify materials used in footwear production

Application

This unit of competency covers the skills and knowledge required to identify and describe materials used in the production of footwear.

The unit of competency applies to identifying a range of materials used in the footwear industry and their uses. Materials include natural and synthetic materials, adhesives and components.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------------|-----|---|
| 1 | Identify characteristics of | 1.1 | Identify types and sources of materials used in footwear production |
|---|------------------------------------|-----|---|

footwear materials	1.2	Identify characteristics and uses of materials
	1.3	Identify handling and care requirements for materials
	1.4	Identify work health and safety (WHS) practices and workplace procedures relevant to materials uses
	1.5	Identify generic and trade names for materials
2 Identify performance of materials for footwear	2.1	Distinguish physical properties and performance characteristics of various materials
	2.2	Identify common faults, problems and surface defects of materials
	2.3	Identify workplace quality practices relating to faults, problems and surface defects
	2.4	Identify types of surface finishes used on materials
	2.5	Identify workplace quality practices relating to faults, problems and surface defects.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for

maintenance of own work quality and contribution to quality improvement of team or section output

- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include: • the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Leathers include five or more of the following:

- calf
- cow hide
- kid
- goat
- buffalo
- kangaroo
- reptile
- sheep
- ostrich
- emu
- pig

Adhesives include five or more of the following:

- polyurethane adhesives
- rubber cement
- methyl ethyl ketone
- halogenation solvent
- dichloromethane
- petrol
- methylated spirits
- solvent-based spray finishes
- solvent-based emulsions

Other materials include five or more of the following:

- satin
- silk
- taffeta
- rubber
- cork
- metal
- synthetics
- thermo plastic rubber

- Characteristics include one or more of the following:**
- stretch
 - size
 - grain
 - nap
 - substance
 - properties and uses of different types of hides and leathers
 - hair follicle patterns of leather

- Performance characteristics include one or more of the following:**
- stretch
 - abrasion
 - wearability
 - absorbency
 - durability
 - elasticity
 - heat sensitivity
 - shrink resistance
 - strength

- Faults, problems or defects include one or more of the following:**
- marks
 - scars
 - cuts

Assessment Requirements for MSTFP2001 Identify materials used in footwear production

Modification History

Release 1. Supersedes and is equivalent to LMTFP2001B Identify materials used in footwear production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- identifying at least five (5) different leather materials used within footwear industry
- identifying at least five (5) different adhesives and chemicals used within footwear industry
- identifying at least five (5) examples of non-leather materials used for footwear
- identifying characteristics of at least five (5) footwear materials and their handling and care requirements
- distinguishing performance of footwear materials
- identifying finishing practices for footwear materials
- identifying common faults, problems and surface defects of footwear materials and how to deal with them
- recognising quality features of footwear materials.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- types of leather used in footwear production
- handling procedures for materials
- characteristics and performance of leathers, fabrics use and other materials used in footwear industry
- common faults, problems and surface defects of footwear materials, and how to deal with them
- workplace procedures required for working with footwear materials
- quality standards for footwear materials.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in identifying materials used in footwear production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2002 Perform stuff cutting

Modification History

Release 1. Supersedes and is equivalent to LMTFP2002B Perform stuff cutting

Application

This unit of competency covers the skills and knowledge required to assess and cut different qualities and types of materials.

The unit of competency applies to the assessment and cutting of various materials to specifications and workplace quality standards using limited discretion, initiative and judgement, and working to defined procedures and methods on the job in own work.

It involves stuff cutting operations using a range of materials, including ethylene-vinyl acetate (EVA) foam, fibreboard, resin and synthetics. It requires some work positioning assisted by machine guide or work marker.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| | | | |
| 2 | Prepare to cut stuff | 2.1 | Set up workstation to reflect specifications and to achieve operator comfort and minimise fatigue |
| | | 2.2 | Clean and maintain machines and cutting board and check for irregularities |
| | | 2.3 | Regularly check striker plate for distortion and damage and report irregularities. |
| | | 2.4 | Assess materials and grade against specifications |
| | | 2.5 | Check various types and finish of synthetics and fabrics according to work ticket |
| | | 2.6 | Sort materials according to colour, shade and specifications |
| | | | |
| 3 | Cut materials | 3.1 | Use knives and patterns to gain optimal materials use against workplace quality standards |
| | | 3.2 | Start up and shut down machines according to safety regulations |
| | | 3.3 | Select knives according to job specifications and size requirements and use according to WHS practices |
| | | 3.4 | Adjust pressures on press to knife size and shape |
| | | 3.5 | Cut parts to workplace quality standards in relation to material flaws |
| | | 3.6 | Select individual pairs and colour and grain match to workplace quality standards |

