Unit Mapping MTM07 to MTM11 ............................................................................................. 66
Overview .................................................................................................................................. 106
Qualifications Framework ........................................................................................................ 109
Qualification Pathways ............................................................................................................. 120
Whole of Industry Qualification Information ......................................................................... 121
Skill Sets in this Training Package ......................................................................................... 123
Assessment Guidelines ............................................................................................................. 125
Assessment Guidelines - Licensing/Registration Requirements .............................................. 138
Competency Standards ........................................................................................................... 141
Examples from this Training Package of Employability Skills .............................................. 145
Competency Standards - Industry Contextualisation ............................................................... 146
MTM10111 Certificate I in Meat Processing (Smallgoods) ...................................................... 147
MTM10211 Certificate I in Meat Processing (Meat Retailing) .................................................. 151
MTM20111 Certificate II in Meat Processing (Abattoirs) ......................................................... 156
MTM20211 Certificate II in Meat Processing (Smallgoods) ...................................................... 169
MTM20311 Certificate II in Meat Processing (Meat Retailing) ................................................. 175
MTM20411 Certificate II in Meat Processing (Food Services) .................................................. 181
MTM30111 Certificate III in Meat Processing (Boning Room) ................................................ 187
MTM30211 Certificate III in Meat Processing (Food Services) ................................................ 194
MTM30311 Certificate III in Meat Processing (Meat Safety) ................................................... 200
MTM30411 Certificate III in Meat Processing (Rendering) ....................................................... 207
MTM30511 Certificate III in Meat Processing (Slaughtering) .................................................... 212
MTM30611 Certificate III in Meat Processing (General) .......................................................... 220
MTM30813 Certificate III in Meat Processing (Retail Butcher) ................................................ 233
MTM30911 Certificate III in Meat Processing (Smallgoods - General) .................................... 240
MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture) ............................. 248
MTM40111 Certificate IV in Meat Processing (Leadership) ...................................................... 255
MTM40211 Certificate IV in Meat Processing (Meat Safety) ................................................... 262
MTM40311 Certificate IV in Meat Processing (Quality Assurance) .......................................... 269
MTM40411 Certificate IV in Meat Processing (General) ............................................................ 277
MTM50111 Diploma of Meat Processing .................................................................................. 285
MTM50211 Diploma of Meat Processing (Meat Retailing) ....................................................... 292
MTM60111 Advanced Diploma of Meat Processing ................................................................. 299
MTM70111 Vocational Graduate Certificate in Agribusiness .................................................. 306
MTM80111 Vocational Graduate Diploma of Agribusiness .................................................... 312
MTMSS00001 Animal Welfare Officer Skill Set ....................................................................... 319
MTMSS00002 Bandsaw Operator (Meat Retail) Skill Set ......................................................... 321
MTMSS00003 Bandsaw Operator (Small Stock) Skill Set ......................................................... 323
MTMSS00004 Basic Bandsaw Operator Skill Set ...................................................................... 325
MTMSS00005 Basic Meat Industry Skill Set ............................................................................. 327

| 4       | 19 April 2013| Addition of one (1) new unit of competency: MTMSR215A Package meat and smallgoods for retail sale  
Revision of one (1) qualification: MTM30813 Certificate III in Meat Processing (Retail Butcher)  
Revision of four (4) units of competency:  
• MTMP414A Oversee humane handling of animals  
• MTMP2010A Apply animal welfare and handling requirements  
• MTMP3067A Prepare and despatch meat products  
• MTMR323A Prepare and produce value-added products  
**ISC Upgrades:**  
Addition of six new Skill Sets:  
• Cooked and Processed Meats for Meat Retail Product Range Skill Set  
• Produce Cooked Fermented Meat Products Skill Set  
• Produce Cooked Meat Products Skill Set  
• Produce Dried Meat Products Skill Set  
• Produce Smoked Meat Products Skill Set  
• Produce UCFM Products Skill Set  
Updated revised units in seven (7) qualifications:  
• MTM20111 Certificate II in Meat Processing (Abattoirs)  
• MTM20211 Certificate II Meat Processing (Smallgoods)  
• MTM20311 Certificate II in Meat Processing (Meat Retailing)  
• MTM30611 Certificate III in Meat Processing (General) |
- MTM31011 Certificate III in Meat Processing (Smallgoods – Manufacture)
- MTM40211 Certificate IV in Meat Processing (Meat Safety)
- MTM40411 Certificate IV in Meat Processing (General)

Updated revised units in seven (7) Skill Sets:
- Animal Welfare Officer Skill Set
- Effective Stunning (Captive Bolt) Skill Set
- Effective Stunning (Gas Stunning) Skill Set
- Effective Stunning (Electrical Stunning) Skill Set
- Humane Slaughter of Animals Skill Set
- Lairage Supervisor Skill Set
- Meat Processing Livestock Handler Skill Set

Updated one (1) equivalent imported unit
Corrected a publishing error in MTM30911 Certificate III in Meat Processing (Smallgoods - General)
Corrected a number of typographical errors

Disclaimer

This work is the result of wide consultations with Australian industry participants. It is a collaborative view and does not necessarily represent the view of Department of Industry or any specific body. For the sake of brevity it may omit factors which could be pertinent in particular cases.

While care has been taken in the preparation of this Training Package, Department of Industry and the original developer do not warrant that any licensing or registration requirements specified here are either complete or up-to-date for your State or Territory. Department of Industry and the original developer do not accept any liability for any damage or loss (including indirect and consequential loss) incurred by any person as a result of relying on the information contained in this Training Package.

The Commonwealth, through the Department of Industry, does not accept any liability to any person for the information or advice (or the use of such information or advice) which is provided in this material or incorporated into it by reference. The information is provided on the basis that all persons accessing this material undertake responsibility for assessing the relevance and accuracy of its content. No liability is accepted for any information or services which may appear in any other format. No responsibility is taken for any information or services which may appear on any linked websites.

Published by:  AgriFood Skills Australia
Release Date:  21 December 2012
Preliminary Information

Important Note to Users
Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment
This Training Package is Version 4 – check whether this is the latest version by going to the National Training Information Service (www.ntis.gov.au) and locating information about the Training Package. Alternatively, contact www.agrifoodskills.net.au to confirm the latest version number.

Explanation of version number conventions
The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Package’s national code (which remains the same during its period of endorsement).
Historical and General Information

MTM11 *Australian Meat Industry Training Package* is the outcome of an extensive Continuous Improvement process.

**Introduction**

The endorsed components of the MTM11 Australian Meat Industry Training Package include:

- national competency standards for abattoirs, smallgoods, food services and meat retailing
- national qualifications framework
- national assessment guidelines.

The MTM11 Australian Meat Industry Training Package has been developed by the National Meat Industry Training Advisory Council (MINTRAC) on behalf of the Australian Meat Industry, for AgriFood Skills Australia. It addresses changes raised by industry stakeholders under the Continuous Improvement process and recorded on the Issues Register. A consultation process occurred across all sectors of the meat industry and with stakeholders in meat industry training to address and resolve the issues raised.

**Summary of changes from MTM07**

The new features of the Training Package include:

- inclusion of additional Skill Sets
- substantial restructuring of the Diploma and Advanced Diploma qualifications
- replacement of superseded imported Units of Competency
- inclusion of Green Skills
- restructuring of Qualification Requirements to address NQC requirements
- addition of new Units in some qualifications
- addition of the Vocational Graduate Certificate and Diploma of Agribusiness.
Introduction to the Industry

Profile of the Australian Meat Industry

Overview
The Australian meat processing industry comprises processors, retailers and exporters who together are responsible for guaranteeing the supply of meat to domestic and international markets.

Red meat processing
From humble beginnings just over 220 years ago, the Australian red meat industry has grown its total value to $15.8 billion and has become one of the world’s largest exporters of red meat and livestock. Approximately 350,000 people are involved either directly in the supply chain or in businesses that service the industry. The Australian domestic market is the industry’s largest single market. Consumers in this country spend an estimated $6.7 billion on beef and nearly $2.5 billion on sheep meat annually.

Australia exports $5 billion worth of beef and cattle annually, making this sector one of the country’s most valuable farm contributors. Sheep meat and sheep exports are worth around $1.6 billion, and goat meat and goats approximately $55 million. Combined, these represent around 23% of total Australian farm exports. Over 70% of red meat production is exported to 110 countries worldwide.

Changes over the last five years have included a continuing reduction of the national sheep flock, primarily due to drought. There has also been an increasing concentration of production in a number of large companies, with many smaller processors either closing, or being bought out by larger companies.

The Australian production system is diverse, offering a wide variety of products to customers and consumers. Products range from high-quality, tenderness-guaranteed eating products, to hides and pharmaceutical ingredients.

The industry is renowned for its efforts in meeting customer requirements. Major international customers for Australian beef are Japan, the US and Korea, while the US is the dominant export market for lamb and goat meat.

The Australian red meat industry has an enviable international reputation as a leader in food safety, animal welfare and disease control. This earns the trust of domestic and international consumers and allows access to all global markets where collectively over three million tonnes of Australian product is consumed each year.²

Pork processing
The pork industry is one of the few Australian food industries operating in a truly global marketplace, maintaining a small export industry to Asia and competing with increasing volumes of subsidised imports from North America and Europe. Increasing competition from imports is regarded as one of the major challenges facing the industry.

For the 2007-08 period, ABS data indicates that the gross value of pig slaughters in Australia decreased by 4% to $902 million, as slaughter numbers and average prices dropped.

In contrast, consumer confidence in pork continues to grow and the peak body, Australian
Pork Limited (APL) believes that the longer term outlook for the Australian pork industry is one of a strong future. Australia’s clean reputation and proximity to Asia, the largest consumers of pork in the world (where demand for meat is increasing due to rising affluence), gives Australian pork producers significant advantages.

In 2006, 82% of Australian pig meat production was consumed domestically and imports accounted for approximately one-third of consumption. More than 60% of imports came from the United States and Canada, major users of GM feed grain, with almost all of the remainder coming from Denmark.

Other species
Australian animals, such as kangaroos, possums, crocodiles and emus, and introduced animals such as feral goats, horses and pigs, are the basis of a significant commercial industry.

Where they can be harvested humanely and, in the case of native animals, sustainably, wild animals can be profitable supplements or alternatives to domestic animals. Their commercial use can also contribute to pest management objectives.

Kangaroos
Kangaroos and wallabies make up the sixty known species of macropods in Australia, while only six species are commercially harvested. Tasmania is the only state where wallabies are commercially harvested. Kangaroos and wallabies are not farmed; rather they are harvested from the wild in five states of Australia by licensed, trained harvesters. The industry provides over 4000 jobs mostly in rural and remote areas.

Of the kangaroo meat that is harvested 60% is used for pet supplies, mostly for the domestic market. The remainder is used for human consumption with around 80% exported. Markets for kangaroo meat include Russia (although this market has been closed for eighteen months), South Africa, France and Germany. The total value of all kangaroo meat exports for 2006/07 was $27 million. Approximately 30% of skins are used domestically with the rest exported as hide, skin and leather.

Camels
Camel meat production in 2003/04 was fourteen tonnes per year and continues to increase with a growing export market. The Central Australian Camel Industry Association Inc (CACIA) is working with the industry to promote the value of camel meat and other products such as camel oil, wool and leather.

Crocodiles
There are seven commercially operated crocodile farms in the Northern Territory of Australia. The main species farmed is the saltwater crocodile (Crocodylus porosus). The skin is the most valued product from farmed crocodiles and skins are exported to Japan, France, Italy and Asia. The by-products of flesh, feet, teeth and skulls are mainly sold on the domestic market.

Ratites
The emu is farmed for three different products: meat, leather and emu oil. Meat is largely sold for consumption in the domestic market, while a small percentage is exported to Europe.
The oil is used in cosmetics and many natural remedies and sold to both the international and domestic market. A single bird can be expected to produce on average 10 to 12kg of meat and 10L of oil. With current commodity prices, the value of a single emu at slaughter is approximately $575 to $600 Australian dollars.\(^8\)

Ostriches are farmed for the meat and the skin (leather and feathers). Currently, the meat is the most valuable commodity but leather prices are continuously rising. There is good demand for ostrich products internationally and the Australian industry cannot keep up with the current demand.

**Buffalo**

The buffalo industry, at present, is in a rebuilding phase after the impact of BTEC. Strict disease eradication measures against bovine tuberculosis (TB) under the national BTEC campaign are responsible for major changes in the buffalo industry.\(^9\)

**Smallgoods production**

Smallgoods are meat products where the meat has been manufactured to form a new product, such as sausages, salamis, bacons, hams, pates, and dried, roasted and preserved meat products. Smallgoods are made from pig meat and other meats, such as poultry, mutton and beef.

Australian produced smallgoods products are mainly consumed by the domestic market.

As at 2008, there were four major smallgoods manufacturers employing more than 1500 employees, and three medium sized smallgoods manufacturers employing more than 200 employees, although industry restructuring and consolidation is continuing. Industry estimates put annual turnover at around $2 billion.

Pork represents anywhere from 60-80% of the smallgoods sector’s meat input, of which 60% comes from imported pig meat.

The industry is characterised by a high level of domestic consumption, low levels of exports, and low volume sales of a large number of product items.\(^10\)

**Meat wholesaling**

The meat wholesaling sector is a growing sector of newly emerging companies primarily made up of boning rooms and establishments servicing the hospitality industry. These establishments supply restaurants, fast-food outlets, food chains, hotels, airlines, and supermarkets and also fill niche markets, making specific products, such as portion control...
products, organic meat products, native meat products, meat patties, pizza toppings, meat products with health benefits, kebabs, and trimmed and pre-packed shelf-ready trays of meat.

**Meat retailing**

Meat retailers in Australia include traditional independent butchers, supermarkets, butcher shop chains, and gourmet and specialist retail meat outlets.

The major factors affecting the meat retailing sector include the increasing focus on producing and supplying meat products to meet customer needs, and further processing and value-adding to meat products to meet demands for pre-prepared and pre-cooked products. Meat retailers increasingly provide food preparation, storage and cooking advice to customers, in response to a growing resurgence of interest in home cooking and non-traditional meat dishes.

There is also a growing trend towards further processing and supplying meat products from a variety of different animal species, including poultry, game meat, rabbits and native animals, and combining meat with other food products to produce specific product to meet local needs.

The Meat Retailing sector is facing increasing regulation particularly in food safety and Quality Assurance (QA). There are also changes in work organisation and work arrangements, including longer opening hours, and increasing skills demands in technology, food safety, QA, Occupational Health and Safety (OH&S), marketing, customer service and finances.

There is a growing trend towards the use of electronic financial systems, and increasing impact of information technologies particularly on marketing and supply of products, e.g. using the Internet.

**National Livestock Identification System (NLIS)**

The National Livestock Identification System (NLIS) is Australia’s system for identifying and tracking livestock for food safety, biosecurity, market access and industry-related purposes. To date, NLIS has implemented schemes into the cattle, sheep and goat industries. The pig industry is also currently developing a national identification and traceability system.

The main driver for the development and introduction of the NLIS (Cattle) was the need to respond effectively to disease and food safety issues within Australia’s beef and dairy industries. NLIS (Cattle) is Australia’s system for identifying and tracking all cattle through their life. It is a permanent, whole-of-life identification system which aims to ensure that individual animals can be tracked from property of birth to slaughter for bio-security, food safety, and product integrity and market access purposes.

The NLIS system uses machine-readable, radio frequency identification devices (RFIDs) to identify cattle. Cattle identified with NLIS devices can be electronically scanned as they move through the livestock chain. At the time of scanning, each owner's PIC can be recorded and linked to the NLIS device. This movement information is then stored in the secure, central NLIS database. The NLIS database allows for rapid and accurate tracing of cattle in the event of a disease outbreak or residue incident.

**Trends in the industry**

Structured training is becoming increasingly important as companies seek to maintain the
viability and competitiveness of all sectors of the industry in both domestic and international markets. Ongoing training is a critical component of addressing customer demands and expectations.

The industry is responding to:

- expectations from consumers, retailers and governments of high environmental and ethical standards, including food safety and animal welfare
- the competitiveness and ever-changing nature of international markets
- the need to attract, develop and retain a productive workforce
- the need to entice a new generation into the industry and to ensure succession planning is in place for the current workforce
- the need to ensure that learning and education opportunities exist for those already in the industry
- the need to continue to innovate in order to remain competitive and ensure the viability of the industry into the future
- the challenges presented by climate change and other environmental factors
- marketing and promotion requirements as markets diversify and more meal options become available
- increasing customer demands for fresh pork products
- whole-of-supply chain accountability in areas, such as animal welfare and traceability
- the impact of social conscience and values, price and health considerations on meal choices
- meeting ever increasing regulatory requirements (including export licensing, food safety, QA, animal welfare, environment, OH&S and workers compensation)
- the emergence and consolidation of large-scale, factory-based smallgoods production
- customer demands for higher standards of game meat processing
- increasing demand for post-trade training, particularly in the development of business skills, in the meat retailing sector
- the development of leading edge boutique businesses operating across meat sectors.

**Work in the industry**

The jobs and workplace functions covered by this Training Package are from entry level through to middle management and include:

- labourers on slaughter floors, in boning rooms and rendering plants
- packers in smallgoods and abattoir operations
- stock handlers, skin and hide processors, offal processors, chiller and freezer operators, loadout personnel and production clerks
- process workers in the smokehouse, pickling, manufacturing, fermentation, kitchen, meat receival and preparation, pre-pack and despatch areas of smallgoods manufacturing plants
- slaughterpersons, boners, slicers and rendering plant operators
- game meat harvesters and processors
- food service personnel in wholesale and retail establishments
- QA officers and meat safety officers (meat inspectors)
- butchers in the meat retailing trade
meat workers in supermarket meat departments
- sales and packaging staff in meat retailing outlets
- managers of micro and small meat retailing businesses and combined meat industry operations
- managers of meat retail departments in supermarkets
- owner-operators of meat retailing businesses and small combined meat industry operations
- supervisors, leading hands, forepersons and team leaders in meat retailing, smallgoods, food services and abattoir operations
- area, regional and state/territory meat managers in supermarkets
- middle managers in abattoirs, smallgoods and food service operations.

Impacts on Training Package development

Regulatory and licensing requirements, business objectives, the literacy and numeracy skills and requirements of workers in the industry, emerging technologies, including e-commerce, environmental issues, and the importance of ethics and values to the industry have been addressed in the development of the Training Package and incorporated into units of competency.

The meat industry is already highly regulated and continues to move towards further regulation. MINTRAC works closely with the relevant authorities including Australian Meat Industry Council (AMIC), the Meat Standing Committee, Australian Quarantine Inspection Service (AQIS) and the meat industry authorities in each state and territory to incorporate regulatory requirements within the competency standards. These requirements are incorporated into relevant units of competency.

Industry-specific regulatory and licensing requirements are specified in the Elements and Performance Criteria, Range Statement and Evidence Guide of the units. These include legislation, regulations, codes, guidelines and standards relating to food safety and food standards, hygiene and sanitation, workplace safety, animal welfare, environmental impact, QA and importing country requirements.

In addition the flexibility of the Training Package ensures that women, Indigenous workers, people whose primary language is a language other than English, and people from rural and remote areas have access to meaningful qualifications and career pathways and that all workers in smallgoods, food services and abattoirs plants can gain qualifications which are meaningful and lead to increased employment opportunities across the industry.

Food services

There are many enterprises in the meat industry which undertake specialised services such as preparing specialty meat cuts, gourmet meat preparation, preparing bulk value-added products, and providing meat preparation customer service. It would not be possible to develop individual qualifications to cover every possible job, especially as new jobs are emerging all the time.

The Australian Meat Industry Training Package contains Certificates II and III in Meat Processing (Food Services) which are highly flexible qualifications enabling selections to be made from a wide range of units. These qualifications enable employers to identify the skills required by their enterprises, and then work with an RTO to identify a suitable training
Validation

The validation of the qualifications structure and key changes to the Training Package were undertaken at industry and enterprise level, particularly where units were newly developed for the industry. Units from other industries and Training Packages were also validated at industry and enterprise level to test their applicability to the industry. Participants in the validation process were asked to assess unit relevance, coverage of work, skills and knowledge requirements, clarity, language style and resourcing implications.

External agencies, advisers and experts were consulted to review initial drafts for technical accuracy, currency and mandatory requirements. They also identified best practice, industry trends and likely/potential future developments within their area of expertise. This ensured that the units of Competency were focused on current and future needs.

Green Skills in the Australian Meat Industry

The Australian Meat Industry’s commitment to the environment is documented in the Meat Industry Strategic Plan 2010-2015. Strategic Theme 1 of this Plan is: Environment and Ethics: Promote ethical and responsible custodianship of the environment, animal welfare and resources used in the production of red meat. There are five Imperatives identified within this Theme.

- Develop, implement and verify a set of robust, creditable standards for environmental stewardship, animal welfare and ethical behaviour acceptable in the community.
- Engage with customers and community to engender community trust that our industry is an ethical and responsible custodian of livestock, land and resources.
- Achieve industry agreement on a total supply chain response to climate change.
- Establish effective whole-of-industry processes for consultation, education and awareness of the requirements for and benefits of change relating to the environment and animal welfare.
- Establish baseline and ongoing data to measure and monitor the impact of our industry on environmental sustainability and ethical custodianship of animals and resources.

Environmental issues affecting the Australian meat industry are monitored and addressed by two National Environment Committees managed through the Australian Meat Industry Council.

- The National Climate Change Committee, a representative committee of eight company managing directors, sets policy and undertakes negotiations with government on behalf of the industry.
- The Environment Research and Development Committee, a committee of 20-30 environmental officers from meat processing companies, sets strategic Research and Development priorities (water, energy, carbon reduction) for the industry and then approves and monitors R&D projects.

The industry also funds the MINTRAC Environment Network. The Environment Network consists of state based networks of researchers, regulators, trainers and practitioners and represents an efficient method of distribution of new information. It also gives environment managers, researchers and regulators a very useful forum to explain, explore and discuss new
issues and innovations.

The two main functions of the network are to:

- organise a limited number of professional development workshops delivered in selected regional centres facilitated by a technical consultant
- develop communication channels between the various parties involved.

Environment and the MTM11 Australian Meat Industry Training Package

There are several units of competency within the MTM11 Australian Meat Industry Training Package which focus specifically on environmental matters:

- MTMCOR206A Overview the meat industry
- MTMPSR202A Apply environmentally sustainable work practices
- MTMPSR403B Facilitate achievement of enterprise environmental practices and policies
- MTMPS5608B Manage environmental impacts of meat processing operations.

In addition, environmental practices and principles are embedded into the Elements and Performance Criteria and Required Skills and Knowledge of most other units within the Training Package.

The MINTRAC Environment Network serves to identify changes required in the Australian Meat Industry Training Package and as a consultative forum to assess proposed changes. The Network also assesses and provides advice on proposed training and assessment support materials.

Overview

What is a Training Package?
A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing peoples skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

How do Training Packages fit within the National Skills Framework?
The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2010 (AQTF 2010), and Training Packages endorsed by the National Quality Council (NQC).

How are Training Packages developed?
Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

How do Training Packages encourage flexibility?
Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained.

Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

Who can deliver and assess using Training Packages?
Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF 2010.

Training Package Components
Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

Training Package Endorsed Components
The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.

**Competency Standards**

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

**Assessment Guidelines**

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF 2010. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

**Qualifications Framework**

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the ‘packaging rules’. The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

**Training Package Support Materials**

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.
Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

**Training Package, Qualification and Unit of Competency Codes**

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, and with the code always before the title.

**Training Package Codes**

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example XYZ08. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

**Qualification Codes**

Within each Training Package, each qualification has a unique eight-character code, for example XYZ10108. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are not used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

**Unit of Competency Codes**

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in MTMCOR201A
- the first three characters signify the Training Package – MTM11 Australian Meat Industry Training Package – in the above example and up to eight characters, relating to an industry sector, function or skill area, follow;
- the last character is always a letter and identifies the unit of competency version. An ‘A’ at the end of the code indicates that this is the original unit of competency. ‘B’, or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent; and
- where changes are made that alter the outcome, a new code is assigned and the title is changed.

**Training Package, Qualification and Unit of Competency Titles**
There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

**Training Package Titles**
The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

**Qualification Titles**
The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words ‘in’ for Certificates I to IV, and ‘of’ for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example: MTM10111 Certificate I in Meat Processing (Smallgoods)

**Unit of Competency Titles**
Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example: MTMCO201A Maintain personal equipment

**Introduction to the Training Package**

**Qualifications Framework**

**The Australian Qualifications Framework**

**What is the Australian Qualifications Framework?**
A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the *AQF Implementation Handbook*.

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

**Qualifications**
Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

**Statement of Attainment**

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/course(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

**AQF Guidelines and Learning Outcomes**

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

**Certificate I**

*Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable. Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

*Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.

**Certificate II**

*Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.
Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

**Distinguishing Features of Learning Outcomes**

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;
- take limited responsibility for own outputs in work and learning.

