MST Textiles, Clothing and Footwear

Release 2.1

CONTENTS

MST Textiles, Clothing and Footwear 24
MST20116 Certificate II in TCF Production Support 25
MST20216 Certificate II in TCF Production Operations 32
MST20316 Certificate II in Leather Production 40
MST20416 Certificate II in Laundry Operations 44
MST20519 Certificate II in TCF Services and Repair 48
MST20616 Certificate II in Applied Fashion Design and Technology 53
MST30116 Certificate III in Clothing and Textile Production 58
MST30216 Certificate III in Manufactured Textile Products 66
MST30316 Certificate III in Millinery 71
MST30416 Certificate III in Footwear 75
Release 2. Supersedes and is equivalent to MST30416 Certificate III in Footwear (Release 1) 75
Release 2. Supersedes and is equivalent to MST30416 Certificate III in Footwear (Release 1) 79
MST30516 Certificate III in Leather Production 80
MST30616 Certificate III in Laundry Operations 85
MST30719 Certificate III in Dry Cleaning Operations 90
MST30819 Certificate III in Applied Fashion Design and Technology 94
MST40119 Certificate IV in Textile Design, Development and Production 102
MST40219 Certificate IV in Clothing Production 108
MST40316 Certificate IV in Custom-Made Footwear 114
Release 2. Supersedes and is equivalent to MST40316 Certificate IV in Custom-Made Footwear (Release 1) 114
Release 2. Supersedes and is equivalent to MST40316 Certificate IV in Custom-Made Footwear (Release 1) 119
MST40416 Certificate IV in Millinery 120
MST40519 Certificate IV in Applied Fashion Design and Merchandising 125
MST50119 Diploma of Applied Fashion Design and Merchandising 132
MST50219 Diploma of Textile Design and Development 141
MST60119 Advanced Diploma of Applied Fashion Design and Merchandising 146
MST60219 Advanced Diploma of Textile Design and Development 155
MSTFD4022 Source materials and resources for production of TCF designs 161
Assessment Requirements for MSTFD4022 Source materials and resources for production of TCF designs 164
MSTFD4023 Calculate cost estimates for TCF products 166
Assessment Requirements for MSTFD4023 Calculate cost estimates for TCF products. 169
MSTFD5023 Develop marketing plans for fashion products 171
Assessment Requirements for MSTFD5023 Develop marketing plans for fashion products 174
MSTFD5024 Evaluate fashion designs against set criteria 176
Assessment Requirements for MSTFD5024 Evaluate fashion designs against set criteria 179
MSTFD5025 Analyse influences on contemporary fashion designs 181
Assessment Requirements for MSTFD5025 Analyse influences on contemporary fashion designs 184
MSTFD5026 Conduct fashion design purchasing 186
Assessment Requirements for MSTFD5026 Conduct fashion design purchasing 189
MSTFD5027 Cost production of fashion and textile designs 191
Assessment Requirements for MSTFD5027 Cost production of fashion and textile designs 194
MSTFD5028 Develop merchandising plans for fashion products 196

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Requirements for MSTFD5028 Develop merchandising plans for fashion products....199
MSTFD5029 Assess impact of current fashion industry innovations and practices....201
Assessment Requirements for MSTFD5029 Assess impact of current fashion industry innovations and practices....204
MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry....206
Assessment Requirements for MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry....209
MSTGN2014 Operate computing technology in a TCF workplace....212
Assessment Requirements for MSTGN2014 Operate computing technology in a TCF workplace....215
MSTGN4014 Produce and analyse spreadsheets....217
Assessment Requirements for MSTGN4014 Produce and analyse spreadsheets....220
MSTGN5010 Coordinate quality assurance for TCF products and services....221
Assessment Requirements for MSTGN5010 Coordinate quality assurance for TCF products and services....224
MSTGN5011 Work with international TCF supply chains....226
Assessment Requirements for MSTGN5011 Work with international TCF supply chains230
MSTGN6007 Manage production processes....232
Assessment Requirements for MSTGN6007 Manage production processes....235
MSTGN6008 Negotiate and manage contracts to produce finished design products....237
Assessment Requirements for MSTGN6008 Negotiate and manage contracts to produce finished design products....241
MSTMF4005 Select, produce and adjust casts for accommodative orthoses....243
Assessment Requirements for MSTMF4005 Select, produce and adjust casts for accommodative orthoses....246
MSTMF4006 Fit medical grade footwear and orthoses that are not complex....248
Assessment Requirements for MSTMF4006 Fit medical grade footwear and orthoses that are not complex....251
MSTMF4007 Produce accommodative orthoses....253
Assessment Requirements for MSTMF4007 Produce accommodative orthoses....256
MSTMF4008 Produce negative and positive casts for lasts and corrective orthoses....258
Assessment Requirements for MSTMF4008 Produce negative and positive casts for lasts and corrective orthoses....261
MSTMF4009 Produce custom-made medical grade footwear....263
Assessment Requirements for MSTMF4009 Produce custom-made medical grade footwear....266
MSTMF4010 Fit complex custom-made medical grade footwear and orthoses....268
Assessment Requirements for MSTMF4010 Fit complex custom-made medical grade footwear and orthoses....271
MSTMF4011 Produce corrective orthoses....273
Assessment Requirements for MSTMF4011 Produce corrective orthoses....276
MSTTX2010 Perform wool quality tests....278
Assessment Requirements for MSTTX2010 Perform wool quality tests....281
MSTTX2011 Perform wool processing machine setting....283
Assessment Requirements for MSTTX2011 Perform wool processing machine setting..286
MSTTX2012 Perform wool store operations....288
Assessment Requirements for MSTTX2012 Perform wool store operations....291
MSTTX3013 Perform wool processing operations....293
Assessment Requirements for MSTTX3013 Perform wool processing operations....297
AHCLSC308 Install metal structures and features....300
Assessment Requirements for AHCLSC308 Install metal structures and features....303
AURVTT004 Trim vehicle components....305

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Requirements for AURVTT004 Trim vehicle components.....309
AURVTT014 Fabricate and fit marine covers 311
Assessment Requirements for AURVTT014 Fabricate and fit marine covers.....315
AURVTT019 Fabricate and install automotive and marine frames, canopies and side curtains.....318
Assessment Requirements for AURVTT019 Fabricate and install automotive and marine frames, canopies and side curtains.....322
AURVTT020 Select and use leather in automotive and marine trimming 325
Assessment Requirements for AURVTT020 Select and use leather in automotive and marine trimming.....329
BSBCUS201 Deliver a service to customers 332
Assessment Requirements for BSBCUS201 Deliver a service to customers.....335
BSBDES202 Evaluate the nature of design in a specific industry context 337
Assessment Requirements for BSBDES202 Evaluate the nature of design in a specific industry context.....340
BSBDES301 Explore the use of colour.....342
Assessment Requirements for BSBDES301 Explore the use of colour 345
BSBDES302 Explore and apply the creative design process to 2D forms.....347
Assessment Requirements for BSBDES302 Explore and apply the creative design process to 2D forms 350
BSBINT301 Apply knowledge of the international trade environment to complete work352
Assessment Requirements for BSBINT301 Apply knowledge of the international trade environment to complete work.....355
BSBINT302 Apply knowledge of legislation relevant to international trade to complete work 357
Assessment Requirements for BSBINT302 Apply knowledge of legislation relevant to international trade to complete work.....360
BSBINT405 Apply knowledge of import and export international conventions, laws and finance 362
Assessment Requirements for BSBINT405 Apply knowledge of import and export international conventions, laws and finance.....365
BSBINT409 Plan for international trade 367
Assessment Requirements for BSBINT409 Plan for international trade.....371
BSBMGT617 Develop and implement a business plan.....373
Assessment Requirements for BSBMGT617 Develop and implement a business plan 377
BSBMKG408 Conduct market research.....379
Assessment Requirements for BSBMKG408 Conduct market research.....383
BSBMKG413 Promote products and services.....385
Assessment Requirements for BSBMKG413 Promote products and services 389
BSBMKG414 Undertake marketing activities.....391
Assessment Requirements for BSBMKG414 Undertake marketing activities.....394
BSBMKG415 Research international markets 396
Assessment Requirements for BSBMKG415 Research international markets.....399
BSBMKG419 Analyse consumer behaviour 401
Assessment Requirements for BSBMKG419 Analyse consumer behaviour.....404
BSBMKG507 Interpret market trends and developments.....406
Assessment Requirements for BSBMKG507 Interpret market trends and developments409
BSBMKG510 Plan e-marketing communications 411
Assessment Requirements for BSBMKG510 Plan e-marketing communications.....415
BSBMKG537 Develop a social media engagement plan.....417
Assessment Requirements for BSBMKG537 Develop a social media engagement plan ..421
BSBMKG605 Evaluate international marketing opportunities.....423

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Requirements for BSBMKG605 Evaluate international marketing opportunities....427
BSBMKG606 Manage international marketing programs....429
Assessment Requirements for BSBMKG606 Manage international marketing programs433
BSBMKG607 Manage market research....435
Assessment Requirements for BSBMKG607 Manage market research....439
BSBMKG608 Develop organisational marketing objectives....441
Assessment Requirements for BSBMKG608 Develop organisational marketing objectives445
BSBSMB304 Determine resource requirements for the micro business....447
Assessment Requirements for BSBSMB304 Determine resource requirements for the micro business....450
BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business....452
Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business....455
BSBSMB401 Establish legal and risk management requirements of small business....457
Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business....461
BSBSMB402 Plan small business finances....463
Assessment Requirements for BSBSMB402 Plan small business finances....466
CPCCCM2002A Carry out excavation....468
CPCCCO2013A Carry out concreting to simple forms....478
CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry....489
Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry....492
CUAACD301 Produce drawings to communicate ideas....494
Assessment Requirements for CUAACD301 Produce drawings to communicate ideas...497
CUACMP311 Implement copyright arrangements....499
Assessment Requirements for CUACMP311 Implement copyright arrangements....502
CUADRA201 Develop drawing skills....504
Assessment Requirements for CUADRA201 Develop drawing skills....507
FSKNUM21 Apply an expanding range of mathematical calculations for work....509
Assessment Requirements for FSKNUM21 Apply an expanding range of mathematical calculations for work....511
ICPPRN282 Produce and manage basic digital print....513
Assessment Requirements for ICPPRN282 Produce and manage basic digital print....517
ICPPRN284 Use colour management systems....520
Assessment Requirements for ICPPRN284 Use colour management systems....523
ICPPRN383 Prepare for personalised digital printing....525
Assessment Requirements for ICPPRN383 Prepare for personalised digital printing....528
ICPPRN385 Apply software applications to digital production....530
Assessment Requirements for ICPPRN385 Apply software applications to digital production....533
ICPPRN387 Use colour management for production....535
Assessment Requirements for ICPPRN387 Use colour management for production....539
ICPPRN388 Preflight and import complex images for digital devices....541
Assessment Requirements for ICPPRN388 Preflight and import complex images for digital devices....544
ICPPRN389 Manage digital files....546
Assessment Requirements for ICPPRN389 Manage digital files....549
ICPPRN390 Generate a proof for digital production....551
Assessment Requirements for ICPPRN390 Generate a proof for digital production....554

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ICPPRN392 Set up and produce specialised digital print 556
Assessment Requirements for ICPPRN392 Set up and produce specialised digital print 560
ICPSUP281 Use computer systems 562
Assessment Requirements for ICPSUP281 Use computer systems 565
MEM05012 Perform routine manual metal arc welding 567
Assessment Requirements for MEM05012 Perform routine manual metal arc welding 570
MEM05050 Perform routine gas metal arc welding 572
Assessment Requirements for MEM05050 Perform routine gas metal arc welding 576
MEM07033 Operate and monitor basic boiler 578
Assessment Requirements for MEM07033 Operate and monitor basic boiler 583
MEM07034A Operate and monitor intermediate class boiler 586
MEM11010 Operate mobile load shifting equipment 595
Assessment Requirements for MEM11010 Operate mobile load shifting equipment 601
MEM12023 Perform engineering measurements 603
Assessment Requirements for MEM12023 Perform engineering measurements 607
MEM12024 Perform computations 609
Assessment Requirements for MEM12024 Perform computations 613
MEM13003 Work safely with industrial chemicals and materials 615
Assessment Requirements for MEM13003 Work safely with industrial chemicals and materials 619
MEM13015 Work safely and effectively in manufacturing and engineering 621
Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering 626
MEM14006 Plan work activities 629
Assessment Requirements for MEM14006 Plan work activities 633
MEM16008A Interact with computing technology 635
MEM17003 Assist in the provision of on-the-job training 641
Assessment Requirements for MEM17003 Assist in the provision of on-the-job training 644
MEM18001 Use hand tools 646
Assessment Requirements for MEM18001 Use hand tools 650
MEM18002 Use power tools/hand held operations 652
Assessment Requirements for MEM18002 Use power tools/hand held operations 656
MEM19006 Replace watch batteries 658
Assessment Requirements for MEM19006 Replace watch batteries 661
MEM19014 Perform hand engraving 663
Assessment Requirements for MEM19014 Perform hand engraving 666
MEM20001 Produce keys 668
Assessment Requirements for MEM20001 Produce keys 672
MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements 674
MEM30032A Produce basic engineering drawings 681
MEM30033A Use computer-aided design (CAD) to create and display 3-D models 687
MSFSF3013 Provide technical advice to customers 692
Assessment Requirements for MSFSF3013 Provide technical advice to customers 695
MSMBLIC001 Licence to operate a standard boiler 697
Assessment Requirements for MSMBLIC001 Licence to operate a standard boiler 709
MSMENV272 Participate in environmentally sustainable work practices 712
Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices 715
MSMENV472 Implement and monitor environmentally sustainable work practices 717
Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices 721
MSMOPS101 Make measurements 723

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Requirements for MSMOPS101 Make measurements 725
MSMSUP102 Communicate in the workplace 727
Assessment Requirements for MSMSUP102 Communicate in the workplace 729
MSMSUP106 Work in a team 731
Assessment Requirements for MSMSUP106 Work in a team 733
MSMSUP382 Provide coaching/mentoring in the workplace 735
Assessment Requirements for MSMSUP382 Provide coaching/mentoring in the workplace 738
MSMSUP390 Use structured problem-solving tools 740
Assessment Requirements for MSMSUP390 Use structured problem-solving tools 743
MSMWHS200 Work safely 745
Assessment Requirements for MSMWHS200 Work safely 748
MSMWHS503 Maintain WHS management system 750
Assessment Requirements for MSMWHS503 Maintain WHS management system 755
MSS402010 Manage the impact of change on own work 758
Assessment Requirements for MSS402010 Manage the impact of change on own work . 763
MSS402031 Interpret product costs in terms of customer requirements 765
Assessment Requirements for MSS402031 Interpret product costs in terms of customer requirements 769
MSS402051 Apply quality standards 771
Assessment Requirements for MSS402051 Apply quality standards 777
MSS402080 Undertake root cause analysis 779
Assessment Requirements for MSS402080 Undertake root cause analysis 783
MSTCL1001 Produce a simple garment 785
Assessment Requirements for MSTCL1001 Produce a simple garment 791
MSTCL2001 Use a sewing machine 793
Assessment Requirements for MSTCL2001 Use a sewing machine 797
MSTCL2002 Provide hand sewing and finishing support 799
Assessment Requirements for MSTCL2002 Provide hand sewing and finishing support 802
MSTCL2003 Perform basic maintenance of headwear 804
Assessment Requirements for MSTCL2003 Perform basic maintenance of headwear 807
MSTCL2004 Sew components 809
Assessment Requirements for MSTCL2004 Sew components 814
MSTCL2005 Use specialised machinery or processes to assist TCF production 817
Assessment Requirements for MSTCL2005 Use specialised machinery or processes to assist TCF production 822
MSTCL2006 Press work 824
Assessment Requirements for MSTCL2006 Press work 829
MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays 831
Assessment Requirements for MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays 836
MSTCL2008 Finish garment production 838
Assessment Requirements for MSTCL2008 Finish garment production 842
MSTCL2009 Despatch work 844
Assessment Requirements for MSTCL2009 Despatch work 848
MSTCL2010 Modify patterns to create basic styles 850
Assessment Requirements for MSTCL2010 Modify patterns to create basic styles 854
MSTCL2011 Draw and interpret a basic sketch 857
Assessment Requirements for MSTCL2011 Draw and interpret a basic sketch 861
MSTCL2012 Organise and plan own work in a home-based production environment ... 864
Assessment Requirements for MSTCL2012 Organise and plan own work in a home-based production environment 868
MSTCL2013 Block and shape headwear by machine 870
Assessment Requirements for MSTCL2013 Block and shape headwear by machine 873

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTCL2014 Access and use information resources for clothing production operations.875
Assessment Requirements for MSTCL2014 Access and use information resources for clothing production operations 879
MSTCL2015 Finish headwear 881
Assessment Requirements for MSTCL2015 Finish headwear.....885
MSTCL2016 Trim headwear.....887
Assessment Requirements for MSTCL2016 Trim headwear 891
MSTCL2017 Press work for production support.....893
Assessment Requirements for MSTCL2017 Press work for production support 897
MSTCL2018 Perform bundling, ticketing and labelling in TCF operations.....899
Assessment Requirements for MSTCL2018 Perform bundling, ticketing and labelling in TCF operations.....903
MSTCL2019 Sew components, complex tasks 905
Assessment Requirements for MSTCL2019 Sew components, complex tasks.....910
MSTCL2020 Lay up and mark uncomplicated fabrics and lays 912
Assessment Requirements for MSTCL2020 Lay up and mark uncomplicated fabrics and lays.....916
MSTCL3001 Identify fabric performance and handling requirements.....918
Assessment Requirements for MSTCL3001 Identify fabric performance and handling requirements.....923
MSTCL3002 Prepare and produce a complex whole garment from specifications 926
Assessment Requirements for MSTCL3002 Prepare and produce a complex whole garment from specifications.....931
MSTCL3003 Perform garment repairs and alterations 933
Assessment Requirements for MSTCL3003 Perform garment repairs and alterations...938
MSTCL3004 Press whole garments.....940
Assessment Requirements for MSTCL3004 Press whole garments.....944
MSTCL3005 Lay up and cut complicated fabrics and lays.....946
Assessment Requirements for MSTCL3005 Lay up and cut complicated fabrics and lays950
MSTCL3006 Assemble bra or swimwear.....953
Assessment Requirements for MSTCL3006 Assemble bra or swimwear 958
MSTCL3007 Embellish garment by hand or machine 960
Assessment Requirements for MSTCL3007 Embellish garment by hand or machine.....964
MSTCL3008 Set and produce digital embroidery 967
Assessment Requirements for MSTCL3008 Set and produce digital embroidery.....971
MSTCL3009 Develop patterns from a block using basic patternmaking principles.....974
Assessment Requirements for MSTCL3009 Develop patterns from a block using basic patternmaking principles.....978
MSTCL3010 Sew woven and stretch knit garments 981
Assessment Requirements for MSTCL3010 Sew woven and stretch knit garments 986
MSTCL3011 Contribute to garment production process improvements.....988
Assessment Requirements for MSTCL3011 Contribute to garment production process improvements 993
MSTCL3012 Make marker for complicated fabrics and lays 996
Assessment Requirements for MSTCL3012 Make marker for complicated fabrics and lays1001
MSTCL3013 Interpret patterns and apply pattern information 1003
Assessment Requirements for MSTCL3013 Interpret patterns and apply pattern information.....1007
MSTCL3014 Interact and communicate with garment production personnel 1009
Assessment Requirements for MSTCL3014 Interact and communicate with garment production personnel.....1014
MSTCL4001 Perform sample machining of advanced construction garments.....1016

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Requirements for MSTCL4001 Perform sample machining of advanced construction garments 1021
MSTCL4002 Assemble and fit commercially tailored or bespoke garments 1025
Assessment Requirements for MSTCL4002 Assemble and fit commercially tailored or bespoke garments 1029
MSTCL4003 Measure, lay up and cut custom-made garments 1031
Assessment Requirements for MSTCL4003 Measure, lay up and cut custom-made garments 1035
MSTCL4004 Determine and perform garment maintenance or repair 1037
Assessment Requirements for MSTCL4004 Determine and perform garment maintenance or repair 1040
MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise 1042
Assessment Requirements for MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise 1046
MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents 1048
Assessment Requirements for MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents 1053
MSTDC2003 Identify pre- and post-spotting requirements 1055
Assessment Requirements for MSTDC2003 Identify pre- and post-spotting requirements 1059
MSTDC2004 Operate dry cleaning machines 1062
Assessment Requirements for MSTDC2004 Operate dry cleaning machines 1066
MSTDC2005 Operate wet cleaning machines 1068
Assessment Requirements for MSTDC2005 Operate wet cleaning machines 1072
MSTDC2006 Operate finishing equipment 1074
Assessment Requirements for MSTDC2006 Operate finishing equipment 1078
MSTDC2007 Receive and sort articles for cleaning 1080
Assessment Requirements for MSTDC2007 Receive and sort articles for cleaning 1084
MSTDC2008 Carry out final inspection of articles 1086
Assessment Requirements for MSTDC2008 Carry out final inspection of articles 1089
MSTDC2009 Identify fabric and garment cleaning requirements 1091
Assessment Requirements for MSTDC2009 Identify fabric and garment cleaning requirements 1095
MSTDC3001 Perform spotting function in dry cleaning operations 1099
Assessment Requirements for MSTDC3001 Perform spotting function in dry cleaning operations 1104
MSTDC3002 Dry clean garments with special treatment requirements 1108
Assessment Requirements for MSTDC3002 Dry clean garments with special treatment requirements 1112
MSTDE3001 Apply hooping and fabric handling techniques 1114
Assessment Requirements for MSTDE3001 Apply hooping and fabric handling techniques 1118
MSTDE3002 Digitise artwork for computerised embroideries 1121
Assessment Requirements for MSTDE3002 Digitise artwork for computerised embroideries 1127
MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries 1131
Assessment Requirements for MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries 1136
MSTDE3004 Generate artwork for computerised embroideries 1140
Assessment Requirements for MSTDE3004 Generate artwork for computerised embroideries 1144
MSTDE3005 Replicate traditional hand craft techniques 1147
Assessment Requirements for MSTDE3005 Replicate traditional hand craft techniques 1152
MSTDE3006 Digitise text to produce embroidered lettering 1155
Assessment Requirements for MSTDE3006 Digitise text to produce embroidered lettering 1161

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTDE3007 Demonstrate features of digitised embroidery machines 1164
Assessment Requirements for MSTDE3007 Demonstrate features of digitised embroidery machines.....1168
MSTDE3008 Produce embroidery from digitised images 1171
Assessment Requirements for MSTDE3008 Produce embroidery from digitised images1175
MSTDE3009 Maintain computerised embroidery machines.....1178
Assessment Requirements for MSTDE3009 Maintain computerised embroidery machines1182
MSTFD2001 Design and produce a simple garment.....1185
Assessment Requirements for MSTFD2001 Design and produce a simple garment.....1189
MSTFD2002 Apply printing techniques to produce Indigenous textile designs.....1191
Assessment Requirements for MSTFD2002 Apply printing techniques to produce Indigenous textile designs 1195
MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs 1197
Assessment Requirements for MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs 1201
MSTFD2004 Work within an Indigenous cultural framework 1203
Assessment Requirements for MSTFD2004 Work within an Indigenous cultural framework.....1207
MSTFD2005 Identify design process for fashion designs 1209
Assessment Requirements for MSTFD2005 Identify design process for fashion designs1213
MSTFD2006 Use a sewing machine for fashion design 1216
Assessment Requirements for MSTFD2006 Use a sewing machine for fashion design..1221
MSTFD3001 Market design product to local outlets.....1224
Assessment Requirements for MSTFD3001 Market design product to local outlets 1228
MSTFD3002 Design and produce indigenous printed textiles to a brief.....1230
Assessment Requirements for MSTFD3002 Design and produce indigenous printed textiles to a brief 1234
MSTFD3003 Prepare design concept for a simple garment.....1237
Assessment Requirements for MSTFD3003 Prepare design concept for a simple garment1241
MSTFD3004 Draw a trade drawing for fashion design.....1244
Assessment Requirements for MSTFD3004 Draw a trade drawing for fashion design .1248
MSTFD3005 Use skin, fur or leather to create fashion or textile products.....1251
Assessment Requirements for MSTFD3005 Use skin, fur or leather to create fashion or textile products 1255
MSTFD4001 Apply design studio process.....1258
Assessment Requirements for MSTFD4001 Apply design studio process 1263
MSTFD4002 Apply principles of colour theory to fashion design development 1267
Assessment Requirements for MSTFD4002 Apply principles of colour theory to fashion design development.....1271
MSTFD4003 Assist in preparation of preliminary design concepts.....1274
Assessment Requirements for MSTFD4003 Assist in preparation of preliminary design concepts 1278
MSTFD4005 Communicate and sell design concepts 1281
Assessment Requirements for MSTFD4005 Communicate and sell design concepts.....1285
MSTFD4006 Interact and network with fashion industry participants.....1288
Assessment Requirements for MSTFD4006 Interact and network with fashion industry participants.....1292
MSTFD4007 Conduct quality assurance for patterns and garments.....1295
Assessment Requirements for MSTFD4007 Conduct quality assurance for patterns and garments.....1299
MSTFD4008 Construct stock size block for garment to meet size and fit specifications1302
Assessment Requirements for MSTFD4008 Construct stock size block for garment to meet size and fit specifications.....1306

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTFD4009 Create and edit digital embroidery designs....1309
Assessment Requirements for MSTFD4009 Create and edit digital embroidery designs 1313
MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles....1315
Assessment Requirements for MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles....1319

MST20116 Certificate II in TCF Production Support

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

Release 2. Supersedes and is equivalent to MST20116 Certificate II in TCF Production Support (Release 1)

2 Elective units updated. Equivalent outcome.

Qualification Description

This qualification is intended for production workers who undertake vital production support roles in a textiles, clothing and footwear (TCF) manufacturing environment.

The worker would perform a limited range of operational support tasks directly related to the manufacture of TCF products. It provides the skills and knowledge required to work under supervision within a production environment.

The worker would apply a breadth and depth of knowledge to a defined range of situations and would be expected to apply this knowledge to solve a defined range of problems by applying known solutions to a limited range of predictable problems.

Elective units of competency should be chosen to meet the specialist skill needs of the area of application.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20116 Certificate II in TCF Production Support, competency must be achieved in thirteen (13) units of competency:

- **four (4**) core units of competency
- **nine (9)** elective units of competency, as described below.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units of competency can be chosen to meet the specialist skill needs of the following areas of application:

- Footwear production
- Textile production
- Textile fabrication
- Clothing production

Core units of competency

Select all four (4) units of competency from the following list.

MSMWHS200	Work safely
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards

Elective units of competency

Select **nine (9)** elective units from Groups A and B as specified below.

- A minimum of **four (4)** units must be selected from Group A
- A minimum of **three (3)** units must be selected from Group B

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- The remaining **two (2)** units may be selected from:
  - units not previously selected from Groups A or B
  - units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level or Certificate III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, select a minimum of **four (4)** units in any combination from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **four (4)** units from one of the specialist groups below.

Footwear production

Unit code	Unit title	Prerequisites
MSTFP2001	Identify materials used in footwear production	
MSTFP2003	Cut printed materials by machine	
MSTFP2005	Operate machine to sew upper	
MSTFP2008	Perform moulding operations	
MSTFP2009	Perform footwear finishing operations	
MSTFP2011	Perform table-based operations	

Textile production

Unit code	Unit title	Prerequisites
MSTCL2001	Use a sewing machine	
MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2007	Select, transfer and remove materials and products	
MSTTX2002	Weigh and check textile materials and products	
MSTTX2004	Conduct packaging or folding for textile production	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTTX2005	Access and use information resources for textile production operations	
MSTTX2007	Operate machines for intermediate production support	

Textile fabrication		
Unit code	**Unit title**	**Prerequisites**
MSTLG2006	Identify materials used in leather goods production	
MSTTF2001	Despatch products	
MSTTF2003	Use canvas and sail production tools	
MSTTF2004	Add reinforcements and attachments	
MSTTF2009	Select and apply canvas and sail materials	
MSTTF2011	Cut and shape canvas or sail materials	
MSTTF2012	Stitch by hand	
MSTTF2013	Waterproof canvas product	
MSTTF2014	Weld plastic materials	
MSTTX2009	Perform industrial sewing on textile products	

Clothing production		
Unit code	**Unit title**	**Prerequisites**
MSTCL2001	Use a sewing machine	
MSTCL2002	Provide hand sewing and finishing support	
MSTCL2003	Perform basic maintenance of headwear

		engineering MEM16006 Organise and communicate information
MEM18002	Use power tools/hand held operations	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MSMOPS101	Make measurements	
MSMSUP106	Work in a team	
MSTFD2005	Identify design process for fashion designs	
MSTFP1001	Embellish footwear	
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2010	Perform tasks to support production	
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN2014	Operate computing technology in a TCF workplace	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTTX2001	Perform knitting operations	
MSTTX2006	Undertake carding operations	
TLIA2011	Package goods	
TLIA2013	Receive goods	
TLIA2020	Replenish stock	
TLIA2021	Despatch stock	
TLID2010	Operate a forklift	

Qualification Mapping Information

Release 2. Supersedes and is equivalent to MST20116 Certificate II in TCF Production Support (Release 1)

Release 1. Supersedes and is not equivalent to.

- LMT20607 - Certificate II in Clothing Production (Intermediate)
- LMT20107 Certificate II in Textile Production (Intermediate)
- LMT21607 Certificate II in Technical Textiles and Non-wovens
- LMT20507 Certificate II in Textile Fabrication
- LMT20707 Certificate II in Clothing Production (Complex or Multiple Processes)
- LMT20907 Certificate II in Footwear Production (Intermediate)

MST20216 Certificate II in TCF Production Operations

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

Release 2. Supersedes and is equivalent to MST20216 Certificate II in TCF Production Operations (Release 1)

2 electives updated, 4 new electives added to Group B electives. Equivalent outcome.

Qualification Description

This qualification is intended for production workers who operate equipment and undertake complex operational tasks directly related to the manufacture of textile, clothing and footwear (TCF) products.

It provides the skills and knowledge required to work under supervision within a production environment. The worker should demonstrate initiative, judgement and discretion in their own work and would apply a breadth and depth of knowledge to a defined range of situations and then would be expected to apply this knowledge to solve a defined range of problems by applying known solutions to a limited range of predictable problems.

It provides the skills and knowledge required to work under supervision within a production environment.

Elective units of competency can be chosen to meet the specialist skill needs of the area of application.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **13**

- **4 core** units of competency
- **9 elective** units of competency, consisting of:
- **at least 4 units** from the specialist electives list (Group A, B, C, D and/or F)
- **at least 3 units** from Group F general elective list
- up to 2 units from any endorsed Training Package or accredited course where those units are available at Certificate II or Certificate III level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Any combination of electives that meets the rules above can be selected for the award of the *MST20216 Certificate II in TCF Production Operations*

Where appropriate, electives may be packaged to provide a qualification with a specialisation.

Packaging for Specialisations

Electives must be packaged to provide a qualification with a specialisation area as follows:

- At least 4 Group A electives must be selected for award of *Certificate II in TCF Production Operations (Footwear Production)*
- At least 4 Group B electives must be selected for award of the *Certificate II in TCF Production Operations (Textile Production)*
- At least 4 Group C electives must be selected for award of the *Certificate II in TCF Production Operations (Textile Fabrication)*
- At least 4 Group D electives must be selected for award of the *Certificate II in TCF Production Operations (Technical Textiles and Non-wovens)*
- At least 4 Group E electives must be selected for award of the *Certificate II in TCF Production Operations (Clothing Production)*

Core units

Select **4 units** of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSMWHS200	Work safely
MSS402051	Apply quality standards

Specialist electives

Group A - Footwear Production

Unit code	Unit title	Prerequisite unit
MSTGN2002	Package and handle TCF items for storage or despatch	
MSTGN2006	Perform test or inspection to check product quality	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTGN2007	Select, transfer and remove materials and products	
MSTFP2001	Identify materials used in footwear production	
MSTFP2002	Perform stuff cutting	
MSTFP2004	Cut non-printed leather by machine	
MSTFP2005	Operate machine to sew upper	
MSTFP2006	Machine upper according to product requirements	MSTFP2005 Operate machine to sew upper
MSTFP2007	Last shoe by machine	
MSTFP2008	Perform moulding operations	
MSTFP2009	Perform footwear finishing operations	
MSTFP2010	Repair footwear product	

Group B - Textile Production

Unit code	Unit title	Prerequisite unit
MSTTX2003	Repair textile product	
MSTTX2004	Conduct packaging or folding for textile production	
MSTTX2005	Access and use information resources for textile production operations	
MSTTX2008	Operate machines for complex production operations	
MSTTX2009	Perform industrial sewing on textile products	

Group C - Textile Fabrication

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTTF2002	Cut, bend and shape metal	
MSTTF2003	Use canvas and sail production tools	
MSTTF2004	Add reinforcements and attachments	
MSTTF2005	Translate information into measurements or diagrams	
MSTTF2006	Measure and scale geometric shapes	MSTTF2005 Translate information into measurements or diagrams
MSTTF2009	Select and apply canvas and sail materials	
MSTTF2010	Lay out and mark out canvas or sail materials	
MSTTF2011	Cut and shape canvas or sail materials	
MSTTF2013	Waterproof canvas product	
MSTTF2014	Weld plastic materials	
MSTTF2015	Install products on and off site	
MSTTF2016	Inspect canvas or sail product	

Group D - Technical Textiles and Non-wovens

Unit code	Unit title	Prerequisite unit
MSTTN2001	Set up and operate a dry laid web forming machine	
MSTTN2002	Set up and operate a spun bond web forming machine	
MSTTN2003	Use basic recognition techniques to identify technical and non-woven textiles	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTTN2004	Undertake web bonding processes	
MSTTN2005	Undertake web conversion and finishing	
MSTTN2006	Identify purpose and performance outcomes of technical textile product	MSTTN2003 Use basic recognition techniques to identify technical and non-woven textiles
MSTTN2007	Conduct technical textile mechanical finishing processes	
MSTTN2008	Conduct heat setting on technical textiles	
MSTTN2009	Apply surface coating to technical textiles	
MSTTN2010	Apply laminations or fusible interlinings to technical textiles	
MSTTN2011	Undertake fibre blending and feeding for non-woven technical production processes	

Group E - Clothing Production

Unit code	Unit title	Prerequisite unit
MSTCL2002	Provide hand sewing and finishing support	
MSTCL2003	Perform basic maintenance of headwear	
MSTCL2005	Use specialised machinery or processes to assist TCF production	
MSTCL2006	Press work	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	
MSTCL2008	Finish garment production	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTCL2010	Modify patterns to create basic styles	
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTCL2013	Block and shape headwear by machine	
MSTCL2014	Access and use information resources for clothing production operations	
MSTCL2015	Finish headwear	
MSTCL2016	Trim headwear	
MSTCL2019	Sew components, complex tasks	
MSTGN2002	Package and handle TCF items for storage or despatch	

Group F – General Electives

MST20316 Certificate II in Leather Production

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

2 electives updated. Equivalent outcome.

Release 2. Supersedes and is equivalent to MST20316 Certificate II in Leather Production (Release 1)

Qualification Description

This qualification is intended for those who require skills and knowledge for operations in a hide, skin and leather processing enterprise or an enterprise involved in the production of leather goods.

Work relates to a limited range of technical and operational tasks within a production environment. Work is generally supervised and may include some multi-skilled roles.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20316 Certificate II in Leather Production, competency must be achieved in **thirteen (13)** units of competency:

- five **(5)** core units of competency
- **eight** (**8**) elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

In addition to packaging for a generic outcome, elective units of competency can be chosen to meet the specialist skill needs of the following areas of application:

- Hide skin and leather
- Leather fabrication

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Core units of competency

- Select all **five (5)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTGN2003	Work in the TCF industry
MSTGN2010	Perform tasks to support production

Elective units of competency

Select **eight (8)** units as specified below.

- A minimum of **four (4)** units must be chosen from Group A
- A minimum of one **(1)** unit must be chosen from Group B
- The remaining three **(3)** units may be selected from:
  - units not previously selected from Group A or B
  - a maximum of **two (2)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level or Certificate III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, select a minimum of **four (4)** units in any combination from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **four (4)** units from one of the specialist groups below.

Hide skin and leather

Unit code	Unit title	Prerequisites
MSTGN2012	Work safely with chemicals in TCF operations	
MSTHL2001	Undertake receival, storage, handling and preservation of materials or products	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MST20416 Certificate II in Laundry Operations

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

2 Elective units updated. Equivalent outcome.

Release 2. Supersedes and is equivalent to MST20416 Certificate II in Laundry Operations (Release 1)

Release 1. Supersedes and is equivalent to LMT21410 Certificate II in Laundry Operations.

Qualification Description

This qualification describes the skills and knowledge to conduct operational and support functions within a laundry enterprise. Work outcomes covered by this qualification typically involve performing a limited range of tasks with known routines and procedures and some accountability for the quality of outcomes. Some multi-skilled roles can be accommodated in this qualification and work is generally supervised.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20416 Certificate II in Laundry Operations, competency must be achieved in **thirteen (13)** units of competency.

- **six (6)** core units of competency
- **seven (7)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core of competency • Select all **six (6)** units of competency from the following list.	
Unit code	**Unit title**

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSMWHS200	Work safely
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
MSTLA2001	Apply infection control policies and procedures in laundry operations
MSTLA2002	Operate washing machines

Elective units of competency

Select up to **seven (7)** elective units from Groups A and B as specified below.

- A minimum of **three (3)** units must be selected from Group A
- The remaining **five (4)** units may be selected from:
  - units not previously selected from Group A
  - units from Group B
  - a maximum of **two (2)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II or Certificate III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification

Group A		
Unit code	**Unit title**	**Prerequisites**
MSTDC2001	Provide customer service in a dry cleaning or laundry enterprise	
MSTDC2007	Receive and sort articles for cleaning

MST20519 Certificate II in TCF Services and Repair

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Core unit updated. Equivalent outcome.

Qualification Description

This qualification is intended for workers who provide technical services in the repair, cleaning, alteration or maintenance of textiles, clothing or footwear (TCF) products.

Workers would apply a breadth and depth of knowledge to a defined range of situations and would be expected to apply this knowledge to solve a defined range of predictable problems.

This qualification is typically applied in small and medium sized enterprises that provide specialist services for repair and alteration of footwear and garments as well as dry cleaning.

Elective units of competency can be chosen to meet the specialist skill needs of the area of application.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **13**

- **5 core** units of competency
- **8 elective** units of competency, consisting of:
  - at least 4 units from the specialist electives list (Group A, B, C and/or D)
  - up to 4 units (not previously selected) from Group A, B, C and/or D
  - up to 3 units from any endorsed Training Package or accredited course where those units are available at Certificate II or Certificate III level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Any combination of electives that meets the rules above can be selected for the award of the *MST20519 Certificate II in TCF Services and Repair*.

Where appropriate, electives may be packaged to provide a qualification with a specialisation.

Packaging for Specialisations

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Electives must be packaged to provide a qualification with a specialisation area as follows:

- At least 4 Group A electives must be selected for award of *Certificate II in TCF Services and Repair (Footwear Repair)*
- At least 4 Group B electives must be selected for award of the *Certificate II in TCF Services and Repair (Dry Cleaning)*
- At least 4 Group C electives must be selected for award of the *Certificate II in TCF Services and Repair (Garment Alterations and Repairs)*

Core units

Select 5 units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry

Specialist electives

Group A - Footwear Repair

Unit code	Unit title	Prerequisite unit
MEM18001	Use hand tools	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information

MST20616 Certificate II in Applied Fashion Design and Technology

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

Release 3. Supersedes and is equivalent to MST20616 Certificate II in Applied Fashion Design and Technology (Release 2).

2 Elective units updated.

Release 2. MSTCL2001 and MSTCL2004 removed from electives. Duplicated by MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to:

- LMT20807 Certificate II in Millinery
- LMT21707 Certificate II in Applied Fashion Design and Technology

Qualification Description

This qualification provides an introductory overview of skills applied in the fashion industry. It includes skills used in the design and production of garments and millinery, as well as in the development of unique fashion and textile designs used in Indigenous Australian culture.

The qualification is designed to apply in a highly supervised context, such as VET in Schools, or other equivalent introduction to fashion industry environments.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST20616 Certificate II in Applied Fashion Design and Technology, competency must be achieved in thirteen (13) units of competency.

- **four (4)** core units of competency
- **nine (9)** elective units of competency as specified below.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification

Core units of competency

Select all **four (4)** units of competency from the following list.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Core units of competency Select all **four (4)** units of competency from the following list.	
Unit code	**Unit title**
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTCL2011	Draw and interpret a basic sketch

Elective units of competency

Select **nine (9)** units as specified below.

- A minimum of **four (4)** units must be selected from Group A
- The remaining **five (5)** units may be selected in any combination from:
  - units not previously selected from Group A
  - units from Group B
  - up to **three (3)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II and III level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives		
Applied fashion design		
Unit code	**Unit title**	**Prerequisites**
MSTCL2003	Perform basic maintenance of headwear

MST30116 Certificate III in Clothing and Textile Production

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

Release 3. Supersedes and is equivalent to MST30116 Certificate III in Clothing and Textile Production Release 2.

4 new electives added to Group B electives, 2 electives updated.

Release 2. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is Not equivalent to:

- LMT30107 Certificate III in Textile Production
- LMT30507 Certificate III in Clothing Production
- LMT31807 Certificate III in Technical Textiles and Non-wovens

Qualification Description

This qualification covers the skills and knowledge required to perform specialised production or multi-skilled operations and supervision roles within the textiles and clothing production environment.

Work outcomes require the ability to operate equipment and take responsibility for specialist production machines or processes where the work is mostly repetitive and predictable and the emphasis is on safety, efficiency, process control and problem solving.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **19**

- **5 core** units of competency
- **14 elective** units of competency, consisting of:
  - at least **6** units from the specialist electives list (Group A, B and/or C)
  - the remaining **8** units may be selected in any combination as below:
    - units not already selected from Group A or B
    - at least **4** units from Group C general electives

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- a maximum of **4** relevant units from other qualifications in this Training Package, other endorsed Training Packages and accredited courses where those units are available at Certificate II, III or IV. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Packaging for Specialisations

Electives must be packaged to provide a qualification with a specialisation area as follows:

- At least 6 Group A electives must be selected for award of *Certificate III in Clothing and Textile Production (Textile Production)*
- At least 6 Group B electives must be selected for award of *Certificate III in Clothing and Textile Production (Clothing Production)*

Core units

Select **5 units** of competency from the following list.

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSMSUP102	Communicate in the workplace	
MSS402051	Apply quality standards

MST30216 Certificate III in Manufactured Textile Products

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Elective unit updated. Equivalent outcome.

Release 3. Supersedes and is equivalent to MST30216 Certificate III in Manufactured Textile Products (Release 2)

Release 2. Imported unit updated. Equivalent.

Release 1. Supersedes and is equivalent to LMT30407 Certificate III in Textile Fabrication

Qualification Description

This qualification provides trade-level technical skills to support the design, development, production and supply of fabricated textile products.

It relates to specialised technical, operational and supervisory skills within a manufacturing enterprise.

Application of this qualification would typically be suitable in small to medium sized enterprise work environments where specialised products such as yacht sails, shades, shade sails, PVC and canvas products, are designed and produced to meet specific customer needs.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30216 Certificate III in Manufactured Textile Products competency must be achieved in **twenty-five (25)** units of competency:

- **ten (10)** core units of competency
- **fifteen (15)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency

Select all **ten (10)** units of competency from the following list.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title
MEM16008A	Interact with computer technology
MSMENV272	Participate in environmentally sustainable work practices
MSMOPS101	Make measurements
MSMSUP102	Communicate in the workplace
MSMWHS200	Work safely
MSTTF2003	Use canvas and sail production tools
MSTTF2005	Translate information into measurements or diagrams
MSTTF2009	Identify and select canvas and sail materials
MSS402051	Apply quality standards
MSTTX2009	Perform industrial sewing on textile products

Elective units of competency

Select **fifteen (15)** units as specified below.

- A minimum of **six (6**) units must be chosen from Group A
- The remaining **nine (9)** units may be selected from:
  - units not previously selected from Group A
  - units from Group B
  - up to **five (5)** units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II, Certificate III or Certificate IV level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

MST30316 Certificate III in Millinery

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

1 Elective unit updated. Equivalent outcome.

Release 3. Supersedes and is equivalent to MST30316 Certificate III in Millinery (Release 2)

Release 2. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is equivalent to LMT30607 Certificate III in Millinery.

Qualification Description

This qualification is intended for those who apply a range of technical skills within a millinery production environment.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30316 Certificate III in Millinery, competency must be achieved in **nineteen (19)** units of competency:

- **nine (9)** core units of competency
- **ten (10)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency

Select all **nine (9)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSMSUP102	Communicate in the workplace

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSS402051	Apply quality standards
MSTML2001	Identify materials used in millinery
MSTML2002	Make flat patterns for millinery
MSTML2007	Block and shape millinery by hand
MSTML2008	Assemble simple blocked millinery components
MSTML3004	Identify performance and handling requirements of millinery materials

Elective units of competency

Select **ten (10)** units as specified below.

- A minimum of **one (1)** unit must be chosen from Group A
- The remaining **seven (9)** units may be selected from:
  - units not previously selected from Group A
  - units from Group B
  - a maximum of **three** (**3**) relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level (maximum 1 unit), Certificate III level or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A		
Unit code	**Unit title**	**Prerequisites**
MSTFD3001	Market design product to local outlets	
MSTFD3005	Use skin, fur or leather to create fashion or textile products	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSTGN3006	Draw 3-D designs	
MSTML3001	Make flat patterns from hat blocks	MSTML2002 Make flat patterns for millinery

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		MSTML2007 Block and shape millinery by hand MSTFD2006 Make millinery with flat pattern components
MSTML3002	Block and shape complex millinery	MSTML2007 Block and shape millinery by hand MSTML3004 Identify performance and handling requirements of millinery materials
MSTML3003	Make millinery using a pattern derived from a hat block	MSTML2005 Place and cut millinery patterns MSTML3001 Make flat patterns from hat blocks
MSTML3005	Assemble complex blocked millinery components	MSTML3002 Block and shape complex millinery

Group B		
Unit code	**Unit title**	**Prerequisites**
MSMSUP106	Work in a team	
MSTCL2003	Perform basic maintenance of headwear	
MSTCL2005	Use specialised machinery to assist assembly production	
MSTCL2011	Draw and interpret a basic sketch	
MSTFD2006	Use a sewing machine for fashion design	
MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2002	Pack, handle, store and despatch work in TCF production	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTGN2003	Work in the TCF industry	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality

MST30416 Certificate III in Footwear

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

1 Elective unit updated. Equivalent outcome.

Release 2. Supersedes and is equivalent to MST30416 Certificate III in Footwear (Release 1)

Release 1. Supersedes and is Not equivalent to:

- LMT30707 Certificate III in Footwear Production
- LMT30807 Certificate III in Footwear Repair

Qualification Description

This qualification is intended for those who perform multi-skilled operations within a work environment that produces or repairs footwear, where an in-depth knowledge of footwear materials and production or repair processes is required.

Suitable applications include manufacture or repair of footwear products.

Elective units of competency should be chosen to meet the specialist skill needs of the area of application.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30416 Certificate III in Footwear, competency must be achieved in **nineteen (19)** units of competency:

- five **(5)** core units of competency
- **fourteen** (**14**) elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Packaging for an industry specialisation

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

In addition to packaging for a generic outcome, elective units if competency can be chosen to meet the specialist skill needs of the following areas of application:

- Footwear production
- Footwear repair

Core units of competency

Select all **five (5)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
MSTFP2001	Identify materials used in footwear production

Elective units of competency

Select **fourteen (14)** units as specified below.

- A minimum of **six (6)** units must be chosen from Group A
- The remaining **eight (8)** units may be selected from:
  - units not previously selected from Group A
  - units from Group B
  - a maximum of **five (5)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II, Certificate III or Certificate IV level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A – Specialist electives

If packaging for a generic qualification, select a minimum of **five (5)** units in any combination from the specialisation groups below.

If packaging for an industry specialisation, select a minimum of **five (5)** units from one of the specialist groups below.

Footwear production

Unit code	Unit title	Prerequisites

MST30516 Certificate III in Leather Production

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Elective unit updated. Equivalent outcome.

Release 2. Supersedes and is equivalent to MST30516 Certificate III in Leather Production (Release 1)

Release 1. Supersedes and is equivalent to LMT30907 Certificate III in Leather Production

Qualification Description

This qualification provides the skills and knowledge required to perform supervision roles, specialised tasks or multi-skilled roles within a leather production environment.

Work relates to specialised technical, operational and supervisory roles in a hide, skin and leather processing enterprise or an enterprise involved in the production of leather goods.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30516 Certificate III in Leather, competency must be achieved in **nineteen (19)** units of competency:

- **four (4)** core units of competency
- **fifteen (15)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency

Select all **four (4)** units of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSMWHS200	Work safely
MSTGN3002	Organise and plan own work to achieve planned outcomes
MSS402051	Apply quality standards

Elective units of competency

Select **fifteen (15)** units as specified below.

- A minimum of **four (4)** units must be chosen from Group A
- The remaining **eleven (11)** units may be selected from:
  - units not previously selected from Group A
  - units from Group B
  - up to **five (5)** units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II, Certificate III or Certificate IV level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A		
Unit code	**Unit title**	**Prerequisites**
MSTGN3001	Control production in a section of a TCF enterprise	
MSTGN3003	Estimate and cost job	
MSTGN3004	Supervise operations in a TCF enterprise	
MSTGN3005	Plan tasks to assist production operations

MST30616 Certificate III in Laundry Operations

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

2 Elective units updated. Equivalent outcome.

Release 2. Supersedes and is equivalent to MST30616 Certificate III in Laundry Operations (Release 1)

Release 1. Supersedes and is equivalent to LMT31110 Certificate III in Laundry Operations.

Qualification Description

This qualification is intended for those who perform supervision roles, specialised technical tasks or multi-skilled roles within a commercial laundry environment.

Work is usually performed in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the use of equipment or application of contingency measures and within known time constraints.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST30616 Certificate III in Laundry Operations, competency must be achieved in **nineteen (19)** units of competency:

- **seven (7)** core units of competency
- **twelve (12)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency Select all **seven (7)** units of competency from the following list.	
Unit code	**Unit title**

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSMSUP102	Communicate in the workplace
MSS402051	Apply quality standards
MSTDC2009	Identify fabric and garment cleaning requirements
MSTLA2001	Apply infection control policies and procedures in laundry operations
MSTLA2002	Operate washing machines

Elective units of competency

Select **twelve (12)** units as specified below.

- A minimum of **three (3)** units must be selected from Group A
- A minimum of **five (5)** units must be selected from Group B
- The remaining **four (4)** units may be selected from:
  - units not previously selected from Group A or B
  - units from Group C
  - a maximum of **three (3)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level (maximum 1 unit), Certificate III level or Certificate IV level (maximum 1 unit).

Group A

Unit code	Unit title	Prerequisites
MSMSUP382	Provide coaching/mentoring in the workplace

MST30719 Certificate III in Dry Cleaning Operations

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Core unit updated. 1 Elective unit updated. Equivalent outcome.

Release 1. Supersedes and is equivalent to MST30716 Certificate III in Dry Cleaning Operations

Qualification Description

This qualification is intended for those who perform supervision roles, specialised technical tasks or multi-skilled roles within a dry cleaning environment.

Work is usually performed in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the provision of services or contingency measures and within known time constraints.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **19**

- **9 core** units of competency
- **10 elective** units of competency, consisting of:
  - **at least 5** units from Group A
  - **at least 2** units from Group B
  - the remaining **3** units may be selected from:
    - units not previously selected from Group A, B and/or C
    - units from any endorsed Training Package or accredited course where those units are available at Certificate II level, Certificate III level or Certificate IV level. These units must be relevant to the work outcome and not duplicate units available within this qualification

Core units

Select **9 units** of competency from the following list.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally sustainable work practices	
MSMSUP102	Communicate in the workplace	
MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTDC2002	Conduct safe handling of dry cleaning chemicals and solvents	
MSTDC2003	Identify pre- and post-spotting requirements	
MSTDC2004	Operate dry cleaning machines	
MSTDC2009	Identify fabric and garment cleaning requirements	
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry	

Group A

Unit code	Unit title	Prerequisite unit
MSMSUP382	Provide coaching/mentoring in the workplace	
MSTCL3003	Perform garment repairs and alterations	
MSTCL3004	Press whole garments	
MSTDC3001	Perform spotting function in dry cleaning operations	
MSTDC3002	Dry clean garments with special treatment requirements	
MSTGN3001	Control production in a section of a TCF enterprise	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3004	Supervise operations in a TCF enterprise	
MSTGN3005	Plan tasks to assist production operations	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
PMBWASTE302	Coordinate waste disposal	

Group B

Unit code	Unit title	Prerequisite unit
MSTDC2001	Provide customer service in a dry cleaning or laundry enterprise	
MSTDC2005	Operate wet cleaning machines	
MSTDC2006	Operate finishing equipment	
MSTDC2007	Receive and sort articles for cleaning	
MSTDC2008	Carry out final inspection of articles	
MSTGN2002	Package and handle TCF items for storage or despatch	

Group C

Unit code	Unit title	Prerequisite unit
MEM07033	Operate and monitor basic boiler	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM07034A	Operate and monitor intermediate class boiler	MEM07033 Operate and monitor basic boiler

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSMBLIC001	Licence to operate a standard boiler	
MSMSUP106	Work in a team	
MSTCL2001	Use a sewing machine	
MSTCL2002	Provide hand sewing and finishing support	
MSTCL2004	Sew components	MSTCL2001 Use a sewing machine
MSTCL2006	Press work	
MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2003	Work in the TCF industry	
MSTGN2008	Coordinate work of team or section	
MSTGN2014	Operate computing technology in a TCF workplace

MST30819 Certificate III in Applied Fashion Design and Technology

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

Release 1. Supersedes and equivalent to:

- MST30816 Certificate III in Applied Fashion Design and Technology. 1 Core unit updated. 1 Elective unit updated. Equivalent outcome.
- LMT32011 Certificate III in Digitising and Computerised Embroidery

Qualification Description

This qualification provides the skills and knowledge required to work in applied design and production roles within the clothing and fashion industry.

This qualification is suitable for workers producing fashion products where a basic understanding of design and marketing as well as sewing skills for specialist machinists, support roles in patternmaking, production of digitally printed or embroidered fabrics or garments is needed.

Items to be produced would include a single or small range of products. This qualification is particularly suitable for those who are self-employed undertaking low volume production of items for local distribution outlets, for example, markets.

Elective units of competency can be chosen to meet the specialist skills needs of the area of application.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **19**

- **4 core** units of competency
- **15 elective** units of competency, consisting of:
  - at least 6 units from the specialist electives list (Group A, B, C, D and/or E)
  - at least 4 units from Group E general electives
  - the remaining 5 units may be selected from:
    - units not previously selected from Group A, B, C, D or E

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- units from any endorsed Training Package or accredited course where those units are available at Certificate II level, Certificate III level or Certificate IV level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Any combination of electives that meets the rules above can be selected for the award of the *MST30819 Certificate III in Applied Fashion Design and Technology*

Where appropriate, electives may be packaged to provide a qualification with a specialisation.

Packaging for Specialisations

Electives must be packaged to provide a qualification with a specialisation area as follows:

- At least 6 Group A electives must be selected for award of *Certificate III in Applied Fashion Design and Technology (Fashion Design)*
- At least 6 Group B electives must be selected for award of *Certificate III in Applied Fashion Design and Technology (Clothing Technician)*
- At least 6 Group C electives must be selected for award of *Certificate III in Applied Fashion Design and Technology (Digital Embroidery)*
- At least 6 Group D electives must be selected for award of *Certificate III in Applied Fashion Design and Technology (Digital Printing)*

Core units

Select **4 units** of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry

Specialist electives

Group A - Fashion Design

Unit code	Unit title	Prerequisite unit
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3002	Prepare and produce a complex whole garment from specifications	MSTFD2006 Use a sewing machine for fashion design

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
		MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTCL3013	Interpret patterns and apply pattern information	
MSTFD3001	Market design product to local outlets	
MSTFD3002	Design and produce Indigenous printed textiles to a brief	MSTFD2002 Apply printing techniques to produce Indigenous textile designs MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs MSTFD2004 Work within an Indigenous cultural framework
MSTFD3003	Prepare design concept for a simple garment	MSTCL2011 Draw and interpret a basic sketch MSTFD2005 Identify design process for fashion designs
MSTFD3004	Draw a trade drawing for fashion design	

Group B - Clothing Technician

MSTCL3001	Identify fabric performance and handling requirements	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3002	Prepare and produce a complex whole garment from specifications	MSTFD2006 Use a sewing machine for fashion design MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3003	Perform garment repairs and alterations	MSTFD2006 Use a sewing machine for fashion design MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3005	Lay up and cut complicated fabrics	MSTCL2007 Lay up, mark and cut

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	and lays	uncomplicated fabrics and lays
MSTCL3006	Assemble bra or swimwear	MSTFD2006 Use a sewing machine for fashion design MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3007	Embellish garment by hand or machine	MSTFD2006 Use a sewing machine for fashion design MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3008	Set and produce digital embroidery	
MSTCL3009	Develop patterns from a block using basic patternmaking principles	
MSTCL3010	Sew woven and stretch knit garments	MSTFD2006 Use a sewing machine for fashion design MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3012	Make marker for complicated fabrics and lays	MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays
MSTCL3013	Interpret patterns and apply pattern information	
MSTTX3003	Set up, adjust and maintain industrial sewing machines	

Group C - Digital Embroidery

CUACMP311	Implement copyright arrangements	
MSTDE3001	Apply hooping and fabric handling techniques	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTDE3002	Digitise artwork for computerised embroideries	MSTDE3001 Apply hooping and fabric handling techniques MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTDE3003	Apply advanced digitising techniques to produce computerised	MSTDE3001 Apply hooping and fabric handling techniques

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	embroideries	MSTDE3002 Digitise artwork for computerised embroideries MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTDE3004	Generate artwork for computerised embroideries	
MSTDE3005	Replicate traditional hand craft techniques	MSTDE3001 Apply hooping and fabric handling techniques MSTDE3002 Digitise artwork for computerised embroideries MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTDE3006	Digitise text to produce embroidered lettering	MSTDE3001 Apply hooping and fabric handling techniques MSTDE3002 Digitise artwork for computerised embroideries MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTDE3007	Demonstrate features of digitised embroidery machines	
MSTDE3008	Produce embroidery from digitised images	
MSTDE3009	Maintain computerised embroidery machines	

Group D - Digital Printing

CUACMP311	Implement copyright arrangements	
ICPPRN284	Use colour management systems	
ICPPRN383	Prepare for personalised digital printing	
ICPPRN385	Apply software applications to digital production	ICPSUP281 Use computer systems

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ICPPRN387	Use colour management for production	ICPPRN284 Use colour management systems
ICPPRN390	Generate a proof for digital production	
ICPPRN392	Set up and produce specialised digital print	
ICPSUP281	Use computer systems	

Group E – General Electives

Unit code	Unit title	Prerequisite unit
BSBDES202	Evaluate the nature of design in a specific industry context	
BSBDES301	Explore the use of colour	
BSBDES302	Explore and apply the creative design process to 2D forms	
BSBSMB304	Determine resource requirements for the micro business	
BSBSMB305	Comply with regulatory, taxation and insurance requirements for the micro business	
ICPPRN282	Produce and manage basic digital print	
ICPPRN388	Preflight and import complex images for digital device	
ICPPRN389	Manage digital files	
MSMSUP382	Provide coaching/mentoring in the workplace	
MSTCL2007	Lay up, mark and cut uncomplicated fabrics and lays	
MSTCL2009	Despatch work	
MSTCL2010	Modify patterns to create basic styles	
MSTCL2011	Draw and interpret a basic sketch	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTCL2012	Organise and plan own work in a home-based production environment	
MSTFD2001	Design and produce a simple garment	
MSTFD2002	Apply printing techniques to produce Indigenous textile designs	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTFD2003	Apply dyeing techniques to produce Indigenous textile designs	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTFD2004	Work within an Indigenous cultural framework	
MSTFD2005	Identify design process for fashion designs	
MSTFD2006	Use a sewing machine for fashion design	
MSTGN2001	Use steaming and pressing equipment in TCF production	
MSTGN2003	Work in the TCF industry	
MSTGN2004	Work in a team environment	
MSTGN2005	Perform minor maintenance	
MSTGN2006	Perform test or inspection to check product quality	
MSTGN2008	Coordinate work of team or section	
MSTGN2014	Operate computing technology in a TCF workplace	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	
MSS402010	Manage the impact of change on own work	
MSS402082	Apply cost factors to work practices	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSS402031	Interpret product costs in terms of customer requirements	
MSS402080	Undertake root cause analysis	
SIRXPDK001	Advise on products and services

MST40119 Certificate IV in Textile Design, Development and Production

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Core unit updated. 1 Elective unit updated. Equivalent outcome.

Release 1. Supersedes and is equivalent to MST40116 Certificate IV in Textile Design, Development and Production.

Qualification Description

This qualification provides the skills and knowledge required to work in occupations such as design, technical support and development, in the textiles industry, with roles such as product design, production planning and quality control.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **25**

- **6 core** units of competency
- **19 elective** units of competency, consisting of:
  - at least 5 units from Group A
  - up to 14 units (not previously selected) from Group A and/or B
  - up to 5 units from any endorsed Training Package or accredited course where those units are available at Certificate III, Certificate IV or Diploma level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Core units

Select **6 units** of competency from the following list.

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
	sustainable work practices	
MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry	
MSTTX3001	Identify quality and types of textile fibres, yarns and fabrics	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Select 1 unit from the following:

MSTGN3004	Supervise operations in a TCF enterprise	
MSTTD4007	Analyse textile design influences	

Group A

Unit code	Unit title	Prerequisite unit
MSTFD4005	Communicate and sell design concepts	
MSTGN4002	Participate in product engineering	
MSTGN4004	Analyse TCF merchandising and marketing principles	
MSTGN4005	Plan and implement production within a work area	
MSTGN4006	Apply TCF market supply systems	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTGN4007	Contribute to the development of products or processes	
MSTGN4009	Design production tooling	
MSTGN4013	Manage technical processes	
MSTTD4001	Produce knitted textile samples	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MST40219 Certificate IV in Clothing Production

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Core and 2 elective units updated. Equivalent outcome.

Release 1. Supersedes and is equivalent to MST40216 Certificate IV in Clothing Production.

Qualification Description

This qualification is intended for those who perform specialised production or multi-skilled operations and supervision roles, within the textiles and clothing production environment.

It covers skills and knowledge in the application of specialised technical and supervisory skills within clothing production enterprises.

It covers occupations such as supervisory roles in a production environment, patternmakers and sample machinists. It allows for a multi-skilled approach to clothing production and provides a basis for career progression to higher skills in the applied fashion design and technology area.

Work outcomes require workers to operate and take responsibility for specialist production machines or processes where the work is mostly repetitive and predictable and the emphasis is on safety, efficiency, process control and problem solving.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Packaging Rules

Total number of units = **25**

- **8 core** units of competency
- **17 elective** units of competency, consisting of:
  - at least 6 units from Group A
  - up to 11 units (not previously selected) from Group A and/or B
  - up to 5 units from any endorsed Training Package or accredited course where those units are available at Certificate III, Certificate IV or Diploma level. These units must be relevant to the work outcome and not duplicate units available within this qualification

MST40316 Certificate IV in Custom-Made Footwear

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

7 Elective units added to Group A electives. Equivalent outcome.

Release 2. Supersedes and is equivalent to MST40316 Certificate IV in Custom-Made Footwear (Release 1)

Release 1. Supersedes and is equivalent to LMT40407 Certificate IV in Custom-Made Footwear.

Qualification Description

This qualification provides skills and knowledge to perform technical and production work in the design and development of custom-made footwear or footwear that involves small production quantities.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **25**

- **9 core** units of competency
- **16 elective** units of competency, consisting of:
  - at least 5 units from Group A
  - at least 3 units from Group B
  - up to 8 units (not previously selected) from Group A, B and/or C
  - up to 4 units from any endorsed Training Package or accredited course where those units are available at Certificate III, Certificate IV or Diploma level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Core units

Select all **8 units** of competency from the following list.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTFP2001	Identify materials used in footwear production	
MSTFP4001	Develop design for custom-made footwear	
MSTFP4002	Make patterns for custom-made footwear	
MSTFP4003	Prepare, cut and sew custom-made shoe components	
MSTFP4004	Assemble and finish custom-made shoe	
MSTFP4005	Fit custom-made footwear	

Group A

Unit code	Unit title	Prerequisite unit
MSTFD4003	Assist in preparation of preliminary design concepts	
MSTFD4014	Identify influences on contemporary fashion designs and construction techniques	
MSTGN4001	Coordinate or set up machines for product change	
MSTGN4002	Participate in product engineering	
MSTGN4005	Plan and implement production within a work area	
MSTGN4007	Contribute to the development of products or processes	
MSTGN4010	Implement and monitor WHS and environmental systems in the workplace	
MSTGN4011	Coordinate quality system and procedures	
MSTGN4012	Fabricate or machine tooling	
MSTMF4001	Select and adjust prefabricated footwear-related orthoses	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTMF4002	Conduct medical grade footwear assessments for clients with footwear-related medical conditions	
MSTMF4003	Modify medical grade footwear	
MSTMF4004	Select and adjust prefabricated medical grade footwear and accessories	
MSTMF4005	Select, produce and adjust casts for accommodative orthoses	
MSTMF4006	Fit medical grade footwear and orthoses	
MSTMF4007	Produce accommodative orthoses	
MSTMF4008	Produce negative and positive casts for lasts and corrective orthoses	
MSTMF4009	Produce custom-made medical grade footwear	
MSTMF4010	Fit complex custom-made medical grade footwear and orthoses	
MSTMF4011	Produce corrective orthoses	

Group B

Unit code	Unit title	Prerequisite unit
MSTFP3001	Cut leather by hand	
MSTFP3002	Hand last shoe	
MSTFP3003	Assemble shoe by hand	MSTFP2001 Identify materials used in footwear production
MSTFP3004	Contribute to footwear production improvement processes	MSS402051 Apply quality

MST40416 Certificate IV in Millinery

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

1 Elective unit updated. Equivalent outcome.

Release 3. Supersedes and is equivalent toMST40416 Certificate IV in Millinery (Release 2)

Release 2. Listed prerequisites adjusted to match corrected units. Equivalent.

Release 1. Supersedes and is equivalent to LMT40707 Certificate IV in Millinery.

Qualification Description

This qualification provides the skills and knowledge required to perform millinery design and construction roles. Work typically involves one-off or small run production within a small enterprise or self-employed operation.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded the MST40416 Certificate IV in Millinery, competency must be achieved in **twenty-five (25)** units of competency:

- **nine (9)** core units of competency
- **sixteen (16)** elective units of competency.

Note: Where prerequisite units are identified they must be counted in the total number of units required for achievement of the qualification.

Core units of competency Select all **nine (9)** units of competency from the following list.		
Unit code	**Unit title**	**Prerequisites**
MSMENV272	Participate in environmentally sustainable work practices	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTFD4006	Interact and network with fashion industry participants	
MSTML2001	Identify materials used in millinery	
MSTML2002	Make flat patterns for millinery	
MSTML2007	Block and shape millinery by hand	
MSTML2008	Assemble simple blocked millinery components	
MSTML3004	Identify performance and handling requirements of millinery materials	MSTML2001 Identify materials used in millinery

Elective units of competency

Select **sixteen (16)** units as specified below.

- A minimum of **five (5)** units must be chosen from Group A
- The remaining **eleven (11)** units may be selected from:
  - units not previously selected from Group A
  - units from Group B
  - a maximum of **five (5)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate III, Certificate IV or Diploma level.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group A

Unit code	Unit title	Prerequisites
MSTML4001	Undertake specific millinery construction techniques	
MSTML4002	Rejuvenate millinery	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTML4003	Present and display millinery	
MSTML4004	Manage millinery procurement and cost millinery products	
MSTML4005	Undertake initial millinery consultation, subsequent fittings and finishing	
MSTML4006	Sketch and prepare millinery fashion designs	
MSTML4007	Make millinery patterns	
MSTML4008	Undertake couture millinery	
MSTML4009	Modify millinery blocks to make new shapes	
MSTML4010	Make couture trims	MSTCL2016 Trim headwear MSTML3004 Identify performance and handling requirements of millinery materials

Group B

Unit code	**Unit title**	**Prerequisites**
MSMENV472	Implement and monitor environmentally sustainable work practices	
MSTCL2016	Trim headwear	
MSTFD2006	Use a sewing machine for fashion design	
MSTFD3001	Market design product to local outlets	
MSTFD3005	Use skin, fur or leather to create fashion or textile products	
MSTGN2014	Operate computing technology in a TCF workplace	
MSTGN3002	Organise and plan own work to achieve planned outcomes	
MSTGN3003	Estimate and cost job	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

MSTGN3006	Draw 3-D designs	
MSTML2005	Press and cut millinery patterns	
MSTML3001	Make flat patterns from hat blocks	MSTML2002 Make flat patterns for millinery MSTML2007 Block and shape millinery by hand
MSTML3002	Block and shape complex millinery	MSTML2007 Block and shape millinery by hand MSTML3004 Identify performance and handling requirements of millinery materials
MSTML3003	Make millinery using a pattern derived from a hat block	MSTFD2006 Use a sewing machine for fashion design MSTML2005 Place and cut millinery patterns MSTML3001 Make flat patterns from hat blocks
MSTML3005	Assemble complex blocked millinery components	MSTML3002 Block and shape complex millinery

MST40519 Certificate IV in Applied Fashion Design and Merchandising

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

3 Core units updated. 1 Elective unit updated. Equivalent outcome.

Release 1. Supersedes and is equivalent to MST40516 Certificate IV in Applied Fashion Design and Merchandising.

Qualification Description

This qualification is intended to cover the skills and knowledge required to work as assistant designers, merchandising assistants and specialist production technicians, such as patternmakers and sewing machinists, who support design and production within the clothing and fashion industry. It includes business and design outcomes which build on technical production skills and knowledge, to provide a basis for career progression to design, construction and merchandising management roles.

This qualification allows for a generalist qualification, or specialisation in the fields of 'Design and Product Development' or 'Business and Merchandising'.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = **25**

- **7 core** units of competency
- **18 elective** units of competency, consisting of:
  - at least 8 units from Group A and/or B and
  - up to 10 units (not previously selected) from Group A, B and/or C
  - up to 5 units from any endorsed Training Package or accredited course where those units are available at Certificate III, Certificate IV or Diploma level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Packaging for Specialisations

Electives must be packaged to provide a qualification with a specialisation area as follows:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- At least 5 Group A electives must be selected for award of *Certificate IV in Applied Fashion Design and Merchandising (Design and Product Development), including the 4 units marked with #*
- At least 5 Group B electives must be selected for award of the *Certificate IV in Applied Fashion Design and Merchandising (Business and Merchandising)* including the 4 units marked with #.

Core units

Select all **7 units** of competency from the following list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS200	Work safely
MSS402051	Apply quality standards
MSTFD4006	Interact and network with fashion industry participants
MSTFD4023	Calculate cost estimates for TCF products
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry
MSTGN2014	Operate computing technology in a TCF workplace

Group A – Design and Product Development

Unit code	Unit title	Prerequisite unit
MSTCL4001	Perform sample machining of advanced construction garments	MSTCL3002 Prepare and produce a complex whole garment from specifications MSTFD2006 Use a sewing machine for fashion design MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTCL4002	Assemble and fit commercially tailored or bespoke garments	
MSTCL4003	Measure, lay up and cut custom-made garments	
MSTFD4001	Apply design studio process

MST50119 Diploma of Applied Fashion Design and Merchandising

Modification History

This version was released with MST Textiles Clothing and Footwear Training Package Release 2.0.

Packaging rules updated. Title of Group B specialisation amended. Changes to electives. Equivalent outcome

Release 1. Supersedes and is equivalent to MST50116 Diploma of Applied Fashion Design and Merchandising.

Qualification Description

This qualification reflects the role of assistant designers and product developers who work in the textiles, clothing and footwear industry, as well as assistant roles associated with fashion buying and managing fashion production as part of a fashion enterprise. The role involves the application of integrated technical and theoretical knowledge across a broad range of specialist areas, incorporating various stages across the design, production and supply chain continuum, according to workplace requirements.

This qualification allows for a generalist qualification, or specialisation in the fields of 'Design and Product Development' and 'Fashion Business'.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 35

- **9 core** units of competency
- **26 elective** units of competency, consisting of:
  - at least 11 units from Group A and/or B
  - up to 15 units (not previously selected) from Group A, B and/or C
  - up to 10 units from any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Any combination of elective units that meets the rules above can be selected for the award of *MST50119 Diploma of Applied Fashion Design and Merchandising*. Where appropriate, elective units may be packaged to provide a qualification with a specialisation.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Packaging for Specialisations

Elective units must be packaged to provide a qualification with a specialisation area as follows:

- At least 8 Group A electives must be selected for award of *MST50119 Diploma of Applied Fashion Design and Merchandising (Design and Product Development), including the 4 units marked with #*
- At least 8 Group B electives must be selected for award of *MST50119 Diploma of Applied Fashion Design and Merchandising (Fashion Business),* including the 4 units marked with #.

Core units

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally sustainable work practices

MST50219 Diploma of Textile Design and Development

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

Release 1. Supersedes and equivalent to:

- MST50216 Diploma of Textile Design and Development. 1 Core unit updated. 4 Elective units updated. Equivalent outcome
- LMT50407 Diploma of Textile Technology and Production Management

Qualification Description

This qualification provides skills and knowledge required to undertake specialised technical and design roles within textile enterprises.

It is intended for those involved in the design and production of textiles, such as screen printed, woven, knitted, tapestry and experimental fabrics and textile products.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 35

- **10 core** units of competency
- **25 elective** units of competency, consisting of:
  - at least 8 units from Group A
  - at least 6 units from Group B
  - up to 11 units (not previously selected) from Group A, B and/or C
  - up to 6 units from any endorsed Training Package or accredited course where those units are available at Certificate IV, Diploma or Advanced Diploma level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

Core units

Select **10 units** of competency from the following list.

Unit code	Unit title	Prerequisite unit

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally sustainable work practices	
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN4010	Implement and monitor WHS and environmental systems in the workplace	
MSTTD4002	Prepare stencils and screens for textile printing	
MSTTD4007	Analyse textile design influences	
MSTTD4009	Assist in the development of textile designs	
MSTTD4012	Analyse use of colour in textiles	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry MSTTD4002 Prepare stencils and screens for textile printing
MSTTD5007	Develop textile designs using computer-based design programs	
MSTTD5008	Develop textile designs and specifications	
MSTTX3001	Identify quality and types of textile fibres, yarns and fabrics	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Group A

Unit code	Unit title	Prerequisite unit
MSTFD5027	Cost production of fashion or textile designs	
MSTGN5001	Participate in production planning processes	
MSTGN5004	Manage installation and commissioning of equipment and systems	
MSTGN5006	Plan and organise non-routine testing	MSTTX4003 Perform routine textile testing and analyse results
MSTGN5007	Prepare procedures and specifications for TCF operations	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTGN5008	Identify opportunities in the TCF market	MSTGN4004 Analyse TCF merchandising and marketing principles
MSTGN5009	Develop and test TCF products or processes	MSTTX4003 Perform routine textile testing and analyse results
MSTGN5010	Coordinate quality assurance for TCF products and services	
MSTGN5011	Work with international TCF supply chains	
MSTTD5001	Design and produce knitted textile products	MSTTD4001 Produce knitted textile samples
MSTTD5002	Design and produce woven tapestry products	MSTTD4004 Produce woven tapestry samples
MSTTD5003	Design and produce woven products	MSTTD4003 Produce woven textile samples
MSTTD5004	Design and produce experimental textiles	
MSTTD5005	Design and produce printed textiles	
MSTTD5006	Exhibit textile designs or products	
MSTTD5009	Produce printed designs on woven and non-woven substrates	
MSTTD5010	Produce computer-aided textile design folios	MSTGN2014 Operate computing technology in a TCF workplace
MSTTX5001	Determine textile finishing processes	MSTTX4001 Interpret and apply textile calculations and specifications MSTTX4002 Understand and apply textile science

Group B

Unit code	Unit title	Prerequisite unit
MSTGN4007	Contribute to the development of products or processes	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTGN4008	Analyse product and determine machine settings	
MSTTD4008	Present and promote textile design concepts	
MSTTD4010	Apply manipulation techniques to create experimental textile samples	
MSTTD4011	Estimate costs for development of textile designs	
MSTTX4001	Interpret and apply textile calculations and specifications	
MSTTX4002	Understand and apply textile science	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry MSTTX3001 Identify quality and types of textile fibres, yarns and fabrics
MSTTX4003	Perform routine textile testing and analyse results	MSTTX4001 Interpret and apply textile calculations and specifications MSTTX4002 Understand and apply textile science
MSTTX4004	Select dyes and develop dye specification and recipe for production	
MSTTX4005	Undertake textile colouration and finishing	MSTTX4002 Understand and apply textile science

Group C

Unit code	Unit title
CUAACD301	Produce drawings to communicate ideas
MSMENV472	Implement and monitor environmentally sustainable work practices
MSMWHS200	Work safely
MSTFD3001	Market design product to local outlets

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title
MSTGN2012	Work safely with chemicals in TCF operations
MSTGN2014	Operate computing technology in a TCF workplace
MSTGN3002	Organise and plan own work to achieve planned outcomes
MSTGN3006	Draw 3-D designs
MSTGN4004	Analyse TCF merchandising and marketing principles
MSTTD4001	Produce knitted textile samples
MSTTD4003	Produce woven textile samples
MSTTD4004	Produce woven tapestry samples
MSTTD4005	Produce screen printed textiles
MSTTD4006	Source textile materials and resources
MSTTX2009	Perform industrial sewing on textile products
MSTTX3008	Select raw materials

Qualification Mapping Information

Release1. Supersedes and equivalent to:

- MST50216 Diploma of Textile Design and Development
- LMT50407 Diploma of Textile Technology and Production Management

MST60119 Advanced Diploma of Applied Fashion Design and Merchandising

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

Packaging rules updated. Title of Group B specialisation amended. Changes to electives. Equivalent outcome.

Release1. Supersedes and equivalent to MST60116 Advanced Diploma of Applied Fashion Design and Merchandising.

Qualification Description

This qualification is intended for design and product development roles in the textile, clothing and footwear industry, as well as roles associated with fashion buying and managing fashion business as part of an enterprise. Work is undertaken autonomously. The role involves the application of broad skills and knowledge for highly skilled work applied at various stages across the design, production and supply chain continuum, according to workplace requirements.

This qualification allows for a generalist qualification, or specialisation in the fields of 'Design and Product Development' and 'Fashion Business'.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 45

- **11 core** units of competency
- **34 elective** units of competency, consisting of:
  - at least 11 units from Groups A and B
  - up to 23 units (not previously selected) from Group A, B and/or C
  - up to 10 units from any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Any combination of elective units that meets the rules above can be selected for the award of *MST60119 Advanced Diploma of Applied Fashion Design and Merchandising*. Where appropriate, elective units may be packaged to provide a qualification with a specialisation.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Packaging for Specialisations

Elective units must be packaged to provide a qualification with a specialisation area as follows:

- At least 8 Group A electives must be selected for award of *MST60119 Advanced Diploma of Applied Fashion Design and Merchandising (Design and Product Development), including the 4 units marked with #*
- At least 8 Group B electives must be selected for award of *MST60119 Advanced Diploma of Applied Fashion Design and Merchandising (Fashion Business),* including the 4 units marked with #.