		3.7	Cut pairs to achieve best yield according to appropriate allowance
		3.8	Identify distortions and defects on press cutting knives, dies and cutting boards and take appropriate action
4	Check finished product	4.1	Check finished product against workplace quality standards
		4.2	Record faults
		4.3	Maintain work records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

Assessment Requirements for MSTFP2002 Perform stuff cutting

Modification History

Release 1. Supersedes and is equivalent to LMTFP2002B Perform stuff cutting

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing operations
- applying cutting techniques to at least five (5) different footwear materials
- operating cutting machines and using cutting boards with a variety of footwear materials
- obtaining maximum yield and achieving workplace quality standards
- undertaking general maintenance of machines
- meeting work specifications and applying workplace procedures
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- range of footwear materials, including ethylene-vinyl acetate (EVA), foam, fibreboard, resin and synthetics
- range of fabrics and their directional strength and stretch
- relevant machines and principles in use of cutting boards
- materials flaws of leather, including veins, growth marks, ticks and scars
- quality standards and practices
- safety and environmental aspects of relevant product assembly processes
- WHS practices, including hazard identification and control measures
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in performing stuff cutting, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2003 Cut printed materials by machine

Modification History

Release 1. Supersedes and is equivalent to LMTFP2003B Cut printed materials by machine

Application

This unit of competency covers the skills and knowledge required to cut uniform synthetics and printed leathers using machines, knives and interlocking knives.

The unit of competency applies to cutting uniform leather or synthetic materials that have been treated or printed to achieve a uniform finish, and to meet specifications and workplace quality standards. It involves the limited application of discretion, initiative and judgement while working to defined procedures and methods.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- | | | | |
|---|---|-----|--|
| | requirements | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to cut printed materials by machine | 2.1 | Prepare workstation and work before commencing operations |
| | | 2.2 | Assess materials against job specifications |
| | | 2.3 | Check various types and finishes of materials according to work ticket |
| | | 2.4 | Sort materials according to colour and shade and other specifications |
| 3 | Carry out minor maintenance safely | 3.1 | Start up and shut down machines according to safety regulations |
| | | 3.2 | Regularly clean cutting board, turn and maintain |
| | | 3.3 | Regularly check striker plate for distortion and damage and report irregularities |
| 4 | Cut linings and components from materials by press or hand | 4.1 | Select knives according to job specifications and size requirements and use according to WHS practices |
| | | 4.2 | Adjust pressures on press to knife sizes and shapes |
| | | 4.3 | Follow work ticket specifications according to pairs and pieces |
| | | 4.4 | Cut parts to workplace quality standards in relation to material flaws |
| | | 4.5 | Select individual pairs, colour and grain match to workplace quality standards |
| | | 4.6 | Cut pairs to achieve best yield according to appropriate allowance |

		4.7	Identify distortions and defects on press cutting knives, dies and cutting boards, and take appropriate action
5	Check finished product	5.1	Check finished product against workplace quality standards
		5.2	Address faults
		5.3	Maintain required records of work

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include one or more of the following:

- swing beam press
- full beam press
- travelling head press
- automated press

Knives include one or more of the following:

- clicking knives
- cutting knives
- interlocking knives

MSTFP2004 Cut non-printed leather by machine

Modification History

Release 1. Supersedes and is equivalent to LMTFP2004B Cut non-printed leather by machine

Application

This unit of competency covers the skills and knowledge required to cut non-uniform and non-printed leathers using machines, knives and interlocking knives.

