EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Stick and bleed** process employed may vary.

| Workplace requirements may include: | • enterprise-specific requirements  
• hygiene and sanitation requirements  
• OH&S requirements  
• Quality Assurance (QA) requirements  
• Standard Operating Procedures (SOPs)  
• the ability to perform the task to production requirements  
• work instructions. |
|-----------------------------------|-------------------------------------------------|

| Animal welfare requirements may include: | • Animal Welfare Code of Practice  
• Enterprise ethical standards  
• European Union (EU) and other importing country animal welfare requirements. |
|------------------------------------------|-------------------------------------------------|

| Regulatory requirements may include: | • Export Control Act  
• hygiene and sanitation requirements  
• relevant Australian Standards  
• relevant regulations  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state and territory regulations regarding meat processing. |
|---------------------------------------|-------------------------------------------------|

| Fast and complete bleeding may | • avoiding contamination of the carcase |
### RANGE STATEMENT

| **include:** | • avoiding damage to the carcase  
• making correct incisions  
• sterilisation techniques. |

| **OH&S requirements** may include: | • enterprise OH&S policies, procedures and programs  
• OH&S legal requirements  
• Personal Protective Equipment (PPE) which may include:  
  • coats and aprons  
  • ear plugs or muffs  
  • eye and facial protection  
  • head-wear  
  • lifting assistance  
  • mesh aprons  
  • protective boot covers  
  • protective hand and arm covering  
  • protective head and hair covering  
  • uniforms  
  • waterproof clothing  
  • work, safety or waterproof footwear  
  • requirements set out in standards and codes of practice. |

| **Communication skills** may include: | • listening and understanding  
• sharing information  
• speaking clearly and directly  
• working with diverse individuals and groups. |

| **Religious requirements** may include: | • Halal  
• Kosher. |

| **Species** may include: | • cattle  
• deer  
• goats  
• pigs  
• sheep. |

MTMP3003A Handle animals humanely while conducting ante-mortem inspection

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required for the safe and humane handling of animals prior to slaughter. |

Application of the Unit

| Application of the unit | This unit is for workers who are employed to undertake ante-mortem inspection or who assist those undertaking ante-mortem inspection. Such inspection may occur in a slaughtering establishment or saleyard, up to and including the knocking box. |

Licensing/Regulatory Information
Not Applicable

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify animal species and breeds, and their behavioural characteristics | 1.1. Common breeds are identified.  
1.2. Normal behavioural characteristics of relevant species are identified. |
| 2. Identify and comply with animal welfare requirements for stock handling and lairage facilities | 2.1. Animal welfare regulatory requirements are identified and complied with.  
2.2. *Workplace and regulatory requirements* for lairage are identified and confirmed as suitable for use.  
2.3. Facilities and equipment are identified and confirmed as suitable for use. |
| 3. Handle animals to achieve objective or outcome required | 3.1. Animals are moved and 'processed' (e.g. for ante-mortem inspection) and sorted as required by workplace and regulatory standards.  
3.2. *Occupational Health and Safety (OH&S)* requirements for handling animals are identified and complied with.  
3.3. Animals are handled appropriately to prevent injury, minimise stress and maintain the quality of hides or pelts. |
| 4. Handle contingencies | 4.1. Suspect sick or injured stock are handled in accordance with workplace and regulatory requirements.  
4.2. Wild or uncooperative animals are handled humanely without disturbing or injuring other animals or people. |
| 5. Deal with affected animals appropriately | 5.1. Affected animals are treated in accordance with regulatory, workplace and OH&S requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- take steps to minimise stress and injury to stock during handling procedures
**REQUIRED SKILLS AND KNOWLEDGE**

- handle animals humanely during ante-mortem inspection
- handle sick and injured animals in accordance with workplace and regulatory requirements
- apply emergency procedures as required
- work effectively as an individual and as part of a team
- use effective interpersonal skills in a range of contexts, including stressful situations
- comply with OH&S requirements for handling stock
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* relevant to the task

**Required knowledge**

Knowledge of:

- methods to handle livestock in a calm and stress-free manner
- impact of stress during handling on the ultimate pH and quality of meat
- impact of poor handling
- OH&S requirements for handling stock
- regulatory and workplace requirements for animal welfare
- documentation required for ante-mortem inspection
- regulatory requirements when dealing with animals affected by common and exotic or notifiable diseases
- procedures for dealing with animal-handling emergencies

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**
- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Regulatory requirements may include:**
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
## RANGE STATEMENT

- coats and aprons
- ear plugs or muffs
- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Contingencies** may include:

- livestock of various temperaments, from very tame to wild, which are unused to human contact or any handling procedures.

**Communication skills** may include:

- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

MTMP3004A Assess effective stunning and bleeding

Modification History

Not applicable.

Unit Descriptor

This Unit covers the skills and knowledge required to assess the humane and effective stunning and slaughter of animals.

Application of the Unit

This Unit is applicable to the assessment of the effectiveness of stunning and bleeding in a slaughtering establishment. The training would normally be undertaken by Quality Assurance officers and supervisors who monitor the humane slaughtering of animals.

Licensing/Regulatory Information

This Unit will fulfil the importing country requirements for meat processing establishments exporting to the European Union, and meets the European Union Regulation EC 1099/2009 training requirements for the assessment of effective stunning and bleeding.

Pre-Requisites

Not applicable.

Employability Skills Information

This Unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Assess the effective stunning of an animal prior to bleeding | 1.1 Animal is checked for an effective stun prior to bleeding.  
1.2 Corrective action is taken when effective stun is not achieved.  
1.3 Records of the assessment of effective stunning are kept according to workplace requirements.  
1.4 Stunning is assessed against the applicable work instruction and Standard Operating Procedures to ensure it is effective and humane. |
| 2. Check for bleed chain insensibility | 2.1 Animals are checked for insensibility on the bleed chain.  
2.2 Signs of sensibility are reported immediately and corrective action is taken immediately.  
2.3 Records of the assessment of effective stunning are kept according to workplace requirements.  
2.4 Bleeding is assessed against the applicable work instruction and Standard Operating Procedures to ensure it is effective and humane. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- assess effectiveness of animal stunning in accordance with workplace and regulatory requirements
- record assessment of bleed chain insensibility according to the workplace requirements
- identify the causes of bleed chain insensibility
- read and interpret electronic data (where applicable)
- record assessment of bleed chain insensibility according to the workplace requirements
- monitor bleed chain insensibility according to workplace requirements
- implement procedures if stun or bleeding is not effective
- record monitoring and assessment results of stunning and or bleed chain insensibilities
- report stunning and bleeding failures
- work effectively as an individual and as part of a team
- apply relevant regulatory and workplace requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- apply communication and mathematical skills appropriate to the task
- follow Workplace Health and Safety (WHS) procedures.

Required knowledge includes:

Knowledge of:

- methods of stunning and their application
- animal welfare requirements including importing country requirements where appropriate
- purpose of stunning animal
- the indicators of an effective stun
- workplace and regulatory requirements for monitoring stunning
- the causes of ineffective stunning and bleeding
- signs of bleed chain insensibility
- procedures for the assessment of stunning
- procedures for the assessment of bleed chain insensibility
- workplace and regulatory requirements for monitoring bleed chain insensibility
- signs of an ineffective stun
- animal welfare implications of ineffective stunning and bleeding
- WHS consequences of not achieving an effective stun
- impact of ineffective restraining and stunning on product quality
- relevant regulatory requirements
- corrective actions for an ineffective stun.
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
| Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
| All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this Unit

| Competency must be demonstrated at normal production speed with a range of types of stock.

### Context of and specific resources for assessment

| Assessment must be performed in an operating abattoir or knackery.

### Method of assessment

| Recommended methods of assessment include:
| - quiz of underpinning knowledge
| - workplace demonstration
| - workplace referee or third-party report of performance over time.
| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for

| A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or
| assessment | telephone 1800 817 462. |

Unit Descriptor

This Unit covers the skills and knowledge required to monitor an automated or manual electrical carcase stimulation unit to ensure that the carcases are receiving the optimal stimulation.

Application of the Unit

This Unit is applicable to workers monitoring electrical stimulation units in slaughtering establishments.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Pre-Requisites

Nil.

Employability Skills Information

This Unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Monitor electrical stimulation unit | 1.1 Monitor the *electrical stimulation unit* using the correct procedure to check electrical stimulation equipment operation.  
1.2 Use dummy load across each of the *electrical inputs* to check operation in accordance with work instructions and manufacturers specifications.  
1.3 Observe for and describe the normal reaction of carcases to electrical stimulation.  
1.4 Observe for and respond to any *abnormal reaction* of carcases to electrical stimulation.  
1.5 Follow up on requests for maintenance and check operation is normal.  
1.6 Follow workplace health and safety requirements for working around *electrical stimulation units*. |
| 2. Ensure routine checks of equipment by technicians are performed | 2.1 Routine checks arranged or overseen to ensure a full check of the equipment is made including: electrical parameters, stored programs, electrical safety, electrodes and equipment integration.  
2.2 Maintenance and equipment reports detailing the findings and recommendations are reviewed and corrective actions implemented. |
| 3. Respond to audits of carcase specification compliance | 3.1 Describe the pH/temperature window and its importance to meat quality.  
3.2 Describe the audit process for electrical stimulation unit performance and the various potential findings.  
3.3 Respond to adverse audit findings including recommendations to alter stimulation inputs, alter stimulation time and adjust chilling regime. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**
- observe and recognise normal and abnormal carcase responses to electrical stimulation
- instruct workers in and around electrical stimulation units to recognise and report abnormal carcase responses
- monitor the electrical stimulation unit using the correct procedure including readouts
- use dummy load across each of the electrical inputs to check operation
- request and schedule maintenance
- review maintenance and performance audit reports and ensure follow up action has been taken
- apply relevant communication skills
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.

Required knowledge includes:

**Knowledge of:**
- purpose of electrical stimulation
- pH/temperature window and its importance to meat quality
- causes of heat toughening and cold shortening and the impacts on meat quality
- correct procedures to check electrical stimulation equipment operation
- purpose of dummy loads to check operation
- relevant work instructions and manufacturers specifications
- normal and abnormal reactions of carcases to electrical stimulation
- required routine checks for electrical parameters, stored programs, electrical safety, electrodes and equipment integration
- use of an oscilloscope to ensure that the waveform parameters are as specified
- maintenance and equipment reports
- audit process for electrical stimulation unit performance and the various potential findings
- how to respond to adverse audit findings of electrical stimulation unit performance
- workplace health and safety issues associated in working around electrical stimulation units.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this Unit | Competency must be demonstrated over time and under typical operating and production conditions for the enterprise. |

| Context of and specific resources for assessment | Assessment may occur in the workplace under normal enterprise or production conditions as well as in simulated situations. |

| Method of assessment | Recommended methods of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace project
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment must be performed in an operating abattoir or knackery.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
## EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- select and prepare appropriate equipment according to workplace requirements
- report equipment faults according to workplace requirements
- seal weasand according to work instruction
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

- anatomy relevant to sealing weasand
- importance of correctly sealing weasand
### REQUIRED SKILLS AND KNOWLEDGE

- *methods used for sealing weasand*
- potential for contamination and cross-contamination
- work instructions
- OH&S requirements
- equipment required
- relevant regulatory requirements
Evidence Guide

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- split carcases accurately and in accordance with workplace and OH&S requirements
- work effectively as an individual and as part of a team
- perform routine cleaning and maintenance as specified in the work instructions
- take action to improve own work performance as a result of self-evaluation, feedback from others, in response to changed work practices or technology
- use communication skills relevant to the task

Required knowledge

Knowledge of:
- routine maintenance that forms part of the work instructions for splitting the carcase
- operation of the carcase splitting saw (where applicable)
- problems caused by soft siding carcasses
- relevant work instructions and Standard Operating Procedures (SOPs)
- OH&S requirements for operating, cleaning and maintaining the saw
- regulatory requirements
- sources of contamination and cross-contamination for carcase splitting

| 1. Explain legging operation | 1.1. Elements of legging operation are identified and explained.  
1.2. Sources of contamination and cross-contamination are identified and explained.  
1.3. Specific hygiene and sanitation requirements for legging are identified.  
1.4. Product or hide defects resulting from inaccurate cuts are identified.  
1.5. Specific Occupational Health and Safety (OH&S) risks associated with the legging area are identified. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- prepare and maintain equipment required during legging operation
- report equipment faults according to workplace requirements
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory and workplace requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- legging process
- use and importance of the spear cut during legging operations
- possible product or hide defects caused in legging operations
- consequences to product or hide of inaccurate opening cuts
- regulatory or importing country requirements
- relevant regulatory and workplace requirements
- sources of contamination and cross-contamination of product during legging process
### REQUIRED SKILLS AND KNOWLEDGE

- equipment used in legging and explain its purpose and care
- specific **OH&S requirements** in the legging area
### Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

| **Overview of assessment** | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | This unit must be undertaken with another legging unit and cannot be assessed in isolation. |

| **Context of, and specific resources for assessment** | Assessment must involve the understanding of workplace work instructions. |

| **Method of assessment** | Recommended methods of assessment include: * assignments * quiz of underpinning knowledge * simulation * workplace project. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Contamination** may include: | • excreta  
• hair  
• roll back  
• spillage. |
| **Equipment** may include: | • cleaver  
• hock cutter  
• knife. |
| **Communication skills** may include: | • listening and understanding  
• sharing information  
• speaking clearly and directly  
• working with diverse individuals and groups. |
| **Regulatory requirements** may include: | • Export Control Act  
• relevant Australian Standards  
• relevant regulations  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state and territory regulations regarding meat processing. |
| **Workplace requirements** may include: | • enterprise-specific requirements  
• hygiene and sanitation requirements  
• OH&S requirements  
• Quality Assurance (QA) requirements |
### RANGE STATEMENT

- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

1.3. Neck is boned in accordance with work instructions.  
1.4. Neck is boned to maximise yield.  
1.5. *Occupational Health and Safety (OH&S)* requirements are identified and complied with. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- identify relevant anatomical structure of the neck and neck area
- identify neck meat to be recovered
- bone neck in accordance with work instructions to maximise yield
- comply with OH&S requirements
- work effectively as an individual and as part of a team
- apply relevant *workplace* and *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:
- techniques required to maximise yield
- potential sources of contamination and cross-contamination
- relevant workplace and regulatory requirements
- specific OH&S requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at chain speed and over a period of time.

### Context of, and specific resources for assessment

Assessment must be conducted in an operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffins
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Workplace requirements may include:**
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production
RANGE STATEMENT

- work instructions.

**Regulatory requirements** may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

2.2. Pelt is opened on the neck and brisket following OH&S requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate correct cutting lines
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant OH&S, regulatory and workplace requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- equipment sterilisation requirements
- general economic impact of nicked, soiled or damaged hide or pelt and scored meat
- relevant work instructions for opening the foreleg and the brisket area
- relevant OH&S, regulatory and workplace requirements
- general anatomy of carcase relevant to the task
### Evidence Guide

#### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under normal production conditions at the usual speed of production and according to workplace requirements.

#### Context of, and specific resources for assessment

Assessment must occur in an operating meat processing plant.

#### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

</table>
| 1. Open the hide or pelt | 1.1. Hide or pelt is opened in accordance with workplace requirements.  
1.2. Hide or pelt is opened in accordance with Occupational Health and Safety (OH&S) requirements. |
| 2. Clear the hide or pelt | 2.1. Hide or pelt is cleared from around both forelegs in accordance with workplace requirements.  
2.2. Hide or pelt is cleared from brisket area following OH&S requirements to avoid the risks of damage and contamination to the carcase. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- open hide in brisket area in accordance with work instruction
- use correct cutting lines
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant OH&S and regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:

- general economic impact of nicked, soiled or damaged hide or pelt and scored meat
- relevant work instructions for opening and clearing the brisket area
- relevant OH&S and regulatory requirements
- general anatomy of carcase relevant to the task
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated in an operating meat processing plant or facility at normal production speed. |

| Context of, and specific resources for assessment | Assessment must occur in a registered meat processing plant or facility. |

| Method of assessment | Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
RANGE STATEMENT

- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

*Contamination* may include:
- chain fall out
- contents of intestines
- dust
- excreta
- hair
- water.

*Communication skills* may include:
- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

*Regulatory requirements* may include:
- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- locate cutting lines for rumping
- complete rumping according to work instructions
- use correct cutting lines
- demonstrate effective knife skills
- follow workplace requirements for critical aspects
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory* and *workplace requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- OH&S requirements at all times
- economic impact of nicked, soiled or damaged hide and scored meat
- relevant work instructions
- relevant regulatory and workplace requirements
- general anatomy of carcase relevant to the task
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal production speed.

### Context of, and specific resources for assessment

Assessment must occur on a slaughter floor under normal operating conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

</table>
| 1. Clean and prepare equipment | 1.1. Equipment is cleaned and prepared according to workplace requirements.  
1.2. Routine maintenance and checks are performed according to work instructions. |
| 2. Position carcase | 2.1. Carcase is positioned and attached to pelt puller according to work instructions and Occupational Health and Safety (OH&S) requirements. |
| 3. Operate pelt puller | 3.1. Pelt puller is started and operated according to work instructions.  
3.2. OH&S requirements are identified and complied with.  
3.3. Operation of puller is monitored and damage to the carcase or pelts reported to the supervisor.  
3.4. Pelts are disposed of in accordance with work instructions.  
3.5. Work area is kept neat and tidy and clear of pelts. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- operate a pelt puller to workplace standards
- apply relevant OH&S and regulatory requirements
- report defective operation of puller clearly, accurately and promptly
- report malfunctions of puller or pelt removal not achieving workplace requirements
- apply relevant communication skills
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take corrective action as specified in work instructions

Required knowledge
- general operation of the puller
**REQUIRED SKILLS AND KNOWLEDGE**

- work instructions for the operation and routine maintenance of the pelt puller
- relevant OH&S and regulatory requirements
- emergency procedures relating to pelt puller and positioning of carcase
- potential for contamination and cross-contamination and the required corrective actions
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

## Context of, and specific resources for assessment

Assessment must be conducted in an operating processing plant.

## Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear

|                       | 3.5. Hide is lowered and disconnected from chain, where this forms part of work instructions. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- position carcase securely and safely, where part of work instructions
- comply with OH&S requirements
- operate a hide puller according to workplace requirements
- operate a hide puller to achieve a hide with good shape and consistency
- remove hide without damage to carcase
- use correct maintenance procedures for hide pulling equipment
- report defects when hides are not coming off cleanly to supervisor in accordance with workplace requirements
- apply relevant communication skills
- work effectively as an individual and as part of a team
REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- general operation of the puller
- work instructions
- potential for contamination and cross-contamination
- relevant regulatory requirements
- maintenance requirements for hide puller
- OH&S issues related to the operation of the hide puller
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

### Context of, and specific resources for assessment

Assessment must be conducted on an operating slaughter floor.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- open carcase and remove internal organs to workplace and regulatory requirements
- use secure *sealing procedures* to avoid fouling the carcase (where this forms part of work instruction)
- apply relevant OH&S requirements
- comply with OH&S requirements
- apply relevant *communication skills*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work with team members to ensure offal is presented correctly for inspection

**Required knowledge**

Knowledge of:

- procedures for safe and hygienic use of knife
- work instructions, including corrective action requirements
- relevant OH&S requirements
### REQUIRED SKILLS AND KNOWLEDGE

- Potential risks of contamination and cross-contamination of the carcase and the required steps for corrective action
- Relevant anatomy of the species, breed, sex and age of the animal being processed
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. |
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. |
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. |
| All assessment must be conducted against Australian meat industry standards and regulations. |

Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated at the normal rate of production. |

Context of, and specific resources for assessment

| Assessment must be conducted in a registered meat processing establishment. |

Method of assessment

| Recommended methods of assessment include: |
| - quiz of underpinning knowledge |
| - workplace demonstration |
| - workplace referee or third-party report of performance over time. |
| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Internal organs and tissues may be those associated with:

- glands
- nervous system
- renal system
- reproductive and digestive systems
- respiratory and circulatory systems.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- federal, state and territory regulations regarding meat processing.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
## RANGE STATEMENT

- lifting assistance
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### Sealing procedures may include:

- elastrator ring
- knot
- plastic clip
- string tie.

### Communication skills may include:

- listening and understanding
- speaking clearly and directly
- sharing information
- working with diverse individuals and groups.

MTMP3039D Eviscerate wild game field shot carcase

Modification History
June 2012: Unit title amended to properly reflect appropriate industry nomenclature. Edits for clarity and consistency.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to eviscerate a carcase that has been wild game shot and forwarded to a meatworks for processing. Such carcases may be required to have the pluck left in to enable meat inspection procedures to take place at the meatworks. |

Application of the Unit

| Application of the unit | This unit is applicable to workers in registered wild game processing plants and is not relevant to field harvesters. |

Required Skills and Knowledge

reoRREUReEed SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- use an air knife competently and safely in accordance with the work instructions for one work station in a meat processing operation
- perform basic maintenance of the knife
- report equipment faults to supervisor in accordance with workplace requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- apply the hygiene and sanitation requirements for that work station
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- basic operating principles of the air knife
- hygiene and sanitation requirements for that work station
- work instructions for a particular work station
- relevant regulatory requirements
- potential sources of contamination and ways of minimising it

</table>

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements** may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
### RANGE STATEMENT

| Communication skills may include: | • listening and understanding  
|                                  | • reading and interpreting workplace documentation  
|                                  | • speaking clearly and directly  
|                                  | • sharing information  
|                                  | • working with diverse individuals and groups. |

### Regulatory requirements may include:

| • Export Control Act  
| • hygiene and sanitation requirements  
| • relevant Australian Standards  
| • relevant regulations  
| • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
| • federal, state and territory regulations regarding meat processing. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- use correct cutting lines
- apply relevant OH&S and *regulatory requirements*
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:
- general economic impact of nicked, soiled or damaged hide/pelt and scored meat
- relevant work instructions for opening and clearing the foreleg and shoulder area
- relevant OH&S and regulatory requirements
- potential sources of contamination and cross-contamination
- ways of minimising contamination
- general anatomy of carcase relevant to the task

| 1. Trim carcase on retain rail | 1.1. Retain rail procedure is identified and explained.  
1.2. Defects that need trimming are identified under a meat inspector's supervision.  
1.3. Defects are trimmed in accordance with work instructions and meat inspector's direction.  
1.4. Defects are trimmed in accordance with hygiene and sanitation requirements.  
1.5. Defects are trimmed in accordance with Occupational Health and Safety (OH&S) requirements.  
1.6. Inspectors’ requests are satisfied and yield maximised when defects are trimmed.  
1.7. Trimmings are disposed of in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- trim defects on carcases (on retain rail) in accordance with meat inspector's or Quality Assurance (QA) officer's direction and work instructions
- demonstrate trim which meets regulatory requirements but maintains yield
- dispose of trim in accordance with work instructions
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- provide and accept feedback in order to improve performance from colleagues and meat inspectors

Required knowledge

Knowledge of:
- potential sources of contamination or cross-contamination
- retain rail procedures
REQUIRED SKILLS AND KNOWLEDGE

- relevant regulatory requirements
- types of defects which result in carcases being retained
## Evidence Guide

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when the chain is working at the normal rate of production.

### Context of, and specific resources for assessment

Assessment must be undertaken in an operating abattoir or game processing plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

<td>1.1. Specifications for cuts are determined using cut descriptions according to regulatory requirements, customer specifications and workplace requirements.</td>
</tr>
</tbody>
</table>
| 2. Bone leg | 2.1. Primal cuts are sliced and removed from leg according to work instructions and specifications.  
2.2. Primal lines are cut in compliance with regulatory requirements.  
2.3. Meat safety and quality hazards are handled according to workplace procedures.  
2.4. Primals are cut to maximise yield.  
2.5. Product is boned in accordance with Occupational Health and Safety (OH&S) requirements including the use of safe manual handling techniques and the safe and effective use of a knife. |
| 3. Identify and remove defects | 3.1. Defects are identified, removed and reported according to government regulations and workplace standards.  
3.2. Persistent defects are reported to supervisor in accordance with work instructions. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- bone out the legs according to specifications and work instructions
- check the accuracy of cutting lines
- identify contamination and take corrective action
- identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements
- identify finished primal cuts
- comply with OH&S requirements
- apply relevant communication skills
### REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- use *equipment* correctly
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

- dropped meat procedures
- OH&S requirements for boning *small stock*
- procedure for cuts required to maximise yields for a given carcase
- structure of the carcase and identify cutting lines
- work instruction for the removal of all primals to desired specifications
- workplace and customer specifications
- carcase defects and corrective actions to be taken
- sources of contamination and cross-contamination and the ways of minimising the contamination.
Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at a normal rate of production.

#### Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant or facility.

#### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Regulatory requirements** may include:
- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

**Specifications** may:
- be derived from
  - AUS-MEAT
  - customer requirements
  - workplace requirements
- and may relate to
  - muscle groups
  - standard primals.

**Workplace requirements** may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.
# RANGE STATEMENT

**Boning** systems or methods may include:
- mechanical de-boning
- quarter boning
- side boning
- table boning.

**Product** may include:
- chilled product
- hot boned product.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Defects** may include:
- abscesses
- bruising
- excreta
- ingesta
- pathological lesions
- product contamination.

**Communication skills** may include:
- listening and understanding
- reading and interpreting workplace documentation
- speaking clearly and directly
- sharing information
- working with diverse individuals and groups.

**Equipment** may include:
- bandsaws
- hooks

MTMP3054C Slice and trim leg - small stock

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to slice and trim relevant cuts of meat from small stock legs, including sheep, pigs, goats, game animals such as kangaroos, wallabies and other small stock processed for human consumption or pet meat. |

Application of the Unit

| Application of the unit | This unit is applicable to workers in boning rooms, food service operations, smallgoods plants, wholesale and retail operations. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A Sharpen knives |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. |
| Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

## EVIDENCE GUIDE

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Specifications may:
- include
  - cutting lines
  - fat depth
  - length and weight ranges
  - muscle groups.
- be derived from:
  - AUS-MEAT
  - customer requirements
  - fat trim depth
  - species
  - workplace requirements.

### Regulatory requirements may include:
- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

### Workplace requirements may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
### RANGE STATEMENT

- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication skills** may include:
- listening and understanding
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

**Small stock** may include:
- goats
- kangaroos
- pigs
- sheep.

| 2. Remove primal cuts from forequarter of carcase | 2.1. Primal cuts are removed from carcase according to workplace requirements and specifications.  
2.2. Primal lines are cut in compliance with regulatory requirements.  
2.3. Meat safety and quality hazards are dealt with according to workplace procedures.  
2.4. Primal cuts are removed from carcase according to *Occupational Health and Safety (OH&S) requirements* including safe manual handling techniques and safe effective use of a knife.  
2.5. Primals are cut from a carcase using a technique that maximises yield. |
| 3. Identify, remove and trim defects | 3.1. Defects and contamination are identified and dealt with according to workplace requirements.  
3.2. Persistent defects in carcases are reported to a supervisor in accordance with work instructions. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- demonstrate the procedure for boning large stock carcase forequarter primal cuts in accordance with workplace requirements
- bone *product* in safe and hygienic manner
- identify primals containing contamination or *abnormalities* and handle according to workplace and regulatory requirements
- maintain the accuracy of cutting lines
- use *equipment* correctly
- apply relevant *communication skills*
### REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

- personal hygiene, dropped meat and OH&S procedures
- primal cutting lines as they relate to the structure of the *large stock* carcase
- regulatory, workplace and meat safety procedures and specifications
- *boning procedure* for cuts that is required to maximise yield for a given carcase
- procedure for removal of all forequarter primals to desired specifications
- carcase defects and the corrective action to be taken
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production for that plant.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered, operating meat processing plant or premises.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**REQUIRED SKILLS AND KNOWLEDGE**

- Regulatory requirements
- Carcase anatomy of *species* as it relates to cutting lines
- How yield is calculated and why it is important
- Personal hygiene and sanitation, and dropped meat procedures
- Nature of defects that can occur on forequarters and the corrective action required for each
- OH&S requirements for slicing
- Product slicing and trimming requirements as identified in customer and workplace specifications
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production for that plant.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered, operating meat processing plant or premises.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may:

- include
  - age
  - chemical lean
  - cutting lines
  - fat depth
  - gender
  - muscle groups
  - weight and/or length ranges
- and be derived from:
  - AUS-MEAT
  - customer requirements
  - species
  - workplace requirements.

Regulatory requirements may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

Workplace requirements may

- enterprise-specific requirements
- OH&S requirements
### RANGE STATEMENT

**include:**
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication skills** may include:
- listening and understanding
- reading and interpreting workplace documentation
- speaking clearly and directly
- sharing information
- working with diverse individuals and groups.

**Species** may include:
- beef
- horse
- buffalo
- any other large species processed for human consumption.

MTMP3058C Slice and trim large stock hindquarter

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to slice and trim hindquarter cuts to specification, from large carcases, such as beef, horse and buffalo. |

Application of the Unit

| Application of the unit | This unit is applicable to workers in boning rooms, food services, smallgoods plants, wholesale and retail operations. The unit may be used for a variety of species including cattle, buffalo, deer and horses. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A | Sharpen knives |
## Employability Skills Information

| Employability skills | This unit contains employability skills. |

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

| 2. Slice and trim hindquarter primary meat cuts into finished meat cuts | 2.1. Hindquarter primary meat cuts are sliced into finished meat cuts according to work instructions and specifications.  
2.2. Dropped meat procedures are followed in accordance with workplace requirements.  
2.3. Occupational Health and Safety (OH&S) requirements are met, including safe knife and manual handling techniques. |
| 3. Monitor defects and contamination | 3.1. Defects are identified and corrective action is taken according to work instructions.  
3.2. Persistent defects are reported to supervisor in accordance with work instructions. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- slice and trim all hindquarter primals to work instructions including those derived from the flank, the knuckle, the silverside, the rump and the tenderloin
- accurately follow cutting lines according to specifications
- apply relevant communication skills
- work effectively as an individual and as part of a team
- recognise and explain mathematical information contained in specifications
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- primal or sub primal cutting lines as they relate to workplace specifications and
**REQUIRED SKILLS AND KNOWLEDGE**

- regulatory requirements
- personal hygiene and sanitation and dropped meat procedures
- relevant specifications for the slicing and trimming of all hindquarter primals prepared in the workplace

2.2. Carcase is split then shoulders, middles and legs are removed according to work instructions and specifications.  
2.3. Carcase is split in accordance with Occupational Health and Safety (OH&S) requirements including the use of safe manual handling techniques and the safe use of a bandsaw. |
| 3. Identify and remove defects | 3.1. Defects and contamination are trimmed and dealt with according to workplace requirements.  
3.2. Persistent defects are reported to supervisors in accordance with work instructions. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- break a carcass using a bandsaw according to work instructions and specifications for one or more species
- check and adjust the accuracy of cutting lines
- use correct techniques for handling hot and/or chilled product
- identify primals containing a contamination or abnormalities and handle according to workplace and regulatory requirements
- apply relevant communication skills
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- cutting lines as they relate to the structure of the carcase
- dropped meat procedures
- how yield is calculated and why it is important
- procedure for removal of all primals to desired specifications
- work instructions for breaking a carcase in the workplace
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production for that plant.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered, operating meat processing plant or premises.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

MTMP3062B Bone small stock carcase - shoulder

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to remove primal cuts from the shoulder of a small stock carcase. Species that are covered by this unit include sheep, goats, pigs, kangaroos and any other small stock species processed. |

Application of the Unit

| Application of the unit | This unit is applicable to those boning small stock shoulders. Workers will be employed in boning rooms, food services, wholesale and retail operations. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A | Sharpen knives |
### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

</tr>
</tbody>
</table>
| 2. Bone shoulder | 2.1. Primal cuts are sliced and removed from the carcase according to work instructions and specifications.  
2.2. Primal cuts are sliced and removed from the carcase according to Occupational Health and Safety (*OH&S*) *requirements* including the safe and effective use of a knife and following safe manual handling techniques.  
2.3. Primal lines are cut in compliance with *regulatory requirements*.  
2.4. Meat safety and quality hazards are handled according to workplace procedures.  
2.5. Primals are cut to maximise yield. |
| 3. Identify and remove defects | 3.1. *Defects* are identified, removed and reported according to government regulations and workplace standards.  
3.2. Persistent defects are reported to supervisor in accordance with work instructions. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- operate *equipment* in accordance with workplace requirements
- check and correct, where necessary, the accuracy of cutting lines
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**
### REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- structure of the carcase and identify primal cutting lines
- procedure for removal of all primals to desired specifications
- sources of contamination and cross-contamination and the ways of minimising it
- importance of and technique required to maximise yield from a carcase
- work instructions and dropped meat procedures
- carcase defects and appropriate corrective actions
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in an operating meat processing plant or facility at normal production speed.

### Context of, and specific resources for assessment

Assessment must occur in a registered meat processing plant or facility.

### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Specifications* may:
- be derived from
  - AUS-MEAT
  - customer requirements
  - workplace requirements
- and relate to:
  - age
  - gender
  - muscle groups
  - species
  - standard primals.

*Workplace requirements* may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

*Boning* systems or methods may include:
- mechanical de-boning
- side boning
- table boning.

*OH&S requirements* may include:
- enterprise OH&S policies, procedures and programs
**RANGE STATEMENT**

- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

**Defects** may include:

- abscesses
- bruising
- ingesta
- pathological lesions
- product contamination.

**Equipment** may include:

- bandsaw
- bone cutters
- hooks
- knives
- pouches
- rise and fall platforms
- stands
- tables.
### RANGE STATEMENT

**Communication skills** may include:

- listening and understanding
- reading and interpreting workplace-related documentation
- speaking clearly and directly
- sharing information
- working with diverse individuals and groups.

MTMP3066B Bone carcase using mechanical aids (large stock)

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to remove all the primal cuts from a large stock carcase including those from beef, horse and buffalo while utilising mechanical aids |

Application of the Unit

| Application of the unit | This unit is applicable to workers in boning rooms, food service operations, smallgoods plants, wholesale and retail operations where a mechanical assisted boning system is utilised. |

Licensing/Regulatory Information

</table>
| 2. Remove primal cuts from the carcase | 2.1. Primal cuts are removed from carcase including those from the hindquarter and forequarter according to work instructions and specifications.  
2.2. *Product is boned* in accordance with Occupational Health and Safety (*OH&S*) requirements including those associated with the activation and use of mechanical aids, safe manual handling techniques, and the safe and effective use of a knife.  
2.3. Primal lines are cut in compliance with *regulatory requirements*.  
2.4. Meat safety and quality hazards are dealt with according to work instructions and workplace procedures.  
2.5. Primals are cut to maximise yield.  
2.6. Workplace requirements for the activation and use of mechanical aids are followed. |
| 3. Identify and remove defects | 3.1. Defects and *contamination* are trimmed and dealt with according to workplace requirements.  
3.2. Persistent defects are reported to supervisors in accordance with work instructions. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- confirm specifications including customer and workplace requirements
- demonstrate correct *equipment* set up, handling and basic maintenance requirements, where part of work instructions
- bone a carcase into a broad range of primal cuts from the forequarter and
REQUIRED SKILLS AND KNOWLEDGE

- hindquarter in accordance with workplace requirements
- use mechanical aids in the boning process in accordance with workplace requirements
- identify contamination and handle according to workplace requirements
- check and correct the accuracy of cutting lines
- comply with OH&S requirements
- apply relevant communication skills
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- structure of the carcase as it relates to cutting lines
- personal hygiene and dropped meat procedures
- primal cutting lines as they relate to the structure of the carcase
- primal specifications
- procedure for cuts required to maximise yield for a given carcase
- work instruction for the removal of all primals to desired specifications
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competence over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>

</tr>
</tbody>
</table>
| Method of assessment | Recommended methods of assessment include:  
  - quiz of underpinning knowledge  
  - workplace demonstration  
  - workplace referee or third-party report of performance over time.  
  Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Specifications** for cuts:

- relate to
  - muscle groups
  - standard primal
- and be derived from:
  - AUS-MEAT
  - customer requirements
  - species (including other large animals such as buffalo, deer and bison)
  - workplace requirements.

**Workplace requirements** may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Product** may include:

- chilled product
- hot boned product.

**OH&S requirements** may include:

- OH&S legal requirements
-enterprise OH&S policies, procedures and programs
-Personal Protective Equipment (PPE) which may include:
  - coats and aprons
**RANGE STATEMENT**

- ear plugs or muffs
- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

*Regulatory requirements* may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

*Contamination* may include:
- abscesses
- bruising
- ingesta
- pathological lesions
- product contamination.

*Equipment* may include:
- bandsaw
- bone cutters
- hooks
- knives
- pouches
- rise and fall platforms
- stands
- tables.

*Communication skills* may include
- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related

MTMP3071C Perform ante-mortem inspection and make disposition

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to detect abnormalities and diseases in the major livestock species (cattle, sheep and pigs) prior to slaughter. This unit will be assessed for the species for which competency is demonstrated in the workplace and the outcome and the species will be recorded appropriately on the assessment sheet. (Note: Poultry, game and ratites are covered by separate units). |

Application of the Unit

| Application of the unit | This unit is applicable to meat inspectors and/or stock handlers responsible for ante-mortem inspection. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMP3003A | Handle animals humanely while conducting ante-mortem inspection |
### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify types of stock and market requirements of food animals commonly slaughtered for meat | 1.1. Major breeds of commonly slaughtered domestic animals are identified.  
1.2. Distinguishing features of major breeds are identified.  
1.3. Market requirements of commonly slaughtered domestic animals are identified. |
| 2. Identify the main reasons for ante-mortem inspection | 2.1. Reasons for ante-mortem inspection are identified.  
2.2. *Regulatory requirements* associated with ante-mortem inspection are identified. |
| 3. Perform ante-mortem inspection on live animals | 3.1. Procedures and principles of humane handling of animals are identified.  
3.2. Signs of common conditions responsible for abnormalities at ante-mortem are detected and identified.  
3.3. Procedures for emergency and suspect slaughter are identified.  
3.4. Ante-mortem inspection is performed on at least one species according to relevant Occupational Health and Safety (*OH&S*), workplace and regulatory requirements.  
3.5. Quality Assurance aspects of ante-mortem inspection are identified. |
| 4. Identify and isolate animals requiring testing for residue | 4.1. Reasons for residue testing are identified.  
4.2. Procedures for identifying and isolating animals for testing are followed. |
| 5. Make *disposition* as a result of inspection and take appropriate action | 5.1. Common diseases and conditions responsible for abnormalities are identified, detected and documented on at least one species  
5.2. Suspect stock are segregated according to regulatory and workplace requirements  
5.3. Signs of major exotic or notifiable *diseases* are identified.  
5.4. Exotic or notifiable disease procedures are followed in accordance with regulatory requirements. |

## Required Skills and Knowledge
### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**
- estimate size of stock pens
- estimate number of cattle in a mob
- identify animals using brand, tags, tattoos and electronic identification devices
- identify common diseases and conditions in beef, sheep and pigs
- describe appropriate dispositions for common diseases and conditions in beef, sheep and pigs
- identify major exotic or notifiable diseases
- demonstrate procedures for humane handling of livestock
- perform ante-mortem inspection to Australian Standards and other relevant regulatory requirements on at least one major domestic food species in a workplace environment under normal operating conditions
- identify suspect animals that may be suffering from a notifiable disease on ante-mortem examination according to Australian Standards
- make disposition according to workplace and regulatory requirements
- **report** notifiable diseases promptly and accurately according to regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- apply relevant **communication skills**
- work effectively as an individual and as part of a team
- perform tasks to workplace requirements
- work cooperatively with company stock handlers to ensure smooth flow of stock

#### Required knowledge

**Knowledge of:**
- regulatory requirements for suspect stock, hygiene and sanitation standards, and workplace standards associated with ante-mortem inspection
- segregation requirements for suspect animals
- sources of information to keep up-to-date with current theories or findings
- steps and procedures for emergency and suspect kill
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of major exotic or notifiable diseases (including Ovine Johne's Disease (OJD))
- principles and procedures for humane handling of livestock
- regulatory requirements associated with exotic or notifiable diseases
- steps to be taken to notify of suspect exotic or notifiable disease
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in the practical aspects of this unit must be assessed under normal production conditions.

Candidates must be able to:

- perform ante-mortem inspection on at least one species.

The identification of diseases and conditions in other species can be undertaken in a simulated situation utilising samples and photographs.

## Context of, and specific resources for assessment

Assessment must include demonstration of competency in an operating abattoir. Assessment of the diagnosis of the less common conditions can be undertaken by simulation.

## Method of assessment

Recommended methods of assessment include:

- assignments
EVIDENCE GUIDE

- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment
A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Regulatory requirements may include:
- Export Control Act
- relevant Australian Standards
- relevant regulations
- state regulations regarding meat processing.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
RANGE STATEMENT

- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Workplace** requirements may include:
  - enterprise-specific requirements
  - OH&S requirements
  - hygiene and sanitation requirements
  - QA requirements
  - Standard Operating Procedures (SOPs)
  - the ability to perform the task to production requirements
  - work instructions.

**Dispositions** may be made:
  - in prescribed formats, according to regulatory requirements.

**Diseases** detected at ante-mortem inspection include:
  - exotic or notifiable diseases.

**Reports** may:
  - be in diagrammatic, sketch, tabular or graphic formats
  - be presented in writing, in standard formats
  - be presented orally
  - include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.

**Communication skills** may include:
  - applying numeracy skills to workplace requirements
  - being appropriately assertive
RANGE STATEMENT

- interpreting needs of internal and/or external customers
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- using negotiation and persuasion skills
- working with diverse individuals and groups
- writing to audience needs.

## EVIDENCE GUIDE

- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Regulatory requirements may include:**

- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.
### Range Statement

| **Hygiene and sanitation requirements** may include: | • relevant government regulations  
| | • workplace requirements.  
| **OH&S requirements** may include: | • enterprise OH&S policies, procedures and programs  
| | • OH&S legal requirements  
| | • Personal Protective Equipment (PPE) which may include:  
| | • coat and apron  
| | • ear plugs or muffs  
| | • eye and facial protection  
| | • head-wear  
| | • lifting assistance  
| | • mesh apron  
| | • protective boot covers  
| | • protective hand and arm covering  
| | • protective head and hair covering  
| | • uniforms  
| | • waterproof clothing  
| | • work, safety or waterproof footwear  
| | • requirements set out in standards, codes of practice etc.  
| **Dispositions** may be made: | • in prescribed formats, according to regulatory requirements.  
| **Common diseases** may include: | • a range of common as well as exotic or notifiable diseases.  
| **Workplace requirements** may include: | • enterprise-specific requirements  
| | • OH&S requirements  
| | • QA requirements  
| | • Standard Operating Procedures (SOPs)  
| | • the ability to perform the task to production requirements  
| | • work instructions.  
| **Specimen collecting tools and equipment may include:** | • cutting board  
| | • forceps  
| | • plastic bags  
| | • polystyrene boxes  
| | • preservatives  
| | • scalpel or surgical knife  
| | • specimen advice sheet |

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify microbiological hazards for meat and meat safety | 1.1. Types of micro-organisms (e.g. bacteria, virus, yeast and mould) are identified.  
1.2. Major microbiological threats to meat (i.e. bacteria and relevant yeasts or moulds) are identified and assessed to determine the risk level and control requirements.  
1.3. Types of bacteria causing food poisoning and meat spoilage are identified.  
1.4. Effects of bacterial contamination in relation to food poisoning (i.e. impact on people) and food spoilage (i.e. shelf life) are identified.  
1.5. Sources of bacterial contamination are identified.  
1.6. Growth characteristics and requirements of bacteria are identified.  
1.7. Critical Control Points (CCP) and control points for prevention and control of bacterial contamination are identified.  
1.8. Control methods required to prevent or reduce microbiological hazards are determined and implemented.  
1.9. Customer and regulatory requirements for microbiological contamination levels are identified.  
1.10. Relevant microbiological tests are identified and test results are assessed. |
| 2. Identify chemical hazards for meat and meat safety | 2.1. Chemical hazards which may affect meat are identified.  
2.2. Common sources of chemical hazards or contamination are identified (e.g. cleaning chemicals and drug residues) are assessed to determine the risk level and control requirements.  
2.3. Control methods which prevent or reduce chemical contamination to acceptable levels including national programs (e.g. residue testing) are determined and implemented.  
2.4. Effects of chemical residues on meat (e.g. poisoning, tainting, and rejections) are explained.  
2.5. Chemical residue testing programs and level requirements are identified. |
<p>| 3. Identify physical hazards on meat and | 3.1. Physical hazards which may affect meat are explained. |</p>
<table>

</tr>
</thead>
</table>
| meat products | 3.2. Common sources of physical hazards and/or contamination are identified and assessed to determine the risk level and control requirements.  
3.3. Control methods to prevent contamination reaching an unacceptable level are determined and implemented.  
3.4. Effects of physical hazards on meat are explained. |
| 4. Calibrate thermometers | 4.1. Thermometers are calibrated according to regulatory requirements. |
| 5. Identify the components of a Hazard Analysis Critical Control Point (HACCP)-based QA program for meat processing plants | 5.1. Regulatory basis for compliance with a HACCP-based QA program is identified and explained.  
5.2. Steps in the development of a HACCP program are identified and explained.  
5.3. Nature and importance of work instructions or task descriptions and operating procedures are identified and workers are coached in their implications.  
5.4. Elements of a HACCP program are identified.  
5.5. Nature and importance of Good Manufacturing Practices (GMP) and pre-requisite programs are identified.  
5.6. Mechanisms for validation, monitoring and verification are identified and explained. |
| 6. Conduct pre-operational hygiene check | 6.1. Pre-operational checklists are identified.  
6.2. Corrective action procedures are identified and explained.  
6.3. Pre-operational hygiene check is conducted. |
| 7. Conduct microbiological test swabbing | 7.1. Appropriate microbiological testing regimes are identified.  
7.2. Swabbing for microbiological testing is performed according to workplace and regulatory requirements.  
7.3. Microbiological test results are assessed and where necessary appropriate corrective action is taken. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- conduct a pre-operational hygiene check
- complete reports as required by regulators or the enterprise
- identify and culture different types of micro-organisms
- identify and describe features of major types of micro-organisms affecting the meat industry
- identify and interpret relevant regulations and Australian Standards
- identify and utilise sources of information
- apply relevant communication and mathematical skills
- calibrate a thermometer
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others and in response to changed work practices or technology
- use relevant problem-solving skills

Required knowledge

Knowledge of:

- aerobic and anaerobic requirements of micro-organisms
- growth traits of different types of micro-organisms
- bacterial contamination testing programs used in abattoirs
- how bacterial contamination can be prevented
- how bacterial growth can be controlled
- how hazard risk assessment is undertaken
- effect each requirement has on microbial growth
- effects of incorrect removal of contamination
- effects on microbial growth of refrigeration, handling techniques etc
- effects on microbial growth of wet carcase surfaces
- impact of chemicals on meat and meat products
- importance of food chain security and the implications of a break down in control
- symptoms, effects and means of prevention of microbial infection contamination of meat
- major sources of physical contamination
- function of the elements of a HACCP-based QA system
- major chemical contamination control programs
- major sources of chemical contamination
- monitoring and control methods employed such as inspection and metal detectors
REQUIRED SKILLS AND KNOWLEDGE

- relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- elements of a HACCP-based QA program including hazard identification, control points, CCP, critical limits, control measures, preventative measures, GMP, pre-requisite programs, verification, monitoring, documentation and validation
- habitat of different types of micro-organisms and their ability to survive outside the host animal
- actions to prevent physical and chemical contamination of meat
- conditions under which food poisoning occurs
- symptoms of bacterial food poisoning
- steps to limit and remove contamination.
## Evidence Guide

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while complying with current HACCP and approved program regulations in an operating meat processing plant.

### Context of, and specific resources for assessment

Assessment must involve reference to an actual or simulated meat processing HACCP program.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulated demonstration
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and
EVIDENCE GUIDE

1.3. Products are monitored for defects according to the agreed criteria and classification.  
1.4. Carcases are scanned using the approved scanning lines.  
1.5. Defects are recorded accurately using the correct forms or electronic system.  
1.6. Immediate corrective action is implemented according to the Meat Hygiene Assessment (MHA) program’s requirements.  
1.7. Carcases are monitored according to the workplace requirements for hygiene and sanitation, and Occupational Health and Safety (OH&S). |

Required Skills and Knowledge

REQUICKED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- instigate corrective actions when appropriate
- monitor product for defects according to the MHA program
- calculate defect ratings
- record the monitoring results accurately
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge
### REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- how carcase monitoring is to be undertaken
- how defect ratings are detected
- hygiene and sanitation requirements when monitoring product
- OH&S requirements when monitoring product
- types of defects to be identified on carcase product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how the approved sample plan is implemented for product monitoring
- classification of defects
- purpose of an MHA program
- relevant regulatory and workplace requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while complying with:

- Australian Quarantine Inspection Service (AQIS) and/or state meat authority regulations
- company procedures.

### Context of, and specific resources for assessment

Assessment must take place in a meat processing plant under real working conditions.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulated demonstration
- workplace demonstration of skills
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- accurately gather monitoring data and calculate compliance ratings
- use weighting and cumulative scores to calculate compliance ratings
- identify when trigger points have been reached and corrective actions are to be implemented
- develop corrective actions
- liaise effectively with supervisors who are responsible for implementing corrective actions
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology

**Required knowledge**

Knowledge of:
- hygiene and OH&S requirements associated with process monitoring
### REQUIRED SKILLS AND KNOWLEDGE

- how the monitoring program is developed
- purpose and nature of work instructions and SOPs
- purpose of an MHA process monitoring program
- relevant OH&S, *regulatory* and workplace requirements.
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while actually complying with:

- Australian Quarantine Inspection Service (AQIS) and/or state meat authority regulations
- company procedures.

### Context of, and specific resources for assessment

Assessment must take place in a meat processing plant under real working conditions.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulated demonstration
- workplace demonstration of skills
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to
EVIDENCE GUIDE

| Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
**RANGE STATEMENT**

- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication skills** may include:

- applying numeracy skills to workplace requirements
- being appropriately assertive
- interpreting needs of internal or external customers
- listening and understanding
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- using negotiation or persuasion skills
- working with diverse individuals and groups
- writing to audience needs.

**Regulatory requirements** may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

MTMP3076B Perform boning room Meat Hygiene Assessment

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to perform quality control and Meat Hygiene Assessment (MHA) checks (or equivalent) on carton meat or offal for contamination or defects as part of a Quality Assurance (QA) program. It deals with the understanding and implementation of specifications, critical limits, tolerances and sampling programs. |

Application of the Unit

| Application of the unit | This unit is applicable to QA staff responsible for MHA and quality control checks on carton meat and offal. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Inspect samples of *carton meat* for defects | 1.1. Samples of product are taken from each line of product according to a pre-determined sampling plan.  
1.2. Sample is inspected for defects in accordance with *regulatory* and *workplace requirements* as established in a government approved Hazard Analysis Critical Control Point (HACCP) program.  
1.3. Defects are reported in accordance with workplace requirements. |
| 2. Assess samples against pre-determined defect tolerances | 2.1. Levels of defects are assessed against established tolerances.  
2.2. Samples outside tolerance are reported to supervisor and corrective action is taken.  
2.3. Sampling program is adhered to and results are recorded according to workplace requirements.  
2.4. Sampling area is kept clean and neat to avoid contamination between samples.  
2.5. Dropped meat procedures are identified and followed according to workplace requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- inspect, identify and record defects
- identify defects and explain the relevant critical limits and specifications
- interpret information including details of out of tolerance samples
- take corrective action if defect tolerances are exceeded
- follow re-inspection procedures to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology
### REQUIRED SKILLS AND KNOWLEDGE

#### Required knowledge

Knowledge of:

- defect tolerance
- procedures for reporting defects and samples outside tolerance
- sampling program and consequence of not following procedures
- relevant Occupational Health and Safety (OH&S) requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while complying with:
- Australian Quarantine Inspection Service (AQIS) and/or state meat authority regulations
- company procedures.

### Context of, and specific resources for assessment

Assessment must take place in a meat processing plant under real working conditions.

### Method of assessment

Recommended methods of assessment include:

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Carton meat may include:
- meat cuts
- offal

Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- federal, state and territory regulations regarding meat processing.

Workplace requirements may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Communication skills may include:
- applying numeracy skills to workplace requirements
### RANGE STATEMENT

- being appropriately assertive
- interpreting needs of internal or external customers
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- using negotiation or persuasion skills
- working with diverse individuals and groups
- writing to audience needs.

### Mathematical skills may:

- involve accurate recording of temperature, time, volume, weight and quantity in standard formats or proformas
- involve interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc
- involve use of calculators and computer software packages
- include operations involving percentages, comparisons and variations
- require reading and interpreting analogue and digital measures (e.g. clocks, scales, pressured gauges, thermometers, cash registers)
- relate to own work and work area problem-solving
- involve routine estimations and calculations using a range of specified formula and procedures.

### OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers

| 1. Monitor offal | 1.1. Samples are selected for assessment according to the approved sampling plan for sample size and frequency.  
1.2. Assessment is conducted utilising appropriate facilities, lighting and time.  
1.3. Assessment is conducted according to workplace requirements.  
1.4. Offal is monitored for defects according to agreed criteria and classification.  
1.5. Defects are recorded accurately using the correct forms or electronic system.  
1.6. Levels for triggering corrective actions are identified.  
1.7. Immediate corrective action is implemented according to the Meat Hygiene Assessment (MHA) program's requirements.  
1.8. Offal is monitored according to the workplace requirements for hygiene and sanitation, and Occupational Health and Safety (OH&S). |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- monitor product for defects according to the MHA program
- record the monitoring results accurately
- calculate defect ratings
- instigate corrective actions when appropriate
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from other or in response to changed work practices or technology
## REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:
- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- hygiene and sanitation requirements when monitoring product
- OH&S requirements when monitoring product
- types of defects to be identified in carcase, offal and carton product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how defect ratings are detected
- classification of defects
- purpose of an MHA program
- relevant regulatory requirements

| 3. Clean press and hood | 3.1. Press and hood are cleaned regularly in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- load and unload press to specifications
- test product samples to ensure pressed product meet specifications
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- basic operating principles of the press
- implications on product quality and productivity of incorrect press
- production problems and out-of-specification product and take corrective action
- relevant regulatory requirements
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production for that rendering plant.

## Context of, and specific resources for assessment

Assessment must be conducted in a registered, operating meat rendering plant.

## Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
## RANGE STATEMENT

| **Communication skills may include:** | - applying numeracy skills to workplace requirements  
- listening and understanding  
- reading and interpreting workplace documentation  
- sharing information  
- speaking clearly and directly. |
| **Regulatory requirements may include:** | - Export Control Act  
- relevant Australian Standards  
- relevant regulations

Required Skills and Knowledge

REQUARED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- conduct pre-start checks and maintenance procedures according to work instructions
- operate machinery according to workplace instructions
- produce a rendered product according to workplace requirements
- identify production problems and out-of-specification product and take corrective action
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
### REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- basic principles of wet rendering process
- operation and maintenance process
- need to change knives and plates daily and the replacement technique
- relevant regulatory requirements
- implications of not following manufacturer's instructions for operation and maintenance
- Quality Assurance (QA) requirements for rendered product
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

</table>
| 1. Control bacteria in rendered products | 1.1. Micro-organisms in meat meal are identified and their impact on quality is explained.  
1.2. Risk assessment and control measures for micro-organisms are carried out.  
1.3. Good housekeeping practices are implemented to minimise risk of contamination.  
1.4. Critical control points are identified and control measures implemented. |
| 2. Implement cleaning program for rendering plant | 2.1. Cleaning program for raw material processing areas is explained and implemented as per work instructions.  
2.2. Cleaning program for dry meal processing areas is explained and implemented as per work instructions.  
2.3. Occupational Health and Safety (OH&S) requirements are identified and met. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- implement cleaning program
- apply relevant regulatory and workplace requirements
- identify production problems and out-of-specification product and take corrective action
- apply relevant communication skills
- assess hygiene risks and take preventative action
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- cleaning program for rendering process
### REQUIRED SKILLS AND KNOWLEDGE

- relevant regulatory and workplace requirements
- critical control points for monitoring hygiene and sanitation of the process
- micro-organisms affecting meat meal and the control measures for these

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over a period of time and at a relevant rate of production.

Context of, and specific resources for assessment

Assessment must be conducted using meat and the meat must be prepared to a specification.

Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 5008-2001/Amdt

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Apply the MSA system | 1.1. Consumer preferences for eating quality traits are identified.  
1.2. *Factors impacting on eating quality* are identified.  
1.3. The role that DNA samples have in the MSA system is identified and explained. |
| 2. Grade beef carcasses to MSA standards | 2.1. Grade codes are accurately identified and allocated.  
2.2. Boning room group of a carcase is identified.  
2.3. Maturity, MSA *marbling*, hump height, *fat distribution* and *hide puller damage* are assessed to MSA standards.  
2.4. *Equipment* used for measuring ultimate *pH* is calibrated, maintained and operated, and calibration results are recorded.  
2.5. Ultimate *pH* is measured.  
2.6. *Hanging method* is identified.  
2.7. DNA samples are collected, stored and despatched according to MSA standards.  
2.8. *MSA graded carcase product* is identified  
2.9. AUS-MEAT chiller assessment measurements of the carcase to be graded are recorded. |
| 3. Operate MSA software and hardware to record grading details and generate eating quality outcomes | 3.1. MSA software and hardware are accessed and operated.  
3.2. Data is entered, stored, sorted, retrieved, checked and validated, interpreted and forwarded.  
3.3. Grading reports and labels are generated. |
| 4. Complete the MSA vendor declaration system | 4.1. Essential information on a vendor declaration is identified.  
4.2. Vendor declaration is signed.  
4.3. *Data Capture Unit (DCU)* defaults are activated in accordance with the vendor declaration.  
4.4. Records of MSA vendor declarations are stored in accordance with MSA requirements. |
| 5. Stamp, ticket or label MSA graded carcase product | 5.1. System for identifying graded product is identified.  
5.2. Slaughter floor ticket information is applied.  
5.3. Stamping of product is completed. |
| 6. Adhere to the MSA Standards Manual | 6.1. All aspects of *MSA grading* are completed in accordance with the Standards Manual and Licensing |
### ELEMENT

for Grading

### PERFORMANCE CRITERIA

- requirements.
- 6.2. Carcase is graded according to the MSA system.
- 6.3. Grading problems are identified and resolved.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:

- demonstrate proficiency with all aspects of the DCU system
- demonstrate proficiency with all aspects of the MSA model
- describe all carcase attributes that are collected
- apply relevant communication and **problem-solving skills**
- apply relevant Occupational Health and Safety (OH&S), regulatory and workplace **requirements**
- maintain currency of knowledge through independent research or professional development
- apply all MSA grading reports
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively as an individual and as a member of a team

#### Required knowledge

Knowledge of:

- requirements of the MSA Standards Manual for Grading
- carcase hanging methods and their impact on eating quality
- fat distribution
- hump height and tropical breed content
- marbling
- **ossification**
- conventions of using **ZIP files**
- hide puller damage
- **essential operating conditions** for use of the MSA system, including the equipment required for grading
- importance of the DNA system to the integrity of the MSA program

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency is to be assessed in the workplace. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

### Context of, and specific resources for assessment

Competency must be demonstrated in the grading of actual carcases, and not simulated.

### Method of assessment

Assessors will need to visit the applicant's workplace on at least one occasion. Recommended methods of assessment include:

- evidence log book
- examination of assessed product
- observation of the applicant working
- written tests and/or questioning.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

**Guidance information for assessment**

The trainer and assessor must have the following qualifications:

- Statement of Attainment in MTMP3095A Grade beef carcases using Meat Standards Australia Standards or Module 6 MSA Grading
- successful completion of the AUS-MEAT chiller assessment course
- successful completion of Overview of meat science relating to the eating qualities of beef, Apply meat science to eating quality, or Module 9 MSA Meat Science.

Trainers and assessors must also demonstrate AUS-MEAT chiller assessment and MSA grading currency.

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Usage of MSA system may include:**

- backing up data
- data validation
- ensuring currency through regular updating
- explaining MSA Producer Codes
- sending files and receiving updates
- updating through the MSA web site.

**Factors impacting on eating**

- carcase weight

**Hanging method** includes:

• Achilles tendon and tenderstretch through the aitch bone or through the iliosacral ligament

• advantages and disadvantages of tenderstretch

• the relationship between hanging method and eating quality.

**pH** includes:

• describing the relationship between ultimate pH and rate of pH decline

• how to check battery power and change the date and time on a pH meter

• identifying the pH/temperature window and the impact of missing the window on eating quality

• the necessary factors needed to record calibration results

• the relationship between glycogen, stress and pH

• the relationship between pH and eating quality

• the required intervals for calibration of both pH and temperature probes.

**MSA graded carcase product** may include:

• approved primals or portions from MSA carcases that were graded in accordance with the MSA Standards Manual for Grading.

**DCU** system familiarity may include:

• changing tag types

• changing time and date on DCU

• current DCU program file and the process used to load this program

• DCU defaults and their link to impact on grading results or MSA requirements

• DCU fields

• DCU operation and maintenance

• different DCU files

• different types of DCU files

• entering grading data

• grader codes and pin numbers for individuals

• identifying and utilising DCU function keys

• instances when it is necessary to load a DCU
RANGE STATEMENT

| program file | • naming and downloading DNL files

|                                            | • requirements for the livestock receival or lairage of licensed enterprises  
|                                            | • requirements for the loadout of licensed enterprises  
|                                            | • requirements for the pH or temperature relationship of licensed enterprises  
|                                            | • requirements for the slaughter floor of licensed premises.  

Knowledge and application of MSA grading requirements must include:

| Grade Codes and why they are used | • MSA butcher bodies and why they require labels  
| MSA Grade Codes and their respective criteria | • MSA mandatory feedback requirements  
| Quinns butcher bodies | • the information that must be contained on MSA carton labels  
| the two options for generating carton labels.  

MSA model requirements include:

| MSA Standards Manual for Grading  
| MSA Standards Manual for Saleyards Consignment  
| MSA Standards Manual for MSA Trade Mark Usage.  

Communication skills may include:

| • applying numeracy skills to workplace requirements  
| • interpreting the needs of internal or external
## RANGE STATEMENT

| **customers** | - listening and understanding  
|              | - reading and interpreting workplace-related documentation  
|              | - sharing information  
|              | - speaking clearly and directly  
|              | - writing to audience needs.  

### Problem-solving skills may involve

| developing practical and creative solutions to workplace problems  
| identifying opportunities and solutions that might not be obvious to others  
| solving problems individually or in teams  
| using numeracy skills to solve problems.  

### OH&S requirements may include:

| enterprise OH&S policies, procedures and programs  
| OH&S legal requirements  
| Personal Protective Equipment (PPE) which may include:  
| - coats and aprons  
| - ear plugs or muffs  
| - eye and facial protection  
| - head-wear  
| - lifting assistance  
| - mesh aprons  
| - protective boot covers  
| - protective hand and arm covering  
| - protective head and hair covering  
| - uniforms  
| - waterproof clothing  
| - work, safety or waterproof footwear.  
| requirements set out in standards and codes of practice.  

### Regulatory requirements may include:

| Export Control Act  
| relevant regulations and Australian Standards  
| federal, state and territory regulations regarding meat processing.  

### RANGE STATEMENT

**Workplace requirements** may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Ossification** includes:

- frosting and its impact on ossification scores
- identifying the regions in which maturity is assessed
- MSA minimum requirements and measurement scale for ossification
- the MSA correlation standard for ossification
- the relationship between connective tissue, age and growth
- the relationship between maturity and eating quality.

**Usage of ZIP files** may include:

- backing-up files to server
- creating ZIP files
- checking data for errors and validating data
- explaining the difference between a ZIP file and a DNL file
- generating, interpreting and printing Butcher Body Labels and MSA Carton Labels
- generating, interpreting and printing MSA feedback reports
- logging onto MSA model and importing DNL file
- using naming conventions for a ZIP file
- sorting, filtering, finding a particular field, replacing and deleting data
- using the three different types of ZIP files
- understanding the purpose and potential applications of ZIP files
- updating plant, brand and producer codes for each lot
- viewing statistics for a number of options.

**Essential operating conditions** include:

- appropriate software and hardware
- carcases that have met AUS-MEAT pre-chiller assessment requirements.
### RANGE STATEMENT

- establishment must be MSA licensed
- grading equipment that is accurate and fully charged
- MSA and AUS-MEAT reference standards.

Knowledge of **MSA minimum requirements** must include:

- the MSA minimum requirement for AUS-MEAT meat colour
- the MSA minimum requirement for fat distribution and hide puller damage
- the MSA minimum requirement for ultimate pH
- the MSA minimum requirements for subcutaneous rib fat/p8 fat.

Minimum standards of performance include:

- currency in AUS-MEAT chiller assessment
- currency in MSA grading.

AgriFood Skills Australia
MTMP3099B Use standard product descriptions - sheep/goats

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to utilise a standardised product description language such as AUS-MEAT. |

Application of the Unit

| Application of the unit | This unit is designed to give workers in boning rooms an understanding of how a standardised product description system is used in a specific workplace. It can be used to improve the skills and knowledge of product description for packers, slicers and boners. |

|  | This unit does not have to be delivered as part of an AUS-MEAT Standards Officer course (language). However it does align with the AUS-MEAT Statement of Attainment for the Sheep Specification course. |

Licensing/Regulatory Information

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify anatomical features of a sheep or goat carcase | 1.1. Directions on a carcase using the anatomical direction format are described.  
1.2. Bones relevant to meat specifications in a sheep or goat skeleton are located and identified.  
1.3. Relevant glands and cartilage on a sheep or goat carcase are located and identified.  
1.4. Muscles relevant to sheep or goat specifications are located and identified. |
| 2. Identify and name meat products using the standard product description | 2.1. Nature and format of product specifications are explained.  
2.2. Meat products are correctly identified, named and spelt using the standardised cut description.  
2.3. Major muscles that make up each meat cut are identified.  
2.4. Correct cutting lines for each product are identified using the anatomical terms to describe cutting lines.  
2.5. Necessary changes required for any given meat product to comply with the company product description are identified. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- undertake measurements and checking against specification requirements
- identify non-conforming product in accordance with specifications
- apply relevant communication and problem-solving skills
- work effectively as an individual and as part of a team
- apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
### REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:

- product specification requirements
- corrective action procedures for non-conforming product
- relevant OH&S, regulatory and workplace requirements
- language specifications of sheep or goat product
- product specification points
- skeletal and anatomical structures and features of sheep or goat product to be specified
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

MTMP3101B Use standard product descriptions - pork

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to utilise a standardised product description language such as AUS-MEAT. |

Application of the Unit

| Application of the unit | This unit is designed to give workers in boning rooms an understanding of how a standardised product description system is used in a specific workplace. It can be used to improve the skills and knowledge of product descriptions for packers, slicers and boners. |
| | This unit does not have to be delivered as part of an AUS-MEAT Standards Officer course (language). However it does align with the AUS-MEAT Statement of Attainment for the Pork Specification course. |

| 1. Identify anatomical features of a pork carcase | 1.1. Directions on a carcase using the anatomical direction format are described.  
1.2. Bones relevant to meat specifications in a pork skeleton are located and identified.  
1.3. Relevant glands and cartilage on a pork carcase are located and identified.  
1.4. Muscles relevant to pork specifications are located and identified. |
| 2. Identify and name meat products using the standard product description | 2.1. Nature and format of product specifications are explained.  
2.2. Meat products are correctly identified, named and spelt using the standardised cut description.  
2.3. Major muscles that make up each meat cut are identified.  
2.4. Correct cutting lines for each product are identified using the anatomical terms to describe cutting lines.  
2.5. Necessary changes required for any given meat product to comply with the company product description are identified. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- apply relevant communication and problem-solving skills
- work effectively as an individual and as part of a team
- identify and apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- identify and explain language specifications on pork product label
- identify non-conforming product in accordance with specifications
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- undertake measurements and checking against specification requirements
### REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:
- product specification requirements
- corrective action procedures for non-conforming product
- product specification points
- skeletal and anatomical structures and features of pork product to be specified
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions.

### Method of assessment

Recommended methods of assessment include:

- completion of standard AUS-MEAT assessment
- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may include:
- approval system
- AUS-MEAT
- communication
- measurement
- technical accuracy.

Muscles may include cuts from:
- forequarter (major)
- hindquarter (major).

Pork products may include:
- muscle content
- points of specification
- product compliance
- product name.

Communication skills may include:
- applying numeracy skills to workplace requirements
- interpreting the needs of internal or external customers
- listening and understanding
- reading and interpreting workplace documentation
- speaking clearly and directly
- sharing information
- writing to audience needs.

Problem-solving skills may include:
- developing practical and creative solutions to workplace problems.
### RANGE STATEMENT

| involve: | • identifying opportunities and solutions that might not be obvious to others  
| | • solving problems individually or in teams  
| | • using numeracy skills to solve problems.  

| **OH&S requirements may include:** | • enterprise OH&S policies, procedures and programs  
| | • OH&S legal requirements  
| | • Personal Protective Equipment (PPE) which may include:  
| | • coats and aprons  
| | • ear plugs or muffs  
| | • eye and facial protection  
| | • head-wear  
| | • lifting assistance  
| | • mesh aprons  
| | • protective boot covers  
| | • protective hand and arm covering  
| | • protective head and hair covering  
| | • uniforms  
| | • waterproof clothing  
| | • work, safety or waterproof footwear  
| | • requirements set out in standards and codes of practice.  

| **Regulatory requirements may include:** | • Export Control Act  
| | • hygiene and sanitation requirements  
| | • relevant Australian Standards  
| | • relevant regulations  
| | • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
| | • federal, state and territory regulations regarding meat processing.  

| **Workplace requirements may include:** | • enterprise-specific requirements  
| | • OH&S requirements  
| | • Quality Assurance (QA) requirements  
| | • Standard Operating Procedures (SOPs)  
| | • the ability to perform the task to production requirements  
| | • work instructions.  

### RANGE STATEMENT

**Measurements and checking** may include:

- data collection
- frequency
- interpreting data
- monitoring sheets
- non-conforming product
- sample size
- taking measurements.

MTMP3102B Provide coaching

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to act as a coach to others in the workplace. |

Application of the Unit

| Application of the unit | Coaching is used when experienced personnel are teamed with new recruits or employees new to a position. The role of a coach is to provide advice, support and guidance as the employee learns new tasks and skills, and becomes familiar with the position and the working environment. In many companies, this is referred to as a 'buddy' system. Coaching or buddying is used throughout the meat industry. |

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**
### REQUIRED SKILLS AND KNOWLEDGE

**Ability to:**
- apply *communication skills* in giving, receiving and analysing feedback relevant to the process of coaching
- apply the organisation's policies, procedures and plans
- apply relevant *problem-solving skills*
- assist another individual to achieve their goals and development needs through the use of significant workplace knowledge
- create a learning environment that allows for open discussion, feedback, tolerance of mistakes during learning within a safe environment, and affirmation of the individual's worthiness
- work effectively as an individual and as part of a team
- demonstrate effective methods of coaching
- demonstrate effective planning skills to organise activities
- Identify and apply relevant Occupational Health and Safety (*OH&S*), regulatory and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate methods and techniques for eliciting and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

### Required knowledge

**Knowledge of:**
- effective learning styles and methods of coaching
- methods for identifying development opportunities
- enterprise's Standard Operating Procedures (SOPs), work instructions and relevant regulatory requirements, and apply them to the coaching process
- principles of coaching for development of competence

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Coaching may include:
- acquisition of specific business competencies
- progress with overall business development
- workplace relationships.

Coaching arrangements may include:
- amount of time involved for both parties
- confidentiality of information
- identification of development opportunities
- development plan towards achieving goals.

Relevant personnel may include:
- human resources manager
- OH&S personnel
- supervisor or training manager
- training or development officer
- other members of the organisation.

Changes in the coaching relationship may include:
- achievement of goals and decision to conclude the relationship
- change in the dynamic of the relationship
- identification of a need for assistance from others with different skills
- inability of one party to continue participation.

Feedback on performance may include:
- informal discussion
- obtaining feedback from supervisors or colleagues
- personal, reflective behaviour strategies
- routine organisational methods for appraising
### RANGE STATEMENT

| Communication skills may include: | • applying numeracy skills to workplace requirements  
| | • being appropriately assertive  
| | • empathising  
| | • interpreting the needs of internal or external customers  
| | • listening and understanding  
| | • providing constructive feedback

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.
# REQUIRED SKILLS AND KNOWLEDGE

## Required skills

Ability to:

- use effective planning skills to organise activities
- apply communication skills in giving, receiving and analysing feedback relevant to the process of mentoring
- apply relevant *problem-solving skills*
- assist another individual to achieve their goals and development needs using significant workplace knowledge and experience
- work effectively as an individual and as part of a team
- demonstrate effective methods of mentoring
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- demonstrate methods and techniques for eliciting and interpreting feedback
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

## Required knowledge

Knowledge of:

- methods for identifying development opportunities
- enterprise’s Standard Operating Procedures (SOPs), work instructions and relevant regulatory requirements, and apply them to the mentoring process
- principles of mentoring
- role and benefits of mentoring
- relevant *OH&S, regulatory* and *workplace requirements*
- methods and techniques for eliciting and interpreting feedback

| 1. Identify anatomical features of a kangaroo carcase | 1.1. Directions on a carcase using the anatomical direction format are described.  
1.2. Bones relevant to meat specifications in a kangaroo skeleton are located and identified.  
1.3. Relevant glands and cartilage on a kangaroo carcase are located and identified.  
1.4. Muscles relevant to kangaroo specifications are located and identified. |
| 2. Identify and name meat products using the standard product description | 2.1. Nature and format of product specifications are explained.  
2.2. Meat products are correctly identified, named and spelt using the standardised cut description.  
2.3. Major muscles that make up each meat cut are identified.  
2.4. Correct cutting lines for each product are identified using the anatomical terms to describe cutting lines.  
2.5. Necessary changes to any given meat product for it to comply with the company product description are identified. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- undertake measurements and checking against specification requirements
- identify non-conforming product in accordance with specifications
- apply relevant communication and problem-solving skills
- work effectively as an individual and as part of a team
- apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
**REQUIRED SKILLS AND KNOWLEDGE**

**Required knowledge**

Knowledge of:
- product specification requirements
- corrective action procedures for non-conforming product
- relevant OH&S, regulatory and workplace requirements
- language specifications for kangaroo products
- product specification points
- skeletal and anatomical structures and features of kangaroo product to be specified
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated applying the language to actual carcases and meat cuts.

## Context of, and specific resources for assessment

Competency must be assessed in an operating meat processing plant.

## Method of assessment

Recommended methods of assessment include:

- completion of standard AUS-MEAT assessment
- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may include:

- approval system
- communication
- measurement
- technical accuracy.

Muscles may include cuts from:

- forequarter (major)
- hindquarter (major).

Products may include:

- muscle content
- points of specification
- product compliance
- product name.

Measurements and checking may include:

- data collection
- frequency
- interpreting data
- monitoring sheets
- non-conforming product
- sample size
- taking measurements.

Communication skills may include:

- applying numeracy skills to workplace requirements
- interpreting the needs of internal or external customers
- listening and understanding
- reading and interpreting workplace
## RANGE STATEMENT

| Documentation | • speaking clearly and directly  
|              | • sharing information  
|              | • writing to audience needs. |

**Problem-solving skills** may involve:

| Problem-solving skills may involve: | • developing practical and creative solutions to workplace problems  
|                                       | • identifying opportunities and solutions that might not be obvious to others  
|                                       | • solving problems individually or in teams  
|                                       | • using numeracy skills. |

**OH&S requirements may include:**

| OH&S requirements may include: | • enterprise OH&S policies, procedures and programs  
|                               | • OH&S legal requirements  
|                               | • Personal Protective Equipment (PPE) which may include:  
|                               | • coats and aprons  
|                               | • ear plugs or muffls  
|                               | • eye and facial protection  
|                               | • head-wear  
|                               | • lifting assistance  
|                               | • mesh aprons  
|                               | • protective boot covers  
|                               | • protective hand and arm covering  
|                               | • protective head and hair covering  
|                               | • uniforms  
|                               | • waterproof clothing  
|                               | • work, safety or waterproof footwear  
|                               | • requirements set out in standards and codes of practice. |

**Regulatory requirements may include:**

| Regulatory requirements may include: | • Export Control Act  
|                                      | • hygiene and sanitation requirements  
|                                      | • relevant Australian Standards  
|                                      | • relevant regulations  
|                                      | • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
|                                      | • federal, state and territory regulations regarding meat processing. |

**Workplace requirements may**

| Workplace requirements may | • enterprise-specific requirements |
### RANGE STATEMENT

Include:

- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- The ability to perform the task to production requirements
- Work instructions.

MTMP3105A Follow and implement an established work plan

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available procedures and advice. Work plans may need to be modified with supervisor/team leader agreement to suit changing conditions and priorities. |

Application of the Unit

| Application of the unit | Team leaders and Quality Assurance (QA) Officers in the meat industry are required to implement a wide variety of work plans such as schedules, work instructions, customer orders and daily plans. They will be required to interpret, prioritise, communicate and implement plans in the context of a team environment. Work and tasks may be allocated through managers, supervisors, work schedules or plans. They may be individual tasks and jobs or team function work schedules. |

| 1. Identify work activities | 1.1. Identify team tasks.  
1.2. Identify work activities that are allocated to the individual.  
1.3. Prioritise work activities as directed. |
| 2. Organise daily work activities | 2.1. Break work activities down into small achievable components.  
2.2. Identify hazards and implement required controls.  
2.3. Identify regulatory and Occupational Health and Safety (OH&S) requirements.  
2.4. Identify relevant workplace requirements.  
2.5. Record activities. |
| 3. Follow work plan | 3.1. Locate relevant Standard Operating Procedures (SOPs) and work instructions.  
3.2. Undertake tasks in accordance with schedule/plan.  
3.3. Maintain output in accordance with schedule/plan.  
3.4. Follow prescribed and routine work related sequences. |
| 4. Modify work plan | 4.1. Identify changing needs/conditions.  
4.2. Identify the safety and production implications of changes.  
4.3. Seek assistance from relevant personnel when difficulties arise.  
4.4. Review tasks and priorities in line with changing needs/conditions with a change of instruction from appropriate personnel.  
4.5. Update work plan taking account of safety and production implications and communicate to appropriate personnel. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills
REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- use communication skills appropriate to the task, including reading, writing, numeracy, listening and speaking skills
- apply relevant problem-solving skills
- work effectively as an individual and as part of a team
- interpret and apply enterprise's standard operating procedures, work instructions and relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate methods and techniques for obtaining and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Required knowledge

Knowledge of:

- enterprise quality, operational and safety procedures
- regulatory requirements and customer specifications
- importance of workplace documentation
- routine work planning processes
- potential safety implications of modifying the work plan
- job outcomes, standards and priorities
- equipment and processes used in the workplace
- hazards associated with the process
- methods of controlling the hazards according to procedures
**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Consistent performance should be demonstrated. In particular assessors should check that:

- hazards are identified and controlled
- work schedules are interpreted and understood and instructions acted upon
- relevant procedures are followed
- resources and time are effectively and efficiently utilised
- potential disruptions or changed circumstances are recognised and work plans modified in conjunction with relevant personnel
- assistance is sought from relevant personnel when difficulties arise

**Context of and specific resources for assessment**

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Regulatory requirements may include:** | animal welfare |
| | award and enterprise agreements and relevant industrial instruments |
| | environmental and waste management |
| | Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment |
### RANGE STATEMENT

- Export Control Act
- relevant industry codes of practice
- relevant regulations
- federal, state and territory regulations regarding meat processing.

### OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) requirements set out in standards, company regulations, codes of practice etc.

### Workplace requirements may include:

- business and performance plans
- confidentiality and security requirements
- enterprise ethical standards, values and obligations
- enterprise-specific procedures, policies and plans
- goals, objectives, plant, systems and processes
- organisational policy and/or guidelines and requirements
- operation of company-specific software and databases
- OH&S policies, procedures and programs
- quality and continuous improvement processes and standards
- Quality Assurance (QA) and/or procedures manuals
- SOPs
- work instructions.

### Relevant personnel may include:

- Human Resources manager
- OH&S personnel
- supervisor or training manager
- training or development officer
- other members of the organisation.

Unit Descriptor

This Unit covers the skills and knowledge required to work with the mob based National Livestock Identification System (NLIS) for sheep and goats.

Application of the Unit

This Unit is applicable for those purchasing livestock, receiving and managing livestock in lairage, livestock clerks, Quality Assurance managers, slaughter floor supervisors, reader and NLIS terminal operators on the slaughter floor, meat authority staff and auditors.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Pre-Requisites

Not applicable.

Employability Skills Information

This Unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

</tr>
</thead>
</table>
| 1. Describe the history of the NLIS and its benefit to industry | 1.1 Explain why the industry has implemented an NLIS for sheep and goats.  
1.2 Explain the benefits of the NLIS to industry. |
| 2. Describe the nature and function of a Property Identification Code (PIC) | 2.1 Identify the component parts of a PIC.  
2.2 Explain the importance of the PIC to the NLIS. |
| 3. Describe and interpret the data contained on a National Vendor Declaration (NVD) | 3.1 Explain the purpose of an NVD.  
3.2 Explain the information contained on an NVD.  
3.3 Interpret the importance of the various details on the NVD for an abattoir.  
3.4 Identify the various mistakes that can be made by producers when completing NVDs.  
3.5 Describe the actions that have to be taken when NVDs are incomplete or incorrectly filled in.  
3.6 Describe the path of the NVD from producer to processor. |
| 4. Complete a review of an NVD as received by a meat processor | 4.1 Identify the important information on an NVD.  
4.2 Identify errors.  
4.3 Describe the corrective actions to be taken. |
| 5. Identify the various types of NLIS devices for sheep and goats | 5.1 Explain the purpose of an NLIS device and the information on it.  
5.2 Identify and explain the purpose of breeder and post-breeder tags. |
| 6. Identify the various NLIS regulations that apply to producers, saleyards and meat processors | 6.1 Identify and explain the role of the various bodies associated with the NLIS.  
6.2 Describe the NLIS regulatory obligations for slaughtering establishments.  
6.3 Describe the corrective action to be taken with untagged sheep.  
6.4 Describe the corrective action to be taken with untagged mobs. |
| 7. Describe the function of the kill sheet | 7.1 Explain the purpose of a kill sheet and who prepares it.  
7.2 Identify the various component parts of a kill sheet and the information contained in it.  
7.3 Explain the importance of following the kill sheet schedule and the importance of validating the kill sheet to the NLIS. |
| 8. Explain the role of Post-Sale Summaries | 8.1 Explain why PSSs are forwarded to abattoirs.  
8.2 Explain how PICs are confirmed by abattoirs with the NLIS |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- understanding of the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- the fundamental benefits of the NLIS to industry
- NLIS devices including ear tags and, where appropriate, Radio Frequency Identification Devices (RFIDs) and boluses
- NLIS regulatory requirements in relation to abattoirs
- the function NLIS devices
- the purpose of an NVD
- the information contained on an NVD
- the role of PSSs
- the function of the kill sheet
- the purpose and types of ear tags for sheep and goats
- purpose, nature of and regulations underpinning the use of PICs
- how to deal with problems originating from consignment PIC
- knowledge of status, abbreviations and what they mean, and the required actions to be taken in response.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this Unit

Assessment must confirm the ability to:

- describe the history of the NLIS and its benefit to industry
- describe the nature and function of a PIC
- describe and interpret the data contained on an NVD
- complete a review of an NVD as received by a meat processor
- identify the various types of NLIS devices for sheep and goats
- identify the various NLIS regulations that apply to producers, saleyards and meat processors
- describe the function of the kill sheet
- explain the role of PSSs.

Assessment must confirm knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- the fundamental benefits of the NLIS to industry
- NLIS devices including RFIDS and boluses, and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to
### MTIP3108A Overview of the NLIS for sheep and goats

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |
Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace health and safety risks**
when working with livestock may include:

- zoonotic diseases such as Q-Fever
- manual handling risks
- risk of injury from livestock
- risk of sunburn
- working from heights such as stock trucks and stockyards
- requirements to wear specified Personal Protective Equipment (PPE)
- being aware of and managing risks affecting co-workers
- risks associated with the use of electrical equipment.

Unit Descriptor

This Unit covers the skills and knowledge required to work with the National Livestock Identification System (NLIS), utilising data carried in a Radio Frequency Identification Device (RFID).

Application of the Unit

This Unit is applicable for those purchasing livestock, receiving and managing livestock in lairage, livestock clerks, Quality Assurance managers, slaughter floor supervisors, reader and NLIS terminal operators on the slaughter floor, meat authority staff and auditors.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Pre-Requisites

Not applicable.

Employability Skills Information

This Unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Describe the history of the NLIS and its benefit to industry</td>
<td>1.1 Explain why the industry has implemented an RFID based identification system.</td>
</tr>
<tr>
<td></td>
<td>1.2 Explain the benefits of the NLIS to industry.</td>
</tr>
<tr>
<td>2. Describe the nature and function of a Property Identification Code (PIC)</td>
<td>2.1 Identify the component parts of a PIC.</td>
</tr>
<tr>
<td></td>
<td>2.2 Explain the business rules for the use of a PIC.</td>
</tr>
<tr>
<td></td>
<td>2.2 Explain the importance of the PIC to the NLIS.</td>
</tr>
<tr>
<td>3. Describe and interpret the data contained on a National Vendor Declaration (NVD)</td>
<td>3.1 Explain the purpose of an NVD.</td>
</tr>
<tr>
<td></td>
<td>3.2 Explain the information contained on an NVD.</td>
</tr>
<tr>
<td></td>
<td>3.3 Interpret the importance of the various details on the NVD for an abattoir.</td>
</tr>
<tr>
<td></td>
<td>3.4 Identify the various mistakes that can be made by producers when completing NVDs.</td>
</tr>
<tr>
<td></td>
<td>3.5 Describe the actions that have to be taken when NVDs are incomplete or incorrectly filled in.</td>
</tr>
<tr>
<td></td>
<td>3.6 Describe the path of the NVD from producer to processor and the impact of incorrect information being recorded on the NVD.</td>
</tr>
<tr>
<td>4. Complete a review of an NVD as received by a meat processor</td>
<td>4.1 Identify the important information on an NVD.</td>
</tr>
<tr>
<td></td>
<td>4.2 Identify errors.</td>
</tr>
<tr>
<td></td>
<td>4.3 Describe the corrective actions to be taken.</td>
</tr>
<tr>
<td>5. Identify the various NLIS devices</td>
<td>5.1 Explain the purpose of an NLIS device and the information on it.</td>
</tr>
<tr>
<td></td>
<td>5.2 Describe the relationship between an RFID and an NLIS identification device.</td>
</tr>
<tr>
<td></td>
<td>5.3 Explain the difference between an RFID ear tag and bolus.</td>
</tr>
<tr>
<td></td>
<td>5.4 Identify the factors that can influence the readability of an NLIS device.</td>
</tr>
<tr>
<td>6. Identify the various NLIS regulations that apply to producers, saleyards and meat processors</td>
<td>6.1 Identify and explain the role of the key organisations associated with the NLIS.</td>
</tr>
<tr>
<td></td>
<td>6.2 Describe the NLIS regulatory obligations for producers, saleyards and slaughtering establishments.</td>
</tr>
<tr>
<td></td>
<td>6.3 Describe the corrective action to be taken with non-identified stock.</td>
</tr>
<tr>
<td></td>
<td>6.4 Describe the corrective action to be taken with non-reading devices.</td>
</tr>
<tr>
<td>7. Describe the function of the kill sheet</td>
<td>7.1 Explain the purpose of a kill sheet and who prepares it.</td>
</tr>
<tr>
<td></td>
<td>7.2 Identify the various component parts of a kill sheet and the</td>
</tr>
</tbody>
</table>
information contained in it.

7.3 Explain the importance of following the kill sheet schedule and the importance of validating the kill sheet to the NLIS data gathered.

7.4 Explain how untagged animals are dealt with prior to and during the slaughter process.

8. Explain the role of Post-Sale Summaries (PSSs)

8.1 Explain what data is contained in a pre-sale catalogue and why it is important.

8.2 Explain why PSSs are forwarded to abattoirs from saleyards.

8.3 Explain how and why PICs are confirmed by abattoirs with the NLIS database.
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- understanding of the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- purpose and benefits of the NLIS to industry
- NLIS data base and its management
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- purpose and types of NLIS tags for sheep and goats
- information printed on the NLIS cattle ear devices
- purpose, nature of and regulations underpinning the use of PICs
- how to deal with problems originating from consignment PIC
- purpose of an NVD
- information recorded on an NVD
- regulatory responsibilities of the various parties in the supply chain
- role of pre–sale catalogues and PSSs
- function of the kill sheet
- the function of post breeder tags
- knowledge of status, abbreviations and what they mean, and the required actions to be taken in response.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment                                                                 | The meat industry has specific and clear requirements for evidence. Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

Ability to:

- read and interpret a pre-sale catalogue or vendor declaration
- read and interpret an NVD and PSS
- use communication skills to interact with agents or transporters, raise and explain issues and problems
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or Property Identification Codes (PICs)
- use mathematical skills to verify stock arriving against number listed on NVD/PSS
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

Knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location.
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this Unit

Assessment must confirm the ability to:

- receive stock
- check NLIS devices
- communicate issues/matters arising to internal management.

Assessment must confirm knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including RFIDS and boluses, and their purpose and function in the NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location.

## Context of and specific resources for assessment

Assessment must be conducted in the workplace. Resources may include:

- enterprise work instructions
- Meat and Livestock Australia (MLA) NLIS assistance
- manufacturer's instructions.

### Method of assessment

The following assessment methods are suggested:
- workplace referee’s report
- knowledge test
- on-the-job demonstration with assessor observation.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

### Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Issues/matters arising may include:

- lost tags
- multiple tags.

#### Workplace health and safety risks when working with livestock may include:

- zoonotic diseases such as Q-Fever
- manual handling risks
- risk of injury from livestock
- risk of sunburn
- working from heights such as stock trucks and stockyards
- requirements to wear specified Personal Protective Equipment (PPE)
- being aware of and managing risks affecting co-workers
- risks associated with the use of electrical equipment.

Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**
- read and interpret a National Vendor Declaration (NVD)
- read and interpret a Post Sale Summary (PSS)
- use communication skills to interact with agents, saleyards or transporters, raise and explain issues and problems
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**
- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- NLIS devices including ear tags, Radio Frequency Identification Devices (RFIDs) (where applicable) and their purpose and function in the NLIS for sheep and goats
- purpose, nature of and regulations underpinning the use of Property Identification Codes (PICs)
- how to deal with problems relating to consignment PICs
- role and responsibilities of regulators, and other bodies such as Meat and Livestock Australia (MLA) in relation to NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this Unit**

Assessment must confirm the ability to:
- receive sheep or goats
- check tags
- check relevant documentation
- communicate issues/matters arising to internal management.

Assessment must confirm knowledge of:
- NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including ear tags, RFIDs (where applicable) and their purpose and function in the NLIS for sheep and goats
- role and responsibilities of regulators, and other bodies such as MLA in relation to NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems relating to consignment
### Context of and specific resources for assessment

Assessment must be conducted in the workplace. Resources may include:
- enterprise work instructions
- Meat and Livestock Australia (MLA) NLIS assistance.

### Method of assessment

The following assessment methods are suggested:
- workplace referee’s report
- knowledge test
- on-the-job demonstration with assessor observation.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.
## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Issues/matters arising may include: | • untagged sheep  
• mixed mobs. |
|-----------------------------------|----------------------------------|
| **Workplace health and safety risks** when working with livestock may include: | • zoonotic diseases such as Q-Fever  
• manual handling risks  
• risk of injury from livestock  
• risk of sunburn

Unit Descriptor

The Unit covers the skills and knowledge required to manage the National Livestock Identification System (NLIS) responsibilities for stock identified with a Radio Frequency Identification Device (RFID) purchased directly from a producer or vendor prior to their arrival at an abattoir.

Application of the Unit

This Unit is applicable for those managing and identifying livestock fitted with RFIDs prior to their arrival at an abattoir.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Pre-Requisites

| MTMP3109A | Overview of the NLIS program utilising RFIDs |

Employability Skills Information

The Unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Confirm requirements with producer | 1.1 Ensure producer is made aware of all requirements when booking stock in.  
1.2 Ensure a completed National Vendor Declaration (NVD) is provided with the stock.  
1.3 Request additional/missing information as necessary. |
| 2. Validate the Property Identification Code (PIC) | 2.1 Ensure PIC listed on the NVD is valid by using a PIC validity checker, e.g. Quick PIC, NLIS Database.  
2.2 If invalid, contact producer to resolve and advise livestock staff. |
| 3. Schedule delivery | 3.1 Make delivery arrangements according to workplace requirements. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

Ability to:

- read and interpret an NVD
- use communication skills to interact with agents, raise and explain issues and problems
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or PICs
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

Knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including RFIDs and boluses, and their purpose and function in the NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems originating from consignment PIC.
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this Unit

Assessment must confirm the ability to:

- confirm requirements with producer
- validate the PIC
- schedule delivery.

Assessment must confirm knowledge of:

- NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including RFIDs and boluses, and their purpose and function in the NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems originating from consignment PIC.

### Context of and specific resources for assessment

Assessment must be conducted in the workplace. Resources may include:

- enterprise work instructions
- Meat and Livestock Australia (MLA) NLIS assistance
- manufacturer’s instructions.

**Method of assessment**

The following assessment methods are suggested:
- workplace referee’s report
- knowledge test
- on-the-job demonstration with assessor observation.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

**Range Statement**

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace health and safety risks**

when working with livestock may include:

- zoonotic diseases such as Q-Fever
- manual handling risks
- risk of injury from livestock
- risk of sunburn
- working from heights such as stock trucks and stockyards
- requirements to wear specified Personal Protective Equipment (PPE)
- being aware of and managing risks affecting co-workers
- risks associated with the use of electrical equipment.

| 1. Confirm requirements with producer | 1.1 Ensure producer is made aware of all requirements when booking in sheep or goats.  
1.2 Ensure the National Vendor Declaration (NVD) questions have been addressed where non-vendor bred stock are included in the mob.  
1.3 Request additional/missing information as necessary. |
| 2. Schedule delivery | 2.1 Make delivery arrangements according to workplace requirements. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- read and interpret vendor declaration
- read and interpret an NVD
- use communication skills to interact with agents, raise and explain issues and problems
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or Property Identification Codes (PICs)
- use mathematical skills to validate NVD data against actual stock numbers
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise **workplace health and safety risks** when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- the role and function of NVDS
- the importance of data contained on an NVD
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices role and responsibilities of producers, regulators, and other bodies such as Meat and Livestock Australia (MLA) in relation to NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location.
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this Unit

- Assessment must confirm the ability to:
  - confirm producer requirements
  - schedule delivery.

- Assessment must confirm knowledge of:
  - the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
  - NLIS regulatory requirements in relation to abattoirs
  - workplace procedures
  - the role of the NVD
  - the importance of the information recorded on the NVD
  - role and responsibilities of regulators, and other bodies such as MLA in relation to NLIS.

## Context of and specific resources for assessment

- Assessment must be conducted in the workplace.

- Resources may include:
  - enterprise work instructions
  - Meat and Livestock Australia (MLA) NLIS assistance
  - manufacturer's instructions.
Method of assessment
The following assessment methods are suggested:
• workplace referee’s report
• knowledge test
• on-the-job demonstration with assessor observation.

Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace health and safety risks when working with livestock may include:

- being aware of and managing risks affecting co-workers
- risks associated with the use of electrical equipment.

Unit Descriptor

This Unit covers the skills and knowledge required to manage the reporting of slaughter data for the mob based National Livestock Identification System (NLIS) data base.

Application of the Unit

This Unit applies to Quality Assurance managers or livestock clerks who are responsible for reconciling actual slaughter data with the shift kill sheet. The Unit also covers the uploading of data to the NLIS data base.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Pre-Requisites

| MTMP3108A | Overview of the NLIS for sheep and goats |

Employability Skills Information

The Unit contains employability skills.
## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Validate the kill sheet with slaughter floor staff | 1.1 Liaise with slaughter staff floor to correct kill sheet discrepancies such as out of sequence stock, emergency kills, non-identified stock or non-reading devices.  
1.2 Validate slaughter numbers prior to upload of NLIS data. |
| 2. Upload data to the NLIS database | 2.1 Access the NLIS database.  
2.2 Upload slaughter data via online entry or through file upload. |
| 3. Check NLIS data upload history | 3.1 Access the NLIS database.  
3.2 Ensure successful upload of data. |
| 4. Respond to upload errors | 4.1 Respond to emails from the NLIS database.  
4.2 View and respond to error reports.  
4.3 Resolve upload issues.  
4.4 Record and save resolution of errors.  
4.5 Implement, record and review corrective actions. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- reconcile difference between slaughter floor data and kill sheet
- use communication skills to interact with the NLIS database and slaughter floor staff
- use negotiation skills to resolve issues
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- sources of errors with NLIS data
- NLIS uploading procedures
- NLIS rules for responding to error emails
- data storage procedures
- status, abbreviations and what they mean, and the required actions to be taken in response.
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>

| 1. Implement start-up procedures | 1.1 Follow work and manufacturer’s instructions to start-up readers and NLIS data terminals.  
1.2 Check back up reader. |
| 2. Perform pre-operational checks | 2.1 Check operation of reader using test RFID.  
2.2 Check terminal is connected to RFID reader and server.  
2.3 Report issues promptly to relevant supervisors. |
| 3. Ensure testing and maintenance regimes | 3.1 Check routine testing and maintenance of readers is being performed. |
| 4. Perform basic troubleshooting on hardware and software | 4.1 Identify and isolate issue and check start-up procedures.  
4.2 Follow basic trouble shooting tests using workplace procedures and manufacturer’s instructions. |
| 5. Implement corrective action when hardware or software fails | 5.1 Inform all relevant staff when hardware or software fails.  
5.2 Implement fall-back plan including use of back-up readers and terminals.  
5.3 Instruct operators as to new arrangements. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- perform start-up operations for RFID readers and recorder
- undertake basic trouble-shooting operations
- use communication skills to interact with people; such as maintenance staff, equipment providers, supervisors and other operators to overcome operating problems
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks*
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- start up procedures on readers and NLIS data terminals
- pre-operational checks on readers and NLIS data terminals
- manufacturer’s instructions
- workplace procedures
- routine testing and maintenance requirements
- standard simple trouble shooting on software and hardware
- role and responsibilities of regulators, and other bodies such as MLA in relation to NLIS.

</tr>
</thead>
</table>
| 1. Start up readers and computer terminal | 1.1 Follow workplace requirements to start up RFID readers and terminals including procedures for boot-up, ensuring main frame connection and log-in.  
1.2 Troubleshoot any problems with start up.  
1.3 Obtain kill sheet.  
1.4 Ensure consumables are available (e.g. carcase tickets). |
| 2. Manage and monitor RFID reading process | 2.1 Ensure RFIDs are being read.  
2.2 Check mobs against the kill sheet to ensure stock is in order, the right numbers, and in the right consignment sequence.  
2.3 Interpret screens and messages.  
2.4 Diarise and resolve any issues rapidly.  
2.5 Immediately implement back-up system if main system appears to be failing or has failed.  
2.6 Liaise with kill floor supervisor and make corrections for mobs that are out of sequence.  
2.7 Maintain communication with on-floor staff. |
| 3. Take corrective actions when NLIS data is not read | 3.1 Respond to non-readers by implementing workplace procedures to manually capture NLIS data.  
3.2 Implement workplace procedures for missing RFIDs.  
3.3 Manage multiple NLIS devices by implementing workplace procedures.  
3.4 Deal with rumen boluses that do not read by implementing workplace procedures. |
| 4. Respond to a carcase with an Extended Residue Program (ERP) status | 4.1 Follow workplace procedures for dealing with a carcase with an ERP status alert.  
4.2 Report the status to slaughter floor supervisor.  
4.3 Implement company’s procedures for monitoring and managing stock with a status. |
| 5. Follow break and end of shift procedures | 5.1 Follow procedures for break and end of shift shut down. |
| 6. Validate shift slaughter details | 6.1 Liaise with the livestock clerk to validate the slaughter floor data.  
6.2 Note and explain any differences between the kill sheet and slaughter operations.  
6.3 Diarise problems and resolve discrepancies of the shift such as missed bodies and animals out of order. |
| 7. Implement workplace procedures to deal with | 7.1 Troubleshoot the problem.  
7.2 Implement corrective actions e.g. use wand reader if panel |
a software or hardware failure reader fails.
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- operate RFID readers and recorders
- check connection with terminal and server Monitor RFID reader
- read and interpret a kill sheet
- communicate clearly with supervisors, livestock clerks and slaughter floor operators
- generate reports
- perform simple trouble shooting on software and hardware
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks*
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the cattle NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- when and how tail tags are used
- start up procedures
- recognising and interpreting NLIS screens
- ERP status and responses
- corrective actions for non-readers, missing tags, out of order stock, multiple devices, boluses
- relevant work instructions and Standard Operating Procedures (SOPs)
- shut down procedures
- tailtag procedures.
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this Unit

Assessment must confirm the ability to:

- start up readers and computer terminal
- manage and monitor RFID reading process
- take corrective actions when NLIS data is not read
- respond to a carcase with an ERP status
- follow break and end of shift procedures
- validate shift slaughter details
- implement work place procedures to deal with a software or hardware failure.

Assessment must confirm knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including RFIDs and boluses, and their purpose and function in the cattle NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- when and how tail tags are used in place of RFIDs
- start up procedures
- recognising and interpreting NLIS screens
- ERP status and responses
- corrective actions for non-readers, missing tags, out of order stock, multiple devices, boluses
- relevant work instructions and Standard Operating Procedures (SOPs)
- shut down procedures
- tailtag procedures.

### Context of and specific resources for assessment

- Assessment must be conducted in the workplace.
- Resources may include:
  - enterprise work instructions
  - Meat and Livestock Australia (MLA) NLIS assistance and publications
  - manufacturer's instructions.

### Method of assessment

- The following assessment methods are suggested:
  - workplace referee’s report
  - knowledge test
  - on-the-job demonstration with assessor observation.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

- A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.
Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Extended Residue Program (ERP) status includes: | • the ERP program and status codes available in the report section of the processor database of the NLIS. |
| Workplace health and safety risks when working with livestock may include: | • zoonotic diseases such as Q-Fever |
| | • manual handling risks |
| | • risks associated with the use of electrical equipment. |

| 2. Prepare kill sheet | 2.1 Prepare kill sheet according to workplace requirements and livestock advice.  
2.2 Liaise with livestock staff to determine correct order for stock presentation to slaughter.  
2.3 Ensure relevant staff receive kill sheet in a timely manner according to workplace requirements. |
| 3. Make adjustments to the kill sheet throughout the day | 3.1 Liaise with slaughter floor staff to ensure kill sheet is modified if stock are presented out of order, e.g. emergency kills.  
3.2 Modify kill sheet as and when livestock or on-floor issues alter the order or number of stock to be processed.  
3.3 Ensure relevant staff received modified kill sheets in a timely manner according to workplace requirements. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

Ability to:

- explain the importance of the Property Identification Code (PIC) and NVD
- read and interpret NVDs
- generate and interpret an abattoir’s kill sheet
- modify a kill sheet to meet changes to production scheduling
- advise livestock and slaughter floor staff of changes in the kill sheet and provide support as required
- communicate effectively with slaughter floor and livestock supervisors
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise workplace health and safety risks when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

Knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- regulatory requirements which impact on when stock must be presented for processing e.g. injured, ill or diseased animals (suspects), dirty stock, etc.
- workplace requirements that impact on the order in which categories of stock are presented
- workplace arrangements for dealing with non-tagged sheep/goats
- kill sheet distribution requirements
- impact of kill sheet changes on lairage and production staff
- status, abbreviations and what they mean, and the required actions to be taken in response.

Unit Descriptor

This Unit covers the skills and knowledge required to undertake a pre-slaughter check of Post Sale Summaries (PSSs), National Vendor Declarations (NVDs) and Property Identification Codes (PICs) against the mob-based National Livestock Identification System (NLIS) database to verify the PICs and confirm eligibility of stock for slaughter.

Application of the Unit

These tasks are typically undertaken by a Quality Assurance manager or a livestock clerk reporting to a Quality Assurance manager. The work is undertaken prior to the preparation of a kill sheet to ensure that stock are eligible for slaughter according to regulatory and workplace requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Employability Skills Information

This Unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Log-in to NLIS database | 1.1 Access NLIS database.  
| | 1.2 Troubleshoot accessing issues.  
| 2. Review NVDs | 2.1 Review the NVDs against regulatory, market and workplace requirements.  
| 3. Check PICs against the NLIS database | 3.1 Enter PICs to be checked against NLIS Database.  
| | 3.2 Identify any invalid PICs and implement response action according to workplace procedures.  
| | 3.3 Store records of checks according to workplace requirements.  
| 4. Implement response to any stock not eligible for slaughter | 4.1 Inform appropriate Quality Assurance, lairage and production staff according to workplace requirements.  

Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- conduct a PIC enquiry on the NLIS database to check PIC
- store print-outs and electronic records according to workplace requirements
- use communication skills to interact with producers, Quality Assurance and production staff
- use negotiation skills to resolve issues such as invalid PICs and NVD issues
- use mathematical skills to verify stock arriving against number listed on NVD/PSS
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise workplace health and safety risks when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

**Knowledge of:**

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS devices and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- the purpose and intent of NVDs
- the effect of a Livestock Producer Assurance (LPA) status
- what makes stock ineligible for slaughter
- purpose, nature of and regulations underpinning the use of PICs
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location.
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the Unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this Unit

Assessment must confirm the ability to:

- log-in to NLIS data base
- review NVDs
- check PICs against the NLIS data base
- implement response to any stock not eligible for slaughter.

Assessment must confirm knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS devices, their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- the purpose and intent of NVDs
- the effect of an LPA status
- what makes stock ineligible for slaughter
- purpose, nature of and regulations underpinning the use of PICs
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location.
Context of and specific resources for assessment

Assessment must be conducted in the workplace. Resources may include:
- enterprise work instructions
- Meat and Livestock Australia (MLA) NLIS assistance.

Method of assessment

The following assessment methods are suggested:
- workplace referee’s report
- knowledge test
- on-the-job demonstration with assessor observation.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace health and safety risks when working with livestock may include:
- being aware of and managing risks affecting co-workers
- risks associated with the use of electrical equipment.

Unit Descriptor

This Unit covers the skills and knowledge required to undertake a pre-slaughter check of National Vendor Declarations (NVDs) and Property Identification Codes (PICs) against the National Livestock Identification System (NLIS) database and where appropriate to identify stock with an actual or potential Extended Residue Program (ERP) status.

Application of the Unit

These tasks are typically undertaken by a Quality Assurance manager or a livestock clerk reporting to a Quality Assurance manager. The work is undertaken prior to the preparation of a kill sheet to ensure that where appropriate stock that have a potential residue issue are dealt with according to regulatory and workplace requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

| 1. Log-in to NLIS database | 1.1 Access NLIS database.  
1.2 Troubleshoot accessing issues. |
| 2. Review NVDs and/or Post-Sale Summary (PSS) | 2.1 Review the NVDs against regulatory, market and workplace requirements.  
2.2 Enter PICs off NVDs into the NLIS Database.  
2.3 Print NVDs results and store.  
2.4 Review PSSs for any statuses. |
| 3. Check PICs against the NLIS database | 3.1 Identify any invalid PICs and implement response action according to workplace procedures.  
3.2 Identify relevant Early Warning (EW) status.  
3.3 Identify ERP status.  
3.4 Identify LPA status.  
3.5 Verify Life-Time (LT) status where required.  
3.6 Identify test requirements. |
| 4. Implement response to EW or ERP status | 4.1 Interpret the requirements for an EW or ERP status.  
4.2 Inform appropriate Quality Assurance, lairage and production staff according to workplace requirements. |
| 5. Review status of cattle on an abattoir's PIC | 5.1 Access NLIS database where applicable and review the status of cattle on the abattoir PIC. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

Ability to:

- interrogate the NLIS database to check PICs, current holdings on abattoir PIC
- store print outs and electronic records according to workplace requirements
- use communication skills to interact with lairage, Quality Assurance and production staff
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or Property Identification Codes (PICs)
- use mathematical skills to verify stock arriving against number listed on NVD / PSS
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take appropriate steps to minimise *workplace health and safety risks* when working with livestock
- work effectively as an individual and as part of a team.