Core units

Unit code	Unit title	Prerequisite unit
MSMENV272	Participate in environmentally sustainable work practices	
MSMWHS200	Work safely	
MSS402051	Apply quality standards	
MSTCL3001	Identify fabric performance and handling requirements	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTFD4006	Interact and network with fashion industry participants	
MSTFD4023	Calculate cost estimates for TCF products	
MSTFD5010	Develop and present design concepts within specific guidelines	
MSTFD5029	Assess impact of current fashion industry innovations and practices	
MSTGN2013	Identify fibres, fabrics and textiles used in the TCF industry	
MSTGN2014	Operate computing technology in a TCF workplace	
MSTGN6001	Develop and implement a sales or marketing strategy for fashion or textile items	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elective units

Group A – Design and Product Development

Unit code	Unit title	Prerequisite unit
MSTFD6001	Evaluate commercial viability of designs	MSTFD4023 Calculate cost estimates for TCF products MSTFD5027 Cost production of fashion and textile designs
MSTFD6002 #	Manage product development of fashion designs	
MSTFD6003 #	Manage fashion design process	
MSTFD6004	Manage advanced patternmaking processes	MSTFD4013 Grade 2-D patterns MSTFD5016 Grade complex patterns
MSTFD6005	Drape structured over-garments	MSTFD4021 Drape fabrics to make patterns MSTFD5012 Perform contour draping
MSTFD6006 #	Develop a fashion range	
MSTFD6007	Implement specialised patternmaking technologies	
MSTFD6008 #	Apply studio processes to create and produce designs for commercial production	
MSTGN6007	Manage production processes	
MSTTD6003	Develop a textile product range	

Group B – Fashion Business

Unit code	Unit title	Prerequisite unit
BSBMGT617	Develop and implement a business plan	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
BSBMKG605	Evaluate international marketing opportunities	
BSBMKG606	Manage international marketing programs	
BSBMKG607	Manage market research	
BSBMKG608 #	Develop organisational marketing objectives	
MSTFD6009	Analyse fashion industry textiles to guide commercial development	
MSTGN4014	Produce and analyse spreadsheets	
MSTGN6002 #	Manage quality system and procedures	
MSTGN6003	Research and evaluate processes and products	
MSTGN6006 #	Map and establish TCF supply chain process	
MSTGN6008 #	Negotiate and manage contracts to produce finished design products	
MSTTD6001	Research commercial development of textiles	
MSTTD6002	Apply electronic systems to textile design and production	MSTTD5007 Develop textile designs using computer-based design programs

Group C – General Electives

Unit code	Unit title	Prerequisite unit
BSBINT405	Apply knowledge of import and export international conventions, laws and finance	
BSBMKG507	Interpret market trends and developments	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
BSBSMB401	Establish legal and risk management requirements of small business	
BSBSMB402	Plan small business finances	
CUACMP311	Implement copyright arrangements	
FSKNUM21	Apply an expanding range of mathematical calculations for work	
MSTFD4001	Apply design studio process	
MSTFD4002	Apply principles of colour theory to fashion design development	MSTFD2005 Identify design process for fashion designs MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTFD4003	Assist in preparation of preliminary design concepts	
MSTFD4005	Communicate and sell design concepts	
MSTFD4007	Conduct quality assurance for patterns and garments	
MSTFD4008	Construct stock size block for garment to meet size and fit specifications	
MSTFD4010	Create pattern to meet design specifications applying advanced patternmaking principles	MSTCL3009 Develop patterns from a block using basic patternmaking principles
MSTFD4011	Cut fabrics for prototype designs	
MSTFD4012	Develop product specifications for fashion design	
MSTFD4013	Grade 2-D patterns	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTFD4014	Identify influences on contemporary fashion designs and construction techniques	
MSTFD4015	Create pattern from block to meet customer specifications	MSTCL3009 Develop patterns from a block using basic patternmaking principles MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles
MSTFD4016	Sew design prototypes	
MSTFD4020	Use electronic fashion design tools	
MSTFD4022	Source materials and resources for production of TCF designs	
MSTFD5001	Design bras and swimwear	MSTCL2010 Modify patterns to create basic styles MSTFD4003 Assist in preparation of preliminary design concepts
MSTFD5002	Develop and test patterns for bras and swimwear	MSTCL3009 Develop patterns from a block using basic patternmaking principles MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTFD5003	Analyse fit model	
MSTFD5005	Manipulate fabrics to create new finishes	MSTCL3001 Identify fabric performance and handling requirements MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTFD5011	Produce fashion illustrations to assist product visualisation	
MSTFD5012	Perform contour draping	MSTFD4021 Drape fabrics to make patterns

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTFD5014	Construct complex blocks for fashion garments	MSTFD4008 Construct stock size block for garment to meet size and fit specifications
MSTFD5015	Develop patterns for complex fashion garments	MSTCL3009 Develop patterns from a block using basic patternmaking principles MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles MSTFD4015 Create pattern from block to meet customer specifications
MSTFD5016	Grade complex patterns	MSTFD4013 Grade 2-D patterns
MSTFD5017	Apply design studio processes to meet client brief	
MSTFD5018	Determine and specify advanced construction processes	
MSTFD5019	Analyse individual fit and make pattern alterations	MSTCL3009 Develop patterns from a block using basic patternmaking principles MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles
MSTFD5021	Conduct digital patternmaking and grading	
MSTFD5022	Develop digital costing markers	MSTFD5021 Conduct digital patternmaking and grading
MSTFD5023	Develop marketing plans for fashion products	
MSTFD5024	Evaluate fashion designs against set criteria	
MSTFD5025	Analyse influences on contemporary fashion designs	
MSTFD5026	Conduct fashion design purchasing	

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit code	Unit title	Prerequisite unit
MSTFD5027	Cost production of fashion and textile designs	
MSTFD5028	Develop merchandising plans for fashion products	
MSTGN4004	Analyse TCF merchandising and marketing principles	
MSTGN4006	Apply TCF market supply systems	MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry
MSTGN5001	Participate in production planning processes	
MSTGN5004	Manage installation and commissioning of equipment and systems	
MSTGN5005	Provide global operations support	
MSTGN5007	Prepare procedures and specifications for TCF operations	
MSTGN5008	Identify opportunities in the TCF market	MSTGN4004 Analyse TCF merchandising and marketing principles
MSTGN5010	Coordinate quality assurance for TCF products and services	
MSTGN5011	Work with international TCF supply chains	
MSTTD5007	Develop textile designs using computer-based design programs	
PMBWASTE302	Coordinate waste disposal	
SIRRMER004	Develop visual merchandising creative concepts	
SIRRMER005	Implement visual merchandising concepts

MST60219 Advanced Diploma of Textile Design and Development

Modification History

This version was released with *MST Textiles Clothing and Footwear Training Package Release 2.0*.

1 Core unit updated. 5 Elective units updated. Equivalent outcome.

Release 1. Supersedes and equivalent to MST60216 Advanced Diploma of Textile Design and Development

Qualification Description

This qualification provides the skills and knowledge required to undertake specialised roles in commercial design and production of textile products, such as screen printed, woven, knitted, tapestry and experimental fabrics.

It includes the application of specialised technical, management and design skills within textile enterprises.

No occupational licensing or certification requirements exist at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 45

- **15 core** units of competency
- **30 elective** units of competency, consisting of:
  - at least 3 units from Group A
  - at least 9 units from Group B
  - at least 6 units from Group C
  - up to 12 units (not previously selected) from Group A, B and/or C
  - up to 7 units from any endorsed Training Package or accredited course where those units are available at Diploma level or Advanced Diploma level. These units must be relevant to the work outcome and not duplicate units available within this qualification.

MSTFD4022 Source materials and resources for production of TCF designs

Modification History

Release 1. Supersedes and is equivalent to MSTFD4017 Source materials and resources for production of fashion designs.

Unit code changed and title updated. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to source materials and resources to produce designs of textiles, clothing and footwear (TCF) items and accessories. It applies to locating and comparing required products and services from local and international suppliers and contractors, applying ethical sourcing requirements.

The unit applies to small to large scale workplaces in the TCF industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to source materials	1.1	Determine job requirements from specifications, job sheets and work instructions
	1.2	Identify and research materials and resources required for production

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements	Performance Criteria	
	1.3	Use computer and web-based technologies to locate and communicate with local and international TCF industry suppliers and contractors
	1.4	Identify materials and resources available from different suppliers
	1.5	Identify and review ethical sourcing requirements and priorities
	1.6	Compare costs and identify minimum order requirements
	1.7	Identify shipping and customs agents, shipping costs and mechanisms for international purchasing that minimise costs
2. Research purchasing costs	2.1	Identify all costs, including hidden costs, for purchasing materials and resources from selected suppliers and contractors
	2.2	Compare cost options of different suppliers and contractors
	2.3	Analyse costs of purchasing direct from international suppliers, contractors and manufacturers, and compare costs associated with purchasing from local suppliers
	2.4	Communicate effectively with suppliers and overcome potential communication barriers
3. Finalise order and monitor order progress	3.1	Compare supplier and contractor sources against required specifications and select based on their ability to meet requirements
	3.2	Place order and prepare tracking documentation according to workplace specifications
	3.3	Review progress of orders to determine on-time delivery
	3.4	Update tracking documentation to reflect progress of order
	3.5	Update orders to reflect changes in sales demand
	3.6	Liaise with production personnel and communicate arrival dates of materials and resources to ensure production schedules can be met
	3.7	Establish protocols and requirements for handling goods received and prepare documentation

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Writing skills to communicate effectively with local and international suppliers
- Oral communication skills to manage expectations and negotiate with local and international suppliers and with production staff
- Planning and organising skills to plan and prioritise own work tasks to deliver on objectives
- Technology skills to:
  - research suppliers and assess sustainable work practices
  - set up, update and manipulate spreadsheets
  - maintain tracking documentation

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD4017 Source materials and resources for production of fashion designs.

Assessment Requirements for MSTFD4022 Source materials and resources for production of TCF designs

Modification History

Release 1. Supersedes and is equivalent to MSTFD4017 Source materials and resources for production of fashion designs.

Unit code changed and title updated. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched at least three potential local and three potential international sources for materials or resources required to produce textiles, clothing and footwear (TCF) designs
- analysed performance characteristics of sources and made judgements on preferred and less suitable purchase options, including whether supplier meets ethical sourcing requirements
- selected three suppliers or contractors based on their ability to meet required specifications
- prepared at least one spreadsheet identifying suitable cost options for comparison, including hidden costs, for purchasing materials and resources from suppliers and contractors
- placed and monitored progress of at least one order for materials or resources.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- specifications and quality standards for garments and products
- ethical sourcing and sustainable work practices in TCF industry
- sources of suppliers for TCF materials and resources
- characteristics of fabrics and materials
- cost options for purchasing materials and resources from suppliers and contractors
- criteria for making cost comparisons
- workplace practices and procedures for purchasing and receiving goods
- hidden costs, including social, human, animal, environmental and whole-of-life costs
- workplace international purchasing procedures
- communication and negotiation strategies to work effectively with suppliers
- barriers to effective communication with suppliers.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including computer-based purchasing software
- modelling of industry operating conditions, including access to suppliers and production personnel.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTFD4023 Calculate cost estimates for TCF products

Modification History

Release 1. Supersedes and is equivalent to MSTFD4004 Calculate cost estimates for fashion products.

Unit code changed and title updated. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to calculate cost estimates for products developed for the textiles, clothing and footwear (TCF) industry, including sample production and bulk production runs.

The unit applies to small to large scale workplaces in the TCF industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to calculate cost estimates	1.1	Determine job requirements from specifications, job sheets and work instructions
	1.2	Identify factors and market forces to consider when costing TCF products
	1.3	Identify hidden costs in sample production
	1.4	Identify and compare different methods of labour use in the TCF industry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.5	Identify differences in costs for sample and bulk production items
2. Calculate costs involved in producing TCF products	2.1	Compare fabric and trim of similar garments from different price points within TCF industry, and identify production differences
	2.2	Estimate costs of selected fabric and trims for sample items and bulk production
	2.3	Review quality standards and desired garment finish to determine labour source
	2.4	Calculate labour costs to produce sample garment and for bulk production
	2.5	Review and adjust chosen fabric, trims and labour, and calculate revised costs
3. Develop costing sheets to industry standards	3.1	Identify components of costing sheets that meet TCF industry standards
	3.2	Complete costing sheets for sample products, incorporating materials, labour and hidden costs
	3.3	Develop quotations for bulk production of TCF items

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret quality standards and TCF industry standards

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD4004 Calculate cost estimates for fashion products.

Assessment Requirements for MSTFD4023 Calculate cost estimates for TCF products

Modification History

Release 1. Supersedes and is equivalent to MSTFD4004 Calculate cost estimates for fashion products.

Unit code changed and title updated. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- estimated costs of two different sample products completed to textiles, clothing and footwear (TCF) industry standards, including:
  - selected fabric and trims
  - labour costs
  - completed costing sheets
- developed a quotation for a TCF product with details of all relevant costings, including hidden costs, of required components for bulk production.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work instructions, standard operating procedures (SOPs) and safe work practices relating to work role
- quality standards for TCF item production
- industry standards for costing specifications
- factors and market forces to consider when costing TCF products
- hidden costs related to product development
- range of typical garment fabrics, including weight and other characteristics
- different methods of labour use in TCF industry
- components of a costing sheet.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- use of suitable facilities, equipment and resources, including computing equipment and costing software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTFD5023 Develop marketing plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to MSTFD5004 Develop marketing plans for fashion products.

Unit code changed. Range of conditions removed. Foundation skills information added. Element removed. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to plan marketing and promotional activities to support the sales of fashion products. Proposed activities must be appropriate to the price point of the fashion design and the overall objectives of the stakeholder.

The unit applies to local and international individual and team activities typical in the promotion and sale of fashion products in small to large scale workplaces in the textiles, clothing and footwear industry. Development of marketing plans may be central to the work role or completed as part of the overall sale of design concepts to stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to develop marketing plan	1.1	Determine job requirements from specifications, job sheets and work instructions
	1.2	Identify key features and benefits of selected fashion design
	1.3	Research target market and identify fashion design needs and

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		expectations
	1.4	Identify price point and marketing budget
	1.5	Identify other relevant details that affect marketing activities
	1.6	Establish marketing objectives with required stakeholders
2. Research and determine marketing options	2.1	Determine suitable media to reach target market and select appropriate strategies
	2.2	Explore marketing event options and promotional activities that meet legal, ethical and work health and safety (WHS) requirements, and assess their potential effectiveness in marketing selected fashion design
	2.3	Explore timing of marketing activities and determine costings for marketing options
3. Develop and finalise marketing plan	3.1	Identify fashion product marketing cycle and develop marketing plan that details marketing activities
	3.2	Adjust marketing plan to ensure it meets marketing objectives, timing, budget requirements, and legal, ethical and WHS requirements
	3.3	Present marketing plan to required stakeholders
	3.4	Update marketing plan to incorporate feedback from stakeholders
	3.5	Document marketing plan according to industry practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to present marketing plans to a range of audiences with confidence and enthusiasm

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Planning and organising skills to tailor marketing messages to different audiences

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD5004 Develop marketing plans for fashion products.

Assessment Requirements for MSTFD5023 Develop marketing plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to MSTFD5004 Develop marketing plans for fashion products.

Unit code changed. Range of conditions removed. Foundation skills information added. Element removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and documented a marketing plan for at least one fashion product that is appropriate to the price point, design and overall objectives of the stakeholder
- presented a marketing plan for at least one fashion product.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- regulatory and industry standards for textiles, clothing and footwear products
- marketing practices, including typical marketing events and promotional activities used in the fashion industry
- concepts of marketing cycle and product life cycle in the fashion industry
- marketing tools and media for the fashion industry, and techniques for their use
- Social media for marketing activities relevant to market.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including computing equipment and software packages.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTFD5024 Evaluate fashion designs against set criteria

Modification History

Release 1. Supersedes and is equivalent to MSTFD5006 Evaluate fashion designs against set criteria.

Unit code changed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to evaluate fashion designs against set criteria, which may include the design brief, a brand, or a stakeholder requirement, to determine if the design and techniques applied meet specifications and stakeholder needs.

The unit applies to small to large scale workplaces in the textiles, clothing and footwear industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to evaluate fashion designs	1.1	Source and interpret job requirements from specifications and design brief
	1.2	Identify purpose of design and characteristics of target market
	1.3	Research current industry design trends in target market
	1.4	Research workplace and industry standards for

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		communicating and presenting fashion design concepts according to legal and work health and safety requirements
	1.5	Identify quality criteria and evaluation criteria that apply to design processes
2. Apply evaluation criteria to fashion designs	2.1	Critically evaluate design and its individual features against original specifications, design brief and design concept
	2.2	Evaluate how well design principles have been applied to design
	2.3	Assess design against identified quality criteria and evaluation criteria
	2.4	Identify required possible adjustments to design to better meet design brief
3. Suggest design improvements	3.1	Identify potential design improvements and test their viability
	3.2	Use industry-appropriate communication and presentation skills to communicate suggested improvements
	3.3	Comply with intellectual property (IP), copyright, and ethical requirements when incorporating ideas sourced elsewhere

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret standards, IP and copyright requirements
- Oral communication skills to:
  - influence others
  - raise difficult issues for productive discussion

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD5006 Evaluate fashion designs against set criteria.

Links

Assessment Requirements for MSTFD5024 Evaluate fashion designs against set criteria

Modification History

Release 1. Supersedes and is equivalent to MSTFD5006 Evaluate fashion designs against set criteria.

Unit code changed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- critically evaluated at least two different fashion designs against set criteria
- identified potential improvements for above designs, and tested them for viability
- presented evaluation of one fashion design to at least one stakeholder.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- regulatory and industry standards for textiles, clothing and footwear (TCF) products, relevant to the work task
- quality standards that apply to design processes
- history and theory of design in relation to fashion design, relevant to job role
- principles of design applied to TCF items
- current fashion industry design trends, relevant to job role
- accepted methods and associated techniques for communicating ideas and concepts in the fashion industry
- design software programs relevant to job role
- typical components of stakeholder brief
- copyright and intellectual property (IP) requirements relevant to design of TCF items
- techniques relating to technical design:
  - sketching and drawing techniques
  - use of different media
  - use of line, form and colour
  - using information technology and software programs.
  -

MSTFD5025 Analyse influences on contemporary fashion designs

Modification History

Release 1. Supersedes and is equivalent to MSTFD5007 Analyse influences on contemporary fashion designs.

Unit code changed. Prerequisite removed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to research and analyse significant influences that determine current individual preferences and future fashion trends. It involves analysing fashion theories on adoption and dissemination of new trends, as well as investigating fashion trends.

The unit applies to those in the textiles, clothing and footwear industry developing designs that meet specific design briefs and current market demands. Work may be conducted in small to large scale workplaces and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Identify influences on contemporary fashion	1.1	Investigate significant influences on contemporary fashion
	1.2	Identify what role these influences play in contemporary fashion preferences
2. Use fashion reference sources	2.1	Identify ways that current theories of fashion are adopted and disseminated

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
	2.2	Identify the role of contemporary media and its function in the process of the fashion being adopted and disseminated
	2.3	Research a current fashion trend and analyse the role of a specified media type on its adoption and dissemination
3. Investigate fashion forecasting	3.1	Identify purposes of fashion forecasting
	3.2	Identify and compare different sources of information used when predicting future fashion directions
	3.3	Predict future trends and provide illustrations with evidence to support predictions
	3.4	Present research and ideas for future fashion trends using communication tools and presentation skills appropriate to fashion industry

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Self-management skills to seek the ideas of others and integrate own ideas and visions into analysis
- Technology skills to identify and research fashion market trends

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD5007 Analyse influences on contemporary fashion designs.

Assessment Requirements for MSTFD5025 Analyse influences on contemporary fashion designs

Modification History

Release 1. Supersedes and is equivalent to MSTFD5007 Analyse influences on contemporary fashion designs.

Unit code changed. Prerequisite removed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- analysed influences on contemporary fashion design using at least three different sources of information
- identified at least one future possible trend and presented evidence with illustrations to support the prediction, using industry-relevant communication and presentation skills.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- regulatory and industry standards for textiles, clothing and footwear products
- theories of fashion adoption and dissemination
- role of media in adopting and disseminating fashion designs
- fashion features of selected products
- reference sources to identify fashion trends
- influences on contemporary fashion
- contemporary and historic fashion trends
- communication tools to convey fashion industry trends
- presentation methods to convey ideas about influences on fashion.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including computing equipment and software packages.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTFD5026 Conduct fashion design purchasing

Modification History

Release 1. Supersedes and is equivalent to MSTFD5008 Conduct fashion design purchasing.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome

Application

This unit of competency describes the skills and knowledge required to research local and international fashion themes and styles, and purchase fashion products for use in the development of fashion designs. It involves identifying sources for purchasing products to help develop designs and fashion directions.

The unit applies to purchases that can inspire new designs or assist in demonstrating ideas to meet a stakeholder design brief or the design needs of a product range or label. Work may be conducted in small to large scale workplaces in the textiles, clothing and footwear industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for fashion design purchasing	1.1	Research national and international styles, themes and trends to identify development opportunities to help develop design and fashion directions
	1.2	Clarify purchasing objectives, establish criteria for selecting design purchases, and confirm purchasing budget

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Identify fashion design outlets and supplier and purchasing locations relevant to purchasing objectives
	1.4	Determine suitable purchasing strategy, and identify potential communication barriers with selected location
	1.5	Investigate and prepare to deal with currency, language and purchasing practices of selected location, and according to work health and safety requirements
2. Purchase fashion products	2.1	Investigate fashion design products to be selected according to design needs of product range and label
	2.2	Ensure fashion design products to be selected are produced ethically using sustainable work practices
	2.3	Test themes, styles and trends of fashion design products to be selected during purchasing
	2.4	Negotiate terms of purchase according to workplace procedures, industry standards, and legal and ethical requirements
	2.5	Assess production and supply opportunities and make purchases that meet purchasing objectives and comply with workplace purchasing procedures
	2.6	Identify and respond to additional design opportunities outside of set objectives
3. Present design purchases to stakeholder	3.1	Prepare purchases for presentation to stakeholder and required workplace personnel
	3.2	Develop and use appropriate communication tools to convey themes and design concepts relating to purchased products
	3.3	Use persuasive language and effective communication skills to encourage adoption of ideas and concepts for further development
	3.4	Document findings and outcomes of purchasing

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to build effective relationships with suppliers
- Numeracy skills to convert currency and exchange rates
- Self-management skills to maintain consistent focus on achieving results
- Initiative and enterprise skills to:
  - test and try new ideas
  - identify opportunities for new product designs and business growth

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD5008 Conduct fashion design purchasing.

Assessment Requirements for MSTFD5026 Conduct fashion design purchasing

Modification History

Release 1. Supersedes and is equivalent to MSTFD5008 Conduct fashion design purchasing.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, and performance criteria of this unit, and:

- determined local and international style and theme trends and identified development opportunities, purchasing objectives and criteria for selecting design purchases
- identified at least five potential local or international fashion design outlets and suppliers at suitable purchasing locations
- purchased at least three different items or supplies
- presented at least 3 purchased items or supplies to stakeholder.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- regulatory and industry standards for textiles, clothing and footwear (TCF) products
- ethical sourcing of TCF supplies
- principles and concepts of TCF design
- characteristics of target market
- workplace purchasing procedures and criteria
- characteristics of fabrics and materials
- research tools typically used for locating fashion outlets
- emerging fashion styles and themes relating to performance evidence
- fashion business development opportunities
- design needs of product range or label
- purchasing strategies relevant to product or workplace
- international business transaction procedures
- documentation and record keeping requirements for purchasing.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- modelling of industry operating conditions, including access to:
  - suppliers
  - stakeholders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e

MSTFD5027 Cost production of fashion and textile designs

Modification History

Release 1. Supersedes and is equivalent to:

- MSTFD5009 Cost production of fashion or textile designs.
- LMTTD5009A Cost production of textile designs

Unit code changed and minor change to title. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to analyse and calculate production costs of fashion and textile designs to determine the most cost-effective production mechanism.

The unit applies to costing domestic and offshore production options. Work may be conducted in small to large scale workplaces in the textiles, clothing and footwear industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to cost fashion or textile design production	1.1	Analyse production requirements to determine necessary scale of production
	1.2	Identify features of different production options in line with target market and product specifications

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Identify and analyse costs associated with each production option
	1.4	Compare cost benefits and cost negatives of each production option according to legal and ethical requirements
	1.5	Review previous production records and consult required personnel to determine cost efficiency of production options
2. Assess influences on production costs	2.1	Determine factors that affect cost of production
	2.2	Identify quality and industry standards for design and production, and assess their implications
	2.3	Analyse production options according to workplace procedures
	2.4	Identify and assess variables that impact on production costs
	2.5	Identify and compare differences between short-run or design production and large scale volume production
	2.6	Review production options in line with additional information and refine most suitable options according to work health and safety requirements
3. Develop and analyse costing sheets for production	3.1	Develop costing sheets for selected production options
	3.2	Check calculations and collate data
	3.3	Analyse data from costing sheets to assess most cost-efficient option for production, according to design, quality and ethical requirements
	3.4	Document cost analysis and present to required personnel to review suitability of options
	3.5	Assess options for adjusting variables to modify production costs
	3.6	Finalise cost analysis and complete required documentation

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Communication skills to use accounting terminology to relay information about costs of production
- Numeracy skills to use accounting formulas and analyse cost trends

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to:

Assessment Requirements for MSTFD5027 Cost production of fashion and textile designs

Modification History

Release 1. Supersedes and is equivalent to:

- MSTFD5009 Cost production of fashion or textile designs.
- LMTTD5009A Cost production of textile designs

Unit code changed and minor change to title. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- costed the production of two different fashion items or textile designs, and for each: determined the most cost-efficient option that meets design, quality and ethical requirements
- presented above options to required personnel.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- structure and format of costing sheets
- terminology used for basic accounting required for performance evidence
- quality standards for fashion production
- sequence of operations for fashion production
- industry standards for costing specifications
- design terminology for fashion
- methods for calculating:
  - profit and loss
  - gross return
  - profit margins
  - earnings before interest and tax
  - return on investment
  - break-even point
- options and scale of production for fashion items
- factors that affect cost of production
- costing variables

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- costing benefits and negatives relating to cost of production
- characteristics of identified target market
- methods used to present costing detail.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including computing equipment and software packages.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTFD5028 Develop merchandising plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to MSTFD5013 Develop merchandising plans for fashion products.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to develop merchandising plans for buying fashion products and fashion ranges for a store.

The unit applies to merchandising of high-volume and low-volume fashion products and accessories to the appropriate market sectors. Developing merchandising plans may be central to the work role or completed as part of the overall sale of design concepts to stakeholders. Work may be conducted in small to large scale workplaces in the textiles, clothing and footwear industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to develop merchandising plan	1.1	Analyse merchandising opportunities
	1.2	Establish merchandising objectives according to workplace requirements
	1.3	Analyse stock levels and sales data to determine product life cycle

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Determine budget for merchandising
2. Develop merchandising plan	2.1	Determine required products and ranges to be purchased
	2.2	Determine quantities, sizes, colours and designs of products to be purchased
	2.3	Develop a merchandising plan that details workplace requirements
3. Assess, document and store merchandising plan	3.1	Assess effectiveness of merchandising plan in meeting marketing objectives and timing requirements
	3.2	Present merchandising plan to stakeholder and integrate stakeholder response into proposals
	3.3	Document merchandising plan according to industry practices, including any legal, ethical and work health and safety requirements
	3.4	Document reports on merchandising opportunities and strategies, and present to relevant audience

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to invite opinions and present merchandising plans
- Numeracy skills to analyse trends in sales data
- Initiative and enterprise skills to seek out new insights, perspectives and opportunities for business growth

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSTFD5028 Develop merchandising plans for fashion products

Modification History

Release 1. Supersedes and is equivalent to MSTFD5013 Develop merchandising plans for fashion products.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed a merchandising plan for at least one fashion product or range, based on analysis of sales data
- presented the developed merchandising plan to a manager or stakeholder.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- regulatory requirements, codes of practice and industry standards for textile, clothing and footwear products
- data analysis methods
- workplace stock management practices
- workplace management systems
- characteristics and purpose of merchandising plans
- characteristics and purchasing styles of target market
- international regulations, pricing structures, import and export factors, production times, quality assurance factors and production arrangements
- goods and services tax (GST) requirements
- industry practices for documenting merchandising plans.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- modelling of industry operating conditions, including access to managers and stakeholders requiring merchandising plans.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTFD5029 Assess impact of current fashion industry innovations and practices

Modification History

Release 1. Supersedes and is equivalent to MSTFD5020 Assess impact of current fashion industry innovations and practices.

Unit code changed. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to conduct research to determine current industry innovations and practices and assess their impact on own practice.

The unit applies to small to large-scale workplaces in the textiles, clothing and footwear industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Fashion design and technology

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Review industry trends and assess impacts on own practice	1.1	Use research methods to identify key industry organisations and information resources
	1.2	Examine impact, and determine implications of, globalisation on the fashion industry
	1.3	Examine key trends affecting production and work flows in the fashion industry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Examine key trends affecting supply in the fashion industry and the implications for own work practice
2. Analyse supply chain for fashion product or service	2.1	Identify key components of supply chain for product or service
	2.2	Identify value added in supply chain against workplace specifications for sustainable outcomes
	2.3	Identify risks in supply chain against workplace specifications for sustainable outcomes
	2.4	Determine implications of extended supply chains on fashion sourcing, production and distribution and on own work
3. Determine impact of digital processes on production	3.1	Identify digital processes used in design and production of fashion items
	3.2	Identify specialised industry software programs and their use in fashion industry practice
	3.3	Identify other commonly used software programs and their use in fashion industry practice
	3.4	Determine implications of digital production processes for own work
4. Determine impact of digital processes on supply	4.1	Identify digital processes engaged in supply and distribution of fashion items
	4.2	Determine implications of digital supply processes for own work
5. Determine impact of ethical and sustainable work practices	5.1	Examine drivers of ethical and sustainable work practices for the fashion industry
	5.2	Determine risks and impacts of unethical and unsustainable practices in the fashion industry
	5.3	Identify implications for fashion business and own work

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTFD5020 Assess impact of current fashion industry innovations and practices.

Assessment Requirements for MSTFD5029 Assess impact of current fashion industry innovations and practices

Modification History

Release 1. Supersedes and is equivalent to MSTFD5020 Assess impact of current fashion industry innovations and practices.

Unit code changed. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified the impact of globalisation on the fashion industry and at least two examples that impact on own work practice
- determined key trends affecting supply and production of textile, clothing and footwear (TCF) items and work flows
- analysed fashion industry supply chains, identifying risks and value added
- determined impacts of industry trends on work practice and identified at least two examples that impact on own work
- identified at least two digital design and production tools and software programs used in the fashion industry and determined impact on own work practice
- identified at least two digital supply and distribution tools and software programs used in the fashion industry and determined impact on own work practice
- determined the effects of unethical work on fashion business and own work.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- ethical practices and requirements specific to the work task, including ethical sourcing requirements in the fashion industry
- regulatory and industry standards for TCF products
- information resources to locate fashion industry innovations and practices
- digital pattern making and grading processes
- trends and impacts on fashion industry practices
- impact of globalisation on the fashion industry
- key components of supply chain for TCF products or services
- concepts of value in fashion industry supply chains
- common risks in fashion industry supply chain
- effect of extended supply chains on fashion sourcing, production and distribution
- digital processes used in supply and distribution

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- specialised and commonly used industry software programs in fashion design and production
- sustainable work practices in the fashion industry
- sustainability drivers in the fashion industry
- supply and sustainability risks for the fashion industry.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - computing equipment and fashion industry software packages
  - digital processing tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Modification History

Release 1. Supersedes and is equivalent to MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry.

Unit code changed. Range of conditions removed. Element removed. Repeated performance criteria removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to identify fibres, yarns, fabrics and textile materials and how they are used in the construction of garments and accessories and in textile production processes.

The unit applies to a range of natural and synthetic materials, which may be used for knitted, woven, spun, tufted and non-woven products. While the unit relates to a comprehensive range of textile, clothing and footwear (TCF) materials, it may be contextualised to a sector or workplace. The unit applies to work conducted in all clothing design, production and merchandising, and textile production and finishing processes using fibres, yarns, fabrics and textiles. It may be conducted in small to large scale workplaces materials in all sectors of the TCF industr and may involve individual and team related activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Distinguish types of	1.1	Distinguish types of fibres and yarns, fabrics and textile

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
TCF materials and production processes		materials used in manufacture of clothing and textile products
	1.2	Identify methods of distinguishing and identifying fibres, yarns and textile materials
	1.3	Identify common and emerging fabrics used in garment industry
	1.4	Identify processes used on raw fibres, basic processed yarns, and finished yarns to create textiles
2. Identify characteristics of fabrics	2.1	Identify fibres used in the construction of different fabrics
	2.2	Identify construction processes of different fabrics
	2.3	Examine a range of fabric types and identify their physical and visual qualities
	2.4	Identify generic and trade names for common fabrics and textile materials
3. Distinguish methods of constructing fabric and textile material	3.1	Identify purposes of different stages in textile product construction process
	3.2	Distinguish basic processes of spinning fibres into yarns and processing yarns into knitted, woven and non-woven textile material
	3.3	Identify textile product construction processes
	3.4	Identify uses of different types of fibres and yarns and their effects on finished products
4. Identify uses of fabrics and textiles	4.1	Identify common uses of a range of fabrics and labelling requirements
	4.2	Identify textile products and their end uses and labelling requirements
	4.3	Identify and measure fabric and textile material quality for identified purpose
	4.4	Identify impact of quality on production processes

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret:
  - work instructions, standard operating procedures (SOPs), and specifications
  - regulatory and industry standards
- Numeracy skills to calculate measurements of fabric and textile products

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry.

Assessment Requirements for MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Modification History

Release 1. Supersedes and is equivalent to MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry.

Unit code changed. Range of conditions removed. Element removed. Repeated performance criteria removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified the labelling requirements of at least five textile materials, according to relevant standards
- identified the types of fibres and the construction process used in five different samples of fabric
- identified physical and visual properties of at least five common fabrics or textiles, including emerging materials, relevant to sector or workplace
- distinguished methods of constructing fabric and textile material
- identified suitable application and end uses of at least five fibres, yarns, fabrics and textile materials, relevant to sector or workplace
- compared fibres, yarns, fabrics and textile materials (minimum one of each) to specifications and quality requirements in an identified sector or workplace.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key components of AS/NZS 1957:1998 Textiles - Care labelling, with variations and additions made by Consumer Protection Notice No. 25 of 2010 relevant to identifying fibres, fabrics and textiles used in textiles, clothing and footwear (TCF) industry
- techniques for identifying fibre, yarn, fabric and textiles, including:
  - natural fibres: cotton, wool, silk and linen
  - synthetic fibres: polyamide, polyester, acrylic, lycra, rayon and acetate
- types of fabrics and textiles and their construction methods:
  - natural and synthetic single yarn fabrics and blends
  - knitted fabrics: weft knits and warp knits
  - woven fabrics: plain, twill, satin, dobby, jacquard and pile
  - non-woven fabrics: felts, nets, braids, bonded and composite
  - emerging smart fabrics

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- features and characteristics of fibres, yarns, fabrics and textile materials:
  - bias
  - stretch
  - fraying
  - feel
  - handle
  - shrinkage
- construction processes for the following fibres, yarns and textiles:
  - spun
  - ply
  - combo
  - blended
  - crimped
  - monofilament
  - multifilament
  - staple spun
  - technical textiles
- methods of identifying fibres:
  - labelling
  - visual
  - handle
  - acetone
  - burn test
- fabric construction processes:
  - knitting
  - weaving
  - blending
  - fusing
  - bonding
  - finishing
- visual features of products:
  - colours
  - textures
  - patterns
  - right side and wrong side
- fabric and textile qualities:
  - firmness
  - softness
  - handle
  - weight

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - grain
  - gauge
  - drape
  - porosity
  - count
  - light penetration
- generic and trade names for common fabrics and textile materials
- fabric and textile uses.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including different fibres, fabrics and textiles required in performance evidence.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTGN2014 Operate computing technology in a TCF workplace

Modification History

Release 1. Supersedes and is equivalent to MSTGN2009 Operate computing technology in a TCF workplace.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to use computing technology in a textiles, clothing and footwear (TCF) workplace. It involves identifying the types and sources of information required, and using computing technology to access, enter, manipulate and store that information. The equipment may include computers and other equipment based on computing technology and must be related to work role.

The unit applies to small to large scale workplaces in all sectors of the TCF industry and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to operate computing technology	1.1	Determine job requirements from specifications, job sheets and work instructions
	1.2	Identify computing technology relevant to work role and its impact on work role and workplace outcomes

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Identify computing technology that is suitable for performing work tasks
	1.4	Identify information and data that need to be accessed, enter and stored, and source of that information and data
	1.5	Identify key features of technology, and ergonomic conditions and procedures for start-up and shutdown
	1.6	Identify relevant software application menus, functions and commands to locate, input and store information and data
	1.7	Identify skills required for software application and source training or support if required
2. Access information and data	2.1	Navigate relevant software application menus, functions and commands to locate information and data
	2.2	Retrieve information and data according to workplace procedures
	2.3	Manipulate information and data to produce reports, using required numerical operations
	2.4	Check to confirm that information and data meet work requirements
3. Input and store information and data	3.1	Use required software menus, functions and commands to enter and manipulate information and data
	3.2	Enter, remove and change information and data
	3.3	Save information and data, and store in file structure according to workplace requirements
	3.4	Follow procedures for shutting down, logging off and exiting computing technology

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to:
  - interpret work instructions, standard operating procedures (SOPs) and safe work practices
  - navigate computer software applications

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTGN2009 Operate computing technology in a TCF workplace.

Assessment Requirements for MSTGN2014 Operate computing technology in a TCF workplace

Modification History

Release 1. Supersedes and is equivalent to MSTGN2009 Operate computing technology in a TCF workplace.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria of this unit, and:

- accessed, operated and effectively used computer technology in a textiles, clothing and footwear (TCF) workplace
- navigated at least two software applications relevant to own work role
- entered, retrieved and manipulated at least two sets of information and data
- digitally produced at least two different reports that use more than one feature of the software in each report.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safe and ergonomic work practices and procedures for use with computer technology, and use of personal protective equipment (PPE)
- functions and capabilities of computing technology used in work role
- impact of technology use on work role
- functions of software applications used in work role:
  - word processing
  - spreadsheets
  - databases
  - email programs
  - internet browsers
  - publication
  - design
- quality standards and practices that apply to technology use in TCF industry
- file structure and storage requirements
- types and sources of data used in TCF industry
- manuals and instructional material for computer technology
- impact of technology on own work operations.

MSTGN4014 Produce and analyse spreadsheets

Modification History

Release 1. New unit

Application

This unit of competency describes the skills and knowledge required to design and set up spreadsheets to analyse production and financial performance.

The unit applies to individuals employed in a range of production settings, who design and work with spreadsheets. Work may be conducted in all sectors of the textiles clothing and footwear industry and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Select and prepare resources	1.1	Determine job requirements from specifications, job sheets and work instructions
	1.2	Identify spreadsheet task requirements in relation to data entry, storage, output and presentation
2. Create spreadsheet	2.1	Ensure data is entered, checked and amended to maintain consistency of design and layout
	2.2	Format spreadsheet using software functions to adjust page and cell layout to meet information requirements
	2.3	Ensure formulas are tested and used to confirm output that

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		meets task requirements
	2.4	Use manuals, user documentation and online help to support best practice in spreadsheet design and production
3. Produce charts	3.1	Select chart type and design that enable valid representation of numerical data to show cost, performance and activity
	3.2	Create charts using required data range in spreadsheet
	3.3	Modify chart type and layout using formatting features
4. Analyse data	4.1	Consolidate data with standard reporting format to report cost, performance and activity
	4.2	Analyse trends in data to identify inventory and cost outcomes
	4.3	Review and update spreadsheet components to match projected outcomes
	4.4	Report outcome of analysis to management

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Numeracy skills to:
  - use mathematical processes, including addition, subtraction, multiplication, division, percentages, ratios and proportions and volumes
  - calculate with whole numbers, fractions, decimals and percentages
  - estimate and calculate projected outcomes, including margins and profits

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSTGN4014 Produce and analyse spreadsheets

Modification History

Release 1. New unit

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria of this unit, and:

- produced two different spreadsheets and analysed data to describe:
- production cost, performance and activity
- mark-up, margins and profits.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose of comparing cost with budget
- type of data the business uses to record performance
- key features of time series data presented in tables and graphs
- trends illustrated in tables and graphs
- methods used to calculate and analyse production and financial performance.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including computing equipment and software to produce spreadsheets.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTGN5010 Coordinate quality assurance for TCF products and services

Modification History

Release 1. Supersedes and is equivalent to MSTGN5002 Coordinate quality assurance for TCF products and services.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to coordinate quality assurance of textiles, clothing and footwear (TCF) products and services to ensure they meet quality standards.

The unit applies to all sectors of the TCF industry. 'Supplier' in this unit may refer to a supplier to the workplace, or where the workplace is the supplier. Work may be conducted in small to large scale workplaces and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
		services according to legal and ethical requirements
	1.4	Make recommendations concerning supplier ability to comply with quality standards according to work health and safety (WHS) requirements, value for money, and where relevant, quality accreditation requirements
2. Establish quality assurance agreement with supplier or customer	2.1	Identify and document specifications of goods and services to be supplied
	2.2	Confirm precise quality requirements with supplier and customer
	2.3	Negotiate agreed quality assurance system and delivery dates
	2.4	Establish and agree on verification method and systems and procedures for dispute settlement
	2.5	Determine recording system for products and services that ensures traceability, where required
3. Check and record quality performance	3.1	Work with relevant personnel to establish procedures to check that materials and products conform to quality standards
	3.2	Coordinate checks of quality of materials, services and equipment delivered according to WHS requirements
	3.3	Initiate corrective action for non-conformance, to obtain and maintain established quality standards
	3.4	Maintain records of quality assurance process and prepare reports according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to manage expectations and conflict that may arise, and effectively resolve issues with non-conformance to quality standards
- Problem solving skills to challenge and test options to resolve problems with quality

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSTGN5010 Coordinate quality assurance for TCF products and services

Modification History

Release 1. Supersedes and is equivalent to MSTGN5002 Coordinate quality assurance for TCF products and services.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria of this unit, and:

- established quality assurance expectations for at least three products or a small range by:
  - documenting specifications of products to be supplied, and related services
  - confirming precise quality requirements with supplier or customer
  - negotiating agreed quality assurance system and delivery dates
  - liaised with suppliers and customers to negotiate agreement for all aspects of the quality process for at least three products or a small range, including establishing a dispute resolution process
- maintained records of quality assurance process for at least three products or a small range, and prepared records according to workplace procedures.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- regulatory and industry standards and codes of practice for textiles, clothing and footwear (TCF) products
- workplace quality policies and procedures used in TCF industry
- production processes, materials and products used in TCF industry
- characteristics of materials, products, services and equipment provided by external suppliers
- quality methodologies, their capabilities, limitations and applicability to TCF industry
- relevant measurement techniques and quality checking procedures used in TCF industry
- mechanisms for dispute resolution used in the workplace
- communication techniques to ensure quality in production
- workplace recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including industry and workplace standards for quality assurance
- modelling of industry operating conditions, including access to suppliers, contractors and production personnel.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTGN5011 Work with international TCF supply chains

Modification History

Release 1. Supersedes and is equivalent to MSTGN5003 Work with international TCF supply chains.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to work with international textiles, clothing and footwear (TCF) supply chains. It involves working with international suppliers and customers of goods and services, according to established contractual agreements.

The unit applies to small to large scale workplaces in all sectors of the TCF industry, and may involve individual and team activities. Work involves the application of initiative and judgement, and sensitivity to cultural and language differences. Working with international suppliers and customers includes implementing import and export practices, building commercial relationships, and working effectively with local customs, communications and industry work practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to work with international supply chain	1.1	Determine job requirements from contracts, orders, specifications, job sheets and work instructions

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.2	Identify members in international supply chain for products and services relating to job requirements within own area of responsibility
	1.3	Determine value added by each supplier
	1.4	Identify supplier characteristics and practices, and any acute, chronic, unethical or unsustainable issues affecting suppliers
	1.5	Identify import and export regulations and practices of relevant country
	1.6	Research local customs and workplace practices and identify relevant factors affecting supply chain operations
	1.7	Access and assess information on local industry markets and conditions and identify transportation and shipping practices
2. Confirm relationships with international suppliers and customers	2.1	Review past relations with suppliers and customers to identify relationship history
	2.2	Confirm specifications for international contracts
	2.3	Identify quality assurance processes and confirm communication channels
	2.4	Establish and maintain ongoing communication to foster positive commercial relations
	2.5	Adhere to relevant identified Australian and international export and import regulations
3. Set up process for supply operations	3.1	Document supply operation process
	3.2	Determine parameters for quality delivery
	3.3	Formalise and document contract with supplier
4. Monitor international supply operations	4.1	Check compliance of international supplier or customer with specified contractual requirements
	4.2	Communicate and monitor required quality standards
	4.3	Identify, report and record non-compliance and investigate

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		to determine causes
	4.4	Seek feedback from international supplier contact
5. Contribute to implementing and recording improvements to global production operations	5.1	Review outcomes of monitoring and feedback
	5.2	Identify opportunities for corrective and preventative action to improve commercial relationship with international supplier or customer
	5.3	Recommend and activate corrective and preventative actions to improve global production operations
	5.4	Communicate changes to required personnel in a logical and clear manner
	5.5	Monitor changes to confirm that production quality and efficiency improve
	5.6	Maintain international production and supply documentation, monitor records, and prepare reports according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to:
  - interpret import and export regulations and supply documentation
  - check contractual requirements
- Oral communication skills to establish networks, negotiate agreements, and resolve conflicts
- Initiative and enterprise skills to maintain drive, identify new opportunities, and investigate options
- Problem solving skills to rectify misunderstandings and issues with non-compliance
- Technology skills to set up and maintain supplier database

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSTGN5011 Work with international TCF supply chains

Modification History

Release 1. Supersedes and is equivalent to MSTGN5003 Work with international TCF supply chains.

Unit code changed. Range of conditions removed. Element removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria of this unit, and:

- work with at least one international textiles, clothing and footwear (TCF) supply chain according to relevant standards, and Australian and international export and import regulations
- investigated possible partners in the international supply chain able to provide at least three products or one small range of products within own area of responsibility
- investigated, interpreted, recorded and used data about international supply chain characteristics and operations, supplier characteristics and practices, import and export regulations, local customs and workplace practices of at least two relevant countries.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task
- regulatory and industry standards for TCF goods and services
- production control and efficiency processes used in work role
- product and process specifications used in work role
- potential issues with selected fabrics and raw materials
- product market and trends relevant to work role
- practices and procedures for international supply arrangements relevant to work role
- ethical sourcing requirements and sustainable work practices used in TCF industry
- quality assurance processes used in TCF industry
- production processes relevant to work role
- international regulations, pricing structures, import and export factors, production times, quality assurance factors, and production and marketing arrangements, relevant to work role
- communication and negotiation techniques to support effective international and domestic supply arrangements
- workplace recording and reporting requirements.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including computing equipment and software packages
- modelling of industry operating conditions, including access to international suppliers.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTGN6007 Manage production processes

Modification History

Release 1. Supersedes and is equivalent to MSTGN6005 Manage production processes.

Unit code changed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to manage a production facility in a textiles, clothing and footwear (TCF) workplace.

The unit requires judgement in planning, technical and supervisory activities related to operations and processes in substantially non-routine situations. Work is performed under limited guidance in line with a broad plan, budget or strategy as part of the major functional area or in highly specialised situations requiring a range of skills. Work may be conducted in small to large scale workplaces in all sectors of the TCF industry and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Review production scheduling	1.1	Review production schedule to determine effective machinery operation, time and cost efficiency in the use of facilities, and suitable use of personnel
	1.2	Make recommendations for improvement and change
	1.3	Modify schedule according to recommendations, production

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		requirements and workplace procedures
2. Facilitate resolution of work flow problem	2.1	Facilitate meetings to identify methods to solve process and work flow problems
	2.2	Use knowledge of process improvement and efficient production techniques and systems to assist in identifying and resolving process and work flow problems
	2.3	Negotiate options to resolve production problems with team
	2.4	Implement recommended problem-resolution option, in line with work health and safety (WHS) practices
3. Monitor production improvements and variations	3.1	Monitor improvements and variations to production to ensure outcomes meet specifications, production schedule, workplace requirements, according to WHS requirements
	3.2	Collate and analyse data to evaluate effectiveness of production improvements and variations
	3.3	Make decisions on improvements and variations to production within limits of own responsibility
4. Create records and reports	4.1	Maintain management records and prepare reports
	4.2	Make presentations on production performance and developments at management meetings

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to initiate actions and build positive relationships
- Numeracy skills to analyse trends in production data
- Teamwork skills to motivate, lead and stretch a production team to achieve agreed outcomes
- Problem solving skills to develop creative solutions to complex problems

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSTGN6007 Manage production processes

Modification History

Release 1. Supersedes and is equivalent to MSTGN6005 Manage production processes.

Unit code changed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria of this unit, and:

- effectively managed at least one production process to produce textile, clothing and footwear (TCF) products to achieve agreed outcomes.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety requirements specific to the work task
- regulatory and industry standards for TCF products and production processes
- Australian Standards relevant to workplace and production processes
- management and production processes, machines and production software, relevant to job role
- workplace systems relating to production processes
- workplace products and their make-up
- work flow control techniques and methods to resolve associated work flow problems
- environmental aspects of workplace activities in production process
- workplace procedures and reporting or recording processes relevant to job role
- regulatory requirements and codes of practice relating to managing production processes
- hazard identification and control measures associated with managing production processes.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including TCF production line
- modelling of industry operating conditions, including access to production team workers.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTGN6008 Negotiate and manage contracts to produce finished design products

Modification History

Release 1. Supersedes and is equivalent to MSTGN6004 Negotiate and manage contracts to produce finished design products.

Unit code changed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge required to negotiate and manage design production contracts. It involves establishing performance standards and monitoring procedures to ensure contract specifications are achieved.

The unit of competency applies to contracts, which may include local and international supply and production of materials, components, and complete products and accessories used to produce finished design products. It may also be applied to contracts relating to providing distribution, transportation, and sales and marketing services. Work may be conducted in small to large scale workplaces in all sectors of the textiles, clothing and footwear industry, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Generic

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Establish contract requirements	1.1	Identify contract requirements in collaboration with required personnel and workplace procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.2	Establish key criteria to define contract parameters
	1.3	Review previous contracts to guide preparation of contract and selection of contractors
	1.4	Prepare contract detailing required products and services and advertise and/or circulate in relevant media
2. Confirm contract agreement	2.1	Review and shortlist contract applications according to applicant's ability to provide goods and services to required standards
	2.2	Select contract supplier and negotiate contract agreement
	2.3	Confirm agreement deliverables and quality and performance standards
	2.4	Confirm documentation, communication and performance monitoring processes with contract supplier
	2.5	Develop risk management plan according to workplace requirements
	2.6	Complete procurement documentation according to workplace procedures
3. Implement and manage contract agreement	3.1	Monitor performance to ensure standards and targets are being achieved
	3.2	Manage change requests from stakeholders
	3.3	Identify and address inconsistencies and missed targets to re-establish required performance levels
	3.4	Consult required personnel to assist in monitoring performance of contract suppliers
	3.5	Identify and implement improvement opportunities to contract delivery, where possible
	3.6	Update documentation throughout implementation of contract
	3.7	Manage supplier payments according to contract agreement

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
4. Evaluate contract implementation and maintain records	4.1	Evaluate implementation and effectiveness of contract in meeting contract requirements, including quality outcomes
	4.2	Identify and drive improvements to future contracting procedures
	4.3	Provide feedback to supplier to assist in improving future performance
	4.4	Prepare records and maintain reports

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to:
  - maintain networks and build productive relationships with stakeholders
  - effectively address conflicts that arise with contractors
- Numeracy skills to successfully manage budgets and contractor payments
- Initiative and enterprise skills to maintain drive and consistent focus on timely delivery of quality products and services
- Problem solving skills to address contractor performance issues as they arise

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSTGN6008 Negotiate and manage contracts to produce finished design products

Modification History

Release 1. Supersedes and is equivalent to MSTGN6004 Negotiate and manage contracts to produce finished design products.

Unit code changed. Range of conditions removed. Foundation skills information added. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria of this unit, and:

- negotiated and managed at least two different contracts that contribute to producing finished design products, including:
  - one with a supplier
  - one with a stakeholder or end user.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal, ethical and work health and safety requirements specific to the work task, including:
  - legal requirements for contracting
  - ethical sourcing and sustainable work practices
- regulatory and industry standards for textiles, clothing and footwear products
- Australian and international requirements to eradicate modern slavery
- principles of quality management, including their application and delegation of responsibilities in a contract
- procedures for documenting supplier contracts
- workplace procurement practices and procedures
- contract management principles and practices
- contractor performance monitoring and management methods
- workplace financial and accounting systems required to manage contracts
- quality assurance standards and practice to ensure compliance.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- use of suitable facilities, equipment and resources, including computing equipment and contract management software system
- modelling of industry operating conditions, including access to suppliers and contractors.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4005 Select, produce and adjust casts for accommodative orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF5001A Select, produce and adjust casts for accommodative orthoses.

Application

This unit of competency describes the skills and knowledge required to select, produce and adjust casts for accommodative orthoses.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner, or someone working directly with medical grade footwear practitioners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Clarify assessments and prescriptions	1.1	Clarify client requirements and confirm necessary information has been provided
		1.2	Consult other parties to clarify additional information
2.	Select stock accommodative orthoses	2.1	Assess stock last against required foot shape and size to determine if match is suitable
		2.2	Assess stock accommodative orthoses against required shape and size to determine if match is suitable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
		2.3	Fit and adjust stock accommodative orthoses according to supplier specifications
3.	Produce accommodative orthoses casts	3.1	Select appropriate construction techniques and materials to modify or produce accommodative orthoses
		3.2	Take negative casts for accommodative orthoses using selected materials
		3.3	Produce positive casts to give desired shape and dimensions for accommodative orthoses according to work health and safety (WHS) practices
		3.4	Assemble accommodative orthoses to comply with design specifications
4.	Finalise production of accommodative orthoses casts	4.1	Perform trial fitting to review fit and function of orthoses cast
		4.2	Check, adjust and refine orthoses cast to ensure it complies with design requirements and established standards for producing accommodative orthoses
		4.3	Record accommodative orthoses cast details in client file, and complete associated record keeping activities

Foundation Skills

This section describes those language, literacy and numeracy skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to interact effectively with client and elicit required detail about accommodative orthoses
- Numeracy skills to accurately measure shape and size of feet and identify differences with shape and dimensions of stock lasts
- Problem solving skills to address accommodative orthoses design and construction issues

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF5001A Select, produce and adjust casts for accommodative orthoses.

Assessment Requirements for MSTMF4005 Select, produce and adjust casts for accommodative orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF5001A Select, produce and adjust casts for accommodative orthoses.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- selected, produced and adjusted casts for accommodative orthoses for at least two different clients with different needs.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of accommodative orthoses design and how they are used to meet specified requirements
- impact of medical problems and patient requirements on process for making accommodative orthoses
- applied anthropometrics of the foot, including the variables in, and effects of, physical force systems on the body, and other physical characteristics of commercial footwear
- accommodative orthoses standards
- diagnostic and definitive orthoses constructions
- modification processes to adjust and refine orthoses
- construction techniques, materials, tools and equipment used to produce casts to meet specifications, including hand and machine-based techniques
- vacuum forming and heat moulding techniques required to produce the performance evidence
- legal, ethical and work health and safety (WHS) requirements associated with producing and adjusting accommodative orthoses
- general housekeeping policies and procedures, including cleaning agents and equipment used with orthoses.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- a workspace used to produce and adjust casts for accommodative orthoses using hand and machine-based techniques
- safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4006 Fit medical grade footwear and orthoses that are not complex

Modification History

Release 1. Supersedes and is equivalent to LMTMF5002A Fit, trial and review medical grade footwear and orthoses (up to medium complexity and risk conditions).

Application

This unit of competency describes the skills and knowledge required to fit, trial and review medical grade footwear and orthoses for foot conditions that are up to medium complexity and risk, including where:

- corrections to the foot structure are required
- client is suffering foot-related pain or discomfort
- ulceration is not present
- there is only a single risk factor, which may include age, systemic problems such as diabetes (insulin dependent), haemophilia, peripheral vascular disease, neuropathy, ulcers, missing toes and lower limb amputations.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner, or someone working directly with medical grade footwear practitioners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Clarify assessments and prescriptions	1.1	Clarify client requirements and confirm necessary information has been provided

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
		1.2	Consult other parties to clarify any additional information
2.	Conduct diagnostic fitting for medical grade footwear and orthoses	2.1	Use prefabricated or partially fabricated medical grade footwear and orthoses to conduct a diagnostic fitting
		2.2	Evaluate diagnostic fitting and review proposed construction and materials
		2.3	Conduct trial to check function of footwear and orthoses
3.	Conduct trial and final fittings of medical grade footwear and orthoses	3.1	Fit medical grade footwear and orthoses in preparation for trial usage and adjust after consultation with client
		3.2	Conduct trial of real-life usage of footwear and orthoses, ease of fitting and compliance with design and production specifications
		3.3	Assess outcomes of trial and adjust footwear after discussion with client
		3.4	Make follow-up arrangements with client
4.	Conduct client follow-up and review	4.1	Re-examine foot and lower limb and compare collected data with previous observations
		4.2	Take measurements of foot, footwear and orthoses and compare to previous findings
		4.3	Establish and confirm extent of changes required to medical grade footwear and orthoses
		4.4	Record new information in client records following established data recording procedures
		4.5	Prepare specifications for development of new, or modification of existing, footwear and orthoses
		4.6	Maintain ongoing consultation with service providers and client during fitting and follow-up stages
		4.7	Complete record keeping procedures and administrative tasks

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to interact effectively with clients and suppliers
- Numeracy skills to develop accurate specifications for new and adjusted medical grade footwear and orthoses
- Problem-solving skills to evaluate and address common foot and foot-related problems

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF5002A Fit, trial and review medical grade footwear and orthoses (up to medium complexity and risk conditions).

Assessment Requirements for MSTMF4006 Fit medical grade footwear and orthoses that are not complex

Modification History

Release 1. Supersedes and is equivalent to LMTMF5002A Fit, trial and review medical grade footwear and orthoses (up to medium complexity and risk conditions).

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria and foundation skills of this unit, and:

- fitted medical grade footwear or orthoses for two different clients with different needs.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of medical grade footwear and orthotic design and how they are used to meet specified requirements
- applied anthropometrics of the foot, including the variables in, and effects of, physical force systems on the body, and other physical characteristics of commercial orthoses and footwear
- principles of biomechanics and kinesiology that directly influence the design and development of medical grade footwear and orthoses
- medium complexity and risk foot conditions and how each should be addressed
- anatomy, physiology and pathology required to carry out assessments up to and including medium-risk foot-related medical conditions
- common medical conditions associated with foot-related problems
- variables to accommodate differing foot measurements and general foot shape needs:
  - individual tissue tolerances
  - nature and extent of functional demands
  - existing foot characteristics, including joint stiffness and prominent deformities
  - potential interventions involving casting and last
  - styles and material characteristics
- assessment and measurement techniques to:
  - evaluate foot and related total body biomechanics
  - observe general physical condition and presenting medical conditions
  - directly examine foot and related structures, including palpation
  - obtain data of client's walk pattern using gait analysis techniques
  - obtain measurements of foot, footwear and orthoses

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - observe and clarify pathology, deformities, muscle forms, and joint functions
  - use computer-aided equipment
  - discuss client's expectations of medical grade footwear and orthoses
  - determine time required for adaptation to new footwear or orthoses
  - determine client's ability to comply with instructions on use of footwear or orthoses
- measurement methods:
  - statically
  - dynamically
  - with and without functional simulation
  - weight bearing and gait pattern analysers
  - with manipulations to achieve greater correction or accommodation of the foot
- footwear, orthoses, construction, standards and terminology
- diagnostic and definitive orthoses constructions
- modification processes to adjust and refine orthoses
- materials, tools and equipment used to fit medical grade footwear and orthoses
- legal, ethical and work health and safety (WHS) requirements associated with fitting medical grade footwear and orthoses
- general housekeeping policies and procedures, including cleaning agents and equipment used with medical grade footwear and orthoses.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment, technology and resources, including a workspace used to fit medical grade footwear and orthoses
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4007 Produce accommodative orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF5003A Produce accommodative orthoses.

Application

This unit of competency describes the skills and knowledge required to produce and fit accommodative orthoses that are made to assist with foot problems that require maintenance or pressure relief, such as pressure sores or metatarsalgia, without correcting the foot structure or position.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner, or someone working directly with medical grade footwear practitioners.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Pre-requisite Unit

N/A

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Determine initial job requirements	1.1	Select accommodative orthoses materials that reflect requirements of client condition and requirements for durability and performance
	1.2	Consult other health professionals to clarify or provide additional information
2. Produce technical drawing of accommodative orthoses	2.1	Produce initial three-dimensional (3D) design of cast
	2.2	Specify materials to be used in accommodative orthoses construction

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements	Performance Criteria	
	2.3	Specify anatomical matching, key references and specific performance requirements of accommodative orthoses
	2.4	Specify dimensions and tolerances using appropriate drawing symbols
3. Produce and post basic form	3.1	Review cast specifications for accuracy, material selection, 3D design and consistency with technical drawing and prescription if applicable
	3.2	Make changes and refinements as necessary, including balancing aesthetic needs with footwear and condition requirements
	3.3	Produce basic form to fitting accuracy of ± 1mm
	3.4	Correct and post basic form to accommodative orthoses standard
4. Conduct trial fitting of accommodative orthoses	4.1	Produce accommodative orthoses for trial
	4.2	Modify existing shoes for trial accommodative orthoses
	4.3	Perform diagnostic fitting of accommodative orthoses
	4.4	Interpret results of fitting for possible changes to accommodative orthoses design and materials
5. Manufacture accommodative orthoses	5.1	Construct accommodative orthoses to specifications
	5.2	Make allowance for variation between trial and final accommodative orthoses
	5.3	Check dimensions and shape of accommodative orthoses against specifications
	5.4	Modify existing shoes for accommodative orthoses if necessary
	5.5	Finish off accommodative orthoses to established quality standards
6. Deliver and fit accommodative orthoses	6.1	Check fitting and make adjustments as required to meet client needs
	6.2	Clarify function, management and maintenance procedures for accommodative orthoses with client

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements	Performance Criteria	
	6.3	Explain arrangements for follow-up to client
	6.4	Complete record keeping procedures and administrative tasks
7. Follow up client	7.1	Check function and state of accommodative orthoses during follow-up
	7.2	Assess client condition, adjust medical grade footwear treatment where required, and update client file

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to interact effectively with clients and suppliers
- Numeracy skills to:
  - take accurate measurements
  - identify and confirm timelines and costs

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF5003A Produce accommodative orthoses.

Assessment Requirements for MSTMF4007 Produce accommodative orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF5003A Produce accommodative orthoses.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- produced accommodative orthoses for two different clients with different needs.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of accommodative orthoses to suit differing needs
- elements and principles of medical grade orthoses and footwear design and how orthoses are used to meet specified requirements
- applied anthropometrics of the foot, including the variables in and effects of physical force systems on the body, and other physical characteristics of commercial orthoses and footwear
- construction techniques, tools and equipment used to produce and modify accommodative orthoses to meet specifications, including hand and machine-based techniques
- product and testing quality standards
- materials typically used to produce accommodative orthoses:
  - rubber
  - ethyl vinyl acetate (EVA) and polyurethane foams
  - cork
  - leather
- biomechanical requirements of orthoses, including volume expansion and functional and positioning requirements
- computer-aided design and production techniques
- safe work practices associated with producing and fitting accommodative orthoses.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment, technology and resources, including:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- a workspace used to produce and adjust orthoses using hand and machine-based techniques
- safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4008 Produce negative and positive casts for lasts and corrective orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF6004A Produce negative and positive casts for lasts and/or corrective orthoses.

Application

This unit of competency describes the skills and knowledge required to produce negative casts and produce and modify positive casts and lasts. Casts are restricted to casts of lower limb below the knee.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner, or someone working directly with medical grade footwear practitioners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Clarify assessments and prescriptions	1.1	Confirm requirements with client and confirm necessary information has been provided
	1.2	Consult other parties to clarify additional information for cast and last development
2. Prepare for casting	2.1	Identify and mark biomechanical and functional requirements of cast
	2.2	Take measurements and drawings as required

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements	Performance Criteria	
	2.3	Select casting techniques appropriate to established requirements
	2.4	Choose appropriate materials to fabricate cast
3. Produce below knee negative cast	3.1	Make a negative cast allowing for biomechanical requirements, volume expansion, and functional and positioning requirements
	3.2	Check quality and requirements of cast, and modify as required
	3.3	Determine and document job specifications for constructing positive cast
4. Produce positive cast and last	4.1	Produce positive cast from last to meet requirements for individual shape, alignment and specific designs, and allowing for biomechanical requirements, volume expansion, and functional and positioning requirements
	4.2	Fabricate and modify cast to meet specific footwear and orthoses design specifications
	4.3	Check shape of cast and last against design specifications
5. Adjust positive cast	5.1	Check shape of positive cast against client measurements, technical drawings and design specifications, allowing for biomechanical requirements, volume expansion, and functional and positioning requirements
	5.2	Add, cut or grind material according to specifications to adjust positive cast and last
6. Perform record keeping procedures	6.1	Record detail of casting to client's file
	6.2	Complete administrative tasks in line with workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Numeracy skills to measure general foot shape and translate those measurements into lasts and casts that allow for individual functional tolerances
- Problem solving skills to address issues that arise in the design and production of casts

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF6004A Produce negative and positive casts for lasts and/or corrective orthoses.

Assessment Requirements for MSTMF4008 Produce negative and positive casts for lasts and corrective orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF6004A Produce negative and positive casts for lasts and/or corrective orthoses.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- produced one negative cast for a corrective orthosis, and one positive cast from a last for a corrective orthosis to suit client needs.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of orthoses and medical grade footwear design and how they are used to meet specified requirements
- applied anthropometrics of the foot, including the variables in and effects of physical force systems on the body, and other physical characteristics of commercial orthoses and footwear
- fabrication tools and techniques used to manufacture cast devices, including:
  - hand and machine methods
  - computer-aided processes
  - mechanical duplicators
  - pour techniques
  - combinations of the above processes
- materials used to manufacture casts, including:
  - plaster
  - wood
  - thermoset resin
  - expandable foams
  - casting polyurethane
- diagnostic and definitive orthoses constructions
- modification processes to adjust and refine orthoses
- safe work practices associated with producing casts and lasts
- general housekeeping policies and procedures, including cleaning agents and equipment used with orthoses.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a workspace used to produce casts for lasts and orthoses using hand and machine-based techniques
  - safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4009 Produce custom-made medical grade footwear

Modification History

Release 1. Supersedes and is equivalent to LMTMF6005A Produce custom-made medical grade footwear.

Application

This unit of competency describes the skills and knowledge required to produce custom-made medical grade footwear, including shoe types that consist of slip-on, shoe, boot, sandal, inner shoe and orthotic incorporation.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner, or someone working directly with medical grade footwear practitioners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Clarify client order	1.1	Confirm required information has been provided in job requirements and order form
		1.2	Consult other parties to clarify or provide additional information about medical grade footwear requirements
2.	Determine resources required to manufacture medical grade footwear	2.1	Confirm availability of materials of type and quality required to manufacture footwear components
		2.2	Select materials to match design requirements of ***footwear components***

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
		2.3	Order special or one-off materials from suppliers and confirm availability within specified timelines
3.	Check shoe last and pattern	3.1	Check the last to confirm that it complies with order form and is free of construction faults
		3.2	Conduct a trial last fitting prior to cutting pattern
		3.3	Clarify design features with client and cut pattern
4.	Construct and finish footwear	4.1	Make mock-up of design to order specifications
		4.2	Check equipment to confirm compliance with manufacturer operating procedures and WHS practices
		4.3	Cut required footwear pieces from patterns and sew and close upper
		4.4	Prepare, cut and build componentry, including inner soles and orthotic componentry
		4.5	Prepare and last footwear
		4.6	Construct sole, heel and build-up and attach bottom, including external raisers, as required
		4.7	Liaise with relevant personnel during production of custom-made medical grade shoes to confirm details
		4.8	Undertake finishing off, add final components and check product to ensure compliance with established quality standards prior to process end
		4.9	Complete record keeping procedures and administrative tasks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret details of customer orders, work specifications and standard operating procedures
- Oral communication skills to interact effectively with clients, medical grade footwear practitioners, podiatrists and technicians

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Problem solving skills to address design and construction issues that arise when producing quality custom-made medical grade footwear

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF6005A Produce custom-made medical grade footwear.

Assessment Requirements for MSTMF4009 Produce custom-made medical grade footwear

Modification History

Release 1. Supersedes and is equivalent to LMTMF6005A Produce custom-made medical grade footwear.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- produced custom-made medical grade footwear to suits the needs of one client.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of medical grade footwear design and how they are used to meet specified requirements
- medical grade footwear and component construction and standards, including:
  - diagnostic and definitive constructions
  - modification processes to adjust and refine footwear
  - special construction details and constraints
- procedures and techniques for footwear component assembly
- suitable shoe types and materials used in constructing medical grade footwear, including:
  - full range of conventional leathers
  - textiles, plastic sheeting, appropriate padding, reinforcement
  - sole and related materials
  - fastening and closing devices
  - specific items, including adhesives, threads and steel toe caps
  - new and emerging footwear materials
- medical grade footwear terminology, components and functions:
  - soles
  - insoles
  - heels
  - unit soles
  - ethyl vinyl acetate (EVA) branded outsoles
  - thermoplastic rubber (TPR) soles
  - toe puffs
  - counters

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- eyelets
- tools and equipment used to construct medical grade footwear:
  - hand tools
  - vacuum forming and heat moulding equipment
  - sewing machines
  - sanders and polishers
- safe work practices associated with producing custom-made medical grade footwear.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a workspace used to produce custom-made medical grade footwear using hand and machine-based techniques
  - safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4010 Fit complex custom-made medical grade footwear and orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF6006A Fit, trial and review custom-made medical grade footwear and orthoses (high complexity and risk conditions).

Application

This unit of competency describes the skills and knowledge required to fit, trial and review medical grade footwear and orthoses for foot conditions that are of high complexity or high risk, including situations where:

- correction to the foot structure is required
- several risk factors apply
- condition is painful
- there are skin conditions to be accommodated
- foot has suffered severe traumatic injury.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner, or someone working directly with medical grade footwear practitioners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTMF4006 Fit medical grade footwear and orthoses

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Clarify assessments and prescriptions	1.1	Clarify client requirements and confirm necessary information has been provided
		1.2	Consult other parties to clarify or provide additional

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
			information about footwear requirements
2.	Conduct trial last and diagnostic fitting	2.1	Check mock-up is to specifications
		2.2	Conduct and evaluate a diagnostic fitting on last
		2.3	Review proposed construction and materials
		2.4	Conduct trial to check function of footwear and orthoses
3.	Conduct trial and final fittings	3.1	Fit medical grade footwear and orthoses and make required adjustments after consultation with client
		3.2	Conduct trial fitting of footwear and orthoses to reflect real-life usage, ease of fitting and compliance with design and production specifications
		3.3	Provide client with details for how to adapt to new footwear and orthoses and make arrangements for follow-up
4.	Conduct client follow-up and review	4.1	Re-examine foot and lower limb and compare data collected with previous observations
		4.2	Take measurements of foot, footwear and orthoses and compare to previous findings
		4.3	Take new measurements to confirm and establish extent of changes required to footwear and orthoses
		4.4	Record client and measurement information relating to changes to footwear and orthoses
		4.5	Prepare specifications for development of new, or modification of existing, footwear and orthoses
		4.6	Maintain ongoing consultation with service providers and health professionals
		4.7	Complete record keeping procedures and administrative tasks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Oral communication skills to interact effectively with clients with complex footwear and orthoses needs, technicians and health professionals
- Writing skills to maintain accurate records, and document measurements and test results
- Self-management skills to adhere to client confidentiality and ethical standards

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF6006A Fit, trial and review custom-made medical grade footwear and orthoses (high complexity and risk conditions).

Assessment Requirements for MSTMF4010 Fit complex custom-made medical grade footwear and orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF6006A Fit, trial and review custom-made medical grade footwear and orthoses (high complexity and risk conditions).

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- fitted complex custom-made medical grade footwear or orthoses for at least one client with a foot condition that is highly complex or high risk.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- procedures for assessing performance of footwear and orthoses
- methods to communicate effectively with clients and carers
- methods to physically examine the foot, footwear and orthoses
- elements and principles of medical grade footwear, orthotic and prosthetic design and how they are used to meet specified requirements
- applied anthropometrics of the foot, including the variables in and effects of physical force systems on the body, and other physical characteristics of commercial orthoses and footwear
- principles of biomechanics and kinesiology that directly influence the design and development of medical grade footwear and orthoses
- anatomy, physiology and pathology required to carry out assessments up to and including high-risk foot-related medical conditions
- common medical conditions associated with foot-related problems
- high complexity and high risk foot conditions
- variables to accommodate differing foot measurements and general foot shape needs:
  - individual tissue tolerances
  - nature and extent of functional demands
  - existing foot characteristics, including joint stiffness and prominent deformities
  - potential interventions involving casting and last
  - styles and material characteristics
- measurement methods:
  - statically
  - dynamically
  - with functional simulation

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - weight bearing-and gait pattern analysers
  - with manipulations to achieve greater correction or accommodation of the foot
- locations that fittings can take place
- safe work practices associated with fitting footwear and orthoses for clients with foot conditions that are of high complexity or high risk.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTMF4011 Produce corrective orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF6007A Produce corrective orthoses.

Application

This unit of competency describes the skills and knowledge required to produce corrective orthoses. Corrective orthoses are made to assist with problems that require corrective posting or support of the foot or ankle, for example, a drop foot splint, inner shoe to stabilise foot or ankle complex and exclude movement, or to correct excessive rear foot pronation.

Work is generally conducted in a small business situation. The unit may apply to a sole practitioner or someone working directly with medical grade footwear practitioners or with a health care team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Medical grade footwear

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Determine initial job requirements	1.1	Select accommodative orthoses materials that reflect requirements of client condition and requirements for durability and performance
		1.2	Consult other parties to clarify or provide additional information about corrective orthoses
2.	Produce technical drawing of corrective orthoses	2.1	Produce initial three-dimensional (3D) design of cast
		2.2	Specify materials to be used in corrective orthoses construction
		2.3	Specify anatomical matching, key references and performance

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
			requirements of corrective orthoses
		2.4	Specify dimensions and tolerances using appropriate drawing symbols
3.	Produce and post basic form	3.1	Review cast for accuracy, material selection, 3D design and consistency with technical drawing and prescription if applicable
		3.2	Make changes and refinements as necessary, including balancing aesthetic needs with footwear and condition requirements
		3.3	Produce basic form to fitting accuracy of ± 1mm
		3.4	Correct and post basic form to corrective orthoses standard
4.	Conduct trial fitting of corrective orthoses	4.1	Produce corrective orthoses for trial fitting
		4.2	Modify existing shoes for trial of corrective orthoses
		4.3	Undertake a diagnostic fitting and interpret results for possible changes to corrective orthoses design and materials
5.	Manufacture corrective orthoses	5.1	Construct corrective orthoses to specification
		5.2	Make allowance for variation between trial orthoses and final corrective orthoses
		5.3	Check dimension and shape of corrective orthoses against specifications
		5.4	Check existing shoes against corrective orthoses and modify where required to meet requirement
		5.5	Finish off corrective orthoses to established quality standards
6.	Deliver and fit corrective orthoses	6.1	Check fitting and make adjustments as required to meet client needs
		6.2	Inform client of function, management and maintenance procedures for corrective orthoses and explain follow-up
		6.3	Complete record keeping procedures and administrative tasks
7.	Follow up client	7.1	Check function and state of corrective orthoses during follow-up
		7.2	Assess client condition and further medical grade footwear

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
			treatment or other health professional treatment, and update client file

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Oral communication skills to interact effectively with clients, suppliers and health professionals
- Numeracy skills to translate foot measurements and general foot shape into casts that include variable tolerances to suit individual needs
- Planning and organising skills to ensure orthoses are produced on time and within budget

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTMF6007A Produce corrective orthoses.

Assessment Requirements for MSTMF4011 Produce corrective orthoses

Modification History

Release 1. Supersedes and is equivalent to LMTMF6007A Produce corrective orthoses

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- produced two corrective orthoses for different clients with different needs.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of medical grade orthoses and footwear design and how orthoses are used to meet specified requirements
- applied anthropometrics of the foot, including the variables in, and effects of physical force systems on the body, and other physical characteristics of commercial orthoses and footwear
- effects of different types of corrective orthoses on the foot, ankle, leg and pelvic and lower back functions
- footwear and component construction methods and standards used to produce and modify corrective orthoses to meet specifications, including:
  - diagnostic and definitive constructions
  - hand and machine-based techniques
  - product and testing quality standards
- corrective orthoses inclusions:
  - removable inserts
  - incorporated ankle-foot orthoses (AFO)
  - shoes
  - post-operative
  - therapy footwear
- corrective orthoses materials typically used to produce corrective orthoses:
  - rubber
  - ethyl vinyl acetate (EVA) and polyurethane foams
  - PVC resins
  - plastics
  - vacuum moulding and laminating carbon glass
  - Kevlar fibre

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- requirements and consequences of corrective orthoses factors, including:
  - biomechanical requirements
  - volume expansion
  - functional and positioning
- approaches to problems that require corrective posting or support of foot and ankle:
  - drop foot splint
  - arthrodesis inner shoe to stabilise foot or ankle complex and exclude movement
  - solutions to correct excessive rear foot pronation
- procedures to translate information into working patterns
- cast check requirements
- administrative functions related to the construction of corrective orthoses
- legal, ethical and work health and safety (WHS) requirements associated with producing footwear and orthoses.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a workspace used to produce and adjust orthoses using hand and machine-based techniques
  - safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to clients.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTTX2010 Perform wool quality tests

Modification History

Release 1. Supersedes and is equivalent LMTEW2012A Perform tests to check wool quality.

Application

This unit of competency describes the skills and knowledge required to set up and operate equipment used for sampling and laboratory testing wool quality.

Work is conducted in small to large scale workplaces and may involve individual and team activities. Work is performed by employees undertaking wool quality testing activities according to defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Textile production

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Prepare laboratory equipment for test process	1.1	Determine job requirements and confirm testing procedures
		1.2	Select and prepare required equipment
		1.3	Determine equipment settings, and check and calibrate equipment
		1.4	Ensure work area around equipment is clean and ready for testing to commence
2.	Evaluate properties of wool samples	2.1	Handle test equipment, instruments and fibre samples according to specified procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.		Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		2.2	Test physical properties of wool samples according to specified procedures
		2.3	Test chemical properties of wool samples according to specified procedures
		2.4	Test contamination of wool samples according to specified procedures
		2.5	Identify and quantify types of contamination
		2.6	Clean work area and dispose of waste in line with waste management procedures
3.	Communicate test information	3.1	Complete test records, and associated documents, according to workplace procedures
		3.2	Report test results according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret work instructions, product requirements and test procedures
- Numeracy skills to read and interpret test results

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent LMTEW2012A Perform tests to check wool quality.

Assessment Requirements for MSTTX2010 Perform wool quality tests

Modification History

Release 1. Supersedes and is equivalent LMTEW2012A Perform tests to check wool quality.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed wool quality tests on at least five different samples of wool, to determine:
  - physical properties
  - chemical properties
  - presence and identification of contaminants.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- procedures, operating principles, and safe work practices for operating wool sampling and test equipment
- laboratory instrument set-up and calibration requirements
- waste management procedures relating to testing process
- testing quality standards
- typical contaminants found in wool samples
- general housekeeping policies and procedures, including cleaning agents and equipment used in wool quality tests
- recording and reporting procedures relating to wool quality tests.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory set up for testing wool samples
  - safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to wool samples.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTTX2011 Perform wool processing machine setting

Modification History

Release 1. Supersedes and is equivalent to LMTEW2014A Perform machine setting and operational maintenance.