The unit of competency applies to the cutting of irregular and non-uniform leather materials leather that is printed, oily-finished, raw surfaced or non-uniform in texture and finish, to meet specifications and workplace standards. It involves the application of discretion, initiative and judgement while working to defined procedures and methods.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

1	Determine job	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with standard operating procedures (SOPs)
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare to cut non-printed leather	2.1	Prepare workstation and work before commencing operations
		2.2	Assess materials against job specifications
		2.3	Check various types and finishes of materials according to work ticket
		2.4	Handle and visually inspect materials, sort according to colours, shades and finish, and store materials that cannot be matched
3	Carry out minor maintenance safely	3.1	Start up and shut down machines according to safety regulations
		3.2	Regularly clean cutting board, turn and maintain
		3.3	Regularly check striker plate for distortion and damage and report irregularities
4	Cut linings and components from materials by press or hand	4.1	Select knives according to job specifications and size requirements and use according to WHS practices
		4.2	Adjust pressures on press to knife sizes and shapes
		4.3	Follow work ticket specifications according to pairs and pieces
		4.4	Cut parts to workplace quality standards in relation to materials flaws and acceptable levels of matching of irregular and non-uniform finishes
		4.5	Make decisions about individual pairs based on colour and grain approximation according to workplace quality standards

- | | | | |
|---|-------------------------------|-----|--|
| | | 4.6 | Cut pairs to achieve best yield according to appropriate allowance and best matching of materials |
| | | 4.7 | Identify distortions and defects on press cutting knives, dies and cutting boards, and take appropriate action |
| 5 | Check finished product | 5.1 | Check finished product against workplace quality standards |
| | | 5.2 | Take necessary action to address failure to meet quality standards, according to workplace procedures |
| | | 5.3 | Maintain required records |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

MSTFP2005 Operate machine to sew upper

Modification History

Release 1. Supersedes and is equivalent to LMTFP2005B Operate machine to sew upper

Application

This unit of competency covers the skills and knowledge required to align and sew uppers.

The unit of competency applies to loading, guiding and unloading machines to sew shoe uppers. Sewing involves basic sewing techniques, such as sewing in straight lines and using one type of material.

Basic sewing techniques include using manual and computerised sewing machines where the positioning of the work may be controlled by machine guide or work marker, and where there is uncomplicated feeding of material.

Work is conducted according to defined procedures and methods.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|--|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to sew upper | 2.1 | Check work bundle, assess quality of component parts and lay out work pieces in correct sequence |
| | | 2.2 | Set up workbench and seating to achieve operator comfort and minimise fatigue |
| | | 2.3 | Clean and check machine, and adjust machine settings according to manufacturer instructions and specifications for work |
| | | 2.4 | Select threads according to specifications, check needle types and attachments, and change parts and worn needles as necessary |
| | | 2.5 | Set stitch length, set up tension and test against specifications |
| | | 2.6 | Test machine for correct operation |
| 3 | Perform machine sewing | 3.1 | Select pieces according to size, colour and style |
| | | 3.2 | Accurately position materials and sew uppers to achieve required specifications |
| | | 3.3 | Machine seams to achieve specific results and trim threads |
| | | 3.4 | Regularly check performance of machine for signs of faulty performance and take follow-up action to address faulty machine performance |

4	Conduct final quality check and despatch work	4.1	Check final product to ensure workplace quality requirements are met
		4.2	Address production faults according to workplace procedures
		4.3	Bundle uppers, stack and store or despatch
		4.4	Record production faults as required
		4.5	Complete work records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards

- the relevant industry or Australian Standards that are

include: current at the time this unit is being undertaken

- Operations include:**
- lining stitching
 - back seaming
 - binding
 - bar tacking

Assessment Requirements for MSTFP2005 Operate machine to sew upper

Modification History

Release 1. Supersedes and is equivalent to LMTFP2005B Operate machine to sew upper

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing operations
- checking work against ticket information, quality requirements and workplace procedures
- handling, receiving and assembling uppers
- applying machining techniques on at least five (5) upper pairs
- operating at least one (1) type of machine where the positioning of the work is controlled by machine guide or work marker
- monitoring machine performance
- taking appropriate action to address faults
- packing, storing and despatching work according to workplace procedures
- applying work health and safety (WHS) practices in work operations
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- machining techniques where the positioning of the work may be controlled by machine guides or work markers or where there is uncomplicated feeding of material
- machine operating procedures
- characteristics of typical leathers, fabrics, threads and other materials used in assembly and machining of uppers
- signs of faulty performance and appropriate actions to redress faults
- quality standards and practices
- handling, storage and despatch practices
- WHS and environmental aspects of relevant upper assembly and machining processes
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in operating machine to sew upper, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2006 Machine upper according to product requirements

Modification History

Release 1. Supersedes and is equivalent to LMTFP2006B Machine upper according to product requirements

Application

This unit of competency covers the skills and knowledge required to machine uppers according to product requirements.