Required knowledge includes:

Knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the NLIS
- NLIS Database Helpline contact details
- purpose, nature of and regulations underpinning the use of PICs
- status, abbreviations and what they mean, and the required actions to be taken in response, including:
  - purpose and intent of NVDs
  - effect of an LPA status
  - nature of an Early Warning (EW) status
  - workplace response to an EW status
  - nature of an Extended Residue Program (ERP) status
  - regulatory and workplace response to an ERP status.

| 1. Define the RI | 1.1. RI measure and the uses of predictive microbiological model are explained.  
1.2. Regulatory requirements for process compliance using the RI are identified.  
1.3. *Factors affecting microbial growth* are identified.  
1.4. RI model parameters are identified. |
| 2. Collect *temperature data* for RI | 2.1. Data logger is set up correctly.  
2.2. Temperature sensor is placed in *product*, taking into account the point of microbiological concern and recommended placement.  
2.3. Time-temperature data is processed into correct format for RI calculator. |
| 3. Select and define process to be validated | 3.1. Process is defined in terms of the output.  
3.2. Production lot is defined.  
3.3. Variables in the process are identified.  
3.4. Number of measurements to be taken is identified.  
3.5. When and where data is to be collected is identified.  
3.6. RI criteria are identified. |
| 4. Calculate RI index | 4.1. Software is loaded and opened.  
4.2. Correct calculator options for process being validated are selected.  
4.3. RI for process to be validated is calculated. |
| 5. Utilise RI to validate process | 5.1. RI is compared with ECO requirements.  
5.2. Appropriateness of the data is assessed where RI does not comply.  
5.3. Action is taken on a non-conforming process.  
5.4. Decisions are made on production disposition for a refrigeration breakdown. |
| 6. Document a validation process using the RI | 6.1. Purpose, process and arrangements for the validation are described.  
6.2. Data collection methods and calculation options used are described and data collected is summarised.  
6.3. Validation decision is stated. |

## Required Skills and Knowledge
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- define a process and the relevant variables
- plan and manage the collection of data for a validation exercise
- arrange and document the validation of a chilling process using the RI
- input data into the RI index
- identify and resolve data inconsistencies
- process data into the correct format for the RI calculator
- review RI calculated and make decisions on process validation or product disposition
- apply relevant communication and mathematical skills
- maintain currency of knowledge and techniques through informal learning and personal research utilising such things as the web, industry journals, Australian Quarantine Inspection Service (AQIS) notices and conference workshops
- work effectively as an individual and as a team member when gathering data
- identify and apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:

- growth phases of microbes
- purpose of predictive microbiological models
- how and why RI is used
- the parameters of the RI model
- product disposition using the RI
- ECO criteria for RI
- requirements for data collection
- different RI calculator options
- documentation requirements for process validation using RI
- factors affecting the growth of microbes
- meaning of log values

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Factors affecting microbial growth include:
- lactic acid levels
- lag phase
- pH
- temperature
- time
- water activity.

### Temperature data includes:
- air flow
- locating and siting sensors
- nature and type of freezers/chillers
- product being refrigerated
- sites of microbial concern
- time of chilling operation
- worst case scenarios.

### Product may include:
- beef (e.g. brisket and tongue)
- game meat
- lamb (e.g. legs and tongue)
- mutton
- other meat species or products
- pork (e.g. hand and spring)
- veal.

### Communication skills may include:
- speaking clearly and directly
- listening and understanding
### RANGE STATEMENT

| include: | | communicate with people from a range of cultural, social and ethnic backgrounds |
| | | reading and interpreting workplace documentation |
| | | the preparation of documentation for a specified audience |
| | | the use of negotiation and persuasion skills, and being appropriately assertive |
| | | the sharing of information. |

**Mathematical skills** may include:

- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature and weights
- graphs of microbial growth
- logarithm growth rates
- model parameters
- percentiles
- predictive models.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:

- Export Control Act
- ECO
- hygiene and sanitation requirements
RANGE STATEMENT

- relevant regulations and Australian Standards
- state and territory regulations regarding meat processing.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

4.2. Results are recorded accurately on the appropriate process monitoring sheets.
4.3. Process is rated according to the established criteria.
4.4. Immediate corrective action is implemented according to the MHA program's requirements.
4.5. A conformity index is calculated and recorded after each process monitoring exercise.
4.6. Process is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.
4.7. Results of process monitoring are tracked over time and reconciled with product monitoring outcomes.

| 5. Analyse data gathered | 5.1. Product and process monitoring results are plotted on simple trend charts.
5.2. Product and process monitoring results are plotted on control charts.
5.3. Trends are interpreted and remedial or corrective actions are taken where necessary.

| 6. Implement MHA program | 6.1. Work instructions for monitoring activities are prepared and implemented.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

- Ability to:
  - monitor product for defects according to the MHA program
  - identify and resolve data inconsistencies
  - monitor the process for conformity with the plant's HACCP-based QA system in accordance with the MHA program
REQUIRED SKILLS AND KNOWLEDGE

- observe hygiene and sanitation requirements when monitoring product and process
- graph and interpret trends in product and process monitoring results
- instigate corrective and preventative actions when appropriate
- apply relevant communication and mathematical skills
- comply with OH&S requirements when monitoring product and process
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- work efficiently as an individual and as a team member
- identify and apply relevant OH&S and regulatory requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with, the applicable standards and regulations
- record the monitoring results accurately
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology

Required knowledge

Knowledge of:
- purpose of an MHA program
- classification of defects
- when and how corrective actions are to be taken in response to monitoring outcomes
- types and purpose of control charts
- purpose of trend charts
- what a trend is and why it is important when monitoring process and product
- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- purpose of the process conformity index
- types of defects to be identified in carcase, offal and carton product
## Evidence Guide

### OVERVIEW OF ASSESSMENT

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be undertaken against Australian meat industry standards and regulations.

### CRITICAL ASPECTS FOR ASSESSMENT AND EVIDENCE REQUIRED TO DEMONSTRATE COMPETENCY IN THIS UNIT

Competency must be demonstrated when implementing a real MHA program.

### CONTEXT OF AND SPECIFIC RESOURCES FOR ASSESSMENT

Assessment must occur in an operating abattoir or boning room.

### METHOD OF ASSESSMENT

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English.
### EVIDENCE GUIDE

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Sampling plan** will include:
- frequency
- sample size

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Established criteria** for rating the process include:
- acceptable
- marginal
- unacceptable.

**Plotting on simple trend charts** must include showing specified zones as:
- acceptable
- marginal
- unacceptable.

**Plotting on control charts** must show:
- specified acceptable, marginal and unacceptable zones
- upper and lower critical limits.

**Communication skills** may include:
- communicating with people from a range of cultural, social and ethnic backgrounds
- reading and interpreting workplace
### RANGE STATEMENT

|              | listening and understanding  
|              | the preparation of documentation for a specified audience  
|              | the use of negotiation and persuasion skills, and being appropriately assertive  
|              | the sharing of information.  

**Mathematical skills** may include:
- identifying acceptable limits, tolerances, out-of-specification performance, trends  
- calculation  
- estimation  
- measurements and interpretation that relate to time, temperature, moisture humidity, ratios, percentages, weight/mass/volume.  

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs  
- OH&S legal requirements  
- Personal Protective Equipment (PPE) which may include:  
  - coats and aprons  
  - ear plugs or muffes  
  - eye and facial protection  
  - head-wear  
  - lifting assistance  
  - mesh aprons  
  - protective boot covers  
  - protective hand and arm covering  
  - protective head and hair covering  
  - uniforms  
  - waterproof clothing  
  - work, safety or waterproof footwear  
- requirements set out in standards and codes of practice.  

**Regulatory requirements** may include:
- Export Control Act  
- Export Meat Orders (EMOs)  
- hygiene and sanitation requirements  
- relevant regulations and Australian Standards  
- requirements in the AS 4969:2007 Australian Standard for the Hygienic Production and

MTMP403B Oversee plant compliance with the Australian Standards for meat processing

Modification History

Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to oversee compliance with the relevant Australian Standards for meat processing in abattoirs and boning rooms. Some state meat authorities will require competency in this unit to prove currency when meat inspectors, who have been out of the industry for some time, seek re-registration. |

Application of the Unit

| Application of the unit | This unit is applicable to meat inspectors, supervisors and Quality Assurance personnel responsible for ensuring a meat processing plant complies with the relevant Australian Standards. |

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify the major regulatory requirements relevant to meat processing plants supplying the domestic market | 1.1. Relevant legislation and its application to meat processing plants is identified.  
1.2. Relevant Australian Standards called up in this legislation are identified.  
1.3. Agency responsible for the enforcement of this legislation is identified.  
1.4. Process for registration of a domestic meat processing plant is explained.  
1.5. Registration process for meat inspectors is described. |
| 2. Identify and describe the requirements of the Australian Standard | 2.1. Nature of approved arrangements and pre-requisite programs is described.  
2.2. Meat inspection requirements of the Australian Standard are described and explained.  
2.3. Disposition requirements of the Australian Standard are described and explained.  
2.4. Requirements for reporting exotic or notifiable diseases are described. |
| 3. Identify government review and audit processes | 3.1. Relevant government agencies regulating the meat industry at state level are identified.  
3.2. Review and audit processes used by the agencies to ensure compliance with the Australian Standard are described. |
| 4. Oversee compliance with the Australian Standard | 4.1. Internal verification activities for compliance are participated in.  
4.2. External review or audit is prepared for.  
4.3. External review or audit of compliance is managed.  
4.4. Corrective action requests from external or internal audits are closed out. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills
## REQUIRED SKILLS AND KNOWLEDGE

### Ability to:
- apply relevant *communication* and *mathematical skills*
- identify and resolve data inconsistencies
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research
- work effectively as an individual and as a team member
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to close out corrective action requests
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *workplace requirements*
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the Australian Standards and associated regulations.
- use technology to access information, prepare reports, and to access and prepare relevant data

### Required knowledge

Knowledge of:
- how to prepare for an external review or audit
- how to close out corrective action requests from external or internal audits
- requirements for meat inspection staff to work effectively as an individual and as a team member
- characteristics of exotic or notifiable diseases
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</th>
</tr>
</thead>
<tbody>
<tr>
<td>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</td>
</tr>
<tr>
<td>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</td>
</tr>
<tr>
<td>All assessment must be conducted against Australian meat industry standards and regulations.</td>
</tr>
</tbody>
</table>

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated in terms of specific legislation relevant to export or domestic meat processing plants. |

### Context of and specific resources for assessment

| Assessment must occur in the context of simulated breaches and simulated review processes. Assessment must involve utilising the current Australian Standards. |

### Method of assessment

<table>
<thead>
<tr>
<th>Recommended methods of assessment are:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• assignment</td>
</tr>
<tr>
<td>• quiz of underpinning knowledge</td>
</tr>
<tr>
<td>• simulation</td>
</tr>
<tr>
<td>• workplace demonstration</td>
</tr>
<tr>
<td>• workplace project</td>
</tr>
<tr>
<td>• workplace referee report of performance over time.</td>
</tr>
<tr>
<td>Assessment practices should take into account any relevant language or cultural issues related to</td>
</tr>
</tbody>
</table>
EVIDENCE GUIDE

Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment
A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Regulatory requirements may include:
- Export Control Act
- Export Control Orders (ECOs)
- hygiene and sanitation requirements
- relevant regulations and Australian Standards
- state and territory legislation and regulations regarding meat processing.

Communication skills may include:
- speaking clearly and directly; listening and understanding
- communicating with people from a range of cultural, social and ethnic backgrounds
- reading and interpreting workplace-related documentation
- the preparation of documentation for a specified audience
- the use of negotiation and persuasion skills, and being appropriately assertive
- the sharing of information.
## RANGE STATEMENT

**Mathematical skills** include:
- graphs of microbial growth
- logging of arithmetic growth rates
- model parameters
- percentiles
- predictive models
- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective equipment (PPE) which may include:
  - coat and apron
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh apron
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Workplace requirements will include:**
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

MTMP404B Apply meat science

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to apply meat science to the eating quality of meat and to interpret scientific data to predict probable impacts on meat eating quality.

It is a Meat Standards Australia (MSA) requirement that enterprises with a licence Level 1(b) have a MSA Coordinator who has completed this unit or a MSA approved equivalent unit. |

Application of the Unit

| Application of the unit | The skill and knowledge gained from this unit will enable a person to interpret meat processing data and to recommend improvements to management to control and enhance the eating quality of meat products.

This unit is suitable for people working in the red meat industry in a Quality Assurance (QA) or management role.

MSA requirements include adherence to the MSA Standards Manual for Grading, the MSA Standards Manual for Saleyard Consignment and the MSA Standards Manual for Trade Mark Usage. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Apply knowledge of muscle structure and biochemistry to meat quality and the factors that affect it | 1.1. Biological mechanisms (both pre and post slaughter) that affect meat quality in beef are explained.  
1.2. Pattern of tissue development in the body and the pattern of deposition within the muscle and fat depots within the body are identified including the composition of fat in depots and the extent it can be manipulated by production factors.  
1.3. Structure of skeletal muscles in terms of the myofibre and connective tissue components and the effect that these structures have on eating quality is identified.  
1.4. Biochemical events that occur in muscle early post-mortem and their significance in subsequent meat quality are identified. |
| 2. Identify the production and pre-slaughter factors that affect meat quality | 2.1. Impacts of production factors on meat quality are identified.  
2.2. Pre-slaughter factors are explained. |
| 3. Identify the processing factors that impact on eating quality | 3.1. pH/temperature window and how it impacts on palatability is explained.  
3.2. Role of electrical stimulation in controlling the rate of glycolysis in the carcase is described.  
3.3. Impact of stretching the muscles pre-rigor on palatability is explained.  
3.4. Process of ageing, its impact on tenderness and methods for extending the storage life of fresh meat including the application of packaging technologies is described.  
3.5. Impact of cooking on the palatability of meat is described. |
| 4. Describe quality attributes of meat | 4.1. Factors that control the changes in colour in fresh meat are identified.  
4.2. Development of marbling fat and its impact on palatability in the carcase is described.  
4.3. Impact of drip on both the appearance and palatability of meat is explained. |
| 5. Identify and evaluate the MSA cuts based grading scheme | 5.1. Palatability Analysis Critical Control Points (PACCP) approach to meat grading is explained.  
5.2. Principles behind the development of the MSA |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- apply relevant *communication skills*
- collate and analyse eating quality *data*
- maintain currency of knowledge through independent research or professional development
- identify and apply relevant *OH&S, regulatory and workplace requirements*
- identify and recommend improvements that could be made to improve meat eating quality to management
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:
- consumer taste testing protocols and how they have been used to set grade standards and develop the cuts-based grading system
- factors that control the changes in colour in fresh meat and other quality factors including drip and marbling which impact on both appearance and palatability
- factors that occur between the knocking box and chiller assessment and their...
### REQUIRED SKILLS AND KNOWLEDGE

- impact on meat palatability
- visual and palatability attributes of meat quality that are important to customers
- physical and chemical changes that occur in the cooking of meat
- anatomical and biochemical determinants of meat palatability
- factors in animal husbandry, transport, lairage, slaughter, carcase storage, packaging, further processing and cooking that will impact on tenderness and palatability
- *minimum standards of performance*
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

Competency must be assessed in the workplace or under simulated conditions. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

### Method of assessment

Recommended methods of assessment are:

- evidence log book
- observation of the applicant working
- workplace referee or third party report of performance over time
- written tests and/or questioning.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and...

## Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Production and pre-slaughter factors that affect meat quality may include:
- breed
- growth path
- glycogen depletion
- high pH
- Hormonal Growth Promotants (HGPs)
- stress and stress reduction techniques.

### Processing factors that affect meat eating quality may include:
- ageing
- anatomical factors
- biochemical factors
- cooking methods
- electrical stimulation
- fat distribution
- grain feeding
- growth rate or path
- hanging method
- hormonal growth promotants
- marbling
- packaging methods
- Pale Soft Exudative (PSE)
- pH
- post mortem shortening
- social regrouping of cattle
### RANGE STATEMENT

| starvation | stress | temperature | time and temperature of cooking process | transport | tropical breed content. |

**Communication skills may include:**

- applying numeracy skills to workplace requirements
- being appropriately assertive
- interpreting the needs of internal or external customers
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups
- writing to audience needs.

**Data includes:**

- ageing requirements
- AUS-MEAT chiller assessment results, transport times
- chiller cycles
- lairage duration and conditions
- MSA grading results
- processing conditions, such as stimulation and other electrical inputs
- time across the slaughter floor.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coat and apron
  - ear plugs or muffis
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh apron
  - protective boot covers
  - protective hand and arm covering
**RANGE STATEMENT**

- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements may include:**
- Export Control Act
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing.

**Workplace requirements may include:**
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Minimum standards of performance include:**
- ability to identify areas where changes in management could potentially improve eating quality
- analysis of data to present management with possible solutions.

| 1. Operate and calibrate pH equipment | 1.1. Temperature calibrations are conducted.  
1.2. pH calibrations are conducted. |
| 2. Conduct monthly and weekly monitoring of the pH or temperature window | 2.1. Correct technique for pH and temperature measurement is demonstrated.  
2.2. Necessary information for validating monitoring is collected.  
2.3. Valid and sufficient readings are collected.  
2.4. Results are recorded and reported. |
| 3. Analyse results of pH and temperature monitoring | 3.1. Effects of heat shortening and cold shortening are recognised.  
3.2. pH and temperature window is identified. |
| 4. Suggest corrective action plans if window conformance is not achieved | 4.1. Factors impacting on pH or temperature window conformance are identified and evaluated.  
4.2. Reasons for non-conformance are identified.  
4.3. Trials to achieve window conformance are conducted. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- collect information on live animals to be used in pH and temperature monitoring
- conduct monthly and weekly monitoring of the pH and temperature window
- observe, time and follow carcases through the slaughter floor recording the following:
  - carcase information
  - chiller number
  - immobiliser information (if applicable)
  - rigidity probe information (if applicable)
  - stimulation information (if applicable)
  - time into the chiller
### REQUIRED SKILLS AND KNOWLEDGE

- time stunned
- analyse results to verify conformance
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- generate individual and lot average graphs to show pH and temperature window conformance
- identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and *workplace requirements*
- Improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- maintain currency of knowledge through professional development or self-directed research
- operate and calibrate pH and temperature readings
- suggest corrective action procedures

### Required knowledge

Knowledge of:

- the scope and nature of *MSA standards*
- how electrical stimulation impacts on pH decline
- impact chilling factors have on the *rate of pH and temperature decline*
- how the time it takes a carcase to reach the chiller can impact on the rate of pH decline
- pH and temperature window
- how cold shortening occurs and the characteristics of cold shortened product
- how heat shortening occurs and the characteristics of heat shortened product
- how other electrical inputs can impact on the rate of pH decline
- the impact the temperature of the slaughter floor can have on the rate of the pH and temperature decline
- what glycogen is and the relationship between stress and pH
- what pH is and why pH is important for eating quality
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

The application of competency is to be assessed in the workplace. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

### Method of assessment

Recommended methods of assessment are:

- evidence log book
- examination of results of monitoring she or he has conducted
- observation of the applicant working
- written tests and/or questioning.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and
EVIDENCE GUIDE

| literacy demands of the assessment task should not be higher than those of the work role. |
| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Essential operating conditions include:**
- calibrated pH equipment
- carcases to be used must be followed across slaughter floor and into chiller.

**pH equipment will include:**
- buffer solutions of a known pH (one at 6.88 and one at 4.00)
- certified mercury in a glass thermometer
- icy water (approximately 0°C)
- pH meters and probes
- potassium chloride solution or gel
- water (approximately 40°C).

**Communication skills may include:**
- listening and understanding
- speaking clearly and directly
- reading and interpreting workplace-related documentation
- sharing information
- using negotiation, persuasion and assertiveness skills
- writing to audience needs.

**Mathematical skills may include:**
- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.
**RANGE STATEMENT**

| **OH&S requirements may include:** | • enterprise OH&S policies, procedures and programs  
• OH&S legal requirements  
• Personal Protective Equipment (PPE) which may include:  
  • coat and apron  
  • ear plugs or muffs  
  • eye and facial protection  
  • head-wear  
  • lifting assistance  
  • mesh apron  
  • protective boot covers  
  • protective hand and arm covering  
  • protective head and hair covering  
  • uniforms  
  • waterproof clothing  
  • work, safety or waterproof footwear  
  • requirements set out in standards and codes of practice. |
|---|---|
| **Regulatory requirements may include:** | • Export Control Act  
• hygiene and sanitation requirements  
• relevant regulations and Australian Standards  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state and territory regulations regarding meat processing. |
| **Workplace requirements may include:** | • enterprise-specific requirements  
• OH&S requirements  
• QA requirements  
• Standard Operating Procedures (SOPs)  
• the ability to perform the task to production requirements  
• work instructions. |
| **MSA standards include:** | • MSA Standards Manual for Saleyards Consignment  
• MSA Standards Manual for Grading  
• MSA Standards Manual for Trade Mark Usage  
• AUS-MEAT procedure 'Controlled pH' |
### RANGE STATEMENT

<table>
<thead>
<tr>
<th>Decline System - pH temperature window conformance monitoring</th>
</tr>
</thead>
</table>

Factors impacting on the rate of pH and temperature decline include:

- Carcase weight and fat coverage
- Chilling cycle
- Electrical stimulation and other electrical inputs
- Feed type of live animal
- Glycogen levels in the live animal
- Lairage duration
- Length of the processing chain
- Seasonal effect
- Sources of cattle - direct consignment/saleyard
- Temperature of the slaughter floor
- Transit type of live animal.

</thead>
</table>
| 1. Develop a QA program for rendering plant | 1.1. Process flow chart is developed for rendering plant.  
1.2. Control and Critical Control Points (CCPs) are identified.  
1.3. Procedures to be carried out at control and CCPs are identified.  
1.4. Critical limits are validated.  
1.5. Operations manual, monitoring sheets and verification procedures are developed. |
| 2. Implement the QA program at the rendering plant | 2.1. QA procedures and requirements are clearly explained to relevant personnel.  
2.2. Staff are coached and mentored in the introduction of work instructions and operating procedures.  
2.3. Verification and recording procedures are introduced and monitored.  
2.4. Internal audit is conducted to verify program. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- develop a QA program that meets regulatory and workplace requirements
- develop an implementation plan
- develop and document work instructions and Standard Operating Procedures (SOPs)
- establish and validate critical limits
- explain the process flow chart for the rendering operation
- form, instruct and lead a Hazard Analysis Critical Control Point (HACCP) team
- identify and observe Occupational Health and Safety (OH&S) requirements where applicable
- identify corrective action
- identify CCPs for QA monitoring
- identify hazards
- implement the QA program
REQUIRED SKILLS AND KNOWLEDGE

- mentor staff implementing the procedures
- prepare a HACCP chart for rendering operations
- use relevant communication skills
- verify the program using sampling, testing and auditing

Required knowledge

Knowledge of:

- verification and validation procedures
**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Regulatory** requirements may include:

- Export Control Act
- federal and state regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

**Workplace requirements** may include:

- enterprise-specific procedures
- OH&S requirements
- QA requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

**OH&S** requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Communicate work requirements and expectations | 1.1. Information requirements of new recruits are identified.  
1.2. Company policies, performance requirements and responsibilities are communicated to new recruits.  
1.3. Information is made available in formats appropriate and accessible to new recruits.  
1.4. Communication methods take into account the purpose and the audience, including social and cultural diversity.  
1.5. Appropriate work behaviours and procedures are modelled in personal conduct.  
1.6. Individual and team issues relating to developing and managing new recruits are identified, facilitated and resolved within level of responsibility. |
| 2. Provide a learning environment for new recruits | 2.1. Learning and development plans for new recruits are established and monitored in conjunction with human resources personnel.  
2.2. Resources required to support informal and formal learning and training in the work area are estimated and secured.  
2.3. Implementation of workplace policies is monitored to ensure the workplace and learning environment conforms with industrial, customer and legal requirements.  
2.4. Opportunities for new recruits to develop and apply skills and knowledge are arranged.  
2.5. Patterns of work organisation and job rotation are established to reinforce learning. |
| 3. Provide regular and timely feedback on performance | 3.1. Progress and performance of new recruits is monitored.  
3.2. Signs of poor or unacceptable practices are identified.  
3.3. Reasons for poor or unacceptable performance are investigated.  
3.4. Structured feedback is provided to new recruits.  
3.5. Strategies to address the performance gap are identified and agreed with the new recruit.  
3.6. Progress and/or taking appropriate follow up action is confirmed though ongoing monitoring. |
## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- apply appropriate communication skills to facilitate resolution of issues and *manage conflict* to resolve disagreements or disputes
- apply interpersonal skills including appropriate questioning, listening and feedback techniques
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- ensure that appropriate behaviour or procedures are consistently observed by all personnel in the work area
- ensure that new recruits have adequate opportunities to learn, apply and practice new skills and knowledge
- ensure that relevant and appropriate information is available to new recruits in the work area to describe behaviour and performance expectations. This includes information on policies and procedures, corporate values and production targets or work outcomes required of the work role
- establish effective relationships with new recruits in the work area
- foster effective teamwork by recognising and utilising the strengths of individuals
- identify and apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- identify legal requirements and responsibilities of self and the company in managing new recruits
- identify and conform with enterprise and employee obligations under *industrial arrangements* and *training agreements* relating to the provision of (workplace) training
- investigate causes of poor or unacceptable work performance in consultation with new recruits
- model behaviour consistent with company policies and procedures
- monitor individual performance, identify *performance gaps and develop strategies* in consultation with human resources personnel
- monitor progress towards achieving agreed conduct and/or performance improvements
- plan and undertake structured feedback or appraisal of new recruits
- provide regular feedback to new recruits to foster confidence and appropriate workplace behaviours
- take action to improve own work practice as a result of self-evaluation, feedback
### REQUIRED SKILLS AND KNOWLEDGE

| • environmental and waste management |
| • equal opportunity, anti-discrimination and sexual harassment |
| • hygiene and sanitation requirements |
| • industrial awards and agreements |
| • OH&S |
| • relevant regulations and Australian Standards. |

**Workplace requirements will include:**

| • enterprise-specific requirements |
| • OH&S requirements |
| • Quality Assurance (QA) requirements |
### RANGE STATEMENT

- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Industrial arrangements** may include:

- consultative processes
- industrial agreements, awards, training agreements
- pay scales and entitlements, qualifications, classification.

**Training agreements** and contracts may include:

- cadetships
- internships
- traineeships and apprenticeships
- training arrangements included in industrial agreements.

**Strategies to address performance gap** may include:

- a clear statement of the problem, an explanation of why it is a problem, and the action or change required to address the problem and any follow up action required
- a formal interview to counsel a new recruit on poor performance.

1.4. Meat transport vehicle or container is inspected for compliance with regulatory and workplace requirements.  
1.5. Corrective action is taken if vehicles or containers do not meet workplace or regulatory requirements.  
1.6. *Reports* are completed to workplace requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- apply *mathematical applications* where relevant
- complete *literacy and numeracy* tasks to a standard required in the workplace
- work effectively as an individual and as part of a team
- follow enterprise and regulatory inspection procedures for meat transport vehicles
- identify non-conformance in hygiene and sanitation, *Occupational Health and Safety (OH&S)* and licensing requirements
- prepare reports clearly and concisely in standard formats
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take corrective action if vehicle or container does not meet workplace or regulatory requirements

### Required knowledge

Knowledge of:

- potential sources of contamination
- regulatory and enterprise hygiene and sanitation requirements related to inspection
REQUIRED SKILLS AND KNOWLEDGE

- of meat transport vehicles or containers
- licensing and registration requirements for meat transport vehicles
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to implement current regulatory requirements.

### Context of, and specific resources for assessment

Assessment has to utilise actual containers or vehicles for inspection activities.

## Method of assessment

Recommended methods of assessment are:

- assignment
- quiz of underpinning knowledge
- verified work log or diary
- workplace demonstration of competency for the assessor
- workplace project
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

## RANGE STATEMENT

### Reports may be:
- diagrammatic, sketch, tabular, graphic
- prepared using information and mathematical data from a range of sources
- presented in writing and in standard formats
- presented orally.

### Mathematical applications may:
- include calculation, estimation, collation and recording of data
- involve the use of a calculator or other electronic aid
- relate to percentages, decimal numbers, time, temperature, humidity, quantity, frequency, ratio, viscosity and density.

### Literacy and numeracy tasks include:
- accurate transcription and collation of data from a variety of sources
- recognition and interpretation of signs, symbols, codes, numbers.

### OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

| 1. Assess a proposed site for a meat processing plant | 1.1. Identify workplace production requirements.  
1.2. Site suitability for a meat processing establishment is assessed in terms of meeting all regulatory requirements.  
1.3. Factors that will affect all key stakeholders in the site are identified. |
| 2. Assess the design and construction of a proposed meat processing establishment | 2.1. All regulatory requirements and importing country requirements, where relevant, for the design and construction of meat processing establishments are identified and applied to the design.  
2.2. Statutory and practical requirements for Quality Assurance (QA), animal welfare, Occupational Health and Safety (OH&S), and hygiene and sanitation are identified and applied to the design.  
2.3. Design is assessed in terms of achieving an effective and efficient product flow and separation of edible and inedible products. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- assess plans for a meat processing establishment against regulatory requirements
- describe the layout, operation and product flow of a range of meat processing establishments
- identify elements of production process design that demonstrate efficient, hygienic and practical production procedures for edible and inedible products
- consult with relevant stakeholders to ensure all requirements are addressed
- work effectively as an individual and as part of a team
- identify and apply relevant workplace requirements
- interpret flow charts and plans relating to the design and construction of meat processing plants
- prepare reports relevant to the task
- take action to improve work performance as a result of self-evaluation, feedback
## REQUIRED SKILLS AND KNOWLEDGE

- from others and in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

Knowledge of:

- quality principles in relation to cleaning and repair of plant and equipment
- relevant statutory requirements for design and construction of abattoirs to meet hygienic production, OH&S and animal welfare requirements
- critical points in meat processing establishments that relate to design
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Plans are assessed in simulated situations but must be assessed against current legislation and codes.

### Context of and specific resources for assessment

Assessment must be undertaken utilising realistic plans for slaughtering or boning facilities.

### Method of assessment

Recommended methods of assessment are:

- assignment
- debrief
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time.

Assessment practices should take into account any

- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Communication skills** may include:

- applying numeracy skills to workplace requirements
- being appropriately assertive
- empathising
- establishing/using networks
- interpreting the needs of internal/external customers
- listening and understanding
- negotiating responsively
- persuading effectively
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups
- writing to audience needs.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Describe *wild game meat* classification requirements | 1.1. Animal habitat is identified to *workplace requirements*.  
1.2. Wild game meat is identified and classified in accordance with workplace and *regulatory requirements*. |
| 2. Identify distinguishing characteristics and features of game animals | 2.1. Differences between game and non-game species are identified.  
2.2. Structure, locations and function of varying body systems are identified.  
2.3. Organoleptic or sensory differences between game and non-game animals are identified. |
| 3. Inspect wild game meat | 3.1. Wild game meat is inspected in accordance with regulatory requirements, hygiene and sanitation, and Occupational Health and Safety (OH&S) standards.  
3.2. Abnormalities in wild game meat are detected and identified.  
3.3. Major diseases and defects of game are identified.  
3.4. Carcase parts and organs are examined during inspection, according to workplace and regulatory requirements.  
3.5. Dispositions are made according to regulatory and workplace requirements.  
3.6. *Reporting and recording* requirements are completed. |

Required Skills and Knowledge

REQUARED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- list the main wild game meat animals
- list and describe major diseases and defects of game
- identify and apply relevant *OH&S requirements*
- inspect wild game meat in accordance with workplace and regulatory requirements
### Required Skills and Knowledge

- Identify abnormalities or diseases in wild game meat
- Access and explain regulatory requirements for wild game meat inspection
- Complete *mathematical operations* required to calculate or establish regulatory compliance
- Identify appropriate learning resources useful when working with unfamiliar species
- Identify sources of contamination and take corrective action
- Take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- Use relevant *communication skills*
- Work with processing team to ensure carcases are presented correctly and in a timely manner

### Required Knowledge

Knowledge of:

- Requirements to enable animal or carcase to be classified as wild game
- Basic structure of game animals
- Regulatory requirements for handling wild game meat
- Distinguishing characteristics and features between the game and non-game animal
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
| All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency need only be demonstrated on the inspection of one game species. |

| Context of and specific resources for assessment | Assessment must include utilising wild game field shot carcases. |

| Method of assessment | Recommended methods of assessment are:
- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time.
| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or |
EVIDENCE GUIDE

| Language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Wild game meat** may include:
- feral pigs
- kangaroos
- wallabies
- any other wild game field shot animal.

**Workplace requirements** may include:
- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Regulatory requirements** may include:
- domestic and importing country requirements
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
### RANGE STATEMENT

**Reporting and recording** may:

- be oral, written (with accurate transcription)
- be manual or electronic
- be complex and contain information from a range of sources
- include graphs, tables, charts, diagrams
- include technical workplace and mathematical language and data.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Mathematical operations** may include:

- acceptable limits, tolerances, out-of-specification performance, trends
- calculation
- estimation
- measurement and interpretation, and relate to time, temperature, moisture humidity, ratios, percentages, weight, mass, or volume
- the use of calculators or electronic aids.

**Communication skills** may include:

- applying numeracy skills to workplace requirements
- being appropriately assertive
- empathising
- establishing/using networks
- interpreting the needs of internal/external

</tr>
<tr>
<td>• use relevant <em>communication skills</em></td>
</tr>
</tbody>
</table>

**Required knowledge**

Knowledge of:

- steps in poultry processing
- major diseases and defects found in poultry
- procedures for reporting exotic or notifiable diseases in poultry
- symptoms of exotic or notifiable diseases
- major food safety hazards in each step of poultry processing
- basic anatomical structure of poultry
- relevant regulatory requirements including Australian Standards and the various requirements for the processing of poultry
- specific hygiene and sanitation requirements for poultry processing
# Evidence Guide

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency should be demonstrated against current Australian Standards and regulations.

## Context of and specific resources for assessment

Assessment should utilise poultry carcases and actual examples of pathology.

## Method of assessment

Recommended methods of assessment are:

- assignment
- debrief
- quiz of underpinning knowledge
- simulation
- verified work log
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time.

Assessment practices should take into account any
## Guidance information for assessment

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- **Poultry** may include:
  - a range of different breeds and species.

- **Regulatory requirements** may include:
  - domestic and importing country requirements
  - Export Control Act
  - federal, state and territory regulations regarding meat processing
  - hygiene and sanitation requirements
  - relevant Australian Standards
  - relevant regulations
  - requirements set out in AS 4465-2006 Construction of Premises and Hygienic Production of Poultry Meat for Human Consumption.

- **Workplace requirements** may include:
  - enterprise-specific procedures
  - OH&S requirements
  - QA requirements
  - Standard Operating Procedures (SOPs)
  - the ability to perform the task to production requirements
  - work instructions.
### RANGE STATEMENT

**Reporting** and recording may:
- be oral, written (with accurate transcription)
- be manual or electronic
- be complex and contain information from a range of sources
- include graphs, tables, charts, diagrams
- include technical workplace and mathematical language and data.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Mathematical operations** may include:
- acceptable limits, tolerances, out-of-specification performance, trends
- calculation
- estimation
- measurement and interpretation, and relate to time, temperature, moisture humidity, ratios, percentages, weight, mass, or volume
- processes which may be undertaken using a calculator or electronic aids.

**Workplace information and documentation may include:**
- specifications
- status reports
- audit reports
- monitoring data.

**Communication skills** may
- applying numeracy skills to workplace requirements
### RANGE STATEMENT

- being appropriately assertive
- empathising
- establishing/using networks
- interpreting the needs of internal/external customers
- listening and understanding
- negotiating responsively
- persuading effectively
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups
- writing to audience needs.

2.2. Ratites are handled humanely according to animal welfare regulations.  
2.3. Signs of common conditions are identified during ante-mortem inspection and are dealt with accordingly.  
2.4. Ante-mortem inspection is performed in accordance with OH&S and *regulatory requirements*.  
2.5. QA issues relating to handling of animals during ante-mortem inspection are identified.  
2.6. Procedures for emergency and suspect slaughter are identified.  
2.7. *Reporting and recording* requirements are completed. |
| 3. Assess suitability for slaughter | 3.1. Diseases and conditions affecting ratite suitability for slaughter are identified and appropriate action is initiated.  
3.2. Major exotic and notifiable diseases and their signs are identified and reported according to regulatory requirements.  
3.3. Appropriate remedial action is taken. |
| 4. Perform post-mortem inspection | 4.1. Post-mortem inspection is performed in accordance with regulatory requirements.  
4.2. Abnormalities in ratites are identified and detected.  
4.3. Disposition is made according to Australian Standards and work instructions.  
4.4. Exotic and notifiable diseases are identified.  
4.5. Reporting and recording requirements are completed. |
# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- perform ante-mortem and post-mortem inspection on ratites according to the Australian Standard
- notify relevant authorities promptly when exotic or notifiable diseases are identified
- prepare notification reports, including technical information for internal personnel and external authorities
- work with processing team to inspect poultry and identify suspect birds in an efficient and timely manner
- research and identify legislation and Australian Standards applicable to the processing of ratites
- apply *mathematical operations* where necessary to establish regulatory compliance
- identify and use relevant *workplace information and documentation*
- identify common conditions and exotic and notifiable diseases in ratites
- identify sources of repeated contamination and work with processing team to rectify problems
- use relevant *communication skills*

### Required knowledge

Knowledge of:

- basic anatomical structure of ratites
- specific hygiene and sanitation requirements associated with ratite processing
- specific structural requirements for ratite processing
- potential hazards associated with ratite processing
- dressing and storage requirements for ratites
- major diseases and defects in ratites
- main products and by-products associated with ratite processing
**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Unit Descriptor

This unit covers the skills and knowledge required to oversee the handling and, where applicable, the slaughtering of animals by a range of company personnel and/or government inspection staff to meet regulatory requirements.

Application of the Unit

Ensuring animals are produced, handled and slaughtered humanely is the responsibility of both regulatory authorities and the companies involved. This unit is therefore applicable to meat safety officers, lairage supervisors, Animal Welfare Officers and Quality Assurance (QA) officers in meat processing establishments, and livestock transport and saleyard staff.

Licensing/Regulatory Information

No occupational licensing, legislative, regulatory or certification requirements apply to this unit.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Oversee the humane handling of *animals* | 1.1 Potential animal welfare risks and existing management procedures are identified  
1.2 Animal welfare requirements are identified in legislation, regulation and workplace procedures  
1.3 *Handling of animals* is overseen in accordance with workplace and regulatory requirements  
1.4 Procedures for minimising animal stress and preventing injury are monitored |
| 2. Oversee the humane *euthanasing or slaughter of animals* | 2.1 Effective restraint and *stunning (where appropriate)*, *prior to euthanasing or slaughtering* of animals is overseen to ensure compliance with workplace and regulatory requirements  
2.2 Bleeding of animals is overseen to ensure compliance with workplace and regulatory requirements  
2.3 Monitoring of bleed chain insensibility is overseen to ensure compliance with workplace and regulatory requirements |
| 3. Oversee facilities, equipment and people involved with the handling of animals | 3.1 Facilities, equipment and people handling and slaughtering animals are overseen in accordance with workplace and regulatory requirements  
3.2 Bruising and/or hide or pelt damage data is monitored and corrective action is taken where appropriate |
| 4. Handle contingencies | 4.1 Handling of sick or injured stock is overseen in accordance with workplace and regulatory requirements  
4.2 Handling of wild or uncooperative animals is overseen in accordance with workplace and regulatory requirements  
4.3 Contingency plans for managing animal welfare are understood and can be implemented |
### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**
- explain the consequence of incorrect animal handling techniques
- explain why correct animal handling helps ensure that meat attains an acceptably low ultimate pH (i.e. high pH meat, caused by stressed animals and depleted glycogen stores, is avoided)
- work effectively as an individual and as part of a team
- ensure bruising and/or hide or pelt damage due to livestock handling is minimised
- ensure stock handlers remain calm and are not injured or put at risk of injury
- ensure stress in animals is minimised through correct handling
- identify and apply relevant animal welfare and workplace health and safety (WHS) requirements
- monitor the handling of livestock to ensure minimisation of stress
- identify sick and injured stock
- identify features of effective restraint, stun and bleed and/or oversee humane destruction
- monitor bleed chain insensibility, where applicable
- plan the movement of stock to meet production requirements and minimise stress
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

#### Required knowledge

**Knowledge of:**
- regulatory and workplace requirements for the humane handling and slaughtering of animals
- animal welfare standards and regulations
- strategies to minimise stress to livestock
- the stunning and bleeding process and/or humane destruction requirements
- causes of ineffective stunning and bleeding
- regulatory and workplace requirements for monitoring stunning and bleeding
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated against the current animal welfare codes and regulations. Part of the assessment must involve working with livestock handling in stockyards or a slaughtering premises. This may take the form of supervising or auditing livestock handling or slaughtering operations.

### Context of and specific resources for assessment

Assessment must be conducted in working stockyards and or slaughtering premises.

### Method of assessment

Recommended methods of assessment are:

- assignment
- quiz of underpinning knowledge
- verified work log
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be
| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |
### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Animals** may include:
- all ages, species and breeds of livestock handled in an establishment for slaughter
- livestock of various temperaments from very tame to wild
- livestock unused to human contact or any handling procedures

**Handling of animals** may include:
- all activities in the supply chain up to and including the knocking box or where live animals are killed, including handling in lairage, yards and pens, as well as the loading, transporting and unloading of livestock

**Workplace requirements** may include:
- enterprise-specific procedures
- WHS requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions

**Regulatory requirements** may include:
- domestic and importing country animal welfare codes, guides and legislation
- Animal Welfare Acts and Codes of Practice
- Export Control Act
- federal and state regulations regarding meat processing or animal welfare
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

**Slaughter of animals** applies to:
- the stunning and bleeding of animals in the slaughter process
## RANGE STATEMENT

| **Stunning** includes the use of: | • gas chambers  
• electrical stunning  
• rifles  
• captive bolt guns  
• any other process approved by the responsible authority |
|  |  |
| **WHS requirements** may include: | • enterprise WHS policies, procedures and programs  
• WHS legal requirements  
• Personal Protective Equipment (PPE) which may include:  
  • coats and aprons  
  • ear plugs or muffs  
  • eye and facial protection  
  • head-wear  
  • lifting assistance  
  • mesh aprons  
  • protective boot covers  
  • protective hand and arm covering  
  • protective head and hair covering  
  • uniforms  
  • waterproof clothing  
  • work, safety or waterproof footwear  
  • requirements set out in standards and codes of practice |
| **Communication skills** may include: | • applying numeracy skills to workplace requirements  
• being appropriately assertive  
• empathising  
• establishing/using networks  
• interpreting the needs of internal/external customers  
• listening and understanding  
• negotiating responsively  
• persuading effectively  
• reading and interpreting workplace-related documentation  
• sharing information  
• speaking clearly and directly

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Assessment must involve cutting meat products over a period of time.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| 1. Remove waste from work areas | 1.1. Waste is deposited into correct bins, hoppers and chutes in accordance with workplace requirements.  
1.2. Correct shovels, brooms and bins are used when gathering waste material to avoid cross-contamination of product and work areas.  
1.3. Work area is kept free from waste or trimmings to ensure a safe working environment for fellow workers.  
1.4. Segregation of edible and inedible product is maintained at all times (where applicable).  
1.5. Work is performed without contaminating edible product (where applicable).  
1.6. Waste in bins and tubs is shifted in accordance with manual handling procedures. |
| 2. Clean areas during production | 2.1. Work areas are cleaned in accordance with workplace requirements including Quality Assurance (QA) and Occupational Health and Safety (OH&S) requirements.  
2.2. Work areas are cleaned while avoiding contamination of product.  
2.3. Cleaning chemicals are used as directed and in accordance with standard workplace procedures (where part of an individual's duties). |
| 3. Wash and store cleaning equipment, tubs and bins | 3.1. Hoses are rolled and stored safely in accordance with workplace requirements.  
3.2. Brooms, shovels and scrubbing brushes are cleaned and stored appropriately when not in use.  
3.3. Chemicals, if used, are stored in accordance with workplace requirements in designated locations.  
3.4. All bins, tubs etc are sanitised in accordance with workplace requirements (where applicable). |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.
### REQUIRED SKILLS AND KNOWLEDGE

#### Required skills

**Ability to:**
- follow work instructions which may require the employee to:
  - *communicate* to supervisor any problems or difficulties
  - maintain cleanliness of work areas and surfaces to workplace requirements
  - sort and dispose of waste in accordance with workplace requirements
  - store equipment and chemicals (where applicable) safely
  - use cleaning materials and equipment in a safe and hygienic manner
  - use hoses in a manner that effectively cleans without contaminating surfaces, edible or inedible product
  - apply relevant *regulatory requirements*
  - apply relevant communication skills
  - work effectively as an individual and as a team member
  - demonstrate a broad understanding of the inedible waste processing that occurs in the meat industry
  - *explain* potential threat to the edible product of inadequate cleaning demonstrate the capacity to clean the work area safely during operations
  - take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

**Knowledge of:**
- OH&S requirements associated with the work e.g. using very hot water, using correct manual handling procedures, and maintaining a safe work environment for others
- potential threat to the edible product of inadequate cleaning
- correct usage of chemicals (as required)
- importance of dealing with or reporting problems associated with waste disposal e.g. blocked chutes or drains
- relevant regulatory requirements
- OH&S issues associated with cleaning during operations
- impact of incorrect disposal of waste on the environment and on by-products processing
- importance of following the documented cleaning procedure or schedule
- importance of, and difference between, wet and dry cleaning procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- perform pre-start checks and routine maintenance as specified in work instructions
- monitor operation of equipment
- weigh and label meat product cartons in accordance with workplace and regulatory requirements
- check carton contents against labelling
- apply relevant communication and mathematical skills
- work effectively as an individual and as a team member
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

Knowledge of:

- Occupational Health and Safety (OH&S) requirements related to labelling
- regulatory requirements with regard to labelling
- consequences of incorrect labelling
- monitoring of consumables
- purpose of labelling information
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competency must be demonstrated under normal rate of production.

**Context of, and specific resources for assessment**

Assessment must be conducted in a registered meat processing plant.

**Method of assessment**

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Workplace requirements may include: | enterprise-specific procedures  
| --- | OH&S requirements  
| | Quality Assurance (QA) requirements  
| | Standard Operating Procedures (SOPs)  
| | the ability to perform the task to production requirements  
| | work instructions. |

| Label information may include: | Australian inspection stamp  
| --- | 'bone in' or 'boneless' statement  
| | category cipher, category in full, cut description in full  
| | country of origin  
| | customer requirements  
| | date of production  
| | duration of ageing workplace in-house bar code  
| | enterprise-specific requirements  
| | generic identification (species)  
| | meat quality statement  
| | number of pieces  
| | temperature requirements for chiller |

MTMPS204C Maintain production records

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to maintain records of throughput required for workplace and regulatory agencies by the stock person, boning room or chiller clerk, or the person responsible for maintaining smallgoods production records. It covers major record-keeping and report generating activities. |

Application of the Unit

| Application of the unit | This unit is applicable to workers who are responsible for keeping detailed records relating to production such as kill sheets, chiller records, boning room records and loadout records. These record-keeping duties should form a significant part of the individual's responsibilities. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare production records | 1.1. *Workplace* and *regulatory requirements* for record-keeping are identified.  
1.2. Production recording equipment or materials are prepared in accordance with work instructions.  
1.3. Records are updated on an electronic or manual system in accordance with work instructions.  
1.4. Shortcomings of the recording system are corrected if applicable. |
| 2. Generate reports | 2.1. Data summaries and reports are prepared in accordance with workplace requirements  
2.2. Major reports are generated detailing inventory, production or staffing data. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- follow all work instructions effectively
- generate reports to meet workplace and regulatory requirements
- apply relevant Occupational Health and Safety (*OH&S*) requirements
- maintain stocks of consumables for use
- prepare all recording equipment for use (where relevant)
- use all recording equipment properly (where relevant)
- record data according to data requirements
- update records as required
- prepare all summaries required
- apply relevant communication and mathematical skills
- work effectively as an individual and as part of a team
- describe the workplace and/or regulatory requirements for record-keeping
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge
## REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- workplace requirements for reports
- relevant security arrangements such as Australian Quarantine Inspection Service (AQIS) or company requirements
- function and uses of the reports generated
- possible shortcomings of recording and how to correct them
- purposes of keeping production records
- relevant OH&S requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while collecting and recording significant data over a period of time. The data should involve some complexity in categories and require accurate recording.

### Context of, and specific resources for assessment

Assessment should be undertaken in an operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Production records may include:

- boning room production intake records whether recorded manually or by scanner
- boning room production recorded manually or by automatic labelling machine
- chiller assessment recording
- employee attendance monitoring and recording if applicable in addition to clock card
- European Union program monitoring recording
- kill floor grading and recording systems such as Sastek
- loadout records recorded manually or by scanner
- pesticide residue monitoring and recording
- recording associated with approved arrangements
- recording associated with inventory control
- recording associated with Quality Assurance (QA) monitoring
- re-pack processing and recording for inventory control
- stock receival and identification records.
### RANGE STATEMENT

**Workplace** requirements may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Regulatory requirements** may include:
- domestic or importing country requirements
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations and Australian Standards
- federal, state and territory regulations regarding meat processing.

**Record-keeping** can be:
- computer based, such as auto labelling systems or bar code scanners
- manual, including the provision of summaries.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - personal protective equipment (PPE):
    - coats and aprons
    - ear plugs or muffs
    - eye and facial protection
    - head-wear
    - lifting assistance
    - mesh aprons
    - protective boot covers
    - protective hand and arm covering
    - protective head and hair covering
    - uniforms
    - waterproof clothing
    - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication** skills may include:
- communicating and working with diverse individuals and groups
### RANGE STATEMENT

- identify and apply relevant Occupational Health and Safety (OH&S) requirements
- identify product chiller requirements
- identify product health and hygiene requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use available technology to record, gather and interpret product-monitoring data

### Required knowledge

Knowledge of:
- carcase grading system employed in a plant
- product transfer and storage methods
- process involved in assessing chillers in the workplace
- product quality monitoring processes
- importance of fat depth, carcase colour and other grading parameters
- rejection procedures

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Products** may include:
- carcase and split carcasses
- the range of animals processed for human consumption.

**Chiller temperature** may:
- be monitored with automatic data loggers or manual temperature gauges.

**Regulatory requirements** may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- federal, state and territory regulations regarding meat processing.

**Workplace requirements** may include:
- enterprise-specific procedures
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production.

| 1. Overview the meat preservation process | 1.1. Types of *preservation* processes used by the meat industry are identified and explained.  
1.2. Meat quality required for preservation processes are identified according to customer and *workplace requirements*.  
1.3. Ingredients and *equipment* required for the preservation process are prepared according to product specifications, *hygiene and sanitation*, and safety requirements. |
| 2. Monitor preservation process | 2.1. Product and process are inspected and monitored to ensure meat is preserved to specifications, health, hygiene and customer requirements.  
2.2. Equipment or processes involved in the preservation process are monitored regularly at critical control points.  
2.3. Procedures to ensure quality and hygiene of the product are monitored and followed at all times.  
2.4. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene requirements are implemented. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:  
- identify critical control points in the meat preservation process  
- apply relevant *communication* and *mathematical skills*  
- maintain currency of knowledge through professional development and self-directed research  
- work effectively as an individual and as a team member  
- determine and implement corrective action  
- identify and apply relevant Occupational Health and Safety (*OH&S*) *requirements*  
- interpret monitoring data and identify out-of-specification performance or product  
- monitor the preservation of meat to ensure compliance with workplace and
### REQUIRED SKILLS AND KNOWLEDGE

**regulatory requirements**
- *record* monitoring information accurately
- *report* non-conformances to appropriate personnel
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:
- criteria for rejected, reprocessed or recalled product
- process involved in preserving meat in own workplace
- critical aspects of meat safety and hygiene in the preservation process
- relevant procedures to ensure the preserved meat product is safe and fit for human consumption
- reject and recall procedures
- impact of the preserving process on product quality, including eating quality
- regulatory requirements relating to the preservation of meat and products
- reject and recall procedures
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while monitoring a commercial meat preservation operation.

### Context of and specific resources for assessment

Assessment may involve a simulated monitoring role for the trainee.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential italicised operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Preservation methods may include:**
- canning
- cooking
- pickling
- refrigeration
- smoking.

**Workplace requirements may include:**
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Equipment may include:**
- canning lines
- chillers
- cooking facility
- injectors
- smoke generators
- steamers.

**Hygiene and sanitation requirements may include:**
- relevant government regulations
- workplace requirements.
### RANGE STATEMENT

**Communication skills may include:**
- communicating and working with diverse individuals and groups
- interpreting customer requirements
- listening and understanding
- speaking clearly and directly
- negotiation, persuasion and assertiveness where necessary
- reading and interpreting workplace documentation
- sharing information.

**Mathematical skills may include:**
- acceptable limits, tolerances, out-of-specification performance, trends
- calculation
- estimation
- measurement and interpretation relating to time, temperature, moisture humidity, ratios, percentages, weight, mass and volume.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements may include:**
- domestic or importing country requirements
- Export Control Act
- hygiene and sanitation requirements
- relevant state regulations and Australian

| 1. Overview the production of further processed meats and smallgoods | 1.1. Range of further processed meat products and smallgoods is identified and explained.  
1.2. Processing techniques involved in the production of these products are identified and explained.  
1.3. *Hygiene and sanitation* and quality hazards associated with the production of these products are identified and explained.  
1.4. *Regulatory requirements* associated with the production of these products are identified and explained. |
| 2. Monitor the preparation of processing equipment and areas | 2.1. Procedures for pre-operational equipment checks conducted are identified in accordance with workplace policies and procedures, and manufacturer's instructions.  
2.2. Pre-operational checks and procedures carried out in accordance with workplace and regulatory requirements are monitored. |
| 3. Monitor the production of smallgoods and further processed meat products | 3.1. Ingredients are identified by type and quality according to *product specifications* and their function in the process is explained.  
3.2. Types of meat, by-product, stock, additive, binder and spices selected are identified according to the formulation specifications and regulatory requirements.  
3.3. Handling requirements for ingredients to prevent contamination and to ensure product quality and safety are demonstrated.  
3.4. Relevant processing equipment is identified and operating procedures are explained according to manufacturer and work specifications.  
3.5. Relevant temperature, consistency, appearance and texture requirements are described and monitored in accordance with product specifications and regulatory requirements.  
3.6. Relevant processing area hygiene and sanitation requirements are monitored as specified in workplace procedures and regulatory requirements.  
3.7. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene and sanitation requirements are identified and assessed against regulatory requirements. |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- monitor production of processed meats and smallgoods to ensure compliance with workplace and regulatory requirements
- apply relevant communication and mathematical skills
- work effectively as an individual and as a team member
- identify and apply relevant Occupational Health and Safety (OH&S), workplace and regulatory requirements
- propose and implement solutions to a range of production problems
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- hazards to the safe and hygienic manufacture of smallgoods
- options for chilling product
- process involved in manufacturing smallgoods
- procedures required to ensure the product is fit for human consumption and meets regulatory and quality requirements
- critical limits in the manufacture of smallgoods
- recall procedures, including notification of appropriate authorities

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

Competency must be demonstrated while monitoring a commercial smallgoods or processed meats operation. Resources may include:

- smoking equipment, machinery or production facility
- product specifications and ingredients
- equipment meeting safety requirements

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may include:

- comminuted product
- cooked and uncooked product
- dried product
- pickled or brined product
- smoked product.

Hygiene and sanitation requirements may include:

- relevant government regulations
- workplace requirements.

Regulatory requirements may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- federal, state and territory regulations regarding meat processing.
## RANGE STATEMENT

### Equipment
- atomising generators
- cookers
- friction generators
- liquid smoke jet
- moulds
- probe thermometers
- sawdust or woodchip burning generators
- smoke generators
- smokers
- sock
- wet bulb reservoir.