Application

This unit of competency describes the skills and knowledge required to set machines for product changes, reset them after general fibre related stoppages, and perform minor maintenance of machinery.

Work may be conducted in small to large scale workplaces and may involve individual and team activities. Work is performed within defined procedures by employees operating machinery used to process wool. It may also involve supervision of a production section of an operation and may involve responsibility for a number of employees operating wool processing machinery.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Textile production

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Set machine	1.1	Determine job requirements from work instructions and job specifications
		1.2	Identify work health and safety (WHS) requirements, including required personal protective equipment (PPE)
		1.3	Clean and set machine according to raw material and product specifications, and machine manufacturer and workplace

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
			procedures
		1.4	Start machine and ensure correct machine operation
		1.5	Conduct trial runs according to identified requirements
		1.6	Check sample conforms to requirements, and adjust settings until sample meets specifications
		1.7	Clean and maintain work area around machine or equipment to meet workplace requirements
2	Rectify machine operating problems	2.1	Use diagnostic procedures and tests to locate and identify machine faults
		2.2	Rectify machine operating problems using appropriate hand tools and measuring equipment
		2.3	Identify and report major problems in operation of machine to supervisor
		2.4	Identify and adjust or repair minor problems, within own skill level and scope of own role
		2.5	Apply environmental requirements and waste management procedures for safe disposal and recycling of waste
3	Communicate production information	3.1	Document setting records and maintenance work according to workplace procedures
		3.2	Interpret information about production status and problems from other operators, shifts and supervisory personnel
		3.3	Communicate information regarding production status and problems to other operators and supervisory personnel

Foundation Skills

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Reading skills to interpret work instructions, product specifications and standard operating procedures
- Numeracy skills to set machine operating parameters
- Self-management skills to complete work systematically with attention to detail, and without damage to goods and equipment

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSTTX2011 Perform wool processing machine setting

Modification History

Release 1. Supersedes and is equivalent to LMTEW2014A Perform machine setting and operational maintenance.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- set up a wool processing machine on at least two occasions, including:
  - for a product change
  - after operational maintenance.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- wool processing machines and associated equipment for:
  - blending and carding
  - combing
  - gilling
  - finishing
  - bale pressing
  - scouring
  - superwash
  - backwash
  - carbonising
- operating principles of wool processing machines and associated equipment
- types of machine controls:
  - electronic
  - computer
  - mechanical
  - hydraulic
  - pneumatic
  - electrical
- technical specifications and location of repair manuals for specified machines
- wool processing machine settings and adjustment requirements
- typical fault conditions and relevant fault finding procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- maintenance and repair processes and techniques
- workplace procedures and maintenance planning
- waste management procedures relating to machine operation
- product quality standards
- legal, ethical and work health and safety (WHS) requirements specific to the work tasks, including those relating to selecting and using personal protective equipment (PPE)
- general housekeeping policies and procedures, including cleaning agents and equipment used in machine setting activities.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a workplace set up with equipment for processing wool
  - safety equipment, including PPE
  - standard operating procedures
- modelling of industry operating conditions, including product specifications and materials for processing.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTTX2012 Perform wool store operations

Modification History

Release 1. Supersedes and is equivalent to LMTEW2015A Perform wool store operations.

Application

This unit of competency describes the skills and knowledge required to receive, store, despatch and distribute wool in a wool store operation.

Work is conducted in small to large scale workplaces and may involve individual and team activities. Work is performed under routine supervision and may involve individual and team activities. Work is performed by employees working in a wool processing operation within defined procedures undertaking wool processing activities, including responsibility for the movement of wool bales in a wool store operation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

N/A

Unit Sector

Textile production

Elements and Performance Criteria

Elements Elements describe the essential outcomes.		**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Prepare for work	1.1	Identify job requirements from specifications, job sheets and work instructions
		1.2	Follow standard operating procedures (SOPs)
		1.3	Identify work health and safety (WHS) requirements including required personal protective equipment (PPE)
		1.4	Read instructions and job sheets to determine bale movement requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements		Performance Criteria	
		1.5	Select suitable bale handling equipment and PPE
2.	Perform receival, despatch and distribution procedures	2.1	Identify areas for marshalling and processing
		2.2	Safely use bale-handling equipment to move, place and stack bales in identified areas following workplace procedures
		2.3	Follow instructions, signs and labels for designated batches and specified purposes
		2.4	Perform minor maintenance and cleaning according to manufacturer specifications, workplace procedures and scope of own role
3.	Monitor movement and of quality	3.1	Apply workplace procedures for identifying incoming and outgoing bales
		3.2	Identify and apply workplace procedures for storing and moving product
		3.3	Identify, isolate and report deviations from required quality
		3.4	Apply environmental requirements and waste management procedures
4.	Communicate wool store information	4.1	Collect, interpret and apply instructions and information from required workplace personnel
		4.2	Relay information regarding operations in work area to other operators, shifts and supervisory personnel
		4.3	Complete records and other required receival, despatch and movement documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret information included in work orders and instructions, cart-notes, dockets, signs, labels, tags, and standard operating procedures
- Oral communication skills to clarify instructions and relay information
- Self-management skills to organise work and complete tasks efficiently and effectively

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSTTX2012 Perform wool store operations

Modification History

Release 1. Supersedes and is equivalent to LMTEW2015A Perform wool store operations.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed wool store operations safely, over a period of one day or one shift, including:
  - loading, unloading, transporting and transferring wool bales
  - monitoring quality of wool bales
  - using suitable equipment
  - accurately completing work records.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- typical wool store operations
- operating principles of wool handling machines and associated equipment
- material-handling procedures and equipment relating to wool store operations in the performance evidence:
  - hand trolleys
  - pallet trucks
  - load shifting equipment
- quality standards regarding condition of goods and materials
- waste management procedures relating to wool store operations
- work health and safety (WHS) requirements and safe work practice specific to working in a wool store, including those relating to selecting and using personal protective equipment (PPE).

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a wool store with wool bales
  - wool bale handling equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- safety equipment, including PPE
- standard operating procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTTX3013 Perform wool processing operations

Modification History

Release 1. New unit. Supersedes and is not equivalent to:

- LMTEW2001A Blend and open greasy wool
- LMTEW2002A Press and dump wool
- LMTEW2004A Perform wool combing
- LMTEW2005A Perform wool preparation using gilling machines
- LMTEW2006A Perform wool finishing
- LMTEW2007A Perform wool pressing operations
- LMTEW2008A Perform wool backwash process
- LMTEW2009A Perform wool scouring
- LMTEW2010A Perform wool carbonising
- LMTEW2011A Perform wool superwash
- LMTEW2013A Perform wool grease recovery and monitor waste disposal.

Application

This unit of competency describes the skills and knowledge required to set up and operate machines used for wool processing.

Work may be conducted in small to large scale workplaces and may involve individual and team activities. Work is performed by employees operating and maintaining one or more machines required for wool processing according to defined procedures. It may also involve supervision of a production section of an operation and may involve responsibility for a number of employees operating wool processing machinery.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1.	Determine job requirements	1.1	Identify job requirements from specifications, job sheets and work instructions
		1.2	Locate and follow standard operating procedures (SOPs)
		1.3	Identify work health and safety (WHS) requirements, including required personal protective equipment (PPE)
		1.4	Locate wool to be processed
2.	Operate wool processing equipment	2.1	Set machine operating parameters to match job specification
		2.2	Start machinery and associated equipment according to WHS practices and workplace procedures
		2.3	Maintain supply of feed materials as required
		2.4	Remove by-products from machine as required
		2.5	Control process variables to ensure quality outcomes
		2.6	Stop and shut down equipment according to WHS practices and workplace standard procedures
3.	Monitor wool processing	3.1	Identify and interpret product quality standards during all stages of wool processing
		3.2	Visually inspect wool processing to ensure flow and blending consistency are maintained
		3.3	Recognise, isolate and report non-conforming outcomes and quality issues
		3.4	Take and prepare wool samples
		3.5	Consult required personnel to address quality issues
4.	Carry out operator maintenance	4.1	Identify, correct and report minor running problems according to workplace and equipment manufacturer procedures
		4.2	Report major machine, equipment or product faults according to workplace procedures
		4.3	Perform minor maintenance and cleaning according to manufacturer specifications, workplace procedures and scope of own role

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

5.	Dispose of waste materials	5.1	Apply workplace lot change and run out procedures to keep waste to a minimum
		5.2	Dispose of machine waste of according to recycling, environmental and safety procedures
6.	Communicate processing information	6.1	Complete required records and documentation according to workplace procedures
		6.2	Interpret information regarding production status and problems from other operators, shifts and supervisory personnel
		6.3	Communicate information regarding production status and problems to other operators, shifts and supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

- Reading skills to interpret work specifications, standard operating procedures and work instructions and other reference material
- Oral communication skills to interact effectively with other operators, technicians and supervisor
- Planning and organising skills to complete work systematically with attention to detail without damage to goods and equipment

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSTTX3013 Perform wool processing operations

Modification History

Release 1. New unit. Supersedes and is not equivalent to:

- LMTEW2001A Blend and open greasy wool
- LMTEW2002A Press and dump wool
- LMTEW2004A Perform wool combing
- LMTEW2005A Perform wool preparation using gilling machines
- LMTEW2006A Perform wool finishing
- LMTEW2007A Perform wool pressing operations
- LMTEW2008A Perform wool backwash process
- LMTEW2009A Perform wool scouring
- LMTEW2010A Perform wool carbonising
- LMTEW2011A Perform wool superwash
- LMTEW2013A Perform wool grease recovery and monitor waste disposal.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and effectively operated equipment to perform at least three of the following wool processing operations:
  - blending and opening greasy wool
  - pressing and dumping
  - combing
  - gilling
  - finishing
  - backwashing
  - scouring
  - carbonising
  - superwashing
  - wool grease recovery
- resolved minor processing issues as they arise during the three operations above.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and safe use of automatic and semi-automatic machines and equipment used in wool processing operations:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - double drum openers
  - decotting machines
  - bale breakers
  - combing machine
  - noil recovery systems
  - air filtration equipment
  - gilling machines
  - oil sprayers
  - hand tools, including bale hook and labelling equipment
  - conveyors
  - dryers
  - blending and opening systems
  - wool carbonising/scouring machines
  - waste disposal and dust extraction systems
  - dusters and crushers
  - stretch breaker
  - pre-draft gilling machine
  - wool grease separators
  - retention bowls and settling systems
  - associated fluid flow systems, valves and controls
- purpose and safe use of ancillary equipment used in wool processing operations:
  - weigh scales
  - farm bale presses, including manual, semi-automatic, and automatic
  - dump presses
  - sampling equipment, including core and grab machines
  - cleaning equipment
  - hand and power tools applicable to task
  - hand trolleys
  - pallet trucks
- safe use of detergents and chemicals used in wool processing
- machine setting and adjustment requirements
- wool types, including carded, combed, carpet and merino
- wool qualities, including fineness and colour
- typical wool contaminants
- product labelling requirements
- safe work practices for processing operation
- safety and environmental controls relevant to process
- general housekeeping policies and procedures including cleaning agents and equipment in wool processing operations.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a wool processing facility
  - safety equipment and standard operating procedures
- modelling of industry operating conditions, including access to wool for processing

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for AHCLSC308 Install metal structures and features

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for metal structures and their construction methods.

AURVTT004 Trim vehicle components

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to calculate, mark, cut, sew and attach trim material to vehicle components. It involves preparing for the task, selecting and using specialist tools and equipment, selecting trim materials and checking their quality, developing material patterns, fabricating, assembling and attaching trim to components and checking trim against specifications, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Trimming and Upholstery

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.2 Trim materials are selected and inspected for quality 1.3 Safety data sheets (SDS) are sourced and interpreted 1.4 Hazards associated with the work are identified and risks are managed 1.5 ***Trim tools and equipment*** and personal protective equipment (PPE) are selected and checked for serviceability 1.6 Work is planned to minimise waste and use time efficiently
2. Measure, mark, cut and fabricate trim	2.1 Material patterns are developed and prepared for use 2.2 Trim materials are measured, marked and cut according to workplace instructions and prepared pattern 2.3 Trimming tools and equipment are used according to workplace procedures and ***safety and environmental requirements*** 2.4 Trim is fabricated according to work instructions and job requirements
3. Attach trim	3.1 Trim materials are fitted and checked for alignment, appearance and quality according to job specifications and workplace instructions 3.2 Trim materials are attached to vehicle component and checked against specifications
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable materials is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	**Description**

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Skills	Description
Learning skills to:	• locate appropriate sources of information efficiently.
Writing skills to:	• legibly and accurately fill out workplace documentation.
Oral communication skills to:	• clarify instructions and procedures • clearly report quality issues and job outcomes.

Numeracy skills to:	• use basic mathematical operations, including addition and subtraction, to calculate:
	  • fitting measurements
	  • quantities of required materials

Planning and organising skills to:	• plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	• use specialist trim tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Trim tools and equipment must include:	• sewing machines • hand tools.

Safety and environmental requirements must include:	• work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for:
	  • selecting and using PPE
	  • using SDS for trim materials
	  • using specialist tools and equipment
	  • manual handling techniques
	• environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTT004 Trim vehicle components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- manufacture and attach two different trim components.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to trimming vehicle components, including procedures for:
  - selecting and using personal protective equipment (PPE)
  - using safety data sheets (SDS) for trim materials
  - using specialist tools and equipment
  - manual handling techniques
- environmental requirements, including procedures for storing and disposing of waste materials
- types and uses of trimming materials, including detection of faults and repair defects
- types and uses of specialist tools and equipment needed to manufacture and attach trim components
- techniques and procedures for trimming components, including:
  - measuring, marking and cutting
  - sewing techniques
  - trim removal and replacement
  - trim cleaning
- procedures for protecting vehicle and components when trimming components
- procedures for final inspection of trimmed component.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle components that they have trimmed, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to trim components
- SDS for trim materials
- vehicle or components for trimming
- tools, equipment and materials appropriate for trimming vehicle components.

AURVTT014 Fabricate and fit marine covers

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to fabricate and fit covers for different marine applications. It involves preparing for the task, selecting and using specialist tools and equipment, selecting materials and checking their quality, following manufacturer and customer instructions, inspecting final work, and completing workplace processes and documentation.

It applies to those working in the marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
marine covers	1.2 Materials are selected and inspected for quality, and quantities are calculated 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools and equipment, including personal protective equipment (PPE), are selected for appropriate ***fabrication methods*** and checked for serviceability 1.5 Work area is prepared and work is planned to minimise waste and use time efficiently
2. Measure, mark out and cut materials	2.1 Templates and specialist tools and equipment are selected and used according to ***safety and environmental requirements*** 2.2 Materials are marked out and cut according to patterns, templates workplace instructions, manufacturer specifications and fitting requirements
3. Fabricate, fit and fasten marine covers	3.1 Marine covers are fabricated and assembled according to job requirements and workplace instructions 3.2 Marine covers are fitted and fastened without causing damage to vehicle or components 3.3 Fitted marine covers are checked for alignment and quality according to job requirements, workplace procedures and manufacturer specifications
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Skills	Description
Learning skills to:	• locate appropriate sources of information efficiently.
Writing skills to:	• legibly and accurately fill out workplace documentation.
Oral communication skills to:	• clarify instructions and procedures • clearly report quality issues and job outcomes.

Numeracy skills to:	• use basic mathematical operations, including addition and subtraction, to calculate:
	  • fitting measurements
	  • quantities of required materials.

Planning and organising skills to:	• plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	• use specialist tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Fabrication methods must include:	• measuring, marking out and cutting • machine sewing • reinforcing and edge finishing • fastening, shaping and gluing • assembling and fitting.

Safety and environmental requirements must include:	• work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for:
	  • selecting and using PPE
	  • using specialist tools and equipment
	  • manually handling marine components
	• environmental requirements, including procedures for storing and disposing of waste materials.

Assessment Requirements for AURVTT014 Fabricate and fit marine covers

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- fabricate and fit two marine covers to job specifications.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to fabricating and fitting marine covers, including procedures for:
  - selecting and using personal protective equipment (PPE)
  - using specialist tools and equipment
  - manually handling marine components
- environmental requirements, including procedures for storing and disposing of waste materials
- type, use and basic maintenance of tools and equipment
- designs and styles of different types of covers
- types of materials and consumables and their applications, including:
  - fabrics
  - fasteners
  - adhesives
- methods and techniques for fabricating marine covers, including:
  - material selection
  - planning
  - measuring
  - marking out

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- cutting
- sewing
- making up and assembly
- fitting and fastening
- methods and techniques for fitting and fastening marine covers
- procedures for protecting vessel and components when fitting covers
- procedures for final inspection of fabricated and fitted marine covers.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the marine covers that they have fabricated and fitted, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- marine trimming workplace or simulated workplace
- workplace instructions
- PPE required to fabricate and fit marine covers
- materials required to fabricate and fit marine covers
- marine vessel or components that require covers to be fabricated and fitted
- tools, equipment and materials appropriate for fabricating and fitting marine covers.

AURVTT020 Select and use leather in automotive and marine trimming

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to identify, select and use leather in the trimming of automotive and marine components. It involves preparing for the task, selecting and using specialist tools and equipment, checking leather quality, calculating required quantities, matching leather, fabricating and attaching covers and trim to manufacturer and customer instructions, and completing workplace processes and documentation.

It applies to those working in the automotive and marine trimming industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to use leather trimming	1.1 Job requirements are determined from workplace instructions 1.2 Adhesive safety data sheet (SDS) information is accessed and interpreted 1.3 ***Materials*** are selected and inspected for quality, and quantities are calculated 1.4 Hazards associated with the work are identified and risks are managed 1.5 ***Trimming tools and equipment*** and personal protective equipment (PPE) are selected and checked for serviceability 1.6 Work and cutting are planned to minimise waste and use time efficiently
2. Fabricate leather components	2.1 ***Leather features and characteristics*** are checked carefully prior to cutting and are matched against workplace instructions 2.2 Leather pieces are laid and marked out in sequence according to developed cutting plan and ***safety and environmental requirements*** 2.3 Leather pieces are cut according to cutting plan and using predetermined measurements or patterns 2.4 Leather is sewn to produce required range of trimming components
3. Attach leather to vehicle, vessel or component	3.1 Leather component is positioned and checked prior to being attached to ensure correct fit 3.2 Leather is attached using most appropriate method and according to workplace procedures and job requirement
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Establish contact with customers	1.1 Acknowledge and greet customer in a professional, courteous and concise manner according to organisational and legislative requirements 1.2 Maintain personal dress and presentation in line with organisational requirements 1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Maintain sensitivity to customer specific needs and any cultural, family and individual differences 1.5 Establish rapport/relationship with customer and express a genuine interest in customer needs/requirements
2 Identify customer needs	2.1 Use appropriate questioning and active listening to determine customer needs 2.2 Assess customer needs for urgency to identify priorities for service delivery 2.3 Provide customer with information about available options for meeting customer needs and assist customer to identify preferred option/s 2.4 Identify personal limitations in addressing customer needs and seek assistance from designated persons where required
3 Deliver service to customers	3.1 Provide prompt customer service to meet identified needs according to organisational requirements 3.2 Provide information regarding problems and delays, and follow-up within appropriate timeframes as necessary 3.3 Communicate with customers in a clear, concise and courteous manner 3.4 Identify opportunities to enhance the quality of service and products, and take action to improve the service whenever possible
4 Process customer feedback	4.1 Promptly recognise customer feedback and handle sensitively according to organisational and legislative requirements 4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures and legislative requirements 4.3 Identify any unmet customer needs and discuss suitability of other products/services 4.4 Support customers to make contact with other services according to organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	• Understands requirements in organisational policy and procedure documents • Interprets product and service information in a range of formats to provide customer advice
Writing	4.2	• Records customer information according to organisational requirements
Oral Communication	1.1, 1.3, 1.4, 1.5, 2.1-2.4, 3.2, 3.3, 4.3	• Provides information or advice using structure and language to suit the audience • Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	• Follows organisational procedures and practices relevant to own role
Interact with others	1.1, 1.3-1.5, 2.1-2.4, 3.1, 3.2, 3.3, 4.1, 4.3, 4.4	• Uses accepted communication practices to establish connections, build rapport and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	3.2, 3.4, 4.1- 4.3	• Addresses routine problems in familiar work contexts • Recognises opportunities to enhance work practices and outcomes

Assessment Requirements for BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- greet customer and establish rapport/relationship in accordance with organisational requirements
- identify customer needs using appropriate interpersonal skills
- provide prompt service to address customer needs in accordance with organisational requirements
- identify and follow up opportunities to increase the quality of service and products
- respond to and record all customer feedback according to organisational standards, policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and briefly describe key provisions of relevant legislation from all forms of government that apply to provision of customer services
- identify and explain workplace organisational policies and procedures relating to customer service and the customer service process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES202 Evaluate the nature of design in a specific industry context

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to examine and consider the design process in a particular industry.

It applies to individuals working in any context, who need to develop a basic appreciation and knowledge of the way design works in a particular industry, and of its potential impacts on industry and individual work practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Source information on design in given industry context	1.1 Investigate the nature, history, role and importance of design in the industry 1.2 Evaluate roles played by designers and other contributors in design process 1.3 Source information on impact of technology on design in the industry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Examine links between design and own work	2.1 Investigate impact of design on own work 2.2 Consider role of individual workers across the industry in affecting future design directions
3 Keep up-to-date with industry design trends	3.1 Identify and access opportunities to maintain currency of knowledge about industry design trends 3.2 Evaluate how design trends affect the overall industry and how it operates 3.3 Share information and proactively discuss emerging trends with work colleagues 3.4 Identify trends that will impact on own work and seek opportunities to develop appropriate skills

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.4	• Identifies and uses opportunities to maintain and improve skills and knowledge
Reading	1.1, 1.3, 3.1	• Reviews textual information from a range of sources to identify relevant information
Writing	3.3	• Prepares specific information using clear and appropriate language to present to other personnel
Oral Communication	3.3	• Participates in verbal exchanges using vocabulary, style and tone appropriate to audience • Uses listening techniques to clarify understanding
Interact with others	3.3	• Collaborates with others to achieve shared goals
Get the work done	1.1-1.3, 2.1, 2.2, 3.2, 3.4	• Plans routine tasks with familiar goals and outcomes • Takes responsibility for routine low-impact decisions within familiar situations • Identifies ideas in use in other contexts and considers how they might be applied in own context with minimal adjustment • Recognises and applies some general design and

Assessment Requirements for BSBDES202 Evaluate the nature of design in a specific industry context

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and interpret a range of information sources on design and apply concepts to own work
- seek opportunities to maintain currency of industry trends and design skills and share information with colleagues.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- investigate and explain consumer/end-user expectations
- explain current and emerging technologies and their effects on design in the industry
- identify influential designers, both past and present
- describe major design trends in the industry
- explain and describe the role of design in a given industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- office equipment and resources
- sources of information on design in a specific industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES301 Explore the use of colour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore the use of colour and to apply colour theory.

It applies to individuals whose work involves understanding and applying the effective use of colour.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Source information on colour and colour theory	1.1 Identify and access sources of information on colour and colour theory 1.2 Evaluate and collate information to build knowledge of colour and its application in different contexts
2 Experiment with colour	2.1 Test different colours and colour-combinations through experimentation 2.2 Use own ideas as a way of testing, challenging or confirming colour theory

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure safe use of materials, tools and equipment during experimentation with colour
3 Communicate concepts and ideas through use of colour	3.1 Investigate how colour might be used to communicate a particular idea or concept 3.2 Select materials, tools and equipment relevant to the idea or concept 3.3 Apply colour to communicate the concept or idea based on own knowledge of colour and colour theory 3.4 Review and reflect on own use of colour and what it communicates 3.5 Seek and obtain feedback from others about the way colour has been used and its success in communicating the concept or idea 3.6 Present and store work any samples in a way which takes account of the need for professional presentation and potential relevance for future work

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.1	• Evaluates and integrates facts and descriptions of colour from a range of texts including text embedded in visual media
Writing	1.2, 3.6	• Produces a range of text types using appropriate vocabulary, grammatical structure and conventions • Applies basic referencing and sequencing of professional and archival resources
Oral Communication	1.1, 3.5	• Presents ideas, asks questions and listens, to seek feedback or generate ideas
Numeracy	2.1	• Selects and uses mathematical information for measurement and volume
Navigate the world of work	2.3	• Takes some personal responsibility for adherence to legal and regulatory requirements with specific reference to safety

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.4, 3.6	• Plans, sequences and implements tasks required to achieve outcomes • Takes responsibility for routine low-impact decisions within familiar situations • Evaluates effectiveness of decisions on how well they meet stated goals • Contributes to the design of new approaches within immediate work environment • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role

Assessment Requirements for BSBDES301 Explore the use of colour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research information on colour and colour theory to inform work
- experiment with different colours and techniques to communicate a concept or idea
- review completed work and present and store samples for future reference.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain colour attributes and colour relationships
- describe and interpret different colour theories and their applications in different contexts
- describe individual interpretation and choice in relation to the use of colour, and the potential limitations of theory
- identify different materials, tools and equipment required to experiment with colour
- describe ways other practitioners use colour in their work.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- office equipment and resources
- materials, resources and equipment needed to apply colour in the relevant work context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES302 Explore and apply the creative design process to 2D forms

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore and creatively apply the design process to the development of two-dimensional (2D) forms.

It applies to individuals who apply the creative design process to the development of 2D forms. The unit underpins many other specialised design units.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Source information on 2D design	1.1 Identify and access relevant sources of information on 2D design 1.2 Evaluate and collate information to build knowledge of 2D design
2 Explore the creative design process for 2D forms	2.1 Use creative thinking techniques to generate a range of ideas and options 2.2 Use experimentation to explore and challenge a range of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	different ideas 2.3 Challenge assumptions, reflect on ideas and refine approaches 2.4 Consciously change perspective, and evaluate ideas and situations in new ways
3 Communicate concepts or ideas through application of design processes to 2D forms	3.1 Investigate and reflect on how a particular concept or idea might be communicated in 2D 3.2 Select materials, tools and equipment relevant to the realisation of the concept or idea 3.3 Apply a creative design process to produce a range of 2D concept realisations 3.4 Reflect on own application of design process and success in communicating the concept or idea 3.5 Seek and obtain feedback from others about the 2D form and its success in communicating the concept or idea 3.6 Present and store concept realisations or samples in a format which takes account of the need for professional presentation and the work's potential value for future jobs

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1	• Interprets textual information from relevant sources to determine and adhere to requirements
Writing	2.1, 3.6	• Produces a range of text types using appropriate vocabulary, grammatical structure and referencing conventions
Oral Communication	2.1, 2.2, 2.3, 3.5	• Participates in verbal exchanges using vocabulary, style and tone appropriate to audience • Uses listening techniques to clarify understanding
Numeracy	3.1, 3.3, 3.5	• Performs mathematical calculations to produce 2D designs
Get the work done	1.1, 1.2, 2.1-2.4, 3.1-3.4, 3.6	• Plans and organises tasks required to achieve required outcomes

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		• Identifies ideas in use in other contexts and considers how they might be applied in own context • Selects new ideas that may improve a process in immediate work context • Takes responsibility for routine low-impact decisions within familiar situations • Evaluates effectiveness of decisions on how well they meet stated goals

Assessment Requirements for BSBDES302 Explore and apply the creative design process to 2D forms

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a range of samples or concept realisations which demonstrate creative thinking techniques and experimentation processes based on available resource materials
- review own work to determine future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify creative thinking techniques that can be used as part of the design process
- describe the elements and principles of design as applied to two-dimensional (2D) forms
- list materials, tools and equipment required for the design of 2D forms in the relevant work context
- describe the notion of individual interpretation and choice within the design process
- explain the particular challenges that may arise in the design of 2D forms.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to the materials, resources and equipment needed to apply design processes to 2D forms.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT301 Apply knowledge of the international trade environment to complete work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to complete work in an international trade context based on a demonstrated knowledge of the international trade environment.

It applies to individuals who work under the supervision of a more experienced colleague in various international work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge accessed from a variety of sources both internal and external to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify international and Australian regulatory bodies and their roles and responsibilities	1.1 Assess personal knowledge of relevant international and Australian regulatory bodies, their roles and responsibilities, and the required skills in applying this knowledge, to determine currency and adequacy 1.2 Identify knowledge and skill gaps

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Seek assistance as required to identify relevant bodies, their roles and responsibilities and their impact on own work 1.4 Undertake learning to ensure currency and adequacy of knowledge and skills concerning regulatory bodies, their roles and responsibilities and their impact on own work
2. Identify significant trade routes and modes of transport	2.1 Assess personal knowledge of significant trade routes and modes of transport and the required skills in applying this knowledge, to determine currency and adequacy 2.2 Identify knowledge and skills gaps 2.3 Seek assistance as required to identify significant trade routes and modes of transport, and their impact on own work 2.4 Undertake learning to ensure currency and adequacy of knowledge and skills concerning significant trade routes and modes of transport, and their impact on own work
3. Investigate available sources of information on international trade	3.1 Determine specific needs for information 3.2 Access organisation's resources to meet information requirements 3.3 Use information to address specific work needs and to identify further information requirements 3.4 Access external information resources to meet further information requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1, 1.2, 1.4, 2.1, 2.2, 2.4	• Assesses personal knowledge and identifies opportunities to update knowledge and skills to improve own work practices
Reading	1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.1-3.4	• Identifies and comprehends relevant information from a range of texts to aid in determining needs and requirements
Writing	1.1, 1.4, 2.1, 2.4, 3.3	• Documents results of research and learning activities for future reference

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Oral Communication	1.3, 1.4, 2.3, 2.4	• Uses appropriate vocabulary and non-verbal features during learning activities • Uses listening and questioning skills to seek and clarify information
Navigate the world of work	1.1, 1.3, 1.4	• Builds knowledge of regulatory framework within own work context and to achieve desired outcomes
Interact with others	1.3, 1.4, 2.3, 2.4	• Interacts effectively when seeking assistance and advice from relevant personnel and industry bodies • Collaborates with other more experienced work colleagues to supplement knowledge and achieve outcomes
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1-3.4	• Plans, organises and implements tasks required to achieve required outcomes • Uses analytical skills to evaluate knowledge or skill gaps and decide on appropriate methods to address these gaps

Assessment Requirements for BSBINT301 Apply knowledge of the international trade environment to complete work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine information needs as assigned by senior members of the organisation using a variety of internal and external sources to gather information
- submit examples of completed tasks that apply knowledge of international and Australian regulatory bodies, their roles and responsibilities and significant trade routes and modes of transport
- carry out self-assessment to address gaps in knowledge or skills.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify significant trade routes and modes of transport
- outline relevant international and Australian regulatory bodies, their roles and responsibilities
- explain the historical and contemporary context of trade, particularly as this affects Australian trade
- outline internal and external information sources related to regulatory bodies, trade routes and transport modes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- relevant documentation
- case studies or scenarios relating to international trade.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT302 Apply knowledge of legislation relevant to international trade to complete work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to complete work in the context of legislation relevant to international trade.

It applies to individuals who work under the supervision of a more experienced colleague in various international work contexts. They may exercise discretion and judgement using appropriate knowledge of legislation relevant to international trade.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify legislative requirements	1.1 Seek assistance to identify current information about range of legislation, regulations and codes of practice relating to own work 1.2 Access organisation's procedures and practices to facilitate compliance with relevant legislation and clarify with others in the workplace as required 1.3 Seek assistance in applying relevant legislation to own work

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Comply with legislative requirements	2.1 Clarify compliance requirements with others within the workplace to confirm understanding and ensure consistency of application 2.2 Seek assistance as required to meet compliance requirements while completing assigned tasks 2.3 Check completed assigned tasks with others in the workplace to ensure compliance with legislative requirements
3 Report possible incidents of non-compliance	3.1 Determine and clarify workplace procedures for reporting incidents of non-compliance as required 3.2 Report possible incidents of non-compliance in line with workplace procedures 3.3 Use incidents of non-compliance and possible implications of non-compliance to guide own work practices

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.3, 3.1	• Identifies and analyses information in organisational and legislative documents
Writing	3.2	• Prepares workplace documents in accordance with organisational formats
Oral Communication	1.1-1.3, 2.1-2.3, 3.1, 3.2	• Participates in spoken exchanges using appropriate vocabulary and non-verbal features to seek assistance • Uses listening and questioning skills to seek and clarify information
Navigate the world of work	1.2, 1.3, 2.1-2.3, 3.3	• Recognises and applies knowledge of regulatory compliance framework and organisational requirements relating to own work
Interact with others	1.1, 1.3, 2.1-2.3, 3.1, 3.2	• Selects the appropriate form and mode of communication when gathering, clarifying and providing information taking into account purpose and audience • Recognises limitations of own knowledge and skills and collaborates with more experienced work

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		colleagues to achieve outcomes
Get the work done	1.2, 2.2, 3.1-3.3	• Plans, organises and implements tasks required to achieve outcomes according to organisational requirements, seeking assistance as necessary • Uses problem-solving skills to analyse and evaluate potential issues and decide on appropriate actions

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status

BSBINT405 Apply knowledge of import and export international conventions, laws and finance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain currency of knowledge and skills on international conventions, laws and finance to apply these to import and export responsibilities.

It applies to individuals with a broad knowledge of international trade who need to maintain relevant knowledge and skills by recognising the limits of their own experience and knowledge, and organise learning to collect, analyse, apply and review information required for specific complex tasks or projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Maintain currency of knowledge and skills	1.1 Assess personal knowledge of relevant international conventions, laws and finance and the required skills in applying this knowledge to determine currency and adequacy 1.2 Identify skills and knowledge gaps 1.3 Undertake learning to ensure currency and adequacy of knowledge

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and skills in applying international conventions, laws and finance to own work
2 Identify information requirements and access available information	2.1 Determine specific needs for information 2.2 Access organisation's resources to meet information requirements 2.3 Use information to address specific work needs and to identify further information requirements 2.4 Access external information resources to meet further information requirements
3 Interpret, analyse and apply available information	3.1 Collect and collate available information for analysis 3.2 Interpret, analyse and process available information to obtain required knowledge 3.3 Seek assistance of specialist experts, if required, to interpret, analyse and synthesise required information 3.4 Use information and knowledge to facilitate import and export of goods in compliance with relevant Australian and overseas legislation, trade conventions and agreements, and international financing arrangements
4 Review research and analysis process	4.1 Use and review information and knowledge to facilitate import and export of goods for effectiveness 4.2 Document review findings for future use in import and export of goods 4.3 Identify skill and knowledge gaps and undertake further learning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1, 1.2, 1.3, 4.3	• Extends own professional development to ensure adequacy and currency of skills and knowledge
Reading	1.1-1.3, 2.2-2.4, 3.1, 3.2, 3.4, 4.1, 4.3	• Gathers, interprets and analyses complex textual information to contextualise it to requirements
Writing	1.2, 1.3, 2.1, 2.3,	• Takes notes for personal use

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	3.1, 3.2, 3.4, 4.1, 4.2	• Uses clear and specialised language to accurately document requirements and outcomes
Oral Communication	3.3	• Participates in verbal exchanges using appropriate language and non-verbal features • Elicits the views and opinions of others by listening and questioning
Navigate the world of work	1.1, 1.3, 2.2, 2.3 2.4, 3.4	• Appreciates the implications of legal and regulatory responsibilities related to own work
Interact with others	3.3	• Seeks guidance and expertise of others when required
Get the work done	1.1-1.3, 2.2, 2.4, 3.1, 3.2, 4.2	• Uses logically sequenced steps to plan and implement tasks related to own work • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary • Uses review processes to reflect on ways practices may be improved in the future

Assessment Requirements for BSBINT405 Apply knowledge of import and export international conventions, laws and finance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify ongoing learning needs in relation to international conventions, laws and financial matters that impact on import/export responsibilities
- identify processes or opportunities to gain the necessary information
- use and manage opportunities to gain the necessary information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the types of learning opportunities available in the organisation and how to access them
- explain the key provisions of legislation, codes of practice, standards or conventions relevant to international transactions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- resource collections
- office equipment and resources
- relevant workplace documents.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT409 Plan for international trade

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively plan for the international trade of goods.

It applies to individuals with the skills and knowledge to evaluate options when planning for the international trade of goods. The planning activity will usually be in the context of providing a preliminary quotation, a quotation, supplementary advice on a quotation, or when evaluating a freight contract received from a buyer or seller.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Evaluate the most appropriate transport method, route and protection/security options according to cargo and delivery requirements	1.1 Ascertain business context of cargo movement 1.2 Examine factors to be considered in route/mode selection 1.3 Evaluate conditions and risks of different routes in relation to delivery requirements 1.4 Utilise resources that provide information on the current service status of particular transport routes
2 Review shipping and airfreight services available for transporting cargo	2.1 Identify airlines and air cargo services operating in and out of Australia 2.2 Compare configuration and carrying capacity of different types of aircraft

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Identify shipping services and types of ocean vessels operating in and out of Australia 2.4 Compare different types of shipping services 2.5 Compare configurations and carrying capacities of different types of ocean vessels
3 Evaluate packing, marking and stowage requirements for a variety of cargo	3.1 Analyse and prepare protection, presentation and preservation requirements 3.2 Analyse range of containers available for international cargo and evaluate for use 3.3 Evaluate marking requirements and prepare correct marking advice 3.4 Identify risk factors in relation to packing and storing of goods for transportation, and select appropriate options
4 Calculate international freight and other shipment costs	4.1 Examine and apply types of rates, volume-to-weight ratio factors, volume rules including rounding off and allowable projections, principles and methods of rating cargo for international carriage by sea 4.2 Take into account, variations in calculating shipping charges caused by surcharges and other variants 4.3 Calculate and compare costs of shipping a variety of goods by several types of ocean service 4.4 Examine and apply types of rates, volume-to-weight ratio factors, volume rules including rounding off, principles and methods of rating cargo for international carriage by air 4.5 Explain variations in calculating airfreight charges caused by the applicability of TACT rates, fuel surcharges, other variants, and exchange rates 4.6 Calculate and compare costs of shipping a variety of goods by different air cargo services 4.7 Investigate and communicate postal and courier freight rates and size/weight factors and limitations 4.8 Investigate and communicate rates and costs associated with chartering vessels and aircraft 4.9 Investigate and communicate rating principles and methods used in domestic, sea, road, rail and air transport 4.10 Investigate all standard and extraordinary ancillary shipment costs on a door-to-door basis applicable in each mode 4.11 Investigate and communicate the total cost concept and other

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	factors that may determine whether cargo is carried by air or sea, or a combination of both (multimodal transport)
5 Identify cargo insurance and claim requirements for goods	5.1 Evaluate the need for cargo insurance 5.2 Investigate the standard types of cover arrangements used by underwriters 5.3 Identify documents to be lodged with carriers, forwarders, insurance underwriters and customs in cargo loss or damage situations and complete for a hypothetical situation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.4, 4.1, 4.2, 4.4, 4.7, 4.8, 4.10, 4.11, 5.1-5.3	• Interprets textual information from a range of sources to determine how content may be applied when planning for international trade
Writing	3.1, 3.3, 4.7-4.9, 4.11, 5.3	• Produces documentation for particular purposes using clear and specific language and required structure • Completes forms and other documents required for international trade
Oral Communication	4.5, 4.7-4.9, 4.11	• Explains complex information using language appropriate to audience and environment
Numeracy	1.1, 1.2, 2.2, 2.5, 4.1-4.11, 5.1	• Analyses numerical information and calculates costs associated with international trade of goods
Interact with others	4.5, 4.7-4.9, 4.11	• Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.4, 4.1-4.11, 5.1-5.3	• Uses logically sequenced steps to plan and coordinate tasks required to achieve outcomes • Uses problem-solving processes in complex situations, gathering and evaluating relevant information before deciding on transport options

Assessment Requirements for BSBINT409 Plan for international trade

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- choose appropriate transport modes, routes and securing options
- demonstrate successful preparation for international transport for different types of general cargo
- document completed quotations, supplementary quotations, budget or expressions of interest prepared for an external client or own workplace.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and standards relevant to international trade
- outline organisational policies and procedures relating to international trade
- outline risk factors in relation to packing and storing of goods for transportation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources
- relevant workplace documents
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan.

It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop business plan	1.1 Review and evaluate pre-existing strategic, business and operational plan, if available 1.2 Analyse and interpret business vision, mission, values and objectives 1.3 Consult with key stakeholders 1.4 Review market requirements for the product or service, profile customer needs and research pricing options

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop performance objectives and measures through consultation with key stakeholders 1.6 Identify financial, human and physical resource requirements for the business 1.7 Consider any permits or licences that may be required for new activity 1.8 Write business plan
2. Monitor performance	2.1 Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2 Ensure skilled labour is available to implement plan 2.3 Test performance measurement systems and refine, if necessary 2.4 Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5 Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1 Analyse performance reports against planned objectives 3.2 Review performance indicators and refine if necessary 3.3 Ensure groups and individuals contributing to under-performance are coached, and provide training where appropriate 3.4 Review system processes and work methods regularly as part of continuous improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.7, 2.3, 3.1, 3.2, 3.4	• Gathers, interprets and analyses textual information when developing the business plan and monitoring operational performance • Utilises understanding of distinguishing structures and features of a range of text as well as recognising and

Assessment Requirements for BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG408 Conduct market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct market research using interview and survey methodologies (excluding specialist statistical design and analysis) and report on findings.

It applies to individuals who undertake data and information gathering and analysis as a major part of their role and are required to conduct market research. These individuals often work in areas such as marketing, communications, strategic planning and organisational development.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Conduct desk research to gather background market information	1.1 Conduct initial desk research using appropriate sources to gather background market information 1.2 Identify options for information collection and collation tools and methods 1.3 Determine and seek approval for reporting formats for market research documentation 1.4 Report initial research findings in approved formats in

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	accordance with organisational procedures
2. Develop research methodology and objectives	2.1 Develop hypotheses and research objectives for market research 2.2 Identify options for quantifying data 2.3 Identify market research methodology and determine, develop, test and amend required survey tools 2.4 Determine and test methods of data extraction, collation and analysis
3. Recruit respondents	3.1 Interpret market research plans to identify potential respondents and their requirements 3.2 Identify respondents in line with research and organisational requirements 3.3 Recruit respondents in line with agreed research methodology and organisational requirements
4. Gather data and information from respondents	4.1 Prepare and arrange resources for data gathering 4.2 Gather data and information using survey tools 4.3 Record data and information gathered in approved formats, in accordance with organisational procedures 4.4 Store and safeguard survey information and data in accordance with organisational procedures
5. Analyse research information	5.1 Conduct checks on quality of data and information collected 5.2 Select appropriate techniques to summarise data and information 5.3 Design software files for entering data and information 5.4 Process data using a method appropriate to research design 5.5 Interpret and aggregate data and information, including categorisation, to provide observations relevant to research objectives
6. Prepare research reports	6.1 Collate and assess findings for relevance and usefulness to research objectives 6.2 Prepare research reports 6.3 Communicate research findings to relevant personnel and stakeholders in accordance with organisational procedures

BSBMKG413 Promote products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to coordinate and review the promotion of an organisation's products and services.

It applies to individuals with a broad knowledge of the promotion of products and services specific to an organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan promotional activities	1.1 Identify and assess promotional activities to ensure compatibility with organisational requirements 1.2 Plan and schedule promotional activities according to the marketing needs of the organisation 1.3 Determine overall promotional objectives in consultation with designated individuals and groups 1.4 Ensure that timelines and costs for promotion of activities are

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	realistic and consistent with budget resources 1.5 Develop action plans to provide details of products and services being promoted
2. Coordinate promotional activities	2.1 Ensure personnel and resources to support promotional activities are identified and prepared to facilitate the achievement of promotional goals 2.2 Identify and agree roles and responsibilities for delivery of promotional services and allocate to relevant personnel 2.3 Establish and conduct relationships with targeted groups in a manner which enhances the positive image of the organisation 2.4 Use networks to assist in the implementation of promotional activities
3. Review and report on promotional activities	3.1 Analyse audience feedback and data to determine the impact of the promotional activity on the delivery of products and services 3.2 Assess effectiveness of planning processes to identify possible improvements in future activities 3.3 Collect feedback and provide to personnel and agencies involved in promotional activity 3.4 Analyse costs and time lines to evaluate the benefits accruing from the promotional activities 3.5 Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of promotional activities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.1	• Interprets, analyses and collates textual information relevant to promotional activities from a range of sources
Writing	1.2, 1.5, 2.3, 3.1, 3.3, 3.5	• Uses clear and specific language to develop formal and informal documents for different audiences in accordance with organisational requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Oral Communication	1.3, 2.3, 3.3, 3.5	• Actively participates in verbal exchanges of ideas and elicits the views and opinions of others by listening and questioning • Uses clear and specific language to clarify, explain and present information relating to the promotional activity
Numeracy	1.4, 1.5, 3.1, 3.3, 3.4, 3.5	• Classifies, analyses and compares numeric information, including costs and timelines, relevant to the promotional activity
Navigate the world of work	1.1	• Adheres to legislative requirements and organisational policies and procedures
Interact with others	1.3, 2.3, 2.4, 3.3, 3.5	• Selects and uses appropriate conventions and protocols with a range of stakeholders to project a professional image while seeking or sharing information • Recognises the importance of building rapport to establish and maintain positive working relationships
Get the work done	1.2, 1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 3.4, 3.5	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses systematic, analytical processes in complex, non-routine situations, gathering relevant information and identifying and evaluating options against agreed requirements • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Uses a range of digital tools to access data, and to extract, organise, integrate and share relevant information

Assessment Requirements for BSBMKG413 Promote products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the context for the promotional activities including:
  - relevant legislation/regulations
  - organisation's goals, objectives, systems, policies and procedures
  - budget and timelines
  - marketing needs and, if defined, marketing plans
  - objectives of the promotional activities
- consult with relevant stakeholders to plan promotional activities to meet objectives, budget and timelines
- coordinate promotional activities including:
  - allocation of personnel, roles and responsibilities
  - sourcing other resources and promotional products as appropriate
  - use of networks and relationships
- analyse feedback and data to evaluate the effectiveness of planning processes and promotional activities and make recommendations on future directions of promotional activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation as relevant to the marketing plan
- outline the planning processes for organising promotional activities

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- explain the organisation's marketing objectives and how they support the overall business objectives
- explain how common promotional activities could be used to support the marketing objectives with reference to
  - advertising
  - client functions
  - employee functions
  - media announcements
  - product launches
  - web pages.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

BSBMKG415 Research international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to undertake market research to select international markets to pursue.

It applies to individuals working with minimal supervision but with support and assistance of a more senior person within the organisation.

The activities focus on the target market and involve communication and executing tasks across cultural and geographic barriers.

The tasks involved in marketing goods and services internationally include selecting and implementing appropriate marketing activities, and monitoring and reviewing marketing performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect information	1.1 Identify target markets to research as new international markets

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
about target markets	from brief or manager 1.2 Confirm information requirements for market research 1.3 Seek assistance as required, with sourcing and accessing required information 1.4 Identify and access sources of required information
2. Investigate trends in target markets	2.1 Collate required information from information sources 2.2 Apply statistical analysis tools to information to identify trends 2.3 Seek assistance as required, with analysing required information 2.4 Investigate causal influences 2.5 Document and report identified trends and causal influences to relevant personnel within organisation
3. Utilise data in decision-making	3.1 Base decision-making on available data 3.2 Check consistency of decision-making against data, and document rationale for decision-making on markets to pursue 3.3 Document and report recommendations to relevant personnel within organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.1, 2.2, 3.1, 3.2	• Interprets textual information obtained from a range of sources and determines how content may be applied to organisational requirements
Writing	1.2, 1.3, 2.1, 2.5, 3.2, 3.3	• Integrates information from a number of sources to develop material that supports purposes and format of documentation using suitable grammatical structure and clear, logical language
Oral Communication	1.1-1.3, 2.3, 2.5, 3.3	• Participates in a variety of spoken exchanges using suitable language and non-verbal features • Uses active listening and questioning techniques to confirm requirements and understanding

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Numeracy	2.2, 2.5	• Collates and interprets numeric information and analyses trend data relevant to marketing activities
Interact with others	1.3, 2.3, 2.5, 3.3	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role • Seeks assistance and guidance from others as required
Get the work done	1.1, 1.2, 1.4, 2.2, 2.4, 3.1, 3.2	• Takes responsibility for planning, organising, confirming and completing tasks to achieve required outcomes • Takes responsibility for outcomes of routine decisions related directly to own role • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Initiates standard procedures when responding to familiar problems within immediate context • Uses digital tools to complete tasks

Assessment Requirements for BSBMKG415 Research international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and document trends in target market
- apply statistical analysis to validate trends
- document decision-making processes based on available data.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss cultural aspects relevant to international markets researched
- compare and contrast market research techniques and tools
- outline required formats for reporting research outcomes
- identify and list external and internal information sources related to international markets.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- relevant workplace documentation
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG419 Analyse consumer behaviour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse consumer behaviour for markets and specific needs.

It applies to individuals who need to analyse consumer behaviour to examine factors that impact decisions to purchase products or services. They conduct a thorough analysis of consumer attitudes and behaviour, and make recommendations on marketing strategies to increase consumption of the product or service being marketed.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm product or service market	1.1 Gather information on market or market segment for a product or service in accordance with a marketing plan 1.2 Identify consumer attributes for market or market segment from market profile or existing customer data 1.3 Identify and test features of product or service in accordance with a marketing plan

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Assess reasons for existing levels of consumer interest	2.1 Investigate consumer need for the product or service through analysis of trends and past performance 2.2 Review past marketing or positioning of product or service in relation to effectiveness of its focus of appeal 2.3 Assess, estimate and test impact of individual, social and lifestyle influences on consumer behaviour for a product or service 2.4 Analyse consumer responses to previous marketing communications 2.5 Review relevant data to determine consumer digital footprints, engagement journeys and expectations 2.6 Assess organisational capability to respond quickly to consumer demand for products or services in accordance with marketing plan
3. Recommend focus of appeal for marketing strategies for product or service	3.1 Ensure marketing strategies address innate and acquired needs of consumers and appeal to motives that influence decision-making 3.2 Present a rationale for focus of appeal that outlines how influences on consumer behaviour will be used to target effective marketing strategies 3.3 Clarify the role of the consumer in the digital marketing environment and model engagement conversations and interventions 3.4 Ensure focus of appeal meets legal and ethical obligations and budgetary requirements of marketing plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.6, 3.1, 3.3	• Interprets and analyses text from a range of sources to identify relevant and key information
Writing	1.1-1.3, 2.1, 2.3, 2.5, 3.1-3.3	• Prepares strategic business documentation incorporating appropriate vocabulary, grammatical structure and conventions appropriate to purpose and

BSBMKG507 Interpret market trends and developments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct an analysis of market data in order to determine organisational and competitor business performance and to prepare market and business forecasts. The information assists in developing an organisation's marketing plan and to determine the current or potential future success of marketing strategies.

This unit applies to marketing professionals who use statistical techniques to analyse organisational and competitor marketing performance and to interpret new and emerging trends when forecasting future business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret trends and market developments	1.1 Use statistical analysis of market data to interpret market trends and developments 1.2 Analyse market trends and developments for their potential impact on the business 1.3 Use measures of central tendency or dispersion and correlations between sets of data for quantitative interpretation of comparative

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	market data 1.4 Perform qualitative analysis of comparative market information as a basis for reviewing business performance 1.5 Analyse the market performance of existing and potential competitors and their products or services to identify potential opportunities or threats
2. Analyse qualitative results	2.1 Analyse performance data from all areas of the business to determine success of marketing activities 2.2 Identify over-performing and under-performing products and services to be considered for redevelopment or withdrawal 2.3 Forecast existing and emerging market needs based on information available using forecasting techniques
3. Report on market data	3.1 Prepare, plot and interpret data for visual presentation 3.2 Assess visual presentation for potential problems, and take any necessary corrective action 3.3 Report on analysis of market data to meet organisational requirements in terms of content, format, level of detail and scheduling

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.5, 2.1, 2.3	• Researches, evaluates, analyses and interprets market information from a range of sources, and interprets requirements
Writing	3.1, 3.2, 3.3	• Prepares reports containing complex ideas and concepts and writes in a range of styles to suit different audiences
Numeracy	1.1-1.5, 2.1, 2.3	• Collects, organises and analyses data to draw conclusions or make forecasts about trends and probability • Uses specialised statistical analysis techniques
Oral Communication	3.1, 3.3	• Presents information to a range of audiences using appropriate vocabulary and non-verbal features

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Interact with others	3.1, 3.3	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to present findings
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Develops plans and uses effective organisational and time management skills to complete tasks with an awareness of how they may contribute to longer term operational and strategic goals • Applies systematic and analytical decision making processes in complex and non-routine situations • Uses digital technologies and systems to enter and analyse data and to present information

Assessment Requirements for BSBMKG507 Interpret market trends and developments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply statistical and qualitative analysis techniques to identify:
  - current business performance
  - competitor performance
  - potential threats and opportunities
- apply qualitative and forecasting techniques to identify:
  - success of marketing activities
  - over and under-performing products and services
  - existing and emerging market needs
- document the analysis of market data including visual presentation of findings.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline internal and external sources of information relevant to forecasting market trends including:
  - business and strategic objectives
  - marketing and other business performance
  - comparative market information
  - changes in technology
  - demographic changes
  - social and cultural factors
  - economic trends

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - government activities and legislative changes
  - industry trends
  - supplier data
- outline the legislative and regulatory context as it applies to marketing
- identify software applications that are commonly used in quantitative and qualitative analysis and outline their key features
- outline statistical concepts, methods, techniques and reporting formats commonly used in marketing including:
  - conversion rate of leads to sales
  - measures of central tendency
  - measures of dispersion
  - nature and degree of relationship between variables
  - net response rate
  - normal distribution probability curve
  - sampling
  - speed of response curve
  - recency or frequency grids
  - lifetime value of customers
  - net present value of customers.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG510 Plan e-marketing communications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research, prepare and evaluate an organisational e-marketing plan that integrates electronic communications and website marketing to support marketing objectives.

It applies to managers working in advertising, public relations, marketing or promotional roles who plan electronic communications to effectively convey marketing communication messages and support achievement of marketing objectives.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare electronic marketing strategy or plan	1.1 In consultation with relevant personnel, determine electronic marketing (e-marketing) purpose and objectives reflecting organisation's strategy, direction and values 1.2 Develop an e-marketing strategy or plan that addresses aims and targets of organisation's existing business or marketing plan, and is consistent with organisational and budgetary requirements 1.3 Develop a value proposition for e-marketing strategy or plan

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify, cost and detail e-marketing tools for the organisation and its products and services in the e-marketing strategy or plan 1.5 Identify and incorporate e-marketing approaches, tools and strategies to reach target market and achieve objectives 1.6 Ensure e-marketing strategy or plan includes an action plan, schedule and budget estimates for developing and implementing e-marketing strategies 1.7 Ensure e-marketing strategy or plan includes effectiveness measures and meets legal and ethical requirements
2. Prepare and evaluate website marketing strategy	2.1 Evaluate website marketing objectives to ensure they are consistent with e-marketing strategy or plan, and modify if required 2.2 Establish strategies for evaluation of website as a marketing tool 2.3 Evaluate website design according to e-marketing strategy, to ensure the design projects required image of the organisation, and conveys features and benefits of products or services; recommend modifications if required 2.4 Evaluate website data recording, contacts and feedback mechanisms as part of website evaluation 2.5 Develop website marketing strategy in accordance with, and for inclusion in, e-marketing strategy or plan 2.6 Integrate website marketing strategy into overall e-marketing strategy 2.7 Evaluate effectiveness of website marketing strategy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.6, 1.7, 2.1, 2.4, 2.5, 2.7	• Interprets, analyses and reviews a range of texts of relative complexity to construct, confirm and extend understanding
Writing	1.2, 1.4, 1.6, 1.7,	• Uses clear, accurate and relevant language to organise and record information and complete workplace

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	2.1, 2.2, 2.3, 2.5, 2.6	documentation
Oral Communication	1.1	• Participates in verbal exchanges using appropriate language and non-verbal features • Elicits views and opinions of others with active listening and questioning
Numeracy	1.4, 2.4	• Interprets numerical data to determine resource requirements and website efficacy
Navigate the world of work	1.1, 1.2, 1.7, 2.1	• Adheres to organisational objectives and policies and considers own role for its contribution to broader goals of the work environment • Appreciates implications of legal, ethical and regulatory responsibilities related to own work
Interacts with others	1.1	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role
Get the work done	1.2-1.5, 2.1-2.4, 2.7	• Develops plans and uses effective organisational and time-management skills to complete tasks with an awareness of how they may contribute to longer-term operational and strategic goals • In more complex, non-routine situations, uses a formal decision-making process, setting or clarifying goals, gathering information and identifying and evaluating several choices against a limited set of criteria • Uses experiences to reflect on the way variables impact outcomes and to gain insights into future effective marketing strategies • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when seeking to understand potential of new technology

Assessment Requirements for BSBMKG510 Plan e-marketing communications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop an e-marketing plan for at least ONE product or service, that meets all legislative and organisational requirements, and contains:
  - an action plan
  - a schedule
  - costings
  - a monitoring strategy
  - evaluation methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain characteristics of a range of electronic marketing tools including:
  - associated benefits of use with e-marketing
  - challenges with implementation, for example costs, and availability of technology
- provide an overview of key provisions of relevant legislation, that affect marketing operations
- outline foundation principles of marketing communications, consumer behaviour and opportunities for electronic marketing.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- relevant organisational strategies and plans
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG537 Develop a social media engagement plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to effectively plan engagement with a preferred target audience on social media.

It applies to individuals working in a variety of marketing and communications occupational roles who have responsibility for developing social media plans and facilitating social engagement on behalf of a business or organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify preferred target audience	1.1 Identify and review relevant client or organisational requirements for product, brand or organisational engagement in social media 1.2 Identify and specify the characteristics of the target audience 1.3 Research and document online habits of the target audience and deliver to appropriate personnel in accordance with organisational policies and procedures
2. Document expected	2.1 Model the typical journey of the target audience across devices,

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
behaviours of target audience	platforms, sites and applications 2.2 Identify common responses to triggers and interventions on social media platforms and applications 2.3 Conduct market research with users on preferred and avoided behaviours on social media 2.4 Evaluate market research to identify the attention span and retention characteristics of alternative content types and engagement patterns 2.5 Document research results and deliver to appropriate personnel
3. Devise social media engagement strategy	3.1 Select preferred social media platforms and applications to meet organisational/client and audience requirements 3.2 Select content and engagement interventions relevant to the target audience, in line with organisational strategies 3.3 Set measurable metrics for successful performance on social media, in line with organisational strategies 3.4 Optimise the use of positive viral and other self-generating expansion techniques 3.5 Identify any risks in the plan to integrity of brand and message, and trust of target audience
4. Facilitate content delivery	4.1 Develop relevant content and schedule release to maximise attention of the target audience 4.2 Engage with target audience on chosen social media platforms by offering personalised responses to target audience questions, comments and reactions 4.3 Review and apply third party tools to automate the engagement process when possible 4.4 Apply measurable metrics for posts, responses and updates 4.5 Maximise cross-platform, device, site and application engagement for effort using suitable tools and techniques
5. Monitor and evaluate social media engagement	5.1 Develop a plan for regular review of performance using a social analytics service 5.2 Review and identify gaps in performance against requirements and adjust as necessary, in line with organisational plan 5.3 Evaluate and report on social media engagement effectiveness, delivering to relevant personnel

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies and analyses complex texts to determine legislative, regulatory, organisational and client requirements • Reviews a range of texts and reported information to understand the audience of the social media engagement
Writing	• Integrates information from a number of sources to develop materials suitable for purpose and audience
Oral Communication	• Presents information and seeks input using structure and language appropriate to audience • Uses questioning and listening to confirm understanding
Numeracy	• Analyses data from a range of sources to effectively understand audience, and define strategy success
Navigate the world of work	• Adheres to legal and regulatory responsibilities, and job requirements relevant to social media engagement
Interact with others	• Selects and uses appropriate conventions and protocols when communicating with internal stakeholders and external suppliers or users to seek or share information
Get the work done	• Plans and organises workload and processes to ensure compliance with organisational policies and procedures, and legislative requirements • Responds rapidly and shows flexibility by taking advantage of the organic nature of social media where it is advantageous for organisation and client • Draws insights from reported information, enabling increased understanding within the organisation and opportunities for improvement

Assessment Requirements for BSBMKG537 Develop a social media engagement plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- specify a target audience for social media engagement to meet client or organisational requirements, including by setting measurable metrics for determining success
- research online behaviours and characteristics of target audience and identify typical responses and journeys
- review and select social media platforms and applications to meet requirements
- develop and schedule release of relevant content that aligns to strategy
- ensure social media interactions maintain consistent message to brand and develop trust, automating engagement process where possible
- monitor and react positively to changes in the social media space.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of existing legislation and policy relevant to social media
- Key features of existing social media platforms and their relevance to key industry functions
- Key features of typical response characteristics of users to common social media interventions
- Key features of existing major tools and techniques used to engage users on social media

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Key features of performance measures commonly used to evaluate social media engagement
- Key features of relevant organisational strategies, policies, and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Business Development – Marketing field of work and include access to:

- relevant legislation and regulations
- communications equipment and technology
- relevant workplace documentation and resources – including organisational policies and procedures
- case studies or, where possible, real situations
- industry digital platforms and applications (where applicable).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMKG605 Evaluate international marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate the international environment, identify market factors and risks, and to assess viability of international marketing opportunities.

It applies to experienced individuals who use specialised knowledge to evaluate the international business environment in preparation for entering an international or export market for the first time, or to identify new marketing opportunities in markets in which their organisation already has a presence.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review global market environment	1.1 Assess international trade patterns and identify their likely importance for the business 1.2 Research international business and electronic commerce market factors, and assess opportunities to enter, shape or influence the market for their likely contribution to the business 1.3 Identify international markets operating under free trade or

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	protectionist arrangements and estimate likely ease of entering and trading successfully 1.4 Identify international trade policies and agreements and estimate their likely impact on international marketing opportunities
2. Assess international business and electronic commerce market factors	2.1 Identify and analyse impact of economic, political, social and cultural factors affecting international marketing opportunities 2.2 Investigate international market trends and developments to identify market needs relevant to the business 2.3 Identify new and emerging business and electronic commerce markets, and assess opportunities to enter, shape or influence markets based on their fit with business goals and direction, and their likely contribution to the business
3. Identify risk factors for international marketing opportunities	3.1 Analyse and rate acceptability of political, financial stability and corruption risk factors of potential market 3.2 Analyse and rate acceptability of legal and regulatory requirements, and trade barriers to potential market 3.3 Relate risk factors to international business cycles in terms of economic conditions and estimate their impact on potential market
4. Investigate international business and electronic commerce marketing opportunities	4.1 Identify and analyse international marketing opportunities according to their likely fit with the organisation's goals and capabilities 4.2 Evaluate each opportunity to determine its impact on current business and customer base 4.3 Use an assessment of costs, benefits, risks and opportunities to determine financial viability of each marketing opportunity 4.4 Determine probable return on investment and potential competitors 4.5 Describe and rank marketing opportunities in terms of viability and likely contribution to the business

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	Criteria	
Reading	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1, 4.2	• Researches and analyses a range of textual information from a variety of sources to identify key details and determine relevance to strategic organisational requirements
Writing	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1, 4.2, 4.5	• Records results of research and analysis using language and format appropriate to organisation and purpose
Numeracy	1.1, 1.2, 2.2, 4.3-4.5	• Performs complex mathematical calculations to analyse trend data, business development opportunities and cost benefit analyses
Navigate the world of work	1.4, 3.2, 4.1	• Keeps up-to-date with legislation or regulations relevant to own rights and responsibilities and considers implications of these when negotiating, planning and undertaking work • Understands and adheres to organisational policies and objectives
Get the work done	1.1-1.4, 2.1- 2.3, 3.1-3.3, 4.2, 4.3, 4.4	• Uses logical planning processes, and an increasingly intuitive understanding of context, to identify risk factors, and to evaluate alternative strategies and resources • Makes a range of critical and non-critical decisions in relatively complex situations, analysing information and taking a range of factors and constraints into account • Recognises potential of new approaches, including new technologies, to enhance work practices and outcomes

Assessment Requirements for BSBMKG605 Evaluate international marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document and present an evaluation of various international marketing opportunities including:
  - analysis of global business environment
  - assessment of social, cultural, political and economic factors impacting selection of market opportunities
  - risk assessment for each opportunity considered
  - analysis of financial viability of selected international marketing opportunities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant Australian and international standards, policies and guidelines, including those covering:
  - environmental matters
  - human rights
  - labour relations
  - packaging
  - risk management
- electronic commerce
- identify and explain key provisions of relevant legislation and codes of practice affecting aspects of marketing operations
- explain the role of the Organisation for Economic Co-operation and Development (OECD)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- identify and describe key features of the country or countries being considered for market entry or penetration, including:
  - cross-cultural communication and negotiation styles
  - global and country specific economic, social and industry directions, trends, practices and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- information sources on countries and markets being considered for entry or further penetration
- office equipment and resources
- examples of previous international marketing evaluation documents, strategic plans and marketing plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG607 Manage market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prepare for, manage and evaluate market research projects across an organisation.

It applies to senior marketing professionals who are responsible for preparing market research plans for implementation, engaging external consultants, managing market research activity, and evaluating research processes and findings across an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare market research plans for implementation	1.1 Determine research policies and procedures 1.2 Develop or commission and review market research project plan and detailed work plans to point of finalisation 1.3 Execute processes to obtain required resources to implement market research project plan and work plans
2. Engage external consultants or service	2.1 Identify requirements for external consultants from market research project plan

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
providers	2.2 Specify goods and services required to implement plans, and detail criteria for selection 2.3 Identify, evaluate and select potential consultants or other providers of required goods and services 2.4 Contract selected consultants or providers of goods and services
3. Manage market research activity	3.1 Monitor work plan activity to ensure adherence to market research project plan and work plans, and consistency with organisational market research policy and procedures 3.2 Manage external consultants or service providers to ensure performance is in line with expectations and contractual requirements
4. Evaluate research processes and findings	4.1 Confirm validity of information and data obtained by market research 4.2 Review relevance and usefulness of findings against research objectives outlined in market research project plan 4.3 Assess performance of project against all relevant elements of market research project plan and work plans 4.4 Measure stakeholder satisfaction with research process and findings 4.5 Prepare reports for future improvements to research process 4.6 Implement revised policy and practices in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1, 4.1	• Accesses complex information from a range of sources and accurately analyses data relevant to marketing activities
Writing	1.2, 2.2, 2.4, 4.5	• Prepares a range of workplace documentation, using clear language and required format, to convey priorities and critical strategic information

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Oral Communication	2.4, 3.2	• Actively participates in verbal exchanges using suitable language and non-verbal features • Uses active listening and questioning techniques to confirm understanding
Numeracy	4.4	• Measures and analyses complex numeric information during evaluation process
Navigate the world of work	1.1, 3.1, 3.2, 4.6	• Understands and adheres to organisational policies and objectives • Is highly autonomous, taking responsibility and ownership for most or all aspects of own work
Interact with others	2.4, 3.2	• Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.2, 1.3, 2.1-2.3, 4.1-4.3	• Uses logical planning processes, and an increasingly intuitive understanding of context, to gather relevant information • Systematically analyses and evaluates information to assess performance and identify opportunities for improvement • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account • Recognises potential of new approaches to enhance work practices and outcomes

Assessment Requirements for BSBMKG607 Manage market research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a market research plan
- develop specifications for research components, outsourced to external consultants as appropriate
- manage market research activities in accordance with organisational market research policy and procedures
- evaluate research processes and findings against relevant market research project plan and work plans
- prepare and present a report on market research findings.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline principles and practices of market research including:
  - data processing methods and data analysis techniques
  - project design to meet given budgets and other resource constraints
  - qualitative and quantitative research
  - design of samples
  - development and application of hypotheses
  - role of research in enterprise development
  - use of survey instruments
- compare and contrast project management principles and practices, including:
  - consultation and stakeholder involvement
  - development of policies and procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - methods of action to ensure performance
  - monitoring of timelines, budgets and other implementation plans
  - organisational procedures for engagement of consultants
- provide an overview of key provisions of relevant legislation, codes of practice and national standards affecting marketing operations
- discuss the impact of economic, social and industry directions, trends, and practices on marketing functions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- previous market research plans and exemplars of market research project specifications
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG608 Develop organisational marketing objectives

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct a strategic analysis to develop organisational marketing objectives. This involves reviewing the organisation's internal and external environments, evaluating past and current marketing performance, and exploring and evaluating new marketing opportunities.

It applies to senior marketing professionals who are responsible for providing strategic direction to the marketing function of an organisation. Their responsibilities include analysing information on internal and external business and marketing environment; examining current marketing performance; identifying new marketing opportunities arising from emerging trends; and devising strategies to achieve overall business objectives.

Individuals operating at this level generally conduct these activities using information gathered by people working under their direct and indirect supervision at lower levels of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1. Identify strategic direction	1.1 Confirm organisation's mission, vision, purpose and values from current organisational materials or from owners, directors or senior management 1.2 Analyse strategic organisational documents to identify organisational directions and targets 1.3 Complete a situational analysis identifying factors impacting the direction and performance of the business 1.4 Identify legal and ethical requirements for the organisation 1.5 Document and confirm strategic direction of the organisation with owners, directors or senior management, and identify its impact on marketing activities
2. Review marketing performance	2.1 Evaluate effectiveness of previous marketing and positioning strategies to identify lessons learned 2.2 Analyse current key products or services and major markets for strengths, weaknesses, opportunities and threats 2.3 Evaluate previous marketing opportunities captured by the organisation, and examine and document their profitability 2.4 Evaluate marketing performance against previous objectives, targets to identify critical success factors, and areas for improvement
3. Scope marketing opportunities	3.1 Identify and analyse marketing opportunities for viability and likely contribution to the business 3.2 Use an assessment of external factors, costs, benefits, risks and opportunities to determine scope of each marketing opportunity 3.3 Analyse opportunities for likely fit with organisational goals and capabilities 3.4 Evaluate each opportunity to determine its likely impact on current business and customer base
4. Formulate marketing objectives	4.1 Develop objectives in consultation with key internal stakeholders that are attainable and measurable, and that identify nature and extent of what is to be achieved 4.2 Ensure objectives are consistent with forecast needs of the business and market 4.3 Ensure objectives are compatible with the organisation's projected capabilities, resources and financial position 4.4 Ensure objectives are compatible with the organisation's direction and purpose, and meet legal and ethical requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.5 Formulate long-term strategic objectives and related key performance indicators by product or service, market segment and overall 4.6 Develop a risk management strategy to identify risks and manage contingencies, and to ensure marketing objectives are met in accordance with overall organisational requirements 4.7 Document marketing objectives

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1-2.4, 3.1-3.3, 4.3, 4.4, 4.6	• Accesses, analyses and evaluates information from a range of sources relating to the marketing process
Writing	1.3, 1.5, 2.3, 4.1, 4.5-4.7	• Uses a range of writing styles to articulate complex concepts • Revises and edits documents based on feedback • Uses appropriate formats and grammatical structures to present information logically for different audiences
Oral Communication	1.1, 1.5, 4.1	• Uses appropriate language and non-verbal features to explain and present information to a range of personnel • Uses active listening and questioning to elicit feedback and clarify or confirm understanding
Numeracy	1.2, 2.2, 2.3, 3.2	• Analyses complex numerical information on trend data, targets and budgets
Navigate the world of work	1.1, 1.2, 1.4, 3.3, 4.4, 4.6	• Works autonomously making high-level decisions to ensure organisational objectives and regulatory requirements are met • Understands own legal and ethical rights and responsibilities
Interact with others	1.1, 1.5, 4.1	• Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how • Fosters a collaborative culture within own sphere of

BSBSMB304 Determine resource requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select options for resource acquisition, develop procedures and systems for efficient installation, and use and maintain resources.

It applies to individuals who are establishing or operating a micro business providing self-employment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify resources needed in the business	1.1 Use the business profile to determine types of resources that may be required

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Gather information regarding resource requirements from appropriate sources 1.3 Investigate digital technology options, benefits and challenges 1.4 Determine resource quantities in accordance with business activity levels and financial position
2. Select appropriate sources for resources required in the business	2.1 Investigate different options for acquiring resources needed in the business in terms of business profile and stakeholder needs 2.2 Determine reliability, risks and costs associated with these options in line with business projections 2.3 Determine ease of access to sources of service and support 2.4 Select suitable options as investigated 2.5 Establish relationships with suppliers and other key people
3. Prepare for use of resources in the business	3.1 Design procedures and systems to allow effective and efficient introduction, use and maintenance of resources 3.2 Negotiate and review arrangements for supply of resources to ensure the business profile is met 3.3 Design procedures for monitoring use of resources 3.4 Develop procedures for maintenance, support, repair and replacement of business machinery, equipment and software

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 3.1	• Gathers, interprets and analyses textual and numerical information from a range of sources and identifies relevant and key information
Writing	1.1, 1.3, 2.5, 3.1-3.4	• Uses factual information and industry related terminology to complete simple instructional documentation
Oral Communication	2.1, 2.5, 3.2	• Uses relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Numeracy	1.3, 2.2, 3.1	• Analyses numerical information to calculate resource and equipment expenditure
Interact with others	2.5	• Uses a range of communication strategies to establish a connection with others
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.4	• Uses a range of digitally based technology and applications to access and filter data, and then extract, organise, integrate and share relevant information in increasingly effective ways • Invests some time in looking for new ideas and opportunities, selecting appropriate options as required • Considers effectiveness of a solution in terms of how well it meets business goals • Takes responsibility for planning and organising own and others workload, identifying ways of sequencing and combining elements for greater efficiency

Assessment Requirements for BSBSMB304 Determine resource requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine appropriate resource levels in line with micro business profile and desired profit
- identify, assess and select digital technologies
- select options for resource acquisition suited to the micro business and financial position, including stakeholder needs
- establish relationship with suppliers including negotiating and reviewing supplies to suit profile of micro business
- develop procedures and systems to allow for efficient and effective installation and use of resources, including monitoring and maintenance as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify legislative requirements relating to micro business operations
- describe the functions of key digital technologies and their benefits and challenges to micro business
- list functions of a range of business equipment and machinery
- outline the micro business profile and structure
- describe procedures and systems for use of and routine maintenance of resources

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- summarise types of resources required as per the micro business profile.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources including maintenance manuals
- business technology including internet access
- relevant workplace documentation and resources including a business profile sample
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to source advice and specialist services to manage business compliance requirements.

It applies to individuals who are establishing or operating a micro business providing self-employment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify regulatory, taxation and insurance requirements of the business	1.1 Identify regulatory, taxation and insurance requirements that might be relevant to operation of the business 1.2 Gather information that assists in interpreting and explaining regulatory, taxation and insurance requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Investigate relationships between legislation, regulations, codes of practice, associated standards and written material to determine compliance requirements of the business
2. Develop procedures to ensure compliance and risk minimisation	2.1 Identify business advisors and other sources of assistance relevant to compliance requirements and business type 2.2 Explain business type and operations to advisors, covering full scope of the business 2.3 Clarify and confirm compliance requirements and risk minimisation needs with advisors 2.4 Access sources of advice and specialist services for regulatory, taxation and insurance compliance 2.5 Review advice and procedures against compliance requirements and their appropriateness for the business
3. Implement compliance procedures	3.1 Implement procedures within provided guidelines 3.2 Take action to ensure the business complies with relevant taxation and business registration requirements, legislation, regulations, codes of practice and associated standards 3.3 Arrange appropriate insurance cover for the business

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.4, 2.5, 3.1-3.3	• Identifies and interprets legislative and regulatory information pertinent to business requirements
Writing	1.1, 2.1, 3.2, 3.3	• Develops material for a specific audience using clear and detailed language to clarify information and requirements
Oral Communication	2.2, 2.3, 3.3	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding
Numeracy	2.5, 3.3	• Analyses numerical information to calculate specific business requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		• Uses formal and informal mathematical language to discuss compliance
Navigate the world of work	1.1, 1.3, 3.1, 3.2	• Takes some personal responsibility for adherence to legal and regulatory requirements
Get the work done	1.2, 1.3, 2.1, 2.4, 3.3	• Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing and timing • Understands and explicitly applies some basic principles of analytical and lateral thinking • Takes responsibility for the outcomes of routine decisions related directly to own role • Determines priorities and sequences steps involved in clearly defined familiar tasks, and identifies and assembles resources required

Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs of the business
- identify, select and access sources of advice on compliance and risk minimisation procedures for the business
- complete a development and review of procedures for compliance and risk minimisation (with assistance from advisors).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify micro business registration and licensing requirements
- list government legislative requirements relating to business operation
- categorise the nature of legal responsibility
- pinpoint relevant industry codes of practice
- list relevant WHS responsibilities and procedures
- name sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues
- outline taxation requirements.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology including internet access for research
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB401 Establish legal and risk management requirements of small business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and comply with all regulations affecting the business.

It applies to individuals operating a small business who use analytical skills to interpret legislation and regulations and develop procedures to manage compliance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and implement business legal requirements	1.1 Identify and research possible options for the business legal structure using appropriate sources 1.2 Determine legislation and regulatory requirements affecting

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	operations of the business under its chosen structure 1.3 Develop and implement procedures to ensure full compliance with relevant legislation and regulatory requirements
2. Comply with legislation, codes and regulatory requirements	2.1 Establish systems to ensure legal rights and responsibilities of the business are identified and the business is adequately protected, specifically in relation to work health and safety (WHS), business registration and environmental requirements 2.2 Identify taxation principles and requirements relevant to the business, and follow procedures to ensure compliance 2.3 Identify and carefully maintain legal documents and maintain and update relevant records to ensure their ongoing security and accessibility 2.4 Monitor provision of products and services of the business to protect legal rights and to comply with legal responsibilities 2.5 Conduct investigations to identify areas of non-compliance with legal and regulatory requirements, and take corrective action where necessary
3. Negotiate and arrange contracts	3.1 Seek legal advice on contractual rights and obligations, if required, to clarify business liabilities 3.2 Investigate and assess potential products and services to determine procurement rights and ensure protection of business interests where applicable 3.3 Negotiate and secure contractual procurement rights for goods and services including contracts with relevant people, as required, in accordance with the business plan 3.4 Identify options for leasing or ownership of business premises and complete contractual arrangements in accordance with the business plan
4. Identify and treat business risks	4.1 identify potential internal and external risks to the business 4.2 assess the probability and impact of identified risks 4.3 prioritise risks for treatment 4.4 develop actions to mitigate risks including identifying insurance requirements and adequate cover

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.2-3.5	• Identifies, analyses and evaluates a range of complex text to determine legislative, regulatory and related business requirements
Writing	1.3, 2.1, 2.3, 2.5, 3.1, 3.3, 3.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.5, 3.1, 3.3	• Uses specific and relevant language to clearly articulate legal issues, and uses questioning and listening techniques to clarify solutions • Participates in verbal negotiations using tone and language suitable to audience
Numeracy	2.2, 2.5, 3.3, 3.4	• Reviews, analyses, compares and contrasts numerical data which may be embedded in documents • Calculates business insurance costs and compares costing options
Navigate the world of work	1.2, 1.3, 2.1	• Monitors adherence to organisational policies and legislative responsibilities and considers own role in terms of its contribution to broader goals of work environment
Interact with others	3.1, 3.3	• Plays a lead role in situations requiring effective collaboration, demonstrating high-level influencing skills, focusing and shaping awareness, and engaging and motivating others
Get the work done	1.1-1.3, 2.1	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Implements actions as per plan, making adjustments if necessary and addressing unexpected issues • Understands importance of secure information and privacy in relation to own work and takes personal responsibility for identifying and managing risk factors • Makes a range of critical and non-critical decisions in complex situations, taking a range of constraints into account

Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB402 Plan small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify financial requirements of a business, including profit targets, cash flow projections and strategies to garner financial support.