The unit of competency applies to loading, guiding and unloading a range of machine types to sew shoe uppers. It includes guided and freehand sewing. Sewing includes corners, curves, complex shapes, and contouring and joining of different materials. Sewing techniques include those where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, or involving the special handling skills required to accommodate variations in materials and meet product requirements.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFP2005 Operate machine to sew upper

Competency Field

Footwear production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Prepare to sew upper | 2.1 | Check work bundle, assess quality of component parts and lay out work pieces in correct sequence |
| | | 2.2 | Set up workbench and seating to achieve operator comfort and minimise fatigue |
| | | 2.3 | Clean and check machine, and adjust machine settings according to manufacturer instructions and specifications for work |
| | | 2.4 | Select threads according to specifications, check needle types and attachments, and change parts and worn needles as necessary |
| | | 2.5 | Set stitch length, set up tension and test against specifications |
| | | 2.6 | Test machine for correct operation |
| 3 | Perform machine sewing | 3.1 | Select pieces according to shape, size, colour and style |
| | | 3.2 | Accurately position materials to achieve required specifications, including quality and to minimise stretch |
| | | 3.3 | Sew corners, curves, complex shapes, and contouring and joining of different materials |
| | | 3.4 | Handle work pieces involving discretionary changes, contouring or critical stopping points and variations in materials, according to specifications and workplace |

		procedures
	3.5	Machine seams to achieve specific results and trim threads
	3.6	Regularly check performance of machine for signs of faulty performance and take follow-up action to address faulty machine performance
4	Conduct final quality check and despatch work	4.1 Bundle uppers and component parts, stack and store or despatch
		4.2 Address production faults according to workplace procedures
		4.3 Bundle uppers, stack and store or despatch
		4.4 Record production faults as required
		4.5 Complete work records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output

- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Operations include one or more of the following:

- lining stitching, back seaming, binding and bar tacking
- guided and freehand sewing
- working with a range of materials and shapes

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFP2006B Machine upper according to product requirements

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTFP2006 Machine upper according to product requirements

Modification History

Release 1. Supersedes and is equivalent to LMTFP2006B Machine upper according to product requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing operations
- checking work against ticket information, quality requirements and workplace procedures
- loading, guiding and unloading one or more types to sew shoe uppers
- applying machining techniques on at least (5) five upper pairs, involving sewing corners, curves, complex shapes, and contouring and joining of different materials
- operating one (1) or more of relevant machines in the workplace
- monitoring machine performance
- taking appropriate action to address faults
- packing, storing and despatching work according to workplace procedures
- applying work health and safety (WHS) practices in work operations
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- one or more of relevant machines in the workplace
- the loading, guiding and unloading techniques of a range of machine types to sew shoe uppers
- upper assembly processes and machines requiring the positioning, feeding and handling of work pieces
- techniques for accurately sewing complex shapes, around corners, curves and contouring
- guided and freehand sewing procedures for the range of relevant machines
- machine operating procedures
- characteristics of typical leathers, fabrics, threads and other materials used in basic assembly and machining of uppers

- signs of faulty performance and appropriate action to redress faults
- quality standards and practices
- handling, storage and despatch practices
- WHS and environmental aspects of relevant upper assembly and machining processes
- workplace procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in machining uppers, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2007 Last shoe by machine

Modification History

Release 1. Supersedes and is equivalent to LMTFP2007B Last shoe by machine

Application

This unit of competency covers skills and knowledge required to last shoes.

The unit of competency applies to the lasting shoes using machine operations which may involve more than one type of machine, operation or process to meet product specifications. It includes the limited use of discretion, initiative and judgement for setting and adjusting machines to meet specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare to last shoe by machine**
- 2.1 Check work bundle, assess quality of component parts and lay out work pieces in correct sequence
 - 2.2 Set up workbench and seating to achieve operator comfort and minimise fatigue
 - 2.3 Clean and check machine, and adjust machine settings according to manufacturer instructions, operator skill and specifications for work
 - 2.4 Make adjustments to machine in relation to heat, pressure for pulling and for lasting time, and monitor lasting machine for correct operations
- 3 **Perform lasting process**
- 3.1 Position upper precisely on machine and guide through pulling and lasting operations
 - 3.2 Check correct operations and adjust settings to obtain specified quality outcomes and to reflect construction techniques
 - 3.3 Monitor lasting machine for correct operations
 - 3.4 Check performance of machine for signs of faulty operations and address faults according to workplace procedures
- 4 **Conduct final quality check and despatch work**
- 4.1 Assess completed work against quality specifications
 - 4.2 Bundle work, stack and store or dispatch.
 - 4.3 Record production faults, as required
 - 4.4 Complete work records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include one or more of the following:

