Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:
- operation of the metal detection unit
- reasons for having metal detection units and their location at the work site
- workplace procedures when metal is detected in a product
- relevant regulatory requirements

## Overview of assessment
- The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
- These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
- Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
- All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit
- Competency in this unit must be demonstrated over time and under typical operating and production conditions for the enterprise.

## Context of, and specific resources for assessment
- Resources include metal detection equipment which meets OH&S requirements.

## Method of assessment
- Recommended methods of assessment include:
  - observation of performance over time
  - workplace demonstration
  - quiz of underpinning knowledge.

- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

## Guidance information for
- A current list of resources for this Unit of Competency is
EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**
- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.
### RANGE STATEMENT

**Hygiene and sanitation requirements** may include:
- relevant government regulations
- workplace requirements.

**Communication skills** may include:
- communicating with diverse individuals and groups
- listening and understanding
- reading and interpreting workplace-related documentation
- speaking clearly and directly.

**Mathematical skills** relate to own work and work area problem-solving and may include:
- accurate recording of quantity in standard formats/proformas
- interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc
- routine estimations and calculations using a range of specified formula and procedures.

**Regulatory requirements** may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- state and territory regulations regarding meat processing.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify casing size requirements according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify, remove and report defective product according to workplace procedures
- apply relevant communication and mathematics skills
- work effectively as an individual and as a member of a team
- work to production speed
### REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practice or technology

### Required knowledge

Knowledge of:
- storage requirements of soaked casings carried over from production
- storage requirements of both natural and synthetic casings
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
- possible faults in skins and their effect on the product
- relevant regulatory requirements
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:
- filling equipment
- manufacturer's instructions
- product specifications
- workplace environment
- workplace procedures.

Method of assessment

Recommended methods of assessment include:
- demonstration of casing preparation
- quiz of underpinning knowledge
- workplace referee report over time.
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Casing specifications may include:
- natural
- synthetic.

Possible casing faults may include:
- breakage
- contamination
- fluctuations in diameter
- incorrect label information
- poor cleanliness
- poor colour
- tearing
- thick ends
- weakness
- webbing
- whiskers
- worm holes
- wrong diameter.

Workplace requirements may include:
- enterprise-specific requirements
### RANGE STATEMENT

**include:**
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Product specifications** may include:
- colour
- consistency or firmness
- shape
- size
- thickness
- weight.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Hygiene and sanitation requirements** may include:
- relevant government regulations
- workplace requirements.

**Communication skills** may include:
- asking questions
- communicating with diverse individuals and groups
- listening and understanding
- reading and interpreting workplace-related documentation
- speaking clearly and directly.
RANGE STATEMENT

**Mathematical skills** may include:
- accurate recording of volume, weight and quantity in standard formats and proformas
- interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc
- routine estimations and calculations using a range of specified formulas and procedures
- routine estimation and calculation involving percentages, comparisons, variations.

**Regulatory requirements** may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
**REQUIRED SKILLS AND KNOWLEDGE**

- correctly fill a range of product lines in terms of:
  - casing
  - clips
  - length
  - tension
  - weight
- shape and form a range of products to product specifications, workplace, hygiene and sanitation, QA and customer requirements
- demonstrate operation, adjustments and actions of filling machine to address faults
- operate a metal detector if a detector is included in the operation
- identify, remove and rectify faulty product
- identify *defects in natural casings*
- clean *equipment* according to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a member of a team
- *explain* filling to required product specifications for a variety of products
- apply relevant Occupational Health and Safety (*OH&S*) and *regulatory requirements*
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work at required speed of production

**Required knowledge**

Knowledge of:

- hygiene requirements for forming products
- filling to required product specifications for a variety of products
- how and why products must be formed and shaped
- possible faults in skins and their effect on the product
- procedures for dealing with waste product and broken casings
- relevant *OH&S* and regulatory requirements

**Required Skills and Knowledge**

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:
- identify slicing equipment and accessories
- identify product and slicing faults in a range of products
- adjust weight control mechanisms if a part of work instructions
- demonstrate procedure for preparing slicing equipment for new product
- slice products to workplace requirements and customer specifications for a variety of products
- clean and maintain slicing equipment if required in work instructions
- observe safety requirements for cleaning slicing equipment (if required in work instructions)
- sharpen a slicing blade if a part of work instructions
- apply relevant *communication* skills
- work effectively as an individual and with other team members
- weigh and bag products with weight specifications
- explain and demonstrate checks on products if a part of work instructions
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology

#### Required knowledge

- workplace procedures when metal is detected in a product
- how and why product is prepared for slicing
- how products are weighed and bagged when they have a weight specification
- how weight control mechanisms are adjusted
- illegal weights
- maximum and minimum allowable weights
- operating procedures for various types of slicing equipment
- importance of cutting blade maintenance in the slicing process
- procedure for sharpening a slicing blade if a part of work instructions
- procedures for handling faulty product
- procedures for reporting faults in slicing equipment
- safety considerations when setting up slicing equipment
- use-by and packed-on dates and their importance
- relevant regulatory requirements

EVIDENCE GUIDE

| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Slicing equipment may include:
- slicer
- dicer
- blade.

Specifications may be defined by:
- customer specifications
- industry standards
- workplace procedures.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs such as
  - accident prevention
  - electrical fault procedures
  - emergency evacuation procedures
  - emergency procedures in case of injury
  - equipment malfunction
  - OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs

</tr>
<tr>
<td></td>
<td>requirements set out in standards and codes of practice.</td>
</tr>
</tbody>
</table>

#### Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

#### Regulatory requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

#### Communication

- be with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties
- involve listening and understanding
- involve the application of numeracy skills to workplace requirements
- require reading and interpreting workplace-related documentation
- require speaking clearly and directly.

#### Explanations may:

- be presented orally, in writing using standard formats, or using a range of communication technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
RANGE STATEMENT

- use workplace, mathematical and technical language.

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Store meat | 1.1. Meat is stored at the required refrigerated temperature in accordance with hygiene and sanitation, regulatory and workplace requirements.  
1.2. Meat storage time and shelf life are documented for each meat product according to regulatory requirements.  
1.3. Meat is checked to ensure it is labelled in accordance with workplace and regulatory requirements. |
| 2. Rotate stored meat | 2.1. Meat is selected for rotation according to label documentation and workplace requirements.  
2.2. Meat is handled hygienically during rotation in accordance with regulatory and hygiene requirements.  
2.3. Meat is rotated according to regulatory, hygiene and workplace requirements.  
2.4. Shelf life of meat is considered in relation to the storage and rotation of meat and meat product.  
2.5. Meat is handled according to Occupational Health and Safety (OH&S) requirements. |
| 3. Maintain clean holding room | 3.1. Holding room is cleaned according to regulatory, OH&S, hygiene and workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- store meat in accordance with temperature requirements
- demonstrate rotation of stored meat in line with:
  - hygiene and sanitation requirements
  - regulatory requirements
  - OH&S requirements
  - workplace requirements
- select, organise, report and record routine information and mathematical data
# REQUIRED SKILLS AND KNOWLEDGE

- related to:
  - labelling
  - rotation and shelf life of meat product
  - storage of meat product
  - work effectively as an individual and as a member of a team
  - **explain** stock rotation requirements for meat to regulatory and hygiene requirements
  - apply relevant *communication* and *mathematical* skills
  - take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

## Required knowledge

Knowledge of:

- effects on the product of the use of meat which is beyond its useful life
- storage temperatures and shelf life for meat
- stock rotation requirements for meat to regulatory and hygiene requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
<tbody>
<tr>

1.3. Carton meat is inspected for contamination and specification defects according to workplace requirements.  
1.4. Corrective action is taken according to workplace requirements.  
1.5. Cartons are handled safely according to workplace and Occupational Health and Safety (OH&S) requirements.  
1.6. Defects are recorded or reported according to workplace requirements.  
1.7. Defects are segregated and disposed of in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- use sample program, where applicable
- perform inspection according to workplace requirements for hygiene and safety
- report defects, where appropriate
- apply defect reporting procedures
- apply relevant communication and mathematical skills
- apply relevant OH&S policies and procedures
- work effectively as an individual and as a member of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
## REQUIRED SKILLS AND KNOWLEDGE

- take appropriate corrective action when defects are found

### Required knowledge

Knowledge of:

- appropriate inspection procedures
- defect reporting procedures
- Standard Operating Procedures (SOPs) for personal hygiene
- likely defects to be encountered
- work instructions for inspection
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:
- real work environment
- relevant documentation such as:
  - product specifications
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials.

### Method of assessment

Recommended methods of assessment include:
- workplace demonstration
- quiz
**EVIDENCE GUIDE**

| | • question and answer  
| | • observation of performance over time.  

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Carton meat** may include:

- beef (e.g. brisket and tongues)
- game meat
- lamb (e.g. legs and tongues)
- mutton
- other meat species or products
- pork (e.g. hand and spring)
- veal.

**Workplace requirements** may include:

- enterprise-specific requirements  
- OH&S requirements  
- Quality Assurance (QA) requirements  
- SOPs  
- the ability to perform the task to production requirements  
- work instructions.

**Product specifications** may vary  
- customer and workplace requirements.
## RANGE STATEMENT

according to:

### OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- PPE which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Communication may:
- be with people from a range of cultural, social and ethnic backgrounds
- involve listening and understanding, speaking clearly and directly
- require reading and interpreting workplace-related documentation
- require writing to audience needs.

### Mathematical skills may include:
- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

### Hygiene and sanitation requirements may include:
- relevant government regulations
- workplace requirements.

### Regulatory requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007

</table>
| 1. Select ingredients         | 1.1. *Ingredients* are selected by type and quality according to *product specifications*.  
                                 | 1.2. Dry ingredients are selected according to the formulation specification.  
                                 | 1.3. Ingredients are handled hygienically at all times to prevent contamination.  
| 2. Weigh and batch ingredients | 2.1. Scales are correctly calibrated for precise measurement.  
                                 | 2.2. Ingredients are placed in specific containers for weighing.  
                                 | 2.3. Ingredients are weighed according to daily production requirements.  
                                 | 2.4. Ingredients are sorted and weighed into batch quantities according to recipes and product requirements.  
                                 | 2.5. Spices are mixed according to recipe.  
| 3. Record usage               | 3.1. Ingredients are stored in a safe and hygienic manner.  
                                 | 3.2. Usage of ingredients is accurately recorded to workplace requirements.  
                                 | 3.3. Usage of ingredients is accurately reconciled to production specifications.  

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- weigh ingredients to product specifications and daily production requirements
- describe procedure to record usage of ingredients
- apply mathematical skills appropriate to the task
- work effectively with team members as appropriate
- explain and demonstrate batching in accordance with food standards code
- apply relevant Occupational Health and Safety (OH&S), workplace and regulatory requirements
### REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

#### Required knowledge

Knowledge of:

- possible effects on product and on consumer health of using incorrect ingredients
- health and hygiene factors relating to the preparation of dry ingredients
- ingredient batches
- OH&S requirements related to the preparation of dry ingredients
- relevant workplace and regulatory requirements
- various additives, spices, binders and ingredients and explain their functions in the product
- procedure for checking scale accuracy
- steps to follow a recipe correctly
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**EVIDENCE GUIDE**

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Ingredients** may

- need to adhere to legislative requirements
- and may include:
  - additives
  - binders
  - pre-mixes
  - salt
  - spices.

**Product specifications** will vary according to:

- customer and workplace requirements.

**Workplace requirements** may include:

- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.
**RANGE STATEMENT**

**Mathematical skills** may involve:
- accurate recording of volume, weight and quantity in standard formats or proformas
- interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc
- operations involving percentages, comparisons and variations
- routine estimations and calculations using a range of specified formula and procedures.

**Explanations** may:
- be in everyday workplace language including mathematical language and some commonly used technical terms
- be presented in writing using standard formats, proformas, charts and diagrams
- be presented orally
- include mathematical and other information from several sources.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - eye and facial protection
  - head-wear
  - lifting assistance
  - uniforms
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

**Communication skills** may include:
- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
RANGE STATEMENT

- speaking clearly and directly
- working with diverse individuals and groups
- writing to audience needs.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- identify routine faults in measuring instruments
- achieve consistent levels of accuracy
- interpret mathematical symbols and diagrams
- explain the purpose of graphs or charts
- source and apply new ideas and techniques to address unfamiliar situations or resolve problems
- explain the relationship between different measurement scales
- apply relevant Occupational Health and Safety (OH&S), workplace and regulatory requirements whenever undertaking numeracy tasks in a meat industry

</thead>
</table>
| 1. Set up specialist cutting equipment | 1.1. Blades are checked for sharpness and correct sequence in accordance with workplace and Occupational Health and Safety (OH&S) requirements.  
1.2. Corrective action is taken as necessary.  
1.3. Equipment is washed down and sanitised according to hygiene and workplace requirements.  
1.4. Ingredients are loaded according to product specifications and OH&S requirements. |
| 2. Operate specialist cutting equipment | 2.1. Ingredients are checked to ensure conformity to product and customer specifications.  
2.2. Equipment is programmed to product specification and OH&S requirements.  
2.3. Ingredients are loaded in a specified regime for the style of the product.  
2.4. Product is processed according to product and manufacturer's specifications, and OH&S requirements.  
2.5. Silent or bowl cutter is operated to produce a variety of specified products to meat production requirements.  
2.6. Timing of the process is judged for correct texture according to product specifications.  
2.7. Temperature is controlled to product specifications, and hygiene and sanitation requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- **explain** the health and hygiene factors related to operating a bowl cutter
- identify various additives, spices and binders
- operate bowl cutter to produce a variety of products to:
### REQUIRED SKILLS AND KNOWLEDGE

- workplace requirements
- OH&S requirements
- hygiene and sanitation requirements
- product specifications
- production requirements
- demonstrate the difference in cutting techniques between raw meat *emulsions* and pre-cooked meat emulsions
- identify any unhygienic meat ingredients
- apply relevant *communication* and *mathematical skills*
- work effectively in a range of situations as an individual and as a team member
- apply relevant *regulatory requirements*
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- corrective action to be taken in situations such as:
  - incorrect loading of ingredients
  - machinery malfunction
  - temperature malfunction
  - unhygienic meat ingredients
- common tests for blade sharpness:
  - no feathered edges
  - cutting paper without tearing
  - checking for ragged edges
- appropriate quantities of water or ice to ensure temperature is maintained according to product specifications
- consequences of loading ingredients in the incorrect order such as:
  - fat separation caused by over-heating etc
  - red colour after cooking
  - temperature control
- health and hygiene factors related to operating a bowl cutter
- importance of protein extraction
- effects on product and on health and safety of incorrectly placing product in equipment
- effect of meat temperature when cutting meat for salami
- effect on product of the temperature of the cutting equipment
- importance of blade sharpness for the cutting process and the consequences of

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffas
  - eye and facial protection
  - head-wear
**RANGE STATEMENT**

- lifting assistance
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Specialist cutting equipment** may:
- involve
- blending
- chopping
- mixing
- include:
  - emulsifier
  - silent or bowl cutter.

**Hygiene and sanitation requirements** may include:
- relevant government regulations
- workplace requirements.

**Explanations** may:
- be in diagrammatic, sketch, tabular or graphic formats
- be presented in writing
- be presented orally
- include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.

**Emulsions** may include:
- cooked meat such as brawn, brine-based products, pates
- raw meat, such as devon, frankfurts, fritz.

**Communication skills** may include:
- interacting with people from a range of cultural, social and ethnic backgrounds
- listening and speaking with others
- reading and interpreting workplace documentation.

**Mathematical skills** may include:
- collection
- estimation
- calculation and interpretation of product formulation and specifications
- monitoring, adjusting and calibrating equipment, stock control and usage.
## RANGE STATEMENT

**Regulatory requirements** may include:

- Export Control Act
- Federal, state and territory regulations regarding meat processing
- Hygiene and sanitation requirements
- Relevant Australian Standards
- Relevant regulations.

</thead>
<tbody>
<tr>
<td>1. Place product in cooking or steaming facility</td>
<td>1.1. Individual product is identified and placed correctly in cooking or steaming facility for even cooking or steaming.&lt;br&gt;1.2. Product is spaced in cooking facility according to product and manufacturer’s specifications.</td>
</tr>
<tr>
<td>2. Cook or steam product</td>
<td>2.1. Correct cooking or steaming procedure is determined.&lt;br&gt;2.2. Cooking or steaming cycle is set and maintained according to specifications and workplace requirements.&lt;br&gt;2.3. Cooking or steaming process is regularly monitored and adjusted as necessary to fulfil product specifications.&lt;br&gt;2.4. Internal temperature of product is checked on completion of cooking or steaming cycle to ensure correct process has been achieved.&lt;br&gt;2.5. A variety of products are cooked or steamed to workplace requirements and customer specifications at a speed similar to production requirements.&lt;br&gt;2.6. Process and results of cooking or steaming are correctly recorded.&lt;br&gt;2.7. Product is dyed to achieve a uniform colour when required by product specifications.</td>
</tr>
<tr>
<td>3. Chill or cool product</td>
<td>3.1. Product is weighed immediately on completion of cooking or steaming cycle.&lt;br&gt;3.2. Product is chilled immediately or cooled at ambient temperature before chilling according to product specifications.&lt;br&gt;3.3. Product is identified and stored according to product specifications and workplace requirements.</td>
</tr>
</tbody>
</table>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills
### REQUIRED SKILLS AND KNOWLEDGE

**Ability to:**
- cook or steam of a variety of products to product specifications, to workplace, customer, Quality Assurance (QA) and **hygiene and sanitation requirements**
- identify the cause and effects of, and explain the appropriate action for:
  - cycle out of sequence
  - drops during cooking
  - excess cooking or steaming
  - excess humidity
  - insufficient cooking or steaming
  - low humidity
- operate cooking or steaming facility in a safe and hygienic manner
- demonstrate storage procedures
- apply relevant **communication and mathematical skills**
- work effectively in a range of situations as an individual and as a member of a team
- apply relevant Occupational Health and Safety (**OH&S**) and **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:
- correct cooking or steaming procedure for specific products
- procedure followed to measure product internal temperatures correctly
- chilling or cooling requirements for different products
- dye addition procedures for a given range of products
- effect of incorrect chilling on yield
- effects of incorrect spacing or placement of product for cooking or steaming
- recording requirements for the cooking or steaming process
- relevant **OH&S** and regulatory requirements
- cause and effects of
  - cycle out of sequence
  - drops during cooking
  - excess cooking or steaming
  - excess humidity
  - insufficient cooking or steaming
  - low humidity
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities. |
| Context of, and specific resources for assessment | Resources may include:  
  - real work environment  
  - relevant documentation such as:  
    - manufacturer's instructions  
    - regulatory requirements  
    - workplace policies and procedures  
    - relevant equipment and materials. |
| Method of assessment | Recommended methods of assessment include:  
  - workplace demonstration  
  - quiz  
  - observation of performance over time. Assessment practices should take into account any relevant language or cultural issues related to |
EVIDENCE GUIDE

| Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may include:

- canned meat products
- frankfurters
- ham
- ready to cut meats.

Cooking includes:

- baking
- dry cooking
- hot water immersion.

Steaming may be via:

- a steam room
- direct steam injection.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Product may be chilled or cooled by:

- chill cabinets
- immersing in ambient running water
- placing in cool room
- placing in intensive or blast chillers.

1.3. Defects are identified and corrective action taken according to workplace requirements.  
1.4. Meat is prepared and stored prior to processing according to workplace requirements. |
| 2. Dry meat products | 2.1. Pre-operational checks on drier are performed according to workplace requirements.  
2.2. Drier is loaded according to workplace requirements, including hygiene and sanitation, and Occupational Health and Safety (OH&S) requirements.  
2.3. Drier is operated according to workplace requirements, including observing time and temperature specifications.  
2.4. Records are maintained according to workplace requirements.  
2.5. Drier is emptied according to workplace requirements. |
| 3. Inspect and store dried meat | 3.1. Dried product is inspected according to workplace requirements.  
3.2. Dried product is stored prior to packing according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant communication and mathematical skills
- work effectively in a range of situations as an individual and as a team member
- apply workplace specifications for meat to be dried
- apply relevant regulatory requirements
- identify defects that have to be inspected for possible causes of contamination
### REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- ways of preventing contamination
- OH&S hazards associated with operating a drier
- workplace specifications for meat to be dried
- relevant regulatory requirements
- time and temperature requirements for the variety of products produced
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
All assessment must be conducted against Australian meat industry standards and regulations. |

| 1. Prepare casings | 1.1. Casings are calibrated according to *product specifications* and *workplace requirements*.  
1.2. *Specifications of casings* are confirmed for each product.  
1.3. Casings are checked for *faults* according to workplace requirements.  
1.4. Casings are prepared as required according to workplace requirements.  
1.5. Casings are flushed thoroughly with clean water in accordance with workplace requirements.  
1.6. Casings are spooled or pulled into filling tube or nozzle in preparation for further processing.  
1.7. Correct quantity of casings is prepared in accordance with production specifications.  
1.8. Casings are prepared according to Occupational Health and Safety (*OH&S*) and *hygiene and sanitation requirements*.  
1.9. Casings are stored according to manufacturer's specifications and hygiene requirements. |
| 2. Prepare filling machinery | 2.1. Requirements in preparation for start-up of filling machine are completed to workplace requirements.  
2.2. Machine requirements are set correctly.  
2.3. Start-up procedures are followed to workplace requirements.  
2.4. Filling materials are attached and changed to workplace requirements and product specifications.  
2.5. *OH&S*, hygiene and sanitation requirements are followed. |
| 3. Fill casings | 3.1. Appropriate casings and filling nozzle are selected according to requirements and product specifications.  
3.2. Filler is loaded and casings are filled to consistency required by product specifications.  
3.3. Defective product is identified, removed and reported according to workplace requirements. |
| 4. Clean equipment | 4.1. Equipment is cleaned according to manufacturer's specifications and workplace requirements. |
**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- identify casing size requirement according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify possible faults in natural and synthetic casings
- correctly fill a range of product lines in terms of:
  - casing
  - clips
  - length
  - tension
  - weight
- perform filling to required product specifications
- identify over-filled and under-filled products
- identify, remove and report defective product according to workplace procedures
- match clip size to casing
- apply relevant *communication* and *mathematical skills*
- work effectively in a range of situations as an individual and as a team member
- describe storage requirements of soaked casings carried over from production
- explain storage requirements of both natural and synthetic casings
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

**Knowledge of:**

- procedures followed to set up filling machine to correct specifications
- appropriate corrective action for:
  - casing breakages and bent nozzles
  - jammed clips or loops
  - poorly-printed casings
- storage requirements of soaked casings carried over from production
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
REQUIRED SKILLS AND KNOWLEDGE

- possible faults in skins and explain their effect on the product
- relevant regulatory requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:
- filling equipment, casings
- manufacturer's instructions
- product specifications
- workplace environment
- workplace procedures.

### Method of assessment

Recommended methods of assessment include:
- demonstration of casing preparation and filling
- quiz of underpinning knowledge
- workplace referee report over time.
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product specifications may include:
- colour
- consistency and firmness
- shape
- size
- thickness
- weight.

Workplace requirements may include:
- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Casing specifications may include:
- natural
- synthetic.

Possible casing faults may include:
- breakage
### RANGE STATEMENT

**include:**
- contamination
- fluctuations in diameter
- incorrect label information
- poor cleanliness
- poor colour
- tearing
- thick ends
- weakness
- webbing
- whiskers
- worm holes
- wrong diameter.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Hygiene and sanitation requirements may include:**
- relevant government regulations
- workplace requirements.

**Communication may include:**
- communicating and working with diverse individuals and groups
- listening and understanding, speaking clearly and directly
- reading and interpreting workplace-related communication.
RANGE STATEMENT

Mathematical skills may include:
- accurate recording of volume, weight and quantity in standard formats and proformas
- interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc
- percentages, comparisons, variations
- routine estimations and calculations using a range of specified formulas and procedures.

Descriptions may:
- be in everyday workplace language including mathematical language and some commonly used technical terms
- be presented in writing using standard formats, proformas, charts and diagrams
- be presented orally
- include mathematical and other information from several sources.

Regulatory requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

| 1. Thaw product in water | 1.1. Meat to be thawed is selected according to workplace requirements.  
1.2. Tanks are checked and prepared according to work instructions.  
1.3. Product is thawed according to work instructions.  
1.4. Tank flows are monitored to meet regulatory requirements.  
1.5. Product temperature monitoring and recording is completed according to workplace requirements.  
1.6. Thawing is completed in accordance with Occupational Health and Safety (OH&S) requirements.  
1.7. Potential sources of contamination and cross-contamination are identified and minimised. |
| 2. Store and despatch thawed product and forward for processing | 2.1. Thawed product is rotated according to workplace requirements.  
2.2. Thawed product is stored according to workplace requirements.  
2.3. Records are kept according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- check and prepare tanks for thawing
- identify contaminated product prior to thawing and take corrective action according to workplace requirements
- thaw product according to workplace and regulatory requirements
- apply relevant communication and mathematical skills
- work effectively in a range of situations as an individual and as a member of a team
- maintain control of the flow of product through thawing and dispatch to further processing
REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices

Required knowledge

Knowledge of:
- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with thawing of product
- workplace requirements for thawing product including:
  - OH&S requirements.
  - Standard Operating Procedures (SOPs)
  - stock rotation
  - work instructions
## Evidence Guide

<tbody>
<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. |
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. |
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. |
| All assessment must be conducted against Australian meat industry standards and regulations. |

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated over time and under typical operating and production conditions for the enterprise. |

### Context of, and specific resources for assessment

| Assessment must occur in the workplace under normal enterprise or production conditions. |

### Method of assessment

| Recommended methods of assessment include: |
| - workplace demonstration |
| - quiz of underpinning knowledge |
| - workplace referee report of performance over time. |
| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may be thawed by:
- immersing in ambient running water
- showering with ambient water
- washing in water or brine.

Product may include:
- beef
- game meat
- lamb
- mutton
- pork
- veal
- other meat species or products.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
RANGE STATEMENT

- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

Communication skills may include:

- interacting with people from a range of cultural, social and ethnic backgrounds
- speaking and listening
- reading and interpreting workplace communication.

Mathematical skills may include:

- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

| 1. Locate equipment faults       | 1.1. Unit or sub-system performance is monitored to identify presence of actual and/or potential faults.  
                                           1.2. Built-in test functions, fault indicators or alarms and error codes are monitored and appropriate maintenance records are checked and reviewed.  
                                           1.3. Equipment faults are detected using established fault diagnoses techniques and procedures.  
                                           1.4. Faults are recorded and/or reported according to standard procedures. |
| 2. Repair and/or replace faulty equipment components | 2.1. Equipment is isolated according to standard procedures in preparation for component repair or replacement.  
                                           2.2. Faulty components are removed using appropriate tools and techniques in accordance with standard procedures.  
                                           2.3. Faulty components are repaired and/or replaced in accordance with manufacturer’s specifications and standard procedures.  
                                           2.4. Unit, sub-system or system is checked and tested to confirm that maintenance has been completed to specifications.  
                                           2.5. Tools are used according to manufacturer’s specifications to achieve desired outcomes.  
                                           2.6. Waste arising from maintenance is dispensed according to waste management requirements.  
                                           2.7. Maintenance information is recorded in the company reporting system. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- prepare equipment and work area to conduct maintenance
## REQUIRED SKILLS AND KNOWLEDGE

- wear personal protective clothing for maintenance work
- apply relevant regulatory requirements
- follow instructions in undertaking agreed maintenance task
- diagnose and repair or replace faulty equipment according to Occupational Health and Safety (OH&S), hygiene and sanitation, workplace requirements and manufacturer’s specifications
- apply fault diagnosis techniques and procedures
- demonstrate the use of common hand and power tools used for component repair or replacement
- verify completion of repair or replacement
- clean maintenance tools or equipment
- maintain a clean and safe work area
- pack or store tools in designated location
- apply relevant communication and mathematical skills
- work effectively as an individual and as part of a team
- seek advice from others, manuals etc to learn new skills and techniques
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- common problems in conducting maintenance
- consequences of incorrect or inadequate maintenance
- environmental aspects related to maintenance
- equipment isolation requirements
- food safety factors in maintaining equipment
- OH&S hazards and controls
- purpose and use of common hand and power tools used for component repair or replacement
- fault diagnosis techniques and procedures
- purpose of routine preventative maintenance
- quality parameters to be achieved
- recording or reporting systems and processes
- relationship of maintenance to other work activities in the meat or enterprise plant
- roles of and relationships with others involved in carrying out maintenance functions
- services used in maintenance
- significance of minimising equipment down time
- waste handling requirements
- relevant regulatory requirements
## Evidence Guide

### OVERVIEW OF ASSESSMENT

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### CRITICAL ASPECTS FOR ASSESSMENT AND EVIDENCE REQUIRED TO DEMONSTRATE COMPETENCY IN THIS UNIT

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### CONTEXT OF, AND SPECIFIC RESOURCES FOR ASSESSMENT

Assessment must occur in the workplace under normal operating and production conditions.

Resources may include:
- real work environment
- relevant documentation such as:
  - manufacturer's instructions and operations manuals
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials.

### METHOD OF ASSESSMENT

Recommended methods of assessment are:
- assignment
- simulation

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- prepare equipment and work area prior to batching meat
- calibrate scales correctly
- follow a recipe correctly
- batch product to specifications at a speed similar to the speed of production
- demonstrate accurate record keeping practices for meat usage
- apply relevant communication and mathematical skills
- work effectively as an individual and with other team members
- apply relevant OH&S, workplace and regulatory requirements
### REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- batching requirements for the workplace
- consequences of using incorrect meat for both the product and the consumer
- hygiene and sanitation factors associated with the selection of meat
- relevant OH&S, workplace and regulatory requirements
- critical information within the Australia New Zealand Food Standards Code relevant to immediate work environment
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
| All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of, and specific resources for assessment

| Assessment must occur in the workplace under normal production conditions.
| Resources may include:
| - real work environment
| - relevant documentation such as:
|   - manufacturer's instructions or operations manuals
|   - regulatory requirements
|   - workplace policies and procedures
|   - relevant equipment and materials.

### Method of assessment

| Recommended method of assessment include:
| - workplace demonstration
| - quiz
EVIDENCE GUIDE

- question and answer
- observation of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Types of meat may include:
- beef
- grain-fed or grass-fed beef
- lamb
- mutton
- pork
- veal
- other approved species.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection

| 3. Ensure smooth operation of process | 3.1. Potential dangers from hazards are identified and actions reflect the required precautions.  
   3.2. Oral communication with team members is clear and accurate.  
   3.3. Faults and variances outside the job holder’s area of responsibility are reported promptly, clearly and accurately to an appropriate authority.  
   3.4. Team members are encouraged and supported to work as an effective team.  
   3.5. Safe working procedures are followed at all times. |
| 4. Shut-down the process | 4.1. Appropriate shut-down procedure is identified.  
   4.2. Process is shut-down according to workplace procedures.  
   4.3. Faults and variances outside area of responsibility are reported promptly, clearly and accurately to an appropriate authority. |

# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**
## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**
- apply production documentation requirements and procedures
- apply relevant communication and *mathematical skills*
- work effectively as an individual or as a member of a team
- demonstrate teamwork practices and team-building techniques
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply relevant Occupational Health and Safety (OH&S), *regulatory* and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

**Knowledge of:**
- relevant QA and inspection procedures and systems
- materials and equipment specifications
- Standard Operating Procedures (SOPs)
- food safety and Hazard Analysis Critical Control Points (HAACP) requirements
- precautions necessary to ensure safety
- how output is maximised while still meeting quality and safety requirements
- limits of authority
- tolerance allowable in the quality system and when action should be taken
- production documentation requirements and procedure
- relevant OH&S, regulatory and workplace requirements
- potential dangers in specific plant and equipment
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace project
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Product** may include:
- devon, polony, fritz
- frankfurts
- salami
- sausages.

**Machine set up** may include:
- selecting or entering programs on to automatic machines to specifications.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

**Communication** may:
- be with people from a range of cultural, social and ethnic backgrounds
- involve listening and understanding, speaking clearly and directly
- involve reading and interpreting workplace-related communication.

**Mathematical skills** may include:
- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
RANGE STATEMENT

- OH&S legal requirements
- PPE which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Regulatory** requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.
### REQUIRED SKILLS AND KNOWLEDGE

#### Required skills

Ability to:
- Apply fault-finding, rectification and reporting procedures.
- Demonstrate correct use of PPE.
- Identify potential dangers in specific plant and equipment.
- Observe relevant Quality Assurance (QA) and inspection procedures and systems.
- Apply production documentation requirements and procedures.
- Apply relevant *communication* and *mathematical skills*.
- Work effectively as an individual and as a member of a team.
- Demonstrate teamwork practices and team-building techniques.
- Apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements.
- Take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.

#### Required knowledge

Knowledge of:
- Standard Operating Procedures (SOPs).
- Safe working procedures and systems.
- Materials and equipment specifications.
- Production documentation requirements and procedures.
- Relevant QA) and inspection procedures and systems.
- Food safety and HACCP requirements.
- Precautions necessary to ensure safety.
- How input is maximised while still meeting quality and safety requirements.
- Limits of authority.
- Rationale for linking, tying, and hanging products.
- Tolerances allowable in the quality system and when action should be taken.
- Workplace requirements for dealing with waste product and broken casings.
- Relevant OH&S, regulatory, and workplace requirements.

| | clearly and directly
|---|---
| | involve reading and interpreting workplace-related communication.

**Mathematical skills** may include:

- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- PPE which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare ingredients | 1.1. Work area is prepared.  
1.2. *Ingredients* for *pâtés and terrines* are selected according to specifications.  
1.3. Meat and offal ingredients are pre-prepared according to specifications.  
1.4. Meat, offal and other ingredients are pre-cooked according to specifications.  
1.5. Moulds for pâtés and terrines are prepared and *lined* according to specifications.  
1.6. Pre-operational checks are set up and conducted on required *specialised machinery*. |
| 2. Prepare pâtés and terrines | 2.1. A range of binding agents and processes required in the preparation of basic forcemeat are prepared and used.  
2.2. A range of pastries suitable for *pâté en croute* are prepared and handled correctly to ensure high quality and attractive presentation.  
2.3. Specialised machinery for making pâtés and terrines is used correctly and safely according to manufacturer instructions.  
2.4. Pâtés and terrines are cooked to specification ensuring non-spore forming pathogens are destroyed.  
2.5. Product stability and spreadability are assessed. |
| 3. Pack and store pâtés and terrines | 3.1. Pâtés and terrines are selected and packed using appropriate packaging.  
3.2. Pâtés and terrines are chilled at a sufficient rate to prevent spore-forming pathogens.  
3.3. Pâtés and terrines are stored according to regulatory requirements. |
| 4. Develop new recipes | 4.1. Recipes for pâtés and terrines are developed using a range of suitable products, with consideration given to food safety, taste and presentation.  
4.2. New recipes are costed and priced.  
4.3. Customer response to new recipes are assessed and evaluated. |

## Required Skills and Knowledge
## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**
- apply presentation skills for pâtés and terrines, including pastry decoration, glazing and layering of ingredients
- assess the freshness and suitability of ingredients for pâtés and terrines
- pre-prepare meat and offal using safe knife skills
- cook meat emulsions
- develop commercially viable new recipes
- correctly package and store finished products
- poach or boil products, as required
- use communication and numeracy skills required to read, write and interpret written documentation, such as recipes and regulatory requirements
- listen to, interpret and correctly carry out instructions
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively in a range of situations as an individual and as a team member.

### Required knowledge

**Knowledge of:**
- ingredients suitable for making pâtés and terrines and their characteristics
- culinary terms related to pâtés and terrines commonly used in the industry
- properties and outcomes of the various seasonings, additives, binding agents and processes used in the preparation of pâtés and terrines
- core temperature requirements associated with the various stages of pâté production
- heating and cooling processes required to ensure end product is safe for consumption and meets regulatory requirements
- safe work practices, in particular in relation to using chopping and mincing equipment
- food safety requirements for the handling and separation of cooked and raw meats
- hygiene requirements particularly relating to possible bacterial spoilage in the preparation, storage and service of pâté and terrine products
- casings and containers suitable for commercial use and storage of pâtés and terrines
- three-stage cooling program or regime specified in the Australian standard
- principles of nutrition, in particular, the food values of pâtés and terrines and the effects of cooking on the nutritional value of food
- packing and storage requirements for pâtés and terrines
- organisation's food safety plan.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Candidates must be able to:
- produce a minimum of one type of pâté or terrine
- demonstrate knowledge of product-specific food safety hazards and control measures
- develop a minimum of three new recipes and test one recipe.

Context of and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:
- workplace recipes and formulations
- manufacturer's instructions
EVIDENCE GUIDE

- product specifications
- food safety plan
- workplace equipment
- workplace procedures.

Method of assessment

Recommended methods of assessment are:

- demonstration of pâté/terrine preparation
- quiz of underpinning knowledge
- workplace referee report over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Ingredients** may include:

- offal, livers
- veal, ham and pork
- game
- poultry
- Australian native game, fruits and products.
- dairy foods
- vegetables.

**Pâtés and terrines** are:

- any edible food that has been ground or pureed to a paste and set and/or baked in a container
RANGE STATEMENT

</tr>
</tbody>
</table>

Ingredients for *lining moulds* may include:

| • pork fat                                                              |
| • pork caul                                                            |
| • vegetables                                                           |
| • pastry                                                               |
| • skins.                                                               |

Specialised machinery may include:

| • bowl cutters or food processors                                      |
| • food mills, mixers and blenders                                      |
| • mincers                                                              |
| • fryers and related pre-cooking equipment                            |
| • immersion cookers                                                    |
| • water cooling baths.                                                 |

*pâtés en croute* are:

| • pâtés or terrines that have been baked in a pastry casing.            |

Packing and storing may involve the use of:

| • blast chillers                                                       |
| • vacuum packaging equipment.                                          |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Workplace requirements may include:

- Enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### Regulatory requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

### Hygiene and sanitation requirements may include:

- relevant government regulations
- workplace requirements.

### Types of ingredients may include:

- additives
- spices
- binders.
RANGE STATEMENT

**Communication skills may include:**
- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

**Mathematical skills may:**
- involve estimation and calculation
- relate to own work and work area problem-solving and monitoring
- relate to product formulation and specification
- require interpretation and drawing conclusions from a range of mathematical tables, charts, bar graphs, pie charts, recipes
- require monitoring formula, specifications, outputs and equipment
- require synthesis and analysis of mathematical information from more than one source.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muff
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Equipment may include:**
- blenders
- choppers
RANGE STATEMENT

- cutters
- mixers.

Additives may include:
- antioxidants
- binders
- curry
- Glucono Delta Lactone (GDL)
- GO2
- nitrates
- nitrites
- non-meat proteins
- phosphate
- salt
- spices
- sugar
- water.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- ferment and mature product to workplace requirements, and product and customer specifications, within workplace time frames
- apply relevant communication and mathematical skills
- work effectively as an individual and with other team members
- demonstrate familiarity with the regulatory requirements related to fermenting product
- apply relevant Occupational Health and Safety (OH&S) requirements

Required knowledge
## REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- possible effects on health of inadequate finishing of maturation process
- possible effects of temperature fluctuations, relative humidity and air circulation on product
- effect pH has on the maturation process
- purpose and effect of smoking salamis
- air circulation requirements of specific products
- impact of Aw on the shelf life of fermented products
- relevant OH&S requirements
- importance of check-weighing at the end of drying
- relationship between pH, Aw and humidity
- requirements of product spacing for specific product
- fermented products
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

| 1. Prepare blending equipment | 1.1. Blending equipment is prepared according to *workplace, hygiene and sanitation*, and Occupational Health and Safety (*OH&S*) *requirements*.  
1.2. Recognition and reporting of faults is carried out to ensure equipment is maintained to an operating level which meets manufacturer's specifications and workplace requirements.  
1.3. Equipment and tools are used according to manufacturer's specifications. |
| 2. Make adjustments to, and operate, blending equipment | 2.1. Blending equipment is adjusted when necessary according to workplace, hygiene and sanitation, and OH&S requirements.  
2.2. Tools and equipment for adjusting processing equipment are used according to workplace, hygiene and sanitation, and OH&S requirements.  
2.3. Blending equipment is operated in accordance with OH&S, workplace and manufacturer's requirements.  
2.4. Blending equipment is used to blend a variety of products to production requirements. |
| 3. Blend products | 3.1. A range of products is blended to workplace, OH&S, hygiene and sanitation, and Quality Assurance (QA) requirements and product specifications, at a speed similar to production requirements. |
| 4. Clean and maintain blending equipment | 4.1. Blending equipment is cleaned and maintained according to work instructions. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:  
- use blending equipment to blend a variety of products to production requirements  
- demonstrate effective operation of tools and equipment used for adjusting blending
### REQUIRED SKILLS AND KNOWLEDGE

- equipment
  - demonstrate safe handling procedures for operating blending equipment
  - operate equipment to manufacturer’s specifications, workplace and OH&S requirements
  - clean and maintain blending equipment as required in work instructions
  - apply *mathematical* and *communication skills* relevant to the task
  - learn new techniques, operate new equipment and adjust to workplace change as required
  - work effectively as an individual and as a team member
  - apply relevant *regulatory requirements*
  - take corrective action to improve own work performance

### Required knowledge

Knowledge of:

- safe handling procedures for operating blending equipment
- conditions under which processing equipment might need adjusting
- cleaning and maintenance procedures for blending equipment if required in work instructions
- relevant regulatory requirements
- purpose and use of equipment used in blending
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Competency must be demonstrated over time and under typical operating conditions for the enterprise.</td>
</tr>
</tbody>
</table>
| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal operating conditions. Resources may include:  
  - real work environment  
  - relevant documentation such as:  
    - manufacturer's instructions or operations manuals  
    - regulatory requirements  
    - workplace policy and procedures  
    - relevant equipment and materials. |
| Method of assessment | Recommended methods of assessment include:  
  - workplace demonstration  
  - observation of performance over time |
### EVIDENCE GUIDE

- quiz, question and answer.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

</table>
| 1. Slice and trim meat in preparation for sale | 1.1. *Meat cuts* are prepared and sliced according to *workplace requirements* and customer specifications.  
1.2. *Meat cuts* are separated into final meat cuts according to Quality Assurance (QA), hygiene and sanitation and Occupational Health and Safety *(OH&S) requirements*, and customer specifications. |
| 2. Handle knife effectively | 2.1. *Knife* is handled safely, hygienically and effectively. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- demonstrate correct cutting, slicing and trimming techniques
- use safe and effective knife skills
- identify and name examples of finished meat cuts
- apply relevant *regulatory requirements*
- slice and trim meat in preparation for sale according to OH&S, hygiene and workplace requirements and customer specifications
- prepare finished meat cuts from all primals relevant to meat retailing and/or smallgoods manufacturing
- remove defects from products according to workplace and regulatory requirements
- work effectively as an individual and as part of a team
- seek advice from relevant sources when working with new *cutting equipment* or products
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* appropriate to the task

**Required knowledge**
REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- principles of QA, hygiene and sanitation, and OH&S in relation to cutting meat
- workplace requirements related to slicing meat
- relevant regulatory requirements
**Evidence Guide**

### EVIDENCE GUIDE

</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated over time and under typical operating and production conditions for the enterprise. For meat retailing:  
- prepare and slice meat cuts for all primals for three species (including beef and sheep) to workplace and regulatory requirements, similar to the speed of production. For smallgoods manufacturing:  
- prepare and slice meat cuts for all primals for one species to workplace and regulatory requirements, similar to the speed of production. |
| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment. |
EVIDENCE GUIDE

Resources may include:

- knives, knife equipment
- product specifications
- workplace requirements.

Method of assessment

Recommended method of assessment include:

- demonstration with an assessor
- observation of performance over time for three (meat retail) or one (smallgoods) species
- quiz of underpinning knowledge
- workplace project.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality and Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Meat cuts may

- differ according to
  - customer specifications
  - end use
  - enterprise specifications
  - species
### RANGE STATEMENT

- include
  - beef - rump, round topside, chick, shin, blade steaks
  - pork - loin, topside, leg steaks
  - sheepmeat - leg steaks.

### Workplace requirements  
**may include:**
- enterprise-specific procedures
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### OH&S requirements  
**may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Regulatory requirements  
**may include:**
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- state regulations regarding meat processing.
RANGE STATEMENT

For **meat retailing**, competency is required for beef and sheep plus one other species from the following:
- buffalo
- emu
- game
- goat
- pork
- poultry
- any other species.

For **smallgoods manufacturing**, competency is required for at least one species from the following:
- beef
- game
- goat
- pork
- sheep
- any other species.

**Cutting equipment** may include:
- commercial knives
- hand held knives
- mechanical knives.

**Communication skills** may include:
- applying basic numeracy skills to workplace requirements
- communicating and working with diverse individuals and groups
- listening and understanding
- reading and interpreting workplace-related documentation
- speaking directly and clearly.

Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

**Meat retailing:**
- trim meat for a minimum of two species (including beef and sheep) to specification, workplace and regulatory requirements.

**Smallgoods manufacturing:**
- trim meat for one species to specification, workplace and regulatory requirements.

#### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

Resources may include:
## EVIDENCE GUIDE

| 
| --- |
| knives |
| knife equipment specifications |
| real workplace. |

### Method of assessment

Recommended methods of assessment are:

- demonstration e.g. knife skills, trimming
- observation over time with workplace referee or third party assessor
- verified work log or diary.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

MTMSR204C Despatch meat product

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to place orders at a despatch point and load into transportation. |

Application of the Unit

| Application of the unit | This unit is suitable for use in loadout for smallgoods manufacturing establishments and in meat establishments which deliver meat and meat product to customers including restaurants. |

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Arrange and consolidate orders | 1.1. Orders picked from separate areas are consolidated.  
1.2. Products and/or batches are placed in correct despatch area.  
1.3. Information about despatch scheduling requirements is acquired.  
1.4. Products are arranged and secured.  
1.5. Product is stored in despatch area according to schedule.  
1.6. Correct methods for efficient and safe loading are used. |
| 2. Loadout product | 2.1. Product is transported to loadout according to Occupational Health and Safety (OH&S), hygiene and sanitation, Quality Assurance (QA) and workplace requirements.  
2.2. Product is loaded according to OH&S, hygiene, QA and workplace production requirements.  
2.3. Products are documented and recorded according to workplace and production requirements.  
2.4. Product loadout is completed according to OH&S, QA, and workplace requirements. |
| 3. Maintain clean holding rooms | 3.1. Holding rooms are maintained to workplace, regulatory, and hygiene and sanitation requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify species and various meat products for storage  
- handle product according to hygiene requirements  
- monitor refrigerated temperature on a regular basis  
- rotate stock  
- apply relevant communication and mathematical skills  
- arrange and consolidate orders to customer and workplace requirements
**REQUIRED SKILLS AND KNOWLEDGE**

- work effectively as an individual and as part of a team
- record information accurately and legibly
- seek advice where necessary from relevant sources when working with new products, technology or changes in work practices
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use correct manual handling techniques for transferring product to storage facilities

**Required knowledge**

- storage requirements for products
- recording procedures for loadout of product
- regulatory requirements related to storage and handling of product
- temperatures for storage of meat products
- workplace requirements for despatch of meat
- appropriate storage facilities for individual products
## Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities. |

| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment. Resources may include:  
- enterprise inventory and despatch systems, access to product holding and loadout areas, orders  
- workplace environment. |

| Method of assessment | Recommended methods of assessment include:  
- quiz of underpinning knowledge  
- workplace demonstration  
- workplace referee or third-party report of performance over time. |
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality and Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.
### RANGE STATEMENT

| **Hygiene and sanitation requirements** may include: | • relevant government regulations  
| | • workplace requirements.  
| **Workplace requirements** may include: | • enterprise-specific procedures  
| | • OH&S requirements  
| | • QA requirements  
| | • Standard Operating Procedures (SOPs)  
| | • the ability to perform the task to production requirements  
| | • work instructions.  
| **Recording** of loadout documentation may be: | • manual or electronic.  
| **Regulatory requirements** may include: | • Export Control Act  
| | • hygiene and sanitation requirements  
| | • relevant Australian Standards  
| | • relevant regulations  
| | • regulations and legislation pertaining to the storage of product types  
| | • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
| | • state and territory regulations regarding meat processing.  
| **Communication skills** may include: | • communicating with people from a range of cultural, social and ethnic backgrounds  
| | • listening and understanding  
| | • reading and interpreting workplace-related documentation  
| | • speaking clearly and directly.  
| **Mathematical skills** may include: | • routine estimation and calculation  
| | • percentages  
| | • comparisons  
| | • variations  
| | • use of calculators.

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- use a range of packaging equipment to package processed meats and smallgoods for retail sale
- identify food safety hazards in packaging processed meat and take appropriate preventative or corrective action
- identify sub-standard or contaminated product
- clean equipment according to hygiene requirements
- work with team members
- apply relevant regulatory and workplace requirements
- report equipment faults, either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- use mathematical skills relevant to the task
- use relevant communication skills

### Required knowledge

- effect of packaging materials and processes on quality, safety and shelf life of product
- regulatory requirements for packaging and labelling
- packaging processes
- workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific WHS requirements for vacuum packing
- general operating principles, including start-up and shut-down procedures
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</th>

## RANGE STATEMENT

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Primal cuts** may:

- differ according to
  - customer specifications
  - end use
  - species
  - workplace specifications.
- include:
## RANGE STATEMENT

- beef - rump, round or knuckle, silverside or outside, topside or inside, loin, shins, chuck, blade or clod, rib set, brisket, flank
- deer - legs, rumps, loins, shoulders, forequarters
- goat - legs, short loin, rib loin, chump, forequarters, breasts
- kangaroo - legs, tail butt, loins, shoulders
- pigs - legs, rumps, loins, foreloins, forequarters, belly/spring
- sheep - legs, short loin, rib loin, chump, forequarters, breast
- veal - legs, loins, forequarters, shoulders.

### Workplace requirements may include:
- enterprise-specific procedures
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

### OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Hygiene requirements may include:
- clean work wear each shift or day
### RANGE STATEMENT

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| **include:** | • cleanliness of work area  
• hand washing  
• head covering  
• personal hygiene  
• sterilisation of equipment. |
| **Cut specifications may be defined by:** | • customer specifications  
• industry standards. |

For **meat retailing**, carcases must include beef, sheep and one of the following species:

- crocodile  
- deer  
- emu  
- game meat  
- goat  
- kangaroo  
- pigs  
- or any other species.

For **smallgoods manufacturing**, carcases must include a minimum of one species from:

- beef and/or veal  
- deer  
- game meat  
- goat  
- kangaroo  
- pork  
- sheep and/or lamb  
- any other species.

**Communication may involve:**

- applying mathematical skills to workplace requirements  
- communicating and working with people from a range of cultural, social and ethnic backgrounds  
- listening and understanding; speaking clearly and directly  
- reading and interpreting workplace-related documentation  
- the use of communications technology.

**Regulatory requirements may include:**

- Export Control Act  
- hygiene and sanitation requirements  
- relevant Australian Standards  
- relevant regulations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate correct use of Personal Protective Equipment (PPE) when boning
- identify meat cuts specifications for:
  - meat retailing: a minimum of three species using cut descriptions according to customer specifications and regulatory requirements
  - smallgoods manufacturing: a minimum of one species
- position cuts securely for boning
- demonstrate safe and effective use of knives and other cutting tools when separating primals
- use safe manual handling techniques
- identify contaminated product and take corrective action according to workplace requirements
- sterilise or sanitise equipment according to regulatory and workplace requirements
- apply relevant communication and mathematical skills
- work effectively as an individual and as part of a team
- describe meat cut specifications using cut descriptions according to customer specifications and regulatory requirements
- apply relevant regulatory requirements
- seek advice from appropriate sources where necessary when working with new species, new technology or changed regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
## REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:

- principles of hygiene and sanitation, and OH&S in relation to cutting meat products
- food safety, QA and product quality requirements for boning primals
- principles of cross-contamination in relation to cutting
- relevant regulatory requirements
Evidence Guide

<table>

Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Boning of primal cuts may include:**  
- beef (e.g. rump, round or knuckle, silverside or outside, topside or inside, loin, shins, chuck, blade or clod, rib set, brisket and flank)
<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• deer (e.g. legs, rumps, loins, shoulders and forequarters)</td>
<td></td>
</tr>
<tr>
<td>• goat (e.g. legs, shortloin, ribloin, chump, forequarters and breasts)</td>
<td></td>
</tr>
<tr>
<td>• kangaroo (e.g. legs, tail butt, loins and shoulders)</td>
<td></td>

</tbody>
</table>

**Workplace** requirements may include:

- enterprise-specific procedures
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S** requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- PPE which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Hygiene and sanitation** requirements may include:

- relevant government regulations
- workplace requirements.
## RANGE STATEMENT

For **meat retailing**, select beef and sheep plus one other species from the following:

- buffalo
- emu
- game
- goat
- pork
- poultry
- or any other species.

For **smallgoods manufacturing**, select a minimum of one species from:

- beef
- game
- pork
- poultry
- sheep
- any other species.

### Communication skills may include:

- applying numeracy skills to workplace requirements
- communicating and working with people from a range of cultural, social and ethnic backgrounds
- interpreting the needs of internal or external customers
- listening and understanding; speaking clearly and directly
- reading and interpreting workplace-related documentation.

### Cut specifications may be defined by:

- customer specifications
- industry standards.

### Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

MTMSR303A Smoke product

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to prepare products which are smoked, such as ham, bacon and smallgoods products. |

Application of the Unit

| Application of the unit | This unit is suitable for skilled operators responsible for smoking ham, bacon and other smallgoods products and operating the smokehouse in smallgoods plants or meat retail enterprises. |

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

| Prerequisite units | Nil |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Select meat   | 1.1. Meat is selected according to *product specifications*.  
|                  | 1.2. Meat is prepared according to product specifications, where part of the work instructions. |
| 2. Prepare ingredients | 2.1. Ingredients are prepared according to product specifications and *workplace requirements*. |
| 3. Prepare facility | 3.1. *Machinery and equipment* are prepared according to product and manufacturer’s specifications. |
| 4. Load products | 4.1. *Product* is checked to ensure correct spacing prior to loading.  
|                  | 4.2. Product is loaded in a manner that ensures even cooking.  
|                  | 4.3. Product is handled at all times according to Occupational Health and Safety (*OH&S*), and *hygiene and sanitation requirements*. |
| 5. Smoke product | 5.1. Core temperature probes are inserted into the centre of the product as appropriate to product specifications and workplace requirements.  
|                  | 5.2. Machinery is programmed, where applicable in accordance with manufacturer’s and product specifications.  
|                  | 5.3. A variety of products is smoked to workplace requirements and customer specifications at a speed similar to production requirements.  
|                  | 5.4. Process is monitored and recorded according to workplace requirements. |
| 6. Monitor smoke cycle | 6.1. Smoke cycle is monitored regularly, results are noted and deviations from the program are corrected.  
|                  | 6.2. Internal temperature is manually checked in accordance with workplace requirements to ensure correct smoke time has been achieved and, where necessary, further cooking is undertaken.  
|                  | 6.3. When product type and processing procedures require, a shower cycle is initiated according to process specifications. |
| 7. Chill product  | 7.1. On completion of smoke cycle, product is correctly weighed and either *chilled* immediately or cooled at ambient temperature to a specified internal temperature before chilling, according to regulatory requirements. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
7.2. | Product is held at a specific and constant temperature according to product specifications.
7.3. | Product is stored according to product specifications.
7.4. | Product is identified and stacked according to product specifications and workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate correct loading procedure for both a full and less-than-full smokehouse
- activate and operate machinery according to manufacturer’s and workplace instructions
- measure and monitor product internal temperature correctly to ensure it meets product specifications
- monitor smoking of meat on a regular basis to meet product specifications (including, where relevant, the interpretation of graphs or flow charts or mimic panels and controls)
- interpret cooking records where appropriate with respect to relevant product
- adjust processing as required to achieve product specifications
- apply relevant communication and mathematical skills
- work effectively as an individual and with other team members
- describe correct smoking procedure for specific product
- explain chilling requirements for different products
- operate smoke facility according to OH&S, hygiene, regulatory, product specifications and workplace requirements, and meet production requirements
- report machine faults either verbally or in writing according to workplace specifications
- store meat according to OH&S, hygiene, regulatory, product specifications and workplace requirements

Required knowledge

Knowledge of:
- correct smoking procedure for specific product
### REQUIRED SKILLS AND KNOWLEDGE

- storage procedures for smoked products
- meat smoking process
- purpose and effect of smoking processes on meat
- health regulations that apply to smoking of meats
- chilling requirements for different products
- possible effects of inconsistent temperature on product
- effects of smoking on shelf life and taste of product
- purpose of correct water temperature and correct additive sequence, especially phosphate and smoke
- recording requirements for the smoking/cooking process
- relevant workplace requirements related to:
  - appropriate humidity levels
  - effect of moisture on casings
  - smoke generator
  - smoke jet
  - sock
  - wet bulb sock
- use and purpose of *raw materials* for smoking meat
- use and purpose of ingredients for smoking meat
- mathematical information in work instructions, specifications and recipes
- meat cuts used in smoking
- cause and effects of, and explain the appropriate corrective action for:
  - cycle out of sequence
  - excess smoke
  - insufficient smoke
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated over time and under normal operating conditions for the enterprise, within the parameters of the role and responsibilities, and according to workplace requirements. |

| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal operating conditions in a simulated environment.