### Product specifications
- vary according to customer and workplace requirements.

### Communication
- communication with people from a range of cultural, social and ethnic backgrounds
- interpreting customer requirements
- listening and understanding
- speaking clearly and directly
- using negotiation, persuasion and assertiveness skills where applicable
- reading and interpreting workplace documentation
- sharing information
- writing to audience needs.

### Mathematical skills
- collection
- estimation
- calculation and interpretation of deviations within cycle
- internal temperature
- humidity
- ambient temperature
- weights.

### OH&S requirements
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
### RANGE STATEMENT

- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Workplace requirements** may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Options for chilling product** may include:

- chill cabinets
- immersing in ambient running water
- placing in coolrooms
- showering with ambient water
- use of intensive coolers
- washing in water or brine.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:

- apply relevant *communication* and *mathematical skills*
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research such as by using the web, industry journals, circulars from regulators and industry workshops
- work effectively as an individual and as a team member
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to resolve problems
- identify and apply relevant Occupational Health and Safety (*OH&S*) and *workplace requirements*
- monitor production of UCFM to ensure compliance with workplace and regulatory requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the Australian Standards and associated regulations
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology
- use technology to access information, prepare reports, and to access and prepare relevant data

#### Required knowledge

Knowledge of:
### REQUIRED SKILLS AND KNOWLEDGE

- process involved in manufacturing UCFM
- purpose of fermentation
- raw materials storage and selection
- fermentation control criteria for pH
- fermentation speed control
- purpose of maturation and drying
- maturation and drying speed control
- impact of the raw material on product quality and food safety
- water activity as a release criteria
- microbiological criteria in UCFM production and microbiological limits of UCFM, particularly the following significant microbial pathogens: enterohaemorrhagic Escherichia coli, Salmonella, enterotoxin of Staphylococcus aureus and Listeria monocytogenes
- physical hazards for UCFM products
- role of starter culture
- storage and handling requirements for starter culture
- product handling and release criteria
- impact of critical limits in a HACCP program for UCFM production
- procedures required to ensure the product is fit for human consumption and meets regulatory, food safety and quality requirements
- implementation of the HACCP plan for the production of UCFM products
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
| All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated through sustained performance over time, with an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

| Resources may include:
| - relevant documentation such as:
|  - manufacturer's instructions and operation manuals
|  - regulatory requirements
|  - workplace policy and procedures
|  - workplace environment.

### Method of assessment

| Recommended methods of assessment include:
| - assignment focusing on understanding and application of principles and theory to workplace operations
| - third-party referee report of sustained performance at appropriate level of authority and responsibility
| - workplace project with a focus on enterprise

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- **UCFM products** may include:
  - caccitora
  - chorizo
  - csabai
  - landjaeger
  - Lebanon Bologne
  - mettwurst
  - polnische
  - salami
  - some cabanossi
  - summer sausage
  - Teewurst, and others.

- **Micro-organisms** may include:
  - bacteria
  - mould
  - virus
  - yeast.
# RANGE STATEMENT

**Major threats** may include:
- bacteria
- relevant yeast or moulds.

**Common sources of chemical hazards/contamination** may include:
- agricultural residue
- cleaning
- veterinarian chemical residues.

**Regulatory requirements** may include:
- Export Control Act
- Export Meat Orders (EMOs)
- hygiene and sanitation requirements
- importing country requirements where appropriate
- relevant domestic requirements
- relevant regulations and Australian Standards
- AS 4696:2007 Australian Standard for the hygienic production and transportation of meat and meat products for human consumption
- federal, state and territory regulations regarding meat processing.

**Equipment** may include:
- blenders
- choppers
- cooking utensils
- dryers
- fermentation environment
- injectors
- knives
- machine or vat
- mixers
- pressure cookers
- sausage machine
- silent or bowl cutter
- smokehouse
- tables, conveyors, platforms
- tumblers.

**Ingredients** may include:
- additives
- binders
- by-products and other relevant materials
- fats
- meats
- Nitrate
- Nitrite

MTMPS415A Conduct an internal audit of a documented program

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to conduct an internal audit of a documented program. |

Application of the Unit

| Application of the unit | This unit is applicable to plant managers, Quality Assurance (QA) personnel, managers and marketing personnel who have a role in scheduling, preparing for and conducting an internal audit in a meat processing plant. The scope of the audit may include operational areas such as food safety, Occupational Health and Safety (OH&S), vendor and environmental programs. This may include industry standards and codes. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Plan the audit</td>
<td>1.1. Audit schedule is interpreted and the timely conduct of internal audit is planned and organised.</td>
</tr>
<tr>
<td></td>
<td>1.2. Objectives, scope and criteria of audit are determined according to <em>workplace requirements</em>.</td>
</tr>
<tr>
<td></td>
<td>1.3. Audit team is assembled and briefed, as required, for the objectives, scope and criteria of the audit.</td>
</tr>
<tr>
<td></td>
<td>1.4. Those affected by and involved in the audit are notified and responsibilities documented according to workplace requirements.</td>
</tr>
<tr>
<td></td>
<td>1.5. Stakeholders involved in an internal audit are notified according to workplace requirements.</td>
</tr>
<tr>
<td></td>
<td>1.6. Procedures, records and <em>workplace documentation</em> needed for the audit are identified.</td>
</tr>
<tr>
<td></td>
<td>1.7. <em>Evidence collection methods and sources</em> to be used in the audit are documented, including workplace checklists developed to workplace specifications.</td>
</tr>
<tr>
<td></td>
<td>1.8. A document review is conducted prior to audit.</td>
</tr>
<tr>
<td>2. Conduct the audit</td>
<td>2.1. An entry meeting is conducted with relevant parties to explain the purpose, scope and criteria for the audit, the methods to be used in the audit, and how results will be reported and followed up.</td>
</tr>
<tr>
<td></td>
<td>2.2. An audit of the program is conducted in accordance with workplace and regulatory requirements.</td>
</tr>
<tr>
<td></td>
<td>2.3. Effective communication skills are used to conduct the audit</td>
</tr>
<tr>
<td></td>
<td>2.4. Verifiable objective evidence is collected against the criteria of the audit.</td>
</tr>
<tr>
<td></td>
<td>2.5. Findings are made using the objective evidence against the criteria of the audit.</td>
</tr>
<tr>
<td></td>
<td>2.6. Non-conformances are identified and categorised according to workplace requirements.</td>
</tr>
<tr>
<td></td>
<td>2.7. Audit activity is recorded according to workplace requirements.</td>
</tr>
<tr>
<td>3. Report on audit</td>
<td>3.1. An audit report is prepared, detailing areas of the program which were audited and findings against the audit criteria, including non-conformances, where applicable.</td>
</tr>
<tr>
<td>findings</td>
<td>3.2. Objective <em>evidence</em> is documented according to workplace standards.</td>
</tr>
<tr>
<td></td>
<td>3.3. Records of audit process, objective evidence and</td>
</tr>
</tbody>
</table>
findings are kept in accordance with workplace and regulatory requirements.
3.4. Findings are reported according to workplace requirements.

4. Confirm and close out corrective action

4.1. The effectiveness of corrective actions is verified.
4.2. Records of the effectiveness of corrective actions are maintained.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to**

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of the business relevant to the industry sector
- locate relevant codes or compliance program requirements
- communicate the audit process, requirements and findings to relevant personnel clearly and accurately
- apply planning skills to ensure the smooth conduct of the audit process
- use negotiation skills to organise and facilitate audit processes, including following meeting procedures and resolving issues
- identify and follow an audit trail
- conduct research to identify, collect and analyse evidence
- gather, analyse and record data accurately
- plan and organise audit activities
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- interpret evidence and make a judgement on the level of compliance
- prepare well-balanced, factual and objective written audit reports

#### Required knowledge

**Knowledge of:**

- audit management to develop and implement an audit against an agreed plan, including an understanding of the scope/level of authority to revise the resource.
### REQUIRED SKILLS AND KNOWLEDGE

- and allocate time allocations to take account of variation to plan
- audit processes
- legislation, regulations, orders, codes and standards applicable to the areas being audited
- communication methods relevant to different groups and audience
- evidence appropriate for use in audit processes, including an understanding of the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods including record sampling and sample analysis, including an understanding of the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- legislation that impacts on acceptable communication methods and conduct including anti-discrimination, anti-harassment and privacy legislation
- methods used to identify Critical Control Points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
- personal attributes required of an auditor
- strategies to communicate in culturally diverse environments
- the internal auditing policies and procedures of the workplace
- the structure, authority levels and lines of reporting within the organisation
- the underlying principles of risk-based approaches to controlling food safety hazards including HACCP as described in the Codex Alimentarius Guidelines
- vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to plan, conduct and report and internal audit of a documented program.

Competency must be demonstrated in the workplace, utilising an approved audit plan and procedure from the workplace. Candidates must conduct an entire internal audit.

### Context of and specific resources for assessment

Assessment must involve working with actual realistic data and in the context of an audit plan that meets regulatory requirements.

### Method of assessment

Recommended methods of assessment include:

- mock audit conducted in the workplace
- debrief after participation in a real audit
- quiz of underpinning knowledge
- verified work log or diary
- workplace demonstration
- workplace referee or third-party report of

2.2. Trends and cyclic patterns of control graphs are identified and analysed. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- apply statistical information to the analysis and verification of a process
- calculate simple statistical measures
- cooperate with monitors to ensure data is accurate and provided on time
- use a range of information and communications technology and software, including statistics management and analysis programs
- conduct trend analysis of meat processing data
- explain the verification process using statistical data
- identify and apply relevant Occupational Health and Safety (OHS), regulatory and workplace requirements
- perform basic statistical calculations on data from samples drawn from the workplace
- prepare control graphs and use charts as relevant
- prepare reports on the outcomes of the statistical analysis of monitoring data
- use and explain simple statistical measures, such as mean, range, frequency, mode and median
- use relevant communication skills.

Required knowledge

Knowledge of:
- statistical measures, such as mean, range, frequency, mode and median.

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify audit dates | 1.1. Known or expected dates of external audits are documented on a schedule according to workplace procedures and practice.  
1.2. Dates are confirmed and all company personnel affected by the external audit are notified. |
| 2. Identify audit scope | 2.1. Audit scope is described and conveyed to people affected by the external audit process. |
| 3. Identify audit team size and length/duration of the external audit | 3.1. Audit team size and audit duration are identified and necessary notifications are made throughout the workplace. |
| 4. Review internal audit reports to check areas expected to be covered in the external audit | 4.1. Internal audits are conducted, where necessary, and reported in accordance with workplace policy and procedures.  
4.2. Previous internal audit reports and production reports are reviewed to identify past problem areas.  
4.3. Past problem areas are monitored and reviewed. |
| 5. Make arrangements for the external audit process | 5.1. Arrangements for the days of the external audit are made and confirmed with the auditors.  
5.2. Arrangements for greeting the external auditors and provision of workplace guide are made in accordance with *workplace requirements*.  
5.3. Internal departments subject to the external audit are notified of the arrangements.  
5.4. Roles and responsibilities of enterprise personnel in the process are determined. |
| 6. Accompany the external auditors | 6.1. Entry and exit interviews are facilitated.  
6.2. External auditors are escorted throughout the duration of the audit in accordance with arrangements and workplace procedures. |
| 7. Report on the external audit | 7.1. Findings of the external audit are reported in accordance with workplace requirements.  
7.2. Findings of the external audit are communicated to everyone affected or involved in the external audit procedure.  
7.3. Findings of the external audit are followed up and corrective action is taken, where appropriate. |
Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as part of a team
- demonstrate clear communication and interpersonal skills related to preparing for and participating in an external audit
- demonstrate methods of scheduling, recording the scheduling and managing the planning for external audits
- ensure the quality systems covering the area to be audited are in place and effective as shown by internal audit reports
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- use available technology to prepare for and follow up external audits
- identify reports of internal and external audits and demonstrate the ability to take corrective action
- maintain currency of knowledge through independent research and professional development
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.

#### Required knowledge

**Knowledge of:**

- regulatory and other requirements for external audits
- technical and regulatory aspects covered by each external audit.
## Evidence Guide

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Communication skills may include:

- applying numeracy skills to workplace requirements
- being appropriately assertive
- interpreting the needs of internal or external customers
- listening and understanding
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- using negotiation and persuasion techniques
- working with diverse individuals and groups
- writing to audience needs.
## RANGE STATEMENT

### Problem-solving skills may include:
- applying a range of strategies in solving problems
- being creative in response to workplace challenges
- developing innovative solutions
- developing practical and creative solutions to workplace problems
- generating a range of options in response to workplace matters
- identifying opportunities that might not be obvious to others
- listening to and resolving concerns in relation to workplace issues
- resolving customer concerns relative to workplace responsibilities
- showing independence and initiative in identifying problems
- solving problems individually or in teams
- using numeracy skills to solve problems.

### OHS requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffis
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
### RANGE STATEMENT

- relevant Australian standards
- relevant regulations
- requirements set out in AS 5008:2001/Amdt 1-2003 Hygienic rendering of animal products
- state and territory regulations regarding meat processing.

| 1. Identify major export legislation | 1.1. Main relevant legislation is identified and application to establishment is described.  
1.2. Export control orders are identified and application is explained in accordance with customer specifications and work instructions.  
1.3. Legislation is accessed on ELMER. |
| 2. Identify and describe importing country requirements | 2.1. Information on importing country requirements is accessed and applied.  
2.2. Specific importing country and export inspection procedures are performed in accordance with regulatory requirements and workplace requirements. |
| 3. Identify the function of the Australian Quarantine Inspection Service (AQIS) | 3.1. Role of AQIS is described.  
3.2. Function of AQIS meat inspection staff is identified.  
3.3. Structure of AQIS and AQIS chain of command is identified. |
| 4. Identify QA arrangements | 4.1. Specific requirements for AQIS approved arrangements are identified.  
4.2. AQIS review, monitoring and auditing arrangements for approved arrangements are described. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- access and research legislation on the ELMER system and other appropriate electronic information systems
- gather, analyse and present complex information to colleagues
- identify and apply relevant Occupational Health and Safety (OH&S) requirements
- identify orders relevant to particular operational situation
- use communication and information technology to access required information
### REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

**Required knowledge**

Knowledge of:
- role and jurisdiction of AQIS
- role and function of AQIS meat inspection staff
- ante-mortem and post-mortem inspection procedures for importing countries
- procedures for condemnation in export works
- main regulatory and legislative requirements for exporting product and their application to meat processing
- QA systems operating, monitored and audited by AQIS in export works.
# Evidence Guide

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be assessed when utilising current importing country requirements and export regulations.

### Context of and specific resources for assessment

Assessment can utilise actual or simulated workplace environment.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or
EVIDENCE GUIDE

| Guidance information for assessment | language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Regulatory requirements may include:**
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian standards
- relevant regulations
- state and territory regulations regarding meat processing.

**Workplace requirements may include:**
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Research parameters include:**
- analysis of technical journals or manuals
- review of regulatory notices, memos, updates and guidelines
- synthesis of information from a range of sources

MTMPS5603C Develop, manage and maintain quality systems

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to establish, maintain and control an enterprise quality system. It also covers the skills and knowledge needed to lead people, manage systems and build quality into all enterprise systems and operations. The development and management of quality systems affects the ability of the enterprise to operate in specific markets and influences customer and consumer confidence in enterprise products. |

Application of the Unit

| Application of the unit | This unit is of particular interest to Quality Assurance (QA) managers and personnel, production managers and supervisors operating in a meat industry context. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse complex statistical data and prepare corrective responses to non-conformances and variations identified in the data, relevant to enterprise quality systems and operations
- apply quality concepts and tools to problem solving and the development of quality data collection, data management systems and analysis strategies
- apply substantial product and process knowledge to the development of the quality system and the interpretation of quality data
- apply relevant communication and mathematical skills
- communicate quality goals, requirements and findings to stakeholders in formats and styles appropriate to the context and purpose
- develop quality policies for the enterprise in consultation with senior management and other stakeholders
- develop consultative and feedback procedures and opportunities for identification and resolution of quality issues and problems
- develop continuous improvement processes and team building using the 'plan, do, check, act cycle'
- consult, negotiate with and report to regulatory authorities openly and promptly, consistent with enterprise ethical standards, including the notification of breaches and the preparation of non-compliance reports
- develop workforce commitment, capability and responsibility for the quality system, including identifying, negotiating and scheduling training, inclusion of responsibilities and duties relating to quality system implementation and integration in all job descriptions and work instructions, clear communication of responsibilities and requirements, delegation of tasks and responsibilities and inclusion of the workforce in consultative and continuous improvement processes
- ensure the quality system meets legislative and regulatory requirements
- exercise judgement, pragmatism and quality knowledge in the management and resolution of quality issues and problems
- identify and apply relevant Occupational Health and Safety (OH&S) and workplace requirements
- identify appropriate monitoring systems and strategies to support the enterprise quality system
- identify, research and update sources of quality information and advice, including technical and regulatory information to support enterprise quality system
- lead personnel (e.g. Hazard Analysis Critical Control Point (HACCP) team, management, quality team, meat inspection team, laboratory, maintenance teams, processors and operators) in the implementation and improvement of the quality
REQUIRED SKILLS AND KNOWLEDGE

- monitor and analyse the costs of the quality system, including prevention costs, appraisal costs, total quality costs and failure costs
- monitor and certify processes and product to meet third-party requirements (e.g. importing country, public health requirements and customers)
- oversee audit processes (internal and external), act on audit findings and provide feedback to personnel for improvement of the system
- oversee the preparation for third party certification (where appropriate)
- plan and resource the enterprise training strategy, consistent with regulatory requirements, to assist personnel at all levels in the implementation of the quality system
- prepare and sign off quality policies, manuals and documentation for the enterprise, including the preparation and updating of preventative, corrective and responsive procedures and strategies, supplier criteria and specifications, supplier and contractor audit requirements
- prepare quality implementation plans, identifying goals, key personnel and areas, resources, strategies, timelines and milestones
- present reports according to legal and enterprise requirements
- resolve customer complaints promptly and provide corrective action responses
- use appropriate questioning, observation, listening and recording skills in the collection and monitoring of quality data
- where quality systems are based on HACCP principles or Good Manufacturing Practice (GMP), explain these principles and the implications for the enterprise quality system.

Required knowledge

Knowledge of:
- key concepts, philosophies and tools of quality management
- management and organisational structure of the enterprise and its impact on enterprise systems
- the role audits play in a quality system
- documentation requirements of the quality system, including levels, and their roles in the functioning of the system, including the requirement for effective and secure quality record keeping systems
- enterprise goals and directions and their implications for the quality system
- process capability
- applicable quality standards, regulations, codes, legislation and customer requirements for the quality system and explain the implications for the enterprise
- legal requirements for the establishment and maintenance of the enterprise QA system including responsibilities for reporting breaches to authorities and implementing audit findings
- principles and functions of hazard analysis and control, validation, including
### REQUIRED SKILLS AND KNOWLEDGE

- Auditing and verification in quality systems.
Evidence Guide

<table>
<thead>

</table>

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise. |

| Context of and specific resources for assessment | Resources may include:  
- a real work environment  
- customer specifications  
- establishment's quality system, performance data  
- relevant documentation, such as:  
  - manufacturer instructions or operations manuals  
  - manufacturer requirements  
  - regulatory requirements  
  - workplace policy and procedures  
  - relevant equipment and materials. |

| Method of assessment | Recommended methods of assessment include:  
- third party referee report of sustained performance at an appropriate level of authority and responsibility |
### EVIDENCE GUIDE

- Assignment focusing on understanding and application of principles and theory to workplace operations
- Workplace projects which focus on the company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Requirements of the quality system** may include:

- Control of documents, data and quality records
- Coverage of contracts, purchasing, supply, processing, handling, storage, packaging, preservation, storage and delivery of meat and meat products
- Definition of management responsibilities
- Design and process controls
- Inspecting and testing, control of non-conforming product, preventative and corrective action, and auditing
- Management of links and impacts on all systems within the enterprise
- Production identification and traceability

  • work, safety or waterproof footwear  
• requirements set out in standards and codes of practice.  

| **Workplace requirements** may include: | • enterprise-specific requirements  
• OH&S requirements  

### RANGE STATEMENT

| | 
|---|---|
| QA requirements | Standard Operating Procedures (SOPs) 
| | the ability to perform the task to production requirements 
| | work instructions. |

**Monitoring systems** and strategies may include:

- audits and reviews 
- feedback from stakeholders 
- inspection and testing procedures and regimes, including chemical and microbiological testing procedures, for validation and verification 
- statistical collection and analysis.

**Quality costs** include:

- appraisal (e.g. design appraisal, inspection, depreciation of quality equipment, process control and end product testing) 
- failure (e.g. scrap and waste, reinspection or retesting, disposal, down time, product downgrading, product liability, loss of custom, returned product and complaints) 
- prevention (e.g. training, auditing, process control engineering, testing, reporting and recall systems).

**Third-party** certification may include:

- Australian Quarantine Inspection Service (AQIS) accountabilities and inspection stamps/seals 
- customer requirements and specifications, including importing country requirements 
- licensing or registration requirements 
- national or international quality endorsement 
- product description and certification.

**Audit processes** include:

- planning 
- establishing controls 
- developing the team 
- conducting entry/exit meetings 
- controlling caucus meetings 
- issuing corrective action requests 
- preparing reports 
- giving feedback and input into the improvement of the system.

**Process capability** includes:

- operational capability (e.g. resources, risks, opportunities and commitments) 
- technical capability (e.g. personnel,

MTMPS5604C Manage maintenance systems

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to develop maintenance strategies which cause minimal disruption to plant operations and which are cost efficient. An enterprise's maintenance system influences the cost and quality of the product and the safety of the workforce and environment. |

Application of the Unit

| Application of the unit | At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. This unit is particularly useful for maintenance managers, plant engineers and production managers working in a meat industry context. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare *maintenance* policies | 1.1. Maintenance costs, including the cost of poor maintenance procedures, are identified and quantified.  
1.2. Management commitment to a productive maintenance strategy is negotiated and confirmed.  
1.3. Enterprise performance is benchmarked against agreed standards, and maintenance policies and priorities are developed.  
1.4. *Maintenance system goals* are developed through negotiation with *stakeholders*.  
1.5. Communication strategies are established to build positive workforce attitude and commitment to maintenance. |
| 2. Implement *maintenance* management system | 2.1. Resource requirements are identified, secured and included in enterprise budgets and operational plans.  
2.2. Location of the maintenance function and/or team within enterprise structures is determined.  
2.3. Profile of the maintenance function and/or team within enterprise structures is determined.  
2.4. Roles and responsibilities of equipment users and the *maintenance team* are clarified and built into position descriptions and work instructions.  
2.5. Mentoring and training in the use and care of technology and equipment is provided to support the maintenance strategy.  
2.6. Maintenance procedures and schedules are prepared to minimise negative impacts on production, costs, waste and the environment.  
2.7. Record keeping systems are developed and maintained.  
2.8. Potential risks are analysed and management strategies recommended.  
2.9. Contingency plans are prepared in collaboration with the workforce, suppliers and customers.  
2.10. Maintenance schedules and procedures are effectively communicated to the team. |
| 3. Monitor and review *maintenance* management system | 3.1. Continuous improvement strategies are developed.  
3.2. Performance criteria for maintenance goals are determined and data collection strategies established.  
3.3. Performance information and outcomes are analysed |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- consult with key personnel, people on the floor, delegates, suppliers, contractors and equipment manufacturers to determine appropriate maintenance strategies, procedures and schedules
- develop maintenance policies and strategies, including establishing criteria for determining maintenance priorities and planning and scheduling routine equipment and overhead maintenance to meet quality system requirements
- establish and monitor performance targets for maintenance teams within performance planning and appraisal processes
- develop workforce commitment to effective maintenance strategies, including implementing strategies for devolving the identification of maintenance needs to the floor, developing consultative and cooperative problem-solving strategies, and negotiating changes in work practices
- develop secure record keeping procedures to document maintenance costs, problems, priorities, solutions, schedules and completions
- apply relevant communication and mathematical skills
- evaluate and recommend alternative maintenance policies and strategies, including evaluation of the costs and benefits of internal and consultant service models, changes in work roles and responsive/preventative models for maintenance
- determine and recommend the need for capital expenditure for the replacement of plant and equipment
- identify and apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- manage maintenance costs, including determining total maintenance costs based on maintenance service cost and machine breakdown cost, setting, justifying, and achieving maintenance budgets
- monitor performance of the system, including establishing indicators, setting up data collection strategies, analysing data to identify trends and isolate problems or problem areas, and measuring progress against targets
- prepare and implement contingency plans for dealing with risks, including equipment breakdowns and failures, including negotiation and planning with...
### REQUIRED SKILLS AND KNOWLEDGE

<table>
<thead>

<th>Production personnel</th>
</tr>
</thead>
<tbody>
<tr>
<td>present reports according to legal and enterprise requirements</td>
</tr>
<tr>
<td>review maintenance strategies and goals within the enterprise, continuous improvement and planning processes.</td>
</tr>
</tbody>
</table>

### Required knowledge

Knowledge of:

- plant and equipment falling under the scope of the maintenance program, including steam generation systems, refrigeration systems, water and effluent systems, processing and production equipment, and building
- maintenance issues related to the enterprise and their impact on the productivity of the plant
- cost elements in maintenance system costing and budgeting
- relevant legislation and regulations (e.g. food safety and food standards), and industrial agreements, and explain the implications for plant and equipment maintenance
- costs resulting from poor maintenance and the benefits of a preventative maintenance system
- impacts of poor maintenance on meat safety, meat and/or product quality, occupational and environmental safety.

EVIDENCE GUIDE

operations

- workplace projects with focus on company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Maintenance** may be:

- preventative
- responsive
- routine.

**Maintenance system goals and performance indicators may include:**

- reductions in backlogs
- changes in attitude (e.g., commitment to elimination of defects before they cause breakdowns, prevention, and end to equipment abuse)
- costs
- frequency of breakdowns
- length of time out of action
- roles or users of maintenance and problem solving
- time of repairs.
### RANGE STATEMENT

**Stakeholders** may include:
- company owners, directors, shareholders and financiers
- competitors
- management and employees
- suppliers, customers and consumers
- unions and employer associations.

**Maintenance teams** may include:
- engineers
- boiler makers
- plumbers and gas fitters
- electricians
- carpenters
- labourers.

**Maintenance policies** may include:
- preventative maintenance strategies, such as:
  - replacing all parts of a certain type when one fails
  - replacing all parts after expected or average service life
  - servicing all equipment according to supplier recommendations and at fixed time intervals after average service life
- responsive maintenance strategies, such as:
  - defined maintenance priorities (e.g. chain breakdowns, chillers overheating versus leaking taps)
  - defined repair or service turnaround times (e.g. within two hours or days of maintenance report).

**Devolution** strategies may include:
- encouraging work areas to prioritise maintenance within specified budget
- including maintenance personnel in problem-solving teams
- linking responsive and preventative maintenance to safety requirements and committees
- rewarding work area or team identification and achievement of maintenance targets.

**Problem-solving strategies** may include:
- cross functional, problem solving, process improvement or maintenance teams
- suggestion boxes
- tool boxes, consultative committees and maintenance meetings.
### RANGE STATEMENT

**Maintenance problems** may include:
- breakdowns in lifting equipment, corning vats and smokehouses
- bug infested equipment (e.g. water in lubrication systems and electrical boxes)
- faulty air knives
- faulty thermostats in chillers, freezers, cool stores, display cabinets and hydraulic equipment
- leaking taps, hoses and pipes
- rust, peeling paint and surface coatings.

**Communication** may:
- be with culturally, ethnically and socially diverse individuals and groups
- involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data
- occur in a variety of sensitive, conflictive, collaborative and supportive environments
- be formal or informal and involve face to face and technological or electronic methods
- require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats
- require persuasion, negotiation and assertiveness skills.

**Mathematical skills** may relate to:
- technical and financial modelling
- calculations
- interpretation and analysis
- complex actual and hypothetical mathematical information, such as:
  - product and product quality
  - financial operations
  - personnel
  - operations
  - sales and turnover
  - exports.

**OHS requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which
### RANGE STATEMENT

</tr>
<tr>
<td>• requirements set out in standards and codes of practice.</td>
</tr>
</tbody>
</table>

### Regulatory requirements may include:

- animal welfare
- commercial law, including fair trading and trade practices
- consumer law
- corporate law, including registration, licensing and financial reporting
- environmental and waste management, and sustainable work practices
- equal employment opportunity (EEO), anti-discrimination and sexual harassment
- Export Control Act
- hygiene and sanitation requirements
- industrial awards and agreements
- relevant regulations
- state and territory regulations regarding meat processing
- taxation

### Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
### RANGE STATEMENT

- the ability to perform the task to production requirements
- work instructions.

**Maintenance costs** include:

- service costs:
  - costs associated with the maintenance service, including labour
  - the cost of parts and materials
  - maintenance facilities
  - equipment and tools
  - training.
- breakdown costs:
  - costs associated with the loss of production, including damaged or destroyed product
  - under-used labour
  - wasted energy and utilities
  - loss of contract or contract penalties
  - reduced capacity.

**Impacts of poor maintenance** on meat safety and meat and product quality may include:

- contamination, including physical (e.g. rust, dust, metal and moisture) and microbiological
- damaged carcases or product
- refrigeration breakdowns causing incorrect temperatures and chilling rates causing toughening, rancidity, weight loss and micro-contamination.

MTMPS5605C Manage utilities and energy

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to identify enterprise utilities and energy requirements, and to manage their use, control waste and control costs. Utilities and energy are a significant cost component in the production of meat and meat products. Their efficient use affects the quality of the product, costs and profits. |

Application of the Unit

| Application of the unit | This unit is of particular interest to maintenance, engineering, production, environment and finance personnel working in a meat industry context. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify enterprise utility and energy requirements and costs | 1.1. Utility and energy requirements for all areas and operations of the enterprise are identified consistent with workplace, customer and regulatory requirements.  
1.2. Current utility and energy costs are measured and impact on profitability is identified.  
1.3. Enterprise’s future utility or energy requirements are determined consistent with enterprise goals and directions.  
1.4. Utility and energy requirements and costs are included in all forward planning. |
| 2. Monitor and control enterprise utility and energy use | 2.1. Performance standards and indicators are established, using agreed benchmarks and best practice methods.  
2.2. Team commitment to utility or energy management is developed using consultative approaches.  
2.3. Systems for the accurate monitoring of utility and energy use and costs are developed.  
2.4. Enterprise operations are audited to assess use, misuse and waste of utilities and energy.  
2.5. Enterprise performance is monitored and systems and operations are adjusted or corrected.  
2.6. Contingency plans for failure of utility or energy supply and service are prepared.  
2.7. Workplace safety systems and procedures are updated to include requirements for safe use of utilities or energy. |
| 3. Review performance and utility or energy costs | 3.1. Strategies and/or procedures for more efficient use of utilities or energy and the minimisation of wastage are identified, evaluated and recommended.  
3.2. Alternative utility or energy sources and services are assessed for availability, suitability for enterprise product, contribution to sustainability, operations and cost.  
3.3. Appropriate utility or energy services are recommended and utility or energy supply conditions and charges negotiated.  
3.4. Enterprise utility and energy performance is monitored and measured.  
3.5. Performance information, including team feedback, is analysed and reported to stakeholders. |
Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- analyse utility or energy tariffs and charges and options available to the enterprise
- apply relevant mathematical and communication skills
- communicate effectively with internal and external personnel with diverse roles, communication skills and cultures to determine utility or energy requirements and use
- calculate and analyse enterprise utility or energy costs and their impact on production costs
- consult with personnel across the enterprise to identify and resolve utility or energy waste problems
- determine current and future utility or energy requirements for enterprise operations, including analysing company goals, conducting utility or energy audits to identify consumption patterns and inefficiencies, measuring enterprise utility or energy consumption and cost, including waste, against agreed benchmarks
- develop performance measures and indicators for utility or energy consumption and costs, based on benchmarks and enterprise goals
- develop strategies for minimising and optimising utility or energy usage, including assessing and monitoring equipment performance, introducing energy efficient plant and equipment, comparing sources and recommending utility or energy substitution, changes to procedures, and assessing and minimising non-working day use of utilities (e.g. lighting)
- evaluate, cost and recommend alternative plant, equipment, procedures and utility or energy sources to improve efficiency, including researching sources, reviewing enterprise procedures, evaluating suitable alternatives for enterprise products and operations, and calculating initial and maintenance costs and payback periods
- identify and apply relevant Occupational Health and Safety (OH&S) requirements
- include safety requirements of utility or energy use in workplace health and safety systems and procedures
- interpret and review performance information and recommend strategies for
REQUIRED SKILLS AND KNOWLEDGE

MTMPS5607C Manage and improve meat industry plant operations

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to plan and monitor an enterprise's operations from the receipt of stock and material, through processing and manufacturing options, transport, distribution and storage, to delivery to the customer. It also includes the skills and knowledge to ensure that the operations are managed in a cost efficient and effective way. |

Application of the Unit

| Application of the unit | This unit is particularly suitable for operations managers, or production managers with plant or department level responsibility for operations within a meat industry context. It provides all production personnel with an integrated approach to operations management. At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

| 1. Assess operational requirements | 1.1. Enterprise directions, goals and forecasts are analysed to establish the parameters for enterprise operations.  
1.2. Industry, market and enterprise information is gathered and analysed to determine short and medium term implications for enterprise operations.  
1.3. *Operational budgets* and strategies to achieve *forecasts* are prepared and *resource* requirements obtained.  
1.4. Operational productivity and performance measures to meet enterprise goals are determined. |
| 2. Plan operations for optimum efficiency and effectiveness | 2.1. Work organisation and performance patterns are reviewed for safety, efficiency and to maximise team contribution and satisfaction.  
2.2. *Systems and technologies* are developed to facilitate cost efficient and effective operations and to meet production, quality, waste, environmental and safety targets.  
2.3. Product/process flows are reviewed for optimum performance.  
2.4. Systems monitoring and control procedures are established to maximise performance.  
2.5. Contingency plans are prepared.  
2.6. Operational assets are identified and asset management strategies are recommended.  
2.7. Action plans to implement change are prepared. |
| 3. Manage operations | 3.1. Operational requirements for inputs, personnel, equipment and transport are identified.  
3.2. Plans and schedules are prepared to meet customer requirements.  
3.3. Systems to control costs, energy consumption, waste, environmental impact, quality and food safety are implemented.  
3.4. Work organisation strategies are planned and reviewed in consultation with the workforce.  
3.5. Opportunities to maximise yield and gain commercial value from total production are identified and evaluated.  
3.6. Operations are monitored and adjusted, consistent with operational plans and budgets. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
| 3.7. Consultation and collaboration are used to identify and resolve problems promptly, efficiently and effectively. |

4. Evaluate performance

| 4.1. Data is collected and analysed to determine achievement of operational performance targets. |
| 4.2. Performance information and implications are conveyed to stakeholders. |
| 4.3. Recommendations and outcomes are included in the review of enterprise business plans, directions and goals. |
| 4.4. Systems and procedures are reviewed to facilitate the achievement of enterprise plans and goals. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- analyse enterprise forecasts for orders, livestock and raw material availability and prices, and determine the operational requirements to achieve enterprise goals
- analyse performance data to determine achievement of profit, productivity and other targets
- analyse the implications of blockages or stoppages (e.g. breakdowns, no stock or materials and staff shortages) at particular points in the process flow, including upstream and downstream effects and costs
- outline enterprise directions, goals and ethical standards and analyse the implications for enterprise operations
- assess current operational capability to achieve enterprise goals, including an analysis of current technology and configurations and mixes of personnel and processes, and a review of procedures to identify any gaps or shortfalls in capability of resources
- apply methods and theories of workplace or work team organisation and job design, and review to enterprise operations
- apply relevant communication skills
- apply scheduling techniques and principles to enterprise operations
- consult, collaborate and negotiate with personnel from all levels and areas of the
REQUIRED SKILLS AND KNOWLEDGE

<table>
<thead>
<tr>
<th>plant</th>
</tr>
</thead>
<tbody>
<tr>
<td>• maintain currency of knowledge through independent research and/or professional development</td>
</tr>
<tr>
<td>• develop action plans to implement changes to improve performance</td>
</tr>
<tr>
<td>• evaluate and recommend strategies for achieving enterprise goals and forecasts, including assessment of alternative configurations/mixes of personnel, processes and work organisation structures and calculating the impact changes in operations have on the productivity of the enterprise/department and the preparation of resource proposals</td>
</tr>
<tr>
<td>• evaluate the costs, benefits, consequences and implications of adopting alternative risk management strategies and make recommendations to senior management</td>
</tr>
<tr>
<td>• identify and apply relevant <em>Occupational Health and Safety (OH&amp;S)</em> and workplace requirements</td>
</tr>
<tr>
<td>• manage operations for area of responsibility, including developing operational strategies and schedules in response to short, medium and long term forecasts and plans for the enterprise; obtaining and scheduling required resources, including raw materials, personnel, equipment, refrigeration, storage and transport; and monitoring product or process flow</td>
</tr>
<tr>
<td>• maximise value of enterprise operations, including identifying opportunities for gaining commercial value from co-products and <em>by-products</em>, evaluating relative returns on enterprise products to determine overall impact on profitability, controlling waste and energy consumption</td>
</tr>
<tr>
<td>• minimise workplace conflict and build positive relationships using consultation, negotiation and problem-solving strategies</td>
</tr>
<tr>
<td>• monitor enterprise performance, including developing productivity and operational performance measures for enterprise operations, linking monitoring systems to quality requirements and performance measures, interpreting performance information and taking/authorising corrective action</td>
</tr>
<tr>
<td>• prepare and monitor operational budgets, including identification of operational cost components, calculation of resource requirements, calculation of cost per unit of finished product (e.g. cost per kilogram dressed weight and processed weight), monitoring of costs, taking action to adjust budget variations, including budget requirements and projections in enterprise financial planning</td>
</tr>
<tr>
<td>• prepare contingency plans to minimise disruption to production</td>
</tr>
<tr>
<td>• present reports according to legal and enterprise requirements</td>
</tr>
<tr>
<td>• research and evaluate available technologies and systems for suitability for enterprise products and directions or plans</td>
</tr>
<tr>
<td>• take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices organisation or technology</td>
</tr>
<tr>
<td>• use detailed product knowledge to describe the processing or production requirements necessary to maintain the quality of enterprise products (e.g. handling, processing methods, equipment, and storage for different species and breeds)</td>
</tr>
</tbody>
</table>
REQUIRED SKILLS AND KNOWLEDGE

- use *mathematical skills* to analyse performance relating to costs, waste, production levels, yields
- utilise available information and communications technology (e.g. productivity analysis and scheduling software).

Required knowledge

Knowledge of:

- enterprise's *scope of operations*
- enterprise budget planning and management processes and cycles
- *regulatory requirements* affecting enterprise operations
- potential impact of operational changes on personnel and develop strategies to minimise negative effects on individuals, the team and enterprise operations
- factors which affect the productivity of the enterprise, including workforce costs, capital investment, materials, waste and overheads.
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

## Context of and specific resources for assessment

Resources may include:

- a real work environment
- relevant documentation, such as:
  - manufacturer instructions and operations manuals
  - regulatory requirements
  - workplace policy and procedures
  - relevant equipment and materials.

## Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
### EVIDENCE GUIDE

- workplace projects with focus on company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

<table>

</tbody>
</table>

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Operational budgets and expenditure may include:**

- asset management
- capital expenditure
- environmental management
- equipment and technology
- livestock, raw materials and ingredients, packaging and other supplies
- replacement, repair and maintenance
- risk management strategies
- staffing levels
- utilities.

Operational budgets may be developed using:

- activity based costing approaches
- limited input approaches or global budget approaches.
### RANGE STATEMENT

**Forecasting methods** may:

- be qualitative and include market research, customer surveys, executive team consensus, sales staff information and feedback
- be quantitative and include long range data from internal and external sources, statistical analysis methods of linear regression, moving averages, weighted moving averages and trend analysis
- include data relating to:
  - livestock from contacts or cattle markets
  - manpower availability
  - prices, exchange rates and inflation
  - sales and consumption patterns
  - seasonality, cycles and growth patterns
  - other factors.

**Resources** to support operations may include:

- administrative systems and procedures
- buildings, plant and equipment, technology, and energy and water supply
- financial resources
- human resources
- stock ingredients and materials.

**Enterprise systems and technologies** include:

- customer service
- food safety
- production, processing, manufacturing or preparation
- quality
- resources (e.g. personnel and finances)
- waste and environmental management
- workplace safety.

**Stakeholders** may include:

- company owners, directors, shareholders and financiers
- competitors
- management and employees
- suppliers, customers and consumers
- unions and employer associations.

**Communication** may:

- be formal or informal and involve face to face and technological or electronic methods
- be with culturally, ethnically and socially diverse individuals and groups
- involve the preparation of reports which may be complex, contain information from a range
**RANGE STATEMENT**

| of technical sources and include mathematical and graphic information and data | • require reading and interpreting workplace related documentation
| • occur in a variety of sensitive, conflictive, collaborative and supportive environments | • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats |
| • require persuasion, negotiation and assertiveness skills. |  

**OHS requirements** may include:

| enterprise OH&S policies, procedures and programs | • hygiene and sanitation requirements |
| • OH&S legal requirements | • Personal Protective Equipment (PPE) which may include: |
| • coats and aprons | • ear plugs or muffs |
| • eye and facial protection | • head-wear |
| • lifting assistance | • protective boot covers |
| • protective hand and arm covering | • protective head and hair covering |
| • uniforms | • waterproof clothing |
| • work, safety or waterproof footwear | • requirements set out in standards and codes of practice. |

**Workplace requirements** may include:

| enterprise-specific requirements | • OH&S requirements |
| • Quality Assurance (QA) requirements | • Standard Operating Procedures (SOPs) |
| • the ability to perform the task to production requirements | • work instructions. |

**By-products** may include:

| fellmongery skins and hide processing | • food ingredients and processing (e.g. gelatins) |
### RANGE STATEMENT

- pharmaceutical and medical products (e.g. valves, organs, collection and processing of foetal blood)
- rendered products (e.g. meat meal and tallow).

**Mathematical skills** may:
- be complex and relate to product and product quality, financial operations, personnel, operations, sales and turnover, and exports
- relate to complex actual and hypothetical technical and financial modelling, calculations and interpretation or analysis.

**Scope of operations** may include interactions with:
- producers and suppliers
- meat processing
- further processing, including smallgoods manufacture
- food service operations and wholesale and retail operations
- storage
- transport and distribution
- customers.

**Regulatory requirements** may include:
- animal welfare
- commercial law, including fair trading and trade practices
- consumer law
- corporate law, including registration, licensing and financial reporting
- environmental sustainability and waste management
- Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment
- Export Control Act
- industrial awards and agreements
- relevant regulations
- state and territory regulations regarding meat processing
- taxation.

MTMPS5608C Manage environmental impacts of meat processing operations

Modification History

Not applicable.
**Unit Descriptor**

| Unit descriptor | This unit covers the skills and knowledge required to assess the potential impacts of enterprise operations on the environment and implement cost effective strategies. Management of environmental impact is a priority across all sectors of the industry and the industry has made a considerable investment in developing best practice systems for the management and minimisation of environmental impact. The scope of the unit includes water quality, usage and waste, air quality, emissions, noise, odour, and the minimisation and disposal of solid wastes. |

**Application of the Unit**

| Application of the unit | This unit is suitable for managers with responsibility for environment matters and for plant engineers, production managers, chiller managers, quality managers working in a meat industry context. At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Determine environmental management strategy requirements** | 1.1. Enterprise’s ethical, community and legal obligations for environmental management are ascertained.  
1.2. Enterprise operations are examined to identify potential environmental impacts.  
1.3. Competitive and economic advantages and disadvantages of environmental management strategies are analysed. |
| **2. Develop enterprise commitment to environmental management** | 2.1. Management commitment is obtained and enterprise environmental management policy formulated.  
2.2. Agreed environmental management strategies are built into enterprise planning, operating systems and review processes.  
2.3. Consultative processes are developed to resolve environmental issues and problems.  
2.4. Environmental management roles and responsibilities are incorporated into job functions, position descriptions and Standard Operating Procedures (SOPs).  
2.5. Communication and training strategies to inform and support stakeholder commitment are developed and implemented. |
| **3. Prepare environmental management strategy** | 3.1. Enterprise requirements for expert assistance and advice are identified.  
3.2. Environmental risks are identified and evaluated.  
3.3. Requirements of environmental management systems are determined.  
3.4. Alternative environmental management strategies and systems are evaluated for efficiency, effectiveness and sustainability, according to enterprise requirements and regulatory compliance.  
3.5. Opportunities for minimising environmental impact and maximising commercial value of waste or waste treatment by-products are identified.  
3.6. Resource requirements are calculated and included in enterprise planning processes.  
3.7. Performance criteria for environmental management are developed. |
| **4. Implement and monitor environmental** | 4.1. Licences, permits, schedules and agreements are negotiated with regulatory requirements.  
4.2. Environment and waste management policies and |

**Required Skills and Knowledge**
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse and interpret current regulatory requirements, including local, state, national and international, for environmental management, such as environmental tolerance levels, and explain the implication for enterprise operations
- assess viability of gaining commercial value from waste, including the determination of commercial quantities, costs, returns and payback periods
- apply relevant mathematical and communication skills
- communicate effectively with internal and external personnel with diverse roles and cultures
- comply with regulatory requirements for managing enterprise environmental impact, including negotiation of agreements, plans, permits and licences with relevant environmental management authorities, confinement of environmental impacts within permissible limits and preparation of the enterprise for external audit where specified
- consult with internal/external stakeholders and external agencies to prepare contingency plans and emergency response procedures for environmental incidents
- develop individual and team capacity to achieve enterprise management policies and goals, including clear communication of individual and team responsibilities for minimising environmental impact, development of consultative processes and strategies to identify and resolve environmental issues, and identification and provision of appropriate training programs
- develop procedures for responding to community complaints and concerns
- evaluate and recommend environmental management systems to meet enterprise needs, including the identification and audit of enterprise creation of waste and environmental impacts and evaluation of control and treatment systems suitable for enterprise operations, comparative costs, savings and minimisation of environmental impacts, such as wastewater disposal, measures to minimise nutrients and other contaminants in water, e.g. strategies to control air pollution, odour treatment processes and managing solid waste
- identify and apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- implement enterprise environmental management systems to minimise environmental impact, including the establishment of monitoring and testing regimes and record keeping systems; development of procedures for identifying, reporting and analysing the causes of environment non-conformances and incidents; development of control measures to prevent recurrence of environmental incidents, hazardous events and non-conformances
- monitor performance of the enterprise environmental management system, including the identification of performance standards based on industry best practice; collection and analysis of qualitative and quantitative performance data;
**REQUIRED SKILLS AND KNOWLEDGE**

- **benchmarking**: assessment of performance against standards and recommendations for improvement
- prepare and update enterprise environmental impact statements and environment management plans
- prepare information about the enterprise's environmental management strategy and progress for release to the public, consistent with enterprise ethical standards and regulatory requirements
- prepare reports and recommendations for senior management, using analysis of complex information and language, and presentation styles appropriate for the purpose
- present reports according to legal and enterprise requirements
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices and requirements or technologies
- utilise effective communication, negotiation and problem-solving skills in interactions with all stakeholders, including environmental authorities and agencies and community representatives
- utilise information and communications technology for research, data collection and analysis and reporting, including the use of statistical and modelling software, where available.

**Required knowledge**

Knowledge of:
- potential costs of prevention, assessment and control of environmental impact
- customer and consumer, including importing country, requirements for effective environmental management and the implications for enterprise operations
- enterprise requirements for **expert advice, assistance** and support
- major air, water and solid waste environmental impacts generated by the meat industry
- relevant environmental authorities, their jurisdictions, powers and the implications for enterprise operations.
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

#### Context of and specific resources for assessment

Resources may include:
- a workplace environment with typical operating and production conditions
- enterprise system information, including company Environmental Protection Authority (EPA) licences, environmental performance reports and data.

#### Method of assessment

Recommended methods of assessment include:
- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects with focus on company environment and conditions.

**Wastewater disposal** options may include:

- biological treatments
- disposal to surface waters
- land disposal
- primary and secondary treatment process
- screening, flotation and evaporation
- sewer disposal
- wastewater recycling.

**Measures to minimise nutrients** and other contaminants in water may include:

- dry cleaning before wash down
- improved manual plug change over for blood pit plug
- improved screening/filters in treatment plans and floor drains screens
- pondage, purification and filtering
- primary screening.

**Air pollution** may include:

- noise (e.g. on site operations and transport)
- odours related to production and transport on lairage of large animals
- vapours, gases (e.g. greenhouse gases), solids fallout.

**Odour treatment processes** may be physical, chemical or biological and include:

- activated carbon
- biofilters and bioscrubbers
- chemical oxidation (e.g. wet chemical scrubbing or ozonisation)
- dispersion (e.g. extraction hoods and dispersion stacks)
- thermal oxidation (e.g. incineration).

**Solid waste** may include:

- animal waste (e.g. non-commercial value hides and manure)
- meat and meat products (e.g. fat, bone and flesh)
- packaging materials (e.g. cardboard cartons, paper/plastic liners, vacuum packs and binding tapes)
- refuse from non-processing operations (e.g.

- Identification of alternative products (e.g. biodegradable packaging)
- Incineration.

### OHS requirements may include:

- Enterprise OH&S policies, procedures and programs
- Hygiene and sanitation requirements
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - Coats and aprons
  - Ear plugs or muffs
  - Eye and facial protection
  - Head-wear
  - Lifting assistance
  - Protective boot covers
  - Protective hand and arm covering
  - Protective head and hair covering
  - Uniforms
  - Waterproof clothing
  - Work, safety or waterproof footwear
  - Requirements set out in standards and codes of practice.

### Workplace requirements may include:

- Enterprise-specific requirements
- OHS requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- The ability to perform the task to production requirements
RANGE STATEMENT

- work instructions.

**Benchmarking** may include working with:
  - companies from other industries
  - internal departments
  - international or national industry standards
  - other companies or sites within the industry.

**Reports** may:
  - include analysis and response to complaints
  - include evaluation of alternative environmental management strategies and controls
  - include financial reports (e.g. cost/benefit analyses and budget reports)
  - include performance information, audit reports and environment management reports to meet licensing requirements
  - be complex
  - contain information from a range of technical sources and include mathematical and graphic information and data
  - need to be presented according to legal and enterprise requirements.

**Expert advice and assistance** may be sought from:
  - environmental engineers
  - environmental agencies
  - government departments.

## Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to prepare and manage Occupational Health and Safety (OH&S) plans and systems. It includes the development of a positive workplace health and safety culture and the development of systems, procedures and controls. Improved OH&S is a priority in the meat industry. Effective management of OH&S systems produces a safe environment and reduces the financial liabilities of the enterprise. This standard is consistent with the National Guidelines for Integrating OH&S Competencies into National Industry Competency Standards [NOH&SC: 7025]. |

## Application of the Unit

| Application of the unit | In the meat industry context, managers may have responsibility for OH&S or OH&S responsibilities within production, human resources (HR) or other roles. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Scope the workplace health and safety program | 1.1. Legal requirements and **obligations** for OH&S are identified and interpreted for the enterprise.  
1.2. Scope of enterprise operations and requirements for OH&S systems is determined, including requirements for management of **hazardous events**.  
1.3. Enterprise’s current system is documented and performance is analysed against internal and external benchmarks. |
| 2. Develop OH&S policies and plans | 2.1. Policies documenting and defining Chief Executive Officer (CEO)/organisational commitment to OH&S are developed.  
2.2. Enterprise goals and targets for **OH&S performance** are set for the short, medium and long term.  
2.3. Resource requirements for the operation of the system are identified and committed.  
2.4. Implementation plan detailing resources and strategies is prepared.  
2.5. **Communication** strategy for informing stakeholders of policies, obligations and responsibilities is prepared. |
| 3. Develop enterprise commitment to OH&S | 3.1. OH&S responsibilities and duties are incorporated in all relevant policies, position descriptions, operating procedures and work instructions.  
3.2. Enterprise OH&S policies, strategies and requirements include all enterprise personnel, contractors, suppliers and visitors on the work site.  
3.3. **Consultative and participative** mechanisms are established to facilitate the prevention, identification and effective and prompt resolution of OH&S issues.  
3.4. OH&S issues, including hazard and risk identification and control, are considered in the planning, design and evaluation of job design, procedures, technology, work/process flows, plant layout and construction. |
| 4. Develop and maintain procedures for identifying hazards | 4.1. **OH&S records** are analysed to determine trends.  
4.2. Existing and potential hazards are correctly identified.  
4.3. Hazard identification procedures are developed and integrated within enterprise procedures and systems. |
<p>| 5. Manage and maintain | 5.1. Risks determined by the identification of hazards are... |</p>

<tbody>
<tr>
<td>procedures for assessing risks</td>
<td>5.2. Procedures for assessment of risks are developed and integrated within enterprise procedures and systems.</td>
</tr>
</tbody>
</table>
| 6. Manage and maintain procedures for controlling risk | 6.1. Risk control measures are developed and implemented, consistent with the hierarchy of control and regulatory requirements.  
6.2. Procedures for control of risks are based on the hierarchy of control and integrated into enterprise procedures and systems.  
6.3. Interim control measures are replaced with permanent measures to control risks at the source.  
6.4. Resources to enable implementation of new or permanent control measures are sought and included in enterprise planning processes. |
| 7. Maintain enterprise commitment to OH&S goals | 7.1. Training is resourced, planned and delivered to support commitment to and compliance with regulatory and enterprise requirements for OH&S.  
7.2. Enterprise, team and individual obligations for progress towards OH&S goals are presented clearly and are regularly updated.  
7.3. Enterprise operations and procedures are monitored to ensure the effective adoption of OH&S procedures according to enterprise and regulatory requirements. |
| 8. Manage and maintain procedures for hazardous events | 8.1. Potential hazardous events are correctly identified.  
8.2. Potential community health hazards are identified and notified appropriately.  
8.3. Local communities, and emergency and community health services and authorities are consulted in the control of hazardous events and community health incidents. |
| 9. Continuously improve OH&S performance | 9.1. OH&S data and record keeping systems are maintained and secured.  
9.2. Performance data, including team feedback, is collected and analysed against enterprise goals and targets.  
9.3. Performance implications are conveyed to stakeholders.  
9.4. Compliance with enterprise and mandatory OH&S requirements is monitored and reported.  
9.5. Systems and procedures are updated for legislative, |

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

**Ability to:**

- access, where appropriate, *specialist external advice* to assist in the development of OH&S systems and plans
- analyse the impact of *workforce characteristics* and enterprise communication patterns and culture on OH&S system design, implementation and operation
- apply analysis of enterprise culture, including ethical standards and values, communication systems and workforce characteristics to the development of effective OH&S consultative processes
- apply principles and procedures for hazard identification, risk analysis and hierarchy of controls in any or all areas of the workplace
- apply problem-solving strategies, such as developing practical and creative solutions, showing independence, developing a range of strategies to resolve problems, testing assumptions, and addressing customer and workplace concerns
- collect, analyse and report complex OH&S information to stakeholders using a variety of formats appropriate for the purpose and the audience
- consult with the community to develop strategies to minimise community health and safety impacts of enterprise operations (e.g. hazardous events and Q fever from stockyards)
- maintain currency of knowledge through independent research and/or professional development
- develop and monitor systems to ensure workforce ownership of and compliance with enterprise safety procedures, including establishing OH&S consultative strategies and processes, mandatory workplace safety committees and provision of training
- develop hazardous events plans in consultation with appropriate workplace personnel and external agencies, including emergency services and government agencies
- establish record management systems to monitor compliance, including mandatory notifications and reporting, mandatory licences and certificates, registers, listings and labelling of regulated materials
- identify and apply relevant communication and *mathematical skills*
### REQUIRED SKILLS AND KNOWLEDGE

- identify and apply relevant **workplace** and regulatory requirements
- identify and interpret the implications, obligations and requirements of relevant legislation, regulations, guidelines, codes of practice, Australian standards for health and safety for the enterprise’s directors, management and workforce
- identify appropriate industry or enterprise benchmarks for OH&S performance
- improve health and safety performance, including developing OH&S plans and strategies, acting on performance information, developing continuous review processes, including recommendations in the OH&S planning process
- integrate enterprise OH&S policies, systems and procedures with relevant organisational management systems and procedures, including the inclusion of OH&S responsibilities in all relevant position descriptions/procedures and work instructions, and strategies for ensuring visitor and contractor compliance with enterprise health and safety policies and procedures
- monitor enterprise health and safety performance, including analysing **health and safety information, and reports** measuring performance against enterprise goals, targets and agreed benchmarks
- observe standard workplace OH&S requirements during performance of duties
- prepare action plans which identify goals, managerial responsibilities and operational strategies for OH&S
- prepare and monitor enterprise training plan for all levels of the organisation to support workforce commitment and contribution to workplace health and safety
- present reports according to legal and enterprise requirements
- set enterprise health and safety goals and targets through consultation with stakeholders and analysis of enterprise OH&S data
- systematically analyse the causes of accidents, incidents and work-related **injuries and illnesses** and take corrective action by identifying and introducing programs for reducing accidents and injuries
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices or requirements or technologies
- update enterprise policies, plans and practices for changes in relevant legislation, regulation, codes of practice and guidelines
- utilise available information and communications technology, including modelling and evaluation software, to collect, monitor, analyse and report enterprise safety data.