It applies to individuals who operate a small business or work within an existing micro or small businesses and interpret financial data.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify costs, calculate prices and prepare profit statement	1.1 Identify and document costs associated with production and delivery of business products and services 1.2 Calculate prices based on costs and profit margin, as an hourly

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	charge-out rate for labour or unit price for products 1.3 Calculate break-even sales point to establish business viability and profit margins 1.4 Identify appropriate pricing strategies in relation to market conditions to meet business profit targets 1.5 Prepare projected profit statement to supplement the business plan
2. Develop a financial plan	2.1 Set profit targets or goals to reflect owner's desired returns 2.2 Identify working capital requirements necessary to attain profit projections 2.3 Identify non-current asset requirements and consider alternative asset management strategies 2.4 Prepare cash flow projections to enable business operation in accordance with business plan and legal requirements 2.5 Identify capital investment requirements accurately for each operational period 2.6 Select budget targets to enable ongoing monitoring of financial performance
3. Acquire finance	3.1 Identify start-up and ongoing financial requirements according to financial plan/budget 3.2 Identify sources of finance, including potential financial backers, to provide required liquidity for the business to complement business goals and objectives 3.3 Investigate cost of securing finance on optimal terms 3.4 Identify strategies to obtain finance as required to ensure financial viability of the business

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.1-2.5, 3.1,	• Identifies, analyses and evaluates complex information from a range of sources

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	3.2	
Writing	1.1, 1.5, 2.1, 2.4, 3.2	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 3.2	• Uses specific and relevant language to secure finance and uses questioning and listening techniques to clarify outcomes • Participates in verbal negotiations using tone and language suitable to audience
Numeracy	1.1-1.5, 2.1, 2.2, 2.4-2.6, 3.1, 3.3, 3.4	• Analyses numerical information to determine costs, prices, profit and losses, and other financial data
Navigate the world of work	2.4	• Appreciates implications of legal and regulatory responsibilities related to own work
Get the work done	1.1, 1.4, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	• Sequences and schedules complex activities, including implementing and monitoring financial strategies • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account, making adjustments as necessary • Regularly uses formal thinking techniques to generate new ideas

Assessment Requirements for BSBSMB402 Plan small business finances

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a financial plan which identifies financial requirements of the business, including cash flow projections and a projected profit statement
- follow the financial plan, including:
  - demonstrating an awareness of appropriate legal requirements
  - implementing strategies to monitor financial performance
- identify sources and investigate costs of securing appropriate financial assistance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain break-even analysis
- clarify costing for the business, including margin or mark-up, hourly charge-out rates and unit costs
- summarise financial decision-making relevant to the business
- outline methods and relative costs of obtaining finance
- summarise principles for preparing balance sheets
- provide a detailed explanation of:
  - principles for preparation of cash flow forecasts
  - principles for preparation of profit and loss statements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - purpose of financial reports
- explain relevant accounting terminology
- describe working capital cycles.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- software for financial calculations
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CPCCCM2002A Carry out excavation

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to undertake hand excavation tasks and excavations requiring the assistance of plant machinery to form excavations for footings, and the provision of services. It includes excavation to new and existing sites, and new services or the diversion of existing services.

Application of the Unit

Application of the unit This unit of competency supports achievement of skills to safely and efficiently undertake basic excavation on a construction site, which includes working with others and as a member of a team.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions and operational details are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation***. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. ***Tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. 1.5. Material quantity requirements are calculated in accordance with plans and specifications. 1.6. ***Materials*** appropriate to the work application and ***quality requirements*** are identified, obtained, prepared, safely handled and located ready for use. 1.7. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2. Locate excavation site and erect safety equipment.	2.1. Excavation route is located, and line and depth are established from site plans and instructions. 2.2. Site pegs/profiles are used to identify service

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	markers and to ***set out*** service points and the excavation limits are marked.
	2.3. Safety barricades and signs appropriate to the project are erected in positions as required by site safety plan.
	2.4. Temporary drainage system is established to divert surface and sub-surface water from excavation.
	2.5. Service markers or taped areas are identified and damage or interference with underground services avoided.
3. Dig excavations.	3.1. ***Excavations*** are safely dug with hand tools to ensure correct route, line and depth, and that procedures are used to minimise risk to self and others.
	3.2. Machine operator is assisted with excavation to ensure correct route, line and depth, and that correct procedures are used to minimise risk to self and others.
	3.3. Trench/excavation support is installed where specified by job specifications and regulations.
	3.4. Excavation is cleaned free from loose material with hand tools and according to job requirements and instructions.
4. Clean up.	4.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
	4.2. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- assist machine operator
- determine requirements
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- follow instructions
- read and interpret:
  - documentation from a variety of sources
  - drawings and specifications
- report faults
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- commonly used in-ground services and identification by relevant markers
- construction terminology
- excavation materials
- excavation techniques
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- regulatory requirements for excavation support for safe access
- safe work with common plant used on construction industry sites
- types, characteristics, uses and limitations of tools and equipment
- workplace and equipment safety requirements.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools, plant and equipment • communicate and work effectively and safely with others • determine from an existing set out, a mark out and then excavate site as part of an overall project to job specifications without damaging services.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

EVIDENCE GUIDE

	• an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments. Validity and sufficiency of evidence requires that: • competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace • where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

EVIDENCE GUIDE

separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- maps
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT

	• regulatory and legislative requirements pertaining to carrying out excavations • relevant Australian standards • safe work procedures related to carrying out excavations • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Planning and preparation include:	• work site inspection • equipment defect identification • assessment of conditions and hazards • determination of work requirements.

Safety (***OHS***) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:	• emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
	• handling of materials
	• hazard control
	• hazardous materials and substances
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  • earth leakage boxes
	  • lighting
	  • power cables, including overhead service trays, cables and conduits
	  • restricted access barriers
	  • surrounding structures
	  • traffic control
	  • trip hazards
	  • work site visitors and the public
	  • working at heights
	  • working in confined spaces
	  • working in proximity to others
	  • working with dangerous materials
	• organisational first aid
	• personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
	• use of firefighting equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT

	• use of tools and equipment • workplace environment and safety.
Tools and equipment include:	• automatic levels • brooms • buckets • crow bars • hammers • hoses • laser levels • levels • measuring tapes and rules • picks • profiles • saws • set out pegs • shovels • staff • straight edges • string lines • wheelbarrows.
Materials include:	• nails • pegs • sheet material shoring (timber and metal) • timber.
Quality requirements include relevant regulations, including:	• Australian standards • internal company quality policy and standards • manufacturer specifications, where specified • workplace operations and procedures.
Environmental requirements include:	• clean-up management • noise and dust • vibration • waste management.
Statutory and regulatory authorities include:	• federal, state and local authorities administering applicable Acts, regulations and codes of practice.
Set out includes:	• identification of services that can be damaged or impede excavation • marking out of the project.
Excavations include:	• extension of existing structures, to provide provisions for new services and to modify or

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT

	repair existing services • provisions for footings/slabs to new structures • shoring (timber, metal or piling) • those being undertaken on sloping ground, flat ground, wet ground, dry ground, loose ground or any type of foundation material, with mechanical assistance possibly required for rock • trench/excavation support using sheet material.

CPCCCO2013A Carry out concreting to simple forms

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to safely install formwork, reinforcement and place and finish concrete for the construction of minor slabs, pathways and other minor works to a specified design finish.

The unit includes positioning the truck, placing concrete from truck to work area, spreading concrete and cleaning up site.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the understanding and skills to use concrete tools, equipment and materials with simple forms, which may include working with others and as a member of a team.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions and operational details are obtained using relevant ***information***, confirmed and applied for ***planning and preparation*** purposes. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. Plant, ***tools and equipment*** selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement. 1.5. Materials quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***. 1.6. ***Materials*** appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use. 1.7. ***Environmental requirements*** are identified for the project in accordance with environmental plans and regulatory obligations and applied.
2. Erect and strip simple	2.1. Subgrade is prepared.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
formwork.	2.2. ***Formwork*** design is identified from drawings. 2.3. Formwork is erected safely on commencement. 2.4. Form release agent is applied to erected formwork where specified. 2.5. Timber components are de-nailed following stripping of formwork. 2.6. Components are cleaned, stacked and stored for reuse or bundled for removal. 2.7. Formwork components are removed from site.
3. Place and tie reinforcement.	3.1. ***Reinforcing*** components are handled and positioned safely. 3.2. Reinforcing bars and mesh are positioned. 3.3. Bar chairs and spacers are positioned, with minimum edge cover.
4. Place concrete.	4.1. Formwork or excavation is cleaned of excess material and debris prior to concrete placement. 4.2. ***Concrete*** is safely transported by wheelbarrow. 4.3. Pump line/chute is controlled and concrete placed. 4.4. ***Concrete is placed*** in formwork to specified depth. 4.5. Concrete is screeded to the alignment of formwork and project specified datums. 4.6. Surface of ***concrete is finished*** in accordance with specifications.
5. Clean up.	5.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations and codes of practice and job specification. 5.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- evaluating own actions and making judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- concrete materials
- concreting techniques
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- levelling techniques
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, drawings and specifications
- processes for the calculation of material requirements
- quality requirements
- simple formwork and reinforcing componentry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and procedures including quality requirements • safely and effectively operate and use tools, plant and equipment • communicate and work effectively and safely with others • prepare subgrade; erect formwork; cut, place and tie reinforcement; place and hand screed concrete for a slab of (4 square metres is recommended) and a minimum depth of 100mm to the required finished level and job specification.
Context of and specific resources	This competency is to be assessed using standard and authorised work practices, safety requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

EVIDENCE GUIDE

for assessment

and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

EVIDENCE GUIDE

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions,

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT

	where specified • MSDS • memos • regulatory and legislative requirements pertaining to concreting • relevant Australian standards • safe work procedures relating to concreting • signage • verbal, written and graphical instructions • work bulletins • work schedules, plans and specifications.
Planning and preparation include:	• assessment of conditions and hazards • determination of work requirements and safety plans and policies • equipment defect identification • work site inspection.

Safety (***OHS***) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:	• emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
	• handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
	• hazard control
	• hazardous materials and substances
	• organisational first aid
	• PPE prescribed under legislation, regulations and workplace policies and practices
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  • earth leakage boxes
	  • lighting
	  • power cables, including overhead service trays, cables and conduits
	  • restricted access barriers
	  • surrounding structures
	  • traffic control
	  • trip hazards
	  • work site visitors and the public
	  • working at heights

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT

	• working in confined spaces • working in proximity to others • use of firefighting equipment • use of tools and equipment • workplace environmental requirements and safety.
Tools and equipment:	• include: • brooms • chutes • edging tools • shovels • trowels • wheelbarrows • may include: • bull floats • hand floats • kibbles • line pumps • stipple devices • trowelling machines.
Quality requirements include:	• internal company quality policy and standards • manufacturer specifications where specified • relevant regulations, including Australian standards • workplace operations and procedures.
Materials:	• include: • bar chairs • bracing • edge form/boards • fabric sheet mesh • pegs • spacers • may include reinforcing bars.
Environmental requirements include:	• clean-up management • dust and noise • stormwater management • vibration • waste management.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT

Simple ***formwork*** includes:	• timber or steel edge form to a maximum of 100mm in depth.

Simple ***reinforcing***:	• includes:
	  • bar chairs
	  • fabric sheet mesh
	  • spacers
	• may include:
	  • reinforcing bars
	  • trench mesh.

Simple forms of ***concrete***:	• include slabs (not requiring internal beams and piers)
	• may include:
	  • beam thickeners
	  • channels
	  • garden edges
	  • pathways
	  • post holes
	  • simple concrete aprons.

Concreting includes:	• finishing of concrete • floating of the concrete • placing of concrete • screeding, limited to include a hand screed.

Placing of concrete involves movement of concrete from the truck to the work and:	• includes:
	  • chutes
	  • wheelbarrows
	• may include:
	  • kibbles
	  • pump lines.

Finishing of concrete includes:	• broomed • hand floating • power floating • sponged • stipple device finish • trowelled • trowelling machine finish • wood floated • other project specified finish.

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess risks.	1.1 Identify, assess and report hazards in the work area to designated personnel. 1.2 Report safety risks in the work area based on identified hazards, to designated personnel. 1.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks. 1.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state or territory WHS legislation, and relevant information.
2. Identify hazardous materials and other hazards on work sites.	2.1 Correctly identify and, if appropriate, handle and use hazardous materials on a work site in accordance with legislative requirements, and workplace policies and procedures. 2.2 Apply measures for controlling risks and construction hazards effectively and immediately. 2.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers, immediately they are identified. 2.4 Identify asbestos-containing materials on a work site and report to designated personnel.
3. Plan and prepare for safe work practices.	3.1 Identify, wear, correctly fit, use and store correct personal protective equipment and clothing for each area of construction work in accordance with workplace procedures 3.2 Select tools, equipment and materials, and organise tasks in conjunction with other personnel on site and in accordance with workplace procedures. 3.3 Determine required barricades and signage, and erect at the appropriate site location. 3.4 Apply material safety data sheets (MSDSs), job safety analyses (JSAs) and safe work method statements (SWMSs) relevant to the work to be performed.
4. Apply safe work practices.	4.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements, and workplace policies and procedures. 4.2 Use plant and equipment guards in accordance with manufacturers' specifications, work site regulations and Australian Standards. 4.3 Follow procedures and report hazards, incidents and injuries

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	to relevant authorities. 4.4 Recognise and do not use prohibited tools and equipment in areas containing identified asbestos. 4.5 Identify and follow requirements of work site safety signs and symbols. 4.6 Clear and maintain work site area to prevent and protect self and others from incidents and accidents, and to meet environmental requirements.
5. Follow emergency procedures.	5.1 Identify designated personnel in the event of an emergency for communication purposes. 5.2 Follow safe workplace procedures for dealing with accidents, fire and other emergencies, including identification and use, if appropriate, of fire equipment within scope of own responsibilities. 5.3 Describe, practice and effectively carry out emergency response and evacuation procedures when required. 5.4 Carry out emergency first aid treatment of minor injuries and, as soon as possible, accurately report treatment details to designated personnel.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

Links

Companion volumes to this training package are available at the VETNet website - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad

Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CUAACD301 Produce drawings to communicate ideas

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form.

It applies to individuals who use drawings, either electronic or hand drawn, for personal use or in response to a project or brief. Drawings may include design concepts for objects, processes or spaces, movement sequences for performances or screen productions, exhibitions, tenders, proposals or publications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan drawing work	1.1 Identify drawing requirements from reference material and confirm with appropriate people if required 1.2 Identify factors, including contractual, legal and ethical factors, that may impact on how drawing work is undertaken 1.3 Gather information about drawing techniques, materials and equipment from a range of sources and determine how they may be used to communicate ideas

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Evaluate information for its application to specific drawing briefs
2. Experiment to represent ideas	2.1 Explore the capabilities of techniques, materials and equipment 2.2 Follow safety procedures for particular techniques, materials and equipment 2.3 Select approaches that best suit the purpose of drawings and their presentation context
3. Create drawings	3.1 Organise materials, tools and equipment for selected techniques 3.2 Produce preliminary drawings and discuss their effectiveness with relevant people 3.3 Confirm intellectual property and other relevant legislative requirements are met 3.4 Finalise drawings, incorporating feedback on work in progress as required 3.5 Prepare drawings for the presentation context

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4	• Interprets information from familiar sources to determine drawing production requirements and legal and safety constraints
Oral Communication	1.1, 1.2, 3.2	• Uses questioning and active listening to gather information and opinions from others
Navigate the world of work	1.2, 2.2, 3.3	• Complies with legal, ethical and safety requirements associated with creative work
Interact with others	3.2	• Uses accepted practices and protocols in discussions of work progress with others
Get the work done	1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.4, 3.5	• Identifies and organises relevant information and resource requirements • Analyses drawing requirements and tests the

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		capabilities of materials, tools and equipment to determine the most appropriate approach for final production • Refine drawings in response to feedback and presentation requirements

Assessment Requirements for CUAACD301 Produce drawings to communicate ideas

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- identify and analyse drawing requirements
- explore techniques, materials and equipment safely
- produce a series of drawings that:
  - show a command of selected techniques
  - successfully communicate the required ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used in drawing
- identify sources of information about different approaches to drawing
- identify work health and safety issues associated with tools and materials used for drawing
- explain intellectual property issues and other legislation relevant to drawing.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment and materials required to produce drawings
- information sources.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUACMP311 Implement copyright arrangements

Modification History

Release	Comments
Release 2	This version was released with CUA Creative Arts and Culture Training Package Version 4.1. Minor edits to performance evidence.
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to implement individual or collaborative copyright arrangements.

This unit applies to individuals required to source copyright information, obtain permission to use other people's material, protect material from unauthorised use and applying copyright notices for creative works.

Individuals that undertake this unit typically work under supervision with some responsibility regarding the planning and completion of work tasks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the	*Performance criteria describe the performance needed to*

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
essential outcomes.	*demonstrate achievement of the element.*
1. Source information on copyright	1.1 Identify sources of information on copyright, to determine what is and what is not protected by copyright 1.2 Identify the role of copyright collecting societies 1.3 Identify and discuss copyright laws and regulations with relevant personnel
2. Obtain permission to use copyright material	2.1 Identify copyright owner's exclusive rights to creative works 2.2 Determine need for copyright clearance and identify potential for use of copyright material in accordance with laws and regulations that govern copyright in Australia 2.3 Discuss and confirm copyright clearance issues with relevant personnel 2.4 Determine if moral rights or performer's rights need to be credited 2.5 Obtain and record copyright clearance permissions in accordance with organisational requirements
3. Protect material from unauthorised use	3.1 Confirm original work as being the result of individual or collaborative effort 3.2 Discuss and formally record copyright ownership or proportional ownership with relevant personnel 3.3 Identify and confirm individual or collaborative copyright responsibilities 3.4 Identify potential infringements to copyright claims 3.5 Apply copyright notices on creative works in accordance with legal obligations and workplace policies and procedures 3.6 Prepare, date and store documentation to track copyright notices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets documentation to assist with copyright requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Writing	• Completes workplace documentation accurately and legibly using technically specific language
Oral Communication	• Obtains information by listening and questioning • Uses clear language to contribute information and express requirements
Navigate the world of work	• Understands and complies with relevant legislation to assist with copyright arrangements
Interact with others	• Works collaboratively to determine and complete requirements
Get the work done	• Plans and organises routine tasks, taking some responsibility for identifying and confirming copyright issues • Recognises and responds to predictable routine problems seeking assistance when problems are beyond immediate responsibilities or experience • Uses technology to track and download material

Modification History

Release	Comments
Release 2	This version was released with CUA Creative Arts and Culture Training Package Version 4.1. Minor edits to performance evidence.
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- source information and seek assistance to organise copyright permission and clearance for creative works
- apply copyright notices on creative works in accordance with legal obligations and workplace policies and procedures
- communicate with copyright collecting societies
- recognise infringements of copyright
- document and store copyright clearances claims and notices in accordance with legal obligations and workplace policies and procedures

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- key concepts of exclusive rights, fair use, moral rights and performer's rights
- procedures to determine copyright ownership
- sources of copyright information
- digital content copyright and common sources of infringement

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Australian organisations responsible for holding copyright collections and their roles and responsibilities
- key features of laws and regulations that govern copyright in Australia.
-

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a creative arts working environment or workplace. This includes access to:

- information sources on definitions, laws and regulations about copyright
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADRA201 Develop drawing skills

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to use a limited range of basic drawing techniques to produce fundamental drawings from simple ideas. This unit relates to drawing as an art form and differs from units that focus on drawing as a visual representation tool.

It typically applies to individuals who have developed some general design or drawing skills and who are now embarking on a career in visual arts. They have little or no experience in drawing and work under close supervision and with guidance from others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – drawing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare drawing resources	1.1 Calculate and obtain type and quantity of drawing equipment, tools and materials according to own selected ideas for the work 1.2 Prepare equipment, tools and materials according to procedures for workplace safety, cost control and waste minimisation 1.3 Set up a safe work space with guidance from key people
2. Use and test drawing	2.1 View a range of drawings in different styles, and discuss with

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
techniques	key people how effects are achieved 2.2 Match potential techniques to ideas for own drawings with assistance from key people 2.3 Test a range of techniques to determine the effects they achieve through experimentation with samples, practice pieces or work in progress 2.4 Use selected techniques to produce fundamental drawings, considering and applying elements and principles of design 2.5 Clean and store equipment, tools, and materials according to specific needs of different items 2.6 Handle equipment, tools and materials safely and minimise waste throughout all processes
3. Review work to develop skills	3.1 Review own drawings and note areas for future improvement 3.2 Seek and consider feedback from key people to identify areas for improvement 3.3 Review different opportunities to build own skills and select suitable options

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.3	• Plans a learning process to build own skills
Reading	1.2	• Interprets detailed information from familiar procedural documents to determine production and safety requirements
Oral Communication	1.3, 2.1, 2.2, 3.2	• Clearly explains ideas for designs and techniques using relevant industry language • Uses questioning and active listening techniques to gain information and feedback and confirm understanding
Numeracy	1.1, 1.3, 2.4	• Uses basic calculations to determine quantities of materials, measure dimensions of work space and drawings

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Navigate the world of work	1.2, 1.3, 2.4, 2.6	• Follows defined procedures and legislative requirements, understands boundaries of own work and skill, and seeks clarification and guidance on all issues
Interact with others	1.3, 2.1, 2.2, 3.2	• Seeks guidance and cooperates with instructions and advice from others to achieve best outcomes for own creative work
Get the work done	1.1-1.3, 2.1-2.4	• Organises all processes to set up work space, test techniques and produce creative work with close guidance from others • Makes routine decisions using procedures to guide activities • Makes decisions about appropriate techniques by evaluating and testing a limited range of known options with assistance from others • Resolves problems with technique through trial, error and practice

Assessment Requirements for CUADRA201 Develop drawing skills

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- produce multiple fundamental drawings where the materials and techniques support own ideas for work
- document a basic plan to build own skills, outlining own selected skill development options.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general features of major styles of drawing and the work of key practitioners relevant to individual area of interest
- outline, for the elements and principles of design, the fundamental characteristics, primary interrelationships and use in fundamental drawings
- outline, for a range of equipment and tools used to produce drawings, key physical features and uses, cleaning techniques and storage requirements
- outline the general features and use of a basic range of materials and techniques used to produce fundamental drawings
- outline typical work space requirements for producing fundamental drawings including ways of organising space and equipment for efficient work operation
- outline procedures for working safely with drawing materials, tools and equipment.

Release 1	This streamlined version first released with *FSK Foundation Skills Training Package version 1.0*.

Application

This unit describes the skills and knowledge to extract and evaluate mathematical information and make a range of calculations including positive and negative numbers, rates and ratios, and powers and roots.

This unit applies to individuals who need numeracy skills at Australian Core Skills Framework (ACSF) level 4 to undertake a vocational training pathway or workplace tasks.

This unit is designed for integration and contextualisation with vocational units to support achievement of vocational competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Numeracy

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Extract and interpret mathematical information	1.1 Extract mathematical information embedded in a range of workplace tasks and texts 1.2 Interpret and comprehend mathematical information

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Element	Performance Criteria
2. Undertake mathematical calculations involving multiple steps	2.1 Select from and use a range of mathematical and problem solving processes 2.2 Flexibly use different forms of fractions, decimals and percentages 2.3 Calculate with positive and negative numbers 2.4 Express numbers as powers and roots and use in calculations 2.5 Calculate using routine formulas
3. Check and communicate results	3.1 Use estimation and assessment processes to check outcome 3.2 Use mathematical language to discuss and explain the processes, results and implications of the task

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing		• Records steps of calculation and result, uses symbolism appropriate to task
Technology		• Uses a scientific calculator

Mapping Information

Assessment Requirements for FSKNUM21 Apply an expanding range of mathematical calculations for work

Modification History

Release	Comments
Release 1	This streamlined version first released with *FSK Foundation Skills Training Package version 1.0*.

Performance Evidence

Evidence of the ability to:

- extract, interpret and use mathematical information
- perform calculations involving fractions, decimals, percentages, positive and negative numbers, basic powers and roots and routine formulas
- perform multi-step calculations
- apply calculations to workplace contexts and tasks.

Note: Where a specific volume and/or frequency is not specified, evidence must be provided at least once

Knowledge Evidence

Evidence of the following knowledge must be demonstrated:

- equivalent value of fractions, decimals and percentages
- relationship between powers and roots
- workplace application of negative numbers
- order of operations and use of brackets and parentheses.

Assessment Conditions

Assessment texts and tasks reflect those typically found in the workplace.

Individuals can access a range of established support resources.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Culturally appropriate processes and techniques suited to the language, literacy and numeracy capacity of individuals and the work being performed must be used.

Reasonable adjustments can be made to ensure equity in assessment for people with disabilities.

Assessors must satisfy NVR/AQTF assessor requirements, have a sound knowledge of the ACSF and have demonstrable expertise in the vocational contextualisation and assessment of the core skill - numeracy.

ICPPRN282 Produce and manage basic digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to construct a range of electronic data files, perform basic colour management techniques and produce and manage a print runt to achieve maximum productivity.

It applies to individuals working in the printing and graphic arts industry who perform a range of mainly routine tasks, work under direct supervision and use limited practical skills and knowledge in a defined context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Troubleshoot and maintain operations of digital print system	1.1 Errors in operation of hardware and consumable components in the printing module of a digital printing system are identified and rectified 1.2 Source of errors related to electronic data file, digital front-end, workstation or industry software or hardware printing systems is located and rectified and/or technical assistance is coordinated according to manufacturer's specifications

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Preventive maintenance is performed according to manufacturer's specifications to ensure digital print system functions at optimum productivity with minimum downtime and wastage 1.4 Incompatibilities between versions of hardware and software used in digital printing are identified and rectified
2. Liaise with clients	2.1 Print service and quality expectations are clearly communicated to client according to enterprise procedures 2.2 Advice is provided to clients on how to set up electronic data files for digital printing according to enterprise procedures, manufacturer's specifications and digital print equipment capabilities 2.3 Advice is provided to clients on appropriate substrates and document finishing methods for digital printing jobs, according to client's budget and job specifications
3. Perform basic electronic document impositions	3.1 Electronic file imposition using a range of industry software is completed according to job specifications 3.2 Document finishing requirements for an imposed digital print job are finalised with co-workers or external services, if required, according to equipment availability and enterprise procedures
4. Perform basic digital colour management	4.1 Red Green Blue (RGB), Cyan Magenta Yellow Black (CMYK) and PMS colour charts are outputted and differences between computer monitor colour and digitally printed colour are adjusted 4.2 Common problems of colour digital printing are rectified and communicated to clients according to job specifications
5. Access and verify electronic data files	5.1 Workstation computer and industry software are used to locate and retrieve electronic data files according to job specifications 5.2 Digital front-end processor is used to locate and retrieve electronic data files according to job specifications 5.3 Preview or pre-flight check of electronic data files is performed to verify correct job set-up according to job specifications 5.4 Basic troubleshooting methods are applied to identify unverified data files, file errors and job requirement inconsistencies according to manufacturer's specifications
6. Submit data files to digital print system	6.1 Job priority is determined according to job specifications and production schedules

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	6.2 Data files are submitted to print and image quality checks, and machine productivity checks are performed
7. Produce digital proof and run print job	7.1 Proof run is conducted to confirm proof conforms to job specifications and/or for client approval 7.2 Print run is conducted according to job specifications ensuring machine productivity and quality are monitored and rectified throughout the print job
8. Coordinate and/or perform document finishing and client delivery	8.1 Steps required for document finishing are determined, if not performed on in-line finishing units, on a web or sheet-fed system according to enterprise procedures 8.2 Finished print work is packaged to prevent damage and to conform to delivery requirements according to job specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 3.1, 4.2, 5.1-5.4, 6.1, 7.1, 7.2, 8.2	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	2.1-2.3	• Communicates relationships between ideas and information in a style appropriate to audience and purpose
Oral Communication	1.2, 1.3, 2.1-2.3, 3.1, 3.2, 4.2, 5.1-5.3, 6.1, 7.1, 7.2, 8.2	• Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies • Determines client and stakeholder requirements to inform a design or technical brief
Numeracy	2.2	• Interprets and analyses a range of mathematical information used in familiar and routine tasks
Navigate the world of work	1.2, 1.3, 2.1-2.3, 3.1, 3.2, 4.2, 5.1-5.4, 6.1, 6.2, 7.1, 7.2, 8.1, 8.2	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Complies with work health and safety (WHS), legislative requirements and follows organisational policies and procedures relevant to own role
Interact with	1.2, 1.3, 2.1-2.3, 3.1,	• Cooperates with others as part of familiar routine

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

others	3.2, 4.2, 5.1-5.3, 6.1, 7.1, 7.2, 8.2	activities, and contributes to specific activities requiring joint responsibility and accountability • Understands what to communicate, with whom and how in routine work situations, identifying relevant information and ideas
Get the work done	1.1-1.4, 3.1, 3.2, 4.1, 4.2, 5.1-5.4, 6.1, 6.2, 7.1, 7.2, 8.1, 8.2	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Recognises and anticipates an increasing range of familiar problems, actively looking for early warning signs and implementing contingency plans • Plans, identifies and assembles resources required to complete tasks • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems

Assessment Requirements for ICPPRN282 Produce and manage basic digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- accurately produce a flowchart that demonstrates FOUR examples of digital print workflows for digital printing (one basic document file, one variable data document file, one colour document file and one electronically imposed document file)
- conduct and manage a digital print run according to client specifications and work health and safety (WHS) requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- name safety devices that need to be in place when working on the machine
- explain a paper misfeed, how to access and clear it
- explain potential problems with front to back registration, and if substrate weight and machine specifications do not match
- outline problems that can occur when downloading files from a digital front-end and how can they be solved, including distinguishing between problems with downloading from a digital front-end, and with the printing module
- describe action if a digital front-end loses communication with the printing module
- outline precautions to maintain fit, proportion and position of printed images, and how to ensure the machine has been calibrated to manufacturer's specifications
- outline the process if image colour is not consistent
- outline the process for ensuring correct dimensions and measurements have been set up in the pre-press stage
- identify quality issues if improper substrate handling procedures are not performed

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- identify machine manuals, safety and other documentation relevant to machine operation and maintenance, where they are kept, and how to find information relating to industry software applications and other relevant sources of information
- describe the process if the incorrect version of software is loaded or needs an update
- outline actions if vital information is missing from the job ticket (manual or electronic)
- outline checks undertaken prior to set-up (availability of material, maintenance)
- outline the process if a file does not transfer correctly and what to do to correct the problem
- outline checks to ensure data is in a format that can be used in digital printing, and benefits of using electronic data rather than scanning hardcopy
- describe ways to submit a PDF file to the digital printer
- describe the process to ensure clients have correct procedures for providing electronic files
- describe the process of explaining to a client differences in colour displayed on a computer monitor compared to printed output
- outline recommendations to a client who has created an electronic file in an incompatible software application
- describe the process for estimating turnaround time for a client with a tight deadline
- describe steps for client approval of the print
- proofing and adjustment and circumstances where a job would be modified before printing
- outline situations where margins would be changed when the job reaches the printer
- name what the proof is checked against
- describe the final approval process for basic jobs
- describe the process for adjusting colour, toner/ink coverage or dealing with density problems
- outline the process if required substrate were unavailable
- name the maximum and minimum weight of substrate that can be printed on a specific machine, and maximum feeding and delivery quantities for the machine
- explain possible problems with incorrect feeding and delivery
- explain OHS procedures to follow when setting up in-line processes
- outline in-line options and on-line finishing options available on the machine
- describe the process for document finishing and client delivery
- describe various types of binding, and procedures, if the binding method required by the client is not available at your site
- outline options if the document size is too thick to staple
- describe importance of packaging of finished print work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to special purpose tools, equipment and materials.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN284 Use colour management systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and apply fundamental theory of colour including terminology, colour modes and analysis of light and colour.

It applies to individuals who generally work under direct supervision and assist with digital production workflow.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify need for colour management	1.1 Varied colour representations across devices are recognised and recorded according to job requirements 1.2 Colour inconsistencies between input, display and output devices, and printed products are identified and addressed 1.3 Components of colour management systems are identified and correctly used
2. Use colour modes and libraries	2.1 Colour modes and libraries are used according to job specifications

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Images are converted between colour modes using processes that ensure best reproduction according to job specifications 2.3 Colour libraries are selected and used within software applications according to job specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1-2.3	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	1.1, 1.3	• Completes job documentation in a style appropriate to audience and purpose
Oral Communication	1.3, 2.1-2.3	• Receives and passes on straightforward messages
Navigate the world of work	1.3, 2.1-2.3	• Recognises and follows explicit and implicit protocols associated with own role including appropriate work health and safety (WHS) requirements associated with immediate role
Interact with others	1.3, 2.1-2.3	• Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.1-1.3, 2.1-2.3	• Takes responsibility for planning and organising own workload including identifying and rectifying familiar problems

Assessment Requirements for ICPPRN284 Use colour management systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- recognise variations and inconsistencies in colour representation across devices
- identify and use components of a colour management system
- select and convert images to appropriate colour modes
- select colour libraries that comply with specific job specifications
- locate and use information relevant to the task from a variety of information sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify components of a colour management system and their application
- explain terminology associated with colour management
- identify standard lighting conditions for matching colour
- describe effects of different lighting conditions on monitors, proofing and printing
- explain measurement of light intensity and colour temperature
- identify differences between red, blue, green (RGB), cyan, magenta, yellow, black (CMYK), lab colour and spot colour
- list different rendering intents and their application
- describe under-colour removal (UCR) and grey component replacement (GCR) and the effect they have on an image
- explain different pantone libraries and their application
- identify work health and safety (WHS) issues to consider when managing colour for digital production.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages used for colour management production.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN383 Prepare for personalised digital printing

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to set up a digital printing press for personalised data printing.

This unit applies to individuals who possess a sound theoretical knowledge base and who typically provide leadership in the production of personalised digital print runs that involve setting data files and ensuring correct sequence.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify job specifications	1.1 Job details are checked and confirmed against job specifications 1.2 Correct materials are checked and are available for the job 1.3 Printing equipment is checked for efficiency and safely 1.4 Post-printing requirements are accurately identified according to job specifications 1.5 Correct data files are accessed and data conforms to job

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	specifications
2. Set data requirements	2.1 Data files are set up to ensure required dynamic links operate correctly and settings conform to job specifications 2.2 Data is in correct sequence required for the run 2.3 Data is checked to ensure it is uncorrupted
3. Set machine quality	3.1 Work area is safe and ready for production 3.2 Digital printing machine is set to run efficiently and safely 3.3 Image is complete, sharp, of the required strength, free from contamination and in register 3.4 Output can be achieved at required quality standard and at required speed 3.5 Sample from the machine is produced and checked for conformance to job specifications 3.6 Adjustments are made where specifications are not met 3.7 If adjustments involve changes to materials, costs or time, supervisor or client are informed and approval secured 3.8 Set up is complete before deadline for the start of production

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.1-2.3, 3.5, 3.6	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	3.7	• Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 1.5, 2.1, 2.2, 3.5-3.7	• Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the world of work	1.1-1.5, 2.1, 2.2, 3.1-3.8	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Recognises and follows all procedures for set-up, cleaning and maintenance of equipment, incorporating

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		regulatory requirements and enterprise procedures
Interact with others	1.1, 1.5, 2.1, 2.2, 3.5-3.7	• Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability • Understands what to communicate, with whom and how, in routine work situations
Get the work done	1.1-1.5, 2.1-2.3, 3.2, 3.3, 3.5-3.8	• Determines priorities and sequences steps involved in clearly defined, familiar tasks • Recognises and takes responsibility for addressing predictable, and some less predictable problems in familiar work contexts • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems

ICPPRN385 Apply software applications to digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to correctly select and use a variety of software applications to efficiently produce a standard job.

It applies to skilled individuals working in digital production who are responsible for digital production workflow and who apply a broad range of competencies in a varied work context. They use some discretion and judgement, and relevant technical knowledge, and provide technical advice and support to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and assess	1.1 Publication requirements of layout brief are determined to

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
software	align with digital production processes and feasibility 1.2 Range of software applications is selected according to job specifications 1.3 Appropriate software applications are used to complete components of the job according to manufacturer's specifications and enterprise standards
2. Arrange elements on page	2.1 Client copy and images are assembled to conform to the design brief 2.2 Text is prepared and required fonts and font size are applied 2.3 Basic elements and images are created and arranged on the page to conform to the design brief 2.4 Image resolution and colour mode are determined according to job specifications, help function is accessed, if required, and solutions to queries found 2.5 Document set-up is completed to conform to the design brief and job specifications
3. Check quality	3.1 Text is reviewed for possible errors and omissions, and errors are discussed with client or supervisor 3.2 Basic elements are arranged to adhere with design principles 3.3 Copy is proofed and rechecked for errors, omissions and overall layout design 3.4 Necessary changes are made and reviewed and re-proofed as required 3.5 Job is saved according to enterprise procedures
4. Use RIP to output job	4.1 Layout is imported into a raster image processor (RIP) or front-end processor according to workplace procedures 4.2 Layout is produced according to job specifications and enterprise standards

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Reading	1.1-1.3, 2.1, 2.3-2.5, 3.1, 4.2	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	2.2, 3.1	• Enters routine data associated with production processes and enterprise procedures
Oral Communication	3.1	• Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the world of work	1.1-1.3, 2.1-2.5, 3.5, 4.1, 4.2	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.1-1.3, 2.4, 2.5, 3.1, 4.2	• Understands what to communicate, with whom and how, in routine work situations
Get the work done	1.2, 1.3, 2.1-2.5, 3.2-3.5, 4.1, 4.2	• Takes responsibility for planning and organising own workload making design choices as appropriate • Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts • Utilises a broad range of features within applications to improve personal productivity, optimising software functions for specific purposes

Assessment Requirements for ICPPRN385 Apply software applications to digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly use TWO software applications to prepare and produce two different sets of layouts according to enterprise standards and job specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list different processes used in digital production
- describe colour modes and how they affect output
- outline how image resolution is governed by output resolution and/or viewing distance
- describe various software applications and their usages in relation to digital production
- identify how job specifications determine typeface selection and the effect typefaces have on readability
- explain design principles, such as hierarchy, emphasis, contrast, alignment, repetition and flow
- describe how to select and manipulate type within a layout application, and image manipulation techniques including basic colour correction
- describe how to create basic vector shapes with an application
- outline different colour modes and their uses
- outline preflighting procedures and various ways to import a job into a RIP
- identify location of manuals, safety and other documentation relevant to high-end software applications for digital production.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- RIP or front-end processor.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN387 Use colour management for production

Modification History

Release	Comments
Release 2	This version released with ICP Printing and Graphic Arts Training Package Version 2.0. Version created to correct typographical error.
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to obtain an acceptable match across colour devices, including the correct use of colour profiles and calibration of monitors and output devices.

It applies to skilled individuals who set up, operate and monitor equipment and machinery, and who may have to prepare material and apply solutions to problems. They may also provide leadership and guidance to others, with limited responsibility for the output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Printing

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify colour requirements	1.1 Publication conditions are determined to identify colour management requirements 1.2 Requirements are established to guide provision and use of colour profiles
2. Calibrate digital devices	2.1 Digital devices in the workflow are calibrated to produce accurate colour reproductions 2.2 Device profiles created during calibration are correctly used and stored 2.3 Digital devices are checked regularly to ensure they are still within calibration 2.4 Profiles or equipment parameters are adjusted to bring devices back into calibration, when required 2.5 Records are stored to ensure calibration occurs regularly
3. Use colour profiles	3.1 Source and destination profiles are identified within the workflow 3.2 Profiles are used to ensure colour on monitors, proofs and final product match as closely as possible 3.3 Images are converted to correct profile if incorrect profile is embedded 3.4 Correct rendering intent is used to ensure accurate colour conversion
4. Configure software within workflow	4.1 In the workflow, software applications with colour management features are determined 4.2 Software applications with colour management features are configured to meet output condition 4.3 Range of colour management presets are configured, saved and correctly used for various output conditions
5. Maintain colour management workflow	5.1 Colour management system is checked regularly to ensure consistent colour match 5.2 Monitors are calibrated regularly to ensure accurate reproduction of colour 5.3 Digital devices are re-calibrated regularly or when conditions

ELEMENT	PERFORMANCE CRITERIA
	change from initial calibration

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.5	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	2.5	• Enters routine data associated with production processes and enterprise procedures
Navigate the world of work	1.1, 1.2, 2.1-2.5, 3.1-3.4, 4.2, 4.3, 5.1-5.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Complies with work health and safety (WHS) and legislative requirements and follows organisational policies and procedures relevant to own role
Get the work done	1.1, 1.2, 2.1-2.4, 3.1-3.4, 4.1-4.3, 5.1-5.3	• Takes responsibility for planning and organising own workload, and assembles required resources • Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts • Utilises a broad range of features within applications to improve personal productivity, optimising software functions for specific purposes

Assessment Requirements for ICPPRN387 Use colour management for production

Modification History

Release	Comments
Release 2	This version released with ICP Printing and Graphic Arts Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly produce THREE jobs with final product on varied media, including both print and digital platforms
- apply colour management system maintenance procedures according to enterprise procedures and job specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify work health and safety (WHS) issues related to managing colour for digital production
- define densitometric and spectrophotometric measurement
- define International Colour Consortium (ICC) profiles, their use and the effects they can have on output
- explain device independent colour and profile connection spaces
- outline use of colour space conversions and rendering intents
- describe factors that influence selection of highlight and shadow aim points
- explain grey balance requirements in relation to colour correction and the process of determining grey balance requirements
- describe ink/toner light errors – 'ideal' versus 'actual' inks/toners

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- explain viewing light conditions and metamerism
- outline factors determining requirements for colour correction and how different stocks affect colour
- describe effects different inks have on colour reproduction for proofing and final production, and how dot gain affects colour
- identify type of press and what printing process is being used for final output
- describe solutions to common problems of colour management
- describe effects of using the wrong profile on output
- identify sources of information on colour management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICPPRN388 Preflight and import complex images for digital devices

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to confirm that digital files required for the printing process are all present, valid, correctly formatted and of the desired format to be imported into a digital device. It includes the application of preflight procedures and importation of files into raster image processors (RIPs).

It applies to individuals who use specialised knowledge and follow organisational processes to ensure product quality meets requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Access and preflight electronic files	1.1 Electronic data files are located and retrieved using a workstation computer and industry software according to job specifications 1.2 Preflight check of electronic data files is performed to verify correct job set-up according to job specifications, and problems associated with files are identified

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Troubleshooting methods are applied to identify file errors and job requirement inconsistencies 1.4 Solutions are implemented to rectify errors according to job specifications 1.5 Preflight presets are configured for various job specifications
2. Import file to RIP or job queue	2.1 Correct output profile is selected according to job specifications 2.2 Most productive submission workflow is selected and documented based on data file format, quantity and file size, and document finishing 2.3 Job priority is determined according to job specifications and production schedules 2.4 Print driver and/or job download software is correctly installed and set up on workstation computer and/or digital front-end processor 2.5 Manufacturer's installation instructions are located and/or software installation is coordinated according to enterprise procedures 2.6 Data file is submitted to output device, image quality and machine productivity checks are performed, and adjustments made to correct any problems

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.5	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	2.2	• Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.5	• Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the	1.1-1.5, 2.1-2.6	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

world of work		
Interact with others	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.5	• Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability • Understands what to communicate, with whom and how, in routine work situations
Get the work done	1.1-1.5, 2.1-2.6	• Takes responsibility for planning and organising own workload, and assembles required resources • Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts • Utilises a broad range of features within applications to improve personal productivity, optimising software functions for specific purposes

Assessment Requirements for ICPPRN388 Preflight and import complex images for digital devices

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- import electronic files that are error-free and meet job specifications into rips or output queues
- find and use information relevant to the task from a variety of information sources
- preflight and import TWO complex jobs according to manufacturer's specifications and enterprise procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe key digital printing processes
- outline required resolution for various output conditions
- describe different colour modes and how they affect output
- explain trapping and overprint requirements
- identify and describe different screen types and angles
- outline bleed amounts required for various jobs
- explain the impact font types and licensing can have on output
- describe preflighting tools available in various applications
- compare different file types and how they can affect output
- outline factors that influence processing speed of a job during ripping
- explain how the ripping speed of a job can be increased.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- high-end computers
- raster image processors (RIPs)
- output devices
- layout software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN389 Manage digital files

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to store and retrieve electronic files for efficient access.

It applies to individuals who work under limited supervision in the application of digital file management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Save digital files	1.1 Logical digital file system of folders and sub-folders is created and files are named using enterprise format 1.2 Files are saved using appropriate format into digital file system 1.3 Version control is used to ensure the most recent files can be accessed
2. Retrieve and manage digital files	2.1 Required files are retrieved and opened from digital file system 2.2 Computer search functions are used to find incorrectly stored files

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Files are sent to required location and any naming errors are amended
3. Archive digital files	3.1 Archive system is created according to enterprise protocols 3.2 Consistent, regular backup strategies are undertaken to allow for retrieval of files if there is a data loss event 3.3 Files are retrieved from archive system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.3, 3.1-3.3	• Uses a number of reading strategies to identify and interpret relevant information within familiar text types
Writing	1.1-1.3, 3.1	• Enters routine data associated with production processes and enterprise procedures
Navigate the world of work	1.1, 1.2, 2.1, 2.3, 3.1, 3.2	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role evaluating effectiveness of decisions on how well they met stated goals
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3	• Determines priorities and sequences steps involved in clearly defined, familiar tasks • Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts • Utilises a broad range of features within applications to improve personal productivity, optimising software functions for specific purposes • Manages and maintains files securely in a variety of storage media and formats

Assessment Requirements for ICPPRN389 Manage digital files

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- store, retrieve and archive various file types
- find and use information relevant to the task from a variety of information sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list work health and safety (WHS) factors for using a computer
- point out the location of manuals, safety and other documentation relevant to digital file management procedures and discuss the contained information
- explain elementary computer operating system functions
- discuss file hierarchy
- outline advantages and disadvantages of different file systems
- explain file size and how it impacts on hard drive space
- identify different file types and how this relates to file size
- explain how to rename a file
- outline version control procedures
- discuss operating systems' search function
- explain backup processes
- outline how to achieve different formats.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

ICPPRN390 Generate a proof for digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate a proof on the printing device to be used for final production.

It applies to individuals who generate and approve proof in the digital sector.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Produce proof on printing device	1.1 Printing device is calibrated according to manufacturer's specifications 1.2 Appropriate colour profiles are selected to ensure consistent colour output 1.3 The same substrate or product is used to generate a proof for the final production run 1.4 Proof is produced according to job specifications and workflow procedures 1.5 Proof is used to make a mock-up to simulate the finishing of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	the final product according to job specifications
2. Assess proof against specifications	2.1 Proof is checked against job specifications to confirm validity and identify and rectify any defects 2.2 Proofing process is repeated if proof does not meet job specifications and enterprise standards
3. Communicate proof with client	3.1 Proof is labelled with appropriate information according to enterprise standards 3.2 Feedback is gained from client for sign off 3.3 Amendments are made if required, and resubmitted to client for sign off 3.4 Proof is stored according to workplace procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.1, 2.2, 3.4	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	3.1-3.4	• Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2,3.2	• Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the world of work	1.1-1.5, 2.1, 2.2, 3.1-3.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Recognises and follows all procedures for regulatory requirements including work health and safety (WHS) and enterprise procedures
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.2	• Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability • Understands what to communicate, with whom and how, in routine work situations
Get the work	1.1-1.5, 2.1, 2.2, 3.1,	• Determines priorities and sequences steps involved in

Assessment Requirements for ICPPRN390 Generate a proof for digital production

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- safely calibrate a digital device to ensure consistent colour output
- produce a proof that gains client approval and matches the final production run
- find and use information relevant to the task from a variety of information sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list work health and safety (WHS) issues related to digital proofing for digital production
- explain colour theory, including additive and subtractive colours, red, green, blue (RGB) and cyan, magenta, yellow, black (CMYK)
- outline varying colour gamuts between colour modes
- discuss colour management workflow set-up procedures
- describe use of output profiles in relation to simulation
- explain how regular calibration helps ensure consistent colour output
- describe quality control systems used in proofing
- outline techniques used to control quality
- explain how to use standard viewing conditions to assess colour output
- describe how to use colour evaluation charts
- outline criteria for evaluating a colour proof
- explain differences between preliminary proofs and a contract proof
- identify types of substrates used in proofing
- name the inks, toners and coatings used in digital printing
- describe how to handle and store materials to ensure quality

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- identify types of finishing techniques used in digital production
- point out the location of relevant manuals, safety and other documentation relevant to digital printing, and discuss the information in these documents
- discuss where other available sources of information are.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- high-end colour output devices
- raster image processors (RIPs) with colour management features.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPPRN392 Set up and produce specialised digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to set up for and produce specialised, digitally printed products. This unit includes the use of non-standard substrates and raster image processor (RIP) settings.

It applies to individuals who evaluate job specifications, set up raster image processor (RIP) settings and produce specialised print jobs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm specialised job specifications	1.1 Job requirements are read and interpreted from job documentation or production control system 1.2 Availability of all job related components is checked and recorded
2. Plan and carry out specialised set-up	2.1 Specialised job specifications are identified and analysed 2.2 Specialised set-up requirements are determined 2.3 Specialised set-up is completed in minimum time and with

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	minimum wastage
3. Set up RIP for specialised digital printing	3.1 RIP functions are analysed to determine appropriate settings according to specialised job requirements 3.2 Experimentation is undertaken with RIP functions to determine settings according to specialised job requirements 3.3 Problems are solved effectively to minimise waste and excess costs 3.4 Documentation and other forms of information are accessed to determine source of any problems 3.5 Most productive way to complete the job is determined
4. Test and select substrate	4.1 Substrate specifications are investigated to determine print feasibility 4.2 Test print run is conducted to confirm substrates appropriateness with job requirements 4.3 Appropriate substrate is selected based on print feasibility and job requirements
5. Conduct specialised proof run	5.1 Material to be used for specialised proof is organised correctly 5.2 Machine is operated according to manufacturer's specifications and enterprise procedures to produce a specialised proof 5.3 Specialised proof is visually inspected to enterprise procedures 5.4 Client approval or authority is sought prior to production run where appropriate 5.5 Results are interpreted and adjustments are carried out according to product and machine specifications
6. Refine and document specialised print process	6.1 Corrective or preventive action is recommended and implemented where appropriate 6.2 Changes are communicated to relevant personnel in a logical and easily understood manner 6.3 Changes are monitored to confirm improvement to production efficiency 6.4 Ongoing problems are reported according to enterprise procedures, and process is documented according to enterprise standards 6.5 Documentation is filed so it can be easily retrieved and used as a reference for future, similar jobs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 3.1, 3.2, 4.1, 5.2, 5.5, 6.5	• Recognises and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	1.2, 5.4, 6.4	• Enters routine data associated with production processes and enterprise procedures
Oral Communication	1.1, 2.1, 2.2, 3.1, 3.2, 4.1, 5.2, 5.4, 5.5, 6.2, 6.4	• Speaks clearly using appropriate vocabulary, tone and pace to communicate
Numeracy	4.1	• Interprets and analyses a range of mathematical information used in familiar and routine tasks
Navigate the world of work	1.1, 2.1-2.3, 3.1-3.3, 4.1-4.3, 5.2-5.5, 6.3, 6.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Complies with WHS, legislative requirements and follows organisational policies and procedures relevant to own role
Interact with others	1.1, 2.1, 2.2, 3.1, 3.2, 4.1, 5.2, 5.4, 5.5, 6.2, 6.4	• Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability • Understands what to communicate, with whom and how, in routine work situations
Get the work done	1.2, 2.3, 3.1-3.5, 4.2, 4.3, 5.1-5.3, 5.5, 6.1, 6.3	• Determines priorities and sequences steps involved in clearly defined, familiar tasks • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans • Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems • Enters key words into a search engine to find information

Assessment Requirements for ICPPRN392 Set up and produce specialised digital print

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse job specifications and develop practical solutions to printing a non-standard product
- safely set up and use a raster image processor (RIP) and digital printing machine for a specialised job on TWO occasions according to manufacturer's and job specifications and enterprise procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- name who to discuss any production problems with
- describe all functions and settings available on a particular RIP or front-end processor
- explain advanced RIP settings, such as dynamic variables to select stock
- explain where to source information on complex raster image processor RIP usage
- discuss types of substrates suitable for various digital processes
- explain the theory behind several digital processes and how this impacts substrate usage
- outline problem-solving methodologies, including empirical, ishikawa and brainstorming
- name online forums and networks which might be useful points of reference for this role
- list work health and safety (WHS) issues in relation to each digital process
- show where documentation or other information can be found on specialised digital processes.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- full colour production digital presses or specialised wide format printers.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPSUP281 Use computer systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to perform basic functions on a computer.

It applies to individuals who perform a range of mainly routine tasks in various sectors of the printing and graphic arts industry, using limited practical skills and fundamental knowledge in a defined context. They generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use a stand-alone computer/terminal correctly	1.1 Correct posture at the keyboard is adopted according to work health and safety (WHS) requirements 1.2 Data is correctly accessed to ensure no loss of data 1.3 Data is manipulated correctly to ensure access, retrieval and storage of data
2. Perform computer/terminal	2.1 Data is accessed, saved and retrieved for reference and amendment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
functions	2.2 Appropriate program is selected for the job to be undertaken 2.3 Mouse and/or keyboard functions are used correctly to operate the computer systems used in the printing industry 2.4 Features of applications are used correctly to deliver a specified output 2.5 Data is saved in correct format and file location 2.6 Master pages, templates and style sheets, as appropriate, are used consistently to ensure data is the same after exchange or transfer

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 2.5, 2.6	• Recognises text within job specifications and follows written instructions
Writing	1.3, 2.4	• Records key information related to outcomes of the job
Navigate the world of work	1.1	• Understands rights and responsibilities and complies with legal and regulatory requirements
Get the work done	1.2, 1.3, 2.1-2.6	• Understands purpose and some specific functions of some common digital tools used in work contexts

Unit Mapping Information

Assessment Requirements for ICPSUP281 Use computer systems

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly and safely perform basic functions on a stand-alone computer/terminal using industry software
- use a stand-alone computer/terminal with at least TWO software applications relevant to the printing industry to create or access files, perform various computing functions, and save files in required format and location.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the work health and safety requirements when performing keyboarding tasks

Starting, operating and shutting down the computer

- Explain when computer power should be turned off
- describe how to start or stop using the computer
- explain appropriate procedures for using and sharing a password
- outline how to access alternative file storage devices

Basic typing skills

- show base finger positions on the keyboard
- explain benefits of typing at an even and consistent pace

Use of applications

- explain how to produce a compressed file
- list and briefly describe the functions of master pages, templates, style sheets and macros
- describe the workplace requirements for saving files.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Support field of work and include access to a stand-alone computer or terminal.

Assessors must satisfy NVR/AQTF assessor requirements.

MEM05012 Perform routine manual metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Application

This unit of competency defines the skills and knowledge required to carry out routine manual metal arc welding (MMAW) of low carbon mild steel where the welding is not required to meet an Australian Standard or equivalent.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
2	**Prepare materials and equipment for welding**	2.1	Identify location of welds in accordance with procedures and job specifications
		2.2	Clean and prepare materials ready for welding
		2.3	Set up welding equipment according to SOPs
		2.4	Select correct electrodes and adjust settings to suit application
3	**Perform routine welding using MMAW**	3.1	Weld materials to job requirements
		3.2	Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:	• butt • fillet
Preparing includes one (1) or more of the following:	• cleaning • setting up jigs • fixtures • clamps • joint preparation
Welding equipment includes the following:	• welding leads • welding machines • electrode holder
Cleaning includes one (1) or more of the following:	• slag and spatter • cleaning • using files • grinders

Unit Mapping Information

Assessment Requirements for MEM05012 Perform routine manual metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for performing routine manual metal arc welding (MMAW)
- cleaning and preparing materials to specifications
- setting up welding equipment, selecting appropriate electrodes and adjusting settings to suit application
- welding materials to comply with specifications
- cleaning welds for slag and splatter in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- material and equipment preparation
- equipment set-up and settings
- appropriate welding consumables consistent with standard operating procedures
- MMAW processes and properties.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing routine manual metal arc welding at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Application

This unit of competency defines the skills and knowledge required to prepare materials and carry out routine gas metal arc welding (GMAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard or equivalent.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements unit MEM05017 Weld using gas metal arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas metal arc welding (GMAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- shielding gas properties and applications
- post-welding treatments
- weld characteristics.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing routine GMAW process at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM07033 Operate and monitor basic boiler

Modification History

Release 1. Supersedes and is equivalent to MEM07033B Operate and monitor basic boiler

Application

This unit of competency defines the skills and knowledge required to perform start-up, take-over/handover, monitor, shutdown and storage of a basic boiler used for all purposes, including the generation of steam.

All work is carried out to applicable state/territory and national work health and safety (WHS) legislation, standards and codes of practice.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, as appropriate should also be selected.

Some jurisdictions may require the holder of this unit to be licensed or certified and users should check with the relevant authorities.

Band: A

Unit Weight: 6

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Machine and process operations

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
2	**Carry out pre-operational checks**	2.1	Undertake pre-operational checks of boiler to plant operating procedures
		2.2	Identify maintenance requirements and report in accordance with procedures
3	**Maintain health and safety standards in work area**	3.1	Identify hazards and potential hazards and report according to SOPs
		3.2	Select hazard prevention/control measures, as required
4	**Start boiler and conduct hand-over/take-over procedures**	4.1	Start boiler and bring online safely, consistent with workplace procedures and production requirements
		4.2	Confirm operating status of boiler
		4.3	Maintain operating log and communicate boiler status/operation according to workplace procedures
5	**Operate, monitor and shut down boiler**	5.1	Operate boiler and monitor consistent with production and safety requirements
		5.2	Conduct boiler water quality tests and adjust boiler water quality to manufacturers' recommendations and workplace procedures, as required

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
		5.3	Act upon boiler failures/emergencies according to workplace procedures and notify downstream users, if necessary
		5.4	Shut down boiler consistent with workplace procedures, production and safety requirements
6	**Carry out boiler shutdown for an internal inspection**	6.1	Shut down boiler for internal inspection
		6.2	Clean boiler internally and externally to manufacturers' recommendations and workplace procedures
7	**Store boiler in shutdown mode**	7.1	Identify manufacturers' recommendations and workplace procedures required for shutdown storage mode
		7.2	Store boiler in identified shutdown mode

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks include one or more of the following:

- feed water supply
- boiler water level
- fuel supply/heat source
- boiler valves - their operation and position
- combustion air supply
- combustion equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, accessibility of the item, and local industry and regional contexts) are included.

Boilers include the following:

- single fixed combustion air supply, non-modulating single heat source and fixed firing rate

Hazards include one (1) or more of the following:

- chemical
- thermal
- manual handling
- guarding of machinery
- illumination of work area
- rubbish and combustibles
- leakage of steam and fuel

Monitor includes one (1) or more of the following:

- steam pressure
- flame and combustion conditions
- feed system and condensate returns
- fuel system
- water level
- combustion management system
- water management system
- boiler and steam manifold fittings
- soot blowers

Handover includes the following:

- previous load requirements
- maintenance issue, including equipment isolated for maintenance
- operational incidences
- completing/reading operating log
- general inspection of boiler to detect any defects
- accept responsibility of boiler
- noted equipment malfunctions
- required equipment tests

Storage mode includes one (1) or more of the following:

- wet
- dry
- open condition
- closed condition

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Requirements for MEM07033 Operate and monitor basic boiler

Modification History

Release 1. Supersedes and is equivalent to MEM07033B Operate and monitor basic boiler

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- safely conducting pre-operational checks of the boiler and reporting any faults or hazards
- starting and bringing the boiler online and confirming its operating status
- monitoring the boiler operation and conducting water quality tests, as required
- reacting effectively to any boiler emergency situations
- shutting down the boiler in the required condition, cleaning and putting into storage mode.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- pre-operational checks, including:
  - feed water supply
  - boiler water level
  - fuel supply/heat source
  - boiler valves their operation and position
  - combustion air supply
  - combustion equipment
- procedures for identifying and reporting maintenance
- statutory requirements and workplace procedures for identifying and reporting hazards in the work area
- processes for starting a boiler, including:
  - heat input
  - warm up of the reticulation system
  - steam traps and steam line purge
  - systems operation
  - reticulation line pressure

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - steam usage
    - supply
- processes for confirming operational status of boiler
- procedures for maintaining boiler operating log
- procedures for communicating boiler status and operation
- principles of boiler operation
- boiler fittings
- preparing boiler for inspection
- procedures for monitoring a boiler, including:
    - steam reticulation line pressure
    - usage, supply and quality of steam
    - combustion/heat source system
    - feed water system
    - fuel system combustion air supply
    - water level
    - boiler steam pressures
- operation of boiler control/safety devices
- location of inspection and explosion doors
- procedures for conducting boiler water quality tests
- feed water systems and treatment
- emergency procedures, including:
    - identification of emergency
    - isolation of heat source
    - selection and application of appropriate fire-fighting equipment
    - notification of downstream users
- processes and procedures, including:
    - confirming water level
    - cooling down
    - boiler pressure/vacuum
    - fuel/heat source isolation
    - removal of combustion equipment and water from boiler
    - isolation from any common connection
    - the opening of all access points required for inspection
- procedures for cleaning the boiler internally and externally
- various modes of boiler storage
- procedures for storing the boiler in open or closed condition.

Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - have vocational competency in operating and monitoring a basic boiler at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM07034A Operate and monitor intermediate class boiler

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers performing start-up, take-over/hand-over, monitoring, shut-down and storage of single or multiple intermediate class boilers and associated equipment to legislative requirements, standards and codes of practice.

Application of the Unit

Application of the unit	This unit applies to the start-up, take-over/hand-over and shut-down of intermediate class boilers. Boilers covered by this unit would typically have the following features: modulating combustion air supply, modulating single heat source, modulating firing rate, and or superheaters, economisers, and other associate equipment. The unit applies to boilers used for all purposes including steam generation and other industrial uses as required in the workplace. The boilers may be singular or in a battery of boilers. Work includes inspection procedures as specified in the manufacturer's recommendations and workplace procedures, identification of maintenance requirements and hazard control measures. All work is carried out to applicable State/Territory and National OHS legislation, standards and codes of practice, including relevant aspects of NOHSC 1006 (1995), AS 3873 (Operation and maintenance of steam plant) and AS2593 1995 (Boilers - unattended and limited attendance) Where basic boiler operation (e.g. single fixed combustion air supply, non-modulating single heat source and fixed firing rate) only is required, Unit MEM07033B (Operate and monitor basic boiler) should be selected.

Prerequisite units		
Path 1	MEM07033B	Operate and monitor basic boiler

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Carry out pre-operational	1.1. Pre-operational checks of boiler and associated equipment are carried out according to standard

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
checks	operating procedures. 1.2. Maintenance requirements are identified and reported in accordance with standard operating procedures.
2. Maintain health and safety standards in work area	2.1. Hazards and potential hazards in work area are identified and reported in accordance with statutory requirements and workplace procedures. 2.2. Personal protective equipment and clothing is selected and used as appropriate, according to statutory requirements and workplace procedures. 2.3. Hazard prevention/control measures are selected and used as required, in accordance with statutory requirements and workplace procedures
3. Start up boiler	3.1. Boiler is started and brought on line safely, consistent with workplace procedures and production requirements.
4. Conduct hand-over/take-over procedures	4.1. Operating status of the boiler is confirmed in accordance with manufacturer's recommendations and workplace procedures. 4.2. Boiler status and operation is communicated according to workplace procedures and statutory requirements.
5. Operate and monitor intermediate class boiler and associated equipment	5.1. The boiler and associated equipment is operated and monitored consistent with production and safety requirements. 5.2. Boiler water quality tests are conducted to manufacturer's recommendations and workplace procedures. 5.3. Water quality is maintained according to manufacturer's recommendations and workplace procedures. 5.4. Boiler failures and emergencies are responded to in accordance with statutory requirements, manufacturer's recommendations and workplace procedures.
6. Shut down boiler and associated equipment	6.1. Operational shut-downs of boiler and associated equipment are carried out in accordance with work-place procedures, production and safety requirements. 6.2. Shut-downs of boiler and associated equipment for internal inspection are carried out in accordance with workplace procedures, production and safety

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	requirements. 6.3. Boiler is isolated in accordance with statutory requirements, manufacturer's recommendations and workplace procedures. 6.4. Boiler is cleaned internally and externally to manufacturer's recommendations and workplace procedures.
7. Store boiler in shut-down mode	7.1. Appropriate storage mode is identified 7.2. Boiler and associated equipment is stored in shut-down mode to manufacturer's recommendations and workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- following, standard operating procedures and statutory requirements
- performing preoperational checks of boiler
- performing maintenance checks
- orally reporting routine information
- identifying hazards, hazardous situations and control measures
- using personal protective clothing and equipment
- selecting the most appropriate prevention/control measure for a given situation
- starting up boilers, including those fitted with associated equipment such as superheaters and economisers
- monitoring boilers, including checks of combustion management system and superheater and economiser operation
- checking operating status
- recording routine and familiar information in operating log and other standard workplace forms
- performing water quality tests to manufacturer's recommendations and workplace procedures
- using testing equipment
- adjusting water quality

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- responding to typical emergency situations
- notifying downstream users
- performing operational and inspection shut-down, including procedures for associated equipment, such as superheaters and economisers
- isolating boiler from any common connection between the boiler and other boilers on line and all access points required for inspection

Required knowledge

Look for evidence that confirms knowledge of:

- pre-operational checks
- procedures for identifying and reporting maintenance requirements
- statutory requirements and workplace procedures for identifying and reporting hazards in the work area
- use and application of personal protective equipment
- safe work practices and procedures
- prevention and control measures
- the processes for starting a boiler such as heat input, warm up of the reticulation system, steam traps and steam line purge, systems operation, reticulation line pressure, steam usage and supply, associated equipment such as superheaters and economisers
- the process for confirming operational status of boiler
- procedures for maintaining an operating log and communicating boiler status
- procedures for communicating boiler status and operation
- principles of intermediate boiler operation - single and battery
- boiler fittings
- preparing boiler for inspection
- feed water systems and treatment, including de-aerator function and purpose
- procedures for monitoring an intermediate class boiler, such as steam reticulation line pressure, usage, supply and quality of steam, combustion/heat source system, feed water system, fuel system, combustion air supply, water level, boiler steam pressures and operation of control/safety devices, combustion management system, associated equipment such as superheaters and economisers
- function, purpose and location of associated equipment:
  - superheater
  - economiser
  - air heater
  - feed water heater
  - attemperator
  - superheater safety valves
  - economiser relief valves
  - main steam stop valve

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• procedures for conducting boiler water quality tests • procedures for adjusting boiler water quality • procedures such as identification of emergency isolation of heat source, operation of boiler, selection and application of fire fighting equipment and notification of downstream users • operational shut-down processes and procedures such as confirming water level, cooling down, boiler pressure/vacuum and fuel/heat source isolation • shut-down processes and procedures for internal inspection, such as confirming boiler cooling down, vacuum/pressure, fuel/heat source isolation, removal of combustion equipment and water from boiler • isolation procedures and safety issues • procedures for cleaning boiler internally and externally • various modes of boiler storage, which may include integral associated equipment such as superheaters and economisers • the reasons for selecting particular storage mode • procedures for storing a boiler in shut-down mode

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to operate and monitor intermediate class boilers. Competency in this unit cannot be claimed until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

EVIDENCE GUIDE	
	workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with operating and monitoring intermediate class boilers or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Pre-operational checks	Feed water supply, boiler water level, fuel supply/heat source, boiler valves - their operation and position, combustion air supply and combustion equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

RANGE STATEMENT	
Boiler	Modulating combustion air supply, modulating single heat source, modulating firing rate, and or superheaters, economisers, single and battery
Hazards	Chemical and thermal hazards, manual handling, machine guarding, illumination of work area, rubbish and combustible materials, steam and fuel leaks etc.
Associated equipment	Superheater, superheater safety valves, economiser, economiser relief valves, air heater, feed water heater, attemperator, main steam stop valve
Monitored	Steam pressure, flame and combustion conditions, feed system and condensate returns, fuel system, water level, combustion management system, water management system, boiler and steam manifold fittings, soot blowers
Storage mode	Wet and dry storing, open or closed condition

MEM11010 Operate mobile load shifting equipment

Modification History

Release 1. Supersedes and is equivalent to MEM11010B Operate mobile load shifting equipment

Application

This unit of competency defines the skills and knowledge required to operate mobile load shifting equipment, including planning, moving and placing loads and shutting down and securing equipment after operation where knowledge of codes and signals is not required in workshops and/or on-site locations.

Where the selection and use of hand tools is required unit MEM18001 Use hand tools should also be selected.

Where the use of a forklift is required unit TLILIC2001 Licence to operate a forklift truck should also be selected.

Where the use of an order picking forklift is required unit TLILIC2002 Licence to operate an order picking forklift truck should also be selected.

Where the use of a vehicle loading crane with a capacity of 10 metre tonnes and above is required unit TLILIC0012 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above) should also be selected.

Depending on the equipment being used a high risk work licence may be required and users should check with the relevant authorities.

Band: **A**

Unit Weight: **4**

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Competency Field

Materials handling

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
2	**Prepare to shift loads**	2.1	Inspect work area to identify hazards, and implement appropriate prevention/control measures to avoid hazards
		2.2	Undertake routine pre-operational checks in accordance with manufacturers' specifications and regulatory safety requirements
		2.3	Inspect attachments and/or equipment
3	**Check controls and equipment**	3.1	Carry out pre-operational and post start-up equipment checks in accordance with manufacturers' specifications and/or operating manual
		3.2	Report defects and damage according to site procedures
4	**Shift and place loads**	4.1	Select the most appropriate load shifting device to suit load and shifting requirements
		4.2	Operate load shifting device within design specifications and safe working load in accordance with SOPs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	4.3	Lift load, ensuring balance, vision of operation and protection of load
	4.4	Select and use the safe and efficient path of movement
	4.5	Check path of movement and monitor for obstacles and hazards
	4.6	Place loads ensuring safety, stability, protection of material and avoidance of hazards on-site
5 **Shut down equipment and secure site**	5.1	Park machinery in accordance with procedures, avoiding site and equipment hazards
	5.2	Conduct shutdown in accordance with manufacturers' specification to isolate vehicles
	5.3	Complete post-operational check in accordance with operational procedures

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

On-site locations include one (1) or more of the following:	• factories • wharfs • ships • warehouses • manufacturing plants

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- building sites
- road construction
- demolition sites
- quarries and mine sites

Pre-operational checks include one (1) or more of the following:

- battery
- water
- fuel
- hazards warning lights
- fluid or gas leaks
- braking
- movement of booms
- visual checks of tyres
- emergency devise/alarms
- log books
- operating motions
- evidence of damage
- excessive wear and tear as determined by manufacturers' specifications and standard operating procedures

Attachments and/or equipment includes one (1) or more of the following:

- hooks
- electromagnetic hook
- buckets
- slings
- tag lines
- buckets
- trench
- excavating
- rock breakers
- shackles
- lifting lugs
- fork arms

Post start-up includes the following:

- hazards warning systems, attachments, movements and control functions are smooth
- operating and emergency controls and safety devices are located, identified and tested

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- communication signals are confirmed
- defects and damage are reported

Load shifting devices include one (1) or more of the following:

- front end loaders/back hoes
- ride on forklifts
- pallet trucks
- skid steer
- vehicle loading crane

Safe working load includes the following:

- assessing weight of load to ensure compliance with equipment load plate specifications

SOPs include one (1) or more of the following:

- industry standards
- production schedules
- safety data sheets (SDS)
- work notes and plans
- product labels
- manufacturers' specifications
- operator manuals
- enterprise policies and procedures
- supervisors' oral and written instructions
- current state/territory WHS legislation
- standards and codes of practice

Obstacles and hazards include one (1) or more of the following:

- overhead cables
- personnel, obstacles (fixed and moveable)
- trenches
- pits
- uneven terrain
- trees
- underground services
- exposure to chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- vehicular traffic

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Shutdown includes the following:

- post-operational equipment checks, motion locks and brakes are applied
- lifting equipment is checked
- defective equipment is identified, segregated and reported to supervisor
- equipment is correctly stowed

Assessment Requirements for MEM11010 Operate mobile load shifting equipment

Modification History

Release 1. Supersedes and is equivalent to MEM11010B Operate mobile load shifting equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting tables, figures and instructions (both written and verbal) to work with others to operate mobile load shifting equipment
- performing routine safety, basic service and maintenance procedures as determined by manufacturers' specifications and site procedures
- calculating load masses and safe working loads and assessing calculation to ensure compliance with equipment load plate specifications
- selecting and safely operating appropriate load shifting equipment to shift loads, including interpreting communication signals and instructions
- conducting pre-operational checks, start-up and shutdown procedures
- determining load masses, including irregular shaped loads and equipment requirements
- demonstrating emergency operating procedures
- communicating faults, malfunctions and workplace hazards, reports and maintenance of operational records in accordance with site procedures.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- pre-operational checks
- start-up and shutdown procedures
- manufacturers' and design specifications of load shifting device
- load chart
- licensing requirements
- load protection and safe load placement
- operational environment
- relevant hazards

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- effect of load mass and shape on lifting and placing loads
- equipment load plate specifications
- appropriate permits
- workplace communication procedures.

Assessment Conditions

- Assessors must:
  - have vocational competency in operating mobile load shifting equipment at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM12023 Perform engineering measurements

Modification History

Release 1. Supersedes and is equivalent to MEM12023A Perform engineering measurements

Application

This unit of competency defines the skills and knowledge required to perform measurements requiring straightforward use of mechanical measuring devices which incorporate visual inspections representing units of measurement and associated calculations in a range of manufacturing, engineering and related environments. Measurements may be expressed in metric or imperial units.

Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **5**

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Identify job requirements from specifications, sketches, job sheets or work instructions
2	**Select appropriate device or equipment**	2.1	Determine measurement requirements from specifications
		2.2	Select appropriate device or equipment to achieve required outcome according to SOPs
3	**Obtain measurements using a range of measuring devices**	3.1	Use correct and appropriate measuring technique
		3.2	Obtain measurements accurately in a safe and effective manner
		3.3	Determine or verify dimensions using calculations, as required
4	**Maintain measuring devices**	4.1	Undertake routine care and storage of devices to manufacturers' specifications or SOPs
		4.2	Make routine adjustments to devices to maintain device accuracy
5	**Communicate measurements as required**	5.1	Record measurements accurately, as required
		5.2	Prepare freehand sketch which depicts required information, as required

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Specifications include one (1) or more of the following:	• drawings • sketches • job instructions • schematics • diagrams • reference manuals
Measuring devices include one (1) or more of the following:	• protractors • combination squares • set squares • dial indicators • thermometers • tapes • rules • micrometres • vernier-scaled measuring equipment
Calculations include one (1) or more of the following:	• addition • subtraction • multiplication • division • fractions • decimals **Note:** Calculations may be made using a calculator
Routine adjustments	• validating the device using simple zeroing or scale adjustment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

include the following:

Measurements include one (1) or more of the following:	• length • squareness • flatness • angle • roundness • clearances • any other measurements that can be read off analogue, digital or other measuring device
Information includes one (1) or more of the following:	• dimensions • instructions • base line • datum points

Assessment Requirements for MEM12023 Perform engineering measurements

Modification History

Release 1. Supersedes and is equivalent to MEM12023A Perform engineering measurements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting measurement requirements from specifications
- selecting appropriate measuring device or equipment to achieve the required outcome
- obtaining measurements in a safe and effective manner and recording measurements, including preparing a freehand sketch which depicts required information, as required
- performing calculations to determine or verify dimensions
- storing and maintaining measuring devices including routine adjustments according to manufacturer's specifications or SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- calculations, including addition, subtraction, multiplication, division, fractions and decimals
- manufacturer's or SOPs for handling and storing a range of measuring devices
- appropriate procedures for adjusting and zeroing a range of measuring devices, including scale adjustment
- appropriate methods of communicating measurements by drawings.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing engineering measurements at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Application

This unit of competency defines the skills and knowledge required to estimate approximate answers to arithmetical problems, carry out calculations involving percentages and proportions, and determine simple ratios and averages.

It also covers producing and interpreting simple charts and graphs in manufacturing, engineering or related environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Assessment Requirements for MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting data from job instructions and relevant sources to establish required outcomes
- determining the appropriate calculation method to suit the application
- performing calculations and confirming answer/s
- producing and interpreting simple charts and graphs from given data.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units
- techniques and procedures for rounding off figures when estimating approximate answers
- features and use of mixed numbers, decimals, fractions and whole numbers
- procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division
- concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage
- concepts and calculations of ratio and proportion
- scales applicable to the axes of the graphs or charts
- types of charts and/or graphs used in the individual's field of work
- upper and lower limits of acceptability applicable to data entered on a graph or chart
- trends indicated by the slope or gradient of a graph
- action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- trends indicated by the graphs or charts drawn.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - have vocational competency in performing computations at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13003 Work safely with industrial chemicals and materials

Modification History

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Application

This unit of competency defines the skills and knowledge required to work safely with industrial chemicals and materials subject to codes and regulations that are stored and used in a workplace, for example, chemicals, solvents, dangerous materials, acids and noxious waste products in a manufacturing and/or engineering environment.

This unit describes the competencies which are beyond those safety requirements normally applied in the workplace as described in unit MEM13015 Work safely and effectively in manufacturing and engineering, or specifically described in individual units, such as welding.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Evidence of competency is to encompass the satisfactory application of current state/territory work health and safety (WHS) legislation, standards and codes of practice, and the hierarchy of hazard control measures.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Competency Field

Work health and safety

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Identify job requirements from specifications, job sheets or work instructions
2	**Use personal protective equipment**	2.1	Select correct and appropriate personal protective equipment (PPE) and use correctly based on information in relevant safety data sheet (SDS)
3	**Adhere to emergency procedures**	3.1	Locate emergency equipment and use in accordance with workplace policies and SOPs
		3.2	Demonstrate responses to emergency procedures as detailed in approved safety procedures and instructions
4	**Observe safe working practices**	4.1	Identify hazardous areas and materials and understand and identify special handling procedures and obtain permits to work, if necessary
		4.2	Use all equipment and hazardous materials in accordance with relevant WHS legislation, manufacturers' instructions and SOPs
		4.3	Identify and understand all site-specific safety policies, safety signs, symbols and labels
		4.4	Interpret and apply SDS
		4.5	Use safe manual handling procedures, including equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.6 Ensure decanted chemicals and storage is to state/territory dangerous goods, WHS legislation and requirements
	4.7 Update chemical manifest following SOPs
	4.8 Perform housekeeping duties to maintain a safe working environment according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hierarchy of control measures include the following:	The application of the hierarchy of control follows the six-step preference of control measures to manage and control risk: **1**. elimination **2.** substitution **3.** isolation **4.** engineering control measures **5.** using safe work practices **6.** personal protective equipment (PPE)
PPE includes one (1) or more of the following:	• goggles/face shields • respirators • air supplied or self-contained helmets • safety boots • gloves and appropriate clothes/garments

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Safe working practices include one (1) or more of the following:	• environment is inspected • hazards (and chemical reactive hazards) are assessed and controlled using hierarchy of hazard control • properly maintained PPE is available • emergency management plan is documented/understood • work to be undertaken in safe 'thermal' environments and all possible ignition sources are to be identified and controlled
Storage includes the following:	• only using containers, which includes minor quantities and those in consumer packages, that are suitable for chemical exposure • labelling and/or placarding containers • updating chemical manifests
State or territory legislative requirements include one (1) or more of the following:	• appropriate WHS • dangerous goods acts and regulations • Australian Standards • Australian Code for the Transport of Dangerous Goods by Road and Rail (ADGC) • Safe Work Australia codes of practice

Assessment Requirements for MEM13003 Work safely with industrial chemicals and materials

Modification History

Release 1. Supersedes and is equivalent to MEM13003B Work safely with industrial chemicals and materials

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting appropriate PPE based on data obtained in relevant safety data sheets (DS)
- observing safe working practices including undertaking a risk assessment
- following approved safety procedures and instructions in demonstrating responses to real or simulated emergencies
- performing proper manual handling techniques when shifting and moving industrial chemicals and materials
- ensuring all decanted chemicals are stored in storage containers that are suitable for chemical exposure and are properly labelled and/or placarded
- updating chemical manifests following SOPs
- complying with appropriate state or territory legislative requirements at all times.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- dangerous goods classification and labelling/placarding
- testing and maintenance of PPE
- inherent hazardous properties of the chemicals to be used
- interpretation of the relevant safety data sheets (SDS)
- basic fire-fighting procedures
- site-specific emergency plan procedures
- chemical spill confinement procedures
- dangerous occurrence (near miss) reporting procedures
- hierarchy of controls.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - have vocational competency in working safely with industrial chemicals and materials at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivelant to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Application

This unit of competency defines the skills and knowledge required to work effectively in manufacturing and engineering work situations, including planning routine work and participating in and following work health and safety (WHS) procedures. The unit applies to working either individually or in a team situation and includes contributing to work-related group activities in a manufacturing or engineering workplace.