Resources may include:
- equipment that meets safety requirements
- product specifications and ingredients
- smoking equipment, machinery or production facility. |

| Method of assessment | Recommended methods of assessment include:
- demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time. |
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product specifications may vary according to:

- customer and workplace requirements.

Workplace requirements may include:

- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Machinery and equipment may include:

- atomising generators
- automatic or manual machinery
- cookers
- friction generators
- liquid smoke jet
- moulds
- probe thermometers
- sawdust or woodchip burning generators
## RANGE STATEMENT

<td></td>
</tr>
</tbody>
</table>

**Product** may include:

- beef (e.g. brisket and tongue)
- game meat
- lamb (e.g. legs and tongue)
- mutton
- other meat species or products
- pork (e.g. hand and spring)
- veal.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Hygiene and sanitation requirements** may include:

- relevant government regulations
- workplace requirements.

**Product may be chilled by:**

- chill cabinets
- immersing in ambient running water
- placing in cool room
- showering with ambient water
- use of intensive coolers
- washing in water or brine.
## RANGE STATEMENT

**Communication skills** may include:
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse groups and individuals
- writing to audience needs.

**Mathematical skills** may include:
- collection
- estimation
- calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

**Descriptions and explanations** may:
- be in diagrammatic, sketch, tabular or graphic formats
- be presented in writing, using standard formats
- be presented orally
- include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.

**Regulatory requirements** may include:
- Export Control Act
- federal and state regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

**Smoke-producing raw materials** may include:
- liquid smoke
- powder
- sawdust
- solid timber
- woodchips.

AHCBIO302A Identify and report unusual disease or plant pest signs

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit of competency specifies the outcomes required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action. |

Application of the Unit

| Application of the unit | The work in this unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks. |

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- observing
- recognising unusual disease or plant pest signs
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- required procedures to follow in notifying appropriate authorities
- where to access additional reliable information or personnel.
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to:  
- identify unusual disease or pest signs within one's own experience  
- notify appropriate authorities where appropriate  
- implement appropriate biosecurity measures. |
| Context of and specific resources for assessment | For valid assessment, one must have opportunities to participate in a range of exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to identify and report unusual disease or plant pest signs.  
The candidate must also have access to resources such as photographs of signs of emergency and endemic diseases and of plant pests. |
| Method of assessment | Assessment for this unit of competency may be undertaken on or off the job. The unit could be assessed on its own or in combination with other units of competency relevant to the job function. |
| Guidance information for assessment | To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.  
The skills and knowledge required to identify and report unusual disease or plant pest signs must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include a range of diseases for a particular species or a variety of pests. |

| 1. Prepare to work with livestock | 1.1. Work to be undertaken is interpreted from work program where necessary, and confirmed with management.  
1.2. Discussions are held with other workers who may be affected by the activities to ensure continued smooth operation of the process.  
1.3. Tools and equipment suitable for the work to be undertaken are selected, checked, and maintained if necessary.  
1.4. Suitable personal protective equipment is selected, used and maintained. |
| 2. Carry out livestock checks | 2.1. All livestock are routinely checked for signs of ill health.  
2.2. Livestock are examined for signs of illness, injuries and abnormalities, and signs of these are reported in the methods prescribed in the organisations work procedures.  
2.3. While handling livestock, the potential for Occupational Health and Safety (OHS) hazards is continually monitored, risks assessed, and suitable controls implemented.  
2.4. Livestock are handled safely and all required restraints are within the organisations and industry guidelines for animal health and welfare. |
| 3. Deal with livestock emergencies | 3.1. Common signs of livestock injury or life threatening conditions are detected and the situation quickly analysed before notification or action is taken.  
3.2. Life threatening livestock ailments requiring emergency treatment are notified to the supervisor, manager or veterinarian and immediate assistance is called.  
3.3. Basic emergency and/or livestock first aid procedures are carried out until professional help arrives.  
3.4. Serious cuts and abrasions to livestock are promptly reported to the supervisor or to the veterinarian and assistance provided as required during professional treatment. |
| 4. Provide veterinary procedure support | 4.1. Cuts, abrasions and bruises are treated under instruction from the veterinarian, manager or foreman.  
4.2. Animals are examined for signs of distress or |

</tbody>
</table>

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- identify hazards and follow safe operating procedures
- handle livestock
- identify signs of ill health or injury or signs of injury or abnormality
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- the range of ailments that may occur or affect livestock
- the application of a range of basic treatments under veterinary supervision
- the behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- the organisations livestock production and management plans
- sound management practices and processes to minimise noise, odours and debris
- relevant legislation and regulations relating to waste and environment management and animal health and welfare.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- check livestock regularly
- identify symptoms of ill health or injury
- deal efficiently and calmly with livestock emergencies
- complete basic livestock first aid procedures
- record and report serious issues or injuries.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Livestock may include:

- cattle
- sheep
- pigs
- alpacas
- goats
- deer.

Livestock does not include:

- horses

 | according to OHS and enterprise environmental practices.
3.5. Relevant information is recorded and reported according to enterprise requirements.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work practices
- provide due care in the handling of livestock
- recognise enterprise livestock identification systems
- safely drive vehicles, and ride horses and motorbikes without damage to person, property or environment
- recognise livestock abnormalities
- control environmental impacts associated with livestock production
- apply contingency measures for handling livestock in the event of adverse weather conditions
- observe and describe the behaviour of livestock
- read and comprehend oral and written information and instructions, write basic statements and maintain livestock handling records
- assess and calculate livestock numbers
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- livestock breeds and basic nutritional and welfare requirements
- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
REQUIRED SKILLS AND KNOWLEDGE

- OHS and animal welfare legislative requirements
- Regulatory controls with regard to handling livestock on public roads.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- identify and draft livestock for handling operations
- move and control livestock
- minimise undue stress and risk to livestock and handlers.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

The range statement relates to the unit of competency as a whole.

Livestock may include:

- beef cattle
- dairy cattle
- sheep
- alpacas
- goats.

AHCLSK207A Load and unload livestock

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the process of loading and unloading animals for transport and defines the standard required to: anticipate animal behaviour; check loading facilities for hazards to animals and workers; provide and maintain appropriate animal feed and water; complete documentation and affix individual tags if required; monitor animal health and welfare; load and unload animals. |

Application of the Unit

| Application of the unit | This unit applies to workers in the livestock industries that normally operate under routine supervision within enterprise guidelines. |

# ELEMENT PERFORMANCE CRITERIA

1. Check facilities and equipment for sound working conditions
   1.1. Required facilities and equipment are identified.
   1.2. The work site, facilities and equipment are checked for hazards and safety concerns are reported.
   1.3. Repairs and maintenance of facilities and equipment required for the loading or unloading of livestock are carried out where necessary.
   1.4. Personal protective clothing and equipment is used and stored.

2. Load animals
   2.1. Animals are mustered, yarded/caught, prepared for transport, loaded and counted using safe working methods.
   2.2. Numbers of livestock are recorded according to enterprise procedures.
   2.3. Identification details of individual animals are recorded as required.
   2.4. Vendor declarations and any other required documentation are completed.
   2.5. Animal identification tags are fitted as required.
   2.6. Livestock are loaded in compliance with animal welfare and Occupational Health and Safety (OHS) requirements.

3. Unload animals
   3.1. Animals are unloaded in a safe manner to ensure no injury to personnel or animals.
   3.2. Numbers of livestock are recorded according to enterprise procedures.
   3.3. Agreement on condition of animals is reached with the receiving and/or dispatching party.

4. Perform appropriate animal health procedure
   4.1. Stock is sorted if required.
   4.2. Animal health treatments are performed off truck as instructed.
   4.3. Animals are fed and watered to enterprise requirements.

---

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.
## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- identify hazards and implement safe operating procedures
- provide due care and handle animals safely and humanely
- prepare equipment and working dogs (when used) for handling animals
- monitor animal behaviour and recognise irregularities
- read and interpret muster plans and maps
- calculate animal numbers and assess and calculate feed and water requirements
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- animal handling and movement methods and techniques
- animal basic health and nutritional requirements
- animal herding/flocking behaviour
- animal welfare codes of practice
- working dogs' uses and techniques (where appropriate)
- relevant OHS and animal welfare legislative and enterprise requirements.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- anticipate animal behaviour
- check loading facilities for hazards to animals and workers
- provide and maintain appropriate animal feed and water
- complete documentation and affix individual tags if required
- monitor animal health and welfare
- load and unload animals.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

The range statement relates to the unit of competency as a whole.

Livestock may include:

- cattle
- sheep
- goats
- alpacas
- pigs
- horses.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- identify hazards and implement safe operating procedures
- horse handling skills
- ride horses
- complete basic hoof care procedures
- groom horses
- care for saddlery and equipment
- measuring quantities required for feed
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- horses and horse husbandry
- horse riding and handling safety when riding
- horse health, behaviour and psychology
- anatomy and physiology of the horse
- care and maintenance of hooves and the lower limbs
- environmental controls and codes of practice applicable to the organisation
- the organisation's livestock production and management plans
- sound management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to waste and environment management,
**REQUIRED SKILLS AND KNOWLEDGE**

- animal health and welfare
- relevant OHS legislation, regulations and codes of practice.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare horses for work
- select and maintain equipment for riding
- monitor and anticipate horse behaviour when riding
- recognise and report hazards or movement problems for remedial action
- care for saddlery and equipment.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Horses may include:

- those suitable for beginning riders and novice handlers, but can be of any type and breed used for riding work.

| 1. Identify role and select working dog | 1.1. Working dog requirements for the enterprise are identified and confirmed.  
1.2. Suitable working dog breeders and bloodlines are researched and availability determined.  
1.3. Dogs are inspected for suitability and selected to meet role and enterprise requirements. |
| 2. Develop and implement training program | 2.1. Basic commands are taught.  
2.2. The dog is introduced to a small flock in a confined area.  
2.3. The dog is asked to handle larger numbers in more open areas.  
2.4. Specialist skills such as backing and forcing are taught.  
2.5. Existing and potential animal handling hazards in the workplace are identified, risk assessed and controlled in line with enterprise requirements. |
| 3. Maintain welfare of working dog | 3.1. Health, condition and status are monitored and maintained.  
3.2. Diet is provided to meet nutritional requirements in consideration of work/training program.  
3.3. Preventative health treatments are arranged and administered.  
3.4. Facilities and equipment needs are provided and maintained in line with animal welfare requirements. |

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

- select working dog to meet requirements
- develop training programs and apply effective training procedures
- maintain health and welfare requirements and recognise abnormalities
- arrange and administer preventative health treatments
- maintain clean and safe facilities and workplace environment
- assess and calculate work area dimensions, and measure dietary requirements and preventative health treatments.
REQUIRED SKILLS AND KNOWLEDGE

- demonstrate safe workplace and animal handling practices
- dispose of waste according to enterprise procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- canine breeds and behaviour, health and nutritional requirements
- effective canine training systems and procedures
- safe animal handling methods and techniques
- canine preventative health treatments
- dietary requirements of working dogs
- enterprise policies with regard to working dogs and recording and reporting routines.
- hazards associated with training and caring for working dogs and appropriate control measures
- State/Territory legislative and regulatory requirements with regard to OHS, animal welfare, and the registration and care of domestic dogs.
Evidence Guide

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- identify hazards and implement safe operating procedures
- steer, manoeuvre and position tractor in a smooth and controlled manner
- utilise the various components and controls of tractors
- set and secure equipment for operation
- safely and effectively operate tractors in adverse weather and difficult terrain conditions
- demonstrate safe and environmentally responsible workplace practices
- interpret manufacturers specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- effectively communicate faults and hazards, interpret and apply task instructions, report and maintain operational records
- calculate and measure distance, volumes and weights
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- tractor components, controls and features and operational functions
- tractor steering systems and features
- attached equipment, features and operational functions and procedures
- operating principles and operating methods
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated power
- effects of adverse weather and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- use and control of hazardous substances.
- relevant legislation with regard to machinery operation and licensing requirements
- environmental Codes of Practice with regard to machinery operation
- OHS legislative requirements, Codes of Practice, hazard identification and risk assessment.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include evidence of the following:

- carry out pre-operational checks and maintenance including tagging defects
- set and secure attachments according to manufacturer's directions
- operate tractor in a safe and controlled manner
- implement shut-down procedures
- store machinery and equipment
- record maintenance and operation details.

**Required Skills and Knowledge**

**REQUIRE SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- identify hazards and implement safe operating procedures
- steer, manoeuvre and position quad bikes in a smooth and controlled manner
- apply hand-eye co-ordination and correctly transfer body weight to maintain bike stability
- safely operate quad bikes in a range of weather and terrain conditions
- match and attach equipment to quad bikes according to manufacturer's specifications, legislative requirements, work requirements and enterprise safety policy
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- effectively communicate faults and hazards, interpret and apply task instructions, report and maintain operational records
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- hazards and risks associated with quad bike use
- components, controls and features of quad bikes and their functions
- range of quad bikes and attached equipment and functional applications
**REQUIRED SKILLS AND KNOWLEDGE**

- operating principles and operating methods
- load limits and the principles of weight distribution with regard to load shifting and bike movement
- effects of adverse weather and terrain conditions on the operation of quad bikes
- licensing requirements
- OHS legislative requirements, codes of practice and enterprise procedures
- codes of practice with regard to the use and control of hazardous substances
- environmental codes of practice for machinery operation.
- Safe Operating Procedures (SOPs)
- record keeping requirements.
# Evidence Guide

## Overview of assessment

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- perform routine pre-operational checks and maintenance
- attach and operate equipment
- recognise and control hazards and risks
- safely operate quad bikes vehicles in a range of weather and terrain conditions
- match and attach equipment appropriate to work requirements
- monitor and maintain vehicle records.

### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

BSBCOM501B Identify and interpret compliance requirements

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation. A range of legislation, rules, regulations and codes of practice may apply to this unit at the time of endorsement, depending on job roles and jurisdictions. |

© Commonwealth of Australia, 2015
Application of the Unit

This unit applies to individuals working as a chief executive or manager in a small organisation (where it would be part of their broad role) or as a member of a compliance management team within a larger organisation. These individuals require a sound theoretical knowledge of compliance and well established skills in identifying and interpreting compliance requirements relevant to the operations and sphere of business of the organisation and/or industry sector concerned.

The unit also applies to internal or external consultants as part of a broader advisory role to the chief executive or management team of a large or small organisation on compliance management policies and systems.

As the activities are focused primarily on identifying and interpreting specific legislative requirements, codes of practice, and internal standards and procedures as they relate to a particular organisation, this unit differs from BSBCOM601B Research compliance requirements and issues. Researching compliance issues is a higher order competence aimed at carrying out research into a wider range of compliance-related issues, such as the costs of compliance, the potential impact of compliance on an organisation or industry, and the risks and consequences of non-compliance.

Licensing/Regulatory Information

Not applicable.

</tbody>
</table>
REQUIRED SKILLS AND KNOWLEDGE

- complaints handling systems
- continuous improvement processes for compliance, including monitoring, evaluation and review
- strategies for developing a positive compliance culture within the organisation
- techniques and performance indicators for monitoring the operation of a compliance program or management system
- reporting processes on compliance management, including reports on breaches and rectification action
- relevant organisational policies and procedures, including:
  - compliance plans and policies in various compliance areas
  - organisational standards for operations and ethics
- relevant Australian and international standards, including:
  - AS 3806:2006 Compliance programs
  - AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations
  - AS ISO 15489:2004 Records management
  - AS/NZS 4360:2004 Risk management
- relevant organisational policies and procedures, including:
  - plans and policies in various compliance areas
  - organisational standards for operations and ethics
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the ability to:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• document processes used to identify, analyse and interpret organisational compliance requirements</td>
</tr>
<tr>
<td></td>
<td>• apply knowledge of elements of compliance programs and related management systems.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Assessment must ensure access to:

- organisational policies and procedures, standard operating procedures, and plans
- relevant published material on legislation, regulations, licensing requirements, codes of practice, standards, etc.
- appropriate computer resources for online searching and review of relevant compliance requirements.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of activities undertaken to identify compliance requirements
- assessment of reports identifying compliance requirements and containing analysis of the implications of those requirements on organisational objectives, processes and systems
- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- observation of interactions with internal and external stakeholders while identifying compliance requirements
- oral or written questioning to assess knowledge of compliance requirements and their impact on organisational objectives, processes and systems
- review of authenticated compliance promotional documents or computer files from the workplace or training environment.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

**Information on relevant compliance requirements may include:**

- correspondence, emails and other written information provided by internal and external personnel contacted during search activities
- information downloadable from relevant websites
- newsletters, bulletins and information sheets and other similar periodic documentation distributed by relevant regulatory authorities and standards bodies
- published information on legislation, regulations, codes of practice, standards, licensing requirements, standard operating procedures, etc.
- records of conversations and meetings with relevant internal and external personnel.

**Relevant internal personnel may include:**

- board of directors
- chief executive officer
- compliance management team
- compliance specialists at the operational level
- frontline managers
- senior management team.

**Relevant external personnel may include:**

- legal and business advisors and consultants with expertise in compliance management
- representatives of professional associations and institutes relevant to the organisation's operations and sphere of business
- representatives of relevant authorities in pertinent compliance areas.

**Relevant personnel performing specific compliance management functions may include:**

- compliance management consultants
- compliance management officers
- compliance managers
- legal personnel specialising in compliance management
- line managers with specific compliance functions.

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

- Interpersonal skills to contribute to a positive culture of compliance within an organisation
- Interpersonal skills to relate to internal and external personnel and in particular those representing relevant regulatory authorities, professional institutes and organisations, standards organisations
- Project management skills to:
  - Manage other personnel involved in the research activity
  - Manage time
  - Manage finances
- Research skills to:
  - Conduct literature and internet searches
  - Assist with various types of research surveys
  - Assist with the analysis and organisation of research data, including qualitative and quantitative data, using appropriate techniques
  - Develop research plans.

### Required knowledge

- Compliance requirements relevant to the organisation research methods and techniques suitable for compliance related research projects
- Elements of compliance program/management systems including:
  - Specification of compliance management functions, accountabilities and responsibilities within the organisation
  - Compliance related management information systems
  - Record keeping systems required for compliance management
  - Liaison procedures with relevant internal and external personnel on compliance related matters
  - Breach management policies and processes including the identification, classification, investigation, rectification and reporting of breaches in compliance requirements
  - Compliance reporting procedures
  - Corporate induction and training processes related to compliance management
  - Processes for the internal and external promulgation and promotion of information on compliance requirements and compliance program/management system
  - Compliance complaints handling systems
  - Continuous improvement processes for compliance including monitoring.
REQUIRED SKILLS AND KNOWLEDGE

- evaluation and review
- strategies for developing a positive compliance culture within the organisation
- techniques and performance indicators for monitoring the operation of a compliance program/management system
- reporting processes on compliance management including reports on breaches and rectification action
- quantitative and qualitative data analysis techniques relevant to compliance related research
- relevant Australian and international standards including but not limited to:
  - AS 3806:2006 Compliance programs
  - AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations
  - AS ISO 15489:2004 Records management
  - AS/NZS 4360:2004 Risk management quantitative and qualitative data analysis techniques relevant to compliance related evaluation
- relevant organisational policies and procedures including:
  - compliance plans and policies in various compliance areas
  - organisational standards for operations and ethics
- sources of data relevant to compliance related research.
### Evidence Guide

#### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- completion of projects in which key aspects or issues associated with compliance requirements or a compliance program/management system have been researched
- knowledge of compliance requirements relevant to the organisation research methods and techniques suitable for compliance related research projects.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to relevant published material such as:
  - organisational policies, standard operating procedures, procedures and plans
  - relevant legislation, regulations, licensing requirements, codes of practice, standards
- access to relevant internal and external data files
- access to appropriate computer resources for online searching, data processing and analysis, and report preparation and editing.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of techniques and data collected to identify compliance requirements
- assessment of reports documenting compliance research and issue findings
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observations of activities undertaken to research compliance requirements and issues
- observations of interactions with internal and external stakeholders while researching compliance requirements
- oral or written questioning to assess knowledge of
| **EVIDENCE GUIDE** | compliance processes used to identify compliance requirements and issues  
- review research plan  
- evaluation of process used to distribute draft report of the research outcomes, findings and recommendations for comment and feedback, and outcomes of this process. |
|-------------------|---|
| **Guidance information for assessment** | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:  
- other compliance units. |
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Purpose and scope of the required compliance related research** may include:

- costs of compliance at the organisation or wider levels
- investigation of relevant jurisdictional aspects of compliance covering:
  - organisational issues
  - industry issues
  - local issues
  - state/territory issues
  - national issues
  - global issues
- potential consequences of non-compliance at the organisation or wider levels
- potential impacts of compliance requirements upon an organisation, an industry or an economy
- program and system requirements for effective compliance management
- skill requirements and organisational structures for effective compliance management

**Client/s may include:**

- educational institutions and organisations
- enterprises
- government departments
- professional associations and institutes
- regulatory authorities

**Relevant internal and/or external personnel** may include:

- board of directors
- chief executive officer
- chief executives and managers in organisations with an interest in the compliance issues being researched
- compliance management team (where relevant)
- compliance specialists at the operational level
- frontline managers
- legal and business advisors and consultants
**RANGE STATEMENT**

| | with expertise and interest in compliance requirements and related management systems  
| | • representatives of professional associations and institutes relevant to the organisation's operations and sphere of business  
| | • representatives of relevant authorities in pertinent compliance areas  
| | • senior management team |

**Research methodology may include:**

| | • desk analysis  
| | • environmental scans  
| | • literature searches including internet searches  
| | • qualitative data analysis  
| | • quantitative data analysis using manual and computerised techniques  
| | • surveys including interviews, focus groups, questionnaires |

**Research plan may include:**

| | • costs  
| | • details of the research objectives and deliverables  
| | • methodology  
| | • personnel required including project manager, researcher or research team and those who may be consulted during the course of the research activities  
| | • time lines and milestones |

**Research data may include:**

| | • completed survey questionnaires  
| | • document files downloaded from internet websites  
| | • published documents including papers, standards, regulations  
| | • quantitative data collected from various sources, such as ABS data, data provided by regulatory authorities, demographic data  
| | • records of interviews, meetings or focus group workshop outcomes  
| | • records of telephone conversations  
| | • written correspondence including letters, faxes, emails |

**Relevant Australian and international standards may include:**

| | • AS 3806:2006 Compliance programs  
| | • AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations |

BSBCUS402B Address customer needs

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
</table>
| Release 1 | This version first released with *BSB07 Business Training Package version 6.0.*  
Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.  
Replaces BSBCUS402A Address customer needs |

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage the ongoing relationship with a customer, which includes assisting the customer to articulate their needs, meeting customer needs and managing networks to ensure customer needs are addressed. The customer relationship would typically involve direct interaction a number of times over an extended period.

This unit is appropriate to workers who are expected to have detailed product knowledge in order to recommend customised solutions. They would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

Application of the Unit

This unit applies to workers required to be familiar with a product and service that varies widely and is capable of significant customisation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.
Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes of a unit of competency.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</td>
</tr>
</tbody>
</table>
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Element</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| 1. Assist customer to articulate needs | 1. Ensure **customer** needs are fully explored, understood and agreed  
1.2 Explain and match available services and products to customer needs  
1.3 Identify and communicate **rights and responsibilities of customers** to the customer as appropriate |
| 2. Satisfy complex customer needs | 2.1 Explain possibilities for meeting customer needs  
2.2 Assist customers to evaluate service and/or product options to satisfy their needs  
2.3 Determine and prioritise preferred actions  
2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner |
| 3. Manage networks to ensure customer needs are addressed | 3.1 Establish **effective regular communication** with customers  
3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation  
3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer, and the **products and services** available  
3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services  
3.5 Maintain records of customer interaction in accordance with **organisational procedures** |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to relate to people from diverse backgrounds and people with diverse abilities.
- information management skills to summarise information verbally and non-verbally
- literacy and numeracy skills to:
  - interpret product and service features or sales data
  - read a variety of texts to prepare general information and papers
  - summarise information obtained from a variety of verbal and non-verbal sources
  - write formal and informal text
- numeracy skills to analyse data, and to compare timelines and promotional costs against budgets
- problem-solving skills to develop solutions unique to a customer
- self-management skills to:
  - comply with policies and procedures
  - seek learning and development opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety
- organisational procedures and standards for customer service relationships
- detailed product and service knowledge which may:
  - be of significant breadth so as to propose alternative products and services, or
  - of significant depth so as to propose variations within a limited product and service range.
Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

| Guidance information for assessment | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended. |
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Customers** may include: | • customers with routine or specific requests  
|                        | • in person, computer-based and telephone customers  
|                        | • internal and external customers  
|                        | • people from a range of social, cultural or ethnic backgrounds  
|                        | • people who may be unwell, drug affected or emotionally distressed  
|                        | • people with varying physical and mental abilities  
|                        | • regular and new customers.  |

| **Rights and responsibilities of customers** may include: | • fulfilment of external obligations  
|                                                           | • informed consent.  |

| **Effective regular communication** may include: | • giving customers full attention  
|                                               | • handling sensitive and confidential issues  
|                                               | • maintaining eye-contact (for face-to-face interactions), except where eye-contact may be culturally inappropriate  
|                                               | • speaking clearly and concisely  
|                                               | • using active listening techniques  
|                                               | • using appropriate language and tone of voice  
|                                               | • using clearly written information/communication  
|                                               | • using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions)  
|                                               | • using open and/or closed questions.  |

| **Products and services** may include: | • either products or services  
|                                        | • goods  
|                                        | • ideas  
|                                        | • infrastructure  
|                                        | • private or public sets of benefits.  |

| **Organisational procedures** may include: | • procedural manuals  
|                                          | • quality systems, standards and guidelines.  |

BSBDES701A Research and apply design theory

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to research and apply different theories of design. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to individuals who use sophisticated research and critical analysis skills in the exploration of design, design theory and its application to professional design practice. The scope of the research activity has both significant depth and breadth. A broader, more general approach to the history and theory of design is covered by BSBDES305A Source and apply information on the history and theory of design. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

<table>
<thead>
<tr>
<th>Prerequisite units</th>
<th></th>
</tr>
</thead>
</table>
### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Research design theory | 1.1. Use a range of *research techniques* to source information about design theory  
1.2. Identify and explore *new, emerging and alternative sources of ideas and thinking* about design  
1.3. Expand own knowledge and understanding of design through review and *critical analysis* of information  
1.4. Analyse, compare and contrast a range of *theoretical perspectives and thinking* on design |
| 2. Apply theories of design to professional practice | 2.1. Evaluate the relevance and application of different theories of design based on analysis of *own professional and personal experience*  
2.2. Analyse the ways in which different aspects of history, theory and other influences are applied, adapted or challenged in practice  
2.3. Assess the ways in which theories and thinking about design may be applied in ways that provide *benefits to individuals, businesses and communities* |
| 3. Develop, articulate and debate own perspectives on theories of design | 3.1. Take a critical approach to different theories and reflect on own ideas and responses  
3.2. Develop own *substantiated positions* in response to research and analysis  
3.3. Articulate own positions in a manner which demonstrates *clarity of thought and conceptual understanding* of different theories and thinking  
3.4. Debate own positions on design showing belief in own ideas and a willingness to remain open to new perspectives |
## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to articulate and debate complex concepts
- critical thinking skills to analyse complex information, and to develop and substantiate own positions and responses to theories and thinking around design
- literacy skills to research information dealing with complex concepts and theories
- self-management skills to develop and substantiate own views and ideas.

### Required knowledge

- different theories of design, including different historical perspectives and current and emerging thinking
- relationship between theories of design and design in practice (in a particular work or broader social context)
- relationships, similarities and differences at a conceptual and practical level between the concepts of design, innovation and creativity
- systemic impacts on design - social, economic, political and environmental.
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• research into past, current and emerging theories of design</td>
<td>• development of substantiated positions on design and its application in response to own analysis and research</td>
</tr>
<tr>
<td>• development of substantiated positions on design and its application in response to own analysis and research</td>
<td>• knowledge of different theories and thinking on design and its application in different social and work contexts.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th>Assessment must ensure:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• use of current and emerging sources of information and thinking on design.</td>
<td></td>
</tr>
</tbody>
</table>

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- evaluation of research undertaken by the candidate into design theory and its application
- evaluation of candidate's participation in discussion and debate on theories of design

### Guidance information for assessment

The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Research techniques may include: | • desk research  
• informal discussions  
• internet  
• interviews  
• literature reviews |
|---|---|
| New, emerging and alternative sources of ideas and thinking may include: | • current business theories  
• government policy  
• individual in any field of endeavour  
• innovative organisations  
• international trends |
| Critical analysis may involve: | • adapting  
• analysing and evaluating actions and policies  
• challenging  
• clarifying issues, values and standards  
• comparing analogous situations  
• comparing and contrasting ideals with practice  
• comparing and evaluating beliefs, interpretations and theories  
• developing criteria for evaluation  
• distinguishing relevant from irrelevant facts  
• examining and evaluating assumptions  
• exploring implications and consequences  
• generating and assessing solutions  
• debating and discussing  
• judging  
• making interdisciplinary connections  
• making plausible inferences and predictions  
• noting significant similarities and differences  
• questioning  
• reading and listening critically  
• reflecting |
| Theoretical perspectives and | • economic |
## RANGE STATEMENT

**thinking** may be:
- environmental
- historical
- local, national and international
- political
- social/cultural

**Own professional and personal experience** may include:
- evaluation of contexts in which creativity has flourished
- evaluation of different attitudes to design and the role of designers
- observations of the ways people interrelate with the design process, of the ways people use and adapt designs in daily life
- reflection on current political, social and cultural trends
- reflection on own experience with any type design process
- workplace experience

**Benefits to individuals, businesses and communities** may include:
- better individual and business relationships
- capacity for innovation and invention
- greater social cohesion
- improved productivity and profit
- psychological wellbeing of individuals and communities

**Substantiated positions** may be positions which are:
- grounded in appropriate research
- result of rational and logical thought
- subjected to the analysis of others
- supported by relevant information

**Clarity of thought and conceptual understanding** may be demonstrated by:
- ability to exchange and debate ideas with others
- appropriate distillation of ideas to suit the required purpose
- audience understanding
- clear articulation of ideas

BSBDIV601A Develop and implement diversity policy

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to research diversity, draft policy, plan for implementation, and implement diversity policy. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit covers the cycle of policy development with a specific focus on diversity and its importance to organisational activity. The policy takes a whole of organisation approach and sees diversity as an asset to the organisation. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Research diversity           | 1.1. Analyse existing practices and information in relation to *diversity*  
                                  | 1.2. Identify potential benefits of diversity and analyse in relation to *business objectives*  
                                  | 1.3. Consult *key stakeholders* about their requirements for a diversity policy  
                                  | 1.4. Access diversity policies from similar organisations and review for relevance to own organisation |
| 2. Draft policy and plan for implementation | 2.1. Draft *diversity policy*  
                                  | 2.2. Develop *action plans* for policy  
                                  | 2.3. Consult key stakeholders for feedback on draft policy and action plans  
                                  | 2.4. Determine relationships and links with other related policies  
                                  | 2.5. Revise policy for implementation |
| 3. Implement diversity policy    | 3.1. Explain and interpret policy to key stakeholders  
                                  | 3.2. Promote policy across the organisation through a range of *communication channels*  
                                  | 3.3. Identify intended and unintended impacts of policy implementation  
                                  | 3.4. Develop tools, benchmarks and other indicators for planning and measuring impact of policy implementation  
                                  | 3.5. Monitor business activities, team plans and staff performance to ensure diversity policy is effectively implemented |
| 4. Review diversity policy       | 4.1. Gather and analyse information about diversity, the policy and its implementation  
                                  | 4.2. Consult key stakeholders to provide feedback on the policy  
                                  | 4.3. Develop and approve recommendations for changes to the policy  
                                  | 4.4. Refine policy |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- high level research and analytical skills to review business needs and to determine how diversity approaches apply
- interpersonal skills to consult and negotiate with people at all levels, and to present ideas for change and foster support for them
- planning and organising skills to implement and monitor diversity policy.

#### Required knowledge

- business operations including:
  - familiarity with structure, roles and responsibilities
  - business plans and strategic direction
  - issues that can be linked to diversity
- diversity within the community and business environment:
  - cultures
  - beliefs
  - traditions and practices
- equal opportunity theory
- productive diversity - contemporary theory about diversity and its potential contribution to business advantage
- legislation, codes of practice and national standards, for example:
  - Commonwealth Human Rights and Equal Opportunity Act
  - Commonwealth Racial Discrimination Act/s
  - Commonwealth Sex Discrimination Act
  - Commonwealth Disability Discrimination Act
  - relevant state/territory legislation.
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- development of a comprehensive diversity policy with details of an implementation strategy and how it will be monitored and reviewed OR
- critical analysis of an existing diversity policy with an evaluation of its effectiveness and recommendations for improvement
- knowledge of relevant legislation, codes of practice and national standards.

### Context of and specific resources for assessment

Assessment must ensure:

- access to workplace documents and data.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- assessment of written reports evaluating the effectiveness of diversity policies and their implementation
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of presentations
- review of action plans to support diversity policy implementation
- review of documentation promoting the policy across the organisation
- evaluation of recommendations for policy changes.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other units from the BSB60407 Advanced Diploma of Management.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Information may include: | • complaints and grievances e.g. sexual harassment, racial discrimination  
|                          | • customer analysis and feedback  
|                          | • equal opportunity targets  
|                          | • recruitment patterns  
|                          | • stakeholder opinions  
|                          | • statistical data |

| Diversity includes differences in: | • age  
|                                    | • belief systems and values  
|                                    | • culture  
|                                    | • expertise, experience and working styles  
|                                    | • gender  
|                                    | • interests  
|                                    | • interpersonal style  
|                                    | • language, literacy and numeracy  
|                                    | • physical differences  
|                                    | • politics  
|                                    | • race  
|                                    | • religion  
|                                    | • sexual orientation  
|                                    | • thinking and learning styles |

| Business objectives may include: | • business goals and plans  
|                                   | • future directions statements  
|                                   | • vision or mission statements |

| Key stakeholders may include: | • customers and clients  
|                                | • heads of business units  
|                                | • managers and supervisors  
|                                | • organisation executives  
|                                | • staff working in a range of job roles and functions |

| Diversity policy may include: | • benefits of recognising diversity  
|                              | • human resources practices |
## RANGE STATEMENT

- key diversity issues for the organisation
- organisational vision and purpose about diversity
- policies the organisation will commit to
- proposed action
- reasonable adjustments

### Action plans may include:

- financial plans
- promotional strategies
- resource requirements
- risk management issues and strategies
- sales and distribution projections
- specific actions, initiatives and tasks to be undertaken
- staffing/responsibility requirements and arrangements
- time lines

### Communication channels may include:

- face-to-face meetings
- inclusion in training events
- internet and intranet
- posters, leaflets and fliers
- presentations and speeches

BSBFIM501A Manage budgets and financial plans

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to undertake financial management within a work team in an organisation. This includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances, and reviewing and evaluating effectiveness of financial management processes in line with the financial objectives of the work team and the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit addresses the requirement for managers to ensure that financial resources are used effectively. This is done by ensuring access to budget/s and ongoing monitoring expenditure against the budget/s. The unit applies to managers working in small and large business environments and not for profit organisations. |

Licensing/Regulatory Information

Not applicable.

| 1. Plan financial management approaches | 1.1. Access *budget/financial plans* for the work team  
1.2. Clarify *budget/financial plans* with *relevant personnel* within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible  
1.3. Negotiate any changes required to be made to *budget/financial plans* with relevant personnel within the organisation  
1.4. Prepare *contingency plans* in the event that initial plans need to be varied |
| 2. Implement financial management approaches | 2.1. Disseminate relevant details of the agreed *budget/financial plans* to team members  
2.2. Provide *support* to ensure that team members can competently perform *required roles* associated with the management of finances  
2.3. Determine and access *resources and systems* to manage financial management processes within the work team |
| 3. Monitor and control finances | 3.1. Implement *processes* to monitor actual expenditure and to control costs across the work team  
3.2. Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns  
3.3. Implement, monitor and modify contingency plans as required to maintain financial objectives  
3.4. *Report* on budget and expenditure in accordance with organisational protocols |
| 4. Review and evaluate financial management processes | 4.1. Collect and collate for analysis, *data and information on the effectiveness of financial management processes* within the work team  
4.2. Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes  
4.3. Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- numeracy skills to read and understand a budget and to update a budget
- technology skills to use software associated with financial record keeping.

### Required knowledge

- basic accounting principles
- organisational requirements related to financial management
- relevant legislation and current requirements of the Australian Taxation Office, including GST
- requirements for organisational record keeping and auditing
- principles and techniques involved in:
  - budgeting
  - cash flows
  - electronic spreadsheets
  - GST
  - ledgers and financial statements
  - profit and loss statements.
# Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• financial skills required to work with and interpret budgets, ageing summaries, cash flow, petty cash, GST, and profit and loss statements</td>
</tr>
<tr>
<td></td>
<td>• knowledge of the record keeping requirements for the ATO and for auditing purposes.</td>
</tr>
</tbody>
</table>

## Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

## Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- assessment of written reports indicating broad knowledge of managing budgets and managing financial resources in the organisation
- demonstration of techniques using financial record keeping software
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- oral or written questioning to assess knowledge of requirements for organisational record keeping and auditing
- review of contingency plans
- review of identification of cost variations and expenditure overruns
- evaluation of documentation reporting on budget and expenditure
- review of documentation identifying and recommending improvements to financial management processes.

## Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:
<table>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Budget/financial plans may include: | • cash flow projections  
| | • long-term budgets/plans  
| | • operational plans  
| | • short-term budgets/plans  
| | • spreadsheet-based financial projections  
| | • targets or key performance indicators for production, productivity, wastage, sales, income and expenditure |
| Relevant personnel may include: | • financial managers, accountants or financial controllers  
| | • supervisors, other frontline managers |
| Contingency plans may include: | • contracting out or outsourcing human resources and other functions or tasks  
| | • diversification of outcomes  
| | • finding cheaper or lower quality raw materials and consumables  
| | • increasing sales or production  
| | • recycling and re-using  
| | • rental, hire purchase or alternative means of procurement of required materials, equipment and stock  
| | • restructuring of organisation to reduce labour costs  
| | • risk identification, assessment and management processes  
| | • seeking further funding  
| | • strategies for reducing costs, wastage, stock or consumables  
| | • succession planning |
| Support may include: | • access to specialist advice  
| | • documentation of procedures  
| | • help desk or identified experts within the organisation  
| | • information briefings or sessions |
### RANGE STATEMENT

<table>
<thead>
<tr>
<th>Required roles may include:</th>

BSBFIM601A Manage finances

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to undertake budgeting, financial forecasting and reporting requirements, and to allocate and manage resources to achieve the required outputs for the business unit. It includes contributing to financial bids and estimates, allocating funds, managing budgets and reporting on financial activity. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to people who have managerial responsibilities which include overseeing the management of financial and other resources across a business unit, a series of business units or teams, or an organisation. It covers all areas of broad financial management. In a larger organisation this work would be supported by specialists in financial management. |

Licensing/Regulatory Information
Not applicable.

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Plan for financial management** | 1.1. Review and analyse previous *financial data* to establish areas which have generated a profit or loss  
1.2. Undertake research to review reasons for previous profit and loss  
1.3. Review business plan to establish critical dates and initiatives that will require or generate resources in next financial cycle  
1.4. Analyse cash flow trends  
1.5. Review statutory requirements for compliance and liabilities for tax  
1.6. Review existing software and its suitability for financial management |
| **2. Establish budgets and allocate funds** | 2.1. Use previous financial data to determine allocations for resources  
2.2. Make informed estimates of new items for inclusion in budget  
2.3. Prepare budgets in accordance with *organisational requirements* and *statutory requirements* |
| **3. Implement budgets** | 3.1. Circulate budgets and ensure managers and supervisors are clear about budgets, reporting requirements and financial delegations  
3.2. Manage risks by checking there are no opportunities for misappropriation of funds and that systems are in place to properly record all financial transactions  
3.3. Review profit and loss statements, cash flows and ageing summaries  
3.4. Revise budgets, as required, to deal with contingencies  
3.5. Maintain audit trails to ensure accurate tracking and to identify *discrepancies* between agreed and actual allocations  
3.6. Ensure compliance with due diligence |
| **4. Report on finances** | 4.1. Ensure structure and *format* of reports are clear and conform to organisational and statutory requirements  
4.2. Identify and prioritise significant *issues* in statements, including comparative financial performances for review and decision making  
4.3. Prepare *recommendations* to ensure financial viability of the organisation  
4.4. Evaluate the effectiveness of financial management |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to explain budgets and reporting requirements, and to deal with questions
- mathematical skills to read and interpret budgets
- technology skills to work with financial software.

#### Required knowledge

- financial probity
- principles of accounting and financial systems
- relevant Australian, international and local legislation and conventions, such as:
  - bilateral or regional trade agreements
  - International Commercial Terms (INCOTERMS)
  - Trade Practices Act
  - Warsaw Convention
  - World Trade Organization determinations
- requirements of the Australian Tax Office, including Goods and Services Tax, Company Tax, PAYG.
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

</thead>
<tbody>
<tr>
<td><strong>Critical aspects for assessment and evidence required to demonstrate competency in this unit</strong></td>
<td>Evidence of the following is essential:</td>
</tr>
</tbody>
</table>
|  | • preparation of budgets which align with the business plan, use previous financial data and meet all compliance requirements  
  | • analysis of the effectiveness of existing financial management approaches  
  | • knowledge of the requirements of the Australian Tax Office. |
| **Context of and specific resources for assessment** | Assessment must ensure: |
|  | • access to appropriate documentation and resources normally used in the workplace. |
| **Method of assessment** | A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: |
|  | • assessment of written reports on financial systems and financial management  
  | • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate  
  | • review of budgets prepared  
  | • oral or written questioning to assess knowledge of legislative requirements or the tax system  
  | • evaluation of documentation reviewing profit and loss statements, cash flows and ageing summaries  
  | • analysis of maintenance of audit trails  
  | • review of recommendations prepared to ensure the financial viability of the organisation. |
| **Guidance information for assessment** | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: |
|  | • other units from the BSB60407 Advanced Diploma of Management. |
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Financial data may include:** | • budgets, forecasts and variations  
• cash flow/profit reports  
• financial/operational statements and reports (e.g. expenditures and receipts, profit and loss statements)  
• market valuations |
|-------------------------------|---------------------------------------------------------------|
| **Organisational requirements may include:** | • financial analysis assessments  
• financial management manuals  
• legal and organisational policies, guidelines and requirements  
• occupational health and safety policies, procedures and programs  
• price and exchange parameters  
• quality assurance and/or procedures manuals  
• recording and filing systems  
• reporting requirements  
• standard financial analysis techniques |
| **Statutory requirements may include:** | • delegated authorities  
• internal control procedures  
• limits on volumes and types of financial transactions  
• reporting of duty, excise and other overseas government charges  
• reporting periods  
• taxation and payment timings |
| **Discrepancies may include:** | • absence of auditable trail  
• expenditure report mismatches  
• inappropriate authorisations  
• incorrect payments  
• incorrect report formats  
• unreconciled cash flows and operating statements  
• variances from budget and phasings |
### RANGE STATEMENT

| Format may include: | audits  |
|                   | balance sheets |
|                   | cash flow statements |
|                   | electronic forms |
|                   | financial year reports |
|                   | operating statements |
|                   | spreadsheets |
|                   | statutory forms |
| Issues may include: | cost structures |
|                   | internal controls |
|                   | losses and returns |
|                   | profitability |
|                   | statutory obligations |
|                   | suppliers and markets |
| Recommendations may refer to: | cash flow |
|                   | changes in business activity including markets, goods or services traded |
|                   | consolidation |
|                   | expenses and overheads |
|                   | labour costs including decisions to move production to other locations or sites |
|                   | loss |
|                   | profit |
|                   | write-offs |

BSBFLM312C Contribute to team effectiveness

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This specifies the outcomes required to by frontline managers to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Frontline managers have a key role in developing efficient and effective work teams within the context of the organisation. They play a prominent part in motivating, mentoring, coaching and developing team cohesion by providing leadership for the team and forming the bridge between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non routine activities that require some discretion and judgement. |

Licensing/Regulatory Information

Not applicable.

</thead>
</table>
| 1. Contribute to team outcomes | 1.1. Consult team members to identify **team purpose, roles, responsibilities, goals, plans and objectives**  
1.2. Support team members to meet expected outcomes |
| 2. Support team cohesion | 2.1. Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility  
2.2. Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities  
2.3. Provide **feedback** to team members to encourage, value and reward team members' efforts and contributions  
2.4. Identify and address issues, concerns and problems identified by team members to **relevant persons** as required |
| 3. Participate in work team | 3.1. Actively encourage and support team members to participate in team activities and communication processes and to take **responsibility for their actions**  
3.2. Support the team to identify and resolve problems which impede its performance  
3.3. Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers |
| 4. Communicate with management | 4.1. Maintain open **communication** with **line manager/management** at all times  
4.2. Communicate information from line manager/management to the team  
4.3. Communicate **unresolved issues** to line manager/management and follow-up to ensure action is taken in response to these matters |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communication skills, including listening
- basic training skills, including mentoring and coaching
- planning and organising skills
- problem solving skills
- attributes:
  - empathic
  - communicative
  - self aware
  - supportive
  - trusting
  - open
  - flexible
  - accommodating
  - initiating
  - loyal
  - fair
  - adaptable

### Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
- organisational policies and procedures
- organisational goals, objectives and plans at both tactical and strategic levels
- organisational structure including organisational chart
- learning and development options available within and through organisation
- a general understanding of the principles and techniques of:
  - group dynamics and processes
  - motivation
  - planning
## REQUIRED SKILLS AND KNOWLEDGE

- negotiation
- individual behaviour and difference
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

</tbody>
</table>

### Method of assessment

A range of assessment methods should be used to assess skills and knowledge. The following examples are appropriate for this unit:

- Direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- Records produced from working in a team, such as:
  - reports
  - minutes or records of meetings
  - work journals or diaries
  - learning and development plans developed with team members
  - records of actions taken to address issues raised
| Guidance information for assessment | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended. |

by team members
**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation, codes and national standards relevant to the workplace may include:

- award and enterprise agreements and relevant industrial instruments
- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination
- relevant industry codes of practice

OHS considerations may include:

- provision of information about OHS legislative requirements, guidelines and the organisation's OHS policies, procedures and programs
- training of all employees in health and safety procedures
- participation in the regular update of OHS systems and procedures
- changes to work practices, procedures and the working environment which impact on OHS

*Team purpose, roles, responsibilities, goals, plans and objectives* may include:

- goals for individuals and the work team
- expected outcomes and outputs
- individual and team performance plans and Key Performance Indicators (KPIs)
- action plans, business plans and operational plans linked to strategic plans
- OHS responsibilities

*Feedback* may refer to:

- communication of ideas and thoughts which focus on specific tasks, outcomes, decisions, issues or behaviours
- formal/informal gatherings between team members where there is discussion on work-related matters

*Relevant persons* may include:

- frontline manager's direct superior or other management representatives
### RANGE STATEMENT

| Responsibility for their actions may involve: | colleagues  
designated personnel e.g. safety officer |
| Communication may include: | verbal, written or electronic communication  
face-to-face  
formal/informal interaction |
| Line manager/management may refer to: | frontline manager's direct superior or other management representatives |
| Unresolved issues may include: | issues, concerns and tensions  
problems related to work roles and responsibilities  
grievances and complaints  
any matters affecting workplace relationships and team cohesion |

BSBHRM402A Recruit, select and induct staff

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to execute tasks associated with the recruitment cycle. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to individuals with a role in recruitment, selection and induction functions who work under the direction of a human resources manager. It is not assumed that the individuals addressed by this unit have staff who report to them, although this may be the case. Performance of the work described in this unit will be underpinned by in depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resource functions. |

Licensing/Regulatory Information

<td>4.4. Arrange induction in accordance with organisational policy</td>
</tr>
</tbody>
</table>

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- communication skills to use networks to source suitable applicants, to listen to and understand what is being said in interviews, and to advise on the outcomes of the selection process
- literacy skills to work with job descriptions to devise suitable questions for interviews, to prepare letters for unsuccessful applicants and to make job offers
- organising and scheduling skills to arrange interviews and venues.

**Required knowledge**

- documentation required for recruitment and selection
- human resource functions, human resource life cycle and the place of recruitment and selection in that life cycle
- principles of equity, diversity and relevant legislation.
- range of interviewing techniques and other selection processes and their application.
### Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:
- demonstrated ability to work with job descriptions to source and select suitable staff
- interviewing and other selection techniques that demonstrate awareness of equal opportunity and anti-discrimination requirements
- knowledge of the human resource life cycle.

#### Context of and specific resources for assessment

Assessment must ensure:
- access to an appropriate range of documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- analysis of responses to case studies and scenarios
- assessment of written reports on recruitment and selection
- demonstration of selection techniques
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of interviewing techniques
- review of advertisements for staffing vacancies
- review of documentation provided to successful candidate
- oral or written questioning to assess knowledge of selection processes.

#### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:
- other units from the Certificate IV in Human Resources.
## Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Job descriptions may include:** | attributes  
job or person specifications  
job title and purpose of position  
necessary skills and knowledge  
qualifications  
selection criteria  
tasks or duties associated with the position |
|---|---|
| **Legislation, codes and national standards may include:** | award and enterprise agreements, and relevant industrial instruments  
relevant industry codes of practice  
relevant legislation from all levels of government that affects business operation, especially in regard to OHS and environmental issues, equal opportunity, industrial relations and anti-discrimination |
| **Occupational health and safety (OHS) considerations may include:** | establishment and maintenance of OHS training, records, induction processes  
performance against OHS legislation and organisation's OHS system, especially policies, procedures and work instructions |
| **Advertising may include:** | electronic or print  
internal or external  
outsourcing |
| **Staffing requirements may include:** | permanent, temporary, full-time, part-time or casual |

BSBINM302A Utilise a knowledge management system

Modification History
Not applicable.

Unit Descriptor

<table>
<thead>
<tr>
<th>Unit descriptor</th>
</tr>
</thead>
<tbody>
<tr>
<td>This unit describes the performance outcomes, skills and knowledge required to access and use a knowledge management system, to input into a knowledge management system, and to contribute to monitoring, reviewing and improving a knowledge management system and work practices.</td>
</tr>
</tbody>
</table>

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

<table>
<thead>
<tr>
<th>Application of the unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>This unit applies to individuals who apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of knowledge management to assist in increasing productivity, to improve quality or to recognise the benefits to the organisation through the improved use of knowledge.</td>
</tr>
</tbody>
</table>

For the purpose of this unit, knowledge management is defined as the whole range of strategies, methods, activities and techniques used formally and informally by individuals and the organisation (as formalised in a knowledge management system) to identify, collect, organise, store, retrieve, analyse, share and apply knowledge to the work of the organisation.

# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

## Required skills

- analytical skills to classify and report information
- literacy skills to read and understand a variety of texts; and to write, edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate
- technology skills to display information in a format suitable to the target audience.

## Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies and procedures for knowledge management
- other relevant organisational policies and procedures, for example:
  - commercial confidentiality.
  - customer service
  - information management
  - records management.

BSBINM401A IMPLEMENT WORKPLACE INFORMATION SYSTEM

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to implement the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information, which plays a significant part in the organisation's effectiveness.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Frontline managers play a significant role in contributing to the organisation's effectiveness in identifying, acquiring, analysing and using appropriate information.

At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, leadership and guidance of others, and some discretion and judgement. |

Licensing/Regulatory Information
Not applicable.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify and source information needs                              | 1.1. Determine and locate *information* required by teams  
1.2. Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to *organisational policies* |
| 2. Collect, analyse and report information                             | 2.1. Collect information, which is adequate and relevant to the needs of teams, in a timely manner  
2.2. Ensure information is in a format suitable for analysis, interpretation and dissemination  
2.3. Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired |
| 3. Implement information systems                                       | 3.1. Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes  
3.2. Use *technology* available in the work area to manage information effectively  
3.3. Submit recommendations for improving the information system to *designated persons and/or groups* |
| 4. Prepare for information system changes                              | 4.1. Collect information about information system future needs in consultation with *colleagues*, including those who have a specialist role in resource management  
4.2. Ensure estimates of information system future needs reflect the organisation's *business plans*, and customer and supplier requirements  
4.3. Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes  
4.4. Prepare team members to work with new technology and information system changes |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- literacy skills to work with information, and to research and present information in ways that are appropriate to the work team
- technology skills to work with a range of information systems.