### Required knowledge

Knowledge of:

- enterprise requirements for external expertise and assistance in the development of OH&S systems and plans
- impacts of enterprise OH&S policies, systems and procedures on all organisational management systems and operations, including processing and production, maintenance, contractors, distribution and administration
### REQUIRED SKILLS AND KNOWLEDGE

- OH&S hazards, risks and controls relevant to enterprise operations, procedures and products
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

*These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.*

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

Resources may include:

- a workplace with typical operating and production conditions
- enterprise system information.

### Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects with focus on company environment and conditions.
**EVIDENCE GUIDE**

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specific OH&S **obligations** and requirements may include:

- duty of care under OH&S legislation and common law
- hazards management
- OH&S representative and consultative mechanisms and issues resolution provisions
- security and confidentiality relating to individual OH&S records
- training.

**Hazardous events** and community health hazards may include:

- lairage of livestock carrying Q fever and other zoonotic diseases
- refrigerant leaks
- seepage from holding ponds.

**Measuring of **OH&S performance** may include:**

- average time lost rate, and days lost per reporting period
- costs, including preventative, rehabilitation and compensation
- reported incidents, accidents, incident rates, and reports by types of accidents and incidents.
## RANGE STATEMENT

### Communication may:
- be inclusive of the cultural, ethnic and social diversity of individuals and groups
- involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data
- involve reading and interpreting workplace documentation
- occur in a variety of sensitive, conflictive, collaborative and supportive environments
- may be formal or informal and involve face to face and technological/electronic methods
- require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats
- require persuasion, negotiation and assertiveness skills.

### Stakeholders may include:
- company owners, directors, shareholders and financiers
- competitors
- emergency services (e.g. ambulance, hospital, fire, police and rescue)
- insurance agencies, brokers and underwriters
- local community
- management and employees
- OH&S agencies and government departments
- suppliers, customers and consumers
- unions and employer associations.

### Consultative and participative processes may include:
- continuous improvement and review
- inclusion of OH&S in other consultative processes and forums (e.g. consultative committee or maintenance meetings)
- involvement of workforce at all levels in problem solving, management and monitoring of OH&S, including inspections, audits, risk assessment and risk control
- OH&S representatives and/or committees
- procedures for reporting hazards, risks and issues.

### OH&S records may include:
- audit and inspection reports
- environmental monitoring and health

- technical and financial modelling
- calculations
- interpretation and analysis
- complex actual and hypothetical
- mathematical information, such as:
  - product and product quality
  - financial operations
  - personnel
  - operations
  - sales and turnover
  - exports.

*Workplace requirements* may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

*Health and safety information and reports* may include:
- audit reports, accident investigation reports, and financial reports relating to premiums, costs and claims
- detailed, summarised, expanded or synthesised information
- oral, written, graphic, technical or statistical information
- sketches, photographs, video or audio taped information.

*Occupation injuries and illnesses* may include:
- cuts, sprains and strains
- substance abuse
- zoonotic diseases.

MTMPS5610C Manage transportation of meat, meat products and meat by-products

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to schedule and monitor the hygienic, safe and secure transportation of meat, meat products and meat by-products, for domestic or international markets. The efficient transportation of meat, meat products and meat by-products results in the satisfaction of customer requirements. |

Application of the Unit

| Application of the unit | This unit is of use to livestock buyers and coordinators, transport managers and finance managers operating in a meat industry context. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

meat, meat products and meat by-products to improve customer service | and reviewed for effectiveness and efficiency.
6.2. Customer feedback and requirements are included in review of transport procedures and schedules.
6.3. Team is involved in continuous improvement processes.
7. Establish effective communication with customers | 7.1. Customer requirements are determined.
7.2. Customer complaints are resolved promptly.
7.3. Communication strategies are inclusive of the cultural, ethnic and social diversity of individuals and groups.
8. Produce reports | 8.1. Reports are produced according to legal and enterprise requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- analyse throughput, production, storage requirements, meat safety, product specifications, customer requirements, orders and the purchasing or scheduling of appropriate transport services
- apply problem-solving skills to resolve transportation issues
- communicate effectively with regulatory authorities and stakeholders
- maintain currency of knowledge through independent research or personal development
- develop supplier quality criteria including audit requirements for the purchase of transport services
- establish systems for the completion and certification of product transport documentation
- identify and analyse transportation options; develop procedures to inform enterprise personnel, customers and contractors of changes in schedules
- apply relevant mathematical skills
- identify and apply relevant OH&S requirements
- present reports according to legal and enterprise requirements
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices or requirements
### REQUIRED SKILLS AND KNOWLEDGE

- **technologies**
  - use available communication and information technology systems to monitor transport purchase, schedule and *track* consignments, collect and analyse performance information
  - work effectively as an individual and as a team member.

#### Required knowledge

Knowledge of:

- food safety requirements for meat and meat product transport vehicles
- regulatory and *workplace requirements* relating to the transportation of meat, meat products and meat by-products
- potential impact and costs of inappropriate transportation of meat, meat products and meat by-products, including public liability and loss of custom
- public and OH&S obligations relating to the transport of meat, meat products and meat by-products
- requirements for maintaining product quality during transportation.

  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

Systems for the tracking and trace back of consignment may be manual or electronic and include:

- communication systems
- computerised tracking systems
- consignment, despatch and delivery documentation
- export documentation
- log books
- product certification.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Select packaging                  | 1.1. Product is bagged in appropriately sized bag.  
1.2. Product is arranged in appropriate container.                                                                                                                                                                     |
| 2. Set machine requirements          | 2.1. Requirements in preparation for start-up of vacuum packing machine are completed to **workplace requirements**.  
2.2. Machine requirements are set correctly.  
2.3. Start-up procedures are followed to workplace requirements.  
2.4. Packing materials are attached and changed to workplace requirements and product specification.  
2.5. Bagged meat is placed on the vacuum packing machine or in the formed pockets as appropriate.  
2.6. Open ends of bags are placed flat across the sealing bar or meat contained in pockets as appropriate.  
2.7. Occupational Health and Safety (OH&S), **hygiene and sanitation requirements** are followed.                                                                                                               |
| 3. Operate machinery                 | 3.1. Vacuum packaging machine is operated correctly in accordance with workplace requirements.  
3.2. A variety of products is vacuum packed to customer specifications, hygiene and sanitation, OH&S and Quality Assurance (QA) requirements at a speed that is the same as production requirements.  
3.3. Bags are shrunk using hot water baths where appropriate.  
3.4. Bagged cuts are left to drain.  
3.5. Shut-down procedures are performed to workplace requirements.                                                                                                                                               |
| 4. Perform routine maintenance       | 4.1. Dyes are changed according to workplace requirements.  
4.2. Corrective action is taken when leaks and defects are identified, according to workplace requirements.  
4.3. Plates are changed as required.                                                                                                                                                                               |
| 5. Ensure quality of packaging and   | 5.1. Bagged cuts are inspected for leaks and other defects.  
5.2. Bagged cuts are placed in cartons according to specifications.                                                                                                                                                  |
| product                              |                                                                                                                                                                                                                      |
# Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

## Required skills

Ability to:

- prepare for vacuum packaging according to OH&S and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- *explain* defects that can occur during packaging
- demonstrate hygienic cleaning of equipment
- work effectively as an individual and as a team member
- demonstrate hygienic work practices for vacuum packing
- apply relevant *communication* and *mathematical skills*
- apply relevant *regulatory requirements*
- manage time and priorities
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

## Required knowledge

Knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific OH&S requirements for vacuum packing
- purpose of vacuum packaging
- relevant communication and mathematical skills
- relevant regulatory requirements
- general operating principles, including start-up and shut-down procedures
- manufacturer’s and workplace requirements for vacuum packaging of product
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency should be demonstrated at the normal speed of production. |

### Context of, and specific resources for assessment

| Assessment should take place in an operating meat processing plant or food service operation. |

### Method of assessment

<table>
<thead>
<tr>
<th>Recommended methods of assessment include:</th>

EVIDENCE GUIDE

than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific procedures
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms

MTMPSR202B Apply environmentally sustainable work practices

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to reduce negative environmental impacts of meat industry work practices. |

Application of the Unit

| Application of the unit | This unit addresses the knowledge, processes and techniques necessary to support environmentally sustainable work practices. It is relevant for personnel in all sectors and areas, and at all levels of the meat processing industry. It is particularly suitable for production personnel in meat processing, smallgoods operators and meat retailing personnel. |

1.3. *Wastes and emissions* created by own work role are identified. |
| 2. *Comply* with environmental regulations | 2.1. *Regulatory requirements*, work instructions and procedures are followed to ensure compliance.  
2.2. Non-conformances are identified and corrective action procedures are followed. |
| 3. Seek opportunities to improve resource efficiency | 3.1. Enterprise plans to improve environmental practices and resource efficiency are followed.  
3.2. Suggestions are made for improvements to workplace practices in own work area. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate a basic understanding of sustainability  
- interpret workplace information  
- report non-conformances  
- recognise and follow procedures, follow instructions and respond to change  
- relate to people from a range of social, cultural, ethnic backgrounds, and physical and mental abilities  
- apply relevant *communication* and mathematical skills  
- ask questions and clarify work requirements  
- work effectively as an individual and as part of a team  
- follow good housekeeping procedures and practices  
- apply relevant Occupational Health and Safety (*OH&S*), regulatory and *workplace requirements*  
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology  
- take corrective action according to workplace requirements
### REQUIRED SKILLS AND KNOWLEDGE

- Work with others to solve problems relating to environmental performance

#### Required knowledge

Knowledge of:

- Environmental and resource efficiency hazards and risks associated with own workplace and own work area
- **Workplace environmental management strategies** affecting own work practice
- Relevant environmental and resource efficiency systems and procedures for own work area
- Relevant OH&S, regulatory and workplace requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competence over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in this unit must be demonstrated under conditions that are the same as the speed of production and within the parameters of the role responsibilities.

### Context of, and specific resources for assessment

Assessment should be undertaken in an operating meat processing plant or food service operation.

### Method of assessment

Recommended methods of assessment include:
- demonstration - snapshot of performance
- quiz, question and answer
- observation of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Environmental and resource efficiency issues may include:
- minimisation of environmental risks
- maximisation of opportunities to improve business environmental performance
- promotion of more efficient consumption of resources including:
  - efficient energy use
  - efficient water use
  - minimisation of waste, through implementation of the waste management hierarchy.

Wastes and emissions may include:
- animal products such as blood, fat and manure
- contamination and polluted water
- direct and indirect generation of greenhouse gases
- emissions resulting from consumption of non-renewable resources e.g. diesel fuels, coal generated electricity, coal, gas including natural gas
- noise
- packaging, emissions, vapours and odours.

Regulatory requirements may include:
- AS/NZS ISO 14001:2004 Environmental Management Systems Requirements with guidance for use
**RANGE STATEMENT**

**Compliance** includes:
- meeting enterprise requirements
- meeting relevant federal, state and local government laws, by-laws and regulations.

**Communication** skills may include:
- listening and understanding
- reading and interpreting workplace-related documentation
- speaking clearly and directly
- sharing information.

**OH&S** requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Workplace requirements** may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Workplace environmental management strategies** may include:
- business plans incorporating capital investment in energy or water saving technology
- documented policies and procedures
- environmental management systems
**RANGE STATEMENT**

- environmental or sustainability targets and goals
- integrated OH&S, environment and/or quality management systems
- work plans to minimise waste, increase efficiency of water use etc.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare, operate and clean *processing equipment* used for curing and corning *product* | 1.1. Processing equipment is prepared according to manufacturer’s *specifications*, and Occupational Health and Safety (OH&S), *hygiene and sanitation*, and *workplace requirements*  
1.2. Processing equipment is operated according to manufacturer’s specifications, and OH&S, hygiene and workplace requirements.  
1.3. Processing equipment is cleaned according to manufacturer’s specifications, and OH&S, hygiene and workplace requirements. |
| 2. Prepare meat | 2.1. Meat is selected according to product specifications.  
2.2. Meat is prepared according to product specifications, and hygiene and workplace requirements. |
| 3. Prepare ingredients | 3.1. Ingredients are selected and prepared according to product specifications, and hygiene and workplace requirements. |
| 4. Prepare brines | 4.1. Required amount of water and other liquid and solid additives are added in correct order and mixed according to product specifications, and hygiene and workplace requirements.  
4.2. Brine solutions are prepared according to product specifications, and hygiene and workplace requirements.  
4.3. Hydrometer (salinometer) is used to check brine solution. |
| 5. Process meat | 5.1. Meat is cured or corned according to product specifications, health regulations and workplace requirements at a speed appropriate for production requirements.  
5.2. Processing is regularly monitored.  
5.3. Adjustments are made to processing as required to achieve product specifications. |
| 6. Store meat product | 6.1. On completion of processing, product is stored according to product specifications, and hygiene, regulatory and workplace requirements. |

### Required Skills and Knowledge
### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:

- identify meat cuts used in curing and corning
- identify various ingredients for curing meat and explain their use and purpose
- identify sub-standard product and address the problem according to workplace requirements
- follow recipes and procedures accurately
- explain the effects of curing on shelf life and taste of product
- activate processing equipment to assess its readiness for operational use
- operate mixing machines for required length of time
- operate adjustment tools and equipment correctly
- perform running adjustments according to workplace requirements and manufacturer's specifications
- pump meat correctly to avoid air pockets
- pump meat to increase original weight according to workplace requirements
- perform curing and corning according to workplace, OH&S, hygiene and regulatory requirements
- demonstrate the correct pickling procedure according to product specifications and workplace requirements
- wash residue from cured meats following removal from holding brine
- report any faults and adjustments required to processing equipment, either verbally or in writing, according to workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer's specifications
- apply relevant communication and mathematical skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- seek advice from appropriate sources when working with new products or equipment
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

Knowledge of:

- conditions under which equipment may need adjusting
- function of various additives and ingredients
- meat curing process
- purpose and effect of brine on meat
REQUIRED SKILLS AND KNOWLEDGE

- safe and correct operation of processing equipment
- health regulations which apply to curing and corned meats
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corned products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling to correct pump percentage and yield requirements
- selection criteria for meat for the curing or corned process
- relevant regulatory requirements
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment
- ‘osmosis’ in relation to the curing process
**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |
|---|---|

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.</th>
</tr>
</thead>
</table>

| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal production conditions.

Resources may include:
- real work environment
- relevant documentation such as:
  - manufacturer’s instructions or operations manuals
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials. |
|---|---|

| Method of assessment | Recommended methods of assessment include:
- quiz of underpinning knowledge
- simulation |
### EVIDENCE GUIDE

- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

## RANGE STATEMENT

- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Hygiene and sanitation requirements may include:
- relevant government regulations
- workplace requirements.

### Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### Explanations may:
- be presented orally, in writing using standard formats or using a range of communications technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use workplace, mathematical and technical language.

### Communication may:
- be with people from a range of cultural, social and ethnic backgrounds
- be with colleagues, superiors, customers, clients and external parties
### RANGE STATEMENT

- involve empathising with customers and work colleagues
- involve interpreting the needs of internal and external customers
- involve listening and understanding, speaking clearly and directly
- involve reading and interpreting workplace-related documentation
- involve the use of negotiation, persuasion and assertiveness skills
- relate to own work area and the wider work area
- require sharing of information
- require writing to audience needs.

**Mathematical skills** may include:

- accurate recording of temperature, time, volume, weight and quantity in standard formats or pro formas
- interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc
- operations involving percentages, comparisons and variations
- reading and interpreting analogue and digital measures including scales, pressured gauges, thermometers
- routine estimations and calculations using a range of specified formula and procedures
- use of calculators and computer software packages.

**Regulatory requirements** may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- federal, state and territory regulations regarding meat processing.

MTMPSR401C Coordinate contracts

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to coordinate the production, packaging and transportation of products to contracted markets according to enterprise, customer and legal requirements, and is relevant for contracts in local, national and international markets. The effective coordination of contracts through all stages of the production and distribution chain gives the meat industry a high profile in the marketplace, with a reputation for quality products and customer service. |

Application of the Unit

| Application of the unit | The breadth of this unit makes it particularly useful for small and micro businesses in the retail, meat processing, smallgoods manufacturing and food service areas. In a micro or small business one person would have responsibility for overseeing contract management. |

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Clarify characteristics of the client or market | 1.1. Characteristics of the client or market are analysed.  
1.2. Appropriate communication strategies are identified. |
| 2. Confirm enterprise and contractual requirements | 2.1. Market regulations, controls and requirements are identified.  
2.2. Contractual requirements are analysed and checked against production schedule.  
2.3. Negotiations with *agents*, *representatives*, *brokers* and clients are confirmed according to enterprise requirements and ethical standards.  
2.4. Contingency plans are put in place. |
| 3. Monitor production for clients and market | 3.1. *Supply of raw product* and ingredients is negotiated and confirmed, according to market and enterprise requirements.  
3.2. Production is scheduled to meet contract requirements.  
3.3. Product specifications, including customer, market requirements and Quality Assurance (QA) requirements, are met.  
3.4. Product is packaged to maintain quality of product and to meet customer and legal requirements. |
| 4. Coordinate transportation of product | 4.1. Transport, freight and storage is scheduled with carrier.  
4.2. *Documentation* is accurately completed.  
4.3. Insurance arrangements are confirmed. |
| 5. Facilitate financial transactions | 5.1. Costs, charges and payments are calculated accurately within enterprise policies and negotiated contracts.  
5.2. Costs, charges and payments are calculated accurately and in appropriate currency.  
5.3. Payments and receipts are monitored according to enterprise procedures. |
| 6. Monitor contract coordination effectiveness | 6.1. Performance against *targets* is assessed.  
6.2. Recommendations for improvement are made. |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply food safety and QA requirements as applicable
- apply problem-solving skills to resolve issues that impact on capacity to meet contractual obligations
- apply relevant mathematical skills
- calculate costs and prices for local, national and international markets, including the impacts of inter-market taxes, tariffs, duties, charges or exchange rates
- complete documentation accurately and on time
- work effectively as an individual and as part of a team
- use effective communication strategies, including cross cultural communication, to negotiate or confirm transactions in the market place e.g. new, distant and diverse markets
- determine implications for the enterprise of information relevant to the sale of meat and meat products in a local, national and international context (e.g. market regulations, agents' terms and conditions, etc)
- identify and apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- identify and follow freight, insurance and banking procedures
- liaise, as required, with agents, representatives and brokers
- prepare schedules and coordinate supply, production, packaging and transhipment of product to meet contract specifications and deadlines.
- review enterprise operations and processes to meet regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate communication and information technology to complete communication, scheduling, monitoring and reporting tasks as required

Required knowledge

Knowledge of:

- legislation, regulations and codes of practice that apply to the production, sale, packaging and transport of meat products in local, national or international markets including legislative requirements and regulations for meat and other ingredients
- standard documentation required for local, national or international trade
- product specifications and enterprise contractual obligations
- negotiation and communication strategies appropriate for use with government
REQUIRED SKILLS AND KNOWLEDGE

agencies and business clients

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare resource proposals    | 1.1. *Resource requirements* are identified in consultation with relevant personnel.  
  1.2. Resource planning information is collected in consultation with colleagues, including those who have a specialist role in resource management.  
  1.3. Objectives of the proposal are clarified and are consistent with enterprise directions and goals.                                                                 |
| 2. Evaluate feasibility of resource proposals | 2.1. Potential impact of resource allocation on enterprise operations is analysed.  
  2.2. Realistic options and outcomes are identified.  
  2.3. *Cost or benefit analyses* (including payback periods) are conducted and documented.  
  2.4. Risks associated with the proposal are identified and assessed.  
  2.5. *Targets, goals and performance measures* to measure performance of implemented strategies are developed. |
| 3. Gain commitment to resource proposals | 3.1. Proposal is refined and commitment to the objectives gained through consultation with colleagues or team.  
  3.2. Proposal is prepared for *presentation* and discussion.  
  3.3. Proposal and recommendations are presented to relevant personnel. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- assess potential impacts of the proposal on enterprise operations (e.g. production and personnel)  
- record, gather and consolidate financial information  
- apply relevant *mathematical skills*  
- assess risks associated with the proposal and recommend risk management strategies
**REQUIRED SKILLS AND KNOWLEDGE**

- calculate net present value, internal rate of return and payback periods
- prepare departmental/section **financial information** for inclusion in enterprise/department budget
- interpret and prepare cash flow statements, profit and loss statements and asset/liabilities statements
- recommend strategies for obtaining resources including finance (e.g. internal, external, re-allocation of resources, new resources or funds)
- prepare **financial proposals** which include costs, cash flow requirements, payback period and benefits
- consult and collaborate with colleagues and those potentially affected to refine the proposal
- promote the advantages and disadvantages of the proposal to relevant personnel and **stakeholders**
- work effectively as an individual and as a team member
- determine the need for and scope of the proposal, relevant to enterprise direction and goals
- develop performance indicators to measure outcomes of resource allocation/proposal
- identify and apply relevant **Occupational Health and Safety (OH&S)**, regulatory and **workplace requirements**
- research options, models and benchmarks relating to the proposal
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices and/or technology
- use **communication** skills to present and argue a case and prepare reports in language, style and format appropriate to the audience
- use technology to analyse, prepare and present a range of data

**Required knowledge**

Knowledge of:

- variable and fixed costs relating to the operations of the department/cost centre/enterprise
- **sources of information** in the enterprise (e.g. specialist personnel, information systems, documentation)
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
  - manufacturer's requirements
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials.

### Method of assessment

Recommended methods of assessment include:

- debriefs
- workplace project
- workplace referee or third-party report of performance over time.
**EVIDENCE GUIDE**

| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role |

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Resource proposals** may include:

- job redesign
- staffing levels or staff required (e.g. increase number on the chain to reduce the need for costly casuals, or additional sales assistant for busy periods)
- new equipment or systems (e.g. downward hide puller, new display cabinet in retail premises or new smokehouse)
- new procedures
- training.

Proposals may be presented orally or in written formats (hard copy and electronic) and include the use of multimedia aids.

**Resources** may include:

- equipment (e.g. maintenance, purchase, type, quantity and function)
- finance (e.g. capital and cash flow)
- personnel (e.g. staffing levels, shifts and allocation to work areas)

MTMPSR403C Facilitate achievement of enterprise environmental policies and goals

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to facilitate the achievement of the enterprise's environmental goals. It includes developing workforce understanding of and commitment to environmental responsibility and sustainability and the monitoring and minimisation of environmental impact and waste. |

Application of the Unit

| Application of the unit | Management of environmental impact is a high priority for the meat processing industry. All members of the industry have responsibility for environmental management and sustainability. This unit is particularly useful for first line managers including supervisors and team leaders in all sectors of the meat industry. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Clarify enterprise policies and responsibilities for minimising environmental impact | 1.1. Relevant *company documents*, policies and legal obligations are located and requirements for enterprise operations are clarified.  
1.2. Responsibilities for minimising environmental impact are explained to individuals and teams.  
1.3. Individual and team commitment to enterprise environmental management strategy is developed. |
| 2. Implement environment management procedures | 2.1. Work practices are planned with colleagues to ensure compliance with workplace and legislative environmental management requirements.  
2.2. Work practices are implemented in accordance with requirements specified in legislation and standards for environment protection.  
2.3. Coaching and mentoring supports colleagues in managing their responsibilities for environmental protection. |
| 3. Monitor, adjust and report performance | 3.1. Environmental impacts including pollutants, emissions and waste are measured according to enterprise procedures and regulatory requirements.  
3.2. Actual and potential problems are identified, rectified and reported promptly and decisively to ensure environmental safety.  
3.3. Environmental hazards are managed so that risks are minimised.  
3.4. Waste recycling, reduction and disposal is carried out within legislative and enterprise requirements.  
3.5. Recommendations to improve environmental and waste procedures and controls are submitted to designated persons and groups.  
3.6. Individuals and teams are informed of the results of environmental improvements in the workplace.  
3.7. Systems, records and reporting procedures are maintained according to legislative requirements. |
| 4. Investigate and report environmental non-conformance | 4.1. Non-conformance is investigated and dealt with according to legislative requirements.  
4.2. Coaching and mentoring supports colleagues to acquire and apply competencies to meet legislative requirements and the associated standards.  
4.3. Workplace environmental and waste minimisation practices are implemented, reviewed and improved to |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | ensure that non-conformance is not repeated.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- adjust and improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- consult with *stakeholders*, individuals and teams in the development and review of environmental procedures
- maintain currency of knowledge through independent research or professional development
- develop, in conjunction with managers, environmental targets for the section/department
- demonstrate consultation, negotiation and mentoring skills in interactions with employees, managers, peers and technical experts
- determine and take corrective actions to eliminate or minimise environmental risks
- ensure that procedures are followed by all employees in the area of responsibility
- explain environmental management requirements, procedures and responsibilities clearly to individuals and teams, in appropriate styles, formats and language
- identify and apply relevant *communication* and *mathematical skills*
- identify environmental hazards and conduct risk analyses
- interpret monitoring information and take corrective action
- apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- investigate, analyse and report environmental incidents, using enterprise procedures
- measure and monitor pollutants, emission and waste levels for the area of responsibility
- prepare reports containing technical and mathematical information for employees, managers and peers
- recognise limits of own expertise and indicate when additional expertise is required
- utilise informal and formal consultative strategies to build individual and team commitment to goals and procedures

### Required knowledge
**REQUIRED SKILLS AND KNOWLEDGE**

Knowledge of:
- company *goals, targets and performance measures*
- enterprise environmental management policies and legal obligations and responsibilities
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment conditions require demonstration of sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
  - workplace policies and procedures
  - regulatory requirements
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- assignments
- workplace project
- workplace referee or third-party report or performance over time.

Assessment practices should take into account any
EVIDENCE GUIDE

| Guidance information for assessment | relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Typically environmental impacts will include the production of pollutants, emissions and waste such as:
- animal products (e.g. blood, fat and manure)
- consumption of non-renewable resources
- contaminated and polluted water
- greenhouse gases, either directly or indirectly
- noise
- packaging
- vapours, odours.

Company documents may include:
- environmental licences
- environmental performance monitoring data, including sampling data
- status reports, plans and projections, technical manuals, industry journals, audit reports, incident reports, complaints registers and investigations
- work site environmental incident/accident reporting and investigation procedure.

Stakeholders may include:
- company owners, directors, shareholders, financiers
- environmental experts
- management and employees

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Develop a learning culture in the enterprise | 1.1. Personal performance demonstrates a commitment to, and the value of, learning.  
1.2. Learning and training strategies are included as an integral part of work and performance plans.  
1.3. Learning and training strategies and plans reflect the diversity of needs and opportunities.  
1.4. Resource proposals to support workplace learning are prepared and recommended.  
1.5. Consultation and negotiation with training and development professionals results in the planning and provision of learning, which enhances individual, team and organisational performance. |
| 2. Create learning opportunities to develop individual, team and organisational performance | 2.1. Workplace environments and contexts which facilitate learning are developed and supported.  
2.2. External and internal opportunities for learning are identified and promoted.  
2.3. Learning plans are developed collaboratively to meet individual, team and organisational goals.  
2.4. Individual and/or team access to, and participation in, learning opportunities is facilitated.  
2.5. Individual and/or team learning and training is planned and provided in consultation with learners and training specialists where appropriate. |
| 3. Facilitate and promote learning | 3.1. Workplace activities are used as opportunities for learning.  
3.2. Personnel are encouraged to take advantage of learning opportunities.  
3.3. Coaching and mentoring contribute effectively to the development of workplace knowledge, skills and attitudes.  
3.4. Benefits of learning are shared with others in the team and organisation.  
3.5. Opportunities are provided for learners to continue to utilise and extend new skills and knowledge.  
3.6. Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards. |
| 4. Monitor and improve learning effectiveness | 4.1. Individual and/or team performance is monitored to determine the type and extent of additional work-based support required.  
4.2. Feedback from individuals and/or teams is used to |
ELEMENT | PERFORMANCE CRITERIA
---|---
| make improvements in future learning arrangements.
| 4.3. Effectiveness and efficiency of learning and training programs is monitored and recommendations for improvement are prepared.
| 4.4. Adjustments to learning plans and activities negotiated with training and development personnel result in improvements in the efficiency and effectiveness of learning.
| 4.5. Learning plans, records and reports of competency are documented and maintained within the organisation’s systems and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- **communicate** openly and sensitively when negotiating learning opportunities and plans
- define the workplace learning opportunities within own capacity to provide, and within the capacity of the enterprise
- develop and review learning plans, linked with individual and or team goals and enterprise needs, in consultation with individuals or teams
- develop simple **targets, goals and performance measures** for measuring outcomes of learning and training
- estimate resources required to support informal and formal learning and training within the department or enterprise (e.g. personnel, time, cost)
- facilitate and monitor the implementation of training and assessment schedules (e.g. negotiate time release)
- maintain currency of knowledge through independent research or professional development
- apply relevant communication and **mathematical skills**
- identify and apply relevant **Occupational Health and Safety (OH&S), regulatory and workplace requirements**
- identify and support internal coaches and mentors
- identify learning opportunities and strategies which meet the cultural, working and learning experiences and styles of individuals and team
REQUIRED SKILLS AND KNOWLEDGE

- identify learning opportunities to support individual and team learning plans
- identify the areas requiring the *training services provided by training professionals*
- map learning and training strategies against individual, team and enterprise goals or priorities
- negotiate training strategies and schedules with enterprise trainers and assessors and other training and development professionals, to meet enterprise needs
- promote and report the impact of training on the operation of the department or enterprise
- promote the sharing of skills and knowledge as a strategy for achieving personal and enterprise goals
- provide coaching and mentoring to individuals and teams
- recognise the achievements of individuals promptly and appropriately, within enterprise requirements
- resource and encourage enterprise trainers and assessors (e.g. ensure necessary equipment and materials are available) to provide and follow up training and assessment
- review learning plans, opportunities, strategies and outcomes with individuals or team
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology

 Required knowledge

Knowledge of:

- enterprise and employee obligations under industrial and training agreements relating to the provision of (workplace) training
- requirements and ethical considerations for the supervision of employees operating under *formal training agreements and contracts* (e.g. trainees and apprentices)
- impact and outcomes of workplace learning on the competitive advantage of the enterprise
- range of internal and external learning opportunities available to enterprise personnel

## RANGE STATEMENT

- environmental and waste management
- Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment
- Export Control Act
- industrial awards, agreements
- relevant regulations
- state regulations regarding meat processing
- taxation
- training and education.

### Workplace requirements may include:

- enterprise ethical standards, values and obligations
- enterprise-specific procedures, policies and plans
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### Training services provided by training professionals may include:

- assessment of individual, team and organisational needs
- delivery, assessment, monitoring and management of structured training
- planning of structured training and identification of unstructured and incidental learning opportunities
- training and support for internal coaches and mentors, enterprise trainers and assessors.

### Formal training agreements and contracts may include:

- cadetships
- internships
- traineeships and apprenticeships
- training arrangements included in industrial agreements.

2.4. Interpersonal styles and methods are adjusted to the social and cultural environment. |
| 3. Build and maintain networks and relationships | 3.1. Networking is used to identify and build relationships.  
3.2. Identifiable benefits for the team and organisation are provided through networks and other *work relationships* with *stakeholders*. |
| 4. Manage difficulties to achieve positive outcomes | 4.1. Problems are identified and analysed and action is taken to rectify the situation with minimal disruption to performance.  
4.2. Colleagues receive guidance and support to resolve their work difficulties.  
4.3. Pro-active strategies are used to manage individual's performance, within the organisation's processes.  
4.4. Conflict is managed constructively within the organisation's processes.  
4.5. Difficult situations are negotiated to achieve results. |

Required Skills and Knowledge

REQUARED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- accept and provide constructive feedback
- contribute to and support meetings (e.g. team, department and maintenance).
- cooperate with other supervisors and managers
- maintain currency of knowledge through independent research or professional development
- demonstrate problem-solving and negotiation skills in a range of circumstances
- develop and implement consultative and participative approaches within own work responsibilities
- encourage and respond to individual and team contributions
- gather and analyse alternative viewpoints, ideas and information to develop processes and strategies
- identify and apply relevant *Occupational Health and Safety (OH&S), regulatory* and *workplace requirements*
- introduce strategies for improving workplace relationships (e.g. coaching and mentoring)
- locate and evaluate information from a range of sources, using a range of available resources
- mentor and counsel individuals and teams, within enterprise procedures
- model positive and effective communication and interaction strategies in the performance of responsibilities
- monitor and diffuse potential conflicts and disputes, applying a range of strategies
- observe and respect enterprise confidentiality requirements and individual's privacy requests
- provide direction, instruction and guidance in ways that encourage cooperation
- recognise and discuss alternative suggestions, viewpoints and proposals
- resolve differences between employees, within enterprise processes
- review own actions and attitudes and describe their impact on others in the work environment
## REQUIRED SKILLS AND KNOWLEDGE

- seek feedback from colleagues and networks on own ideas and performance
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use available information and communications technology to facilitate two-way communication and understanding
- use enterprise's established procedures to handle grievances and complaints
- work collaboratively with individuals in planning, reviewing and improving performance

### Required knowledge

Knowledge of:

- impact of the enterprise's social, ethical and business standards on workplace relationships
- factors which influence workplace relationships (e.g. cultural and social characteristics, past experience and industrial approaches)
- networks and other sources of information which could assist in the development of workplace relationships and build own knowledge and expertise
- strategies for building networks
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |
| Context of and specific resources for assessment | Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise. |
| Resources may include: |
| - real work environment |
| - relevant documentation such as: |
| - workplace policies and procedures |
| - regulatory requirements |
| - relevant equipment and materials. |
| Method of assessment | Recommended methods of assessment include:

- assignments
- debriefs
- workplace referee or third-party report of performance over time. |

Assessment practices should take into account any
**EVIDENCE GUIDE**

relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Information** may be from internal and external sources and include:

- documents, manuals, publications
- enterprise, industry and professional or research reports
- input from specialist personnel
- networks
- team contributions and input.

**Communication may:**

- be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures
- be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds
- involve interpreting the needs of internal or external customers
- involve presentation of explanations and reports in language styles suitable for the audience and include everyday workplace language, technical and mathematical language
- involve reading workplace documents which may include status reports, plans and projections, technical manuals, industry
## RANGE STATEMENT

| **journals and financial records** | • require use of mathematical terms and may relate to product and product quality, price, sales and turnover, profits and losses, return and new custom, market penetration, advertising distribution and coverage • require negotiation, persuasion and assertiveness skills. |
| **Diversity of individuals may include:** | • ability • age, gender, language group • ethnicity, culture and social or economic background. |
| **Enterprise social, ethical and business standards may include:** | • 'can do' service etc • fairness, equity, respect, honesty • politeness, cooperativeness, promptness. |
| **Networks may:** | • be special interest (e.g. professional, technical, OH&S) • be with customers and clients • internal (e.g. supervisors) • involve other industries, government and community agencies and groups. |
| **Workplace relationships may be with:** | • colleagues and peers • customers, clients and suppliers • employees under supervision • superiors • team/department/section members. |
| **Stakeholders may include:** | • company owners, directors, shareholders, financiers • competitors • management and employees • suppliers, customers, consumers • unions and employer associations. |
| **OH&S requirements may include:** | • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: • coats and aprons • ear plugs or muffs |
## RANGE STATEMENT

- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Regulatory requirements may include:

- animal welfare
- commercial law including fair trading, trade practices
- consumer law
- corporate law, including registration, licensing, financial reporting
- environmental and waste management
- Equal Employment Opportunity (EEO), anti discrimination and sexual harassment
- Export Control Act
- industrial awards, agreements
- relevant Australian standards
- relevant regulations
- state and territory regulations regarding meat processing
- taxation.

### Workplace requirements may include:

- enterprise ethical standards, values and obligations
- enterprise-specific procedures, policies and plans
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

MTMPSR406C Manage and maintain a food safety plan

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to manage a food safety plan. |

Application of the Unit

| Application of the unit | Food safety is critical to public health and safety and the successful operation of meat industry businesses. This unit is suitable for managers in meat retail establishments, and supervisors and team leaders in smallgoods, meat processing and food services establishments, for maintaining the food safety plan or system in a designated work area. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Manage the implementation of the food safety plan | 1.1. Food safety principles, food safety procedures and requirements, including regulatory requirements, are explained to the team.  
1.2. Team commitment to, and responsibility for, food safety is developed.  
1.3. Procedures to support the food safety plan are put in place.  
1.4. Training and mentoring is provided to the team to assist implementation. |
| 2. Monitor the food safety plan and take corrective action | 2.1. Team implementation of the food safety plan is monitored.  
2.2. Records and reports are completed accurately and on schedule.  
2.3. Prompt action is taken to correct non-conformance according to enterprise and regulatory requirements.  
2.4. Causes of non-conformance are identified and analysed.  
2.5. Control measures are implemented to prevent future non-conformance.  
2.6. Non-conformance is reported according to enterprise requirements. |
| 3. Maintain the food safety plan | 3.1. Feedback is sought from all personnel to identify potential hazards, corrective actions and controls.  
3.2. Processes or conditions which could result in breaches of food safety procedures are identified and preventive or corrective action is taken.  
3.3. Corrective action and control procedures are updated to improve food safety.  
3.4. Documentation is completed according to enterprise and regulatory requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

© Commonwealth of Australia, 2015
# REQUIRED SKILLS AND KNOWLEDGE

**Ability to:**
- collect, monitor and interpret data to identify trends and non-conformance
- communicate with a range of stakeholders, including customers, to convey food safety requirements and programs
- demonstrate current technical and process knowledge for the control of hazards and improvement of the food safety system
- demonstrate enterprise monitoring procedures (including sampling, testing and required records and documents) and explain their purpose
- determine and take corrective action
- identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and workplace requirements
- identify and review operations and practices for food safety improvement
- identify enterprise *Standard Operating Procedures (SOPs)* and explain their role in the food safety system
- lead personnel/team in investigation of food safety incidents and potential incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures as required
- review communication systems (spoken and written) to minimise the potential for mis-reporting and misunderstanding of food safety requirements, procedures and plans
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- use a range of communication and team building strategies to gain team commitment to food safety
- use detailed product knowledge, including product characteristics and the requirements for safe preparation, processing, storage, handling, display, to monitor food safety
- utilise problem-solving strategies required in investigating non-conformance and reviewing the food safety system

**Required knowledge**
- enterprise recall and traceability procedures
- food safety requirements to the team
- food safety risk assessment procedures
- Hazard Analysis Critical Control Point (HACCP) principles and the process for developing a food safety plan
- regulatory requirements that apply to the enterprise's food safety plan
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

### Context of and specific resources for assessment

Resources may include:
- real work environment
- relevant documentation such as:
  - food safety plan and/or HACCP plan
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials.

### Method of assessment

Recommended methods of assessment include:
- assignment or simulation
- workplace project
- workplace referee or third-party report on performance.
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment
A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Food safety plans** will be:
- based on HACCP principles
- in standard formats and meet mandatory requirements

**Teams** may be:
- a department or small business
- a food safety or HACCP team
- all personnel in work area
- two or more people.

**Record-keeping systems** may be:
- electronic and/or manual.

**Reports** may be:
- complex, contain technical, mathematical and graphic information and be presented in standard formats according to enterprise and legal requirements.

**Regulatory requirements** may include:
- animal welfare
- commercial law including fair trading, trade practices
- consumer law
- corporate law, including registration, licensing, financial reporting
**RANGE STATEMENT**

- environmental and waste management
- Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment
- Export Control Act
- industrial awards, agreements
- relevant Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing
- taxation.

**Communication** may:

- be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures
- be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds
- involve communication and information technologies
- involve presentation of explanations and reports in language styles suitable for the audience and include everyday workplace language, technical and mathematical language
- involve reading and interpreting workplace-related documentation
- require negotiation, persuasion and assertiveness skills.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- hygiene and sanitation requirements
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
## RANGE STATEMENT

- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Workplace requirements may include:

- enterprise ethical standards, values and obligations
- enterprise-specific procedures, policies and plans
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

### Standard Operating Procedures may relate to:

- personal hygiene
- food preparation and processing
- pest control
- waste disposal
- cleaning
- maintenance of premises
- product recall
- customer complaints
- calibration.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- Ability to:
  - analyse and interpret work instructions, Standard Operating Procedures (SOPs), safety and hygiene procedures, and other workplace documentation
  - identify livestock
  - locate, and interpret industry information
  - distinguish between meat products and the processes to produce them
  - identify personal hygiene and operational sanitation procedures
  - identify and Occupational Health and Safety (OH&S) risks
  - apply sustainable work practices

#### Required knowledge

- Knowledge of:
  - factors which impact on meat safety and quality through the supply chain
### REQUIRED SKILLS AND KNOWLEDGE

- the main animal welfare issues associated with the production and processing animals for human consumption
- main markets for meat
- common causes and impact of contamination
- relationship between food safety and market access
- nature and structure of the Australian meat processing industry
- principles of Quality Assurance (QA) and traceability from paddock to retailer
- slaughtering and boning processes
- nature and purpose of the AUS-MEAT and MSA programs
- customer requirements
- value-adding of meat products
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Critical aspects of assessment must include the following:

- describe the livestock production and marketing, and retailing systems for the meat industry
- document the sequence of operations for livestock slaughter and meat processing
- define processes for a range of meat smallgoods
- describe production factors influencing meat quality and safety
- comply with industry requirements for hygiene, OH&S and other work practices.

### Context of and specific resources for assessment

Assessment of performance requirements in this unit should be undertaken within the context of food technology in the meat processing industry.

Assessment must occur in a real or simulated workplace where the candidate has access to:

- production process and related equipment,
EVIDENCE GUIDE

| manufacturers' advice and operating procedures |
| equipment and facilities for carrying out slaughtering of livestock and processing of primary cuts of meat. |

Method of assessment

The following assessment methods are suggested:

- written and/or oral questioning to assess knowledge and understanding
- direct or third-party evidence of compliance with enterprise procedures for hygiene and OHS
- a process chart developed and explanation of the sequence of operations for meat processing in an abattoir.

Evidence should be gathered over a period of time in a range of actual or simulated environments.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Production techniques may include:

- location
- flock/herd size
- feedlots or paddock raised
- organic
**RANGE STATEMENT**

<table>

**Species** to be slaughtered may include:

- cattle
- sheep
- goats
- pigs
- horses
- ratites
- crocodiles.

**Traceability requirements** may include:

- National Livestock Identification Scheme (NLIS)
- ear and tail tags
- state-based requirements
- PigPass
- disease notification
- customer requirements, such as Country of Origin Labelling (COOL).

**Purchasing process and selling alternatives** may include:

- contractual requirements
- 'over the hook'
- live purchasing in paddock or saleyards
- computer selling
- major customers (e.g. Woolworths, Tesco, McDonalds) paddock-plate purchasing systems.

**Critical elements of the slaughtering process** will include:

- animal welfare and handling requirements
- quality determinants (e.g. stress)
- carcase description
- food safety and testing regimes
- stunning and slaughtering procedures
- hide removal
- evisceration
- time and temperature requirements for carcase chilling and freezing.

**Critical elements of the boning process** will include:

- cut descriptions
- integrated/independents boning rooms
- customer specifications

- Microbiological testing
- Residue testing
- Species testing
### RANGE STATEMENT

- temperature logging
- Critical Control Points (CCPs)
- role of AQIS and National Association of Testing Authorities (NATA) in laboratory accreditation.

**Product sources** for smallgoods production may include:

- imported product
- Australian product
- different species (e.g. cattle, sheep, goats and pigs)
- product additives and mixes (e.g. emulsions, spices and nitrites/nitrates).

**Smallgoods products and production processes** will include:

- smoked product
- cooked product
- Uncooked Comminuted Fermented Meat UCFM
- dried meats
- factory-type production techniques
- independent retailer production techniques
- regulatory requirements
- processing equipment.

**Food safety requirements impacting smallgoods production** will include:

- UCFM
- thawing processes
- uncooked/cooked product handling requirements
- blending/batching processes
- packaging requirements
- product storage and transport requirements.

**Regulatory requirements** impacting meat retailing will include:

- role of State and Council authorities
- environmental requirements
- legislation, regulations and Codes of Practice
- OH&S, Equal Employment Opportunity (EEO) legislation
- Modern Awards
- Food Standards Code.

**Customer requirements and expectations** affecting meat retailing may include:

- species and cuts
- packaging
- value-adding
- religious
- dietary and allergen requirements.
## RANGE STATEMENT

### Key issues impacting meat industry employment may include:
- labour supply and market characteristics
- meat industry career structures
- role and nature of training
- role of overseas workers
- seasonal and market factors
- national policies and regulations.

### Environmental impacts of a meat processing site may include:
- water use
- waste water
- emissions
- power sources and consumption.

### Changing customer expectations may include:
- animal welfare and handling
- organic production
- social accountability
- ethical production
- traceability.

### Key industry bodies will include
- state and federal regulators
- peak industry bodies (e.g. MLA, AMIC and AMPC)
- unions covering the industry (e.g. (Australian Meat industry Employees Union AMIEU))
- AUS-MEAT
- Standards determining bodies:
  - International Organization for Standardization (ISO)
  - Joint Accreditation System of Australia and New Zealand (JAS ANZ)
  - Food Standard Australia New Zealand (FSANZ).

MTMPSR408A Specify beef product using AUS-MEAT language

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to use AUS-MEAT language in defining beef specifications. Satisfactory completion of assessment conducted by AUS-MEAT is required before an individual can gain AUS-MEAT Accreditation for Beef Boning Room Standards Officers. People who have satisfactorily completed AUS-MEAT Accreditation for Beef Boning Room Standards Officers will have satisfied the requirements for this unit of competency. |

Application of the Unit

| Application of the unit | This unit prepares workers to work with beef cuts, specifications and cutting lines. Participants will be directly involved in demonstration and explanation of: • achieving maximum yields and returns • basic anatomy • cutting lines • detecting and recording defects • product description • specifications and verification. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify anatomical features of a beef carcase | 1.1. Directions on a carcase are described using the anatomical direction format.  
1.2. Bones relevant to meat *specifications* in a beef skeleton are located and identified.  
1.3. Major *muscles* relevant to meat specifications are identified.  
1.4. Major glands and cartilage relevant to meat specifications are identified. |
| 2. Identify and name meat products using the standard product description | 2.1. Nature and format of product specifications are identified.  
2.2. Standardised cut descriptions are used and correctly spelt to name meat products.  
2.3. Major muscles that make up each meat cut are identified.  
2.4. Correct cutting lines for each product are identified using the correct anatomical features to describe the cutting lines.  
2.5. What must be altered from any given meat product for it to comply with the company product specification is identified. |
| 3. Check *beef product* complies with written specifications | 3.1. Beef product compliance with written specifications is checked and principles of Quality Assurance (QA) are described.  
3.2. Sections of the workplace QA system related to ensuring beef product compliance are described to AUS-MEAT product description requirements.  
3.3. Non-conforming product is defined and described in relation to workplace requirements.  
3.4. Critical Control Points (CCPs) are identified and monitored in accordance with *workplace requirements*. |
| 4. Assess product compliance | 4.1. Product compliance with written specifications is assessed in accordance with workplace and AUS-MEAT product description requirements.  
4.2. Product description given in written specifications is identified and explained.  
4.3. Corrective action is taken in the event of non-conformance to beef product specifications. |
<p>| 5. <em>Measure and check</em> product compliance | 5.1. Cutting lines and muscle content is checked in accordance with written specifications. |</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- apply relevant communication and problem-solving skills
- work effectively as an individual and as a team member
- identify and apply relevant Occupational Health and Safety OH&S requirements
- identify and apply relevant workplace and regulatory requirements
- identify and explain AUS-MEAT language specifications on beef product label
- identify non-conforming product in accordance with specifications
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- corrective action procedures for non-conforming product
- product specification points
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under normal enterprise or production conditions.

### Context of and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions.

### Method of assessment

Recommended methods of assessment include:
- completion of standard AUS-MEAT assessment
- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
## EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Specifications** may include:
- approval system
- AUS-MEAT
- communication
- measurement
- technical accuracy.

**Muscles** may include cuts from:
- forequarter (major)
- hindquarter (major).

**Beef product** may include:
- muscle content
- points of specification
- product compliance
- product name.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Measurement and checking** may include:
- data collection
- frequency
- interpreting data
- monitoring sheets
- non-conforming products
- sample size.
### RANGE STATEMENT

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Engage in complex verbal communication | 1.1. *Group* processes are facilitated and monitored to support group objectives.  
1.2. One-to-one interaction with team members is provided to achieve effective support.  
1.3. Work instructions are explained to others.  
1.4. Work requirements and expectations are negotiated with others.  
1.5. *Negotiation* skills are used as appropriate.  
1.6. Conflict resolution techniques are used as appropriate.  
1.7. *Problem-solving* and decision making techniques are used as appropriate. |
| 2. Read complex text | 2.1. *Written information* is read, analysed and used to assist in overseeing workplace performance.  
2.2. Technical information from written source is used to examine and introduce new procedures and approaches to improve workplace performance. |
| 3. Prepare written information for a range of *audiences* and applications | 3.1. Routine and specialist reports are consolidated and summarised to convey key points.  
3.2. Procedures and instructions related to existing and new functions and tasks are written for others to follow and implement. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- analyse written information from a variety of sources to assist with decision-making process
- convey information, which may be complex or technical or involve a change to a familiar process, to people who may not have a technical background
- convey workplace information, such as work instructions, in a way that facilitates learning by others
REQUIRED SKILLS AND KNOWLEDGE

- demonstrate conflict-resolution techniques
- demonstrate participative problem-solving techniques to resolve workplace problems
- demonstrate techniques to check that information has been understood
- explain and demonstrate communication styles relevant to conveying information to employees from a range of social, cultural and ethnic backgrounds
- identify and observe Occupational Health and Safety (OH&S) requirements where applicable
- identify and observe regulatory and workplace requirements where relevant
- locate and extract relevant information from technical documentation
- prepare reports in a range of formats and language styles suitable for the audience
- resolve or progress issues in complex and/or hostile environments
- select and organise relevant routine information to:
  - clarify or explain issues or problems
  - offer suggestions for improvement
  - provide opinions
- use facilitation skills to ensure participation from all group members
- utilise available information and communications technology to facilitate communication

Required knowledge

Knowledge of:

- purpose of feedback and forms of feedback suitable for the workplace
- purpose of reports and other documentation used in the work area
- roles and expectations of customers, suppliers and participants in the work process
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency needs to be demonstrated while exercising suitable levels of authority in the workplace.

## Context of and specific resources for assessment

Assessment must include demonstration of competency in the workplace under normal working conditions.

## Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or
## EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

### Range Statement

<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>
</tr>
</thead>
</table>

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Groups** may be:

- informal work groups or formal committees.

**Negotiations** may involve:

- complex coordination of human and material resources and can involve both internal and external customers and suppliers.
- referrals to management and/or industrial parties, where conflicts are unable to be resolved.

**Problem-solving** may include:

- involvement and support of more senior management
- discussion and resolution of issues undertaken with support from more senior management
- involvement of:
  - owner or operator
  - external facilitators.

**Written information** may include:

- graphs, charts and tables
- industry publications
- manuals
- newsletters
- notices from government and regulatory bodies
- orders
- procedures and instructions
### RANGE STATEMENT

- relevant legislation and award provisions:
  - OH&S legislation
  - award provisions relating to conditions of employment
  - training
  - affirmative action
  - Equal Employment Opportunity (EEO) legislation
- status reports
- supplier correspondence and contracts.