**Certificate III**

**Characteristics of Learning Outcomes**

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the section of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

**Distinguishing Features of Learning Outcomes**

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

**Certificate IV**

**Characteristics of Learning Outcomes**

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.
Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

**Distinguishing Features of Learning Outcomes**

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

**Diploma**

**Characteristics of Learning Outcomes**

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team coordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

**Distinguishing Features of Learning Outcomes**

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas
- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.

**Advanced Diploma**

**Characteristics of Learning Outcomes**
Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures. The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

Vocational Graduate Certificate

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
• Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
• Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

Skill Sets

Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording ‘these competencies meet [insert skill set title or identified industry area] need’ on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2010 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment.

Skill Sets in this Training Package

This section provides information on Skill Sets within this Training Package, with the following important disclaimer: Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Where this section is blank, nationally recognised Skill Sets have yet to be identified in this industry.

### Whole of Industry Qualification Information

#### Qualifications suitable for VET in Schools

Certificates I and II from MTM11 may be delivered as VET in Schools courses.

The following qualifications can be delivered as VET in Schools courses:

- MTM10111 Certificate I in Meat Processing (Smallgoods)
- MTM10211 Certificate I in Meat Processing (Meat Retailing)
- MTM20111 Certificate II in Meat Processing (Abattoirs)
- MTM20211 Certificate II in Meat Processing (Smallgoods)
- MTM20311 Certificate II in Meat Processing (Meat Retailing)
- MTM20411 Certificate II in Meat Processing (Food Services)

Jobs requiring the use of knives and cutting machinery must be supervised by a person who is competent in the task at all times.
Whole of Industry Qualification Information

Enrolment into these qualifications is conditional on the following parties collaborating to agree on delivery, assessment and infrastructure arrangements:

- the employer
- the union (AMIEU)
- the school
- the RTO

### Skill Sets in this Training Package

- Meat Hygiene Assessment Officer Skill Set
- Meat Industry Microbiological Testing Skill Set
- Meat Packer (Boning Room) Skill Set
- Meat Packer (Offal Room) Skill Set
- Meat Processing Cleaner (Amenities) Skill Set
- Meat Processing Cleaner (Boning Room) Skill Set
- Meat Processing Cleaner (Chiller) Skill Set
- Meat Processing Cleaner (Slaughter Floor) Skill Set
- Meat Processing Core Skill Set
- Meat Processing Environmental Officer Skill Set
- Meat Processing Livestock Handler Skill Set
- Pack Meat Products Skill Sets
- Prepare Head for Inspection Skill Set
- Process Animal Covering Skill Set
- Produce Cooked Fermented Meat Products Skill Set
- Produce Cooked Meat Products Skill Set
- Produce Dried Meat Products Skill Set
- Produce Smoked Meat Products Skill Set
- Produce UCFM Products Skill Set
- Tongue Meat Recovery Skill Set
- Transport Livestock Skill Set
Assessment Guidelines

Introduction
These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Assessment System Overview
This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing and registration requirements; and assessment pathways.
Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.
Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.
Assessment must be carried out in accordance with the:
- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF

Benchmarks for Assessment
The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

Principles of Assessment
All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:
- validity
- reliability
- flexibility
- fairness
- sufficiency

These principles must be addressed in the:
design, establishment and management of the assessment system for this Training Package
• development of assessment tools, and
• the conduct of assessment.

Validity
Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:
(a) assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance
(b) assessment of knowledge and skills must be integrated with their practical application
(c) judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

Reliability
Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

Flexibility
To be flexible, assessment should reflect the candidate’s needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

Fairness
Fairness in assessment requires consideration of the individual candidate’s needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

Sufficiency
Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

Rules of Evidence
The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

**Valid**
Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

**Sufficient**
Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

**Current**
In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

**Authentic**
To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate’s own work.

**Assessment Requirements of the Australian Quality Training Framework**
Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 Essential Standards for Registration. The AQTF 2010 Essential Standards for Initial and Continuing Registration can be downloaded from <www.training.com.au>.

The following points summarise the assessment requirements.

**Registration of Training Organisations**
Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

**Quality Training and Assessment**
Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 Essential Standards for Initial and Continuing Registration, Standard 1.

**Assessor Competency Requirements**
Each person involved in training and assessment must be competent for the functions they perform. See the AQTF 2010 Essential Standards for Initial and Continuing Registration, Standard 1 for assessor (and trainer) competency requirements. See also the AQTF 2010 Users’ Guide to the Essential Standards for Registration – Appendix 2.

Assessment Requirements
The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Assessment Strategies
Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

National Recognition
Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Access and Equity and Client Outcomes
Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Monitoring Assessments
Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Recording Assessment Outcomes
Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Issuing AQF qualifications and Statement of Attainment
Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current AQF Implementation Handbook and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/course(s). See the AQTF and the edition of the AQF Implementation Handbook—available on the AQF Council website <www.aqf.edu.au >

Licensing/Registration Requirements
This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer. Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each State and Territory, and can regularly change. The developers of this Training Package consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and the Department cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis. Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact mintrac@mintrac.com.au
Separate licensing arrangements are required for the following units within MTM11 Australian Meat Industry Training Package:

- MTMPS206B *Operate forklift in a specific workplace*. Candidates undertaking this unit are required to hold a current forklift licence prior to commencement of this unit.
- MTMP2007A *Perform emergency kill*. Candidates undertaking this unit are required to hold a current firearms licence prior to commencement of this unit, if a firearm is to be used to undertake the emergency kill.
- MTMPSR408A *Specify beef product using AUS-MEAT language*.
- MTMPSR409A *Specify sheep product using AUS-MEAT language*.
- MTMPSR410A *Specify pork product using AUS-MEAT language*. Separate certification through AUS-MEAT is required.

Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact

**Requirements for Assessors**

In order to conduct assessment for statutory licensing or other industry registration requirements, assessors must meet the requirements outlined in the following chart, in addition to the AQTF requirements.

<table>
<thead>
<tr>
<th>LICENCE/REGISTRATION</th>
<th>JURISDICTION</th>
<th>REQUIREMENTS</th>
</tr>
</thead>
</table>

© Commonwealth of Australia, 2015
These requirements may be met through

**Pathways**
The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.

![Diagram of learning and assessment pathways](image-url)
Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired. Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package, the AQTF and, where relevant, the Australian Qualifications Framework.

**Learning and Assessment Pathways**

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process. Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace. Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

**Credit Pathways**

Credit is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

**Recognition of Prior Learning**

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;
- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career.

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

- questioning (oral or written)
- consideration of a portfolio and review of contents
- consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
- mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
- observation of performance, and
- participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate’s own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);
- reliable (shows that the candidate consistently meets the endorsed unit of competency);
- current (reflects the candidate’s current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

**Credit Transfer**

*Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.*
This process involves education institutions:

- mapping, comparing and evaluating the extent to which the defined learning outcomes and assessment requirements of the individual components of one qualification are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification
- making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications
- setting out the agreed credit outcomes in a documented arrangement or agreement, and
- publicising the arrangement/agreement and credit available.

**Combination of Pathways**

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate. In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

**Assessor Requirements**

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

**Assessor Competencies**

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF 2007 *Essential Standards for Registration* follows:

1.4 Training and assessment are conducted by trainers and assessors who:

a) have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and

b) have the relevant vocational competencies at least to the level being delivered or assessed, and

c) can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and

d) continue to develop their Vocational Education and Training (VET) knowledge and
Designing Assessment Tools

This section provides an overview on the use and development of assessment tools.

Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

Using Prepared Assessment Tools

If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register <www.ntis.gov.au>.

Developing Assessment Tools

When developing their own assessment tools, assessors must ensure that the tools:

- are benchmarked against the relevant unit or units of competency;
- are reviewed as part of the validation of assessment strategies required under the AQTF; and
- meet the assessment requirements expressed in the AQTF 2010 Essential Standards for Initial and Continuing Registration.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

Language, Literacy and Numeracy

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.
Mandatory Assessment Requirements

Assessments must meet the criteria set out in the AQTF 2010 Essential Standards for Initial and Continuing Registration. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 Essential Standards for Initial and Continuing Registration are as follows:

1.5 Assessment, including Recognition of Prior Learning (RPL):
   a) meets the requirements of the relevant Training Package or accredited course
   b) is conducted in accordance with the principles of assessment and the rules of evidence
   c) meets workplace and, where relevant, regulatory requirements
   d) is systematically validated.

Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.
Employability Skills are embedded within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <http://employabilityskills.training.com.au>.

For more information on Employability Skills in AgriFood Skills Australia Training Packages go to the AgriFood Skills Australia website at www.agrifoodskills.net.au.

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from http://employabilityskills.training.com.au"

Access and Equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia’s VET clients and Australia’s current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia’s economic development and social and cultural life.

Reasonable Adjustments

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability. Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While ‘reasonable adjustment’ and ‘unjustifiable hardship’ are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.
An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student’s disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship.

Further Sources of Information

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

**General Resources**

For general information and resources go to http://www.training.com.au/

The National Register is an electronic database providing comprehensive information about RTOs, Training Packages and accredited courses - &lt;www.ntis.gov.au&gt;

The Training Package Development Handbook site provides National Quality Council policy for the development of Training Packages. The site also provides guidance material for the application of that policy, and other useful information and links.

**Assessment Resources**

Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focused training and assessment.

RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.

Resources can be purchased or accessed from:

- TVET Australia – provides an integrated service to enable users of the national training system to identify and acquire training materials, identify copyright requirements and enter licenses for use of that material consistent with the scope and direction of the NQC.

Competency Standards

What is competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

Contextualisation of Units of Competency by RTOs

Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure—but only where these expand the breadth of the competency and do not limit its use.

Components of Units of Competency

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit Title
The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

**Unit Descriptor**
The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

**Employability Skills**
This sub-section contains a statement that the unit contains Employability skills.

**Pre-requisite Units (optional)**
If there are any units of competency that must be completed before the unit, these will be listed.

**Application of the Unit**
This sub-section fleshes out the unit of competency’s scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

**Competency Field (Optional)**
The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

**Sector (optional)**
The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

**Elements of Competency**
The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

**Performance Criteria**
The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

**Required Skills and Knowledge**
The essential skills and knowledge are either identified separately or combined. Knowledge identifies what a person needs to know to perform the work in an informed and effective manner. Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

**Range Statement**
The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

Evidence Guide
The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills

Employability Skills in Units of Competency
The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

How Employability Skills relate to the Key Competencies
The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

Employability Skills  Mayer Key Competencies

Communication  Communicating ideas and information
Teamwork  Working with others and in teams
Problem solving
Solving problems
Using mathematical ideas and techniques

Initiative and enterprise
Planning and organising
Collecting, analysing and organising information
Planning and organising activities

Self-management

Learning

Technology
Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

Explicitly embedding Employability Skills in units of competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency. Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

Sample unit of competency components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component.

Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

Unit Title Give formal presentations and take part in meetings (Communication)
Examples from this Training Package of Employability Skills

Unit Descriptor

This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. (Initiative and enterprise)

Element

Proactively resolve issues. (problem solving)

Performance Criteria

Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. (Planning and organising)

Range Statement

Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (technology)

Modify activities depending on differing workplace contexts, risk situations and environments. (Learning)

Required Skills and Knowledge

Work collaboratively with others during a fire emergency. (teamwork)

Instructions, procedures and other information relevant to the maintenance of vessel and port security. (Communication)

Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to:

- assess response options to identified crime-prevention needs and determine the optimal action to be implemented
- in consultation with relevant others, design an initiative to address identified issues. (Initiative and enterprise).

Employability Skills Summaries and units of competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

#### Element

*MTMP3105A Follow and implement an established work plan*: Element 2: Organise daily work activities

#### Performance Criteria

*MTMP2155B Despatch hide or skin*: Element 1.4 Occupational Health and Safety (OH&S) requirements are identified and met.

#### Range Statement

Communication skills may include:
- interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties
- speaking clearly and directly
- the use of communication technology
- own work and the wider work area
- reading and interpreting workplace documentation.

#### Required Skills and Knowledge

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.

#### Evidence Guide

Not applicable

### Competency Standards - Industry Contextualisation

Customisation of this Training Package may be achieved by:
- choosing appropriate electives from Units provided in this Training Package
- importing appropriate elective Units from other Training Packages or accredited courses, as allowed within the qualification requirements
- contextualising Units of Competency to better suit an enterprise or industry context.

Description

This qualification covers work activities undertaken by workers commencing entry-level work in smallgoods enterprises. It is appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- labourers requiring an induction.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior smallgoods skills or knowledge
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- MTM20211 Certificate II in Meat Processing (Smallgoods)
- MTM20411 Certificate II in Meat Processing (Food Services).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable
Employability Skills Summary

Description

This qualification covers work activities undertaken by workers commencing work in an abattoir. This qualification may be suitable for use in a pre-vocational or VET in Schools program. However, schools will need to take into consideration the substantial amount of on-the-job training required in this qualification, as well as the risks associated with work in an abattoir, including:

- Q-fever and other zoonotic diseases
- the use of knives
- the demanding physical nature of some positions
- proximity to machinery
- use of automatic machinery.

Job roles

Job role titles covered by this qualification may include:

- stockyard or lairage labourer
- slaughter floor labourer
- carcase trimmer
- packer
- offal room labourer
- tripe room labourer
- loadout operator
- skin shed labourer
- fellmongerer
- by-products labourer
- meat processing cleaner
- field harvester of wild game
- livestock handler in lairage.

Pathways Information

Pathways into the qualification
Pathways into the qualification may be:

- by direct entry without prior meat processing skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification, with credit for applicable units already successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM30111 Certificate III in Meat Processing (Boning Room)
- MTM30211 Certificate III in Meat Processing (Food Services)
• MTM30111 Certificate II in Meat Processing (Abattoirs)
• MTM30311 Certificate III in Meat Processing (Meat Safety)
• MTM30411 Certificate III in Meat Processing (Rendering)
• MTM30511 Certificate III in Meat Processing (Slaughtering)
• MTM30611 Certificate III in Meat Processing (General)
• MSL30109 Certificate III in Laboratory Skills.

Licensing/Regulatory Information

No occupational licensing, legislative, regulatory or certification requirements apply to this qualification.

Entry Requirements

Not Applicable
**Employability Skills Summary**

**EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>

</table>
Packaging Rules

Packaging Rules

- complete all six core units of competency
- complete a minimum of three elective units of competency, to a minimum value of twenty points.

Units with a value of up to fifteen points can be selected from a Certificate III in Meat Processing qualification in Slaughtering, Boning Room, Rendering, General or Meat Safety.

A maximum of four units can be selected from other Certificate II level qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to the identified job role and must not duplicate units already contained within the qualification. Units selected will be worth 2 points.

Description

This qualification covers work activities undertaken by workers undertaking work in smallgoods establishments. It is not appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program unless there is opportunity for a sustained period of work placement in a smallgoods enterprise. A substantial component of this qualification must be assessed on the job.

Job roles

Job role titles covered by this qualification may include:

- smallgoods labourer
- smallgoods operator.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- direct entry without prior work experience
- after completion of MTM10111 Certificate I in Meat Processing (Smallgoods)
- through Recognition of Prior Learning
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification, with credit for applicable units successfully completed
- MTM30911 Certificate III in Meat Processing (Smallgoods - General)
- MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture)
- MTM30211 Certificate III in Meat Processing (Food Services).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable
## Employability Skills Summary

**EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
</table>
| Communication            | • listening and carrying out instructions  
                          | • speaking clearly and directly with other personnel  
                          | • using mathematical skills related to areas such as time, weights and portion size                                            |
| Teamwork                 | • working effectively as an individual as well as in a work team  
                          | • working effectively with workers from another country  
                          | • applying own knowledge to assist other members of the work team                                                        |
| Problem solving          | • showing independence in identifying problems, such as malfunctioning equipment or OH&S issues                                |
| Initiative and enterprise| • adapting to new situations, such as changes to products or introduction of new equipment  
                          | • using numeracy skills to solve problems, such as modification of temperature settings                                      |
| Planning and organising  | • managing time and priorities, such as work times and meeting production schedules                                             |
| Self-management          | • monitoring and evaluating own performance to ensure team and production requirements are met efficiently  
                          | • taking responsibility for own work output                                                                               |
| Learning                 | • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes  
                          | • learning in a range of settings, such as through formal training or informally from other workers                         |
| Technology               | • using technology, such as workplace machinery  
                          | • applying OH&S requirements when using technology                                                                        |
Packaging Rules

Complete sixteen (16) units of competency in total.

- complete all five (5) core units of competency
- complete eleven (11) elective units of competency, made up of:
  - a minimum of three (3) units of competency from Group A
  - a minimum of six (6) units of competency from Group B.

Two additional elective units may be selected from Group A or B or any Certificate II qualification in this Training Package, or any other Training Package or accredited course. Units selected must be relevant to smallgoods processing and must not duplicate any unit already contained in the qualification.

Description
This qualification covers work activities undertaken by workers working in meat retailing enterprises. It is appropriate for inclusion as a VET in Schools program.

Job roles
Job role titles covered by this qualification may include:

- butcher shop sales assistant
- meat department worker
- assistant butcher
- meat wholesale worker
- boning room assistant.

Pathways Information
Pathways into the qualification
Pathways into the qualification may be:

- after completion of MTM10211 Certificate I in Meat Processing (Meat Retailing)
- by direct entry without prior meat retailing skills or knowledge
- through Recognition of Prior Learning
- through a meat retailing school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification with credit for applicable units successfully completed
- MTM30813 Certificate III in Meat Processing (Retail Butcher) with some credit for applicable completed Units
- MTM30211 Certificate III in Meat Processing (Food Services)
- MTM30611 Certificate III in Meat Processing (General)
- MTM30111 Certificate III in Meat Processing (Boning Room).

Licensing/Regulatory Information
Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Not Applicable
# Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
</table>
| Communication            | • listening and carrying out instructions  
• speaking clearly and directly with other personnel and customers  
• reading and interpreting workplace-related documentation, such as customer orders and recipes  
• using mathematical skills in areas such as time, weights and portion size and tender  
• sharing information with other workers, for example, customer requests                                                                                                                                 |
| Teamwork                 | • working effectively as an individual as well as in a work team  
• working effectively with workers and customers from another country  
• applying own knowledge to assist other members of the work team                                                                                                                                 |
| Problem solving          | • developing practical and creative solutions to workplace problems, for example, suggesting substitutions for unavailable ingredients  
• showing independence in identifying problems, such as malfunctioning equipment or OH&S issues  
• using numeracy skills to solve problems, for example, adjusting temperatures or recalculation of quantities                                                                                                                                 |
| Initiative and enterprise| • adapting to new situations, such as introduction of new products or equipment  
• using numeracy skills to solve problems, such as modification of portion sizes  
• translating ideas into action by demonstrating suggestions                                                                                                                                 |
| Planning and organising  | • collecting, analysing and organising information, such as customer orders and product specifications  
• using basic business systems for planning and organising, for example, work instructions or Standard Operating Procedures  
• participating in ongoing continuous improvement and planning                                                                                                                                 |

Description

This qualification covers work activities undertaken by workers commencing work in meat enterprises which undertake specialised services, such as preparing specialty meat cuts, gourmet meat, bulk value-added products, and providing meat preparation customer service.

The MTM20411 Certificate II in Meat Processing (Food Services) is a highly flexible qualification enabling selections to be made from a wide range of units.

This qualification may be suitable for inclusion as a VET in Schools program, but careful attention must be given to ensuring appropriate work placement opportunities are available for the selected units.

Job roles

Job role titles covered by this qualification may include:

- meat wholesale preparation worker
- meat department customer service worker
- meat wholesale packer/wrapper
- meat wholesale packer/slicer
- butcher shop customer service worker
- delicatessen assistant
- value-adding worker in a boning room
- workers in single species retail outlets
- workers undertaking shelf-ready preparation of meat products
- 'meals ready-to-eat' preparers
- portion control slicer and packer.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior industry skills or knowledge
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM30111 Certificate III in Meat Processing (Boning Room)
- MTM30211 Certificate III in Meat Processing (Food Services)
- MTM30511 Certificate III in Meat Processing (Slaughtering)
- MTM30611 Certificate III in Meat Processing (General)
- MTM30813 Certificate III in Meat Processing (Retail Butcher)
- MTM30911 Certificate III in Meat Processing (Smallgoods - General)
- MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture)
Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

## Packaging Rules

**Packaging Rules**
Complete fourteen units of competency in total.

- complete all six core units of competency
- complete eight elective units of competency.

The eight elective units can be selected from a Certificate I and/or Certificate II from the Abattoirs, Smallgoods, Meat Retailing and/or Food Processing sectors.

Units selected from the Abattoirs sector must be worth 2 or more points (if a 1-point unit is selected, then an additional unit must be selected to make up the 2 points).

Up to two units can be selected from another Training Package or accredited course. Units selected must be relevant to the identified job role and must not replicate units already selected.

Description
This qualification covers work activities undertaken by workers in boning rooms or in meat wholesale enterprises which prepare meat cuts from whole carcases. It is not appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles
Job role titles covered by this qualification may include:

- boner
- slicer
- bandsaw operator.

Pathways Information

Pathways into the qualification
Pathways into the qualification may be:

- by direct entry without prior meat industry skills or knowledge
- after completion of a Certificate I or II Meat Processing qualification
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).

Description

This qualification covers work activities undertaken by workers in meat enterprises which undertake specialised services, such as preparing specialty meat cuts, gourmet meat, bulk value-added products, providing meat preparation customer service, and so on.

The MTM30211 Certificate III in Meat Processing (Food Services) is a highly flexible qualification enabling selections to be made from a wide range of units.

This qualification is not suitable for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- further processing packer/team leader
- co-products experienced workers/team leader
- supermarket deli manager
- meat processing production machinery operator
- specialised boning operator.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of a Certificate II in Meat Processing qualification
- by Recognition of Prior Learning
- by direct entry without prior meat industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40211 Certificate IV in Meat Processing (Meat Safety)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Not Applicable
### Employability Skills Summary

#### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Packaging Rules

Packaging Rules
Complete twelve units of competency in total.

- complete all six core units of competency
- complete six elective units of competency.

The six elective units can be selected from a Certificate III qualification from the Abattoirs, Smallgoods, Meat Retailing and/or Food Processing sectors.

Units selected from the Abattoirs sector must be worth four or more points. If units of fewer than four points are selected, then additional units can be added to make up the points value.

Two units can be selected from another Training Package or accredited course. The units selected must be relevant to the identified job role and must not replicate units already selected.

Description

This qualification covers work activities undertaken by meat inspectors in meat processing enterprises. The MTM30311 Certificate III in Meat Processing (Meat Safety) is most commonly undertaken by meat inspectors in domestic processing enterprises. However, at the time of endorsement of this Training Package legislation and regulatory requirements relating to meat inspection were undergoing considerable change at both state/territory and federal level. People seeking registration as a meat inspector should check the current requirements with their state or territory food authority or the Australian Quarantine Inspection Service (AQIS), as appropriate.

This qualification is not appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles
Job role titles covered by this qualification may include:
- meat inspector.

Pathways Information

Pathways into the qualification
Pathways into the qualification may be:
- after completion of a Certificate I or II Meat Processing qualification
- through Recognition of Prior Learning
- by direct entry without prior meat industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:
- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40211 Certificate IV in Meat Processing (Meat Safety)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
Depending on the jurisdiction, Meat Inspectors must be registered with the relevant controlling authority (e.g. PrimeSafe (Victoria) or AQIS for export plants).

Entry Requirements
Not Applicable

of NVDs and PICs for NLIS for sheep and goats
- MTMP3122A Undertake pre slaughter checks of NVDs, PICs and RFID
Description
This qualification covers work activities undertaken by workers in meat processing plants who are working in the areas of Quality Assurance or the laboratory.

Job roles
Job role titles covered by this qualification may include:
- Quality Assurance officer
- Meat processing laboratory assistant
- Game harvester
- Game depot manager
- Pre-dressing game inspector
- Supervisor and leading hand
- On-floor trainer.

Pathways Information
Pathways into the qualification
Pathways into the qualification may be:
- after completion of a Certificate I or II Meat Processing qualification
- through Recognition of Prior Learning
- by direct entry without prior industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:
- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- MSL30109 Certificate III in Laboratory Skills
- approved Skill Sets to gain expertise in specific skilled job roles, for example, the Meat Industry Microbiological Skill Set
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).