### Required knowledge

- information management systems and technology that would be associated with the workplace such as:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Information may include:
- archived, filed and historical background data
- continuous improvement and quality assurance data
- data available internally or externally
- data shared and retrieved in various forms such as in writing or verbally, electronically or manually
- financial and contractual data
- marketing and customer-related data
- organisational performance data
- planning and organisational documents
- policies and procedures

### Organisational policies may include:
- guidelines for decision making throughout the organisation that link the formulation of strategy with its implementation
- sets of accepted actions approved by the organisation
- Standard Operating Procedures

### Technology may include:
- computerised systems and software such as databases, project management and word processing
- telecommunications devices
- any other technology used to carry out work roles and responsibilities

### Designated persons and/or groups may include:
- groups designated in workplace policies and procedures
- managers or supervisors with management roles and responsibilities concerning information systems
- other stakeholders accessing the information system such as customers and service providers
- other work groups or teams whose work will be affected by the system
## RANGE STATEMENT

**Colleagues** may include:
- employees at the same level or more senior managers
- occupational health and safety committee members and other specialists
- people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- team members

**Business plans** may include:
- cash flow projections
- long-term budgets/plans
- operational plans
- short-term budgets/plans
- spreadsheet-based financial projections
- targets or key performance indicators for production, productivity, wastage, sales, income and expenditure

BSBINN301A Promote innovation in a team environment

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to be an effective and proactive member of an innovative team. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. The team may 'make itself' or be constructed by others. It may have core members and members who participate at certain times or for particular purposes. It may be permanent or temporary, or come together at different times to work on specific projects. The team could consist of a team of contractors/freelancers, permanent staff, clients and service providers, or any combination of these groups. It may operate within an organisation or across several organisations - or simply across a group of individuals. The key focus of the unit is on what makes for an innovative team, what keeps it working well, how the structure of work can make a difference and what skills and knowledge are needed to maximise opportunities for innovation. Where a greater focus on team leadership is required this unit should be combined with units such as BSBLED401A Develop teams and individuals. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Create opportunities to maximise innovation within the team | 1.1. Evaluate and reflect on *what the team needs and wants to achieve*  
1.2. Check out *information about current or potential team members' work* in the context of developing a more innovative team  
1.3. Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross-fertilising ideas  
1.4. Acknowledge, respect and discuss the *different ways that different people may contribute* to building or enhancing the team |
| 2. Organise and agree effective ways of working | 2.1. Jointly establish *ground rules* for how the team will operate  
2.2. Agree and communicate responsibilities in ways that encourage and reinforce *team-based innovation*  
2.3. Agree and share tasks and activities to ensure the best use of skills and abilities within the team  
2.4. Plan and schedule activities to allow time for thinking, challenging and collaboration  
2.5. Establish personal reward and stimulation as an integral part of the team's way of working |
| 3. Support and guide colleagues | 3.1. Model *behaviour that supports innovation*  
3.2. Seek *external stimuli and ideas* to feed into team activities  
3.3. Pro-actively share information, knowledge and experiences with other team members  
3.4. Challenge and test ideas within the team in a positive and collaborative way  
3.5. Pro-actively discuss and explore ideas with other team members on an ongoing basis |
| 4. Reflect on how the team is working | 4.1. De-brief and reflect on activities and on opportunities for improvement and innovation  
4.2. Gather and use feedback from within and outside the team to generate discussion and debate  
4.3. Discuss the *challenges of being innovative* in a constructive and open way  
4.4. Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues  
4.5. Identify, promote and celebrate successes and |
### Required Skills and Knowledge

<table>
<thead>
<tr>
<th>REQUIRED SKILLS AND KNOWLEDGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>This section describes the skills and knowledge required for this unit.</td>
</tr>
</tbody>
</table>

#### Required skills

- communication skills to work collaboratively as part of a team, to provide guidance and support to others, and to participate in open and constructive discussions
- creative thinking skills to generate, explore, test and challenge ideas
- learning skills to stretch boundaries of own knowledge and skills
- literacy skills to analyse a wide range of information from varied sources
- planning and organisational skills to participate in the effective allocation of work in a team context
- problem-solving skills to work constructively to overcome issues and challenges of both a practical and conceptual nature and to make ideas become realities
- self-management skills to take a pro-active team role and to reflect on own performance in modelling and encouraging behaviour that supports innovation.

#### Required knowledge

- barriers to innovation that can occur within a team and broader barriers that sometimes hinder innovation
- broad concepts of innovation including what innovation is, different types of innovation and the benefits of innovation
- characteristics of teams that are more likely to be innovative and characteristics of broader environments that support and encourage innovation
- different roles that people may play within a team, how this impacts on the way a team works and what it might achieve
- group dynamics in a team.
Evidence Guide

**Overview of assessment**

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• active participation in a team where the team takes a pro-active and considered approach to innovation and innovative practice</td>
</tr>
<tr>
<td></td>
<td>• collaborative and open communication within the team</td>
</tr>
<tr>
<td></td>
<td>• knowledge and understanding of the internal and external factors that contribute to a team becoming and remaining innovative.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th>Assessment must ensure:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• demonstration of skills as part of a team.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Method of assessment</th>
<th>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</td>
</tr>
<tr>
<td></td>
<td>• direct observation of team interactions</td>
</tr>
<tr>
<td></td>
<td>• evaluation of reports by the candidate or the team (could be oral or written) discussing the ideas, challenges and opportunities associated with teams, and how they can be more innovative</td>
</tr>
<tr>
<td></td>
<td>• evaluation of feedback from other people in the team about the candidate's communication approaches and abilities</td>
</tr>
<tr>
<td></td>
<td>• oral or written questioning to assess knowledge of the characteristics of innovative teams, innovation concepts more broadly and they ways in which innovation can be encouraged</td>
</tr>
<tr>
<td></td>
<td>• review of jointly established 'groundrules' for how the team will operate.</td>
</tr>
</tbody>
</table>

| Guidance information for assessment | Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended. |
### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| What the team needs and wants to achieve may relate to: | • addressing particular customer feedback  
• conceiving and implementing a particular project  
• developing new services or products  
• generating ongoing ideas within the work unit  
• improving budgetary performance  
• improving or changing work conditions  
• new ideas that impact beyond the workplace (e.g. that have a broader social or community impact) |
| --- | --- |
| Information about current or potential team members' work may relate to: | • interests  
• lifestyle preferences  
• past jobs  
• technical strengths  
• work preferences  
• working styles |
| Different ways that different people may contribute may relate to individual strengths around: | • creating positive energy within the team  
• fundamental literacy strengths (e.g. particularly strong in visual literacy, written or spoken communication)  
• generating ideas  
• networks or spheres of influence  
• particular ways of thinking  
• powers of persuasion  
• problem-solving capacities  
• specific technical skills or knowledge |
| Ground rules may relate to: | • boundaries or lack of boundaries for team activities and ideas  
• confidentiality  
• copyright, moral rights or intellectual property  
• regularity of communication  
• key roles and responsibilities  
• time lines |

BSBINN801A Lead innovative thinking and practice

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to generate, lead and sustain innovative organisational thinking and practice.
The unit also covers generating innovative thinking and creativity to lead sustainable innovative practices; supporting a culture of innovation; and maintaining a sustained approach to innovative thinking and practice. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to individuals who initiate and lead innovation in any industry or community context. Each organisation's thinking and practice will be different depending on its core business, purpose, size, complexity and broader operating context. Leaders encourage innovative thinking and practice in relation to drivers shaping the particular work environment. Managers may use innovative thinking and practice to advance learning and business processes that contribute to organisational strategies, business plans and goals. |

Licensing/Regulatory Information

| 1. Generate innovative thinking and creativity     | 1.1. Research and use a *range of techniques and tools* to generate new ideas and thinking  
1.2. Research and analyse trends shaping organisation’s current and future thinking and practice  
1.3. Introduce and promote creative thinking techniques to foster personal and team innovation  
1.4. Evaluate *overall context* for individual and collective innovative thinking and creativity  
1.5. Research and analyse specific *conditions for innovation* and issues that impact on individual and collective innovative thinking and creativity  
1.6. Research and review innovation *drivers and enablers*                                                                                                                                                       |
| 2. Lead innovative practices                       | 2.1. Develop personal *leadership style* to model positive innovative thinking and practice  
2.2. Review, challenge and refine own style and practice in relation to modelling and supporting innovation  
2.3. Assess and determine the requirements to promote sustainable innovative activity for the operational context and people involved  
2.4. Devise and implement most appropriate means to promote knowledge transfer  
2.5. Identify, evaluate and manage *risks* associated with innovation within an organisation                                                                                                                                 |
| 3. Generate and support a culture of innovation     | 3.1. Introduce and promote innovative practices, processes, products or services appropriate to audience and organisational requirements  
3.2. Establish ways to capture, communicate and share innovative ideas and practices  
3.3. Initiate and foster communication, consultation and team development approaches that support innovation  
3.4. Identify, assess and provide adequate resources for innovation to occur  
3.5. Develop and apply strategies to foster a workplace culture capable of encouraging innovation  
3.6. Establish *mechanisms at system and process* level that can support innovation                                                                                                                                 |
| 4. Sustain innovative thinking and practice         | 4.1. Develop strategies to make innovation an integral part of organisational activity                                                                                                                                 |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- communication, consultation and negotiation skills to model and lead open and collaborative relationships
- planning and organisational skills to develop, implement and sustain practical strategies for innovation
- problem-solving skills to assess challenges and risks at a strategic level and to develop appropriate responses
- research and analytical skills to work with structurally intricate and conceptually complex innovation texts and broader industry contexts; and to develop materials which deal with complex ideas and concepts
- self-management and learning skills to evaluate and enhance personal effectiveness, and to promote a culture of ongoing learning and development
- team and leadership skills to generate, promote and sustain innovation in an organisational or community setting
- technology skills to use computers for document production and research of innovative practices and theories

### Required knowledge

- current and past theories and thinking about innovation and creativity
- leadership styles including the way that different approaches impact on innovation in organisations, and specific approaches that foster innovation
- legislative framework that affects business operations in a given context, including particular legislation with a direct impact on innovation, for example concerning copyright, trademarks, intellectual property, occupational health and safety (OHS)
- management techniques and tools for the encouragement of creative thinking and for turning good ideas and creative thinking into innovation
- organisational and industry context for innovation including overarching mission, objectives and strategies
- relationship between theory and thinking on innovation and creativity, and applied practice
- risk assessment and management strategies in the context of innovation
- social, political, economic and technological developments that determine the broad context for innovation in the relevant workplace context
- theories, processes and practice of organisational transformation and the management of the stages of change
- typical strategic challenges and barriers to innovation within organisations and ways of overcoming these challenges and barriers
## Evidence Guide

### Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• comprehensive understanding and application of key concepts, current theories and processes for promoting innovative thinking and practices in an organisational context</td>
</tr>
<tr>
<td></td>
<td>• critical examination of trends in thinking and emerging practices as they relate to an organisation’s current thinking and practices</td>
</tr>
<tr>
<td></td>
<td>• knowledge of social, political, economic and technological developments that determine the broad context for innovation in the relevant workplace context.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th>Assessment must ensure:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• assessment over a sufficient timeframe to allow holistic assessment of the candidate’s capacity to lead and sustain innovative thinking and practice</td>
</tr>
<tr>
<td></td>
<td>• opportunities for interaction with others to reflect the collaborative nature of the innovation process</td>
</tr>
<tr>
<td></td>
<td>• access to current organisational documentation and support materials.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Method of assessment</th>
<th>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</td>
</tr>
<tr>
<td></td>
<td>• evaluation of reports prepared by the candidate to propose strategies and techniques for building innovative thinking and practice within a given organisational context</td>
</tr>
<tr>
<td></td>
<td>• oral or written questioning to assess knowledge of innovation theory and practice, context for innovation, and factors that affect innovation in a particular organisation.</td>

<tr>
<td></td>
<td>foresight tools</td>
</tr>
<tr>
<td></td>
<td>Kirton Adaptation Innovation Inventory</td>
</tr>
<tr>
<td></td>
<td>mindmapping (Buzan)</td>
</tr>
<tr>
<td></td>
<td>nominal group technique</td>
</tr>
<tr>
<td></td>
<td>scenario analysis.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Overall context may include the environment relating to:</th>
<th>culture</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>electronic and non-physical context</td>
</tr>
<tr>
<td></td>
<td>global</td>
</tr>
<tr>
<td></td>
<td>local or regional</td>
</tr>
<tr>
<td></td>
<td>national</td>
</tr>
<tr>
<td></td>
<td>work group or community.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Conditions for innovation may span causal factors and issues relating to:</th>
<th>ability to gain and respond to customer feedback</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>available resources (in all their forms)</td>
</tr>
<tr>
<td></td>
<td>business systems</td>
</tr>
<tr>
<td></td>
<td>changes to workflow and processes</td>
</tr>
<tr>
<td></td>
<td>competency, capability and skills of the workforce</td>
</tr>
<tr>

<td>culture and values</td>
</tr>
<tr>
<td></td>
<td>economic change</td>
</tr>
<tr>
<td></td>
<td>emerging technologies</td>
</tr>
<tr>
<td></td>
<td>executive support for innovation</td>
</tr>
<tr>
<td></td>
<td>external</td>
</tr>
<tr>
<td></td>
<td>globalisation</td>
</tr>
<tr>
<td></td>
<td>government regulations, policy or funding initiatives</td>
</tr>
<tr>
<td></td>
<td>internal</td>
</tr>
<tr>
<td></td>
<td>labour market and industry changes and restructures</td>
</tr>
</tbody>
</table>
**RANGE STATEMENT**

- learning culture
- management practices
- new business models
- new markets
- organisational sociocultural circumstances and issues (for example, within Indigenous organisations)
- research and development focus and support
- shift to knowledge economy or new economy
- structure and design of work in the organisation
- technology change and convergence
- vision, core purpose and capabilities.

**Drivers** are factors or changes that impel innovative practice and may include:

- customer expectations
- globalisation
- market shifts
- new legislation (such as compliance)
- policies (such as environmental protection)
- price and profitability
- technology change.

**Enablers** are factors that help innovation overcome barriers and may include:

- breakthroughs
- collaboration
- culture
- development
- intellectual property
- inventions
- management support
- profitability
- research
- resources
- responsiveness
- skilled workforce
- technology.

**Leadership style** will usually be differentiated by five classical approaches:

- autocratic (non-participative)
- charismatic flexibility
- democratic (participative)
- laissez faire (free reign)
- paternalistic.

**Risks** may include:

- damage to property/equipment
- environmental
RANGE STATEMENT

- market changes
- OHS (including disease)
- product failure
- professional incompetence
- resource deficiencies
- systems and process failures.

*Mechanisms at system and process level* may be physical or electronic and relate to:

- customer management
- human resources
- information technology
- learning
- market
- OHS
- operations
- planning (strategic and corporate)
- quality
- research and development
- risk
- resource management
- supply chain management
- structural and performance hierarchies (strata).

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Start computer, system information and features | 1.1. Adjust workspace, furniture and equipment to suit user **ergonomic requirements**
1.2. Ensure **work organisation** meets organisational and **occupational health and safety (OHS) requirements** for computer operation
1.3. Start computer or log on according to user procedures
1.4. Identify basic functions and features using system information
1.5. Customise desktop configuration, if necessary, with assistance from appropriate persons
1.6. Use help functions as required |
| 2. Navigate and manipulate desktop environment | 2.1. Open, close and access features by selecting correct **desktop icons**
2.2. Open, resize and close desktop windows by using correct window functions and roles
2.3. Create shortcuts from the desktop, if necessary, with assistance from appropriate persons |
| 3. Organise files using basic directory and folder structures | 3.1. Create folders/subfolders with suitable names
3.2. Save files with suitable names in appropriate folders
3.3. Rename and move folders/subfolders and files as required
3.4. Identify folder/subfolder and **file attributes**
3.5. Move folders/subfolders and files using cut and paste, and drag and drop techniques
3.6. Save folders/subfolders and files to **appropriate media** where necessary
3.7. Search for folders/subfolders and files using appropriate software tools
3.8. Restore deleted folder/subfolders and files as necessary |
| 4. Print information | 4.1. Print information from installed printer
4.2. View progress of print jobs and delete as required
4.3. Change default printer if installed and required |
| 5. Shut down computer | 5.1. Close all open applications
5.2. Shut-down computer according to user procedures |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to identify work requirements, to comprehend basic workplace documents, to interpret basic user manuals and to proofread simple documents
- communication skills to identify lines of communication, to request advice, to effectively question, to follow instructions and to receive feedback
- problem-solving skills to solve routine problems in the workplace, while under direct supervision
- technology skills to use equipment safely while under direction, basic keyboard and mouse skills and procedures relating to logging on and accessing a computer
- basic typing techniques and strategies.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - OHS
  - basic ergonomics of computer use
  - main types and parts of computers, and basic features of different operating systems
  - suitable file naming conventions.
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
</table>
|  | • navigation and manipulation of the desktop environment within the range of assigned workplace tasks  
• knowledge of organisational requirements for simple documents and filing conventions  
• application of simple keyboard functions to produce documents with a degree of speed and accuracy relevant to the level of responsibility required. |

### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of workplace documentation.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate  
- demonstration of techniques  
- oral or written questioning to assess knowledge of computer operations and functions  
- review of shortcuts created  
- review of folders/subfolders created.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBITU102A Develop keyboard skills  
- other general administration units.
### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Ergonomic requirements** may include: | • avoiding radiation from computer screens  
| | • chair height, seat and back adjustment  
| | • document holder  
| | • footrest  
| | • keyboard and mouse position  
| | • lighting  
| | • noise minimisation  
| | • posture  
| | • screen position  
| | • workstation height and layout  
| **Work organisation** may include: | • exercise breaks  
| | • mix of repetitive and other activities  
| | • rest periods  
| | • visual display unit (VDU) eye testing  
| **Occupational health and safety requirements** may include: | • OHS guidelines related to the use of the screen equipment, computing equipment and peripherals, ergonomic work stations, security procedures, customisation requirements  
| | • statutory requirements  
| **Desktop icons** include: | • directories/folders  
| | • files  
| | • network devices  
| | • recycle bin and waste basket  
| **File attributes** include: | • dates  
| | • size  
| **Appropriate media** may include: | • CDs  
| | • diskettes  
| | • local hard drive  
| | • other locations on a network  
| | • USB/Flash/Thumb drives  
| | • zip disks

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Determine development needs | 1.1. Systematically identify and implement *learning and development needs* in line with *organisational requirements*
1.2. Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and implemented
1.3. Encourage individuals to self-evaluate performance and identify areas for improvement
1.4. Collect *feedback on performance* of team members from relevant sources and compare with established team learning needs |
| 2. Develop individuals and teams | 2.1. Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry
2.2. Ensure that *learning delivery methods* are appropriate to the learning goals, the learning style of participants, and availability of *equipment and resources*
2.3. Provide workplace learning opportunities, and *coaching and mentoring assistance* to facilitate individual and team achievement of competencies
2.4. Create development opportunities that incorporates a range of activities and support materials appropriate to the achievement of identified competencies
2.5. Identify and approve resources and time lines required for learning activities in accordance with organisational requirements |
| 3. Monitor and evaluate workplace learning | 3.1. Use feedback from individuals or teams to identify and implement improvements in future learning arrangements
3.2. Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support
3.3. Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning
3.4. Document and maintain records and reports of competency according to organisational requirements |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of clients and colleagues
- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- negotiation skills to achieve mutually acceptable outcomes
- technology skills to support effective communication and presentation.

### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- facilitation techniques to encourage team development and improvement
- organisational policies, plans and procedures
- career paths and competency standards relevant to the industry.
**Evidence Guide**

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- identifying and implementing learning opportunities for others
- giving and receiving feedback from team members to encourage participation in and effectiveness of team
- creating learning plans to match skill needs
- knowledge of relevant legislation.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of learning and development plans, policies and procedures
- examples of documents relating to diversity policies and procedures.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- analysis of responses to case studies and scenarios
- oral or written questioning to assess knowledge of career paths and competency standards relevant to the industry
- review of records and reports of competency.

#### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- management units
- other learning and development units.
### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

---

**Learning and development needs** may include:
- career planning/development
- coaching, mentoring and/or supervision
- formal/informal learning programs
- internal/external training provision
- performance appraisals
- personal study
- recognition of current competence/skills recognition
- work experience/exchange/opportunities
- workplace skills assessment

**Organisational requirements** may include:
- access and equity principles and practices
- anti-discrimination and related policy
- business and performance plans
- confidentiality and security requirements
- defined resource parameters
- ethical standards
- goals, objectives, plans, systems and processes
- legal and organisational policies, guidelines and requirements
- OHS policies, procedures and programs
- quality and continuous improvement processes and standards
- quality assurance and/or procedures manuals

**Feedback on performance** may include:
- formal/informal performance appraisals
- obtaining feedback from clients
- obtaining feedback from supervisors and colleagues
- personal, reflective behaviour strategies
- routine organisational methods for monitoring service delivery

**Learning delivery methods** may include:
- conference and seminar attendance
- formal course participation
- induction
### RANGE STATEMENT

- involvement in professional networks
- on-the-job coaching or mentoring
- presentations/demonstrations
- problem-solving
- work experience

### Equipment and resources may include:

- facilities
- funding
- guest speakers
- technological tools and equipment
- time
- training equipment such as whiteboards and audio-visual equipment

### Coaching and mentoring assistance may include:

- fair and ethical practice
- non-discriminatory processes and activities
- presenting and promoting a positive image of the collective group
- problem-solving
- providing encouragement
- providing feedback to another team member
- respecting the contribution of all participants and giving credit for achievements

BSBMGT402A Implement operational plan

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, producing short term plans for the department/section, planning and acquiring resources and providing reports on performance as required. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Frontline managers are actively engaged in planning activities to achieve the measurable, stated objectives of the team and the organisation. This key role is carried out to provide safe, efficient and effective products and services to customer satisfaction within the organisation's productivity and profitability plans. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning, evaluation, leadership and guidance of others. |

Licensing/Regulatory Information
Not applicable.

Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Implement operational plan | 1.1. Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers  
1.2. Implement operational plans to contribute to the achievement of organisation's performance/business plan  
1.3. Identify and use key performance indicators (KPIs) to monitor operational performance  
1.4. Undertake contingency planning and consultation processes  
1.5. Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes |
| 2. Implement resource acquisition | 2.1. Recruit and induct employees within organisation's policies, practices and procedures  
2.2. Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel |
| 3. Monitor operational performance | 3.1. Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets  
3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance  
3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies  
3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely  
3.5. Present recommendations for variation to operational plans to the designated persons/groups and gain approval  
3.6. Implement systems, procedures and records associated with performance in accordance with organisation's requirements |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

### Required knowledge

- principles and techniques associated with:
  - contingency planning
  - methods for monitoring and reporting on performance
  - monitoring and implementing operations and procedures
  - problem identification and methods of resolution
  - relevant budgeting and financial analysis, interpretation and reporting requirements
  - resource management systems at the tactical implementation level
  - resource planning and acquisition
  - tactical risk analysis including identification and reporting requirements.
# Evidence Guide

## Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required</td>
</tr>
<tr>
<td></td>
<td>• knowledge of principles and techniques associated with monitoring and implementing operations and procedures.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

<table>
<thead>
<tr>
<th></th>
<th>Assessment must ensure:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• access to appropriate documentation and resources normally used in the workplace.</td>
</tr>
</tbody>
</table>

### Method of assessment

<table>
<thead>
<tr>
<th></th>
<th>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</td>
</tr>
<tr>
<td></td>
<td>• review of documentation outlining contingency planning and consultation processes undertaken</td>
</tr>
<tr>
<td></td>
<td>• demonstration of techniques in managing performance</td>
</tr>
<tr>
<td></td>
<td>• evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.</td>
</tr>
</tbody>
</table>

### Guidance information for assessment

<table>
<thead>
<tr>
<th></th>
<th>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• other units from the Certificate IV in Frontline Management.</td>
</tr>
</tbody>
</table>
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Resource requirements may refer to: | • goods and services to be purchased and ordered  
| | • human, physical and financial resources - both current and projected  
| | • stock requirements and requisitions |

| Relevant personnel, colleagues and specialist resource managers may include: | • colleagues and specialist resource managers  
| | • managers  
| | • occupational health and safety committees and other people with specialist responsibilities  
| | • other employees  
| | • people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities  
| | • supervisors |

| Operational plans may refer to: | • organisational plans  
| | • tactical plans developed by the department or section to detail product and service performance |

| Key performance indicators may refer to: | • measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements |

| Contingency planning may refer to: | • contracting out or outsourcing human resources and other functions or tasks  
| | • diversification of outcomes  
| | • finding cheaper or lower quality raw materials and consumables  
| | • increasing sales or production  
| | • recycling and re-use  
| | • rental, hire purchase or alternative means of procurement of required materials, equipment and stock  
| | • restructuring of organisation to reduce labour |
## RANGE STATEMENT

| **costs** | risk identification, assessment and management processes  
|           | seeking further funding  
|           | strategies for reducing costs, wastage, stock or consumables  
|           | succession planning  

**Consultation processes may refer to:**

| mechanisms used to provide feedback to the work team in relation to outcomes of consultation  
| meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans  

**Organisation's policies, practices and procedures may include:**

| organisational culture  
| Standard Operating Procedures  
| organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources  
| undocumented practices in line with organisational operations  

**Performance systems and processes may refer to:**

| informal systems used by frontline managers for the work team in the place of existing organisation-wide systems  
| formal processes within the organisation to measure performance, such as:  
| feedback arrangements  
| individual and teamwork plans  
| KPIs  
| specified work outcomes  

**Designated persons/groups may include:**

| other affected work groups or teams and groups designated in workplace policies and procedures  
| those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers  

**Systems, procedures and records**

| databases and other recording mechanisms for ensuring records are kept in accordance with

BSBMGT403A Implement continuous improvement

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to implement the organisation's continuous improvement systems and processes. Particular emphasis is on using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.  

| No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Frontline managers have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position, closely associated with the creation and delivery of products and services, means that they have an important role in influencing the ongoing development of the organisation.  

| At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, and leadership and guidance of others. |

Licensing/Regulatory Information
Not applicable.

<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Implement continuous improvement systems and processes | 1.1. Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision making processes, assume responsibility and exercise initiative  
1.2. Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback  
1.3. Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes |
| 2. Monitor and review performance | 2.1. Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved  
2.2. Improve customer service through continuous improvement techniques and processes  
2.3. Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation |
| 3. Provide opportunities for further improvement | 3.1. Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan  
3.2. Document work performance to aid the identification of further opportunities for improvement  
3.3. Manage records, reports and recommendations for improvement within the organisation's systems and processes |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - coach and mentor team members
  - gain the commitment of individuals and teams to continuously improve
  - innovation skills to design better ways of performing work.

Required knowledge

- principles and techniques associated with:
  - benchmarking
  - best practice
  - change management
  - continuous improvement systems and processes
  - quality systems.
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- Evidence of the following is essential:
  - taking active steps to implement, monitor and adjust plans, processes and procedures to improve performance
  - supporting others to implement the continuous improvement system/processes, and to identify and report opportunities for further improvement
  - knowledge of principles and techniques associated with continuous improvement systems and processes.

### Context of and specific resources for assessment

- Assessment must ensure:
  - access to appropriate documentation and resources normally used in the workplace.

### Method of assessment

- A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
  - assessment of written reports
  - direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
  - observation of presentations
  - oral or written questioning to assess knowledge of principles and techniques associated with change management
  - review of how the organisation's continuous improvement processes was communicated to individuals and teams
  - review of documentation of work performance.

### Guidance information for assessment

- Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:
  - other units from the Certificate IV in Frontline Management.
## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Systems may refer to: | • forums, meetings  
| | • newsletters and reports  
| | • organisational policies and procedures  
| | • web-based communication devices  

| Participation in decision making processes may include: | • feedback in relation to outcomes of the consultative process  
| | • processes which ensures all employees have the opportunity to contribute to organisational issues  

| Continuous improvement processes may include: | • cyclical audits and reviews of workplace, team and individual performance  
| | • evaluations and monitoring of effectiveness  
| | • implementation of quality systems, such as International Standardization for Organization (ISO)  
| | • modifications and improvements to systems, processes, services and products  
| | • policies and procedures which allow the organisation to systematically review and improve the quality of its products, services and procedures  
| | • seeking and considering feedback from a range of stakeholders  

| Mentoring and coaching may refer to: | • providing assistance with problem-solving  
| | • providing feedback, support and encouragement  
| | • teaching another member of the team, usually focusing on a specific work task or skill  

| Technology may include: | • computerised systems and software such as databases, project management and word processing  
| | • telecommunications devices  
| | • any other technology used to carry out work roles and responsibilities

Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Expectations of the organisation** include:
- environmental management
- occupational health and safety
- product safety
- service
- values and ethics
- other relevant factors

**Incidents** may include:
- emergency response
- environmental event (emissions, noise, etc.)
- product failure
- workplace accident

**Risk management** means:
- process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood of the negative event occurring and/or the consequences in the event it does occur

**Accountabilities and responsibilities** means:
- clarification of who is to be accountable for a decision or action prior to its execution, and identification of groups, individuals and activities for which a person is responsible for managing

**Positive work environment** means:
- environment where employees identify with the organisation and its purpose and where communication is free-flowing, decisions are transparent and conflict is positive and constructive

BSBMGT617A Develop and implement a business plan

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

Business plans are critical tools for business growth and development. They will vary depending on the needs of the organisation. This unit covers the typical elements of a business plan and the standard approaches to be used in implementing a business plan.

The business plan should be supported by a strategic plan, and may also be supported by a marketing plan and cash flow forecasts. |

Licensing/Regulatory Information
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Develop business plan      | 1.1. Review and evaluate pre-existing *strategic, business and operational plan*, if available  
|                                | 1.2. Analyse and interpret business vision, mission, values and objectives             
|                                | 1.3. Consult with *key stakeholders*                                                  
|                                | 1.4. Review market requirements for the product or service, profile customer needs and research pricing options 
|                                | 1.5. Develop *performance objectives and measures* through consultation with key stakeholders 
|                                | 1.6. Identify financial, human and physical resource requirements for the business     
|                                | 1.7. Consider any permits or licences that may be required for new activity             
|                                | 1.8. Write *business plan*                                                             |
| 2. Monitor performance        | 2.1. Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 
|                                | 2.2. Ensure skilled labour is available to implement plan                               
|                                | 2.3. Test performance measurement systems and refine, if necessary                     
|                                | 2.4. Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 
|                                | 2.5. Report system failures, product failures and variances to the business plan as they occur |
| 3. Respond to performance data| 3.1. Analyse performance reports against planned objectives                             
|                                | 3.2. Review performance indicators and refine if necessary                             
|                                | 3.3. Ensure groups and individuals contributing to under-performance are *coached*, and provide training where appropriate   
|                                | 3.4. Review system processes and work methods regularly as part of continuous improvement |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical and research skills to review the market, to research competitors and to review pricing structures
- coaching and communication skills to remediate any under-performance in the work group or individuals
- planning and organising skills to sequence activities and to develop a logical structure.

#### Required knowledge

- performance measurement approaches and benchmarking
- options for developing business plans.
**Evidence Guide**

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

<table>
<thead>

</tr>
</tbody>
</table>

**Context of and specific resources for assessment**

|  | Assessment must ensure: |
|  | • access to appropriate documentation and resources normally used in the workplace. |

**Method of assessment**

|  | A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: |
|  | • assessment of written reports/examples of business plans and their outcomes |
|  | • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate |
|  | • oral or written questioning to assess knowledge of options for developing business plans |
|  | • review of development of performance objectives and measures |
|  | • review of how business plan was communicated to all relevant parties. |

**Guidance information for assessment**

|  | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: |
|  | • other units from the Advanced Diploma of Management. |
**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Strategic, business and operational plan may include:** | • previously formulated:  
| | • action plan  
| | • business goals  
| | • competitor analysis  
| | • financing arrangements or financial targets  
| | • management arrangements and/or personnel requirements  
| | • marketing approaches  
| | • product or service research or analysis |
| **Key stakeholders may include:** | • business partners or financiers  
| | • customers  
| | • shareholders  
| | • staff  
| | • technical experts or advisers |
| **Performance objectives and measures may relate to:** | • efficiency measures  
| | • input measures such as staff time or dollars allocated  
| | • outcomes measures  
| | • qualitative indicators such as feedback from customers, effect on the wider market or competitors, staff reports  
| | • quantitative indicators, such as numbers produced and sold, turnover, customer satisfaction ranking, lower staff turnover |
| **Business plan includes:** | • description of the business  
| | • business products and services  
| | • marketing activity  
| | • financial indicators  
| | • productivity and performance targets for key result areas such as:  
| | • community awareness or branding  
| | • environmental impact |

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to plan, implement and manage basic marketing and promotional activities. It is a foundation unit that covers general and basic marketing and promotional activities that do not require detailed or complex planning or implementation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | The unit applies to people with no previous experience in marketing. It could be undertaken as part of a broader role of a person in a small enterprise, or as part of a marketing plan for a larger enterprise. |

Licensing/Regulatory Information
Not applicable.

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Research marketing information | 1.1. Research the concept of marketing as it applies to the organisation  
1.2. Identify and analyse organisation's marketing plan and relevant policies and procedures  
1.3. Identify need for *marketing activities* from the established marketing plan  
1.4. Investigate previous marketing activities for relevant information  
1.5. Identify profile of the market segment  
1.6. Identify positioning and market mix for each target segment  
1.7. Identify *outcomes* expected from marketing activities |
| 2. Plan marketing activities | 2.1. Undertake *analysis* of collected basic marketing information  
2.2. Develop and document *work activity plans* for marketing activities  
2.3. Obtain approval of plans from *relevant enterprise personnel* |
| 3. Implement marketing activities | 3.1. Determine and access *resources* required for work activities  
3.2. Undertake marketing activities within job role  
3.3. Assist with assigning responsibilities and functions to *relevant personnel* performing specific marketing functions  
3.4. Monitor marketing activities, and review and amend activity plan as required |
| 4. Review marketing activities | 4.1. Measure and record outcomes of marketing activities  
4.2. Review marketing activities against expected outcomes and record identified improvements  
4.3. Prepare reports of marketing activities and communicate to relevant enterprise personnel |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **learning skills to:**
  - select and use appropriate research methods
  - review and learn from marketing activities to contribute to the organisation's marketing operations

- **literacy skills to:**
  - prepare general information and papers for a target audience
  - read a variety of texts
  - write formal and informal letters

- **planning and organising skills to develop implementation schedules**

- **problem-solving skills to address issues that may affect plans and their implementation**

- **research skills to:**
  - research the concept of marketing
  - identify profile of marketing segment

### Required knowledge

- **basic foundations of marketing practices:**
  - concept of marketing
  - marketing planning process
  - marketing mix
  - segmentation
  - targeting and positioning

- **key provisions of relevant legislation and industry-specific regulations that may affect aspects of marketing, such as:**
  - anti-discrimination legislation
  - codes of practice
  - competition legislation
  - consumer legislation
  - environmental issues
  - ethical principles
  - OHS legislation
  - privacy legislation
  - trade practices legislation
  - organisational policies and procedures relating to marketing
## REQUIRED SKILLS AND KNOWLEDGE

- specific product knowledge related to products and services being marketed

### Evidence Guide

#### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Evaluate each component of the marketing mix | 1.1. Identify key *characteristics of products or services* and estimate their significance to the market  
1.2. Review pricing policy and analyse *pricing variables* to determine their effect on demand  
1.3. Analyse *promotional methods* to determine their importance to *marketing outcomes*  
1.4. Review *channels of distribution* and estimate their significance in relation to marketing outcomes  
1.5. Identify and analyse *level of customer service* provision to determine its significance to marketing outcomes  
1.6. Identify potential customer base and key pressure points for success  
1.7. Analyse and test the effect of the components of *marketing mix* on each other, and establish their relative importance to customer base |
| 2. Determine marketing mix for specific markets | 2.1. Identify and assess environmental factors for their impact on marketing mix  
2.2. Identify *consumer priorities, needs and preferences* that affect marketing mix  
2.3. Consider product, pricing, promotional, distribution and service variations, and evaluate these against marketing objectives, target market characteristics and desired positioning  
2.4. Select marketing mix that best satisfies target market and meets marketing objectives  
2.5. Ensure marketing mix decision meets organisational, strategic and operational marketing objectives |
| 3. Monitor and adjust marketing mix | 3.1. Monitor marketing mix against marketing performance and isolate components for testing  
3.2. Evaluate implications of altering one or more components of marketing mix in relation to market factors and consumer response  
3.3. Adjust components of marketing mix in response to test results and evaluation of market response  
3.4. Ensure adjusted marketing mix meets budgetary requirements  
3.5. Ensure adjusted marketing mix continues to meet organisational, strategic and operational marketing objectives, and desired positioning |
## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to identify market information, to write in a range of styles for different audiences and to interpret requirements
- numeracy skills to interpret testing results and to manage marketing budgets
- organisational and time management skills to design and adjust a marketing mix.

### Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects business operations, codes of practice and national standards such as:
  - anti-discrimination legislation and principles of equal opportunity, equity and diversity
  - ethical principles
  - marketing codes of practice and conduct such as the Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice; Free TV Australia Commercial Television Industry Code of Practice
  - privacy laws
  - Trade Practices Act
  - organisational policies, procedures, products and services
  - principles and concepts of marketing such as consumer or buyer behaviour and elements of marketing mix
  - statistical techniques.
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- developing a report containing a description of activities undertaken to establish a marketing mix in an organisation, including information on each element of the marketing mix, such as:
  - levels of customer service to be provided
  - how a product or service will be distributed
  - how a product or service will be priced
  - whether additional products or services will be offered
  - how the product or service will be promoted
- reporting on at least one review of the success of marketing mix activities developed including coverage of any necessary adjustments made.

### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual or simulated workplace
- access to office equipment and resources
- access to organisational and marketing strategic plans.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- assessment of written reports on the marketing mix
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of presentations on the marketing mix or changes made to the marketing mix
- oral or written questioning to assess knowledge and understanding
- review of authenticated documents from the workplace or training environment.
**EVIDENCE GUIDE**

BSBRES801A Initiate and lead applied research

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.
|                | The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.
|                | No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance.
|                         | The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes. It involves leading a range research activities and techniques that, in combination, can provide quality information to enhance learning related activities and the development of capabilities. |

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Construct an applied research strategy** | 1.1. Clarify and confirm *applied research purpose* and needs of the *target group*  
1.2. Determine policies and procedures in relation to conducting applied research  
1.3. Establish mechanisms for collecting and maintaining data in a systematic manner  
1.4. Analyse *factors affecting the reliability and validity of data*  
1.5. Review relevant research ethics and codes of conduct  
1.6. Prepare *applied research strategy* and *hypothesis*  
1.7. Frame a research strategy in consideration of available *tools and resources* |
| 2. **Use a range of applied research techniques** | 2.1. Review and evaluate a range of *applied research methods, theories, and data collection techniques*  
2.2. Select appropriate methods to gather and analyse data  
2.3. Use, as appropriate, *suitable technology* and technology services to support data collection and analysis  
2.4. Access *appropriate sources of information and contributors* relevant to the research  
2.5. Optimise *relevance of the research* through integrity of the data collected and analysis tools used |
| 3. **Analyse and present findings** | 3.1. Evaluate how research findings such as trends and changes will impact on learning strategy  
3.2. Review data and research findings for accuracy of details and adherence to any *legal requirements*  
3.3. Collate and analyse data for relevance against the original applied research strategy  
3.4. Document and *present research findings* in a clear and logical manner consistent with audience needs  
3.5. Identify the need for and an appropriate approach to, further research |
# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **Communication and teamwork skills** to:
  - analyse and interpret structurally intricate information in the area being researched
  - consult with target groups using a range of communication techniques
  - develop written texts which deal with complex ideas and concepts
  - present research results creatively to meet audience needs
- **Initiative and enterprise skills** to discover and source appropriate information, and to identify future implication of information and data collected
- **Planning and organising skills** to:
  - construct an applied research strategy
  - initiate and design research methodology
  - manage an applied research project
  - frame research strategy in consideration of available resources
- **Problem-solving skills** to:
  - develop and examine the validity of the hypothesis using a range of applied research techniques
  - collect, organise, analyse and present data
  - analyse research
  - check the integrity of data collected
  - conduct trend analyses
- **Self-management and learning skills** to:
  - manage own time and determine priorities
  - review and adhere to relevant ethics and codes of conduct
  - store data to maintain privacy and confidentiality of information
  - conduct research to develop capabilities and learning related activities
- **Technical skills** to:
  - select suitable technology and technical services
  - use a range of software programs
  - use technology and the internet to discover, access, collect and store data, information and research in a systematic manner.

### Required knowledge

- communication processes and methods
- data collection methods
- legislation, regulations, policies, procedures and guidelines relating to handling or
REQUIRED SKILLS AND KNOWLEDGE

- storing data, including privacy and freedom of information
- presentation techniques
- reporting methods
- research ethics and codes of conduct
- research tools and methods
- selection of appropriate applied research techniques.
### Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>

</table>

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- formulating a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design
  - designing an applied research project using appropriate tools and techniques
  - research report with analysis of data, and valid and reliable findings
  - utility and relevance of the research results
  - knowledge of applied research techniques.

### Context of and specific resources for assessment

Assessment must ensure:

- research activity relates to an actual workplace or simulated context and topic
- competence is consistently demonstrated over time, over a range of applied topics, and using a range of tools and techniques appropriate to the given situations and research topic.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- applied projects or assessment activities relating to conducting applied research
- observation of contextual application of skills
- oral or written questioning to assess knowledge of

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Applied research purpose** may be contained in documents such as: | • agreements  
• research brief  
• research contracts  
• research guidelines  
• research statement |
|---|---|
| **Target group** may include: | • age cohort  
• career choices  
• cultural background and needs  
• diversity  
• employees  
• employment status or role  
• end users  
• learners/students  
• learning styles and preferences  
• level of education achieved  
• literacy and numeracy skills  
• location  
• occupational health and safety  
• predetermined service user group  
• skill or competency profile  
• socioeconomic background |
| **Applied research strategy** may cover: | • analysis of industry specific trends, statistics and issues  
• collection of data to assist informed decision making, planning or risk management  
• data and information relating to strategy, policy, practices, or work processes developed and implemented by an organisation  
• formation of solutions to complex problems  
• information and analysis needed to develop a campaign, strategic plan, industry or sector plan and strategy, or to bargain effectively with employers |

### RANGE STATEMENT

- ethnographic research
- content, textual analysis, theories and techniques, which will vary upon consideration of:
  - application of statistical methods
  - causal factors and dependant or independent variables
  - critical analysis
  - experimental, quasi-experimental, non-experimental
  - mathematical calculations
  - problem solving
  - qualitative or quantitative research
  - sampling and sample size

**Data collection techniques** may include:

- collaboration with other experts or mentors
- desk research
- document research
- field study
- observation
- physical items analysis
- interviews
- questionnaires
- surveys

**Suitable technology** may include:

- communication technology and networks
- databases and the use of spreadsheets, graphs, trend and time series, and mathematical equations
- hardware and software

**Appropriate sources of information** may include:

- archives
- community organisations
- computer data, including internet
- discussions with current industry practitioners
- discussions with industry personnel, manufacturers, and technical and sales personnel
- government departments
- industry associations and organisations
- industry journals
- libraries (such as text, film, video, sound, graphic)
### RANGE STATEMENT

- media (such as film, television, radio, newspapers, multimedia)
- media archives
- museums, galleries
- organisational policies, procedures and journals
- personal observations and experience
- professional organisations
- reference books
- technical publications, manuals

**Contributors** may include:

- individuals and groups both inside and outside the organisation who have some direct interest or expertise in relation to the applied research or who provide data

**Relevance of the research** may be based on:

- available time and resources
- feasibility of implementing the recommendations
- findings of previous and current research
- original research parameters and brief
- quality and credibility of the methodology
- value of its usefulness
- value of the information and data

**Legal requirements** may include:

- agreements with third parties that supply research or data
- competency standards
- contracts
- copyright and privacy laws relating to physical materials and electronic technology
- licensing
- plagiarism
- privacy
- relevant commonwealth and state/territory legislation, policy, codes of practice and national standards
- security of information

**Presenting research findings** may include:

- circulating publications for comment and critique on the internet
- contributing to strategic policy
- drafting publications or reports
- presentations at seminars and conferences
- providing data, plans, specifications and reports resulting in changed work practice/s or

BSBRKG404A Monitor and maintain records in an online environment

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the identification and assessment of records for storage and the maintenance and monitoring of electronic business records. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to individuals who are required to demonstrate understanding of a broad knowledge base incorporating some theoretical recordkeeping concepts. The application is in relation to working with electronic records in an existing business or records system that has guidelines and processes to assist in making judgements on the status and classification of records. These judgements should be performed under supervision or in consultation with more senior staff or users of the system. |

Licensing/Regulatory Information
Not applicable.

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Confirm requirements for recordkeeping in an online environment | 1.1. Identify and confirm system procedures for capturing and managing records
1.2. Identify and verify organisational and risk management requirements for classifying and storing online information
1.3. Identify legal, business, financial, socio-historical, and security requirements for recording online business transactions
1.4. Prepare an organisational checklist in accordance with organisational requirements for use in assessing which electronic information should be captured, for how long and in what format |
| 2. Identify and assess records for storage | 2.1. Categorise incoming and outgoing information in terms of key activities and responsible personnel
2.2. Assess information against the organisational checklist and records identified for capture
2.3. Dispose information not to be stored in accordance with organisational procedures
2.4. Determine storage methods and media in accordance with retention requirements |
| 3. Monitor and maintain business records in an online environment | 3.1. Classify, sentence and link records with other records in the system in accordance with system rules and organisational procedures
3.2. Assign unique identifiers and register records into the recordkeeping system in accordance with system rules and organisational procedures
3.3. Determine access and security status and disposal requirements of records and records in accordance with organisational procedures
3.4. Store records on required media in accordance with organisational and record retention requirements
3.5. Carry out migration of records from one medium to another in accordance with organisational procedures
3.6. Action and record archiving or disposal of records in accordance with disposal schedule and organisational procedures
3.7. Maintain records in a usable and accessible form in accordance with security conditions and legislative requirements |
**Required Skills and Knowledge**

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to identify organisational requirements for recordkeeping in an online environment
- technology skills to address online access and security issues
- literacy skills to read and interpret record content, functions and problems
- problem-solving and analysis skills to identify requirements of business or records system
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities

#### Required knowledge

- overview knowledge of key provisions of relevant legislation, regulations, standards and documentation that may affect relevant aspects of business operations, such as:
  - AS ISO 15489:2004 Records Management
  - AS 5044 AGLS Metadata element set
  - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
  - AS 5090:2003 Work process analysis for recordkeeping
  - ASX Principles of Good Corporate Governance
  - ethical principles
  - codes of practice
  - privacy and freedom of information
  - archives and records legislation
  - occupational health and safety
- general principles and processes of records management and records management systems, including, but not limited to:
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
- online recordkeeping environment including location and nature of transactions
Evidence Guide

<table>

</tr>
</tbody>
</table>
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Systems** relating to online records may include:
- archival control systems
- business systems
- cash register-based systems
- characteristics relating to:
  - aggregations
  - context
  - entities
  - metadata
- current business or records systems
- ERDMS (Electronic Records and Document Management System)
- informal
- paper-based accumulation and card systems
- PC-based accounting systems, employee and tax records systems
- proprietary recordkeeping package
- storage facilities systems

**Records** may include:
- digital, such as:
  - remote drives
  - servers
  - CDs
  - DVDs
  - imaging systems
  - PC-based applications
  - mainframe
  - server
- physical, such as:
  - audio-visual or multimedia
  - graphic
  - microform
  - paper-based (acid free or multiple copies
  - a variety of sources, such as:
## RANGE STATEMENT

BSBWOR402A Promote team effectiveness

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to promote teamwork. It involves developing team plans to meet expected outcomes, leading the work team, and proactively working with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s. |

Licensing/Regulatory Information

Not applicable.

</thead>
</table>
| 1. Plan to achieve team outcomes | 1.1. Identify, establish and document **team purpose**, **roles, responsibilities, goals, plans and objectives** in **consultation** with team members  
1.2. Support team members in meeting expected outcomes |
| 2. Develop team cohesion | 2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team  
2.2. Encourage and support team members to take **responsibility for own work** and to assist each other in undertaking required roles and responsibilities  
2.3. Provide **feedback** to team members to encourage, value and reward individual and team efforts and contributions  
2.4. Recognise and address issues, concerns and problems identified by team members or refer to **relevant persons** as required |
| 3. Participate in and facilitate work team | 3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes  
3.2. Give the team support to identify and resolve problems which impede its performance  
3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers |
| 4. Liaise with management | 4.1. Maintain open **communication** with **line manager/management** at all times  
4.2. Communicate information from line manager/management to the team  
4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken  
4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - boost team morale
  - deal with team conflict
  - deliver messages from management
  - facilitate discussion
  - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

- organisational goals, objectives and plans
- organisational policy and procedures framework
- organisational structure, including organisational chart
- principles and techniques associated with:
  - delegation and work allocation
  - goal setting
  - group dynamics and processes
  - individual behaviour and difference
  - leadership
  - motivation
  - negotiation
  - planning.
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• teamwork plan with details of how it was generated and how it will be monitored so that team goals can be met</td>
</tr>
<tr>
<td></td>
<td>• techniques in communicating information, dealing with team conflict and resolving issues</td>
</tr>
<tr>
<td></td>
<td>• knowledge of organisational goals, objectives and plans.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of demonstrated techniques in working with team dynamics
- observation of performance in role plays
- oral or written questioning to assess knowledge of principles and techniques associated with group dynamics and processes
- evaluation of opportunities provided for input of team members into planning, decision making and operational aspects of work team
- review of feedback provided to team members
- review of teamwork plan.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other units from the Certificate IV in Frontline

CPPCLO2035A Maintain cleaning storage areas

Modification History
Revised unit
Unit updated and equivalent to PRMCL35B Maintain a cleaning storage area

Unit Descriptor
This unit of competency specifies the outcomes required to maintain cleaning equipment and consumable storage areas, which may be a vehicle or premises. The movement and control of equipment, chemicals and consumables used in the provision of cleaning services are also addressed.
The unit requires the ability to maintain and operate a safe and efficient cleaning storage area according to legislative requirements. Maintaining the storage area requires the ability to follow established procedures, understand issues associated with storing and using chemicals, and adhere to legislative and public health and safety requirements.

Application of the Unit
This unit of competency supports employees without managerial or supervisory responsibilities. The unit applies to persons whose major function is cleaning, not storekeeping.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Maintain storage area

1.1 Storage area is secured from unauthorised access according to legislative, occupational health and safety (OHS) and company requirements.

1.2 Hazards are identified and risks are controlled in storage area according to legislative, OHS and company requirements.

1.3 Safety warnings are prominently displayed and safety information is made accessible according to legislative, OHS and company requirements.

1.4 Equipment is stored, maintained and checked to enable ready access and re-use according to manufacturer specifications and legislative, OHS and company requirements.

1.5 Chemicals and consumables are stored according to manufacturer specifications and legislative, OHS and company requirements.

1.6 Personal protective equipment (PPE) is cleaned, safety-checked and stored, and maintenance requirements are recorded according to manufacturer specifications, and OHS and company requirements.

1.7 Work site communication devices and documents are reviewed and responded to according to company requirements.

1.8 Collected waste is disposed of according to work order, manufacturer specifications and legislative, OHS, company and environmental requirements.

1.9 Storage area is made accessible and free of obstacles according to practical restrictions of site or vehicle, and
according to OHS and company requirements.

2 Control and maintain stocks of equipment and chemicals

2.1 Inventory system of equipment, PPE, chemicals and consumables with maximum and minimum holding levels is operated and maintained according to legislative and company requirements.

2.2 Usage patterns are monitored and chemicals and consumables are re-ordered to maintain required levels according to company requirements.

2.3 Labelling system of containers is maintained according to manufacturer specifications and legislative, OHS and company requirements.

2.4 Chemicals and consumables are issued on a first-in first-out basis according to company requirements.

2.5 Chemicals are prepared according to manufacturer specifications and legislative, OHS and company requirements.

2.6 Obsolete equipment, chemicals and waste are collected and disposed of according to manufacturer specifications and environmental, legislative, OHS and company requirements.

3 Respond to emergency situations

3.1 Spillages and emergency situations are responded to with emergency response procedures according to environmental, legislative, OHS and company requirements.

3.2 Regulatory and company documentation is prepared according to environmental, legislative, OHS and company requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

<table>
<thead>
<tr>
<th>Required skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>interpersonal skills to relate to people from a range of backgrounds</td>
</tr>
<tr>
<td>• language, literacy and numeracy skills to:</td>
</tr>

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:  
  • comply with company, legislative and regulatory requirements  
  • maintain a secure and accessible storage area  
  • use emergency response procedures  
  • use good storage and housekeeping practices, particularly those relating to labelling and security of chemicals  
  • use systematic stock control records. |
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include access to:  
  • suitable venue, including stores and store records  
  • suitable equipment and chemicals  
  • PPE  
  • equipment operating manuals and MSDS  
  • work order instructions, work plans and schedules  
  • assessment instruments, including personal planner and assessment record book. |
| Method of assessment | Assessment methods must:  
  • satisfy the endorsed Assessment Guidelines of the Property Services Training Package  
  • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application  
  • reinforce the integration of employability skills with workplace tasks and job roles  
  • confirm that competency is verified and able to be transferred to other circumstances and environments. |

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Storage area** may be a vehicle, room, storage cupboard or other secure area separate from normal client functions and may include: | • chemical cupboards  
| • clothes racks  
| • desks  
| • equipment storage bays  
| • in-built vehicular storage arrangement to keep consumables and equipment secure during transport  
| • slop sinks. |
| **Legislative requirements** may include: | • Australian standards, quality assurance and certification requirements  
| • award and enterprise agreements  
| • industry advisory standards and codes, such as:  
  | • building codes  
  | • dangerous goods codes  
| • relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:  
  | • anti-discrimination and diversity policies  
  | • chemical controls  
  | • chemical registers and manifests  
  | • consumer protection  
  | • energy conservation  
  | • environmental protection  
  | • equal employment opportunity  
  | • freedom of information  
  | • industrial equipment certificates of competency or licences  
  | • industrial relations  
  | • OHS Acts and regulations  
  | • privacy  
  | • public health  
  | • trade practices  
  | • water conservation  
  | • workplace consultative arrangements. |
| **Occupational health and safety (also known as workplace health and** | • allergic reactions, such as contact dermatitis  
| • communication devices for remote and isolated locations, such as: |
### Safety Requirements

- mobile phone
- two-way radio
- dermatotoxicological control and prevention measures
- emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
- hazard identification and risk assessment mechanisms
- health surveillance and monitoring, such as regular blood testing
- hierarchy of hazard control procedures
- maintaining clear access
- national and industry standards and codes of practice
- OHS control procedures, such as:
  - health and safety plans
  - job plans
  - job safety analyses
  - risk assessments
  - safe operating practices and procedures
  - safe system of work statements
  - safe work instructions
  - work method statements
- reporting injury and dangerous occurrences
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for equipment, PPE and chemical storage, including interpretation of:
  - MSDS
  - hazardous substance information, such as long latency periods
- safety training, induction and refresher training
- selection and use of PPE and clothing appropriate to the hazard
- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals according to MSDS
- use of residual current devices
- use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

### Company Requirements

- business and performance plans
- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badges, cards or passes
- company policies and procedures, including:
  - access and equity policy, principles and practice
  - OHS policies and procedures, including control procedures
  - maintenance procedures for equipment and PPE
  - those relating to own role, responsibility and delegation
  - work site access security clearance procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, and code of ethics
- emergency response and evacuation procedures
- employer and employee rights and responsibilities
- environmental protection procedures
- personnel practices and guidelines
- quality and continuous improvement processes and standards
- records and information systems and processes
- training materials (induction, refresher and new skills)
- using contractors.

**Hazards** may include:

- allergic reactions to chemicals or equipment, including latex allergies
- biological and animal waste
- bites and stings
- blood and blood-stained products
- confined or restricted spaces
- contaminated clothing, materials or equipment
- damaged or inappropriate equipment
- dust and fibres
- electrical hazards arising from:
  - cables
  - electrical fittings:
    - switches
    - lights
  - untested electrical equipment
- fatigue
- fire
- gas
- heights
- inadequate lighting and ventilation
- infectious and zoonotic diseases, such as:
  - Q fever
  - scabies
- mobile equipment and vehicle hazards around plant and vehicles
- moving or unguarded parts
- noise
- occupational violence and bullying
- poor personal hygiene practices
- spill, splash and spray
- release of substances with negative environmental impact
- synergistic chemical reactions, such as:
  - hazardous incompatibility
  - reactivity
- syringes or other sharps
- temperature extremes
- ultraviolet light
- unsafe manual-handling techniques, including awkward and repetitive postures
- unsafe underfoot conditions, such as slippery, uneven and rough surfaces
- work in unfamiliar isolated or remote environments.

|                                   | operation manuals.  |

| Equipment may include:            | access equipment, such as ladders |
|                                   | bins                              |
|                                   | brooms                            |
|                                   | buckets                           |
|                                   | buffers                           |
|                                   | cleaning trolleys                 |
|                                   | cloths                            |
|                                   | cobwebbers                        |
|                                   | doodle bag holders                |
- drop sheets
- drying equipment
- dust pans and brushes
- dusters
- extension poles
- extraction units, wands and hand tools
- hoses
- microfibre products
- mops
- polishers
- pressure-washing equipment and attachments
- scouring pads
- scrapers
- scrubbers
- sponges
- spray bottles
- squeegees
- steam cleaners
- sweepers
- vacuum cleaners and attachments
- window cleaning equipment
- work site communication devices.