**Audiences** for information may include:
- customers
- suppliers
- management and/or workers.

**Communication** may be:
- spoken
- written
- non-verbal and include the use of signs, signals, symbols and pictures, and require the interpretation and sensitive handling of non-verbal and visual clues and cues.
- reported according to statutory and workplace requirements and may involve manual and/or electronic systems
- reported and presented through:
  - spoken
  - written and supported by:
    - graphs
    - pictures
    - charts
    - tables.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
### RANGE STATEMENT

- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements may include:**

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

**Workplace requirements may include:**

- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Technology may include:**

- information and communication technologies such as:
  - diaries and organisers
  - computerised equipment
  - personal computers
  - on-line services
  - telephone
  - fax
  - automated machinery
  - robotic equipment.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Involve management and staff in developing the quality system | 1.1. Relevant staff members and management are involved to clarify the purpose and scope of the program.  
1.2. Enterprise needs and expectations are clearly defined.  
1.3. Other systems, such as AUS-MEAT, Occupational Health and Safety (OH&S) and meat inspection are incorporated into the system as appropriate to the workplace needs. |
| 2. Establish the scope of the system | 2.1. Scope of the HACCP-based quality system is defined to encompass food safety, quality, regulatory compliance, animal welfare and preventative maintenance.  
2.2. System is directed to prevent and control food safety hazards and any other hazards such as product quality and OH&S hazards.  
2.3. Agreement is sought from relevant areas of the workplace on the coverage and scope of the system. |
| 3. Conduct hazard analysis and assessment | 3.1. Every step in the production process is assessed for potential food safety hazards.  
3.2. Critical Control Points (CCPs) are established to identify where each significant hazard can be prevented or controlled.  
3.3. Critical limits are established for each CCP.  
3.4. A measurable or recognisable standard is assigned for each CCP to define the critical limits.  
3.5. Critical limits are technically and scientifically validated. |
| 4. Ensure all documents, work procedures and processes required for the system are developed, available and in use | 4.1. All products and processes covered by the HACCP-based quality system are described in a standardised format defining product characteristics relevant to food safety.  
4.2. Work instructions and Standard Operating Procedures (SOPs) are reviewed for accuracy, relevance and sufficiency to prevent potential hazards.  
4.3. Documented procedures for monitoring CCPs are implemented.  
4.4. Documented procedures which ensure any CCPs which are out of control are brought back into control, and affected product is suitably handled, are |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | implemented.
4.5. Documented procedures are implemented to ensure the whole HACCP system is regularly audited and verified as working effectively.
4.6. All documents and records required for the system are available, up-to-date and in use.

5. Audit, verify and validate the system

5.1. HACCP plans are routinely revised, verified and validated to reassess hazards, CCPs, critical limits, microbiological and other testing methods and all related procedures of the HACCP system to ensure they are still appropriate to the plant’s operations and products.
5.2. Follow up on audit findings is taken and recorded.
5.3. HACCP system is reviewed to take account of any process or product changes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- conduct monitoring of a CCP
- use communications technology such as computers, as relevant to the task
- develop and implement changes in a HACCP-based QA system
- identify and apply relevant *OH&S, regulatory* and *workplace requirements*
- record and analyse monitoring and verification data
- use relevant *communication* skills
- validate CCPs and critical limits

Required knowledge

Knowledge of:
- objectives of a HACCP-based QA system
- process for validating critical limits and CCPs
- role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program
REQUIRED SKILLS AND KNOWLEDGE

- process of auditing and verifying a HACCP-based QA system
- steps in the development of a HACCP-based QA system
- steps in the systematic introduction of a HACCP-based QA system
- documentation required to support a HACCP-based QA system
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in the workplace utilising an existing approved HACCP plan.

### Context of and specific resources for assessment

Assessment must involve working with actual realistic data and in the context of a HACCP plan that meets regulatory requirements.

### Method of assessment

Recommended methods of assessment are:
- assignment
- debrief
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration of competency for the assessor
- workplace project
- workplace referee or third party report of performance over time.

Unit Descriptor

This Unit covers the skills and knowledge required to develop and implement work instructions and Standard Operating Procedures (SOPs). It addresses the planning and consultation process for development, validation and implementation. Work instructions and SOPs will be in written form and may utilise photographs or illustrations to emphasise a particular characteristic or feature required from the performance of the task. Format is sequential and uses a Plain English approach.

Application of the Unit

Work Instructions and SOPs will usually be developed by Quality Assurance Officers, regulators or supervisors in the meat processing industry, and will frequently address regulatory or customer requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this Unit.

Pre-Requisites

Nil.

Employability Skills Information

This Unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify and scope the requirements of the work instructions and SOPs | 1.1 Format is developed or selected according to enterprise requirements.  
1.2 Individual tasks/responsibilities to be covered are accurately identified.  
1.3 The sequence of tasks is determined to ensure efficiency is achieved.  
1.4 The sequencing of information is consistent with current or desired performance.  
1.5 Regulatory and customer requirements are identified. |
| 2. Write work instruction or SOP | 2.1 Work instruction or SOP identifies key roles and responsibilities.  
2.2 Document is prepared using a format and language consistent with enterprise procedures.  
2.3 Corrective actions and/or critical control points are included in the documentation.  
2.4 Safe work practices and/or hygiene requirements related to the task are included.  
2.5 Photographs or illustrations are included as appropriate.  
2.6 Document version control procedures are implemented. |
| 3. Validate work instruction or SOP | 3.1 Written document is tested for consistency with identified requirements and supports workplace performance.  
3.2 Written document is trialled with personnel to confirm clarity and language is appropriate to literacy needs.  
3.3 Written document addresses WHS, hygiene and regulatory requirements as appropriate.  
3.4 Written document is amended, as necessary, based on feedback from validation activities.  
3.5 Images and diagrams are examined for accuracy and conformance to workplace and regulatory requirements. |
| 4. Implement work instruction or SOP | 4.1 Required approvals are obtained and recorded.  
4.2 Plan for implementation is developed and communicated to appropriate personnel.  
4.3 Training requirements are identified and addressed.  
4.4 Work instruction or SOP is implemented.  
4.5 Effectiveness of implementation is evaluated.  
4.6 Records of implementation are stored appropriately. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

Ability to:

- collect, record and analyse data
- communicate with work teams and management
- communicate complex technical information to culturally diverse staff
- interpret product specifications, standards and production information
- use enterprise procedures to control document versions
- use computers to develop, control and store documentation
- develop plans
- prioritise tasks
- solve problems
- apply literacy skills to:
  - compile reports
  - use Plain English
  - interpret complex technical specifications or data
  - prepare detailed specifications, procedures and work instructions
  - read and interpret information
  - record and analyse data
  - report progress and technical information.
- use numeracy skills to:
  - calculate time and other production data
  - estimate volume, mass and weight
  - gather and record data
  - prepare technical reports.

Required knowledge includes:

Knowledge of:

- communication techniques appropriate for culturally diverse workforce
- Hazard Analysis Critical Control Point (HACCP) and food safety plan
- legal and regulatory requirements impacting the Australian meat processing industry
- WHS requirements
- methods available to regulate production flows, temperature control and time
- product and process specifications
- organisational communication systems
- production systems, including corrective actions and control points
• validation techniques.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence – not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this Unit

Assessment must confirm the ability to:
- perform tasks necessary to develop and validate work instructions or SOP
- implement the work instructions or SOPs
- assess implementation against the product specification, WHS requirements, and as meeting the learning needs of intended staff.

Assessment must confirm knowledge of:
- enterprise Standard Operating Procedures (SOPs)
- HACCP planning
- product specifications, quality objectives and production parameters
- sources of information relating to equipment and personnel capability
- special language requirements of the workplace
- the manageable tasks capable of completion within the time available and to the requirements of the product specification
- the processes for validating documents
- workplace WHS requirements
- version control
- workplace chain of communication
- implementation processes
| **Context of and specific resources for assessment** | Assessment must be conducted in the workplace. Resources may include:
- applicable regulations and customer specifications
- access to processing or production facilities
- enterprise WHS policy
- enterprise product specifications
- equipment operating parameters
- relevant food safety standards
- translator or translations of material written in a language other than English
- video or other projection equipment for materials not in written form. |
|---|---|
| **Method of assessment** | The following assessment methods are suggested:
- project writing work instructions or SOPs (work or scenario based), completing a validation process and developing an implementation plan
- project rewriting or modifying existing work instructions or SOPs, completing a validation process and then implementing the revised versions
- workplace referee’s report
- written or oral questions. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
| **Guidance information for assessment** | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |
## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Regulatory and customer requirements may include: | • AS4696:2007 Australian standard for the hygienic production and transportation of meat and meat products  
• other relevant Australian Standards  
• Export Control Act  
• DAFF Biosecurity notices  
• Approved Arrangement  
• Ecologically Sustainable Development (ESD) principles, environmental hazard identification, risk assessment and control  
• food safety, HACCP, hygiene and temperature control  
• inspection arrangements for DAFF Biosecurity and the Australian Customs Service (ACS)  
• business or workplace operations, policies and practices  
• WHS hazard identification, risk assessment and control. |
| Format and language may include: | • cultural diversity and/or special language needs of the workplace  
• photographic illustrations to identify particular characteristics  
• pictograms to demonstrate particular activities  
• using Plain English. |
| Corrective actions and/or critical control points may relate to: | • food safety standards  
• HACCP  
• product specifications. |
| Safe work practices may include: | • enterprise WHS policies, procedures and programs  
• WHS legal requirements  
• hazard assessments  
• Personal Protective Equipment (PPE) which may include:  
  • coats and aprons  
  • ear plugs or muffs  
  • eye and facial protection |
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

Conformance to workplace and regulatory requirements of images and diagrams may include:
- copyright permissions acknowledgement
- ensuring depiction conforms to workplace requirements.

Required approvals may include:
- approval for inclusion in the Approved Arrangement
- enterprise corporate approvals.

**Unit Sector(s)**

MTMPSR5601C Design and manage the food safety system

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to design and manage food safety programs for a meat industry enterprise including meat processing, smallgoods, retail and food services operations. The unit also covers skills and knowledge for working with customers and consumers on food safety issues. |

Application of the Unit

| Application of the unit | This unit is appropriate for all managers in a food safety and/or Quality Assurance (QA) role, and for those working in production roles with responsibility for food safety and QA within their job role. Food safety is a critical element of product quality and is a priority for all sectors of the meat processing industry. Food safety is also a community issue and public perceptions of the safety of meat and meat products impact on the viability of meat processing enterprises. |

## Employability Skills Information

| Employability skills | This unit contains employability skills. |

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Establish enterprise meat or food safety system requirements | 1.1. Goals, scope and requirements of *food safety system* are determined, consistent with customer, enterprise and *regulatory requirements*.  
1.2. Alternative food safety systems are evaluated against enterprise requirements and preferred system is identified.  
1.3. Development of the food safety system is carefully planned, using team and consultative approaches.  
1.4. Resource requirements, including staff training requirements, for effective systems operation and maintenance are identified and obtained. |
| 2. Develop food safety systems | 2.1. Food safety responsibilities, obligations and roles are identified and clearly explained to *stakeholders*.  
2.2. Processes covered by the food safety system are identified and described.  
2.3. Food safety hazards are identified for all processes within the scope of the food safety system.  
2.4. Hazard control measures are identified, developed and validated.  
2.5. Procedures for *preventative action* are developed. |
| 3. Establish monitoring procedures and corrective actions | 3.1. Monitoring procedures are developed and *monitoring* information is used to inform *corrective actions*.  
3.2. Corrective actions are developed and implemented to effectively control hazards.  
3.3. Recording and *documentation* procedures are developed, maintained and secured.  
3.4. *Strategies to support the workforce* in the routine and consistent application of food safety systems are developed, resourced and implemented. |
| 4. Evaluate food safety system | 4.1. *Audit procedures* are established and audits monitored.  
4.2. *Verification procedures and schedules* are established and verification information is used in the review of the food safety system.  
4.3. Food safety system is reviewed and updated for changes in Australian Standards, *technical information* (including verification data) and process information according to established procedures. |
ELEMENT | PERFORMANCE CRITERIA
---|---
4.4. Food safety systems are prepared for external review and approval by relevant authorities.  
4.5. Performance information is used to measure performance against policies and goals.
5. Communicate food safety outcomes | 5.1. Interactions with the public, regulatory authorities and agencies are conducted in a positive, cooperative and open manner.  
5.2. Food safety incidents and non-compliances are reported promptly to relevant authorities.  
5.3. Customer and consumer feedback is gathered, analysed and included in review of the food safety system.  
5.4. Food safety system outcomes are documented to promote public confidence in enterprise products and services.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:  
- analyse performance information to determine progress and areas for review or improvement  
- consult with stakeholders to determine the scope of the *food safety systems, procedures and controls* and identify food handling practices, processing techniques and support programs in use  
- demonstrate detailed knowledge of Hazard Analysis Critical Control Point (HACCP) principles and techniques and where appropriate to the enterprise, Good Manufacturing Practices (GMP)  
- demonstrate detailed knowledge of *validation* and verification (including audit) purposes and processes  
- demonstrate substantial product and process knowledge and the microbiological, physical and chemical impacts on the safety of enterprise meat and meat products in the identification of hazards and the assessment and control of food safety risks  
- determine measures for correcting processes or outcomes outside acceptable limits or support program requirements including procedure to be followed, when corrective action must be implemented, the person responsible for taking corrective action
REQUIRED SKILLS AND KNOWLEDGE

- action and the information to be recorded
- develop and validate control measures using objective data, industry guidelines and codes of practice
- develop performance standards and criteria for the food safety system
- develop strategies to support the workforce in the implementation of the food safety system
- establish internal audit processes and schedules, including developing and leading the audit team
- establish procedures to monitor, review and secure record-keeping systems consistent with regulatory requirements
- establish verification procedures and schedules and identify action required if the outcomes of verification indicate that the program requirements have not been met or that the original program was inadequate
- establish, monitor and continuously improve food safety support systems consistent with regulatory requirements
- evaluate alternative food and/or meat safety systems for suitability for enterprise goals and directions, enterprise operations, enterprise product, cost and customer and regulatory requirements
- identify and apply relevant Occupational Health and Safety (OH&S), regulatory and workplace requirements
- identify monitoring requirements and develop monitoring procedures for food safety hazards identified in the enterprise
- identify workforce training needs and negotiate and schedule training to support system requirements and operation
- liaise with suppliers to establish and monitor enterprise food safety and quality requirements for products and processes
- maintain currency of knowledge through independent research or professional development
- monitor public health requirements and concerns and prepare reports for the enterprise, public health authorities, customers and consumers on progress and outcomes of the food safety system.
- monitor the implementation of preventative action measures, controls and actions to correct non-compliance or non-conformances
- prepare accurate reports for senior management detailing compliance breaches/incidents, actions and outcomes and the implications for the enterprise
- prepare action plans for the development and review of the food safety system, which include timelines, the establishment, leading and support of the HACCP team
- prepare and present food safety system information, procedures, documentation and reports in languages, formats and styles appropriate for the audience and purpose
- prepare communication strategies to inform internal and external stakeholders of progress and outcomes of the food safety system
REQUIRED SKILLS AND KNOWLEDGE

- prepare HACCP plans and support documentation including hazard analysis charts and tables, manuals, data analysis reports, corrective action reports and verifications reports, Standard Operating Procedures (SOPs) and work instructions where appropriate for the enterprise system
- provide feedback to the workforce or team on food safety performance
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology.
- use appropriate communication skills and strategies for informing and confirming the roles, responsibilities and obligations of all participants in the operation of the enterprise
- use available technology and data management systems to gather, record, manipulate, interpret and report food safety data and information

Required knowledge

Knowledge of:

- enterprise's ethical standards and the implications for the food safety system
- roles, responsibilities and obligations of the enterprise and individuals in the food safety system
- regulatory requirements for food safety, including HACCP-based programs, support programs, record-keeping, verification and internal/external audits, and explain the implications for enterprise operations
- scope, auditor role and responsibility, and scheduling requirements for internal and external audit process
- legal responsibilities for reporting audit findings, including breaches and non-compliances to enforcement agencies, and for conflicts of interest, confidentiality, rights of appeal and giving evidence in court

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Food safety systems:**

- are written documents required by legislation which specify how businesses will control all food safety hazards that are reasonably expected to occur within a food enterprise
- may be developed by personnel within the enterprise or by external consultants
- may be developed within an enterprise's QA system or as a discrete program
- must provide for the systematic monitoring of controls and actions to correct hazards not under control (records demonstrating action in relation to or in compliance with the food safety program must be kept)
- may be for export or domestic processing, smallgoods manufacturing, wholesaling, cold stores or retail enterprises
- may be ISO-based or non ISO-based.
### RANGE STATEMENT

**Regulatory requirements** may include:

- animal welfare
- commercial law including fair trading, trade practices
- consumer law
- corporate law, including registration, licensing, financial reporting
- environmental and waste management
- Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment
- Export Control Act
- industrial awards, agreements
- Australian Standards
- relevant regulations
- state and territory regulations regarding meat processing
- taxation.

**Stakeholders** may include:

- company owners, directors, shareholders, financiers
- competitors
- management and employees
- regulatory authorities
- suppliers, customers, consumers
- unions and employer associations.

**Preventative action** may involve:

- revision of materials, processes and/or food handling procedures
- revision of workplace practices and documentation such as specifications, SOPs, approved supplier programs, and work instructions.

**Product/process monitoring** may be:

- microbiological or chemical testing
- online testing
- sensory.

**A corrective action** plan identifies:

- non-conformance
- corrective actions
- date by which action must be taken
- other follow up requirements.

**Food safety documentation** includes:

- amendment registers
- Critical Control Point (CCP) monitoring forms and additional monitoring requirements
- CCP work instructions
- factory/shop floor plan
### RANGE STATEMENT

- HACCP audit table
- HACCP team register
- hazard analysis table
- process flow charts
- product description or use
- supporting programs and schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, product identification and recall.

**Technical information** includes:

- conditions for bacterial food poisoning, including:
  - product composition
  - temperature
  - time
  - aw
  - pH.

**Strategies to support the workforce** in the implementation of the food safety system may include:

- clear signage
- coaching and mentoring
- development and presentation of procedures in plain language and visuals
- implementation of problem-solving by work teams to develop and monitor food safety procedures
- initial and refresher structured training programs
- provision of appropriate work areas and equipment.

**Food safety systems, procedures and controls** apply to:

- display, packaging and sale of food, including meat and meat products
- equipment design, use and maintenance
- handling and disposal of condemned or recalled food, including meat, products
- location, construction and servicing of meat premises
- processing, further processing and preparation of food including meat and meat products
- receival, storage and transportation of food including meat and meat products.

**Validation** is:

- the identification, collection and analysis of objective information to confirm that
### RANGE STATEMENT

</tbody>
</table>
### RANGE STATEMENT

- **SOPs**
- **work instructions.**

**Monitoring requirements for food safety hazards** include:
- a description of the method or procedure to be followed
- the frequency and timing
- the information to be recorded (procedures to be followed would typically be specified in the form of a SOP or work instruction)
- the person responsible.

**Public health requirements** include the impacts of pathogenic bacteria such as:
- Clostridium etc
- E.coli
- Listeria
- Salmonella
- Yersinia.

**Communication** may:
- be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures
- be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds
- involve reading and interpreting workplace documents
- require the use of negotiation, persuasion and assertiveness skills.

**Data management systems** may be manual or computerised, cover data collection, data monitoring and data analysis and interpretation and include:
- calculators
- charting and graphing materials
- computer software packages including spreadsheets, statistical analysis packages
- computerised equipment
- inspection regimes
- manual measuring equipment (e.g. thermometers, pressure gauges, scales)
- monitoring sheets and records
- product quality and safety.

| 1. Identify potential for **new product or process development** | 1.1. *Internal and external environments* including legislative framework, industry directions, enterprise goals and consumer trends are analysed to identify emerging opportunities.  
1.2. Enterprise goals for the development of new product or process are clearly described.  
1.3. Potential products or processes are identified and evaluated, consistent with the goals and directions of the enterprise.  
1.4. Enterprise estimates and forecasts of required production levels, costs, sales and required rate of return are obtained.  
1.5. Regulatory requirements for the development and sale of new product or process are identified. |
| 2. Develop and **test** product or process | 2.1. Schedules and plans for the development and trial of new product are prepared.  
2.2. Sources of technical expertise and information are identified.  
2.3. Product or process concept is researched and refined.  
2.4. Prototype is developed and evaluated for impact on meat quality and food safety.  
2.5. Specifications for new product or process are refined and confirmed. |
| 3. Evaluate feasibility of product or process for the enterprise | 3.1. Bench top samples of new products are prepared.  
3.2. Trials and tests of product or processes are coordinated, monitored and evaluated for commercial operation.  
3.3. Customer and consumer feedback is gathered and analysed.  
3.4. Enterprise capacity to support new product or process is assessed and system strengths and weaknesses are identified.  
3.5. Resource analyses and proposals for the introduction of new product or process are prepared.  
3.6. New product is **costed for commercial implementation** and evaluated against enterprise forecasts of production, costs, sales and rate of return.  
3.7. Risks are identified, measured and analysed.  
3.8. Recommendations including risk management |
### ELEMENT | PERFORMANCE CRITERIA
---|---
|  | strategies are prepared and presented to stakeholders.

4. **Scale up operations for commercial implementation**

4.1. Resources for commercial operation are obtained and scheduled.
4.2. Action plans for the scale up to commercial operations are prepared, in consultation with enterprise personnel.
4.3. Communication and consultation strategies to inform stakeholders of progress and gain commitment to the process are prepared and implemented.
4.4. Food safety requirements of new product or process are identified and included in food safety system and plans.
4.5. Monitoring and control systems are developed and implemented.
4.6. Contingency plans are prepared.
4.7. Personnel are trained in new product or processes, systems and procedures.
4.8. Product or process is commissioned with minimum disruption to other operations.

5. **Evaluate market impact of new product**

5.1. Product information and samples are prepared for marketing and promotion.
5.2. Targets for new product or process are determined in consultation with relevant personnel, within enterprise goals and operations.
5.3. Product or process performance is measured against targets.
5.4. *Causes of non-achievement of targets* are analysed and recommendations for improvement prepared.
5.5. Customer or consumer feedback is gathered, analysed and included in recommendations for improvement.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**
# REQUIRED SKILLS AND KNOWLEDGE

**Ability to:**

- Analyse product or process performance against enterprise targets. This includes identifying company goals, setting targets, collecting and analysing performance data including customer feedback.
- Apply relevant **communication** and **mathematical skills**
- Work effectively as an individual and as a team member.
- Describe and comply with the legal, ethical and **regulatory requirements** relating to the development, testing and trialling, packaging, labelling and distribution of meat and meat products.
- Develop commitment and capacity of personnel. This requires identification of training requirements and provision of training, consultation with personnel in planning and in the resolution of problems, teamwork, and the use of effective communication strategies with all stakeholders.
- Develop concept proposals based on detailed technical and product knowledge and an evaluation of alternative products or processes.
- Identify and apply relevant **Occupational Health and Safety (OH&S)**, **regulatory** and **workplace requirements**
- Outline sampling, testing and evaluation procedures and assess their appropriateness to the development of new product.
- Plan and implement the commercial operation of the new product or process, including obtaining and scheduling resources, the development of Standard Operating Procedures (SOPs), work instructions, product specifications and their integration with plant systems.
- Prepare product descriptions for a range of audiences (e.g. regulatory authorities, importing countries, enterprise marketing and/or sales personnel, customers and consumers).
- Prepare product or process development strategy.
- Prepare resource proposals based on the calculation and estimation of costs, sales, payback periods and potential rates of return.
- Present reports according to legal and enterprise requirements.
- Research and describe current technical and product information relating to potential new product (e.g. processing and manufacturing techniques, functional ingredients, **additives**, and consumer and industry trends).
- Take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.
- Utilise a range of communication and information technologies for the development, testing, monitoring and analysis of new products.

## Required knowledge

**Knowledge of:**

- Impact of pre and post slaughter factors and the major physical, chemical, biochemical and microbiological characteristics and changes affecting the quality...
### REQUIRED SKILLS AND KNOWLEDGE

- nutritional qualities of meat and meat products
### Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise. |

| Context of and specific resources for assessment | Resources may include:  
- a real work environment  
- relevant documentation such as:  
  - workplace policies and procedures  
  - manufacturer instructions and operations manuals  
  - regulatory requirements  
  - relevant equipment and materials. |

| Method of assessment | Recommended methods of assessment include:  
- a third-party referee report of sustained performance at appropriate level of authority and responsibility  
- assignment focusing on understanding and application of principles and theory to workplace operations |
### EVIDENCE GUIDE

| Workplace projects which focus on company environment and conditions. |

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**New product or process developments** may include:

- development of products or processes totally new to the market
- introduction of products or processes already in the market and used by competitors
- product or process extensions (e.g. pack sizes, mild and hot salamis, restructured meat products)
- product or process improvements including convenience (e.g. easy carve), eating quality (e.g. taste) and extended shelf life.

**Internal and external environments** and information may include:

- changes in legislation (e.g. export, environment, food safety)
- competitors’ practices
- enterprise goals and requirements for by-product utilisation, increased market share, diversification

MTMPSR601A Benchmark to manage/improve enterprise performance

Modification History

Not Applicable
## Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to conduct benchmarking exercises through the identification of appropriate benchmarks and to use them to focus enterprise operations and improve performance. In the meat industry benchmarking is a tool for informing, measuring and developing an enterprise's performance. |

## Application of the Unit

| Application of the unit | This unit is suitable for all managers working in a meat industry context and supports them in their responsibility for measuring, evaluating and improving enterprise performance. This unit has applicability for engineers, refrigeration/chiller managers, production and operations managers, Occupational Health and Safety (OH&S), environment, quality, Human Resources (HR), finance, livestock, logistics managers. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

## Employability Skills Information

| Employability skills | This unit contains employability skills. |

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify the need for **benchmarking** | 1.1. Benchmarking is identified in enterprise planning processes as a tool for achieving strategic goals.  
1.2. Customer requirements, perceptions and satisfaction data are analysed to identify the need for improvement.  
1.3. Competitor’s products or processes are analysed to identify the need for improvement.  
1.4. Company processes are analysed to determine whether potential *improvements to efficiency* might be possible.  
1.5. **Regulatory requirements** are analysed to identify the need for improvement. |
| 2. Prepare for benchmarking | 2.1. Scope and parameters of the benchmarking exercise are determined according to enterprise priorities and plans.  
2.2. Benchmarking resource requirements are estimated and included in budgets and operational plans.  
2.3. **Benchmarking strategy** is planned around realistic time frames and enterprise planning cycles.  
2.4. **Communication** and **mathematical requirements** are identified and planned.  
2.5. Goals of benchmarking are developed in consultation with **stakeholders**.  
2.6. **Benchmarking teams** are selected according to agreed criteria.  
2.7. Team roles and responsibilities are confirmed and supported with training.  
2.8. Benchmarking activities are scheduled and documented following consultation with stakeholders.  
2.9. Criteria are established for internal and external benchmarking and agreed upon by benchmarking team.  
2.10. Internal and/or external **benchmarking partners** or sources are identified, according to the scope, parameters and goals of the benchmarking exercise.  
2.11. Cooperative and open relationships are built with benchmark partners. |
| 3. Undertake | 3.1. Logistical requirements and impacts of the |

| benchmarking activity | benchmarking exercise are identified and negotiated with stakeholders.  
3.2. Statistical analysis frameworks and measurement frameworks are developed.  
3.3. Problem-solving processes are developed and agreed.  
3.4. Own enterprise or department functions, processes and operations are analysed and documented according to agreed criteria.  
3.5. Benchmarking partner's functions, processes, operations and performance outcomes are analysed and documented.  
3.6. Comparisons of performance are made to identify compatibility of measurement data, commonalities, trends, differences and gaps.  
3.7. Comparisons or benchmarking reports are communicated to benchmarking partners according to agreement.  
3.8. Change strategies are developed from analysis and evaluation of divergences and gaps. |
| 4. Capitalise on benchmarking outcomes | 4.1. Opportunities for using benchmarking and benchmarking data in continuous improvement processes are identified.  
4.2. Customer consultation and feedback is built into continuous improvement processes.  
4.3. Enterprise personnel are supported through the change process.  
4.4. Improvements resulting from the benchmarking processes are measured and reported to stakeholders.  
4.5. Benchmarking information is utilised to develop the enterprise's competitive advantage and market profile. |
# REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- determine criteria for the identification of appropriate benchmarking partners and maintaining positive partner relationships, consistent with enterprise goals and directions
- access industry and enterprise benchmarking data
- analyse and interpret a range of complex qualitative and quantitative data relating to enterprise operations and benchmarking activities
- apply relevant communication and mathematical skills
- identify enterprise goals and directions and explain the role benchmarking can have in achieving enterprise goals
- develop and maintain positive relationships with benchmarking partners
- work effectively as an individual and as a member of a team
- use effective communication, negotiation and leadership skills in a range of benchmarking interactions (e.g. with benchmarking teams, benchmarking partners and internal stakeholders dealing with change)
- use problem-solving skills in a range of situations
- utilise information and communications technology including performance management, project management, statistical and modelling software
- prepare a strategy for gathering and analysing customer feedback
- develop a financial model for measuring Return On Investment (ROI) for benchmarking processes
- develop and implement a communication and marketing strategy to inform stakeholders (including senior management, personnel at all levels of the organisation and customers) of benchmark goals, progress and outcomes
- prepare benchmarking action plans that specify resource requirements, methodologies, milestones, communication strategies and timelines, and include mechanisms for linking with enterprise planning cycles and continuous improvement strategies
- develop and implement strategies for the resolution of logistic, resource, cultural, ethical and political issues raised during the benchmarking process, including scheduling team release and involvement, supporting individuals through change, managing group dynamics, confidentiality and commercially sensitive information, dealing with diversity
- develop performance indicators for the enterprise, function, department or process being benchmarked
- implement the findings of benchmarking exercise including interpreting benchmarking results, identifying areas for improvements, building findings into targets and planning, identifying possible indicators of enterprise and/or department competitive edge and preparing a market profile
- plan quantitative and qualitative data management strategies (e.g. collection, collation, analysis, presentation and reporting)
- prepare memorandums of understanding or contracts for benchmarking partners, as appropriate
## REQUIRED SKILLS AND KNOWLEDGE

- present reports according to legal and enterprise requirements
- take action to improve own work performance as a result of feedback from others, self-evaluation, or in response to changed work practices and technologies

### Required knowledge

Knowledge of:

- the role of performance indicators in benchmarking
- the difference between performance and process benchmarking
- relevant OH&S, workplace and regulatory requirements
- the critical factors required for successful and effective benchmarking processes and outcomes, and the implications for enterprise benchmarking activities
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Effective management and/or facilitation of a benchmarking process, including related improvement activities, must be demonstrated.

### Context of and specific resources for assessment

Resources may include:
- access to appropriate information sources including industry standards and research data, similar businesses and industries
- enterprise system information
- workplace environment with typical operation and production conditions.

### Method of assessment

Recommended methods of assessment include:
- a third-party referee report of sustained performance at appropriate level of authority and responsibility
EVIDENCE GUIDE

- assignment focusing on understanding and application of principles and theory to workplace operations
- simulation
- workplace or industry projects with a focus on company/industry environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Benchmarking may be undertaken:
- between companies, including competitors
- between departments or sections:
  - boning, slaughter, rendering, stockyards, sales
  - curing, corning, smokehouse, rasher room
  - for functional areas (e.g. human resources, finances, production, marketing and sales)
- between sites
- between the company and industry
- internally, externally or across industries.

Improvements to efficiency might be:
- reductions in labour

| 1. Gather legal information required for business compliance | 1.1. Relevant legal information is gathered and analysed from appropriate sources.  
1.2. Expert advice is sought, analysed and evaluated.  
1.3. Employer and employee obligations and responsibilities are clearly explained to management. |
| 2. Identify legal risks | 2.1. Workplace policies, systems, controls and practices are evaluated according to enterprise and legal requirements.  
2.2. Workplace policies, procedures and systems are analysed for compliance with contract and legal requirements.  
2.3. Key risk areas are identified.  
2.4. Level of risk is analysed. |
| 3. Ensure enterprise compliance with legal requirements | 3.1. Current strategies for compliance with legal requirements are analysed.  
3.2. Feedback on compliance record is provided to stakeholders.  
3.3. Strategies to ensure compliance with legal requirements and reduce risk are developed, communicated and implemented.  
3.4. Currency of legal information is maintained. |
| 4. Report enterprise compliance | 4.1. Records relating to systems, training, communication and non-compliance with legal requirements are maintained and secured.  
4.2. Compliance reports are prepared for internal personnel and external authorities as required.  
4.3. Non-compliance incidents are recorded and reported to relevant internal personnel and external authorities in a timely manner.  
4.4. Compliance reports and enterprise representations are prepared for external authorities. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.
### REQUIRED SKILLS AND KNOWLEDGE

#### Required skills

Ability to:
- analyse and update legal information through independent research and/or professional development
- read, analyse and interpret complex legal information
- access relevant mathematical information
- interpret monitoring data and prepare compliance reports
- apply legal concepts including duty of care, to the development and implementation of enterprise operations and systems
- apply teamwork strategies to foster stakeholder commitment and compliance with legal requirements
- communicate legal information and requirements to all stakeholders, in a language and style suitable for the purpose and audience
- determine the enterprise's level of legal and statutory compliance
- interact and communicate with external authorities in a professional and open manner
- promptly report non-compliance to relevant external authorities and enterprise personnel
- determine corrective actions appropriate for the circumstances
- present reports according to legal and enterprise requirements
- use assertive, persuasion and negotiation skills as required
- determine the responsibilities and liabilities of managers, directors, owners and employees and the consequences of non-compliance
- maintain and secure records and record keeping systems to meet legal or statutory requirements
- prepare briefing information for specialist legal advisors
- identify enterprise requirements for specialist legal advice
- take action to improve own work practice as a result of self-evaluation, feedback from others’ or in response to changed work practices or technology

#### Required knowledge

Knowledge of:
- relevant OH&S and workplace requirements
- sources of legal information
- legal concepts including social justice, tort, negligence, consumer law, employment law
- relevant environmental requirements
- relevant food safety legal requirements
- relevant trade practices requirements
# Evidence Guide

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Ability to identify, understand and interpret legal information in context for the enterprise’s business must be demonstrated.

### Context of and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:
- real work environment.
- relevant documentation such as:
  - manufacturer’s instructions or operations manuals
  - regulatory requirements
EVIDENCE GUIDE

- workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects focusing on company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

legal information required for business compliance may include:

- ANZ risk management standards
- ANZ compliance standards
- Australian Standards
- commercial law including fair trading, banking, trade practices, insurance, contracts, patents, copyright, trademarks, sale of goods, procurement rights
**RANGE STATEMENT**

| | consumer law  
corporate law, including registration, licensing, financial reporting, liability, partnerships  
environmental and waste management  
Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment  
export regulations  
food standards and food safety including industry licensing and registration, processing and transporting of meat for human consumption, food safety and labelling of ingredients  
industrial awards, agreements  
OH&S regulations and rehabilitation legislation  
superannuation  
taxation  
traineeship requirements. |
|---|---|
| **Sources** of legal information include: | courts, including industrial, civil and criminal courts  
employer associations and unions  
government departments, agencies and statutory bodies  
industry associations  
enterprise legal advisors  
official web sites containing Acts, regulations and food standards. |
| **Legal requirements** must include, as a minimum: | consumer  
commercial  
corporate  
industrial awards  
employment. |
| **Stakeholders** might include | enterprise management  
regulatory authorities  
industry organisations. |
| Compliance reports for **external authorities** might include: | environmental compliance reports  
declarations of legal competence |

MTMPSR603A Manage meat processing systems to maintain and improve product quality

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to manage the enterprise quality system and maintain the quality of products. It includes the skills and knowledge to monitor, review, evaluate and improve enterprise operations to ensure delivery of meat and meat products that satisfy customer demands. |

Application of the Unit

| Application of the unit | This unit is particularly appropriate for Quality Assurance (QA) personnel, production managers, cold chain coordinators and transport coordinators. Many factors impact on the quality, including eating quality, of meat and meat products, which affect prices and sales. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Define meat quality | 1.1. Relevant regulatory, scientific, industry and market information defining *meat quality*, and *factors affecting* meat quality, is researched and analysed.  
1.2. Customer and consumer perceptions, expectations and requirements are identified and analysed.  
1.3. Meat quality is defined and balanced against enterprise requirements for yield, cost and meat safety.  
1.4. Enterprise meat quality specifications for suppliers or supplied product and end product are prepared.  
1.5. Performance standards, including specifications, are established and data collection strategies are put in place. |
| 2. Analyse production processes and systems for impact on meat quality | 2.1. Meat quality control points along the value chain, including pre- and post-slaughter factors, are identified.  
2.2. Production processes and systems are analysed against agreed criteria.  
2.3. Enterprise operations including inputs, processes and technology are analysed and evaluated for impact on meat quality, yield and cost.  
2.4. Recommendations to improve operations for product quality are prepared and presented.  
2.5. Alliances with suppliers and customers are identified and established to improve quality at all points in the value chain.  
2.6. Resource requirements for the achievement of meat quality specifications are identified and allocated. |
| 3. *Monitor* meat product quality | 3.1. Sampling and *testing* procedures and schedules are prepared, implemented and analysed.  
3.2. Non-conformances with meat quality requirements are investigated.  
3.3. Preventative and control measures are developed and implemented. |
| 4. Evaluate meat quality outcomes | 4.1. Performance is analysed and assessed against performance standards.  
4.2. Continuous improvement strategies are developed and strategies for implementation prepared.  
4.3. Consumer and customer feedback is analysed and acted on within the continuous improvement |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
| framework. 4.4. **Recommendations for improving operations** to maintain and enhance meat or meat product quality are developed and communicated to appropriate personnel |
| 5. **Promote enterprise meat quality outcomes** | 5.1. Meat quality outcomes are reported to *stakeholders*, including employees, customers and consumers. 5.2. Enterprise meat quality specifications are used to identify enterprise’s market edge. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- evaluate current plant, equipment and processes for impact on meat and meat product quality
- assess and monitor the efficiency of improvements to meat and meat product quality
- apply relevant communication and mathematical skills
- monitor operations for meat and meat product quality
- develop performance criteria for meat and meat product quality
- evaluate product quality outcomes through the development of specifications and performance standards, analysis and interpretation of performance information including costs and sales
- improve product input and service quality through the development of alliances, supplier specifications and audit processes, monitoring input quality
- maintain currency of knowledge through independent research or professional development
- prepare and communicate information on meat and meat product quality outcomes to workforce, consumers and customers
- prepare recommendations for improving operations to maintain and enhance meat/meat product quality
- prepare specifications for enterprise product, including specifications for end product where not provided by customer, supplier and supplied product specifications, product description, labelling and claims
REQUIRED SKILLS AND KNOWLEDGE

- research best practice in meat processing, meat manufacturing and meat preparation techniques and technology including computerised, mechanical and manual systems, and the impact on product quality
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology

Required knowledge

Knowledge of:

- Hazard Analysis Critical Control Point (HACCP) principles, systems and food safety requirements for enterprise product.
- nutritional content and value of meat and meat products
- negative physiological changes of meat and their prevention (e.g. Dark, Firm and Dry (DFD) and Pale, Soft, Exudative (PSE))
- impact of species, breed, sex, age (dentition and ossification) and nutrition of livestock on meat and meat product quality
- enterprise requirements for product costs, prices and sales and how this influences enterprise definitions and achievement of product quality
- major physical, chemical/biochemical and microbiological characteristics and changes affecting the quality of meat and meat products
- relevant Occupational Health and Safety (OH&S) and workplace requirements
- optimum testing and sampling regimes to monitor and measure the quality of enterprise product
- meat tenderisation techniques and their suitability for enterprise product and operations, including:
  - advanced technological processes
  - calcium activated tenderisation
  - conditioning, including elevated temperature conditioning
  - electrical stimulation
  - further processing (e.g. cooking and smoking)
  - mechanical tenderisers (e.g. knife tenderisers)
  - product ageing process (e.g. rigor mortis, shear force and post mortem including calcium dependent) proteolysis
  - tenderstretching
- pre and post slaughter factors and their impact on meat and meat product quality
- biological and anatomical structures of major species processed in Australia for human consumption
- local and international meat and meat product description and grading systems operating in the Australian market, such as:
  - AUS-MEAT
  - Japan Beef Grading System
  - Meat Standards Australia (MSA)
REQUIRED SKILLS AND KNOWLEDGE

- United States Department of Agriculture (USDA) Grading System
- Regulatory requirements impacting on enterprise operations and the quality of enterprise product

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Criteria for defining meat quality may include:**

- consumer preferences
- customer specifications
- eating quality standards (e.g. MSA).

**Factors affecting meat quality may include:**

- pre and post slaughter:
  - breeding, farming and farm handling, including diet and nutrition
  - climate and seasonal variations
  - animal husbandry
  - cooking
  - further processing, refrigeration, packaging, storage and handling
  - livestock characteristics, including anatomy and biochemical characteristics
  - slaughtering and processing operations
  - transportation, handling and lairage

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to plan and oversee the effective operation of enterprise cold chain and refrigeration systems to ensure product quality and food safety. It also covers ways to manage and reduce the costs of cold chain operations. Cold chain systems and operations are critical to the quality and food safety of enterprise products and their efficient management will help minimise the cost of production and maintain regulatory compliance. |

Application of the Unit

| Application of the unit | This unit is applicable to production managers, plant engineers, Quality Assurance (QA), maintenance and chiller managers or coordinators. |
| At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies. |

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Assess enterprise cold chain system requirements | 1.1. Enterprise goals, directions and forecasts are analysed and the implications for cold chain requirements are determined.  
1.2. Enterprise refrigeration systems, cold chain, technical support team and operations are documented.  
1.3. Regulatory and customer requirements relating to the operation and maintenance of refrigeration systems are identified.  
1.4. Enterprise requirements for specialised refrigeration advice and expertise are determined.  
1.5. **Optimum refrigeration requirements** to maintain quality and safety of products are determined.  
1.6. Performance standards and targets including standards related to food safety, cost, quality and waste are established. |
| 2. Manage and control cold chain systems | 2.1. Procedures for the hygienic and safe operation and maintenance of refrigeration or cold chain systems are developed according to quality, food safety, manufacturer specifications, and customer and enterprise requirements.  
2.2. Contingency plans and procedures for systems failure or overload are prepared and conveyed to relevant personnel.  
2.3. Emergency procedures and plans are prepared and included in health and safety systems, procedures, training and work instructions.  
2.4. Strategies for communicating and resolving systems problems and failures with stakeholders are prepared. |
| 3. Monitor refrigeration and cold chain system performance | 3.1. Performance information requirements and data collection strategies are determined and developed.  
3.2. Monitoring procedures for the operation of refrigeration or cold chain systems are established and maintained.  
3.3. Non-conformances are investigated, reported where required, and corrective actions implemented.  
3.4. Preventative and control procedures are developed and implemented to prevent future non-conformance. |
| 4. Improve refrigeration | 4.1. Performance data is analysed and measured against performance standards, including product quality and |
ELEMENT | PERFORMANCE CRITERIA

System performance | cost requirements.
| 4.2. Energy costs of refrigeration systems are calculated and monitored.
| 4.3. Strategies for improving performance and minimising costs are developed and implemented.
| 4.4. Refrigeration system requirements are included in budgets and forward planning.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:

- assess requirements for enterprise refrigeration or cold chain systems based on enterprise goals, directions and forecasts, detailed product knowledge and regulatory requirements
- apply calculation skills and budget principles to refrigeration costs
- apply relevant communication and mathematical skills and processes including, as appropriate:
  - assertiveness, persuasion and negotiation skills
  - face-to-face, technological and electronic methods
  - communicating in sensitive, conflictive, collaborative and supportive environments
  - analysing and presenting complex concepts, technical information, mathematical information and other data in simple or complex formats
  - complex actual and hypothetical technical and financial modelling, calculations, interpretation or analysis
- develop and maintain the operating system
- prepare manuals and procedures for the operation of refrigeration systems, chillers and freezers according to hygiene, safety, quality and customer requirements and determine corrective actions for systems variations and non-conformances
- identify key personnel for the resolution and communication of systems problems and failures
- maintain currency of knowledge through independent research or professional development
- maintain the quality of products in the cold chain by monitoring chillers or freezers
REQUIRED SKILLS AND KNOWLEDGE

and interpreting refrigeration data to maintain appropriate temperature or humidity for product types and quantities

- manage maintenance of enterprise refrigeration systems including the negotiation and preparation of maintenance schedules; monitoring repairs; conformance with regulatory and quality requirements; and replacement requirements
- manage refrigeration costs by monitoring the costs of refrigeration including internal or external service models, maintenance costs, lost time costs, product losses and energy costs, minimising energy costs
- monitor and report system performance including setting performance standards and measures for refrigeration system, consistent with enterprise goals and products, analysing performance information and making recommendations for systems improvement for inclusion in enterprise forward planning
- operate refrigeration or cold chain systems efficiently including identifying and implementing strategies for reducing heat load in enterprise chiller or freezer, minimising energy costs, maximising availability and minimising down time, maintaining temperatures according to quality and food safety requirements
- prepare safety procedures for chillers or refrigeration systems including emergency plans and procedures for incidents and accidents associated with refrigerants (leaks and spills) and procedures for the safe and efficient operation of equipment (e.g. forklifts and lights) in chillers and freezers
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- utilise information and communications technology including statistical and modelling software for research, data collection and analysis, and reporting

Required knowledge

Knowledge of:

- refrigeration concepts and terms including:
  - ambient temperature
  - Biot number: ratio of conductive (internal) resistance to heat transfer to the convective (external) resistance
  - half cooling time
  - surface heat transfer
  - thermal properties of meat including conductivity
  - strategies for reducing heat loads, such as:
    - air curtains
    - automatic door closers
    - improved insulation to prevent heat filtration through wall
    - no lights, people, machinery inside
    - plastic strips
    - removal of heat load caused by fans
### REQUIRED SKILLS AND KNOWLEDGE

- Impact of high and/or low humidity on eating quality, production and storage of meat and meat products
- Impact of moisture transfer during chilling and freezing on quality, production and storage of meat and meat products
- Impact of packaging on chilling and freezing rates of meat and meat products
- Concept of heat load and the implications for product quality and energy requirements for refrigeration system
- Methods of chilling and freezing meat and meat products including:
  - Air (e.g. natural convection, forced convection and spray chilling)
  - Air freezing
  - Contact freezing
  - Cryogenic (e.g. gaseous, sold and liquid - liquid nitrogen and solid carbon dioxide)
  - Cryogenic freezing
  - Direct contact (e.g. plate freezing and conduction)
  - Direct freezing systems
  - Liquid immersion (e.g. chilled water or glycol solution)
- Impact of chilling or chilling rates and freezing or freezing rates on quality, production and storage of meat and meat products
- Qualities of humidity including changes in evaporation, pH levels, saturation humidity, saturation vapour pressure
- Thermal properties of meat and meat products and the implications for meat quality
- Relevant Occupational Health and Safety (OH&S) and workplace requirements
- Relevant food safety requirements and reporting responsibilities
- Identify enterprise requirements for refrigeration system including evaluating requirements for specialist personnel and expertise for management and maintenance of refrigeration system; and evaluating different methods of chilling and freezing for cost, efficiency and impact on product quality
- Hygiene and sanitation requirements for operation, cleaning and maintenance of cold chain systems
- Processes and methods for chilling and freezing meat and meat products and their impact on product quality, food safety and tenderness
- Relevant regulatory requirements including food safety regulations and the implications for the management of the enterprise refrigeration or cold chain systems
- OH&S requirements related to the safe handling of refrigerants and safety in controlled atmosphere and confined spaces
- Main elements of the compression cycle (compressor, evaporator, condenser, refrigerant) used in refrigeration

application of principles and theory to workplace operations
- workplace projects with focus on company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment
A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Cold chain systems include:
- chillers
- freezers
- other temperature controlled areas.

Cold chain may extend from point of slaughter to retail outlet and include transportation.

Optimum requirements for enterprise refrigeration systems may relate to:
- technical requirements (e.g. heat load transfer and efficiency) for efficient and cost-effective systems, and capacity to meet enterprise production, product and food safety requirements.

Stakeholders may include:
- company owners, directors, shareholders, financiers
## RANGE STATEMENT

- competitors
- refrigeration specialists
- management and employees
- suppliers, customers, consumers
- unions and employer associations
- regulators.

**Performance** measures for cold chain systems may relate to

- costs
- energy consumption
- food safety and legal
- product quality
- customer specifications.

**Strategies for improving performance** may include assessment of alternative refrigeration strategies such as:

- different configurations and types of chillers
- repair, upgrade or purchase of new equipment and systems
- use of alternative energy sources or alternative refrigeration service models such as:
  - combination of internal and external expertise
  - external contractors
  - internal personnel
  - use of technology.

Competency field

Competency field
MTMPSR606A Assess and purchase livestock

Modification History

Not Applicable
Unit Descriptor

This unit covers the skills and knowledge required to identify, select and purchase livestock according to customer requirements and within enterprise livestock budgets. The selection, purchasing and transport of livestock has implications for the quality of the product and the profitability of the enterprise.

Application of the Unit

In a meat industry context, individuals working at this level exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.

Their responsibilities may include management of cost centres or departments operating semi-autonomously within guidelines of the parent enterprise or company (e.g. retail meat departments, boning rooms, food service and meat retail, domestic and export establishments, medium and large enterprises and small business employing fewer than 100 workers).

This unit is of particular interest to livestock buyers but may also have relevance for production and finance personnel.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify livestock markets | 1.1. Livestock markets and methods are identified and selected to meet enterprise requirements.  
1.2. Risks associated with the purchase of inappropriate livestock are analysed and risk management strategies identified.  
1.3. *Regulatory requirements* relating to the sale and purchase of livestock are identified.  
1.4. Networks and alliances to ensure access to markets are established, and *market intelligence* is gained, according to legal and enterprise ethical requirements. |
| 2. Select livestock | 2.1. *Enterprise specifications* and requirements for livestock are confirmed, including Quality Assurance (QA) arrangements for and with producers.  
2.2. Livestock inspection procedures are conducted according to *Occupational Health and Safety (OH&S)* and animal welfare requirements.  
2.3. Livestock are selected according to enterprise and customer specifications. |
| 3. Purchase livestock | 3.1. Market conditions are analysed and trends in livestock quality and prices are monitored.  
3.2. Terms of sale are negotiated according to enterprise requirements.  
3.3. Livestock budget is monitored and corrective action is taken to address variations.  
3.4. *Documentation* relating to purchase or sale is completed. |
| 4. Transport livestock | 4.1. Transport of livestock is negotiated according to enterprise and animal welfare requirements.  
4.2. Transport of livestock is negotiated according to enterprise production schedules and requirements. |
| 5. Evaluate livestock purchases | 5.1. Quality of livestock is monitored against customer specifications and enterprise requirements.  
5.2. Strategies for improving quality of purchases are recommended and implemented. |

**Required Skills and Knowledge**
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *mathematical skills*
- assess livestock against enterprise specifications and determine fitness for purpose (suitability for customer requirements and ability to meet customer specifications), including the identification of species and breeds in stockyards or paddocks and calculating dressed carcase weight to determine yield and product price
- communicate effectively with producers to provide feedback on enterprise requirements including the presentation of livestock
- complete purchase documents accurately
- develop open and constructive relationships with key *livestock sales and transport personnel*
- estimate expected yield from species and breeds
- evaluate industry methods for purchasing livestock and determine methods suitable for the enterprise
- gather and interpret processing and sales data, including customer feedback to analyse quality of livestock purchased
- identify and apply relevant OH&S and *workplace requirements*
- identify potential alliances, *key stakeholder* networks and *information sources* to facilitate enterprise access to required livestock and livestock markets
- interpret the implications of enterprise forecasts of orders and sales for the purchase of livestock
- manage livestock budget including analysis of livestock market trends and enterprise purchase history to determine quality and price parameters, calculating average purchase price per kilo and balancing purchase prices to achieve livestock budget targets
- negotiate enterprise requirements for transport of livestock with *carrier* including animal welfare requirements, enterprise production schedules and enterprise budget requirements
- obtain and secure documentation relating to livestock status, purchase and transport
- prepare livestock purchasing plans to meet enterprise forecasts of orders and sales including liaison with enterprise personnel to identify production livestock schedules and requirements, analysing enterprise orders and sales, and confirming livestock specifications
- present reports according to legal and enterprise requirements
- use available communication and information technology to record, monitor and analyse livestock purchase data, including fat scores, prices and pricing structures

Required knowledge
### REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:
- characteristics of different species and breeds and their suitability for the enterprise's product
- identification of animals using brands, tags and tattoos
- international, national and local factors affecting the livestock market and describe the implications for the enterprise's operations
- livestock classification and conformation or scoring system
- customer specifications and the implications for the selection and purchase of stock (e.g. required product or cuts, European Union (EU) closed system, Japanese ox)
- enterprise ethical standards and the implications for operations in the livestock market
- **producer QA** programs including 'Cattle Care' and 'Flock Care'
- regulatory requirements affecting the purchase and transportation of livestock
- effects of transportation on livestock and product quality
- symptoms of infectious and non-infectious diseases to be identified or eliminated when assessing livestock
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

**Context of and specific resources for assessment**

Resources may include:

- a real work environment
- access to stockyards
- relevant equipment and materials
- relevant documentation such as:
  - customer and workplace specifications
  - electronic and online livestock data
  - manufacturer instructions or operations manuals
  - regulatory requirements
  - workplace policy and procedures.

**Method of assessment**

Recommended methods of assessment include:

- a third-party referee report of sustained performance at an appropriate level of authority and responsibility.
EVIDENCE GUIDE

- assignment focusing on the understanding and application of principles and theory to workplace operations
- simulation
- workplace projects with focus on company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Regulatory requirements may include:

- animal welfare
- appropriately accredited saleyards
- commercial law including fair trading, trade practices
- consumer law
- corporate law, including registration, licensing, financial reporting
- environmental and waste management, sustainable work practices
- Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment
- Export Control Act
### RANGE STATEMENT

- hygiene and sanitation requirements
- industrial awards, agreements
- relevant regulations and Australian Standards
- state, territory and federal regulations regarding meat processing
- taxation law.

**Market intelligence** may be local, national and international and may be provided by:

- communications media (e.g. radio, TV, newspapers and internet)
- government agencies:
  - Department of Primary Industries and Energy (DPIE)
  - Australian Bureau of Agricultural and Resource Economics (ABARE)
  - Australian Competition and Consumer Commission (ACCC)
  - Aus Industry/AusTrade
- industry associations
- research agencies and publications (e.g. MLA, Feedback)
- specialist journals and press (e.g. breeder or producer, economic, agricultural and manufacturing)
- standard yield analysis systems and standard costing arrangements
- stock and station agents.

**Selection** of suitable cattle may be determined by:

- age, sex, size, condition
- breed or strain
- chemical application history
- cost
- end use
- feed history
- health anomalies
- number
- pregnancy status
- production records
- weight, fat cover, muscling.

**Enterprise specifications** may include:

- availability and delivery dates
- body conformation requirements
- number or head
- species and breeds
- use of AUS-MEAT language and descriptors.

MTMPSR607A Analyse and develop enterprise systems for new opportunities

Modification History

Not Applicable
Unit Descriptor

Unit descriptor
This unit covers the skills and knowledge required to evaluate and develop production systems which are suited to the company’s products and goals, are cost efficient and to ensure that products meet enterprise and customer specifications. The design of the production system affects the quality of product processed. The analysis and development of enterprise production systems gives an enterprise the flexibility to become an innovative organisation, take on new opportunities and strengthen or expand its market.

Application of the Unit

Application of the unit
At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.