Licensing/Regulatory Information
Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Not Applicable
### Employability Skills Summary

#### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
</table>
| Communication                       | • listening and carrying out instructions  
• speaking clearly and directly with other personnel  
• reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures and workplace memorandums  
• interpreting customer needs, for example, product specifications  
• using mathematical skills, such as time, weights and temperature  
• sharing information with other workers, especially during changeover processes |
| Teamwork                            | • working effectively as an individual as well as in a work team  
• working effectively with workers from another country  
• applying own knowledge to assist other members of the work team |
| Problem solving                     | • developing practical solutions to workplace problems, such as OH&S issues  
• solving problems, either individually or in teams, for example, reporting malfunctioning equipment, to ensure that the problem is appropriately addressed  
• using numeracy skills to solve problems, for example, adjusting temperatures |
| Initiative and enterprise            | • adapting to new situations, such as change of species or introduction of new equipment  
• identifying opportunities that might not be obvious to others, for example, making changes to allocation of work tasks to speed up production |
| Planning and organising             | • collecting, analysing and organising information, such as work instructions or Standard Operating Procedures  
• using basic business systems for planning and organising, for |
**EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**

| Self-management | Example, production schedules and customer specifications  
|                 | - managing time and priorities, such as work times and production schedules  
|                 | - monitoring and evaluating own performance to ensure team and production requirements are met efficiently  
|                 | - taking responsibility for own work output  
| Learning        | - learning in a range of settings, such as through formal training or informally from other workers  
|                 | - learning new skills and techniques to adjust to production or equipment changes  
| Technology      | - using technology, such as workplace machinery  
|                 | - demonstrating skilled use of workplace technology, such as knives  
|                 | - applying OH&S requirements when using technology |
Packaging Rules

• complete all six core units of competency
• complete a minimum of two elective units of competency to a minimum value of thirty points.

Up to three units may be substituted with units selected from another Certificate III or IV qualification in this Training Package, or another Training Package or accredited course. The selected units must be relevant to the nominated meat processing job and must not duplicate units already contained in the qualification. Units selected will be worth 2 points.

Description
This qualification is the trade qualification for butchers.

Job roles
Job role titles covered by this qualification may include:
• butcher.

Pathways Information

Pathways into the qualification
Pathways into the qualification may be:
• after completion of a Certificate I or II Meat Processing qualification, with credit for relevant completed units
• after completion of a pre-apprenticeship program
• through Recognition of Prior Learning
• by direct entry without prior industry skills or knowledge

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:
• any other Certificate III in Meat Processing qualification, with credit for applicable units successfully completed
• MTM40111 Certificate IV in Meat Processing (Leadership)
• MTM40311 Certificate IV in Meat Processing (Quality Assurance)
• MTM40411 Certificate IV in Meat Processing (General)
• small business management qualifications

Licensing/Regulatory Information
No occupational licensing, legislative, regulatory or certification requirements apply to this qualification.
Entry Requirements

Not Applicable
### Employability Skills Summary

#### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• listening and carrying out instructions</td>
</tr>
<tr>
<td></td>
<td>• speaking clearly and directly with other personnel and</td>
</tr>
<tr>
<td></td>
<td>customers</td>
</tr>
<tr>
<td></td>
<td>• reading and interpreting workplace-related documentation,</td>
</tr>
<tr>
<td></td>
<td>such as customer orders and recipes</td>
</tr>
<tr>
<td></td>
<td>• writing, such as recording customer orders</td>
</tr>
<tr>
<td></td>
<td>• using mathematical skills in areas such as time, weights,</td>
</tr>
<tr>
<td></td>
<td>portion size and tender</td>
</tr>
<tr>
<td></td>
<td>• sharing information with other workers, for example,</td>
</tr>
<tr>
<td></td>
<td>customer requests</td>
</tr>
<tr>
<td></td>
<td>• using negotiation, empathy, persuasion and assertiveness</td>
</tr>
<tr>
<td></td>
<td>skills to interact with customers</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• working effectively as an individual as well as in a work</td>
</tr>
<tr>
<td></td>
<td>team</td>
</tr>
<tr>
<td></td>
<td>• working effectively with workers or customers from another</td>
</tr>
<tr>
<td></td>
<td>country</td>
</tr>
<tr>
<td></td>
<td>• applying own knowledge to assist other members of the work</td>
</tr>
<tr>
<td></td>
<td>team</td>
</tr>
<tr>
<td></td>
<td>• identifying and utilising the strengths of other team members,</td>
</tr>
<tr>
<td></td>
<td>such as specialised product knowledge</td>
</tr>
<tr>
<td></td>
<td>• providing coaching and mentoring support to new or junior</td>
</tr>
<tr>
<td></td>
<td>workers</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• developing practical and creative solutions to workplace</td>
</tr>
<tr>
<td></td>
<td>problems, for example, suggesting substitutions for</td>
</tr>
<tr>
<td></td>
<td>unavailable ingredients</td>
</tr>
<tr>
<td></td>
<td>• showing independence in identifying problems, such as</td>
</tr>
<tr>
<td></td>
<td>malfunctioning equipment or OH&amp;S issues</td>
</tr>
<tr>
<td></td>
<td>• solving problems individually or in teams</td>
</tr>
<tr>
<td></td>
<td>• suggesting a range of solutions to solve problems, for</td>
</tr>
<tr>
<td></td>
<td>example, recommending alternative products to customers to</td>
</tr>
<tr>
<td></td>
<td>reduce oversupply</td>
</tr>
<tr>
<td></td>
<td>• using numeracy skills to solve problems, for example,</td>
</tr>
<tr>
<td></td>
<td>adjusting temperatures or recommending cooking times</td>
</tr>
<tr>
<td>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</td>
<td></td>
</tr>
<tr>
<td>------------------------------------------</td>
<td></td>
</tr>
<tr>
<td><strong>Initiative and enterprise</strong></td>
<td></td>
</tr>
<tr>
<td>- testing assumptions, for example, experimenting with new ingredients, or testing new product lines</td>
<td></td>
</tr>
<tr>
<td>- resolving customer concerns, such as complaints about poor product</td>
<td></td>
</tr>
<tr>
<td>- adapting to new situations, such as introduction of new products or equipment</td>
<td></td>
</tr>
<tr>
<td>- using numeracy skills to solve problems, such as modification of portion sizes</td>
<td></td>
</tr>
<tr>
<td>- translating ideas into action by demonstrating suggestions</td>
<td></td>
</tr>
<tr>
<td>- initiating and developing innovative solutions, for example, customer reward programs or product specials</td>
<td></td>
</tr>
<tr>
<td><strong>Planning and organising</strong></td>
<td></td>
</tr>
<tr>
<td>- collecting, analysing and organising information, such as customer orders and product specifications</td>
<td></td>
</tr>
<tr>
<td>- using basic business systems for planning and organising, for example, work instructions, or Standard Operating Procedures</td>
<td></td>
</tr>
<tr>
<td>- participating in ongoing continuous improvement and planning processes, such as Quality Assurance processes</td>
<td></td>
</tr>
<tr>
<td>- determining or applying required resources, such as stock requirements</td>
<td></td>
</tr>
<tr>
<td>- managing time and priorities, such as work times and production schedules</td>
<td></td>
</tr>
<tr>
<td>- adapting resource allocations to cope with contingencies, for example, adjusting packaging to deal with different sized product or reducing stock orders for short weeks</td>
<td></td>
</tr>
<tr>
<td><strong>Self-management</strong></td>
<td></td>
</tr>
<tr>
<td>- monitoring and evaluating own performance to ensure team and production requirements are met efficiently</td>
<td></td>
</tr>
<tr>
<td>- taking responsibility for own work output</td>
<td></td>
</tr>
<tr>
<td><strong>Learning</strong></td>
<td></td>
</tr>
<tr>
<td>- being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes</td>
<td></td>
</tr>
<tr>
<td>- learning in a range of settings, such as through formal training or informally from other workers</td>
<td></td>
</tr>
<tr>
<td>- managing own learning, for example, undertaking self-directed research to identify a new recipe or product</td>
<td></td>
</tr>
<tr>
<td>- contributing to the learning of others, for example, explaining work processes to new workers</td>
<td></td>
</tr>
<tr>
<td><strong>Technology</strong></td>
<td></td>
</tr>
<tr>
<td>- using technology, such as point of sale technology</td>
<td></td>
</tr>
<tr>
<td>- demonstrating skill when using workplace technology, such as knives, bandsaws and mincers</td>
<td></td>
</tr>
<tr>
<td>- applying OH&amp;S requirements when using technology</td>
<td></td>
</tr>

Description
This qualification covers work activities undertaken by smallgoods producers working in larger, factory-type smallgoods enterprises. Factories will often have specialised lines of production, (for example, hams and bacons) and use complex production machinery, and may not encompass the range of smallgoods production techniques found in traditional smallgoods enterprises.

This qualification is not appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles
Job role titles covered by this qualification may include:
- smallgoods operator
- slicing and packaging operator
- slicer
- product formulation operator.

Pathways Information
Pathways into the qualification
Pathways into the qualification may be:
- by direct entry without prior work experience
- after completion of the Certificate I and II in Meat Processing (Smallgoods) qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:
- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).

Licensing/Regulatory Information
Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Not Applicable
**Employability Skills Summary**

**EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>

© Commonwealth of Australia, 2015  
AgriFood Skills Australia
Description

This qualification covers work activities undertaken by smallgoods producers working in a small to medium-sized traditional smallgoods enterprise which produces a range of smallgoods products.

It is not appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:
- smallgoods producer
- smallgoods maker.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:
- after completion of the Certificate I and II in Meat Processing (Smallgoods) qualifications
- by direct entry without prior smallgoods skills or knowledge
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:
- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable
## Employability Skills Summary

### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
</table>
| Communication             | • listening and carrying out instructions  
• speaking clearly and directly with other personnel  
• reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures and workplace memorandums  
• interpreting customer needs, for example, product specifications  
• using mathematical skills in areas such as time, weights and temperature |
| Teamwork                  | • working effectively as an individual as well as in a work team  
• working effectively with workers from another country  
• applying own knowledge to assist other members of the work team |
| Problem solving           | • showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction  
• solving problems, either individually or in teams, for example, reporting malfunctioning equipment to ensure that the problem is appropriately addressed  
• using numeracy skills to solve problems, for example, adjusting smoke room temperatures |
| Initiative and enterprise | • adapting to new situations, such as introduction of new product or equipment |
| Planning and organisning  | • collecting, analysing and organising information, such as work instructions or Standard Operating Procedures  
• using basic business systems for planning and organising, for example, customer specifications  
• taking initiative and making decisions within workplace role, for example, recommending alternative or additional product to customers  
• managing time and priorities, such as work times and delivery |

| Self-management      | • monitoring and evaluating own performance to ensure team and production requirements are met efficiently  
|                      | • taking responsibility for own work output                                               |
| Learning             | • learning in a range of settings, such as through formal training or informally from other workers  
|                      | • learning new skills and techniques to adjust to product or equipment changes             |
| Technology           | • using technology, such as workplace machinery                                             
|                      | • demonstrating skilled use of workplace technology, for example, bowl cutter              
|                      | • applying OH&S requirements when using technology                                          |

Packaging Rules

Packaging Rules
Complete twenty-six units of competency in total.

- complete all five core units of competency
- complete a minimum of two units from Group A
- complete a minimum of seven units from Group B
- complete a minimum of seven units from Group C
- complete at least one unit from Group D.

Up to four elective units may be selected from any Certificate II or III qualification in this Training Package, or any other Training Package or accredited course. Units selected must be relevant to smallgoods processing and must not duplicate any unit already contained in the qualification.

Description
This qualification covers work activities undertaken by experienced meat workers who are carrying out supervisory roles.

Job roles
Job role titles covered by this qualification may include:
- meat processing supervisor
- meat processing team leader
- smallgoods supervisor
- boning room supervisor
- meat department supervisor
- meat processing assessor.

Pathways Information

Pathways into the qualification
Pathways into the qualification may be:
- after successful completion of any Certificate II or III Meat Processing qualification
- by direct entry with industry experience but without prior qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:
- approved Skill Sets to gain expertise in specific skilled job roles
- any other Meat Processing qualification at level IV, with credit for applicable units successfully completed
- MTM50111 Diploma of Meat Processing
- MTM50211 Diploma of Meat Processing (Meat Retailing).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Not Applicable
## Employability Skills Summary

### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Description
This qualification covers work activities undertaken by meat inspectors in meat processing enterprises, usually at export processing plants. At the time of endorsement of this Training Package legislation and regulatory requirements relating to meat inspection were undergoing considerable change at both state/territory and federal level. People seeking registration as a meat inspector should check the current requirements with their state or territory food authority or the Australian Quarantine Inspection Service (AQIS), as appropriate.

Job roles
Job role titles covered by this qualification may include:

- meat inspector.

Pathways Information

Pathways into the qualification
Pathways into the qualification may be:

- after successful completion of MTM30307 or MTM30311 Certificate III in Meat Processing (Meat Safety)
- by direct entry without prior meat processing skills or knowledge
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification
After achieving this qualification, candidates may undertake:

- any other Meat Processing qualification at Level IV, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM50111 Diploma of Meat Processing
- MTM5211 Diploma of Meat Processing (Meat Retailing).

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
Depending on the jurisdiction, Meat Inspectors must be registered with the relevant controlling authority (e.g. PrimeSafe (Victoria) or AQIS for export plants)

Entry Requirements

Not Applicable
# Employability Skills Summary

## EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• listening and interpreting worker issues or management concerns&lt;br&gt;• speaking clearly and directly with other personnel, such as workers, management and customers&lt;br&gt;• reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures, Australian Standards and AQIS directives&lt;br&gt;• preparing written documentation, such as reports&lt;br&gt;• using mathematical skills, such as graphing, calculation and prediction&lt;br&gt;• sharing information with managers and regulatory authorities&lt;br&gt;• applying negotiation, persuasion and assertiveness skills when addressing food safety issues</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• working effectively as an individual as well as in a work team&lt;br&gt;• working effectively with workers from another country&lt;br&gt;• applying own food safety knowledge to assist other members of the work team&lt;br&gt;• using teamwork skills in a range of situations, such as when addressing food safety issues</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• developing practical and creative solutions to workplace problems, such as food safety issues&lt;br&gt;• showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction or implement corrective action&lt;br&gt;• using numeracy skills, such as calculation, prediction and graphing, to resolve problems&lt;br&gt;• resolving concerns raised by external groups, such as customers or regulatory authorities</td>
</tr>
<tr>
<td><strong>Initiative and enterprise</strong></td>
<td>• adapting to new situations, such as changes to processes or introduction of new equipment&lt;br&gt;• translating ideas into action, for example contributing to the revision of a work instruction or Standard Operating Procedure</td>
</tr>
</tbody>
</table>
EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

Description
This qualification covers work activities undertaken by Quality Assurance officers in abattoirs and smallgoods production enterprises.

Job roles
Job role titles covered by this qualification may include:
- Quality Assurance officer
- Quality Assurance supervisor
- Quality Assurance auditor
- Quality Assurance manager
- compliance manager.

Pathways Information
Pathways into the qualification
Pathways into the qualification may be:
- after completion of a Certificate II or III in Meat Processing
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Licensing/Regulatory Information
Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Entry requirements
The following units must be completed prior to commencing this qualification:
- MTMCOR201A Maintain personal equipment
- MTMCOR204A Follow safe work policies and procedures
- MTMCOR202A Apply hygiene and sanitation practices
- MTMCOR205A Communicate in the workplace
- MTMCOR203B Comply with Quality Assurance and HACCP requirements
- MTMCOR206A Overview the meat industry

In addition, the trainee must have completed a minimum of twelve months relevant employment in a meat processing plant, or hold an appropriate qualification which provides background understanding of a Quality Assurance system.

Pathways from the qualification
After achieving this qualification, candidates may undertake:
- any other Meat Processing qualification at Level IV, with credit for applicable units successfully completed
• approved Skill Sets to gain expertise in specific skilled job roles, for example, the Meat Industry Microbiological Skill Set
• TAE40110 Certificate IV in Training and Assessment
• MTM50111 Diploma of Meat Processing
• MTM50211 Diploma of Meat Processing (Meat Retailing)
## Employability Skills Summary

### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

<table>

Description

This qualification covers work activities undertaken by workers at supervisory or post-trade level in the meat industry. It is designed to enable candidates to select a mix of technical and leadership units to suit their job roles and career requirements. This qualification is also designed to enable candidates to gain cross-sectoral experience in the meat industry.

Job roles

Job role titles covered by this qualification may include:

- meat retailing supervisor
- smallgoods production supervisor
- meat processing production supervisor
- responsible UCFM officer
- meat processing assessor
- lairage supervisor
- rendering supervisor.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry with industry experience but without formal qualifications
- after completion of a trade qualification
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Meat Processing qualification at level IV, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM50111 Diploma of Meat Processing
- MTM50211 Diploma of Meat Processing (Meat Retailing)
- TAE40110 Certificate IV in Training and Assessment.

Licensing/Regulatory Information

 Licensing, legislative, regulatory or certification considerations

People working as industry assessors must address Australian Quality Training Framework (AQTF) requirements.

Entry Requirements

Not Applicable
### Employability Skills Summary

**EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

                            • showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction  
                            • working with a team to resolve a problem, for example, a production issue  
                            • using numeracy skills, such as graphing and charting, to resolve problems |
| **Initiative and enterprise** | • adapting to new situations, such as changes to customer specifications or introduction of new equipment  
                            • translating ideas into action, for example, revising a work instruction or Standard Operating Procedure |
## EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

**Planning and organising**
- identifying opportunities that might not be obvious to others, for example, a change of supplier to achieve cost savings or a change in processes to achieve better productivity
- collecting, analysing and organising information, such as HACCP reports
- using basic business processes for planning and organising, for example, production schedules
- taking initiative and making decisions within workplace role, for example, setting production levels
- managing time and priorities, such as meeting report deadlines and timely implementation of corrective actions
- participating in continuous improvement and planning processes, for example, Quality Assurance

**Self-management**
- having and articulating own ideas and vision, for example, when contributing to company business planning processes
- monitoring and evaluating own performance to ensure company production requirements are met efficiently
- taking responsibility for work output within area of responsibility

**Learning**
- being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes
- learning in a range of settings, such as through formal training or informally from other workers
- learning new skills and techniques to adjust to production or equipment changes
- managing own learning to ensure currency, for example, by attending technical workshops or through internet research
- applying a range of learning approaches appropriate to individual and situational requirements

**Technology**
- using technology, such as workplace machinery, computers and testing equipment
- demonstrating skilled use of workplace technology
- applying OH&S requirements when using technology
- adapting to new technology requirements, such as new software
- applying technology as a management tool, for example, running production reports and using spreadsheets

---

### Packaging Rules

Packaging Rules
Complete eighteen units of competency in total.

- complete all ten core units of competency
- complete eight elective units of competency. At least one elective unit must be selected from Group A and one from at least one other Group.

Up to three of the eight technical units can be selected from a Certificate IV or Diploma from this or any other Training Package. Selected units must be relevant to the identified meat processing job and must not duplicate units already contained within the qualification.

**Qualification structure**

MTM50111 Diploma of Meat Processing

Modification History
Not Applicable
Description

The qualification is for people who are in a management position or who have the potential to move into these positions. People who enter this qualification will usually have substantial experience in a meat industry sector, and will be seeking to improve their business expertise and experience.

People who are considering undertaking this qualification need to be aware that it requires extensive reading, writing of assignments and project work. Previous study at a minimum of Certificate IV level is good preparation for Diploma level study.

The Diploma qualification is designed for people who are already employed in the industry and who have the opportunity to draw upon workplace experiences and to carry out assignments and projects in the workplace.

Job roles

Job role titles covered by this qualification may include:

- production manager
- maintenance manager
- Quality Assurance manager
- foreperson
- shift manager
- departmental manager
- regulator
- senior supervisor.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- completion of a Certificate III or IV in Meat Processing
- completion of a trade qualification
- completion of a Bachelor degree
- by direct entry with industry experience but without formal qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- MTM60111 Advanced Diploma of Meat Processing
- any other Diploma or Advanced Diploma qualification in a related industry area
- a Bachelor degree.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

**Entry Requirements**

Not Applicable
Employability Skills Summary

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Description

The qualification is for people who are in a management position and who seek to move into senior positions within their own enterprise or in related industry originations. People who enter this qualification will usually have substantial experience in a meat industry sector, and will be seeking to improve their business expertise and experience, and broader knowledge and understanding of the industry.

People who are considering undertaking this qualification need to be aware that it requires extensive reading, research capability, writing of assignments and project work.

The MTM60111 Advanced Diploma of Meat Processing is designed for people who are already employed in the industry and who have the opportunity to draw upon workplace experiences and to carry out assignments and projects in the workplace.

Job roles

Job role titles covered by this qualification may include:

- plant manager
- project officer
- peak organisation representative.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- completion of a Diploma of Meat Processing
- completion of a Bachelor degree
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Diploma or Advanced Diploma qualification in a related industry area
- a Graduate Certificate/Diploma in Agribusiness
- a post-graduate qualification.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Entry requirements

The following units must be completed prior to commencement of this qualification:
- MTMCOR403A Participate in OH&S risk control process
- MTMCOR401C Manage own work performance
- MTMCOR404A Facilitate hygiene and sanitation performance
- MTMCOR402C Facilitate Quality Assurance process

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

| Self-management | • having and articulating own ideas and vision, for example, when undertaking company business planning processes  
|                 | • monitoring and evaluating own performance to ensure company requirements are addressed  
|                 | • taking responsibility for work outcomes of self and others within area of responsibility  |

| Learning | • being receptive to learning new ideas and techniques, such as changed legislation, food safety measures or product specifications  
|         | • learning in a range of settings, such as through formal training, independent research or informally from colleagues  
|         | • learning new skills and techniques to adjust to industry or customer changes  
|         | • managing own learning to ensure currency, for example, by attending technical workshops or through internet research  
|         | • applying a range of learning approaches appropriate to individual and situational requirements  
|         | • contributing to the learning of others through support of professional development and informal learning processes  |

| Technology | • using technology, such as computers, software packages and testing equipment  
|            | • demonstrating skilled use of workplace technology  
|            | • applying OH&S requirements when using technology  
|            | • adapting to new technology requirements, such as new software  
|            | • applying technology as a management tool, for example, running production reports or using spreadsheets  |

Packaging Rules

Packaging Rules
Complete a total of ten units of competency.

- a minimum of five units must be selected from Group A
- a minimum of three units must be selected from Group B.

Two of the elective units can be selected from a relevant Diploma or Advanced Diploma from this Training Package or any other Training Package or accredited course. Selected units must be relevant to the meat industry and must not duplicate units already contained within the qualification.

Description
This qualification provides a general vocational outcome in agribusiness. It reflects the role of individuals who apply substantial specialised knowledge and skills to the managerial role in an organisation or business area. In these roles they make significant high-level independent judgements in major planning, research, design, operational, compliance and management functions within highly varied or specialised agribusiness contexts.

The agrifood industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context.

Job roles
Occupational titles may include:

- senior manager
- export/marketing manager
- research and development manager
- processing systems manager
- compliance and systems manager.

Pathways Information

Pathways into the qualification
Candidates may enter the qualification through a number of entry points which demonstrate their potential to undertake study at graduate level, including:

- an Advanced Diploma or Diploma qualification relevant to an agrifood industry
- relevant extensive vocational experience in middle management in an agrifood industry at a skill level commensurate with the AQF level VI attributes and criteria
- higher education qualification (e.g. Bachelor Degree), with relevant vocational experience in an agrifood industry.

This qualification is suited to Australian Apprenticeship pathways

Pathways from the qualification
After achieving this qualification, candidates may undertake:

- a Graduate Diploma of Agribusiness
- a post-graduate qualification.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
Units of competency in this qualification do not require a licence or certification.

Entry Requirements
Not Applicable

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

- preparing and lodging reports in accordance with organisational and business requirements
- setting business targets and identifying resource requirements
- establishing information management systems, and business policies and procedures
- developing and implementing business strategies
- reviewing business performance

Self-management

- developing and substantiating own views and ideas
- providing leadership in OH&S practice, ethical standards, legislative requirements and governance
- reviewing own personal and professional competence against personal development objectives
- supporting and using participative arrangements aimed at establishing trust

Learning

- reflecting upon and evaluating personal leadership style, and personal and professional competence
- identifying and applying multiple perspectives and interpretations, and appropriate protocols and language in culturally diverse contexts
- contributing to the learning of others in the organisation

Technology

- analysing and implementing technological and system requirements
- applying foundation skills in using standard desktop applications
- reviewing and implementing improved electronic business systems and networks within the organisation
- using technology, including the internet, to access current legislative and regulatory requirements, codes of practice and industry guidelines
- applying business management and project management software and tools
- using communication and information technology to record, monitor and analyse data
- conducting online research to obtain information about market opportunities

Packaging Rules

Packaging Rules
Complete four elective units of competency, made up of:
- three units of competency from Group A (business leadership stream)
- one unit of competency from either Group A, not previously selected, or Group B (technical stream), or from a relevant Vocational Graduate Certificate or Diploma from this Training Package or any other Training Package or accredited course. The selected unit must not duplicate units already contained within the qualification.

<td>Oversee humane handling of animals</td>
</tr>
</tbody>
</table>

Target Group

Typically the Animal Welfare Officer is a company employee who manages the company's animal welfare team and therefore is able to:

- understand and articulate the regulatory and technical issues associated with animal welfare
- represent the company with regard to the approach taken to address animal welfare issues
- influence company policies, procedures, training regimes, Key Performance Indicators (KPIs) and Quality Assurance (QA) documentation as they relate to procedures impacting on animal welfare
- review, as part of their duties, the results of the routine monitoring of procedures impacting on animal welfare
- review the results of internal and external audits to assess the performance of the company in relation to animal welfare
- oversee the implementation of corrective actions and preventative measures
- monitor the effectiveness of corrective actions and preventative measures
- implement animal welfare assessment criteria and perform an abattoir animal welfare assessment
- recognise operative training needs and implement training for animal handlers

Suggested words for Statement of Attainment

This Skill Set from the MTM11 Australian Meat Industry Training Package meets the industry requirements for managing animal welfare.