- toe laster
- side laster
- seat laster
- seat and side laster
- forepart laster
- force lasting machine

Unit Mapping Information

Assessment Requirements for MSTFP2007 Last shoe by machine

Modification History

Release 1. Supersedes and is equivalent to LMTFP2007B Last shoe by machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing operations
- checking work against ticket information, quality requirements and workplace procedures
- operating lasting machine and setting machine to meet production requirements
- positioning upper precisely on machine and guiding through pulling and lasting operations
- making adjustments to machine in relation to heat, pressure for pulling and for lasting time, and monitoring lasting machine for correct operations
- operating more than one (1) type of machine or operating a complex machine or process to create at least five (5) lasts
- monitoring machine performance and product quality
- taking appropriate action to address machine faults and product quality
- packing, storing and despatching work according to workplace procedures
- applying work health and safety (WHS) practices in work operations
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- machine operations requiring the positioning, feeding and handling of work pieces
- procedures for single or multiple machine operations and processes
- characteristics of typical leathers and how to make allowances for variations
- signs of faulty performance and appropriate action to redress faults
- quality standards and practices
- handling, storage and despatch practices
- safety and environmental aspects of relevant lasting processes
- workplace procedures
- recording and documentation practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in lasting shoes by machine, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2008 Perform moulding operations

Modification History

Release 1. Supersedes and is equivalent to LMTFP2008B Perform moulding operations

Application

This unit of competency covers the skills and knowledge required to perform moulding operations.

The unit of competency applies to the preparation, operation, monitoring and adjusting of moulding machines used to mould and attach soles to footwear.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Set up and load moulding machine**
 - 2.1 Adjust machine settings to meet product requirements
 - 2.2 Check sole moulds and set according to manufacturer specifications
 - 2.3 Check mould size, type and date stamp, and load lasted uppers onto machine
 - 2.4 Prepare mould material, moulding tools and equipment and check for production
 - 2.5 Report non-conforming materials
 - 2.6 Clean area around machine during and on completion of setting and loading
- 3 **Operate and monitor moulding machine**
 - 3.1 Start up and shut down machine according to manufacturer requirements
 - 3.2 Monitor machine operation to ensure correct procedures are assessed and product meets quality standards
 - 3.3 Perform checks to ensure required flow of moulding material and report non-conforming product
 - 3.4 Sort waste and clean machine when required
 - 3.5 Identify minor product process and machine faults and address to meet specified requirements
 - 3.6 Report major machine or product faults
- 4 **Conduct final quality check and complete records**
 - 4.1 Check moulded sole against quality standards
 - 4.2 Unload footwear from moulding machine according to manufacturer specifications
 - 4.3 Complete cleaning of area to ensure work environment

is maintained in a safe and productive manner

4.4 Complete production records and other documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Mould material includes one or more of the following:

- PVC
- rubber
- polyurethane
- dual density polyurethane
- thermoplastic polyurethane

Moulding tools and equipment include one or more of the following:

- Allen keys
- soft-faced mallet
- spanners
- gloves
- punch
- apron
- tape
- shaping block

Checks include the following:

- pigment tanks are full and stirred
- heads are clear and greased
- mould release tanks are full
- electrostatic wire is clean
- nozzle caps are in good condition

Assessment Requirements for MSTFP2008 Perform moulding operations

Modification History

Release 1. Supersedes and is equivalent to LMTFP2008B Perform moulding operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking machine settings and preparing moulding materials to meet production requirements
- operating and monitoring moulding machine involving defined procedures and methods for at least five (5) footwear items
- making minor adjustments as required to meet quality standards
- checking product samples against standards
- identifying and addressing minor product process and machine faults to meet specified requirements
- reporting major machine or product faults
- loading and unloading products according to workplace procedures
- completing records accurately and completely.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- procedures and guidelines for safe operation of moulding machine
- typical fault conditions and related fault-finding procedures
- machine maintenance and repair techniques
- technical specifications manuals
- signs of faulty performance and appropriate action to address faults
- typical moulding tools, equipment and materials
- quality standards and practices
- work health and safety (WHS) and environmental aspects of relevant moulding processes
- workplace procedures
- recording and documentation practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in performing moulding operations, at least to the level being assessed, with relevant industry knowledge and experience.