**Manufacturer specifications** may include:

- equipment operating manuals
- instructional guides
- MSDS
- other resources supplied by the manufacturer, such as:
  - laminated cards
  - notices
  - wall posters
  - product labels
  - safety instructions pre-printed on equipment.

**Chemicals** may include:

- acid cleaners
- alkaline cleaners
- low environmental-impact chemicals
- neutral cleaners
- solvent cleaners.

**Consumables** may include:

- air fresheners
- hand towels
- liner bags
- soap
- toilet paper.
### Personal protective equipment

- ear muffs and plugs
- gloves, such as non-permeable
- goggles
- high-visibility vests and clothing
- overalls and other protective clothing
- respirators
- safety glasses
- safety harnesses
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

### Work site communication devices

- communication books
- noticeboards
- telephones and two-way radios
- whiteboards.

### Waste

- chemicals past expiry date
- obsolete equipment
- machine or vehicle exhaust emissions
- packaging
- used containers
- used or contaminated PPE
- used or unused chemicals.

### Work order information

- access to work site, including:
  - access and egress points
  - timing of access
  - budget allocations
  - completion times and dates
  - human resource requirements to complete the work tasks
  - job requirements and tasks
  - legislative and local government requirements
  - OHS requirements and emergency response procedures
  - requirements for working in isolated and remote locations
  - resource requirements, such as equipment and materials
  - specific client requirements, such as:
    - dress and presentation requirements
    - relationships with other activities
  - use of signage and barriers
  - work schedules
- work site contact persons
- work site requirements for specific industries, such as:
  - hospitals and medical centres
  - nursing homes
  - retail food courts
  - schools
  - tourism and hospitality.

### Environmental requirements may include:
- clean-up, containment and isolation
- company policies and guidelines
- emergency chemical spill control measures
- environmental protection agency and requirements of government departments, such as:
  - agriculture
  - emergency services
- hazardous materials handling
- local government regulations and by-laws
- low-energy cleaning methods
- low environmental-impact chemicals
- low-moisture cleaning methods
- low water-use equipment and water-efficient cleaning methods
- non-chemical cleaning methods.

### Emergency response procedures include:
- applying first aid
- clean-up, containment and isolation
- decontamination
- documenting emergency response and evacuation procedures
- evacuating work site or workplace
- notifying authorities
- using firefighting appliances
- using PPE.

### Regulatory and company documentation may include:
- accident and incident reports
- certificates and notices
- customer files and databases
- invoices
- job sheets
- OHS control procedures, forms and documentation
- risk assessments.

Not applicable.
CPPCLO3020A Clean using pressure washing

Modification History
Revised unit
Unit updated and equivalent to PRMCL20B Clean using pressure washing

Unit Descriptor
This unit of competency specifies the outcomes required to use pressure washing to clean surfaces. Pressure washing produces a variable stream of either water or cleaning chemical and is used as a replacement for hand scrubbing in large areas or where surfaces are very soiled.
Some surfaces, such as cracked, painted or other sealed surfaces, may be sensitive to pressure washing.
The unit requires the ability to assess the extent of the cleaning task through knowledge of the characteristics of the surface and the type of surface soiling. It is also necessary to apply understanding of client requirements and company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and cleaning methods is essential to performing the task safely and efficiently.
In this unit work is conducted from ground level. CPPCLO3036A Clean at high levels describes work conducted over two metres above ground level.

Application of the Unit
This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
his unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Assess area for suitability for pressure washing.

1.1 Area to be pressure washed is assessed, work order is reviewed according to company requirements, and issues are clarified with appropriate persons.

1.2 Hazards and risks in work site are identified and controlled according to company, legislative and occupational health and safety (OHS) requirements.

1.3 Type and condition of surface are identified by observation according to work order and company requirements.

1.4 Soil type is identified by observation according to work order and company requirements.

1.5 Work site access requirements are identified according to work order and company requirements.

1.6 Size and usage pattern of work site are determined to ensure safety of personnel and efficient use of equipment and chemicals.

1.7 Effectiveness and suitability of a pressure wash is assessed according to work order and legislative, OHS, company and environmental requirements.

1.8 Cleaning techniques are selected according to work order, manufacturer specifications and environmental, legislative, OHS and company requirements.

1.9 Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2 Select equipment and chemicals.

2.1 *Personal protective equipment* (PPE) is selected and used according to manufacturer specifications, and OHS and company requirements.

2.2 Equipment and chemicals are selected for work order according to OHS and company requirements.

2.3 Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.

2.4 Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.

2.5 Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.

3 Prepare work site.

3.1 Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.

3.2 *Signage and barriers* are installed as required to maximise public safety during the cleaning operation according to work order, and OHS and company requirements.

3.3 Items requiring protection from pressure spray are covered and secured according to work order and company requirements.

3.4 *Work restrictions* affecting completion of work order are identified and appropriate persons are notified.

4 Clean work site.

4.1 Heavily soiled areas are prepared using cleaning techniques according to manufacturer specifications and company requirements.

4.2 Pressure washing is conducted using equipment, PPE and chemicals and according to manufacturer specifications and company requirements.

4.3 Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
Tidy work site.

Collected soil and waste are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and environmental requirements.

Signage and barriers are removed according to work order, and OHS and company requirements.

Clean and safety check equipment, and store equipment and chemicals.

Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.

Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.

Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.

Chemicals are stored according to manufacturer specifications, and OHS and company requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients’ trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to schedule and roster work
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of waste
  - identifying hazards and controlling risks
  - manual handling
  - selecting equipment and chemicals
  - working at heights
- self-management skills to work alone and in a team
- teamwork skills to lead teams

Required knowledge

- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
• injury, dangerous occurrence and incident reporting
• OHS procedures
• quality systems
• legislation, regulations, codes of practice and industry advisory standards that apply to cleaning using pressure washing, including OHS legislation
• routes of entry and potential symptoms of exposure to chemicals
• safe work practices for using:
  • chemicals
  • equipment, including PPE
• pressure washing, including:
  • equipment and its functions
  • pressure washing methods, including:
    • cleaning methods for surfaces where there are restrictions or limitations on pressure washing
    • preparation requirements of areas for pressure washing
  • types of surfaces, their characteristics and suitability for pressure washing
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed by observing practical demonstrations of cleaning using pressure washing involving at least two different surfaces and two different work site environments.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify hazards associated with pressure washing • identify surface and soil types • use safe and efficient pressure cleaning methods • select cleaning equipment and chemicals • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include access to: • suitable work site or venues with a variety of surface and soil types suitable for pressure washing • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles</td>
</tr>
</tbody>
</table>
- confirm that competency is verified and able to be transferred to other circumstances and environments.

| Guidance information for assessment | Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as:
  - CPPCLO2037A Clean external surfaces
  - CPPCLO3021A Clean industrial machinery. |
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Work order** information may include: | • access to work site, including:  
| | • access and egress points  
| | • timing of access  
| | • budget allocations

- solvent cleaners.

**Environmental requirements may**
- clean-up, containment and isolation
- company policies and guidelines
Cleaning techniques may include:
- low-water cleaning methods
- detailing
- hand washing
- pre-spraying
- pressure water blasting
- rinsing.

Manufacturer specifications may include:
- equipment operating manuals
- instructional guides
- MSDS
- other resources supplied by the manufacturer, such as:
  - laminated cards
  - notices
  - wall posters
  - product labels
  - safety instructions pre-printed on equipment.

Personal protective equipment may include:
- ear muffs and plugs
- gloves, such as non-permeable
- goggles
- high-visibility vests and clothing
- overalls and other protective clothing
- respirators
- safety glasses
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

Signage and barriers may include:
- physical barriers and restraints erected to restrict access to a site

include:
- emergency chemical spill control measures
- environmental protection agency and requirements of government departments, such as:
  - agriculture
  - emergency services
- hazardous materials handling
- local government regulations and by-laws
- low-energy cleaning methods
- low environmental-impact chemicals
- low-moisture cleaning methods
- low water-use equipment and water-efficient cleaning methods
- non-chemical cleaning methods.
include:

- signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
  - cleaning in progress
  - hazardous chemicals in use or present in work area.

| Work restrictions may include:
|-------------------------------------------------------------|
| • amount of cleaning anticipated
| • client activity
| • employee level of literacy and communication skills
| • faulty or inappropriate equipment
| • site accessibility
| • site hazards
| • skills of work unit or team
| • staffing resources
| • time limitations.

| Waste may be either solid or liquid and include:
|-------------------------------------------------------------|
| • chemicals past expiry date
| • obsolete equipment
| • packaging
| • removed soil
| • used cleaning cloths
| • used containers
| • used or unused chemicals
| • used or contaminated PPE
| • used or unused chemicals.

Cleaning operations

**Custom Content Section**

Not applicable.
CPPCLO3036A Clean at high levels

Modification History
Revised unit
Unit updated and equivalent to PRMCL36B Clean at high levels

Unit Descriptor
This unit of competency specifies the outcomes required to clean a range of surfaces and sites above easy reach from the ground. This unit is used in cleaning situations where the cleaning activity occurs at heights above two metres from the ground or floor surface and is typically manual or 'hands on'. The cleaning activity may occur either indoors or outdoors and involves use of specialised equipment to access the area to be cleaned. Safety is an important issue for cleaners involved in cleaning work at high levels.

The unit requires the ability to assess the extent of the cleaning task through knowledge of characteristics of surfaces, sites and soiling. It also requires understanding of client requirements and company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and cleaning methods is essential to performing the task safely and efficiently.

Application of the Unit
This unit of competency supports employees without managerial or supervisory responsibilities. Where ladders are being used or where required for safety reasons, the work is usually done in pairs.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

requirements.

2.4 Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.

2.5 Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.

3 Prepare work site.

3.1 Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.

3.2 Signage and barriers are installed as required during cleaning operation according to work order, and OHS and company requirements.

3.3 Drop sheets are placed on floor, furniture and equipment according to work order and company requirements.

3.4 Work restrictions affecting completion of work order are identified and appropriate persons are notified.

4 Clean work site.

4.1 Dry dust and cobwebs are removed according to work order and company requirements.

4.2 Difficult to reach areas are vacuumed according to work order and company requirements.

4.3 Fittings are wiped according to work order and company requirements.

4.4 Chemical solution is rinsed from all surfaces according to work order and company requirements.

4.5 Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.

5 Tidy work site.

5.1 Drop sheets are removed according to work order and company requirements.

5.2 Collected soil and waste are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and
environmental requirements.

5.3 Signage and barriers are removed according to work order, and OHS and company requirements.

6 Clean and safety check equipment, and store equipment and chemicals.

6.1 Access equipment, other equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.

6.2 Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.

6.3 Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.

6.4 Chemicals are stored according to manufacturer specifications, and OHS and company requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients’ trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- organisational skills to plan and organise work
- problem-solving skills to manage contingencies
- skills to work safely when:
  - cleaning glass
  - handling and disposing of chemicals
  - handling and disposing of waste
  - identifying hazards and controlling risks
  - manual handling
  - working at heights
- self-management skills to work alone and in a team

Required knowledge

- safe use of equipment in line with manufacturer specifications
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
- injury, dangerous occurrence and incident reporting
- OHS procedures
- quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning at high levels, including:
  - Australian standards and codes of practice for the safe use of ladders
  - certificate of competency requirements for elevated work platform, scaffolding and industrial rope access
  - OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, such as:
    - access equipment
    - PPE
  -
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed by observing practical demonstrations of cleaning at high levels involving at least two different work site environments.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:  
- identify type and characteristics of surface and site to be cleaned  
- use safe and efficient cleaning methods  
- select required access equipment  
- select required cleaning equipment and chemicals  
- comply with company and legislative requirements  
- achieve outcomes in relation to customer work order and company requirements. |
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include access to:  
- suitable work site or venue with surfaces at high levels  
- suitable equipment and chemicals  
- PPE  
- equipment operating manuals and MSDS  
- work order instructions, work plans and schedules, and policy documents  
- assessment instruments, including personal planner and assessment record book. |
| Method of assessment | Assessment methods must:  
- satisfy the endorsed Assessment Guidelines of the Property Services Training Package  
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application  
- reinforce the integration of employability skills with workplace tasks and job roles  
- confirm that competency is verified and able to be transferred to |
| Guidance information for assessment | Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as:

- CPPCLO2010A Clean ceiling surfaces and fittings
- CPPCLO2037A Clean external surfaces. |
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Modified History

Revised unit
Unit updated and equivalent to PRMCL38A Clean a food handling area

Unit Descriptor

This unit of competency specifies the outcomes required to clean in food-handling areas where the work does not involve direct food contact. This unit is not appropriate for a person who has direct contact with food, raw materials or ingredients.

This unit is based on the guideline food safety unit GFSWFHAA Carry out work in a food handling area.

Food-handling areas include food courts and industrial food-processing plants.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and special characteristics of food-handling areas, and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently, as is paying careful attention to health and safety issues.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Assess area to be cleaned.

1.1 **Food-handling area** is assessed, **work order** is reviewed according to **food safety program**, client and **company requirements**, and issues are clarified with **appropriate persons**.

1.2 **Hazards** are identified and risks controlled in work site according to company, **legislative**, and **occupational health and safety** (OHS) **requirements**.

1.3 **Contamination hazards** in work site are identified according to legislative, OHS and company requirements.

1.4 **Surface** types are identified by observation according to work order and company requirements.

1.5 **Soil type** is identified by observation according to work order and company requirements.

1.6 Size and usage pattern of work site are determined to ensure safety of and minimal disruption to **personnel** and efficient use of cleaning **equipment** and **chemicals**.

1.7 **Cleaning techniques** are selected according to work order and company requirements.

2 Select equipment and chemicals.

2.1 **Personal protective equipment** (PPE) is selected and used according to **manufacturer specifications**, and OHS and company requirements.

2.2 Equipment and chemicals are selected for work order according to OHS and company requirements.

2.3 Equipment and chemicals are checked to ensure they meet cleaning and sanitation requirements of food safety...
program according to legislative, OHS and company requirements.

2.4 Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.

2.5 Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.

2.6 Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.

2.7 **Consumables** are obtained to meet anticipated usage patterns according to work order and company requirements.

3 Prepare self and work site.

3.1 Personal hygiene, clothing and footwear, hygiene and health levels are applied that meet food safety program, legislation, OHS and company requirements.

3.2 Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.

3.3 **Signage and barriers** are installed as required according to work order and OHS and company requirements.

3.4 Food-safety program requirements related to work order are identified according to OHS and company requirements.

3.5 **Work restrictions** affecting completion of work order are identified and appropriate persons are notified.

4 Clean work site while maintaining food safety.

4.1 Food-safety program is followed and cleaning activities are conducted to ensure food safety is maintained according to health regulations, work order, and OHS and company requirements.

4.2 Surfaces are cleaned using equipment, PPE, chemicals and cleaning techniques according to manufacturer specifications, work order, and OHS and company requirements.
4.3 Work is conducted according to legislative, OHS and company requirements.

4.4 Procedures or practices inconsistent with food-safety program are reported to appropriate persons.

5 Replenish consumables and tidy work site.

5.1 Consumables are replenished according to client requests, work order and company requirements.

5.2 Collected soil and waste are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and environmental requirements.

5.3 Signage and barriers are removed according to work order, and OHS and company requirements.

6 Clean, safety check and store equipment.

6.1 Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.

6.2 Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.

6.3 Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.

6.4 Chemicals are stored according to manufacturer specifications, and OHS and company requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients’ trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- observation skills to:
  - identify contamination types
  - identify surface types in preparation for cleaning
- organisational skills to plan and organise work
- problem-solving skills to manage contingencies
- skills to work safely when:
  - dusting, cleaning, polishing and buffing
  - handling and disposing of chemicals
  - handling and disposing of contaminated waste
  - identifying food contamination hazards and controlling risks
  - manual handling
  - replenishing consumables
  - selecting chemicals to suit surface type
- self-management skills to work alone and in a team

Required knowledge

- cleaning and sanitation requirements of food-handling areas, including:
- chemicals
- cleaning methods
- personal hygiene practices, including:
  - clothing and footwear requirements associated with working and moving in and between food-handling areas and non food-handling areas
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- equipment and chemicals for use in food-handling areas, including non-breakable materials
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning food-handling areas, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of contamination and prevention methods
- waste collection, recycling and handling procedures
- workplace information on food-safety policies and procedures
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed by observing practical demonstrations of cleaning food-handling areas involving at least two different work site environments.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:  
  - access and apply workplace information on food-safety policies and procedures relating to own work  
  - fit and use personal protective clothing and equipment as required by work tasks to meet food business requirements  
  - identify food-safety hazards in work area  
  - identify hazards associated with food-handling area  
  - identify surfaces and soil types found in food-handling areas  
  - maintain housekeeping standards in food-handling area and dispose of waste to meet food-handling requirements  
  - maintain personal conduct and hygiene to ensure that food safety is not compromised  
  - identify and report situations or procedures that could compromise food safety  
  - report health conditions and illness as required by workplace food-safety procedures  
  - select cleaning equipment and chemicals  
  - take necessary precautions when moving between or around workplace and from one task to another to minimise risk of food contamination  
  - use safe and efficient cleaning methods  
  - maintain clothing and footwear as required by work task to meet food-safety procedures  
  - achieve outcomes in relation to customer work order and company and legislative requirements. |
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include access to:  
  - suitable food-handling work site or venue  
  - suitable equipment and chemicals |
- PPE
- equipment operating manuals and MSDS
- food-safety policies and procedures relevant to the workplace
- work order instructions, work plans and schedules
- assessment instruments, including personal planner and assessment record book.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Property Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

**Guidance information for assessment**

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units relevant to the job function, such as:

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Food-handling areas** deal with:

- dispatching food
- handling food
- inspecting food
- packaging food
- preparing food
Work order information may include:

- access to work site, including:
  - access and egress points
  - timing of access
  - budget allocations
  - completion times and dates

- human resource requirements to complete the work tasks
- job requirements and tasks
- legislative and local government requirements
- OHS requirements and emergency response procedures
- requirements for working in isolated and remote locations
- resource requirements, such as equipment and materials
- specific client requirements, such as:
  - dress and presentation requirements
  - relationships with other activities
  - use of signage and barriers
  - work schedules
  - work site contact persons
  - work site requirements for specific industries, such as:
    - hospitals and medical centres
    - nursing homes
    - retail food courts
    - schools
    - tourism and hospitality.

Food-safety program identifies the food-safety hazards that may be reasonably expected to occur in all food-handling operations of a food business and:

- identifies where and how each hazard can be controlled
- describes how controls are monitored
- describes corrective actions required if conditions are not met
- specifies information to be recorded and procedures to be signed off
- must comply with relevant national, state and industry legislation and regulations
- includes responsibilities for any person visiting or working in food-handling areas
- specifies minimum procedures to ensure any person does not:
  - contaminate food
  - have unnecessary contact with ready-to-eat food
  - spit, smoke or use tobacco or similar in food-handling areas (refer Food Safety Standard 3.2.2, Clause 17:3 and state

**Occupational health and safety** (also known as workplace health and safety) **requirements** may relate to:

- Allergic reactions, such as contact dermatitis
- Communication devices for remote and isolated locations, such as:
  - Mobile phone
  - Two-way radio
- Dermatoxicological control and prevention measures
- Emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
- Hazard identification and risk assessment mechanisms
- Health surveillance and monitoring, such as regular blood testing
- Hierarchy of hazard control procedures
- Maintaining clear access
- National and industry standards and codes of practice
- OHS control procedures, such as:
  - Health and safety plans
  - Job plans
  - Job safety analyses
  - Risk assessments
  - Safe operating practices and procedures
  - Safe system of work statements
  - Safe work instructions
  - Work method statements
- Reporting injury and dangerous occurrences
- Routes of entry and potential symptoms of exposure to chemicals
- Safe work practices for equipment, PPE and chemical storage, including interpretation of:
  - MSDS
  - Hazardous substance information, such as long latency
| Periods | • safety training, induction and refresher training  
|        | • selection and use of PPE and clothing appropriate to the hazard  
|        | • ultraviolet light  
|        | • up-to-date electrical test and tag compliance  
|        | • use of chemicals according to MSDS  
|        | • use of residual current devices  
|        | • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.  

**Contamination hazards include:**
- chemical contamination caused by cleaning and sanitation chemicals  
- microbiological contamination resulting from cross-contamination when moving into and between food-handling areas  
- physical contamination caused by metal, glass, plastic and cloths.

**Surfaces may include:**
- ceramics and porcelain  
- chrome  
- concrete  
- glass  
- laminate  
- metal  
- paint  
- plastic  
- stainless steel  
- stone  
- surfaces encompassing new technologies  
- terracotta  
- vinyl.

**Soil types can be wet or dry and may include:**
- blood  
- dust  
- food, food scraps and residue  
- grease  
- human waste  
- litter  
- mould and algae  
- mud and dirt  
- pen, texta and pencil  
- rust  
- soap scum  
- syringes.
**Personnel** may include:
- client’s staff members
- colleagues
- general public
- venue, facility, shopping centre staff and management.

**Equipment** may include:
- absorbent cleaning cloths
- brooms
- buckets
- cleaning trolleys
- damp cloths
- doodle bugs
- dry cloths
- hoses and nozzles
- lint-free cloths
- long-handled brushes and dustpan tongs
- microfibre products
- mops
- needle hazard disposal units
- nylon scourers
- scrapers
- scrubbing brushes
- scrubbing and polishing machines
- window squeegees
- wringer buckets.

**Chemicals** may include:
- acid cleaners
- alkaline cleaners
- low environmental-impact chemicals
- neutral cleaners
- solvent cleaners.

**Cleaning techniques** may include:
- buffing
- damp dusting
- hosing
- low-water cleaning methods, such as using microfibre cleaning products
- mopping
- polishing
- pre-spraying
- scrubbing
- spot cleaning
- sweeping
- wet wiping
- window cleaning.
| **Personal protective equipment** may include: | • ear muffs and plugs  
• gloves, such as non-permeable  
• goggles  
• overalls and other protective clothing  
• respirators  
• safety glasses  
• safety shoes  
• splash-proof face masks  
• tongs  
• wet-work clothing. |
| **Manufacturer specifications** may include: | • equipment operating manuals  
• instructional guides  
• MSDS  
• other resources supplied by the manufacturer, such as:  
  • laminated cards  
  • notices  
  • wall posters  
  • product labels  
  • safety instructions pre-printed on equipment. |
| **Consumables** may include: | • air fresheners  
• bin liners  
• cloth towels and tea towels  
• disposable gloves  
• hair nets  
• hand towels, such as cloth, rolls and sheets  
• serviettes  
• soap. |
| **Signage and barriers** may include: | • physical barriers and restraints erected to restrict access to a site  
• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:  
  • cleaning in progress  
  • hazardous chemicals in use or present in work area. |
| **Work restrictions** may include: | • amount of cleaning anticipated  
• client activity  
• employee level of literacy and communication skills  
• faulty or inappropriate equipment  
• site accessibility  
• site hazards  
• skills of work unit or team  
• staffing resources  
• time limitations. |
### Waste

Waste may be either solid or liquid and include:

- chemicals past expiry date
- obsolete equipment
- packaging
- used cleaning cloths
- used containers
- used or contaminated PPE
- used or unused chemicals.

### Environmental requirements

Environmental requirements may include:

- clean-up, containment and isolation
- company policies and guidelines
- emergency chemical spill control measures
- environmental protection agency and requirements of government departments, such as:
  - agriculture
  - emergency services
- hazardous materials handling
- local government regulations and by-laws
- low-energy cleaning methods
- low-environmental-impact chemicals
- low-moisture cleaning methods
- low water-use equipment and water-efficient cleaning methods
- non-chemical cleaning methods.

FDFAU4001A Assess compliance with food safety programs

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers skills and knowledge required to assess compliance against an approved food safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert. |

Application of the Unit

| Application of the unit | This unit applies to regulatory, commercial or internal auditors. When this unit is applied to regulatory auditing it should be noted that the National Food Safety Audit Policy for regulatory auditing requires that the unit FDFAU4002A Communicate and negotiate to conduct food safety audits, must be pre or co-assessed with this unit when applied to assessing compliance against approved food safety programs that have been validated by a technical expert. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan the audit | 1.1. An audit plan is developed to meet the audit scope  
1.2. The plan is capable of delivering the required outcomes within resource and time allocations  
1.3. Plan includes audit purpose, scope and relevant templates or approved food safety program  
1.4. Activities and responsibilities for the audit are identified  
1.5. Audit timing (as required by legislation and/or client) is identified including timetable for each stage of the audit  
1.6. Resource, personnel and reporting requirements are identified  
1.7. Follow up and completion procedures are identified  
1.8. Communication protocols are identified and established to facilitate the effective exchange of information and suited to the auditee environment |
| 2. Confirm that the food business has documented required preliminary work | 2.1. The food and the method of distribution are defined  
2.2. Customers and intended use of food is identified  
2.3. The process is described and documented  
2.4. The food business has checked their documentation for accuracy and completeness |
| 3. Confirm the food safety program is supported by a tool or template or has been validated | 3.1. The documented food safety program and related procedures and prerequisite programs are assessed to confirm that they have a prescriptive tool or have been validated by a technical expert  
3.2. The food business method of identifying and analysing food safety hazards is reviewed  
3.3. Templates or the approved food safety program are correctly selected to meet audit scope  
3.4. Templates or the approved food safety program are appropriately adapted to suit the needs of the business without adversely affecting food safety  
3.5. Documented verification records are reviewed to confirm that the requirements of the food safety program are being met  
3.6. Corrective actions required where processes are identified as not meeting targets or critical limits are assessed to confirm they meet the requirements of the template or food safety program  
3.7. Food safety prerequisite programs are assessed to |

Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**
- plan and organise audit activities
- identify work processes and work flow
- interpret food safety programs including flow charts, standard operating procedures (SOPs), and other process documentation
- describe each process step and identify food safety hazards
- conduct research to identify, collect and analyse evidence of compliance with food safety programs
- use communication skills to support evidence collection and outcome presentation
- identify and classify non-compliances
- prepare audit reports and certificates to meet regulatory and client requirements
- review corrective action implementation plans
- monitor the implementation of corrective actions
- maintain audit records

#### Required knowledge

**Knowledge of:**
- required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards
- purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools
- guidelines on implementing industry templates or approved food safety programs
- legal requirements of food businesses
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- audit activities and principles, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional system owner requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
REQUIRED SKILLS AND KNOWLEDGE

- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- vocabulary and terms relating to food safety programs, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- common biological, physical and chemical hazards that may occur in the food business and appropriate methods of control and critical limits as outlined in the approved food safety program or template
- the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority to initiate cessation of an audit
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the skills of food safety and food hygiene relevant to the food business
**Evidence Guide**

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competence in this unit must be able to assess compliance against an approved food safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- confirm that the food safety program and/or template is appropriate to the activities of the business
- review food safety program records to assess compliance against the approved food safety program and/or template
- collect and analyse evidence to confirm that the food safety program is consistently followed and controls all critical risks
- identify circumstances where variation or customising of the template or food safety program requires further validation
- submit non-compliance reports to clearly identify the aspects of the food safety program that have broken down/need further development in order to prevent recurrence.

#### Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the scenarios should be assessed in an actual workplace context.

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.

The following resources must be available:
- food safety plans
### EVIDENCE GUIDE

- food safety-related documentation required to implement and record the food safety plan
- evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program
- plant and equipment that would typically be used in a commercial manufacturing business.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package. The following assessment methods should be considered to gather sufficient and valid evidence of competency:

- observation and a report covering the critical aspects for assessment identified above
- questioning to test the level and application of knowledge
- workplace example or scenario to allow a valid decision on the compliance of the food safety program to be made, with evidence of recording and feedback.

### Guidance information for assessment

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Food safety program

Food safety programs include both prerequisite programs and a risk-based analysis of food safety hazards to determine required control measures to eliminate, prevent or reduce hazards. Minimum legal requirements for food safety programs are specified in National Food Safety Standard 3.2.1 or other relevant legislative requirements.

The food safety program may be based on a template or externally developed program that is adapted to the needs of the business.

### Licensing/certification requirements

Licensing and certification requirements are determined by system owners.

### Technical expert

The requirements of a technical expert are determined by the system owner. System owners may include:
- government regulators as well as private system owners.

### Audit scope

The scope describes the purpose, extent and boundaries of the audit. This may include:
- physical locations
- products
- processes
- time period covered by the audit
- extent of authority of the auditor

### Prerequisite programs

Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP). Prerequisite programs can be divided into two categories.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Develop a communication plan to support audit processes | 1.1. Roles and responsibilities of the auditee are defined and agreed by both parties to address the audit scope  
1.2. Roles and responsibilities of all personnel involved in the audit process are defined, communicated and agreed  
1.3. Appropriate communication methods and protocols are determined and specific arrangements, including reporting requirements, are agreed  
1.4. A communication plan is developed to identify the communication requirements and responsibilities of personnel involved in the audit process |
| 2. Select and use appropriate communication methods to conduct an audit | 2.1. Appropriate communication methods are used to establish and maintain effective client relationships, collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution and communicate audit findings  
2.2. Communication methods are selected to take account of system owner and food business requirements, workplace culture and individual differences  
2.3. Information provided by the auditee is interpreted in the context of the industry sector, language and culture of the business |
| 3. Negotiate to achieve agreement on audit outcomes | 3.1. Areas of disagreement over audit outcomes are identified and clarified with the auditee  
3.2. Understanding is sought on actions to be followed to resolve outstanding issues  
3.3. Communication techniques are applied to encourage all relevant parties to participate and express their views fully  
3.4. Auditee views are treated with respect  
3.5. Options for resolving differences are explored to reach agreement and meet audit timeline and resource parameters  
3.6. Appropriate issue resolution strategies are explored to increase the likelihood of agreement on steps required to conclude the audit  
3.7. The negotiation process is managed to maintain constructive client relationships  
3.8. Any areas of continuing non-compliance that result |
ELEMENT | PERFORMANCE CRITERIA
---|---
from unresolved differences are reported to system owners and appropriate authorities as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- select, design and use appropriate communication methods and techniques to support the audit process and the needs of the audience
- apply strategies to communicate with people at different levels of the food business with different English language, literacy and technical skill levels
- facilitate groups to resolve sensitive and/or conflict-based issues
- structure and present written and verbal information that is thorough, legible, clear, accurate and appropriate to the purpose and the audience
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- communicate information in environments where the recipients may be hostile to the information being presented
- apply issue resolution strategies

Required knowledge

Knowledge of:
- legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation
- vocabulary and terms relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards
- confidentiality needs and expectations of food businesses
- strategies to communicate in culturally diverse environments
- dynamics of conflict and strategies to manage resolution
- the structure, authority levels and lines of reporting within a food business
- communication methods relevant to different groups and audiences
- reporting formats and requirements to meet client and legislative needs
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competence in this unit must be able to select and use appropriate methods of communication and negotiation to support audit processes. This unit should be assessed together with other food safety auditing units.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- design a communication plan to meet the needs of stakeholders in an audit process, specifically where a number of participants have limited English language and literacy skills
- facilitate and negotiate to seek understanding of audit outcomes in a conflict-based situation where the outcomes are contested by the auditee. This component of assessment must provide opportunities to select and apply appropriate communication methods.

### Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment where the simulated context provides access to audit findings which are disputed by the auditee. At least one of the audit scenarios should be assessed in an actual workplace context. A simulated environment must provide access to a typical range of personnel with communication skill levels appropriate to food businesses and to the roles of personnel involved in food safety audit processes.

### Method of assessment

The following assessment methods should be considered to gather sufficient and valid evidence of competency:

- observation of communication and conflict management skills
- a report for a communication plan to conduct a food safety audit
<table>
<thead>

## RANGE STATEMENT

<table>
<thead>
<tr>
<th>Information/responding to information requests</th>
</tr>
</thead>
</table>

### Food business requirements

Business requirements may require that communication is consistent with:

- confidentiality requirements
- legal requirements and related policies and procedures relating to communication requirements
- professional codes of conduct/personal attributes of auditors
- information that is accurate, thorough and clearly presented
- resource parameters
- organisational structure and delegated levels of authority
- existing communication mechanisms and systems used in the auditee’s workplace

### Individual differences

Individual differences may include but are not limited to:

- age
- race
- gender
- culture
- religion
- impairment/disability
- physical features
- educational background
- technical skill level
- communication styles and skill levels
- English language and literacy
- any other individual characteristics that may need to be taken into account in designing communication as covered by relevant legislation

### Issue resolution strategies

Issue resolution strategies may include:

- establishing open communication practices to encourage the trust and engagement of all parties
- designing processes that ensure all parties have opportunities to fully express their

FDFAU4003A Conduct food safety audits

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements. |

Application of the Unit

| Application of the unit | At the time of writing the terms and definitions relating to the audit process were consistent with and further described in the international standard ISO/IEC 19011:2002, 'Guidelines on quality and/or environmental management systems auditing'.

Users of this unit should refer to the current ISO standard and current food safety legislation.

This unit applies to conducting on-site audits and is relevant to regulatory and commercial food safety system auditors who may be auditing low, medium or high risk food safety hazards. When this unit is applied to regulatory auditing it should be noted that the National Food Safety Audit Policy for regulatory auditing, requires that this unit must be pre or co-assessed with:

- FDFAU4002A Communicate and negotiate to conduct food safety audits
- FDFAU4004A Identify, evaluate and control food safety hazards.

When applied to conducting regulatory food safety audits of high risk food businesses or processes, additional units relevant to the specified business or process may be required to meet the National Food Safety Audit Policy. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Define the scope of the audit | 1.1. Audit scope is identified and defines the extent of the audit to meet legislative and audit client requirements  
1.2. Audit criteria meet legislative and client requirements  
1.3. The definition and levels of non-conformity and related reporting responsibilities are identified consistent with legislative requirements and client requirements  
1.4. Evidence required to address audit scope and criteria is identified and appropriate collection methods are selected  
1.5. Food safety management system documents are reviewed to determine adequacy for the purposes of the audit |
| 2. Plan the audit | 2.1. An audit plan is developed that includes definitions and levels of non-conformity to meet the audit scope  
2.2. Activities and responsibilities for the audit are identified  
2.3. Audit timing (as required by legislation and/or client) is identified, including timetable for each stage of the audit  
2.4. Resource, personnel and reporting requirements are identified  
2.5. Follow up and completion procedures are identified  
2.6. Communication protocols are established to facilitate the effective exchange of information and suited to the auditee environment |
| 3. Conduct the audit | 3.1. Information on the audit scope and methodology is communicated in an effective and timely manner  
3.2. Stages and activities of the audit process are followed  
3.3. Methods used by the food business to carry out preliminary work, identify food safety hazards and assess level of risk are reviewed to confirm that they are appropriate and correctly applied  
3.4. Evidence used by the food business to support identification of control measures and establish control limits is identified and evaluated to determine adequacy and relevance  
3.5. Methods used by the food business to control |
<table>

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

*Ability to:*

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of food businesses relevant to the industry sector
- plan and manage audit activities
- communicate information in ways appropriate to the purpose and the audience and to facilitate opening and closing meetings
- negotiate and facilitate audit processes, including following meeting procedures and resolving issues
- select and use research skills relevant to audit activities, including researching technical sources to validate food safety programs and collecting evidence to support verification
- consolidate audit findings based on objective evidence
- prepare records and reports appropriate to the purpose of the audit and the needs of the auditee and the client (system owner/regulator)

#### Required knowledge

*Knowledge of:*

**Auditor roles and responsibilities**

- audit activities and stages, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional client requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
- audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan

**Food safety management systems**

- purpose and intent of each element of a food safety management system
- the underlying principles of risk-based approaches to controlling food safety hazards, including HACCP as described in the Codex Alimentarius Guidelines
**REQUIRED SKILLS AND KNOWLEDGE**

- vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- food safety management system knowledge relevant to the system being audited, including system requirements, definitions and levels of non-compliance and related reporting responsibilities as defined by legal and management system requirements
- the interaction between different types of management systems, including the impact of food safety decisions on other management systems, such as occupational health and safety (OHS), quality, environmental risk management and animal welfare
- technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements

**Food safety legislation**

- the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
- the content covered by the Food Standards Code and/or other relevant standards
- the structure and responsibilities of commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
- the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
- sources of information on legislation and codes governing primary production and primary processing
- requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- the role of auditors when called on to provide evidence as a witness in court

**Food safety audit processes**

- preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flowchart) and check accuracy and

# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competence in this unit must be able to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- Identify food safety legislation applying to a food business. Legislative requirements may relate to actual or hypothetical food businesses. A minimum of two scenarios must be covered providing that at least one food business operates in a market segment that has to meet compliance requirements in place of or in addition to the Food Standards Code. One such market segment is export meat processors who must comply with the Export Control Act and the Export Meat Orders.

- The assessment activity must:
  - identify the relevant legislation applying to the food business taking account of the industry sector, range of food handling activities undertaken and the markets into which products and/or services are sold.
  - locate advice on relevant authorities and enforcement agencies in a state or territory and for international markets as appropriate.
  - explain the legal responsibilities of a given food business.
  - Plan and conduct an audit that complies with legal and client requirements as appropriate. The criteria and evidence requirements may be developed to apply to an actual or hypothetical food business. The assessee must substantiate:
    - how audit scope and criteria meet legislative and
## EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>Client requirements.</th>
</tr>
</thead>
</table>
| - the evidence required to assess compliance with the criteria and to support an objective, reliable and consistent audit outcome.  
- definitions, levels and related reporting of non-conformance to comply with legislative requirements.  
- Submit completed audit records for the selected audit including the final audit report, non-conformity reports, corrective action reports, follow up reports and suggestions for improvements to the food safety management system and to the audit process. These latter items may be documented in personal notes rather than part of the formal audit report according to the audit scope. |

### Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the audit scenarios should be assessed in an actual workplace context.

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.

The following resources must be available:

- food safety plans
- food safety-related documentation typical of commercial manufacturing businesses and used for the purpose of verification
- evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes
- plant and equipment that would typically be used in a commercial manufacturing business.

### Method of assessment

The following assessment methods should be considered to gather sufficient and valid evidence of competency:

- observation, including the completion of documentation to show the planning and conducting of an audit
- a report on the legal responsibilities of the food business
- questioning to test the level and application of knowledge
**EVIDENCE GUIDE**

- documentation to show validation and verification processes used
- completion of all audit records.

The whole audit process must be witnessed by the assessor.

Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.

| Guidance information for assessment | To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. |
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>

</thead>
<tbody>
<tr>
<td></td>
<td>- audit personnel directly involved in undertaking the audit</td>
</tr>
</tbody>
</table>
### RANGE STATEMENT

- access to relevant personnel and information within the business
- access to any additional resources as required

### Food businesses
A food business refers to a business, vehicle, enterprise or activity where food is produced, processed, stored, displayed, transported and/or sold. It may also include primary producers.

### Preliminary work
Preliminary work includes but is not limited to:
- identifying food to be covered by the food safety program
- defining the food and the method of distribution
- identifying customers and intended use of food
- describing the process (flowchart)
- checking for accuracy and completeness of the previous steps

### Validation
Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes.

### Verification
Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met.

### Audit records
Audit records are maintained to demonstrate the implementation of the audit process. These may include but are not limited to:
- audit plans
- audit reports
- non-conformity reports
- corrective action reports
- follow up reports

### Close out
Auditors have different levels of responsibility and authority to close out audits according to the level of non-conformity and whether they are an authorised officer or a commercial auditor. Closing out may involve notifying the regulator.
<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>

Unit Descriptor

<table>
<thead>
<tr>
<th>Unit descriptor</th>
</tr>
</thead>
<tbody>
<tr>
<td>This unit of competency covers the skills and knowledge required to identify, evaluate and control food safety hazards for the purposes of validating specific control measures in a food safety program.</td>
</tr>
</tbody>
</table>
Application of the Unit

This unit applies to regulatory, commercial and internal food safety system auditors.

When this unit is applied to regulatory auditing it should be noted that the National Food Safety Audit Policy for regulatory auditing requires that, when assessing compliance of food safety programs in a medium or high risk environment, the following units must be pre or co-assessed with this unit:

- FDFAU4002A Communicate and negotiate to conduct food safety audits
- FDFAU4003A Conduct food safety audits.

When applied to conducting regulatory food safety audits of high risk food businesses or processes, additional food safety auditing unit/s relevant to the specified business or process may be required under the National Food Safety Audit Policy. Current high risk food safety auditing units are:

- FDFAU4005A Audit bivalve mollusc growing and harvesting processes
- FDFAU4006A Audit a cook chill process
- FDFAU4007A Audit a heat treatment process
- FDFAU4008A Audit manufacturing of ready-to-eat meat products.

Licensing/Regulatory Information

Not applicable.

Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Identify food safety hazards in a food business** | 1.1. Biological food safety hazards that could present a risk in the food at the point of consumption are identified by type, origin and food association and assessed to determine risk level and control requirements  
1.2. Intrinsic and extrinsic chemical food safety hazards that could present a risk in the food at the point of consumption, including toxin presence, are identified by type, origin and food association and assessed to determine risk level and control requirements  
1.3. Physical food safety hazards that present a risk in food are identified and assessed to determine control requirements |
| **2. Control food safety hazards in a food business** | 2.1. Processing hazards and related control measures and critical limits, monitoring and recording requirements are established and validated to eliminate or reduce food safety hazards to acceptable levels  
2.2. Food storage and handling requirements necessary to eliminate or reduce food safety hazards are determined  
2.3. Personal hygiene practices required to eliminate or reduce food safety hazards are established  
2.4. Cleaning and sanitation, housekeeping and pest control practices and procedures required to prevent or reduce food safety hazards are established  
2.5. Other prerequisite programs are developed to eliminate or reduce food safety hazards to acceptable levels |
Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- interpret and apply relevant legislation, codes of practice and technical standards
- identify biological, chemical and physical food safety hazards
- determine critical control points and critical limits for identified hazards
- establish the required procedures, systems and records to monitor critical control points in order to demonstrate that the critical control point is in control
- specify required corrective actions and corrections to be taken when critical limits are not achieved

#### Required knowledge

**Knowledge of:**

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards (including toxin production and spore formation) and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable (and legal) levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Food Standards Code (and may be additionally defined by system owners)
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the
### REQUIRED SKILLS AND KNOWLEDGE

# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competency in this unit must be able to establish or validate specific control measures in a food safety program based on demonstration of the identification, evaluation and control of food safety hazards.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- select a food supply chain and identify:
  - known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption
  - likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels
  - sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain
  - impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain
  - acceptable levels of contamination. These may be established by reference to relevant legislation and/or reference to system requirements
- select one stage in the food supply chain (which must be a medium or high risk business or process) and establish or validate control measures and verification records and procedures.

### Context of and specific resources for assessment

Assessment may occur in a real or simulated food business context where the simulated context provides access to food safety programs for a multi-staged food supply chain which includes the point of delivery to the...
**EVIDENCE GUIDE**

| Consumer.  
The selected supply chain must include at least one medium or high risk business and/or process and provide opportunity to apply a depth and breadth of food safety knowledge. |
|---|

**Method of assessment**

The following assessment methods should be considered to gather sufficient and valid evidence of competency:

- observation and documentation showing the identification of critical aspects of a food chain
- questioning to test the level and application of knowledge
- workplace example or scenario to produce validated control measures and verification records and procedures for food safety hazards.

**Guidance information for assessment**

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>

</tr>
</tbody>
</table>

### Acceptable levels

Acceptable levels define the level of a particular hazard in the end product that is acceptable to ensure food safety. Acceptable levels are typically defined by:

- the Food Standards Code
- commonwealth, state or territory legislation or codes
- industry codes of practice
- international protocols (CODEX Alimentarius)
- customer food safety requirements (including intended use)

### Prerequisite programs

Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP).

Prerequisite programs can be divided into two categories:

- **Infrastructure and maintenance programs.**
  - These may include:
  - layout, design and construction of buildings and facilities
## RANGE STATEMENT

- supplies of air, water, energy and other utilities
- equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning
- support services, including waste and sewage disposal

**Operational prerequisite programs.** These may include:

- personal hygiene
- cleaning and sanitation
- pest control
- measures for the prevention of cross-contamination
- packaging and labelling procedures
- supplier assurance
- chemical storage
- employee training
- maintenance
- calibration
- document control
- internal audit programs
- traceability and recall programs
- on-farm food safety schemes
- inspecting and testing regimes, including analytical and microbiological testing

### Validation

Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes.

### Validation evidence

Validation evidence confirms that control measures are capable of being consistently effective and may include the application of:

- existing Australian legislative requirements
- challenge tests
- peer reviewed scientific papers
- targeted scientific reports
- validation already carried out in other jurisdictions and recognised by the responsible authority
- mathematical modelling (e.g. predictive microbiology models)
- industry codes of practice (where implementation by food business is verified during audits)

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare to enter a freezer storage environment | 1.1. Appropriate clothing and footwear are identified and available  
1.2. Clothing and footwear are correctly fitted prior to entering a freezer  
1.3. Checks and inspections are conducted according to workplace procedures |
| 2. Identify and monitor equipment operation in a freezer storage environment | 2.1. Effects of freezing temperatures on equipment used are identified  
2.2. Equipment is monitored to ensure it is in operational order when in use in a freezer |
| 3. Handle frozen product safely | 3.1. Handling requirements for frozen product are identified  
3.2. Frozen product is handled safely  
3.3. Work is conducted in accordance with workplace environmental guidelines |
| 4. Respond to emergencies | 4.1. Signs and symptoms of exposure are identified  
4.2. Appropriate action is taken to minimise effects of exposure of self and others |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- locate and fit appropriate protective clothing, footwear and equipment
- follow procedures to enter and work in a freezer environment to ensure safety of self and others, including carrying out relevant checks and inspections prior to entry as required by workplace procedures
- follow procedures to handle product to avoid product damage
- monitor operating performance of equipment used in the freezer and identify signs of unsafe or unfit operation
- conduct work in a manner appropriate to minimising risk of contamination
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

**Knowledge of:**

- purpose and conditions required in a freezer storage environment, including how temperature parameters are maintained in the freezer/cold room
- safety requirements and hazards associated with entering and working in a freezer storage/cold room area, including required protective clothing and equipment, limitations of protective clothing and equipment, and maximum work duration
- symptoms associated with hypothermia and action to take if these occur
- the effects of freezer/cold room temperatures and frozen condensation on equipment used in a freezer/cold room but designed for room temperature operation, including symptoms that equipment is unsafe or unfit for use
- effects of room temperatures on equipment using hydraulic oils designed for freezer/cold room temperatures
- typical freezing rates for product handled, such as products stacked on pallets
- handling requirements for moving pallets of frozen product and how this differs from moving pallets of fresh product
- the differences in product stability of pallets loaded with fresh compared with frozen product and related wrapping requirements
- the effect of freezing on product packaging and related handling requirements
- housekeeping requirements for work area
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Evidence of ability to:  
- identify risks associated with freezer storage to self and equipment and identify controls to address risks  
- correctly use personal protective equipment  
- use and monitor equipment in freezer storage  
- take corrective action in response to typical faults, inconsistencies and symptoms of exposure  
- complete workplace records as required  
- apply safe work practices and identify OHS hazards and controls  
- apply food safety procedures. |
| Context of and specific resources for assessment | Assessment must occur in a real or simulated workplace where the assessee has access to:  
- personal protective clothing and equipment  
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements  
- freezer storage/cold room area  
- stock to be held in frozen storage. |
| Method of assessment | This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:  
- FDFOP2010A Work with temperature controlled stock. |
| Guidance information for assessment | To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. |

2.3. Residence time in temperature controlled stores is monitored to meet stock control requirements  
2.4. Out-of-specification storage temperatures are identified and corrective action is taken |
| 3. Transfer temperature controlled stock | 3.1. Goods are handled and transferred to maintain temperature control and meet stock rotation requirements  
3.2. Stores transfer information is recorded according to workplace reporting requirements  
3.3. Work is conducted in accordance with workplace environmental guidelines |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine product handling and storage requirements
- identify storage requirements including temperature limits, minimum duration at given temperatures, and segregation and co-storage requirements
- identify temperature controlled storage facilities and temperature zones available
- select, fit and use personal protective clothing and/or equipment
- use materials handling equipment in a temperature controlled environment as required to undertake work functions
- follow procedures to measure temperature of product, such as use of instrumentation as required to take core and surface temperatures
- read instrumentation, such as temperature gauges, to monitor stores and zone temperatures
- identify and report out-of-specification temperatures in product and storage facilities
- take corrective action in response to out-of-specification temperatures including implementation of procedures to segregate damaged or potentially unsafe product
- complete records of stock receipt and transfer as required
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- occupational health and safety (OHS) hazards and controls, including the purpose and limitations of protective clothing and equipment
- temperature controlled storage facilities and capacities available in the work area, such as temperature zones within a single store and concepts (e.g. the Cold Chain compliance) as relevant to work requirements
- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges, and where required requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating, and disposing of damaged or potentially unsafe stock
REQUIRED SKILLS AND KNOWLEDGE

- stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment
- food safety and quality consequences of stock temperature control requirements not being met
- monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation
- notification, recording and reporting requirements
- operating procedures for goods handling equipment as required
- housekeeping requirements for work area
- recording requirements and procedures
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify storage requirements of temperature controlled stock
- monitor temperature of storage area and stock to ensure standards are maintained
- handle and transfer stock to maintain required conditions
- identify and act on non-conformances
- complete workplace documentation
- apply food safety procedures.

### Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- temperature storage specifications
- stock handling and rotation systems
- controlled temperature storage facilities
- stock requiring storage
- load shifting equipment as required
- stock information recording system and procedures.

### Method of assessment

This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:

- FDFOP2007A Work in a freezer storage area
- TLIA1407C Use product knowledge to complete work operations
- TLID1007C Operate a forklift
- TLIK107C Use infotechnology devices and computer

**Guidance information for assessment**
To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Policies and procedures</th>
<th>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</th>
</tr>
</thead>
<tbody>

FDFOP2061A Use numerical applications in the workplace

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This is unit of competency covers the skills and knowledge required to apply basic mathematical functions of addition, subtraction, multiplication and division to undertake workplace calculations or to estimate approximate answers when exact calculations are not required. |

Application of the Unit

| Application of the unit | This unit has application in a production environment where basic mathematics may be required to undertake or support work processes. Typical applications of mathematical concepts in the workplace include but are not limited to measuring or estimating product characteristics, such as weight, capacity, time and temperature; measuring and estimating material usage, quantities and ratios; measuring equipment and processing parameters, such as speed/throughput; and calculating entitlements, such as pay, leave entitlements, and shift allowances. The unit requires both calculation and estimation skills with the choice between calculation and estimation dependent on the particular process and sector. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify whether a calculation or estimation is required to meet workplace requirements
- carry out calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables where required)
- use estimation techniques to check quantities, ratios, speed and other required data estimates
- use estimation techniques to check calculated results and workplace data
- record calculations and measurement information accurately according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals (to one decimal point) (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, such as charts, graphs and tables
- recording requirements and responsibilities where relevant
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify calculation or estimation requirements
- carry out calculations involving basic addition, subtraction, division and multiplication
- where estimations are used, estimated amounts must be consistent with process or product specification and demonstrate knowledge of measurement units used in the workplace
- use estimation techniques to check calculated results and workplace data.

### Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- work tasks requiring simple estimation and calculation
- conversion tables, calculators and measuring instruments where required
- workplace forms/documents used for recording data where required.

### Method of assessment

This unit should be assessed together with other units of competency relevant to the function or work role. Example could be:

- FDFOP2015A Apply principles of statistical process control.

### Guidance information for assessment

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Calculations**
Calculations may include:
- the use of whole numbers, decimals, fractions and percentages
Calculations may be made:
- manually or using calculators and other measuring instruments as appropriate to the task

**Estimations**
Estimations can be used where the workplace tasks require only an approximate judgment of an amount, ratio, speed, and so on. Estimations can be made from:
- observations of other amounts or measurements
- supplied data, such as volume or weight information on packaging of raw materials

**Conversion charts**
Conversion charts are those in common use in the workplace

**Results**
Results may or may not be recorded depending on workplace requirements

**Numerical information**
Numerical information may be presented in forms, including:
- simple run charts
- graphs

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for line setup | 1.1. Materials are confirmed and available to meet production requirements  
1.2. Equipment and related accessories are confirmed, available and fit for use to meet production requirements  
1.3. Tools and equipment required for line setup are available, operational and fit for use  
1.4. Processing parameters and settings are identified to meet production or packaging requirements |
| 2. Set up the line for operation | 2.1. Cleaning and maintenance requirements and status are identified and confirmed  
2.2. Equipment is inspected to confirm condition  
2.3. Machine settings are selected or adjusted as required to meet safety and production requirements  
2.4. Processing or packaging parameters are entered as required to meet production requirements  
2.5. Equipment performance is checked and adjusted as required  
2.6. Pre-start checks are carried out as required by workplace requirements  
2.7. Line setup is completed to match production or packaging schedule and operating requirements  
2.8. The line is ready and safe to operate and any maintenance requirements are reported according to workplace reporting requirements  
2.9. Work is conducted in accordance with workplace environmental guidelines  
2.10. Relevant personnel are notified of setup completion |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

**Ability to:**

- access production/packing schedule and related information to identify line setup/changeover requirements, such as checking product sequencing and compatibility, confirming that the required cleaning and/or sanitation has occurred and required packaging components and consumables are available as appropriate
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary equipment and related attachments, materials and services for production
- confirm supply of necessary equipment and services to carry out setup operations
- set and/or adjust equipment to meet production/packaging requirements, including selecting the required parameters or equipment settings, and changing processing set points as required
- position safety guards and cancel isolation/lockouts ready for operation
- confirm that sensors and related feedback instruments are correctly positioned and operational
- operate equipment to confirm equipment setup and make final adjustments as required
- time setup activities to meet production requirements
- advise affected work areas/personnel of completion of setup
- maintain work area to meet housekeeping standards
- load and/or position materials/ingredients/product and/or packaging consumables according to enterprise procedures
- use the control panel/system to set and adjust equipment components according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

**Required knowledge**

**Knowledge of:**

- basic operating principles of equipment and related accessories, including equipment adjustment points, range and location/alignment requirements of sensors and related feedback instruments, and status and purpose of guards
- operating capacities of equipment used in the work area, such as different types of

HLTFA301C Apply first aid

Modification History
Not Applicable
Unit Descriptor

Descriptor
This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance.

Application of the Unit

Application
These skills and knowledge may be applied in a range of situations, including community and workplace settings.

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency.

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries.

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit.

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency. The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Assess the situation | 1.1 Identify assess and minimise hazards in the situation that may pose a risk of injury or illness to self and others  
1.2 Minimise immediate risk to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements  
1.3 Assess casualty and identify injuries, illnesses and conditions |
2. Apply first aid procedures

2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness.

2.2 Use available resources and equipment to make the casualty as comfortable as possible.

2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner.

2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort.

2.5 Seek consent from casualty prior to applying first aid management.

2.6 Provide first aid management in accordance with established first aid principles and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements.

2.7 Seek first aid assistance from others in a timely manner and as appropriate.

2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures.

2.9 Use safe manual handling techniques as required.

2.10 Monitor casualty's condition and respond in accordance with effective first aid principles and procedures.

2.11 Finalise casualty management according to casualty's needs and first aid principles.
ELEMENT
3. Communicate details of the incident

PERFORMANCE CRITERIA

3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant communication media and equipment

3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services/other emergency services/relieving personnel

3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures

3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures

3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies

4. Evaluate own performance

4.1 Seek feedback from appropriate clinical expert

4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents

4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:
The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:
REQUIRED SKILLS AND KNOWLEDGE

- ARC Guidelines relating to provision of first aid as outlined
- Awareness of stress management techniques and available support
- First aid management of:
  - abdominal injuries
  - allergic reactions
  - altered and loss of consciousness
  - bleeding
  - burns - thermal, chemical, friction, electrical
  - cardiac arrest
  - casualty with no signs of life
  - chest pain
  - choking/airway obstruction
  - injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
  - envenomation - snake, spider, insect and marine bites
  - environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
  - fractures
  - medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
  - near drowning
  - poisoning and toxic substances (including chemical contamination)
  - respiratory distress
  - seizures
  - shock
  - stroke
  - substance misuse - common drugs and alcohol, including illicit drugs
- Social/legal issues:
  - duty of care
  - need to be culturally aware, sensitive and respectful
  - importance of debriefing
  - confidentiality
  - own skills and limitations
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to use...  