MTMBUS701A Manage financial performance

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to manage financial performance in an organisation or business unit. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Leaders in agri-business are typically required to forecast future financial resource needs, analyse current asset performance and capacity to a standard expected in a commercial environment, and to set business targets. There will be a requirement to manage compliance mechanisms, to manage financial risk within agreed plans and mechanisms, and to monitor compliance with financial projections. This unit will have specific relevance for leaders or managers working in a competitive commercial environment. |

</thead>
</table>
| 1. Forecast future financial resource needs | 1.1. The capacity of existing financial systems is established and assessed.  
1.2. Financial data and business system requirements are forecasted.  
1.3. Forecasted requirements are analysed.  
1.4. Budget forecasts are prepared and planned according to organisational and statutory requirements.  
1.5. Recommendations for budget expenditure or for modification of existing projections are prepared and presented. |
| 2. Analyse current asset performance and capacity | 2.1. The costs of, and returns from, assets and liabilities are analysed using standard accounting reports identifying the extent of the debt and equity financing.  
2.2. Management responsibilities and legal requirements for reporting are identified in consultation with relevant organisational staff.  
2.3. Financial reports and key information are analysed and interpreted.  
2.4. The effects of financial decisions on the ability of the organisation to meet planned outcomes in relation to a specific activity or specified timeframe are analysed and evaluated. |
| 3. Set business targets and compliance mechanisms | 3.1. Comparative and trend information is collected and needs for future budget and associated resources confirmed.  
3.2. Consultation on relevant short-term and long-term needs is completed.  
3.3. Resources are allocated against the budget to maximise organisation's performance.  
3.4. Accurate and up-to-date records of resource allocation and usage are maintained according to organisational requirements.  
3.5. Management systems which enable timely collection, management and processing of information are developed and reviewed.  
3.6. Records of budget performance and expenditure are completed and accurately reported according to organisational procedures and statutory requirements.  
3.7. Budget audit mechanisms and compliance requirements are evaluated and improved, as |
### ELEMENT | PERFORMANCE CRITERIA
--- | ---
4. Manage financial risk | 4.1. Financial risk factors are identified and analysed.  
4.2. Financial risks are documented and managed according to organisational policies and procedures.  
4.3. Procedures are implemented to review financial risk management activities regularly.  
5. Monitor compliance with financial projections | 5.1. Deviations from budgets that generate an adverse affect on budget objectives are identified.  
5.2. Action plans to remedy significant deviations from budget objectives and projections are promptly developed.  
5.3. Financial documentation is monitored and reviewed against organisational objectives.  
5.4. Budget priorities are revised and renewed to meet operational contingencies and risk management.  
5.5. Costs to targets set in the budget are managed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- identify and analyse potential risks of any type
- identify financial information and to follow relevant accounting procedures
- apply decision making skills
- use interpersonal skills to:
  - maintain appropriate relationships with colleagues
  - establish trust
  - value and be open to, the opinions of others
  - work as part of a team
  - listening actively
- negotiate effectively
- timetable and schedule reports and lodgements
- use problem-solving, initiative and enterprise skills to prepare budgets and to
REQUIRED SKILLS AND KNOWLEDGE

- monitor their implementation
- use research skills to identify asset management valuations
- apply applicable professional standards
- manage risk

Required knowledge

Knowledge of:

- accounting, financial statements and cash flow
- communication processes and methods
- compliance requirements
- cost of capital, capital structure and working capital
- finance and investment decisions
- goal of financial resource management
- legislation, codes and by-laws relevant to the organisation's operations
- principles of finance management
- relevant legislation
- risk and return
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- preparing a financial resource plan/budget
- monitoring and managing financial resources over a full planning cycle
- effectively communicating financial reports and operational execution
- making adjustments to changing circumstances and responding to unusual situations
- knowledge of relevant legislation.

### Context of and specific resources for assessment

Assessment must ensure:

- access to workplace contractual and procurement documentation
- competence is consistently demonstrated over time, and over a range and variety of situations
- access to appropriate documentation and resources normally used in the workplace
- access to an appropriate operating environment.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- completion of applied projects or learning activities, such as budget preparation, analysis and reporting, preparation of financial forecasts, and review and analysis of costs
- direct observation of contextual application of skills
- oral or written questioning to assess knowledge of risk and return
- review of documentation displaying compliance with professional and regulatory standards for financial management.

### Guidance information for

Holistic assessment with other units relevant to the
EVIDENCE GUIDE

| assessment | industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Systems** are defined as:
- a detailed description.depiction of how organisations relate to their environments and how they process information through strategic and tactical management to develop actual operating procedures
- electronic financial management systems used by the organisation.

**Financial data** may include:
- Australian Bureau of Statistics (ABS) economic data
- balance sheet
- benchmarks or trend analysis
- budget variances
- budgets and forecasts
- cash flow/profit reports
- financial/operational statements and reports (e.g. expenditures and receipts, and profit and loss statements)
- financial markets monitoring services (e.g. Reuters)
- income statements
- market valuations.

**Statutory requirements** may include:
- delegated authorities
- internal control procedures
- reporting periods
- taxation payment timings.
RANGE STATEMENT

### Standard accounting reports may include:
- deprival asset valuations
- direct and indirect allocation
- discounted cash flows
- impact statements
- internal rate of return
- net present value
- pay back break even periods
- pro-rata and percentage apportionment
- rates of return.

### Management responsibilities may include:
- organisational policies, procedures, guidelines, ethical and/or professional standards.

### Legal requirements may include:
- private sector requirements, such as:
  - Australian Accounting Standards (SAC 1, 2, Framework AASB1001)
  - Corporations Act 2001
  - GST and income tax reporting
- public sector requirements, such as:
  - Financial Administration and Audit Act 1977

### Key information may include:
- gross profit
- net profit
- return on investment
- for public or not-for-profit organisations:
  - best use of resources
  - surplus/deficit against budget
  - value for money.

### A specific activity might include:
- significant project (e.g. new product line)
- introduction of new technology
- partnership arrangement with another organisation
- introduction of a new customer.

### A specified time frame may:
- be long enough to be able to undertake a meaningful impact evaluation of an activity (e.g. over a period of several months or a full planning cycle)
- cover the lifetime of a specific project.

### Comparative and trend information includes:
- benchmarks as agreed
- business activity

MTMBUS702A Provide strategic leadership

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to analyse and improve personal leadership style and professional competence, and to lead organisational strategic development and deployment. The unit also covers leading transformational practices, cultivating collaborative practices, and providing strategic leadership in a dynamic context. No licensing, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers wishing to develop strategic capabilities. Their effectiveness is based on professional expertise and personal integrity, and they act as a role model for others.

The unit may relate to learning activities within a small to medium sized organisation or a significant unit of activity in a large organisation.

Leaders must be able to respond strategically and act as leaders of change. They seek to improve competitive advantage through transformation of individual, team and operational capabilities. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- use problem-solving, initiative and enterprise skills to:
  - direct, motivate, consult and delegate appropriate to the circumstances
  - collect, analyse and interpret data using a range of methods
  - shape strategic thinking and inspire others through a shared vision
  - work with teams with diverse emotional and multiple intelligences and thinking (cognition) skills
  - use teamwork skills to lead a team, workgroup or unit, being aware of employee needs and requirements
  - use provide leadership in occupational health and safety (OHS) practice, ethical standards, legislative requirements and governance
  - review own personal and professional competence against personal development objectives
  - support and use participative arrangements aimed at establishing trust
  - to:
    - maintain appropriate relationships with colleagues and others
    - value and be open to the opinions of others
    - work as part of a team
REQUIRED SKILLS AND KNOWLEDGE

- model collaborative communication and learning
- use active listening and negotiation skills
- encourage participation across all levels of personnel and clients
- seek opinions and elicit feedback from a range of stakeholders
- develop plain English written texts which deal with complex ideas and concepts
- use workplace technology.

Required knowledge

Knowledge of:

- relevant legislation that affects the business operation, especially in regard to OHS and environmental issues, Equal Employment Opportunity (EEO) and anti-discrimination, industrial relations and regulatory requirements
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership styles
- personal development planning methodologies
- data collection methods
- external environment scanning relating to social, political, economic, regulatory and technological developments
- emotional intelligence and its relationship to individual and team effectiveness
- organisational transformation and the management of the stages of change
- organisational design and building in responsiveness to changes in customer or market conditions
- environmental sustainability principles.
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<td></td>
<td>• resources normally used in the workplace, such as organisational policies and procedures, and relevant legislation</td>
</tr>
<tr>
<td></td>
<td>• access to clients.</td>
</tr>
</tbody>
</table>

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- series of workplace activities and projects developed and implemented as part of the organisation's strategic development
- review of applied projects and learning activities, such as reports and case studies
- direct observation of contextual application and presentations to a range of stakeholders
- oral or written questioning to assess knowledge of leadership styles
- analysis of personal reflection and self-awareness of leadership styles and impact of this approach on task
## Guidance information for assessment

- Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Efficacy** may include:

- accurately reflecting and performing self-assessment
- having self-confidence
- recognising personal emotional responses in a given context.

**Personal efficacy** may include:

- accessibility
- adaptability to change
- decisiveness
- flexibility
- personal performance appraisal
- self-analysis.

**Relevant individuals and groups** may include:

- employees and staff
- employers
- government agencies and departments
- industry associations and employer bodies
- industry representatives
- national Industry Skills Councils (ISCs)
- professional associations
- regulatory, licensing and compliance authorities
- research agencies
<table>

</tr>
<tr>
<td>- subject or technical specialists and experts</td>
</tr>
<tr>
<td>- trade unions</td>
</tr>
<tr>
<td>- universities.</td>
</tr>
</tbody>
</table>

**Responsibilities** may include:
- clarifying who is to be accountable for a decision or action prior to its execution
- identifying groups, individuals and activities for which a person has management responsibility.

Controlling and appropriately regulating **disruptive emotions and impulses** may include:
- avoiding personal responses that may be insensitive or inappropriate in a given context
- managing disruptive emotions and impulses
- positively shaping interpersonal relationships
- self-control.

**Relevant stakeholders** may include:
- administrative and regulatory bodies
- coordinators, teachers, assessors, coaches, mentors and support staff
- experts
- industry, employees, employers, professional and peak bodies or associations
- public or private sector enterprises
- students
- suppliers and business partners
- training and assessment organisations.

**Risks** may include:
- issues, concerns or actions likely to result in a negative outcome, such as preventing the organisation from meeting its objectives
- likely consequences of such an event on organisational performance and business continuity management.

**Leadership style** will usually be differentiated by five classical approaches:
- autocratic (non-participative)
- charismatic flexibility
- democratic (participative)
- laissez faire (free reign)
- paternalistic.

Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- applying cross-cultural knowledge and protocols
- effectively communicating with diverse groups and individuals in the work environment
- knowledge of communication styles and methods, and cultural protocols for use with people from a range of backgrounds.

### Context of and specific resources for assessment

Assessment must ensure:
- activities are related to a business context
- access to workplace context in which cross-cultural communication and negotiation skills are required.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate in researching issues in business
- evaluation of supervisor's reports on how the candidate applies knowledge of culture and cultural diversity
- analysis of projects, responses to problem-based case studies/related tasks, completed records and reports developed by the candidate
- review of analysis of interaction between the key elements of culture and cultural diversity
- review of evaluation of business practices in selected countries
- evaluation of formal and informal coaching and training strategies applied to improve organisational cross-cultural communication practices and strategies
- oral or written questioning to assess knowledge of personal cultural assumptions shaping expectations and outcomes.
### EVIDENCE GUIDE

| Guidance information for assessment | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged. |

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Culture is:**

- The set of distinctive spiritual, material, intellectual and emotional features of society or a social group. It encompasses, in addition to art and literature, lifestyles, ways of living together, value systems, traditions and beliefs. Culture is at the heart of contemporary debates about identity, social cohesion, and the development of a knowledge-based economy. (UNESCO Universal Declaration on Cultural Diversity 2002).

**Cultural diversity is:**

- The uniqueness and plurality of the identities of the groups and societies making up humankind. (UNESCO Universal Declaration on Cultural Diversity 2002).

**Significant events may include:**

- cultural
- economic
- historical
- physical and geographic
- political
- religious.

**Key characteristics of business systems may include:**

- legislative and economic structure
- public and private company ownership
- market access

MTMBUS704A Develop and enhance collaborative partnerships and relationships

Modification History

Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to develop and enhance collaborative partnerships and relationships with business, community and industry stakeholders. The unit also covers communicating to influence others, enhancing new and existing partnerships, establishing positive collaborative relationships, leading the establishment of a partnership program and establishing reporting mechanisms. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers working in an enterprise where collaborative partnerships and relationships are used to build capabilities. It includes forming partnerships or other collaborative arrangements to achieve improved product, marketing, workforce development, business outcomes or community relationships.

Enterprise leaders gain the respect of colleagues, contacts, clients and the community through demonstrating professionalism in all aspects of their work. This professionalism is underpinned by their management expertise and effective interpersonal and communication skills. |

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify and analyse existing partnerships and relationships with stakeholders | 1.1. Key existing *business partnerships* and relationships are identified and analysed.  
1.2. Outcomes to be achieved from existing business partnerships and relationships are identified.  
1.3. *Indicators* and *feedback processes* are analysed to evaluate the health of the partnership arrangements.  
1.4. Strategies are developed and implemented to enhance the effectiveness of existing partnerships and relationships. |
| 2. Lead the establishment of a new or renegotiated partnership program | 2.1. Outcomes to be achieved from a new or renegotiated business partnership are established.  
2.2. *Relevant organisational policies and procedures* in partnership plan are identified and addressed.  
2.3. Relevant legal requirements are identified and incorporated into planning of the partnership.  
2.4. Partnership program is formed using collaborative and consultative processes.  
2.5. *Resource requirements* are planned and allocated to accomplish the partnership program.  
2.6. Relevant organisational policies and procedures relating to the partnership are established.  
2.7. Work activities are organised and allocated in a cost-effective and equitable manner with clear, quantifiable and agreed *performance standards*. |
| 3. Communicate to influence relevant individuals and stakeholders | 3.1. Trust, confidence and support from relevant individuals and other stakeholders are generated by demonstrating a high standard of personal performance and conduct.  
3.2. *Communication strategies* to represent the organisation positively to media, local community and stakeholders are implemented.  
3.3. Decisions are made in consultation with relevant stakeholders and relevant individuals, where appropriate.  
3.4. Individuals are empowered to develop their own ways of working within agreed boundaries of competence, cultural, *diversity* and *organisational and legal requirements*.  
3.5. A range of *influencing strategies* are used to increase commitment from staff and stakeholders to achieve organisational requirements and to
ELEMENT | PERFORMANCE CRITERIA
--- | ---
contribute to desired culture.  
3.6. Selected community and/or professional engagements are undertaken that project a positive image of the organisation to the broader community and stakeholders.

4. Establish and implement *reporting mechanisms* for partnership program

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- Use analysis and interpretation skills to:
  - evaluate organisational information management systems, policies and procedures
  - select relevant evaluation information and documentation
  - identify any potential and current non-compliance
  - access and interpret organisation’s standards and values
  - analyse records or notes of the evaluation process
  - analyse business, political, economic and organisational contexts influencing the nature and impact of partnership arrangements
  - make judgements relating to the success and deficiencies of existing arrangements
  - generate and evaluate ideas through the analysis of information and concepts at an abstract level
  - use initiative and enterprise skills to initiate and establish collaborative partnerships and relationships
  - use interpersonal and communication skills to negotiate, question, direct, listen and investigate, network and clarify issues
  - use planning and organising skills to:
    - research and evaluate validation processes, and to determine and implement improvements to these processes
### REQUIRED SKILLS AND KNOWLEDGE

- develop and establish agreement to plans
- use problem-solving skills to undertake risk assessment, review feedback and plan improvements
- lead and motivate a team in establishing productive networks, partnerships and other relationships

### Required knowledge

Knowledge of:

- relevant legislation that affects the business operation, especially in regard to Occupational Health and Safety (OH&S) and environmental issues, Equal Employment Opportunity (EEO) and anti-discrimination, industrial relations, food safety and trade
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership techniques, including:
  - leadership styles
  - emotional intelligence and its relationship to individual and team effectiveness
  - organisational transformation and the management of the stages of change
  - personal development planning methodologies
  - strategies to evaluate and analyse effectiveness of personal performance
- data collection methods
- external environment scanning relating to social, political, economic and technological developments
- models for effective consultation and collaboration within a partnership
- organisational design and building in responsiveness of operations to change in customer or market conditions
- risk assessment and monitoring strategies
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
</table>
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | • demonstrated capacity to foster partnerships, conduct stakeholder consultation and use strategic and personally enhancing communication skills  
• demonstrated capacity to use accepted strategies and assess and analyse personal performance  
• developing collaborative approaches to enhance individual, team and organisational outcomes  
• initiating and implementing external partnerships in line with relevant regulatory, employment and organisational requirements  
• knowledge of relevant policies, legislation, codes of practice and national standards  
• strategies to evaluate and enhance effectiveness of partnership arrangements. |

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th>Assessment must ensure:</th>
</tr>
</thead>
</table>
| **Method of assessment** | • competence is consistently demonstrated over time in a workplace context, and over a range and variety of situations  
• access to required assessment facilities and resources. |

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- review of applied projects or learning activities, especially relating to formation of professional networks and stakeholder consultation in relation to forming partnerships
- direct observation of contextual application of skills
- submission of a portfolio of evidence, including previous work forging partnerships
- oral or written questioning to assess knowledge of

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stakeholders may include:

- administrative and regulatory bodies
- community organisations
- employees
- industry, employees, employers, professional and peak bodies or associations
- public or private sector enterprises.

Business partnerships may:

- be informal
- be physical or virtual (e.g. online)
- involve a formal agreement
- involve one or more enterprises, and training and assessment organisations
- include sponsorship or community funding agreements
- involve mergers, supply agreements, joint ventures, research and development partnerships.

Indicators may include:

- employees
- employers
- government agencies and departments
- industry associations, employer bodies and professional associations
- industry representatives
- media reports

## RANGE STATEMENT

- confidentiality and privacy requirements
- licensing requirements
- requirements of awards and enterprise bargaining agreements
- requirements of endorsed Training Packages
- requirements of other relevant federal and state/territory legislation (e.g. OH&S, anti-discrimination, workplace and industrial relations, workers compensation, and apprenticeships and traineeships)
- requirements set by professional associations
- requirements set by quality systems.

### Influencing strategies may include:

- debate
- dialogue
- discussion
- formal and informal techniques
- levels of participation
- moderated negotiations
- networking
- providing encouragement to staff to undertake activities that develop their personal competence and performance
- resolving conflict in a fair, equitable and collaborative manner
- strategies applied face-to-face or collectively.

### Reporting mechanisms may include:

- internal organisational recording and reporting systems
- record keeping policies and procedures
- community notices and newsletters
- financial reporting for funding and payments from funding bodies
- OH&S incident reporting systems
- performance agreements.

MTMBUS705A Develop and manage international business operations

Modification History

Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to operate businesses in increasingly international contexts. The unit brings together many of the functional aspects of business and operationalises them in an international business environment and context. No licensing, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers who perform or oversee the business functions of an enterprise within an international business context. The unit may relate to a small to medium size enterprise or a significant business unit within a large enterprise. Business leaders and managers must be able to understand and respond to the international environment within which a business operates and the factors which affect business activity. |

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Identify and analyse impacts of international factors on the business operation and functions</td>
</tr>
<tr>
<td>2. Investigate international business opportunities in the areas of investment, trade, finance and workforce development</td>
</tr>
<tr>
<td>3. Operate international business activities</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Core activities, customer base, business values and current business direction are confirmed.</td>
</tr>
<tr>
<td>2. Performance data from all areas of the business is reviewed to identify strengths, weaknesses and critical success factors relevant to international business activity.</td>
</tr>
<tr>
<td>3. Trends and developments having an impact on international business activity are identified and analysed for their potential impact on the business.</td>
</tr>
<tr>
<td>4. Comparative international market information is gathered and analysed as a basis for reviewing business performance.</td>
</tr>
<tr>
<td>5. Market intelligence is gathered from available sources and documented.</td>
</tr>
<tr>
<td>6. Current capabilities and resources are identified and assessed to identify areas for improvement or exploitation within international markets.</td>
</tr>
<tr>
<td>7. International market performance of existing and potential competitors and their products or services is analysed to identify potential opportunities or threats within international business markets.</td>
</tr>
<tr>
<td>8. Legal, ethical and environmental constraints of the international market are identified and analysed for their effect on international business activity.</td>
</tr>
<tr>
<td>9. Current and emerging needs in international markets that link positively to the business's strengths or capabilities are identified.</td>
</tr>
<tr>
<td>10. The needs of the business in terms of changes required to address an international market opportunity are identified.</td>
</tr>
<tr>
<td>11. Available international business positioning strategies are identified and a strategy chosen to meet marketing requirements and the consumer profile, including the culture of profiled groups.</td>
</tr>
<tr>
<td>12. A positioning implementation plan is developed in accordance with organisational requirements.</td>
</tr>
<tr>
<td>13. International business options are identified and strategies for products, pricing, sourcing, logistics, promotion and distribution developed.</td>
</tr>
<tr>
<td>14. The international business payment, investment capital, accounting and taxation issues, options and proposed strategies are identified.</td>
</tr>
<tr>
<td>15. Financial compliance requirements associated with international business activity are identified for relevant regulatory requirements.</td>
</tr>
</tbody>
</table>
ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | international finance regulations.
3.6. Documentation requirements for export are identified and prepared.
3.7. The investment, trade, financial, taxation and workforce risks in the international business operation are identified and contingency strategies developed.
3.8. Operational plans to address the international business activity are developed or amended in accordance with organisational requirements.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- use analytical skills to identify potential risks and opportunities, and assess market dynamics
- use culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- make decisions
- use interpersonal skills to:
  - maintain appropriate relationships with colleagues
  - establish trust
  - value and be open to the opinions of others
  - work as part of a team
  - listening actively
  - demonstrate cultural sensitivity
- negotiate effectively
- use planning and organisation skills to develop and implement business strategies
- use problem-solving, initiative and enterprise skills to seek and develop international business opportunities
- use research skills to identify trends and international business opportunities
- manage risk
- use a range of tools to monitor business performance

**Required knowledge**
REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:
- relevant legislation, codes of practice and standards that affect international business
- nature and scope of international business
- international trade and investment theory
- international monetary system and balance of payments
- foreign exchange and financial markets
- national trade and investment policy
- co-operation between nations: legal and political forces
- cultural-interpersonal relations and human resource management
- strategic management
- modes of entry and strategic alliances
- organisational design and control
- international marketing and operations management
- international finance, accounting and taxation
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• knowledge of the key concepts of international business and how to apply them within an enterprise</td>
<td>• capacity to effectively integrate international business challenges and opportunities within and across functional areas of business</td>
</tr>
<tr>
<td>• capacity to effectively integrate international business challenges and opportunities within and across functional areas of business</td>
<td>• knowledge of key trends in international business.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations
- access to resources normally used in the workplace, such as organisational policies and procedures, and relevant legislation.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- series of workplace activities and projects developed and implemented as part of the organisation's business development and management
- review of applied projects and learning activities, such as reports and case studies
- direct observation of contextual application
- oral or written questioning to assess knowledge.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Performance data** may include:
- accidents
- complaints
- coverage
- faults
- penetration
- production time and cost
- profitability
- sales
- share
- warranties.

**Areas of the business** may include:
- finance
- marketing
- overseas representatives or branches of the organisation
- personnel
- production.

**Trends and developments** may include:
- changes in technology
- demographic trends
- ecological/environmental trends
- economic trends (local, regional, national and international)
- government activities (e.g. interest rates and deregulation)
- industrial trends
- political events (e.g. wars, internal conflicts and forthcoming elections)
- social and cultural factors.

**Comparative international market information** may include:
- benchmarking against Australian performance
- best practice information
- inter-firm comparison data
**RANGE STATEMENT**

- international benchmarking.

**Sources may include:**
- business advisory services
- commercial sources of market intelligence provided by specialists and consultants
- databases
- financial institutions
- information from Austrade and state/territory government agencies, and chambers of commerce
- internet
- new networking opportunities
- official statistics
- peers
- professional/trade associations and publications.

**Capabilities and resources may include:**
- situational factors:
  - 24-hour operation
  - age and life of business equipment
  - capacity of equipment relative to current output
  - communications
  - competence of staff relative to business needs
  - human and financial resources
  - industrial relations climate
  - level of technology
  - location/position
  - transport distribution channels
- intangibles:
  - brand
  - 'feel good' factor
  - image
  - perceived quality or value
  - service
  - social acceptability
  - style.