This unit covers WHS skills associated with carrying out routine operational activities safely and in compliance with legislative and regulatory requirements.

The unit covers the skills associated with participation in quality systems, communication and cooperation with others. The unit applies to workplaces with informal or formal quality management and improvement systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **2**

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Identify goals, objectives and task requirements and clarify with appropriate persons, where required
		1.2	Prioritise task requirements
2	**Review and modify plan**	2.1	Adjust timelines, priorities and other planning components to respond to contingencies, as necessary
		2.2	Re-examine results of work activity against the plan and identify possible improvements to future performance of work tasks
3	**Work effectively with others in the workplace**	3.1	Identify own role and responsibilities and relationship to other employees, including employees performing related/interdependent activities
		3.2	Identify supervisors and other sources of advice and assistance for own work
		3.3	Apply effective interpersonal skills to interact with others and contribute to activities and objectives
		3.4	Review and modify own work progress to complement the work of others
		3.5	Report own work progress to supervisors and where required to fellow employees using standard operating procedures (SOPs)
4	**Follow safe work practices**	4.1	Check for and identify hazards in the work area before and during work
		4.2	Follow procedures for avoiding or controlling hazards already identified in instructions, signage or other workplace communication
		4.3	Identify and report risks and hazards not covered by procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
		4.4 Select, use and maintain relevant personal protective equipment (PPE) by procedures, as required
		4.5 Recognise emergency situations and take appropriate initial emergency action
		4.6 Follow procedures for responding to emergencies
		4.7 Report incidents, injuries and other WHS non-conformances according to procedures
5	**Work within a quality system**	5.1 Follow instructions and procedures and perform duties in accordance with standard operating procedures or quality system requirements
		5.2 Ensure conformance of product and process to specifications
		5.3 Report defects and non-conformance to specifications according to procedures
		5.4 Participate in process improvement procedures, where required
6	**Participate in workplace health and safety procedures**	6.1 Identify workplace health and safety policies and procedures relevant to own work and work area
		6.2 Identify relevant WHS managers and representatives for own work area
		6.3 Provide input to minimise hazards in work area in line with organisation WHS procedures and participative arrangements

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Quality systems include one (1) or more of the following	• quality planning • quality assurance • quality control • quality improvement procedures and processes
Task requirements include one (1) or more of the following:	• timeframe • quality requirements • outcome and performance requirements • job history • checks • reporting requirements • tools and equipment • materials and parts • supporting documents
Specifications include one (1) or more of the following:	• task lists • instructions • manufacturer manuals • diagrams and schematics • sketches • parts lists • SOPs
Planning includes one (1) or more of the following:	• preparing a plan to complete the task • organising task into manageable steps including appropriate order and timing • monitoring the progress of processes related to own responsibilities • applying relevant WHS instructions • collecting, sorting, recording results of work • seeking advice and guidance on setting priorities and timeframes

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- seeking feedback from supervisor, trainer or mentor

Unit Mapping Information

Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivelant to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and avoiding or controlling hazards
- reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs
- recognising and responding to emergencies following SOPs
- identifying and obtaining, instructions and information on job requirements, including one or more of the following:
  - verbal or written job instructions
  - specifications
  - SOPs
  - charts
  - lists
- identifying and responding to contingencies, including:
  - equipment breakdowns
  - non-conforming components
  - safety hazards
- recording information into proforma workplace documents, including:
  - production tally forms
  - quality control forms
  - safety incident forms
- performing assigned tasks and checking outcome of own work for conformance to specifications
- identifying own responsibilities within the workplace quality system
- giving and receiving feedback on own and group work
- seeking assistance from supervisors and mentors.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use and application of personal protective equipment
- basic quality system terminology and concept, including:
  - quality assurance
  - quality control
  - quality improvement
- procedures to be followed in performing own work
- objectives, requirements and specifications to which the individual's work is to comply
- costs and consequences of poor quality
- effective interpersonal skills:
  - effective listening
  - basic speaking skills
  - use of workplace terminology and jargon
  - giving and receiving feedback
  - checking and clarifying task-related information
  - verbal, visual and written instructions
  - appropriate modes and methods of communication
- barriers to effective communication
- sources of technical expertise/assistance
- hazards and control measures associated with workplace activities.

Assessment Conditions

- Assessors must:
  - have vocational competency in working safely and effectively in manufacturing and engineering at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM14006 Plan work activities

Modification History

Release 1. Supersedes and is equivalent to MEM14005A Plan a complete activity

Application

This unit of competency covers the skills and knowledge required to plan familiar work activities, whilst following established procedures and work health and safety (WHS) policies and procedures of the organisation.

Planning is undertaken by the individual performing the work. Individual plan components may require modification and prioritising to meet job requirements or to respond to unforeseen circumstances.

Where computations are required to be performed unit MEM12024 Perform computations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **4**

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Identify outcomes and objectives and clarify with appropriate persons
		1.3 Obtain and clarify relevant specifications and procedures
		1.4 Identify and prioritise individual components of the plan
		1.5 Select and use planning tools and techniques according to the requirements of the work
		1.6 Check the plan for accuracy and relevancy to job requirements
2	**Modify plan components**	2.1 Modify the plan components, as necessary, to respond to unforeseen developments
		2.2 Review the outcome of the work activity and, where necessary, identify future improvements to the plan
3	**Follow WHS requirements**	3.1 Comply with WHS requirements at all times
		3.2 Identify WHS hazards and risks and implement appropriate risk control measures in accordance with SOPs
		3.3 Select, use and maintain appropriate personal protective equipment (PPE) in accordance with SOPs
		3.4 Raise WHS issues with designated personnel in accordance with SOPs
		3.5 Report WHS related actions and incidents according to SOPs

Assessment Requirements for MEM14006 Plan work activities

Modification History

Release 1. Supersedes and is equivalent to MEM14005A Plan a complete activity

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- planning a work activity using appropriate planning tools and techniques whilst following established procedures, including work health and safety (WHS) requirements
- checking the plan to ensure accuracy and conformance and modifying the plan components, as necessary, to overcome any unforeseen difficulties or developments
- identifying hazards and implementing appropriate risk control measures and procedures
- selecting, using and maintaining relevant personal protective equipment (PPE)
- evaluating the effectiveness of risk controls measures
- providing proforma WHS reports in accordance with SOPs, as required.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of PPE
- relevant specifications
- sources of advice relating to the objectives, requirements and specifications
- timeframe for activity completion
- quality requirements of the product or service
- techniques and reasons for prioritising of each step in a plan
- modifications that can be made to the plan to respond to unforeseen developments
- risk control measures
- reporting requirements for accidents, incidents and other non-conformances with WHS procedures.

Assessment Conditions

- Assessors must:
  - have vocational competency in planning work activities in a manufacturing and engineering environment at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job requirements	1.1. Nature and scope of task requirement are identified. 1.2. Information/data required to be accessed, input or stored is identified. 1.3. Source of information/data is identified.
2. Access information/data	2.1. Access procedures are followed. 2.2. Technology is navigated to find the required information/data. 2.3. Relevant software application menus, functions and commands are used to locate required information/data. 2.4. Information/data is retrieved using organisational procedures. 2.5. Information/data is checked for relevance to job requirements.
3. Input information/data	3.1. Relevant software menus, functions and commands are used to manipulate information/data. 3.2. Information/data is entered, changed, or removed as required.
4. Store	4.1. Data/files are saved following standard procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

ELEMENT	PERFORMANCE CRITERIA
information/data	prior to exiting the application. 4.2. Data output is produced as required. 4.3. Procedures for shutting down/logging off/exiting computing technology are followed.
5. Access assistance as required	5.1. Appropriate personnel are identified and consulted as required. 5.2. Manuals, online help and other reference materials are identified and used as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • ability to enter or retrieve data using appropriate software applications • reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents • planning and sequencing operations • checking and clarifying task-related information • using numerical operations within the scope of this unit
Required knowledge
Look for evidence that confirms knowledge of: • functions and capabilities of various types of computing technology used in the workplace • functions of software applications • hazards and control measures associated with using computing technology, including housekeeping • safe work practices and procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to interact with computing technology to achieve workplace outcomes.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with interacting with computing technology or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for

EVIDENCE GUIDE	
assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Access procedures	Logging on and security procedures, virus checks, start-up routines, application start-up
Technology	Hand held data recording devices, screen based equipment, personal computers, bar coders
Applications	• Word processing spreadsheets and databases • Customised engineering and manufacturing applications • Material Resource Planning (MRP) • Warehousing inventory applications • Predictive reliability and maintenance applications • Production data management applications
Data output	Report, email, chart, graph, printout, data transfer, labels

MEM17003 Assist in the provision of on-the-job training

Modification History

Release 1. Supersedes and is equivalent to MEM17003A Assist in the provision of on the job training

Application

This unit of competency defines the skills and knowledge required to assist in the provision of on-the-job training to others while undertaking normal duties and it may involve the replacement of normal duties with training duties for limited periods of time. The individual would not be expected to be solely responsible for the assessment or reporting of a trainee's progress.

Typical applications could include the provision of on-the-job training by a tradesperson to apprentices/trainees or by a production worker to other production workers/trainees.

Where the development of training programs is required unit MEM17001 Assist in development and deliver training in the workplace should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **2**

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, job sheets or work instructions
		1.5	Identify objectives of training and role of on-the-job training in consultation with appropriate personnel
		1.6	Develop a plan for the training
2	**Provide on-the-job training**	2.1	Conduct training using methods appropriate to the training objectives and learner
		2.2	Monitor trainee progress and provide feedback appropriate to the learning outcomes
		2.3	Report trainee's progress according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MEM17003 Assist in the provision of on-the-job training

Modification History

Release 1. Supersedes and is equivalent to MEM17003A Assist in the provision of on the job training

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- determining through consultation the objectives of training and the role of on-the-job training
- planning training delivery
- conducting appropriate training in a safe and effective manner, including the appropriate use of personal protective equipment (PPE)
- using appropriate training methods
- monitoring trainee's progress and providing feedback
- reporting trainee's progress through appropriate channels.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of PPE
- requirements for planning occasional on-the-job training
- features of training with relevant personnel, including:
  - identification of person(s) to be trained
  - the individual's role in the provision of training
  - skills and knowledge to be learned
  - procedures to be followed
  - training location(s)
  - tools, equipment, materials and resources required
  - appropriate delivery method/s
  - the role of feedback in the provision of on-the-job training
  - the reasons for monitoring trainee's progress
- reporting procedures.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - have vocational competency in assisting in the provision of on the job training at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Application

This unit of competency defines the skills and knowledge required to use a range of hand tools for a variety of general engineering applications.

This unit should not be selected if the hand tool is dedicated to a single operation or machine or when a machine-specific/customised tool is used.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times
		1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Use hand tools for general engineering applications**	2.1 Select hand tools appropriate to the task requirements
		2.2 Use hand tools to produce outcomes that meet job specifications
		2.3 Identify unsafe or faulty tools and mark for repair according to designated procedures before, during and after use
		2.4 Undertake routine maintenance of tools using engineering principles, tools, equipment and procedures
		2.5 Store hand tools safely in appropriate location according to procedures and manufacturers' recommendations

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hand tools include one (1) or more of the following:

- hacksaws
- hammers
- punches
- screwdrivers
- sockets
- wrenches
- scrapers
- chisels
- gouges
- wood planes
- files of all cross-sectional shapes and types
- hand held taps and dies

Applications include one (1) or more of the following:

- adjusting
- dismantling
- assembling and finishing of items or components
- finishing, cutting, scraping of metallic and non-metallic material to size and shape
- tapping/retapping and threading/rethreading new/damaged threads

Drawings include one (1) or more of the following:

- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
- work specifications that include graphic representations that do not require interpretation

Job specifications include one (1) or more of the following:

- finish
- tension
- size
- shape

Routine maintenance includes one (1) or more of the following:

- cleaning
- lubricating
- tightening
- simple tool repairs
- adjustments

Assessment Requirements for MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using hand tools to produce the desired outcome to job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine maintenance and cleaning of hand tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment
- storage location and procedures for a range of hand tools.

Assessment Conditions

- Assessors must:
  - have vocational competency in using hand tools at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011,* its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Application

This unit of competency defines the skills and knowledge required to use a range of hand held power tools and fixed power tools for hand held operations used in a variety of general engineering applications.

This unit should not be selected if the power tools used are dedicated to an operation or machine, e.g. nut-runner, air drill and power driver.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use hand tools is required unit MEM18001 Use hand tools should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Use power tools for general engineering applications**	2.1	Select power tools appropriate to the task requirements
		2.2	Use power tools for a determined sequence of operations to produce desired outcomes to job specifications
		2.3	Identify unsafe or faulty tools and mark for repair before, during and after use according to SOPs
		2.4	Undertake operational maintenance of tools according to principles, techniques and SOPs
		2.5	Store power tools safely in appropriate location according to manufacturers' recommendations and SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

MEM19006 Replace watch batteries

Modification History

Release 1. Supersedes and is equivalent to MEM19006B Replace watch batteries

Application

This unit of competency defines the skills and knowledge required to replace digital or analog watch batteries and arrange water resistance and pressure testing.

Some knowledge of watch glasses and seals is required, however specific replacement functions for these are not covered by this unit and testing functions relate only to the measurement of voltage, consumption and resistance.

This unit does not apply to diver and other water-resistant watch types and water resistance and pressure testing is not covered by this unit, however identification of watches requiring testing as well as procedures for arranging testing are a requirement of this unit.

Where power cell replacements in these two categories are of common practice with associated testing and/or identification/cleaning/supply/fitting of waterproofing/water resistance components appropriate horological units should be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Assessment Requirements for MEM19006 Replace watch batteries

Modification History

Release 1. Supersedes and is equivalent to MEM19006B Replace watch batteries

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, job sheets or work instructions to replace watch batteries in digital and analog watches
- selecting and using appropriate tools and equipment, including all hand and power tools appropriate to opening and closing watch cases
- handling and cleaning case, movement and other watch parts and inspecting for obvious damage, wear and moisture intrusion
- inserting and removing batteries
- measuring voltage, resistance and consumption for correct values in accordance with manufacturers' data
- arranging water resistance and pressure testing.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- applicable horological terminology
- design of case types, including water resistant, dustproof and diver's, and their functions
- types of batteries and their functions and battery cell construction
- analog, digital, multi-function and mechanical watch functions
- wear and the possible effects on glass and adjustors
- watch-specific tools and equipment
- manufacturers' information, specifications and SOPs
- location and cause of moisture and corrosion effects
- handling, cleaning and adjustment procedures
- work health and safety (WHS) issues for mercury and lithium batteries
- appropriate symbols and other identifying relevant standards information and their location

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- battery features, identification codes and parts associated with battery function
- procedures to confirm battery status
- relevant internal and external water resistance and pressure testing bodies or personnel
- arrangements and procedures for dispatch and receipt of watches.

Assessment Conditions

- Assessors must:
  - have vocational competency in replacing watch batteries at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM19014 Perform hand engraving

Modification History

Release 1. Supersedes and is equivalent to MEM19014B Perform hand engraving

Application

This unit of competency covers the skills and knowledge required for performing basic hand engraving using hand tool applications. Work includes block and script lettering and carving techniques on mostly flat surfaces to achieve patterns in relief or intaglio.

Where the work being performed requires the item to have shaping/drilling/contour modification using power tools unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: **A**

Unit Weight: **4**

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information
MEM18001	Use hand tools

Competency Field

Jewellery and horological

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, sketches, job sheets or work instructions
2	**Select and maintain engraving equipment and accessories**	2.1	Identify sequence of procedures and select appropriate equipment
		2.2	Prepare gravers to industry standards
3	**Perform hand engraving**	3.1	Measure item and mark out for engraving
		3.2	Position work piece and hold or clamp effectively and without damage to the work piece
		3.3	Undertake work according to SOPs and industry standards

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MEM19014 Perform hand engraving

Modification History

Release 1. Supersedes and is equivalent to MEM19014B Perform hand engraving

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying the engraving sequence and selecting the gravers, scorpers and other applicable tools required to meet specifications
- measuring and marking out using datum lines or points for engraving and positioning and holding item without damage
- completing work according to work specifications
- maintaining the engravers by machining and sharpening graver shape and cutting angles in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- engraving terminology
- sources of task-related information
- securing methods and limitations
- different gravers and scorpers and their applications
- techniques for producing and maintaining cutting edges
- equipment and techniques used for maintaining gravers
- hand engraving techniques for letters and basic pictures and carvings.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing hand engraving at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM20001 Produce keys

Modification History

Release 1. Supersedes and is equivalent to MEM20001A Produce keys

Application

This unit of competency defines the skills and knowledge required to produce and duplicate keys for mechanical locking devices and systems. It applies to the production of keys across a range of locksmithing areas, including automotive, domestic, commercial, security containers and ancillaries.

Where other programming of high-security transponders is required unit MEM20013 Service automotive transponder systems should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, drawings, work instructions or existing samples
		1.5	Select appropriate method for cutting/duplicating according to key type and system, and other applicable factors
		1.6	Confirm signatories, as required
2	**Prepare materials and equipment**	2.1	Select appropriate tools and equipment
		2.2	Select correct key blank for the given application
		2.3	Set up equipment and accessories in an appropriate manner for cutting/duplicating
3	**Produce and duplicate keys**	3.1	Ensure key fits and operates lock in a correct manner
		3.2	Ensure key dimensions meet manufacturer specifications
		3.3	Use hand tools and equipment safely and in accordance with SOPs
		3.4	Finish key according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Method for cutting/duplicating includes one (1) or more of the following:

- hand
- machine
- computer and book code equipment
- programming of read/write transponders

Key types include one (1) or more of the following:

- inline pin tumbler
- single and double sided wafer
- 2 and 4 track
- lever:
  - pin
  - pipe
  - mortice
  - flat steel
  - double bitted
- warded
- pre-cut
- rotating pin
- rotating disc
- axial pin (dimple)
- tubular
- cruciform

Key systems include one (1) or more of the following:

- restricted, semi-restricted and non-restricted system numbers
- manufacturer restricted
- factory restricted
- locksmith restricted/managed
- association restricted

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Requirements for key production includes one (1) or more of the following:	• specific client requirements and quantities • completion times and dates • job requirements and tasks • signature authorities • WHS requirements • company requirements • compliance with relevant manufacturer requirements • warranties and service information
Tools and equipment include one (1) or more of the following:	• manual and computerised code machines • milling machines, tubular machines and duplicating machines • crimpers, hand files and bridge support • measuring equipment, including standard gauges and vernier callipers

Assessment Requirements for MEM20001 Produce keys

Modification History

Release 1. Supersedes and is equivalent to MEM20001A Produce keys

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- interpreting conversion charts, reference books and samples to identify blank requirements for keys used across a wide range of industries
- selecting appropriate cutting/duplicating method for key type and system
- measuring key dimensions and identifying key type appropriate to the task
- setting up and safely using cutting and duplicating equipment to produce keys
- testing and adjusting key operation, checking calibration and finishing keys.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- different techniques for cutting and duplicating
- tools and equipment for hand and machine key cutting
- key systems and blanks
- spacings, depths, angles, shapes and other measurements relevant to cutting keys
- terminology for key production
- requirements of key restrictions
- workplace method for confirming signatory to key order
- key blank storage and classification systems
- identification marking procedures
- key storage and packaging procedures.

Assessment Conditions

- Assessors must:
  - have vocational competency in producing keys at least to the level being assessed with relevant industry knowledge and experience

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply functions of computer-aided design (CAD) software programs that are typically used in the production of detail drawings.

Application of the Unit

This unit is suitable for those working within a CAD or drafting work environment and may be applied across engineering and manufacturing environments. It covers competent use of a CAD program to perform basic drawing tasks used in the development of detail drawings. Drawings may include plans, diagrams, charts, circuits, systems or schematics.

This unit includes using computer equipment and selecting software functions in order to generate basic drawing elements.

Work is conducted under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm drawing requirements	1.1	Confirm purpose, scope, and information and presentation requirements for drawing
		1.2	Review available information relevant to project and work requirements, and identify and address further information needs
		1.3	Identify computing equipment and software used in the organisation
		1.4	Identify work flow and procedures for work supervision
		1.5	Examine requirements for presentation of drawings
2	Identify key features of CAD software	2.1	Describe types of CAD software used for detail drafting, their key features and suitability for producing specific drawing outcomes
		2.2	Describe types of CAD software used for design drafting, their key features and suitability for producing specific drawing outcomes
		2.3	Identify differences in CAD process to generate 2-D drawings and 3-D models, and reasons for each presentation
		2.4	Identify differences in CAD process to generate single and multiple view drawings, and reasons for each presentation
		2.5	Identify CAD software used in the organisation and confirm compatibility with other software programs and peripheral equipment
		2.6	Identify software features for linked specifications, catalogues or materials ordering
3	Access software and set up for	3.1	Open software and navigate organisational filing and library system

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	drawing work	3.2	Identify organisational and software templates and determine uses
		3.3	Identify organisational symbols, codes and standards to be applied in drafting work and how these are accessed and applied
		3.4	Apply workplace procedures to retrieve and manipulate required information and navigate computing technology
		3.5	Set up working environment
4	Produce basic drawing elements	4.1	Use CAD functions to produce basic drawing elements
		4.2	Use editing and transfer tools and methods to modify drawing elements
		4.3	Apply dimensions, text and symbols to drawing elements
		4.4	Import and export files into/out of working space
		4.5	Generate different views and perspectives
		4.6	Organise presentation of work
5	Complete CAD operations	5.1	Save and file drawing elements according to organisational procedures
		5.2	Print drawing elements and evaluate presentation
		5.3	Evaluate work and identify areas for improvement
		5.4	Close applications, perform CAD housekeeping and maintain organisational filing system

Required Skills and Knowledge

Required skills

Required skills include:

- literacy skills sufficient to read instructions for drawings work

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- using computer technologies and navigating software
- numeracy skills sufficient to interpret technical information and determine scaling and layout issues
- navigating software to:
  - manipulate drawing entities
  - modify dimension styles
  - create and use layers
  - manipulate the drawing origin
  - define and utilise symbol libraries
  - utilise grids/grid snaps and object snaps
  - display views at multiple scales
  - add title blocks/frame to layout a drawing for printing
  - prepare advanced drawings in plane orthogonal or equivalent
  - set up prototype drawings
  - define and extract attribute data
  - create bills of materials (BOM) utilising attribute data and third-party application software

Required knowledge

Required knowledge includes:

- general knowledge of different approaches to drawing
- awareness of copyright and intellectual property issues and legislation in relation to drawing
- environmental and occupational health and safety (OHS) issues associated with the tools and materials used for drawing
- quality assurance procedures
- CAD program capabilities and processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to use CAD software to produce graphics commonly used in drafting work.
Critical aspects for assessment and evidence required to demonstrate competency in this	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

unit	competency in new and different situations and contexts. Specifically the candidate must be able to: • work within typical site/teamwork structures and methods • apply worksite communication procedures • comply with organisational policies and procedures, including quality requirements • participate in work meetings • comply with quality requirements • use industry terminology • apply appropriate safety procedures • identify drawing work requirements and determine appropriate software functions and features • identify features and uses of CAD software used in detail and design drafting • access and use computing equipment and CAD software functions to produce drawing elements.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with drafting or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways, including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Range Statement

CAD software	CAD software may include: • AutoCAD • Inventor • Revitt • Solidworks • ProSteel • XSteel • other programs
Key features	Key features may include: • 2-D • 3-D modelling • built-in specifications • file import/export • save • undo • scale
Specific drawing outcomes	Specific drawing outcomes may include • 2-D • 3-D modelling • drawings for specific engineering applications • orthographic/isometric/perspectives/schematics
Basic drawing elements	Basic drawing elements may include: • points, line angles, circles, arcs, planes, figures and solids

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• squares, rectangles and triangles • bisected lines and dividing lines • polygon, ellipse, spline, dimension and hatch
Editing and transfer tools and methods	Editing and transfer tools and methods may include: • delete, fillet, chamfer, erase, trim/extend, break, undo and redo commands • zooming and panning • moving, copying, rotating and mirroring • polar and rectangular duplication • object snaps • dimensions • selecting entities • dividing • scaling • measuring • grouping

MEM30032A Produce basic engineering drawings

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers producing drawings or similar graphical representations where the critical dimensions and associated tolerances and design specifications are predetermined.

Application of the Unit

This unit applies to any of the full range of engineering disciplines. All work is carried out under supervision and all specifications, dimensions and tolerances are predetermined. The unit covers application of introductory drafting skills to select and apply drawing protocols.

Manual drafting or computer-aided design (CAD) drawing equipment may be used.

If CAD skills are required, MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements, should be selected.

Drawings are completed to Australian Standard (AS) 1100.101–1992 Technical drawing – General principles.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify drawing requirements	1.1	Identify information requirements for work and obtain all relevant job requirements and design specifications in accordance with workplace procedures
		1.2	Identify, interpret and analyse drawing requirements, specifications and relevant workplace information
		1.3	Interpret and apply industry terminology for drawing work
		1.4	Confirm communication practices required during drawing work
		1.5	Estimate time requirements for completing work
2	Select drawing features	2.1	Set up drawing list or register
		2.2	Determine level of detail and numbers of drawings required for work
		2.3	Plan presentation and layout, and determine drawing sheets, text style and size, and scales, appropriate for drawing work
		2.4	Identify features and applications of line types and thicknesses and select for drawing work
		2.5	Establish datums and dimensions
3	Prepare and detail drawings	3.1	Prepare drawings in plane orthogonal, isometric projection or equivalent
		3.2	Detail drawings in third angle projection, including auxiliary views, sections and assemblies
		3.3	Draw sections through engineering components incorporating correct use of cutting plane symbols and conventions

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		3.4	Include appropriate symbols for limits and fits, surface texture and geometric tolerances
		3.5	Resolve problems in consultation with a supervisor
		3.6	Check drawing compliance with work instructions and specifications
4	Select physical dimensions and produce engineering parts list	4.1	Where required, select components and/or materials from supplier/manufacturer catalogues using predetermined design specifications
		4.2	Produce an engineering parts list in accordance with workplace procedures
5	Complete drawing documentation	5.1	Obtain approval for drawings and/or parts list
		5.2	Store approved drawings and/or parts lists
		5.3	Catalogue and issue drawing and documentation in accordance with workplace procedures

Required Skills and Knowledge

Required skills

Required skills include:

- correctly using and maintaining equipment, including CAD
- manual drafting, filing and printing
- reading and interpreting specifications
- communicating with supervisor to confirm work requirements and outcomes
- visualising components
- preparing a drawing in plane orthogonal, isometric projection or equivalent
- determining drawing protocols required to complete drawing to industry standard
- selecting and locating text to support presentation
- establishing datums and dimensions for drawings
- drawing sections through an engineering component incorporating correct use of cutting plane symbols and conventions

Required knowledge

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Required knowledge includes:

- drafting media, including cartridge paper, tracing paper, drafting film and plain printing paper
- layout conventions
- effective use of blank space, location of notes and symbols
- sectioning
- overview of graphical techniques
- assembly drawings and explosion drawings
- schematics/line drawings, graphs and pictorials
- standard engineering drawing symbols, references and terminology
- application of surface finish symbols to drawings
- uses of different scales in industry applications
- uses and types of line weights
- uses and types of drawing sheets
- type of information provided with drawings

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to produce basic engineering drawings to AS 1100.101–1992 Technical drawing – General principles.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. Specifically the candidate must be able to: • work within typical site/teamwork structures and methods • apply worksite communication procedures • comply with organisational policies and procedures, including quality requirements • participate in work meetings • comply with quality requirements • use industry terminology

MEM30033A Use computer-aided design (CAD) to create and display 3-D models

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers using a computer-aided design (CAD) program to produce and plot basic 3-D view drawings.

Application of the Unit

This unit applies to the production of 3-D models using CAD software and associated equipment. This will include the use of region and solid modelling techniques, section views and pre-drawn library files. Work also includes extraction of properties and application of basic rendering techniques.

All work is conducted under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm drawing requirements	1.1	Confirm purpose, scope and information and presentation requirements for drawing
		1.2	Identify, interpret and analyse available information relevant to project and work requirements, and identify and address further information needs
		1.3	Identify computing equipment and software used in the organisation
		1.4	Identify work flow and procedures for work supervision and confirm communication requirements through project
		1.5	Examine requirements for presentation of drawings
2	Create and display 3-D views	2.1	Set up a 3-D environment on the screen to allow multiple viewing
		2.2	Create 3-D views on the screen by manipulation of drawing planes and insertion of 3-D geometric shapes
		2.3	Draw on any plane of the 3-D view
		2.4	Use editing functions to modify 3-D geometric shapes in creating 3-D views
		2.5	Produce wire line, surface and solid face displays in isometric, perspective and orthographic projections
3	Detail 3-D model	3.1	Extract the mass and surface area of a given solid model made from a nominated material
		3.2	Apply basic rendering techniques to render solid model to a specified set of criteria
4	Save completed	4.1	Save file in an appropriate format to enable retrieval and

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

drawing file in various formats		use in a CAD system
	4.2	Save file in other formats to enable retrieval in other software applications

Required Skills and Knowledge

Required skills

Required skills include:

- reading and interpreting engineering specifications
- organising information
- using computer and peripherals
- using CAD program
- saving 3-D modes in various file formats
- preparing drawings in plane orthogonal, isometric projection or equivalent

Required knowledge

Required knowledge includes:

- region modelling techniques
- solid modelling techniques
- development of sectioned models
- use of cutting plane
- use of cross hatching
- use of pre-drawn library files and primitives to produce a 3-D model
- use of third level software to produce 3-D models
- how to extract mass and area properties
- how to extract area properties from region models
- application of basic rendering techniques to a 3-D model

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to use CAD to create and display 3-D models.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. Specifically the candidate must be able to: • work within typical site/teamwork structures and methods • apply worksite communication procedures • comply with organisational policies and procedures, including quality requirements • participate in work meetings • comply with quality requirements • use industry terminology • apply appropriate safety procedures • identify modelling work requirements and determine appropriate software functions and features • apply CAD functions to produce a rendered 3-D model to Australian Standard (AS) 1100.101–1992 Technical drawing – General principles.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. MSFSF3013 Provide technical advice to customers

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers providing advice to customers on a range of technical issues that impact on soft furnishing types, uses and installation issues, including wall structures, interior design principles, motorisation, energy conservation and interpretation of architectural drawings.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking technical advisory work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

Pre-requisite Unit

Competency Field

Unit Sector

Soft Furnishing

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify customer requirements	1.1	Questioning techniques are applied to determine the nature of customer requirements
		1.2	Potential site problems or site-specific requirements are identified
2	Access and interpret information	2.1	All available information relating to customer-specific requirements is gathered, recorded and confirmed with the customer
		2.2	Information on options that potentially meet the customer's

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			requirements is accessed and interpreted
3	Provide advice to customer	3.1	Viable options relating to products, techniques or solutions that are relevant to the customer's requirements are generated
		3.2	Information on available options relating to products, techniques or solutions is provided to the customer
		3.3	Features, benefits, limitations and safety implications relating to available options are explained to the customer
		3.4	The customer is advised to seek specialist advice, where warranted

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

Tools and equipment include:

- measuring and calculating equipment:
  - tapes
  - rulers

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• calculators • computers

Materials include:	• product and fabric samples
	• visual aids:
	  • photographs
	  • magazines
	  • trade brochures
	  • sketches
	• technical drawings

Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFSF3014B Provide technical advice to customers.

Assessment Requirements for MSFSF3013 Provide technical advice to customers

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Provide advice to customers on three (3) occasions with each involving a different central subject
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Interpretation of plans, drawings and worksheets
- Interior design principles
- Types of motorisation
- Energy conservation methods
- Types of wall and ceiling construction

Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to sample products, visual aids and customer specifications.

MSMBLIC001 Licence to operate a standard boiler

Modification History

Release 1. Supersedes and is equivalent to MSABLIC001 Licence to operate a standard boiler.

Application

This unit specifies the outcomes required to operate a standard boiler safely. This includes boiler start-up, handover, monitoring, shutdown and storage of a boiler that uses a single fuel source and does not have an air pre-heater, feed water heater, superheater, attempurator or desuperheater, simultaneous dual fuel firing capability or economiser attached.

This unit also covers the preparation for inspection procedures as specified in manufacturer recommendations, identification of maintenance requirements and relevant risk control measures.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, High Risk Work, and meets Commonwealth, state and territory high risk work licensing requirements. Any alteration to the unit content or outcomes would result in a unit that is not acceptable to WHS/Occupational Health and Safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Nil

Competency Field

Unit Sector

Boiler operation (licensed)

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element
1	**Plan and prepare**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	for work	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Identify potential workplace hazards and appropriate risk control measures consistent with appropriate standards to ensure the safety of personnel and equipment
		1.4	Locate and review appropriate records to prepare for boiler operation
		1.5	Identify the type of boiler and plan boiler operations according to procedures
		1.6	Identify appropriate personal protective equipment (PPE) in accordance with SOPs
		1.7	Identify suitable communication methods and confirm with appropriate personnel
2	**Start up boiler**	2.1	Apply risk prevention and risk control measures to the work area according to procedures
		2.2	Select communication equipment and inspect for serviceability
		2.3	Select all necessary equipment and inspect for operational effectiveness according to procedures, including establishing water level
		2.4	Check boiler visually for any damage or defects and report and record any found according to procedures with appropriate action taken
		2.5	Vent boiler to atmosphere prior to start-up, as required
		2.6	Carry out pre-start up checks on the boiler and bring the boiler online safely according to procedures
		2.7	Start up boiler according to procedures
		2.8	Identify maintenance requirements and any visual faults and report according to procedures
		2.9	Confirm, complete and log all maintenance and/or repairs and associated isolations and make the equipment serviceable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

3	**Monitor boiler operation**	3.1	Diagnose operating status of the boiler
		3.2	Maintain operating log clearly and accurately according to procedures
		3.3	Monitor boiler, valves, fittings and pressure gauges according to procedures
		3.4	Blow boiler water level gauges through both steam and water sides
		3.5	Test standby plant and equipment according to procedures
		3.6	Conduct boiler water quality tests, where required, and record the results according to procedures
		3.7	Adjust boiler water chemicals after tests, where appropriate and required according to procedures and notify downstream users, if necessary
		3.8	Activate the automatic blowdown and, where required, boiler is blown down to adjust total dissolved solids (TDS) levels to recommendations
		3.9	Communicate handover information regarding boiler status and operation clearly to relevant personnel according to procedures
		3.10	Respond immediately to any boiler emergency in accordance with procedures
4	**Shut down boiler**	4.1	Shut down the boiler for inspection according to procedures, as required
		4.2	Identify maintenance requirements and report any visual faults according to procedures
		4.3	Complete isolations associated with in-service maintenance according to procedures
		4.4	Clean boiler internally and externally to manufacturer recommendations and procedures, where required
		4.5	Complete boiler operating log for shutdown

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

5	**Store boiler in shutdown mode**	5.1	Identify storage time and condition of storage, where required
		5.2	Store boiler in safe condition for access in accordance with manufacturer recommendations and procedures
		5.3	Test stored boiler water and chemicals, where required, and handle in accordance with procedures, where storage is for extended periods

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Boiler includes: Fixed and modulating combustion controls and a single heat source. Operation includes a battery of boilers and boilers that have a single thermal or solar heat source.

Note: Boilers meeting the definition of 'advanced boiler' are excluded.

Standard boiler includes:

- vessel or an arrangement of vessels and interconnecting parts in which steam and vapour is generated or in which water or other liquid is heated above that of the atmospheric pressure by the application of:
  - fire
  - the products of combustion
  - electrical power
  - similar means
- fixed and modulating combustion controls, fixed and

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

modulated air supply, a single fuel source and will have:

- boiler piping
- supports
- mountings
- valves
- gauges
- fittings
- controls
- boiler settings and directly associated equipment

Type of boiler includes one or more of the following:

- fire tube
- water tube
- once through boilers
- waste heat
- electrically heated
- novel or unique

Hazards include one or more of the following:

- asbestos lagging
- chemical hazards
- thermal hazards
- manual handling hazards
- machinery guard requirements
- hot exposed steam pipe
- leakage of steam
- leakage of fuel
- odour of gas
- fumes from a liquid chemical spill
- faulty/broken ladder or hand rail
- working at heights
- flammable liquids
- fire and explosion
- electrical hazards
- work area, including:
  - illumination
  - excessive noise from machinery
  - spillage of oil
  - rubbish and combustibles
  - obstruction

Risk control methods include:	Risk control methods refer to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control: • elimination • substitution • isolation • engineering controls • administrative controls • personal protective equipment (PPE)
Appropriate standards include one or more of the following:	• legislation • codes of practice • manufacturer specifications • Australian Standards • technical standards (International) • industry standards (where applicable)
Procedures include one or more of the following:	• manufacturer guidelines (e.g. instructions, specifications or checklists) • industry operating procedures • workplace procedures (e.g. work instructions, operating procedures or checklists)
Equipment includes one or more of the following:	• gas monitoring equipment • water testing equipment • fire-fighting equipment • workplace first aid equipment • work platform and associated gear, including walkways
Communication methods include one or more of the following:	• verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Appropriate personnel includes one or more of the following:	• production workers • maintenance workers • supervisors and managers • other boiler operators • suppliers • colleagues
Records include one or more of the following:	• operating log books • maintenance records • records of faults and potential faults • isolation procedures • safe operating procedures • daily operating inspections • repairs carried out according to manufacturer recommendations and operating procedures • workplace record keeping requirements • details of any daily or periodic maintenance work • details of yearly programmed or additional maintenance work
Risk control measures include one or more of the following:	• barricades and controls • machine guarding • fall prevention • pedestrian controls • adequate illumination • noise controls • signage • PPE
PPE includes one or more of the following:	• thermally insulated gloves • hard hat protection • ear protection (muffs or plugs) • chemical resistant gloves and apron • respiratory devices • eye protection • working protective gloves • whole body fire-resistant clothing
Communication equipment includes one or more of the	• two-way radios • mobile phones

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

following:

- intercoms
- landline telephones
- pagers
- satellite phones
- computers

Pre-start up checks include:

- testing warning lamps or visual warning indicators
- control panel checks
- checks of feedwater supply system
- fuel supply/heat source system
- operation and position of boiler valves
- combustion air supply system
- boiler water level
- essential fittings and gauges
- selection of PPE
- inspection and location of inspection and explosion doors (where applicable)
- identification of hazards and management of risks and maintenance problems
- fire-fighting equipment
- manufacturer recommendations and checklists
- relevant records and logs

Start-up includes:

- purge boiler furnace
- heat input
- warm-up reticulation system
- venting the boiler of air, where required
- steam traps and steam line purge system operations
- reticulation line pressure
- steam usage and supply

Maintenance includes:

- leaking steam pipe
- pressure gauge accuracy
- exposed electrical wiring
- defective illumination in the workplace
- leaking fuel pump gland
- leaks in high pressure feed line
- leaking gauge glass mounting
- leaking safety valve
- isolation procedures, hardware and equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Faults include one or more of the following:

- abnormal operating conditions
- boiler tube failure
- feedwater supply and/or other major auxiliary loss
- wet steam
- high dissolved oxygen
- pH of water
- high conductivity
- actuator or valve mechanical or electrical fault/failure
- instrument failure
- steam leak

Diagnosed includes one or more of the following:

- senses, including:
  - audio
  - smell
  - touch
  - visual
- remote or local indicators and recorders
- computers and alarms, including:
  - visible
  - audible

Operating log includes:

- date and time of checking
- each check, examination and results
- printed and signed name of person who performed the checks
- date and time of any lockout or equipment malfunction
- results of tests on boiler or feedwater
- changes in operation

Valves and fittings include one or more of the following:

- safety valves
- gauge glasses
- main steam stop valve
- feedwater stop valve
- feed check valve
- blowdown valve
- steam side/line drain valves
- flame failure detection device
- water level controller

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- boiler steam pressure gauge

Monitored includes:

- water supply system
- checks of steam reticulation line pressure
- usage and supply of steam
- quality of steam
- combustion/heat source system and management
- feedwater system
- fuel system
- combustion air supply
- water level
- boiler steam pressure
- boiler and steam manifold valves (where fitted)
- soot blowers (where fitted)
- operation of control/safety devices, including control panels

Tested includes one or more of the following:

- response checks
- standby plant 'cut in' tests
- valve operating checks
- hydrostatic tests
- performance tests
- alarm and protection tests

Tests include one or more of the following:

- pH levels
- conductivity
- oxygen
- TDS
- hardness
- other contaminants

Chemicals include one or more of the following:

- oxygen scavenger
- feedwater additives
- other chemicals
- hardness
- condensate chemicals
- pH buffers

Handover includes:

- previous load requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- maintenance issue, including equipment isolated for maintenance
- operational incidences
- read operating log
- general inspection of boiler to detect any defects
- accept responsibility of boiler
- noted equipment malfunctions
- required equipment tests

Emergencies include one or more of the following:

- tube failure
- loss of water level
- power failure
- inadequate housekeeping
- explosion
- fire
- bomb threat
- terrorism
- personal accidents
- chemical spills
- major steam leaks
- major water leaks and flooding
- natural disasters
- oil spills

Appropriate emergency response measures include one or more of the following:

- identification of emergency
- isolation of heat source
- selection and application of appropriate fire-fighting equipment and PPE
- notification of downstream users
- operation of boiler only when safe to do so
- notification of appropriate regulatory authorities, including Commonwealth, state, territory and boiler manufacturer

Shutdown includes:

- checks of water level
- cooling down process
- valve settings
- equipment isolation
- boiler pressure/vacuum
- fuel/heat source isolation in accordance with manufacturer recommendations

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- boiler post-purge

Storage mode includes:

- wet and dry storing
- open or closed position

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSABLIC001 Licence to operate a standard boiler.

Assessment Requirements for MSMBLIC001 Licence to operate a standard boiler

Modification History

Release 1. Supersedes and is equivalent to MSABLIC001 Licence to operate a standard boiler.

Performance Evidence

Evidence of competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include demonstration of:

- following work instructions, SOPs and safe work practices
- complying with Commonwealth, state and territory work health and safety (WHS) legislation and regulations
- complying with Australian and industry standards, organisation workplace standards, policies and relevant codes of practice requirements at all times
- planning and preparing for work, including identifying potential hazards and implementing appropriate risk control measures
- identifying the type of standard boiler
- reading and interpreting maintenance records, operating logs and safety data sheets (SDS)
- conducting the appropriate pre-start up checks, including identifying all maintenance requirements and visual faults
- using appropriate tools, equipment and PPE in accordance with procedures
- completing all maintenance and rectification requirements in accordance with manufacturers' and workplace procedures, including recording/reporting requirements
- completing the start-up procedures and bringing the boiler online
- monitoring the boiler, including conducting relevant tests and activities and adjusting boiler water quality in accordance with procedures
- interpreting boiler operation tables and figures
- communicating handover of boiler status to appropriate personnel
- demonstrating emergency operating procedures
- identifying all boiler energy sources required to be isolated and made safe for maintenance, inspection and repairs
- applying boiler cleaning and storage techniques.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of PPE
- Commonwealth, state and territory WHS/OHS legislation and approved codes of practice relevant to standard boiler operation

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Australian and industry standards relevant to standard boiler operation
- basic principles of heat transfer and thermodynamics in relation to boiler operations
- boiler steam equipment operating principles and operating methods
- types and characteristics of feedwater systems and treatment
- types and use of equipment and fittings for operation and maintenance of boilers
- function, purpose and operation of main steam stop valve
- boiler auxiliary equipment characteristics and capabilities
- essential fittings required where more than one boiler is installed (e.g. battery of boilers)
- processes for confirming operational status of a boiler
- workplace communication techniques and procedures
- responsibilities for checking and testing boilers
- location and inspection procedures and techniques for inspection and explosion doors
- steam and boiler hazards for cold start and handover
- hierarchy of risk control
- type and limitations of corrective action and/or adjustments that can be made in response to routine boiler operation problems and emergencies
- various harmful energy sources in boiler operation and the means to effectively isolate these energy sources and make them safe
- modes of boiler storage and procedures for storing boiler in open or closed condition
- SDS and safe chemical handling and storage methods for boiler operation and cleaning
- procedures for cleaning boilers internally and externally, as required
- procedures for recording, reporting and maintenance of workplace records and information.

Assessment Conditions

- Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessments must be conducted in the English language.
- Where possible, assessment of performance should be undertaken in the workplace and/or under realistic workplace conditions that typically reflect:
  - the use of full-scale equipment
  - performing tasks/activities within timelines that would be expected in a workplace
  - standard and authorised work practices, safety requirements and environmental constraints.
- Where this is not possible or where personal safety, plant operation or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Accredited assessors are responsible for ensuring that candidates have access to all tools, equipment, PPE, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

Application

This unit describes the skills and knowledge required to comply with environmental regulations, identify environment issues and minimise the risks of negative impact on work and carry out improvements in own work area.

This unit applies to operators and team members who are required to follow procedures to work in an environmentally sustainable manner.

This unit applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be contextualised for the industry sector, organisation and section.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements	Performance Criteria
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify current resource use and environmental issues	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Confirm current usage of resources
2. Comply with environmental regulations	2.1 Read and follow environmental policies and procedures to ensure compliance with federal, state/territory and local government laws, by-laws, regulations and mandated codes of practice, and codes and standards that the organisation applies voluntarily 2.2 Ask questions and seek clarification relating to environmental work requirements 2.3 Identify incidents, including breaches or potential breaches of environmental regulations and occurrences outside of standard procedures and report to appropriate personnel 2.4 Report environmental incidents using workplace forms and procedures
3. Seek opportunities to improve environmental practices and resource efficiency	3.1 Follow workplace procedures to improve environmental practices and resource efficiency 3.2 Make suggestions for improvements to environmental workplace practices and work plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release 2. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- followed environmental policies and identified potential breaches of environmental regulations and suggested improvements within the limit of own authority.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- environmental sustainability issues relevant to organisation
- resource use and impact of inefficiencies associated with own work role
- environmental and resource efficiency policies and procedures for own work role
- environmental regulations and guidelines and their impact on own work role
- the environmental issues, hazards and risks associated with own work role
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - environmental regulations, guidelines and procedures
  - workplace incident reporting procedures and forms.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

HSE

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	**Investigate current practices in relation to resource usage**	1.1	Identify environmental regulations applying to the enterprise
		1.2	Assess procedures for assessing compliance with environmental regulations
		1.3	Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required
		1.4	Measure and record current resource usage by members of the work group
		1.5	Analyse and record current purchasing strategies
		1.6	Analyse current work processes to access information and data, and assist in identifying areas for improvement
2	**Set targets for improvements**	2.1	Seek input from stakeholders, key personnel and specialists
		2.2	Access external sources of information and data as required
		2.3	Evaluate alternative solutions to workplace environmental issues
		2.4	Set efficiency targets
3	**Implement performance**	3.1	Source and use techniques/tools to assist in achieving targets

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	improvement strategies	3.2	Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management
		3.3	Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them
		3.4	Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate
		3.5	Implement costing strategies to fully value environmental assets
4	**Monitor performance**	4.1	Document outcomes and communicate reports on targets to key personnel and stakeholders
		4.2	Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance
		4.3	Set new targets and investigate and apply new tools and strategies
		4.4	Promote successful strategies and reward participants where possible

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
  - contribution to climate change and other macro threats that can arise from materials and work processes used
  - regulated environmental issues
  - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - will typically include the use of appropriate tools, equipment and documents

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMOPS101 Make measurements

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements

Application

This unit describes the skills and knowledge required to use physical and/or chemical measuring equipment to make or take routine measurements and keep records related to the measurements.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

This unit applies to all routine measurements within manufacturing and similar environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed and recorded at least 1 of the following workplace measurements:
  - extent
  - dimension
  - quantity
  - mass
  - capacity
  - capability
- responded to routine and non-routine measuring problems in accordance with organisation procedures
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic units of measurement, including
  - kilogram
  - metre
  - second
- types of measuring devices, including how, when and why they are used
- purpose of equipment calibration and methods of checking equipment is within calibration
- routine problems that may arise in the work environment and corrective action and reporting procedures appropriate to the problem cause.
-

MSMSUP102 Communicate in the workplace

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

Application

This unit describes the skills and knowledge required to receive, relay and record written and oral messages and to provide relevant information in response to requests within timelines.

This unit applies to personnel who are required to communicate clearly and accurately to record messages, seek clarification, access needed information, relay information to other people and complete workplace documentation.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- received, recorded and relayed messages, including:
  - listening attentively and asking questions to confirm understanding
- responded to at least one request for information in accordance with procedures, including:
  - using clear and concise language in both verbal and written communication
- completed workplace forms legibly and accurately

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information
- communication equipment
- organisation procedures, including:
  - telephone and communications protocols and/or procedures
  - documentation and record keeping
- types and meaning of workplace codes, numbers, symbols, signs and colours typically used in the work environment
- types, purpose and importance of workplace documentation
- workplace expectations for acceptable language and tone, including swearing, level of formality, courteousness and respect for diversity
- challenges in communicating with people from culturally and linguistically diverse (CALD) backgrounds in the workplace and possible strategies
- communication problems and corrective actions relevant to own role
-

MSMSUP106 Work in a team

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team.

Application

This unit describes the skills and knowledge required to organise own activities within a team to fit with work schedules and to meet operational guidelines.

This unit applies to team members who are required to use interpersonal and communication skills to plan, organise and complete their work activities according to instructions and with limited discretionary powers.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Assessment Requirements for MSMSUP106 Work in a team

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- participated in at least 1 work team to achieve allocated tasks
- used communication and interpersonal skills with:
  - team members
  - team leaders
  - supervisors.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisation procedures, including:
  - record keeping requirements
- own role in team and meeting team requirements and the role of other team members, team leaders and supervisors
- organisation work standards and how the team contributes to them
- interpersonal and communication techniques that promote effective teamwork including:
  - listening
  - questioning
  - paraphrasing
  - non-verbal communication
  - giving and receiving feedback.
  -

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

MSMSUP382 Provide coaching/mentoring in the workplace

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP382A Provide coaching/mentoring in the workplace.

Application

This unit describes the skills and knowledge required to establish and provide one-to-one coaching and/or mentoring in the workplace and evaluate its effectiveness.

This unit applies to senior operators, team leaders or personnel who have significant workplace experience and who are required to use interpersonal skills to provide coaching and mentoring within their area of expertise to assist an employee to identify and meet his/her development needs.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Release 1. Supersedes and is equivalent to MSAPMSUP382A Provide coaching/mentoring in the workplace.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- provided coaching or mentoring to at least 1 individual, including using interpersonal skills to:
  - build rapport, trust and respect with individual
  - facilitate identifying the individual's development goals
  - facilitate identifying solutions and actions
  - encourage and support the individual to develop towards the achievement of goals
  - assist the individual to make decisions about achieving goals
- evaluated outcomes of coaching process to ensure the individual is achieving goals.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of interpersonal skills and application to coaching and mentoring, including:
  - building rapport, trust and respect
  - verbal and non-verbal communications
  - questioning, listening and reflecting
  - self-disclosure
  - giving and accepting feedback
  - establishing a safe environment for open communication
- relevance and application of skills development techniques, including:
  - one-on-one training using explanation and demonstration
  - use of supporting materials in written, visual or other format
  - facilitation and guidance of self-directed learning
  - identifying needs and setting goals
- sources of information for self-directed learning, including:

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
  - specific, measurable, achievable, relevant, timed (SMART) objectives
  - resource requirements
  - methods for reaching objectives
  - timelines
  - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

Assessment Conditions

MSMWHS503 Maintain WHS management system

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS503A Maintain the workplace OHS management system

Application

This unit of competency covers the skills and knowledge required to maintain and improve an established work health and safety (WHS) management system.

The WHS management system will already have been developed by persons with the relevant specialist knowledge and skills.

This unit of competency applies to personnel with a specialised responsibility for maintaining the WHS management system. Depending on the organisation this might be an owner, manager, team leader, WHS officer/manager, a technician with particular WHS responsibilities, or someone in a similar role. The competency applies within the area of managerial responsibility, which may be an entire organisation or department of an organisation.

The work will be carried out with the support of other team members.

Management must be aware that, while employees have WHS responsibilities, line managers are ultimately responsible, under both WHS legislation and common law duty of care, for the safety of the workplace, including ensuring that employees comply with documented work procedures. This legislation includes general WHS legislation as well as that for hazardous substances, dangerous goods and major hazard sites.

No other licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Manage WHS information in the workplace	1.1	Take action to ensure that requirements for WHS record keeping and reporting are implemented according to workplace procedures and legislative requirements
		1.2	Access sources of WHS information and evaluate for application to the workplace
		1.3	Collect and collate data and information to provide information to managers and stakeholders on WHS requirements, trends and risk controls
2	Support implementation of WHS management system	2.1	Determine WHS priorities in consultation with appropriate managers and stakeholders
		2.2	Identify WHS training needs for implementation and maintenance of the WHS management system
		2.3	Develop action plans taking account of priorities and training needs
		2.4	Monitor achievement of action plans and update plans accordingly
3	Support WHS participative arrangements	3.1	Ensure WHS information and documentation is understandable and accessible to all
		3.2	Promptly address WHS issues that may arise within area of authority or refer to appropriate person
		3.3	Provide information about the outcomes of WHS consultation in a manner that is accessible to all
4	Collect data to evaluate currency of WHS	4.1	Identify, in consultation with stakeholders and, as required expert advisors, internal data and information that provides relevant and reliable information on the

	management system		performance of the WHS management system
		4.2	Conduct workplace inspections on a regular basis.
		4.3	Identify workplace WHS implications of any changes to legislation
		4.4	Identify any WHS implications to proposed changes to the workplace
		4.5	Take action to arrange a WHS management system audit
5	Analyse data and information to identify areas for improvement	5.1	Assess compliance of WHS management system with WHS legislation
		5.2	Analyse information collected to identify areas for improvement.
		5.3	Consult with stakeholders, key personnel and, as required, WHS advisors
		5.4	Document and communicate outcomes of analysis to key personnel and stakeholders in an easily understood format
		5.5	Recognise limits of own expertise and seek appropriate advice
6	Initiate and maintain improvements	6.1	Determine priorities for WHS in consultation with stakeholders
		6.2	Develop a WHS plan with responsibilities and timeframes and validate the plan with stakeholders
		6.3	Identify and source resources required for implementation of plan
		6.4	Monitor achievement against plan
		6.5	Monitor effectiveness of modifications to WHS management system on an ongoing basis incorporating feedback from stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

WHS records WHS records include one or more of the following:

- hazard and incident reports
- logs/logs sheets
- inspection/start-up/shutdown checklists
- injury reports
- maintenance records

WHS information sources WHS information sources include one or more of the following:

- WHS legislation, codes of practice and Australian and International standards
- WHS regulators
- Safe Work Australia Guides
- industry bodies
- internet sites, journals and newsletters
- manufacturer manuals
- material safety data sheets (MSDS) and registers
- organisation WHS policies and procedures
- internal risk assessments, job safety analyses (JSAs) and workplace inspections
- internal hazard and incident reports

Assessment Requirements for MSMWHS503 Maintain WHS management system

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS503A Maintain the workplace OHS management system

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to:

- communicate using appropriate style and format for a range of stakeholders to:
  - evaluate the WHS management system
  - provide information on the effectiveness of the WHS management system in minimising risk
  - identify, plan, implement and monitor improvements
  - convey WHS and other complex/technical information
  - consult and seek input/feedback
  - interact with the workforce to maintain the process that comprise the WHS management system
- analyse WHS data to identify areas for improvement
- create and manage documentation, including:
  - WHS records
  - minutes of meetings and consultations
  - workplace inspection checklists, audits and reports
- write clearly and unambiguously, including:
  - reports
  - policies and procedures
  - WHS information
- develop WHS management system improvement plans
- apply a quality improvement process to implement and monitor improvements
- identify WHS training needs.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to fulfil their job role, including:

- WHS responsibilities of employers, employees, supervisors and contractors, including duty of care responsibilities

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- regulatory requirements for WHS information and consultation and processes and arrangements to meet these obligations
- regulatory requirements for WHS record keeping and reporting
- regulatory requirements for training and licensing relevant to WHS
- elements of a WHS management system and principles and practices of effective WHS management and risk control
- barriers to implementation of WHS, including language and literacy, cultural diversity of workforce and workplace culture in relation to WHS
- sources and types if information that provide realistic information on the performance of the WHS management system
- techniques for analysing WHS data, including simple statistical analysis and graphing of trends
- types of internal and external change that may impact on WHS and WHS compliance
- audit and inspection processes.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS402010 Manage the impact of change on own work

Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Application

This unit of competency covers the skills and knowledge required by an individual to effectively manage the changes in their own work resulting from their organisation's implementation of competitive systems and practices.

This unit applies to an individual in an organisation implementing competitive systems and practices that affect the individual's own work. The unit includes the skills required to positively participate in ongoing and continuous change as it affects their work. The individual will be expected to deal with these changes as part of a team and to give feedback from their own perspective.

This unit requires the application of skills associated with problem solving, planning and organising and self-management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Examine the impact of change on own work practices**	1.1	Identify competitive systems and practices relevant to changes in own work.
		1.2	Examine changes to work flow.
		1.3	Examine changes to equipment/process/physical environment.
		1.4	Examine changes to work relationship with team members and other teams.
		1.5	Examine changes to data collection needs.
		1.6	Examine changed work for impacts on health, safety and environment (HSE).
		1.7	Examine changes to quality requirements.
		1.8	Identify any additional individual skill needs.
		1.9	Identify other areas requiring assistance.
2	**Implement change**	2.1	Review changes which may have an adverse impact with team leader.
		2.2	Adopt changes to individual work practice.
		2.3	Seek assistance in gathering/processing data, as required.
		2.4	Implement the data collection/processing and take actions on resulting information in accordance with procedures.
		2.5	Seek assistance/training to meet needs caused by change.
3	**Implement continuous improvement**	3.1	Critically examine all changes.
		3.2	Identify impacts of changes both up and down the immediate value stream.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

3.3 Identify areas for improvement.

3.4 Make recommendations for improvement in accordance with procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Impact of change	• elements being undertaken individually or as part of a team

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

may include one or more of:	• seeking assistance from team leaders for areas outside the employee's range of responsibility and authority.
Procedures (written, verbal, visual, computer based, etc.) include one or more of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Gathering and monitoring performance data include one or more of:	• manual gathering by individual employees through charts, tally sheets or keypad/board entry • automatic collection through software, such as SCADA software, ERP systems, MRP and proprietary systems.
Continuous improvement (kaizen) includes evaluation of one or more of:	• time required • resources used • resultant quality • other aspects relevant to the process.
Stages where value stream actions may occur include one or more of:	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Assessment Requirements for MSS402010 Manage the impact of change on own work

Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices used in their own workplace
- identify change and its impact on own work practices in relation to implementation of competitive systems and practices
- adopt change and seek any required assistance
- identify areas for improvement.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision:

- features of common competitive systems and practices in use in own workplace
- sources of data on the process/plant
- methods of determining own skill needs
- health, safety and environment (HSE) principles relevant to own job
- change implementation contacts and procedures
- employee assistance mechanisms within organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include evidence of responding to change in own workplace

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including, relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402031 Interpret product costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

Application

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to *MSS402082 Apply cost factors to work practices*, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify cost components deriving from customer benefit and other costs**	1.1	Identify customer features/benefits in product or process being undertaken.
		1.2	Identify cost components which deliver customer features/benefits and those which do not.
2	**Compare required performance of product or process steps with actual performance**	2.1	Identify performance required to meet customer needs in own work and that of team.
		2.2	Identify actual performance.
		2.3	Compare cost components of products or process with current customer-related targets.
		2.4	Separate costs components into those that contribute to customer features/benefits and those that do not.
		2.5	Determine non-contributing cost components which are under control of the individual or team.
3	**Minimise waste**	3.1	Recommend changes to eliminate or reduce waste.
		3.2	Adopt changes which minimises waste.
		3.3	Monitor effect of changes to ensure gains are made against customer features/benefits.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just In Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Customer features/ benefits include all of:

- characteristics of the product or service which the customer perceives as meeting their need
- characteristics of the product or service which the customer perceives as adding value
- financial or features items which the customer perceives and a benefit.

Performance includes all of:

- takt - the allowable time to produce one product at the rate and quality customers are demanding it
- the rate of output of the plant compared to the takt time.

Customer-related targets includes all of:

- internally set financial targets that contribute to meeting customer features/benefits
- operational targets that contribute to meeting customer features/benefits
- other targets that contribute to meeting customer features/benefits.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Contributing cost components include all of:	• costs that make a direct contribution to customer features/benefits. • costs that need to be incurred (although they may be minimised) in order to gain the customer feature/benefit.
Non-contributing cost components include all of:	• costs that do not contribute to customer features/benefits • costs that must be maintained, such as regulatory compliance costs which do not contribute to customer features and so should be minimised • costs that neither contribute to customer features/benefits nor must be maintained (muda) and so should be eliminated if possible.
Muda (waste) includes all of:	• any activity which does not contribute to customer or organisation benefit/features in the product • activities which do not yield any benefit to the organisation or any benefit to the organisation's customers • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items.

Assessment Requirements for MSS402031 Interpret product costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, on **one (1)** or more occasions to recommend muda reduction related to their workplace, and to:

- identify and distinguish between cost components leading to customer benefit or otherwise
- take steps to minimise muda in their workplace.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- contributions towards customer perceived benefit
- concepts of expense, income and capital
- fixed and variable cost components relevant to own work:
  - power/energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- relative impact of each of these
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402051 Apply quality standards

Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

Application

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.		demonstrate achievement of the element.	
1	**Assess own work**	1.1	Continuously check completed work against workplace standards relevant to the operation being undertaken.
		1.2	Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned.
		1.3	Identify and isolate faulty components, products or processes.
		1.4	Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures.
2	**Assess quality of received components, parts or materials**	2.1	Continuously measure/check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance.
		2.2	Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service.
		2.3	Identify and isolate faulty components, parts, materials or information that relate to the operator's work.
		2.4	Record and/or report faults and any identified causes in accordance with workplace procedures.
		2.5	Identify causes of any identified faults and take corrective action as specified in workplace procedures.
3	**Investigate causes of quality deviations**	3.1	Record information on quality and other indicators of process performance.
		3.2	Investigate and report causes of deviations from specified quality standards for components.
		3.3	Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Quality parameters include one or more of:

- finish
- size
- durability
- product or process variations
- materials

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- alignment
- colour
- damage and imperfections
- time
- is complete/contains all required information/data
- complies to template
- uses the correct styles and formats.

Quality checks include one or more of:

- visual inspection
- physical measurements
- chemical tests
- checks against patterns, templates, styles, formats and guides
- processing time.

Materials include one or more of:

- physical raw materials
- orders, forms and other documentation
- services required for undertaking an operation (e.g. power, water, compressed air and fuel).

Procedures (written, verbal, visual, computer based, etc) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Indicators of production performance include one or more of:

- number of items/production rate
- delays and causes of delays (where known)
- other information as specified in the procedures.

Data entry/recording includes one or more of:

- keyboard
- written (including ticks or signs)
- verbal.

Sources of information/ documents include one

- quality and Australian Standards and procedures
- work instructions, patterns, designs and recipes

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

or more of:	• organisation work procedures • manufacturer instructions for materials and equipment • organisational or external personnel • customer requirements.
Investigate and report requires following set procedures which include one or more of:	• verbal instructions • documented procedures • other quality procedures as implemented within an organisation or work environment.

Workplace context includes one or more of:	• work organisation procedures and practices relating to the manufacture and quality outcomes for products
	• conditions of service, legislation and industrial agreements, including:
	  • workplace agreements and awards
	  • federal or state/territory legislation
	  • standard work practice.

Reporting/communication includes one or more of:	• verbal and written communication in accordance with organisational policies and procedures • oral, written or visual communication, including simple data.
Being responsible for the maintenance of own work quality includes one or more of	• contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures • following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation.
Applicable regulations and legislation include one or more of	• work health and safety (WHS) legislation relevant to workplace activities • workers compensation legislation.

Unit Mapping Information

Assessment Requirements for MSS402051 Apply quality standards

Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more products/processes, to:

- check and measure relevant quality parameters
- interpret results of quality checks in terms of specifications, patterns and work standards
- take required action where standards of materials, component parts, final product or work processes are found to be unacceptable
- maintain accurate records.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- relevant measurement techniques and quality checking procedures
- reporting procedures.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of quality standards to own workplace

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402080 Undertake root cause analysis

Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Application

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA). This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

This unit applies to individuals working in an organisation that is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Recognise problems**	1.1	Identify features or occurrences indicative of a problem.
		1.2	Use appropriate tools, techniques and charts to define the problem.
2	**Implement quick fix**	2.1	Recommend a quick fix within the scope of competency and authority.
		2.2	Use technology or processes relevant to the problem to implement quick fix.
3	**Determine root cause**	3.1	Identify a range of possible causes.
		3.2	Gather data and other information to eliminate or confirm possible causes.
		3.3	Use available data and information to link causes and effects.
		3.4	Seek assistance to obtain additional information if problem is beyond own competency/authority.
		3.5	Identify root cause.
4	**Develop permanent solution**	4.1	Identify a range of methods to eliminate the root cause or break the cause tree.
		4.2	Select the most appropriate solution.
		4.3	Liaise with relevant people.
		4.4	Recommend or implement solution within the limits of competency and authority.
		4.5	Monitor impact of solution and make further recommendations, as required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Problems include one or more of:

- variation to normal plant or equipment operation
- unplanned or non-conforming process or operations outcomes
- out of specification products
- excess scrap
- accidents and emergencies
- regulatory breaches
- customer returns and complaints
- reduction or loss of sales.

Techniques/charts include one or more

- control charts
- Pareto charts

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

of:

- run charts
- flow charts
- cause and effect diagrams
- tree diagrams
- 5 Whys analysis
- organisation specified/mandated methods.

Assessment Requirements for MSS402080 Undertake root cause analysis

Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more problems, to:

- undertake problem identification
- use appropriate processes to achieve root cause identification
- recommend solutions and implementation procedures to problems within own area
- monitor implementation of solutions.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- methodology of root cause analysis, including:
  - difference between quick fix and root cause elimination
  - breaking of causal tree
- indicators of problems and variances to normal operation
- relevant analysis tools (e.g. Pareto charts, 5 Whys).

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include a root cause analysis in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSTCL1001 Produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTCL1001B Produce a simple garment

Application

This unit of competency covers the skills and knowledge to assemble garment components using a domestic machine and operation techniques.

The unit of competency applies to selecting fabrics, laying up pattern pieces, and cutting and assembling garments in a non-commercial environment.

This unit of competency is designed for particular application in a highly supervised environment and is suitable for selection in vocational education and training (VET) in schools programs or where access to volume production and commercial machines and processes are not an option.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to produce a simple garment**	2.1	Select pattern according to size and style required
		2.2	Select fabric to suit purpose and design of garment
		2.3	Determine sequencing of garment assembly operations according to pattern requirements
		2.4	Calculate fabric amount according to fabric width, pattern size and pattern requirements and document
		2.5	Prepare workstation, tools and equipment
3	**Prepare components**	3.1	Lay out pattern pieces and pin or tack to make best use of fabric length and to match fabric pattern, nap and weave
		3.2	Cut fabric according to seam allowances and pattern markings
		3.3	Check cut pattern pieces against garment requirements and fabric characteristics, and make any required corrections
		3.4	Lay out garment components according to sequence of assembly operations
4	**Assemble garment components**	4.1	Sew components according to workplace procedures, garment requirements and accepted quality standards
		4.2	Control machine speed and work handling for type of sewing operations, fabrics and garment complexity
		4.3	Check garment for correct fit and assembly quality
		4.4	Sew components according to workplace procedures,

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			garment requirements and accepted quality standards
5	**Complete work**	5.1	Complete any required hand sewing according to pattern requirements and accepted standards of sewing quality
		5.2	Inspect sewn garment, identify any faults and take appropriate action to ensure it meets quality standards and pattern requirements
		5.3	Press garment according to fabric requirements and garment construction details
		5.4	Record outcome

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE requirements
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Simple garment includes one or more of the following:	• accessories • straight seamed, draw string skirt • t-shirt • smock dress • headwear • other garments that require a small range of sewing techniques using domestic machines
Prepare workstation tools and equipment includes the following:	• setting up workbench and seating according to WHS practices • cleaning and checking machine to ensure correct operation • setting up and adjusting machine according to specifications • checking needles, attachments and parts • identifying, reporting and replacing worn needles or parts • regularly checking performance of machine for signs of faulty operation • taking required action according to defined procedures to address faults • identifying and preparing other equipment for production
Fabric includes one or more of the following:	• a range of fabric types, including cottons, woollens, synthetics, velvets, lace, stretch and single knits • single and multi-directional prints • interfacings and linings
Patterns include one or more of the following:	• commercially available patterns • stock patterns • individually drafted patterns
Pattern markings include:	• notches • darts
Components include one or more of the following:	• sleeves • waistbands (straight or shaped)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• collars • cuffs • plackets • facings (neck and armhole) • binds • zips (dress, skirt, trouser and invisible) • buttons and buttonholes • hems (double fold, rolled, blind and stitched hem)
Machines include the following:	• domestic sewing machine • overlocker
Set-up includes the following:	• correct thread, needle size and type, needle guard, tension setting and attachments
Other equipment includes one or more of the following:	• pins • scissors • needle and thread • marker or chalk
Sewing operations include:	• positioning, feeding and handling of work pieces involving contouring, stopping or handling skills required to accommodate fabric variations • gathering, easing and tucking
Hand sewing includes one or more of the following:	• attaching buttons and other closures • attaching embellishments, such as beading, trims and badges • hemming and overstitching • embroidery

Assessment Requirements for MSTCL1001 Produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTCL1001B Produce a simple garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- preparing workstation, materials, tools and equipment
- interpreting commercially produced patterns to select appropriate fabric length and type
- laying up pattern piece and pinning or tacking to make best use of fabric length and to match fabric pattern, nap and weave
- cutting fabric according to seam allowances and pattern markings
- operating domestic sewing or overlocking machines to sew components to produce at least two (2) simple garments, according to workplace procedures, garment requirements and accepted quality standards
- completing any required hand sewing according to pattern requirements and accepted standards of sewing quality
- inspecting sewn garment, identifying any faults and taking appropriate action to ensure it meets quality standards and pattern requirements
- pressing garment according to fabric requirements and garment construction details
- recording outcome.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- techniques in using and maintaining domestic sewing machine and overlocker
- commercial pattern instructions and markings
- characteristics of a range of fabrics, including lace, woven and knitted fabrics and threads, such as denim, single knits, tricot and gabardine
- quality standards and practices
- sizing requirements
- sequence of operations for garment assembly
- workplace procedures
- recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in producing a simple garment, at least to the level being assessed, with relevant industry knowledge and experience.
- Where possible assessment must occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2001 Use a sewing machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2001B Use a sewing machine

Application

This unit of competency covers the skills and knowledge required to use a sewing machine to align and sew work pieces.

The unit of competency applies to sewing techniques where the positioning of the work is controlled by guide bars, sensor lights or other such guiding devices, or where there is uncomplicated feeding of the fabric.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to use sewing machine**	2.1	Receive work pieces, check specification sheets and plan follow-up action
		2.2	Check that the bundle matches ticket information and that previous operations, such as pressing and cutting, have been successfully completed
		2.3	Lay out work pieces in sequence
		2.4	Set up workbench and seating according to workplace procedures
		2.5	Clean, check, set up and adjust machines according to specifications for work
		2.6	Identify poor machine performance and adjust as required
3	**Sew work pieces**	3.1	Sew pieces according to product requirements and quality standards
		3.2	Use machine according to requirements for speed of work
		3.3	Control machine speed and work handling according to type of operations, fabrics and product type
4	**Assess quality of sewn pieces**	4.1	Inspect sewn pieces against quality standards
		4.2	Identify any faults or pieces that do not meet quality standards and report
		4.3	Record results of quality inspection

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.4 Complete production records or packing slips as required

4.5 Direct work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include:

Automatic machines used to perform basic machining tasks where feeding and positioning of fabric is guided by the machine, including one or more of the following:

- plain lockstitch machine

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• three thread overlocker • zigzag sewing machine
Fabrics include one or more of the following	• stable woven and knitted fabrics, such as cotton drill, calico, double knit, rugby knit and poplin
Set-up includes the following:	• ensuring correct thread, needle size and type, needle guard, tension setting and attachments
Identify poor machine performance includes the following:	• identifying worn or damaged parts, and reporting or replacing according to manufacturer specifications • identifying tension faults • identifying poor thread performance or incorrect thread selection • identifying incorrect foot or needle for sewing • identifying impact of poor machine performance on sewing • checking and replacing worn or damaged needles and attachments (feet)
Sewing operations include the following:	• aligning and sewing straight seams • joining flat pieces of stable fabric together • top stitch, edge stitch, open seams, closed seams and lapped seams

Assessment Requirements for MSTCL2001 Use a sewing machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2001B Use a sewing machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- checking work against ticket information or specification sheets
- preparing workstation tools and equipment
- performing basic machining tasks where feeding and positioning of fabric is guided by the machine, using at least two (2) different fabrics, to sew at least one (1) sample of each of the following operations:
  - aligning and sewing straight seams
  - joining flat pieces of stable fabric together
  - top stitch, edge stitch, open seams, closed seams and lapped seams
- sewing and doing routine maintenance on at least one (1) of the following machines:
  - plain lockstitch machine
  - three thread overlocker
  - zigzag machine
- inspecting completed work to check quality and production output requirements, and identifying and correcting faults
- recording results of quality inspection and completing production records or packing slips as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- garment assembly processes and machines where the positioning of the work may be controlled by guide bars, sensor lights or other such guiding devices, or where there is uncomplicated feeding of the fabric
- techniques in using and maintaining one or more automatic machines:
  - plain lockstitch machine
  - three thread overlocker
  - zigzag machine

MSTCL2004 Sew components

Modification History

Release 1. Supersedes and is equivalent to LMTCL2004B Sew components

Application

This unit of competency covers the skills and knowledge required to undertake sewing to assemble and sew garment components or textile products using one or more machines for intermediate sewing operations. Operations include feeding and handling of work involving directional changes, contouring or critical stopping points or requiring feeding and handling skills because of fabric or material variation.

The unit of competency applies to sewing work using a machine such as a plain lockstitch sewing machine, a three, four or five thread overlocker, a blind hemming machine or a zigzag sewing machine.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2001 Use a sewing machine

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to sew components**	2.1	Prepare to use sewing machine
		2.2	Check needles, attachments and parts, and identify worn needles and parts, and report or replace, according to manufacturer instructions
		2.3	Receive work and check that the bundle matches ticket information and that previous operations have been successfully completed
3	**Sew components**	3.1	Complete required sewing operations to sew work pieces using machine according to specifications and workplace procedures
		3.2	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces
		3.3	Take required action to address poor performance
4	**Review and complete work**	4.1	Inspect sewn components or textile products, identify any faults, take appropriate action and check finished pieces against quality standards
		4.2	Record results of inspection of finished component
		4.3	Record action taken to either reject or correct faulty components

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.4	Record preventative action taken to avoid recurrence of defective pieces
4.5	Complete production records or packing slips
4.6	Direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • personal protective equipment (PPE) • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Prepare to use sewing machine	• receive work pieces, check specification sheets and plan follow-up action

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

includes the following:	• lay out work pieces in sequence • set up workbench and seating according to workplace procedures • clean, check, set up and adjust machines according to specifications for work • identify poor machine performance and adjust as required •
Sew work pieces includes the following:	• sew pieces according to product requirements and quality standards • use machine according to requirements for speed of work • control machine speed and work handling according to type of operations, fabrics and product type •
Fabrics include the following:	• woven and knitted fabrics, such as denim, single knits, tricot and gabardine
Components include one or more of the following:	• sleeves • waistbands (straight or shaped) • collars • cuffs • plackets • facings (neck and armhole) • binds • zips (dress, skirt, trouser and invisible) • buttons and buttonholes • pockets (cut away, patch and in seam)
Textile products include one or more of the following:	• finished textile products • components of textile products • faulty textile products
Machines include one or more of the following:	• plain lockstitch sewing machine • three, four or five thread overlocker • zigzag sewing machine • blind hemming machines
Set-up includes the following:	• correct thread • needle size and type: a variety of size and types, such as standard and ball point • needle guard

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• tension setting • attachments
Sewing operations include the following:	• sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points • sewing techniques involving the special handling skills required to accommodate fabric variations • gathering, easing, tucking and stitching curves • hems (double fold, rolled, blind and stitched hem) • darts and pleats

Assessment Requirements for MSTCL2004 Sew components

Modification History

Release 1. Supersedes and is equivalent to LMTCL2004B Sew components

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- demonstrating intermediate sewing techniques using one (1) or more fabrics to sew at least five (5) different garment or textile components
- completing at least five (5) examples of the following operations:
  - feeding and handling work involving directional changes, contouring or critical stopping points
  - feeding and handling skills required because of fabric or material variation
- sewing and doing routine maintenance on at least one (1) of the following machines:
  - three, four and five thread overlocker
  - zigzag machine
  - blind hemming machine
  - plain lockstitch sewing machine
- inspecting sewn components or textile products, identifying any faults, taking appropriate action and checking finished pieces against quality standards
- recording results of inspections to identify faulty components and preventative action
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- characteristics of woven and knitted fabrics, such as denim, single knits, tricot and gabardine
- range of components:
  - sleeves
  - waistbands (straight or shaped)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - collars
    - cuffs
    - plackets
    - facings (neck and armhole)
    - binds
    - zips (dress, skirt, trouser and invisible)
    - buttons and buttonholes
    - pockets (cut away, patch and in seam)
- work for sewing, such as:
    - pieces of material or fabric components
    - yarns and threads
    - finished textile products
    - components of textile products
    - faulty textile products
    - labels and tickets
    - finishing components and accessories
    - fusing or pressing station
- machine operation and maintenance
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in sewing components, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2005 Use specialised machinery or processes to assist TCF production

Modification History

Release 1. Supersedes:

- LMTCL2005B Use specialised machinery or processes to assist assembly production
- LMTTX2014B Use specialised machinery to assist textile production

Not equivalent

Application

This unit of competency covers the skills and knowledge required to use specialised machinery to assist in assembly production and completion of garments textiles and other textile products.

The unit of competency applies to the skills needed to operate production machinery which is not covered by other textile, clothing or footwear (TCF) production units, such as cutting, button holing, stud, fusing or gluing or backing machines, and others.

It does not include:

- materials handling equipment, such as forklifts
- machines for weaving, spinning, knitting, tufting, creeling, dyeing, packing, folding and finishing operations
- the set-up or maintenance of machinery where such tasks are normally performed by textile mechanics, fitters or electricians.