MSTFP2009 Perform footwear finishing operations

Modification History

Release 1. Supersedes and is equivalent to LMTFP2009B Perform footwear finishing operations

Application

This unit of competency covers the skills and knowledge required to perform footwear finishing operations.

The unit of competency applies to activities associated with completing a sequence of finishing operations on footwear. Finishing operations may include hand or machine tasks, such as attaching buckles, cutting loose threads, lacing shoes, inserting heel pads, attaching labels, polishing, cleaning, spraying, boxing and despatching.

Work performed may require some decision making within defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Finishing operations include three or more of the following:

- trimming loose threads
- checking
- spraying
- cleaning
- polishing
- hand or machine sewing buckles
- attaching accessories or trims
- inserting heel cushion pads
- flaring
- lining trimming
- attaching labels
- pairing up
- boxing
- despatching

Assessment Requirements for MSTFP2009 Perform footwear finishing operations

Modification History

Release 1. Supersedes and is equivalent to LMTFP2009B Perform footwear finishing operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing and maintaining work area, as required
- attaching correct components to footwear
- completing finishing operations according to workplace procedures for at least five (5) sets of footwear
- ensuring finished footwear meets quality specifications
- addressing faults appropriately
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of typical materials used in footwear production and finishing
- quality standards and practices
- required finishing procedures
- industry and product processes and equipment
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in performing footwear finishing operations, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFP2010 Repair footwear product

Modification History

Release 1. Supersedes and is equivalent to LMTFP2010B Repair footwear product

Application

This unit of competency covers the skills and knowledge required to repair footwear products.

The unit of competency applies to repairing footwear products at different stages of production to meet quality standards. Repair includes removing and replacing incorrectly fitted sole, trimming excess materials, correcting stitching and trims, and removing rough surfaces. It involves the use of discretion, initiative and judgement in own work.

The unit of competency may include minor machine and tool maintenance applicable to the repair task.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Footwear production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
 - 1.1 Follow standard operating procedures (SOPs)
 - 1.2 Comply with work health and safety (WHS) requirements at all times
 - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
 - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

- 2 **Prepare to repair footwear products**
 - 2.1 Inspect footwear product and determine areas requiring repair, and deviations from job specifications and quality standards
 - 2.2 Document specifications for repair task and plan repair work according to workplace procedures and time and resources available
 - 2.3 Assemble machinery, equipment, tools and materials required for repair task and check they comply with specifications
 - 2.4 Conduct minor maintenance to address any faults in equipment or tools, to ensure they are ready to use, or refer to appropriate personnel

- 3 **Undertake repair**
 - 3.1 Undertake repair to restore footwear to standard specified using a range of techniques and materials and according to WHS practices
 - 3.2 Check footwear product against specifications and appropriate quality standards and make adjustments, as required
 - 3.3 Once adjustments are made, return footwear product to production line, prepare for storage or transfer to appropriate work section, as required
 - 3.4 Complete paperwork and documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Quality standards include one or more of the following:

- product designs and patterns
- job cards
- worksheets
- job specifications

Preparation for repair includes one or more of the following:

- unpicking stitching, ungluing or removing bonding
- roughening surfaces using grinders and/or abrasives
- removing rough or loose materials
- removing sole

Assessment Requirements for MSTFP2010 Repair footwear product

Modification History

Release 1. Supersedes and is equivalent to LMTFP2010B Repair footwear product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance, criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- assessing products for repair
- repairing at least five (5) products to optimum condition
- performing a range of repair techniques to the required industry standard
- using one (1) or more machine or hand technique appropriate to the repair task
- checking repair against quality standards
- applying workplace procedures
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- footwear production processes
- characteristics of materials used in product construction
- appropriate repair techniques and their application
- hand and machine tools, equipment and materials for footwear repair
- quality standards and practices
- workplace procedure
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in repairing footwear, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