Essential knowledge (contd):

- Working knowledge of:
REQUIRED SKILLS AND KNOWLEDGE

- basic occupational health and safety requirements in the provision of first aid
- basic principles and concepts underlying the practice of first aid
- chain of survival
- first aiders' skills and limitations
- infection control principles and procedures, including use of standard precautions
- priorities of management in first aid when dealing with life threatening conditions
- procedures for dealing with major and minor injury and illness

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes the ability to:

- Administer medication in line with state/territory regulations, legislation and policies
- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit HLT CPR201A Perform CPR)
- Demonstrate:
  - ability to call an ambulance
  - consideration of the welfare of the casualty
  - safe manual handling
  - site management to prevent further injury
- Evaluate own response and identify appropriate improvements where required
- Follow OH&S guidelines
- Infection control, including use of standard precautions
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available
REQUIRED SKILLS AND KNOWLEDGE

- medical/pharmaceutical instructions
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:
- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:
- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines
EVIDENCE GUIDE

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Related units:

This unit incorporates the content of units:

- HLTCP201B Perform CPR
- HLTFA201B Provide basic emergency life support

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.
RANGE STATEMENT

Contextualisation to address specific requirements may include:
- Focus on first aid management of specific types of injury
- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Established first aid principles include:
- Preserve life
- Prevent illness, injury and condition(s) becoming worse
- Promote recovery
- Protect the unconscious casualty

Vital signs include:
- Consciousness
- Breathing
- Circulation

A hazard is:
- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

Hazards may include:
- Physical hazards
- Biological hazards
- Chemical hazards
- Hazards associated with manual handling

Risks may include:
- Risks from equipment, machinery and substances
- Risks from first aid equipment
- Environmental risks
- Exposure to blood and other body substances
- Risk of further injury to the casualty
- Risks associated with the proximity of other workers and bystanders
- Risks from vehicles
RANGE STATEMENT

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding
- Burns - thermal, chemical, friction, electrical
- Chest pain/cardiac arrest
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress/arrest
- Seizures
- Shock
- Stroke
- Substance misuse - common drugs and alcohol, including illicit drugs.
RANGE STATEMENT

First aid management must take into account applicable aspects of:

- The setting in which first aid is provided, including:
  - workplace policies and procedures
  - industry/site specific regulations, codes etc.
  - OHS requirements
  - state and territory workplace health and safety legislative requirements
  - location and nature of the incident
  - situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
  - location of emergency services personnel.
- The use and availability of first aid equipment and resources
- Infection control
- Legal and social responsibilities of first aider

Resources and equipment are used appropriate to the risk to be met and may include:

- AED
- First aid kit
- Auto-injector
- Puffer/inhaler
- Resuscitation mask or barrier
- Spacer device

Communication media and equipment may include but are not limited to:

- Telephones, including landline, mobile and satellite phones
- HF/VHF radio
- Flags
- Flares
- Two way radio
- Email
- Electronic equipment
- Hand signals

Appropriate clinical expert may include:

- Supervisor/manager
- Ambulance officer/paramedic
- Other medical/health worker
RANGE STATEMENT

Documentation may include:

- Injury report forms
- Workplace documents as per organisation requirements

Documentation may include recording:

- Time
- Location
- Description of injury
- First aid management
- Fluid intake/output, including fluid loss via:
  - blood
  - vomit
  - faeces
  - urine
- Administration of medication including:
  - time
  - date
  - person administering
  - dose
- Vital signs

Unit Sector(s)

Not Applicable
MSAPMSUP172A Identify and minimise environmental hazards

Modification History
Not applicable.

Unit Descriptor

Unit descriptor
This competency covers the awareness of environmental issues and organisation environmental policies and procedures to minimise environmental threats.

Application of the Unit

Application of this unit
This competency is performed by all operators in all plants. It reflects the regulatory requirements and the industry's concern to operate in an environmentally friendly manner. The operator will:

- identify activities/materials likely to be an environmental issue
- take the appropriate action on environmental issues as required.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites

Prerequisites
This unit has no prerequisites.
Individual organisations may choose to add prerequisites and co-requisites relevant to their processes.

Employability Skills Information

Employability Skills
This unit contains employability skills.

| **1. Identify potential environmental threats.** | 1.1 Recognise the type and severity of environmental threat posed by the materials and processes used for own work.  
1.2. Identify ways materials used may enter the environment.  
1.3. Identify sensitive features of the local environment and their impact on work practice and procedures. |
| **2. Identify workplace procedures and policies to minimise environmental threats.** | 2.1 Identify workplace policy for environmental protection.  
2.2. Identify in relevant standard operating procedures environmental protection measures appropriate for work.  
2.3. Explain contact procedures for personnel involved in environmental response teams.  
2.4. Recognise abnormal or unacceptable emission levels. |
| **3. Follow procedures to minimise environmental threats.** | 3.1 Implement environmental protection measures in relevant procedures.  
3.2. Report abnormal emissions/environmental issues to appropriate personnel.  
3.3. Apply containment procedures in accordance with SOPs where appropriate.  
3.4. Implement approved waste management procedures and practices.  
3.5. Follow approved safety procedures and use personal protective equipment as specified in procedures. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding is required of organisation environment protection systems, procedures and equipment sufficient to for work activities. Knowledge is required of organisation standard procedures and work instructions and relevant regulatory requirements, along with the ability to implement them within appropriate time constraints and in a manner relevant to the operation of the system.

Competence includes an awareness of:

- internal environmental control standards
- severity of environmental risks from materials and work processes used
- likely impact on the environment of materials and process.

Competency also includes an awareness of the local environment and environmental issues such as:

- sensitive waterways/wetlands
- flows from the plant to the environment (e.g., through sandy soil, local creek)
- particular environmental threats posed by materials and processes used and the work practices required to minimise these threats.

Also required is the ability to:

- communicate using in-plant reporting systems - verbal, electronic and written
- initiate first response to an environmental incident in accordance with SOPs
- use containment equipment
- use personal protective equipment
- use other required resources.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand typical product specifications, job sheets, procedures and work instructions, material labels and safety information as provided to operators. Writing is required to the level of completing workplace forms. Basic numeracy is required to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment. Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit
It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to identify actual and potential environmental breaches as appropriate to the job level.

Consistent performance should be demonstrated. For example, look to see that:

- standard procedures are followed
- deviations from desired conditions are recognised
- action specified in the standard procedures is carried out
- the impact of work practices/actions on the environment is understood.

**Assessment method and context**

Assessment will occur using a simulation and will occur in a work like environment. Competence in this unit may be assessed:

- by observation over time on a processing plant
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

**Specific resources for assessment**

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required. Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

**Range Statement**

**RANGE STATEMENT**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

**Context**

This competency applies to all work environments and sectors in the industries. Responses are restricted to a 'first response' approach, including the notifying of appropriate organisation personnel.
Procedures
All operations are performed in accordance with procedures. Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment
This competency includes use of equipment and tools such as:
- PPE
- spill kits.

Hazards
Typical workplace hazards include:
- chemicals and hazardous materials
- gases and liquids under pressure
- moving machinery
- materials handling.

Emissions/discharges
Typical emissions/discharges include:
- noise
- light
- odour
- gas
- smoke vapour
- liquid and solids
- particulates
- fumes.

Problems
Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical problems include:
- required information/materials not available
- required tool/equipment not available

Appropriate action for non-routine problems may be reported to designated person or other action specified in the procedures.

Unit Sector(s)
Not applicable.
MSL904001A Perform standard calibrations

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |
Licensing/Regulatory Information
Not applicable.

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills include:

- selecting and applying appropriate test methods and calibration procedures
- maintaining close attention to procedures, accuracy and precision of measurement to ensure the integrity of test/calibration results
- using calibration and correction charts
- calculating to give results in appropriate accuracy, precision and units
- preparing test/calibration documentation that is accurate and complies with requirements
- operating equipment correctly and safely
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and report opportunities for improvements to procedures

### Required knowledge

Required knowledge includes:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures, and applications
- National Association of Testing Authority's (NATA) and National Measurements Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- methods for statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement (may include the use of software)
- reporting procedures and legislative requirements
- handling, transport, storage and operation of reference and working standards
- laboratory environmental control requirements
- relevant health, safety and environmental requirements
- layout of the enterprise, divisions and laboratory
- organisational structure of the enterprise
- lines of communication
- role of laboratory services for the enterprise and customers
### REQUIRED SKILLS AND KNOWLEDGE

**Specific calibration fields**

Additional knowledge requirements may apply for different calibration fields. For example, testing and calibrations conducted in the following:

- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurements
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Assessors should ensure that candidates can:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- maintain very close attention to procedures, accuracy and precision of measurement to ensure integrity of test/calibration results (especially during lengthy tests)</td>
</tr>
<tr>
<td></td>
<td>- critically examine each calibration step to ensure repeatability and validity of data</td>
</tr>
<tr>
<td></td>
<td>- apply all relevant procedures and regulatory requirements to ensure the quality and integrity of the services or data provided</td>
</tr>
<tr>
<td></td>
<td>- prepare test/calibration documentation that is accurate and complies with requirements</td>
</tr>
<tr>
<td></td>
<td>- operate equipment correctly and safely</td>
</tr>
<tr>
<td></td>
<td>- recognise problems or departures in systems and documentation and initiate actions to prevent or minimise them</td>
</tr>
<tr>
<td></td>
<td>- recognise and report opportunities for improvements to procedures.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL924001 Process and interpret data
- relevant MSL974000 series unit of competency
- relevant MSL975000 series unit of competency.

Resources may include:

- specialised calibration/test equipment, reference standards and laboratory facilities
- access to a library of calibration methods, procedures and equipment specifications
- enterprise quality manual and procedures.

### Method of assessment

The following assessment methods are suggested:

- review of calibration results, uncertainty calculations and workplace documentation completed by the
**EVIDENCE GUIDE**

| Candidate | feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate  
|           | observation of the candidate performing standard calibrations  
|           | oral or written questioning to check underpinning knowledge of standard calibration procedures. |

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

**This competency in practice**

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

**Background**

Calibration work may be simple or highly complex depending upon the type of equipment being calibrated and the accuracy or uncertainties required. Manual calibrations may involve interconnecting equipment and setting the stimulus devices to the settings listed in the procedure. At each setting, the technician must verify that the response or output of the unit under test (UUT) is within the tolerances specified in the procedure. In addition, many procedures require that 'as-found' (before adjustment) and 'as-left' (after adjustment) results are recorded for maintaining the UUT documentation history.

Often calibration technicians must assess and document the total uncertainties for a given measurement by analysing equipment specifications and methodology.
EVIDENCE GUIDE

during calibration. They have to interpret specifications and technical information and demonstrate initiative when adjusting and repairing instruments.

The calibration technician's workload can be routine and repetitive. A perpetual backlog of work and the constant need to reduce turn-around-time to meet client demands, coupled with enterprise productivity goals, can induce stress and mental fatigue if not carefully managed. However, it is essential that all personnel are able to perform tests and associated work tasks without undue pressure that might influence technical judgement if 'integrity of measurement' is to be retained. Errors arising from items incorrectly calibrated will, at best, have to be recalled which wastes time, resources and destabilises enterprise credibility. At worst, if undetected, they may have severe safety implications to personnel or equipment, depending on the nature of the item.

Calibration (1)

A customer delivers a test pressure gauge and requires certification that the gauge conforms to manufacturer's specifications. Personnel in the item reception area log the job and the laboratory supervisor assigns it to a calibration technician. He/she reads the work order and retrieves the approved calibration procedure. The procedure requires the customer's gauge to be tested to 1000 kPa using a hydraulic test station. The technician assembles the required apparatus and personal protective equipment. The gauge is visually inspected for defects and contamination. The temperature of the environment is checked and the hydraulic test station confirmed as fully operational. The required pressures are applied to the gauge and the indicated readings are transcribed onto the test report. The technician notes that some readings are outside the allowable tolerance and adjustments will have to be made. He/she takes another set of readings after making the necessary adjustments and records them on the report. The technician applies the required labels to the gauge, updates the database, produces a test report and places the item on the quality assurance bench for inspection by the supervisor. The supervisor visually inspects the item and checks the readings on the report. The job has taken two hours to complete.

Calibration (2)

A client has asked the laboratory to calibrate a spectrum
**EVIDENCE GUIDE**

| analyser to manufacturer's specification. The supervisor assigns the job to a calibration technician who reads the job sheet and locates the appropriate calibration procedure. Although this spectrum analyser will be calibrated partly with the aid of automated technology, the technician estimates that the calibration will still take about nine hours to complete. The technician reads the procedure and assembles the equipment and allows for the required warm-up time for instrument stabilisation. Possible sources of error are minimised by cleaning connectors and tensioning them with the torque spanner. The technician performs the manual phase of the test and manually records 12 pages of results. The equipment is reconnected for the automated part of the procedure the test recommenced. The technician produces a further six pages of results. These are assessed for errors and non-conformances and all calculations are carefully checked. A final report is produced which accompanies the spectrum analyser to the quality assurance bench for checking by the supervisor. All cables and equipment used for the calibration are returned to the store. |
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Standard calibrations

Standard calibrations may include testing and/or calibrating the following equipment and reference materials using standard methods and procedures:

- test equipment, such as anemometers, balances, barometers, calipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments
- electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references
- working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers

### Hazards

Hazards may include:

- electric shock
- disturbance or interruption of services
<table>
<thead>
<tr>

</table>
| 1. Interpret brief and design feasible project plan | 1.1. Interpret and confirm project objectives, deliverables, constraints and principal work activities  
1.2. Determine resource requirements, including personnel, equipment and materials  
1.3. Develop a detailed implementation plan for the project outlining methodology, milestones and budget  
1.4. Identify roles and responsibilities of project team members  
1.5. Analyse quality requirements to ensure compliance with quality standards  
1.6. Develop risk management strategies and risk management plans to ensure successful and timely outcomes |
| 2. Establish and implement project plan | 2.1. Brief team members about the project and allocate roles and responsibilities, balancing job roles and skills development opportunities  
2.2. Establish communication and reporting mechanisms  
2.3. Implement agreed time management strategies to ensure milestones are met  
2.4. Apply agreed quality requirements to measure performance and outcomes |
| 3. Manage project | 3.1. Monitor and report progress of activities in relation to the project plan  
3.2. Ensure income and expenditure is in line with the agreed project plan and budget  
3.3. Work with the team to analyse and diagnose problems and to determine corrective actions  
3.4. Implement agreed variations to the plan to accommodate changing situations  
3.5. Maintain accurate records and communication with stakeholders and project team members |
| 4. Finalise project | 4.1. Ensure project objectives are met and deliverables are provided on time and within budget  
4.2. Complete all reporting requirements |
| 5. Evaluate project methodology | 5.1. Assess the effectiveness of resource management in delivering project outcomes  
5.2. Evaluate the effectiveness of communication processes used throughout the project |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | 5.3. Recommend improvements for future projects

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Required skills include:

- analysing a complex technical brief and preparing a feasible project implementation plan
- establishing a project team and implementing a project in response
- reaching milestones within budget
- consulting and communicating effectively to ensure the project outcomes are achieved
- maintaining accurate records and documentation in accordance with the enterprise procedures
- selecting and establishing operational systems for the project
- planning work activities, resources and finances to ensure the project outcomes are achieved within the timeframe and budget constraints
- monitoring and evaluating the progress of the project

**Required knowledge**

Required knowledge includes:

- purpose and methods of planning
- techniques for monitoring timelines, expenditure and team performance
- techniques for achieving effective communication and cooperation
- techniques for troubleshooting, problem solving and conflict resolution
- reporting requirements
- techniques for evaluation and continuous improvements
- relevant health, safety and environment requirements
- laboratory's business goals and key performance indicators
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Assessors should ensure that candidates can:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• analyse a complex technical brief and prepare a feasible project implementation plan</td>
</tr>
<tr>
<td></td>

<td>• select and establish operational systems for the project</td>
</tr>
<tr>
<td></td>
<td>• plan work activities, resources and finances to ensure project outcomes are achieved within the timeframe and budget constraints</td>
</tr>
<tr>
<td></td>
<td>• monitor and evaluate the progress of the project.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL916002A Manage and develop teams
- MSL936001A Maintain quality system and continuous improvement processes within work/functional area.

Resources may include:

- procedures and documentation typically used by the enterprise
- scheduling charts/strategic plans
- GANTT charts
- operational reports
- financial plans
- sample budgets.

### Method of assessment

The following assessment methods are suggested:

- review of reports, operational budgets and project
### EVIDENCE GUIDE

</table>

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

### This competency in practice

**Manufacturing**

A cosmetics manufacturing company decided to upgrade the image of a product range which included lipsticks, nail lacquers, hair shampoos and conditioners. A technical specialist coordinated the project and organised input from marketing, development, quality assurance and production personnel. The production boundaries were defined through consultation with marketing and it was decided to update shades of shaded products and introduce natural ingredients whenever possible. The project had to be completed within a reasonably short timeframe and within a tight budget which placed overall constraints on the way the project could be handled. After developing and gaining approval for an
EVIDENCE GUIDE

| Implementation plan, team members were briefed and development samples produced for approval. Product characteristics were checked and recommendations made for adjustments until each product met requirements. When pilot batch manufacture had been successfully completed, project development processes were fully documented and then passed to production to allow for efficient development of production batches. |
| Environmental |
| The quality team in a laboratory has set a goal of getting reports out more quickly and assigned the coordination of the project to one of the senior technical officers. The officer prepared an outline of the project, a timeframe, a resource list and budget. Specific tasks were allocated to members of the quality team according to their abilities and existing work commitments. The officer monitored the project's progress by tracking and adjusting elements as necessary. After the development of a final draft for the revised procedures, a draft project report was prepared for consideration by the quality team. |
| Food processing |
| A dairy company currently uses an imported cocoa-based product for the chocolate flavouring of their milk. Following a feasibility study of a range of ingredients, it was decided to investigate further an alternative source on the basis of cost. A technical specialist prepared a project plan that included required personnel, materials, equipment and a detailed GANTT chart. Key personnel from quality assurance, production, engineering, product development and marketing were chosen for the project team. The project was monitored to confirm progress, control expenditure and review the suitability of the alternative product source. At the end of the project, the technical specialist assessed the outcomes and prepared a detailed report that recommended the use of a local ingredient. |
# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |

</table>

### Required skills

Required skills include:

- performing simple calculations
- preparing and interpreting straightforward tables, graphs and charts
- applying calculations in the workplace
- coding, recording and checking data accurately
- presenting accurate results in the required format
- recognising obvious trends in data
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

### Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- conversion of units involving multiples and submultiples
- significant figures, estimation, approximation, rounding off
- substitution of data in formulae
- calculations involving fractions, decimals, proportions and percentages
- procedures for maintaining and filing records, security of data
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit may be assessed with technical units, such as:

- MSL973001A Perform basic tests
- MSL973002A Prepare working solutions
- MSL973007A Perform microscopic examination.

Resources may include:

- data sets and records
- computer and relevant software or laboratory information system
- relevant enterprise procedures.

### Method of assessment

The following assessment methods are suggested:

- review of data worksheets, calculations, graphs and tables prepared by the candidate
- review of records transcribed, maintained or stored by the candidate
- feedback from supervisors and peers
- observation of the candidate as they record data and perform calculations
- questions to assess understanding of relevant procedures and trends in data.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made.
EVIDENCE GUIDE

to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

<th>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Construction materials</strong></td>
</tr>
<tr>
<td></td>
<td>A laboratory assistant is given 20 soil samples and asked to test their moisture content by weighing each sample, placing them in an oven for 24 hours and then reweighing them. The assistant performs the tests in accordance with the standard method and then calculates the % water content by dividing the weight loss by the wet weight and multiplying by 100. He/she checks the results. After entering them into the laboratory information management system (LIMS), they notice that they are consistently less than the previous results recorded for soils at the same site. The assistant reports the discrepancy to the supervisor who checks whether the oven was operated at the required temperature. The supervisor then discovers that the assistant has calculated the moisture content by dividing the weight loss by the wet weight instead of the dry weight. The assistant recalculates the moisture content for the 20 samples and notes that the results are now consistent with previous results.</td>
</tr>
<tr>
<td></td>
<td><strong>Manufacturing</strong></td>
</tr>
<tr>
<td></td>
<td>On Friday, a laboratory assistant performs the routine set of temperature, pressure and humidity measurements at 10 sites in a refinery. They enter the data on a pre-prepared data sheet that also contains the data recorded for the previous days of that week. The assistant checks the data for any significant variations to that recorded previously. They notice that for site #5, the temperature reading is 250°C which is 100°C below the expected value. The assistant repeats the measurement</td>
</tr>
</tbody>
</table>
and gets the same result. After returning to the laboratory, the assistant enters the data into the LIMS and reports the odd result to their supervisor. The supervisor contacts the site manager and finds out that the pipeline at site #5 has been isolated as part of unscheduled maintenance in that part of the site.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Manufacturing**

A laboratory assistant in a materials testing laboratory was performing routine tensile tests on samples of vinyl sheet. The assistant converted the readings from the machine to appropriate units using a simple calculation and recorded them in the logbook for that test method. After comparing these test results with previous results for the same type of vinyl material, the assistant found that the tensile strength was within the required range. However, it was at the lower rather than the upper end of the range as in previous testing. The assistant discussed the results with the laboratory supervisor. The calibration file for that machine showed that it had been calibrated four months previously and had not needed adjustment. Test results for the same period showed that the machine was giving lower than normal tensile strength readings for the few higher strength materials tested over the last two months. The assistant did some more checks and confirmed this trend. The machine was re-calibrated by the instrument company and the frequency of internal calibration checks by the laboratory assistant was increased. This problem would not have been detected or corrected as quickly without the assistant's initiative and competent recording and retrieval of test results and

<td>A technical assistant works in a team with laboratory scientists and technical officers. Analyses of electrolytes are routine and occur in large volume throughout even in this small diagnostic laboratory. The assistant is assigned tasks that contribute to the overall production of results, their reporting and the quality control evaluation of the results. One task is the daily collection of the electrolyte analyses from the internal quality control area. In this case, the technical assistant plots the results on a Levy-Jennings graph and computes the mean value. The assistant reports immediately to the supervisor if the plots show deviations which indicate out-of-control results.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Food processing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cooking and holding temperatures greatly affect the nutrient composition of processed foods. The CSIRO provides documentation of nutrient losses with temperature variations. For cooked foods, there is the added problem of microbial growth in the so called ‘danger zone’. In one laboratory, the technical assistant conducts simple testing of foods using a temperature probe and also measures the temperature of the storage areas, holding trays or bainmaries and individual tray units. Careful documentation of the temperatures of the foods and times of measurement must be kept. The technical assistant supplies the data as tables and a plot of temperature versus time. For quality control purposes, the assistant is directed to use a cross reference of mercury thermometer readings versus probe measurements for ambient temperature. The assistant plots the thermometer readings against the probe readings and reports to the supervisor if the plot shows a slope other than the defined value.</td>

**Concepts of metrology**

Concepts of metrology may include:
## RANGE STATEMENT

- that all measurements are estimates
- measurements belong to a population of measurements of the measured parameters
- repeatability
- precision
- accuracy
- significant figures
- sources of error
- uncertainty
- traceability

### Data

Data may be recorded on:
- worksheets
- spreadsheets
- databases linked to information management systems

Data may include results of:
- observations
- tests and measurements
- analyses
- surveys
- quality assurance and control assessments

Data may be presented in the form of:
- graphs
- tables
- histograms
- pie charts
- bar charts
- control charts
- semi-quantitative observations and be expressed on a scale (for example, 1 to 4 or + to ++++)

### Calculations

Calculations may be performed:
- with or without a calculator
- using computer software, spreadsheets, databases and statistical packages

### Calculations of scientific quantities

Calculated of scientific quantities may include:
- converting units involving multiples and submultiples
## RANGE STATEMENT

- significant figures, round off, estimate and approximate
- transposing and evaluating formulae
- fractions, decimals, proportions and percentages
- perimeters and angles
- percentage and absolute uncertainties in measurements and test results
- statistical values of data, such as mean, median, mode and standard deviation
- areas (m$^2$) and volumes (mL, L, m$^3$) of regular shapes, such as packaging
- dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
- ratios, such as mass to mass, mass to volume and volume to volume percentages
- concentration, such as molarity, g/100mL, mg/L, mg/(L, ppm, ppb), dilution mL/L
- average count, colonies per swab surface and cell counts, such as live and dead/total
- process variables, such as pressure, gauge pressure, velocity and flow rates
- biological oxygen demand (BOD), chemical oxygen demand (COD) and total organic carbons (TOC)
- % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
- food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability
- stress, strain, moduli and force

## Records

Records could include information associated with:
- purchase of equipment and materials, service records
- safety procedures
- history of calibration and test results

## Occupational health and safety (OHS) and environmental

OHS and environmental management requirements:
### RANGE STATEMENT

<table>

Required Skills and Knowledge

REQUID SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing laboratory computations
- calculating scientific quantities
- statistical analysis
- graphical analysis
- reporting results in the required formats and expected timeframe
- storing, retrieving and manipulating data following document traceability procedures
- maintaining the security and confidentiality of data in accordance with workplace and regulatory requirements

Required knowledge

Required knowledge includes:

- relevant scientific and technical terminology such as: variables, dispersion, central tendency, process control, process stability, normal distribution, confidence level and replication
- calculations involving evaluation of formulae containing algebraic, power, exponential and/or logarithmic functions
- preparation and interpretation on linear and non-linear graphs, complex control charts and frequency distribution plots
- determination of regression line equations, correlation coefficients
- statistical analysis and significance tests, such as t-test, f-test, analysis of variance (ANOVA)
- data acceptability tests, such as Q, T and Youden
- the characteristics of a valid measurement
- relevance/importance of the national measurement legislation and guidelines to laboratory measurement
- sources and estimates of uncertainty in measurements
- procedures for data traceability
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and maintaining security of data
**Evidence Guide**

**Context of and specific resources for assessment**

This unit of competency is to be assessed in the workplace or simulated workplace environment. This unit of competency may be assessed with:

- MSL924002A *Use laboratory application software*
- technical units, such as:
  - *relevant MSL974000 series units of competency*
  - *relevant MSL975000 series units of competency*.

Resources may include:

- data sets and records
- computer and relevant software or laboratory information system
- relevant workplace procedures.

**Method of assessment**

The following assessment methods are suggested:

- review of data worksheets, calculations, computer files (such as spreadsheets, databases), statistical analysis, graphs and/or tables prepared by the
**EVIDENCE GUIDE**

| Candidate | • questions to assess understanding of relevant procedures, trends in data and sources of uncertainty  
|           | • review of reports prepared by the candidate  
|           | • feedback from supervisors and peers regarding the candidate's ability to analyse and report data in accordance with enterprise procedures. |

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

</tr>
</thead>
<tbody>
<tr>
<td>Manufacturing</td>
<td>Before pharmaceutical products can be approved for use in Australia, they must be tested for shelf life in their Australian sales packs. The shelf life of a preparation is the time of storage which results in a preparation becoming unfit for use, either through chemical decomposition of the active substances or physical deterioration of the preparation. Stability profiles are determined by storing the preparation under a range of temperature conditions and evaluating it at predetermined time intervals. For example, a technical assistant may be required to evaluate the physical parameters of the new tablet to detect any changes in its appearance, hardness, friability, disintegration and dissolution profile. The assistant regularly assays the tablets using a stability indicating assay. The results are plotted and the information gained is used to predict the</td>
</tr>
</tbody>
</table>
period of time for which the tablets will meet the appropriate standards for physical characteristics, purity and potency when stored under defined conditions.

**Biomedical**

Supplementation of vitamins and minerals in the diet as a means to avert a clinical problem is a popular area of research, linking epidemiological and clinical investigation with food analyses. In the example of folate, such combined studies have led to the fortification of a number of foods and the requirement for folate supplementation for women of child bearing age. A typical project team would involve medical staff, a dietician and a scientific or technical officer to perform the assays. One possible line of study is to control the level of supplementation for the person and introduce the micronutrient in a dose form over and above that given in a controlled baseline diet. Blood samples would be collected and the serum micronutrient levels assayed. The technical officer would be responsible for keeping the statistical quality control data and analysing the assays. The technical officer would work with the research team to correlate the serum levels with the dose input. To contribute effectively, the technical officer must understand the significance of the relationships between collected test data and the controlled experimental variables.

**Food processing**

A state government analytical laboratory recently performed comparative assays of (-carotene using ultraviolet-visible (UV-VIS) spectrometric and high performance liquid chromatography (HPLC) techniques. In any procedure where the assay is to be replaced, side by side analyses must be performed on multiple samples and the correlations between the data compared statistically. The two procedures are then developed or modified for local laboratories and a routine procedure developed. At this point, technical officers would assay the samples by the two methods. They would ensure that all procedures were followed with close attention to quality control. Precision would be assessed through frequent assays of the same samples. Sensitivity of the assay would be assessed by performing the assay over a range of sample concentrations. The technical officers would carefully document the procedures and record all

#### Required skills

Required skills include:

- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- minimising the exposure to hazards of self, others and the laboratory
- safely storing equipment and materials using enterprise procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records
- reporting potential hazards and maintenance issues using enterprise procedures

#### Required knowledge

Required knowledge includes:

- enterprise procedures for the cleaning of work preparation areas, materials and equipment
- storage requirements for specific materials and equipment
- enterprise procedures for minimisation and disposal of waste
- enterprise procedures for monitoring of laboratory stocks
- information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
- relevant health, safety and environment requirements
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Assessors should ensure that candidates can:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• follow enterprise procedures, relevant codes and guidelines when maintaining the laboratory/field workplace</td>
</tr>
<tr>
<td></td>
<td>• work safely and minimise exposure of hazards to self, others and the laboratory</td>
</tr>
<tr>
<td></td>
<td>• keep accurate up-to-date records and report potential hazards and maintenance issues.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- **MSL943002A Participate in laboratory/field workplace safety.**

Resources may include:

- access to work preparation areas, stocks, materials and equipment
- cleaning, decontamination and/or disinfection agents and equipment
- personal protective equipment
- stock order firms, labels and records/forms.

### Method of assessment

The following assessment methods are suggested:

- observation of the candidate’s techniques for cleaning and/or removal of spillages and waste disposal
- review of stock records completed by the candidate
- feedback from supervisors and peers
- questioning to assess underpinning knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess.
EVIDENCE GUIDE

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

This competency in practice

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.

Manufacturing

On receipt of a bulk container of cleaning or sanitising agent, a laboratory assistant always attached to the container a description of its method of use. The assistant also attached a list of the surfaces, apparatus, utensils and machines that could be safely treated with that chemical agent as outlined in the company's quality manual. This practice reduced the likelihood of misuse of the chemical, wastage, damage to equipment and inadequate cleaning and sanitation.

Biomedical and environmental

Laboratory assistants and technical officers routinely examine fluids for micro-organisms using a microscope. They examine fluids, such as urine, seawater, chlorinated pool water, water from catchment areas and bottled water. To maintain microscopes in working order, they thoroughly clean the stage, oculars and each objective after use and sometimes between samples. The 100X objective requires particular care since this is the oil immersion objective. The oil is slightly acidic and will slowly corrode the objective if it is not cleaned thoroughly and regularly. After using the 100X objective they also take care not to drag the other objectives through the oil.

Food processing

A laboratory assistant regularly uses standard pH
| EVIDENCE GUIDE | solutions to calibrate the laboratory's pH meters. The assistant is aware from the label that the shelf life of these solutions after opening is two months and records the opening and disposal dates on the container. The assistant is also aware that the shelf life of unopened buffer solutions is twelve months from the date of manufacture and monitors this by noting the production date on the bottle. Requests for stock replacement take into account the normal rate of use of these buffer solutions so that unopened bottles have not reached their expiry date before use. |
# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>

### RANGE STATEMENT

- spillages, leakages, breakages and contamination
- stock requirements and shortages

### Hazards

Hazards may include:

- aerosols from broken centrifuge tubes and pipetting
- chemicals, such as acids, heavy metals, pesticides and hydrocarbons
- crushing, entanglement and cuts associated with moving machinery or falling objects
- cryogenics, such as dry ice and liquid nitrogen
- electric shock
- fluids under pressure, such as steam and industrial gas cylinders
- manual handling, working at heights and working in confined spaces
- microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
- occupational overuse syndrome, slips, trips and falls
- pedestrian and vehicular traffic
- sharps, broken glassware and hand tools
- solar radiation, dust and noise
- sources of ignition, flammable liquids and gases

### Established safe work practices

Established safe work practices may include:

- applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets and Class PCII, PCIII, and PCIV physical containment facilities
- ensuring access to service shut-off points
- following established manual handling procedures for tasks involving manual handling
- handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions
- identifying and reporting operating problems or equipment malfunctions
RANGE STATEMENT

- labelling of samples, reagents, aliquoted samples and hazardous materials
- recognising and observing hazard warnings and safety signs
- reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates
- use of MSDS
- use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots

**Occupational health and safety (OHS) and environmental management requirements**

- OHS and environmental management requirements:
  - all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
  - all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
  - where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Perform setup and pre-use checks of laboratory equipment | 1.1. Perform laboratory equipment setup and pre-use checks in accordance with enterprise procedures  
1.2. Perform safety checks in accordance with relevant enterprise and instrumental procedures  
1.3. Identify faulty or unsafe components and equipment and report to appropriate personnel  
1.4. Complete instrument log books/records to meet enterprise requirements |
| 2. Perform calibration checks | 2.1. Start up equipment according to operating procedures  
2.2. Use specified standards for calibration check  
2.3. Check equipment as per calibration procedures and schedules  
2.4. Record all calibration data accurately and legibly  
2.5. Compare data with specifications and/or previous records to identify non-compliant equipment  
2.6. Quarantine out of calibration equipment |
| 3. Assist with equipment maintenance | 3.1. Ensure all equipment work areas are clean during and after equipment use  
3.2. Perform basic maintenance in accordance with enterprise procedures  
3.3. Clean and store equipment according to enterprise and/or manufacturer’s specifications/procedures  
3.4. Identify and replace, repair or dispose of damaged/worn equipment as appropriate |
| 4. Maintain records | 4.1. Record and report information on unsafe or faulty equipment according to enterprise procedures |
### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:
- performing setup, pre-use checks and shutdown procedures
- performing calibration checks of basic equipment using standard procedures
- obtaining readings of the required accuracy and precision
- identifying non-compliant equipment from specifications and/or previous checks
- recognising non-standard behaviour of instruments
- assisting with maintaining equipment in working order by performing basic maintenance tasks
- following all relevant occupational health and safety (OHS) requirements
- following enterprise recording and reporting procedures

#### Required knowledge

Required knowledge includes:
- operational principles and methods for equipment use
- basic sources of error in equipment operation and their control
- role and importance of correct calibration
- basic equipment maintenance procedures
- enterprise communication and reporting procedures
- relevant OHS and environment requirements
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:
- perform setup pre-use checks and shutdown procedures
- perform calibration checks of basic equipment using standard procedures
- obtain readings of the required accuracy and precision
- recognise non-standard behaviour of instruments
- assist with maintaining equipment in working order by performing basic maintenance tasks
- follow all relevant OHS requirements
- follow enterprise recording and reporting procedures.

Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:
- MSL973001A Perform basic tests.

Resources may include:
- standard laboratory equipped with appropriate equipment and reference materials
- enterprise procedures and standard methods, equipment manuals
- calibration check standards and procedures
- maintenance procedures.

Method of assessment

The following assessment methods are suggested:
- review of the quality of test data/results achieved by the candidate over time
- inspection of records and workplace documentation completed by the candidate
- feedback from peers and supervisors
- observation of the candidate performing calibration checks and basic maintenance tasks

In all cases, practical assessment should be supported by
EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>This competency in practice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</td>
</tr>
</tbody>
</table>

**Manufacturing and construction materials testing**

Laboratory assistants perform calibration checks and operate a range of laboratory equipment to ensure the quality of products. For example, the labelling on fertilisers specifies the total percentage of nitrogen [N or N(t)], the total percentage of phosphorus [P or P(t)] in all forms and the total percentage of potassium [K]. A 5-10-5 fertiliser contains 5% N, 10% P and 5% K.

During the manufacture of fertiliser, an assistant in a quality control laboratory measures the concentration of nitrogen, phosphorus and potassium using standard analytical methods to ensure that the final products are within prescribed specifications. The assistant must pay particular attention to the equipment calibration check. If the equipment is out of calibration no amount of testing skill will result in accurate results. Selling out of specification fertiliser could result in a product recall or claims from users against the manufacturer.

**Biomedical and environmental services**

Laboratory assistants are quite often involved in routine collections and culturing of cells. Bacterial cells are often cultured and grown to large populations in order to provide material from which to extract biological materials. A quick method of determining when the cell growth has yielded enough cells is to determine the
**EVIDENCE GUIDE**

<table>
<thead>
<tr>
<th>absorbance of the cell culture by measuring absorbance at 600 nm. An absorbance of 1 to 1.5 will give a good cell harvest. This method relies on the assistant being able to perform calibration checks on an ultraviolet-visible (UV-VIS) spectrometer.</th>
</tr>
</thead>
</table>

**Food and beverage processing**

A laboratory assistant in the quality control laboratory of a fruit canning company is required to perform calibration checks and maintain and operate a range of equipment, including a pH meter. Canned pears, for example, are routinely checked for pH to ensure safe heat processing. While checking the calibration of the pH meter with the standard buffer solutions, the laboratory assistant found that stable pH readings could not be obtained. On closer inspection, it was found that the pH probe was damaged. This was reported to the supervisor. The probe was replaced and the meter was re-checked for calibration in readiness for routine testing.

**Construction Materials Testing**

A laboratory assistant has been allocated the task of performing in-house calibration checks on the laboratory's equipment. He/she has previously prepared a wall chart for the year that shows when the required calibration checks fall due in accordance with the NATA Field Application Document (FAD) for construction materials testing. The assistant consults the wall chart and notes that this month's calibration checks include checking the:

- ice points of the liquid-in-glass thermometers
- working sieves against the reference set
- compaction hammers for compliance with specifications
- repeatability of the balances.

A full calibration of one of the laboratory's nuclear density gauges is also required. He/she then telephones the local calibration authority to book the nuclear gauge in for calibration and prepares to perform the other in-house checks.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Codes of practice</th>
<th>Where reference is made to Industry codes of practice and Australian/international standards, it is expected the latest version will be used</th>
</tr>
</thead>
</table>

### Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
  - AS/NZS 2243 Set:2006 Safety in laboratories set
  - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
  - Australian code of good manufacturing practice for medicinal products (GMP)
  - National Association of Testing Authorities (NATA) Field Application Documents (FADs)
  - calibration check and maintenance schedules
  - enterprise recording and reporting procedures
  - equipment manuals
  - equipment start up, operation and shutdown procedures
  - material safety data sheets (MSDS)
  - material, production and product specifications
  - national measurement regulations and guidelines
  - OHS national standards and codes of practice
  - principles of good laboratory practice (GLP)
  - production and laboratory schedules
  - quality manuals
  - standard operating procedures (SOPs)

### Typical equipment and instruments

Typical equipment and instruments may include:

- balances, pipettes, burettes and volumetric glassware
RANGE STATEMENT

- colorimeters/spectrometers and polarimeters
- compaction rammers and soil classification equipment
- conductivity meters and pH meters
- disintegration apparatus, thermometers, incubators and water baths
- instrument chart recorders, penetrometers, force measuring equipment and tensiometer
- melting point apparatus, viscometers and hardness testing equipment
- mixing and separating equipment such as centrifuges, riffles and splitters, and mixers
- noise meters and blasting meters
- optical microscopes

Occupational health and safety (OHS) and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

</thead>
</table>
| 1. Maintain and control stocks of materials or equipment | 1.1. Label, document and store stocks in accordance with relevant standards and specific safety requirements  
1.2. Follow stock rotation procedures to maximise use of stocks within permitted shelf life  
1.3. Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level  
1.4. Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate  
1.5. Initiate quality control sampling and testing procedures when appropriate  
1.6. Report stock problems outside own knowledge and authority limitations to relevant personnel |
| 2. Order and receive materials and equipment | 2.1. Determine requirements of customers and suppliers using appropriate communication and interpersonal skills  
2.2. Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions  
2.3. Place and/or follow up approved orders using enterprise systems and procedures  
2.4. Check condition of received goods and take appropriate action |
| 3. Maintain stock records | 3.1. Record all relevant details accurately using the specified forms/computer system  
3.2. Ensure that written information is legible and indelible  
3.3. File all records in the designated place |
| 4. Maintain a safe work environment | 4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel  
4.2. Minimise the generation of wastes and environmental impacts  
4.3. Ensure the safe collection of redundant/outdated stocks for subsequent disposal |
### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- maintaining and controlling stocks or materials and equipment
- ordering and receiving materials and equipment
- maintaining stock records
- maintaining a safe work environment

#### Required knowledge

Required knowledge includes:

- technical terminology relating to ordering and storage of stocks
- laboratory stock, product and service information
- types of chemical reactions and rationale for recommended storage systems
- enterprise procedures and quality system requirements for stock control
- codes of practice and regulations concerning the handling, storage and transport of the stock involved
- relevant health, safety and environment requirements
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### EVIDENCE GUIDE

#### Method of assessment

The following assessment methods are suggested:

- review of documentation for orders prepared by the candidate
- examination of stock records maintained by the candidate
- observation of the candidate handling stock and conducting quality control sampling and testing
- feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
- explanation by the candidate of the labelling and storage requirements of a selection of stock items.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

#### This competency in practice

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

**Biotechnology**

A technical officer arrived at work on Monday morning and discovered that the freezer had been turned off over the weekend and the restriction nucleases had thawed. These enzymes were to be used that morning. The technician needed to check the enzyme activity to determine whether the enzymes had been denatured by the rise in temperature. The technician quickly set up a digestion mix of affected enzyme with some viral DNA of known sequence. The digest produced DNA fragments of expected length, showing the enzyme still had activity.
**EVIDENCE GUIDE**

The technician reported the incident along with the results to the supervisor, who decided that the enzymes could be used for that day.

**Manufacturing**

Neglected chemicals may deteriorate on the shelf and turn into a completely different entity. Not only can this change in identity damage a chemical manufacturing process, it can also present an immediate hazard. For example, this occurred in a storeroom where stored ether built up high levels of peroxides. When it was used in an extraction process to make a starting material in a manufacturing process, the peroxides were concentrated and exploded. The company was fortunate that loss of life didn't occur. The company revised enterprise procedures to ensure that in the future, redundant or outdated stocks are identified and removed.

**Food processing**

The staff in a confectionary company laboratory use enzyme based methods to routinely analyse sugars (glucose, fructose, sucrose and lactose) in products. Although the enzymes are stored as directed by the manufacturer, typically at -20°C in the dark, they do not retain their activity indefinitely. To avoid using inactive enzyme in an analytical procedure and obtaining a reduced or false negative result, several features of each enzyme preparation are routinely noted. These include the date of purchase, the number of times the enzyme has been thawed and refrozen and its initial activity. Periodically, the enzyme activity is verified and stock is discarded where its activity has fallen to a less than acceptable value. These practices ensure that the analytical methods that use enzymes are performed with functional reagents and give accurate results.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Codes of practice</th>

### Workplace procedures

Workplace procedures may include:

- ordering, purchase and receipt of stocks
- verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)
- organisation of compatible batch or lot numbers
- storage of stocks, stock control and rotation of stock
- quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins)
- reporting non-conformances

### Records

Records could include:
### RANGE STATEMENT

- stock usage
- orders and progress of orders
- equipment servicing and repairs
- current inventories
- quality control sampling, testing and stock rotation

### Communication

Communication may require the use of equipment or systems, such as:

- telephone, fax, email and mail
- online information systems, inventories, print records, databases and catalogues
- filing systems

Communication may involve:

- suppliers
- freight companies
- internal customers
- external customers

### Hazards

Hazards may include:

- electric shock
- chemicals, such as acids and hydrocarbons
- microbiological organisms associated with blood and blood products
- radioisotopes
- sharps, such as broken glassware
- disturbance or interruption of services
- manual handling of heavy boxes
- fluids under pressure and industrial gas bottles

### Safety procedures

Safety procedures may include:

- use of personal protective equipment, such as hearing protection, gloves, safety glasses, coveralls and safety boots
- ensuring access to service shut-off points
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations
- regular cleaning of equipment and work areas

### Occupational health and safety (OHS) and environmental

OHS and environmental management
RANGE STATEMENT

**management requirements**

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL935002A Assist in the maintenance of reference materials

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to assist in the maintenance of reference materials that can be used in the identification of new specimens and allow for the quality control of laboratory procedures. The unit of competency does not cover the scientific identification of species or specimens. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to technical officers and laboratory technicians working in all industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'. |

Licensing/Regulatory Information
Not applicable.

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Acquire reference materials | 1.1. Confirm that required transit conditions were maintained  
1.2. Apply quarantine or isolation arrangements as necessary  
1.3. Record data of accessioned reference material in the collection database  
1.4. Label material to ensure that its identity is maintained during storage and issue |
| 2. Maintain reference materials | 2.1. Monitor storage conditions to ensure that they comply with suppliers' warranty specifications  
2.2. Monitor storage conditions to ensure materials remain true to specification  
2.3. Test material during storage, where relevant and appropriate, to report on reference characteristics and specificity  
2.4. Report findings that suggest reference specimens may be deteriorating |
| 3. Dispense reference materials to clients | 3.1. Verify requests with supervisor before requests for reference materials are processed  
3.2. Supply reference material without contamination of stock material  
3.3. Keep records of materials issued in accordance with enterprise procedures |
| 4. Maintain a safe work environment | 4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel  
4.2. Follow safety protocols when handling and processing reference materials  
4.3. Minimise the generation of wastes and environmental impacts  
4.4. Ensure the safe collection of redundant/obsolescent stocks for subsequent disposal |
Required Skills and Knowledge

<table>
<thead>
<tr>
<th>REQUIRED SKILLS AND KNOWLEDGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>This section describes the skills and knowledge required for this unit.</td>
</tr>
</tbody>
</table>

**Required skills**

Required skills include:
- maintaining materials and specimens so that the reference characteristics and attributes are stable in storage and manifest in use after retrieval
- performing all manipulations safely
- testing stored material for reference characteristics before release or use
- communicating appropriately with all customers

**Required knowledge**

Required knowledge includes:
- certified reference materials - what they are, when and why they should be used
- the storage requirements of biological and non-biological materials
- quarantine or isolation procedures
- the labile nature of chemical and biological materials
- the rationale for testing reference characteristics before issuing reference materials
- reasons for testing before accession of reference materials
- relevant health, safety and environment requirements

**Specific industry**

Additional knowledge requirements may apply for different industry sectors. For example:

**Process manufacturing and construction:**
- drill (core) samples for mineral identification
- concrete samples for analysis of composition and/or strength and suitability for application

**Biomedical and environmental:**
- bacterial cultures related to colony and microscopic morphology, specificity and reliability of staining reaction, biochemical characteristics and immunological characteristics
- cell suspensions and cell and tissue preparations that can act as quantitative or qualitative controls in tests and procedures
- plasma and other body fluids with known attributes or quanta that can act as standards and controls in quantitative and qualitative tests and procedures

**Food and beverage processing:**
- quality assurance for viability of enzymes used in process
- bacterial or yeast cultures relating to colony and microscopic morphology for

</tr>
<tr>
<td>• communicate appropriately with all customers.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with any units that may involve using materials from a collection for example:

- *MSL916003A Supervise laboratory operations in work/functional area*
- *MSL975001A Perform microbiological tests*
- *MSL976003A Evaluate and select appropriate test methods and procedures.*

Resources may include:

- equipment and materials related to the occupational task for which the reference material is relevant
- reference materials
- standard operating procedures (SOPs).

### Method of assessment

The following assessment methods are suggested:

- review of records for the supply of reference materials by the candidate
- observation of the candidate performing tests of stored reference material prior to release and review of results
- case studies, such as the:
  - accession and processing of a plasma sample that is intended for use as a control in a blood coagulation test
  - response to request for supply of a
### EVIDENCE GUIDE

| Staphylococcus culture with coagulase activity
| - oral/written questioning about receipt, testing during storage and release of reference materials. |

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

| This competency in practice |
| Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show their relevance in a workplace setting. |

#### Manufacturing

A technical officer in a pharmaceutical laboratory assays each batch of paracetamol tablets before their release for sale using ultraviolet spectrometric analysis. Twenty tablets are ground and a known weight of sample is dissolved in a specified solvent. The ultraviolet absorption is measured and compared with the absorption of a reference standard, which has been similarly treated. The potency of the tablets is calculated and compared to the release limits before being released for sale. The concentration of the reference paracetamol must be accurately known if the assay is to be correct. The standard is packed and stored under conditions that will minimise its breakdown, and the storage conditions are monitored to ensure that the potency remains with acceptable limits.

#### Biomedical

A technical officer in a histology laboratory was asked to perform a batch of iron stains by the Prussian Blue technique. The officer went to the block repository and...
chose one of the liver blocks known to contain haemosiderin. The officer checked the block number against the data in the control materials log and then cut four sections to process in parallel for the day's batch and those anticipated over the next few days. Noting that there was only one iron-positive block left, the officer wrote a short memo to the laboratory supervisor suggesting that the pathologist allow for a stock of tissue to be collected the next time they identified a suitable specimen.

**Food processing**

While many attributes of food can be quantified and specified using chemical reference standards, some attributes are best assessed by comparison with a physical reference sample. For example, the number of poppy seeds on a loaf of bread would be impractical to count. However, comparison with retention samples made with various levels of poppy seeds will give an approximation of the number of seeds on the bread. Suitable reference samples need to be prepared and preserved so that the handling of samples does not result in seeds falling from the sample.
**Range Statement**

MSL935003A Authorise the issue of test results

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to critically assess the accuracy of data and validity of test results prior to formally authorising their release to the client. Personnel are expected to investigate and, if necessary, rectify results that are not consistent with expected values. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory personnel working in all industry sectors who are approved by their organisation to authorise the results obtained for specific test methods. In many instances these personnel are known as 'signatories' or 'delegates' for the tests involved. The scope of tests authorised in each case will be determined by the specialised knowledge, technical competence and experience of the personnel involved. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'. |

Licensing/Regulatory Information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- verifying the accuracy and completeness of data, results and technical records
- recognising unexpected or unacceptable data and results
- using statistical tests to estimate uncertainties and determine data acceptability
- reviewing records of sampling, sample preparation, testing and/or calibration activities to identify potential causes of unacceptable data/results
- using effective problem solving strategies
- recommending appropriate preventative/corrective actions to control potential/actual non-conforming work
- applying enterprise procedures for authorising test results
- explaining technical details of sampling, test methods and results to clients
- demonstrating a professional approach and positive company/organisation image (including maintaining independence and an ability to resist improper influences)

Required knowledge

Required knowledge includes:

- scientific and technical knowledge of the samples, procedures, equipment, materials and instrumentation used to generate the test results and data
- expected values for data and results and the uncertainty components for specified test methods
- problem solving techniques and cause analysis appropriate to the test methods
- enterprise procedures for authorising the issue of test results
- relevant reporting requirements such as the Guide to the Expression of Uncertainty in Measurement (GUM), National Association of Testing Authorities (NATA) and/or test methods
- working knowledge of health, site safety and environmental management requirements relevant to job role
- working knowledge of confidentiality requirements relevant to job role
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

| Critical aspects for assessment and evidence required to demonstrate competency in this unit |
| Assessors should ensure that candidates can: |
| • verify the accuracy and completeness of data, results and technical records for specified tests |
| • issue specified test results in accordance with authorisation and enterprise procedures |
| • investigate unexpected or unacceptable results in a logical and efficient manner |
| • explain test results to clients. |

Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

• relevant MSL09 units of competency that cover the ability to perform the tests involved, relevant data analysis and quality assurance procedures.

Resources may include:

• data sets and records
• test methods and description of test setup
• computer and relevant software or laboratory information system
• relevant workplace procedures.

Method of assessment

The following assessment methods are suggested:

• review of records and test results verified and issued by the candidate
• feedback from supervisors and clients regarding the candidate’s ability to issue authorised test results
• review of recommendations and reports prepared by the candidate
• questions to assess understanding of procedures governing the authorised issue of test results, acceptability of data/results, sources of uncertainty and preventative/corrective actions.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and
EVIDENCE GUIDE

| Those aspects of competency which are difficult to assess directly. |
| Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. |
| Access must be provided to appropriate learning and/or assessment support when required. |
| The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment. |

This competency in practice

| Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. |
| **Calibration** |
| A calibration technician/specialist has completed testing an instrument and places it with the test report for the relevant signatory to authorise. The laboratory manager physically examines the item to ensure all accessories have been applied. The manager checks the test report for validity and correctness and ensures any abnormalities or departures from normal or specified conditions are reported appropriately. He/she confirms that all data transfers and calculations are accurate and in accordance with SOPs, industry guidelines and the laboratory's accreditation requirements. The manager also ensures that all relevant databases are updated and client confidentiality is maintained. He/she signs the relevant certificates and reports and authorises the release of the results and return of the item to the client. |
| **Construction materials testing** |
| A laboratory supervisor, who is authorised to issue Atterberg Limit test results, receives a set of QC data for gravel that is to be supplied to a local council. The technician has provided Liquid Limit, Plastic Index, Linear Shrinkage data for three samples: |
| 1. 35%, 7%, 3% |
| 2. 35%, 4%, 3% |
EVIDENCE GUIDE

3. 33%, 5%, 2%

Using a well known 'rule of thumb' that the P.I./L.S. ratio for gravel samples is usually between 2 and 3, the supervisor notes that the ratio for the second sample is 1.3. This indicates a possible error. Although the most likely source of error is in the determination of the Plastic Limit, he/she systematically reviews all of the technician's work. Firstly, he/she checks that all three samples are from the same source and whether their appearance was recorded on receipt. He/she reviews the relevant data records by checking for simple transcription errors, moisture calculation errors, variation in the weights of containers and straightforward weighing errors. He/she also checks if the samples were properly dried to constant mass. Then he/she accesses the client's previous test records to see if any similar sample variability has occurred in the past. After completing all the checks he/she can do from his/her desk, he/she talks to the tester and asks to see the rolled specimens before they disposed of. A visual inspection confirms his/her hunch that the technician's rolling technique is not good enough to obtain reliable results. He/she arranges for the test to be repeated under supervision using surplus sample material and also organises additional training.