The unit of competency applies to work that may be repetitive and require a limited range of operations. Tasks may be pre-set and the operator must be able to work accurately to achieve required specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to use specialised machinery**	2.1	Prepare work area and check work against ticket information or workplace specifications
		2.2	Lay out work pieces or materials in sequence
		2.3	Prepare ancillary work according to workplace procedures and set up machine or process
		2.4	Prepare and adjust specialised machine according to the specifications for the work
		2.5	Report and record any problems
3	**Operate specialised**	3.1	Operate specialised machine to complete production tasks according to workplace procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	machine	3.2	Assess work to check it complies with quality standards and production specifications
		3.3	Check machine during production and adjust to ensure optimum performance
		3.4	Perform routine checks and carry out minor maintenance according to workplace procedures
4	**Complete work**	4.1	Assess production outputs to check work complies with quality standards, production specifications and workplace procedures
		4.2	Identify, report and record any machine or production faults
		4.3	Despatch completed items to next operation
		4.4	Report outcomes or complete documentation, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Prepare to use specialised machines includes the following:	• receive work pieces, check specification sheets and plan follow-up action • lay out work pieces in sequence • set up workbench and seating according to workplace procedures • perform routine minor maintenance according to manufacturer specifications • report and record any problems
Equipment includes one or more of the following:	• moulding machine • fusing machine • gluing machine • ticket or label printer • button holing machine • stud machine • fusing or gluing or backing machine • labelling machine • bevelling machine • cutting machine • cuff turner and fuser • pocket setting machine
Production tasks include one or more of the following:	• cutting • gluing • fusing • moulding • making tickets or labels • bundling cut work • placing tickets and labels with cut work • loading and unloading machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing operations
- checking work against job specifications and workplace standards
- operating one (1) or more specialised machines to assist textile, clothing and footwear (TCF) production on at least two (2) occasions
- applying machine operation techniques according to machine specifications and workplace requirements to complete work
- carrying out minor machine maintenance according to workplace procedures
- assessing production outputs to check work complies with quality standards and production specifications
- identifying, reporting and recording any machine or production faults
- applying workplace procedures
- providing oral or written reports according to workplace requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specialised machinery, such as:
  - moulding machine
  - fusing machine
  - gluing machine
  - ticket or label printer
  - button holing machine

MSTCL2006 Press work

Modification History

Release 1. Supersedes and is equivalent to LMTCL2006B Press work

Application

This unit of competency covers the skills and knowledge required to press work as part of the garment production process.

The unit of competency applies to pressing work where the position and handling of work are under the control of the operator and operator skills may contribute to the final appearance and finish of the work. The operator uses skills in positioning and shaping of the garment which makes a significant contribution to the final appearance of the garment.

Work to be pressed may include stable woven and knitted natural and synthetic fabrics.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

2	**Prepare to press work**	2.1	Set up work area according to workplace procedures
		2.2	Clean and check pressing equipment
		2.3	Perform routine minor maintenance
		2.4	Collect or receive work, check quality and determine any follow-up action
3	**Press work**	3.1	Lay out work in correct proximity and sequence
		3.2	Identify faults, spots and marks and take appropriate action
		3.3	Select and use appropriate attachments
		3.4	Sequence pressing
		3.5	Position work on pressing equipment according to product requirement
		3.6	Apply heat, steam, vacuum, pressure and time according to product requirements and fabric specifications
		3.7	Control equipment and work handling for variations in work type and construction and pressing requirements
		3.8	Position and shape the garment to contribute to the final appearance

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Despatch pressed work**	4.1	Inspect pressed work and compare against workplace pressing standards
		4.2	Record results of inspection and report and record subsequent action to either reject or correct faulty work
		4.3	Determine and record preventative action to avoid any recurrence of faulty work
		4.4	Pass pressed work to next operation, or hang or pack it and direct to required despatch area, despatch storage or packing sections

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are

MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL2007B Lay up, mark and cut uncomplicated fabrics and lays

Application

This unit of competency covers the skills and knowledge required to lay up, mark and cut uncomplicated fabrics and lays.

The unit of competency applies to situations where single garments or only a couple of layers of fabric are to be cut. The marker may be developed directly on the fabric lay or planned separately and applied.

Manual or computer-aided techniques may be used.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to cut fabrics and lays**	2.1	Set up working area
		2.2	Interpret lay-up instructions for uncomplicated articles
		2.3	Collect and check fabric
		2.4	Interpret cutting order for marking requirements, such as fabric type, width, quantity and garment sizes
3	**Draft and position lay marker**	3.1	Collect required pattern pieces and check manually or by computer
		3.2	Manipulate pattern pieces and position manually on paper or by computer for most efficient fabric use
		3.3	Draw up lay marker manually or by computer
		3.4	Prepare lay-up instructions according to requirements
		3.5	Check marker against requirements and copy marker either manually or digitally by computer, camera or smartphone
		3.6	Place marker on lay, check marker and lay alignment, and take appropriate action according to job specifications
4	**Cut lay and complete work**	4.1	Cut lay using cutting equipment according to operation requirements
		4.2	Monitor work quality and check for faults

Assessment Requirements for MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL2007B Lay up, mark and cut uncomplicated fabrics and lays

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or cutting order
- setting up manual or computer drafting equipment before commencement of marker-making operations
- making markers involving patterns, uncomplicated fabrics and lays, using manual or computer techniques on at least two (2) occasions
- preparing cutting table and work before commencing cutting operations
- using lay-up techniques
- using cutting techniques
- monitoring work quality and checking for faults
- directing cut work to next operation, cleaning work area and preparing for next job
- storing master copy of lay marker in filing drawer or computer as appropriate.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- set up of work area:
  - setting up workstation, cutting table and seating according to workplace procedures and specifications for work
  - cleaning cutting equipment, checking and assessing servicing according to manufacturer instructions
  - preparing cutting table to suit correct lay length
  - setting up lay-up and marking equipment and preparing for use
- characteristics of fabrics and other materials used in garment assembly, such as woven fabrics (poplin, drill, flannelette) and knitted fabrics (rugby knit, double knit)
- assessing fabric:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - checking fabric width and quality with lay-up instructions
  - laying-up fabric and adjusting fabric tension to match fabric performance
  - checking fabric for faults
  - taking required action to cut out faults or other appropriate techniques
- pattern identification
- computer operations involved in marker-making, copying and storage
- quality standards and practices:
  - inspecting cut work
  - identifying any faults
  - taking appropriate action to ensure cut pieces meet required quality standards
  - taking preventative action to avoid any recurrence of defective pieces
  - recording preventative action
  - regularly checking performance of cutting equipment for signs of faulty operation, including evidence from inspection of cut pieces, and taking any required action
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in laying up, marking and cutting uncomplicated fabrics and lays, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2008 Finish garment production

Modification History

Release 1. Supersedes and is equivalent to LMTCL2008B Finish garment production

Application

This unit of competency covers the skills and knowledge required to finish completed work in the production of garments or other associated articles.

The unit of competency applies to hand or machine tasks. Work performed may require some decision making within defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Assessment Requirements for MSTCL2008 Finish garment production

Modification History

Release 1. Supersedes and is equivalent to LMTCL2008B Finish garment production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing work area, materials and equipment, and specifications for sequence of operations
- checking garment or article against specifications to ensure correct sizing and attention to loose threads, and missing buttons and attachments on at least two (2) occasions
- attaching correct components to at least two (2) garments and articles
- completing finishing operations
- ensuring finished garment meets specifications
- identifying and reporting faults, and returning to appropriate section for repair according to quality standards
- completing production and other records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of typical fabrics and other materials used in garment production
- quality standards and practices
- correct sequencing of components
- required finishing procedures
- industry and product processes and equipment
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in finishing garment production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2009 Despatch work

Modification History

Release 1. Supersedes and is equivalent to LMTCL2009B Despatch work

Application

This unit of competency covers the skills and knowledge required to prepare finished works for despatch to customers or storage.

The unit of competency includes labelling and packing of items and completion of documentation.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare workstation**	2.1	Set up workbench and seating according to workplace procedures
		2.2	Lay out components in correct proximity and sequence according to specifications
3	**Package work**	3.1	Check garment or article against specifications to ensure item is correct and ready for despatch
		3.2	Attach tickets, labels and swing tags as required
		3.3	Perform boxing, packing, bagging, folding and hanging in accordance with environmental guidelines
		3.4	Identify faults, report and return to appropriate section for repair according to quality standards
4	**Despatch completed work**	4.1	Direct or transfer completed garments or articles to required storage or despatch area
		4.2	Complete production and other records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Components include one or more of the following:	• tags • swing tickets • labels • completed garments • packaging materials • coat hangers • tape • plastic clothes covers
Specifications include one or more of the following:	• construction specifications • quality standards • customer order • despatch documentation

MSTCL2010 Modify patterns to create basic styles

Modification History

Release 1. Supersedes and is equivalent to LMTCL2010B Modify patterns to create basic styles

Application

This unit of competency covers the skills and knowledge required to modify patterns to create basic styles.

The unit of competency applies to the modification of existing styled patterns to create new styles with minimal modification.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to modify patterns**	2.1	Identify pattern pieces, markings and required style modifications
		2.2	Check pattern components against pattern specification sheet
		2.3	Confirm garment requirements
		2.4	Identify fabric performance characteristics that may affect style modifications
		2.5	Select and prepare patternmaking tools and equipment
		2.6	Prepare basic sketch of required modification
3	**Modify and finalise pattern**	3.1	Apply basic patternmaking principles to make modifications on identified pattern pieces
		3.2	Cut modified pattern pieces and check for accuracy
		3.3	Label pattern pieces, including grain lines, notches and pattern information
		3.4	Prepare cutting instructions

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Style modifications include one or more of the following:

- changing neckline
- adding opening or closure
- lengthening or shortening
- adding flat seaming
- applying pockets and flaps

Modify pattern includes one or more of the following:

- appropriate seam allowance
- ease allowance
- notching
- pattern information (size, style number, cutting instructions and identity)
- darts
- drill holes
- grain line
- cutting line
- stitching line

Assessment Requirements for MSTCL2010 Modify patterns to create basic styles

Modification History

Release 1. Supersedes and is equivalent to LMTCL2010B Modify patterns to create basic styles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- identifying pattern pieces, markings and required style modifications, and checking pattern components against pattern specification
- drawing at least two (2) basic sketches of pattern modifications
- identifying, selecting and using appropriate tools and equipment for patternmaking
- identifying fabric requirements and characteristics
- using basic patternmaking principles to make modifications of relevant pattern pieces for at least two (2) different style patterns
- cutting out and labelling pattern pieces accurately with all required markings
- checking pattern pieces for accuracy
- preparing cutting instructions.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking and design terminology
- basic patternmaking principles:
  - dart manipulation
  - square blocking
- pattern specification:
  - number of pattern pieces
  - style details
  - fabric swatches
  - trade sketch
  - special pattern information

MSTCL2011 Draw and interpret a basic sketch

Modification History

Release 1. Supersedes and is equivalent to LMTCL2011B Draw and interpret a basic sketch

Application

This unit of competency covers the skills and knowledge required to draw and interpret a two-dimensional sketch of a garment, and to identify construction features.

The unit of competency applies to interpreting and drawing basic trade sketches used by patternmakers and designers. Basic sketches or working drawings are two-dimensional, accurate drawings and may be drawn freehand or with the use of measuring devices and templates.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to draw a basic sketch**	2.1	Prepare drawing tools, equipment and workstation
		2.2	Identify basic styles and pattern pieces
		2.3	Identify and follow specifications and use correct terminology to identify garment components
3	**Draw sketches**	3.1	Select appropriate template to draw a sketch and draw accurate lines as required to complete sketch of garment
		3.2	Complete freehand sketches to correctly represent pattern pieces of garment
		3.3	Identify and label relevant parts of sketch
4	**Interpret sketch and complete work**	4.1	Identify features of design from sketch
		4.2	Interpret specifications, where used, from sketch
		4.3	Check work against quality standards
		4.4	Carry out any changes or adjustments to sketch as required.
		4.5	Complete documentation relating to sketch according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Pattern pieces include one or more of the following:	• any components of the basic styles that need to be clarified, such as: • waistbands • pockets • skirt front and back • sleeves
Templates include one or more of the following:	• front and back full body view (ladies', men's and children's) • upper torso or lower torso • swimwear or lingerie
Lines on pattern include the following:	• straight • angled • curved • pointed • circled

Assessment Requirements for MSTCL2011 Draw and interpret a basic sketch

Modification History

Release 1. Supersedes and is equivalent to LMTCL2011B Draw and interpret a basic sketch

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standard
- preparing workstation, tools and equipment
- identifying basic styles, pattern pieces and components of identified garment
- using at least two (2) different appropriate templates to draw a sketch and draw accurate lines as required to complete sketch
- completing a freehand sketch to correctly represent required pattern pieces, garment or style
- identifying and labelling relevant parts of sketch
- showing accurate details of at least three (3) pattern pieces and garment construction
- applying quality criteria in completion of sketch
- conveying all necessary instructions/information by the appropriate use of notes on the sketch
- completing documentation relating to sketch according to workplace procedures.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of fabrics used for garment construction
- basic pattern styles:
  - straight and A-line skirt
  - shift dress
  - blouse
  - pants
  - trousers
- features of design:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - pattern pieces
    - construction requirements
    - garment style
- basic pattern shapes
- drawing tools and equipment:
    - A3 layout pad
    - pencils with HB leads
    - pencil sharpener
    - kneadable eraser
    - templates
- sequence of operations
- quality criteria:
    - proportion
    - perspective
    - symmetry and balance
    - fabric performance
    - detailing
    - neatness
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in drawing and interpreting a basic sketch, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2012 Organise and plan own work in a home-based production environment

Modification History

Release 1. Supersedes and is equivalent to LMTCL2012B Organise and plan own work in a home-based production environment

Application

This unit of competency covers the skills and knowledge required to organise and plan own work in a home-based production environment.

The unit of competency applies to machine operations, such as sewing, where responsibility is taken for collection and despatch, quality and timely production and documentation.

Work is conducted according to defined procedures in a home-based or outside a factory environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to organise home-based production**	2.1	Identify and contact relevant personnel in client organisation
		2.2	Confirm drop-off and pick-up arrangements with relevant personnel
		2.3	Identify timelines and work requirements, and confirm steps required to complete work with appropriate personnel
		2.4	Confirm and interpret quality requirements of client organisation and assess work according to agreed steps and quality criteria
		2.5	Check work against specifications and quality standards and take action to rectify work that is not according to requirements
3	**Set up home-based workplace**	3.1	Set up workbench and seating according to workplace procedures
		3.2	Clean, check, set up and adjust machines according to standard home-based work practices and all specifications
		3.3	Identify problems with machines and equipment and either fix or refer to maintenance personnel
		3.4	Establish home-based work record system according to standard home-based work practice and relevant industrial award.
		3.5	Keep records according to record system requirements.

Assessment Requirements for MSTCL2012 Organise and plan own work in a home-based production environment

Modification History

Release 1. Supersedes and is equivalent to LMTCL2012B Organise and plan own work in a home-based production environment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- clarifying and confirming drop-off and pick-up arrangements for work
- handling, receiving and assembling garments
- confirming and interpreting work specifications and quality requirements
- applying required quality procedures and required work steps
- organising home-based workplace and maintaining home-based machines and equipment
- establishing home-based work record system according to standard home-based work practice and relevant industrial award
- keeping records according to record system requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- garment assembly processes
- operating procedures for sewing machines
- relevant personnel and requirements of client organisation
- characteristics of typical fabrics, threads and other materials used in garment production
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- have vocational competency in organising and planning own work in a home-based environment, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2013 Block and shape headwear by machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2013B Block and shape headwear by machine

Application

This unit of competency covers the skills and knowledge required to perform blocking and shaping of headwear by machine.

The unit of competency applies to the production of headwear from specialist millinery foundation materials and standard textile products in a commercial environment where multiple units of styles are produced. It includes selecting the block where applicable.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to block headwear**	2.1	Interpret design specification and confirm blocking and shaping requirements
		2.2	Select materials required for design.
		2.3	Assemble selected materials in readiness for shaping hat
3	**Block headwear**	3.1	Select block, where necessary, to suit design and ensure correct application
		3.2	Prepare fibre/materials for blocking process
		3.3	Set up machine and equipment to meet requirements
		3.4	Process by steam
		3.5	Assess blocking using appropriate machine according to manufacturer specifications and workplace procedures
		3.6	Identify and rectify non-conforming outcomes
		3.7	Document process and outcomes according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machines include one or more of the following:

- hat blocking press
- cord
- steam applicator
- hot block
- hat stretcher
- cutting tools

Assessment Requirements for MSTCL2013 Block and shape headwear by machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2013B Block and shape headwear by machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting design specifications
- preparing and handling materials
- manipulating materials to produce required shapes for at least two (2) types of headwear
- using blocks according to specifications
- operating machines or equipment used in shaping headwear
- recognising and rectifying non-conforming outcomes
- documenting process and outcomes according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- textiles and millinery foundation materials and their composition, and the effects of temperature and steam
- the stretch quality of fabrics
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - have vocational competency in blocking and shaping headwear by machine, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2014 Access and use information resources for clothing production operations

Modification History

Release 1. Supersedes and is equivalent to LMTCL2017B Access and use information resources for clothing production operations

Application

This unit of competency covers the skills and knowledge required to access and use information resources for clothing production operations.

The unit of competency applies to the identifying and using relevant industry information that may be used to assist in carrying out clothing production work activities.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 **Identify and**	1.1 Identify information needs and confirm with appropriate

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	locate clothing production information resources		personnel
		1.2	Identify and locate workplace information resources to assist in clothing production operations
		1.3	Seek direction from appropriate personnel, where required, in locating and obtaining information
		1.4	Check currency and authenticity of information resources
2	**Access and interpret clothing production information**	2.1	Use a range of reading techniques and simple search techniques to locate relevant information
		2.2	Interpret symbols, codes, legends, abbreviations and clothing production terminology
		2.3	Interpret working drawings to guide work
		2.4	Read, interpret and follow information on work specifications, standard operating procedures (SOPs), work instructions and other reference material
		2.5	Seek assistance to explain or clarify information, as required
		2.6	Note information and summarise, if necessary, for subsequent use
3	**Use and store information resources**	3.1	Use information resources to assist and improve clothing production operations
		3.2	Apply information to own work activities
		3.3	Store relevant information resources appropriately
		3.4	Update and maintain documentation to ensure it is current and easy to access

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Information resources include one or more of the following:

- SOPs
- safety procedures
- job lists
- manufacturer manuals
- specifications
- patterns
- machine settings
- Australian and International Standards
- quality system documentation
- customer requirements
- workplace procedures and manuals
- industry manuals
- codes of practice
- awards
- legislation
- plans

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• diagrams • log books • working drawings • hard and soft copy • key personnel, supervisors, trainers and colleagues
Location of information resources includes one or more of the following:	• reference libraries • workplace storage areas • internet • database records • site supervisor • manager or other personnel
Working drawings include the following:	• trade drawings • accurate analytical drawings of garments that are detailed to show how the garment is constructed and finished • sketches used by designers and patternmakers to inform production - part of specification sheets

Assessment Requirements for MSTCL2014 Access and use information resources for clothing production operations

Modification History

Release 1. Supersedes and is equivalent to LMTCL2017B Access and use information resources for clothing production operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standard
- locating and accessing at least three (3) different sources of information relevant to clothing production
- accessing at least five (5) different information resources and applying the information to own work
- interpreting clothing production terminology, symbols, codes, legend, abbreviations and data relevant to work requirements for at least two (2) different clothing production operations
- interpreting at least two (2) working drawings to guide work
- reading, interpreting and following information on work specifications, SOPs, work instructions for at least two (2) garments
- applying skimming and scanning reading techniques to locate required information
- seeking assistance and making notes if required
- storing, updating and maintaining relevant information resources and documentation to ensure it is current and easy to access.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- information resources available in the workplace relevant to wok role
- range of formats that information can be presented
- organisation of information by classification and cataloguing systems
- simple search techniques:
  - using index, table of contents, numbering and classification systems
  - computer database search or look-up, questioning and cross referencing

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - basic techniques to identify relevant information, including skimming and scanning, and identifying key words/ideas
- own work role and activities
- operating procedures for production machines or processes
- expertise of key personnel
- location of information resources
- quality standards and practices
- reading techniques
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in accessing and using information resources for clothing production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2015 Finish headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2015B Finish headwear

Application

This unit of competency covers the skills and knowledge required to perform the tasks associated with finishing of headwear and related articles, and involves final inspection.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Finish techniques includes:

- brushing, steaming or pressing
- attaching elastic
- labelling
- adjusting the positioning of trims, as required

Labels include the following:

- care instructions
- client and/or manufacturer or enterprise information

Tools and equipment include one or more of the following:

- heat equipment
- steam equipment
- chemical adhesives

Final inspection includes one or more of the following:

- checking for potentially dangerous items, including:
  - wiring
  - pins
  - staples
  - flower/trim wires
  - dyes
  - hat elastic

Assessment Requirements for MSTCL2015 Finish headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2015B Finish headwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- applying finishing techniques, as required, on at least two (2) different forms of headwear
- identifying and selecting relevant labels and instructions
- carrying out inspection processes on different headwear products
- labelling, attaching elastic and finishing headwear to required standard
- operating machines and equipment required to finish headwear
- recognising non-conforming outcomes
- maintaining records of finished articles and any non-conformance.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- finishing processes and their application to different fabrics
- inspection and checking procedures
- quality standards and practices
- the importance of ventilation and lighting
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in finishing headwear, at least to the level being assessed, with relevant industry knowledge and experience.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2016 Trim headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2016B Trim headwear

Application

This unit of competency covers the skills and knowledge required to perform the tasks associated with trimming headwear.

The unit applies to multiple units of repetitive styles, such as sports caps, sun protective headwear, soft hats and adventure wear, sewn from textile products. It involves selecting or making simple trims.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to trim headwear**	2.1	Confirm requirements for trimming headwear and determine sequence for trimming
		2.2	Select appropriate materials to reflect requirements of design and quality
		2.3	Prepare materials by cutting, stiffening or shaping, as required, according to design requirements
3	**Trim headwear**	3.1	Form, sew, staple or glue trims in preparation for attachment to headwear
		3.2	Attach trim to hat, as required, to reflect design
		3.3	Check trimmed or finished article for safety, including potentially dangerous items
		3.4	Document process and outcomes according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSTCL2016 Trim headwear

Modification History

Release 1. Supersedes and is equivalent to LMTCL2016B Trim headwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- selecting appropriate materials to reflect requirements of design and quality
- preparing materials by cutting, stiffening or shaping, as required, according to design requirements
- attaching and positioning trims to produce the required outcome on at least two (2) types of headwear
- applying quality requirements
- operating machines or equipment according to work health and safety (WHS) requirements
- checking trims for safety, including potentially dangerous items
- documenting process and outcomes according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- trims, including fabric types, variety, their application and attachment methods
- inspection and checking procedures
- quality standards and practices
- importance of ventilation and lighting
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- have vocational competency in trimming headwear, at least to the level being assessed, with relevant industry knowledge and experience.

MSTCL2017 Press work for production support

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to press components as part of the garment production process.

The unit applies to pressing work to provide support to production operations. Pressing requires limited operator control of equipment and performance of basic and intermediate tasks that are routine. Positioning of fabric is uncomplicated and operations involve a limited range of fabrics and standard adjustments to equipment.

Work to be pressed may include stable woven and knitted natural and synthetic fabrics. Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • personal protective equipment (PPE) • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Fabric range includes one or more of the following:	• woven cottons • denim • cotton drill • calico • polyesters • interfacings • trims and attachments
Preparations for pressing includes the following:	• checking that water reservoirs are filled to the designated levels in relevant equipment • checking condition of electrical cords

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- cleaning contact surfaces of steaming and pressing equipment
- filling steam equipment with distilled water
- setting thermostats at appropriate temperature
- checking equipment operational procedures

Pressing equipment includes two or more of the following:

- irons
- presses
- industrial steam irons
- suction boards
- sleeve board
- sleeve roll

Routine minor maintenance includes one or more of the following:

- washing out or replacing cover and padding
- shaking out rubber mat
- brushing and air blowing wire mesh
- applying sole-cleaning compounds to hand irons

Report faulty work includes one or more of the following:

- written records
- shown by the attachment of a ticket
- oral or written reports

Assessment Requirements for MSTCL2017 Press work for production support

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or pressing instructions
- preparing pressing equipment and work before commencing pressing operations
- using at least two (2) types of pressing equipment and applying pressing techniques for garment components on at least two (2) occasions
- inspecting pressed work and comparing against workplace pressing standards
- reporting faulty work and taking follow up action to avoid any recurrence of faulty work, according to workplace procedures
- forwarding pressed work to next operation according to workplace requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- pressing requirements and characteristics of typical fabrics and other materials used in garment assembly
- pressing equipment, such as:
  - irons
  - presses
  - industrial steam irons
  - suction boards
  - sleeve board
  - sleeve roll
- quality standards and practices
- workplace practices
- recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in pressing work, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2018 Perform bundling, ticketing and labelling in TCF operations

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to uncomplicated bundle cut work, make tickets and labels and place tickets and labels on the cut work in production support role according to workplace procedures.

This unit of competency applies to bundling, ticketing and labelling operations in the textile, clothing and footwear (TCF) sector. Work is conducted according to defined procedures to meet workplace requirements.

Work may be conducted in a variety of environments, including operational workplace activities, restricted space and hazardous, controlled or exposed conditions.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

4.5 Complete workplace records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Ticketing and labelling includes the following:

- bundling
- making of tickets
- making of labels
- placing of tickets on cut work
- placing of labels on cut work

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Equipment and tools include:	• ticket and labelling printing machine
	• one or more of:
	  • hand tools
	  • pallet truck
	  • hand trolleys

Assessment Requirements for MSTCL2018 Perform bundling, ticketing and labelling in TCF operations

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting and applying established workplace procedures
- checking and sorting component parts
- bundling work on at least two (2) occasions according to specifications
- using a ticket labelling machine on at least two (2) occasions in accordance with workplace procedures
- entering information accurately
- detecting errors in labels and tickets
- placing tickets and bundles accurately
- communicating appropriately with relevant personnel to deal with damaged or inferior products and resolve problems
- completing relevant documentation.
- carrying out work to defined procedures in a production support work roles
- making of tickets labels, and the placing of the tickets and labels on cut work, that requires the use of discretion, initiative and judgement within the defined procedures

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- procedures and requirements for bundling, ticketing and labelling
- manual handling techniques
- operation of ticketing and labelling equipment
- quality standards and practices
- work health and safety (WHS) practices, including hazard identification and control measures
- workplace procedures
- recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in performing bundling, ticketing and labelling tasks to support TCF production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2019 Sew components, complex tasks

Modification History

Release 1. New Unit

Application

This unit of competency covers the skills and knowledge required to perform complex tasks to align and sew the sections of a garment because of the complexity of combining parts, or because of frequent variation in fabrics and materials.

This unit of competency covers the skills and knowledge required to assemble or sew components in situations that involve the use of either single industrial machines for advanced fabric manipulations and demonstrated shaping of the end product, or the operation of three or more different industrial machine types, that require feeding and handling skills, directional changes, and contouring as well as critical stopping points.

Machine types may include a plain lockstitch sewing machine, a three, four or five thread overlocker, a blind hemming machine or a zigzag sewing machine.

Work is conducted according to defined procedures and requires discretion, initiative and judgement.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to perform complex tasks**	2.1	Prepare to use sewing machines
		2.2	Check needles, attachments and parts and identify worn needles and parts and report or replace, according to manufacturer instructions
		2.3	Receive work and check that the bundle matches ticket information and that that previous operations have been successfully completed
3	**Perform complex sewing tasks**	3.1	Sew complex work pieces or manipulate fabric to ensure correct shaping of the end result, using machine according to workplace procedures
		3.2	Perform complex sewing operations demonstrating different operations or for advanced fabric manipulation
		3.3	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces
		3.4	Take required action to address poor performance

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Review and complete work**	4.1	Inspect sewn complex work, identify any faults, take appropriate action and check finished pieces against quality standards
		4.2	Record results of inspection of finished component
		4.3	Record action taken to either reject or correct faulty components
		4.4	Record preventative action taken to avoid recurrence of defective pieces
		4.5	Complete production records or packing slips
		4.6	Direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Prepare to use sewing machine includes the following:	• receive work pieces, check specification sheets and plan follow-up action • lay out work pieces in sequence • set up workbench and seating according to workplace procedures • clean, check, set up and adjust machines according to specifications for work • identify poor machine performance and adjust as required •
Sew work pieces includes the following:	• sew pieces according to product requirements and quality standards • use machine according to requirements for speed of work • control machine speed and work handling according to type of operations, fabrics and product type •
Fabrics include one or more of the following:	• woven and knitted fabrics, such as denim, single knits, tricot and gabardine
Components include one or more of the following:	• sleeves • waistbands (straight or shaped) • collars • cuffs • plackets • facings (neck and armhole) • binds • zips (dress, skirt, trouser and invisible) • buttons and buttonholes • pockets (cut away, patch and in seam)
Industrial machines include one or more of the following:	• plain lockstitch sewing machine • three, four or five thread overlocker • zigzag sewing machine • blind hemming machines • buttonholers • pocket and collaring machines

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• elasticators • binders
Set-up includes the following:	• correct thread • needle size and type: a variety of size and types such as standard, ball point • needle guard • tension setting • attachments
Complex sewing operations include following:	• Manipulation of various components to deal with frequent variation of fabrics and materials to ensure correct shaping of end result • Sewing techniques needed to address fabric variations as well as awkward positioning, feeding and handling which require contouring or stopping points sewing stretch knit fabric to non-stretch fabric
Complex tasks include one or more of the following:	• lycra sportswear with panels • gathering, easing, tucking and stitching curves • hems (double fold, rolled, blind and stitched hem) • darts and pleats

Assessment Requirements for MSTCL2019 Sew components, complex tasks

Modification History

Release 1. New Unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- demonstrating techniques to complete complex sewing operations on at least five (5) occasions which involve
  - performing a sequence of different operations on a single sewing machine or on multiple machines to complete the majority of a complex task
  - exercising fabric manipulation skills to handle and align sections and ensure correct shaping of the end result, because of fabric variations or complexity of combining parts
- inspecting sewn components, identifying any faults, taking appropriate action and checking finished pieces against quality standards
- recording results of inspections to identify faulty components and preventative action
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards
- characteristics of woven and knitted fabrics such as denim, single knits, tricot, gabardine
- techniques to use a single sewing machine to align and sew work pieces
- range of components:
  - sleeves
  - waistbands (straight or shaped)
  - collars
  - cuffs
  - plackets
  - facings (neck and armhole)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - binds
    - zips (dress, skirt, trouser and invisible)
    - buttons and buttonholes
    - pockets (cut away, patch and in seam)
- machine operation and maintenance, such as:
    - plain lockstitch sewing machine
    - three, four or five thread overlocker
    - zigzag sewing machine
    - blind hemming machines
    - buttonholers
    - pocket and collaring machines
    - elasticators and binders
- handling frequent variations in fabrics
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in sewing components, complex tasks, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL2020 Lay up and mark uncomplicated fabrics and lays

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to lay up and mark uncomplicated fabrics and lays.

The unit of competency applies to production support roles or situations where single garments or only a couple of layers of fabric are to be cut.

Manual or computer-aided techniques may be used.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for lay-up**	2.1	Set up working area
		2.2	Interpret lay-up instructions for uncomplicated articles
		2.3	Collect and check fabric
		2.4	Interpret cutting order for marking requirements, such as fabric type, width, quantity and garment sizes
3	**Perform lay-up**	3.1	Collect required pattern pieces and check manually or by computer
		3.2	Manipulate pattern pieces and position manually on paper or by computer for most efficient fabric use
		3.3	Draw up lay marker manually or by computer
		3.4	Prepare lay-up instructions according to requirements
		3.5	Check marker against requirements and copy marker either manually or by computer
4	**Finalise work**	4.1	Direct work to next operation, according to workplace procedures
		4.2	Clean work area and prepare for next job

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • personal protective equipment (PPE) • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Uncomplicated articles include one or more of the following:	• t-shirts • straight or A-line skirts • shift dresses • section crowns • brims • tips • side bands • berets
Lay-up and marking equipment includes one or more of the following:	• computers and required software • patterns • fabric • marker card or paper • weights • clamps

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Set up working area includes the following:	• setting up workstation, according to workplace procedures and specifications for work • cleaning cutting equipment, checking and assessing servicing according to manufacturer instructions • preparing cutting table to suit correct lay length • setting up lay-up and marking equipment and preparing for use
Check fabric includes the following:	• checking fabric width and quality with lay-up instructions • laying-up fabric and adjusting fabric tension to match fabric performance • checking fabric for faults • taking required action to cut out faults according to workplace procedures or other appropriate techniques
Monitor work quality includes the following:	• inspecting cut work • identifying any faults • taking appropriate action to ensure cut pieces meet required quality standards • taking preventative action to avoid any recurrence of defective pieces • recording preventative action

MSTCL3001 Identify fabric performance and handling requirements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3001B Identify fabric performance and handling requirements

Application

This unit of competency covers the skills and knowledge required to identify fabric performance and handling requirements.

The unit of competency applies to fabrics used to produce garments and accessories and includes sourcing information from reference material and industry specialists, as well as conducting simple tests to identify fabric types and properties. Identification methods and tests covered by this unit are those where the procedure has already been determined and the range of outcomes established.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Fabric types include the following:	• natural and synthetic single yarn fabrics and blends • knitted fabrics, including weft knits and warp knits • woven fabrics, including plain, twill, satin, dobby, jacquard and pile • non-woven fabrics, such as felts, nets, braids, bonded and composite • emerging smart fabrics
Performance characteristics include one or more of the following:	• stretch • abrasion • wearability • absorbency

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- durability
- elasticity
- heat sensitivity
- shrink resistance
- ease of care
- drape quality
- colour fastness
- strength

Performance testing includes five or more of the following:

- light
- heat
- chemical reaction
- absorbency
- abrasion
- pill
- wash
- fabric finish

Finishes includes four or more of the following:

- crease resistance
- fire retardency
- waterproofing or water resistance
- colouration for structural or applied design such as printing or dyeing
- surface finishes for aesthetics, stability or serviceability
- interlacing and interloping

Handling fabrics includes one or more of the following:

- cutting
- dyeing
- printing
- pressing
- lining
- assembling
- sewing
- packaging and storage

Implications for production include one or more of the following:

- sewing requirements such as needle size and type, machine type, thread type
- binding, joining, fusing requirements
- lining, reinforcement
- seam types

Assessment Requirements for MSTCL3001 Identify fabric performance and handling requirements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3001B Identify fabric performance and handling requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- locating and interpreting information in Australian Standard AS/NZ 1957:1998 Textiles – Care labelling
- using a range of identification methods to identify key performance characteristics of at least two (2) different examples of each identified fabric type (at least ten (10) fabrics)
- conducting and keeping record of a broad range of performance tests on a variety of fabrics, including at least five (5) different performance tests on five (5) fabric types
- identifying fabric quality of at least ten (10) different fabrics using established quality indicators
- preparing a table to summarise performance characteristics, common problems and faults, appropriate uses, care requirements in handling products, and implications for production, of at least ten (10) different fabrics
- collecting at least two (2) fabric samples to demonstrate at least four (4) different finishes, identifying their application and implications for handling
- identifying care, cleaning and labelling requirements of a sample of at least ten (10) different fabrics or products, to comply with Australian Standards
- recording outcomes according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- fibre identification:
  - natural fibres, such as cotton, wool, silk, linen
  - man-made, such as rayon and acetate
  - synthetic, such as nylon and polyester
- fabric identification methods:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - identifying physical properties and features and other characteristics determined by clients or markets
    - checking of specifications and manuals
    - consultation with specialists
    - visual inspection
    - tactile analysis
    - acetone
    - burn test
- performance characteristics
- performance testing
- care and cleaning requirements:
    - dry cleaning
    - hand washing
    - washing
    - drying
    - ironing
    - special requirements (e.g. hanging)
    - bleaching
- quality indicators:
    - straight grain
    - even or uneven weave
    - slippage
    - length of fibres
    - pilling
    - even print or dye colour
    - print alignment or sizing
    - fabric resilience
    - workability
    - wash testing
- fabric finishes
- information resources on fibres and fabrics
- workplace procedures
- recording and reporting practices.
-

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - have vocational competency in identifying fabric performance and handling, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3002 Prepare and produce a complex whole garment from specifications

Modification History

Release 3. Supersedes and is equivalent to MSTCL3002 Prepare and produce a complex whole garment from specifications (Relase 2)

Prerequisite - MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry **superceded by** MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Release 2. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3002B Prepare and produce sewn garment.

Application

This unit of competency covers the skills and knowledge required to prepare, align and sew a complex whole garment.

The unit of competency applies to sample machining involving all operations in the assembly of a garment from written specifications.

Work may be self-directed and unsupervised and may include carrying out a work plan to specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to construct complex garment**	2.1	Identify garment requirements from production specifications
		2.2	Determine machining requirements and develop plan for garment construction
		2.3	Check and lay out work pieces in sequence according to construction plan
		2.4	Prepare workstation, machines and equipment
3	**Sew complex garment**	3.1	Sew complex garment according to product requirements, quality standards and required operations
		3.2	Perform operations to produce whole garment according to workplace procedures
		3.3	Control machine speed and work handling for type of operations, fabrics and product type according to workplace procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		3.4	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces, and take required action
4	**Complete work**	4.1	Inspect and check garment against quality standards, identify any faults and take appropriate action
		4.2	Record results of inspection and action taken to either reject or correct faulty garment
		4.3	Record preventative action taken to avoid any recurrence of defective garment
		4.4	Complete manual or digital production records or packing slips
		4.5	Direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • personal protective equipment (PPE) • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Garment requirements include one or more of the following:	• work pieces, accessories and trims • pattern • production or delivery time requirements
Prepare workstation, machines and equipment includes the following:	• setting up workbench and seating according to ohs practices • cleaning and checking machines • maintaining records • setting up and adjusting machines according to specifications for work • checking needles, attachments and parts • identifying, reporting or replacing worn needles and parts according to manufacturer instructions
Garment includes one or more of the following:	• any complex whole garment that includes multiple pieces, such as sleeves, collars and trims, and which is made to production specifications (for example shirts, trousers, dresses, unstructured jackets, stretch knits, skirts, bras and swimwear)
Machines include one or more of the following:	• plain lockstitch sewing machine • a three, four or five thread overlocker • a zigzag sewing machine • blind hemmers • buttonholers • pocket and collaring machines • elasticators • binders
Set-up includes one or more of the following:	• correct thread • needle size and length • needle guard

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- tension setting
- attachments

Operations include the following:

- sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points
- special handling skills required to accommodate fabric variations
- production of whole garment from specifications or patterns
- sample machining
- all operations required to complete whole garment construction

Unit Mapping Information

Release 3. Supersedes and is equivalent to MSTCL3002 Prepare and produce a complex whole garment from specifications (Relase 2)

Release 2. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3002B Prepare and produce sewn garment.

Assessment Requirements for MSTCL3002 Prepare and produce a complex whole garment from specifications

Modification History

Release 3. Supersedes and is equivalent to MSTCL3002 Prepare and produce a complex whole garment from specifications (Relase 2)

Prerequisite - MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry **superceded by** MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Release 2. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3002B Prepare and produce sewn garment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- performing a range of sewing operations, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, and where special handling skills are required to accommodate fabric variations
- completing all operations to sew at least two (2) complex whole garments that include multiple pieces, such as sleeves, collars and trims, bras or swimwear, according to garment requirements, quality standards and required operations
- applying the range of sewing techniques required for complex garment operations to construct a whole garment
- providing routine checks and maintenance of machines
- controlling machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
- inspecting sewn garment, identifying any faults, taking appropriate action and checking finished work against quality standards
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian standards

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- production machine operation and maintenance, such as:
  - plain lockstitch sewing machine
  - three, four or five thread overlocker
  - zigzag sewing machine
  - blind hemming machines
  - buttonholers
  - pocket and collaring machines
  - elasticators
  - binders
- characteristics of a variety of fabrics, threads and other materials used in garment assembly
- range of sewing techniques required to construct complex whole garment
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in sewing garments, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3003 Perform garment repairs and alterations

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3003B Perform garment repairs and alterations

Application

This unit of competency covers the skills and knowledge required to repair and alter finished garments based on client needs.

The unit of competency applies to repairing garments that have been damaged, either during the production process or during normal wear. It also applies to the alteration of garments following production, where they do not fit an individual.

Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for repairs and alterations**	2.1	Identify type of garment damage or alteration required
		2.2	Determine repair or alteration work requirements, take measurements and develop plan
		2.3	Lay out work in sequence according to repair or alteration plan
		2.4	Prepare workstation, machines and equipment
3	**Sew minor alterations or repairs by machine or hand**	3.1	Repair or alter product according to product requirements, quality standards and required operations
		3.2	Control machine speed and work handling for type of operations, fabrics and product type, and workplace procedures
		3.3	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces, and take required action
4	**Complete work**	4.1	Inspect product and check against quality standards, identify any faults and take appropriate action
		4.2	Record results of inspection of finished product and complete client records

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.3 Direct completed work to finish section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Repair process includes:	• planning the deconstruction of the garment so the repair can be achieved
Alterations include one or more of the following:	• hems • letting out, or taking in, seams for fit • reshaping garment with dart and seams

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Measurements include one or more of the following:	• depth of hem take-up or let-down • sleeve length • waist, bust or hip measurement
Repair equipment includes one or more of the following:	• blind hemmers • buttonholers • elasticators • binders • plain lockstitch sewing machine • three, four or five thread overlocker • zigzag sewing machine • needles • darning tools
Set-up includes one or more of the following:	• correct thread • needle size and length • needle guard • tension setting • attachments
Operations include the following:	• sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points • the special handling skills required to accommodate fabric variations • all operations required to complete repair and alteration in construction

Unit Mapping Information

Assessment Requirements for MSTCL3003 Perform garment repairs and alterations

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected – MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3003B Perform garment repairs and alterations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- planning process for repairs or alterations to occur
- checking work pieces against specifications for repairs or alterations
- preparing workstation and work before commencing sewing operations
- repairing or altering at least four (4) products according to product requirements, quality standards and required operations
- applying range of sewing techniques as required to repair or alter products
- operating and monitoring equipment required for repairs and alterations to identify faulty operation
- inspecting product and checking against quality standards, identifying any faults and taking appropriate action
- recording results of inspection of finished product and completing client records
- directing completed work to finish section.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- techniques in using and maintaining production machines
- hand sewing techniques
- characteristics of fabrics, threads and other materials used in garments
- repair requirements, such as:
  - replacing zips, buttons or other fasteners by hand or machine
  - reinserting or attaching elastic
  - darning holes by hand or machine

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- garment damage:
  - holes, tears or rips
  - broken zips
  - worn elastic
  - broken seams or hems
  - lost buttons, hooks and eyes
- preparing workstation and work before commencing sewing operations:
  - setting up workbench and seating according to work health and safety (WHS) practices
  - cleaning and checking machines
  - maintaining records
  - setting up and adjusting machines according to specifications for work
  - checking needles, attachments and parts
  - identifying, reporting or replacing worn needles and parts according to manufacturer
- quality standards and practices
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in performing garment repairs and alterations, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3004 Press whole garments

Modification History

Release 1.1. Correction of typographical errors in Application of the unit.

Release 1. Supersedes and is equivalent to LMTCL3004B Press whole garments

Application

This unit of competency covers the skills and knowledge required to press whole garments.

The unit of competency applies to pressing of whole garments, which may include many components, complex seams and fabrics. Operator skills may contribute to the final appearance and finish of the work. Fabrics could include wool suiting, satin, velvet, chiffon, silks, linen, and lace.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

MSTCL3005 Lay up and cut complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3005B Lay up and cut complicated fabrics and lays

Application

The unit of competency covers the skills and knowledge required to lay up fabric and cut work as part of the garment production process in situations involving complex patterns and a variety of fabrics and lays.

It applies to situations where multiple garments and layers of fabric are to be laid up and cut according to a marker, and may include two-way markers and step layers.

Work involves discretion, initiative and judgement within defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Competency Field

Clothing production

Unit Sector

Not applicable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to cut complicated fabrics and lays**	2.1	Set up working area
		2.2	Interpret lay-up instructions for complicated articles
		2.3	Collect and check fabric
		2.4	Check lay height and position of fabric according to cutting equipment and work specifications
		2.5	Use layering with calico or paper for delicate or difficult-to-manage fabrics to assist lay-up according to job card and workplace practices
3	**Cut work**	3.1	Use cutting equipment according to requirements for operation
		3.2	Inspect cut work, identify any faults and take appropriate action to avoid fault or join pieces to ensure cut pieces meet required quality standards
		3.3	Take and record preventative action to avoid any recurrence of defective pieces
		3.4	Regularly check performance of cutting equipment for signs of faulty operation, including evidence from inspection of cut pieces
		3.5	Perform routine maintenance, including changing blades and drill bits, on cutting equipment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Complete work**	4.1	Bundle work according to job card
		4.2	Direct cut work to next operation and clean work area and prepare for next job
		4.3	Store master copy of lay marker in filing drawer or computer, according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • personal protective equipment (PPE) • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Check fabric includes the following:	• checking fabric width and quality with lay-up instructions • laying-up fabric and adjusting fabric tension to match fabric performance • checking fabric for faults • taking required action to cut out faults or other appropriate techniques
Lay-up instructions include one or more of the following:	• job cards • cutting orders • customer order breakdown • marker
Bundled includes one or more of the following:	• by fabric shade • whole garments • same pattern pieces • with notions (e.g. threads)

Assessment Requirements for MSTCL3005 Lay up and cut complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3005B Lay up and cut complicated fabrics and lays

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, lay-up instructions
- applying relevant standards
- preparing cutting table and work before commencing operations
- using appropriate lay-up and cutting techniques to match pattern pieces and fabric
- using cutting equipment safely and according to manufacturer guidelines
- cutting a variety of complicated pattern pieces for at least two (2) garments
- inspecting cut work to identify any faults and taking appropriate action to ensure cut pieces meet required quality standards
- inspecting equipment and performing routine maintenance
- directing cut work to next operation, cleaning work area and preparing for next job
- storing master copy of lay marker in filing drawer or computer according to workplace procedures.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- safety and environmental aspects of lay-up and cutting processes, including safe storage and disposal of excess fabrics and rolls
- equipment set up and preparation:
  - setting up cutting table and seating according to workplace procedures and specifications for work
  - setting up lay-up and marking equipment and preparing for use
  - cleaning cutting equipment, checking and assessing servicing according to manufacturer instructions
  - preparing cutting table to suit lay length
  - cleaning, checking for faults and assessing servicing against manufacturer instructions

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - positioning of cutting table
    - changing cutting blades
- lay-up equipment:
    - weights
    - clamps
    - spreading table
- cutting equipment:
    - round blade cutter
    - straight knife cutter
    - drills
    - metal die
    - computerised cutting machine
- quality standards and practices
- lay-up techniques, including the appropriate use of fabric and paper layers
- stretching techniques for fabrics
- applications of cutting machinery
- cutting machinery components requiring routine maintenance
- range of woven fabrics, such as:
    - denim
    - wool suiting
    - corduroy
    - satins
    - chiffon
    - rayons
- range of knits, such as:
    - polar fleece
    - double knits
    - single knits
    - tricot
- characteristics of fabrics and other materials used in garment assembly
- common fabric faults
- complicated garments with a number of pieces and a variety of shapes, such as:
    - shirts/blouses
    - trousers
    - jackets
    - dresses
    - skirts
    - fabrics with directional patterns
- workplace procedures
- recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in layup and cut complicated fabric, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3006 Assemble bra or swimwear

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3006B Assemble bra or swimwear

Application

This unit of competency covers the skills and knowledge required to plan, align and assemble a bra or swimwear garment from specifications or patterns using a variety of machines and processes.

The unit of competency applies to assembling a bra or swimwear garment and may apply to sample machining involving all operations in the assembly of a garment to specifications. It involves being able to work quickly and accurately with expensive and delicate fabrics, to tight tolerances.

Work may be self-directed and unsupervised.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to assemble bras or swimwear**	2.1	Set up workbench and seating, and clean, set up and adjust machines and check oil levels
		2.2	Check needles, attachments and parts, and identify, report or replace worn items according to manufacturer instructions
		2.3	Check work bundle, determine any follow-up action and lay out components in sequence
		2.4	Maintain records
		2.5	Determine specifications and machining requirements and develop plan for bra or swimwear construction
3	**Assemble bra or swimwear**	3.1	Assemble bra or swimwear according to product requirements and quality standards
		3.2	Assemble bra or swimwear according to workplace procedures and requirements for speed of work
		3.3	Control machine speed and work handling for type of operations, fabrics and product type
		3.4	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		finished pieces, and take required action
	3.5	Check all work for compliance with specifications, including tolerances, and take remedial action where non-compliance is detected
4 **Complete work and production records**	4.1	Inspect finished garment, check against quality standards, identify any faults and take appropriate action
	4.2	Record results of inspection of finished garment to either reject or correct faulty garment
	4.3	Record preventative action to avoid any recurrence of defective garment
	4.4	Complete production records or packing slips and direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- personal protective equipment (PPE)
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Machines include one or more of the following:	• plain lockstitch sewing machine • three thread overlocker • zigzag sewing machine • blind hemming machines • buttonholers • pocket and collaring machines • elasticators • binders • three-step, twin needle with binding, channelling, single needle and bar rack • fusing, moulding, gluing and ultrasonic machine
Set-up includes one or more of the following:	• correct thread • needle size and type: a variety of size and types, such as standard and ball point • needle guard • tension setting • attachments correct heat and pressure • correct foot
Operations include the following:	• sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points • special handling skills required to accommodate fabric variations • production of whole garment from specifications or patterns • sample machining • all operations required to complete whole garment construction
Assemble includes one or more of the following:	• gluing • fusing

Assessment Requirements for MSTCL3006 Assemble bra or swimwear

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3006B Assemble bra or swimwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing workstation and work before commencing sewing operations
- determining specifications and machine requirements and planning for assembling of bra or swimwear
- performing a range of sewing operations, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, and where special handling skills are required to accommodate fabric variations
- using one or more machines required for completing all operations to sew at least two (2) bras or swimwear according to garment requirements, quality standards and required operations
- operating and maintaining machine/s required for complete operations
- controlling machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
- inspecting sewn garment, identifying any faults, taking appropriate action and checking finished work against quality standards
- recording results of inspections to identify faulty components and preventative action
- completing production records or packing slips and directing completed work to next operation or packing section, according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- machine operations and maintenance
- characteristics of fabrics, threads and other materials used in garment assembly
- quality standards and practices
- sequence of operations

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- acceptable tolerances and other quality standards
- appropriate components for bras and swimwear:
  - straps
  - hooks
  - elastic
  - fasteners
  - ribbon
  - underwire
  - foam padding
  - oil-filled straps
  - rings
  - fine lace and delicate fabrics
- performance and properties of one-way and two-way stretch fabrics
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in assembling bra or swimwear, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3007 Embellish garment by hand or machine

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected -MSTCL2005 removed as incorrect unit and MSTCL2001 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3007B Embellish garment by hand or machine

Application

This unit of competency covers the skills and knowledge required to embellish a garment using hand or machine techniques.

The unit of competency applies to selecting and applying an embellishment on garments, either at the completion of production, or during the production stage. The embellishments may be added by either hand or machine, as determined by the design brief.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to embellish garments**	2.1	Interpret design brief and identify specifications, type of embellishment and methods of embellishing by hand and machine
		2.2	Identify garment considerations, machine requirements and appropriate attachments
		2.3	Identify criteria for selection of threads and types of decorations to be attached
		2.4	Set up work area, equipment and materials and adjust to specifications for work
		2.5	Perform routine minor maintenance according to manufacturer specifications
		2.6	Report and record any problems
3	**Embellish garment or piece**	3.1	Lay out work pieces
		3.2	Complete hand and machine embellishment
		3.3	Assess work to comply with quality standards and production specifications
		3.4	Check machine and adjust to ensure optimum performance

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Despatch completed work**	4.1	Check garments or articles against quality standards
		4.2	Identify any faults, report and record, and take necessary action to repair or discard
		4.3	Direct completed garments or articles to next operation
		4.4	Complete work documentation as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

Assessment Requirements for MSTCL3008 Set and produce digital embroidery

Modification History

Release 1. Supersedes and is equivalent to LMTCL3008B Set and produce digital embroidery

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- planning work tasks to achieve specifications
- preparing workstation and work
- using required machine, computer and program functions
- selecting and editing a variety of stock lettering and motif designs and monograms to produce digitised embroidery effects on garments, such as hats, t-shirts and other simple garments
- producing at least six (6) different embroidery examples using different stock designs and at least two (2) different fabrics
- carrying out minor machine maintenance according to manufacturer specifications
- checking completed work against quality standards
- identifying, reporting and recording any faults, and taking necessary action to repair or discard
- directing completed work to next operation and completing work documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- digital embroidery program features
- embroidery specifications:
  - content
  - colour
  - size, including width and length
  - stitch type and size
  - font
  - fill

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- editing tools and procedures
- operating procedures for digitising machines
- characteristics of typical fabrics, threads and other materials
- backing requirements for a range of fabrics and simple garments
- stock lettering and motif designs and monograms
- equipment and materials:
  - digital embroidery machine
  - computer
  - garment
  - threads
  - scissors
  - tape measures
- machine requirements:
  - thread type
  - needle type
  - stitch settings

MSTCL3009 Develop patterns from a block using basic patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTCL3009B Develop patterns from a block using basic patternmaking principles

Application

This unit of competency covers the skills and knowledge required to develop patterns from a block using basic patternmaking principles.

The unit of competency applies to the development of a variety of pattern styles utilising the basic principles of patternmaking, including dart manipulation and square blocking.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

Work is conducted according to defined procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for MSTCL3009 Develop patterns from a block using basic patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTCL3009B Develop patterns from a block using basic patternmaking principles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting and applying correct pattern and garment terminology
- taking measurements
- identifying, selecting and using the appropriate tools and equipment for patternmaking
- selecting the appropriate block and developing a pattern to demonstrate a variety of pattern styles
- applying the patternmaking principles of square block and dart manipulation in developing at least two (2) patterns according to the specifications
- checking pattern pieces for accuracy, including seam and ease allowances, seam match, hems and functional openings
- labelling all pattern pieces, including grain lines, notches, pattern information and cutting instructions
- making toile to test fit and accuracy of pattern and assessing against design specifications
- making any necessary alterations to finalise pattern and check it is accurate, complete and complies with design specifications
- cutting out and labelling pattern pieces accurately
- documenting alterations to patterns
- completing pattern specification sheets and attaching to patterns for storage
- filing finished patterns in storage system.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking principles and design terminology
- patternmaking tools and equipment:
  - pattern blocks

MSTCL3010 Sew woven and stretch knit garments

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3010B Sew woven and stretch knit garments

Application

This unit of competency covers the skills and knowledge required to sew woven and stretch knit garments.

The unit of competency applies to sewing complete stretch and woven fabric garments or products and may apply to sample machining involving all operations in the assembly of a garment to specification. It covers the skills and knowledge to plan, align and sew complete stretch and woven fabric garments from specifications or patterns using a variety of machines and processes.

Work may be self-directed and unsupervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2006 Use a sewing machine for fashion design

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to sew woven and stretch knit garments**	2.1	Identify garment requirements from production specifications
		2.2	Determine machining requirements and develop a plan for garment construction
		2.3	Check and lay out work pieces in sequence according to construction plan
		2.4	Prepare work station, machines and equipment
3	**Sew garment**	3.1	Sew garment according to requirements for sewing woven and stretch knit fabrics, quality standards and workplace procedures
		3.2	Sew garment according to requirements for speed of work
		3.3	Control machine speed and work handling for type of operations, fabrics and product type
		3.4	Regularly check performance of machine for signs of faulty operation, including evidence from inspection of finished pieces, and take required action
4	**Complete work**	4.1	Inspect garment and check against quality standards, identify any faults and take appropriate action

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.2 Record results of inspection of finished garment and take action to either reject or correct faulty garment and record

4.3 Record preventative action taken to avoid any recurrence of defective garment

4.4 Complete production records and packing slips

4.5 Direct completed work to next operation or packing section

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Garments include one or more of the following:	• clothing which includes multiple pieces, such as sleeves, collars and trims • clothing which is made to production specifications, for example shirts, trousers, dresses, unstructured jackets, skirts, lingerie and briefs
Prepare workstation, machines and equipment includes the following:	• setting up workbench and seating according to WHS practices • cleaning and checking machines • maintaining records • setting up and adjusting machines according to specifications for work • checking needles, attachments and parts • identifying, reporting or replacing worn needles and parts according to manufacturer instructions
Machines include one or more of the following:	• plain lockstitch sewing machine • three, four or five thread overlocker • zigzag sewing machine • blind hemmers • buttonholers • pocket and collaring machine • elasticators • binders • flat seaming machines
Set-up includes one or more of the following:	• correct thread, needle size and length needle guard, tension setting and attachments • setting machine tension specific to woven and stretch knit fabrics
Operations include one or more of the following:	• sewing techniques specific to stretch and woven fabrics, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points or involving the special handling skills required to accommodate fabric variations • production of whole garment from specifications or patterns • sample machining • processes required to complete whole garment construction

Assessment Requirements for MSTCL3010 Sew woven and stretch knit garments

Modification History

Release 1.1. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL3010B Sew woven and stretch knit garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, production specifications
- applying relevant standards
- planning and preparing for product construction
- checking work pieces against pattern or specifications
- preparing workstation and work before commencing sewing operations
- applying appropriate sewing techniques required to construct whole garment form stretch or woven fabric
- sewing at least two (2) garments according to requirements for sewing woven and stretch knit fabrics, quality standards and workplace procedures
- operating one or more machines required for complete operations
- inspecting garment and checking against quality standards, identifying any faults and taking appropriate action to either reject or correct faulty garment and record
- recording preventative action taken to avoid any recurrence of defective garment
- completing production records and packing slips
- directing completed work to next operation or packing section.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of a stretch and woven fabrics
- threads and other materials used in garment assembly
- quality standards and practices
- use and maintenance of production machines, including:
  - plain lockstitch sewing machine
  - three, four or five thread overlocker

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - zigzag sewing machine
  - blind hemmers
  - buttonholers
  - button sewers
  - pocket and collaring machines
  - elasticators
  - binders
- garment requirements:
  - work pieces, accessories and trims
  - pattern
  - production or delivery time requirements
  - stitch finishes
- range of sewing techniques required to construct woven and stretch knit garments
- impact of incorrect sewing techniques on stretch and woven fabrics garment construction
- sequence of operations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in sewing woven and stretch knit garments, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL3011 Contribute to garment production process improvements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3011B Contribute to garment production process improvements

Application

This unit of competency covers the skills and knowledge required to review production processes in garment production and contribute to identifying and implementing improvements.

The unit of competency applies to providing input to improvements in the range of clothing production environments, including volume and custom production.

Improvement contributions may be made to any part of the production process. Work may be self-directed and unsupervised.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to contribute to process improvements**	2.1	Identify key elements of production requirements
		2.2	Review production processes and workplace procedures
		2.3	Identify methods of monitoring production outcomes
		2.4	Assess garment production outcomes against production goals
3	**Identify improvement opportunities**	3.1	Identify opportunities for improvement
		3.2	Make suggestions for improvement
		3.3	Test improvement with appropriate personnel
		3.4	Provide reports, records and recommendations for improvement
		3.5	Identify implications of improving aspects of production process
4	**Implement improvement**	4.1	Identify desired result of improvement and establish method of measuring outcome
		4.2	Identify methods of addressing any possible negative implications and implement
		4.3	Consult with relevant personnel to communicate improvement

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.4 Implement improvement and monitor outcome to review if it is effective in achieving desired result

4.5 Make adjustments to improvement as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Garment production processes include one or more of the following:

- receiving and processing of fibres or fabric
- identification of fibre and fabric quality
- lay-up and cutting of fabric
- making marker

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- pressing
- specialist machine use, such as binding, moulding and embroidery
- pattern design, modification and development
- sewing, and machine processes
- repairs and alterations
- blocking and shaping
- trimming and finishing
- testing and inspecting
- despatch, storage and packing
- finishing processes
- WHS
- housekeeping
- waste minimisation and disposal

Value chain includes:

- the entire chain of production from raw materials to distribution of final product

Suppliers include one or more of the following:

- suppliers of fibres, fabrics, trims, buttons, zips, thread and components used in garment production
- personnel, specialist support and contractors
- despatch, warehousing and transport operators
- publicity and promotional suppliers
- machinery and equipment suppliers, and repair contractors

Production waste includes one or more of the following:

- unusable materials and off-cuts
- delays
- movement and transport
- poor process design
- inventory
- inefficient performance of a process
- making defective items

Tests include one or more of the following:

- trial
- verify
- pilot
- measure against research

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Appropriate personnel include one or more of the following:	• managers • supervisors • colleagues • specialist staff
Opportunities for improvements include one or more of the following:	• production practice • documentation • supply • despatch • operator practices • safety • quality • housekeeping

Assessment Requirements for MSTCL3011 Contribute to garment production process improvements

Modification History

Release 1. Supersedes and is equivalent to LMTCL3011B Contribute to garment production process improvements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- reviewing production processes for garments
- identifying methods of monitoring production outcomes
- assessing garment production outcomes against production goals
- identifying and assessing improvement opportunities for at least two (2) elements of the production process
- testing improvements with appropriate personnel and identifying implications of improving aspects of production process
- providing reports, records and recommendations for improvement
- evaluating implications of improvement
- communicating process improvement options
- implementing improvement and monitoring outcome to review if it is effective in achieving desired result
- making adjustments to improvements as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- the range of garment production processes
- key elements of garment production process:
  - key customers and their needs and expectations
  - garment production processes and how they contribute to the value chain
  - key suppliers their role in the value chain
  - enterprise quality standards for critical points of production process
  - enterprise production requirements

MSTCL3012 Make marker for complicated fabrics and lays

Modification History

Release 1. Supersedes and is equivalent to LMTCL3012B Make marker for complicated fabrics and lays

Application

This unit of competency covers the skills and knowledge required to make markers for complicated fabrics and lays.

The unit of competency applies to marker-making for multiple garments and layers of fabric before lay-up and cutting, in situations involving complex patterns and a variety of fabrics and lays, using computer-aided or manual processes. It may include two-way markers.

It may include directional fabrics and a number of pattern pieces with a variety of shapes, such as shirts, blouses, trousers, jackets, dresses and skirts.

Work involves discretion, initiative and judgement within defined procedures. Manual or computer-aided techniques may be used.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2007 Lay up, mark and cut uncomplicated fabrics and lays

Competency Field

Clothing production

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to make marker**	2.1	Set up and prepare work area and equipment according to workplace procedures
		2.2	Identify marker requirements
		2.3	Collect required pattern pieces and check manually or by computer
3	**Draft lay marker**	3.1	Manipulate pattern pieces and position for most efficient use of fabrics
		3.2	Check pattern grain indication against grain of material
		3.3	Draw up lay marker according to pattern requirements
		3.4	Prepare laying-up instructions according to requirements
4	**Position marker**	4.1	Check marker against order requirements and copy marker either manually or by computer
		4.2	Place marker on lay
		4.3	Check marker and lay alignment and take appropriate action according to job specification

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Work area includes one or more of the following:	• computer workstation • air flow and flotation tables • cutting table • seating
Equipment includes one or more of the following:	• computers and required software • patterns • marker card or paper • fabric

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- marker card or paper
- weights
- clamps

Marker requirements include the following:

- fabric type
- fabric width
- product quantity
- garment sizes
- wastage allowances

Manipulate and position includes one or more of the following:

- manually onto paper
- manually directly onto the fabric
- using appropriate computer software

Fabric includes one or more of the following:

- wovens, such as:
  - denim
  - wool suitings
  - corduroy
  - satins
  - chiffon
  - rayons
- knits such, as:
  - polar fleece
  - double knits
  - single knits
  - tricot
  - directional and checked patterned fabrics

MSTCL3013 Interpret patterns and apply pattern information

Modification History

Release 1. Supersedes and is equivalent to LMTCL3013B Interpret patterns and apply pattern information

Application

This unit of competency covers the skills and knowledge required to interpret patterns and apply pattern information.

The unit of competency applies to interpreting a variety of pattern styles, using patternmaking terminology and applying the basic principles of pattern making. It includes applying pattern information and specifications to the relevant processes of garment construction.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for MSTCL3013 Interpret patterns and apply pattern information

Modification History

Release 1. Supersedes and is equivalent to LMTCL3013B Interpret patterns and apply pattern information

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures and safe work practices, pattern charts
- applying relevant standards
- interpreting and using pattern and garment terminology
- identifying pattern pieces and checking against pattern chart
- identifying and interpreting all pattern markings
- identifying garment style features, interpreting garment requirements and clarifying, where necessary
- applying patternmaking principles to construct patterns for at least two (2) garments according to specifications and workplace quality standards
- checking pattern pieces, information and specifications for accuracy throughout garment production process
- identifying and reporting garment production faults relating to pattern or pattern information and specifications
- completing production documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- patternmaking and design terminology
- impact of patternmaking on production
- pattern markings:
  - notches
  - grain line
  - seam lines
  - drill holes
  - darts
  - cutting instructions

MSTCL3014 Interact and communicate with garment production personnel

Modification History

Supersedes and is equivalent to LMTCL3014B Interact and communicate with garment production personnel

Application

This unit of competency covers the skills and knowledge required to interact and communicate with others in the garment production process to ensure production outcomes are achieved.

The unit applies to implementing techniques to interact and communicate effectively with others, including applying knowledge of the information requirements of other production personnel.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to implement workplace communication practices**	2.1	Identify roles of different production personnel
		2.2	Identify routine workplace communication channels and tools, and apply workplace procedures
		2.3	Identify communication protocols of different garment production personnel
		2.4	Identify workplace interaction and communication practices and quality standards
3	**Communicate production-related information**	3.1	Identify objectives and benefits of communicating production-related information effectively
		3.2	Use appropriate communication tools
		3.3	Routinely use language and terminology that is appropriate to production process when interacting with work team, to ensure required meaning is accurately communicated
		3.4	Seek and respond to feedback to ensure communication in relaying production concepts and requirements is effective
		3.5	Seek assistance from appropriate personnel to resolve any difficulties that arise in communication
		3.6	Document outcomes of communication and information received according to workplace procedures and maintain records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • PPE • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Production personnel include one or more of the following:	• patternmakers • designers • cutters • pressers • despatch personnel • machinists • supervisors
Communication channels and tools	• sketches, drawings, illustrations and photographs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

include one or more of the following:	• samples of fabrics and garments • written descriptions and instructions • specification sheets • storyboards • meetings • computers, internet and email • databases
Protocols include one or more of the following:	• specific formats • timing and content of communication required by others performing related garment production processes
Quality standards include one or more of the following:	• accepted formats for presenting ideas and concepts • standards of presentation for drafts and final versions • layout and content
Objectives of effective communication for production include one or more of the following:	• clarify production processes • suggest improvements to processes, patterns or designs • convey information about production • report difficulties or problems • handover production to next process
Interacting and communicating includes one or more of the following:	• face to face • by telephone • writing
Appropriate personnel includes one or more of the following:	• supervisor • work colleagues • colleagues with specific and relevant expertise

Assessment Requirements for MSTCL3014 Interact and communicate with garment production personnel

Modification History

Supersedes and is equivalent to LMTCL3014B Interact and communicate with garment production personnel

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- using appropriate industry terminology and language
- interacting with production personnel to achieve agreed outcomes
- applying an understanding of the objectives of effective communication on production, and roles and information needs of different production personnel on at least two (2) occasions
- using different communication tools and channels as appropriate
- seeking and responding to appropriate feedback to ensure communication in relaying production concepts and requirements is effective
- seeking assistance from appropriate personnel to resolve any difficulties that arise in communication
- documenting outcomes of communication and information received according to workplace procedures, and maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- workplace communication practices and quality standards
- benefits of effective communication
- accepted ways of communicating information in the workplace
- roles of different production personnel
- ways to effectively manage information
- uses of a variety of communication tools
- quality standards and practices
- workplace procedures
- recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in interacting and communicating with garment production personnel, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL4001 Perform sample machining of advanced construction garments

Modification History

Release 3. Supersedes and is equivalent to MSTCL4001 Perform sample machining of advanced construction garments (Release 2)

Prerequisite - MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry **superceded by** MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

Release 2. Data entry errors re listed prerequisites corrected - MSTCL2001 and MSTCL2004 replaced with MSTFD2006. Equivalent.

Release 1. Supersedes and is equivalent to LMTCL4001A Perform sample machining of bespoke garments

Application

This unit of competency covers the skills and knowledge required to interpret design and advanced construction pattern specifications, and perform sewing operations to complete sample garments.

This unit of competency applies to sample machining of garments involving all sewing operations required to sew a complete design sample featuring advanced construction, and assemble complete garments to design specifications.

Work is independent, with the operator being responsible for own outcomes and may have some responsibility for the work of others.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3002 Prepare and produce a complex whole garment from specifications

MSTFD2006 Use a sewing machine for fashion design

MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Competency Field

Clothing production

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to machine advanced construction garment**	2.1	Analyse design specifications to identify advanced construction requirements
		2.2	Prepare workstation tools and equipment
		2.3	Examine garment components to ensure that they comply with pattern specifications and make any adjustments as required
		2.4	Determine advanced construction requirements and plan sequence of operations
3	**Sew garment**	3.1	Conduct sewing operations according to requirements of pattern, component detail and design
		3.2	Use all machines required to produce a complete design sample

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	3.3	Control machine speed and work handling for type of operations, fabrics and product
	3.4	Regularly check performance of machine for signs of faulty operation
	3.5	Perform garment embellishment, where necessary, to meet design specifications
	3.6	Finish garment and inspect against design and pattern specifications
	3.7	Record results of inspection of finished garment
4 **Review design and production processes**	4.1	Identify garment construction problems, provide feedback to designers and patternmakers, and document
	4.2	Review production processes to assess timing and task requirements and identify alternative processes to achieve more efficient or effective outcomes
	4.3	Use appropriate communication tools to review sample garment and production with appropriate personnel
	4.4	Document outcomes of communication and maintain records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the	• requirements prescribed by legislation, awards, agreements and conditions of employment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

following:	• SOPs • work instructions • PPE • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Garments include one or more of the following:	• commercially tailored garments, such as:
	  • suits
	  • coats
	  • jackets
	  • trousers
	  • skirts
	  • dresses
	  • evening wear

Determine construction requirements include the following:	• analysing pattern to determine machining and assembly requirements • examining fabrics, trims and accessories and preparing items for attachment • clarifying construction or design details with the designer or pattern maker as required • developing plan for garment construction and sequence of operations
Machines include three or more of the following:	• plain lockstitch sewing machine • three, four or five thread overlocker • zigzag sewing machine • blind hemmers • buttonholers • pocket and collaring machines • elasticators

Release 1. Supersedes and is equivalent to LMTCL4001A Perform sample machining of bespoke garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, design specifications
- applying relevant standards
- preparing and setting up machines and determining all construction requirements
- operating and maintaining at least three (3) types of machines required for complete operations
- performing a range of sewing operations, where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points, and where special handling skills are required to accommodate fabric variations
- completing all operations to sew at least two (2) complex whole advanced construction garments that include multiple pieces, such as sleeves, collars and trims according to garment requirements, quality standards and required operations
- controlling machine speed and work handling for type of operations, fabrics and product type according to workplace procedures
- performing embellishment, where required, and finishing garment to meet design specifications
- inspecting garment construction problems, providing feedback to designers and patternmakers and documenting
- reviewing production processes, identifying alternative processes to achieve more efficient or effective outcomes, and using appropriate communication tools to review sample garment and production with appropriate personnel
- documenting outcomes of communication and maintaining records.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of a variety of fabrics, threads and other materials used in garment assembly
- design specifications for advanced construction garments, such as:
  - type of garment
  - style requirements
  - fit model specifications
  - sizing
  - design restrictions or conditions
  - trims and accessories
  - fabric
- sequence of operations to produce a completed sample product
- operation of variety of production machines required to complete garment assembly
- construction specifications, such as:
  - multiple interfacings
  - tailored collars
  - cut-in pockets
  - vents
  - linings
  - wide range of commonly used and specialised fabrics
- machine set-up:
  - clean machines
  - set up and adjust machines according to specifications for work
  - check needles, attachments and parts
  - identify worn needles and parts and report or replace according to manufacturer instructions
- hand embellishment techniques, such as:
  - beading
  - smocking
  - embroidery stitches
  - fabric manipulation
- machine embellishment, such as:
  - quilting
  - pintucking
  - shirring
  - machine embroidery
  - appliqué

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - lace insertion
- garment finishing, such as:
    - trimming loose threads
    - checking
    - spotting
    - sorting
    - hand or machine sewing buttons or fasteners
    - hand or machine sewing hems
    - securing lining
    - sewing and cutting buttonholes
    - attaching accessories or trims
    - attaching tickets and labels
    - bundling
- communication with appropriate personnel:
    - managers
    - colleagues
    - specialist staff
    - designers
    - patternmakers
    - production supervisors
- quality practices
- workplace procedure
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in performing sample machining of advanced construction items, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTCL4002 Assemble and fit commercially tailored or bespoke garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4002A Assemble and fit commercially tailored or bespoke garments

Application

This unit of competency covers the skills and knowledge required to assemble and fit commercially tailored or bespoke garments.

The unit applies to work that requires discretion and judgement, for both self and others, in planning and selecting processes, procedures and outcomes in response to a tailored or bespoke garment brief. It includes pinning and sewing of fabric pieces, initial assembly, sewing whole garment, fitting and modifying the garment as required to meet customer requirements. It also involves hand sewing, completing trims and undertaking alterations as required to confirm correct sizing, look and wearer comfort.

Degree of complexity may vary depending on the characteristics of the fabrics being used and intricacy of design.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to fit bespoke garments**	2.1	Pin and sew together fabric pieces and linings, as required, and hang appropriately in readiness for assembly
		2.2	Conduct first fitting with the client and make changes, as required
		2.3	Use effective communication strategies to interact with client and respond to client feedback with discretion
3	**Assemble garment**	3.1	Sew together pieces to form the whole garment in accordance with pattern specifications and workplace procedures
		3.2	Press garment in accordance with requirements
		3.3	Assess second fitting of garment with client
		3.4	Determine any modifications needed in consultation with the client
4	**Finish garment and conduct final**	4.1	Undertake alterations, where relevant
		4.2	Assess hand sewing and apply trims in accordance with

fitting		design requirements and quality criteria
	4.3	Finish garment to meet specifications and attach appropriate labels
	4.4	Conduct final fitting to ensure client satisfaction and to confirm correct sizing, look and wearer comfort
	4.5	Prepare all relevant paperwork and documentation in accordance with workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Tailored garments include one or more of the following:	• suits • coats • jackets • trousers • skirts • dresses
Communication strategies include the following:	• effective verbal and non-verbal communication • oral, written and visual communication • active listening • positive language • recognising and adapting to cultural differences • negotiation and conflict resolution skills

Garment assembly includes the following:	• using appropriate machine, such as:
	  • plain lockstitch sewing machine
	  • three, four or five thread overlocker
	  • zigzag sewing machine
	• hand sewing
	• applying trims

Quality criteria includes the following:	• proportion • perspective • symmetry and balance • detailing • neatness

Assessment Requirements for MSTCL4002 Assemble and fit commercially tailored or bespoke garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4002A Assemble and fit commercially tailored or bespoke garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- preparing and assembling pieces for at least two (2) types of garment
- conducting first, second and final fittings to meet client specifications and correct fit on at least two (2) occasions
- performing alterations
- hand and machine sewing and applying trims to achieve quality criteria
- communicating effectively with clients
- finishing garment to meet specifications and attaching appropriate labels
- conducting final fitting to ensure client satisfaction and to confirm correct sizing, look and wearer comfort
- preparing all relevant paperwork and documentation in accordance with workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- garment construction
- assembly methods using machining and hand sewing
- fabric properties and their characteristics
- quality practices
- interpersonal communication
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:

MSTCL4003 Measure, lay up and cut custom-made garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4003A Measure, lay-up and cut custom-made garments

Application

This unit of competency covers the skills and knowledge required to perform cutting to order for one-off single lays within the clothing industry.

This unit applies to measuring, laying-up and cutting material to produce custom-made garments. The unit includes skills and knowledge to assess all relevant body characteristics and determine, measure and interpret relevant body measurements. Discretion and judgement may be required, for both self and others, in planning and selecting processes, procedures or outcomes.

The degree of complexity may vary depending on characteristics of the fabrics being used and intricacy of design. Measuring and laying up tasks may be associated with operations where size, shape and cost of fabric are significant. The unit includes skills and knowledge to select or modify the pattern and perform cutting to meet design requirements and any special needs of the client.

Measuring, cutting and pattern selection or alteration may be combined in made to measure specialist order cutting.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for MSTCL4003 Measure, lay up and cut custom-made garments

Modification History

Release 1. Supersedes and is equivalent to LMTCL4003A Measure, lay-up and cut custom-made garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- obtaining accurate measurements from at least two (2) clients
- interpreting garment measurements to suit special body characteristics of client, on at least two (2) occasions
- determining preferred fabric and incorporating special needs of the client into the design, where required
- consulting and communicating effectively with the client for the presentation of ideas and designs and ensuring design is suitable for client
- chalking design into the pattern or selecting/modifying the pattern to meet the requirements
- checking material for quality, faults, width, selvedges, dye lot and marking requirements
- laying-up and aligning material with pattern
- cutting material to meet design requirements and measurements of the pattern
- preparing all relevant paperwork and documentation in accordance with workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- garment construction
- assembly methods
- fabric properties such as weight, shrinkage, pile, grain and pattern shapes
- the importance of the selvedge and bias of fabrics and their characteristics
- interpersonal communication
- workplace procedures
- recording and reporting practices.

MSTCL4004 Determine and perform garment maintenance or repair

Modification History

Release 1. Supersedes and is equivalent to LMTCL4004A Determine and perform garment maintenance or repair

Application

This unit of competency covers the skills and knowledge required to assess garments for maintenance or repair and to undertake the required maintenance and repairs.

This unit of competency applies to the range of repairs that typically apply in specialised garment repair situations, where the complexity and degree of responsibility will be dependent on the size of the enterprise and internal work organisation.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

2	**Prepare to perform maintenance or repair**	2.1	Assess or examine garment to determine requirements for maintenance or repair
		2.2	Calculate costs to determine feasibility of repair
		2.3	Prepare garment in appropriate manner for maintenance or repair
		2.4	Assemble materials and equipment required for the task
3	**Undertake maintenance or repair**	3.1	Assess or organise cleaning or laundering of garment, where necessary
		3.2	Repair garment to restore garment to optimum condition in accordance with workplace procedures
		3.3	Prepare garment for storage, where appropriate
		3.4	Maintain records and prepare reports, where necessary, in accordance with workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Maintenance includes one or more of the following:	• spot cleaning • determining dry cleaning or laundering requirements • preparation for storage
Repair includes one or more of the following:	• invisible mending • complex repairs

Assessment Requirements for MSTCL4004 Determine and perform garment maintenance or repair

Modification History

Release 1. Supersedes and is equivalent to LMTCL4004A Determine and perform garment maintenance or repair

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- assessing at least ten (10) garments or fabric types and determining required maintenance or repair
- calculating costs
- assessing or organising cleaning or laundering of garment, where necessary
- repairing and restoring at least ten (10) garments or fabric types to optimum condition, using a range of maintenance and repair techniques, in accordance with workplace procedures
- preparing garment for storage, where appropriate

maintaining records and preparing reports, where necessary, in accordance with workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of fibres and fabrics
- variety of fabrics/materials and how they react to laundering, dry cleaning or spot cleaning
- appropriate testing procedures
- cleaning agents and the effect they have on a range of fabrics/materials, including those that are fragile and easily damaged
- garment repair techniques and their application
- workplace procedures
- recording and reporting practices.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in garment maintenance and repair, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise

Modification History

Release 1. Supersedes and is equivalent to LMTDC2001A Provide customer service in a dry cleaning or laundry enterprise

Application

This unit of competency covers the skills and knowledge required to provide service to dry cleaning or laundry customers. It applies to interacting with customers to identify and satisfy customer requirements, including referral to appropriate personnel where applicable.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Establish customer requirements**	2.1	Seek information from customer to determine the service they require
		2.2	Outline available services with the customer and discuss specific options for dry cleaning or laundry needs, where necessary
		2.3	Identify situations that need additional assistance and refer customer to appropriate service
		2.4	Determine service charges and confirm with customer
3	**Interact with customer to process required service**	3.1	Identify or confirm article, fabric and dry cleaning or laundry requirements
		3.2	Complete instructions, including special attention tags, to identify article and cleaning requirements
		3.3	Process customer records and reference dockets, including record of damage and missing trim
		3.4	Hang articles or store, ready for dry cleaning or laundry
		3.5	Retrieve cleaned article and do a final check to ensure customer requirements have been met
		3.6	Present article to customer and process transaction through point of sale equipment according to workplace practices
		3.7	Use effective interpersonal communication skills
4	**Handle customer complaints**	4.1	Acknowledge any customer complaints and clarify specific difficulties
		4.2	Propose options to resolve complaints and negotiate a suitable solution with customer

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.3 Notify relevant staff and identify strategies to avoid or resolve complaints

4.4 Use effective communication skills to demonstrate respect for cultural differences in the workplace

4.5 Refer customer to other sources if they need further assistance

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Assessment Requirements for MSTDC2001 Provide customer service in a dry cleaning or laundry enterprise

Modification History

Release 1. Supersedes and is equivalent to LMTDC2001A Provide customer service in a dry cleaning or laundry enterprise

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- greeting customer and determining dry cleaning or laundry requirements
- dealing with customer to complete transactions, including operating associated equipment on at least two (2) occasions
- conducting final check of articles
- identifying other sources of assistance
- negotiating solutions to problem situations, service complaints and enquiries
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- workplace or store policies and procedures
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- care and maintenance procedures for articles
- point of sale techniques
- quality practices
- effective communication skills
- problem solving and negotiation strategies
- workplace practices
- practices for recording and reporting
- federal and state or territory legislative or regulatory requirements.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in providing customer service in a laundry or dry cleaning enterprise, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents

Modification History

Release 1. Supersedes and is equivalent to LMTDC2012A Conduct safe handling of dry cleaning chemicals and solvents

Application

This unit of competency covers the skills and knowledge required to handle and work with dry cleaning chemicals and solvents commonly used in dry cleaning operations.