**Opportunities may include:**
- consideration of applications and costings for trademarks, patents and standards accreditation
- cooperative ventures
- extending, expanding or otherwise changing an

MTMBUS706A Commercialise research and technology product/idea

Modification History

Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to undertake the fundamentals of commercialisation of a product/idea from the initial concept to the launching of the product/idea (or innovation) and then to full production. Competency requires developing the skills and knowledge to successfully research, analyse, cost and develop a business opportunity for a product/idea. The skill to manage the commercialisation as well as evaluate the success or otherwise of the process is also required. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers responsible for the development of a commercialisation strategy for an innovative product or technique which has been developed through research. Leaders undertaking product commercialisation will investigate and negotiate the legal and partnership implications of commercialisation, undertake market testing and develop the commercialisation strategy. |

Licensing/Regulatory Information

### Required knowledge

Knowledge of:

- business strategies and legal requirements underpinning trademarks, copyright and patents
- commercial environment analysis techniques, such as Strengths, Weaknesses, Opportunities, Threats (SWOT)/TOWS
- market testing strategies and techniques
- strategies to analyse and assess the upstream and downstream implications of an innovation
- risk assessment strategies and techniques
- team selection, management and support strategies
- legal requirements underpinning partnership arrangements, contracts and taxation
- environmental sustainability principles
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- capacity to develop, negotiate and structure an agreed commercialisation strategy
- demonstrated application of leadership style and approach appropriate to individuals involved, outcomes being sought and context
- knowledge of relevant legislation.

### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- assessment over a sufficient timeframe to allow holistic assessment of the candidate's capacity to lead the development of a commercialisation strategy
- resources normally used in the workplace, such as organisational policies and procedures, and relevant legislation
- access to stakeholders, potential partners and clients.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- series of workplace activities and projects developed and implemented as part of the organisation's commercialisation strategy
- review of applied projects and learning activities, such as reports and case studies
- direct observation of contextual application and presentations to a range of stakeholders
- oral or written questioning to assess knowledge of commercialisation strategies and techniques.

### Guidance information for

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,
EVIDENCE GUIDE

| assessment | for example, with other units in the qualification in which this unit is packaged. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Describing the product/innovation will include:
- providing detailed background information
- identifying the benefit and assumptions made when approval was given to develop the innovation
- preparing reports, summaries, demonstrations and promotional materials to suit a variety of audiences
- preparing responses to questions, issues and technical queries from current and prospective stakeholders.

Market testing may include:
- consumer sampling and testing strategies
- franchising pre-production ordering
- identifying routing opportunities, such as:
  - partner options
  - licensing
  - regulatory compliance.

Funding options may include:
- government (local, state, territory and federal) development grants
- industry joint funding, including partnerships with industry and government
- commercial funding, including investor funding (e.g. venture capital and equity partners)
- owner/operator
- partnership arrangements.

Resourcing requirements may include:
- financial requirements:
**RANGE STATEMENT**

| include: | • manufacture capital investment  
|          | • Intellectual Property (IP) costs  
|          | • regulatory approval/market access cost  
|          | • innovation production costing  
|          | • sales and marketing costs  
|          | • forecast return on investment  
|          | • infrastructure  
|          | • human.  

**Marketing plan will include:**

| • determining resources required  
| • budgeting  
| • setting key performance indicators (KPIs)  
| • developing sale forecasts for one, three and five years.  

**Supply chain strategy will include:**

| • supply chain logistics SWOT  
| • identifying and evaluating potential supplier partnerships  
| • negotiating contracts.  

Developing an **IP strategy may include:**

| • freedom to operate  
| • IP management purpose and benefits  
| • patent infringement issues  
| • patent mapping  
| • patenting options  
| • trademark registration.  

**Environmental sustainability impacts may include:**

| • reduction of waste  
| • increased energy and resource efficiencies  
| • recycling.  

**Negotiating proposal modifications may involve:**

| • making presentations to key stakeholders  
| • negotiating with senior company personnel or Board Directors  
| • modifying aspects of the proposal to accommodate stakeholder input/requirements.  

**Project implementation plan will include:**

| • determining project champions  
| • developing project planning chart with critical points and stages  
| • structuring, identifying and recruiting the project team  
| • assigning KPIs and objectives to individuals.  

**Monitoring process may include:**

| • identifying, selecting and analysing data  
| • quantitative and qualitative feedback.

MTMBUS801A Manage change to organisational electronic technology systems

Modification History

Not Applicable
Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to improve business outcomes through implementing the introduction of, or upgrades to, advanced electronic technologies. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers whose role is to manage the introduction of advanced electronic technologies to enhance business practices. Leaders and managers should be able to manage the implementation of advanced electronic technologies, such as those associated with electronic business (e-business) models; financial systems, information management systems, mobile and wireless technologies; and technologies relating to the management of customer and regulatory requirements. Operational management in relation to introducing technologies to enhance business processes may involve complex judgements. This unit may relate to the business activities of a small to medium sized organisation or to a significant unit of activity in a large organisation. |

Licensing/Regulatory Information

</table>
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare organisational change management strategy for implementation of advanced electronic technologies | 1.1. Proposed changes are analysed in relation to current operational practices, infrastructure and the strategic plan.  
1.2. Identified changes are evaluated, costed and prioritised.  
1.3. Risks associated with implementation are identified, evaluated and managed.  
1.4. Implementation strategies are developed, including change management and communication strategies.  
1.5. Implementation team is engaged, assembled and briefed. |
| 2. Manage implementation | 2.1. Implementation strategies are communicated to stakeholders and timelines and accountabilities clarified.  
2.2. Progress of implementation against planned milestones is monitored, recorded and reported.  
2.3. Potential risks to successful completion are identified and managed through consultation with stakeholders and review of testing outcomes.  
2.4. Implementation strategy is reviewed and revised, as necessary.  
2.5. Installation is finalised according to implementation strategy and organisational procedures.  
2.6. Training programs needed to support new technologies are identified and implemented. |
| 3. Evaluate implementation outcomes | 3.1. Implementation process is reviewed and evaluated.  
3.2. Implementation team is debriefed.  
3.3. Outcomes of implementation process are assessed against organisation requirements.  
3.4. Project outcomes are reported to key stakeholders. |
4.2. Business processes required for ongoing electronic technology management are implemented. |

Required Skills and Knowledge
# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## Required skills

Ability to:

- apply change management theory
- use effective communication and teamwork skills to consult with stakeholders and system users
- apply planning and reporting skills
- use problem-solving, initiative and enterprise skills to:
  - assess vulnerabilities in electronic technology proposals
  - manage risks
  - monitor stakeholder satisfaction
  - develop strategies to respond to system, personnel and technology problems
- provide leadership in occupational health and safety (OH&S) practice and observance of ethical standards, legislative requirements and good corporate governance requirements
- apply technology skills to:
  - use appropriate technology to achieve system and business outcomes
  - use appropriate terminology
  - use high levels of accounting (mathematical), technological and e-commerce systems
  - assess advice relating to suitability and reliability of hardware and software
  - analyse and assess potential of new technology solutions to improve organisational outcomes

## Required knowledge

Knowledge of:

- business policies and procedures impacting on job role or function
- change management theory
- capabilities and limitations of infrastructure
- business needs
- facilities and infrastructural management
- methods for assessing and analysing electronic technology proposals
- planning techniques
- quality measures and principles
- relevant legislation, codes and regulations that affect business operations, especially in regard to OH&S and environmental issues, Equal Employment Opportunity (EEO), industrial relations and anti-discrimination
- written policies and internal procedures on electronic technology management and

MTMBUS802A Undertake research project

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to undertake independent study as a research project directed towards an agri-business issue or problem, including a literature review. The project outcomes will be designed to influence strategic practices and outcomes within an industry context. Some topics will require knowledge of experimental design, survey techniques and statistical analysis of results. |

Application of the Unit

| Application of the unit | This unit applies to leaders or managers using applied research methodologies to address an industry or sectorial issue. The focus of this unit is on using research strategies to better understand industry opportunities and threats in order to gain improved industry performance. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- use analysis and interpretation skills to:
  - critically review other research strategies, analyses and findings
  - apply research findings to a current issue
  - select relevant information and documentation
- use communication and negotiation skills to:
  - present and explain research ideas
## REQUIRED SKILLS AND KNOWLEDGE

- gain commitment to participate in research activity
- present findings
- use develop and conduct research activity
- undertake risk assessment and resolve blockages

### Required knowledge

Knowledge of:
- relevant legislation and regulatory requirements impacting on research activity
- research strategies and techniques
- data collection methods
- risk assessment and monitoring strategies, including environmental risk analysis
- strategies to evaluate and analyse effectiveness of research approach
- environmental sustainability principles
### Evidence Guide

**EVIDENCE GUIDE**

</thead>
</table>
| 1. Identify and access data sources available to the business | 1.1. The data collection requirement of the business question or issue is scoped and defined.  
1.2. *Data sources* are identified and assessed for accessibility and reliability.  
1.3. Data is researched and/or collated from sources in accordance with *legislation, policies and guidelines*.  
1.4. Accuracy and appropriateness of the data is evaluated.  
1.5. Data is recorded in the desired format in accordance with professional, business and task requirements. |
| 2. Apply data analysis and decision making techniques to analyse business data | 2.1. Data is collected, stored and retrieved using *software* in accordance with legislation, policy and guidelines.  
2.2. Spreadsheet tools are used to retrieve data and present it in suitable formats.  
2.3. Graphical data is displayed in accordance with *graphical presentation principles*.  
2.4. Quantitative and/or qualitative analysis is performed to obtain required outcome.  
2.5. *Analysis* and descriptive tools and techniques are used appropriately given the nature of the information and the required outcomes.  
2.6. Limitations in the methodology are identified and described, as appropriate.  
2.7. *Summary statistics* are calculated from the given data set in accordance with the business requirement. |
| 3. Produce information for business decision making | 3.1. Data summaries and trends are interpreted according to *accepted standards*.  
3.2. *Statistical tests* are interpreted and explained.  
3.3. Data is interpreted in such a way as to inform business decision making.  
3.4. Data is presented in tables, charts and maps so that the reader does not misconstrue it.  
3.5. Glossaries, technical notes and referencing are included with the data, where required.  
3.6. Reports are prepared and presented that include *statistical concepts*, tables, charts and maps in accordance with organisational policy and procedures.  
3.7. *Findings* are presented in a way that is most appropriate for the audience.  
3.8. Charts are used appropriately in presentations for the variables being charted and in accordance with *accepted*... |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- analyse and interpret data
- identify sources of data, collect data, follow analysis procedures and explain results
- apply decision making skills
- negotiate effectively
- collect data and produce reports
- use problem-solving, initiative and enterprise skills to produce information for business decision making
- use research skills to identify and collect data
- manage risk

Required knowledge

Knowledge of:
- relevant legislation, codes of practice and standards
- use of statistical data for business decision making
- methods of presenting data
- methods of describing data
- risk and uncertainty
- interval estimation
- hypothesis testing
- comparing group differences
- simple linear regression and correlation
- multiple regression
- time-series analysis
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th><strong>Overview of assessment</strong></th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Critical aspects for assessment and evidence required to demonstrate competency in this unit</strong></td>
<td>• knowledge of how to:</td>
</tr>
<tr>
<td></td>
<td>• differentiate between different types of data</td>
</tr>
<tr>
<td></td>
<td>• differentiate between inferential and descriptive statistics</td>
</tr>
<tr>
<td></td>
<td>• application of linear regression and correlation analysis techniques</td>
</tr>
<tr>
<td></td>
<td>• knowledge of the strengths and limitations of results produced by each statistical technique (error correction and hypothesis testing)</td>
</tr>
<tr>
<td></td>
<td>• provision of advice for business decision making based on the results of statistical analysis.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Context of and specific resources for assessment</strong></th>
<th>Assessment must ensure:</th>

<tr>
<td></td>
<td>• access to resources normally used in the workplace such as organisational policies and procedures, relevant legislation.</td>
</tr>
</tbody>
</table>

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- series of workplace activities and projects developed and implemented as part of the organisation's business development and management
- review of applied projects and learning activities such as reports and case studies
- direct observation of contextual application
- oral or written questioning to assess knowledge.
EVIDENCE GUIDE

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Data sources may include:
- Australian Bureau of Statistics (ABS) data
- government agency sources.

Legislation, policies and guidelines may include:
- state/territory and federal legislation and regulations, such as:
  - financial management Acts
  - privacy legislation
  - Equal Employment Opportunity (EEO) and anti-discrimination legislation
  - Occupational Health and Safety (OH&S) legislation
  - ethics and accountability standards
  - risk management standards
  - fraud control standards
  - knowledge management standards
  - organisational policy, procedures and protocols.

Software may include:
- database tools
- spreadsheets
- web-based tools (e.g. online survey tools)
- statistical packages.

Graphical presentation principles may include:
- understanding graphical literacy of audience
- scaling
- sample representativeness

<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
ELEMENT | PERFORMANCE CRITERIA
--- | ---
1. Maintain personal equipment | 1.1. *Personal equipment* is maintained to ensure manufacturer specifications are met, where relevant
1.2. *Occupational Health and Safety (OH&S)*, hygiene and sanitation, workplace and regulatory requirements are met

2. Store personal equipment | 2.1. Appropriate maintenance is carried out for the equipment used.
2.2. Personal equipment is stored in accordance with workplace and regulatory requirements.

3. Clean personal equipment | 3.1. Personal equipment is cleaned to ensure that workplace requirements, OH&S, hygiene and sanitation requirements, and manufacturer’s specifications are all met, where relevant.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- apply communication skills relevant to the task
- demonstrate the procedures for maintaining personal equipment
- check and prepare equipment in time for the start of work
- work effectively as an individual and as part of a team
- apply hygiene and sanitation, OH&S requirements in using, cleaning and storing personal equipment, including Personal Protective Equipment (PPE)
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

Knowledge of:

- maintenance techniques for personal equipment
- relevant *work instructions, Standard Operating Procedures (SOPs) and reports*
- hygiene and sanitation, OH&S, workplace and regulatory requirements related to maintaining, cleaning and storing personal equipment
- manufacturer specifications for use, maintenance, cleaning and storage of personal equipment
<table>
<thead>
<tr>

</table>
### Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Competency must be demonstrated during the normal operations of a workplace.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>Competency must be assessed using the personal equipment issued to the individual.</td>
</tr>
</tbody>
</table>
| Method of assessment | Recommended methods of assessment include:  
- quiz of underpinning knowledge  
- workplace demonstration  
- workplace referee or third-party report of performance over time.  
Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

**Personal equipment** may include:
- chains
- handsaws
- PPE
- pouches
- steels.

**OH&S requirements** may include:
- enterprise OHS policies, procedures and programs
- OHS legal requirements
- PPE:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:
- Export Control Act
- Federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian standards
## RANGE STATEMENT

| **1. Clean own work area and equipment during operations** | 1.1. Worksite is hygienically cleaned during operations to *Occupational Health and Safety (OH&S)*, *workplace* and *regulatory requirements*.  
1.2. Equipment and surfaces are hygienically cleaned to regulatory and workplace requirements.  
1.3. Cleanliness of work area is monitored according to workplace requirements. |
| **2. Identify sources of contamination and spoilage** | 2.1. Contamination and cross-contamination risks are identified and *steps taken to reduce the risk*.  
2.2. *Corrective action* is taken when contamination is identified in accordance with workplace and regulatory requirements. |
| **3. Follow workplace hygiene and sanitation requirements** | 3.1. Personal hygiene practices are followed to workplace requirements.  
3.2. Product is handled in accordance with workplace, and hygiene and sanitation requirements.  
3.3. Individual's work is conducted hygienically in accordance with workplace requirements.  
3.4. Products are processed in accordance with regulatory requirements. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- consistently follow workplace, hygiene and sanitation procedures
- work effectively as an individual and as part of a team to keep work areas clean
- demonstrate basic hygiene and sanitation practices in all activities undertaken in the workplace
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication* skills relevant to the task
- use and mix cleaning chemicals (if used) according to manufacturer specifications, regulatory and workplace requirements
REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Knowledge of:

- hygiene and sanitation requirements for own area
- reporting procedures for contamination, as appropriate
- chemical contamination risks to product and how they are controlled
- consequences of contaminated or spoiled meat leaving the establishment
- consequences of failing to follow workplace requirements for hygienic handling and processing of meat
- time, temperature and moisture requirements for microbial growth
- causes of food spoilage and poisoning
- possible sources of contamination and cross-contamination in the worksite
- visual evidence of contamination
- microbes which may affect meat
- the scope and coverage of AS 4696:2007 Hygienic production and transportation of meat and meat products for human consumption
- sources of physical and microbiological contamination in meat establishments and how these hazards are controlled
- monitoring methods (e.g. visual, looks clean, smells clean and use of protein sticks)

### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Workplace requirements** may include:
- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Regulatory requirements** may include:
- Export Control Act
- Federal, state and territory regulations
## RANGE STATEMENT

| **Sources of contamination may include:** | • chemical agents (e.g. insecticides and cleaning agents)  
• foreign bodies  
• microbiological and biological agents  
• physical agents (e.g. ingesta, excreta, dust and grease). |
| **Steps taken to reduce the risk may include:** | • good housekeeping practices  
• hand washing  
• maintaining clean clothes and PPE. |
| **Corrective action may include:** | • disposing of contaminated product  
• trimming product. |
| **Hygiene and sanitation requirements may include:** | • relevant government regulations  
• workplace requirements. |
| **Communication may:** | • be spoken, written, non-verbal and include signs and signals  
• be with people from a range of cultural, social and ethnic backgrounds or with colleagues, superiors, customers, clients and external parties. |

| 1. Identify hazards and control points | 1.1. Hazards to food safety and quality are identified for own work area according to workplace and regulatory requirements.  
1.2. Control points for own work area are identified according to workplace requirements. |
| 2. Identify elements of the Quality Assurance (QA) system | 2.1. Purpose and elements of the QA and Hazard Analysis Critical Control Point (HACCP) systems are identified and related to workplace requirements.  
2.2. Product specifications for own work area are identified. |
| 3. Follow requirements of a HACCP-based QA system | 3.1. Workplace requirements of the HACCP systems are identified and followed.  
3.2. Non-conforming products are communicated to supervisor where this forms part of workplace requirements.  
3.3. Consequences of not following workplace requirements are explained. |
| 4. Identify quality control practices in a HACCP-based QA system | 4.1. Measures for monitoring quality control are identified.  
4.2. Inspection and re-inspection procedures are identified. |
| 5. Inspect own work | 5.1. Inspection of own work is carried out as prescribed in workplace requirements.  
5.2. Corrective action is taken according to workplace requirements. |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:

- comply with regulatory requirements
- determine critical control points
- follow workplace requirements related to HACCP and QA
- identify hazards to food safety
- inspect own work
- identify and apply relevant *Occupational Health and Safety (OHS) requirements*
- monitor critical control points
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

Knowledge of:

- corrective actions relevant to critical control points
- nature of food safety hazards
- purpose of a HACCP program
- requirements for, and the nature of a HACCP plan
- regulatory requirements relevant to own work area
- nature and importance of *work instructions*, Standard *Operating Procedures (SOPs), explanations and reports*
- potential risk, loss or damage if the required actions are not performed
- control points for a specific task or activity and how hazards are controlled
- hazards to food safety and quality for specific work areas
- reasons for quality control, such as inspection and sampling
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. |
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. |
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. |
| All assessment must be conducted against Australian meat industry standards and regulations. |

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

| Competency must be demonstrated over time while performing tasks in meat processing, smallgoods or meat retail premises. |

**Context of and specific resources for assessment**

| Assessment must involve demonstration of competency including compliance with work instructions and SOPs. |

**Method of assessment**

| Recommended methods of assessment include: |
| assignment |
| debrief |
| quiz of underpinning knowledge |
| simulation |
| verified work log or diary |
| workplace demonstration |
| workplace project |
| workplace referee or third-party report of performance over time. |

Assessment practices should take into account any

| 1. Fulfil OH&S responsibilities and recognise the OH&S responsibilities of key personnel | 1.1. OH&S responsibilities are met according to regulatory and workplace requirements.  
1.2. OH&S responsibilities of key personnel are recognised and explained. |
| 2. Follow workplace OH&S policies and procedures     | 2.1. Workplace OH&S policies, procedures and programs are followed.  
2.2. Personal Protective Equipment (PPE) is used, maintained and stored as appropriate. |
| 3. Follow legal provisions related to OH&S           | 3.1. Relevant provisions of OH&S legislation and codes of practice are followed. |
| 4. Contribute to OH&S                                | 4.1. OH&S issues are raised with designated personnel in accordance with workplace requirements and relevant OH&S legislation.  
4.2. Participative arrangements for OH&S are contributed to in the workplace within the organisational procedures and scope of responsibilities and competencies. |
| 5. Follow workplace requirements for hazard identification and risk control | 5.1. Hazards to health and safety in the work area are recognised and reported to designated personnel according to workplace requirements.  
5.2. Workplace requirements for controlling risks to health and safety are accurately followed. |
| 6. Follow emergency procedures                       | 6.1. Emergency procedures are followed according to workplace requirements.  
6.2. Appropriate reporting procedures for emergencies are followed according to workplace requirements. |
| 7. Operate machinery safely                          | 7.1. Machinery is operated according to safe work practices and procedures, where applicable.  
7.2. Machinery is operated and maintained according to manufacturer specifications and workplace requirements, where applicable. |

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**
## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- work safely as an individual and as a member of a team
- select, organise and complete *routine explanations and reports* on OH&S issues
- demonstrate safe work practices in all activities at the *work site*
- follow workplace OH&S policies and procedures
- identify and apply relevant regulatory requirements as applicable
- identify and follow emergency procedures, including evacuation procedures, according to workplace requirements
- identify OH&S hazards in own work area and around general plant or worksite especially slips, falls and manual handling
- list hazards at the work site and control measures that have been put in place
- outline and observe own OH&S legal responsibilities
- outline the employer's OH&S legal requirements
- seek advice from more experienced colleagues or from manuals in order to operate new machinery and equipment safely
- use relevant *communication* skills

### Required knowledge

Knowledge of:

- use, maintenance and storing of PPE required for different areas at the worksite, according to workplace requirements and manufacturer specifications
- ways of minimising manual handling hazards
- safe operating procedures for machinery at own work station
- procedures for reporting accidents at the work site
- functions of OH&S committees and representatives at the work site, as appropriate
- PPE that must be worn for different areas at the work site
- process for making suggestions for improvement
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Guidance information for assessment

| A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Regulatory requirements may include:

- Export Control Act
- Federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

Workplace requirements may include:

- emergency, fire and accident procedures
- enterprise-specific procedures
- hazard policy and procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Workplace OH&S policies, may include:

- confined spaces entry permit
### RANGE STATEMENT

**procedures and programs** may include:

- drug and alcohol policies and programs
- emergency procedures
- evacuation plans
- hazardous substances policies and programs
- manual handling policies and programs
- noise reduction policies and programs
- OH&S inspectors and audits checklists
- OH&S policies and programs
- sexual harassment policies and programs.

**Personal Protective Equipment (PPE)** may include:

- coats and aprons
- ear plugs or muffs
- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear.

**Participative arrangements for OH&S** may include:

- OH&S committees
- OH&S representatives
- workplace meetings.

**Emergency procedures** may include:

- accident and incident reporting and investigation procedures
- evacuation plans
- first aid procedures.

**Routine explanations and reports** may:

- be completed with the assistance of others
- be directly related to own work and work area
- problem solving
- be in English
- be in everyday workplace language and include mathematical language and commonly used technical terms
- be in languages other than English
- be presented in writing using standard formats or proformas, diagrams, symbols and charts
- be presented orally
- include information from several sources

<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Contribute to the maintenance and improvement of workplace operations and requirements | 1.1. Problems are solved by communicating with others.  
1.2. Information is exchanged to perform workplace tasks and take appropriate action.  
1.3. Spoken and written reports (where applicable) are provided clearly and promptly. |
| 2. Identify key personnel in the workplace | 2.1. Organisational structure of the workplace, mission statements and strategic plan are identified.  
2.2. Key personnel and their roles in the organisation are identified.  
2.3. Role of trainees is identified. |
| 3. Contribute to positive workplace relations | 3.1. Communication styles of cultural, social and ethnic groups are recognised and considered.  
3.2. Appropriate communication style for context, audience and purpose is applied.  
3.3. Regulatory and workplace ethical standards are considered in verbal and non-verbal communications. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- copy and record *workplace information* accurately in routine formats and pro formas, where appropriate
- demonstrate effective communication techniques with supervisors and colleagues
- demonstrate the exchange of relevant routine information with others to:
  - explain issues or problems
  - meet quality and food safety requirements
  - offer suggestions for improvement
  - reach conclusions
- describe forms of feedback provided to colleagues and key personnel
- participate in, and contribute to, meetings and discussions
- read *written information* and write to a level typically required in the workplace
### REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate communication styles when:
  - negotiating sensitive issues
  - obtaining views and information from others
  - working with cultural, social and ethnic groups

### Required knowledge

Knowledge of:

- roles of key personnel in the workplace
- sources of information relevant to own work, including **occupational health and safety (OHS)**, regulatory, work instructions and **workplace requirements**
- workplace standards of behaviour
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated in the workplace and over a period of time. |

| Context of and specific resources for assessment | Assessment may involve simulation or actual demonstration of competency. |

| Method of assessment | Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or |
EVIDENCE GUIDE

| Language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Communication may be:

- in English
- in languages other than English
- spoken, written, non-verbal and include signs and signals
- with people from a range of cultural, social and ethnic backgrounds or with colleagues, superiors, customers, clients and external parties
- information relating to own work, including:
  - AUS-MEAT language charts
  - codes of practice
  - customer service standards
  - diagrams
  - grading specifications
  - Hazard Analysis Critical Control Point (HACCP) charts
  - industry and agency newsletters
  - inspection schedules
  - labels and tags
  - messages
  - notices
## RANGE STATEMENT

- orally provided information
- orders
- packaging, loadout and repackaging documentation
- policies
- posters
- pricing schedules and tickets
- procedures
- sample data
- scales and dials in analogue or digital formats
- voltage meters and readings
- work instructions.