Construction materials testing

Asphalt is being laid at night on a busy motorway and the road must be available for traffic by 6 am each day. The construction company's own laboratory is responsible for conducting compaction tests for each lot. The specifications require a field compaction density of 95% of the laboratory compacted density and penalties apply for lots where results are &lt; 94%. A technician who is authorised to issue compaction results uses a nuclear density gauge to determine field compaction values in accordance with an established inspection test plan and test method. The data for the latest lot is 95, 94, 93, 93, 93.5, 93 and 93%. The average result is 93.5% and the shift foreman decides to roll and then re-test the lot. The repeat test indicates an average value of 93%. Before completing the test report, the technician reviews all the data, calculations and record of 'standard counts' for the gauge. He/she also checks the laboratory compaction results, gradings and bitumen content for consistency and compliance.
with mix design. These results indicate a trend of the mix design moving out of specification. The technician informs the plant manager that the test results indicate unacceptable compaction. The manager maintains that the results are borderline and points out that the company has already paid $250K in penalties this month. He/she asks the technician to re-check the compaction results and repeat the tests at different inspection points. He/she also suggests that the technician should find a better sample for the maximum density test. The technician reviews the results and re-tests further samples but there are no new results that would justify any change to the test report. Therefore, the technician issues the test report unaltered.
### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Codes of practice</th>
<th>Where reference is made to industry codes of practice and Australian/international standards, it is expected the latest version will be used</th>

### RANGE STATEMENT

- Eurolab technical report
- inspection test plans, sampling plans for sites
- NATA supplementary requirements for the relevant field of testing (e.g. field application document)
- NATA Accreditation programs requirements
- NATA Technical notes, policy circulars and guides
- national measurement regulations and guidelines
- Nordtest guide
- principles of good laboratory practice (GLP)
- sampling and test procedures and standard operating procedures (SOPs)

### Data and results

Data and results may include:

- entries in worksheets, spreadsheets or databases that may be linked to information management systems
- observations, measurements, derived data and calculations
- results of tests and analyses

### Technical records

Technical records may include:

- request forms, service agreements and contracts
- worksheets, work books, check sheets and work notes
- data and information generated during sampling, testing and/or calibrations that indicate whether quality or process parameters have been achieved
- control graphs
- external, internal test reports and calibration certificates
- clients notes, papers and feedback
- listing of data, personnel responsible for sampling, performance of each test/calibration and checking of results

### Calculations

Calculations may be performed:

- with or without a calculator or computer software, such as spreadsheets, databases and...

| Sample preparation problems | Sample preparation problems could result from: |
## RANGE STATEMENT

- use of incorrect sample containers
- incorrect particle size
- contamination
- incorrect sample handling, storage or conditioning (filtered/non-filtered, temperature control, moisture content and preservation)
- incorrect matrix
- incomplete digest

### Sources of interference

Sources of interference may include:

- presence of contaminants
- spectral interference (e.g. in Inductively Coupled Plasma Spectroscopy)
- physical interference (e.g. in Atomic Absorption Spectroscopy)
- matrix effects
- masking of analytes

### Preventative/corrective actions

Preventative/corrective actions may include:

- more regular use of certified reference materials
- internal quality controls using secondary reference materials
- participation in inter-laboratory comparison or proficiency testing programs
- replicate tests or calibrations using the same or different methods
- retesting or recalibration of retained items
- correlation of results for different characteristics of an item
- additional audits and management reviews
- more regular quality checks on consumables
- increased staff observation, supervision and/or training
- more detailed sample specifications, test methods and procedures

### Confidence level

- The most common confidence level is 95% in accordance with the National Measurement Act, 1960. However, some applications require a higher level of confidence

### Occupational health and safety

OHS and environmental management
RANGE STATEMENT

(OHS) and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL952002A Handle and transport samples or equipment

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to pick up and transport samples or test/calibration equipment in a way which ensures the integrity of subsequent test results. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to couriers and laboratory and field assistants in all industry sectors. The person transporting the items is not necessarily responsible for sampling or testing. This unit does not cover sample collection or the ability to handle and transport animals as might be defined under prevailing animal care and ethics legislation and practices.  
Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section ‘This competency in practice’. |

Licensing/Regulatory Information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- planning the picking up of items in conjunction with a supervisor
- preparing a vehicle for the required journey
- using communication devices so contact is possible between the courier, reception centre, and routine pickup locations
- communicating effectively and courteously with individuals, customers, clients and reception staff
- recording details of item exchange in relevant sections of chain of custody forms, as required
- maintaining the integrity of collected samples or equipment during transport
- containing and cleaning up spillage or breakages
- using appropriate techniques and equipment to safely dispose of waste materials
- maintaining confidentiality in all aspects of work
- reporting of problems, accidents or incidents in accordance with enterprise procedures

Required knowledge

Required knowledge includes:

- the relationship between effective communication with clients and customers and enterprise business
- the need for appropriate and timely transport
- control measures for minimising exposure to hazardous materials and equipment
- effect of changes in environmental conditions, vibration and shock on samples
- procedures for the containment and cleanup of spillages and breakages
- efficient waste containment and disposal practices
- maintenance requirements of equipment used in the processes of handling and transporting samples
- relevant health, safety and environment requirements
- enterprise procedures for responding to emergencies
- contact details for key personnel

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical samples:

- labile nature of biological and environmental samples
- possible infectivity of biological materials
### REQUIRED SKILLS AND KNOWLEDGE

- possible effects of exposure to radioactive materials
**Evidence Guide**

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:

- follow required policies and procedures to maintain the integrity of collected samples or equipment during transport
- deal with customers effectively and courteously
- work safely
- maintain confidentiality and report problems, accidents and incidents in accordance with procedures.

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL943002A Participate in laboratory/field workplace safety.

Resources may include:

- vehicle
- enterprise procedures for the handling and transport of samples or equipment
- communication devices
- sample containers
- containers for transporting samples and test/calibration equipment.

### Method of assessment

The following assessment methods are suggested:

- review of the job sheets or journal of completed activities
- direct observation of work as a courier
- the quality of review of results traceable to the transport of samples or equipment by candidate
- oral or written questions to assess knowledge of the handling of unforeseen circumstances
- simulated role plays between a courier and personnel at a reception desk or customer pickup centre.
### EVIDENCE GUIDE

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

### This competency in practice

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.

**Calibration**

Calibration laboratories must take special care to ensure that they do not damage test equipment during handling, testing or storage. Information relating to equipment requiring special handling, transport or storage conditions should be provided to those responsible for collecting and transporting the items.

A customer-orientated calibration laboratory offers a door to door calibration service to most of its clients. Once a week their driver arrives at a major facility and takes delivery of several precision measuring instruments. As always, the driver signs the acceptance note paying particular attention that all the items are recorded correctly, including listing all accessories and associated handbooks. But this time, two delicate items require unique transit cases to ensure they are stored and transported upright. Because the laboratory received prior notice, these cases were loaded into the van before setting off as well as a copy of the special transport and packaging instructions. The driver secures all the items in accordance with the accompanied written instructions to ensure their safe travel and minimise damage during transit. Upon return, the driver unloads the van and the instruments are acquitted by administration staff,
inspected for damage and booked into the laboratory. The lab supervisor makes sure that their technicians are aware of the special handling requirements of the two delicate instruments.

**Biotechnology**

During transit, samples must be handled and maintained under conditions which will ensure that their potency and efficacy are maintained. A courier has been asked to transport vaccine samples from the airport to the enterprise for laboratory evaluation. The supervisor faxes the courier company detailed instructions regarding pickup and handling/storage conditions during transit. In this case, the samples are in insulated containers and the temperature is monitored and recorded continuously. The courier collects the samples, puts them in the coolest part of the vehicle, ensuring that the package will not be subject to any sudden jolts, and transports them to the enterprise. After the samples arrive they are checked by the enterprise and appropriate documentation completed.

**Biomedical**

At 8 am the courier commences the day shift. The shift supervisor identifies the collection centres to be visited. The courier takes the mobile phone from the charger and checks their pager. In the vehicle, the courier logs in the odometer reading, makes a mental note of the fuel level, checks the cooler boxes and other equipment and carefully drives out. Today, there are pickups from four private hospitals and 12 collecting centres in a 200 sq km zone. As they approach the first hospital, there is a call from base with instructions to collect a tissue biopsy and bring it back immediately. He/she asks the base contact to tell haematology that their 10 am specimen arrival will be 40 minutes late because of this unforeseen diversion. Eventually, they complete the round, having remembered to replenish specimen collecting stock at each centre visited.

**Environmental (1)**

A technical assistant regularly handles and transports sensitive equipment over rough terrain in a 4WD vehicle. After reaching a field site, they are asked to transport expensive water monitoring equipment across an estuary in a small aluminium boat. The assistant notes that the equipment boxes are open to the weather and will need to be made waterproof. Because the water is choppy, the
### EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>Assistant adds extra packing material to cushion the most shock sensitive items. They choose to travel with the equipment rather than entrusting it to the local fisherman. Together, they carefully secure the items on the seats rather than placing them on the floor of the boat which is wet.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Environmental (2)</strong></td>
</tr>
<tr>
<td>A waste management authority has sent one of their laboratory technicians to collect six containers that have been found by a member of the public on the verge of an industrial area service road. Given that the materials may be hazardous the technician assembles a full set of safety equipment. They also locate a laptop computer with MSDS information, a list of phone contacts for agencies responsible for handling hazardous materials and suitable containers for storing/transporting potentially hazardous materials. Upon arrival at the site, the technician locates six containers of concentrated sulphuric acid which are clearly labelled. The technician consults the MSDS for information on appropriate handling, storage and transportation procedures and follows them closely.</td>
</tr>

## RANGE STATEMENT

- enterprise protocols regarding customer liaison and communication
- vehicle log books
- protocols for use of pagers, mobile telephones and two-way radios
- precautions for safe handling and handling of specific materials (e.g. toxic, infective, radioactive and dangerous goods)
- precautions for the transport of volatile and unstable fluids
- incident/accident report forms
- spillage and waste containment and disposal protocols and containment materials

### Maintenance of the integrity of samples or test/calibration equipment

Maintenance of the integrity of samples or test/calibration equipment could involve:

- use of appropriate sample containers (glass, plastic and opaque)
- use of appropriate preservatives
- wrapping container in foil to exclude light
- temperature control, which may involve prevention of direct contact between the sample and coolant
- use of appropriate equipment boxes (insulated, shockproof and waterproof)
- restraint of containers to prevent movement
- checking sample viability during transport while avoiding unnecessary handling

### Hazards

Hazards may include:

- biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
- chemicals, such as acids and hydrocarbons
- sharps and broken glassware
- manual handling of heavy sample bags and containers and equipment

### Safety practices

Safety practices may include:

- use of MSDS
- use personal protective equipment, such as gloves, safety glasses, goggles and coveralls

**Required Skills and Knowledge**

<table>
<thead>
<tr>
<th>REQUIRED SKILLS AND KNOWLEDGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>This section describes the skills and knowledge required for this unit.</td>
</tr>
</tbody>
</table>

### Required skills

Required skills include:

- receipt and logging in of samples
- checking of samples for history and acceptable transport conditions
- preparing and sub-sampling of samples
- labelling samples accurately and completely
- using standard precautions when dealing with potentially hazardous materials
- applying knowledge of the relationship between specific sample preparation and associated tests
- clarifying specific client requirements with appropriate personnel promptly
- labelling and storing samples in a way which maintains sample integrity and traceability
- disposing of samples following required procedures
- maintaining equipment and the workspace

### Required knowledge

Required knowledge includes:

- enterprise procedures for the receipt, documentation, distribution and storage of samples
- potentially hazardous and unstable nature of samples
- requirement of specified sample types for specific tests
- importance of maintaining effective customer relations
- sample storage and transport requirements
- relevant health, safety and environment requirements

### Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical laboratories:

- potentially infective nature of all biological materials
- nature of unstable solutions, such as anti-coagulated whole blood
- non-conformance of clotted samples for procedures, such as routine haematological tests
# Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

## Overview of assessment

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:
- safely receive and log samples in accordance with enterprise procedures
- apply knowledge of the relationship between sample preparation requirements and associated tests
- deal with customers politely and efficiently
- recognise and deal with problems according to enterprise procedures
- maintain sample integrity and traceability.

## Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:
- MSL913001A Communicate with other people
- MSL943002A Participate in laboratory/field workplace safety.

Resources may include:
- a selection of sample containers, tubes, request forms and sample documentation
- simulated samples when an authentic sample is unavailable or inappropriate.

## Method of assessment

The following assessment methods are suggested:
- review of sample receipt and preparation records prepared by the candidate
- feedback from supervisors and peers
- direct observation of sample receipt and preparation
- questioning to assess knowledge of procedures where direct observation is difficult (such as sample receipt and preparation in the field).

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.
**EVIDENCE GUIDE**

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work-like environment.

</tr>
</tbody>
</table>

**Environmental**

A laboratory assistant at a hazardous liquid waste recycling plant is required to log in all samples, match all samples with the in-house profile of the source of the waste, label them and activate the tracking procedure. He/she then prepares a sample for a series of standard tests which are determined by the profile of the waste material (acid or alkali, organic or heavy metal, etc). Given the hazardous nature of the waste, the laboratory assistant must use appropriate safety equipment at all times and ensure the safe disposal of all hazardous material. The assistant must work efficiently as these procedures are activated upon arrival of a road tanker and when the hazardous waste has been verified and judged acceptable for treatment at the plant by the laboratory supervisor. The laboratory assistant also liaises with the truck driver, or the referring client, should the samples (and/or subsequent tests) not comply with enterprise conditions for receiving the hazardous waste.

**Construction materials testing and mineral assay**

A laboratory assistant has received a consignment of disturbed soil samples from a client for classification testing. A test request and field logs have been sent by mail. Each sample is bagged and labelled, with the label showing the name of the client, project, date and sampling location, and a field description of the material. The laboratory policy is that samples weighing more than 20 kg must be bagged so that the individual bags do not exceed this limit and labelled as bag 1 of ..., bag 2 of ....
EVIDENCE GUIDE

The assistant checks to ensure all component bags of such samples are present. He/she is careful to handle the samples using safe manual handling techniques. The assistant arranges the samples in order of location and reconciles them with the test request and logs. Two samples have been shown on the request but have not been received. The assistant emails the technician who despatched them and subsequently is advised that they were overlooked during despatch and will be forwarded as soon as possible.

The assistant compares the samples with the field descriptions and finds that they match. Samples that are not designated for testing immediately are set aside in the laboratory store. The remainder are placed in trays for drying in the 50ºC oven. The tray numbers are carefully written on the respective worksheets. When the samples have dried and cooled they are split out sufficiently for sieve analysis and plasticity testing, making allowance for the maximum particle size of each sample. The assistant is careful to avoid raising dust during the process.

Biomedical

A laboratory assistant has just started a shift in specimen reception and puts on a coat and gloves before touching any samples. There is a pile of samples and forms in the sample box. In some cases, the samples and forms are enclosed in a plastic bag. In other cases, they are seemingly unconnected. The assistant notices that one of the samples has a bloodstained label. She/he quickly examines the samples, isolates the leaking sample in a lockable plastic bag and places the related request form in the bag’s separate compartment. The assistant then disposes of her/his dirty gloves. The assistant now logs all samples into the computer, placing to one side a sample and request form that is inadequately labelled. She/he makes a note to call the referring doctor as soon as possible. The assistant places the haematology samples in the colour-coded tray and calls the laboratory for their pickup. She/he then calls the doctor of the patient whose sample is inadequately labelled. She/he records the missing date of birth on the request form, and then barcode/labels tubes for the samples’ testing. Within 30 minutes, she/he has cleared the first rush of samples. She/he takes the time to carefully empty the bin of

</tbody>
</table>
### RANGE STATEMENT

- procedure sheets indicating transport and storage requirements
- safety manuals describing personal protective equipment requirements, control of hazardous wastes, containment and cleanup of spillages, and disposal and recycling of wastes

**Samples received**

Samples received may include:

- gas or air samples
- liquid samples, such as water and waste water, stormwater, sludges and complex mixtures and sewage
- solid samples, such as soils and sediments, rocks/minerals, concrete, quarry or mining products
- solid wastes, such as hazardous, non-hazardous, domestic, commercial, industrial, mining and agricultural
- biological specimens such as tissue and blood
- raw materials, start, middle, end of production run samples and final products

**Hazards**

Hazards may include:

- biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
- dust and noise
- chemicals, such as acids and hydrocarbons
- aerosols
- sharps and broken glassware
- manual handling of heavy sample bags and containers
- crushing, entanglement and cuts associated with moving machinery

**Safe work practices**

Safe work practices may include:

- use of MSDS
- use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots
- use of biohazard containers and laminar flow cabinets
### RANGE STATEMENT

- correct labelling of reagents and hazardous materials
- handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer’s instructions, and enterprise procedures and regulations
- regular cleaning and/or decontamination of equipment and work areas

### Occupational health and safety (OHS) and environmental management requirements

OHS and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL94001A Obtain representative samples in accordance with sampling plan

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to obtain a range of samples that are representative of the source material (e.g. raw ingredients, product in process and final product) and to prepare the samples for testing. All sampling activities are conducted in accordance with a defined sampling plan. This unit does not cover the subsequent testing of the samples. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory technicians in all industry sectors. It involves:

- a range of sampling plans, samples and sampling procedures, which apply to the enterprise site, plant laboratory or field sites
- enterprise products/materials and hazardous materials
- a range of sampling points and/locations.

Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section ‘This competency in practice’. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for sampling | 1.1. Confirm the sampling location, number and type of samples, and timing and frequency of sampling from enterprise or client's sampling plan  
1.2. Liaise with relevant personnel to arrange site access and, if appropriate, all necessary clearances and/or permits  
1.3. Select sampling equipment and conditions to achieve representative samples and preserve sample integrity during collection, storage and transit  
1.4. Check that all procedures are in accordance with client or enterprise requirements, relevant standards and codes  
1.5. Identify site and sampling hazards and review enterprise safety procedures  
1.6. Assemble and check all sampling equipment, materials, containers and safety equipment  
1.7. Arrange suitable transport to, from and around site as required |
| 2. Conduct sampling and log samples | 2.1. Locate sampling sites and, if required, services at the site  
2.2. Conduct representative sampling in accordance with sampling plan and defined procedures  
2.3. Record all information and label samples in accordance with traceability requirements  
2.4. Record environment or production conditions and any atypical observations made during sampling that may impact on sample representativeness or integrity  
2.5. Transport all samples back to base according to standard operating procedures (SOPs) and relevant codes |
| 3. Prepare samples for testing | 3.1. Prepare sub-samples and back-up sub-samples that are representative of the source  
3.2. Label all sub-samples to ensure traceability and store in accordance with SOPs  
3.3. Follow defined preparation and safety procedures to limit hazard or contamination to samples, self, work area and environment  
3.4. Distribute sub-samples to defined work stations maintaining sample integrity and traceability requirements |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 4. Address client issues | 4.1. Enter approved information into laboratory information management system (LIMS)  
4.2. Report all relevant aspects of the sampling and preparation phases in accordance with enterprise procedures  
4.3. Ensure that information provided to client is accurate, relevant and authorised for release  
4.4. Maintain security and confidentiality of all client/enterprise data and information |
| 5. Maintain a safe work environment | 5.1. Clean all equipment, containers, work area and vehicles according to enterprise procedures  
5.2. Check serviceability of all equipment before storage  
5.3. Use defined safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel  
5.4. Minimise the generation of wastes and environment impacts  
5.5. Ensure the safe collection of all hazardous wastes for appropriate disposal |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Required skills include:

- collecting representative samples in accordance with a sampling plan
- techniques to preserve the integrity of samples
- identifying atypical materials and samples and taking appropriate action
- maintaining sampling equipment
- completing sampling records
- working safely
- following requirements for the disposal of waste and the preservation of the environment

**Required knowledge**

Required knowledge includes:

- principles of representative samples
- principles and procedures for random, systematic and stratified sampling, consistency of sampling procedures
- preservation of the integrity of samples
- maintaining identification of samples relative to their source
- enterprise and/or legal traceability requirements
- cost effectiveness of sampling
- characteristics of product/material to be sampled and likely contaminants
- links between quality control, quality assurance, quality management systems and sampling procedures
- enterprise procedures dealing with legislative requirements for the handling, labelling and transport of hazardous goods
- links between correct occupational health and safety (OHS) procedures and personal and environmental safety particularly at high risk sites

**Specific industry**

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical and environmental services:

- specific legislation on biohazards
- documentation procedures for the chain of custody for samples to be used as evidence or for blood transfusion
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Assessors should ensure that candidates can:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• collect the specified quantity of sample to enable all processing and testing to occur and back-up samples to be stored</td>
</tr>
<tr>
<td></td>
<td>• obtain a sample that is representative of the bulk material</td>
</tr>
<tr>
<td></td>
<td>• preserve the integrity of samples by closely adhering to procedures</td>
</tr>
<tr>
<td></td>
<td>• label samples and sub-samples to satisfy enterprise/legal traceability requirements</td>
</tr>
<tr>
<td></td>
<td>• identify atypical materials and samples and take appropriate action</td>
</tr>
<tr>
<td></td>
<td>• maintain sampling equipment in appropriate condition</td>
</tr>
<tr>
<td></td>
<td>• complete sampling records using enterprise procedures</td>
</tr>
<tr>
<td></td>
<td>• follow safety regulations and enterprise OHS procedures during sampling, transport and storage</td>
</tr>
<tr>
<td></td>
<td>• follow relevant legislative requirements for the disposal of waste and the preservation of the environment.</td>
</tr>
</tbody>
</table>

Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL924001A Process and interpret data
- MSL943002A Participate in laboratory/field workplace safety
- relevant MSAL974000 series units of competency
- relevant MSAL975000 series units of competency relevant to the sampling.

Resources may include:

- variety of sample types
- sampling plans
- a selection of sampling containers and sampling techniques
## EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>Method of assessment</th>
<th>The following assessment methods are suggested:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• inspection of samples collected by the candidate</td>
</tr>
<tr>
<td></td>
<td>• review of sampling documentation completed by the candidate</td>
</tr>
<tr>
<td></td>
<td>• feedback from peers, customers and supervisors that sampling plans were followed</td>
</tr>
<tr>
<td></td>
<td>• questioning to assess underpinning knowledge of representative sampling procedures</td>
</tr>
<tr>
<td></td>
<td>• observation of the candidate taking a range of samples</td>
</tr>
</tbody>
</table>

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Manufacturing</strong></td>
</tr>
<tr>
<td></td>
<td>A metallurgical laboratory technician is very familiar with preparing representative samples for a range of final products in a steelmaking plant. One day, he/she is asked to sample a 50 tonne small-particle coal delivery which is believed to have a higher than acceptable sulphur content. Having never prepared representative samples for such a large quantity of material, the technician consulted their supervisor and developed an appropriate sampling plan. The technician arranged for the operator of a small front-end loader to take buckets of coal from five equally spaced points around the pile. The resulting</td>
</tr>
<tr>
<td>EVIDENCE GUIDE</td>
<td></td>
</tr>
<tr>
<td>----------------</td>
<td></td>
</tr>
<tr>
<td>material was then combined and mixed in one heap. The technician coned and quartered the heap enough times to obtain a representative sample of about 5kg. He/she arranged for the unwanted material to be returned to the stockpile. On return to the laboratory, the technician crushed the sample and repeatedly coned and quartered the material to obtain an analytical portion.</td>
<td></td>
</tr>
</tbody>
</table>

**Environmental**

A field technician trained in sampling natural water systems is asked to sample a bright yellow industrial wastewater discharge into a small creek. The relevant sampling plan specifies that the samples should be collected where the waste water is well mixed near the centre of the creek and at the mid-depth point. The technician also notes that the samples must be collected where turbulence is at a maximum so that the settling of solids is minimal. On arrival at the site, the technician locates where the wastewater is entering the creek. He/she moves downstream to where the waste water and creek water is well mixed and there is little apparent loss of the yellow suspended solids. The technician dons the required personal protective equipment and uses a convenient bridge to collect a set of six samples and duplicates over a half-hour period using the equipment and procedures specified in the sampling plan. Using a field notebook, the technician records all information specified in the laboratory's chain of custody requirements and safety plan for handling potentially hazardous industrial waste.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used.

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
  - AS 1199 Sampling procedures and tables for inspection by attributes
  - AS 1678 Emergency procedure guide - Transport
  - AS 1940-2004 Storage and handling of flammable and combustible liquids
  - AS 3780-2008 The storage and handling of corrosive substances
  - AS 4433.2-1997 Guide to the sampling of particulate materials - Preparation of samples
  - AS/NZS 4452:1997 The storage and handling of toxic substances
  - American Association of Cereal Chemists (AACC) Approved Methods of Analysis
  - Australian Dangerous Goods Code
  - enterprise and/or client sampling schemes and sampling plans
  - enterprise recording and reporting procedures
  - gene technology regulations
  - material safety data sheets (MSDS)
  - methods and procedures which may be written to meet enterprise, client and/or regulatory/certifying body requirements
  - National Code of Practice for the labelling of workplace substances [NOHSC:2012 (1994)]
  - site plans, maps and specifications

### RANGE STATEMENT

- Use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots
- Use of biohazard containers and laminar flow cabinets
- Correct labelling of reagents and hazardous materials
- Handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer’s instructions, and enterprise procedures and regulations
- Regular cleaning and/or decontaminating equipment and work areas
- Machinery guards
- Signage, barriers, service isolation tags, traffic control and flashing lights
- Lockout and tag-out procedures

### Occupational health and safety (OHS) and environmental management requirements

OHS and environmental management requirements:

- All operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- All operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- Where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to perform tests and measurements using standard methods with access to readily available advice from supervisors. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory/field assistants working in all industry sectors. In general, they do not calibrate equipment and make only limited adjustments to the controls. They do not interpret or analyse results or troubleshoot equipment problems. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |

## Employability Skills Information

| Employability skills | This unit contains employability skills. |

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Interpret test requirements | 1.1. Review test request to identify samples to be tested, test method and equipment involved  
1.2. Identify hazards and enterprise controls associated with the sample, preparation methods, reagents and/or equipment |
| 2. Prepare sample | 2.1. Record sample description, compare with specification, record and report discrepancies  
2.2. Prepare sample in accordance with appropriate standard methods |
| 3. Check equipment before use | 3.1. Set up test equipment in accordance with test method  
3.2. Perform pre-use and safety checks in accordance with enterprise procedures and manufacturer's instructions  
3.3. Identify faulty or unsafe equipment and report to appropriate personnel  
3.4. Check calibration status of equipment and report any out of calibration items to appropriate personnel |
| 4. Perform tests on samples | 4.1. Identify, prepare and weigh or measure sample and standards to be tested  
4.2. Conduct tests in accordance with enterprise procedures  
4.3. Record data in accordance with enterprise procedures  
4.4. Perform calculations on data as required  
4.5. Identify and report out of specification or atypical results promptly to appropriate personnel  
4.6. Shut down equipment in accordance with operating procedures |
| 5. Maintain a safe work environment | 5.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel  
5.2. Minimise the generation of wastes and environmental impacts  
5.3. Ensure safe disposal of laboratory and hazardous wastes  
5.4. Clean, care for and store equipment and reagents as required |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- interpreting enterprise procedure or standard methods accurately
- using safety information, such as material safety data sheets (MSDS) and performing procedures safely
- checking test equipment before use
- completing all tests within required timeline without sacrificing safety, accuracy or quality
- calculating, recording and presenting results accurately and legibly
- maintaining security, integrity and traceability of all samples, data/results and documentation
- cleaning and maintaining equipment

#### Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- purpose of test
- principles of the standard method
- pre-use equipment checks
- relevant standards/specifications and their interpretation
- sources of uncertainty in measurement and methods for control
- enterprise and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- procedures for recognition/reporting of unexpected or unusual results
- relevant health, safety and environment requirements
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Assessors should ensure that candidates can:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• accurately interpret enterprise procedures or standard methods</td>
</tr>
<tr>
<td></td>
<td>• complete all tests within the required timeline without sacrificing safety, accuracy or quality</td>
</tr>
<tr>
<td></td>
<td>• demonstrate close attention to the accuracy and precision of measurements and the data obtained</td>
</tr>
<tr>
<td></td>
<td>• maintain the security, integrity and traceability of all samples, data/results and documentation.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL922001A Record and present data.

Resources may include:

- standard laboratory equipped with appropriate equipment standards and materials
- enterprise procedures and standard methods, and equipment manuals
- MSDS.

### Method of assessment

The following assessment methods are suggested:

- review of the quality of test data/results achieved by the candidate over time
- inspection of records and workplace documentation completed by the candidate
- feedback from peers and supervisors
- observation of the candidate performing a range of basic tests
- oral or written questioning to check underpinning knowledge of test procedures.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess.
**EVIDENCE GUIDE**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>

</thead>
<tbody>
<tr>
<td></td>
<td>directly. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. Access must be provided to appropriate learning and/or assessment support when required. The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</td>
</tr>
<tr>
<td><strong>This competency in practice</strong></td>
<td>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. <strong>Manufacturing</strong> Standard testing methods may be viewed as legal requirements that must be followed to ensure that a product manufactured in a chemical plant meets the specification by which it is sold to the customer. Technical assistants perform tests in a quality control laboratory to ensure that material meets legal requirements and the material is safe and effective in use. Peroxides may be present in ether as a result of light-catalysed air oxidation. Peroxides are toxic and can give rise to mixtures which are explosive when distilled. Technical assistants test ether to ensure that the level of peroxide is within acceptable limits. The test is done by shaking ether with a solution of potassium iodide. After standing for 30 minutes in the dark the yellow colour of the aqueous phase, due to the liberation of iodine, must not be more intense than a prepared standard solution. These tests ensure the quality and safety of the ether. <strong>Food processing</strong> A snack food company produces a range of high quality, impulse purchase snack foods. Some of these products are moisture and/or oxygen sensitive and are therefore packaged in multi-layer flexible packaging to provide optimum shelflife. The packaging must also be able to withstand the rigours of the production and distribution process. While the packaging is purchased to meet the shelflife and distribution specifications, the quality</td>
</tr>
</tbody>
</table>
### EVIDENCE GUIDE

| assurance program requires the periodic evaluation of the packaging materials against these specifications. A laboratory assistant uses standard methods to test the tearing resistance, bursting strength, impact resistance and permeability and/or leakage of the snack food packaging. Tests are also conducted on aspects of the manufacturing process that can affect shelf life. These tests involve the measuring of the heat-seam strength and the sealing performance of the closure process. The test results are recorded by the laboratory assistant to verify the conformance of the materials to the supplier specifications and of the process to the manufacturing specifications. The assistant reports any anomalies or non-conformances to the appropriate personnel.

**Construction materials testing**

A technician performs an Aggregate Stripping Test (AS 1141.50) and enters the results in the laboratory’s information management system (LIMS). The resulting 20-30% stripped values (i.e. 70-80% adhering) indicate a 'fail' result. The technician notes that he has repeated the test and obtained the same 'fail' result. The laboratory manager reviews the results and asks the technician to explain how he performed the test. He describes how he prepared 3-4 mm thick plates of bitumen and binding agent in the mould and then placed 50 small clean pieces of aggregate on top. After treatment in an oven for 24 hours and a 50°C water bath in accordance with the test method, the technician had then carefully pulled out the pieces of aggregate and avoiding any twisting motion. He then estimated the % of bitumen adhering to each of the stones with the expectation that the stripped value would be about 5% (i.e. 95% adhering). The manager is satisfied that the technician has performed the test in accordance with the method and suggested that he now re-run the test with a known aggregate as a control. This test gives a stripped value of 5-7% (i.e. 93-95% adhering). The manager is now sufficiently confident of the laboratory’s results to sign and issue the test report and explain the aggregate's 'test failure' to the client. |
# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>

## Concepts of metrology

Concepts of metrology may include:

- that all measurements are estimates
- measurements belong to a population of measurements of the measured parameters
### RANGE STATEMENT

- repeatability
- precision
- accuracy
- significant figures
- sources of error
- uncertainty
- traceability

### Preparation of samples

Preparation of samples may include:
- sub-sampling or splitting using procedures, such as riffling, coning and quartering, manual and mechanical splitters
- diluting samples
- physical treatments, such as ashing, dissolving, filtration, sieving, centrifugation and comminution
- moulding, casting or cutting specimens

### Typical tests carried out by laboratory/field assistants

Typical tests carried out by laboratory/field assistants may include:
- visual/optical tests of appearance, colour, texture, identity, turbidity, refractive index (alcohol content and Baume/Brix)
- physical tests:
  - density, specific gravity and compacted density
  - moisture content and water activity
  - particle size, particle shape and size distribution
- chemical tests:
  - gravimetric
  - colorimetric
  - electrical conductivity (EC) and pH
  - specific ions using dipsticks and kits
  - nutrients (e.g. nitrates and orthophosphates) using basic kits
  - ashes, including sulphated ashes
- biological/environmental tests:
  - pH, oxygen reduction potential (ORP), dissolved oxygen (DO) and (EC)
  - E coli using test kits
<table>

<tr>
<td>● temperature measuring devices, such as</td>
<td>● sharps, broken glassware and hand tools</td>
</tr>
<tr>
<td>thermometers and thermocouples</td>
<td></td>
</tr>
</tbody>
</table>

Hazards may include:
### RANGE STATEMENT

- flammable liquids
- dry ice and liquid nitrogen
- fluids under pressure
- sources of ignition
- occupational overuse syndrome, slips, trips and falls
- manual handling, working at heights and working in confined spaces
- crushing, entanglement and cuts associated with moving machinery or falling objects

### Enterprise controls to address hazards

Enterprise controls to address hazards may include:

- use of MSDS
- use of signage, barriers and service isolation tags
- use of personal protective equipment, such as hard hats, hearing protection, sunscreen lotion, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots
- use of appropriate equipment, such as biohazard containers and cabinets and laminar flow cabinets
- recognising and observing hazard warnings and safety signs
- labelling of samples, reagents, aliquoted samples and hazardous materials
- handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions, and enterprise procedures and regulations
- cleaning and decontaminating equipment and work areas regularly using recommended procedures
- following established manual handling procedures for tasks involving manual handling

### Minimising environmental impacts

Minimising environmental impacts may involve:

- recycling of non-hazardous waste, such as chemicals, batteries, plastic, metals and glass
- appropriate disposal of hazardous waste
- correct disposal of excess sample/test material
- correct storage and handling of hazardous
RANGE STATEMENT

<table>
<thead>
<tr>
<th>Chemicals</th>
</tr>
</thead>
</table>

**Occupational health and safety (OHS) and environmental management requirements**

OHS and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL973002A Prepare working solutions

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to prepare working solutions and to check that existing stocks are suitable for use. Calculations of quantities, choice of reagent grades and required dilutions will be specified by the supervisor. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory assistants working in all industry sectors. Test solutions include those required to perform laboratory tests. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |

Licensing/Regulatory Information
Not applicable.

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Safely use laboratory chemicals, glassware and equipment | 1.1. Apply appropriate safety precautions for use of laboratory equipment and hazardous chemical materials  
1.2. Use appropriate laboratory glassware and measuring equipment  
1.3. Clean and store glassware and equipment in accordance with enterprise procedures |
| 2. Make up working solutions | 2.1. Identify the relevant standard methods for solution preparation  
2.2. Assemble specified laboratory equipment  
2.3. Select and prepare materials and solvent of specified purity  
2.4. Measure appropriate quantities of reagents for solution preparation and record data  
2.5. Prepare labels and log solution details in laboratory register  
2.6. Transfer solutions to appropriately labelled containers |
| 3. Check existing stock of solutions | 3.1. Monitor shelf life of working solutions according to laboratory procedures  
3.2. Replace out-of-date or reject solutions according to laboratory procedures  
3.3. Conduct routine titrimetric analyses, if appropriate, to determine if solutions are fit for purpose |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:
• using appropriate materials, equipment and procedures to prepare solutions
• following appropriate occupational health and safety (OHS), and hygiene procedures, if appropriate
• using all equipment safely and efficiently
• using enterprise procedures to calculate concentrations
• identifying solutions not fit for use
• using titrations to determine the concentration of solutions
• labelling, storing and disposing of solutions appropriately
• recording and presenting data appropriately

Required knowledge

Required knowledge includes:
• relevant biological, chemical, food and laboratory terminology
• principles of metrology
• the international system of units (SI)
• concentration terms, such as % w/w, % w/v, % v/v, ppm (mg/L) and molarity
• basic theory of acids, bases, salts, buffers and neutralisation
• enterprise procedures for preparing solutions
• calculations required to prepare specified amounts of solutions of specified concentration
• appropriate OHS procedure for preparing, handling and disposal of solutions
• use of material safety data sheets (MSDS)
• relevant health, safety and environment requirements
## Evidence Guide

### EVIDENCE GUIDE

</tr>
<tr>
<td><strong>This competency in practice</strong></td>
</tr>
</tbody>
</table>
| Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.  

**Manufacturing**  
When starting materials used for the manufacture of common household materials are in transit from the supplier to the manufacturer, they may degrade if subjected to conditions, such as heat, moisture, light and oxygen. Even when the supplier ships quality materials to the manufacturing plant, the materials may be sub-standard when they arrive. Quality control tests are designed to test starting materials to ensure they are within specification. For example, aspirin forms salicylic acid when stored under adverse conditions. Laboratory assistants prepare and monitor the quality of solutions, such as ferric chloride solution, which gives an intense violet colour when added to salicylic acid but gives no colour with aspirin. Absence of the violet colouration indicates that breakdown of the aspirin hasn’t occurred.  

**Biomedical**  
A laboratory assistant made up 1 litre of buffer solution using buffer tablets and a 1 litre volumetric flask as specified in the method. To ensure the solution was suitable for use the assistant measured the pH and found it was within acceptable range. The assistant then appropriately labelled a storage vessel and stored the buffer according to requirements. By following enterprise procedures the shelf life of the buffer was maximised. |
### EVIDENCE GUIDE

**Environmental**

An environmental laboratory is contracted to determine the acidity of water samples taken from local lakes and streams. A laboratory assistant is required to make up small batches of 0.01M sodium hydroxide and to determine its concentration by titrating it against a standard solution of potassium acid phthalate using phenolphthalein indicator. This procedure is carried out monthly to ensure that the concentration of the sodium hydroxide solution is accurately known. Alternatively, the laboratory assistant may be required to prepare and standardise a fresh batch of sodium hydroxide on a monthly basis. In this case, he/she must understand the underpinning knowledge of basic acid/base theory, potential problems of interferences (such as slow absorption of carbon dioxide by sodium hydroxide solution) so as to ensure that the concentrations of workup solutions are accurately known. He/she must also be skilled in calculating and performing dilution when required to prepare such low concentrations (0.01M) of working solutions.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. MSL973003A Prepare culture media

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to prepare culture media which is free of contamination to facilitate optimal growth of organisms and cells. It includes the ability to organise the materials, equipment and work environment and follow standard methods. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory assistants in the biomedical, biological, environmental, food processing and pharmaceutical industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |

Licensing/Regulatory Information
Not applicable.

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare culture media | 1.1. Prepare mixture of media and solvent to ensure solution and even settling of heat soluble materials  
1.2. Label media to allow tracking in subsequent processes  
1.3. Use a vessel large enough to endure adequate mixing and heating of the media  
1.4. Dispense media into vessels for sterilisation, leaving room for expansion during heating and cooling |
| 2. Sterilise media | 2.1. Load the steriliser in keeping with maximum permitted loads and appropriate positioning of materials  
2.2. Ensure a sterilisation indicator is correctly placed with the load to monitor sterilisation process  
2.3. Operate sterilisation cycle in accordance with manufacturer’s requirements to achieve sterilisation at the required settings  
2.4. Cool media to the temperature specified in the media formulation procedures |
| 3. Pour, label and store media | 3.1. Add labile constituents where necessary, under conditions that will not lead to their denaturation or contamination of media  
3.2. Ensure even mixing of additives and media before dispensing  
3.3. Aseptically dispense media to minimise occurrence of procedural contamination  
3.4. Label media to allow for selection, avoiding areas of the culture vessel required for examination of colony growth  
3.5. Store media to maximise shelf life and minimise contamination  
3.6. Date batch media to ensure correct batch rotation  
3.7. Incubate control plates as a sterility check |
| 4. Perform quality control checks | 4.1. Inspect media for any evidence of possible contamination or problems with structure or sterilisation  
4.2. Check useability of selective media by growth of expected organism  
4.3. Check stored stocks at regular intervals for conformance to required standards |
<table>
<thead>
<tr>
<th>ELEMENT</th>

| 5. Maintain work area and equipment to prevent cross-infection and contamination | 5.1. Use personal protective equipment and safe work practices to ensure safety of self and others  
5.2. Place disposable and reusable items into relevant receptacles  
5.3. Clean and disinfect work area and equipment after use  
5.4. Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- calculating mass and volume
- measuring accurately
- making media to support growth of the relevant micro-organism or tissue
- preventing cross-contamination
- following enterprise procedures consistently
- labelling and storing culture media according to enterprise procedures
- accurately recording data
- reporting non-compliance, anomalies or out of specification results
- sorting, collecting, treating, recycling or disposing of waste
- using appropriate personal protective equipment

#### Required knowledge

Required knowledge includes:

- basic microbiological concepts and terminology such as growth rates in culture, production of gas and haemolysis of red cells in media
- growth requirements of micro-organisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) in terms of their laboratory culture
- the purpose, content and features of culture media and the relationship between the correct preparation of culture media and the optimal growth of organisms or cells
- nature, properties and use of a range of biological media
- the relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- the importance of physical requirements, such as pH and temperature on optimal growth of organisms and cells
- the effect of inappropriate storage on culture media quality and performance
- cleaning and sanitising requirements of equipment and work area
- relevant health, safety and environment requirements
## Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure candidates can:

- prepare culture media which is free of contamination to facilitate the optimal growth of organisms and cells
- use appropriate sterilisation techniques, such as maintaining adequate space between containers
- perform post-sterilisation procedures, such as dispensing or adding using aseptic technique
- ensure the sterilised media has cooled down sufficiently to ensure that heat labile constituents, such as blood, hormones or antibodies are not inactivated when added to the media
- consistently follow enterprise procedures
- report non-compliances, anomalies or out of specification results.

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL943002A Participate in laboratory/field workplace safety
- MSL973004A Perform aseptic techniques.

Resources may include:

- work schedule and enterprise procedures, including advice on safe work practices
- relevant equipment and personal protective equipment
- MSDS.

### Method of assessment

The following assessment methods are suggested:

- review of quality assurance results and examination of batches of media prepared by the candidate
- observation of the candidate preparing culture media
- written and/or oral questioning to assess underpinning knowledge.
### EVIDENCE GUIDE

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

</tbody>
</table>

**Food processing**

A laboratory assistant's task was to prepare and pour agar plates in readiness for milk sampling. The assistant collected all the equipment and material needed to make an agar plate and ensured the working area was suitably prepared. The agar solution was carefully prepared and poured into a large conical flask prior to sterilisation in the autoclave. On completion of the sterilisation cycle, the agar was cooled to 42ºC in a water bath. It was then poured into the plates after flaming the neck of the flask. The lids were quickly replaced on the plates to minimise contamination. The plates were then stored. Any excess plates were bagged in a laminar flow unit and then placed in the fridge. The equipment was hot washed and the benches swabbed with 70% ethanol solution.

**Biomedical**

Media preparation is a routine task of the technical assistant. The methods and standard procedures are all documented but common working knowledge and standard 'don'ts' are not always written into the methods. Some ingredients, such as labile nutrients and antibiotics must be added under sterile conditions after the basic ingredients have been mixed and autoclaved. In one laboratory there is a list of ingredients not to be
### EVIDENCE GUIDE

autoclaved posted on the notice board, in the media recipe book and for good measure, on the autoclave itself. One day, a technical assistant who was preparing media added all the ingredients, including the glucose, then autoclaved all 20L of it. The technical assistant learned the consequences of not paying full attention to the procedure the hard way and spent most of the day removing the 'toffee' residue from inside the autoclave!
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

MSL973004A Perform aseptic techniques

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to perform aseptic techniques to maintain the integrity of both the sample source and the sample. It applies to sampling techniques in tissue culture and to generic microbiological procedures. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory assistants and technicians working in the field or laboratory in the biomedical, biological, food processing and environmental industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for aseptic sampling or transfer | 1.1. Ensure that any sampling procedure conforms with the requirements of the sampling plan  
1.2. Use specified personal protective clothing and equipment  
1.3. Prepare the work area for safe and effective sample transfer  
1.4. Select equipment and materials specified by the procedure  
1.5. Organise equipment to minimise contamination during manipulations  
1.6. Label containers for clear identification  
1.7. Record details in relevant log or database |
| 2. Transfer materials aseptically | 2.1. Protect the integrity of the sample source by sterilising the sampling site and the mouth of transport or culture vessel  
2.2. Sterilise inoculating loops and/or pipette where used to prevent contamination  
2.3. Perform transfer while minimising opportunities for contamination and cross-infection  
2.4. After transfer, and before sealing the transport or culture vessel, flame the vessel mouth to maintain sterility  
2.5. Re-sterilise inoculating loops, minimising the generation of aerosols  
2.6. Perform quality control checks, if required  
2.7. Label transport or culture vessels for clear identification |
| 3. Maintain work area and equipment to prevent cross-infection and contamination | 3.1. Place disposable and reusable items into relevant receptacles  
3.2. Clean and disinfect work area and equipment after use  
3.3. Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal |
### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- sterilising equipment such as flasks, loops and pipettes
- handling of laboratory equipment and glassware to prevent contamination
- streak plating of inoculations
- sampling transfers
- labelling and storing culture media according to enterprise procedures
- recording data accurately
- reporting non-compliance, anomalies or out-of-specification results
- sorting, collecting, treating, recycling or disposing of waste
- following enterprise procedures consistently
- using appropriate personal protective equipment

#### Required knowledge

Required knowledge includes:

- the relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- cleaning and sanitising requirements of equipment and work area and effects of physical and chemical agents on microbial growth and death
- principles of infection control related to occupational health and safety (OHS), sampling and transfer of materials in microbiological investigations
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- growth requirements of micro-organisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) in terms of their laboratory culture
- relevant health, safety and environment requirements

#### Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

**Food processing:**

- food spoilage symptoms
- food safety principles
- beneficial/detrimental organisms relevant to specific food industry sector
# Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

In particular, assessors should look to see that the candidate:

- follows established laboratory procedures, including recording of samples, operation of equipment and cleaning/decontamination
- prevents cross-contamination of sample source and sample
- manipulates equipment to prevent contamination of culture medium during transfer
- sterilises equipment as required to prevent cross-contamination of work area, personnel and environment.

## Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL943002A Participate in laboratory/field workplace safety
- MSL973003A Prepare culture media.

Resources may include:

- standard laboratory with appropriate equipment and materials
- enterprise procedures and standard methods
- MSDS.

## Method of assessment

The following assessment methods are suggested:

- review of quality assurance results and examination of samples transferred by the candidate
- observation of the candidate successfully transferring a range of samples
- written and/or oral questioning to assess underpinning knowledge.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess.

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.

**Food processing**

As part of the quality assurance program at an ice-cream manufacturer, six ice-creams were removed from the production line, placed in sterile bags and then stored in a freezer in the microbiology laboratory. Later in the morning, the laboratory assistant removed the samples from the freezer, registered the samples with the date received and test code and signed the register book. She/he then placed the samples in a water bath set at 42°C. While the samples were melting, the laboratory assistant labelled the respective agar plates with the registered codes. Using aseptic techniques she/he carefully transferred 1ml of ice-cream mix into the total plate count agar. The plates were then placed in the incubator. The final results were noted and recorded.

**Biomedical**

In preparation for antibiotic sensitivity testing and biochemical identification of presumed pathogenic bacteria, a technical assistant was asked to prepare a sterile peptone suspension of a lactose fermenting colony. The colony had been previously identified by the supervisor on a MacConkey’s agar plate. The assistant labelled a 5mL tube of peptone broth with the sample number and a code for the identified colony and then donned a pair of disposable gloves. Bringing the labelled tube and the MacConkey’s plate near to the Bunsen, she/he took an inoculating loop and sterilised it in the
<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>incandescent flame. She/he carefully cooled the loop in a sterile area of the agar and gently scraped off half the colony. With the other hand, and in the vicinity of the heated air of the Bunsen, she/he removed the cover of the peptone tube in her/his crooked finger. In a continuous and coordinated way she/he flamed the lip of the tube and emulsified the colony in the broth. She/he then flamed the lip of the tube and replaced its cover. Finally, the technical assistant re-sterilised the inoculating loop by introducing and holding it in the Bunsen flame to minimise the generation of bacterial aerosols.</td>

### Personal protective equipment

Personal protective equipment may include:

- gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits and respirators
- biohazard containers and laminar flow cabinets

### Sample pot and transfer media and the subculturing and/or passaging of culture

- sterile broth
- media for isolation of colony
- tissue culture media
- media for continuous culture systems

### Samples

Samples may include:

- body fluids and liquids
- water and soil
- sterile pharmaceuticals
- yeasts and moulds
- milk and yoghurt
- swabs and smears
- propagation tissue
- plant material
- fermented foods and beverages

### Equipment

Equipment may include:

- transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas
- Bunsen burners and bench incinerators
- anaerobic jars
- incubators, water baths, refrigerators, freezers and possibly dry ice and liquid nitrogen cylinders
- laminar flow units and biohazard cabinets
- autoclave or pressure cooker
- swabs
- continuous culture systems

| 1. Interpret test requirements | 1.1. Review test request to identify samples to be tested, test method and equipment involved  
1.2. Identify hazards associated with the sample, preparation methods and equipment and implement enterprise control measures |
| 2. Set up work area for preparation and examination of samples | 2.1. Collect equipment and arrange the workspace so that equipment can be used safely and efficiently  
2.2. Perform pre-use and safety checks to ensure equipment is fit for purpose and report faulty or unsafe equipment to appropriate personnel |
| 3. Prepare samples for examination | 3.1. Log and label samples according to enterprise procedures to ensure traceability  
3.2. Check suitability of the original and prepared sample for the examination and report unsuitable samples to appropriate personnel  
3.3. Prepare and store the sample for examination following enterprise methods |
| 4. Set up and use a light microscope | 4.1. Set up the light path to optimise resolution  
4.2. Select the appropriate objectives and filter for the sample being examined  
4.3. Ensure that the lenses are clean  
4.4. Adjust settings and alignment of the light path to optimise performance  
4.5. Place sample correctly on the stage |
| 5. Observe, identify and report sample characteristics | 5.1. Recognise and identify significant sample characteristics  
5.2. Perform required calculations accurately  
5.3. Prepare and view control samples and check that results are consistent with expected values  
5.4. Identify and report out of specification or atypical results promptly to appropriate personnel  
5.5. Record and report data in accordance with enterprise procedures |
| 6. Maintain a safe work environment | 6.1. Ensure safety and minimise cross-contamination through the use of personal protective clothing and safety equipment  
6.2. Handle all samples and equipment in accordance with enterprise safety protocols  
6.3. Clean up spills using appropriate techniques to

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:
- setting up the workbench and microscope ergonomically
- setting up, cleaning and using a light microscope to achieve optimum resolution of the specimen
- using personal protective clothing and other safety equipment correctly
- performing counts on samples
- performing basic measurements using grids
- logging and tracking samples through all steps from receiving a sample through to completion of a procedure and reporting
- interpreting and recording test results, including simple calculations
- correctly handling and storing samples and equipment

Required knowledge

Required knowledge includes:
- parts and functions of a light microscope
- importance and appropriate use of controls and certified reference materials
- hazards and risks in laboratories associated with performing microscopic examination
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biological industry:
- basic structure and function of cells and organelles
- basic classes and classification of organisms of organisms, such as prokaryotes, eukaryotes, plants, animals, bacteria, viruses and prions
- cell physiology and processes, such as simple and facilitated diffusion, plasmolysis, osmosis, tonicity, active transport, energy production, mitosis, motility, phagocytosis and pinocytosis
- purposes and mechanisms of staining (e.g. Gram +ve and -ve)
Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:
- follow enterprise standards, procedures and practices
- prepare suitable samples
- recognise, identify and document significant sample characteristics
- set up a light microscope for optimal resolution
- maintain personal safety and that of others
- minimise cross-contamination and contamination of the laboratory and environment.

**Context of and specific resources for assessment**

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:
- **MSL922001A Record and present data**
- **MSL933002A Contribute to the achievement of quality objectives**
- **MSL943002A Participate in laboratory/field workplace safety**
- **MSL953001A Receive and prepare samples for testing**.

Resources may include:
- standard laboratory equipped with appropriate equipment, such as light microscopes and samples
- enterprise procedures, standard methods and materials.

**Method of assessment**

The following assessment methods are suggested:
- observation of the candidate performing microscopic examinations
- review of data records prepared by the candidate, such as counts, observations and results
- feedback from supervisors and peers about adherence to enterprise/technical procedures
- questioning to assess underpinning knowledge.
## EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</td>
</tr>
<tr>
<td>Access must be provided to appropriate learning and/or assessment support when required.</td>
</tr>
<tr>
<td>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</td>
</tr>
</tbody>
</table>

### This competency in practice

<table>
<thead>
<tr>
<th>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Construction materials testing</strong></td>
</tr>
<tr>
<td>The supply of river sand is running out and quarries are accessing alternative sources of sand for use in concrete mixes in construction. The sand should not be an aggregate that is likely to break down into smaller particles. A technician in a quarry company is required to analyse samples of crushed rock using a light microscope. The technician looks for characteristics of the sample, such as angularities, roundness, sharpness, cracks, presence of organic matter, mineral structure and whether the particles are a conglomerate. If the sample does not meet the characteristics, the company will need to treat it to make it suitable for use in concrete mixes (for example by washing, crushing and sieving).</td>
</tr>
<tr>
<td><strong>Food processing</strong></td>
</tr>
<tr>
<td>A customer complaint is received about the baking properties of a flour delivery. The laboratory assistant at the flour mill is given the task of testing the starch content of the suspect flour. He/she prepares iodine stained samples of the returned flour and a range of baked and partially baked products prepared from it. First, the assistant makes up fresh iodine staining solution and then prepares slides of each sample for microscopic examination. He/she identifies the</td>
</tr>
</tbody>
</table>
characteristic starch granules of the flour sample and records the degree of gelatinisation in the starch granules in the baked samples. He/she discusses the results with the supervisor and prepares a report for the customer.

**Biomedical**

A laboratory assistant works in the microbiology laboratory of a public hospital and is responsible for preparing and staining sputum smears from patients for micro and culture. The assistant puts on a clean gown and gloves before collecting the specimens from the reception area of the laboratory. The assistant prepares cultures of the sputum specimens on simple and selective media before preparing, fixing and staining smears for microscopic examination. The results are checked by the supervisor, entered into the laboratory information management system (LIMS) and sent to the appropriate section of the hospital.

**Environmental**

A laboratory assistant prepares media for plant tissue culture. There has been some contamination of Gram-positive bacteria in the last two batches and the supervisor has initiated an overhaul of the preparation and aliquotting procedure. The laboratory assistant has been asked to follow the new procedure exactly and to remove samples at each stage of ingredient addition for microscopic examination. The laboratory assistant records the exact addition amounts, batch numbers and brands of the reagents, the location of the addition (which biohazard cabinet), the equipment used and the pre-sterilisation records of all equipment.