This unit of competency applies to operators who prepare, use and store dry cleaning chemicals and solvents when performing dry cleaning operations.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning operations and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to use dry cleaning chemicals and solvents**	2.1	Access information on dry cleaning chemicals and solvents
		2.2	Identify personal responsibilities in working with cleaning chemicals
		2.3	Interpret common terminology in safety data sheets (SDS) for cleaning chemicals
		2.4	Identify procedures for using chemicals in a cost-effective manner
3	**Identify chemical control measures**	3.1	Identify risks associated with cleaning chemicals and operator use
		3.2	Identify measures for controlling risks
		3.3	Implement correct procedures for calculating quantities and measuring cleaning chemicals
		3.4	Identify local procedures to document procedures and respond to environmental considerations
4	**Apply safe handling of dry cleaning chemicals and solvents**	4.1	Ventilate work area and eliminate ignition sources
		4.2	Identify cleaning chemicals, measure, handle and store according to WHS practices and workplace procedures
		4.3	Safely operate machinery and equipment associated with use of cleaning chemicals
		4.4	Report WHS issues, faults or emergencies to relevant personnel
		4.5	Demonstrate procedures to act upon accidents and

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

emergencies according to procedures for the cleaning chemical

4.6 Maintain work area and dispose of cleaning chemicals according to regulatory requirements, environmental considerations and SDS recommendations

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Access information on dry cleaning chemicals and solvents includes the following:

- identifying relevant regulations and codes of practice relating to the control of hazardous substances
- assessing workplace information and workplace procedures regarding the safe handling of cleaning

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	chemicals • identifying chemicals and their characteristics • differentiating between toxic agents, corrosives, reactives, and flammables and combustibles
Dry cleaning chemicals and solvents include one or more of the following:	• perchlorethylene • white spirit • hydrocarbon • liquid silicon • detergent • chlorine bleach • oxybleach • builder • starch • fabric conditioner • laundry sour • caustic alkali
Workplace information includes the following:	• SDS for hazardous substances • workplace procedures • signage and labelling • verbal instruction
Risks include one or more of the following:	• mixing of chemicals • spills and leaks in the workplace • chemical fires • exposure to perchlorethylene or other cleaning chemicals via absorption • inhalation or ingestion

Assessment Requirements for MSTDC2002 Conduct safe handling of dry cleaning chemicals and solvents

Modification History

Release 1. Supersedes and is equivalent to LMTDC2012A Conduct safe handling of dry cleaning chemicals and solvents

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- identifying risks and control measures
- complying with industry regulations and codes of practice that govern the control of chemicals in the workplace
- differentiating between toxic agents, corrosives, reactives, and flammables and combustibles
- locating and interpreting safety data sheets (SDS) and other available safety information on dry cleaning chemicals
- identifying procedures for responding to accidents, incidents and emergencies according to procedures for the cleaning chemical
- accurately identifying and measuring dry cleaning chemicals for at least five (5) different garment types
- using personal protective equipment (PPE)
- demonstrating procedures to act upon accidents and emergencies according to procedures for the cleaning chemical
- transferring, storing and disposing of cleaning chemicals safely and with respect to environmental considerations
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of PPE
- Australian Standards, industry regulations and codes of practice that govern the control of chemicals in the workplace
- characteristics of different chemicals and solvents used in the dry cleaning industry: toxic agents, corrosives, reactives, and flammables and combustibles
- workplace procedures relating to dry cleaning chemical use
- personal responsibilities in the control of dry cleaning chemicals in the workplace:
  - following work health and safety (WHS) procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - following workplace procedures
  - following environmental procedures
  - reporting incidents
  - using PPE
- risks of exposure to chemicals by absorption, inhalation and ingestion
- health risks arising from exposure to cleaning chemicals
- the meaning of common SDS terms
- risks associated with operating machinery or equipment that use cleaning chemicals
- procedures for the safe and cost-effective measuring and mixing of chemicals and other agents
- workplace procedures for reporting emergencies or WHS issues, control of chemical spills and fires, hazard identification and control measures
- reporting and documentation requirements.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in conducting safe handling of dry cleaning chemicals and solvents, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2003 Identify pre- and post-spotting requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC2011A Identify pre- and post-spotting requirements

Application

This unit of competency covers the skills and knowledge required to recognise and identify types of stains and other marks on articles or garments, and determine and document spotting treatment requirements.

This unit of competency applies to operators who are responsible for identifying types of stains and other marks that require spotting prior to and after dry cleaning, and determining the required spotting procedure. This unit does NOT cover skills required for implementing spotting procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

MSTDC2004 Operate dry cleaning machines

Modification History

Release 1. Supersedes and is equivalent to LMTDC2004A Operate dry cleaning machines

Application

This unit of competency covers the skills and knowledge required to load articles into machines, monitor procedures and process articles according to specifications and quality requirements.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times
		1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for dry cleaning**	2.1	Identify production schedule and work load priorities to plan work
		2.2	Determine dry cleaning machine loads by counting, weight, volume or classification
		2.3	Determine correct load size or weight by reading indicator scales
		2.4	Follow dry cleaning machine operator instructions and schedules for a given process or article
		2.5	Complete records according to workplace practices
3	**Operate dry cleaning machine**	3.1	Load machine with correct weight for machine according to garment classification, manufacturer specifications, workplace procedures and WHS practices
		3.2	Select program for load type or classification
		3.3	Select additive dispensing and prepare for dosing system, where relevant
		3.4	Operate machine in accordance with operating instructions
		3.5	Monitor additives and dosing for correct operation and report faults, where appropriate
		3.6	Monitor machine operation and dry cleaning procedures
		3.7	Unload garments using correct manual handling techniques
		3.8	Complete records
4	**Finalise and review dry cleaning**	4.1	Check dry cleaning machine operation for correct operation
		4.2	Report machine operational faults

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.3	Review processes to optimise environmental protection, waste disposal, pollution control and recycling
4.4	Hang articles or sort and inspect for stains or further treatment, according to finishing requirements and quality standards
4.5	Direct garments to correct area for finishing

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Dry cleaning machines include one or more of the following:	• microprocessor • computer-controlled

Assessment Requirements for MSTDC2004 Operate dry cleaning machines

Modification History

Release 1. Supersedes and is equivalent to LMTDC2004A Operate dry cleaning machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities
- selecting appropriate program and monitoring operations and equipment on at least two (2) occasions
- determining dry cleaning machine loads by counting, weight, volume or classification on at least two (2) occasions
- loading machine appropriately and selecting appropriate additives on at least two (2) occasions
- using correct manual handling techniques
- using and handling additives and chemicals safely
- optimising environmental protection, waste disposal, pollution control and recycling
- hanging articles, sorting and inspecting for stains or further treatment, according to finishing requirements and quality standards, and directing garments to correct area for finishing
- maintaining records
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- workplace or store policies and procedures
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- care and maintenance procedures for articles
- safe handling and use of additives and chemicals:
  - perc spirit
  - hydrhlorethylene
  - whiteocarbon

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - liquid silicon
  - detergent
  - chlorine bleach
  - oxybleach
  - builder
  - starch
  - fabric conditioner
  - laundry sour
  - caustic alkali
- machine operation, program selection and monitoring procedures
- level of operator maintenance for between load servicing
- characteristics and hazards of additives and dosing systems
- environmental aspects related to workplace, and machine or equipment operation
- practices for recording and reporting
- federal and state or territory legislative or regulatory requirements.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in operating dry cleaning machines, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2005 Operate wet cleaning machines

Modification History

Release 1. Supersedes and is equivalent to LMTDC2005A Operate wet cleaning machines

Application

This unit of competency covers the skills and knowledge required to load articles into water-based cleaning machines, monitor procedures and process to specifications and quality requirements.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times
		1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for wet cleaning**	2.1	Identify production schedule and work load priorities to plan work
		2.2	Determine machine and equipment loads by weight or classification
		2.3	Determine size of load by weighing and reading indicator scales
		2.4	Follow wet cleaning machine operator instructions and schedules for a given process or article
		2.5	Complete records according to workplace procedures and instructions
3	**Operate wet cleaning machine**	3.1	Load machine with correct weight for machine according to product classification manufacturer specifications, workplace procedures and WHS practices
		3.2	Determine wet cleaning program for type of wash
		3.3	Select water levels and temperature for load type
		3.4	Add appropriate additives to machine
		3.5	Operate machine in accordance with operating instructions
		3.6	Prepare additives and dosing system and monitor for correct operation and report faults
		3.7	Unload articles using correct manual handling techniques
		3.8	Complete records
4	**Finalise and review wet cleaning**	4.1	Check machine operation for correct water, temperature and additives levels, and program operation
		4.2	Report washing machine operational faults

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.3 Monitor discharge from washing machine to optimise environmental protection and waste disposal

4.4 Hang articles or sort and inspect for stains or further treatment, according to finishing requirements and quality standards

4.5 Direct articles to correct area for finishing, drying or further processing

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Machine and equipment includes one or more of the

- microprocessor
- computer controlled

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

following:

- small wet cleaning machines in the 2.5 to 25 kg capacity range
- weighing machines

Assessment Requirements for MSTDC2005 Operate wet cleaning machines

Modification History

Release 1. Supersedes and is equivalent to LMTDC2005A Operate wet cleaning machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities, and wet cleaning machine operator instructions and schedules for a given process or article on at least two (2) occasions
- selecting appropriate program and monitoring operations and equipment on at least two (2) occasions
- loading machine appropriately and selecting appropriate additives on at least two (2) occasions
- using correct manual handling techniques
- using and handling additives and chemicals safely
- checking garments for quality
- monitoring discharge from washing machine to optimise environmental protection and waste disposal
- hanging articles or sorting and inspecting for stains or further treatment, according to finishing requirements and quality standards
- directing articles to correct area for finishing, drying or further processing
- maintaining records.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities, and wet cleaning machine operator instructions and schedules for a given process or article on at least two (2) occasions
- selecting appropriate program and monitoring operations and equipment on at least two (2) occasions
- loading machine appropriately and selecting appropriate additives on at least two (2) occasions

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- using correct manual handling techniques
- using and handling additives and chemicals safely
- checking garments for quality
- monitoring discharge from washing machine to optimise environmental protection and waste disposal
- hanging articles or sorting and inspecting for stains or further treatment, according to finishing requirements and quality standards
- directing articles to correct area for finishing, drying or further processing
- maintaining records.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in operating wet cleaning machines, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Operate finishing equipment**	2.1	Perform procedures for start-up and stopping of finishing equipment
		2.2	Check schedules to ensure finishing operations meet workplace requirements for quality and quantity
		2.3	Classify, sort and prepare articles according to finishing and re-work requirements
		2.4	Place articles into or on finishing equipment and operate equipment in accordance with workplace requirements for quality and quantity
		2.5	Monitor machines and adjust for correct operation in accordance with manufacturer specifications, WHS practices and environmental protection
		2.6	Report machine problems or faults outside area of responsibility to relevant personnel
3	**Finalise and review finishing**	3.1	Inspect articles against quality standards
		3.2	Return articles not meeting quality standards for re-processing
		3.3	Identify damaged or torn articles for repair or return in accordance with workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Operate includes one or more of the following:

- manual handling techniques
- safe use of machines and related equipment
- reporting procedures for faults and safety checks
- production requirements

Finishing equipment includes one or more of the following:

- air operated
- microprocessor controlled
- finishing equipment
- steam tunnel
- trouser topper
- trouser legger
- puff iron
- air and steam finisher
- hand iron
- hot head press
- utility press

Assessment Requirements for MSTDC2006 Operate finishing equipment

Modification History

Release 1. Supersedes and is equivalent to LMTDC2006A Operate finishing equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities
- selecting, operating and monitoring at least two (2) types of finishing equipment for two (2) different types of garments
- maintaining quality requirements for each stage of the process
- identifying articles that are damaged, torn, or require reprocessing
- using correct manual handling techniques
- using and handling additives and chemicals safely
- checking garments for quality
- complying with relevant federal and state or territory legislative or regulatory requirements

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- finishing equipment and their applications
- machine operation, monitoring, and adjustment procedures
- fibres and fabrics and the effects of heat and steam
- level of operator maintenance
- inspection processes
- environmental aspects of related to workplace and machine, or equipment operation and manual handling
- quality practices
- federal and state or territory legislative or regulatory requirements.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in operating finishing equipment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC2007 Receive and sort articles for cleaning

Modification History

Release 1. Supersedes and is equivalent to LMTDC2007A Receive and sort articles for cleaning

Application

This unit of competency covers the skills and knowledge required to receive and sort articles, such as garments and linen, and ensure that no foreign object or contaminant is included.

This unit of competency applies to recording and classifying articles for dry cleaning or laundry purposes and may include garments, linen or other fabric products.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Work should comply with Australian Standard *AS/NZS 4146:2000 Laundry practice*.

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Receive and classify articles**	2.1	Receive articles, record and identify according to industry procedures
		2.2	Record any existing damage, missing components or other related detail
		2.3	Interpret and apply product handling procedures and instructions
		2.4	Identify articles to be processed from manufacturer labels and care labelling or workplace testing procedures
		2.5	Classify articles according to their colour, care requirements and fabric type
		2.6	Provide customer service and use related equipment for stock management and financial transaction processes, as required, according to workplace procedures
3	**Prepare articles for cleaning**	3.1	Identify, safely remove and dispose of foreign objects and lost property according to environmental protection, waste disposal, recycling and workplace procedures
		3.2	Apply preparation procedures for the correct handling of articles
		3.3	Note any special requirements and take these into account during the preparation
		3.4	Transfer relevant information to appropriate people
		3.5	Use machinery and equipment to prepare articles, including special requirements, and operate correctly

Assessment Requirements for MSTDC2007 Receive and sort articles for cleaning

Modification History

Release 1. Supersedes and is equivalent to LMTDC2007A Receive and sort articles for cleaning

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- reading care labels and recognising colours, fabric types and fragility of fabrics to identify correct classification and care requirements
- preparing a range of articles and fabric types with different care needs for dry cleaning or laundering on at least two (2) occasions
- completing work systematically with attention to detail without damage to goods and equipment
- using related equipment and providing customer service and stock management and financial transaction processes according to workplace procedures, as required
- identifying, safely removing and disposing of foreign objects and lost property according to environmental protection, waste disposal, recycling and workplace procedures
- operating machinery and equipment to prepare articles, including special requirements
- maintaining accurate records
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- range of processes available
- care and maintenance procedures for articles:
  - clothing, garments or fabric accessories
  - kitchen linen
  - hospitality linen
  - other fabric products
- customer service and cash handling procedures
- environmental aspects related to workplace operation and manual handling

Assessment Requirements for MSTDC2008 Carry out final inspection of articles

Modification History

Release 1. Supersedes and is equivalent to LMTDC2008A Carry out final inspection of articles

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- inspecting a range of articles of different types and materials to check compliance with standards on at least two occasions
- interpreting special attention tags
- determining procedure to complete a range articles (e.g. spotting, repressing and repair) to standards
- communicating with team members to report quality issues as needed
- complying with environmental protection, waste disposal, pollution control and recycling requirements
- complying with relevant federal and state or territory legislative or regulatory requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- inspection processes and requirements
- procedures for finishing and completion of articles:
  - clothing, garments or fabric accessories
  - kitchen linen
  - hospitality linen
  - other fabric products
- problem-solving techniques
- safety and environmental aspects of workplace operation and manual handling
- quality practices
- workplace practices
- practices for recording and reporting
- *AS/NZS 4146:2000 Laundry practice.*

MSTDC2009 Identify fabric and garment cleaning requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC2010A Identify fabric and garment cleaning requirements

Application

This unit of competency covers the skills and knowledge required to identify fabric handling requirements from care labelling instructions.

The unit of competency applies to interpreting care labelling instructions on fabric and garments and determining implications for cleaning and handling.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

Care labelling practices and procedures followed in this unit are in accordance with current standards published by the Australian Standards, and are mandatory under the Competition and Consumer Act 2010.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Interpret care labelling**	2.1	Interpret care labelling symbols
		2.2	Identify care categories and Australian Standards
		2.3	Interpret meaning of care instructions
		2.4	Use care labelling information to identify potential fabric problems caused by improper handling
		2.5	Identify consequences of improper care
		2.6	Use information resources to expand own knowledge of cleaning requirements
3	**Identify fabric or garment cleaning requirements**	3.1	Identify fabrics, fabric finishes, trims and embellishments that may affect handling
		3.2	Identify care requirements of garments
		3.3	Determine measures to control fabric problems according to fabric handling requirements and WHS practices

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Information on care labelling includes the following:

- country of origin
- fibre content (e.g. 80% wool 20% polyester)
- care instructions for:
  - hand washing
  - washing
  - drying
  - ironing
  - special requirements (e.g. hanging)
  - dry cleaning
- prohibitions against specific actions, such as "do not bleach"

Care considerations include one or more of the following:

- fibre used
- fabric construction
- trimming, interfacing, lining, decorations and buttons
- design of article
- dyes used

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• special treatments (e.g. waterproofing) • normal care treatment
Fabric problems include two or more of the following:	• differential shrinkage • heat shrinkage • chafing • light fading and fume fading • hardening of printed fabrics • loss of body, lustre and sheen • holes, yarn slippage and fraying • discoloration or rings • loss of embossed design • relaxation shrinkage • distortion of bias cut fabrics • yarn slippage • separation of bonded fabric • garment failures

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- identifying fabrics and fabric problems for at least five (5) different articles
- identifying fibre and fabric finishes, trims and embellishments that may affect handling procedures
- using correct manual handling techniques
- interpreting meanings of care labelling information
- identifying care requirements and control measures for a range of garments and fabrics requiring different care considerations
- determining measures to control fabric problems according to fabric handling requirements and work health and safety (WHS) practices
- maintaining records
- complying with Australian Standards for care labelling.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- common and fragile fabric types
- fabric care considerations
- main causes of fabric problems
- common fabric problems
  - differential shrinkage
  - heat shrinkage
  - chafing
  - light fading and fume fading
  - hardening of printed fabrics
  - loss of body, lustre and sheen

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in identifying fabric and garment cleaning requirements, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC3001 Perform spotting function in dry cleaning operations

Modification History

Release 1. Supersedes and is equivalent to LMTDC3003A Perform spotting function in dry cleaning operations

Application

This unit of competency covers the skills and knowledge required to perform spotting techniques on articles received for dry cleaning. It includes identifying a wide range of stains on a variety of fabrics, determining spotting requirements and suitable spotting agents, and carrying out spotting procedures.

This unit of competency applies to operators who are responsible for implementing spotting procedures within a dry cleaning operation. It requires skill in spotting all types of stains on common as well as special fabrics, and involves the use of standard and specialist spotting agents.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Dry cleaning and laundry operations

essential outcomes.		demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to perform spotting function**	2.1	Identify types of spotting agents and classify
		2.2	Determine applications of spotting agents to specific types of stains
		2.3	Identify application procedures for spotting agents
		2.4	Consider safety and handling requirements of spotting agents
		2.5	Identify common fabrics and special fabrics
		2.6	Prepare work area, resources, materials and equipment according to requirements and workplace procedures
3	**Determine spotting requirements**	3.1	Identify type of stain and its characteristics, and determine fabric type
		3.2	Identify appropriate spotting agent according to stain characteristic and fabric requirements
		3.3	Identify spotting requirements for common stains and select appropriate method
		3.4	Consider advanced spotting processes and procedures and select appropriate method, where necessary
		3.5	Seek information to support skill development when stains or spotting techniques are difficult to identify
		3.6	Implement control measures for factors that affect spotting procedures

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Carry out spotting procedure**	4.1 Prepare spotting agents and mix according to manufacturer instructions and workplace procedures
		4.2 Handle fabrics or materials according to fabric requirements
		4.3 Operate machine or equipment in accordance with manufacturer instructions and workplace procedures
		4.4 Apply spotting technique in accordance with workplace procedures and spotting agent directions
		4.5 Dry, hang or store article correctly, label and take to the correct area for dry cleaning
		4.6 Record and report non-removable stains and defects according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• WHS requirements
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Types of special spotting agents include one or more of the following:	• wet-side and dry-side agents: • sodium thiosulphate • formic acid • oxalic acid • iodine • acetone • methyl alcohol • oxidising and reducing bleaches • digestion agents • solvents • detergents
Safety and handling requirements include one or more of the following:	• PPE • procedures for use of certain types of container materials (e.g. plastic and metal) • flammability • solubility • sample testing requirements • requirements for mixing and diluting
Fabric requirements include one or more of the following:	• tamping requirements • brushing requirements • special needs for keeping fabric flat or not • rinsing needs • procedures for use of certain equipment and chemicals • susceptibility to breaks and creasing • side of fabric upon which to apply spotting
Advanced spotting processes and procedures include one or more of the following:	• digestion • bleaching • steam treatment • synthetic detergent treatment • ammonia action

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• chemical action • oxidising • reducing
Relevant documentation includes one or more of the following:	• information about the procedure employed • record of non-removable stains and defects • customer invoicing • customer pick-up information

Assessment Requirements for MSTDC3001 Perform spotting function in dry cleaning operations

Modification History

Release 1. Supersedes and is equivalent to LMTDC3003A Perform spotting function in dry cleaning operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- identifying and classifying types of spotting agents, determining applications of spotting agents to specific types of stains, and their application procedures
- identifying particular stains and their removal procedures
- identifying special fabrics, fabric characteristics and care requirements prior to selection of spotting procedure
- selecting spotting agents and conducting procedure appropriate to the type of stain, fibre and fabric, and dye and colour characteristics, for a range of at least (10) ten articles, with different spotting requirements and common fabric types
- conducting spotting procedures with a variety of at least five (5) special fabrics, with a variety of stains or marks
- documenting spotting agents and procedure applied
- preparing and mixing spotting agents accurately and safely, using related measuring and other dispensing or dosing equipment
- drying, hanging, storing, labelling and transferring article according to workplace practices to meet quality requirements
- recording and reporting non-removable stains and defects according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- the range of spotting agents and their application to specific stains
- spotting resource requirements:
  - spotting board
  - drying cabinet
  - tumbler

  - spotting brushes
  - spatula
  - towel
  - cheesecloth
  - blotters
  - relevant machines and equipment
- application procedures for spotting agents
- the differences between oxidising and reducing bleaches
- rules for bleaching
- acceleration processes
- safety and handling and storage requirements of spotting agents
- procedures for stain identification
- types of stains and their characteristics:
  - organic or non-organic
  - dye stains
  - albumin stains
  - protein stains
  - vegetable adhesives
  - mustard
  - tomato sauce
  - wine
- the characteristics and qualities of special fabrics:
  - taffeta
  - satin
  - crepe
  - chiffon
  - moire fabrics
  - embossed fabrics
  - pile fabrics
  - velvet
  - metallic fabric
  - pigment print
  - flock prints
  - acetate sharkskin
  - sequins
  - wools and silks
  - smooth silks and cottons
- requirements for handling and care of fabrics during the spotting process
- characteristics of fibres, fabrics, and dyes or colours, and the effects of the spotting procedure

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- procedures for identifying the type of stain:
  - considering the information provided by the customer
  - identifying the colour of the stain
  - identifying the feel or odour of the stain
- machinery and equipment requirements of spotting techniques
- factors affecting the spotting process:
  - time
  - temperature
  - moisture
  - ph concentration
- measuring equipment and numeracy relevant to preparing solutions
- workplace procedures for mixing and preparing spotting agents and procedures for operating machines and equipment
- environmental aspects related to workplace and machine or equipment operation and manual handling
- quality practices
- workplace practices
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in conducting spotting functions in dry cleaning operations, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDC3002 Dry clean garments with special treatment requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC3002A Dry clean garments with special treatment requirements

Application

This unit of competency covers the skills and knowledge required to determine and conduct dry cleaning of garments that require special treatment and handling.

This unit of competency applies to the dry cleaning of leather, suede, wedding gowns and vintage clothes or other fabrics and garments, which require special treatment and handling.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work may be self-directed and unsupervised.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to dry clean garments**	2.1	Analyse garments to determine dry cleaning requirements
		2.2	Confirm customer requirements
		2.3	Determine dry cleaning processes for garment
		2.4	Seek information to support skill development when garment dry cleaning requirements are difficult to identify
		2.5	Document dry cleaning requirements and communicate with team members, where required
		2.6	Tag garment for identification
3	**Perform dry cleaning**	3.1	Prepare machine and solvents for dry cleaning
		3.2	Conduct spotting and select program for garment requirements
		3.3	Select additive dispensing and prepare for dosing system, where relevant
		3.4	Operate machine and monitor machine operation in accordance with operating instructions and workplace procedures
		3.5	Monitor additives and dosing system for correct operation and report faults where appropriate
		3.6	Unload garment using correct manual handling techniques and complete records
4	**Inspect garment**	4.1	Inspect garment to determine if further cleaning or

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

and complete operations		finishing is required to meet quality standards
	4.2	Conduct further cleaning or finishing
	4.3	Complete documentation and prepare garment for customer to collect

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS requirements
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Determine dry cleaning requirements include the following:	• identifying fabric, trim and features that require special processing • interpreting garment labelling • identifying spotting requirements of garment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Dry cleaning processes include one or more of the following:	• selection of solvents • spotting processes • checking of garment cleaning requirements • timing of dry cleaning processes • use of machines and equipment • drying and pressing processes

Assessment Requirements for MSTDC3002 Dry clean garments with special treatment requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC3002A Dry clean garments with special treatment requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, include:

- reading and following work instructions, standard operating procedures and safe work practices
- determining cleaning requirements for at least five (5) different types of complex garments
- using and handling additives and chemicals safely
- preparing machine and solvents for dry cleaning, conduct spotting, and selecting program for garment requirements
- selecting and monitoring additive dispensing and dosing system, where relevant
- operating and monitoring machine in accordance with operating instructions and workplace procedures, for at least five (5) special or complex garments
- unloading garment using correct manual handling techniques, inspect for stains or further work, and complete records
- monitoring and completing dry cleaning operation and inspecting articles to maintain quality requirements
- documenting, assessing and reporting faults
- completing documentation and preparing garment for customer to collect.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- cleaning requirements of special fibres and fabrics
- handling and cleaning procedures for complex garments, such as:
  - wedding gowns
  - vintage clothes
  - leather
  - suede
  - other garments that require special treatment and handling
- machine operation, program selection, and monitoring procedures for complex garments

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- use of solvents for complex garments:
  - perchlorethylene
  - white spirit
  - hydrocarbons
- environmental aspects related to workplace, and machine or equipment operation and manual handling, including consumable or hazardous materials
- quality practices
- workplace practices
- effective communication
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in conducting safe handling of dry cleaning chemicals and solvents, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3002 Digitise artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3002A Digitise artwork for computerised embroideries

Application

This unit of competency covers the skills and knowledge required to apply fundamental digitising techniques to artwork for computerised embroidery production.

The unit of competency applies to a range of digitising techniques using industry standard software to convert artwork from images to production of embroideries to industry standard. It includes use of manual and automatic digitising techniques, documenting and storing images, and producing samples to confirm result meets artwork specifications.

Work involves liaison with specialist embroiderers and digitisers. Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to digitise artwork for computerised embroideries**	2.1	Use computer basic operations, installing and navigating software to source and import selected artwork
		2.2	Prepare materials and equipment for digitising according to design specifications
		2.3	Digitise shapes using manual techniques
		2.4	Apply automated digitising techniques
3	**Develop digitised artwork**	3.1	Select and apply a range of fill and outline stitch types, and save design to library
		3.2	Complete image to stitch conversion, adding complex fills to selected designs, and make colour selections
		3.3	Adjust embroidery designs and optimise embroidery stitch quality
		3.4	Finalise design to optimise productivity and quality
		3.5	Prepare for export and save to library
		3.6	Prepare designs for output to printer and machine
4	**Complete embroidery sample and**	4.1	Select fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements

finalise work	4.2	Complete a range of embroidery pieces, according to specifications to test design specifications
	4.3	Minimise and dispose of waste according to environmental guidelines and workplace procedures
	4.4	Seek feedback and integrate into outcomes
	4.5	Maintain records according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Software includes:	• any software classed as a digitising software (as

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

opposed to customising or editing software)

Import selected work includes the following:	• opening software and exploring workspace functionality, elements and icons • setting defaults to machine requirements • determining image importation requirements • processing images as necessary in preparation for automated and semi-automated digitising techniques • recognising and selecting file types • importing image into working area
Prepare materials and equipment includes the following:	• selecting machine format and confirming capability to meet image requirements • selecting fabric type • selecting workspace/canvas and adjusting colour • identifying colour blocks and colour thread changes and adjusting • setting up thread palette • determining and planning optimum digitising sequence • manually adjusting stitching order and making colour changes to selected areas
Manual digitising techniques include one or more of the following:	• identifying and applying basic stitch types • creating free shapes with fixed angle stitching, with and without holes • creating free shapes with turning stitching, with and without holes • creating borders, runs and details
Automated digitising techniques include one or more of the following:	• converting file types and manipulating for application • converting design objects and shapes to embroidery and digitising using semi-automated and fully automated techniques
Fills and outlines include one or more of the following:	• modifying basic property options, including design size, to meet specific design requirements • selecting and altering fill stitch pattern properties (single and multiple areas) and direction

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- selecting and altering outline properties
- creating a realistic computer representation (3-D view)

Adjust embroidery designs and optimise stitch quality includes one or more of the following:

- adjusting image inclusions and objects to support design effects
- introducing machine hoop, for output sizing, and integrating into design
- adjusting stitch densities and lengths and eliminating small stitches
- optimising corner stitching and long satin stitches
- minimising stitch bunching
- stabilising fabric with automatic underlays
- stitching design
- assessing and adjusting pull compensation

Finalise design includes one or more of the following:

- assessing stitch sequence, stitch entry and exit points, and start/end of design and confirming optimal quality outcome
- assessing and revising insertion and deletion of trim functions, where possible, to optimise productivity
- assessing and revising colour sequencing, where possible, to optimise productivity
- making adjustments to digitising specifications to ensure optimal quality outcome of embroidery

Output to printer and machine includes the following:

- creating template and worksheet, printing and checking to ensure design requirements are achieved
- exporting completed design to the machine ready for stitching according to manufacturer specifications and save for later access
- printing design reports

File types includes one or more of the following:

Bitmap:

- .jpeg
- .gif
- .tiff
- .bmp.
- png

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	Vector: • .wmf • .emf • .eps/.ps • .ai • .cdr
Optimum digitising sequence includes the following:	• minimising registration problems caused by fabric distortion • planning colour sequence

Unit Mapping Information

Assessment Requirements for MSTDE3002 Digitise artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3002A Digitise artwork for computerised embroideries

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- using computer basic operations, installing and navigating software to source and import selected artwork
- preparing materials and equipment for digitising according to design specifications
- applying a range of automatic, semi-automatic and manual digitising techniques to process embroidery design
- selecting and applying a range of fill and outline stitch types, and saving design to library
- completing image to stitch conversion, adding complex fills to selected designs, and making colour selections
- finalising design to optimise productivity and quality, prepare for export and save to library
- preparing designs for output to printer and machine
- demonstrating ability in digitising techniques through production of a variety of at least five (5) embroidery pieces, according to specifications
- maintaining records according to work practices.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- workplace functionality:
  - tool bar
  - navigations

    - templates.

Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in digitising artwork for computerised embroideries, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3003A Apply advanced digitising techniques to produce computerised embroideries

Application

This unit of competency covers the skills and knowledge required to apply advanced digitising techniques to a range of items.

The unit of competency applies to advanced level digitising techniques to produce computerised embroideries.

Work involves liaison with specialist embroiderers and digitisers.

Work may be conducted in small to large scale enterprises such as operational workplace activities or home-based activities, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTDE3002 Digitise artwork for computerised embroideries

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare advanced digitising techniques**	2.1	Prepare materials and equipment for digitising
		2.2	Use a range of advanced stitching techniques
		2.3	Identify colour blocks and colour thread changes, and adjust to meet design specifications.
		2.4	Manually adjust stitching order and make colour changes to selected areas, as required
		2.5	Create new thread charts, modify existing thread charts and mix thread colours to meet design requirements
		2.6	Create alternative stitch-out options for different colourways, fabrics and placements
		2.7	Adjust outline nodes to create different shapes
		2.8	Use a range of advanced editing techniques to modify designs and create and enhance design effects
3	**Complete embroidery sample**	3.1	Select fabric, stabiliser, toppings and backings, needles, thread and hoop types and use according to the design production requirements
		3.2	Complete embroidery in an efficient manner and inspect against design specifications
		3.3	Minimise waste and dispose of according to

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			environmental guidelines
4	**Create and manage files and design libraries**	4.1	Establish styles and properties for designs and fabrics
		4.2	Create thread charts and customise according to design requirements
		4.3	Create templates for different styles of work
		4.4	Define machine formats and hoops for designs
		4.5	Convert design collections, catalogue and archive according to workplace requirements

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Prepare materials and equipment includes the following:	• selecting machine format and confirming capability to meet image requirements • manipulating file types and convert for digitising • selecting fabric type • selecting workspace/canvas and adjusting colour • setting up thread palette • determining and planning optimum digitising sequence
Advanced stitching techniques include one or more of the following:	• creating and stitching a variety of gradient patterns • creating and stitching an embossed area • creating texture effects using tatami offsets and pattern splits • creating and stitching a variety of single and dual motifs • creating and stitching a variety of stamp fill patterns • creating and stitching a range of decorative fills and outlines according to design requirements • creating stitch patterns with carving stamps • creating user-defined splits according to design requirements • creating and adjusting a stable underlay on new or existing embroidery design
Optimum digitising sequence includes the following:	• minimising registration problems caused by fabric distortion • planning colour sequence
Stamp fill patterns include one or more of the following:	• existing (pre-programmed) • individually created • placement • size • direction • repetition • spacing • layout
Files and design libraries include one or more of the	• styles and properties for designs and fabrics • thread charts

MSTDE3004 Generate artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3004A Generate artwork for computerised embroideries

Application

This unit of competency covers the skills and knowledge required to obtain and create images suitable for computerised embroidery production.

The unit of competency includes scanning, creating and obtaining images; importing into digitising software for embroidery production; and producing a sample to confirm image suitability.

Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Digitising and computerised embroidery

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 **Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to generate artwork**	2.1	Identify design and embroidery considerations for image selection
		2.2	Establish software and technology requirements to obtain images
		2.3	Source images and download from internet sources
		2.4	Source hard copy images and scan into digital format
		2.5	Assess image quality and identify opportunity for improvements or alterations
		2.6	Confirm copyright status of selected images
		2.7	Assess suitability of images for digitising and confirm capacity of software
3	**Create or edit artwork**	3.1	Create artwork and convert into digital format
		3.2	Navigate software to edit and alter images
		3.3	Make alterations and/or improvements and save file in suitable file types
		3.4	Import image into digitising software
		3.5	Enter artwork specifications into digitising software
4	**Complete embroidery and review outcomes**	4.1	Select fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements
		4.2	Create embroidery and inspect against design specifications

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.3	Confirm digitising specifications and process as appropriate to achieve embroidery outcomes in a simple and fully automated manner
4.4	Minimise and dispose of waste according to environmental guidelines
4.5	Seek feedback and integrate into outcomes
4.6	Save and file artwork according to the workplace filing requirements

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Design and embroidery considerations include one or more of the following:	• size • shape • quality • use of colour • editing options • image inclusions • compatibility with client profile • complexity/simplicity • production cost
Artwork includes one or more of the following:	• clipart • wingdings • text • borders • pictures
File types include one or more of the following:	• .jpeg • .gif • .tiff • .bmp • .wmf • .emf • .png

Assessment Requirements for MSTDE3004 Generate artwork for computerised embroideries

Modification History

Release 1. Supersedes and is equivalent to LMTDE3004A Generate artwork for computerised embroideries

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- setting up and using a scanner
- accessing and obtaining a range of images from internet sources
- complying with copyright obligations for using images
- importing selected artwork into digital format
- creating or editing artwork using suitable software
- applying creativity to use of colour, texture, shape, balance and composition
- converting images into digital format
- creating at least five (5) embroidery samples on different fabrics that comply with design specifications
- saving and filing artwork according to the workplace procedures.

Knowledge Evidence

- Evidence must be provided that demonstrates knowledge of:
- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines

MSTDE3005 Replicate traditional hand craft techniques

Modification History

Release 1. Supersedes and is equivalent to LMTDE3005A Replicate traditional hand craft techniques

Application

This unit of competency covers the skills and knowledge required to apply specialised digitising techniques to replicate traditional hand craft techniques on a computerised embroidery machine.

The unit of competency applies to using industry standard software to specify design properties and convert artwork for the computerised production of a range of traditional embroidery techniques.

Work may be conducted in small to large scale enterprises, such as operational workplace activities or home-based activities.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTDE3002 Digitise artwork for computerised embroideries

MSTDE3003 Apply advanced digitising techniques to produce computerised embroideries

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to replicate traditional hand craft techniques**	2.1	Confirm work requirements and prepare workspace
		2.2	Source and select images, import into software and edit, as required
		2.3	Save artwork in appropriate file type
3	**Digitise for embroidery techniques**	3.1	Identify application and characteristics of traditional hand craft techniques and confirm suitability for design requirements
		3.2	Select traditional hand craft technique and determine properties in digitised image
		3.3	Apply creativity to use of colour, texture, shape, balance and composition
		3.4	Save finished design to library
		3.5	Create template and worksheet, print and check to ensure design requirements are met
		3.6	Export completed design to the machine ready for stitching according to manufacturer specifications

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Complete embroidery pieces and finalise work**	4.1 Select suitable fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements
		4.2 Create embroideries to replicate traditional hand craft techniques on different fabric types suitable for each of the techniques
		4.3 Minimise waste and dispose of according to workplace procedures and environmental guidelines
		4.4 Seek feedback and integrate into outcomes

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

File types include one or more of the following:	• .jpeg • .gif • .tiff • .bmp • .wmf • .emf • .png
Traditional hand craft techniques include the following:	• blanket stitch • redwork • cross-stitch • appliqué • quilting • stippling • chain stitch • crazy quilting • lace • candlewick
Properties in digitised image include one or more of the following:	• underlay • fill pattern • outline • colour • density • pull compensation • stabilisation • stitch points and corners • size

Assessment Requirements for MSTDE3005 Replicate traditional hand craft techniques

Modification History

Release 1. Supersedes and is equivalent to LMTDE3005A Replicate traditional hand craft techniques

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- identifying application and characteristics of traditional hand craft techniques and confirm suitability for design requirements
- selecting traditional hand craft technique and determine properties in digitised image
- applying creativity to use of colour, texture, shape, balance and composition
- saving finished design to library and exporting completed design to the machine ready for stitching according to manufacturer specifications
- selecting fabric, needles, thread, stabiliser and hoop to meet design specifications
- digitising and sewing separate embroideries on different fabric types using ten (10) traditional hand craft techniques
- seeking and applying feedback to enhance outcomes
- complying with workplace procedures
- documenting and storing artwork.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of machines: microprocessor or computer control
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic sewing machine operations
- software functionality
- computer basic operations
- basic machine embroidery techniques
- colour, texture, shape, balance and composition theory
- traditional hand craft techniques and uses:

- range of digitising techniques
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in replicating traditional hand craft techniques, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTDE3006 Digitise text to produce embroidered lettering

Modification History

Release 1. Supersedes and is equivalent to LMTDE3006A Digitise text to produce embroidered lettering

Application

This unit of competency covers the skills and knowledge required to digitise and produce embroidered lettering.

The unit of competency applies to creating a range of pre-digitised fonts and digitising techniques using industry standard software to produce embroidered lettering. Work involves liaison with specialist embroiderers and digitisers. Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTDE3001 Apply hooping and fabric handling techniques

MSTDE3002 Digitise artwork for computerised embroideries

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Create basic lettering and complex text paths**	2.1	Confirm work requirements, prepare work area and open software
		2.2	Create basic lettering
		2.3	Transfer files to machine data library for stitching according to manufacturer specifications
		2.4	Introduce complex text paths and use with an existing embroidery file
		2.5	Select existing embroidery and combine with text paths
		2.6	Save file to library and export to machine for stitching according to manufacturer specifications
3	**Create artistic fonts**	3.1	Create text embroidery and shadows, fill techniques and colour options to create effects
		3.2	Use variations in font style, size and effects for shaping words and achieving precise replication of existing printed material
		3.3	Use windings/webdings or equivalent, both as a font and individually as a picture
		3.4	Combine windings/webdings with other fonts
		3.5	Save file to library and export to machine for stitching according to manufacturer specifications
4	**Create a monogram**	4.1	Select letters and font and adjust for single, double and triple letter monograms

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		4.2	Use fill techniques and colour options to create effects
		4.3	Select appropriate underlay
		4.4	Use outline options with and without fill stitches to create effects
		4.5	Use tools to adjust images as required
		4.6	Save file to library and export to machine for stitching according to manufacturer specifications
5	**Complete embroidery**	5.1	Select fabric, stabiliser, toppings and backings, needles, thread and hoop types, and use according to the design production requirements
		5.2	Create embroidery to demonstrate a range of digitised text techniques and inspect against design specifications
		5.3	Minimise waste and dispose of according to workplace procedures and environmental guidelines
		5.4	Seek feedback and integrate into outcomes
		5.5	Document and store artwork

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Digitised text techniques include the following:

- basic lettering
- complex text paths
- artistic fonts using variation in style, size, colour, wingdings, fill, outline and effects
- monograms

Basic lettering includes one or more of the following:

- introducing stitched letters using basic fonts
- creating text on a straight line path
- using bold and italic options
- adjusting font size to create various size options
- creating multi-line text embroidery

Text paths include one or more of the following:

- arc
- freehand
- ellipse
- angle
- rotation

Complex text paths include one or more of the following:

- creating and adjusting upper and lower arc paths
- creating and adjusting an ellipse path
- creating and adjusting a freehand path
- using above, on and below the line settings with the different paths
- adjusting individual letter positions (on all above paths)
- selecting different font styles and using on different paths
- reviewing effects for suitability to meet design brief

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Fills include one or more of the following:	• stamp pattern • motif fill • contour • radial • cross-stitch
Underlay includes one or more of the following:	• edge run • centre run • tatami • grid • zigzag • double zigzag • complex grid • complex edge
Adjusting font size includes one or more of the following:	• flip • rotate • mirror image • angle • copy • paste • resize • reshape • proportion • position • align • scale • skew

Assessment Requirements for MSTDE3006 Digitise text to produce embroidered lettering

Modification History

Release 1. Supersedes and is equivalent to LMTDE3006A Digitise text to produce embroidered lettering

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- applying creativity to use of colour, texture, shape, balance and composition to create basic lettering and complex text paths
- creating text embroidery and shadows, fill techniques and colour options to create effects
- using variations in font style, size and effects and for shaping words and achieving precise replication of existing printed material
- using a range of techniques to create monograms
- selecting fabric, needles, thread, stabiliser and hoop to meet design specifications
- producing basic digitised lettering, complex text paths, monograms and artistic text
- saving files to library and exporting to machine for stitching according to manufacturer specifications
- demonstrating digitising text techniques through production of at least two (2) embroidered lettering pieces using different fabrics to meet artwork specifications
- seeking and applying feedback to enhance outcomes
- complying with workplace procedures
- documenting and storing artwork.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- computer navigation to use basic software functions
- machine embroidery techniques
- text path:
  - arc

MSTDE3007 Demonstrate features of digitised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3007A Demonstrate features of digitised embroidery machines

Application

This unit of competency covers the skills and knowledge required to demonstrate features of digitising and computerised embroidery equipment in a retail, commercial or industry setting.

The unit of competency includes the demonstration of program and machine features and working requirements to customers. It typically applies in a retail, commercial or industry environment where the worker is responsible for sales advice and service of specialised digitising and computerised embroidery equipment. It requires skills to be able to demonstrate features and options available for the user.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Digitising and computerised embroidery

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to demonstrate features of digitised embroidery machines**	2.1	Identify intended uses and priorities for equipment and match to machine selection
		2.2	Establish customer requirements
		2.3	Access and select information resources
3	**Explain features and demonstrate machines and digitising functions**	3.1	Identify and describe machine features, typical problems and their remedies
		3.2	Demonstrate machine preparation, basic care and maintenance requirements
		3.3	Demonstrate digitising and software functions
4	**Demonstrate embroidery production**	4.1	Select image and digitise for production
		4.2	Demonstrate relevant software options to digitise and edit images and text
		4.3	Demonstrate embroidery procedures
		4.4	Produce embroidery sample and explain process to customer
5	**Confirm customer understanding**	5.1	Seek feedback to confirm customer understanding of key features of the equipment and process
		5.2	Use effective communication skills to invite and respond to questions
		5.3	Provide customer with support information or documentation, as required

Assessment Requirements for MSTDE3007 Demonstrate features of digitised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3007A Demonstrate features of digitised embroidery machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- demonstrating the range of features, functions and procedures, of a digitised embroidery machine on at least two (2) occasions
- reading and following work instructions, standard operating procedures and safe work practices and other reference material
- applying relevant standards
- explaining information on standard operating procedures (SOPs), work instructions and other reference material
- identifying and describing machine features, typical problems and their remedies
- maintain machine and equipment to suppliers requirements
- producing embroidery sample and explaining process to customer
- seeking feedback to confirm customer understanding of key features of the equipment and process
- using effective communication skills to invite and respond to questions
- providing customer with support information or documentation as required.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- basic care and maintenance requirements
- computer navigation to access and manipulate an image
- software functionality
- basic machine embroidery techniques
- types and properties of fabric
- colour, texture, shape, balance and composition theory
- hoop types
- needle types and uses:

MSTDE3009 Maintain computerised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3009A Maintain computerised embroidery machines

Application

This unit of competency covers the skills and knowledge required to set up and maintain computerised embroidery machines to ensure efficient operation.

The unit of competency applies to maintenance work on embroidery machines and responding to production problems. It targets the operator or assigned personnel who address common performance problems that do not require specialised sewing machine mechanic skills.

Work involves liaison with operators, if required.

Work may be conducted in a variety of environments, such as operational workplace activities, or home-based activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to maintain computerised embroidery machines**	2.1	Identify type of machine and determine maintenance requirements and schedule
		2.2	Inspect componentry of equipment, assess for wear and identify any need for maintenance
		2.3	Operate machine to assess performance and identify impact of fabric and needles
		2.4	Identify and adjust possible faults in software application or digitised file
3	**Conduct basic maintenance**	3.1	Identify performance problems and determine root cause
		3.2	Assess timing and adjust according to manufacturer specifications
		3.3	Assess and adjust positioning and timing of cutters, as required
		3.4	Assess and address other operational problems
		3.5	Identify electronic or major operational problems and refer to suitable personnel
		3.6	Document maintenance work according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • standard operating procedures • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Software includes:	• any software classed as a digitising software (as opposed to customising or editing software)
Performance problems include one or more of the following:	• needle breaking • thread breaking • missing stitches • stoppage
Root cause includes one or more of the following:	• incorrect timing • electrical faults • sharp or worn edges or components • incorrect needle or positioning • incorrect thread or material components • machine needs oiling or cleaning • incorrect tension

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- blockages or clogging in components
- lack of operator skill

Assessment Requirements for MSTDE3009 Maintain computerised embroidery machines

Modification History

Release 1. Supersedes and is equivalent to LMTDE3009A Maintain computerised embroidery machines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- maintain at least two (2) computerised embroidery machines
- reading and following work instructions, standard operating procedures, safe work practices, manufacturer specifications
- applying relevant standards
- assessing operational performance of machine
- determining impacts of materials and componentry on performance
- identifying performance problems and determining root cause
- identifying and adjusting possible faults in software application or digitised file
- assessing timing and adjusting according to manufacturer specifications
- assessing and adjusting positioning and timing of cutters, as required
- identifying electronic or major operational problems and referring to suitable personnel
- documenting maintenance work according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- embroidery machines: domestic (single or multi-needle) or commercial (single or multi-head) machines
- computer navigation to use basic software functions
- machine embroidery techniques
- common performance problems, typical causes and related adjustments
- stabilisers, toppings and backings:
  - water soluble
  - tear away
  - iron on
  - cut away
  - varying weights

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- fabric types and properties:
  - woven
  - non-woven
  - knits
  - lightweight
  - heavyweight
- hoop types and uses:
  - tubular
  - sash
  - screw
  - cap
  - square
  - round
  - spring
- needle types and uses:
  - standard
  - metalfil
  - embroidery eye
  - stretch
- thread types:
  - polyester
  - metallic
  - rayon
  - cotton
- workplace policies and procedures
- environmental aspects related to workplace and machine or equipment operation and manual handling
- workplace practices
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in maintaining computerised embroidery machines, at least to the level being assessed, with relevant industry knowledge and experience.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2001 Design and produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD2001B Design and produce a simple garment

Application

The unit of competency covers the skills and knowledge required to design, plan and produce a simple garment. Production of the garment involves the use of a domestic sewing machine or plain lockstitch machine. Designs involve modification of existing blocks or patterns.

Work is conducted according to defined procedures and would not be applied in a large scale production environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times
		1.3 Use appropriate personal protective equipment (PPE) in

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Plan and prepare to produce garment**	2.1	Identify and explore influences and inspirations for design concept
		2.2	Produce storyboard or sketches to assist in the development of ideas
		2.3	Discuss ideas and design concepts with appropriate personnel for review and development of design
		2.4	Select and modify pattern or blocks to suit design and garment size requirements
		2.5	Select, check and prepare materials, tools and equipment
3	**Produce garment**	3.1	Use a machine to produce garment according to pattern
		3.2	Assess garment against design and pattern, and rectify garment faults
		3.3	Finish garment according to design requirements
4	**Review garment production process**	4.1	Review production techniques and design to identify future improvements
		4.2	Clean work area and equipment, and store tools and equipment

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • personal protective equipment (PPE) • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS requirements
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Garments include one or more of the following:	• accessories • straight seamed, draw string skirt • t-shirt • smock dress • other garment requiring a small range of sewing techniques and use of a domestic machine and overlocker
Fabrics include one or more of the following	• stable woven and knitted fabrics, such as cotton drill, calico, double knit, rugby knit and poplin
Appropriate personnel include one or more of the following:	• trainer • co-worker • mentor
Tools and equipment include one or more of the following:	• pins • scissors • needle and thread • marker or chalk

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Machines include one or more of the following:	• domestic sewing machine • plain lockstitch machine • overlocker

Assessment Requirements for MSTFD2001 Design and produce a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD2001B Design and produce a simple garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- producing storyboard or sketches to demonstrate design ideas and developing design concept
- developing a pattern to suit design and size requirements
- selecting and preparing fabric, materials, tools and equipment
- using a machine to produce at least two (2) simple garments, using the same or different, fabrics, patterns or blocks
- producing simple garments to meet identified pattern and size requirements
- rectifying garment faults and finishing garment to meet design requirements
- identifying improvements in garment production techniques for future production
- cleaning work area and storing materials, tools and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- components of the design process:
  - sketches
  - pictures
  - storyboard
  - fabric samples
  - sharing and reviewing ideas
- techniques to modify blocks and patterns
- techniques in using a sewing machine and overlocker
- sizing requirements
- materials for simple garment:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - fabric
  - thread
  - buttons
- characteristics of fabrics affecting fabric suitability
- typical fault conditions and related fault-finding procedures:
  - holes
  - inconsistent sewing
  - broken thread
- characteristics of types and styles of threads
- simple equipment maintenance techniques

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in designing and producing a simple garment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2002 Apply printing techniques to produce Indigenous textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2002B Apply printing techniques to produce indigenous textile designs

Application

This unit of competency covers the skills and knowledge required to apply printing techniques to produce Indigenous textile designs

The unit of competency applies to Aboriginal and Torres Strait Islander students that use stencil, lino cut, block, stamp or silk screen printing techniques to produce culturally-specific designs and artworks for fabrics.

The unit of competency should be customised to accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for printing Indigenous textile designs**	2.1	Identify and apply protocols for developing culturally-specific designs
		2.2	Identify suitable fabric and printing technique
		2.3	Develop single or two colour design suitable for cultural context and chosen fabric and printing technique
		2.4	Prepare fabric, tools and equipment
3	**Print fabric**	3.1	Apply printing technique to fabric according to WHS practices
		3.2	Use tools and equipment effectively and safely to achieve desired result
		3.3	Complete work systematically with attention to detail
4	**Review design and printing process**	4.1	Assess outcome of printing
		4.2	Modify design and technique, as required
		4.3	Clean and store materials and equipment

Assessment Requirements for MSTFD2002 Apply printing techniques to produce Indigenous textile designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2002B Apply printing techniques to produce indigenous textile designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- applying protocols for developing culturally-specific designs
- identifying elements and principles of design in identified Aboriginal and Torres Strait Islander artwork
- developing design suitable for cultural context and chosen fabric and printing technique
- preparing fabric, tools and equipment
- using tools and equipment effectively with attention to detail to achieve desired result
- printing a single or two colour design on at least three (3) fabric samples
- reviewing and modifying design and technique as required
- cleaning and storing materials and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- cultural protocols for using images, designs and printing techniques
- examples of works of identified Aboriginal and Torres Strait Islander artists and textile designers
- elements and principles of design in identified Aboriginal and Torres Strait Islander artwork
- printing processes and practices used by the identified community
- printing techniques:
  - stencil

MSTFD2004 Work within an Indigenous cultural framework

Modification History

Release 1. Supersedes and is equivalent to LMTFD2004B Work within an indigenous cultural framework

Application

This unit of competency covers the skills and knowledge required to work within an Indigenous cultural framework.

The unit of competency applies to Aboriginal and Torres Strait Islander students who wish to produce culturally-specific textile products and identify business opportunities. It applies to key cultural practices and processes used for the design and development of textile works, garments and accessories.

The unit of competency should be customised according to the customs and protocols of the relevant communities. Work should accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Access information on cultural influences**	1.1	Identify sources of information on local cultures relevant to individual
		1.2	Use appropriate cultural practices to access cultural information
		1.3	Identify cultural influences, ethics and law relating to production of cultural works
2	**Apply relevant work and cultural practices to design and develop textile products**	2.1	Identify relevant procedures and materials common to design and development of textile works, garments and accessories
		2.2	Identify customary structure, organisation and business procedures of relevant Aboriginal and Torres Strait Islander community
		2.3	Determine production processes for converting materials into textile products
		2.4	Comply with cultural protocols, personal rights, responsibilities and legal obligations to design and produce culturally-specific textile products
3	**Investigate business opportunities for cultural works**	3.1	Identify significant people to support design and development of textile works, garments and accessories
		3.2	Identify opportunities for production and sale of cultural textile products
		3.3	Identify potential supply chain components

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Information sources include one or more of the following:	• community elders • family members • artworks and artists • stories • community members • government agencies and services • written, electronic and audio visual material • art centres and galleries
Cultural information includes one or more of the following:	• stories • creative processes and practices • symbols • themes • processes and practices • protocols and procedure • region, environment • cultural rites • artworks • economic systems
Design and development procedures include one or more of the following:	• sourcing and uses of raw materials • dyeing • printing • use of tools and equipment • use of culturally significant themes and stories • involvement and endorsements from significant people • respect for traditional laws and values
Protocols include the following:	• the set of rules applying to behaviour/practices in a specific cultural

Assessment Requirements for MSTFD2004 Work within an Indigenous cultural framework

Modification History

Release 1. Supersedes and is equivalent to LMTFD2004B Work within an indigenous cultural framework

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- using appropriate sources and cultural practices to access cultural information
- applying protocols for developing culturally-specific designs
- identifying relevant procedures and materials common to design and development of textile works, garments and accessories
- identifying customary structure, organisation and business procedures of relevant Aboriginal and Torres Strait Islander community
- complying with cultural protocols, personal rights, responsibilities and legal obligations to develop textile products
- identifying at least two (2) opportunities for production and sale of textile products
- identifying potential supply chain components.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- protocols on access to culturally specific information
- safe work practices and procedures
- cultural protocols for using images, designs and printing techniques
- procedures and materials common to design and development of textile works, garments and accessories
- supply chains:
  - product flow
  - raw material
  - production
  - distribution
  - marketing
  - customers
  - business support and administrators
- people to support design and development of textile works, garments and accessories
- production processes:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- textile printing and dyeing
- making patterns
- marking and cutting fabric
- sewing
- finishing
- colour mixing

- potential opportunities for product sales
- supply chain components.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in Indigenous cultural knowledge, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD2005 Identify design process for fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2005B Identify design process for fashion designs

Application

This unit of competency covers the skills and knowledge required to identify design process for fashion designs.

The unit of competency applies to identifying the criteria for a fashion design brief, and how they impact on the process of producing fashion items. It includes the impact of colour on the design process in a production environment.

Work is conducted according to defined procedures, in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 **Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Prepare for fashion design process**	2.1	Identify the elements and principles of fashion design
		2.2	Identify the criteria of an identified fashion design brief
		2.3	Investigate colour dimensions and colour combinations for fabrics, accessories and components
		2.4	Identify commercial considerations in producing a design
		2.5	Prepare tools, equipment and work space
3	**Prepare colour design**	3.1	Identify relationship between value and intensity and prepare a colour chart for a design brief
		3.2	Use appropriate tools and equipment to prepare a colour wheel and shade scale according to colour mixing principles
		3.3	Colour match all garment components with identified fabric to prepare colour design for production
4	**Review colour design**	4.1	Check that colour charts satisfy specifications and quality criteria
		4.2	Carry out any changes or adjustments as required
		4.3	Document and record design

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Criteria for a fashion design brief include three or more of the following:

- subject matter/garment
- style
- effects
- colour
- size
- fabric
- quantity
- timeframe

Tools and equipment include one of more of the following:

- digital equipment
- software
- fabrics
- hand tools
- pencils, crayons, pens, brushes and paints

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- paper and cardboard

Assessment Requirements for MSTFD2005 Identify design process for fashion designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD2005B Identify design process for fashion designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- interpreting the criteria of a given fashion design brief
- investigating colour dimensions and colour combinations for a variety of fabrics, accessories and components in response to a design brief
- preparing a colour wheel and shade scale according to colour mixing principles
- preparing a colour chart for a design brief
- colour matching all garment accessories and components with identified fabric to prepare colour design for production
- checking colour chart against design brief and quality criteria, and making adjustments, as required
- documenting and recording design.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- elements and principles of design:
  - repetition
  - gradation
  - rhythm
  - radiation
  - harmony
  - contrast
  - dominance
  - proportion
  - balance
  - unity
- role of colour in fashion design

MSTFD2006 Use a sewing machine for fashion design

Modification History

Release 1. New unit

Application

This unit of competency covers the skills and knowledge required to use a sewing machine to align and sew pattern pieces and sew components.

The unit of competency applies to aligning and sewing straight seams, joining flat pieces of stable fabric together, sewing components and stitching hems, using basic stitching.

Work is conducted according to defined procedures and would not be applied in a large scale production environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to use sewing machine**	2.1	Determine materials and machining requirements and develop plan for sewing operations
		2.2	Clean, check, set up and adjust machine according to specifications for work
		2.3	Identify poor machine performance and adjust, as required
		2.4	Check and lay out fabric pieces in sequence according to production operations
3	**Use sewing machine**	3.1	Sew pieces according to pattern requirements and quality standards
		3.2	Use machine according to requirements for efficient work
		3.3	Perform a range of sewing operations to align and sew pattern pieces and sew components.
		3.4	Control machine and handle work according to type of operations, fabrics and product type
4	**Assess quality of sewn work**	4.1	Inspect sewn work against specifications, workplace procedures and quality standards
		4.2	Identify any faults or pieces that do not meet quality standards and take appropriate action
		4.3	Record results of quality inspection and store work ready for next operation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • PPE • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Machines include one or more of the following:	• domestic sewing machine • commercial sewing machine • plain lockstitch sewing machine • overlocker
Materials include one or more of the following:	• fabric • thread • zips • buttons • trims

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Fabrics include one or more of the following	• stable woven and knitted fabrics, such as cotton drill, calico, double knit, rugby knit and poplin • denim, single knits, tricot and gabardine
Components include three or more of the following:	• sleeves • waistbands (straight or shaped) • collars • cuffs • plackets • facings (neck and armhole) • binds • zips (dress, skirt, trouser and invisible) • buttons and buttonholes • pockets (cut away, patch and in seam)
Set-up includes the following:	• correct thread • needle size and type: a variety of size and types, such as standard and ball point • tension setting • attachments
Identify poor machine performance includes:	• identifying worn or damaged parts, and reporting or replacing according to manufacturer specifications • identifying tension faults • identifying poor thread performance or incorrect thread selection • identifying incorrect foot or needle for sewing • identifying impact of poor machine performance on sewing • checking and replacing worn or damaged needles and attachments (feet)
Actions to respond to faults or poor quality include one or more of the following:	• correcting and re-doing work • discarding and recycling fabric and starting again • adjusting machine settings, threading, tension, foot and needle • revising choice of fabric, thread or stitching • seeking advice or further training
Sewing operations include	• aligning and sewing straight seams

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

one or more of the following:	• joining flat pieces of stable fabric together • top stitch, edge stitch, open seams, closed seams and lapped seams • sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points or involving the special handling skills required to accommodate fabric variations • gathering, easing, tucking and stitching curves • hems (double fold, rolled, blind and stitched hem) • darts and pleats

Assessment Requirements for MSTFD2006 Use a sewing machine for fashion design

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against specifications and preparing machine and materials
- demonstrating sewing techniques on a domestic or commercial machine
- using at least two (2) different fabrics, to sew at least three (3) samples of the following operations:
  - aligning and sewing straight seams
  - joining flat pieces of stable fabric together
  - top stitch, edge stitch, open seams, closed seams and lapped seams
- demonstrating sewing techniques using one (1) or more fabrics, to sew at least three (3) different components, and include three (3) of the following operations:
  - gathering, easing, tucking and stitching curves
  - hems (double fold, rolled, blind and stitched hem)
  - darts and pleats
- doing routine maintenance on identified sewing machine
- inspecting completed work to check it complies with workplace procedures and quality, and identifying and correcting faults
- recording results of quality inspection and storing work ready for next stage.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- sewing operations, such as:
  - aligning and sewing straight seams
  - joining flat pieces of stable fabric together
  - top stitch, edge stitch, open seams, closed seams and lapped seams

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - sewing techniques where the positioning, feeding and handling of work pieces involves discretionary changes, contouring or critical stopping points or involving the special handling skills required to accommodate fabric variations
    - gathering, easing, tucking and stitching curves
    - hems (double fold, rolled, blind and stitched hem)
    - darts and pleats
- techniques in using and maintaining identified sewing machine
- characteristics of fabrics:
    - stable woven and knitted fabrics and threads, such as cotton drill, calico, double knit, rugby knit and poplin
    - denim, single knits, tricot and gabardine
- materials, including:
    - fabric
    - buttons
    - zippers
    - trims
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in using a domestic or commercial sewing machine for fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3001 Market design product to local outlets

Modification History

Release 1. Supersedes and is equivalent to LMTFD3001B Market design product to local outlets

Application

This unit of competency covers the skills and knowledge required to market design product to local outlets.

The unit of competency applies to the presentation and sale of a single or small range of fashion design products to local outlets, such as markets, galleries, shops and art centres, or direct to the customer.

Work may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for MSTFD3001 Market design product to local outlets

Modification History

Release 1. Supersedes and is equivalent to LMTFD3001B Market design product to local outlets

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- determining design product or products to be marketed and identifying features and benefits of product
- identifying key customers, purchasing behaviours and potential sales outlets
- exploring pricing options for similar products and sales outlets and determining proposed sale price
- preparing and costing three (3) promotional tools and materials highlighting features and benefits of design products for sale
- negotiating promotional costings and price of product with outlet or customer, as required
- preparing documentation confirming supply arrangements and sale conditions
- developing a process and format to record marketing and sales outcomes
- listing at least one (1) opportunity for varying product design and promotional tools to enhance market for product.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- location of sales outlets and sales practices in local community
- features and benefits of identified products
- purchasing options and sales processes:
  - location of sales outlet
  - purchasing times
  - cash or credit payment options
  - acceptable price range
  - expectations of product performance
  - opportunity to try garments on

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - need to return or exchange items
- promotional tools and practices:
    - display props
    - gimmicks
    - websites
    - labelling
    - special offers

MSTFD3002 Design and produce indigenous printed textiles to a brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD3002B Design and produce indigenous printed textiles to a brief

Application

This unit of competency covers the skills and knowledge required to design and produce printed textiles that reflect Indigenous Australian cultures, in response to a brief.

The unit of competency applies to Indigenous Australians and the use of culturally-specific designs, artworks and production processes and techniques for printed fabrics or textile products. Textile products may involve more than one printing technique.

The unit of competency should be customised to accommodate the image use and design protocols and techniques specific to an Aboriginal or Torres Strait Islander community.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD2002 Apply printing techniques to produce Indigenous textile designs

MSTFD2003 Apply dyeing techniques to produce Indigenous textile designs

MSTFD2004 Work within an Indigenous cultural framework

Competency Field

Fashion design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for producing Indigenous printed textiles**	2.1	Interpret design brief and consult with relevant people to identify key requirements
		2.2	Identify and apply protocols for developing culturally-specific designs
		2.3	Identify and experiment with techniques and develop design concept to obtain desired effects
		2.4	Confirm design and review against requirements of the brief
		2.5	Prepare chosen textile, tools and equipment for printing
3	**Print textiles**	3.1	Apply printing technique according to WHS practices
		3.2	Use tools and equipment effectively and safely to achieve desired result
		3.3	Complete work systematically with attention to detail
4	**Review design and printing**	4.1	Review process to assess outcome in relation to brief
		4.2	Modify printing techniques and design elements, as

Assessment Requirements for MSTFD3002 Design and produce indigenous printed textiles to a brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD3002B Design and produce indigenous printed textiles to a brief

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- applying protocols for developing culturally-specific designs
- identifying requirements of the design brief and confirming with relevant people
- experimenting with techniques and developing a design concept to achieve desired effects
- preparing and using fabric, tools and equipment to print at least three (3) preliminary samples to experiment with technique
- reviewing process and applying printing technique to print a design as specified in the design brief on at least three (3) fabric samples
- completing work systematically with attention to detail
- modifying design and technique as required
- cleaning and storing materials and equipment.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- cultural protocols for using images, designs and printing techniques
- examples of works of Aboriginal and Torres Strait Islander artists and textile designers
- elements and principles of design in Aboriginal and Torres Strait Islander artwork

  - silk screen
  - uses of natural and acrylic paints
  - uses of natural items for stamps
- information resources on fibres and fabrics
- safe practices and procedures

Assessment Conditions

- Assessors must:
- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in designing textiles, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3003 Prepare design concept for a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD3003B Prepare design concept for a simple garment

Application

This unit of competency covers the skills and knowledge required to prepare design concept for a simple garment.

The unit of competency applies to individuals working with the patternmaker or designer to create a design concept for production of a simple garment. The concept is based on historical influences and trends from the 20th Century. Work is supervised, may be conducted in small to large scale enterprises, and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2011 Draw and interpret a basic sketch

MSTFD2005 Identify design process for fashion designs

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Prepare to develop design concept**	2.1	Identify significant events of the 20th Century and fashion trends related to them
		2.2	Identify fashion cycles and garments that contain different design principles
		2.3	Prepare tools, equipment and work space
		2.4	Draw a series of trade sketches to illustrate design principles
3	**Develop design concept**	3.1	Determine garment type and specifications
		3.2	Prepare sketches to illustrate design concept and develop storyboard
4	**Check and review design concept**	4.1	Review sketches and assess against quality criteria
		4.2	Complete documentation relating to storyboard
		4.3	Carry out any changes or adjustments, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • PPE • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS requirements
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Drawing tools and equipment include one or more of the following:	• A3 layout pad • digital equipment • software • fabrics • hand tools • pencils, crayons, pens and paints • paper and cardboard
Significant events include one or more of the following:	• wars • female emancipation • rock and roll • hippy era • technological developments (e.g. plastics and manufactured textiles) • space age
Garments include one or more of the following:	• skirts • trousers/pants

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- shirts/blouses
- dresses

Assessment Requirements for MSTFD3003 Prepare design concept for a simple garment

Modification History

Release 1. Supersedes and is equivalent to LMTFD3003B Prepare design concept for a simple garment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and illustrating selected features of fashion trends related to significant 20th Century events or periods
- drawing a series of trade sketches to illustrate design principles for at least two (2) garment features that represent fashion trends related to a significant 20th Century event or periods
- developing a storyboard and documentation to represent design concept for one (1) simple garment that reflects fashion trends related to a significant 20th Century event
- checking design concept and making required changes, as required to meet relevant industry or Australian Standards that are current at the time this unit is being undertaken

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant industry or Australian Standards that are current at the time this unit is being undertaken
- significant events of the 20th Century that have impacted on fashion trends
- fashion trends relating to garment features, such as:
  - skirt hem lengths
  - sleeve shapes
  - trousers widths
  - lycra
  - hipsters
- design principles and features of fashion trends associated with 20th Century events
- principles of design:
  - repetition
  - gradation
  - rhythm
  - radiation

  - harmony
  - contrast
  - dominance
  - proportion
  - balance
  - unity
- elements of a storyboard:
  - fabrics
  - colours
  - sketches
  - illustrations
  - shapes
  - textures
  - specifications
  - fabric swatches
- quality criteria:
  - proportion
  - perspective
  - symmetry and balance
  - detailing
  - neatness
- work instructions, SOPs and safe work practices.

Assessment Conditions

- Assessors must:
- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in preparing a design concept for a simple garment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD3004 Draw a trade drawing for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD3004B Draw a trade drawing for fashion design

Application

This unit of competency covers the skills and knowledge required to draw an accurate trade or technical drawing based on specifications and a design.

The unit of competency applies to the patternmaking or design room, where accurate trade or technical drawings are required to interpret and clarify a garment design.

Work is supervised and may be conducted in small to large scale enterprises. Work may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

			requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to produce a trade drawing**	2.1	Identify all garment characteristics, components and specifications
		2.2	Select and prepare drawing tools, equipment and workstation
		2.3	Select appropriate templates to prepare trade drawing
3	**Produce a trade drawing**	3.1	Use quality criteria to create a working drawing that correctly represents a pattern piece or garment
		3.2	Draw lines accurately to represent garment specifications
		3.3	Identify and label relevant parts of drawing and include notes relating to construction and design features
4	**Check and complete work**	4.1	Assess trade drawing against design specifications and quality criteria
		4.2	Make changes or adjustments to trade drawing, as required
		4.3	Complete and store documentation relating to trade drawing

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSTFD3004 Draw a trade drawing for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD3004B Draw a trade drawing for fashion design

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- using appropriate tools and equipment to produce working drawings
- using templates to produce drawings that are in proportion and technically correct, showing all details, including front and back view, and incorporating all quality criteria
- completing accurate trade drawings of at least two (2) garments that meet all requirements of the design brief or specification
- drawing lines accurately to represent garment specifications
- identifying and labelling relevant parts of drawing, and including notes relating to construction and design features
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- drawing tools and equipment:
  - paper
  - layout pad
  - pencils, various grades
  - pencil sharpener
  - kneadable eraser
  - ruler
  - black felt tip pens
  - portfolios
  - templates
  - computer with drawing software

MSTFD3005 Use skin, fur or leather to create fashion or textile products

Modification History

Release 1. Supersedes and is equivalent to LMTML3005A Use skin, fur or leather in millinery products

Application

This unit of competency covers the skills and knowledge to use skin, fur or leather to create or embellish fashion, textiles or textile products, such as simple garments, accessories and millinery.

Skills and knowledge in design and production will include the required dimensions of the animal skin or pelt, the techniques and resources required to carry out production according to the design, the intended purpose of the finished product, and the views of the customer in using particular animal skins or pelts.

Skin, fur and leather may be incorporated by hand or simple machining. Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

The unit does not include working with footwear.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for MSTFD3005 Use skin, fur or leather to create fashion or textile products

Modification History

Release 1. Supersedes and is equivalent to LMTML3005A Use skin, fur or leather in millinery products

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- selecting materials and processes to make fashion or textile products that incorporate fur, skin or leather
- developing designs and/or patterns for fashion or textile products that incorporate fur, skin or leather, according to design and performance requirements
- conducting handling and production operations and processes on selected fur, skin or leather and complying with relevant legal and environmental regulations
- applying relevant procedures to produce at least two (2) products using skin, fur or leather
- checking products meet specifications and production requirements
- applying workplace procedures
- completing required documentation

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- production techniques for identified product
- patternmaking and cutting for accessories, simple garments or millinery
- performance requirements of various finished products
- performance and handling requirements of two (2) or more treated and processed animal skins and pelts, such as:
  - leather
  - suede
  - chamois
  - fur
  - feather
  - reptile

MSTFD4001 Apply design studio process

Modification History

Release 1. Supersedes and is equivalent to LMTFD4001B Apply design studio process

Application

This unit of competency covers the skills and knowledge required to apply design studio processes when interpreting and responding to a specified brief to produce a fashion design product.

The unit of competency applies to the integration of skills across the design process and focuses on experimentation of design studio processes to result in the production of a fashion design product. The design brief may be contextualised to a particular context within the fashion industry and includes clear specifications for the product design.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

    - designers
    - patternmakers
    - production supervisors
- quality criteria:
    - proportion
    - perspective
    - symmetry and balance
    - detailing
    - neatness
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in fashion design studio processes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4002 Apply principles of colour theory to fashion design development

Modification History

Release 1. Supersedes and is equivalent to LMTFD4002B Apply principles of colour theory to fashion design development

Application

This unit of competency covers the skills and knowledge required to apply principles of colour theory to fashion design development.

The unit of competency applies to identifying the elements and principles of colour theory, and how they impact on the design process when developing fashion products. It includes the development of a colour wheel and a colour chart for an identified design concept. It applies to using colour in any area of the fashion design process, to create visual effects, influence mood and develop design directions based on colour choices.

Work is supervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTFD2005 Identify design process for fashion designs

Competency Field

Fashion design and technology

Unit Sector

Not applicable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Investigate colour and colour theory**	2.1	Identify sources of information on colour and colour theory
		2.2	Identify the attributes and dimensions of colour
		2.3	Identify the application of colour theory to the fashion design process
3	**Experiment with colour for fashion design**	3.1	Identify the criteria of an identified fashion design brief
		3.2	Investigate colour combinations and relationships for use in fashion design
		3.3	Identify visual or optical effects of colour and colour schemes
		3.4	Investigate colour forecasting options
		3.5	Mix colours to create new combinations or schemes
		3.6	Use appropriate tools and equipment to prepare a colour wheel and shade scale or chart according to colour mixing principles
		3.7	Identify fabric and colour-match all components for production
4	**Use colour to**	4.1	Identify different uses of colour and compare impact on

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

communicate concept or idea		concept or idea
	4.2	Apply colour to fashion templates and use colour to develop fashion storyboards and reflect design concept
	4.3	Check colour chart complies with design brief and quality criteria
	4.4	Document and store colour investigations for future reference

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Visual or optical effects include two or more of the following:	• size • density • value • visual mixing • simultaneous contrast • motion • texture
Criteria for a fashion design brief include two or more of the following:	• subject matter/garment • style • effects • colour • size • fabric • quantity • timeframe
Tools and equipment include two or more of the following:	• digital equipment • software • fabrics • hand tools • pencils, crayons, pens, brushes and paints • paper and cardboard

Assessment Requirements for MSTFD4002 Apply principles of colour theory to fashion design development

Modification History

Release 1. Supersedes and is equivalent to LMTFD4002B Apply principles of colour theory to fashion design development

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- creating a portfolio of fashion pictures and illustrations that reflect different visual or optical effects, moods and colour schemes
- interpreting the criteria of a given fashion design brief
- identifying at least two (2) colour forecasting sources
- preparing a colour wheel and shade scale according to colour mixing principles
- preparing a colour chart for a story board for a design concept
- colour matching all garment accessories and components with identified fabric to prepare colour design for production
- checking colour chart against design brief and quality criteria, and making adjustments if required
- documenting and recording design.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- sources of information on colour and colour theory
- role of colour in fashion design
- colour wheels
- dimensions of colour:
  - value/tone
  - hue
  - chroma/intensity/clarity/saturation
- attributes of colour:
  - mood

MSTFD4003 Assist in preparation of preliminary design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4003B Assist in preparation of preliminary design concepts

Application

This unit of competency covers the skills and knowledge required to assist in the preparation of preliminary design concepts.

The unit of competency applies to preparing preliminary design concepts for garments, for self or others, using generally basic stable fabrics.

It applies to original creation or adaptation of designs or interpretation of sketches for single or multiple production styles and ranges, made-to-measure and theatre costuming.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Prepare to contribute to preliminary design concepts**	2.1	Collaborate with relevant people to identify and confirm design brief details and clarify parameters of the project
		2.2	Identify principles of good fashion design and required Australian Standards
		2.3	Research fashion trends and assess suitability of fabrics to satisfy the project brief
		2.4	Identify a range of possible design concepts with relevant people
3	**Contribute to preliminary design concepts**	3.1	Work with others to develop preliminary design concepts
		3.2	Prepare storyboard themes related to styles, fabrics and colours
		3.3	Contribute positively to ideas and discussion with team members to enhance success of project
4	**Contribute to preparation of the presentation**	4.1	Develop and refine relevant support materials and explanations in conjunction with members of design team
		4.2	Determine and rehearse own role and relationship to others for a presentation meeting
		4.3	Outline features and benefits of designs in a positive manner that encourages approval
		4.4	Assess contribution and identify areas for improvement

Assessment Requirements for MSTFD4003 Assist in preparation of preliminary design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4003B Assist in preparation of preliminary design concepts

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- collaborating with others to generate ideas in response to a design brief
- contributing to selecting and preparing appropriate preliminary design concept for development
- preparing storyboard themes manually or using computer-aided design (CAD) systems related to styles, fabrics and colours
- contributing positively to ideas and discussion with team members and to the development and presentation of the design concept to enhance success of project
- preparing and rehearsing own contribution to a presentation to the client that meets all requirements of the brief and outlines features and benefits
- presenting features and benefits of designs in a positive manner that encourages approval
- reviewing performance and identifying areas for improvement.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- elements and principles of design and how they are used to create good design in the fashion industry
- fashion industry context such as codes of practice, global and local trends, copyright obligations and resource sources
- garment construction, marker making and cutting procedures, including:
  - seam finishes, such as flat seam, blind hem and French seam
  - allocation of seam allowance
  - stitches, such as straight, zigzag, overlock and buttonholes
  - stitch requirements
  - notching

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - pattern information (size, style number, cutting instructions and identity)
  - darts
  - drill holes
  - slits
  - job seams
  - grain line
  - cutting line
  - stitching line
- colour/colour mix and interpretation
- properties and characteristics of basic stable fabrics, fibres, trims and accessories
- Australian Standards
- suitability of fabrics:
  - trends
  - performance
  - colour
  - availability
  - care and maintenance requirements
- storyboard components:
  - trade sketches of new garment designs
  - illustrations
  - magazine extracts
  - fabric swatches
  - trim or accessory samples
  - colour palette
  - specifications
- parameters of the project:
  - team members and their roles
  - chain of command
  - timelines
  - budget constraints
  - reporting processes
  - workplace practices
  - technical requirements of production
  - constraints
  - project plan and critical path
  - additional expertise
  - influence of previous projects
- presentation to client:
  - use effective oral and/or written communication tools to present design concept
  - use positive language

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- emphasise features and benefits of design concepts
- encourage and promote acceptance of design concept
- assess and respond to client response

- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4005 Communicate and sell design concepts

Modification History

Release 1. Supersedes and is equivalent to LMTFD4005B Communicate and sell design concepts

Application

This unit of competency covers the skills and knowledge required to communicate and sell design concepts.