This unit is suitable for senior managers, Chief Executive Officers (CEOs), Chief Finance Officers (CFOs) and directors of meat processing and smallgoods enterprises, building a culture of innovation in a meat industry context.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- flowchart the movement of products and resources along the chain or process line to identify strengths and weaknesses
- apply in-depth *product knowledge* in determining the processing requirements for species or products according to customer and enterprise requirements, including methods, technology, quality, speed of production
- analyse the organisational environment to assess capacity for, and impact of changes to, systems and operations
- establish goals and performance criteria for operation of the production system
- determine criteria for evaluating alternative production systems and system components including reference to product specifications, yield and quality, technical requirements and cost
- develop data collection and recording systems linked to systems performance criteria
- analyse performance information and prepare reports for stakeholders
- apply relevant *communication* and *mathematical skills*
- develop a communication strategy for involving the workforce, negotiating changes and reporting progress
- assess alternative configurations of technology, labour, processes, organisation and layouts for process flow effectiveness
- compare capability of existing production system with market potential and capability of alternative systems
- estimate the impacts of enterprise forecasts and changes in the industry, including technology and in the market on enterprise resource requirements, operation and sales
- evaluate the consequences and change implications of adopting new, reconfigured or redesigned systems on overall operation of the plant, including the impact on personnel
### REQUIRED SKILLS AND KNOWLEDGE

- identify and apply relevant *Occupational Health and Safety OH&S, workplace and regulatory requirements*
- identify and resolve industrial relations issues related to changes in systems
- prepare action plans for the implementation of new systems including commissioning of the new system, timelines, resources and training and change facilitation strategies to assist personnel implement new, reconfigured or redesigned systems
- prepare and justify budgets for the introduction of new systems or components including calculating the costs of retaining the current system and the costs of setting up and operating new, reconfigured or redesigned systems, including initial costs, ongoing costs and payback periods
- prepare and present recommendations in formats, language and styles appropriate for the audience
- present reports according to legal and enterprise requirements
- quantify and cost the resources required for optimum operation of existing systems, including utilities and energy, personnel, equipment and stock
- research and analyse *market intelligence*, trends and forecasts to identify possibilities for the enterprise
- research and evaluate available systems (e.g. technology and equipment, processing methods and techniques and work design) appropriate for enterprise product
- research and evaluate sources of support including government and private, financial and other support
- review existing procedures and controls or develop new ones to facilitate systems operations according to enterprise and regulatory requirements including integration with enterprise quality and food safety systems
- seek external advice where appropriate (e.g. from technology and equipment manufacturers, architects, engineers and tradespeople)
- use a range of quality and evaluative tools to analyse the capability of enterprise systems to meet future projections
- use available communication and information technology to complete forecasts, analyses and *modelling*, where required

### Required knowledge

Knowledge of:
- enterprise goals and directions and the implications for enterprise operations
- budgeting strategies including calculating the costs of retaining the current system and the costs of setting up and operating new, reconfigured or redesigned systems, including initial costs, ongoing costs and payback periods
- report formats and styles and their appropriateness for various audiences

EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Production system and system components may include alternative combinations and configurations of:

- human resources including management practices, work practices
- job or work design
- operational sequencing and flows
- plant layout and construction
- technology and equipment.

Criteria for evaluating alternative systems and configurations may include:

- capacity (e.g. volume, speed and life span)
- compliance with relevant design and operating standards, codes, regulations
- energy requirements
- personnel requirements
- safety
- set up and operating costs
- waste and environmental impact.

Stakeholders may include:

- company owners, directors, shareholders, financiers

MTMPSR608A Establish new markets

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to assess the enterprise’s potential and capacity for entering new markets. It includes the skills and knowledge needed to identify new markets including local, interstate and international markets, research regulatory requirements and negotiate contracts. The decision to enter new markets is based on extensive research and planning. |

Application of the Unit

| Application of the unit | Management understanding of the risks and benefits of new markets and the impact on the business is essential. Managers responsible for marketing and production, and Quality Assurance (QA) managers required to supply product for new markets would benefit from this unit. This unit is relevant for all sectors of the industry. |

| 1. **Research** and determine viability of entering new markets | 1.1. *Sources of assistance* for identifying and establishing new markets are identified and evaluated.  
1.2. *Characteristics* of potential markets are analysed.  
1.3. Enterprise product or service range is reviewed in terms of potential market and customer requirements.  
1.4. Competitive position of enterprise product is assessed and sales projections are prepared.  
1.5. *Licensing* and other regulatory requirements are determined.  
1.6. Costs, benefits and risks of entering new markets are evaluated. |
| 2. Develop a market entry strategy | 2.1. Resourcing strategies for entering the new market are developed.  
2.2. Strategies for managing risk are identified.  
2.3. Marketing strategy is developed, in association with relevant internal and external personnel.  
2.4. Distribution strategy is planned to ensure profile of product in the new market. |
| 3. Identify contract and service requirements | 3.1. Enterprise terms of payment and administrative requirements are established.  
3.2. Documentary and commercial requirements of new markets are identified.  
3.3. Finance and insurance requirements are identified.  
3.4. Requirements for transport and distribution contracts are identified to ensure quality and safety of product. |
| 4. Develop evaluation strategy for new market entry | 4.1. *Targets* are identified and performance indicator requirements determined.  
4.2. Strategies for collecting and analysing performance are prepared.  
4.3. Strategies for reporting outcomes and including recommendations in future planning are identified. |

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**
## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- apply relevant *communication and mathematical skills*
- communicate and negotiate clearly, ethically and effectively with a range of representatives (e.g. internal personnel, government agents, financial agencies, distributors, *export control agencies*, brokers, customers) and other *stakeholders*
- determine and obtain *resources* required to support new market strategy
- *establish infrastructure requirements* for new market
- *evaluate and report market entry* performance
- *evaluate potential and/or feasibility of new market entry*
- identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and *workplace requirements*
- identify strategies for managing financial risk
- identify the cultural requirements of the new market/clients
- maintain currency of knowledge through independent research or professional development
- prepare enterprise strategies and plans which include resource requirements, timelines, milestones and communication strategies
- prepare, negotiate and implement strategies and action plans for entering the new market.
- present reports according to legal and enterprise requirements
- research potential markets including competitors, products, customers and market regulations, legislation and controls
- research, collate and analyse *information* relating to the individual business, domestic and international context (as applicable)
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or *technology*.
- use available information and communication technology and systems (e.g. forecasting software, budgets, research material) to assist planning, monitoring and reporting
- use *teamwork strategies* to prepare work team to support new market strategy

### Required knowledge

**Knowledge of:**

- purpose and features of distribution and marketing strategies
- role of new markets in the achievement of enterprise goals and plans
- enterprise budgetary and planning cycles and processes; methods for analysing production; and sales records and costs; and enterprise methods for estimating and forecasting sales and production requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise, is required.

Context of and specific resources for assessment

Resources may include:
- a real work environment
- relevant documentation such as:
  - enterprise business plan
  - manufacturer instructions and operations manuals
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:
- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace
EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>• workplace projects which focus on company environment and conditions.</td>
</tr>
</tbody>
</table>

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Market research may include:

• a broad market study
• a feasibility study
• in depth market research.

Sources of assistance may include:

• industry associations
• government agencies
• departments and programs (e.g. Supermarket to Asia, Aus Trade export market development grants and National Food Industry Strategy)
• consulates and embassies
• financial institutions
• consultants.

Market characteristics include:

• competition (e.g. local and other exporters)
• distribution
• general position of industry within target
## RANGE STATEMENT

| Market | market  
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• market access including import restrictions, licensing, tariffs, food safety regulations, transport, infrastructure, currency stability, cultural and political characteristics, legal systems, bureaucracy etc</td>
</tr>
</tbody>
</table>
|                | • market size, growth and patterns  
|                | • packaging and labelling  
|                | • product pricing, including impact of exchange rates |

**Regulatory requirements** may include:

- animal welfare  
- AQIS notices and circulars  
- Australian Customs Service requirements (EXIT, ELMER, Harmonised tariff system, CALM)  
- commercial law including fair trading, trade practices  
- consumer law  
- corporate law, including registration, licensing, financial reporting  
- criteria for supply and processing of raw product/ingredient for export (inspection and certification of fresh product and ingredients)  
- environmental and waste management  
- Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment  
- Export Control Act  
- export licensing requirements  
- export meat orders  
- food standards  
- importing country requirements  
- industrial awards, agreements  
- prescribed goods orders  
- relevant Australian Standards  
- relevant regulations  
- sales taxes and duties  
- state and territory regulations regarding meat processing  
- taxation  
- Trade Practices Act Part V.  

**Export licensing requirements**  

- sourcing of product from export licensed meat processors
### RANGE STATEMENT

<table>
<thead>
<tr>
<th>may include:</th>
<th>inspection regimes and requirements.</th>

</thead>
</table>

**Risks** may include:
- risks to premises
- personnel
- plant and equipment
- breach of contract
- natural disaster
- food safety
- intellectual property.

**Market targets and performance indicators** may include:
- sales levels
- productivity measures (e.g. economies of scale and turnover)
- product quality
- market share and penetration.

**Communication and mathematical skills** may:
- be complex and relate to product and product quality, financial operations, personnel, operations, sales and turnover and exports
- be formal or informal and involve personal face-to-face methods and technological/electronic methods
- involve communication and information technology that may include telephone, email, internet, software including testing and analysis programs, scheduling, financial packages and databases
- involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data
- involve strategies that are inclusive of the cultural, ethnic and social diversity of individuals and groups
- involve the use of negotiation, persuasion and assertiveness skills
- occur in a variety of sensitive, conflictive, collaborative and supportive environments
- relate to complex actual and hypothetical technical and financial modelling, calculations and interpretation or analysis
- require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify meat cuts | 1.1. Meat cuts are correctly identified by cut name and *species* according to workplace requirements and *specifications*.  
1.2. Meat cuts are correctly selected by cut name and species according to *workplace requirements*. |
| 2. Identify primal cuts | 2.1. Primal cuts are correctly identified by name and species according to workplace requirements.  
2.2. Primal cuts are correctly selected by name and species according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify meat cuts according to label on cartons (as appropriate)
- identify primal cuts correctly by species and cut according to workplace specifications for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- apply relevant *regulatory requirements*
- select and handle products according to *Occupational Health and Safety (OH&S) requirements*
- select cuts correctly by species and cut according to workplace requirements for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- Identify cuts correctly by species and cut according to workplace specifications for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- select primal cuts correctly by species and cut according to workplace requirements for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing

Required knowledge

Knowledge of:
### REQUIRED SKILLS AND KNOWLEDGE

- primal cuts used for different cuts of meat for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- principles of product selection by species, primal and cut type for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- relevant regulatory requirements
- appropriate sources of information on new species or cuts
- different species and categories of meat and cuts for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The candidate must be able to select and identify primal and secondary cuts correctly by species and cut for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing.

Where the candidate does not prepare primal cuts in their usual place of work they must complete the requirements of the Unit in an alternative work placement or in a simulated environment.

### Context of, and specific resources for assessment

Assessment may occur on- or off-the-job.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
EVIDENCE GUIDE

- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Species may include:
- beef
- buffalo
- crocodile
- deer
- emu
- game meat
- goat
- kangaroo
- pork
- poultry
- sheep
- or any other species.

Specifications may be defined by:
- customer specifications
- enterprise procedures
**RANGE STATEMENT**

| Workplace requirements may include: | • enterprise-specific procedures  
• OH&S requirements  
• Quality Assurance (QA) requirements  
• Standard Operating Procedures (SOPs)  
• the ability to perform the task to production requirements  
• work instructions. |
|---|---|
| Regulatory requirements may include: | • Export Control Act  
• federal and state regulations regarding meat processing and food handling  
• hygiene and sanitation requirements  
• relevant Australian Standards  
• relevant regulations. |
| OH&S requirements may include: | • enterprise OH&S policies, procedures and programs  
• OH&S legal requirements  
• Personal Protective Equipment (PPE) which may include:  
• coats and aprons  
• ear plugs or muffs  
• eye and facial protection  
• head-wear  
• lifting assistance  
• mesh aprons  
• protective boot covers  
• protective hand and arm covering  
• protective head and hair covering  
• uniforms  
• waterproof clothing  
• work, safety or waterproof footwear  
• requirements set out in standards and codes of practice. |
| Categories of meat include: | • age  
• differentiation of classes  
• sex  
• weight. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate storage techniques which minimise risk of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- monitor refrigerated temperature on a regular basis
- recognise and interpret codes, date tags and labels
- identify and report unacceptable temperatures either verbally or in writing, according to workplace requirements
- work individually and with other team members
- seek advice from appropriate sources when working with new products
- use correct manual handling techniques for transferring product to storage facilities
- use relevant communication skills

Required knowledge
REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:
- storage techniques which minimise risk of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- appropriate *storage facilities* for individual products
- recommended refrigerated temperature for each product stored
- regulatory requirements related to storing meat products
- species and various meat products for storage

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- cleanliness of holding rooms
- enterprise-specific procedures
- measuring equipment such as thermometers, and other measuring equipment which may be digital or analogue
- OH&S requirements
- Quality Assurance (QA) requirements
- rotation of stock
- Standard Operating Procedures (SOPs)
- storage times and temperatures
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:
- Export Control Act
- Federal, state and territory regulations regarding meat processing and food handling
- relevant Australian Standards
- relevant regulations.

Hygiene and sanitation requirements may include:
- relevant government regulations
- workplace requirements.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements.
**RANGE STATEMENT**

- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

*Communication skills* may include:

- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

*Storage facilities* may include:

- chiller
- freezer.

MTMR104C Prepare minced meat and minced meat products

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to prepare minced meat and minced meat products to regulatory requirements. |

Application of the Unit

| Application of the unit | This unit is applicable to boning rooms, smallgoods manufacturing and meat retail operations. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A Sharpen knives |

### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Clean and prepare processing equipment used in the preparation of minced meat products | 1.1. Mincing equipment is prepared according to manufacturer’s specifications and workplace, Occupational Health and Safety (OH&S), and hygiene and sanitation requirements.  
1.2. Mincing equipment is cleaned according to manufacturer specifications, and workplace and OH&S requirements.  
1.3. Mincing equipment is adjusted as required in accordance with manufacturer specifications and workplace, OH&S and hygiene requirements. |
| 2. Mince meat | 2.1. **Trimmings** are selected according to workplace policy.  
2.2. Trimmings are cut to manufacturer specifications and workplace requirements to avoid blockages in mincer.  
2.3. Trimmings are fed through mincer efficiently to avoid blockages and heat build-up.  
2.4. Species are accurately identified.  
2.5. Species are stored separately according to product description.  
2.6. Product is maintained at correct temperature during processing.  
2.7. Product is handled and stored at correct temperature and conditions. |
| 3. Prepare minced meat products | 3.1. Minced meat products are prepared according to regulatory, workplace, hygiene and OH&S requirements.  
3.2. Ingredients are combined to workplace requirements.  
3.3. **Fat content** is measured.  
3.4. Meat is processed in preparation for forming to product specifications and regulatory requirements.  
3.5. Product is formed to specifications and regulatory requirements.  
3.6. Correct temperature of product is maintained during processing and handling.  
3.7. Product is stored at correct temperature and conditions. |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- activate mincing equipment to assess its readiness for operational use
- identify different species and categories of meat
- start-up and shut-down equipment when necessary according to manufacturer, workplace and OH&S requirements
- operate a mincer to manufacturer, workplace, OH&S, and hygiene and sanitation requirements
- tighten front plate on mincer as required
- operate adjustment tools and equipment correctly
- interpret time and temperature measuring equipment
- accurately copy and record temperature, weights and time, according to workplace requirements
- clean mincer between species to avoid cross-contamination
- use tools and cleaning agents appropriate to the cleaning activity or manufacturer's specifications
- report faults and adjustments required either verbally or in writing according to workplace requirements
- work individually and as part of a team
- list minced meat products
- perform tasks according to OH&S, hygiene and regulatory requirements
- seek advice from appropriate sources when working with new products
- use relevant *communication skills*

#### Required knowledge

**Knowledge of:**

- conditions under which equipment may need adjusting
- fat content using chemical lean measures or visual lean estimation
- purpose and use of processing equipment used in making minced meat products
- temperature requirements for product
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- procedure for cleaning equipment

6.2. Customer enquiries are followed up in accordance with workplace requirements.  
6.3. Customer is informed in relation to enquiry. |
| 7. Record information from enquiries | 7.1. Information about enquiries is recorded to workplace requirements. |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- apply *communication* skills to meet customer needs and enterprise requirements
- provide an overview of the *range of products* and *services* offered by the enterprise
- seek advice or assistance from more experienced team members when necessary
- operate telephone system
- demonstrate polite and efficient telephone technique
- demonstrate suitable behaviour by attending to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically and maintaining professional standards of dress and personal hygiene
- arrange pick up or delivery with customer according to enterprise procedures
- apply relevant *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- use *mathematical skills* appropriate to the task

### Required knowledge

Knowledge of:

- how to interact with others in an appropriate way
- workplace complaints policies and procedures
- workplace requirements related to acknowledging and greeting customers, including enterprise ethical standards
- relevant OH&S and regulatory requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated over time and under typical operating conditions for the enterprise. |

| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal operating conditions. |

| Method of assessment | Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Customers include regular or first-time visitors to the enterprise, or those making contact by telephone.

Workplace requirements may include:
- enterprise ethical and customer standards
- enterprise standard for greeting and thanking the customer
- enterprise-specific requirements
- OH&S requirements
- order forms
- Quality Assurance(QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Customer requirements may include:
- advice on enterprise products and services
- different cultural and ethnic needs
- immediate purchase of customer-selected items.

Customer orders may be taken:
- by email
- by fax
- by phone
- face to face.

Procedures for following up customer enquiries may include:
- contacting customer when additional information, product or service is available
- recording in order book.

1.3. Tools are used according to manufacturer specifications to achieve desired outcomes.  
1.4. Tools are stored safely in a designated location. |
| 2. Undertake minor routine preventative maintenance | 2.1. Routine preventative maintenance on equipment is carried out in association with fellow workers in accordance with workplace agreements and company procedures.  
2.2. Grease and oil is applied as directed according to manufacturer’s specifications and maintenance instructions.  
2.3. Faulty application of lubricants is identified and reported according to standard procedures.  
2.4. Occupational Health and Safety (OH&S) non-compliance is identified, rectified and/or reported.  
2.5. Waste arising from routine preventative maintenance is disposed of according to company procedures.  
2.6. Routine preventative maintenance information is recorded in the company reporting system. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify routine maintenance requirements
- clean preventative maintenance tools and equipment
- prepare equipment and work area to conduct preventative maintenance
- select, fit and use personal protective clothing and/or equipment
### REQUIRED SKILLS AND KNOWLEDGE

- ensure appropriate *supplies* prior to commencement of task
- seek advice from other team members or manuals prior to working with new equipment
- consistently apply isolation procedures
- address common problems in conducting routine preventative maintenance
- demonstrate purpose and use of common hand and power tools used in routine preventative maintenance
- locate and refer to workplace information such as lubrication schedules
- identify faults in routine preventative maintenance
- identify relevant plant and equipment
- observe food safety factors for maintenance and servicing
- rectify or report faulty maintenance
- report or record maintenance information as required
- apply relevant *regulatory* and *workplace requirements*
- follow relevant *OH&S requirements*
- observe roles of and relationships with others involved in carrying out maintenance functions
- maintain work area to meet housekeeping standards
- use *communication* skills relevant to enterprise requirements

#### Required knowledge

Knowledge of:

- purpose and use of common hand and power tools used in routine preventative maintenance
- purpose and use of routine preventative maintenance
- isolation procedures
- food safety factors for maintenance and servicing
- environmental issues and controls related to routine preventative maintenance
- links between routine preventative maintenance and other work to be achieved by routine maintenance
- relevant regulatory and workplace requirements
- relevant OH&S requirements

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Maintenance instructions** may include:
- manufacturer instructions and manuals
- regulatory requirements
- verbal instructions from a supervisor
- workplace procedures.

**Supplies** for routine maintenance may include:
- air
- chemicals
- grease
- oil
- power
- steam
- water.

**Regulatory** requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards.
**RANGE STATEMENT**

| Workplace requirements may include: | • relevant regulations.  
• enterprise ethical standards, values and obligations  
• enterprise-specific procedures, policies and plans  
• Standard Operating Procedures (SOPs)  
• work instructions.  
| --- | ---  
| **OH&S requirements** may include: | • enterprise OH&S policies, procedures and programs  
• OH&S legal requirements  
• Personal Protective Equipment (PPE) which may include:  
  • coats and aprons  
  • ear plugs or muffs  
  • eye and facial protection  
  • head-wear  
  • lifting assistance  
  • mesh aprons  
  • protective boot covers  
  • protective hand and arm covering  
  • protective head and hair covering  
  • uniforms  
  • waterproof clothing  
  • work, safety or waterproof footwear  
• requirements set out in standards and codes of practice.  
| **Communication** may: | • be with people from a range of cultural, social and ethnic backgrounds  
• involve listening and understanding  
• involve the use of communication technology.  
• require speaking clearly and directly.

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Monitor temperature of meat product in receival area** | 1.1. Temperature of received meat product is checked and recorded in line with *workplace requirements*.  
1.2. Supervisor is notified when meat product is delivered at a temperature that does not meet *workplace, hygiene and sanitation* and *regulatory requirements*. |
| 2. Monitor temperature of cool room | 2.1. Temperature of cool room is checked and recorded to meet *workplace, hygiene and sanitation* and *regulatory requirements*.  
2.2. Supervisor is notified when cool room temperature does not meet *workplace, hygiene and sanitation* and *regulatory requirements*. |
| 3. Monitor display cabinet temperature | 3.1. Temperature of display cabinet is checked and recorded to meet *workplace, hygiene and sanitation* and *regulatory requirements*.  
3.2. Supervisor is notified when display cabinet temperature does not meet *workplace, hygiene and sanitation* and *regulatory requirements*. |
| 4. Monitor temperature of meat product while moving between refrigerated storage locations | 4.1. Temperature of meat product is monitored while outside of refrigerated storage areas to comply with *workplace, hygiene and sanitation* and *regulatory requirements*.  
4.2. Meat product is returned to refrigerated storage quickly and efficiently according to *workplace requirements*. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- measure temperature of meat product and storage areas, including:
  - receival area
  - cool room
### REQUIRED SKILLS AND KNOWLEDGE

- display cabinets
- monitor refrigerated temperatures on a regular basis
- advise customers of suitable storage temperatures of meat product
- apply *Occupational Health and Safety (OH&S) requirements* for working in refrigerated areas
- seek advice from appropriate sources when working with new products
- *explain* effect of incorrect storage temperatures on meat products
- use relevant *communication skills*
- use *mathematical skills* relevant to the task
- work effectively individually or as part of a team

#### Required knowledge

Knowledge of:
- suitable temperature range for meat product stored in warehouse chillers, transportation, cool rooms and display cabinets
- effect of incorrect storage temperatures on meat products
- recommended refrigerated temperature for each product stored
- regulatory requirements related to storing meat products
- OH&S requirements for working in refrigerated areas
# Evidence Guide

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Resources may include:
- freezer, cool room and refrigerated display cabinet
- thermometers
- digital or analogue equipment
- work instructions.

### Method of assessment

Recommended methods of assessment are:
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace referee or third-party report of performance over time.
## EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Monitoring temperatures may include:

- reading temperatures
- recording temperatures
- reporting unacceptable temperatures, either verbally or in writing
- using measuring equipment, such as thermometers and other measuring equipment, which may be digital or analogue
- using mathematical skills appropriate to the task.

### Workplace requirements may include:

- enterprise-specific procedures
- using measuring equipment
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- storage times and temperatures
- performing task to production requirements
- work instructions.
### RANGE STATEMENT

| **Hygiene and sanitation requirements** may include: | • relevant government regulations  
• workplace requirements. |
| **Regulatory requirements** may include: | • Export Control Act  
• federal, state and territory regulations regarding meat processing and food handling  
• relevant Australian standards. |
| **Storage** may include: | • chiller  
• commercial freezer  
• cool room  
• display cabinet  
• personal refrigerator and freezer  
• refrigerated vehicle. |
| **OH&S requirements** may include: | • enterprise OH&S policies, procedures and programs  
• OH&S legal requirements  
• Personal Protective Equipment (PPE), which may include:  
  • clothing for refrigerated environment  
  • coats and aprons  
  • ear plugs or muffins  
  • eye and facial protection  
  • head-wear  
  • lifting assistance  
  • protective boot covers  
  • protective hand and arm covering  
  • protective head and hair covering  
  • uniforms  
  • waterproof clothing  
  • work, safety or waterproof footwear  
• requirements set out in standards and codes of practice. |
| **Explanations** may: | • be presented orally or in writing using standard formats  
• include information from several sources  
• be presented in diagrammatic, tabular, graphic or pictorial formats  
• require summaries of information for presentation to work colleagues  
• use a range of communications technology and... |

</thead>
</table>
| 1. Break carcase into specified cuts using a bandsaw | 1.1. Cutting lines are followed for breaking of product according to Occupational Health and Safety (OH&S), hygiene, Quality Assurance (QA), and workplace requirements.  
1.2. Carcase is cut into standard primal cuts according to workplace, OH&S, hygiene and QA requirements. |
| 2. Cut product using a bandsaw | 2.1. Product is cut according to workplace, OH&S, and hygiene and sanitation requirements. |
| 3. Hang and store product | 3.1. Product is hung according to workplace requirements.  
3.2. Product is stored according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate assembly and operation of a bandsaw to manufacturer's, workplace and OH&S requirements
- demonstrate a safety check on the bandsaw
- ensure the safety of team members while working with a bandsaw
- report equipment faults, either verbally or in writing, according to workplace requirements
- demonstrate hanging and hooking techniques according to OH&S, hygiene and sanitation, QA and workplace requirements
- demonstrate storage and rotation of meat product according to workplace requirements
- seek advice from appropriate resources before using bandsaw on new products
- work effectively individually or as part of a team
- use relevant communication skills

Required knowledge

Knowledge of:
### REQUIRED SKILLS AND KNOWLEDGE

- primal cuts of carcase
- principles of storage and rotation of product according to workplace and *regulatory requirements*
- cutting lines for breaking carcase according to specifications
- safety procedures related to use of bandsaw
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Where the candidate cannot use a bandsaw in their usual place of work they must complete the requirements of the Unit in an alternative work placement or in a simulated environment.

**Context of, and specific resources for assessment**

Assessment must occur in the workplace under normal operating conditions or off-the-job in a simulated environment.

**Method of assessment**

Recommended methods of assessment include:

- simulation
- verified work log or diary
- workplace referee or third-party report of performance over time.
**EVIDENCE GUIDE**

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

| 1. Provide information on cooking specific meat cuts | 1.1. Cooking method is identified for various meat cuts to maximise eating quality.  
1.2. Information is provided for cooking times for various meat cuts to meet customer needs.  
1.3. Information is provided on complementary herbs, spices, vegetables, sauces or other flavours according to customer needs. |
| 2. Provide information on specific cuts for cooking methods | 2.1. Available meat cuts are identified for specific cooking method according to customer needs.  
2.2. Information is provided for cooking times for various meat cuts to meet customer needs. |
| 3. Provide information on storage and shelf life of fresh meat and cooked meat products | 3.1. Information is provided on the storage and shelf life of fresh meat and cooked meat products. |
| 4. Provide hygiene information on handling of meat products | 4.1. Information is provided on the safe and hygienic handling, storage and preparation of meat products. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- acknowledge customer's presence
- greet customer
- establish customer needs by enquiry, listening and summarising
- demonstrate awareness of cultural and ethnic differences and respond accordingly
- demonstrate suitable behaviour by attending to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically and maintaining professional standards of dress and personal hygiene
- explain cooking times and temperatures for roasting and microwaving meat to
REQUIRED SKILLS AND KNOWLEDGE

- achieve rare, medium or well done results
- provide advice on cooking methods, times, temperatures, and efficiently and courteously meet customer needs
- relay information to customer
- acknowledge complaints
- demonstrate polite and efficient telephone technique (if required)
- follow up customer enquiries
- refer customer to more experienced staff if necessary, listen and learn from colleagues
- identify and apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- operate telephone system, if required
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

**Required knowledge**

Knowledge of:

- effects of each cooking technique on tenderness of meat
- flavours which enhance various cuts and how to achieve the flavours
- how to interact with others in an appropriate way when providing advice
- moist cooking, dry cooking and microwave cooking techniques
- serving suggestions including suitable vegetables, pasta or rice accompaniments
- properties and effects of animal fats in cooking
- which cuts are suitable for dry cooking techniques including roasting, grilling and stir-frying
- which cuts are suitable for microwave cooking techniques
- which cuts are suitable for moist cooking techniques including casseroling and stewing
- cooking times and temperatures for roasting and microwaving meat to achieve rare, medium or well done results
- storage times, temperatures and shelf life of fresh and cooked meat products
- workplace complaints policies and procedures
- relevant OH&S, regulatory and workplace requirements
- sources of information on new cooking techniques

| 1. Select requested products | 1.1. Meat product requested is recognised.  
1.2. Meat product is selected according to workplace and customer requirements. |
| 2. Weigh selected products | 2.1. Products are weighed according to regulatory, workplace and customer requirements.  
2.2. Products are costed accurately.  
2.3. Sale price is confirmed with customer.  
2.4. Meat orders are prepared according to customer's recorded requirements.  
2.5. Special, standing or repeat orders are prepared according to customer specifications. |
| 3. Wrap and pack sales items | 3.1. Items are neatly and safely wrapped or packed according to hygiene, workplace and customer requirements.  
3.2. Wrapping equipment is used according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify meat products
- identify the most appropriate packaging for products
- prepare meat order to customer requirements
- identify sub-standard products and take required action
- weigh items correctly following regulatory requirements
- over wrap meat items according to weather conditions and customer requirements
- use wrapping materials appropriately
- price items accurately according to displayed price
- use, read and interpret scales, calculators, cash registers
- explain regulatory requirements related to weighing products
- work with team members
REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *Occupational Health and Safety (OH&S)* and regulatory requirements
- record *mathematical* information accurately
- report equipment faults, either verbally or in writing according to workplace requirements
- seek advice from colleagues when working with new products or equipment
- use relevant *communication skills*

**Required knowledge**

Knowledge of:

- regulatory requirements related to weighing products
- effect of poor wrapping techniques on meat quality
- relevant OH&S and regulatory requirements

EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific procedures and ethical standards
- Standard Operating Procedures (SOPs)
- work instructions.

Customer requirements may include:
- individually wrapped products
- packaging for freezer storage
- secure bags
- trays and over wrap plastic film.

Regulatory requirements may include:
- Export Control Act
- Federal, state and territory regulations regarding meat processing and food safety
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

Equipment used in wrapping and over wrapping may include:
- brown paper bags
- butcher paper
- plastic bags
- plastic wrap
- polystyrene trays
- wrapping machinery.

Explanations may:
- be completed with the assistance of others
- be directly related to own work and work area problem-solving
- be in everyday workplace language and

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select packaging equipment according to customer specifications and workplace requirements
- assemble the packaging unit
- check the unit to ensure cleanliness and working order
- adjust equipment settings as required for packaging instructions or schedules
- check safety features are in place
- set weight controls on scales
- load product according to specifications
- operate packaging equipment to package products to manufacturer’s and customer specifications, workplace, OH&S and hygiene and sanitation requirements
- complete packaging records, documents and labels accurately
- identify and report faults in equipment either verbally or in writing according to workplace requirements
- work with team members or individually
- seek advice from manuals or team members before repairing faults
- use mathematical skills relevant to the task
- use relevant communication skills
### REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:

- methods of recording production
- *regulatory requirements* related to packaging
- features of the *packaging unit* (e.g. parts, safety features, start-up and shut-down procedures, possible faults and adjustments)
- production schedule
**Evidence Guide**

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

### Method of assessment

Recommended methods of assessment include:
- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

2.3. Cooking process is completed in a logical and safe manner.  
2.4. Problems with the cooking process are identified promptly and corrective action is taken.  
2.5. Dishes are prepared using a range of methods and current technology within acceptable enterprise time frames. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify the most appropriate cooking methods for a range of cuts of meat  
- select appropriate cooking equipment  
- follow recipes accurately  
- apply hygiene and safety principles and procedures during the cooking process  
- demonstrate safe work practices, particularly in relation to bending, lifting and using cutting implements, appliances, heated surfaces and other equipment which carry a risk of burns  
- seek advice from appropriate sources when working with new products/equipment  
- report equipment faults, either verbally or in writing according to workplace requirements  
- work individually and with other team members  
- explain logical and time-efficient workflow  
- apply relevant Occupational Health and Safety (OH&S), regulatory and
### REQUIRED SKILLS AND KNOWLEDGE

**workplace requirements**
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

**Required knowledge**

Knowledge of:
- effects of different cookery methods on the nutritional value of food
- underlying principles of all basic methods of meat cookery
- waste minimisation techniques and environmental considerations in relation to different cookery methods
- logical and time-efficient workflow
- use and characteristics of a range of equipment used for the required methods of meat cookery
- relevant OH&S, regulatory and workplace requirements
- major food groups, culinary terminology and equipment as they relate to the required methods of meat cookery
Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The candidate must be able to cook meat dishes using all the following cooking methods:

- boiling or simmering
- stewing
- braising
- roasting
- grilling
- shallow frying.

#### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

#### Method of assessment

Recommended methods of assessment include:

- assignments
EVIDENCE GUIDE

- quiz of underpinning knowledge
- verified work log or diary
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

| 2. Select packaging | 2.1. Appropriately sized bag is selected for product.  
2.2. Product is arranged on appropriate container. |
| 3. Set machine requirements | 3.1. Requirements in preparation for start-up of vacuum packing machine are completed to workplace requirements.  
3.2. Machine requirements are set correctly.  
3.3. Start-up procedures are followed according to workplace requirements.  
3.4. Packing materials are attached and changed according to workplace requirements and product specification.  
3.5. Bagged meat is placed on the vacuum packing machine or in the formed pockets as appropriate.  
3.6. Open ends of bags are placed flat across the sealing bar or meat contained in pockets as appropriate.  
3.7. Occupational Health and Safety (OH&S), hygiene and sanitation requirements are followed. |
| 4. Operate machinery | 4.1. Vacuum packaging machine is operated correctly in accordance with workplace requirements.  
4.2. A variety of products are vacuum packed to customer specifications, and hygiene and sanitation, OH&S and Quality Assurance (QA) requirements, at a speed appropriate for production requirements.  
4.3. Bagged cuts are left to drain.  
4.4. Shut-down procedures are performed to workplace, OH&S, and hygiene and sanitation requirements. |
| 5. Ensure quality of packaging and product | 5.1. Bagged cuts are inspected for leaks and other defects.  
5.2. Corrective action is taken when leaks and defects are identified according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- prepare for vacuum packaging according to OH&S and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- *explain* defects that can occur during packaging
- clean equipment according to hygiene requirements
- work with team members
- apply relevant *regulatory* and workplace requirements
- report equipment faults, either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

**Required knowledge**

Knowledge of:
- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific OH&S requirements for vacuum packing
- purpose of vacuum packaging
- general operating principles, including start-up and shut-down procedures
- manufacturer and workplace requirements for vacuum packaging of product
- relevant regulatory and workplace requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and
**EVIDENCE GUIDE**

| **literacy demands of the assessment task should not be higher than those of the work role.** |

**Guidance information for assessment**

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**

- enterprise-specific procedures
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - head-wear
  - lifting assistance
  - protective boot covers
  - uniforms
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Hygiene and sanitation requirements may include:**

- relevant government regulations
- workplace requirements.
## RANGE STATEMENT

### Explanations may:
- be completed with the assistance of others
- be directly related to own work and work area problem-solving
- be in everyday workplace language and include mathematical language and commonly used technical terms
- be presented in writing using standard formats or proformas, diagrams, symbols and charts
- be presented orally
- include information from several sources.

### Regulatory requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards.

### Mathematical skills may include:
- accurate recording of temperature, time, volume, weight and quantity in standard formats or proformas
- interpreting and drawing conclusions from routine charts, bar graphs and pie charts
- operations involving percentages, comparisons and variations
- reading and interpreting analogue and digital measures including clocks, scales, pressure gauges, thermometers, cash registers
- routine estimations and calculations using a range of specified formula and procedures.

### Communications skills may include:
- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

</thead>
</table>
| 1. Conduct routine check of plant and equipment | 1.1. Visual checks are made of plant and equipment to detect signs of defects and damage in accordance with preventative maintenance documentation and procedures.  
1.2. Requirements for the adjustments and repairs are made to plant and equipment within workplace procedures and agreements. |
| 2. Implement routine preventative maintenance | 2.1. Routine adjustments and repairs are made to plant and equipment within workplace procedures and agreements.  
2.2. Greasing, lubrication and other regular servicing of plant and equipment are carried out in accordance with workplace schedules, procedures and agreements, and according to maintenance instructions.  
2.3. Equipment is cleaned and returned to operating order after maintenance is complete.  
2.4. Out-of-specification preventative maintenance is identified, rectified and/or reported.  
2.5. Waste arising from preventative maintenance is collected, treated and disposed of or recycled according to company procedures.  
2.6. Routine maintenance information is recorded in the company reporting system. |

Required Skills and Knowledge

REQUSted SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- apply isolation procedures
- conduct pre-operational checks and requirements
- calculate down time for preventative maintenance
- select, fit and use personal protective clothing and equipment
- access services used in preventative maintenance
REQUIRED SKILLS AND KNOWLEDGE

- seek advice from manuals and colleagues before working with new equipment
- prepare equipment and work area to conduct preventative maintenance
- resolve common problems in conducting preventative maintenance
- clean preventative maintenance tools and equipment
- observe cleaning requirements
- maintain a clean and safe work area
- rectify and report out-of-specification faulty maintenance
- apply waste handling requirements
- report and record maintenance information
- follow Occupational Health and Safety (OH&S) requirements hazards and controls
- explain and follow roles and relationships with others involved in planning and carrying out maintenance functions
- use communication and mathematical skills appropriate to the task
- work with team members when appropriate to carry out tasks and solve problems

Required knowledge

Knowledge of:

- services used in preventative maintenance
- isolation procedures
- waste handling requirements
- pre-operational checks and requirements
- cleaning requirements
- OH&S requirements hazards and controls
- common problems in conducting preventative maintenance
- operational requirements of equipment including cleaning and sanitation following servicing
- purpose of preventative maintenance and possible consequences of poor preventative maintenance
- workplace information, systems and schedules for conducting preventative maintenance
- consequences of incorrect or inadequate routine maintenance
- environmental aspects related to preventative maintenance
- impact of operating and cleaning procedures on maintenance requirements (e.g. unless product is removed from belts during cleaning, belts may not track properly)
- quality parameters to be achieved
- relationship of preventative maintenance to other work activities in the meat processing plant
- food safety factors in maintaining and servicing plant and equipment
- relevant regulatory and workplace requirements
## Evidence Guide

### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions.

Resources may include:
- real work environment
- relevant documentation such as:
  - manufacturer's instructions and operations manuals
  - regulatory requirements
  - workplace policies and procedures
  - relevant equipment and materials.

### Method of assessment

Recommended methods of assessment include:
- verified work log or diary
- workplace project
EVIDENCE GUIDE

- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- **Maintenance instructions** may include:
  - manufacturer instructions and manuals
  - regulatory requirements
  - verbal instructions from a supervisor
  - workplace procedures.

- **Tools and equipment** used for servicing may include:
  - grease guns
  - power tools
  - small hand tools.

- **Reporting** systems may include:
  - electronic
  - manual data recording
  - storage systems.

- **OH&S requirements** may include:
  - enterprise OH&S policies, procedures and programs
  - OH&S legal requirements
  - Personal Protective Equipment (PPE) which may include:
## RANGE STATEMENT

- coats and aprons
- ear plugs or muffs
- eye and facial protection
- head-wear
- lifting assistance
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Explanations may be:

- completed with the assistance of others
- directly related to self
- in everyday workplace language, including some mathematical language
- presented in routine standard proformas using accurately copied information, symbols, numbers, abbreviations, sketches, codes and everyday workplace language
- presented orally
- routine, simple and brief.

### Communication may:

- be with people from a range of cultural, social and ethnic backgrounds
- involve the use of communications technology
- require speaking clearly and directly.

### Regulatory requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards.

### Workplace requirements may include:

- enterprise ethical standards, values and obligations
- enterprise-specific procedures, policies and plans
- Standard Operating Procedures (SOPs)
- work instructions.

4.2. Casings are used and stored according to workplace requirements and health and hygiene requirements.  
4.3. Defective casings are identified and reported where appropriate according to workplace requirements.                                                                                                      |
| 5. Fill casings                              | 5.1. Casings are filled to consistency required by product specifications.  
5.2. Defective product is identified and reported, where appropriate, according to workplace requirements.                                                                                                           |
| 6. Link, tie and hang sausages               | 6.1. Sausages are linked and tied to product specifications.  
6.2. Excess casings are trimmed according to product specifications.  
6.3. Sausages are hung or stored according to product specifications and workplace requirements.                                                                                                               |
| 7. Prepare, operate, disassemble and clean equipment | 7.1. Sausage making equipment is prepared, adjusted and operated to Occupational Health and Safety (OH&S), workplace and hygiene requirements, and manufacturer specifications.  
7.2. Equipment is disassembled and cleaned, and parts are stored in line with OH&S, workplace and regulatory requirements, and manufacturer specifications.                                                                 |
| 8. Sell a variety of sausages                | 8.1. Information, including cooking, storage and serving suggestions, is provided to customers on a variety of sausages.  
8.2. Sausage range is promoted to customers.                                                                                                                        |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- accurately identify different species and categories of meat used in sausages
- seek advice from appropriate sources before working with new equipment or products
- operate adjustment tools and equipment
- apply *mathematical skills* relevant to the task
- make a range of at least four different varieties of sausage
- report required faults and adjustments, verbally or in writing according to workplace requirements
- **explain** cooking methods for a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
- answer customer enquiries, for at least four different varieties of sausage, relating to:
  - cooking methods
  - cooking times
  - storage
  - shelf life
  - ingredients
  - nutritional value, including fat content
- work with team members
- apply relevant OH&S requirements
- use relevant *communication skills*

### Required knowledge

**Knowledge of:**

- sausage filler types according to power source
- materials for hanging and storing sausages
- protective covering for sausages and its purpose
- conditions under which equipment may need adjusting
- function and operation of sausage filler machines
- safe and correct operation of sausage making equipment
- cooking methods for a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
## REQUIRED SKILLS AND KNOWLEDGE

- shelf life of a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
- temperature for storing a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
- filling yields of various sizes and types of casings
- purpose and storage needs of collagen casings and natural casings
- purpose and use of *processing equipment* used in making sausages
- purpose and use of ingredients used in sausage making
- relevant OH&S requirements
- ingredients used in at least four different varieties of sausage
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- regulatory requirements in relation to sausage making
- procedures for cleaning sausage making equipment
- properties of correct blending of ingredients
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time under typical operating conditions.

The candidate must be able to make at least four varieties of sausages including two gourmet varieties.

Where the candidate cannot make and sell sausages in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:
- simulation
- verified work log or diary
- workplace project
- workplace referee or third-party report of

### RANGE STATEMENT

**Explanations** may:
- be completed with the assistance of others
- be directly related to problem solving in own work and work area
- be in everyday workplace language and include mathematical language and commonly used technical terms
- be presented in writing using standard formats or proformas, diagrams, symbols and charts
- be presented orally
- include information from several sources.

**Communication skills** may include:
- applying mathematical skills to workplace requirements
- listening and understanding
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

**Processing equipment** may include:
- bowl or silent cutter
- mincer
- sausage filler.

MTMR211B Produce and sell value-added products

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to produce and sell value-added products such as stir-fries, sprinkles, glazes, pre-marinated meat, satays, and forced, stuffed and seasoned meat. The products may be made from prepared ingredients, such as commercially-prepared marinades and ready-cut meat, or by following recipes and preparing ingredients. |

Application of the Unit

| Application of the unit | This unit is applicable to meat retail and food services operations. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A | Sharpen knives |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Select *ingredients* for formulation of *value-added products* | 1.1. Ingredients are selected according to workplace recipes, policy and practice.  
1.2. Ingredients are weighed according to *regulatory requirements*.  
1.3. Unused ingredients are labelled according to *workplace* and regulatory *requirements*. |
| 2. Prepare meat, stuffings, seasonings and forcemeat for *value-added products* | 2.1. Meat is prepared according to recipes, policy and practices.  
2.2. Stuffings, seasonings and forcemeat are prepared according to recipes, policy and practices. |
| 3. Mix ingredients | 3.1. Ingredients are added according to recipe and product specifications.  
3.2. Ingredients are blended to achieve product consistency or substance according to recipe and product specifications. |
| 4. Produce *value-added products* | 4.1. Ingredients are added to meat according to instructions or recipe.  
4.2. Product is formulated according to product specifications and workplace, *hygiene and sanitation*, and Quality Assurance (QA) requirements.  
4.3. Product is presented according to product specifications and workplace requirements.  
4.4. Product is *labelled* according to product specifications, and regulatory and workplace requirements. |
| 5. Store products and ingredients | 5.1. Products are stored according to workplace and regulatory requirements.  
5.2. Ingredients are stored according to workplace and regulatory requirements.  
5.3. Shelf life of product is identified.  
5.4. Effects of ingredients on shelf life are identified. |
| 6. Sell meat product | 6.1. *Information*, including cooking, preparation, storage and serving suggestions, is provided to customers on meat product.  
6.2. Product is promoted to customers. |
Required Skills and Knowledge

REQUIRE SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- follow recipes accurately
- select meat and ingredients according to recipes and workplace requirements
- measure and weigh meat and ingredients according to recipe and regulatory requirements
- perform calculations as required for production of value-added products
- explain permissible use of additives and ingredients in value-added products
- mix ingredients to achieve product consistency according to recipe and product specifications
- produce at least five value-added products from a minimum of three species
- identify quality requirements related to production of value-added products, including limits to value-adding options
- present and label products to workplace requirements
- record information, including mathematical information, accurately
- store meat and ingredients to workplace and regulatory requirements
- apply workplace, Occupational Health and Safety (OH&S) and hygiene requirements related to producing value-added products
- use mathematical skills relevant to the task (e.g. estimating measures to verify calculations)
- work effectively individually or as part of a team
- work with other team members to develop new value-added products
- use relevant communication skills

Required knowledge

Knowledge of:
- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and the effect of different ingredients on shelf life
- range of effects on the product and consumer of the use of both incorrect and inadequate quantities of ingredients
- permissible use of additives and ingredients in value-added products
- properties of correct blending
- use and purposes of ingredients in producing value-added products
- reasons for poor product consistency and rectify problem
- workplace, OH&S and hygiene requirements related to producing value-added products
REQUIRED SKILLS AND KNOWLEDGE

- effect of various ingredients on product shelf life
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</th>
</tr>
</thead>
<tbody>
<tr>
<td>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</td>
</tr>
</tbody>
</table>

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

<table>
<thead>
<tr>
<th>Competency must be demonstrated over time under typical operating conditions.</th>
</tr>
</thead>
<tbody>
<tr>
<td>The candidate must demonstrate the ability to make a minimum of five different value-added products from at least three species.</td>
</tr>
</tbody>
</table>

Where the candidate is unable to produce the required volume of value-added products in their workplace they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

### Context of, and specific resources for assessment

| Assessment must occur in the workplace under normal production conditions or in a simulated environment. |

### Method of assessment

<table>
<thead>
<tr>
<th>Recommended methods of assessment include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>verified work log or diary</td>
</tr>
<tr>
<td>workplace project</td>
</tr>
</tbody>
</table>
**EVIDENCE GUIDE**

- workplace referee or third-party report of performance over time
- demonstration with assessor.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Ingredients** vary depending on the products and may include:

- brines
- fruit
- glazes
- marinades
- meat
- nuts
- satays
- sauces
- sprinkles
- stuffings
- vegetables.

**Value-added products** may include:

- forced, stuffed or seasoned meat products
- other products to recipe.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- receive incoming stock
- follow equipment and material requirements
- follow health and hygiene requirements
- follow workplace requirements
- identify and minimise safety hazards
- apply relevant OH&S and regulatory requirements
- calibrate equipment correctly
- use different types of weighing machines
- complete documentation for weighing and receiving goods
- explain the features and purpose of a stock control sheet
## REQUIRED SKILLS AND KNOWLEDGE

- work individually or with others to carry out tasks
- work with diverse individuals and groups
- use mathematical skills relevant to the task
- use relevant communication skills

### Required knowledge

Knowledge of:

- principles of the relevant health Acts and regulatory requirements in relation to stock control
- differences in quality of carcasses
- differences in types of weighing machines
- indications of meat contamination and workplace procedures for handling contamination
- storage requirements for a range of species and meat cuts
- features and purpose of a stock control sheet
- purpose of each item of data on invoices and delivery dockets
- relevant OH&S and regulatory requirements
- limits of weight individuals are allowed to carry according to legislative and regulatory requirements

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- federal, state and territory regulations regarding meat processing
- state OH&S Acts.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements, which may include acceptable weight limits a person may carry
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
RANGE STATEMENT

- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

Meat products may include:
- carton meats
- dry products, such as skins
- frozen goods
- pre-packaged goods
- whole carcases
- sides of carcases.

Ticketing and labels may include:
- AUS-MEAT language
- other processor specification data.

Checking meat quality includes:
- abnormal condition
- ageing
- ante-mortem trauma
- classification
- colour
- composition
- contamination
- fat colour and dimension
- fat depth
- muscle
- post-mortem trauma
- weight.

Documentation may include:
- claim and credit forms
- invoices
- order forms.

Explanations may:
- be presented orally or in writing using standard formats
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for

Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Determine customer needs | 1.1. Customer’s needs are clarified through questioning and active listening to ensure specialised cuts are cut and trimmed correctly.  
1.2. Other sources of information are utilised when necessary to ensure specialised cuts meet the needs of customers. |
| 2. Select meat for specialised cuts | 2.1. Meat is selected in accordance with quality requirements of specialised cuts.  
2.2. Meat is selected from a minimum of two species.  
2.3. Meat is selected from bone-in primals |
| 3. Prepare specialised meat cuts | 3.1. Meat is cut according to customer and workplace requirements.  
3.2. Cuts are presented to customer requirements. |
| 4. Handle knife effectively | 4.1. Knife is handled safely, hygienically and effectively. |
| 5. Cost and price specialised cuts | 5.1. Specialised cuts are costed to include yield and labour costs.  
5.2. Specialised cuts are priced to meet workplace requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- establish customer requirements by questioning, active listening and clarifying of customer comments where applicable
- seek advice from appropriate sources when developing new cuts
- select and weigh meats for a range of specialised cuts
- prepare specialised meat cuts to *Occupational Health and Safety (OH&S)* and hygiene requirements
- identify sub-standard products and rectify as appropriate
- apply communication skills relevant to the task
### REQUIRED SKILLS AND KNOWLEDGE

- apply *mathematical skills* relevant to the task
- work individually and in a team
- *explain* food safety, Quality Assurance (QA) and product quality requirements for specialised cuts
- apply relevant OH&S and *regulatory requirements*

### Required knowledge

- what specialised cuts are
- food safety, QA and product quality requirements for specialised cuts
- requirements for a range of specialised cuts according to workplace and customer requirements
- types of specialised cuts to meet customer requirements
- relevant OH&S and regulatory requirements
- why meat retailers sell specialised cuts
- why customers request specialised cuts
- costing and pricing calculations

• use of calculators and computer software packages  
• the use of familiar and unfamiliar complex formulas |
### RANGE STATEMENT

- product formulations and specifications
- interpreting and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts,
- monitoring, adjusting and calibrating of formulas, specifications, outputs and equipment
- synthesising and analysing mathematical information from more than one source.

### Explanations may:

- be presented orally, in writing using standard formats or using a range of communications technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use workplace, mathematical and technical language.

### Regulatory requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing and food handling
- hygiene and sanitation requirements
- relevant Australian Standards.

| 1. **Sort and select carcase or meat product** | 1.1. *Carcase or meat product* is sorted according to customer and workplace *specifications*.  
1.2. Contaminated carcasses or meat products are identified and corrective action is taken.  
1.3. Hygiene and sanitation requirements are followed in regard to selecting carcase or meat product. |
| 2. **Assess carcase or meat product** | 2.1. Carcase or meat product is assessed to verify that it meets *workplace* or market requirements.  
2.2. Carcase or meat product is assessed according to workplace requirements, customer specifications and industry requirements. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- select carcase or meat product to customer and workplace requirements
- apply relevant *regulatory requirements* for slicing
- record and communicate outcomes of carcase or meat product assessment according to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:
- methods of assessing carcase or meat product according to specifications
- procedures for interpreting, recording and reporting mathematical and technical information such as that found on carcase tickets
- elements of the specification being utilised
- workplace, *Occupational Health and Safety (OH&S)*, and hygiene and sanitation requirements in relation to assessing and *measuring carcases* or meat product

| 1. Calculate yield of carcase or product as appropriate | 1.1. Total weight of product is calculated and recorded according to workplace requirements.  
1.2. All components are weighed, including carcase, primal cuts and trimmings as appropriate, according to workplace requirements.  
1.3. Calculations are performed to determine yield.  
1.4. Tasks are performed in accordance with Occupational Health and Safety (OH&S), hygiene and workplace requirements. |
| 2. Record yield | 2.1. Yield is recorded in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- weigh whole carcase or product prior to cutting or trimming into components
- estimate yield to identify and rectify inaccurate calculations
- explain the principles of calculation of yield
- work individually and with team members
- apply relevant regulatory and OH&S requirements
- use communication skills relevant to the task
- use mathematical skills relevant to the task

Required knowledge

Knowledge of:
- principles of calculation of yield
- relevant regulatory and OH&S requirements
- steps in calculating yield
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**
- receive incoming stock:
  - follow equipment and material requirements
  - follow health and hygiene requirements
  - follow workplace requirements
  - identify and minimise safety hazards
  - use different types of weighing machines
  - check and interpret electronic labels
  - calibrate equipment correctly
  - complete documentation for weighing and receipt of goods
- perform stock control tasks:
  - follow equipment and material requirements
  - follow health and hygiene requirements
  - follow workplace requirements
  - identify and minimise safety hazards
  - work individually or with others to carry out tasks
  - work with diverse individuals and groups
  - apply relevant Occupational Health and Safety (OH&S) and regulatory requirements
  - use relevant communication skills

### Required knowledge

**Knowledge of:**
- principles of the relevant health acts and regulatory requirements in relation to stock control
- ageing process and the shelf life of various products
- bacterial process in ageing and deterioration of meat
- differences in quality of carcases
- differences in types of weighing machines
- features and purpose of the stock control sheet
- indications of meat contamination, and workplace procedures for handling contamination
- principles and procedures of stock rotation
- procedures for meat disposal
REQUIRED SKILLS AND KNOWLEDGE

- purpose of each item of data on invoices and delivery dockets
- relevant OH&S and regulatory requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- simulation
- workplace project
- workplace referee or third-party report of performance over time

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.
## Range Statement

### RANGE STATEMENT

| • products and services to suit customer needs |
| • methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product |
| • enterprise ethical and customer service standards |
| • relevant OH&S, regulatory and workplace requirements |
| • sources of information to further meet customer needs |
| • products and explain how they may be cooked and served |
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Where the candidate does not interact with customers in their usual place of work, they must undertake alternative work placement or simulated work experience to meet the requirements of this unit.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

- Recommended methods of assessment include:
  - quiz of underpinning knowledge
  - workplace project
  - workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Cooking requirements may include:

- composition of meat
- Heart Foundation approved cuts
- nutrition
- recommended cooking methods
- sauces and accompaniments.