**Audience** may include:

- business associates
- clients
- colleagues
- customers
- external parties
- superiors.

**Workplace information** may be:

- in English
- in everyday workplace language, including some mathematical language
- in languages other than English
- presented in routine proformas using accurately copied information, symbols, numbers, abbreviations, codes and sketches
- presented orally
- provided visually (e.g. video, OH&S signs, symbols and other pictorial presentations)
- routine, simple and brief.

**Written information** may include:

- any written information relevant to own work requirements
- job requirements
- messages
- policies
- procedures
- reports
- work instructions.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
# RANGE STATEMENT

- OH&S legal requirements
- personal protective equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:

- Export Control Act
- Federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

**Workplace requirements** may include:

- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Work within the industry sector | 1.1. Composition and structure of the meat industry is examined to provide an overview for work priorities.  
1.2. Major species and trade markets are examined.  
1.3. Path of meat is traced from paddock to plate.  
1.4. Flow of product is traced from stockyards to meat processing plant, to meat wholesalers and retailers, and through smallgoods plants.  
1.5. Products are identified. |
| 2. Apply workplace policies | 2.1. Relevant workplace policies are obtained and applied, where appropriate.  
2.2. Role of trainees is identified in relation to workplace policies.  
2.3. Information on working conditions is obtained and important elements identified. |
| 3. Follow award or employment agreement provisions | 3.1. Information about relevant award provisions and employment conditions are obtained and applied, where appropriate.  
3.2. Information on employee rights and responsibilities is obtained and explained. |
| 4. Identify appropriate organisations and associations | 4.1. Major industry organisations, peak bodies and regulatory bodies, and their roles are identified. |
| 5. Follow equal employment opportunity (EEO) legislative requirements | 5.1. Information about EEO provisions is obtained and applied as appropriate.  
5.2. Information on sexual harassment is obtained and policies against sexual harassment are explained in terms of personal responsibility. |
| 6. Demonstrate awareness of environmental issues in the meat industry | 6.1. Relevant environmental regulatory requirements are identified.  
6.2. Workplace environmental policies and practices are identified.  
6.3. Consequences of not following workplace environmental policies and practices are identified. |

# Required Skills and Knowledge
**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- explain employee's responsibilities
- explain the flow of product from receival to sale in own workplace
- follow relevant workplace policies
- identify relevant *workplace requirements*, policies and procedures and explain their implications for trainees
- list the markets where the company's products are distributed
- name the products produced in own workplace
- outline the path of meat from paddock to plate
- relate to others in an effective and non-discriminatory way showing mutual respect
- use relevant communication skills

### Required knowledge

- dispute resolution procedures in the workplace
- nature and role of *work instructions*, *Standard Operating Procedures (SOPs)*, *explanations and reports*
- principles of EEO and policies to prevent sexual harassment
- relevance of *Occupational Health and Safety (OH&S)* and *regulatory requirements* for meat industry employees
- workplace employment conditions
- enterprise ethical standards and requirements for interacting with other employees and staff

</tr>
</thead>
</table>
| 1. Set and achieve personal goals | 1.1. Personal performance standards reflect pride in achievement, commitment to customer service and enterprise requirements.  
1.2. Personal goals reflect roles and responsibilities within the organisation.  
1.3. Opportunities to extend personal performance and goals are identified and used.  
1.4. Personal qualities and workplace relationships provide a role model to others.  
1.5. Personal performance is consistent over changes in workplace conditions and contexts. |
| 2. Establish and achieve personal work priorities | 2.1. Responsibilities, duties and tasks are prioritised to achieve personal, team and organisational goals.  
2.2. Work plans and schedules are developed and followed to achieve personal and enterprise targets.  
2.3. *Technology* is used efficiently and effectively to manage work priorities and commitments.  
2.4. Strategies for minimising and managing stress are implemented. |
| 3. Maintain and update professional skills and knowledge | 3.1. Personal skill and knowledge is assessed against position/job description, competency standards and personal goals to identify areas and priorities for development.  
3.2. *Feedback* from clients, customers and colleagues is used to improve competence.  
3.3. Opportunities for *professional development* are identified and utilised. |
| 4. Review own work performance | 4.1. Personal performance is analysed.  
4.2. Personal goals are reviewed according to changing industry directions, enterprise goals and personal performance.  
4.3. New skills and knowledge are identified to maintain professional excellence and competitive edge.  
4.4. Strategies for achieving personal goals are prepared. |

## Required Skills and Knowledge
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- apply judgement, experience and knowledge of enterprise deadlines and targets
- develop strategies for minimising and managing stress
- document professional development and training achievements
- identify and apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- identify personal career path and opportunities
- keep up-to-date with enterprise procedures and processes
- make decisions within own responsibility and accountability
- manage time effectively
- participate in internal and external networks to develop own knowledge, skills and competence
- plan and sequence tasks and activities
- respond to others openly and fairly
- review own strengths, weaknesses and level of competence and identify areas for improvement
- seek and accept constructive feedback on own performance
- use relevant *communication skills*
- utilise a range of information and communication technologies to organise and complete tasks on schedule

**Required knowledge**

Knowledge of:
- characteristics required of an effective leader in the meat industry
- enterprise goals, directions and ethical standards and values
- how personal goals contribute to the achievement of enterprise goals
- own role in achieving organisation's goals
- potential career paths available in the industry
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in the workplace and supported by a referee's report.

Context of and specific resources for assessment

Assessment must demonstrate actual management of a work load at an appropriate level.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

MTMCOR402C Facilitate Quality Assurance process

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to oversee a Hazard Analysis Critical Control Point (HACCP)-based Quality Assurance (QA) program. This unit is suitable for meat retail, smallgoods, meat processing and food service establishments producing meat and meat products for domestic and export markets. |

Application of the Unit

| Application of the unit | This unit is applicable to supervisors or those with responsibility for all or part of a meat establishment HACCP-based QA program. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMCOR203A | Apply quality assurance practices |

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Facilitate the ongoing implementation of the QA program in the workplace | 1.1. Regulatory basis for compliance with the company's HACCP-based QA program is identified.  
1.2. Nature and importance of work instructions and **Standard Operating Procedures (SOPs)** is identified and workers are coached in their implications.  
1.3. Work instructions and SOPs are written so that they comprehensively document the details required for competent performance.  
1.4. Work instructions and SOPs are reviewed for accuracy.  
1.5. Implementation of work instructions and operating procedures is monitored. |
| 2. Monitor inspection and test records | 2.1. Control and critical control points in the HACCP program are identified.  
2.2. Procedures for monitoring products and processes are identified and implemented, where appropriate.  
2.3. Critical limits and the causes for product or process not conforming are identified.  
2.4. Inspection and test records are monitored to verify product quality and to identify performance trends.  
2.5. Descriptions of proposals to introduce improved processes or procedures are contained in status reports. |
| 3. Respond to non-conforming product or processes | 3.1. Procedures for taking corrective action are identified.  
3.2. Corrective and preventative measures are implemented to prevent recurrence.  
3.3. Procedures are devised or revised to support control measures.  
3.4. Processes or conditions which could result in a breach of meat safety procedures are identified and corrective action is taken.  
3.5. Process changes are introduced and controlled so that QA requirements are accomplished. |
| 4. Review product samples and test results | 4.1. Product **sampling** procedures are identified.  
4.2. Post-collection procedures are identified according to SOPs.  
4.3. Test results are reviewed and responded to in accordance with **workplace requirements**. |
### ELEMENT | PERFORMANCE CRITERIA
---|---
5. *Calculate* yield, wastage and productivity indicators  
5.1. Yield, wastage and productivity measures are calculated to determine performance outcomes.  
5.2. Yield, wastage and productivity measures are compared with targets to determine variation of actual from planned performance.
6. Calculate *calibration* adjustments  
6.1. *Mathematical concepts* associated with equipment calibration are used to determine adjustment to settings.  
6.2. Calibration calculation is verified by checking the accuracy of the adjustment in the actual work performance.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:
- apply appropriate mathematical concepts and measures
- assemble product and process inspection, test and other quality data in prescribed format
- calibrate equipment accurately and verify calibrations
- communicate quality system and/or food safety system requirements clearly and precisely to workers
- determine and take corrective and preventative action
- establish and manage relevant project teams to develop and implement or update the necessary elements of the quality system and food safety system
- explain actual and potential problems evident from trend analysis
- apply the HACCP principles and the process for developing a QA or food safety program
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- interpret the results and trends of process monitoring
- prepare process and product status *reports* recommending changes to improve processes and procedures
- prepare reports using primary and summary data, and appropriate language
- use relevant *communication skills*
### REQUIRED SKILLS AND KNOWLEDGE

- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- utilise available technology to record, manipulate, analyse and present or report data
- verify calibrating calculations
- explain the data the enterprise uses to record performance
- interpret the resulting trends of product monitoring and testing
- monitor records and documentation for accuracy and compliance
- monitor the accurate and timely recording of quality data

### Required knowledge

Knowledge of:

- workplace, regulatory and customer requirements critical to the workplace's operation and success
- enterprise recall and traceability procedures
- post-collection procedures for handling samples
- purpose of the HACCP development and review process
- risks associated with samples and how they may be minimised
- the actual/potential problems which can occur if SOPs or work instructions or their equivalent are non-existent or not accurate
- document controls associated with a procedure change
- necessary scope of the **QA system** and food safety system to ensure requirements are met
- purpose of calibrating equipment
- purpose of SOPs and work instructions
- sampling procedure
- implementation process for a change in the process
- causes of variation and non-conformance and appropriate courses of action to rectify problems
- critical limits for enterprise product or processes
- actual and potential risks associated with uncontrolled changes in procedures
- legal obligations of the enterprise and individuals for maintenance of the QA system
- team requirements and team management processes or strategies
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Competency must be demonstrated in terms of current regulatory requirements.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>Assessment must involve a demonstration of skills in the workplace.</td>
</tr>
</tbody>
</table>
| Method of assessment | Recommended methods of assessment include:  
  - assignment  
  - quiz of underpinning knowledge  
  - simulation  
  - verified work log or diary  
  - workplace demonstration workplace project  
  - workplace referee or third-party report of performance over time.  
  Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and |
EVIDENCE GUIDE

| literacy demands of the assessment task should not be higher than those of the work role. |
| Guidance information for assessment |
| A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**SOPs** may relate to:
- personal hygiene
- food preparation and processing
- pest control
- waste disposal
- cleaning
- maintenance of premises
- product recall
- customer complaints
- calibration.

**Sampling** and testing may be conducted by:
- external agencies.

**Workplace requirements** may include:
- enterprise QA policy, practices and procedures
- enterprise-specific procedures
- OH&S requirements
- QA requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

**Calculations** may include:
- typical workplace circumstances used in primary recording and summary documentation
### RANGE STATEMENT

<table>
<thead>
<tr>
<th><strong>Mathematical concepts and measures may include:</strong></th>
<th><strong>Calibrations</strong> will typically relate to:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• estimating techniques to confirm the general accuracy of calculations&lt;br&gt;• manual operations or the use of a calculator.</td>
<td>• trends, norms, variation from norms, percentages, decimals, fractions and time series&lt;br&gt;• quality data, including time series and trends, presented in tables and graphs.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>OH&amp;S requirements</strong> may include:</th>
<th><strong>Reports</strong> may be:</th>
</tr>
</thead>
</table>

  • a manual and/or electronic system |
RANGE STATEMENT

| Communication skills may include: | • applying numeracy skills to workplace requirements  
• being appropriately assertive  
• empathising  
• establishing/using networks  
• interpreting the needs of internal/external customers  
• listening and understanding  
• negotiating responsively  
• persuading effectively  
• reading and interpreting workplace-related documentation  
• sharing information  
• speaking clearly and directly  
• working with diverse individuals and groups  
• writing to audience needs. |
|---|---|
| Regulatory requirements may include: | • Export Control Orders  
• hygiene and sanitation requirements  
• relevant Australian Standards  
• relevant regulations  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state regulations regarding meat processing. |
| QA systems may: | • incorporate food safety plans and programs. |

A food safety program systematically identifies the food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. It identifies where and how each hazard can be controlled, describes how these controls are to be monitored, the corrective action required if control conditions are not met and information to be recorded. The food safety
RANGE STATEMENT

program must comply with relevant federal, state, territory and industry legislation and regulations. Regulators may require the development of discrete food safety plans, rather than food safety plans embedded in the QA system.

## Employability Skills Information

| Employability skills | This unit contains employability skills. |

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Participate in workplace inspections | 1.1. Group processes are facilitated to identify potential OH&S hazards.  
1.2. Workplace inspections are participated in to identify potential hazards as appropriate.  
1.3. Reporting obligations are fulfilled.  
1.4. Risk control processes are implemented. |
| 2. Participate in OH&S risk control process | 2.1. Risk assessment processes are participated in.  
2.2. Hazards are controlled in accordance with hierarchy of controls.  
2.3. Workplace procedures for dealing with hazardous events are initiated.  
2.4. Information is provided to relevant parties in line with action or is reported to designated personnel. |
| 3. Monitor implementation of safe work practices | 3.1. Compliance with safe work practices is demonstrated by example.  
3.2. Safe work performance by employees is monitored.  
3.3. Safe work practices are implemented in accordance with regulatory requirements. |
| 4. Assist development of safe work practices | 4.1. Changes to work procedures or Standard Operating Procedures (SOPs) are developed in line with outcomes of risk control processes and regulatory requirements.  
4.2. Employees are consulted in relation to the development of safe work practices.  
4.3. Employee understanding of safe work procedures on-the-job is reinforced. |
| 5. Contribute to participative arrangements for the management of OH&S | 5.1. Organisational procedures for consultation over OH&S issues are implemented and monitored to ensure that all members of the work group have the opportunity to contribute.  
5.2. Issues raised through consultation are dealt with and resolved promptly or referred to the appropriate personnel for resolution in accordance with workplace procedures.  
5.3. Outcomes of consultation over OH&S issues are made known to the work group promptly. |
| 6. Contribute to workplace rehabilitation | 6.1. Contributions are made to workplace rehabilitation programs in accordance with rehabilitation co-ordinator and/or rehabilitation providers |

program as appropriate | requirements.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- demonstrate participative problem-solving techniques to identify and resolve OH&S issues
- identify and apply extent of responsibility
- identify and apply relevant *OH&S* and *workplace requirements*
- demonstrate safe work practices associated with work tasks
- identify OH&S hazards in the workplace
- identify relevant *hazard control equipment* and explain function, safe operation, maintenance and storage requirements
- use facilitation skills to ensure participation from all group members
- use relevant *communication skills*

**Required knowledge**

- procedures for reporting hazards, accidents and incidents
- risk management principles
- process for developing and altering work procedures or SOPs

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Interpret statutory and workplace requirements relating to hygiene and sanitation | 1.1. *Hygiene and sanitation, regulatory* and *workplace requirements* are explained to other workers to assist their workplace performance.  
1.2. Employer and employee rights, responsibilities and obligations are implemented in achieving hygiene and sanitation compliance. |
| 2. Monitor hygiene and sanitation performance | 2.1. Hygiene and sanitation are monitored to workplace and statutory requirements to verify compliance.  
2.2. Situations requiring action to improve hygiene and sanitation compliance are reported as part of the continuous improvement process.  
2.3. Results of process and product monitoring are evaluated for their impact on hygiene and sanitation. |
| 3. Respond to hygiene and sanitation problems | 3.1. Hygiene and sanitation issues are investigated according to established processes and procedures to achieve resolution of the problem under examination.  
3.2. Recommended action arising from the investigation is followed up and reported to ensure reinforcement and documentation of the outcomes. |
| 4. Evaluate results of microbiological testing | 4.1. Results of microbiological testing are analysed in terms of regulatory and workplace requirements.  
4.2. Corrective action is taken in response to microbiological results when required by workplace and regulatory requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- define the problem to be investigated
- demonstrate understanding and application of HACCP systems
- identify and apply *Occupational Health & Safety (OH&S) requirements*
- plan approach to the investigation
### REQUIRED SKILLS AND KNOWLEDGE

- evaluate the problem
- explain and monitor workplace hygiene and sanitation policies, practices and procedures
- **report** outcomes of the investigation
- follow up post-investigation issues
- identify action required to strengthen hygiene and sanitation compliance
- implement the monitoring procedures
- report monitoring outcomes
- use techniques for individual and team resolution of the problem
- use relevant *communication skills*

### Required knowledge

Knowledge of:

- purpose of hygiene and sanitation monitoring
- regulatory and commercial implications of inadequate control of hygiene and sanitation
- company processes and procedures to conduct a hygiene and sanitation investigation
- employer and employee rights, responsibilities and obligations regarding hygiene and sanitation
- statutory requirements related to the site at which the person is employed
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| **1.** Identify the sequence of operations for wild game harvesting in Australia | 1.1. The importance of a professional image for wild game meat industry is explained.  
1.2. The sequence of operations from harvesting to end product is described.  
1.3. The range of wild game meat products produced in Australia is identified.  
1.4. The impact of customer expectations on the wild game harvesting process is explained. |
| **2.** Interpret the commercial and regulatory environment of wild game meat harvesting | 2.1. The role of Australian Quarantine Inspection Service (AQIS) and relevant state and territory regulatory authorities are explained.  
2.2. The importance of the relevant approved arrangement, food safety plan or management plan is explained.  
2.3. Relevant sections of AS 4464:2007 Hygienic Production of Wild Game Meat for Human Consumption are explained.  
2.4. The nature of prohibited areas/locations for harvesting is explained.  
2.5. Auditing, review and micro-testing programs which affect the industry are described. |
| **3.** Operate effectively as an individual in the wild game harvesting industry | 3.1. Appropriate communication skills and styles are used.  
3.2. Occupational Health and Safety (OH&S) hazards are identified and appropriate precautions taken.  
3.3. Time and delivery obligations are managed.  
3.4. Personal hygiene requirements are described. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:

- use appropriate communication styles
**REQUIRED SKILLS AND KNOWLEDGE**

- read and interpret workplace related documentation
- maintain the professional image of the industry in the performance of duties
- learn in order to accommodate change
- collect, analyse and organise information
- work with diverse individuals and groups
- interpret the needs of internal and external customers
- monitor and evaluate own performance

**Required knowledge**

Knowledge of:

- application of Approved Arrangement or management plan to the individual's duties
- implications of company, regulator and international reviews of game harvesting industry
- role of the state and federal regulators
- the steps in the wild game supply chain
- markets for the wild game products

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Wild game** refers to:

- any vertebrate animal:
  - including a mammal, bird or reptile, but excluding fish; and
  - of a species that can be legally harvested; and
  - not husbanded in the manner of a farmed animal; and
  - is killed in the field.

- and may include:
  - kangaroos
  - wallabies
  - wild boar
  - wild goat
  - possum
  - rabbit
  - hare
  - wild game birds.

**Wild game meat products** may

- meat for human consumption
- pet meat

| 1. Prepare and maintain vehicle and equipment | 1.1. Vehicle is cleaned and hygiene checked prior to harvesting operation.  
1.2. *Consumables* are checked and replenished, as required.  
1.3. *Equipment* is checked and maintained. |
| 2. Load, transport and deliver to depot or processing works | 2.1. Carcases are loaded according to management plan and *regulatory requirements*.  
2.2. Carcases are loaded and transported to avoid contamination.  
2.3. Delivery times are planned to meet regulatory and company requirements. |
| 3. Unload *game* shot carcasses | 3.1. Carcases are unloaded according to management plan and regulatory requirements.  
3.2. Carcases are unloaded to minimise contamination.  
3.3. Delivery times at field depots or processing plants are planned and achieved to meet regulatory and company requirements. |
| 4. Clean truck and equipment | 4.1. Vehicle is cleaned to meet regulatory requirements.  
4.2. Cleaning chemicals are used that meet regulatory requirements in accordance with manufacturer instructions.  
4.3. Kit and hanging pins are cleaned in accordance with the management plan.  
4.4. Kit and hanging pins are stored so as to avoid contamination. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- Ability to:  
  - clean vehicle and equipment to a required standard  
  - maintain the vehicle
## REQUIRED SKILLS AND KNOWLEDGE

- operate the vehicle safely
- avoid contamination of carcases during loading and unloading
- hang carcases according to regulatory and corporate requirements
- plan transport to the depot to meet company and regulatory requirements
- complete required paperwork to a satisfactory standard
- use communication skills applicable to communicating with depot managers and/or processing company personnel and regulatory representatives
- clean and sanitise vehicle
- avoid contamination of kit and equipment in storage

### Required knowledge

Knowledge of:
- regulations covering game harvesting vehicles
- supply of required consumables
- relevant sections of the Australian Standard
- potable water supply requirements
- lighting requirements
- hanging requirements
- importance of air flow
- regulations associated with transport, loading and unloading of carcases
- causes of contamination during loading, transport and unloading
- methods for minimising contamination
- time requirements for refrigeration after death and sunrise
- regulatory requirements for identification and traceability of carcases
- reporting and documentation requirements
- hygiene and sanitation during unloading
- personal hygiene Standard Operating Procedures (SOP)
- work instruction for carcase receival
- depot requirements for receival of carcases
- Occupational Health and Safety (OH&S) hazards associated with handling carcases
- Ways of minimising OH&S hazards associated with handling carcases
- hygiene and sanitation requirements for game harvesting vehicles
- the purpose and uses of particular cleaning and sanitising chemicals
- importance of sanitising
- suitability of chemicals
- OH&S hazards associated with cleaning chemicals
- storage requirements for kit and hanging pins
# Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The assessment must represent a report on the candidate's ability to maintain, operate, load and unload carcases during a game harvesting exercise.

### Context of and specific resources for assessment

This competency has to be demonstrated under actual work conditions while harvesting game animals.

### Method of assessment

Recommended methods of assessment include:

- video record
- on-the-job observation by an assessor
- third party such as a regulator or depot manager
- oral or written test.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
## EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to
- eviscerate carcases hygienically and avoid contamination
- consistently follow a set routine for evisceration
- handle knives safely and hygienically
- identify species
- read and interpret required workplace documentation
- apply numeracy skills to workplace requirements
### REQUIRED SKILLS AND KNOWLEDGE

- develop practical solutions to workplace problems
- adapt to new situations
- manage time and priorities
- be open to learning and new ideas and techniques

### Required knowledge

**Knowledge of:**

- types and causes of contamination
- trimming requirements
- relevant State Regulations
- relevant sections of the Australian Standard
- rejection and disposal processes
- hygiene and sanitation requirements
- company and regulatory requirements
- causes of contamination and cross contamination
- time requirements for evisceration
- Occupational Health and Safety (OH&S) hazards associated with the field during evisceration of game carcases
- corporate requirements for tagging procedures
- state wildlife/conservation authority requirements for tagging
- property/location identification protocols
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to:
- demonstrate competent evisceration of carcases without guidance or supervision
- recognise diseases and abnormal conditions.

Context of and specific resources for assessment

This competency has to be demonstrated under actual work conditions either at a game depot or at a processing works receiving carcases straight from the field.

Method of assessment

Methods of assessment may include:
- recognition of diseases and conditions from photographic records or preserved samples
- demonstration of evisceration in the presence of an assessor
- video record of evisceration.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Abnormal conditions may include:

- diseases and conditions
- injuries and wounds.

Conditions that exclude carcases may include:

- abscess or tumours (multiple)
- contamination (dirt, vegetable matter, faeces and ingesta)
- emaciation
- fly strike
- gangrene
- nasal and eye discharge (rabbits).

Maintenance of hygiene between carcases will include:

- hand washing
- cleaning of knives
- cleanliness of clothing.