The unit of competency applies to the use of design tools, such as storyboards and inspiration boards, to communicate and sell design concepts to other fashion industry professionals.

The unit of competency applies to work in a production environment where design decisions impact on the work and where design concepts must be communicated to other fashion industry professionals in order to gain agreement for further development.

The unit of competency includes the application of the elements and principles of design, and how they impact on the process of producing fashion items. It includes impact of colour on the design process.

Work is supervised and may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to communicate design concepts**	2.1	Interpret and respond to the design brief
		2.2	Identify key requirements for design concept and sources of design ideas
		2.3	Identify target market and its influence on design process
		2.4	Apply principles of design to identify, collect and collate inspirational items
		2.5	Identify and prepare key elements of a storyboard
3	**Create design tools to communicate design concepts**	3.1	Develop an inspiration board to communicate sources of inspiration for design brief
		3.2	Develop and illustrate garment concepts based on design brief and inspiration board
		3.3	Select suitable fabrics and colour palette and produce storyboard to reflect design brief
		3.4	Seek feedback on design concepts and tools, and make any modifications or additions as required
4	**Sell design concepts**	4.1	Identify and emphasise the interests of fashion industry professionals in a presentation to promote design concept

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.2	Explain and promote benefits and features of design concept and link to design brief
4.3	Use effective presentation skills with design tools to sell the concept
4.4	Seek acceptance of design concept and commitment to further development

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Key requirements of design concept include the following:	• budget • type of garment

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• style requirements • target market
Interests of fashion industry personnel include one or more of the following:	• appealing to target market • price range • market position • construction strategies • promotion opportunities • themes • corporate goals • timing • international fashion influences • use in mass media
Garments include one or more of the following:	• skirts • trousers/pants • shirts/blouses • dresses • coats • lingerie
Fashion industry professionals include one or more of the following:	• senior designers and patternmakers • clients • management • buyers • media

MSTFD4006 Interact and network with fashion industry participants

Modification History

Release 1. Supersedes and is equivalent to LMTFD4006B Interact and network with fashion industry participants

Application

This unit of competency covers the skills and knowledge required to interact and network with fashion industry participants.

This unit of competency applies to communication and networking with people who work along the fashion industry supply chain.

The unit of competency applies to industry appropriate communication and relationship building techniques to maintain effective industry networks, and to ensure design and production processes meet requirements.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare to interact with others in the fashion industry**	1.1	Identify roles of different fashion industry participants and the routine industry communication channels and tools that are appropriate
		1.2	Identify the information needs of fashion industry participants for design, procurement, production and marketing processes
		1.3	Identify communication protocols, workplace practices and quality standards of different industry participants
		1.4	Follow work instructions, standard operating procedures (SOPs) and safe work practices
2	**Communicate design concepts and production requirements**	2.1	Use industry appropriate language and terminology to interact and communicate with fashion industry participants
		2.2	Identify objectives and processes for communicating design concepts effectively and apply appropriate communication channels and tools
		2.3	Apply knowledge of roles and information needs of different industry participants to communicate production requirements
		2.4	Seek and respond to feedback to assess if communication of design concept and production requirements is effective, and incorporate feedback into future communication
		2.5	Seek assistance from appropriate personnel with specific and relevant expertise to deal with any communication difficulties or barriers
		2.6	Document information and outcomes of communication, and maintain records
3	**Develop and maintain effective industry**	3.1	Apply understanding of scope and role of different industry participants to develop networks for relevant areas of operation

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

networks	3.2	Develop and maintain cooperative working relationships with relevant industry participants
	3.3	Gather and store up-to-date information about key industry participants to maintain business intelligence and sustain networks

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Communication channels and tools include three or more of the following:	• sketches, drawings, illustrations and photographs • samples of fabrics and specifications • written descriptions and rationale • multimedia forms, such as DVD • charts, diagrams and specification sheets • storyboards and inspiration boards • meetings • electronic communication tools • displays, demonstrations and events • mass media channels • social media
Information needs include one or more of the following:	• details for production or marketing purposes • size, style, features and colours • timing, costs, distribution and availability • layout and content • goals and strategies • roles and expectations

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• priorities and limitations
Protocols include one or more of the following:	• specific formats • timing • content of communication required by different industry participants • mechanism for dealing with communication difficulties or complaints
Communication includes one or more of the following:	• face to face • telephone • correspondence • email • digital media

Assessment Requirements for MSTFD4006 Interact and network with fashion industry participants

Modification History

Release 1. Supersedes and is equivalent to LMTFD4006B Interact and network with fashion industry participants

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- using industry appropriate language and terminology to interact and communicate with fashion industry participants, using at least three (3) different communication channels or tools
- applying knowledge of roles and information needs of at least four (4) different industry participants to communicate about design concepts and production requirements
- applying appropriate communications skills to maintain cooperative working relationships
- documenting information and outcomes of communication, and maintaining records according to workplace procedures and industry standards
- establishing and maintaining up-to-date information about at least ten key industry participants to maintain business intelligence and sustain networks.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, standard operating procedures (SOPs) and safe work practices
- roles of various fashion industry participants
- routine industry communication channels and tools
- information needs of fashion industry participants for design, procurement, production and marketing processes
- communication protocols, workplace practices and quality standards
- communication strategies:
  - effective verbal and non-verbal communication
  - oral, written and visual communication
  - active listening
  - positive language
  - recognising and adapting to cultural differences
  - negotiation and conflict resolution skills
- fashion industry language and terminology

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- scope and information needs of different industry participants:
  - designers
  - patternmakers
  - suppliers
  - merchandising and marketing professionals
  - buyers
  - media
  - importers and exporters
  - production personnel
- fashion industry networks:
  - industry bodies
  - professional associations
  - design studios
  - industry professionals providing specific services
  - production companies
  - professional development networks
- documentation and record keeping requirements
- quality standards:
  - accepted formats for presenting ideas and concepts
  - standards of presentation for drafts and final versions
  - layout and content.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in fashion networking, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4007 Conduct quality assurance for patterns and garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD4007B Conduct quality assurance for patterns and garments

Application

This unit of competency covers the skills and knowledge required to conduct quality assurance for patterns and garments.

This unit of competency applies to quality assurance standards that patternmakers and others who work in the patternmaking industry need to meet. The quality assurance process is required to ensure that the garment produced from the pattern meets all requirements of the design specifications.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to conduct quality assurance**	2.1	Identify all steps of the quality process for development of patterns and garment production according to Australian Standards
		2.2	Analyse specification document and check information is complete
		2.3	Identify input and output requirements and check garment measurement table
		2.4	Assess integrity and validity of base pattern to ensure seams match and darts are proved
		2.5	Check if block and pattern is appropriate for design and identify construction and finishing methods
		2.6	Prepare tools and equipment and prepare garment for measuring
3	**Implement quality assurance practices**	3.1	Take accurate garment measurements and compare to specifications in measurement table
		3.2	Verify garment sizing and identify and record any problems, faults or deviations
		3.3	Report problems to designer, patternmaker and sample machinist
		3.4	Obtain fabric performance and testing information and verify against label information
		3.5	Identify faults or production problems for garment construction or patterns, and recommend suitable preventative or corrective action

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Conclude quality assurance process**	4.1	Check garment or article against specifications and attach tickets, labels and swing tags, as required, according to Australian Standards
		4.2	Prepare for despatch according to industry standards, environmental considerations and sustainable practice
		4.3	Despatch completed garments and complete and store quality assurance, production and other records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Construction and finishing methods include one or more of the following:	• seam finishes, such as flat seam, blind hem and French seam • allocation of seam allowance • stitches, such as straight, zigzag, overlock and buttonholes • stitch requirements • pressing, such as steam, heat and iron
Verify garment sizing includes the following:	• identifying different sizes • comparing body measurements to garment sizing • identifying grading increments/growth in measurement at nominated points on pattern and across different styles • verifying body measurements of base size • developing a size chart, where required
Faults and quality deviations include one or more of the following:	• material faults, such as weak spots, pilling and bleeding • construction process faults, such as broken thread, inappropriate seams, seam finishing, seam puckering and needle damage • labelling and specifications faults, such as incorrect care label and instructions, and incorrect size • production problems for garment construction or patterns

Assessment Requirements for MSTFD4007 Conduct quality assurance for patterns and garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD4007B Conduct quality assurance for patterns and garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting specifications, assessing integrity and validity of base pattern and checking if block and pattern is appropriate
- taking accurate garment measurements and comparing to specifications in measurement table
- implementing relevant quality assurance assessments on at least two (2) occasions
- identifying, recording and reporting faults, deviations from specifications or production problems to relevant people
- taking action, as required, where quality assurance has not been met
- preparing garments for despatch according to industry standards, environmental considerations and sustainable practice
- maintaining accurate quality assurance, production and other records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- measures required to undertake quality assurance assessment
- garment construction and finishing methods
- garment measurements:
  - circumference and linear measurements
  - measuring across the top of the shoulder of the garment
  - sleeve
  - underarm to side seam
  - neck circumference
  - waist circumference
- patternmaking tools and equipment:

MSTFD4008 Construct stock size block for garment to meet size and fit specifications

Modification History

Release 1. Supersedes and is equivalent to LMTFD4008B Construct stock size block for garment to meet size and fit specifications

Application

The unit of competency covers the skills and knowledge required to construct blocks to meet size and fit specifications in garment production. Blocks are used as the basis for patternmaking to develop new styles.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to construct block**	2.1	Interpret and clarify size and fit specifications and Australian Standards with designer or relevant personnel
		2.2	Identify base size to be constructed and check for compatibility with fit model
		2.3	Evaluate and record size and fit model specifications, body movement and comfort requirements
		2.4	Select appropriate drafting principles and methods for block construction
3	**Construct initial block**	3.1	Analyse measurements of fit model and enter data into block drafting formulas and methodology
		3.2	Determine ease allowance
		3.3	Construct block using patternmaking technical skills and ensure compliance with safe work practices and industry requirements
		3.4	Document methods and formulas
		3.5	Cut and construct toiles to check accuracy
4	**Complete final block**	4.1	Transfer information from toiles to blocks, including any minor adjustments
		4.2	Label final blocks and check all necessary information is accurate and complete and complies with specifications
		4.3	File and store blocks according to appropriate criteria and complete all required documentation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Fit model includes one or more of the following	• male • female • child
Garments include one or more of the following:	• skirts • trousers/pants • shirts/blouses • dresses • coats • lingerie

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Measurement of fit model includes the following:	• accurate assessment of body measurement positions (reference points, such as bust, waist and hip levels) • accurate taking of body measurements, including girth, and vertical and horizontal measurements • reference to Australian Standard measurements • age • sex • assessment of physical characteristics, including body characteristics and unique features, as aligned with standard representation
Construct toiles includes the following:	• confirming correct proportion, fit and balance • fitting and making necessary minor adjustments • evaluating accuracy of toiles in relation to fit, comfort and base size specifications

MSTFD4009 Create and edit digital embroidery designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4009B Create and edit digital embroidery designs

Application

This unit of competency covers the skills and knowledge required to create and edit digital embroidery designs using specialised software programs.

This unit of competency applies digital embroidery effects on a wide range of garments and fabrics.

This unit requires the use of computers.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTCL3008 Set and produce digital embroidery

MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles

Modification History

Release 1. Supersedes and is equivalent to LMTFD4010B Create pattern to meet design specifications applying advanced pattern-making principles

Application

The unit of competency covers the skills and knowledge required to create a pattern from an existing block, using advanced patternmaking principles, including contouring, square blocking and pivoting.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009 Develop patterns from a block using basic patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to create pattern to meet design specifications**	2.1	Select and prepare patternmaking tools, equipment, additional materials, if required, and workstation
		2.2	Interpret and clarify design drawings and specifications, and identify design lines and style features
		2.3	Clarify design requirements
		2.4	Determine ease allowance and obtain details of base size
3	**Create pattern**	3.1	Select appropriate block to develop pattern and retrieve from storage system
		3.2	Apply advanced patternmaking principles to develop pattern from existing block to specified design
		3.3	Document methods and formulas used
		3.4	Check pattern pieces, label and complete markings
4	**Check and finalise pattern for production**	4.1	Test toile or garment segments and assess against design specifications
		4.2	Make any necessary alterations to finalise pattern and check it is accurate, complete and complies with design specifications
		4.3	Select sizing system for pattern and base size
		4.4	Prepare spreadsheet and grade table of full size range with essential measurements
		4.5	Complete pattern specification sheets with trade drawings, attach to patterns for storage and file appropriately

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.6 Prepare work order for sizing labels as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Advanced patternmaking principles include the following:	• pivoting • square blocking • contouring • advanced dart manipulation
Garments include one or more of the following:	• skirts • trousers/pants

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• shirts/blouses • dresses • coats • lingerie
Methods and formulas include one or more of the following:	• deviations from standard patterns • sources of pattern components • pattern derivation methods and formulas • block construction methods and formulas • application of current industry practice

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in patternmaking, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4011 Cut fabrics for prototype designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4011B Cut fabrics for prototype designs

Application

This unit of competency covers the skills and knowledge to lay up, make marker and cut work for sample designs where only a couple of garments would be cut out at a time, as required by the designer to test design or pattern.

The unit of competency applies to situations where single garments or only a couple of layers of fabric may be cut. The marker may be developed directly on the fabric lay or planned separately and applied. Cutting tools and equipment would include dress maker's shears, electric cutting tools and rotary cutters.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to cut fabrics for prototype design**	2.1	Prepare work space and ensure all tools and equipment are clean and serviced according to manufacturer instructions
		2.2	Prepare cutting table to suit correct lay length and set-up, lay-up and marking equipment
		2.3	Check fabric width and quality with laying-up instructions
		2.4	Lay up fabric and adjust tension to match fabric performance
		2.5	Inspect fabric for faults and cut out faults using splicing (overlap joining) or other appropriate repair techniques
3	**Cut fabrics for design prototypes**	3.1	Interpret cutting order for marking requirements and collect pattern pieces
		3.2	Check pattern pieces and manipulate for most efficient fabric use
		3.3	Draw up lay marker manually or by computer and prepare laying-up instructions according to order requirements
		3.4	Check marker against order requirements and copy marker manually or by computer
		3.5	Place marker on lay, check alignments and adjust, as required
		3.6	Use cutting equipment to cut lay according to operating requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Review and finalise work**	4.1	Check cut fabric and assess quality of the product and equipment performance
		4.2	Direct cut work to next operation
		4.3	Clean work area and prepare for next job
		4.4	Store master copy of lay marker in filing drawer or computer

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • standard operating procedures • SOPs • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Cutting equipment includes	• dressmaker's shears

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

one or more of the following:	• electric rotary and upright cutters • cutting mats
Fabrics include one or more of the following:	• woven fabrics • knitted fabrics • fabrics with a variety of finishes
Manipulate includes one or more of the following:	• positioned manually on paper • by computer
Assess quality includes one or more of the following:	• inspecting fabric, tools and equipment to ensure optimum performance • inspecting cut work, identify any faults • taking appropriate action to ensure cut pieces meet quality standards • taking preventive action to avoid any recurrence of defective pieces and record • checking performance of cutting equipment regularly for signs of faulty operation, and taking appropriate action

Assessment Requirements for MSTFD4011 Cut fabrics for prototype designs

Modification History

Release 1. Supersedes and is equivalent to LMTFD4011B Cut fabrics for prototype designs

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- checking work against work specification or cutting order, and workplace practices and setting up equipment
- making markers involving patterns, fabrics and lays using manual or computer techniques
- preparing cutting table and work before commencing cutting operations
- using, lay-up, marking and cutting tools and equipment to cut at least two (2) different fabrics to meet required specifications
- checking cut fabric and assessing quality of the product and equipment performance
- responding appropriately to imperfections or faults
- storing master copy of lay marker in filing drawer or computer.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking principles and procedures
- lay-up and marking equipment:
  - computers and required software
  - patterns
  - fabric
  - marker card or paper
  - weights
  - clamps
- computer operations involved in marker making, copying and storage
- marking requirements:
  - fabric type
  - width

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- quantity
- garment sizes
- pattern identification
- fabric characteristics and prototype faults
- quality standards and fabric/garment handling procedures
- maintaining accurate records

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in cutting fabrics for prototype designs, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4012 Develop product specifications for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4012B Develop product specifications for fashion design

Application

This unit of competency covers the skills and knowledge required to develop product specifications for fashion design.

The unit of competency applies to patternmaking or design, where accurate specifications are required to communicate, interpret and clarify a garment design to ensure production achieves the requirements of the design brief.

Specification documentation may include standard forms, trade drawings and use of industry standards, according to workplace practices and procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD3004 Draw a trade drawing for fashion design

Assessment Requirements for MSTFD4012 Develop product specifications for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4012B Develop product specifications for fashion design

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- assessing instructions and completing all required information on specification sheets
- using appropriate tools and equipment
- producing drawings on specification sheets that are in proportion and technically correct, showing all details, including front and back view, and incorporating all quality criteria
- completing specification sheet with all relevant information and recording set deviations for at least two (2) garments
- comparing finished product against specifications and correcting deviations

revising specification sheets as required and record and store documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- key features of different types of specification sheet
- common faults and discrepancies and their causes
- drawing techniques, tools and equipment for specification sheets
- documentation including standard forms, trade drawings and use of industry standards, according to workplace practices and procedures
- industry standards in relation to sizing and the impact of industry sizing deviations
- specification sheet information:
  - style number
  - fabric types and quantity
  - fabric quality standards
  - suppliers
  - cutting and making instructions

MSTFD4013 Grade 2-D patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD4013B Grade 2D patterns

Application

This unit of competency covers the skills and knowledge to grade flat or 2-D patterns used for garment production.

The unit of competency applies to production of a basic style garment where discretion and judgement may be required in planning and selecting processes, procedures or outcomes.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS) requirements at all times

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to grade patterns**	2.1	Select and prepare workstation and/or equipment according to WHS practices
		2.2	Identify grading system used in workplace
		2.3	Identify measurements of base size and subsequent spread
		2.4	Calculate number of sizes in grading and establish grade increments between sizes
		2.5	Set up base pattern of a basic style
		2.6	Identify style and fabric characteristics which influence grading and check queries with patternmaker
		2.7	Select appropriate grade plan and construct grade rule table
3	**Grade pattern**	3.1	Determine stacking or outlay requirements, including direction
		3.2	Grade pattern manually using patternmaking technical skills or by computer
		3.3	Identify stack points or lines if stacking is used
		3.4	Preserve integrity of pattern attributes during grading
		3.5	Accurately label all pattern pieces with pattern marking symbols
		3.6	Check pattern for accuracy and rectify or address faults as required
4	**Finalise grading**	4.1	Maintain records and complete documentation, as required

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.2 File patterns

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Grading system includes the following:	• flat, 2-D patterns • position of constant or stack point
Basic styles of garments include two or more of the following:	• A-line skirt • straight skirt • t-shirt • shirt

MSTFD4014 Identify influences on contemporary fashion designs and construction techniques

Modification History

Release 1. Supersedes and is equivalent to LMTFD4014B Identify influences on contemporary fashion designs and construction techniques

Application

This unit of competency covers the skills and knowledge to identify influences of the 20th Century on fashion design and construction techniques.

The unit of competency applies to the analysis of the most important economic, social, political and technological factors in the 20th Century that have had an impact on fashion development and demand.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Identify the function of clothing**	1.1	Identify the purposes of clothing and the factors which influence the way people dress
		1.2	Identify characteristics represented in clothing
		1.3	Identify how the function of clothing relates to fashion design
2	**Analyse 20th Century influences on role of designers**	2.1	Identify significantly influential fashion designers of the 20th Century throughout the world
		2.2	Identify fashion trends from the 20th Century
		2.3	Identify significant events of the 20th Century and their relationship to fashion changes
		2.4	Use information sources to identify design and construction features of 20th Century garments and their desired effects
3	**Assess fashion influences on current practice**	3.1	Compare the role of fashion designers as change agents through the 20th Century to current practices
		3.2	Investigate design influences on current styling and trends
		3.3	Analyse how designers use construction techniques to create design features in contemporary designs
		3.4	Identify influences of new and emerging practices

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSTFD4014 Identify influences on contemporary fashion designs and construction techniques

Modification History

Release 1. Supersedes and is equivalent to LMTFD4014B Identify influences on contemporary fashion designs and construction techniques

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching information to identify the factors which influence the way people dress and the characteristics represented in clothing
- identifying at least three (3) significantly influential fashion designers of the 20th Century throughout the world and fashion trends associated with them
- demonstrating the relationship of at least three (3) fashion changes to significant events of the 20th Century
- presenting research on a decade from the 20th Century to identify influences on fashion development and demand
- identifying design and construction features of 20th Century garments and their desired effects
- outlining current and emerging fashion design and construction trends.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- functions of clothing:
  - social
  - psychological
  - cultural
  - economic
  - environmental
- characteristics represented by dress:
  - gender
  - age group
  - nationality

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - religious affiliation
  - career
  - social, economic and marital status
  - personal achievement
  - loyalties
  - beliefs
  - family connections
- factors that influence the way people dress:
  - political events
  - music
  - fads
  - myths
  - economics ups and downs
  - sexual mores
  - social movements
  - climate
  - health and safety
  - changes in work/leisure time
  - image
  - self esteem
  - happiness
  - stimulation
  - incentive
  - expression of fantasies
- distinctive characteristics of fashion in selected 20th Century decades, such as:
  - skirt hem lengths
  - sleeve shapes
  - trousers widths
  - lycra
  - hipsters
- historical features and trends of the 20th Century
- current and emerging fashion design and construction trends
- construction techniques
- research and presentation skills.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - have vocational competency in fashion design history, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4015 Create pattern from block to meet customer specifications

Modification History

Release 1. Supersedes and is equivalent to LMTFD4015B Create pattern from block to meet customer specifications

Application

This unit of competency covers the skills and knowledge required to create a pattern from an existing block for an individual size, and to meet the styling requirements of the customer.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009 Develop patterns from a block using basic patternmaking principles

MSTFD4010 Create pattern to meet design specifications applying advanced patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to create pattern to meet customer specifications**	2.1	Select and prepare pattern-making tools, equipment, additional materials, if required, and workstation
		2.2	Interpret and clarify design drawings and specifications, and identify design lines and style features
		2.3	Clarify design requirements
		2.4	Determine ease allowance
3	**Create pattern**	3.1	Measure client, select appropriate block and make size adjustments
		3.2	Plan pattern production according to quality standards and workplace procedures
		3.3	Proportion design lines on dress form
		3.4	Apply patternmaking principles to develop pattern from existing block to customer design and fit
		3.5	Document methods and formulas used
		3.6	Check pattern pieces, label and complete markings
4	**Check and finalise pattern**	4.1	Test toile or garment segments for proportioning and fit
		4.2	Fit prototype to ensure that pattern is satisfactory to customer
		4.3	Complete any pattern alterations and assess pattern meets fit and design requirements

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.4 Finalise pattern and check it is accurate, complete and complies with design specifications

4.5 Complete pattern specification sheet, attach to patterns for storage and file appropriately

4.6 Direct final patterns to next production process

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design requirements include the following:

- fabric characteristics and performance
- trim details and finishings
- special construction methods

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Methods and formulas include the following:	• deviations from standard patterns • sources of pattern components • pattern derivation methods and formulas • block construction methods and formulas • application of current industry practice
Check prototype or pattern pieces includes the following:	• accuracy of seam allowances • ease allowance • seam match • hems • functional openings

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD4015B Create pattern from block to meet customer specifications

Assessment Requirements for MSTFD4015 Create pattern from block to meet customer specifications

Modification History

Release 1. Supersedes and is equivalent to LMTFD4015B Create pattern from block to meet customer specifications

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting and clarifying design drawings and specifications
- using patternmaking tools and equipment and applying industry standards for pattern and garment construction
- measuring client, selecting appropriate block and making size adjustments to produce pattern from an existing block for an individual size and to meet the styling requirements of the customer
- applying patternmaking principles to develop at least two (2) patterns from existing block to customer design and fit
- checking pattern pieces, labelling and completing markings, and documenting methods and formulas used
- fitting toile, prototype or garment segments to check for correct fit, and adjusting patterns to suit customer and design requirements
- finalising pattern, checking it is accurate, complete and complies with design specifications, and completing pattern specification sheet to attach to patterns
- filing patterns according to workplace procedures and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
  - blocks
  - dress form
  - scissors
  - square rule
  - marker pens

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - hole punch
  - pins
  - fashion triangle
  - French curve
  - pattern notcher
  - weights
  - tape measure
- design specifications and procedures
- patternmaking principles and procedures:
  - dart manipulation
  - adding fullness
  - contouring
- pattern markings:
  - appropriate seam allowance
  - notching
  - pattern information (size, style number, cutting instructions and identity)
  - darts
  - drill holes
  - grain line
  - stitching line
- design requirements and style features:
  - garment type
  - collar
  - sleeves
  - yoke
  - sides
  - openings
  - neckline
  - buttons
  - seams
  - zips
  - gathers
  - pleats
  - panels
  - tucks
- customer and workplace fit requirements
- fabric characteristics
- marker making procedures
- cutting and garment construction
- maintaining accurate records.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in patternmaking at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4016 Sew design prototypes

Modification History

Release 1. Supersedes and is equivalent to LMTFD4016B Sew design prototypes

Application

This unit of competency covers the skills and knowledge required to assemble a prototype garment using commercial machines.

The unit of competency applies to producing a garment that is not designed to be worn but will be used for the purposes of confirming elements of design and production requirements.

This unit covers sewing and assembly skills only.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for garment assembly**	2.1	Collect and organise relevant information on design concept
		2.2	Prepare work pieces according to design concept
		2.3	Lay out pattern pieces and pin or tack to the fabric to match fabric pattern, nap and weave
		2.4	Lay out garment components according to sequence of assembly operations
		2.5	Set up workbench and seating and adjust machines according to specifications for work
3	**Assemble garment components**	3.1	Assemble components according to WHS practices and accepted garment assembly techniques
		3.2	Check garment for sizing and appearance
		3.3	Adjust garment to better display design characteristics and correct fabric alignment, garment fitting and other features
4	**Complete prototype**	4.1	Complete required hand sewing and finishing according to design concept requirements
		4.2	Press garment according to fabric requirements and garment construction details
		4.3	Check quality and impact of finished garment against original design concept
		4.4	Note any assembly issues and inform appropriate personnel

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Work pieces include one or more of the following:	• pieces of fabric which have been cut according to the pattern requirements • a range of fabric types, including cottons, woollens, synthetics, velvets, lace, stretch and knitted • single and multi-directional prints • interfacings and linings
Fabric includes one or more of	• lace • woven and knitted fabrics and threads, such as denim

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

the following:	• single knits • tricot • gabardine
Garment components include the following:	• sleeves • waistbands (straight/shaped) • collars • cuffs • plackets • facings (neck and armhole) • binds • zips (dress, skirt, trouser and invisible) • buttons and buttonholes
Machines include one or more of the following:	• commercial sewing machine • three thread overlocker • zigzag sewing machine
Appropriate personnel include one or more of the following:	• patternmakers • designers • production personnel • sample machinists

Assessment Requirements for MSTFD4016 Sew design prototypes

Modification History

Release 1. Supersedes and is equivalent to LMTFD4016B Sew design prototypes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- operating a commercial sewing machine or overlocking machine to assemble a prototype garment
- preparing and laying out pattern pieces for at least two (2) garments, and attaching to the fabric to match fabric pattern, nap and weave
- laying out garment components according to sequence of assembly operations and sequencing operations as specified
- sewing and finishing at least two (2) garments according to specifications
- adjusting garment to better display design characteristics and correct fabric alignment, garment fitting and other features
- completing required hand sewing and finishing, and pressing garment according to fabric requirements and garment construction details
- checking prototype satisfies quality criteria and original design concept and advising appropriate people of assembly issues.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- techniques in using and maintaining three thread overlocker and commercial sewing machines:
  - correct thread, needle size and type, needle guard, tension setting and attachments
  - checking for worn components that may impact on sewing operations
  - routine cleaning and oiling
- characteristics of a range of commercially available fabrics
- methods of assembling garment pieces for the purposes of prototype production
- the impact of adjustments to garment components or seams
- embellishments that are used in garment assembly
- garment assembly issues:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - complex or time-consuming assembly
  - quality
  - difficulty in following pattern or design concepts
  - problems arising from material selection
  - issues relating to sizing or fabric cuts
- hand sewing and finishing techniques:
  - attaching buttons and other closures
  - attaching embellishments such as trims, badges
  - hemming and overstitching
  - gluing and bonding trims
- quality criteria:
  - proportion
  - perspective
  - symmetry and balance
  - detailing
  - neatness.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in sewing design prototypes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4018 Use and apply sizing systems appropriate for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4018B Use and apply sizing systems appropriate for fashion design

Application

This unit of competency covers the skills and knowledge required to use and apply sizing systems appropriate for designing garments.

The unit of competency applies to sizing standards that are required in the design, production and retailing of garments. Work is conducted according to defined procedures.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Prepare to use and apply sizing system**	2.1	Identify Australian approaches to sizing standards and identify features of sizing systems
		2.2	Identify international sizing systems and determine advantages and disadvantages of different sizing systems
		2.3	Establish intended purpose of the garment design
3	**Develop size chart**	3.1	Analyse sizing requirements of garment and determine sizing system
		3.2	Read and interpret design specifications and clarify the brief with designer, where necessary
		3.3	Analyse body measurements and body characteristics and their effect on sizing
4	**Develop size chart**	4.1	Identify appropriate sizes from sizing system for the design
		4.2	Identify effects of inappropriate sizing for the design
		4.3	Take necessary body measurements and record distinctive body characteristics
		4.4	Develop and store size chart, as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Sizing system includes one or more of the following:

- women's sizes, such as 10, 12, 14, 16, and so on
- men's sizes, such as 92, 95, 95, and so on
- women's bra sizes, such as 12A, 12B, 12C, 12D, 12DD, and so on
- children's sizes, such as 1-7, 8-12, and so on
- babies' sizes, such as 0000, 000, 00, 0, and so on

Body measurements include one or more of the following:

- all measurements as required for labelling according to legislation requirements, such as:
  - height and weight
  - reference points, such as nape, waist point, seat vertex, abdomen vertex, carpus, neck base, upper sternum, bust point and pelvic bone
  - levels, such as crown, shoulder, armscye, bust or chest, waist, hip, crotch and knee
  - girth measurements, such as waist, bust or chest, hip, high hip, upper and under bust, head circumference, upper arm, wrist, thigh, calf, ankle and heel/instep

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- horizontal measurements, such as shoulder, shoulder breadth, across front, across back, and bust point to bust point
- vertical measurements, such as nape to centre back waist, nape to neck base, nape to bust or chest, nape to waist, nape to wrist, centre front waist to floor, centre back waist to floor, right-hand side waist to floor, left-hand side waist to floor, waist to hip, inside leg, body rise, arm length and neck length
- cup size
- shoe size
- seat prominence
- knee
- instep
- posture

Body characteristics include one or more of the following:

- genetic, developmental and structural influences
- shape classifications, such as hourglass, rectangular, pear and inverted triangle
- anthropometric classifications (somatotypes)
- shoulder slope (raised, normal and sloping)
- body sway and postural asymmetry (according to lower and upper body)
- proportions (tall, short or average, short or long-waisted, and mid-body shortness)

Assessment Requirements for MSTFD4018 Use and apply sizing systems appropriate for fashion design

Modification History

Release 1. Supersedes and is equivalent to LMTFD4018B Use and apply sizing systems appropriate for fashion design

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- reading and interpreting design specifications and Australian and international sizing systems
- analysing body measurements and body characteristics and their effect on sizing
- taking necessary body measurements and recording distinctive body characteristics
- analysing sizing requirements of at least two (2) garments, determining sizing system, and identifying appropriate sizes from sizing system for the design
- taking necessary body measurements and recording distinctive body characteristics
- identifying effects of inappropriate sizing for the design
- developing and storing size charts based on at least two (2) sizing systems.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- quality standards and garment handling procedures
- sequence of operations
- Australian Standards for sizing
- body measurements and body characteristics and their effect on sizing
- body science:
  - structural anatomy
  - morphology
  - anthropometry
- sizing systems
- recording and reporting practices.

Assessment Conditions

- Assessors must:

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in fashion sizing systems, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4019 Use colourisation techniques on fabrics

Modification History

Release 1. Supersedes and is equivalent to LMTFD4019B Use colourisation techniques on fabrics

Application

This unit of competency covers the skills and knowledge required to use fabric colourisation techniques to create new finishes for design effects.

The unit of competency applies to using a variety of colourisation techniques, such as dyeing or printing on a range of fabrics, for garments and accessories. Colourisation techniques would be specified in the design process.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011	Identify fibres, fabrics and textiles used in the TCF industry
MSTCL3001	Identify fabric performance and handling requirements

Competency Field

Assessment Requirements for MSTFD4019 Use colourisation techniques on fabrics

Modification History

Release 1. Supersedes and is equivalent to LMTFD4019B Use colourisation techniques on fabrics

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying the effects of colourisation techniques on at least five (5) different fabrics
- experimenting with at least three (3) different colourisation techniques on a range of fabrics
- assessing outcome and modifying techniques and/or fabrics, as required
- applying knowledge of fabric characteristics to identify effects of colourisation on the design
- applying a range of colourisation techniques to create design effects and satisfy quality criteria
- documenting and storing information to record the processes.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practices
- relevant Australian Standards
- uses and performance characteristics of fabrics
- information resources on fibres and fabrics
- characteristics of fibres and fabrics
- recording and reporting practices
- uses of colour to create design effects
- colourisation techniques:
  - dyeing (shibori and resist (batik))
  - printing (block, silk screen, transfer, roller and stencilling)
- quality criteria:
  - proportion
  - perspective

MSTFD4020 Use electronic fashion design tools

Modification History

Release 1. Supersedes and is equivalent to LMTFD4020B Use electronic fashion design tools

Application

This unit of competency covers the skills and knowledge required to use a range of electronic design programs and equipment, such as software programs and computing technology.

The unit of competency applies to the creation of designs, patterns or production specifications using electronic programs and equipment, such as graphic and design software, computers and peripherals, and specialised equipment.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

			requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Prepare to use electronic design tools**	2.1	Interpret the specifications of the design brief and identify production requirements
		2.2	Identify garment factors that need to be considered
		2.3	Prepare suitable programs and equipment
3	**Use design tools**	3.1	Use design programs and equipment to create required designs, patterns and/or production specifications
		3.2	Test designs, patterns or production specifications and modify, as required
		3.3	Assess outputs generated using electronic design programs against design specifications and production requirements
4	**Check and finalise designs**	4.1	Present outputs to appropriate personnel to assess accuracy and completeness
		4.2	Make adjustments or improvements, as required
		4.3	Create final products and protect, organise and store them according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design programs and equipment include two or more of the following:

- computer
- software programs (e.g. computer-aided design (CAD), Illustrator and Photoshop)
- hardware peripherals, such as scanners and printers
- specialised equipment

Garments include one or more of the following:

- skirts
- trousers/pants
- shirts/blouses
- dresses
- coats
- lingerie

Garment considerations include one or more of the following:

- type of fabric
- colour of fabric
- purpose of garment
- quality standards
- distinctive features

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Production requirements include the following:	• timeline • available resources • instructions • documentation
Appropriate personnel include one or more of the following:	• supervisor • trainer/mentor • designers • patternmakers • production supervisors • clients

Assessment Requirements for MSTFD4020 Use electronic fashion design tools

Modification History

Release 1. Supersedes and is equivalent to LMTFD4020B Use electronic fashion design tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying requirements for at least two (2) garments or products
- selecting appropriate software program
- using design programs and equipment to create designs, patterns and production specifications for at least two (2) garments
- testing designs, patterns or production specifications and modifying, as required
- assessing outputs generated using electronic design programs against specifications of design brief
- seeking feedback from appropriate people and making adjustments, as required
- creating final products and protecting, organising and storing them according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practices
- relevant Australian Standards
- principles of design
- electronic equipment and program features
- editing tools and procedures
- operating procedures
- garment production requirements
- design specifications:
  - visual content and presentation
  - style details
  - fabric types and quantities
  - production requirements
  - special effects or features

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - quality criteria
    - finishing details
    - sizing
- designs, patterns and production requirements
- quality standards
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in electronic fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD4021 Drape fabrics to make patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD4021B Drape fabrics to make patterns

Application

This unit of competency covers the skills and knowledge to drape fabrics to make patterns.

This unit of competency applies to using draping techniques to create a basic fitted foundation. This applies to the creation of fitted blocks, such as a bodice and a skirt and does not include draping of set-in sleeves. Draping is conducted on a body form, such as a mannequin or model.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job requirements**	1.1 Follow standard operating procedures (SOPs)
		1.2 Comply with work health and safety (WHS)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to drape fabrics**	2.1	Select and prepare draping tools and equipment
		2.2	Prepare body form for draping
		2.3	Identify and mark reference points on body form and make any other necessary preparations
		2.4	Select and prepare fabric for draping
		2.5	Prepare the drape plan
3	**Transfer drape to make pattern**	3.1	Pin fabric on model form and perform draping operations
		3.2	Remove drape from model form and draw or rule lines on drape at pin positions
		3.3	Use drape as a template to create paper pattern or block
		3.4	True and mark pattern
4	**Check and finalise pattern**	4.1	Check pattern pieces for all requirements, label pieces and complete markings
		4.2	Finalise pattern and check it is accurate, complete and complies with design specifications
		4.3	Complete pattern specification sheet, attach to patterns for storage and file appropriately

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Body form includes one or more of the following:

- mannequin
- model
-

Body reference points include the following:

- bust
- waist
- hips
- centre front
- centre back
- side seam

Prepare fabric for draping includes the following:

- estimate dimensions of fabric piece required for each section/piece to be draped
- identify warp, weft and bias of fabric
- identify and assess fabric handling qualities

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Fabric includes one or more of the following:

- toile fabric
- sample fabric

Pieces to be draped include one or more of the following:

- front bodice
- back bodice
- front skirt
- back skirt
- other pieces to be draped:
  - front extended line
  - back extended line

Drape plan includes one or more of the following:

- adding fullness (pleats, tucks and gathers)
- seam positioning
- adding wearing ease for movement
- multiple darts/division of darts
- manipulating dart excess
- symmetric and/or asymmetric design features
- cowls, twists and knots

Draping operations include one or more of the following:

- relating body reference points and fabric grains
- moulding and manipulating fabric to fit model form according to working drawing, fit and design lines
- adding ease to allow for movement
- incorporating fullness or volume if required
- smoothing or manipulating fabric over contours of model form
- forming and pinning darts and seams to create pattern or construct garment
- preparing drape for truing

Check pattern pieces includes the following:

- accuracy of seam allowances
- ease allowance
- seam match
- hems
- functional openings
- flow through

Assessment Requirements for MSTFD4021 Drape fabrics to make patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD4021B Drape fabrics to make patterns

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- preparing tools, equipment and fabric pieces
- marking reference points on model
- pinning fabric on model form and performing at least two (2) draping operations
- removing drape from model form and drawing or ruling lines on drape at pin positions
- transferring the drape to paper
- using drape as a template to create at least two (2) paper pattern or block
- finalising pattern and checking it is true, accurate, complete and complies with design specifications
- checking pattern pieces for all requirements, labelling pieces and completing markings
- completing pattern specification sheet, attaching to patterns for storage and filing appropriately.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- draping tools and equipment:
  - model form
  - narrow tape/ribbon
  - tape measure
  - pen/pencil
  - scissors
  - square rule
  - marker pens
  - hole punch
  - pins

MSTFD5001 Design bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5001B Design bras and swimwear.

Application

This unit of competency covers the skills and knowledge to design structured bras and swimwear for production.

The unit of competency applies to designs which include structured foundations. Bras and swimwear that do not include these components are covered in other fashion design units.

The unit of competency applies to a variety of fabrics and garments which may be produced by an individual or design team. The extent and nature of product design will depend on the products individual workplace.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL2010 Modify patterns to create basic styles

MSTFD4003 Assist in preparation of preliminary design concepts

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to develop bras and swimwear**	2.1	Research and analyse current national and international fashion trends, components, specialised needs and quality and special construction practices for structured foundations
		2.2	Analyse market and develop story themes to outline options
		2.3	Research and record appropriate production information
3	**Develop design concept**	3.1	Consider design requirements for design brief and develop preliminary design concepts
		3.2	Consult team members to assess and improve design
		3.3	Develop design concept to meet client brief
		3.4	Prepare artwork, drawings, specifications and any additional documentation that may be required, in appropriate format
		3.5	Include fit and performance standards in design concepts
4	**Present and document the design**	4.1	Prepare a presentation of the design concept
		4.2	Use appropriate communication tools and presentation skills to target needs of the audience

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.3 Convey features and benefits of the design and promote acceptance and approval

4.4 Prepare documentation to record the process and outcomes and maintain records

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Structured foundations include one or more of the following:

- boning
- underwire
- corsetry

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Specialised needs include one or more of the following:	• styling features relating to health effects of bra and swimwear construction • appropriate bra and swimwear structure for special client groups, including maternity, mastectomy, junior and costume wear • sports and fuller figure bras and swimwear and the need for extra support • use of specialist materials and trims
Developing story themes include one or more of the following:	• fashion magazines • samples • swatches • trims • colour palette
Production information includes the following:	• clarifying design parameters, in consultation with production manager, sales team, management and client, as required • researching trends in fabrics and components for performance, colour, availability, care and maintenance requirements and suitability to design • assessing technical requirements associated with production within specified guidelines • identifying any additional expertise required for design
Fabrics include two or more of the following:	• one-way stretch • two-way stretch • no-stretch (bias cut fabrics)
Specifications include the following:	• budget • type of garment • style requirements • fit model specifications • size range • timeline • design restrictions or conditions
Audience includes one or more of the following:	• management • client • patternmaker

Assessment Requirements for MSTFD5001 Design bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5001B Design bras and swimwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching local and overseas fashion trends and specialised construction for bras or swimwear
- researching and assessing production information and technical requirements for structured garments
- developing preliminary design concepts for structured garment designs, in response to design briefs for at least two (2) different target groups or specialised needs
- communicating effectively with team members to assess and improve design
- developing design concepts to meet client brief, using two (2) different types of fabric: one-way stretch, two-way stretch or no stretch fabric
- preparing artwork, drawings, specifications, fit and performance standards, and any additional documentation that may be required, in appropriate format
- using communication and presentation skills to promote the design concept and target needs of audience
- documenting the process and outcomes, and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for garment production
- discretion and judgement in planning and selecting processes
- elements and principles of quality design in the bra or swimwear industry
- industry, global and local trends
- fashion trends:
  - colour
  - fabrics
  - styles
  - trims

MSTFD5002 Develop and test patterns for bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5002B Develop and test patterns for bras and swimwear

Application

This unit of competency covers the skills and knowledge to develop and test patterns for bra and swimwear production using an existing block and applying patternmaking principles.

The unit of competency applies to patterns which include structured foundations. Bras and swimwear that do not include these components are covered in other patternmaking units.

This unit of competency applies to working as an individual or as part of a production team to develop and test a pattern from an existing block, using advanced principles of patternmaking.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTCL3009 Develop patterns from a block using basic patternmaking principles

Competency Field

Fashion design and technology

Unit Sector

Not applicable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to develop patterns for bras and swimwear**	2.1	Select and prepare patter-making tools, equipment, additional materials, if required, and workstation
		2.2	Interpret and clarify design drawings and specifications, and identify design lines and style features
		2.3	Confirm fabric characteristics and performance, trims, components and finishings specified in the design
		2.4	Consider current practices, specialised needs and special construction methods for bras and swimwear with structured foundations
		2.5	Determine size standards for fit
3	**Create pattern for bras and swimwear**	3.1	Plan pattern production according to quality and workplace standards
		3.2	Select appropriate block for developing bra or swimwear pattern
		3.3	Make necessary adjustments to seams to create silhouette to match design brief
		3.4	Produce pattern using advanced patternmaking principles and document methods and formulas used
		3.5	Check pattern pieces, label and complete markings
		3.6	Identify and document any construction problems and

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			check pattern meets Australian Standards
4	**Check and finalise pattern**	4.1	Construct segments and assess the pattern is compatible with design
		4.2	Complete any pattern alterations and assess pattern meets fit and design requirements
		4.3	Finalise pattern and check it is accurate, complete and complies with design specifications
		4.4	Complete pattern specification sheet, attach to patterns for storage and file appropriately

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Assessment Requirements for MSTFD5002 Develop and test patterns for bras and swimwear

Modification History

Release 1. Supersedes and is equivalent to LMTFD5002B Develop and test patterns for bras and swimwear

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- interpreting and clarifying design drawings and specifications
- applying industry standards to create patterns to meet client briefs for at least two (2) different target groups or specialised needs, using two (2) different types of fabric: one-way stretch, two-way stretch or no stretch fabric
- using patternmaking tools and equipment according to industry practices and choosing appropriate existing block to develop at least two (2) patterns for bras or swimwear
- producing patterns that meet Australian Standards, using advanced patternmaking principles and documenting methods and formulas used
- checking pattern pieces, labelling and completing markings, and documenting any construction problems
- constructing segments, completing any pattern alterations, finalising pattern and assessing pattern meets fit and design requirements
- completing pattern specification sheet, attaching to patterns for storage and filing appropriately.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
  - scissors
  - square rule
  - marker pens

MSTFD5003 Analyse fit model

Modification History

Release 1. Supersedes and is equivalent to LMTFD5003B Analyse fit model

Application

This unit of competency covers the skills and knowledge required to analyse and select the fit model used to present sample garments and derive garment fit and size standard.

The unit of competency applies to representations that are required in the design, manufacture and retail of fashion garments to ensure that the targeted customer population is addressed in size range and appropriate data is obtained from research. This data also provides a solid basis for design, pattern derivation and garment construction for a sizing system.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Plan to analyse fit model**	2.1	Obtain profile of target market
		2.2	Identify characteristics of market population
		2.3	Establish intended purpose of the design
		2.4	Interpret design brief and select appropriate sizing system and fit model to represent target population
		2.5	Communicate with relevant people to confirm plans
3	**Measure fit model**	3.1	Obtain tools and equipment and prepare fit model for measurement and image capture
		3.2	Establish and mark body reference points
		3.3	Take and record body measurements
		3.4	Consult designer and product development team to analyse measurements
		3.5	Assess body characteristics and compare to standard body
		3.6	Identify unique features, assess for potential problems in fit and record all information
4	**Finalise and check fit model**	4.1	Identify types of dress forms or 3-D avatars available to designers and technicians and evaluate options according to resources
		4.2	Compare to fit model and select appropriate representation

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Target market includes one or more of the following:

- plus sizes
- petit sizes
- teen
- mature age
- baby
- toddler

Sizing system includes one or more of the following:

- women's sizes, such as 10, 12, 14, 16, and so on
- men's sizes, such as 92, 95, 98, and so on
- women's bra, sizes such ad 12A, 12B, 12C, 12D, 12DD, and so on
- children's sizes, such as 5, 6, 7, 8, 9, 10, and so on

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• babies' sizes such, as 0000, 000, 00, 0, and so on
Confirm plans includes the following:	• clarify design brief with designer, if required • gain approval of stakeholders for selected fit model • liaise with fit model to develop schedule for measurement taking, fittings and presentation of garments
Standard body includes one or more of the following:	• Australian Standards, international standards and recommended size charts • proprietary data developed in-house or through external sources which define the figure as proportional, aligned and falling within appropriate weight for age parameters for target population
Unique features include one or more of the following:	• common postural faults, such as forward head, rounding of shoulders, anterior/posterior pelvic tilts, sway back and flat back • prominent features, such as protruding abdomen, bust or seat • spinal and pelvic rotation • foot alignment, such as supinated or pronated foot • arm types, such as very thin or heavy • leg types, such as bow legs or knock knees • neck length, such as long or short

Assessment Requirements for MSTFD5003 Analyse fit model

Modification History

Release 1. Supersedes and is equivalent to LMTFD5003B Analyse fit model

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- scoping and interpreting target market and characteristics of market population
- interpreting design brief and selecting appropriate sizing system and fit model to represent target population on at least two (2) occasions
- analysing and assessing physical characteristics
- recording measurements and consulting with design and production team members to analyse measurements
- assessing body characteristics, comparing to standard body and identifying unique features, to assess for potential problems in fit
- recording measurements, body characteristics and unique features
- selecting appropriate representation of fit model to use in product development
- maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- sizing systems
- characteristics of target market:
  - age
  - gender
  - size, body characteristics
  - economic and social expectations
  - purchase pattern
- tools and equipment:
  - manual or electronic tape measure
  - image capturing devices
  - pen/pencil

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - measure chart
    - tape, cord or elastic
    - eraser
    - Australian Standard chart
- body characteristics:
    - posture
    - genetic, developmental and structural influences
    - shape classifications, such as hourglass, rectangular, pear and inverted triangle
    - anthropometric classifications (somatotypes)
    - shoulder slope (raised, normal and sloping)
    - body sway and postural asymmetry (according to lower and upper body)
    - proportions (short or long-waisted and mid-body shortness)
- body measurements:
    - height and weight
    - body reference points, such as nape, acromion, waist point, seat vertex, abdomen vertex, carpus, neck base, upper sternum, bust point and pelvic bone
    - levels, such as crown, shoulder, scye, bust or chest, waist, hip, crotch and knee
    - girth measurements, such as waist, bust or chest, hip, high hip, upper and under bust, head circumference, upper arm, wrist, thigh, calf, ankle and heel/instep
    - horizontal measurements, such as shoulder, shoulder breadth, across front, across back,and bust point to bust point
- vertical measurements, such as nape to centre back waist, nape to neck base, nape to bust or chest, nape to waist, nape to wrist, centre front waist to floor, centre back waist to floor, right-hand side waist to floor, left-hand side waist to floor, waist to hip, inside leg, body rise, arm length and neck length
    - cup size
    - shoulder angle
    - seat prominence
- body science:
    - structural anatomy
    - morphology
    - anthropometry
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - have vocational competency in analysing fit models, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5005 Manipulate fabrics to create new finishes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5005B Manipulate fabrics to create new finishes

Application

This unit of competency covers the skills and knowledge required to use manipulation techniques to create decoration for fabric design effects.

The unit of competency applies to manipulating a range of textiles that are used in the production of garments and accessories.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry

MSTCL3001 Identify fabric performance and handling requirements

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to manipulate fabrics**	2.1	Identify a range of fabric manipulation techniques
		2.2	Identify effects of manipulation on different textiles
		2.3	Identify processes to achieve different manipulations
		2.4	Investigate how uses of manipulation inform and inspire design
		2.5	Identify the role of manipulation as a production tool and its effect on design
3	**Manipulate textiles to produce work sample**	3.1	Apply manipulation techniques to a variety of textiles
		3.2	Assess outcome and modify manipulation as required to provide quality outcomes
		3.3	Produce samples of manipulated textiles
		3.4	Document techniques and their effects for future reference

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Fabric manipulation includes three or more of the following:	• crushing • heat application • tucking • pleating • shrinking • dyeing
Textiles include one or more of the following:	• knitted fabrics, including weft knits and warp knits • woven fabrics, including plain, twill, satin, dobby and jacquard • non-woven fabrics, such as felts, nets, braids and bonded • raw materials • yarns • man-made materials

Assessment Requirements for MSTFD5005 Manipulate fabrics to create new finishes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5005B Manipulate fabrics to create new finishes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- providing at least ten (10) illustrations that demonstrate a range of fabric manipulation techniques on a variety of fabrics
- identifying and illustrating three (3) examples of how uses of manipulation inform and inspire design
- experimenting with at least three (3) manipulation techniques on different fabrics to determine their effects
- assessing outcomes and modifying manipulation as required to enhance effects
- documenting manipulation techniques and their effects for future reference.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- uses and performance characteristics of textiles, fibres and fabrics
- Australian Standards for garment production and use of chemicals
- manipulation techniques:
  - crushing
  - heat application
  - tucking
  - pleating
  - shrinking
  - dyeing
- quality practices
- workplace practices
- recording and reporting practices.

MSTFD5010 Develop and present design concepts within specific guidelines

Modification History

Release 1. Supersedes and is equivalent to LMTFD5010B Develop and present design concepts within specific guidelines

Application

The unit of competency covers the skills and knowledge required to develop and present fashion design concepts to the client, in response to a brief. It applies to a garment or small range for adult or children's market which includes some distinctive style and features. Work is conducted according to workplace practices and procedures as a member of a team or under supervision.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Determine job requirements from specifications, job sheets or work instructions
2	**Prepare to develop design concepts**	2.1	Identify and confirm design brief details and relevant design information, and clarify parameters of the project
		2.2	Research principles of good fashion design, design trends, availability of materials and other relevant information
		2.3	Identify a range of possible design concepts and prepare storyboard themes related to fabrics and colours
		2.4	Consult with other members of the design team to modify ideas and select appropriate concepts for development
3	**Develop design concepts**	3.1	Determine appropriate styles and trims or accessories
		3.2	Research and confirm production feasibility
		3.3	Prepare artwork and provide specifications in appropriate format, and include any additional documentation required
		3.4	Prepare design concepts and relevant support materials for presentation according to agreed presentation strategy
4	**Estimate production costs**	4.1	Collaborate with team to check and confirm all items and resources required for the designs
		4.2	Obtain costs for all materials from relevant sources, compare where necessary, and identify preferred suppliers
		4.3	Calculate total design costs

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

		4.4	Negotiate amendments or modifications as required to ensure design concept is within budget
5	**Present design concepts**	5.1	Prepare materials and equipment to create an effective presentation
		5.2	Outline features and benefits of designs in a positive manner that encourages approval
		5.3	Include all client brief and workplace requirements in the presentation
		5.4	Document process and costings and store documentation according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Design brief details include:	• garment or range details • target market • end uses of product • cost point • fabrics and materials • size • production requirements • timelines • client requirements • workplace requirements • quality requirements • style and feature requirements
Garments include one or more of the following:	• skirts • trousers/pants • shirts/blouses • dresses • coats • lingerie
Style features include one or more of the following:	• garment type • collar • sleeves • yoke • sides • openings • neckline • buttons • seams • zips • gathers • pleats • panels • tucks

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Parameters of the project include:	• team members and their roles • chain of command • timelines • budget constraints • reporting processes • workplace practices • technical requirements of production • constraints • project plan and critical path • additional expertise • influence of previous projects
Storyboards include:	• trade sketches of new garment designs • illustrations • magazine extracts • fabric swatches • trim or accessory samples • colour palette • specifications
Prepare artwork includes one or more of the following:	• manually • computer-aided design (CAD) system
Presentation strategy includes one or more of the following:	• illustrated talk • digital presentation • meeting with client • fashion event • trade display

Assessment Requirements for MSTFD5010 Develop and present design concepts within specific guidelines

Modification History

Release 1. Supersedes and is equivalent to LMTFD5010B Develop and present design concepts within specific guidelines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures and safe work practices
- applying relevant standards
- generating ideas in response to a design brief, identifying at least three possible design concepts and preparing storyboard themes related to fabrics and colours
- consulting with team members to determine appropriate concept for development
- incorporating distinctive style and features, trims or accessories, and confirming production feasibility
- preparing artwork manually or using computer-aided design (CAD) systems and detailing specifications and other relevant documentation as required, in appropriate format
- researching potential sources and suppliers, comparing costs and identifying preferred option
- calculating total design costs and preparing detailed costings sheets, and estimating of all costs for at least three (3) garments or a small range
- negotiating amendments or modifications as required to ensure design concept is within budget
- creating an effective presentation to present design concept, for at least three (3) garments or a small range, that meets all requirements of the brief and outline features and benefits
- preparing and storing completed documentation.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- elements and principles of design and how they are used to create good design in the fashion industry:
  - repetition
  - gradation
  - rhythm

MSTFD5011 Produce fashion illustrations to assist product visualisation

Modification History

Release 1. Supersedes and is equivalent to LMTFD5011B Produce fashion illustrations

Application

This unit of competency covers the skills and knowledge required to produce fashion illustrations that will visually communicate the fashion figure in a variety of poses and silhouettes.

The unit of competency applies to producing fashion illustrations using stylised drawing and rendering techniques.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Fashion design and technology

Unit Sector

MSTFD5012 Perform contour draping

Modification History

Release 1. Supersedes and is equivalent to LMTFD5012B Perform contour draping

Application

This unit of competency covers the skills and knowledge required to perform contour draping for styled garments that are worn against the body.

The unit of competency applies to draping fabric to the contours of the figure incorporating working design drawings. Draping may be for a one-off garment that goes from drape to garment or a prototype that goes from drape to flat pattern for small volume production. Draping is performed on a body form, such as a mannequin or model.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4021 Drape fabrics to make patterns

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to perform contour draping**	2.1	Select and prepare draping tools and equipment
		2.2	Plot design lines from working drawings onto body form, using narrow tape
		2.3	Check measurements against specifications
		2.4	Prepare fabric for draping
3	**Plan drape**	3.1	Identify requirements for adding ease and manipulating dart excess
		3.2	Plan seam positioning and develop drape plan
		3.3	Prepare cover designs if a fitted foundation to support volume draping or layering is required
4	**Perform and finalise drape**	4.1	Pin fabric on model form and perform draping operations
		4.2	Remove drape from model
		4.3	Finalise drape and direct to next production process

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Fabric includes one or more of the following:	• fabric of the final garment • a fabric that has the same handle or drape
Prepare fabric for draping includes the following:	• estimating dimensions of fabric pieces required for each section/piece to be draped • identifying warp, weft and bias of fabric • identifying and assessing fabric handling qualities
Drape plan includes one or more of the following:	• adding fullness (pleats, tucks and gathers) • multiple darts/division of darts • symmetric and/or asymmetric design features • cowls, twists and knots
Draping operations include the following:	• relating body reference points and fabric grains • moulding and manipulating fabric to fit model form according to working drawing, fit and design lines

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- adding ease to allow for movement
- incorporating fullness or volume, if required
- smoothing or manipulating fabric over contours of model form
- forming and pinning darts and seams to create pattern or construct garment
- preparing drape for truing and performing truing

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5012B Perform contour draping

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e

Assessment Requirements for MSTFD5012 Perform contour draping

Modification History

Release 1. Supersedes and is equivalent to LMTFD5012B Perform contour draping.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- preparing tools, equipment and fabric pieces
- plotting design lines from working drawings onto body form, using narrow tape
- checking measurements against specifications
- identifying requirements for adding ease and manipulating dart excess
- planning seam positioning and developing drape plan
- preparing cover designs if a fitted foundation to support volume draping or layering is required
- carrying out all required draping operations on model form on at least two (2) occasions
- finalising the drape for next process.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- principles and concepts of patternmaking
- customer and workplace requirements
- cost efficiency in relation to patternmaking
- range of typical garment fabrics, including weight and other characteristics
- draping tools and equipment:
  - model form
  - narrow tape/ribbon
  - tape measure
  - pen/pencil
  - scissors
  - square rule
  - marker pens

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - hole punch
  - pins
  - fashion triangle
  - French curve
  - pattern notcher
  - weights
- draping processes and plans
- body science:
  - structural anatomy
  - morphology
  - anthropometry
- fabric handling characteristics:
  - fall
  - stretch
  - stability
  - drape
- required details for pattern pieces
- pattern markings:
- appropriate seam widths
  - notches
  - dart lines
  - drill holes
  - grain line
  - cutting instructions
  - stitching lines
- cutting and garment construction
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in contour draping, at least to the level being assessed, with relevant industry knowledge and experience.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5014 Construct complex blocks for fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5014B Construct complex blocks for fashion garments

Application

This unit of competency covers the skills and knowledge required to construct complex blocks for fashion garments.

The unit of competency applies to the construction of blocks to develop patterns for fashion garments that require advanced styling, such as label house, couture, designer label, made-to-measure, bridal or corsetry production.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4008 Construct stock size block for garment to meet size and fit specifications

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to construct complex blocks**	2.1	Confirm garments in range and obtain profile of target market
		2.2	Interpret and clarify design sketches and drawings, specifications and intended purpose of the design with designer
		2.3	Evaluate and record size and fit model specifications, body movement and comfort requirements
		2.4	Consider fabric characteristics and performance, trims and finishing of the design
3	**Construct complex blocks**	3.1	Select blocks and block drafting principles and methods for selected fashion garments
		3.2	Analyse measurements and characteristic of fit model and enter data into block drafting formulas and methodology
		3.3	Construct block using patternmaking technical skills and check to ensure compliance with requirements, design specifications and standards
		3.4	Document methods and formulas used
4	**Verify blocks for accuracy and suitability**	4.1	Check block either manually, by computer or by constructing a toile
		4.2	Construct toiles from block, where required
		4.3	Verify correct proportion, fit and balance and suitability of garment, and make minor adjustments, where

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			required
		4.4	Label final blocks and check for accuracy and completeness of all necessary information to ensure compliance with specifications
5	**Develop block portfolio for fashion label**	5.1	Present blocks in preparation for development of style patterns according to workplace requirements and cost efficiency
		5.2	File and store blocks on appropriate media according to appropriate criteria and complete all required documentation
		5.3	Maintain records and prepare reports where necessary

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Garment range with advanced styling includes one or more of the following:	• tailored suits • eveningwear • bridal wear • couture • stretch trousers • corsetry • raglans • kimonos • overcoats • jackets • capes
Profile includes one or more of the following:	• age • ethnicity • gender • size, body characteristics • economic and social expectations
Measurement and characteristics of fit model include:	• accurate assessment of body measurement positions (landmark points, such as nape; and levels, such as waist level) • accurate taking of body measurements, including girth, vertical and horizontal measurements • age • sex • ethnicity • assessment of physical characteristics, including body characteristics and unique features as aligned with standard representation
Media includes one or more of the following:	• cardboard • computer file • tissue paper

Assessment Requirements for MSTFD5014 Construct complex blocks for fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5014B Construct complex blocks for fashion garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting designs for label garment range and determining appropriate fabric characteristics and performance, trims and finishing of the design
- recording size and fit model specifications, body movement and comfort requirements
- analysing measurements and entering data into block drafting formulas
- constructing, checking and verifying blocks, for at least two (2) different specified garments or small garment range, with advanced styling
- constructing and adjusting toiles or prototypes, and modifying block as required
- presenting blocks in preparation for development of style patterns according to workplace requirements and cost efficiency
- labelling final blocks and checking all necessary information is accurate and complete and complies with specifications
- filing and storing blocks according to appropriate criteria and maintaining records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for the fashion industry
- principles, concepts and processes of block construction
- industry, global and local trends
- detailed knowledge of garment construction
- fabric characteristics and performance
- cost efficiency in relation to block construction and patternmaking
- garments or small garment range with advanced styling, such as:
  - tailored suits
  - eveningwear
  - bridal wear

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - couture
    - stretch trousers
    - corsetry
    - raglans
    - kimonos
    - overcoats
    - jackets
    - capes
- patternmaking technical skills
- computer aided design skills relevant to block construction
- block making methods and formulas:
    - deviations from standard patterns
    - sources of pattern components
    - pattern derivation methods and formulas
    - block construction methods and formulas
    - application of current industry practice
- toile construction
- block filing criteria:
    - date
    - category
    - label
    - location
    - gender
    - age
- documentation and recording practices.

Assessment Conditions

- Assessors must:
    - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
    - have vocational competency in complex block construction at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5015 Develop patterns for complex fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5015B Develop patterns for complex fashion garments

Application

This unit of competency covers the skills and knowledge required to develop patterns for the production of complex fashion garments with advanced styling requirements.

The unit of competency applies to the development of patterns using an existing block and applying advanced patternmaking principles.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTCL3009	Develop patterns from a block using basic patternmaking principles
MSTFD4010	Create pattern to meet design specifications applying advanced patternmaking principles
MSTFD4015	Create pattern from block to meet customer specifications

Competency Field

Fashion design and technology

Unit Sector

Not applicable

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to create patterns**	2.1	Select and prepare patternmaking tools, equipment, additional materials, if required, and workstation
		2.2	Interpret and clarify design drawings and specifications, and identify design lines and style features
		2.3	Confirm garments in range, intended purpose and target market with designer
		2.4	Obtain profile of target market, check sketches or drawings and interpret specifications with designer, as required
		2.5	Evaluate and record all design and advanced styling requirements
3	**Create pattern for complex garments**	3.1	Plan pattern production according to quality standards and workplace procedures
		3.2	Select blocks for block portfolio and check they are accurate and appropriate
		3.3	Make necessary adjustments to seams to create silhouette to match design brief
		3.4	Produce pattern using advanced patternmaking principles and document methods and formulas used
		3.5	Check pattern pieces, label and complete markings

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4	**Check and finalise patterns**	4.1 Test toile or garment segments for proportioning and fit
		4.2 Fit prototype to ensure that pattern is satisfactory to customer
		4.3 Complete any pattern alterations and assess pattern meets fit and design requirements
		4.4 Finalise pattern and check it is accurate, complete and complies with design specifications
		4.5 Complete pattern specification sheet, attach to patterns for storage and file appropriately

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Australian Standards include:
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Design requirements include :
- fabric characteristics and performance
- trim details and finishings
- special construction method
- ease allowances
- identification of fabrics not suitable to the design
- budget constraints
- specification of fit model
- body movement
- comfort

Style features include one or more of the following:
- garment type
- collar
- sleeves
- yoke
- sides
- openings
- neckline
- buttons
- seams
- zips
- gathers
- pleats
- panels
- tucks

Advanced styling includes one or more of the following
- label house
- couture
- designer label
- made-to-measure
- bridal
- corsetry

Complex garments include one or more of the following:
- tailored suits
- eveningwear
- bridal wear
- couture

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- trousers
- pants
- suits
- corsetry

Advanced patternmaking methods and formulas include the following:

- deviations from standard patterns
- sources of pattern components
- pattern derivation methods and formulas
- block construction methods and formulas
- application of current industry practice

Check pattern pieces includes the following:

- accuracy of seam allowances
- ease allowance
- seam match
- hems
- functional openings
- flow through

Specification documents include the following:

- number of pattern pieces
- what the pattern consists of (e.g. 2 bodice, 1 sleeve)
- measurement table
- size table
- technical drawing
- details of types of materials (fabric, lining, fusing, elastic, closures and trims)
- sign-off
- recommendations for stitching

Unit Mapping Information

Assessment Requirements for MSTFD5015 Develop patterns for complex fashion garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD5015B Develop patterns for complex fashion garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- interpreting and clarifying design drawings and specifications, design lines and style features
- confirming garments in range, intended purpose and target market with designer
- obtaining profile of target market, checking sketches or drawings, interpreting specifications with designer, as required
- recording all design and advanced styling requirements
- using patternmaking tools and equipment and applying industry standards for advanced patternmaking and complex garment construction
- choosing appropriate block portfolio to develop a complex pattern to suit work specifications
- producing a pattern using advanced patternmaking principles for at least two (2) complex garments with advanced styling, and documenting methods and formulas used
- checking pattern pieces, labelling and completing markings
- fitting toile, prototype or garment segments to check for correct fit, and adjusting patterns to suit customer and design requirements
- finalising pattern, checking it is accurate, complete and complies with design specifications, and completing pattern specification sheet to attach to patterns
- filing patterns according to workplace procedures and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- patternmaking tools and equipment:
  - blocks
  - dress form

MSTFD5016 Grade complex patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD5016B Grade shaped patterns

Application

This unit of competency covers the skills and knowledge required to conduct allometric grading of shaped or 3-D patterns for fashion garments.

The unit of competency applies to grading patterns where the focus is on taking into account differences in body growth for a specialised fit. Allometric grading must consider the relative growth rate of different parts of the body. Discretion and judgement may be required in planning and selecting processes.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSTFD4013 Grade 2-D patterns

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare to grade complex patterns**	2.1	Research target market and collect data of target market for measurement table
		2.2	Clarify design brief and confirm target market and intended purpose of design with designer
		2.3	Analyse measurement table
		2.4	Identify growth of circumference and length increments and construct size table
		2.5	Identify base pattern pieces, allocate grade points and construct grade rule table
3	**Grade complex patterns**	3.1	Determine stacking or outlay requirements, including direction
		3.2	Grade pattern manually using patternmaking technical skills or by computer
		3.3	Identify stack points or lines if stacking is used
		3.4	Preserve integrity of pattern attributes during grading
		3.5	Accurately label all pattern pieces with pattern marking symbols
		3.6	Check pattern for accuracy and rectify or address faults as required
4	**Finalise and store complex patterns**	4.1	Prepare shaped patterns and markers and present in preparation for production

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

4.2 Prepare specification documents required

4.3 Maintain records and complete documentation as required

4.4 File patterns according to workplace procedures

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Research target market includes the following:

- analyse target market
- identify averages and differences
- analyse body growth
- record relevant data

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Body growth includes the following:	• change in shape • increase in dimension of the neck, torso and limbs which is independent of growth in stature
Grading methodology includes the following:	• allometric or 3-D apportion of grade increments • positioning of constant or stack point through growth areas of body
Shaped grading includes the following:	• a construction-based method of grading • reduces or grows a base pattern in height, girth and shape • distributes grade increments at points and in values that reflect a third dimension to a flat 2-D pattern • must consider the relative growth rate of different parts of the body

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTFD5016B Grade shaped patterns

Assessment Requirements for MSTFD5016 Grade complex patterns

Modification History

Release 1. Supersedes and is equivalent to LMTFD5016B Grade shaped patterns

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- researching target market, clarifying design brief and confirming target market and intended purpose of design with designer
- analysing measurement table, identifying growth of circumference and length increments and constructing size table
- identifying base pattern pieces, allocating grade points and constructing grade rule table
- determining stacking or outlay requirements, including direction
- using computer-aided design (CAD) or manual grading system to grade at least two (2) shaped or 3-D patterns
- preserving integrity of pattern attributes during grading and correctly marking and labelling pattern pieces
- checking pattern for accuracy, rectifying faults as required, finalising pattern for production and preparing specification documents
- completing documentation, maintaining records and filing patterns according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian size Standards
- workplace and customer size charts
- allometric grading processes
- pattern attributes:
  - darts
  - notches
  - shape
  - design proportion
- marker making

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- pattern marking symbols and labelling:
  - grain lines
  - darts
  - notching
  - all necessary slits
  - job seams
  - seam allowance
  - cutting line
  - stitching line
- correct written information and instructions
- cost efficiency in patternmaking
- documentation, specifications and recording practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in grading complex patterns, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5017 Apply design studio processes to meet client brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD5017B Apply design studio processes to meet client brief

Application

This unit of competency covers the skills and knowledge required to apply design studio processes when working to a client brief to design and produce fashion garments.

The unit of competency applies to integrating skills across the design and production process and focuses on experimentation and continuous improvement in order to achieve desired design effects and meet a client brief for individual garments or a small range.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Fashion design and technology

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Determine job**	1.1 Follow standard operating procedures (SOPs)

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Prepare for design and production**	2.1	Identify and confirm specifications of design brief, client needs and objectives and establish the purpose and parameters of the design with client
		2.2	Identify characteristics of target market and review relevant products previously developed by the enterprise in terms of similar specifications
		2.3	Establish communication requirements and channels with client
		2.4	Research relevant information to guide design and production process
		2.5	Analyse information, clarify brief, as required, and identify any additional expertise required for project
		2.6	Access and apply information on design techniques and processes used to achieve desired effects, as required throughout design and development processes to improve product
3	**Undertake design and production process**	3.1	Identify preliminary concept options, discuss with client or workplace design team and evaluate options against design brief specifications
		3.2	Apply principles and elements of design to experiment with design concepts
		3.3	Use selection processes to evaluate and refine concept options and scope out preliminary design concepts to present to client
		3.4	Present design concept to client and apply client's feedback to modify and improve design
		3.5	Scope production requirements and make preparations

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

			for production
		3.6	Identify sequence of operations and complete requirements to develop and confirm design pattern
		3.7	Complete required actions to produce finished fashion product
4	**Review design and production processes**	4.1	Assess finished product against quality criteria, design specifications and design brief
		4.2	Evaluate design to identify opportunities for improvement
		4.3	Analyse and evaluate production process to identify opportunities for improvement
		4.4	Document process and improvements
		4.5	Plan to present final product to client
5	**Present finished product to client**	5.1	Prepare finished product for presentation
		5.2	Select accessories, fabric examples and components to convey range and style options of design
		5.3	Select model as required
		5.4	Organise presentation of finished product
		5.5	Seek client response and assess for improvement possibilities
		5.6	Assess further production and business opportunities

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Specifications includes the following:

- budget
- price point
- type of garment
- fabric type and quantity
- range
- style requirements
- fit model specifications
- size range
- timeline
- special effects or features
- quality criteria
- finishing details
- design restrictions or conditions

Relevant information includes one or more of the following:

- trends
- fabrics
- production and construction processes
- target market

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

	• resource availability • costs
Selection processes include one or more of the following:	• checking against design brief • discussing with client • testing with target market • testing with production team • discussing with patternmaker • testing with sales and marketing professionals
Experiment with design concepts includes one or more of the following:	• scoping out preliminary concepts using sketches, illustrations, models, samples, fibres and fabrics • using selected criteria and processes to evaluate design concepts by self and others • assessing feedback and analysis for potential to improve design concept • using further experimentation to develop design concepts • selecting concepts for presentation and testing with appropriate personnel
Present design concept to client includes the following:	• using communication tools to present design concept • emphasising features and benefits of design concepts • encouraging and promoting acceptance of design concept • assessing and responding to client response • modifying design concept and improving it where possible
Communication tools include one or more of the following:	• inspiration board • storyboard • research information • multimedia tools • print and audio tools • demonstration or exhibition
Presentation skills include one or more of the following:	• effective verbal and non-verbal communication • active listening • use of appropriate communication tools • positive language • clear statement of main points • interpersonal communication skills

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- seeking and responding to feedback
- encouraging questions
- responding effectively to questions

Preparations for production include the following:

- identifying all components required for production
- identifying technical aspects of production
- completing specification sheet to guide production
- identifying and sourcing resources and production requirements
- developing production plan to guide production
- confirming production plan with client

Sequence of pattern operations includes the following:

- selecting pattern base to meet design brief
- modifying blocks to create patterns that meet design requirements and specifications
- making pattern according to industry standards, including industry markings and lay plans
- creating toile to test accuracy of pattern
- confirming pattern against design specifications

Produce finished fashion product includes the following:

- preparing workplace according to WHS practices
- preparing materials and resources
- cutting fabric according to pattern directions
- sewing product according to specifications
- finishing product according to specifications

Assessment Requirements for MSTFD5017 Apply design studio processes to meet client brief

Modification History

Release 1. Supersedes and is equivalent to LMTFD5017B Apply design studio processes to meet client brief

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- confirming specifications of design brief, client needs and objectives and establishing the purpose and parameters of the design with client
- determining target market and preliminary concept options, discussing with client or workplace design team and evaluating options against design brief specifications
- applying principles and elements of design to experiment with design concepts and presenting design concept to client, using client's feedback to modify and improve design
- producing at least three (3) fashion design products or a small range that meets the client design brief specifications and Australian Standards
- presenting finished garment to client, to convey range and style options of design, and seeking client response
- evaluating completed product design and production processes to identify possible improvements
- preparing all relevant documentation and identifying further production and business opportunities.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- aspects of the design process:
  - applying elements and principles of design
  - developing inspiration boards and storyboards
  - assessing fibres and fabrics
  - reviewing relevant products, such as garment sample designs
- design, patternmaking and fashion production tools, equipment and processes:
  - blocks
  - dress form

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

    - scissors
    - square rule
    - marker pens
    - hole punch
    - pins
    - fashion triangle
    - French curve
    - pattern notcher
    - weights
    - tape measure
- characteristics of target market:
    - age
    - gender
    - size and body characteristics
    - economic and social expectations
    - purchase pattern
- communication tools:
    - inspiration board
    - storyboard
    - research information
    - multimedia tools
    - print and audio tools
    - demonstration or exhibition
- communication skills and strategies:
    - effective verbal and non-verbal communication
    - oral, written and visual communication
    - active listening
    - positive language
    - recognising and adapting to cultural differences
    - negotiation and conflict resolution skills
- elements and principles of design and how they are used to create good design in the clothing industry:
    - repetition
    - gradation
    - rhythm
    - radiation
    - harmony
    - contrast
    - dominance
    - proportion

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

  - balance
  - unity
- information sources and requirements for design and production
- structural anatomy impacting on design:
- skeletal development
- muscle development
- body morphology:
  - shape
  - form
  - fat distribution
- garment construction
- fabrics, fibres, trims and accessories, and their properties and characteristics
- personnel who can contribute to design brief and studio processes:
  - supervisor
  - trainer/mentor
  - designers
  - patternmakers
  - production supervisors
- quality criteria:
  - proportion
  - perspective
  - symmetry and balance
  - detailing
  - neatness
- recording and reporting practices.

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in applying design studio processes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills,
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2019 Innovation and Business Skills Australia

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSTFD5018 Determine and specify advanced construction processes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5018B Determine and specify advanced construction processes

Application

This unit of competency covers the skills and knowledge required to determine and specify advanced construction processes to achieve desired design details.

The unit of competency applies to design details which achieve specific effects in the production of garments to give a garment a more unique, individual appearance. It also applies to producing samples and developing construction specifications and standard operating procedures (SOPs) to guide the production of garments which incorporate design detail.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

essential outcomes.		demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Produce design details**	2.1	Determine design details and their position on the garment
		2.2	Prepare artwork/drawings/specifications and any additional documentation in appropriate format
		2.3	Plan advanced garment construction processes and determine advanced machine or equipment requirements
		2.4	Select appropriate fabric, components and equipment and use advanced construction processes to produce sample design detail
3	**Develop advanced construction process plan**	3.1	Evaluate sample to assess results and modify sample and process plan, as required
		3.2	Consult with production team to determine requirements and assign tasks according to available expertise and production requirements
		3.3	Communicate with team members to clarify advanced construction process plan
		3.4	Analyse design specification sheet, drawings, samples and patterns with team
		3.5	Apply quality criteria and copyright/intellectual property (IP) obligations
4	**Confirm and document**	4.1	Establish relevant technical, monitoring and reporting procedures

Assessment Requirements for MSTFD5018 Determine and specify advanced construction processes

Modification History

Release 1. Supersedes and is equivalent to LMTFD5018B Determine and specify advanced construction processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- developing specifications for at least two (2) design details and the process to achieve them, ensuring copyright and quality criteria are applied
- using required equipment to demonstrate at least three (3) advanced garment construction processes
- developing advanced construction specifications and process plan, including details of advanced machines or equipment
- communicating effectively with construction team to finalise plans and assign tasks for at least two (2) garments with special design effects and advanced construction processes
- documenting processes and maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- design details to achieve special effects, such as:
  - printing
  - dyeing
  - fraying
  - cutting fabric on bias
  - painting
  - beading
  - embroidery
- garment construction
- advanced construction processes, such as:
  - cut-in and applied pockets and tabs