The laboratory assistant then prepares slides, fixes them and performs a Gram stain on each of the aliquots removed from the new preparation run. Microscopic analysis of each aliquot reveals nil contamination. The supervisor decides that there has been a breach in the old procedure and the laboratory assistant is asked to follow the new procedure and to perform a routine microscopic check on all batches for the next month.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>

</tbody>
</table>
### RANGE STATEMENT

- fixing of films to minimise cell damage and the production of artefacts
- labelling
- mounting of stained films, sections and whole mounts to ensure long term preservation
- permanent labels for smears, films and sections for presentation, storage and retrieval
- physical or chemical separation
- selection of diluent to preserve or enhance visibility of the cells to be counted
- selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling
- serial dilution to enable individual cells to be reliably counted
- staining of fixed material to illustrate required characteristics
- sub-sampling
- thin film or smear on a slide

### Checking sample condition

Checking sample condition may include:
- labelling
- spillage
- spoilage due to incorrect storage and transport conditions
- temperature control
- suitability for the examination

### Pre-use checks

Pre-use checks may include:
- calibration
- cleaning/checking use by dates of reagents
- routine maintenance

### Equipment

Equipment may include:
- glass slides
- counting chambers (e.g. haemocytometer)
- optical graticules and stage micrometers
- tissue culture flasks

### Light microscopes

Light microscopes may include:
- bright field illumination microscopic examination up to 1000x magnification
- stereomicroscopes and dissection microscopes
## RANGE STATEMENT

- compound microscopes
- phase contrast microscopes
- inverted microscopes

### Biological samples

Biological samples may include:
- smears, impression smears, sections, squashes, films and whole mounts
- a monolayer of cells in smears and films
- fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques
- blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes
- stained sections of animal tissues using regressive haematoxylin and eosin to differentiate cytoplasmic and nuclear detail
- differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium)
- stained whole mounts of helminths
- whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae
- pond water organisms
- onion root tip squash
- midstream sample of urine

### Physical samples

Physical samples may include:
- sand
- asbestos fibres
- coal samples
- construction testing materials
- geological specimens

### Checking prepared samples

Checking prepared samples may include looking for:
- clean and scratch-free microscope slides to reduce artefacts
- preparation according to SOPs
- a homogeneous suspension of sample
- films and smears that have been fixed rapidly
<table>

</table>
## RANGE STATEMENT

- use of biohazard containers and laminar flow cabinet
- correct labelling of reagents and hazardous materials
- handling and storing hazardous materials and equipment in accordance with labels, MSDS and manufacturer's instructions
- ergonomic layout, correct illumination and organisation of workbench
- regular cleaning and/or decontamination of equipment and work areas

### Occupational health and safety (OHS) and environmental management requirements

OHS and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL974004A Perform food tests

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to interpret food test requirements, prepare samples, conduct pre-use and calibration checks on equipment and perform routine testing of raw food materials, in-process materials and final products. These tests will involve several measurement steps. The unit includes data processing and some interpretation of results and tracking of obvious test malfunctions where the procedure is standardised. However, personnel are not required to analyse data, optimise tests/procedures for specific samples or troubleshoot equipment problems where the solution is not apparent. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to laboratory or technical assistants and instrument operators working in the food and beverage processing industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section ‘This competency in practice’. |

Licensing/Regulatory Information
Not applicable.

| | 7.2. Maintain confidentiality and security of enterprise information and laboratory data  
| | 7.3. Maintain equipment and calibration logs in accordance with enterprise procedures  

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- using instruments for qualitative and/or quantitative analysis
- interpreting test methods and procedures
- sample preparation procedures
- performing calibration checks
- using instruments for qualitative and/or quantitative analysis
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- calculations to estimate uncertainty and produce results
- preparing calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

#### Required knowledge

Required knowledge includes:

- principles and concepts underpinning the test/procedure
- purpose of tests
- metrology techniques underpinning test/procedure including uncertainty
- principles and concepts related to equipment/instrument operation and testing
- function of key components of the equipment/instrument
- effects on the test of modifying equipment/instrument variables
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Assessors should ensure that candidates can:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• interpret test methods/procedures accurately</td>

### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSL924001A Process and interpret data.

Resources may include:

- standard laboratory equipped with test equipment, instruments, standards and materials
- enterprise procedures and standard methods.

### Method of assessment

The following assessment methods are suggested:

- review of test data/results obtained by the candidate over a period of time to check accuracy, consistency and timeliness of results
## EVIDENCE GUIDE

- review of test records and workplace documentation completed by the candidate
- observation of candidate conducting a range of food tests and procedures and sample preparation
- feedback from peers and supervisors
- oral or written questioning of food technology concepts and principles, test methods and enterprise procedures.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

### This competency in practice

Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

**Food processing**

A technician was required to conduct an analysis of the level of sorbic acid in samples of processed cheese. She/he set up and calibrated the distillation unit while the samples were prepared. The controls and samples were distilled and placed in the spectrometer at 260 nm. Readings were carefully recorded for each sample and control flask. The control sample readings at the beginning and end of the testing period were compared for any variance. The technician worked quickly and excluded light from the reactants as they were light sensitive. Analytical data was presented to the supervisor for checking and signing-off for release of the product batch prior to the results being recorded on a daily run chart for viewing by production personnel.
Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Codes of practice</th>

</tbody>
</table>
### RANGE STATEMENT

- equipment startup, operation and shutdown procedures
- gene technology regulations
- industry standards, such as Royal Australian Chemical Institute (RACI) or American Association of Cereal Chemists (AACI) methods for colour, moisture, total ash, fats and proteins, nitrogen, fibre, micro-organisms and viscosity
- material safety data sheets (MSDS)
- material, production and product specifications (including maximum residue levels)
- national measurement regulations and guidelines
- principles of good laboratory practice (GLP)
- production and laboratory schedules
- quality manuals, equipment and procedures manuals
- SOPs and in-house methods
- Therapeutic Goods Regulations 1009

### Sample preparation processes

Sample preparation processes may include:

- grinding
- milling
- preparation of discs
- dissolving
- ashing
- refluxing
- extracting
- filtration
- evaporation
- flocculation
- precipitation and centrifugation
- culturing of selected micro-organisms
- digestion
- degassing
- temperature equilibration

### Principles and concepts underpinning the test/procedure

Principles and concepts underpinning the test/procedure may include:

- ions, atoms, molecules, bonding, affinities and related properties
### RANGE STATEMENT

- chemical reactions (acid/base and complexiometric)
- structure and properties of proteins, lipids, carbohydrates, vitamins and minerals
- food additives, flavourings and essences
- nutrient value of major food groups
- interaction of water with food components
- microbiology, including incubation characteristics, selective media, growth stages of bacterial cultures and reference organisms
- microbiology of organisms with public health significance
- chemical and microbial changes in food
- food preservation techniques
- fermentation process
- packaging and controlled atmosphere
- elastic properties of materials and hardness
- cohesive/adhesive forces, fluid flow and viscosity
- changes of state, energy content and enthalpy change
- electromagnetic spectrum and absorption, emission and refraction of light
- quality control program for raw materials, process control and finished product inspection
- genetically modified foods

### Food tests and procedures

Food tests and procedures may include:

- visual and sensory tests:
  - appearance, taste, texture, colour and odour of foods
  - melting point, boiling point and freezing point
  - sediments and scorched particles
  - foreign matter
  - damage to packaging and compatibility of packaging
  - dispersability
- chemical analysis:
  - pH, conductivity and moisture content
  - solids, fats, proteins and carbohydrates
<table>

</tr>
</thead>
<tbody>
<tr>
<td>● ash analysis and salt analysis</td>
<td>● control of starting materials, in-process materials and finished products</td>
</tr>
<tr>
<td>● titratable acids, iodine values and peroxide values</td>
<td>● health monitoring</td>
</tr>
<tr>
<td>● enzyme activity</td>
<td></td>
</tr>
</tbody>
</table>
### RANGE STATEMENT

- basic troubleshooting of production processes

#### Hazards

Hazards may include:
- microbiological organisms and agents associated with soil, air, water, plants, animal tissue and fluids
- chemicals, such as acids, heavy metals, pesticides and hydrocarbons
- aerosols from broken centrifuge tubes and pipetting
- sharps and broken glassware
- flammable liquids and gases
- cryogenics, such as dry ice and liquid nitrogen
- fluids under pressure, such as steam and industrial gases
- sources of ignition
- high temperature ashing processes
- disturbance or interruption of services

#### Hazard control measures

Hazard control measures may include:
- ensuring access to service shut-off points
- recognising and observing hazard warnings and safety signs
- labelling of samples, reagents, aliquoted samples and hazardous materials
- handling and storage of hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions
- identifying and reporting operating problems or equipment malfunctions
- cleaning and decontaminating equipment and work areas regularly using enterprise procedures
- using personal protective clothing and equipment, such as gloves, safety glasses, coveralls, gown, body suits and respirators
- using containment facilities (PCII, PCIII and PCIV physical containment laboratories), containment equipment (biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets) and containment procedures
- following established manual handling
## RANGE STATEMENT

<table>
<thead>
<tr>
<th>procedures</th>

<tbody>
<tr>
<td>• reporting abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates to appropriate personnel</td>
</tr>
</tbody>
</table>

### Records

Records may include:

- test and calibration results
- equipment use, maintenance and servicing history
- faulty or unsafe equipment

### Occupational health and safety (OHS) and environmental management requirements

OHS and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL974006A Perform biological procedures

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the ability to interpret work requirements, prepare samples, conduct pre-use and calibration checks on equipment and perform routine biological procedures, including sample preparation. These procedures may involve several steps and are used to classify cell types, species and biologically active compounds by analysing their biological and chemical characteristics. This unit includes data processing, interpretation of results and troubleshooting obvious departures from standard procedures. |

Application of the Unit

| Application of the unit | This unit of competency is applicable to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'. |

Licensing/Regulatory Information
Not applicable.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Interpret and schedule work requirements | 1.1. Review work request to identify samples, required procedures and materials/equipment/instruments involved  
1.2. Identify hazards and enterprise control measures associated with the sample, preparation methods, reagents and/or equipment  
1.3. Plan parallel work sequences to optimise throughput of multiple sets of samples, if appropriate |
| 2. Receive and prepare biological samples | 2.1. Log samples using standard operating procedures (SOPs)  
2.2. Record sample description, compare with specification and note and report discrepancies  
2.3. Prepare samples in accordance with testing requirements  
2.4. Ensure traceability of sample from receipt to reporting of results |
| 3. Perform techniques that assist in the classification of a cell or species | 3.1. Select suitable techniques in accordance with enterprise requirements and methods  
3.2. Set up and use equipment and reagents in accordance with the method  
3.3. Perform techniques in accordance with the method |
| 4. Perform techniques that analyse biological activity | 4.1. Select suitable techniques in accordance with enterprise requirements and methods  
4.2. Set up and use equipment and reagents in accordance with the method  
4.3. Perform techniques in accordance with the method |
| 5. Process and interpret data | 5.1. Record test data noting atypical observations  
5.2. Construct calibration graphs, if appropriate, and compute results for all samples from these graphs  
5.3. Ensure calculated values are consistent with expectations  
5.4. Record and report results in accordance with enterprise procedures  
5.5. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required  
5.6. Interpret trends in data and/or results and report out of specification or atypical results promptly to appropriate personnel  
5.7. Determine if obvious procedure or equipment...

| 6. Maintain a safe work environment | 6.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel  
6.2. Minimise the generation of wastes  
6.3. Ensure the safe disposal of biohazardous wastes  
6.4. Clean, care for and store equipment and reagents as required |
| 7. Maintain laboratory records   | 7.1. Record approved data into enterprise system  
7.2. Maintain confidentiality and security of enterprise information and laboratory data  
7.3. Maintain equipment and calibration logs in accordance with enterprise procedures |
**Required Skills and Knowledge**

<table>
<thead>
<tr>
<th>REQUIRED SKILLS AND KNOWLEDGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>This section describes the skills and knowledge required for this unit.</td>
</tr>
</tbody>
</table>

### Required skills

- using instruments for qualitative and/or quantitative analysis
- sample preparation and separation techniques
- performing calibration checks
- metrology techniques underpinning test/procedure including estimating uncertainty
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- preparing and using calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

### Required knowledge

- hazards and risks in biological laboratories
- principles and concepts related to equipment/instrument operation and testing
- function of key components of the equipment/instrument and/or reagents
- effects of modifying equipment/instrument variables
- basic equipment/method troubleshooting procedures
- calculation steps to give results in appropriate units and precision
- sources of uncertainty in measurement and methods for control
- importance and appropriate use of controls and certified reference materials
- enterprise and/or legal requirements for traceability
- relevant health, safety and environmental requirements
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:

- interpret test procedures accurately
- prepare and test samples using procedures appropriate to the nature of sample
- perform calibration checks (if required)
- safely operate test equipment to enterprise standards and/or manufacturer’s specification
- prepare calibration graphs and calculate results in appropriate units and precision
- apply basic theoretical knowledge to interpret gross features of data and make relevant conclusions
- identify atypical results as out of normal range or an artefact using reference material or quality control sera
- trace and source obvious causes of an artefact
- communicate problems to a supervisor or outside service technician
- record and communicate results according to enterprise procedures
- maintain security, integrity, traceability and identity of samples, sub-samples and documentation
- follow OHS procedures and principles of GLP.

#### Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- **MSL924001A Process and interpret data**
- **MSL974003A Perform chemical tests and procedures**.

Resources may include:

- standard laboratory equipped with appropriate test equipment and instruments, reagents and materials
- SOPs and testing methods.

#### Method of assessment

The following assessment methods are suggested:
## EVIDENCE GUIDE

- review of results obtained by the candidate over a period of time to ensure accuracy, consistency and timeliness
- review of testing records and workplace documentation completed by the candidate
- observation of candidate conducting a range of biological procedures
- feedback from peers and supervisors
- oral or written questioning of biological concepts, principles and enterprise procedures.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

### This competency in practice

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

**Biomedical (1)**

A laboratory technician conducts a screening test for parasites in stool samples. She/he checks the sample identification details, cross-checks the sample barcode with the request slip and the data entry in the laboratory information management system (LIMS). The technician locates the test method and then examines the sample container to ensure that it has not leaked and that there is sufficient volume for the test. She/he prepares the sample by adding solvent to a portion and shaking it before placing it in a centrifuge. After satisfactory separation, she/he pipettes a small quantity of the top layer of solvent onto a glass slide and adds iodine as a stain. The technician carefully views the slide using x40.
**EVIDENCE GUIDE**

<table>
<thead>
<tr>
<th>Magnification and searches for eggs. She/he enters a nil result in the LIMS and disposes of the sample in accordance with enterprise procedures.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Biomedical (2)</strong></td>
</tr>
<tr>
<td>A technical officer is requested to determine the total protein concentration of a blood sample using colorimetry. After checking the condition of the sample, she/he collects the Biuret reagent from the refrigerator, the required number of tubes and protein control samples and standards specified in the method. The officer labels the tubes and then accurately dispenses the correct volumes of reagent, standards, controls and samples into them. The solutions are thoroughly mixed using a vortex mixer and allowed to stand for five minutes for the reaction to occur. She/he records absorbance readings for each tube and prepares a calibration curve. The officer reads the concentration values from the graph for the control and test samples and checks the control data against the expected values. As these fall within the accepted range, she/he enters the test results into the LIMS.</td>
</tr>
</tbody>
</table>
# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

## RANGE STATEMENT

### Disposal of biohazardous wastes

Disposal of biohazardous wastes may include:

- collection for sterilisation by autoclaving (e.g. autoclaving of microbiological plates)
- appropriate storage (e.g. of waste containing radioactive isotopes)
- use of biohazard waste containers

### Records

Records may include:

- test calibration results
- equipment use, maintenance and servicing history
- faulty or unsafe equipment
- batch number, catalogue number and use by date for analytical kits

### Occupational health and safety (OHS) and environmental management requirements

OHS and environmental management requirements:

- all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time
- all operations assume the potentially hazardous nature of samples and require standard precautions to be applied
- where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL975001A Perform microbiological tests

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor       | This unit of competency covers the ability to contribute to the culture, isolation and identification of micro-organisms, such as bacteria, fungi, viruses, protozoans, algae and parasites in order to investigate the physiology and pathology of plants and animals, monitor the natural environment, and to assist in the production of foods, pharmaceutical goods and other manufactured materials. |

© Commonwealth of Australia, 2015
AgriFood Skills Australia
Application of the Unit

This unit of competency is applicable to laboratory technicians and technical officers working in the biomedical, biotechnology, environmental, manufacturing and food processing industry sectors. The results of work performed by technical personnel would normally be integrated, interpreted and reported on by scientists, medical, veterinary or plant pathologists or other responsible officers of an enterprise. Although a supervisor may not always be present, the technician will follow standard operating procedures (SOPs) that will clearly describe the scope of permitted practice in modifying testing procedures, interpreting of data and for communicating test results to people outside the laboratory.

It is applicable to investigations of as well as addressing the broader needs of biotechnology and tissue culture applications.

Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'.

Licensing/Regulatory Information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using protective clothing and biological safety cabinets
- safely performing tasks for the culture, isolation, identification and use of micro-organisms
- not contaminating oneself, other people, the work area, equipment or the samples or materials under test
- not contaminating media or reagents during manipulations involving transfer of cultures
- identifying artefacts or image aberrations attributable to misalignment or obstruction of light paths or condensers used in bright field, dark ground, phase and fluorescent microscopy, or with other steps in microscopic examinations
- Gram reactions
- describing bacterial colony forms on common media used in bacteriological investigations
- preparing documentation that is accurate, concise and in accordance with enterprise requirements
- reporting incidents or accidents
- disinfecting spillage and safely disposing of all contaminated materials
- decontaminating the work area upon completion of work

Required knowledge

Required knowledge includes:

- microbiological terminology, including, where relevant, that of bacteriology, parasitology, virology and mycology
- disinfection and sterilisation as applied to practical aspects of microbiology
- microbial diversity
- micro-organisms of importance in medicine, in production of foods and other manufactured goods, and in assessment of the natural environment
- cell biology and chemistry related to laboratory phenomena, such as growth and isolation of organisms for identification
- microbial genetics
- rationale for sample dilution when preparing materials for enumerating organisms and other pure culture work (e.g. Most Probable Number (MPN) technique)
- need for accurate identification of sample source (e.g. body, specimen, process line and field location)
- relevant health, safety and environment requirements
### REQUIRED SKILLS AND KNOWLEDGE

**Specific industry**

Additional knowledge requirements may apply for different industry sectors. For example:

**Biomedical and biotechnology:**
- aspects of normal and abnormal anatomy, physiology, biochemistry and immunology as these pertain to the microbiological investigation of health and disease of animals and plants
- interactions of micro-organisms with hosts
- issues of pathogenicity
- antimicrobial agents and antibiotic susceptibility/sensitivity testing
- use of polymerase chain reaction (PCR) procedures in virology testing
- handling of genetically altered cells
- freezing and thawing of cultured cells
- in tissue culture settings, maintaining the proper growth or storage conditions for the preservation of pure cell culture lines
- maintaining the proper containment and preservation of genetically altered cell lines
- use of micro-organisms in enzyme, vitamin, preservative and amino acid production

**Biological and environmental:**
- sampling for the microbiological testing of drinking water which should conform to the guidelines published by the National Health and Medical Research Council (NHMRC) and the Australian Water Resources Council
- testing procedures for the microbiological content of water which should be guided by advice of relevant national and state/territory environment protection agencies
- aspects of ecology and other biological disciplines as these pertain to the microbiological investigation of the natural environment
- use of micro-organisms in waste and toxic spill recovery
- use of micro-organisms in site remediation
- identification of micro-organisms to assist in determining the cause, time or nature of pollution

**Food processing:**
- sampling and test batteries which should conform to relevant food standards code
- aspects of food, pharmaceutical and other relevant processing as these relate to the involvement of micro-organisms in the production process and the microbiological monitoring of the production process
- use of bacteria as probiotics
- multiple resistant antibiotic strains of bacteria and their relevance to the food industry
- importance of hazard analysis and critical control points (HACCP) to production
### REQUIRED SKILLS AND KNOWLEDGE

<td></td>
</tr>
</tbody>
</table>

**Method of assessment**

The following assessment methods are suggested:

- review of results/data/records generated by the candidate
- feedback from peers and supervisors to confirm that enterprise procedures are consistently followed and those results meet workplace requirements
- oral and/or written questions associated with laboratory determinations and record keeping
- integrated assessment with a case study focus, such as the isolation and identification of bacterial species in a specimen containing two or more species, by relating sample, cultural, morphological and biochemical data, and such from other relevant tests and procedures.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

**This competency in practice**

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

**Biomedical**

A patient's urine sample and request form have been brought to the laboratory for urgent testing. After
preparation of the work area, the technical officer examines a cover-slipped preparation of the sample and notes the presence of pus cells and non-motile rod organisms. In a Gram stain he confirms the presence of pus cells and Gram negative bacilli. They inoculate a MacConkey's and a blood agar plate for growth and isolation of bacteria. After consultation with the supervisor they are asked to set up a direct culture for antibiotic sensitivity testing. The supervisor informs the clinician of the initial findings. The next morning the technical officer assists the supervisor to read the plates. The predominance of lactose fermenting organisms is noted. The supervisor asks the technical officer to set up a biochemical panel to assist in identifying the organism. The supervisor confirms the technical officer's reading of the direct sensitivities plate. Later in the day the team is able to confirm that the patient's urine is infected with Escherichia coli and that the organism is sensitive to a number of antibiotics, including a sulphonamide and a cephalosporin.

**Food processing**

A swollen can of tuna was received at the company laboratory for microbiological investigation. The technical officer recorded the details supplied with the can and prepared for the investigation. A range of media, including cooked meat media and nutrient broth were prepared and aseptic can opening equipment was sterilised. After the can was opened in the biohazard cabinet, the state of the contents was recorded, pH checked and Gram stains prepared and examined. The media was inoculated with the food samples and incubated at a range of temperatures under aerobic and anaerobic conditions. The can was then emptied for double seam tear down to determine the cause of the spoilage. The next day the technical officer examined the media and broth cultures. From all the data collected the technical officer and supervisor were able to determine that pre-processing spoilage had occurred, probably due to excessive delays in the process prior to can sterilisation. The results were reported to production personnel so that they could follow up the circumstances relating to the delays, and ensure that the SOP had been followed and sufficient product rejected.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used.

Standards, codes, procedures and/or enterprise requirements

- Standards, codes, procedures and/or enterprise requirements may include:
  - Australian and international standards, such as:
    - AS 2252 Biological safety cabinets
    - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
    - AS/NZS 2243.3:2002 Safety in laboratories - Microbiological aspects and containment facilities
    - ISO/TS 19036:2006 Microbiology of food and animal feeding stuffs - Guidelines for the estimation of measurement of uncertainty for quantitative determinations
    - ISO7218:2007 Microbiology of food and animal feeding stuffs - General requirements and guidance for microbiological examinations
  - cleaning, hygiene, personal hygiene requirements
  - enterprise procedures, standard operating procedures (SOPs) and operating manuals
  - guidelines for small scale genetic manipulation work from the gene technology regulations
  - incident and accident/injury reports
  - instructions to comply with new legislation, standards, guidelines and codes
  - quality system and continued improvement processes
  - safety requirements for equipment, materials or products and material safety data sheets
### RANGE STATEMENT

| **(MSDS)** | sampling procedures (labelling, preparation, storage, transport and disposal)  
| | schematics, work flows and laboratory layouts  
| | test procedures (validated and authorised)  
| | waste minimisation, containment, processing and disposal procedures |

#### Equipment, materials and systems

Equipment, materials and systems may include:

- protective and physical containment facilities and equipment for safe handling of micro-organisms personal protective equipment, such as gloves, gowns, masks and safety glasses and gloves for working with extremes of heat and cold  
- carbon dioxide cabinets and incubators  
- transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas  
- liquid nitrogen containers for cell storage  
- filtration membranes  
- microscopes with bright field and other relevant illumination systems and stereomicroscopes  
- counting chambers for micro-enumeration  
- colony counting devices  
- Bunsen burners and bench incinerators  
- Incubators and water baths  
- anaerobic jars, fermentation chambers, continuous culture systems and other devices for controlling growth environments of micro-organisms  
- laboratory information management systems (LIMS), databases, record and filing systems  
- stains, media, reagents and biological materials necessary for laboratory testing  
- laboratory glassware and measuring equipment  
- disinfecting and sterilising solutions and equipment, such as ultraviolet (UV) lamps  
- materials suitable for the safe containment, collection, processing and disposal of biological and non-biological wastes  
- autoclaves

MSS407001A Prepare for and implement change

Modification History
New unit, superseding MSACMG701A Prepare for and implement change - Equivalent

Unit Descriptor
This unit of competency covers the skills and knowledge required to establish the preconditions for the implementation of a change, such as a ‘step change’ or a change resulting from a problem solving exercise, such as a kaizen blitz. The unit can be applied to subsections of an organisation, such as a team, area or department, or a small or medium sized enterprise (SME).

Application of the Unit
This unit is intended for team leaders and people with a similar sphere of influence/scope of authority and responsibility. It applies to individuals who are already familiar with change leadership in a competitive systems and practices environment through either previous study or industry experience. Where this is not the case, MSS403010A Facilitate change in an organisation implementing competitive systems and practices, may be completed to supply the necessary skills.
Skills covered by this unit are applied in an organisation after a desired change has already been identified. This unit may also be applied in service organisations applying competitive systems and practices principles.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Define the change
   1.1 Determine the purpose of the change
   1.2 Identify key change project personnel
   1.3 Record the current state that the change is addressing
   1.4 Develop a consensus view of the intended future state, including indicators of a successful change
   1.5 Develop an agreed statement of the solution
   1.6 Identify the health, safety and environment (HSE) impacts of the change
   1.7 Determine the scope of the change project, including taking into account the impact of the solution on any codes of practice, standards, contracts, commercial or industrial agreements
   1.8 Obtain sign-off from key change project personnel

2 Identify personnel required to implement the change and their roles
   2.1 Develop a high level change network map
   2.2 Identify employees, suppliers or customers who may be required to implement the change
   2.3 Identify other demands on these people during the change
   2.4 Investigate priorities, synergies and conflicts
   2.5 Take appropriate action to resolve conflicts
<table>

</table>
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:
- undertaking self-directed problem solving and decision-making
- communicating across all levels in an organisation
- presenting to others the benefits of change
- initiating, planning and executing change across broad and specialised contexts
- developing strategies to counter resistance to change
- adjusting change strategies on the basis of review findings and feedback

Required knowledge

Required knowledge includes:
- competitive systems and practices principles, including:
  - value stream mapping
  - 5S
  - Just in Time (JIT)
  - mistake proofing
  - process mapping
  - establishing customer pull
  - kaizen and kaizen blitz
  - setting of key performance indicators (KPIs)/metrics
  - identification and elimination of waste (muda)
- change management
- workplace strategy and vision
- methods of determining competency gaps in team members
- project planning and management

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and A person who demonstrates competency in this unit must
### evidence required to demonstrate competency in this unit

Be able to provide evidence of the ability to:

- prepare for and deliver change
- communicate with all stakeholders
- develop consensus among stakeholders
- undertake risk analysis of proposed changes
- develop and implement of change management plans that have objectives, measurable KPIS and tested solutions to anticipated contingencies.

### Context of and specific resources for assessment

Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to:

- workplace procedures and plans relevant to work area
- specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee
- documentation and information in relation to production, waste, overheads and hazard control/management
- reports from supervisors/managers
- case studies and scenarios to assess responses to contingencies.

### Method of assessment

A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence:

- demonstration in the workplace
- workplace projects
- suitable simulation
- case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on)
- targeted questioning
- reports from supervisors, peers and colleagues (third-party reports)
- portfolio of evidence.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and
| **Guidance information for assessment** | Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed. |

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Competitive systems and practices** | Competitive systems and practices may include, but are not limited to:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems
- statistical process control systems, including six sigma and three sigma
- JIT, kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree

Competitive systems and practices should be interpreted
| **Change project personnel** | Change project personnel include:

- the decision makers who determine if the proposed change may proceed and the key managers and implementers of the change |

| **Current state** | The current state is ideally defined by existing data. Where this is not available suitable proxies should be sought |

| **Codes of practice/standards** | Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used |

| **HSE** | All changes implemented should be at least neutral, or preferably beneficial, in their impact on HSE |

| **High level change network** | High level change network includes groups involved in the change and who need to be committed to the change and include:

- sponsors
- cascading change sponsors
- targets
- agents
- advocates
- enablers
- impeders |

| **Organisation** | Organisation includes:

- any part of a manufacturing or service organisation
- companies, government bodies or other body of people aiming to produce a product to service a customer |

| **Key change project personnel** | Key change project personnel include:

- project sponsors
- cascading sponsors
- relevant managers
- change agents |
- **Project sponsor**
  Project sponsors include:
  - those people who proposed the project and are its main supporters

- **Cascading sponsor**
  A cascading sponsor refers to:
  a person who reports to a sponsor and so may be contributing on their behalf
  A cascading sponsor works with delegated authority and responsibility

**Risks**
Risks include:
- business risks (e.g. over-spending)
- market risk (e.g. loss of market share)
- HSE risks
- relationship risks (e.g. to shareholders, employees, suppliers, customers or the community)

- **Organisation capacity**
  Organisation capacity includes:
  - organisation history of implementing change
  - capability in change implementation
  - adaptability of people to change
  - demand for the change in the part of the organisation

- **Risk dimensions**
  Specific risk dimensions include:
  - impact of the solution (its potential for disruption to production, quality, delivery and budgets)
  - readiness of people to accept the change, including readiness to accept changes in role and responsibilities
  - availability of resources, including financial, plant and equipment, and dedicated personnel

- **Transition approach**
  Transition approach will depend on the nature of the risks determined and will include:
  - transition style (top down/pilot/process focused/delegated change)
  - degree of sponsorship to be cascaded
  - balance of engagement/involvement
  - internal and/or external resources
  - use of change to build organisation capacity

- **High level involvement plans**
  High level involvement plans aim to create ownership by involving groups in specific activities within defined constraints of:
- objectives for involvement
- decision parameters and
timing of involvement

The specific activities include:
- problem/opportunity identification
- solution design
- implementation/transition planning
- solution building
- solution testing
- solution piloting
- training design
- training delivery
- communication roll out
- solution roll out

| Alignment plan | Alignment plan ensures alignment and sustainability between:
|----------------|------------------------------------------------------------------------------------------------------------------|
|                | - policies, processes and procedures
|                | - incentives and rewards (KPIs and intended outcomes)
|                | - consequences and penalties for non-compliance
|                | - preventing pre-change behaviours and patterns recurring |

| Sustaining improvement | Improvement may be sustained by including it in:
|------------------------|-------------------------------|
|                        | - standard procedures and work instructions
|                        | - standard practice
|                        | - other relevant documents and practices |

| Team leader | Team leader may include:
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- any person who may have either a permanent or an ad hoc role in facilitating the function of a team in a workplace</td>
</tr>

MSS407006A Build relationships between teams in an operations environment

Modification History
New unit, superseding MSACMG706A Build relationships between teams in a manufacturing environment - Equivalent

Unit Descriptor
This unit of competency covers the skills and knowledge required to develop an attitude of respect for individuals in teams and trust between individuals, teams, supervisors and management in order to develop a suitable culture for implementing and sustaining competitive systems and practices initiatives.

Application of the Unit
This unit is intended for team leaders and people with a similar sphere of influence/scope of authority and responsibility. It builds on more general competitive systems and practices graduate units and specifically addresses inter-team issues. The unit also encompasses intra-team issues where these are a barrier. The unit envisages a specialist facilitation role in assisting with implementing an organisation competitive systems and practices culture. It is also about developing a ‘whole of value stream’ view so that there is not competition between individuals or teams, but rather cooperation to achieve organisation and value stream goals with competition being directed towards other organisations competing in the marketplace. This unit may also be applied to service organisations applying competitive systems and practices principles.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.
Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Identify organisational relationships
   1.1 Map actual and intended process flows within and between teams
   1.2 Map actual and intended communication/information/data flows within and between teams
   1.3 Identify and map other interactions (actual and intended) within and between teams
   1.4 Determine the consequences in terms of customer benefit of intended flows/interactions
   1.5 Determine the consequences in terms of customer benefit of the actual flows/interactions

2 Foster cooperation within team
   2.1 Present relationships information to team members
   2.2 Discuss areas where greater cooperation would yield benefits
   2.3 Agree on ways to achieve greater cooperation in these areas
   2.4 Facilitate team implementation of agreed changes
<table>
<thead>
<tr>
<th>Chapter</th>
<th>Process</th>
<th>Steps</th>
</tr>
</thead>
</table>
| 3 | Foster cooperation between teams | 3.1 Present relationships information to teams/team representatives  
3.2 Discuss areas where greater cooperation would yield benefits  
3.3 Agree on ways to achieve greater cooperation in these areas  
3.4 Obtain any necessary approvals for proposed changes  
3.5 Facilitate implementation by teams of agreed changes |
| 4 | Identify sources of tension, conflict or competition | 4.1 Examine team and individual key performance indicators (KPIs) for sources of conflict/competition  
4.2 Examine flows and interactions for possible sources of conflict and competition  
4.3 Observe interactions between team members and identify tensions, conflicts and competition  
4.4 Observe interactions between teams and identify tensions, conflicts and competition  
4.5 Observe response to change and resistance to change |
| 5 | Reduce causes of tension, conflict or competition | 5.1 Draft modified KPIs to reduce causes of conflict and competition  
5.2 Draft modified systems causing conflicting flows and interactions  
5.3 Facilitate discussions within and between teams to identify causes of tensions, conflicts and competition  
5.4 Facilitate discussions to develop a consensus solution to identified causes of tensions, conflicts and competition  
5.5 Obtain any required approvals for suggested/drafted changes  
5.6 Facilitate the implementation of the agreed solutions  
5.7 Take actions to ensure agreed changes become standard practice |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying competitive systems and practices techniques and tools used by downstream, upstream and support teams, including:
  - value stream mapping
  - 5S
  - Just in Time (JIT)
  - mistake proofing
  - process mapping
  - six sigma
  - establishing customer pull
  - kaizen and kaizen blitz
  - setting of KPIs/metrics
  - identification and elimination of waste (muda)
- determining value in terms of customer benefit for downstream, upstream and support teams
- determining impact on value of each team from operations of other teams
- communicating with other teams and team leaders, other employees and external representatives relevant to competitive systems and practices
- communicating using different media and format and to audiences and individuals from a variety of literacy and numeracy levels
- maximising cooperation between teams on:
  - setting of KPIs
  - solving problems to root cause
  - disruptions to flow
  - variations of flow level/volume
  - variations in quality/quantity/timeliness
  - implementing standardisation
- ensuring awareness of teams of performance requirements
- communicating sources of assistance to own and other team members

Required knowledge

Required knowledge includes:
- competitive systems and practices principles, strategies and techniques, including:
  - value stream mapping
  - 5S
  - JIT
  - mistake proofing
  - process mapping
  - six sigma
  - establishing customer pull
  - kaizen and kaizen blitz
  - setting of KPIs/metrics
  - identification and elimination of waste (muda)
- organisational goals, products and processes
- types of KPIs, their applications and limits
- approval processes within organisation
- communication methods across a variety of media and formats, including preparation of formal proposals and negotiations
- continuous improvement
- process mapping, communication and people interaction mapping
- customer perception of value

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>• identify sources of conflict/tension</td>
</tr>
<tr>
<td></td>
<td>• consensus development of improvement plans, including setting of KPIs</td>
</tr>
<tr>
<td></td>
<td>• implement improvement plans and rechecking subsequent relationships.</td>
</tr>
</tbody>
</table>

| Context of and specific resources for assessment | Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. |
Access may be required to:

- workplace procedures and plans relevant to work area
- specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee
- documentation and information in relation to production, waste, overheads and hazard control/management
- reports from supervisors/managers
- case studies and scenarios to assess responses to contingencies.

**Method of assessment**

A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence:

- demonstration in the workplace
- workplace projects
- suitable simulation
- case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on)
- targeted questioning
- reports from supervisors, peers and colleagues (third-party reports)
- portfolio of evidence.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

**Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

---

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with
training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Competitive systems and practices</th>
<th>Competitive systems and practices may include, but are not limited to:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• lean operations</td>
</tr>
<tr>
<td></td>
<td>• agile operations</td>
</tr>
<tr>
<td></td>
<td>• preventative and predictive maintenance approaches</td>
</tr>
<tr>
<td></td>
<td>• monitoring and data gathering systems, such as Systems Control</td>
</tr>
<tr>
<td></td>
<td>and Data Acquisition (SCADA) software, Enterprise Resource Planning</td>
</tr>
<tr>
<td></td>
<td>(ERP) systems, Materials Resource Planning (MRP) and proprietary</td>
</tr>
<tr>
<td></td>
<td>systems, statistical process control systems, including six sigma</td>
</tr>
<tr>

</thead>
</table>

| HSE | All changes implemented are expected to be at least neutral, or preferably beneficial in their impact on HSE |
| **Relationship between organisational teams** | Organisational teams may include:  
• downstream customer teams  
• upstream supplier teams  
• support teams (e.g. maintenance and information technology (IT))  
Relationship between teams includes:  
• the impact of teams on each others’ work expressed in competitive systems and practices terms  
Impacts covered could include:  
• supplier, customer and support team impacts on:  
  • flow  
  • pull  
  • takt time  
  • waste |
|---|---|
| **Cooperation within teams** | Cooperation within team may include:  
• assistance with problem solving  
• dealing with disruptions to flow  
• dealing with variations of flow level/volume  
• dealing with variations in quality/quantity/timeliness  
• **KPIs**  
KPIs may include:  
• reward systems  
• systems (formal and informal) which encourage some types of behaviour over others  
• **Resistance to change**  
Resistance to change may be:  
• overt or covert  
| **Stakeholders** | Stakeholders may include:  
• work team members  
• value stream members as well as other stakeholders  
| **Team leader** | Team leader may include:  
• any person who may have either a permanent or an ad hoc role in facilitating the function of a team in a workplace

MSS408003A Develop models of future state operations practice

Modification History
New unit, superseding MSACMG803A Develop models of future state manufacturing practice - Equivalent

Unit Descriptor
This unit of competency covers the skills and knowledge required to establish processes for identifying future state models of best practice for operations that are then used as the template for both strategic decision-making and goal setting. It may be applied to whole organisations or significant sections of the value stream.

Application of the Unit
This unit applies in an environment where operations practices are standardised and there is a culture that accepts sustaining improvements and building on them. It is intended for managers and people with a similar sphere of influence.
This unit applies to individuals who are familiar with competitive systems and practices, value stream mapping, and culture improvement. Where this is not the case the following units can be completed to supply the necessary skills:
- MSS405001A Develop competitive systems and practices for an organisation
- MSS405002A Analyse and map a value stream
- MSS405013A Facilitate holistic culture improvement in an organisation.
This unit may also be applied to non-production areas and service organisations applying competitive systems and practices principles.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.
Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Develop a shared future state model
   1.1 Establish an appropriate representative team
   1.2 Analyse a value stream map of an appropriate section of the value stream
   1.3 Determine the current state of practice across the value stream
   1.4 Identify overall organisation strategy, direction and competitive systems and practices philosophy
   1.5 Validate view with process/system owner

2 Develop and review a collaborative best practice model
   2.1 Develop a future state model of practice
   2.2 Review model with process/system owners and other stakeholders across the value stream as appropriate
   2.3 Modify model to deliver better results for the customer and reduce wastes
   2.4 Develop implementation plan in consultation with stakeholders

3 Provide the resources necessary to move
   3.1 Identify changes required to infrastructure
   3.2 Determine benefit/cost for required changes
<table>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in highly varied and/or highly specialised contexts
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- determining current state of operations in the organisation or selected portion of the value stream across a range of key indicators, including:
  - output quantities and qualities
  - variability in quality and quantity
  - uptime
  - causes and times for the different wastes (muda)
  - investment hurdle rates and actual rates of return
  - health, safety and environment (HSE) indicators
  - reliability indicators
  - other key performance indicators (KPIs) indicators appropriate to the organisation and its technology and processes
- identifying desirable future state across a range of indicators of operations in the organisation or selected portion of the value stream, including forecasts of:
  - output quantities and qualities
  - variability in quality and quantity
  - HSE indicators
  - reliability/uptime
  - rates of return
  - other indicators appropriate to the organisation and its technology and processes
- analysing data, including indicators of progress to future state
- prioritising actions according to:
  - benefit/cost analysis
  - readiness analysis
  - tactical survival response

Required knowledge
Required knowledge includes:

- competitive systems and practices at both a strategic and tools level, including advantages and limitations of:
  - value stream mapping
  - 5S
  - Just in Time (JIT)
  - mistake proofing
  - process mapping
  - establishing customer pull
  - breakthrough improvement and continuous improvement (kaizen and kaizen blitz)
  - setting of KPIs/metrics
  - identification and elimination of waste (muda)
  - six sigma and lean six sigma
- best practice in implementation of competitive systems and practices tools
- customer benefit as used in competitive systems and practices
- formal problem solving tools, including root cause analysis (RCA)
- workplace strategy and vision
- ways of determining competency gaps that may act as restrictions in achieving best practice in operations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

**Required skills:**

- conduct basic wastewater tests
- calibrate testing equipment
- operate testing equipment
- conduct sub-sampling
- dispose of samples and waste
- communicate effectively
- produce reports and logs
- perform relevant work-related calculations
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- interpret work requirements.

**Required knowledge:**

- range and purpose of basic wastewater testing
- procedures for the use of instruments and other field-testing equipment
- test procedures
- relevant work-related calculations
- maintenance and storage of reagents
- sub-sampling and basic wastewater test methods
- documentation procedures for test results
- sample and waste disposal procedures
- relevant legislative and organisational requirements.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to perform basic wastewater tests by:

- interpreting testing requirements and procedures
- preparing, checking and using equipment correctly
- conducting at least three different tests safely while maintaining the integrity of samples
- recording all relevant information.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person’s competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time.
EVIDENCE GUIDE

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Basic wastewater tests**

- range of tests required for competent performance of work tasks in the organisational context, which should comprise at least three of the following types of test:
  - pH
  - temperature
  - electrical conductivity
  - dissolved oxygen
  - microscopy
  - thirty minute settleability
  - settleable solids concentration (cone test)
  - turbidity.

**Testing details** may include:

- locations, including:
  - on-site testing
  - field-based testing
  - laboratory
- range of testing procedures and techniques that apply to organisational, plant or field sites
- variety of samples to be tested
- testing equipment
- test reporting systems.

**Planning of testing work** may include:

- interpretation of instructions and directions
- timelines
- interaction and communication with team members and individuals
- interpretation of legislative and organisational requirements.

**Legislative and organisational requirements** may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements.
RANGE STATEMENT

Testing equipment may include:
- portable meters, such as:
- pH meters
- electrical conductivity meters
- thermistors
- comparators
- pocket colorimeters
- dissolved oxygen meters
- test kits
- microscopes
- thermometers
- Imhoff cones
- graduated cylinders and settling apparatus.

Abnormal sample characteristics may include:
- insufficient sample volume
- odour
- visible contaminants, such as:
- scum
- debris
- discoloration.

Maintaining integrity of samples may include application of correct:
- holding time
- storage procedures
- sub-sampling procedures.

Atypical data may include:
- results that fall outside organisational range requirements
- results that fall outside legislated range requirements.

Information may include:
- time and logging of sample receipt and testing
- visual observations
- equipment identification
- atypical results
- test results.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:
- apply policies, procedures and standards
- recognise and report operational problems
- use safety equipment and personal protective equipment
- select, collect and test samples
- interpret material safety data sheets (MSDS)
- receive and apply instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with other employees and people that interact within the work environment.

Required knowledge:
- sources of wastewater
- physical, chemical and microbiological characteristics and operating principles related to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plant processes
- major chemicals and equipment used
- wastewater treatment plant hazards
- safety equipment
- reasons for data and information collection.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to monitor and report on wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas including:

- performing, recording and reporting process measurements and calculations
- demonstrating procedures for starting and stopping plant and locking out control equipment
- adjusting process controls according to specific plant procedures
- recording and reporting faults and breakdowns
- identifying common process faults and following procedures to rectify these.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning
EVIDENCE GUIDE

experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Wastewater sources** may include:
- domestic
- industrial
- storm
- ground.

**Reasons for treatment** may include:
- ensuring conformity with legislation, regulations, standards and codes
- removal of impurities and contaminants to enable discharge or re-use
- reducing impact of impurities on the environment and public health.

**Statutory requirements** are defined by:
- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements.

**Wastewater treatment processes** may include:
- grit removal
- aeration
- screening
- sedimentation
- disinfection
- granular and membrane filtration
- thickening and dewatering
- suspended and fixed media aerobic bioreactor processes
- anaerobic processes
- lagoons and wetlands
- gas scrubbers
- biosolids and effluent disposal and re-use
- dilution
- chemical dosing
- nutrient removal
- reverse osmosis.
RANGE STATEMENT

**Characteristics of wastewater** may include:
- types of impurities, such as:
  - organic
  - inorganic
  - micro-organisms
  - public health considerations.

**Equipment used** may include:
- pumps, including:
  - centrifugal
  - positive displacement
  - airlift
  - blowers
  - screens
  - control valves
  - electronic digital monitoring systems
  - recording systems
  - chemical testing and analysis equipment
  - communication equipment
  - belt press
  - centrifuge
  - comminutor
  - flow meters
  - flow recorders
  - manual or hydraulic equipment
  - personal protective equipment.

**Chemicals and major equipment used** may include:
- chemicals and lime
- sodium hypochlorite
- aluminium and iron coagulants
- polymers.

**Data** may include:
- instantaneous flow rate
- flow records
- temperature
- sand and grit
- pH
- chemical oxygen demand
- dissolved oxygen
- settleable solids concentration (cone test)
- thirty minute settleability test
- sludge blanket level
- residual chlorine
- microscopic examination
- conductivity.
RANGE STATEMENT

Process calculations may include:
- average dry weather flow
- peak dry weather flow
- chemical feed rate and concentration
- process efficiency.

Wastewater quality parameters may include:
- physical
- chemical
- microbiological.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- recognise and report operational problems
- apply policies, procedures and standards
- use safety equipment and personal protective equipment
- collect and test samples
- interpret material safety data sheets (MSDS)
- receive and apply instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with other employees and people that interact within the work environment.

Required knowledge:

- sources and characteristics of wastewater
- physical, chemical and microbiological characteristics and basic principles related to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plants and processes
- major chemical types and equipment used
- wastewater treatment plant hazards
- safety equipment
- reasons for data and information collection
- MSDS.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to operate and maintain wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas including:

- applying wastewater treatment processes, including operating mechanical equipment
- using chemicals safely, as required and according to organisational procedures
- conducting regular routine inspection of mechanical equipment
- identifying hazards and applying appropriate safety procedures
- gathering and recording data
- reporting anomalies.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
EVIDENCE GUIDE

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Reasons and requirements** for treatment may include:
- ensuring conformity with legislation, standards and guidelines
- removing impurities and contaminants to enable discharge and re-use
- reducing impact of impurities on environment and public health
- relevant environmental protection legislation and regulations and trade waste agreements.

**Wastewater treatment processes** may include:
- grit removal
- aeration
- screening
- sedimentation
- disinfection
- granular and membrane filtration
- thickening and dewatering
- anoxic processes
- sludge digestion
- suspended and fixed media aerobic bioreactor processes
- anaerobic processes
- lagoons and wetlands
- gas scrubbers
- biosolids and effluent disposal and re-use
- dilution
- chemical dosing
- nutrient removal
- reverse osmosis.

**Mechanical equipment** used may include:
- pumps, including:
  - centrifugal
  - positive displacement
  - airlift
  - blowers
  - screens
  - control valves
  - electronic digital monitoring systems
RANGE STATEMENT

- recording systems
- chemical testing and analysis equipment
- communication equipment
- manual and hydraulic equipment
- personal protective equipment.

**Chemicals** and aids used may include:

- lime
- sodium hypochlorite
- polymers
- aluminium and iron coagulants
- carbon sources.

| 1 Plan the project. | 1.1 Clarify project brief with relevant personnel.  
1.2 Identify and quantify human and financial resources to support management of project.  
1.3 Assemble and brief project team.  
1.4 Negotiate and finalise organisational requirements and procedures for management of project.  
1.5 Identify and address **legislative requirements** relevant to project in the planning process.  
1.6 Develop project goals, objectives and performance indicators in consultation with relevant personnel and stakeholders and follow organisational procedures.  
1.7 Plan project according to organisational requirements and using appropriate **planning tools**. |
| 2 Manage the project. | 2.1 Communicate project plan to project team and clarify and allocate resourcing and accountabilities.  
2.2 Monitor, record and report progress of project against milestones of project plan and according to organisational requirements.  
2.3 Integrate range of tasks that comprise project to ensure efficient completion.  
2.4 Consult stakeholders regarding progress of project and inform development.  
2.5 Negotiate, record and communicate required changes to project plan.  
2.6 Finalise project according to project plan and organisational procedures. |
| 3 Manage project risk. | 3.1 Identify potential risks to successful completion of project through extensive consultation with relevant stakeholders and personnel.  
3.2 Analyse identified risks for likelihood of occurrence and their potential consequences.  
3.3 Develop risk management or control plans to eliminate or reduce potential for risk events and consequences.  
3.4 Review risk management or control plans periodically during life of the project and assess them for their adequacy, timeliness and effectiveness in risk mitigation. |
| 4 Deliver quality project outcomes. | 4.1 Identify and record quality requirements for successful completion of project and communicate them to project team members.  
4.2 Identify and use quality management methods, techniques |
ELEMENT

PERFORMANCE CRITERIA

and tools to support and manage project.

4.3 Assess outcomes of project for compliance with required quality standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- apply advanced project management skills
- apply quality management principles and techniques
- apply risk management principles and techniques
- use project management software and tools
- coordinate activities
- communicate effectively with a wide audience inside and outside the workplace
- plan effectively
- prepare a range of internal and external reports
- solve problems.

Required knowledge:

- technical and industry knowledge relevant to project being managed
- legislation relevant to project being managed
- project management, quality management and risk management techniques
- relevant industry trends, including emerging technologies
- infrastructure capacity and capacity planning
- organisational processes and reporting requirements.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to lead a complex project within the water industry including:

- managing a complex project and delivering required project outcomes
- effectively coordinating activities of project team members to deliver required outcomes
- preparing, monitoring and revising plans
- applying principles of quality and risk management to completion of project
- communicating with stakeholders.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition
EVIDENCE GUIDE

(RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time.

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Legislative requirements** may include:

- relevant federal legislation, including:
  - National Water Commission Act 2004
  - Environment Protection and Biodiversity Conservation Act 1999
- relevant state or territory legislation relating to water and resource management
- relevant state or territory legislation and regulations relating to OHS, including:
  - protective clothing and equipment
  - use of tools and equipment
  - workplace environment and safety
  - handling of materials
  - use of fire fighting equipment
  - use of first aid equipment
  - hazard control and hazardous materials and substances
  - relevant local government by-laws
  - relevant government and non-government policies and regulations such as:
    - National Water Initiative
    - Murray Darling Basin Water Agreement
    - relevant community planning and development agreements, such as land care agreements.

**Plan project** to address all facets of activity, which may include:

- budgets
- timelines
- human resource requirements
- project milestones
- project accountabilities
- project reporting processes and schedules
- contingency arrangements
- risk management requirements
- quality requirements.

**Planning tools** used to may be:

| 1 Analyse water resource issues. | 1.1 Analyse economic and social issues relevant to sustainable water use to determine implications for specific situations.  
1.2 Identify and analyse community attitudes to use of recycled water for their impact on future initiatives.  
1.3 Identify and analyse legislation, regulations and policies on sustainability and water recycling issues for relevance to specific situation.  
1.4 Determine water sustainability objectives and targets for specific situation. |
| 2 Determine treatment options for recycling. | 2.1 Determine water catchment and groundwater protection and management principles for surface and groundwater sources, and recycled water.  
2.2 Analyse hydrometric cycle and types and percentage of water use to determine sustainability of specific water resources.  
2.3 Analyse impact of stormwater and industrial, agricultural, aquaculture and domestic water use on water quality.  
2.4 Analyse sustainability issues and effect of reduced and more concentrated sewage flows for a specific situation.  
2.5 Evaluate treatment options for recycling of treated wastewater and alternative water sources for their suitability in meeting quality standards for a range of uses. |
| 3 Develop environmental strategies and targets. | 3.1 Analyse designs of model sustainable water systems to determine their viability in specific situations.  
3.2 Analyse costs and benefits of recycling schemes most appropriate to situation.  
3.3 Evaluate existing and planned water recycling systems against Australian and international benchmarks.  
3.4 Undertake risk assessment to determine strategies for managing hazards and risks.  
3.5 Recommend integrated water resource planning to achieve water sustainability objectives and targets, with consideration of costs. |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- perform complex research
- analyse technical information
- analyse financial information
- analyse trend data
- research and interpret social trends
- perform relevant statistical analysis
- identify potential or actual operational problems
- undertake evidence-based short, medium and long-range planning
- prepare complex reports
- use computer systems.

Required knowledge:

- political, economic and social aspects of water sustainability
- principles of cost benefit analysis
- concept of virtual water in agricultural and manufactured products
- legislative and regulatory requirements relevant to a sustainable water industry
- hydrometric cycle
- methods for evaluating risks to water quality, assets and services
- water sustainability issues and ecosystem quality
- recycling models and performance benchmarks
- water sustainability in domestic, industrial, agricultural and aquaculture contexts, including stormwater
- legislative and regulatory framework for water industry
- relevant Australian standards, international guidelines and best practice systems applicable to water sustainability.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to analyse and identify solutions to issues such as the sustainable use of water, drinking water safety and quality, water recycling and the effectiveness of wastewater treatment including:

- analysing complex technical, social and legislative issues affecting water sustainability
- determining water and wastewater treatment options
- researching and reviewing information and developing evidence-based recommendations for the development of relevant policies relating to environmental sustainability.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person’s competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
EVIDENCE GUIDE

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Economic issues** may include:
- costs and benefits of various options
- public and private ownership
- costing models
- increased costs of new developments.

**Social issues** may include:
- land resumption
- cost of water supply
- damage to ecosystems
- equity issues
- political exploitation.

**Water** includes:
- water in a watercourse, lake or spring
- underground water
- overland flow water
- water that has been collected in a dam
- wastewater of domestic, commercial, industrial or agricultural origin.

**Community attitudes** may include:
- revulsion or fear of contamination
- fear of diseases
- resistance to change.

**Legislation, regulations and policies** relevant to the State or Territory may include:
- Environmental Protection and Biodiversity Conservation Act 1999
- relevant state and territory environmental protection legislation
- relevant water legislation and regulations
- Australian Drinking Water Guidelines
- water recycling guidelines
- water quality guidelines

**Sustainability** may include:
- replenishment of resources
- maintaining resources
- assault on diminishing resource.

**Water and wastewater sustainability objectives**
- sustainable use of water
- drinking water safety
- water recycling
RANGE STATEMENT

may include:

- long-term certainty of sources.

Sustainability issues may include:

- leakage
- evaporation
- sewer mining
- grey water use
- recycling
- intelligent use
- alternatives.

Alternative water sources may include:

- stormwater
- bore water
- brackish water
- process water.

Range of uses may include:

- irrigation
- aquaculture
- industry
- fire fighting
- recreation
- domestic
- replenishing raw surface water or groundwater resources.

Model sustainable water systems may include examples that are:

- specific to locations (e.g. Australia, Singapore, Israel and California)
- specific to industries (e.g. paper, cooling and food processing)
- existing or planned
- local and international.

Australian and International benchmarks may include:

- data from existing systems
- published research.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- perform complex research
- analyse technical information
- use technology, including the internet, to access current legislative and regulatory requirements for water industry
- identify potential or actual operational problems
- undertake evidence-based short, medium and long-range planning
- communicate with employees, senior management, external industry experts and other stakeholders
- prepare complex reports
- use communication systems
- give and receive instructions.

Required knowledge:

- fundamental aspects of physics, chemistry, biology and microbiology relevant to water and wastewater treatment and requisite laboratory skills
- water sources and resources relevant to water and wastewater treatment
- substances in natural water sources and their interactions
- environmental and epidemiological effects of substances found in wastewater sources
- microbial species and effects
- purposes of water treatment
- fundamentals of separation processes and disinfection
- microbial metabolism
- input and output parameters of treatment systems
- reticulation systems and hydraulic modelling
- legislative and regulatory framework for water industry
- Environment Protection Authority requirements for treatment plant licenses and drinking water
- OHS legislation, risk management and procedures
- relevant water treatment policies and procedures
- communication systems
- relevant Australian standards, international guidelines and best practice systems applicable to water treatment plants and plant technologies.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to understand water quality and sustainability technology, and provide high-level advice on meeting legislative and regulator requirements including:

- analysing and applying principles of water science
- analysing and applying principles associated with design of water treatment plants and processes
- reviewing and refining current practices associated with water treatment plant technologies
- preparing clear and accurate reports
- contributing to development of water treatment planning within organisation.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Components** may include:
- natural water cycles, including:
  - rivers and lakes
  - artesian and aquifers
  - brackish and salt water
  - stormwater
  - engineered water cycles, including:
    - reticulation systems
    - dams
    - collection systems
    - bores and wells.

**Features** may include:
- natural water cycles:
  - rainfall patterns
  - size and protection
  - retention time in catchment
  - evaporation rate
  - types of source:
    - bore
    - river
    - dam
    - engineered water cycles
    - type of user:
      - domestic
      - industrial
      - aquaculture
      - agriculture
      - type of water or wastewater treatment system:
        - urban
        - non-urban
    - length and volume of collection and reticulation system.