Range of catering needs may include:

- carving
- cooking
- meat preparation
- menus or recipes
- new lines
- portion requirements
- presentation.

Communication skills may include:

- interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties
- speaking clearly and directly
- the use of communications technology
- own work and the wider work area
- reading and interpreting workplace-documentation.
### RANGE STATEMENT

**Mathematical skills** and tasks relate to own work and work area problem-solving and monitoring, and may include:

- estimating and calculating
- the use of calculations and computer software packages
- the use of familiar and unfamiliar complex formulas
- product formulations and specifications
- interpreting and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts
- require monitoring, adjusting and calibrating of formulas, specifications, outputs and equipment
- synthesis and analysis of mathematical information from more than one source.

**Explanations** may:

- be presented orally, in writing using standard formats or using a range of communications technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use workplace, mathematical and technical language.

**OH&S** requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - head-wear
  - uniforms
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory** requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing and food handling
- hygiene and sanitation requirements
- relevant Australian Standards.

**Workplace requirements** may

- enterprise-specific procedures and ethical

MTMR310C Bone and fillet poultry

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to manually bone and fillet poultry. |

Application of the Unit

| Application of the unit | This unit is applicable to meat retailing enterprises. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A | Sharpen knives |

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare work bench for use | 1.1. Work bench is cleared of other species and products.  
1.2. Work bench is cleaned in accordance with hygiene and workplace requirements. |
| 2. Bone poultry | 2.1. Poultry is secured for boning.  
2.2. Poultry is *boned* to maximise yield using hand knives to workplace and hygiene requirements. |
3.2. Poultry is separated into a range of bone-in products to workplace and hygiene requirements. |
| 4. Identify and separate contaminated product | 4.1. Product is checked for contamination and non-compliance to workplace and hygiene requirements.  
4.2. Contaminated or non-compliant product is separated and corrective action is taken. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- cut product according to workplace, *Occupational Health and Safety (OH&S)* and hygiene requirements
- demonstrate correct cutting, slicing and trimming techniques
- demonstrate cutting lines to produce cuts to workplace requirements
- demonstrate safe and effective knife skills
- bone poultry safely, effectively, and with consideration for maximising yield
- demonstrate the ability to work with team members
- *explain* hygiene requirements specific to poultry (e.g. salmonella risk)
- operate and clean *equipment* according to workplace requirements
- remove defects from products according to workplace, hygiene and regulatory requirements
- use *communication* skills appropriate to the task
**REQUIRED SKILLS AND KNOWLEDGE**

**Required knowledge**

Knowledge of:
- hygiene requirements specific to poultry (salmonella risk)
- boning procedure
- OH&S implications of the slippery and moist nature of poultry
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in simulated environment.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace assignment
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hygiene requirements may include:
- hygiene requirements specific to poultry
- relevant government regulations
- workplace requirements.

Workplace requirements may include:
- enterprise-specific requirements
- Standard Operating Procedures (SOPs)
- work instructions.

Poultry may include:
- chickens
- ducks
- geese
- pheasant
- quail
- turkeys.

Boned products may include:
- breast fillets
- tenderloins
- thigh fillets
- trimmings.

Bone-in products may include:
- breasts
- drumsticks
- lovely legs
- marylands
- mini-drummies
- thighs
- wings.
## RANGE STATEMENT

### OH&S requirements

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs/muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Explanations

- be presented orally, in writing using standard formats or using a range of communications technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use workplace, mathematical and technical language.

### Equipment

- may include boning cones.

### Regulatory requirements

- Export Control Act
- relevant Australian Standards
- state and territory regulations regarding meat processing and food handling.

### Communication skills

- interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties
- speaking clearly and directly
- the use of communications technology
- relate to own work and the wider work area
RANGE STATEMENT

- reading and interpreting workplace documentation.

Required Skills and Knowledge

 человек

REQUIRE SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- alter electronic scales to show correct sales price
- apply *mathematical skills* appropriate to the task
- calculate margins required to return gross profit targets
- calculate product cost price based on invoice price and cost price based on yield
- calculate sale price to achieve required return according to enterprise targets and goals
- *explain* concepts of 'break even point', and 'gross' and 'net profit' margins
- apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- identify *overhead cost per kilogram*
- mark ticket prices to show correct sales price
- use *communication skills* relevant to the task

Required knowledge

Knowledge of:
- concepts of 'break even point', and 'gross' and 'net profit' margins
- reasons for prices calculated to achieve more than or less than gross profit margin
- relevant *OH&S, regulatory and workplace requirements*
- elements contributing to the total cost of the product (total cost of purchase, preparing or selling product)
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

### Method of assessment

Recommended methods of assessment include:

- assignments
- simulation
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may include:

- Bone-in, bone out, sliced or trimmed meat
- smallgoods
- value-added products.

Targets and goals may include:

- customer targets including return custom, average purchase per customer, specific product purchase
- market share
- returns and profits, including variable net or gross profit margins on selected items and total product range
- stock targets including product mix ratios and levels, sale of surplus product or stock.

Mathematical skills may include:

- the use of calculators and computer software packages
- estimation and calculation
- the use of familiar and unfamiliar complex formula
- product formulation and specification
- interpretation and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts
- monitoring, adjusting and calibrating formula, specifications, outputs and equipment
- synthesis and analysis of mathematical information from more than one source.
**RANGE STATEMENT**

**Explanations** may:
- be presented orally, in writing using standard formats or using a range of communications technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use workplace, mathematical and technical language.

**Gross profit** is based on fixed and variable overheads (including wages and salaries, sole proprietor drawings) and net profit requirements of the business.

**Gross profit** is based on:
- fixed and variable overheads, including wages and salaries, sole proprietor drawings, and net profit requirements of the business.

**OH&S requirements** may include:

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select primal cuts for maximum yield and suitability to portion control specification
- demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two **species**
- demonstrate safe use of bandsaw, as required
- demonstrate sorting procedures to gain maximum yield
- explain and demonstrate hygiene standards and procedures for preparing portion control cuts
- explain and demonstrate QA standards and procedures for preparing portion control cuts
- slice portions evenly
- apply **mathematical skills** relevant to the task
- **explain** and demonstrate correct procedure for achieving and maintaining weights while cutting
- identify sub-standard product and rectify appropriately
- demonstrate the ability to listen actively and ask questions to confirm
## REQUIRED SKILLS AND KNOWLEDGE

**understanding when customers are explaining new cuts and/or specifications**
- work with team members
- explain and demonstrate sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- apply *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- use *communication skills* relevant to the task

### Required knowledge

Knowledge of:
- correct procedure for achieving and maintaining weights while cutting
- hygiene standards and procedures for preparing portion control cuts
- QA standards and procedures for preparing portion control cuts
- sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- pre-portioning processes
- criteria for selection of meat to suit specification
- hygiene requirements for preparation of cuts
- portion specification
- quality requirements for preparation of cuts
- relationship between primal cut size, dimensions, order specification and yield
- value of off-cuts
- OH&S and regulatory requirements

</table>
| 1. Process order         | 1.1. Orders for stock are processed or raised as requested according to workplace requirements.  
|                          | 1.2. Ordering and recording system is accurately maintained according to workplace requirements.  
|                          | 1.3. Orders and delivery requirements are recorded accurately and filed for retrieval according to workplace procedures.  |
| 2. Follow up order       | 2.1. Delivery process is monitored to meet agreed deadlines.  
|                          | 2.2. Routine supply problems are handled or referred to management as required by workplace requirements.  
|                          | 2.3. Continuous liaison with buyers and suppliers is maintained to ensure continuity of supply.  
|                          | 2.4. Stock is distributed according to workplace allocation.  |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- apply *problem-solving skills* where necessary
- work with team members and individually
- demonstrate *communication* and *mathematical skills* in regard to:
  - maintaining delivery and supply records
  - maintaining stock ordering and recording system
  - processing or raising stock orders
  - stock distribution records
- apply workplace requirements in regard to:
  - current and future stock levels
  - existing suppliers
  - quality control procedures and requirements
  - range of stock
### REQUIRED SKILLS AND KNOWLEDGE

- workplace merchandising and marketing
- apply relevant *Occupational Health and Safety (OH&S)* and regulatory requirements

### Required knowledge

Knowledge of:

- workplace requirements in regard to:
  - current and future stock levels
  - existing suppliers
  - quality control procedures and requirements
  - range of stock
  - workplace merchandising and marketing
- relevant OH&S and regulatory requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions.

Resources may include:

- real work environment
- relevant documentation such as:
  - manufacturer's instructions or operations manuals
  - regulatory requirements
  - workplace policies and procedures
- relevant equipment and materials.

### Method of assessment

Recommended methods of assessment include:

- simulation
- workplace project
- workplace referee or third-party report of performance over time.
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise ethical standards, values and obligations
- enterprise-specific procedures, policies and plans
- hygiene and sanitation requirements
- staff training policies and procedures
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions
- workplace merchandise and marketing policies
- working with local, national or international suppliers.

Problem-solving skills may involve:

- applying a range of strategies to problem-solving
- developing practical and creative solutions to workplace problems
- identifying opportunities that might not be
| **RANGE STATEMENT** | obvious to others  
- showing independence and initiative in identifying problems  
- solving problems individually or in teams  
- testing assumptions and taking context into account  
- using numeracy skills to solve problems.  

**Communication may involve:**  
- applying negotiation and persuasion skills  
- being appropriately assertive  
- empathising  
- interpreting needs of internal or external customers  
- listening and understanding  
- reading and interpreting workplace documentation  
- speaking clearly and directly  
- sharing information  
- working with diverse individuals and groups  
- writing to audience needs.  

**Mathematical skills may include:**  
- estimation and calculation  
- the use of calculators and computer software packages  
- the use of familiar and unfamiliar complex formula  
- own work and work area problem-solving and monitoring  
- product formulations and specifications  
- interpreting and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts  
- monitoring, adjusting and calibrating formula, specifications, outputs and equipment  
- synthesis and analysis of mathematical information from more than one source.  

**OH&S requirements may include:**  
- enterprise OH&S policies, procedures and programs  
- OH&S legal requirements  
- Personal Protective Equipment (PPE) which may include:  
  - coats and aprons  
  - ear plugs or muffs
## RANGE STATEMENT

- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Regulatory requirements may include:

- Export Control Act
- relevant regulations
- state and territory regulations regarding meat processing.

| 1. Design and complete statistical tables and charts | 1.1. *Frequency tables and charts* are designed to record and present statistical information.  
1.2. Statistical tables and charts are analysed to provide a description and interpretation of their contents. |
| 2. Calculate measures of central tendency | 2.1. *Measures of central tendency* are calculated and used to explain the average of a set of data. |
| 3. Calculate measures of dispersion | 3.1. *Measures of dispersion* are calculated and used to explain the pattern of variation of data. |
| 4. Graph statistical data | 4.1. Graphs are structured to *present meat processing data* in a form suitable for analysis and interpretation.  
4.2. Meat processing performance and trends are interpreted from graphs. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- accurately calculate averages, average range and standard deviation
- consistently use estimation processes
- consistently use mathematical processes
- consistently use mathematical symbols and diagrams
- consistently prepare and interpret statistical charts and tables including frequency charts and tables.
- consistently prepare and interpret graphs
- apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- use relevant *communication skills*

**Required knowledge**

Knowledge of:
- estimation processes
REQUIRED SKILLS AND KNOWLEDGE

- mathematical processes
- mathematical symbols and diagrams
- purpose and structure of statistical charts and tables including frequency charts and tables
- purpose and structure of graphs
- purpose of calculating averages
- purpose of measuring the dispersion of values
- relevant OH&S, regulatory and workplace requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under typical operating conditions for the enterprise and within the parameters of the role and responsibilities.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Resources may include:
- a real work environment
- calculations as required
- conversion charts used in the workplace
- formulae to calculate mean, mode and median, range and standard deviation
- relevant documentation such as:
  - manufacturer's instructions and operations manuals
  - regulatory requirements
  - work procedures including advice on safe work practices, food safety and environmental

Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Implement the MSA system | 1.1. MSA grading system is described.  
1.2. Factors that affect eating quality are identified.  
1.3. Product is cut correctly for each approved cooking method.  
1.4. Product categories in line with AUS-MEAT and MSA requirements are identified. |
| 2. Describe the licensing requirements for an MSA end user | 2.1. MSA Standards Manual for Trade Mark Usage is used appropriately.  
2.2. Carton end panels and butcher body labels are interpreted accurately.  
2.3. MSA customer complaint system is described. |
| 3. Explore increased value through the seaming out of primals | 3.1. Beef primals and sub-primal cuts are identified.  
3.2. Beef primals are value-added by seaming into individual muscles.  
3.3. Product is prepared according to MSA approved eating quality and cooking methods. |
| 4. Investigate potential profits through seaming of primals into sub-primals | 4.1. Variation in yield differences between preparing product traditionally versus value-adding through seaming is investigated.  
4.2. Gross profit of preparing product traditionally versus value-adding through seaming is investigated.  
4.3. Differences in portion sizes between traditionally prepared product and value-added product are demonstrated. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- seam the following primals into muscles:
  - blade
  - knuckle
**REQUIRED SKILLS AND KNOWLEDGE**

- rump
- investigate gross profit percentages of selling primal cuts seamed versus traditionally sliced
- work effectively as an individual and as part of a team
- demonstrate active listening in relation to customer complaints
- complete an MSA customer complaint form and provide all necessary information
- apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- use relevant *communication skills*

**Required knowledge**

Knowledge of:

- differences between the MSA grading system and other international grading systems
- key elements of the MSA program
- relationship between pricing and eating quality
- taste test panel system on which the MSA is based
- relevant OH&S, regulatory and workplace requirements
- primals that have variable eating quality
- sources of information on the MSA program
- failure rate of beef
- MSA approved cooking methods and describe their preparation requirements
- value-added options using muscle seaming
- variables that impact on eating quality

</table>
| 1. *Prepare*, operate and clean processing *equipment* used for curing and corning *product* | 1.1. Processing equipment is prepared according to manufacturer *specifications*, and *Occupational Health and Safety (OH&S)*, *hygiene* and *workplace requirements*.  
1.2. Processing equipment is operated according to manufacturer specifications, and OH&S, hygiene and workplace requirements.  
1.3. Processing equipment is cleaned according to manufacturer specifications, and OH&S, hygiene and workplace requirements. |
| 2. Prepare meat | 2.1. Meat is selected according to product specifications.  
2.2. Meat is prepared according to product specifications, and hygiene and workplace requirements. |
| 3. Prepare ingredients | 3.1. Ingredients are selected and prepared according to product specifications, and hygiene and workplace requirements. |
| 4. Prepare brines | 4.1. Required amount of water and other liquid and solid additives are added in correct order and mixed according to product specifications, and hygiene and workplace requirements.  
4.2. Brine solutions are prepared according to product specifications, and hygiene and workplace requirements.  
4.3. Hydrometer (salinometer) is used to check brine solution. |
| 5. Process meat | 5.1. Meat is cured or corned according to product specifications, health regulations and workplace requirements at a speed appropriate for production requirements.  
5.2. Processing is regularly monitored.  
5.3. Adjustments are made to processing as required to achieve product specifications. |
| 6. Store meat product | 6.1. On completion of processing, product is stored according to product specifications, and hygiene, *regulatory* and workplace requirements. |
| 7. Sell meat product | 7.1. *Information*, including cooking, storage and serving suggestions, is provided to customers on meat product.  
7.2. Product is promoted to customers. |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- activate processing equipment to assess its readiness for operational use
- follow recipes and procedures accurately
- explain the curing and corning processes for a variety of meat products
- mix curing ingredients for required length of time
- perform running adjustments according to workplace requirements and manufacturer specifications
- pump meat to increase original weight according to workplace requirements
- pump meat correctly to avoid air pockets
- demonstrate the correct pickling procedure, according to product specifications and workplace requirements
- perform curing and corning according to workplace, OH&S, hygiene and regulatory requirements
- wash residue from cured meats following removal from holding brine
- identify sub-standard product and address the problem according to workplace requirements
- operate adjustment tools and equipment correctly
- seek advice from appropriate sources when working with new products or equipment
- report any faults and adjustments required to processing equipment, either verbally or in writing, according to workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer specifications
- apply relevant communication and mathematical skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- the term 'osmosis' in relation to the curing process
- different salts, cures and brines used in the curing process
### REQUIRED SKILLS AND KNOWLEDGE

- conditions under which equipment may need adjusting
- function of various additives and ingredients
- purpose and effect of brine on meat
- safe and correct operation of processing equipment
- health regulations that apply to curing and corned meats
- curing and corning processes for a variety of meat products
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corned products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling to correct pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- meat cuts used in curing and corning
- various ingredients for curing meat and their use and purpose
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment

EVIDENCE GUIDE

Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Preparation of equipment includes:**
- programming automatic machines to specifications, where applicable.

**Equipment and machinery used in processing may include:**
- automatic injector machine (Injectomat)
- massagers
- pumping equipment.

**Product may include:**
- beef (e.g. brisket, silverside and tongue)
- game meat
- lamb (e.g. legs and tongue)
- mutton
- pork (e.g. hand and spring)

## RANGE STATEMENT

### Information on meat product may include:
- dietary information, including kilojoules per average serving size
- identifying allergies associated with cures, brines and salts used in product
- identifying ingredients and preservatives in meat product
- interpreting nutritional panels
- recommendations for alternative products.

### Explanations may:
- be presented orally or in writing using standard formats
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use a range of communications technology and media
- use workplace, mathematical and technical language.

### Communication skills may include:
- interacting with people from a range of cultural, social and ethnic backgrounds, and with colleagues, superiors, customers, clients and external parties
- empathising with customers and work colleagues
- interpreting the needs of internal and external customers
- listening and understanding, and speaking clearly and directly
- reading and interpreting workplace documentation
- the use of negotiation, persuasion and assertiveness skills
- own work area and wider work area
- sharing of information
- writing to audience needs.

### Mathematical skills may include:
- accurate recording of temperature, time, volume, weight and quantity in standard formats or proformas
- interpreting and drawing conclusions from routine charts, bar graphs and pie charts
- operations involving percentages, comparisons
RANGE STATEMENT

- reading and interpreting analogue and digital measures, including scales, pressured gauges and thermometers
- routine estimations and calculations using a range of specified formulas and procedures
- using calculators and computer software packages.

<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Identify <strong>poultry cuts</strong></td>
<td>1.1. Poultry cuts are identified by cut name and <em>species</em> according to <em>specifications</em> and <em>workplace requirements</em>.</td>
</tr>
</tbody>
</table>
| 2. Sort and select poultry product | 2.1. Poultry product is sorted according to customer and workplace specifications.  
2.2. Poultry cuts are selected by cut name and species according to workplace requirements.  
2.3. Contaminated product is identified and corrective action is taken.  
2.4. Hygiene and sanitation requirements are followed in regard to selecting product. |
| 3. **Assess** poultry product | 3.1. Product is assessed for shelf life expectancy.  
3.2. Product is assessed according to workplace requirements, customer specifications and industry requirements. |
| 4. Identify and separate contaminated product | 4.1. Product is checked for contamination and non-compliance to workplace and hygiene requirements.  
4.2. Contaminated or non-compliant product is separated and corrective action is taken. |
| 5. Sell poultry product | 5.1. *Information*, including cooking, storage and serving suggestions, is provided to customers on poultry products.  
5.2. Product is promoted to customers. |
| 6. Store poultry product | 6.1. Poultry is stored according to hygiene and sanitation, regulatory and workplace requirements.  
6.2. Poultry is stored under correct conditions and temperatures to maintain quality, extend shelf life, and maximise appearance and eating quality. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**
### REQUIRED SKILLS AND KNOWLEDGE

**Ability to:**
- identify poultry cuts according to label on cartons as appropriate
- select cuts correctly by species and cut according to workplace requirements
- select poultry to customer and workplace requirements
- identify cuts correctly by species and cut, according to workplace specifications
- remove defects from products according to workplace, hygiene and regulatory requirements
- record and communicate outcomes of poultry product assessment according to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements in relation to selling poultry
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**
- normal causes of contamination of poultry
- hygiene requirements specific to poultry (e.g. salmonella risk)
- methods of assessing poultry according to specifications
- legislation regarding growth promotants in poultry
- OH&S implications of the slippery and moist nature of poultry
- difference between growth promotants and antibiotics
- difference between organic, free range and conventional poultry products
- procedures for interpreting, recording and reporting mathematical and technical information, such as that found on carton labels
- workplace, *Occupational Health and Safety (OH&S)*, and hygiene and sanitation requirements in relation to assessing poultry
- relevant *regulatory requirements* in relation to selling poultry
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal workplace conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be
EVIDENCE GUIDE

<td>Knife is handled safely, hygienically and effectively.</td>
</tr>
</tbody>
</table>

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- prepare equipment for breaking carcase correctly and safely
- position or fasten carcase securely for separation
- demonstrate the separation of carcase into primal cuts on a range of meat cuts for a minimum of three *species* including beef, sheep and one other species, according to workplace, OH&S, and hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- demonstrate safe manual-handling techniques
- apply relevant *communication* skills
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- sanitise equipment according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:

- hygiene, OH&S or workplace requirements when breaking carcases
- quality requirements for breaking carcases
- principles of contamination in regard to primary cuts
- primary *cut specifications* for beef, sheep and one other species
### REQUIRED SKILLS AND KNOWLEDGE

- major anatomical structures of the carcase of each species
- relevant regulatory requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise and must include:

- breaking carcase into primal cuts for a minimum of three species, including beef and sheep
- identifying primary cut specifications for at least three species, including beef and sheep.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Resources may include:

- appropriate knives and breaking equipment
- cutting lines
- specifications for primals for three species, including beef and sheep.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge

**EVIDENCE GUIDE**

<table>
<thead>
<tr>
<th>Workplace demonstration</th>
<th>Workplace referee or third-party report of performance over time.</th>
</tr>
</thead>
</table>

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Primal cuts* may:

- differ according to:
  - customer specifications
  - end use
  - species
  - workplace specifications
- include:
  - beef (rump, round or knuckle, silverside or outside, topside or inside, loin, shins, chuck, blade or clod, rib set, brisket and flank)
  - deer (e.g. leg, rump, loin, shoulder and forequarters)
  - goat (e.g. leg, short loin, rib loin, chump, forequarters and breast)
RANGE STATEMENT

- kangaroo (e.g. leg, tail butt, loin and shoulder)
- pigs (e.g. leg, rump, loin, fore loin, fore quarters and belly or spring)
- sheep (e.g. leg, short loin, rib loin, chump, fore quarters and breast)
- veal (e.g. leg, loin, fore quarters and shoulder).

**Workplace requirements may include:**

- ability to perform the task to production requirements
- enterprise-specific procedures
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- work instructions.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Hygiene requirements may include:**

- clean work wear each shift or day
- cleanliness of work area
- hand washing
- head covering
- personal hygiene
- sterilisation of equipment.
## RANGE STATEMENT

### Species must include:
- beef
- sheep
- one other species, which may include:
  - crocodile
  - deer
  - emu
  - game meat
  - goat
  - kangaroo
  - pig.

### Communication skills may include:
- interacting with colleagues, superiors, customers, clients and external parties, and
- applying mathematical skills to workplace requirements
- communicating and working with people from a range of cultural, social and ethnic backgrounds
- empathising with customers and work colleagues
- interpreting the needs of internal and external customers
- listening and understanding, and speaking clearly and directly
- reading and interpreting workplace documentation
- own work area and wider work area
- sharing of information
- the use of communications technology
- the use of negotiation, persuasion and assertiveness skills
- writing to audience needs.

### Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian standards
- requirements set out in AS 4696:2007
  Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- federal, state and territory regulations regarding meat processing.

1.2. Meat cuts are located on a carcase by cut name and species according to workplace requirements and customer specifications.  
1.3. Specialised cuts are located on a carcase by cut name and species according to workplace requirements and customer specifications. |
| 2. Identify cuts | 2.1. Meat cuts are identified on a carcase by cut name and species according to workplace requirements and customer specifications.  
2.2. Meat cuts are identified on primals in cartons by cut name and species according to workplace requirements and customer specifications.  
2.3. *Cutting lines* for meat cuts are correctly identified on primals according to workplace requirements and customer specifications.  
2.4. Cutting lines for primal cuts are correctly identified on a carcase according to workplace requirements and customer specifications. |
| 3. Assess cuts | 3.1. Meat cuts are assessed for quality to workplace requirements and customer specifications.  
3.2. Meat cuts are assessed against *cut specifications* to workplace requirements.  
3.3. Primal cuts are assessed for quality to workplace requirements and customer specifications.  
3.4. Primal cuts are assessed against cut specifications to workplace requirements. |

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**
# REQUIRED SKILLS AND KNOWLEDGE

## Ability to:
- demonstrate safe manual-handling techniques
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- apply relevant *communication* skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

## Required knowledge
- *hygiene* and *Occupational Health and Safety (OH&S) requirements* for breaking carcases
- quality requirements for breaking carcases
- principles of contamination in regard to primary cuts
- sequence for breaking carcases
- relevant *regulatory requirements*
- acceptable cutting lines to produce primary cuts to workplace requirements
- primary cut specifications for beef, sheep and one other species
- major anatomical structures of the carcase of each species
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th></th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
</table>

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

<table>
<thead>
<tr>
<th></th>
<th>Competency must be demonstrated over time under typical operating conditions.</th>
</tr>
</thead>
</table>

### Context of, and specific resources for assessment

|  | Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment. Resources may include:  
- charts and diagrams for cuts  
- specifications for primal cuts. |
|---|---|

### Method of assessment

|  | Recommended methods of assessment are:  
- quiz of underpinning knowledge  
- simulation  
- workplace demonstration of competency for the assessor  
- workplace referee or third-party report of performance over time. |
|---|---|
### EVIDENCE GUIDE

| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Primal cuts** may:

- differ according to:
  - customer specifications
  - end use
  - species
  - workplace specifications
- include:
  - beef (e.g. rump, round or knuckle, silverside or outside, topside or inside, loin, shin, chuck, blade or clod, rib set, brisket and flank)
  - deer (e.g. leg, rump, loin, shoulder and forequarters)
  - goat (e.g. leg, short loin, rib loin, chump, forequarters and breast)
  - kangaroo (e.g. leg, tail butt, loin and shoulder)
  - pigs (e.g. leg, rump, loin, foreloin, forequarters and belly or spring)
  - sheep (e.g. leg, short loin, rib loin, chump,

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Research local markets to determine potential customer needs | 1.1. *Local demographics* are investigated and purchasing *preferences/requirements* interpreted.  
1.2. Current product lines, brands and suppliers are reviewed to determine match to local preferences/requirements.  
1.3. Current and alternative suppliers are researched to ensure local requirements can be met.  
1.4. Alternative product lines are reviewed to *determine economic viability* of introduction. |
| 2. Recommend new products to manager | 2.1. New product line possibilities are prioritised.  
2.2. Research is *reported* to supervisors/managers.  
2.3. New product lines or suppliers are recommended to managers, with support from market research. |
| 3. *Promote product features* to customers | 3.1. Customers are informed of special features of product lines.  
3.2. Product features that meet local requirements and preferences are promoted. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- undertake market research, including determining:
  - demographic make-up of local area
  - specific religious needs of local area, such as halal or kosher meats
  - specific cuts of meat preferred by major local cultural groups
  - preferences for organic meats
  - preferences for value-added products or basic meat cuts
  - more sophisticated expectations of product such as brands that promote good animal welfare practices, environmentally-friendly production and processing, Australian made and owned products
  - preferences for particular species, including game meat
## REQUIRED SKILLS AND KNOWLEDGE

- prices they are prepared to pay for meat
- what is sold by competitors
- use appropriate research methodology, such as internet research, questionnaires, observations, conversations with customers, other local residents, local council data, suppliers or other industry members, existing market research data
- research suppliers and brands for product features and supply chain policies and practices
- seek advice from appropriate sources when introducing/investigating new product lines
- apply communication skills relevant to the task
- apply mathematical skills to determine economic viability of various product lines
- apply relevant Occupational Health and Safety (OH&S) and regulatory requirements
- report findings and make recommendations based on market research and accurate cost/price/profit calculations to senior staff members
- provide sound information to customers about product lines, brands and supply chain, using appropriate language and showing sensitivity to cultural differences
- research and follow cutting specifications for non-standard meat cuts
- provide sound information to customers on link between specialised brands and product cost
- demonstrate effective interpersonal skills in providing advice to customers
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- take action to improve own work performance as a result of self evaluation, feedback from others or changes in work practices, legislation or technology

### Required knowledge

Knowledge of:

- requirements of whole of supply-chain practices required for a product to achieve brandings such as RSPCA, free-range, organic, environmeat and MSA
- range of species, including game
- difference between dry-aged and wet-aged meat
- requirements of whole of supply-chain practices required for a product to meet religious requirements such as halal (for Muslim consumers) or kosher (for Jewish consumers)
- enterprise ethical and customer service standards
- relevant OH&S requirements such as:
  - enterprise OH&S policies, procedures and programs
  - OH&S legal requirements
  - Personal Protective Equipment (PPE) which may include:
    - coat and apron
    - head-wear
## REQUIRED SKILLS AND KNOWLEDGE

- uniforms
- work, safety or waterproof footwear
- requirements set out in standards, codes of practice etc.
- workplace requirements, such as:
  - enterprise-specific procedures and ethical standards
  - Standard Operating Procedures (SOPs)
  - work instructions
- relevant regulatory requirements such as:
  - federal and state regulations regarding meat processing and food handling
  - hygiene and sanitation requirements
  - relevant Australian Standards
- sources of information to further meet customer needs and expectations
- features of new and existing product lines
- mathematical formulas for determining product selling prices
- problem-solving techniques
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

### Context of and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

- Recommended methods of assessment include:
  - quiz of underpinning knowledge
  - workplace project
  - workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**local demographics** include:
Social make-up of local community (e.g. residents, shoppers, workers) such as:
- age
- sex
- marital/family status
- socio-economics
- culture
- religion.

**preferences/requirements and product features may include:**
- meat processed according to religious requirements (e.g. Halal or Kocher)
- preferences for species
- preferences for specific or specialised cuts
- preferences for particular cooking methods
- cost
- value-added or cook-and-serve meals
- packaging
- organic meat
- gourmet product
- convenience (ability to buy whole meal in one location)
- free-range meat and eggs
- dry-aged or wet aged product
- social responsibility of supply chain, including animal welfare practices,
## RANGE STATEMENT

<table>
<thead>
<tr>
<th>Environmentally friendly practices, employee-welfare practices and human rights policies.</th>
</tr>
</thead>
</table>

### Determining economic viability

- means to determine whether a product can be produced and sold at a price that:
  - the customer is willing to pay
  - the enterprise will make an acceptable profit margin
- can be determined using mathematical skills that may involve:
  - estimation and calculation
  - the use of calculations and computer software packages
  - the use of familiar and unfamiliar complex formulas
  - relate to product formulation, yield and costing and pricing
  - require interpretation and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts
  - require synthesis and analysis of mathematical information from more than one source.

### Reports may:

- be conducted orally in writing using standard formats or using a range of communications technology and media
- include information from several sources
- present information in diagrammatic, tabular, graphic or pictorial formats
- require summaries of information for presentation to work colleagues
- use workplace, mathematical and technical language.

### Promotion of product features may include:

- advertising through local media
- signage and product labelling
- providing information on enterprise website
- newsletters and brochures
- providing information to customers orally
- merchandising strategies
- using suppliers' merchandising to promote
RANGE STATEMENT

brands locally.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- collect samples in accordance with workplace and regulatory requirements
- apply relevant Occupational Health and Safety (OH&S) requirements
- use relevant communications skills

Required knowledge

Knowledge of:
- procedure for collecting, receiving, handling and storing specimens in accordance with laboratory procedures, universal precautions and legislative requirements
- use of aseptic techniques in collecting samples
- how sample collection has to be coordinated with workplace activities
- importance of obtaining representative samples and how this can be achieved
- procedures for documenting all pertinent sample information in the required format
- workplace Standard Operating Procedures (SOPs) for collecting and preparing samples
- relevant OH&S requirements
- steps in preparing samples and sub-samples to comply with required procedures
- workplace procedures to recognise sampling equipment and, as required, maintain it in a sterile condition
- correct disposal procedures
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Sample collection techniques must comply with the relevant meat industry regulations and standards.

### Context of, and specific resources for assessment

Assessment may be conducted in a real or simulated situation.

### Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Samples** may include:
- blood
- blood products
- animal tissue and fluids
- solids, liquids, and gases that involve raw materials,
- products, by-products, waste or naturally-occurring substances.

Their exact nature will depend on the ambit of the laboratory and the workplace.

**Workplace procedures** may include:
- enterprise-specific requirements
- SOPs
- work instructions.

**Samples requiring analysis by external laboratories** are:
- forwarded in accordance with relevant regulations and procedures.

**Relevant regulations** may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing.
**RANGE STATEMENT**

- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication skills may include**

- applying numeracy skills to workplace requirements
- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups
- reading and interpreting workplace related documentation.

**SOPs may include those covering:**

- collection
- preparation
- storage
- transport.

</thead>
</table>
| 1. Prepare and operate processing equipment used in producing *value-added products* | 1.1 Processing equipment is prepared and operated according to hygiene, and health and safety requirements  
1.2 Faults are identified in line with manufacturer and workplace requirements  
1.3 Equipment is used according to manufacturer, workplace and *Workplace Health and Safety (WHS)* requirements  
1.4 Start-up and shut-down procedures are performed according to manufacturer and workplace requirements |
| 2. Clean processing equipment | 2.1 Equipment is cleaned to manufacturer's, WHS, hygiene and workplace requirements |
| 3. Follow recipe | 3.1 Recipes are followed to prepare and produce value-added products to product specifications |
| 4. Select *ingredients* for formulation of *value-added products* | 4.1 Ingredients are selected in accordance with recipes, policy and practice, and *regulatory requirements*  
4.2 Ingredients are weighed in accordance with recipe specifications and regulatory requirements  
4.3 Ingredients are labelled according to workplace and regulatory requirements |
| 5. Prepare meat, stuffings, seasonings and force meat for *value-added products* | 5.1 Meat is prepared according to recipes, policy and practice  
5.2 Stuffings, seasonings and force meat are prepared in accordance with recipes, policy and practice |
| 6. Prepare marinades, sauces, and glazes for *value-added product* | 6.1 Marinades, sauces and glazes are prepared in accordance with recipes, policy and practice |
| 7. Mix ingredients | 7.1 Ingredients are weighed in accordance with recipe requirements  
7.2 Ingredients are added to meat according to recipes, product specifications and regulatory requirements  
7.3 Ingredients are blended to achieve product consistency according to recipes and product specifications |
| 8. Produce *value-added products* | 8.1 Product is formulated according to product specifications  
8.2 Product is presented according to product specifications and policy and procedures  
8.3 Pastry types are used correctly according to recipes and workplace requirements  
8.4 Meat is skewered according to recipes and workplace requirements |

</table>
| 9. Store products and ingredients | 9.1 Product is stored according to workplace and regulatory requirements  
9.2 Ingredients are stored according to workplace and regulatory requirements  
9.3 Shelf life of products is identified and appropriate action taken  
9.4 Effects of ingredients on shelf life are identified and appropriate action taken |
### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- make adjustments to equipment when necessary according to manufacturer's, workplace and WHS requirements
- *describe* shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- *explain* the permissible use of additives and ingredients in value-added products
- identify suitable alternatives from existing stock where quantities of required ingredients are not available, as applicable
- work with team members to develop new value-added products
- identify sub-standard product and rectify appropriately
- label value-added products according to workplace and regulatory requirements
- provide advice to customers on ingredients in value-added products
- seek advice on new recipes and products from appropriate sources
- use *communication skills* appropriate to the task
- use *mathematical skills* as required for production of value-added products
- estimate measures to verify calculations

#### Required knowledge

**Knowledge of:**

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- range of effects on the product and on consumer health of the use of incorrect and inadequate quantities of ingredients
- properties of correct blending
- purpose and use of processing equipment in the preparation of value-added products
- use and purpose of stuffings, seasoning and force meat in producing value-added products
- use and purposes of ingredients in producing value-added products
- quality requirements related to production of value-added products
- effect of various ingredients on product shelf life
- procedures for cleaning processing equipment
- workplace, WHS and hygiene requirements related to producing value-added products
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

The candidate must be able to produce value-added meat products from a minimum of three species, using pastry, fresh produce, dried herbs and spices and marinades.

Where the candidate does not produce value-added products in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

### Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace assignment
- workplace referee or third-party report of performance over time

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English.
EVIDENCE GUIDE

| literacy demands of the assessment task should not be higher than those of the work role. |

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Value-added products may include:
- beef wellington
- fillet mignon
- goldfield racks with camembert
- pastry meat products
- tornadoes (e.g. pork and apple)
- veal cordon bleu

Workplace requirements may include:
- enterprise-specific procedures and ethical standards
- Standard Operating Procedures (SOPs)
- work instructions

WHS requirements may include:
- enterprise WHS policies, procedures and programs
- WHS legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - protective boot covers
  - protective hand and arm covering

MTMR501A Develop and assess a meat retailing business opportunity

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to identify, develop and assess a new business or activity opportunity for the meat retailing enterprise. |

Application of the Unit

| Application of the unit | Owners, managers or senior staff of meat retailing enterprises may wish to develop their business, start a new venture or explore potential to create new products and services for an existing organisation. |
| | The person might be (or intend to be) self employed, or work for a business of any size, where they may develop opportunities as part of a broader role within the enterprise. |
| | This unit does not cover implementing or financing the new venture, or managing the growing business. |

Assessment of performance is to be consistent with the evidence guide. |
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify a business opportunity | 1.1. Relevant market, client, product and service information is located and reviewed.  
1.2. *Collective capability* of existing staff and facilities is assessed.  
1.3. *Thinking techniques* are used to generate *business opportunity ideas*.  
1.4. Sources for additional information and fresh business opportunity ideas are identified, explored and absorbed.  
1.5. Personal and business objectives of developing opportunities are identified.  
1.6. Input is obtained from others to improve and sort initial ideas. |
| 2. Develop a business concept | 2.1. A range of business opportunity ideas is reviewed and prioritised to develop business concepts.  
2.2. *Basic business planning estimates* are calculated for new business concepts.  
2.3. Relevant *legal and non legal requirements* are identified and reviewed.  
2.4. *Criteria for determining the feasibility* of new business ideas are determined and documented.  
2.5. Preliminary assessment of feasibility of business concepts is undertaken and *specialist advice* sought as required.  
2.6. *Risks* of business concepts are identified.  
2.7. *Choice* is made of most feasible ideas to be further developed into business plans.  
2.8. Basic documentation is prepared to communicate business concepts to stakeholders. |
| 3. Work with others to advance the business concept | 3.1. Requirements for partners, alliances and advisors to advance business concept are determined.  
3.2. Potential partners, alliances and advisors are identified and assessed.  
3.3. Legal advice is sought to protect interest throughout negotiations, where appropriate.  
3.4. Negotiations are conducted to advance the concept.  
3.5. Partnership, alliance and advisory arrangements are negotiated, if appropriate.  
3.6. Partnership, alliance and advisory arrangements are |

 | confirmed using legal processes, if appropriate.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- relate to people from a range of social, cultural and ethnic backgrounds, and physical and mental abilities
- use thinking techniques
- use research and analytical skills to:
  - conduct basic research
  - conduct an initial feasibility assessment
  - prepare basic business planning estimates
- apply negotiation skills for exploring partnerships
- use verbal and written communication skills to:
  - document ideas, business planning estimates and feasibility assessment
  - negotiate with potential partners
- determine legal, Occupational Health and Safety (OH&S) and non-legal requirements
- work with employees and family (if a family business)
- calculate business planning estimates
- assess risk and plan for contingencies
- solve problems as they arise in negotiations
- using technology to manage information
- identify and develop fresh business opportunity ideas
- document a range of ideas
- assess and evaluate relevant market, client, product and service information
- communicate ideas to supervisors, managers and other employees

**Required knowledge**

Knowledge of:

- general characteristics and traits of successful entrepreneurs
- biographies and case studies of particular individuals, in own or related industries
REQUIRED SKILLS AND KNOWLEDGE

- relevant legal, OH&S and non-legal requirements
- basic methods of business planning
- personal characteristics of successful entrepreneurs
- risk assessment strategies

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- **Collective capability** of existing staff and facilities may include:
  - flexibility
  - interest in pursuing new ideas
  - desire to take risks
  - confidence in self and vision
  - attitudes toward ambiguity and uncertainty
  - financial capability to invest in change
  - ability to think laterally
  - limitations of existing facilities and environment.

- **Thinking techniques** may include:
  - brainstorming
  - discussions
  - lateral thinking
## RANGE STATEMENT

| de Bono’s Six Thinking Hats® method |

### Business opportunity ideas

- ideas to create profits or assets
- new product lines
- identifying and targeting a new customer or group of customers
- new facilities or locations
- change of image.

### Basic business planning estimates

- work methods
- locations
- initiatives and types of activities
- human resources
- budgets and other resources
- timelines
- return on investment period.

### Legal and non-legal requirements

- award and enterprise agreements and relevant industrial instruments
- Food Safety Code
- relevant legislation from all levels of government that affects business operation, especially in regard to OH&S and environmental issues, Equal Employment Opportunity (EEO), industrial relations and anti-discrimination
- relevant industry codes of practice
- requirements deriving from organisation's policies and procedures
- access and equity requirements
- codes of practice
- contractual obligations
- customer expectations
- industrial relations agreements
- insurance requirements
- laws and regulations
- local council regulations
- accreditation/licence/patent/copyright requirements
- maintenance/service/operating requirements
- manufacturers' requirements
- OH&S requirements
- professional development requirements
- standards
- warranty requirements.
## RANGE STATEMENT

### Criteria for determining feasibility
- ability to meet legal and non-legal requirements
- ability to meet personal and business objectives
- commercial viability
- supply and demand assessments.

### Specialist advice
- accounting, legal, food safety and OH&S advice
- advice from government agencies, industry associations, business brokers and consultants
- mentoring support

### Risks
- regulations, legislation and codes of practice
- safety
- public reputation and consumer interest
- sustainability
- personnel
- environmental factors
- financial risk.

### Choice
- by owner/operator of small business
- by key family members of family business
- by managers or supervisors.

| 1. Weigh product             | 1.1. Product is inspected and graded according to *workplace requirements*.  
1.2. Product outside specifications is handled according to workplace requirements.  
1.3. Corrective action is taken according to workplace requirements if product is outside specifications.  
1.4. Product is weighed according to workplace, *hygiene and sanitation*, Quality Assurance (QA) and *regulatory requirements*, where part of work instructions. |
| 2. Arrange product           | 2.1. Product is arranged according to workplace, hygiene and sanitation, QA and regulatory requirements, where part of work instructions.                                                                                 |
| 3. Bag and seal product      | 3.1. Product is bagged according to workplace, hygiene and sanitation QA and regulatory requirements, where part of work instructions.                                                                                  |
| 4. Inspect product           | 4.1. Product is inspected for defects according to workplace, hygiene and sanitation, QA and regulatory requirements, where part of work instructions.  
4.2. Appropriate action is taken for defects according to workplace requirements.                                                                    |
| 5. Place product into container | 5.1. Product is prepared for containers according to workplace, hygiene and sanitation, QA and regulatory requirements.  
5.2. Product is packed into containers according to workplace, hygiene and sanitation, QA and regulatory requirements.                                      |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
### REQUIRED SKILLS AND KNOWLEDGE

- inspect and grade of a variety of products prior to packaging
- demonstrate the accurate weighing of a variety of products
- package and arrange product into two containers according to workplace requirements
- bag and seal product to workplace, hygiene and sanitation, and QA requirements
- inspect bagged product for defects and take appropriate action for defects
- work effectively as an individual and as a member of a team
- explain how a variety of products may need to be arranged in bags
- apply relevant **OH&S requirements**
- make adjustments to own work practice in response to advice from colleagues, new techniques or technology or self-evaluation
- use *communication* and *mathematical skills* appropriate to the task

### Required knowledge

Knowledge of:

- labelling requirements
- inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- procedures for packing products into containers for a variety of different products
- requirements for inspecting bagged products and the action to be taken if defects are found
- requirements related to bagging products
- how a variety of products may need to be arranged in bags
- relevant **OH&S requirements**
**Evidence Guide**

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |
| --- |
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated over time and under typical operating conditions for the enterprise. |
| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal operating conditions. Resources may include:  
- real work environment  
- relevant documentation such as:  
  - manufacturer's instructions or operations manuals  
  - regulatory requirements  
  - workplace policy and procedures  
  - relevant equipment and materials. |
| Method of assessment | Recommended methods of assessment include:  
- workplace demonstration  
- observation of performance over time |
### EVIDENCE GUIDE

- quiz, question and answer.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Product may include: | bacon  
|                      | frankfurts  
|                      | kabanas and mini kabanas  
|                      | sliced product. |

| Workplace requirements may include: | enterprise-specific requirements  
|                                     | OH&S requirements  
|                                     | QA requirements  
|                                     | Standard Operating Procedures (SOPs)  
|                                     | the ability to perform the task to production requirements  
|                                     | work instructions. |

| Hygiene and sanitation requirements may include: | relevant government regulations  
|                                                   | workplace requirements. |

| Regulatory requirements may include: | Export Control Act  
|                                     | federal and state regulations regarding meat |
### RANGE STATEMENT

| Processing | hygiene and sanitation requirements  
|           | relevant Australian Standards  
|           | relevant regulations.  

**Explanations may be:**

- completed with the assistance of others  
- directly related to own work area  
- in everyday workplace language, including some mathematical language  
- presented in routine standard proformas using accurately copied information, symbols, numbers, abbreviations, sketches, codes and everyday workplace language  
- presented orally  
- routine, simple and brief.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs  
- OH&S legal requirements  
- Personal Protective Equipment (PPE) which may include:  
  - coats and aprons  
  - ear plugs or muffs  
  - eye and facial protection  
  - head-wear  
  - lifting assistance  
  - protective boot covers  
  - protective hand and arm covering  
  - protective head and hair covering  
  - uniforms  
  - waterproof clothing  
  - work, safety or waterproof footwear  
- requirements set out in standards and codes of practice.

**Communication skills may include:**

- interacting with people from a range of cultural, social and ethnic backgrounds  
- listening and understanding  
- the use of communications technology.

**Mathematical skills may include:**

- using calculators and with the assistance of others  
- recognition and accurate copying of numbers relating to temperature, time, volume, weight

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Set up and adjust thermoforming machinery and materials | 1.1. Thermoforming machinery and materials are set up for a variety of product specifications according to manufacturer's specifications and workplace, Occupational Health and Safety (OH&S) and hygiene requirements.  
1.2. Thermoforming machinery and materials are adjusted according to manufacturer's specifications and workplace, OH&S and hygiene requirements. |
| 2. Set up requirements for packaging | 2.1. Requirements for packaging are set up to workplace, OH&S, and hygiene and sanitation requirements. |
| 3. Operate thermoforming machinery | 3.1. Thermoforming machinery is operated to throughput requirements for a variety of products according to manufacturer's specifications and workplace, OH&S and hygiene requirements. |
| 4. Change dates | 4.1. Dates on the date coder are changed according to manufacturer's specifications and workplace, OH&S and hygiene requirements. |
| 5. Clean machinery and materials | 5.1. Machinery and accessories are cleaned according to manufacturer's specifications and workplace, OH&S and hygiene requirements. |
| 6. Monitor and identify faulty product and packaging | 6.1. Faulty product and packaging is identified according to workplace requirements |
| 7. Report and/or fix operating problems on thermoforming equipment and auxiliaries | 7.1. Operating problems on thermoforming equipment and auxiliaries are reported and/or fixed according to workplace requirements. |
| 8. Perform gas flushing | 8.1. Gas flushing is performed according to workplace requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.
## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

**Ability to:**
- set up machine for gas-flushing if required under work instructions
- identify where labels and other raw materials are stored
- read gas gauges and change gas bottle if required under work instructions
- demonstrate correct loading procedure at machine speed
- demonstrate correct loading procedure for labels
- change dates on the coders
- correctly load and unload films
- join films
- line up printed film
- demonstrate a full label change
- set machine to different product specifications
- perform a full changeover within the specified time including:
  - knives
  - rails
  - sealing chamber
- describe obvious flaws in packaging film
- apply *communication* and *mathematical skills* appropriate to the task
- work effectively as an individual and with a team
- *explain* how the thermoforming machine works
- apply appropriate *regulatory requirements*
- implement the hygiene procedures for the thermoforming machinery
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

**Knowledge of:**
- how the thermoforming machine works
- reasons for changing the different settings
- temperature requirements and the importance of correct temperature
- hygiene requirements and their importance when changing between uncooked and cooked products
- need to adjust tracking and the procedure to make adjustment
- packaging specifications for a range of products for cartons, tubs and pouches
- principles of thermoforming
- purposes of gas analysis and demonstrate the function of a gas-flush analyser if required in work instructions
### REQUIRED SKILLS AND KNOWLEDGE

- use of oxygen absorbers if required under work instructions
- use-by date or packed-on date for a range of products and the importance of these dates
- which films are used for which products
- appropriate regulatory requirements
- causes and corrective actions for re-packs
- thermoforming equipment and accessories

EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- performance of the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
**RANGE STATEMENT**

| Hygiene requirements may include: | • relevant government regulations  
• workplace requirements. |
| Requirements for packaging may include: | • cartons  
• film  
• labels  
• plastic containers. |
| Communication skills may include: | • communicating with diverse individuals and groups  
• listening and understanding  
• reading and interpreting workplace-related documentation  
• speaking clearly and directly. |
| Mathematical skills may include: | • accurate recording of temperature, time, volume, weight and quantity in standard formats and proformas  
• interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc  
• reading and interpreting analogue and digital measures including scales, pressure gauges, thermometers  
• routine estimations and calculations using a range of specified formulas and procedures. |
| Explanations may be: | • completed with the assistance of others  
• directly related to own work and work area problem-solving  
• in everyday workplace language and include mathematical language and commonly used technical terms  
• presented in writing using standard formats or proformas and symbols  
• presented orally. |
RANGE STATEMENT

Regulatory requirements may include:

- Export Control Act
- Federal and state regulations regarding meat processing
- Hygiene and sanitation requirements
- Relevant Australian Standards
- Relevant regulations.

| 1. Set up gas flushing packaging process | 1.1. Machinery is set up for packaging process according to workplace, Occupational Health and Safety (OH&S), hygiene and sanitation requirements and manufacturer’s specifications.  
1.2. Gas cylinders are set up and checked according to workplace requirements and supplier’s specifications. |
| 2. Set up requirements for packaging | 2.1. Requirements for packaging are set up and placed in appropriate positions on packaging line according to workplace, OH&S, and hygiene and sanitation requirements. |
| 3. Operate gas flushing process to throughput requirements | 3.1. Packaging machinery is operated to throughput requirements for a variety of products according to manufacturer’s specifications and workplace, OH&S, Quality Assurance (QA) and hygiene and sanitation requirements. |
| 4. Report and/or fix operating problems on equipment and auxiliaries | 4.1. Operating problems are reported and/or fixed according to workplace requirements. |
| 5. Check packaged product against specifications | 5.1. Packaged product is assessed according to workplace, and hygiene and sanitation requirements.  
5.2. Appropriate action is taken if product is out-of-specifications  
5.3. Packaged product is labelled according to workplace requirements. |
| 6. Perform gas flushing | 6.1. Gas flushing is performed according to workplace requirements. |
| 7. Replace gas cylinders | 7.1. Empty gas cylinders are replaced according to workplace where part of work instructions.  
7.2. Procedures for removing empty cylinders and replacing with full cylinders are followed. |
| 8. Clean machinery and accessories | 8.1. Machinery and accessories are cleaned according to manufacturer’s specifications and workplace, OH&S, and hygiene and sanitation requirements. |

Required Skills and Knowledge
**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- set up and place the requirements for packaging in appropriate positions on packaging line to workplace, OH&S, and hygiene and sanitation requirements
- set up and check gas cylinders to workplace requirements and supplier's specifications
- set up the machinery for packaging process to workplace, OH&S, hygiene and sanitation requirements and manufacturer's specifications
- conduct gas flushing process to workplace requirements
- operate packaging machinery to throughput requirements for a variety of products to manufacturer's specifications and workplace, OH&S, QA, and hygiene and sanitation requirements
- assess packaged product to workplace, and hygiene and sanitation requirements
- label packaged product to workplace requirements
- take appropriate action if product is out-of-specification
- apply *communication* and *mathematical skills* appropriate to the task
- work effectively as an individual and as part of a team
- explain the gas flushing process
- apply relevant OH&S and *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

- types of packaging where gas flushing is included
- workplace requirements related to checking the packaged product against specifications
- workplace requirements related to the gas flushing process of packaging
- relevant OH&S and regulatory requirements
**Evidence Guide**

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- use bar and coder system on a variety of products
- change dates on the coders
- demonstrate the correct procedures for manually entering new product details into the product coding system
- demonstrate the correct maintenance procedures for bar and coder system components
- demonstrate the correct procedures for fixing common printing problems
- apply communication and mathematical skills appropriate to the task
- work effectively as an individual and as a member of a team, including with diverse individuals and groups
- explain the common causes of printing problems
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practice or technology
### REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:

- functions performed by solvent and water in the printing process
- safety procedures for handling solvents
- start-up procedures for the coding system
- common causes of printing problems
- correct procedures for fixing common printing problems
- use-by date or packed-on date for a range of products and the importance of these dates
- components of the coding system and explain their maintenance requirements
- correct procedures for re-booting the computer system
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
</tr>
</tbody>
</table>
| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal production conditions.

Resources include:
- bar and coder system
- labels
- manufacturer's requirements
- printer and accessories
- workplace environment
- workplace procedures. |
| Method of assessment | Recommended methods of assessment include:
- workplace demonstration
- quiz
- question and answer |
EVIDENCE GUIDE

- observation of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
## RANGE STATEMENT

- lifting assistance
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Regulatory requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

### Hygiene requirements may include
- relevant government regulations
- workplace requirements.

### Communication skills may include
- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

### Mathematical skills and tasks relate to own work and work area problem-solving and may include:
- accurate recording of time, date, weight and quantity in standard formats and proformas
- interpreting and drawing conclusions from routine charts, bar graphs, and pie charts.

### Explanations may:
- be completed with the assistance of others
- be directly related to own work and work area problem-solving
- be in everyday workplace language and include mathematical language and commonly used technical terms