**Variables** may include:
- natural water cycles, including:
  - rainfall
  - temperature
RANGE STATEMENT

- pH, hardness and alkalinity
- taste, odour, colour and turbidity
- nature and quantity of total dissolved and suspended matter
- dissolved oxygen
- engineered water cycles, including:
  - flow rates
  - industrial and agricultural uses and inputs
  - input and output parameters
  - availability and uses of recycling.

Water testing may include:

- pH, chlorine, suspended solids and dissolved oxygen
- alkalinity and volatile acids
- mixed liquor suspended solids
- mixed liquor volatile suspended solids
- colour, turbidity and conductivity
- biological oxygen demand (BOD) and chemical oxygen demand (COD), total organic carbon (TOC), phosphorus (P), nitrogen (N), other ions and organic compounds
- identification and enumeration of bacteria, cyanobacteria and protozoa.

Substances commonly found in natural water sources may include:

- metal ions
- salts
- N and P
- microorganisms and algae
- organic and inorganic compounds producing colour, turbidity, odour or taste
- radiation emitters.

Interactions may include:

- oxidation of metal ions
- settling of suspended matter
- ultraviolet destruction of microorganisms
- growth of nuisance organisms, such as cyanobacteria.

Substances commonly found in range of wastewater sources may include:

- toxins
- metals
- domestic or industrial organic matter
- other dissolved and suspended solids
- toxic, flammable and asphyxiating gases
- disinfection by-products.

Range of wastewater sources may include:

- domestic
- industry
- aquaculture
RANGE STATEMENT

- agriculture
- stormwater.

Environmental effects may include:
- serious:
  - material environmental harm to air, water or land
  - nuisance environmental harm.

Epidemiological effects may include:
- faecal-oral route of infection
- infection and transmission of infectious agents
- effects of biological, chemical or physical toxins on animals and plants.

Microbial species may include:
- E. Coli
- salmonella
- campylobacter
- Shigella
- Yersinia
- protozoa
- adenovirus
- enterovirus
- hepatitis virus.

Agents of disease may include:
- bacteria
- viruses
- protozoa
- microbial toxins
- chemical toxins.

Agents for removing organic matter may include:
- aerobic bacteria
- facultative bacteria
- anaerobic bacteria.

Water treatment may include:
- coagulation
- flocculation
- sedimentation
- filtration
- disinfection
- natural systems
- designed wetlands
- lagoons
- Imhoff tanks
- small septic tanks
- bio-filters
- contactors
- activated sludge processes
RANGE STATEMENT

Separation processes may include:

- special treatment processes.
- filtration
- presses
- centrifuges
- sedimentation
- gravity settling
- flocculation
- chemically assisted processes.

Input and output parameters may include:

- Biological Oxygen Demand and Chemical Oxygen Demand
- suspended solids
- biomass as mixed liquor suspended solids (MLSS) or mixed liquor volatile suspended solids (MLVSS)
- pH
- dissolved oxygen (DO)
- N, P and other chemical species
- toxins
- chlorine
- faecal coliforms, such as E. Coli
- colour
- turbidity.

Fundamental features may include:

- pipe networks
- gravity and pressure systems
- pumps and pump wells
- reservoirs
- residual disinfection
- oxygenation
- hydraulic modelling
- leak detection
- leak prevention.

Reticulation systems may include:

- sewage collection systems
- water distribution systems.

Legislation and regulations relevant to the State or Territory may include:

- Environmental Protection and Biodiversity Conservation Act 1999
- relevant state and territory environmental protection legislation
- relevant water legislation and regulations
- Australian Drinking Water Guidelines
- Water recycling guidelines
- Water quality guidelines
RANGE STATEMENT

Forces of change may include:
- Community expectations
- Availability of technology
- Climatic change
- Diminishing fresh water sources.

Unit Descriptor

Unit descriptor
This unit covers all activities involved in gathering and managing evidence. It includes planning and activating evidence collection, identifying persons of interest, collecting and storing evidence, and summarising and reporting on evidence.

In practice, gathering and managing evidence may overlap with other generalist or specialist public sector work activities such as exercising regulatory powers, acting ethically, complying with public sector legislation, applying government processes, gathering and analysing information, etc.

This unit replaces and, for qualification purposes only, is equivalent to PSPFRAU403A Gather, manage and present evidence. The unit has been expanded and is no longer restricted to evidence relating to fraud.

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.
Employability Skills Information

**Employability skills**  This unit contains employability skills.

**Elements and Performance Criteria Pre-Content**

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Plan and activate evidence collection** | 1.1 *Evidence* requirements are researched to establish the type and standard of evidence and *resources* required when the size of investigation and/or type of offence/s require this  
1.2 Approval to commence investigation is obtained in accordance with organisational policy and procedures  
1.3 Plan of action is agreed in accordance with organisational policy and procedures, and communication and review processes are established  
1.4 Evidence recording process is put in place in accordance with organisational guidelines and legislative requirements |
| **2. Identify persons of interest** | 2.1 Possible witnesses are identified, located and contacted to request that they provide information  
2.2 Particulars of witness/es are documented according to correct evidentiary procedures  
2.3 *Responsible parties* are identified, located and their particulars are recorded in accordance with correct evidentiary procedures  
2.4 Responsible parties are contacted for interview in accordance with organisational procedures and legislative requirements, and informed of the nature of the investigation, if required by law |
| **3. Collect and store evidence** | 3.1 *Authority to search* is obtained/verified, involving other organisations where necessary  
3.2 Evidence is identified, *collected, labelled*, recorded and preserved according to exhibit management principles for later use in proceedings  
3.3 Evidence is *managed* in accordance with the principles of continuity of possession, *legislation and standards*  
3.4 Corroboratory evidence is collected, documented and preserved  
3.5 *Expert* skills and knowledge are accessed when necessary to further assist staff in areas where they cannot or are not authorised to act  
3.6 Constant review is implemented during evidence collection to enable gaps and inadequacies to be addressed in accordance with organisational policy and procedures |
| **4. Summarise and report on evidence** | 4.1 Verbal and written summaries/reports are made in accordance with legislative and organisational requirements  
4.2 Outcomes of investigation are entered into data management systems according to organisational guidelines |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:
- organising and problem solving
- liaising and negotiating
- communicating with people from diverse backgrounds
- responding to diversity, including gender and disability
- making comparisons and exercising judgment about facts in written materials
- report writing using formal structures and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of gathering and managing evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:
- rules of evidence relevant to the jurisdiction
- evidence legislation relevant to the jurisdiction
- legislation which contains the offence/s under investigation
- document management systems
- exhibit management principles
- organisational policies, guidelines and regulations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to gathering and management of evidence
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that **must** be achieved **prior** to this unit: *Nil*
- **Co-requisite units** that **must** be assessed **with** this unit: *Nil*
- **Co-assessed units** that **may** be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPGOV422A Apply government processes
  - PSPREG401C Exercise regulatory powers
  - PSPREG407B Produce formal record of interview
  - PSPREG411A Gather information through interviews

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- gathering and management of evidence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to gathering and managing evidence
- case studies and workplace scenarios to capture the range of likely offences for which evidence needs to be gathered and managed

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine
EVIDENCE GUIDE

- gathering and management of evidence in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Evidence may include
- real, oral, computer data or documentary
- photographic or video
- new evidence which results in reopening an investigation
- requirements identified in an evidence guide or evidence matrix
- an estimate of the costs of gathering evidence

Establishing resource requirements may require

Responsible parties may include
- suspects
- alleged offenders
- obligation holders
- employers
- principal contractors
- owners
- operators

Particulars of responsible parties may include
- personal details
- identification of assets and entitlements for criminal or civil recovery purposes

Authority to search may include
- warrant already issued
- no requirement for search warrant under powers of enabling legislation
- affidavit
- confirming the legal basis for the search and seizure
- appropriate information to ground a warrant
- requirement to obtain search/seizure warrant before proceeding
- organisational approval/s to undertake search and seizure
- completion/submission of organisational documents relating to planned search and seizure
- the need for assistance from other agencies/jurisdictions
- referral to other agencies

Evidence collection may include
- voluntary submission
- acquisition through legislative powers
- following new lines of inquiry suggested during the process of gathering evidence
RANGE STATEMENT

Labelling of evidence may include
- date
- time
- location
- details of person/s giving the evidence
- person/s collecting the evidence

Evidence management may include
- systematic recording (such as dating and numbering)
- using written or electronic database systems
- referral to prosecution organisations at any stage
- constant reviews during an investigation
- restricting access to evidence

Legislation and standards may include
- relevant Commonwealth/State/Territory legislation and guidelines
- ethical and conduct standards
- judicial standards which must be followed in evidence collection to ensure the continuity of possession and admissibility of the evidence

Expert knowledge and skills may include
- police, other law enforcement agencies
- private provider
- standards setting organisation
- input such as:
  - search warrant
  - surveillance
  - scientific analysis

Reports may be
- to finalise case
- to inform team members and management
- to refer to other sections or organisations
- to prepare for final summation in proceedings
- edited and security coded for a particular audience

<tbody>
<tr>
<td>First Release</td>
<td>This is a revised unit, based on and equivalent to SIRXCLM002A Manage store facilities.</td>
</tr>
</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

Application of the Unit
This unit applies to staff with managerial responsibility in a retail environment.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

| 1. Manage store maintenance program.       | 1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to store policy and procedures and relevant legislation.  
1.2. Identify deficiencies in store maintenance procedures and take remedial action as required.  
1.3. Obtain expert or specialist advice as required, according to store policy.  
1.4. Initiate contingency plan within scope of authority in the event of maintenance problems. |
| 2. Manage retail equipment maintenance.    | 2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy.  
2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy.  
2.3. Identify and rectify equipment faults where possible, without undue delay.  
2.4. Report equipment faults or failures, according to service agreements and store policy. |
| 3. Negotiate maintenance contracts.        | 3.1. Negotiate maintenance contracts with contractors and suppliers according to store policy and procedures.  
3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to relevant personnel.  
3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications. |
| 4. Identify facilities and space requirements. | 4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements.  
4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures.  
4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location. |

© Commonwealth of Australia, 2015

AgriFood Skills Australia
4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - ensure listening and understanding
  - negotiate contracts and relay contractual requirements to staff
  - obtain expert or specialist advice
  - report faults
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
  - apply accounting processes and record data
  - develop, document and record procedures
  - estimate measurements and volumes
  - maintain records
  - read and interpret manufacturer instructions
  - work within a budget

Required knowledge

- store policy and procedures in regard to:
  - maintenance of store facilities
  - maintenance of retail equipment
  - maintenance contract terms and options
  - contract specifications
- relevant legislation and statutory requirements relating to managing store facilities, including:
  - work health and safety (WHS) legislation
  - food safety legislation and regulations
- relevant industry codes of practice relating to managing store facilities
- principles and techniques in:
  - monitoring performance of contracts
  - negotiating, in particular contract negotiation
  - interpersonal communication
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - maintenance contracts
  - store policy and procedures on maintenance of facilities, and contract negotiation
  - relevant legislation and statutory requirements
  - WHS
  - legislation and industry codes of practice
- a team
- equipment and technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Store policy and procedures** in regard to:
- store maintenance
- facilities management
- reporting mechanisms
- WHS
- food safety.

**Relevant legislation** may include:
- federal, state or territory and local legislation
- food safety regulations
- WHS.

**Expert or specialist advice** may be sought regarding:
- point-of-sale terminals
- EFTPOS terminals
- computers, scanners and printers
- pricing equipment
- electronic bar coding equipment
- portable data entry
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- fixtures and fittings
- food preparation equipment.

Faults may be **reported**:
- verbally
- in writing
- by email
- to service personnel
- to contractors
- to relevant managers
- to supervisor.
Contracts:
- may be negotiated internally and externally
- may involve:
  - quality standards
  - building maintenance services
  - cleaning
  - security
  - electrical services
  - plumbing services
  - equipment maintenance.

Relevant personnel may include:
- managers
- supervisors
- specialist staff.

</tr>
</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions, and reconciling and recording takings. The unit requires the application of store policy and procedures in undertaking those tasks.

Application of the Unit
This unit applies to frontline retail staff working under some supervision.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

Assessment of performance is to be consistent with the evidence guide.</td>
</tr>
</tbody>
</table>

1. Balance and secure takings from register or terminal.
   1.1. Perform register or terminal balance at designated times according to store policy and procedures.
   1.2. Separate cash float from takings prior to balancing procedure and secure according to store policy.
   1.3. Supply change to register or terminal according to store policy.
   1.4. Obtain and interpret register or terminal reading or print-out.
   1.5. Secure cash and non cash documents according to store security policy and procedures.

2. Reconcile takings.
   2.1. Count cash accurately.
   2.2. Calculate non cash documents accurately.
   2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
   2.4. Report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel according to store policy.
   2.5. Record store and individual department takings and file records according to store policy.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - balance the register or terminal
  - count cash
  - calculate non-cash transactions
  - calculate discrepancies between reported and actual takings
  - complete documentation
  - interpret documentation
  - report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale terminal
  - calculating non-cash documents
  - change required and denominations of change
  - clearance of terminal and transference of tender
  - counting cash
  - credit and returns
  - credit cards
  - EFTPOS
  - gift vouchers
  - lay-by
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- store policy and procedures in regard to:
  - cash float
  - operation of equipment used at register or terminal
  - register or terminal balance
  - security of cash and non-cash transactions
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float
- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - financial transaction dockets, slips and invoices
  - sample debit card and credit card vouchers
  - recording and tally sheets
  - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Register or terminal may be:
- cleared at intervals during or at close of trading
- cleared by operator or specialist staff
- electronic
- manual.

Store policy and procedures in regard to:
- cash handling
- register or terminal balance
- security.

Non-cash documents may relate to:
- cash on delivery (COD)
- cheques
- credit cards
- customer credit ratings
- customer refunds
- gift vouchers
- hire-purchase
- lay-by.

Relevant personnel may include:
- manager
- supervisor
- team leader.

Records may be:
- electronic
- manual.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- report presentation
- interpersonal communication skills to:
  - encourage team members to control costs
  - provide information to relevant personnel where potential occurs for budget under or overspend
  - negotiate budgets and provide information on budget decisions through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- time management
- literacy and numeracy skills in regard to:
  - report writing
  - compilation and analysis of budgetary figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - financial management
  - resource utilisation
- store revenue
- capital and overhead costs
- interest rates
- pricing policies, including GST requirements
- cost of stock, materials and equipment
- staffing costs
- operational costs
- principles and techniques in:
  - interpersonal communication
  - monitoring resource utilisation and costs
  - analysing efficiency and effectiveness
  - cost-benefit analysis
  - differential analysis
REQUIRED SKILLS AND KNOWLEDGE

- risk analysis.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently negotiates, develops and implements store budgets according to store policy and procedures
- monitors, analyses and reports on income and expenditure against budgets according to store policy and procedures
- manages and maintains accurate accounting systems according to store policy and procedures
- develops and maintains store policy and procedures in regard to store sales budgets or targets.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- store or sample policy and procedures in regard to financial management
- an accounting system
- budgetary information
- a team involved in budget control.
EVIDENCE GUIDE

Methods of assessment
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research project
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills
Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- financial management
- reporting mechanisms.
RANGE STATEMENT

**Information** may include:
- resource utilisation
- capital and overhead costs
- interest rates
- stock, materials and equipment
- staffing levels
- operational costs.

**Information** may be obtained by:
- direct observation
- written reports
- numerical data.

**Resources** may include:
- people
- materials
- equipment and technology
- finances
- time.

**Team members** may include:
- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

**Communication** may be:
- formal and informal
- with individuals or groups
- written, faxed, emailed or spoken.

**Relevant personnel** may include:
- relevant managers
- supervisor
- team leader.
RANGE STATEMENT

Proposals may include:

- profitability
- productivity
- quality of service
- environmental impact
- working conditions
- working relationships
- team motivation
- long-term goals
- short-term goals.

Record keeping systems may include:

- manual
- computerised.

Budget or target figures may encompass:

- sales
- cash flow
- net profit
- payroll
- staff expenditure
- capital
- maintenance
- advertising and promotion.

SIRXINV004A Buy merchandise

Modification History
Not applicable.

Unit Descriptor

Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit

Application of the unit
This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

Not applicable.
Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
  - market trends and projections
  - sales figures and investment levels
  - space requirements

- negotiation skills
  - interpersonal communication skills to:
    - liaise with relevant personnel
    - establish supplier relationships, negotiate supply of goods
    - provide information and training on product range
    - provide feedback and coaching through clear and direct communication
    - ask questions to identify and confirm requirements
    - give instructions
    - use language and concepts appropriate to cultural differences
    - use and interpret non-verbal communication
  - group presentation skills
  - report writing
  - using and applying technology, including electronic data interchange

- literacy and numeracy skills in relation to:
  - developing pricing policies
  - calculating and estimating product range contributions
  - calculating the cost of stock loss and dissipation
  - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - marketing
  - buying
  - profit margins
  - quality control
  - stock inventory levels: current and future
  - stock location and allocated areas
REQUIRED SKILLS AND KNOWLEDGE

- staff product knowledge training
- industry and store information, including:
  - market needs
  - range of merchandise available
  - market competition
  - existing and possible new suppliers
  - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
  - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
  - store policy and procedures
  - legislation and statutory requirements
  - industry codes of practice
  - merchandise and supplier data.
EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.
RANGE STATEMENT

Customer requirements may be monitored by:
- questionnaires
- surveys
- observation.

Merchandise range may include:
- existing stock
- new stock.

Impact on business operations may include:
- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:
- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:
- verbally
- in writing
- in groups
- individually.

Performance indicators may include:
- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:
- face-to-face
- correspondence
- meetings
- telephone or electronic media.
RANGE STATEMENT

**Pricing arrangements** may include:
- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

**Market factors** may include:
- fashion trends
- product availability
- sales performance.

**Legal requirements** may include:
- sale of second-hand goods
- Trade Practices and Fair Trading Acts
- licence, patent or copyright arrangements
- pricing procedures, including GST requirements.

**Staff training** may include:
- on-the-job
- off-the-job
- one-on-one coaching
- any combination of the above.

**Staff** may include:
- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

**Terms of trade** may include:
- special buys
- payment terms
- promotional deals with supplier.
RANGE STATEMENT

Stock lines may be deleted due to:

- changes in store policy and culture
- sales performance
- customer requirements
- fashion trends
- product availability
- problems with supply.

Methods to consolidate stock may include:

- movement of stock between departments or stores.

store marketing and promotional activities.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - give instructions
  - provide feedback to management through clear and direct communication
  - provide information to staff
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - present and price merchandise
  - read and interpret store policies and procedures
- observation skills to assess display and presentation compliance with visual merchandising standards
- technology skills to operate and maintain electronic labelling and ticketing equipment
- team leadership skills to:
  - instruct and support staff
  - supervise staff activities

Required knowledge

- availability and use of materials
- correct storage procedures for labelling and ticketing equipment and materials
- load-bearing capacity of fixtures and display areas
- location of display areas
- manufacturer specifications for the use of electronic labelling and ticketing equipment
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication skills
- principles of display and design
- procedure for accessing information and implementing price changes
- relevant industry codes of practice relating to coordinating merchandise presentation
- relevant legislation and statutory requirements relating to coordinating merchandise presentation, including Australian Consumer Law
- relevant work health and safety (WHS) legislation and codes of practice
- store policies and procedures in regard to:
  - efficient use of resources
  - merchandise range
- merchandising, pricing and ticketing
- minimum stock levels required
- stock rotation and replenishment
- storage of stock
- store promotional themes
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- implements and instructs staff regarding store display, merchandising, ticketing and pricing policies and procedures
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements, and timing for dismantling and disposing of displays
- evaluates and reports effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
  - store policy and procedures manuals on merchandising
  - WHS requirements
  - manufacturer instructions and operation manuals on electronic ticketing equipment
  - legislation and statutory requirements
  - industry codes of practice
  - a work team.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.
Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Display standards and requirements may include:

- maintaining existing displays
- safety
- setting up new displays
- ticketing and display signage.

Staff may be:

- from a range of social, cultural and ethnic backgrounds
- from within or outside own work team
- full-time, part-time, casual or contract.

Displays may be located in a variety of areas, including:

- fixtures on floor
- interior or exterior
- permanent or temporary
- publicly accessible areas
- shelves
- walls
- windows.

Display information may include:

- discount information
- price
- product brand
- special guarantees
- product characteristics, such as:
  - size
  - weight capacity
  - materials.

Customers may include:

- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Employability skills
The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1       | 1.1 Communicate *mission statement* according to store’s stated purpose and values.  
1.2 Interpret mission statement in active consultation with *team members and management*. |
| 2       | 2.1 Develop objectives and targets after active consultation with team members and management according to *store policy and procedures*.  
2.2 Ensure *strategies and objectives* accurately reflect the overall *store mission and values*.  
2.3 Ensure strategies and objectives are attainable, cost-efficient and realistic within a designated timeframe and allow for continuous improvement planning.  
2.4 Ensure strategies and objectives contain sufficient detail to allow development of specific projects. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
2.5 | Clearly acknowledge *constraints upon objectives*.

3 | Develop action plans.

3.1 | Develop, evaluate and implement action plans according to store policy and procedures.
3.2 | Ensure action plans contain clear, comprehensive and concise details.
3.3 | Ensure action plans take account of appropriate operational and other relevant considerations.
3.4 | Ensure proposals identify targets, standards and implementation methods.
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- analysing, implementing and evaluating plans
- presenting reports
- consultative processes
- group presentation
- interpersonal communication skills to:
  - interpret and communicate mission statement
  - develop objectives and targets in consultation with team members and management through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- literacy skills in regard to:
  - documenting strategic plans
  - reading and interpreting information
  - numerical skills in regard to financial and budget planning.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to strategic planning
- store purpose and values
- store mission statement
- internal and external operating environment
- principles and techniques in strategic planning.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets, communicates and implements store’s mission statement
- collaboratively develops team objectives reflecting the store’s mission statement
- collaboratively develops strategies for achieving team objectives
- collaboratively develops effective action plans to implement strategies, including targets, standards and implementation methods.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - strategic plans
  - store mission statement
  - store value statement
  - information on the internal and external operating environment
- a team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
EVIDENCE GUIDE

Assessing employability skills Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the performance criteria is detailed below.

**Mission statements** may be:
- formal
- informal
- communicated verbally
- communicated in writing.

**Team members and management** may include:
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

**Store policy and procedures** in regard to:
- strategic planning
RANGE STATEMENT

Strategies and objectives may relate to:
- technology
- time management
- standards of work
- quality
- quantity
- human relations, personal development
- legal issues
- internal and external operating environments
- implementation of policy and procedures
- development and communication of ideas
- development of product and service provision
- problem solving
- financial control and accounting
- profits
- management systems
- inventory control
- loss prevention.

Store mission and values may include:
- customer relationships
- supplier relationships
- legal requirements
- OHS
- equal opportunity
- ethics
- employment
- human relations
- training
- environment.

Constraints upon objectives may include:
- internal considerations
- external considerations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:
- planning and proposing changes
- consultation skills
- negotiation skills
- evaluating and forecasting
- collecting and organising information
- presentation skills
- interpersonal communication skills to:
  - report information and communicate recommendations
  - negotiate changes and communicate details of implementation plans through clear and direct communication
  - ask questions to identify and confirm requirements
  - share information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
  - literacy skills in regard to documenting plans and reports.

The following knowledge must be assessed as part of this unit:
- store policy and procedures in regard to:
  - initiating and implementing change
  - applying relevant legislation and organisational rules
  - changes to technology and resources
  - market needs and marketing opportunities
  - resource utilisation and costs
  - analysing efficiency and effectiveness
  - assessing alternatives in areas of change, including contingency planning
  - using financial analysis techniques, including cost and benefit, differential and risk analysis
  - quality assurance and control.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- reviews relevant information and identifies opportunities for increased sales and service
- evaluates proposals for changes to merchandise and service range and operating systems
- negotiates for the successful implementation of change
- collaboratively implements changes
- evaluates implemented change against the initial proposal.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures in regard to initiating and implementing change
  - resource utilisation
  - proposals for changes
  - market analysis data
- a team.
EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.
RANGE STATEMENT

**Information** may be gathered from:
- external sources
- higher-level managers
- subordinates
- colleagues
- specialists
- staff in other departments.

**Appropriate personnel** may include:
- supervisor and manager
- team members.

**Opportunities for improvement and change** may include:
- personnel requirements and team composition
- employment and work practices
- work methods and patterns
- cost factors
- nature and availability of services and products
- quality of services and products
- methods to reduce waste
- new equipment and technology
- design of systems.

**Implications** of change may affect:
- profitability
- productivity
- quality of service and product
- environmental impact
- working conditions
- working relationships
- reactions of individual employees.

**Analysis measures** may be:
- qualitative
- quantitative.
RANGE STATEMENT

*Communication* and negotiations may include:
- higher-level managers
- subordinates
- colleagues
- specialists
- staff in other departments
- representatives from external organisations.

*Negotiations* may be conducted:
- verbally in formal or informal meetings
- by telephone or fax
- written correspondence
- email.

*Store policy and procedures* in regard to:
- initiating and implementing changes
- communication techniques.

*Problems* in implementing change may relate to:
- internal considerations
- external considerations.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to sell products and services in a retail environment.

It involves the use of sales techniques and encompasses key selling skills, from approaching the customer to closing the sale.

It requires a basic level of product knowledge and the recognition and demonstration of verbal and non-verbal communication skills to determine customer requirements, sell the benefits of products and services, overcome objections and close sales.

Personal evaluation is used to maximise sales, according to industry codes of practice, relevant legislation and store policy.

Application of the Unit
This unit applies to frontline sales personnel.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

</tbody>
</table>

1. **Develop and apply product knowledge.**
   1.1. Develop *product knowledge* by accessing *relevant sources of information* and confirm with relevant staff.
   1.2. Apply knowledge of the use and application of relevant products and services in interactions with customers according to store policy and *legislative requirements*.
   1.3. Identify gaps in product knowledge and resolve by accessing relevant sources of information.

2. **Approach customer.**
   2.1. Identify *customers* by name where possible.
   2.2. Develop knowledge of customer buying behaviour by accessing relevant sources of information.
   2.3. Determine and apply appropriate timing of customer approach according to store policy and customer behaviour.
   2.4. Initiate customer contact according to store policy.
   2.5. Convey a positive impression to encourage customer interest according to store policy.

3. **Gather and respond to information.**
   3.1. Apply questioning techniques and listening skills to determine customer buying motives and requirements.
   3.2. Interpret and clarify non verbal communication cues.
   3.3. Direct customer to specific merchandise according to customer requirements and store policy.

4. **Sell benefits.**
   4.1. Match customer needs to appropriate products and services.
   4.2. Communicate knowledge of product features and benefits clearly to customers.
   4.3. Describe product use and safety requirements to customers.
   4.4. Refer customers to appropriate product specialist as required.
   4.5. Answer *routine customer questions* about merchandise accurately and honestly or refer to senior sales staff.

5. **Overcome objections.**
   5.1. Identify and acknowledge customer objections according to store policy.
   5.2. Categorise objections into price, time and merchandise characteristics and consider solutions.
5.3. Offer solutions to customer objections according to store policy.
5.4. Apply *problem solving* within personal scope of responsibilities to overcome customer objections or refer to senior staff.

6. Close sale.
   
   6.1. Monitor, identify and respond appropriately to customer buying signals.
   
   6.2. Encourage customer to make purchase decisions.
   
   6.3. Select and apply appropriate method of closing sale.

7. Maximise sales opportunities.
   
   7.1. Recognise and apply opportunities for making additional *sales* according to store policy.
   
   7.2. Advise customer of complementary products or services according to customer’s identified need.
   
   7.3. Review personal sales outcomes and consider strategies to maximise future sales in consultation with relevant staff.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - handle difficult customers

- verbal and non-verbal communication skills to:
  - question, listen and observe
  - overcome objections and close sale

- literacy and numeracy skills to:
  - handle payments for goods
  - read product information
  - read store policies and procedures
  - record information
  - weigh and measure goods

- selling skills to use a range of selling techniques

Required knowledge

- customer types and needs, including:
  - customer behaviour and cues
  - customer buying motives
  - demographics, lifestyle and income
  - individual and cultural differences
  - types of customer needs, such as:
    - functional
    - psychological

- relevant industry codes of practice, legislation and statutory requirements relating to the sale of products and services

- selling techniques, including:
  - add-ons and complementary sales
  - closing techniques
  - opening techniques
  - overcoming customer objections
  - recognising buying signals
  - using strategies to focus customer on specific merchandise

- specific product knowledge for area or section

- store merchandise and service range

- store policies and procedures in regard to:
  - allocated duties and responsibilities
  - selling products and services and sales performance
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future sales.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as policy and procedures manuals
- a range of customers with different requirements
- a range of merchandise and products appropriate to the retail workplace
- product labels and sources of product information.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Product knowledge** may include:
- features and benefits
- handling and storage requirements
- price
- safety features
- stock availability
- use-by dates
- warranties.

**Relevant sources of information** may include:
- demonstrations
- internet
- labels
- product profiles
- staff members
- store or supplier product manuals
- store tours
- videos.

**Legislative requirements** may include:
- industry codes of practice
- liquor laws
- lottery legislation
- work health and safety (WHS)
- sale of second-hand goods
- sale of X and R-rated products
- tobacco laws
- Australian consumer law and fair trading Acts
- trading hours
- transport, storage and handling of goods.

**Customers** may include:
- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

**Routine customer questions** may relate to:
- availability
- features and benefits
- price and price reductions
Problem solving may be affected by:
- quality.
- resource implications
- store policies and procedures.

Sales transactions may be completed:
- face-to-face
- online
- over the telephone.

TAEASS401B Plan assessment activities and processes

Modification History

Version  Comments
TAEASS301B  Released with TAE10 Training and Education Training Package version 2.0

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.
## Elements and Performance Criteria Pre-Content

**ELEMENT**

Elements describe the essential outcomes of a unit of competency.

**PERFORMANCE CRITERIA**

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Determine assessment approach** | 1.1 Identify candidate and confirm *purposes and context of assessment/RPL* with relevant people according to *legal, organisational and ethical requirements*  
1.2 Identify and access *benchmarks for assessment/RPL* and any specific assessment guidelines |
| **2. Prepare the assessment plan** | 2.1 Determine evidence and *types of evidence* needed to demonstrate competence, according to the *rules of evidence*  
2.2 Select *assessment methods* which will support the collection of defined evidence, taking into account the context in which the assessment will take place  
2.3 Document all aspects of the *assessment plan* and confirm with relevant personnel |
| **3. Develop assessment instruments** | 3.1 Develop *simple assessment instruments* to meet target group needs  
3.2 Analyse *available assessment instruments* for their suitability for use and modify as required  
3.3 *Map assessment* instruments against unit or course requirements  
3.4 Write clear instructions for candidate about the use of the instruments  
3.5 Trial draft assessment instruments to validate content and applicability, and record outcomes |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
  - interpret competency standards and other assessment documentation, including material relating to reasonable adjustment
  - identify opportunities for integrated competency assessment
  - contextualise competency standards to the operating assessment environment, including RPL
  - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
  - obtain competency standards, assessment tools and other relevant assessment resources
  - research candidate characteristics and any reasonable adjustment needs
  - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
  - demonstrate sensitivity to access and equity considerations and candidate diversity
  - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.

Required knowledge

- ethical and legal requirements of an assessor
- competency-based assessment, including:
  - work focused
  - criterion referenced
  - standards based
  - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Purposes of assessment/ RPL may include:**
- recognising current existing competence of candidates
- determining if competence has been achieved following learning
- establishing candidate progress towards achievement of competence
- determining language, literacy and numeracy needs of candidates
- certifying competence through a qualification or Statement of Attainment
- licensing or regulatory requirements.

**Context of assessment/ RPL may include:**
- environment in which the assessment/RPL will be carried out, including real or simulated workplace
- opportunities for collecting evidence in a number of situations
- relationships between competency standards and:
  - evidence to support RPL
  - work activities in the candidate’s workplace
  - learning activities
  - who carries out the assessment/RPL.

**Organisational, legal and ethical requirements may include:**
- assessment system policies and procedures
- assessment strategy requirements
- reporting, recording and retrieval systems for assessment, including RPL
- quality assurance systems
- business and performance plans
- access and equity policies and procedures
- collaborative and partnership arrangements
- defined resource parameters
- mutual recognition arrangements
- industrial relations systems and processes, awards, and enterprise agreements
- Australian Quality Training Framework
- registration scope
- human resources policies and procedures
- legal requirements, including:
<table>
<thead>
<tr>
<th><strong>TAEASS401B Plan assessment activities and processes</strong></th>
<th><strong>Date this document was generated:</strong> 13 April 2015</th>
</tr>
</thead>
</table>

- anti-discrimination
- equal employment opportunity
- job role, responsibilities and conditions
- relevant industry codes of practice
- confidentiality and privacy requirements
- OHS considerations, including:
  - ensuring OHS requirements are adhered to during the assessment process
  - identifying and reporting OHS hazards and concerns to relevant personnel.

**Benchmarks for assessment/RPL** may include:
- criterion against which the candidate is assessed or prior learning recognised, which may be:
  - competency standard/unit of competency
  - assessment criteria of course curricula
  - performance specifications of an enterprise or industry
  - product specifications.

**Types of evidence** may include:
- direct
- indirect
- supplementary.

**Rules of evidence** ensure that evidence collected is:
- valid
- sufficient
- authentic
- current.

**Assessment methods** are the particular techniques used to gather evidence and may include:
- direct observation, for example:
  - real work/real time activities at the workplace
  - work activities in a simulated workplace environment
- structured activities, for example:
  - simulation exercises and role-plays
  - projects
  - presentations
  - activity sheets
- questioning, for example:
  - written questions, e.g. on a computer
  - interviews
  - self-assessment
  - verbal questioning
  - questionnaires
  - oral or written examinations (applicable at higher AQF levels)
- portfolios of evidence, for example:
<table>

<td>Evidence of training</td>
</tr>
<tr>
<td></td>
<td>Authenticated prior achievements</td>
</tr>
<tr>
<td></td>
<td>Interview with employer, supervisor, or peer.</td>
</tr>
</tbody>
</table>

**Assessment plan** may include:

- Overall planning document describing:
  - What is to be assessed
  - When assessment is to take place
  - Where assessment is to take place
  - How assessment is to take place.

**Simple assessment instruments** may include:

- Instruments developed by an assessor as part of formative or summative assessment activities, including:
  - Profiles of acceptable performance measures
  - Templates and pro formas
  - Specific questions or activities
  - Evidence and observation checklists
  - Checklists for the evaluation of work samples
  - Recognition portfolios
  - Candidate self-assessment materials
  - Instruments developed elsewhere that have been modified by the assessor for use with a particular client group.

**Available assessment instruments** may include:

- Commercially available instruments
- Those created by others inside the registered training organisation.

**Map assessment** means:

- Showing a clear relationship between the evidence and the requirements of the unit.

## Elements and Performance Criteria

| 1. Prepare for assessment | 1.1 Interpret **assessment plan** and confirm organisational, legal and ethical requirements for conducting assessment with relevant people  
1.2 Access and interpret relevant **benchmarks for assessment** and nominated **assessment tools** to confirm the requirements for evidence to be collected  
1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures  
1.4 Organise **specialist support** required for assessment  
1.5 Explain, discuss and agree details of the assessment plan with candidate |
| --- | --- |
| 2. Gather quality evidence | 2.1 Use agreed **assessment methods** and instruments to gather, organise and document evidence in a format suitable for determining competence  
2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence  
2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel  
2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required |
| 3. Support the candidate | 3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)  
3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to **individual differences** and enables two-way **feedback**  
3.3 Make decisions on reasonable adjustments with the candidate, based on candidate’s needs and characteristics  
3.4 Access required specialist support in accordance with the assessment plan  
3.5 Address any OHS risk to person or equipment immediately |
| 4. Make the assessment decision | 4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence  
4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence  
4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan  
4.4 Provide clear and constructive feedback to candidate regarding |
| 5. Record and report the assessment decision | 5.1 Record assessment outcomes promptly and accurately  
5.2 Complete and process an assessment report according to agreed assessment procedures  
5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions |
|---------------------------------------------|
| 6. Review the assessment process            | 6.1 Review the assessment process in *consultation* with relevant people to improve own future practice  
6.2 Document and record the review according to relevant assessment system policies and procedures |
**Required Skills and Knowledge**

*This section describes the skills and knowledge required for this unit.*

**Required skills**

- analysis and interpretation skills to:
  - break down competency standards
  - interpret assessment tools and other assessment information, including those used in RPL
  - identify candidate needs
  - make judgements based on assessment of available evidence
- observation skills to:
  - recognise candidate’s prior learning
  - determine candidate’s performance
  - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
  - access required human and material resources for assessment
  - access assessment system policies and procedures
  - access RPL policies and procedures
  - evaluate evidence
  - evaluate assessment process
- cognitive skills to:
  - weigh up the evidence and make a judgement
  - consider and recommend reasonable adjustments
- decision-making skills to:
  - recognise a candidate’s prior learning
  - make a decision on a candidate’s competence
- literacy skills to:
  - read and interpret relevant information to conduct assessment
  - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
  - explain the assessment, including RPL process
  - give clear and precise instructions
  - ask effective questions
  - provide clarification
  - discuss process with other relevant people
  - give appropriate feedback
  - discuss assessment outcome
  - use language appropriate to candidate and assessment environment
  - establish a working relationship with candidate.
Required knowledge

- competency-based assessment, including:
  - vocational education and training as a competency-based system
  - criterion-referenced assessment as distinct from norm-referenced assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - principles of assessment and how they are applied
  - rules of evidence and how they are applied
  - range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - potential barriers and processes relating to assessment tools and methods
  - assessment system, including policies and procedures established by the industry, organisation or training authority
  - RPL policies and procedures established by the organisation
  - cultural sensitivity and equity considerations
  - relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
    - copyright and privacy laws in terms of electronic technology
    - security of information
    - plagiarism
    - training packages and competency standards
    - licensing requirements
    - industry and workplace requirements
    - duty of care under common law
    - recording information and confidentiality requirements
    - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
    - workplace relations
    - industrial awards and enterprise agreements
  - OHS responsibilities associated with assessing competence, such as:
    - requirements for reporting hazards and incidents
    - emergency procedures
    - procedures for use of relevant personal protective equipment
    - safe use and maintenance of relevant equipment
• sources of OHS information.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Evidence of the ability to:

- assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan
- assess at least one candidate for RPL
- consider reasonable adjustment and the reasons for decisions in at least one assessment
- cover an entire unit of competency and show:
  - the application of different assessment methods and instruments involving a range of assessment activities and events
  - two-way communication and feedback
  - how judgement was exercised in making the assessment decision
  - how and when assessment outcomes were recorded and reported
  - assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements
- how the assessment process was reviewed. |

| Context of and specific resources for assessment | Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided. |
| Method of assessment |
| Guidance information for assessment |
### Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

| Assessment plan may include: | • overall planning, describing:  
| | • what is to be assessed  
| | • when assessment is to take place  
| | • where assessment is to take place  
| | • how assessment is to take place. |

| Benchmarks for assessment: | • refer to a criterion against which the candidate is assessed  
| | • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications. |

| Assessment tools include: | • the learning or competency unit(s) to be assessed  
| | • the target group, context and conditions for the assessment  
| | • the tasks to be administered to the candidate  
| | • an outline of the evidence to be gathered from the candidate  
| | • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules)  
| | • the administration, recording and reporting requirements  
| | • the evidence of how validity and reliability have been tested and built into the design and use of the tool. |

| Specialist support may include: | • assistance by third party, such as carer or interpreter  
| | • support from specialist educator  
| | • provision of developed online assessment activities  
| | • support for remote or isolated candidates and assessors  
| | • support from subject matter or safety experts  
| | • advice from regulatory authorities  
| | • assessment teams and panels  
| | • support from lead assessors  
| | • advice from policy development experts. |

| Assessment methods include: | • particular techniques used to gather different types of evidence, such as:  
| | • direct observation |
- structured activities
- oral or written questioning
- portfolios of evidence
- review of products
- third-party feedback.

### Individual differences

**may include:**

- English language, literacy and numeracy barriers
- physical impairment or disability
- intellectual impairment or disability
- medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma
- learning difficulties
- mental or psychological disability
- religious and spiritual observances
- cultural images and perceptions
- age
- gender.

### Feedback

**may include:**

- ensuring assessment/RPL process is understood
- ensuring candidate concerns are addressed
- enabling questions and answers
- confirming outcomes
- identifying further evidence to be provided
- discussing action plans
- confirming gap training needed
- providing information regarding available appeal processes
- suggesting improvements in evidence gathering and presentation.

### Consultation

**may involve:**

- moderation with other assessors, or training and assessment coordinators
- discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors
- technical and subject experts
- English language, literacy and numeracy experts.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context. |

Application of the Unit

| Application of the unit | This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations. |

Licensing/Regulatory Information

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **verbal and non-verbal communication techniques, such as:**
  - asking relevant and appropriate questions
  - providing explanations
  - demonstrating
  - using listening skills
  - providing information clearly

- **safety skills to implement OHS requirements, by acting and responding safely in order to:**
  - identify hazards
  - conduct prestart-up checks if required
  - observe and interpret learner behaviour that may put people at risk

- **time-management, skills to:**
  - ensure all learning objectives are covered
  - pace learning

- **reflection skills in order to:**
  - identify areas for improvement
  - maintain personal skill development

- **literacy skills to:**
  - complete and maintain documentation
  - read and follow learning programs and plans
  - read and analyse learner information

- **technology skills to operate audio-visual and technical equipment**

- **interpersonal skills to:**
  - engage, motivate and connect with learners
  - provide constructive feedback
  - maintain appropriate relationships
  - establish trust
  - use appropriate body language
  - maintain humour
  - demonstrate tolerance
  - manage a group
  - recognise and be sensitive to individual difference and diversity

- **observation skills to:**
  - monitor learner acquisition of new skills, knowledge and competency

---

© Commonwealth of Australia, 2015

AgriFood Skills Australia
REQUIRED SKILLS AND KNOWLEDGE

**Requirements**
- assess learner communication and skills in interacting with others
- identify learner concerns
- recognise learner readiness to take on new skills and tasks

**Required knowledge**
- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:
- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
  - different learning objectives
  - a range of techniques and effective communication skills appropriate to the audience.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

Method of assessment

Guidance information for assessment

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).
### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Learner characteristics may include: | • language, literacy and numeracy levels  
|                                      | • learning styles  
|                                      | • past learning and work experiences  
|                                      | • specific needs  
|                                      | • workplace culture. |
| Safe learning environment may include: | • exit requirements  
|                                         | • personal protective equipment  
|                                         | • safe access  
|                                         | • safe use of equipment. |
| Instruction and demonstration objectives may include: | • competencies to be achieved  
|                                                          | • generic and technical skills, which may be:  
|                                                          | • provided by the organisation  
|                                                          | • developed by a colleague  
|                                                          | • individual or group objectives  
|                                                          | • learning outcomes. |
| Learning resources may include: | • any material used to support learning, such as:  
|                                                 | • learner and user guides  
|                                                 | • trainer and facilitator guides  
|                                                 | • example training programs  
|                                                 | • specific case studies  
|                                                 | • professional development materials  
|                                                 | • assessment materials  
|                                                 | • a variety of formats  
|                                                 | • those produced locally  
|                                                 | • those acquired from other sources. |
| Learning materials may include: | • handouts for learners  
|                                            | • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications. |
| Details may include: | • location and time  
|                      | • outcomes of instruction or demonstration |
### RANGE STATEMENT

| **reason for instruction or demonstration** |
| **who will be attending instruction session.** |

### OHS procedures may include:

- emergency procedures
- hazards and their means of control
- incident reporting
- use of personal protective equipment
- safe work practices
- safety briefings
- site-specific safety rules.

### Delivery techniques may include:

- coaching
- demonstration
- explanation
- group or pair work
- providing opportunities to practise skills and solve problems
- questions and answers.

### Coaching may include:

- learning arrangements requiring immediate interaction and feedback
- on-the-job instruction and 'buddy' systems
- relationships targeting enhanced performance
- short-term learning arrangements
- working on a one-to-one basis.

### Measures may include:

- informal review or discussion
- learner survey
- on-the-job observation
- review of peer coaching arrangements.

Unit Descriptor
Unit Descriptor
This unit involves the skills and knowledge required to complete and or evaluate import and export documentation, and check documentation in accordance with the requirements of Customs and related legislation and workplace procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Application of the Unit
Work must be carried out in compliance with the relevant Customs and related legislation and workplace requirements concerning the completion and checking of import/export documentation.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

This unit is normally packaged at AQF II or above.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1** Identify procedures required for documentation for import/export of goods | 1.1 Documents required for import/export of goods are identified  
1.2 Required documents are sourced  
1.3 Content requirements for each section of the documentation are applied  
1.4 Timelines for completion of documents are identified and noted  
1.5 Requirements for permits and other documentation (e.g. Quarantine) are identified and implications noted  
1.6 Procedures for obtaining clearances including AUTHORITY TO DEAL, Delivered into Home Consumption authorisation and Export Declaration Numbers (EDN) are identified and followed in accordance with the requirements of Customs and related legislation and workplace procedures  
1.7 Letters of credit are identified and implications of each noted  
1.8 Assistance is sought as required in identifying required documents and to commence process of assessing or completing these documents  
1.9 Lodge all documentation if required by legislation (e.g. CITES) |
| **2** Complete documentation to meet legislative and workplace requirements | 2.1 Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs and related legislation and workplace procedures  
2.2 Workplace procedures for authorisations are followed  
2.3 Data entry for documents are completed  
2.4 Problems arising in completing required documents are identified and assistance sought to resolve these in accordance with the requirements of Customs and related legislation and workplace procedures  
2.5 Actions are taken to meet deadlines  
2.6 Assistance is sought as required in completing required documents |
| **3** Check documentation to ensure it meets legislative requirements | 3.1 Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines in accordance with the requirements of Customs and related legislation and workplace procedures  
3.2 Declarations are checked to ensure they meet the requirements of Customs and related legislation and workplace procedures  
3.3 Letters of credit are checked to ensure they meet commercial, transport and overseas requirements  
3.4 Dangerous goods documentation is checked in accordance with the requirements of Customs and related legislation and workplace procedures |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
3.5 Any revisions to documents are finalised and rechecked by self and supervisor, manager or more senior personnel prior to lodgement

4 Lodge documentation for processing

4.1 Documents are forwarded to relevant personnel in accordance with the requirements of Customs and related legislation and workplace procedures

4.2 Documents are filed, stored and retained in accordance with the requirements of Customs and related legislation and workplace procedures

---

**Required Skills and Knowledge**

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian and international standards, codes and regulations relevant to the import and export of cargo and freight
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of import and export documentation
- Focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation
- Problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve the problems
- The Customs Act 1901 and related legislation
- Documentation requirements for the import and export of cargo and freight

**Required skills:**

- Communicate effectively with others when completing import and export documentation
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the import and export of cargo and freight
- Complete and/or assess accuracy of import and export documentation
- Work collaboratively with others when completing import and export documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing and/or assessing
Required skills:

- import and export documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant communications, computing and office equipment when completing import and export documentation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - identifying procedures required for documentation for import/export of goods
  - completing and checking documentation and records to meet relevant Customs legislation and related legislation and workplace requirements
  - providing customer/client service and work effectively with others
  - selecting and using appropriate workplace colloquial and technical language and communication technologies in the workplace context

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is
EVIDENCE GUIDE

required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:
  - a range of work environments
  - by day or night

Customers may be:
  - internal or external

Workplaces may comprise:
  - large, medium or small worksites

Work may be conducted in:
  - limited or restricted spaces
  - exposed conditions
  - controlled or open environments

Cargo may include:
  - goods with specialist requirements, including temperature controlled goods and dangerous goods
  - personal effects
  - consignments imported/exported by parcels post
  - consignments imported/exported by air freight
  - consignments imported/exported by sea freight
  - wildlife or wildlife products (living or non-living)
  - goods with specialist requirements, including temperature controlled goods and dangerous goods
RANGE STATEMENT

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- goods identification numbers and codes
- manifests, barcodes, and container identification/serial number
- relevant Customs legislation, related legislation including quarantine legislation, environment and conservation legislation and Australian and international codes of practice and regulations relevant to import/export of cargo
- Australian and international standards, regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- dangerous goods declarations and material safety data sheets (MSDSs) (where applicable)
- packing declaration
- timber treatment certificates
- cleanliness certificate
- handling instructions for cargo (especially for dangerous goods or temperature controlled goods)
- commercial invoices
- packing lists
- air waybill (AWB)
- certificates of origin
RANGE STATEMENT

- bills of lading (B/L) or sea waybills
- certificates of marine insurance, other insurance certificates
- quarantine treatment certificate
- transportation and warehousing instructions
- permits from regulatory bodies (Australian and international)
- financial documentation
- other documents specific to goods, country of origin/destination
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian Standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant Customs and related legislation, including taxation legislation
- relevant standards and codes for the import/export of cargo
- quarantine legislation
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

Applicable regulations and legislation may include:

- relevant Customs and related legislation, including taxation legislation
- relevant standards and codes for the import/export of cargo
- quarantine legislation
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation
Unit Sector(s)
Not Applicable

Competency Field
Competency Field A - Handling Cargo/Stock
TLID2013A Move materials mechanically using automated equipment

Modification History
Not Applicable

Unit Descriptor
This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information
Refer to Unit Descriptor

Pre-Requisites
Not Applicable
Employability Skills Information

Employability Skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

ELEMENT | PERFORMANCE CRITERIA
--- | ---
1 Select load moving equipment | 1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods
1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures

2 Move goods | 2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures
2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures

3 Check goods and complete documentation | 3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken
3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS
This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:
- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements
REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment,
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
    - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The operations may be conducted: • in a range of work environments • by day or night • in a range of typical weather conditions

Customers may be: • internal or external

Workplaces may comprise: • large, medium or small worksites

Work may be conducted in: • restricted spaces • exposed conditions • controlled or open environments

Mechanised equipment may include a range of goods and materials handling equipment such as: • automatic guided vehicle • tow motors • high level order picker • conveyor system • mechanised pallet mover

Personal protective equipment may include: • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing

Hazards in the work area may include exposure to: • chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • moving and rotating equipment and vehicles

Personnel in the work area may include: • workplace personnel • site visitors • contractors • official representatives

Communication in the work area may include: • phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace • company procedures • enterprise procedures • organisational procedures
RANGE STATEMENT

procedures may include:
- established procedures

Information/documents may include:
- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- manufacturers instructions concerning the use and servicing of automated mechanical equipment
- workplace procedures and policies
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- ADG Code and regulations

Competency Field

Competency Field D - Load Handling
TLID3020A Care for livestock in transit

Modification History
Not Applicable

Unit Descriptor
This unit involves the skills and knowledge required to prepare and care for livestock in transit, including making preparations to transport livestock, caring for and controlling livestock in transit, and using appropriate animal husbandry techniques, as required. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant regulations and industry codes of practice for the care of livestock in transit.

Work is performed under limited or minimum supervision generally within a team environment. It involves the application of the basic principles and routine procedures to the care of livestock during transit.

Licensing/Regulatory Information
Refer to Unit Descriptor

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.  Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare to transport livestock | 1.1 Condition, quality and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace policy  
1.2 Any poor quality livestock is identified and reported to specified personnel in accordance with workplace policy  
1.3 Feed provisions and other requirements for livestock prior to and during transit are identified and organised  
1.4 Portable stockyards are assembled as required |
| 2 Care for and control livestock in transit | 2.1 Condition of livestock is regularly monitored during loading, transit and unloading and appropriate action is taken in terms of relevant government regulations, workplace policy, and humane and permit requirements  
2.2 Working dogs and appropriate handling equipment are used to aid the handling of livestock during loading and unloading operations in accordance with regulations and workplace procedures  
2.3 Required action is taken for the care and well-being of animals in the event of an accident during transit  
2.4 Distressed stock is handled in an appropriate manner in accordance with government regulations and workplace policies |
| 3 Use animal husbandry techniques | 3.1 Symptoms of animal diseases and parasites are identified and appropriate action taken to control them in terms of relevant government regulations, workplace policy, and humane and permit requirements  
3.2 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace policy |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulations concerning the care for livestock in transit
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when caring for livestock during transit and related precautions to control the risk
- Workplace procedures and policies for the caring for livestock during transit
REQUIRED KNOWLEDGE AND SKILLS

- Specialised livestock handling equipment and procedures for its use
- Insurance rights and responsibilities
- Housekeeping standards and procedures when caring for livestock during transit
- Methods of securing livestock during transit

Required skills:

- Communicate effectively with others when caring for livestock in transit
- Read and interpret instructions, procedures and information relevant to the care of livestock in transit
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the care of livestock in transit
- Work collaboratively with others when caring for livestock in transit
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when caring for livestock in transit in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events during the care of livestock in transit
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to animals or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify and correctly use equipment required to care for livestock during transit
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment
EVIDENCE GUIDE
guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit
- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

Range Statement
RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.
RANGE STATEMENT

Livestock being cared for in transit may include any livestock able to be transported, such as:
- sheep
- cattle
- horses
- goats
- pigs
- chickens

Customers may be:
- internal or external

Operations may be conducted:
- in a range of work environments and weather conditions
- by day or night

Work may be conducted in:
- restricted spaces
- exposed conditions
- controlled or open environments
- a workplace, warehouse or depot
- in a vehicle on the road
- at a client’s workplace

Handling operations may be carried out both manually and with the aid of working dogs and livestock handling equipment, including:
- cattle prods
- restraining devices
- portable cattle yards

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:
- gloves
- safety headwear
- safety footwear

Information/documents may include:
- industry codes and government regulations for the care of livestock during transit
- workplace documentation
- client instructions
- workplace procedures and policies for the care of livestock during transit
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- award, enterprise bargaining agreement, other industrial arrangements
- guidelines on livestock husbandry relevant to the care of livestock during transit
RANGE STATEMENT

- standards and certification requirements
- quality assurance procedures
- emergency procedures
- state/territory mass and loading regulations
- Australian and state/territory regulations relevant to the care of livestock during transit
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

Applicable regulations and legislation may include:

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify product required for meat product orders | 1.1. Products are identified and labelled in accordance with trade descriptions.  
1.2. Products are identified in accordance with company requirements. |
| 2. Check customer requirements for delivery of order | 2.1. Customer requirements are confirmed to determine product order delivery arrangements.  
2.2. Customer requirements are checked to confirm whether the order is domestic or export so as to comply with appropriate regulatory and importing country requirements.  
2.3. Temperature and storage requirements for product order are confirmed and arranged in accordance with workplace requirements. |
| 3. Arrange orders | 3.1. Products are identified for an order and chiller location is confirmed.  
3.2. Product is assembled and checked against documentation to ensure correct order is sent out. |
| 4. Complete documentation | 4.1. Despatch documentation is correctly completed either manually or electronically to workplace and regulatory requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- make up meat orders correctly in accordance with workplace, Occupational Health and Safety (OH&S), hygiene and sanitation, Quality Assurance (QA) and regulatory requirements
- identify cartons and carcases which are unsuitable for loadout
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills
### REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:

- types of cartons and carcases which are unsuitable for loadout
- export and domestic regulatory requirements related to the despatch of meat products
- procedures to deal with contingencies, such as incorrect orders documentation
- relevant security arrangements
- temperature requirements for despatch of product
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Competency must be demonstrated at normal chain speed.</th>
</tr>

<td>• workplace demonstration</td>
</tr>
<tr>
<td></td>
<td>• workplace referee or third-party report of performance over time.</td>
</tr>
</tbody>
</table>

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Meat product orders** may be:
- carcase or cartons.

**Delivery** may be:
- container
- truck.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Documentation** may include:
- domestic transfers
- labelling, which may include:
  - for Australian inspection
  - for domestic purposes
  - for export purposes
  - pre-printed cartons
  - meat transfer certificates
  - notice of intention
  - supplementary meat transfer certificates.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which