Property refers to:

- private property, farm, cattle station etc
- crown land.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- Ability to:  
  - inspect carcases and make accurate dispositions  
  - identify  
    - faecal material  
    - abnormal carcases  
    - enlarged or discoloured kidneys  
    - slimy or smelly meat surface  
    - emaciated carcases  
    - abnormal animals  
    - fly strike  
    - mould
### REQUIRED SKILLS AND KNOWLEDGE

- unacceptable contamination by other foreign matter
- inadequate dressing (bladder left in, pluck missing, kidney(s) missing etc)
- evidence of animal welfare issues (e.g. non head-shot/brain shot)
- receive and record harvester's paperwork, where applicable
- check tags for compliance
- prepare records of carcase receival
- communicate with game harvesters and processing companies
- weigh carcases (where appropriate)
- read and interpret workplace related documentation
- apply numeracy skills to workplace requirements
- share information
- show independence in identifying problems
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

### Required knowledge

- causes of contamination at receival
- hygiene and Occupational Health and Safety (OH&S) risks associated with carcase receival
- relevant sections of AS 4464:2007 Australian Standard for Hygienic Production of Wild Game Meat for Human Consumption
- identification and traceability requirements
- eligible carcases
- tag requirements
- Shire requirements
- areas prohibited to game harvesters
- lighting lux requirements to ensure adequate inspection at night
- OH&S hazards specific to receival

MTMG304A Receive and inspect wild game carcases at a processing plant

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers the competencies required to make a disposition on game carcasses as they are received at a game processing plant. |

Application of the Unit

| Application of the unit | This unit is applicable to an operator who performs pre-dressing inspection of game carcasses at a processing plant. The operator will assess carcasses according to regulatory and customer requirements and make appropriate dispositions. |

Licensing/Regulatory Information

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Perform pre-dressing inspection of *wild game* animal carcases | 1.1. Relevant work instructions and standard operating procedures (SOPs) are followed.  
1.2. *Tags* of all carcases are inspected for compliance.  
1.3. Tags of all carcases are inspected for determination of eligibility.  
1.4. All types of *contamination, diseases and abnormalities* relevant to making a disposition are identified.  
1.5. Disposition is made according to the relevant work instruction.  
1.6. Carcases are retained, where required.  
1.7. Inspection results are communicated and recorded. |
| 2. Test and record the temperature of wild game animal carcases (where applicable to the work instruction) | 2.1. Work instruction for taking carcase temperature is implemented.  
2.2. Disposition is made according to work instruction for testing carcase temperature.  
2.3. Sampling procedures for temperature testing are implemented.  
2.4. Carcase temperature is manually tested.  
2.5. Sample carcases are retained for micro-testing, where applicable. |
| 3. Weigh carcases (where part of work instruction or employee's duties) | 3.1. Relevant work instruction and SOPs are followed for weighing carcases on receival.  
3.2. Scales are prepared and tared.  
3.3. Carcases are weighed.  
3.4. Under weights are reported. |
| 4. Maintain records (where part of work instruction or employee's duties) | 4.1. Depot and truck temperature data logging records are retrieved and stored.  
4.2. Receival records are recorded and stored.  
4.3. Reports are prepared according to workplace and *regulatory requirements*.  
4.4. Issues associated with record keeping are communicated to appropriate personnel. |

### Required Skills and Knowledge
# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## Required skills

**Ability to:**
- assess harvester tags for completeness, eligibility and accuracy
- assess temperature of carcases (where required)
- identify
  - faecal material
  - ingesta
  - enlarged or discoloured kidneys
  - indication of any decomposition process
  - emaciated carcases
  - abnormal animals
  - fly strike
  - mould
  - unacceptable contamination by other foreign matter
  - faulty dressing (bladder left in, pluck missing, kidney(s) missing etc)
  - evidence of animal welfare issues (e.g. non head-shot/brain shot)
- determine which carcase needs to be retained
- communicate and record inspection results
- ensure requirements of the work instruction have been addressed
- read and interpret workplace related documentation
- apply numeracy skills to workplace requirements
- share information
- show independence during inspection
- work without supervision
- where necessary delegate
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

## Required knowledge

**Knowledge of:**
- relevant sections of AS 4464: 2007 Hygienic Production of Wild Game Meat for Human Consumption
- importance of the process and the need to control the unloading process to ensure adequate inspection
- relevant work instruction and Standard Operating Procedures (SOPs)
## REQUIRED SKILLS AND KNOWLEDGE

- state wildlife/conservation authority requirements
- company Food Safety Approved Program requirements
- Occupational Health and Safety (OH&S) hazards associated with unloading
- lighting requirements
- temperature requirements
- sampling and temperature check procedures and reporting requirements
- micro testing arrangements
- rejection and disposal processes
- carcase retain procedures
- calibration requirements
- processes for scales preparation and carcase weighing
- weight requirements and underweight reporting procedures
- company and regulatory reporting requirements
- approved tag requirements
- inspection records requirements
- evidence of diseases and conditions
- causes of contamination
- anatomy of game animals sufficient to provide meaningful and objective feedback to harvesters and depot managers
- identification and traceability regulations/requirements
- nature of data logger information
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to:
- demonstrate competent pre-dressing inspection of carcases following presentation without guidance or supervision
- recognise diseases and abnormal conditions and make dispositions.

### Context of and specific resources for assessment

This competency has to be demonstrated under actual work conditions at a game processing works receiving carcases either from field depots or direct from the field.

### Method of assessment

Assessment methods may include:
- workplace referee report
- on-the-job demonstration with assessor observation
- knowledge test
- recognition of diseases and conditions from photographic records or preserved samples
- oral and written examinations.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Wild game* refers to:

- any vertebrate animal:
  - including a mammal, bird or reptile, but excluding fish; and
  - of a species that can be legally harvested; and
  - not husbanded in the manner of a farmed animal; and
  - is killed in the field.

- and may include:
  - kangaroos
  - wallabies
  - wild boar
  - wild goat
  - possum
  - rabbit
  - hare
  - wild game birds.
### RANGE STATEMENT

| Approved tags may include: | • harvester or company tags  
<table>
<thead>
<tr>
<th></th>
<th>• state and territory wildlife authority tags.</th>
</tr>
</thead>
</table>
| Contamination may include:| • faecal material  
|                          | • ingesta  
|                          | • fly strike  
|                          | • mould  
|                          | • unacceptable contamination by other foreign matter  
|                          | • inadequate dressing (e.g. bladder left in, pluck missing and kidneys missing). |
| Diseases and abnormalities may include: | • tumours  
|                          | • abscesses  
|                          | • cysts  
|                          | • abnormal carcases  
|                          | • nasal and eye discharge (rabbits)  
|                          | • any other conditions listed in AS 4464:2007 Australian Standard for Hygienic Production of Wild Game Meat for Human Consumption that are relevant to making a disposition at this inspection point. |
| Regulatory requirements may include: | • state, territory and federal regulations administered by:  
|                          | • food authorities  
|                          | • Australian Quarantine Inspection Service (AQIS)  
|                          | • parks and wildlife authorities  
|                          | • state and territory government departments  
|                          | • relevant sections of AS 4464:2007 Hygienic production of wild game meat for human consumption. |

| 1. Store *wild game* carcase product | 1.1. Rails are used according to *workplace requirements* to transfer wild game carcase product into the chiller according to workplace and *Occupational Health and Safety (OH&S)* requirements.  
1.2. Carcase meat product is identified and stored in appropriate area according to workplace requirements.  
1.3. Carcase meat product is chilled and *stored* at correct temperature according to workplace and *regulatory requirements*.  
1.4. Carcases are spaced to achieve chilling and storage temperature requirements. |
| 2. Perform basic refrigeration maintenance | 2.1. Basic troubleshooting is performed on refrigeration units.  
2.2. Chiller operation and condition is assessed.  
2.3. Gas levels and defrost cycles are monitored.  
2.4. Manual defrost is performed. |
| 3. Monitor carcase temperature | 3.1. Deep muscle time/temperature is monitored and recorded according to workplace requirements.  
3.2. Data logger monitoring is undertaken according to regulatory and company requirements.  
3.3. Thermometers are calibrated according to workplace requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- work efficiently in teams and individually
- measure and record temperature if part of workplace requirements
- move carcase according to workplace, OH&S, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements
- store carcase product according to workplace, OH&S, hygiene and sanitation, QA
### REQUIRED SKILLS AND KNOWLEDGE

- explain workplace requirements related to storing carcase product
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

Knowledge of:

- handling procedures for carcase product
- hygiene and sanitation requirements related to storing carcase product
- methods of product transfer
- OH&S requirements to reduce potential risks
- potential OH&S risks related to storing carcase product, transferring carcases on a rail, and working in a cold environment
- regulatory requirements related to storing carcase product
- importance of storing product at the required ambient temperature
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under normal operating conditions.

Context of and specific resources for assessment

Assessment must be conducted in an accredited game depot environment.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- workplace demonstration of competency for the assessor
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the
## EVIDENCE GUIDE

| 1. Plan harvesting of *wild game* animals | 1.1. Anatomy and physical features of target animal are confirmed, including location of vulnerable organs of target animal.  
1.2. Location of habitats, habits and range of movements of target animal are identified.  
1.3. Timing of the harvest is determined based on the activity patterns of the target animal.  
1.4. Hazards associated with the harvest are identified in accordance with Occupational Health and Safety (OH&S) standards.  
1.5. Environmental and public safety risks associated with the harvest are identified. |
| 2. Prepare for the harvesting job | 2.1. Location and boundaries for the harvest are determined in accordance with the animal management plan.  
2.2. Time and duration of the harvest are checked and relevant personnel notified, where applicable.  
2.3. Precautions to minimise hazards associated with the harvest are taken in accordance with OH&S standards.  
2.4. Precautions to minimise environmental risks associated with the harvest are taken.  
2.5. Firearm licences, harvesting permits or exemptions are confirmed as current in accordance with statutory requirements.  
2.6. Firearm and ammunition types are selected to comply with those recommended for the target animal in accordance with regulatory requirements and animal ethics guidelines.  
2.7. Firearm is zeroed and test fired in accordance with industry practice.  
2.8. Firearm is stowed unloaded and in safety mode for transport. |
| 3. Harvest animals | 3.1. Personal Protective Equipment (PPE) is used in accordance with OH&S standards and statutory requirements.  
3.2. Firearm is carried safely with muzzle pointing in safe direction at all times in accordance with statutory requirements and industry practice.  
3.3. Firearm is loaded, discharged and unloaded safely in accordance with regulatory requirements.  
3.4. Target animal is inspected pre-harvest for suitability. |
**ELEMENT** | **PERFORMANCE CRITERIA**
--- | ---
3.5. | Firearm is aimed at vulnerable sites on the animal according to target species.
3.6. | Each target animal is killed using a minimum of shots.
3.7. | Each target animal is checked to ensure it is dead prior to selecting the next target animal.
3.8. | Target animals that have not been killed are destroyed cleanly in a humane manner in accordance with animal welfare regulations and statutory requirements.
3.9. | Carcasses are bled in accordance with industry practice.
4. | Clean and store equipment and material
4.1. | Firearms are maintained and stored in accordance with manufacturer instructions and statutory requirements.
4.2. | Ammunition is stored in accordance with statutory requirements.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**
This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- identify hazards and implement safe operating procedures
- plan own work activities
- manage own time
- maintain and store weapons
- handle weapons
- ability to assess viability of shot
- use weapons to harvest accurately
- minimise animal trauma

**Required knowledge**

Knowledge of:
- OH&S, environment, public risk and animal welfare legislative and enterprise
**REQUIRED SKILLS AND KNOWLEDGE**

- common law principles relating to property, stock, duty of care and due diligence
- animal life cycles and behaviours
- anatomy and physical features of the animal
- firearms safety
- suitable firearms and ammunition for target species
- emergency procedures appropriate to the firearms handling
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- confirm the species to be harvested
- prepare and handle ammunition and weapons safely
- ensure the harvesting area is clear and notifications have been made where necessary
- shoot the animal in a body site appropriate to the target species that causes instant death and is prescribed in the relevant code of practice.

### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
### EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
<th>Element 3 can be assessed in the field culling game or utilising a realistic simulation in the field.</th>
</tr>
</thead>
</table>
| Method of assessment | This unit may be assessed holistically with other units. The assessment strategy for this unit must verify required knowledge, skill and application using the following assessment methods:  
  - field assessment of harvest skills  
  - oral/written questions  
  - professional conversations  
  - direct observation.  
  Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

| 1. Manage animals in lairage | 1.1. Animals are received into lairage according to workplace requirements.  
1.2. Animals in lairage are handled to minimise stress and according to workplace requirements.  
1.3. Animal welfare issues in relation to the handling of animals in lairage are dealt with according to regulatory and workplace requirements including provision of food and water.  
1.4. Records of all livestock movements on plant are maintained according to workplace requirements.  
1.5. Animals are handled according to Occupational Health and Safety (OH&S) requirements. |
| 2. Present animals for slaughter | 2.1. Animals are selected for slaughter according to product specifications and workplace requirements.  
2.2. Animals are prepared for slaughter at a rate to maintain productivity according to workplace requirements.  
2.3. Animals are presented for slaughter in a suitable condition to maintain the standards of product.  
2.4. Animals are presented for slaughter according to workplace, animal welfare, regulatory and OH&S requirements. |
| 3. Maintain flow and order of animals | 3.1. Animals are made available to meet start-up times and chain speed requirements.  
3.2. Flow and order of animals is maintained according to start-up times and chain speed requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- ensure mob or lot separation and comply with regulatory or importing country's requirements
### REQUIRED SKILLS AND KNOWLEDGE

- follow workplace recordkeeping procedures for receipt of animals
- keep accurate stock receipt records
- plan and maintain the flow and order of animals to meet production requirements
- move stock around pens and lairage in accordance with workplace requirements
- comply with animal welfare requirements for animals kept in lairage
- deal with sick and injured stock in accordance with workplace and regulatory requirements
- utilise stock identification systems accurately and comply with regulatory requirements related to the identification of stock
- work effectively as an individual and as part of a team
- apply relevant *communication skills*
- fulfil OH&S requirements for handling stock in lairage
- meet workplace and regulatory requirements in relation to animal welfare requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work cooperatively with other stock handlers

### Required knowledge

- workplace Standard Operating Procedures (SOPs) and work instructions for animal handling
- animal welfare requirements
- regulatory and workplace requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when meeting the demands of moving stock to supply normal production requirements.

### Context of, and specific resources for assessment

Assessment must be undertaken in an operating abattoir.

### Method of assessment

- **Recommend**ed methods of assessment include:
  - quiz of underpinning knowledge
  - workplace demonstration
  - workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment
A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Lairage** facilities will vary according to the species and may include:
- paddocks
- pens
- sheds
- yards.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

**Livestock handling** methods may include the use of goads such as:
- audio
- dogs
- electrical
- mechanical.

**Records of livestock movement** may include:
- receivable documents
- reconciliations of livestock on hand
- slaughter data.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
RANGE STATEMENT

| Selection of suitable livestock for slaughter may require consideration of: | • health status  
• length of lairage period  
• product specification. |
| --- | --- |
| Product specification may be described by: | • breed or type  
• carcase characteristics (e.g. age, sex, weight)  
• skin, hide or coat characteristics  
• species  
• standard of preparation and presentation. |
| Animal preparation may include: | • whole or partial wash down. |
| Standards of product may be described by: | • customer specifications  
• industry standards  
• workplace grades or classification. |
| Regulatory requirements may include: | • animal welfare  
• hygiene and sanitation requirements  
• relevant regulations  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state and territory regulations regarding meat processing. |
| Communication skills may include: | • listening and understanding  
• reading and interpreting workplace documentation  
• sharing information |
### RANGE STATEMENT

- speaking clearly and directly
- working and communicating with diverse individuals and groups.

1.3. *Occupational Health and Safety (OH&S) requirements* are identified and complied with.  
1.4. Animal welfare requirements are identified and met.  
1.5. Stock is segregated in accordance with work instructions.  
1.6. Requirements for mob separation are identified and complied with. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- feed the race to maintain production requirements
- feed the race without causing undue stress to the animals
- maintain segregation according to workplace requirements
- maintain the flow of animals to meet production requirements
- use goads in accordance with work instructions, OH&S and animal welfare requirements
- restrain the animal to workplace and OH&S requirements
- apply relevant *communication skills*
- cooperate and communicate with other stock handlers to move stock
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- animal welfare requirements
- correct use of goads
### REQUIRED SKILLS AND KNOWLEDGE

- regulatory requirements for segregation (e.g. cattle for the European Union)
- required segregation of animals
- Standard Operating Procedures (SOPs) and work instructions relevant to feeding the race
- workplace requirements related to feeding the race and the reasons for these requirements
- characteristics of breeds, sex and age of animals as they relate to work duties
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while complying with workplace and regulatory requirements and at normal production speed at the plant.

Context of, and specific resources for assessment

The skills component of this unit must be assessed at a functioning abattoir.

Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| 1. Inspect calves available for collection from farms | 1.1. Calves are checked to meet specifications for transport and slaughter.  
1.2. Calves are checked to meet regulatory requirements.  
1.3. Calves not suitable for transport or slaughter are identified and rejected, where necessary.  
1.4. Reasons for rejecting calves are explained to farmers (where necessary). |
| 2. Weigh and load young calves, where applicable | 2.1. Calves are lifted safely and humanely onto scales.  
2.2. Calves are loaded safely onto truck or trailer.  
2.3. Weights are recorded.  
2.4. Occupational Health and Safety (OH&S) risks are identified and minimised when loading calves. |
| 3. Prepare paperwork associated with purchase of young calves | 3.1. National Livestock Identification System (NLIS) and National Vendor Declaration (NVD) requirements for calves to be transported are completed.  
3.2. Paperwork is prepared in accordance with company and regulatory requirements. |
| 4. Transport young calves | 4.1. Collection trips are planned to meet company and regulatory requirements.  
4.2. Calves are transported in accordance with company and regulatory requirements.  
4.3. Calves are monitored in transport in accordance with company and regulatory requirements.  
4.4. Appropriate action is taken to manage sick or injured calves. |
| 5. Unload calves | 5.1. Calves are unloaded safely and humanely according to company and regulatory requirements.  
5.2. Required paperwork is completed and presented. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills
### REQUIRED SKILLS AND KNOWLEDGE

**Ability to**
- identify calves fit for transport and processing
- communicate to explain reasons for refusing selection of calves
- load, transport and unload bobby calves humanely, safely and hygienically
- accurately complete relevant paperwork
- plan pick up runs to meet regulatory and company requirements for time off feed
- identify and observe OH&S requirements when handling calves
- read and interpret relevant workplace documents
- share information
- manage time and priorities

**Required knowledge**

Knowledge of:
- relevant company and regulatory requirements
- relevant calf behaviour
- animal welfare issues associated with handling and transporting young calves
- relevant paperwork for purchasing
- record keeping requirements
- NLIS requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competencies for handling, loading, transport and unloading of calves must be demonstrated using live animals.

### Context of and specific resources for assessment

Assessment must be conducted under normal operating conditions.

### Method of assessment

Recommended forms of assessment include:
- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Check facilities and equipment | 1.1. Required facilities and equipment are identified.  
1.2. The work site, facilities and equipment are checked for hazards.  
1.3. Repairs and maintenance of facilities and equipment required for the unloading of livestock are carried out or reported where necessary.  
1.4. Personal Protective Equipment (PPE) and clothing is used and stored. |
| 2. Unload animals | 2.1. Animals are unloaded in a safe manner to comply with animal welfare, company and regulatory requirements.  
2.2. Livestock is identified, counted and recorded according to enterprise procedures.  
2.3. Workplace records are maintained according to workplace and regulatory requirements.  
2.4. Documentation is completed according to regulatory and transporter requirements.  
2.5. Agreement on condition of animals is reached with the transporter. |
| 3. Perform appropriate animal health procedures | 3.1. Stock is sorted, if required, with sick or injured stock segregated according to workplace and regulatory requirements.  
3.2. Animal health treatments are performed off truck as instructed.  
3.3. Animals are fed and watered to enterprise requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- prepare equipment and working dogs (when used) for handling animals
- monitor animal behaviour and recognise irregularities
**REQUIRED SKILLS AND KNOWLEDGE**

- provide due care and handle animals safely and humanely
- use goads (where applicable), in accordance with work instructions, *Occupational Health and Safety (OH&S)* and animal welfare requirements
- calculate animal numbers and assess and calculate feed and water requirements
- apply relevant *communication skills*
- cooperate and communicate with others to facilitate unloading stock
- work effectively as an individual and as part of a team
- comply with relevant OH&S and animal welfare legislative requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively with others to facilitate unloading of stock

**Required knowledge**

Knowledge of:

- animal basic health and nutritional requirements
- animal herding and flocking behaviour
- working dogs' uses and techniques (where appropriate)
- animal handling and movement methods and techniques
- animal welfare standards
- Standard Operation Procedures (SOPs) and work instruction relevant to unloading stock
- relevant OH&S and animal welfare legislative requirements
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competence requires evidence of the ability, under supervision, to:
  - safely and humanely unload animals in a calm and controlled manner
  - anticipate animal behaviour
  - provide and maintain appropriate animal health and nutritional requirements.

Evidence must also be demonstrated in the employment of safe workplace and positive environmental practices. |

| Context of, and specific resources for assessment | Assessment must occur in the workplace under normal production conditions. |

| Method of assessment | Recommended methods of assessment include:
  - workplace demonstration
  - quiz of underpinning knowledge
  - workplace referee or third-party report of performance over time. |
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Facilities and equipment may include:
- fixed and portable loading ramps
- pens
- prods
- yards.

Hazards may include:
- animal movement and handling
- dust
- gates
- moving trucks and other vehicles
- solar radiation
- uneven work surfaces.

Animals include:
- cattle
- goats
- horses
- pigs
- sheep.

Safe manner includes:
- animal handling including zoonoses control (e.g. Q fever)
### RANGE STATEMENT

- hazard and risk control
- manual handling
- outdoor work including protection from solar radiation, dust and noise
- the appropriate use and maintenance of personal protective equipment.

#### Regulatory requirements may include:
- Animal Welfare Standards
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

#### Identification system used may include:
- tail tags
- other means of identification of animals including electronic systems.

#### Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

#### OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify and explain animal handling practices                       | 1.1 Work instructions and work practices for the welfare and handling of animals are identified  
1.2 The impact on the quality of meat of stressing and/or injuring animals is identified  
1.3 Defects in meat quality resulting from poor handling techniques of live animals are identified |
| 2. Identify and explain animal welfare requirements                     | 2.1 Risks to animals being handled are identified  
2.2 Workplace and regulatory requirements for handling animals humanely are identified and explained  
2.3 Relevant sections of the applicable Animal Welfare Standard and relevant legislation are identified and explained |
| 3. Identify and explain Workplace Health and Safety (WHS) requirements for handling animals safely | 3.1 Risks associated with handling animals are identified  
3.2 WHS requirements associated with handling animals are identified |
| 4. Identify and explain livestock identification procedures             | 4.1 Individual animal identification procedures are identified, where appropriate, according to workplace, WHS and regulatory requirements  
4.2 The purpose of individual mob and lot identification is explained  
4.3 Lots are identified according to workplace requirements  
4.4 The consequences of incorrect lot identification are explained |
| 5. Identify and explain requirements for dealing with sick and injured stock | 5.1 Workplace and regulatory requirements are explained  
5.2 Humane destruction (euthanasing) arrangements are described |
| 6. Apply animal welfare and handling techniques                        | 6.1 Animals are handled in a way that complies with workplace requirements and minimises stress  
6.2 Flow of stock to meet processing requirements is maintained  
6.3 Animals are handled safely in accordance with workplace and WHS requirements  
6.4 Sick and injured stock are handled in accordance with workplace requirements |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**
- identify sick or injured animals
- identify out-of-specification animals
- accurately complete records of livestock movement
- communicate effectively and appropriately with fellow workers (e.g. to exchange information with stockperson)
- identify signs and causes of stress in animals
- comply with workplace procedures and requirements for handling livestock and minimising livestock stress
- maintain flow of livestock with minimal livestock stress
- identify the relevant sections of the animal welfare standard and code
- identify relevant regulatory requirements

### Required knowledge

**Knowledge of:**
- workplace procedures for receipt and/or dispatch of animals
- workplace requirements for maintaining flow and order of animals
- impact of stress and injury on the animal
- impact of stress and injury on product quality, including carcases, hides and skins
- stock identification systems including National Livestock Identification System (NLIS)
- lot identification of stock and its importance with regard to trace back
- WHS hazards of handling stock
- feed and water requirements where relevant
- the relevant sections of the animal welfare standard and code
- relevant work instructions and Standard Operating Procedures (SOPs) associated with tasks undertaken
- customer and community expectations
- workplace and regulatory requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**
- animal handling practices
- Key Performance Indicators (KPIs)
- enterprise-specific requirements
- hygiene and sanitation requirements
- WHS requirements
- Quality Assurance requirements
- SOPs and work instructions
- the ability to perform the task to workplace requirements

**Regulatory requirements may include:**
- relevant legislation such as the Export Control Act and Animal Welfare Acts
- hygiene and sanitation requirements
- relevant regulations and Australian Standards and Codes of Practice
- National Livestock Identification Systems (NLIS)
- Animal Welfare Standards

**WHS requirements may include:**
- enterprise WHS policies, procedures and programs
- WHS legal requirements
- Personal Protective Equipment (PPE)
- requirements set out in standards and codes of practice

**Suitability of animals for slaughter may require consideration of:**
- age
- condition
- gender
- breed
- health status
- length of lairage period

| 1. Conduct pre-operational check of stimulation equipment | 1.1. Electrical stimulation unit is regularly checked to ensure it is in good working order.  
1.2. Equipment is maintained by cleaning electrodes (where applicable).  
1.3. Circuit boards or cards are replaced if a fault develops (where this forms part of operator's work instructions). |
| 2. Follow effective electrical stimulation procedures | 2.1. Electrical stimulation is applied within the required time after stunning.  
2.2. Constant contact with electrodes is ensured during stimulation.  
2.3. *Occupational Health and Safety (OH&S) requirements* are identified and met.  
2.4. Stimulation is run to its full time according to the workplace or manufacturer's specifications for the type of stimulation equipment.  
2.5. When using the nasal or rail methods, the carcase contact with the rubbing bar is maintained during electrical stimulation to ensure stimulation is effective.  
2.6. Loss of voltage is prevented by keeping carcasses separated during stimulation.  
2.7. Peak voltage levels are checked and maintained to ensure effective stimulation.  
2.8. Carcase is stimulated in accordance with workplace requirements. |
| 3. Check for ineffective stimulation | 3.1. Electrical stimulation unit is checked regularly to ensure that current is maintained to specified level, stimulation is applied within specified time limits after stunning, and duration of stimulation meets workplace requirements.  
3.2. Electrodes are checked to ensure they are attached during stimulation. |

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- conduct pre-operational checks
- conduct effective electrical stimulation of carcases according to workplace requirements
- stimulate carcases within the correct time after stunning
- ensure correct voltage levels are used as well as minimum and maximum stimulation times
- check for ineffective stimulation
- keep stimulation units well maintained and in good working order
- apply relevant *communication skills*
- comply with the OH&S requirements for operating electrical stimulation equipment
- work effectively as an individual and as part of a team
- apply relevant *regulatory* and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:
- the basic operations of the stimulator
- the benefits of effective stimulation
- the purpose of electrically stimulating a carcase
- events which would indicate that the stimulation is ineffective
- the relevant work instruction
- relevant regulatory and workplace requirements
- OH&S requirements
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</th>
</tr>
</thead>
<tbody>
<tr>
<td>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</td>
</tr>
<tr>
<td>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</td>
</tr>
<tr>
<td>All assessment must be conducted against Australian meat industry standards and regulations.</td>
</tr>
</tbody>
</table>

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated in the workplace at normal chain speed. |

### Context of, and specific resources for assessment

| Assessment must be conducted in the workplace under normal production conditions. |

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Remove the head | 1.1. Head is severed at the base of the jaw (i.e. the atlanto-occipital joint)  
1.2. Head is removed in accordance with work instructions including, where relevant, compliance with Specified Risk Material (SRM) requirements  
1.3. Head is removed according to *Occupational Health and Safety (OH&S) requirements*  
1.4. Head is forwarded for further processing, or disposed of, according to *workplace requirements*  
1.5. Machinery for *removal of head* is prepared, operated and maintained in accordance with work instructions (where this is relevant to a particular work instruction) |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:
- use correct cutting lines for removing head
- remove head in accordance with work instructions
- use safe and hygienic knife skills to remove head (where manually removed)
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- comply with OH&S requirements related to removing head
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

- basic anatomy of muscles, bones and joints of head for relevant species
- cutting lines for removing head
- how and when problems with equipment are reported
- the work instruction for removing heads
- relevant regulatory requirements
- potential contamination and cross-contamination associated with removing head
- issues associated with SRM material
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment of skills must take place during production time.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

### Guidance information for assessment

| 1. Remove hair, ears, eyelids and snout | 1.1. Carcase is shaved correctly and ears, eyelids and snout are removed according to workplace requirements.  
1.2. Work is performed in accordance with Occupational Health and Safety (OH&S) requirements.  
1.3. Ears, eyelids and snout are removed without contamination or cross-contamination in accordance with hygiene and sanitation requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- shave and remove ears, eyelids, snout and trotters in accordance with workplace and OH&S requirements
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- the purpose of a pre-evisceration trim
- the quality implications of an incorrect trim
- the work instruction for the pre-evisceration trim
- relevant regulatory requirements
- possible sources of contamination and cross-contamination and methods used to avoid these situations
## Evidence Guide

1.3. Potential sources of contamination are identified and managed according to workplace requirements.  
1.4. Hides are numbered where part of the task. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- number heads and carcases in accordance with work instructions  
- apply mathematical operations to a level required for accurate numbering  
- work effectively as an individual and as part of a team  
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:

- hygiene practices for minimising contamination  
- the consequences of incorrect correlation of heads and carcases  
- the reasons for correlating heads and carcases  
- the work instruction for numbering carcases and heads  
- potential sources of contamination and cross-contamination
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
### RANGE STATEMENT

- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear

Requirements set out in standards and codes of practice.

### Mathematical operations may include:

- correlation and numbering of carcases, heads and hides
- different correlation systems for hides, heads, viscera and carcases
- different marking and numbering regimes
- use of computer screens and software packages to record information.

MTMP2025B Bag tail

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to bag the tail to prevent contamination. |

Application of the Unit

| Application of the unit | This unit is applicable to workers on the slaughter floor. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A | Sharpen knives (when brushes are removed as part of this task) |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Bag tail and secure bag | 1.1. Tail is bagged and the bag secured in accordance with workplace requirements.  
1.2. Stock of bags and ties are monitored and replenished in accordance with workplace requirements.  
1.3. Brush is removed (where applicable). |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate bagging of tails and removal of brush
- demonstrate the capacity (at production speed) to:
  - maintain stocks of bags and ties, using estimation and calculation
  - monitor stocks of bags and ties, using estimation and calculation
- use a knife safely to remove tail brushes, where applicable
- work effectively as an individual and as part of a team
- follow work instructions for bagging tails
- apply relevant Occupational Health and Safety (OH&S) and regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- the reason for bagging tails
- relevant OH&S and regulatory requirements
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at chain speed.

### Context of, and specific resources for assessment

Assessment must be conducted on the slaughter floor.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - personal protective equipment (PPE):
    - coats and aprons
    - ear plugs or muffs
    - eye and facial protection
    - head-wear
    - lifting assistance
    - mesh aprons
    - protective boot covers
    - protective hand and arm covering
    - protective head and hair covering
    - uniforms
    - waterproof clothing

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:
- Export Control Act
- relevant regulations
- state and territory regulations regarding meat processing.

Recording may be undertaken:
- manually or electronically

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
## RANGE STATEMENT

- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.
- set out in standards, codes of practice etc.

### Communication skills may involve:

- listening and understanding
- reading and recording data
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

### Residue testing is:

- programmed according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- perform start-up operations according to workplace and manufacturer's requirements
- locate and open correct vein for flushing
- flush carcase hygienically and safely according to workplace and manufacturer's requirements
- monitor reservoir of flushing solution
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- the purpose of carcase flushing
- indicators of ineffective flushing
- the work instructions for the operation of the pump and flushing process
- relevant regulatory requirements

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
**RANGE STATEMENT**

| Regulatory requirements may include: | • Export Control Act  
• hygiene and sanitation requirements  
• relevant regulations  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state and territory regulations regarding meat processing. |

</table>
| 1. Confirm equipment settings | 1.1. Automated equipment safety guards are secured and in place.  
1.2. Equipment settings are selected and confirmed in accordance with workplace and Occupational Health and Safety (OH&S) requirements. |
| 2. Operate equipment for scalding or de-hairing | 2.1. Scalding or de-hairing equipment is powered in accordance with regulatory and workplace requirements.  
2.2. Scalding or de-hairing equipment is operated in accordance with workplace and manufacturer's specifications.  
2.3. Scalding or de-hairing equipment is operated in accordance with OH&S requirements.  
2.4. Equipment is operated within its capacity and the capacity of the operator.  
2.5. Carcase is scalded and de-haired to workplace requirements. |
| 3. Identify and report defects | 3.1. Carcases leaving the process are monitored to ensure de-hairing meets workplace requirements.  
3.2. Defects are monitored and corrective action is taken in accordance with workplace requirements. |

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- Ability to:
  - operate and monitor de-hairer according to manufacturer's specifications and work instructions
  - monitor defects in processing and take corrective action
  - report defects in accordance with workplace requirements
  - work effectively as an individual and as part of a team
  - take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
### REQUIRED SKILLS AND KNOWLEDGE

- use *communication* skills relevant to the task

#### Required knowledge

Knowledge of:
- defects to be identified and reported in accordance with workplace requirements
- OH&S requirements of operating machinery
- potential sources of contamination and ways of preventing it
- work instructions related to operating scalding or de-hairing equipment
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.  
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.  
| Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.  
| All assessment must be conducted against Australian meat industry standards and regulations. |

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated at normal chain speed. |

### Context of, and specific resources for assessment

| Assessment must occur in the workplace under normal production conditions. |

### Method of assessment

| Recommended methods of assessment include:  
| • quiz of underpinning knowledge  
| • workplace demonstration  
| • workplace referee or third-party report of performance over time.  
| Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
# EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**

- enterprise-specific requirements
- OH&S requirements

Required Skills and Knowledge

REQUICK SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- operate a rise and fall platform in accordance with work instructions and OH&S requirements for a particular task (e.g. trimming)
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- relevant regulatory requirements
- workplace requirements for the operation of a rise and fall platform
- basic operating principles of the rise and fall platform
- OH&S requirements related to the operation of a rise and fall platform
**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at chain speed while performing a task at a work station that utilises a rise and fall platform.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- demonstrate the basic start-up operations and routine maintenance as prescribed in the work instructions
- operate the nose roller in accordance with work instructions
- operate the nose roller in accordance with OH&S requirements
- clean and sanitise, and follow basic maintenance program for the nose roller in accordance with workplace requirements
- dispose of waste in accordance with workplace requirements
- keep work area clean and tidy
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- OH&S requirements associated with nose roller
- basic operation of nose roller
- uses of head meat and offal
REQUIRED SKILLS AND KNOWLEDGE

- work instruction for operating a nose roller
- relevant regulatory requirements
- sources of contamination of heads
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
| These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated at chain speed.

### Context of, and specific resources for assessment

| Assessment must occur in the workplace under normal production conditions.

### Method of assessment

| Recommended methods of assessment include:
| • quiz of underpinning knowledge
| • workplace demonstration
| • workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Workplace requirements may include: | enterprise-specific requirements  
| | OH&S requirements  
| | Quality Assurance (QA) requirements  
| | Standard Operating Procedures (SOPs)  
| | the ability to perform the task to production requirements  
| | work instructions. |

| OH&S requirements may include: | enterprise OH&S policies, procedures and programs  
| | OH&S legal requirements  
| | Personal Protective Equipment (PPE) which may include:  
| | coats and aprons  
| | ear plugs or muffs  
| | eye and facial protection  
| | head-wear  
| | lifting assistance  
| | mesh aprons  
| | protective boot covers  
| | protective hand and arm covering  
| | protective head and hair covering  
| | uniforms  
| | waterproof clothing  
| | work, safety or waterproof footwear |

REQUICKED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- operate cutter in accordance with OH&S requirements
- operate pneumatic cutter to workplace requirements for one work station
- demonstrate procedures for disposal of off-cuts
- demonstrate maintenance and sterilisation of cutter
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- basic operating principles of pneumatic cutter
- OH&S issues associated with use of the cutter
- relevant regulatory requirements
REQUIRED SKILLS AND KNOWLEDGE

- potential sources of contamination and cross-contamination
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at a work station using a cutter at normal chain speed. The pneumatic cutter must be operated for at least one workstation (e.g. cutting hocks, horns or trimming necks) at the speed of the chain.

### Context of, and specific resources for assessment

Assessment must be conducted in the workplace under normal conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be
Guidance information for assessment

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- operate mincer in accordance with work instructions and manufacturer specifications
- monitor minced product to ensure compliance with customer or workplace specifications
- monitor product to be minced to ensure compliance with QA specifications
- consistently follow hygiene and sanitation procedures associated with the operation of the mincer
- report equipment faults according to workplace requirements
- maintain mincer in accordance with work instructions
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

**Required knowledge**

Knowledge of:
- operation and adjustment of the mincer
### REQUIRED SKILLS AND KNOWLEDGE

- work instructions for operating the mincer
- relevant regulatory requirements
- potential OH&S risks
- potential sources of contamination

| Recommended methods of assessment include:  
  - quiz of underpinning knowledge  
  - workplace demonstration  
  - workplace referee or third-party report of performance over time.  
  
  Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
RANGE STATEMENT

- requirements set out in standards and codes of practice.

Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

Communication skills may include:
- listening and understanding
- sharing information
- speaking clearly and directly
- working and communication with diverse individuals and groups.

### Overview of assessment

- The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

- These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

- Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

- All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Competency must be demonstrated in a processing environment and over a period of time.

### Context of, and specific resources for assessment

- Assessment tasks must be comprehensively customised to gather evidence specific to the new technology being implemented in a meat processing or retailing environment.

### Method of assessment

- Recommended methods of assessment include:
  - assignments
  - debriefs
  - quiz of underpinning knowledge
  - simulation
  - verified work log or diary
  - workplace demonstration
  - workplace project
  - workplace referee or third-party report of performance over time.
EVIDENCE GUIDE

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- operate sterivac equipment in accordance with OH&S requirements
- operate sterivac equipment to remove contamination to workplace requirements
- identify contamination to be removed
- remove contamination in accordance with workplace requirements
- maintain sterivac equipment in accordance with workplace requirements
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

Knowledge of:
- basic operating principles of pneumatic sterivac equipment
- OH&S issues associated with use of sterivac equipment
## REQUIRED SKILLS AND KNOWLEDGE

- consequences of not removing contamination to workplace requirements
- work instructions for operating the sterivac equipment
- relevant regulatory requirements
- potential sources of contamination and cross-contamination
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be assessed at normal chain speed and over a period of time.

### Context of, and specific resources for assessment

Assessment of skills must be conducted in an operating plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. | 1. Prepare rib puller for operation | 1.1. Rib puller is cleaned according to workplace requirements, where part of work instructions.  
1.2. Pre-operational checks are completed according to workplace requirements.  
1.3. Basic maintenance (e.g. replacement of strings) is undertaken according to workplace requirements. |
| 2. Operate rib puller | 2.1. Rib puller is operated according to work instructions.  
2.2. Rib puller is operated according to workplace Occupational Health and Safety (OH&S) requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- undertake pre-operational checks according to workplace requirements
- operate the rib puller in accordance with workplace OH&S requirements, Standard Operating Procedures (SOPs) and work instructions
- undertake routine maintenance according to workplace requirements
- clean rib puller in accordance with workplace requirements
- report equipment faults to supervisor either verbally or in writing in accordance with workplace requirements
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.
- use relevant communication skills

Required knowledge

Knowledge of:

- cleaning and maintenance requirements of the rib puller
- work instructions for operating the rib puller
## REQUIRED SKILLS AND KNOWLEDGE

- relevant regulatory requirements
- potential sources of contamination and cross-contamination
- ways of minimising contamination
Evidence Guide

<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency has to be demonstrated at normal chain speed. |

| Context of, and specific resources for assessment | Assessment must take place in an operating meat processing plant. |

| Method of assessment | Recommended methods of assessment include:  
- quiz of underpinning knowledge  
- workplace demonstration  
- workplace referee or third-party report of performance over time.  
Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
EVIDENCE GUIDE

Guidance information for assessment
A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
RANGE STATEMENT

- requirements set out in standards and codes of practice.

Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

Communication skills may include:
- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- activate processing equipment to assess its readiness for operational use
- perform running adjustments according to workplace requirements and manufacturer’s specifications
- operate adjustment tools and equipment correctly
- **report** any equipment faults and adjustments required either verbally or in writing to supervisor, according to workplace procedures
- work effectively as an individual and as part of a team
- apply relevant **Occupational Health and Safety (OH&S)** and **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use **mathematical applications** relevant to the task
- use relevant **communication skills**

Required knowledge

Knowledge of:

- selection criteria for meat for curing or corning process
REQUIRED SKILLS AND KNOWLEDGE

- the meat curing process
- the term 'osmosis' in relation to the curing process
- effects of curing on shelf life and taste of product
- purpose and effect of brine on meat
- purpose of correct water temperature and correct additive sequence
- purpose and use of processing equipment used in curing and corning products
- reasons for pickling to correct pump percentage and yield requirements
- safe and correct operation of processing equipment
- conditions under which equipment may need adjusting
- relevant OH&S and regulatory requirements
- procedures for cleaning processing equipment

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Meat** may include:
- beef
- game meat
- lamb
- mutton
- pork
- veal
- other meat species or products.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Product specifications** may vary according to:
- customer and workplace requirements.

**Reports** may:
- be in diagrammatic, sketch, tabular and graphic formats
- be presented in writing, in standard formats
**RANGE STATEMENT**

- be presented orally
- include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffis
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Regulatory requirements may include:**
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- federal, state and territory and regulations regarding meat processing.

**Mathematical applications may include:**
- collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

**Communication skills may include:**
- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform pre-operative checks
- operate head splitter hygienically and safely
- identify potential OH&S hazards
- store split heads hygienically according to workplace requirements
- report equipment faults to supervisor either verbally or in writing in accordance with workplace requirements
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

- standard of head splitting required to meet Quality Assurance (QA) requirements
- relevant work instructions and SOPs
- relevant regulatory requirements
- potential sources of contamination and measures to minimise contamination
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |
| --- | --- |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated at normal production speed. |
| Context of, and specific resources for assessment | Assessment must be conducted in an operating meat processing plant. |

| Method of assessment | Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

MTMP2051C Trim neck

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to trim contamination from the neck of a carcase. |

Application of the Unit

| Application of the unit | This unit is applicable to workers on a slaughter floor, knackery, boning room or game processing plant, who are responsible for trimming the neck. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A Sharpen knives |

### Employability Skills Information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate safe and hygienic neck trimming
- trim neck to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- types of contamination to be trimmed
- OH&S, hygiene and sanitation, and customer specifications related to trimming neck
- potential sources of contamination of product and how it is avoided
- relevant regulatory requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
|                        | These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
|                        | Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
|                        | All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated on the slaughter floor or in a boning room at the normal rate of production.

### Context of, and specific resources for assessment

Assessment must be conducted in a meat processing plant.

### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements** may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
### RANGE STATEMENT

- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

## Required Skills and Knowledge

<table>
<thead>
<tr>
<th>REQUIRED SKILLS AND KNOWLEDGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>This section describes the skills and knowledge required for this unit.</td>
</tr>
</tbody>
</table>

### Required skills

- Ability to:
  - identify spinal cord and dura mater to be removed
  - remove spinal cord cleanly and safely according to workplace requirements
  - work effectively as an individual and as part of a team
  - apply relevant regulatory requirements
  - take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

### Required knowledge

- Knowledge of:
  - QA specifications for spinal cord removal
  - reasons for the removal of the spinal cord
  - where relevant, SRM and Bovine spongiform encephalopathy (BSE)
  - relevant work instructions and *Occupational Health and Safety (OH&S)* requirements
  - relevant regulatory requirements
  - customer specifications
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</td>
</tr>
</tbody>
</table>

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

|   | Competency must be demonstrated at the normal chain speed. |

### Context of, and specific resources for assessment

|   | Assessment has to be demonstrated in a meat processing plant. |

### Method of assessment

|   | Recommended methods of assessment include:  
|---|---|
|   | quiz of underpinning knowledge  
|   | workplace demonstration  
|   | workplace referee or third-party report of performance over time  
|   | Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

### Guidance information for assessment

|   | A current list of resources for this unit of competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Workplace requirements may include: | • enterprise-specific requirements  
|                                  | • OH&S requirements  
|                                  | • QA requirements  
|                                  | • Standard Operating Procedures (SOPs)  
|                                  | • the ability to perform the task to production requirements  
|                                  | • work instructions |

| Regulatory requirements may include: | • Export Control Act  
|                                  | • hygiene and sanitation requirements  
|                                  | • relevant regulations  
|                                  | • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
|                                  | • state and territory regulations regarding meat processing |

| OH&S requirements may include: | • enterprise OH&S policies, procedures and programs  
|                                  | • OH&S legal requirements  
|                                  | • Personal Protective Equipment (PPE) which may include:  
|                                  | • coats and aprons  
|                                  | • ear plugs or muffs  
|                                  | • eye and facial protection  
|                                  | • head-wear  
|                                  | • lifting assistance

Required Skills and Knowledge

REQUdED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify potential OH&S hazards
- operate the equipment to break jaws according to all workplace requirements
- store heads correctly prior to boning
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use communication skills appropriate to the task

Required knowledge

Knowledge of:
- potential sources of contamination and cross-contamination
- methods of minimising contamination and cross-contamination
- OH&S requirements for operating the equipment
- work instructions for operating a jaw breaker
- relevant regulatory requirements
- Personal Protective Equipment (PPE) requirements of this job

                                    4.2. Weights are recorded according to workplace requirements.  
                                    4.3. Carcasses are tagged and labelled according to workplace and regulatory requirements.                                                                                               |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- weigh carcases and accurately complete scales records  
- demonstrate the correct scale check procedure  
- report equipment faults to supervisor  
- record and report recorded weights information
### REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

#### Required knowledge

Knowledge of:

- concept of tare
- *regulatory requirements* of checking scales and weighing carcases
- scale problems that can be encountered and the action required to maintain weighing standards
- possible problems for the scales operation and the appropriate corrective action
- weights recording process and where applicable the reporting process on the information gathered
- *Occupational Health and Safety (OH&S) requirements* in relation to weighing process
Evidence Guide

</thead>
<tbody>
<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competency must be demonstrated under normal production conditions.

**Context of, and specific resources for assessment**

Assessment must occur in the workplace under normal working conditions.

**Method of assessment**

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| 2. Operate tag generating equipment | 2.1. Codes for specific carcase category are entered into the system.  
2.2. Tags are generated according to workplace requirements.  
2.3. Consumables are monitored and replenished as required.  
2.4. Equipment is monitored, cleaned and maintained according to workplace requirements and manufacturer's specifications.  
2.5. Reports are generated, where part of work instructions. |
| 3. Tag carcase | 3.1. Carcase is tagged according to workplace requirements.  
3.2. Potential sources of contamination are identified and dealt with according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- generate carcase tags according to workplace requirements
- monitor operation of equipment and stocks of consumables
- recognise, select and record information accurately according to workplace requirements
- where applicable, generate reports of recorded information
- report equipment faults to supervisor
- work effectively as an individual and as part of a team
- apply relevant Occupational Health and Safety (OH&S) requirements for tagging carcasses
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

**Required knowledge**

Knowledge of:

- *regulatory requirements* for tagging carcasses
- purpose of *tagging information*
- relevant OH&S requirements for tagging carcasses
- types of tags used and information recorded
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment
A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Label or tag may include:
- automatic or handwritten ticket
- government stamp (regulation)
- roller brand
- work instructions.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
RANGE STATEMENT

- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication skills may include:**

- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

**Regulatory requirements may include:**

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

**Tag information may include:**

- 'bone in' or 'boneless' statement
- category cipher, category in full, cut description in full
- country of origin
- date of production
- generic identification (species)
- meat quality statement
- number of pieces
- temperature requirements for chiller
- trade description
- type of packaging
- weight
- workplace in-house bar code.

MTMP2064C Measure fat

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to measure fat for the purposes of carcase grading. |

Application of the Unit

| Application of the unit | This unit is applicable to workers on slaughter floors and in boning rooms. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A Sharpen knives |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Conduct pre-operation check | 1.1. *Fat measuring equipment* is checked according to workplace requirements to ensure it is in good working order.  
1.2. Equipment is calibrated before the start of production, after each break, and whenever a blade is changed to ensure measurements are accurate.  
1.3. Instruments are checked regularly for wear at the start of each shift. |
| 2. Identify lots requiring fat measurement | 2.1. Lots requiring measurement are located according to workplace requirements to determine the value, market destination and yield of meat.  
2.2. Possible *damage* to the measurement site is assessed and appropriate action is taken to ensure accuracy of measurement according to workplace requirements. |
| 3. Measure the fat | 3.1. Fat measurements are taken according to workplace and species requirements.  
3.2. Incorrect measurements are cancelled and rectified promptly to prevent the transmission of incorrect measurements to the recording system. |
| 4. Record the fat measurement | 4.1. Fat measurement is compared with visual assessment of fat depth.  
4.2. Fat measurement is recorded according to workplace requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- Ability to:
  - measure fat according to workplace requirements
  - check and maintain equipment in accordance with work instructions
  - observe relevant *Occupational Health and Safety (OH&S) requirements*
  - report equipment faults to supervisor
  - read, record and report measurement information
REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- purpose of fat measurements and *regulatory requirements*
- relevant OH&S requirements
- sites for possible damage including hide stripper, air knife, bruising, excessive trim, wavy finish and soft siding, and appropriate actions to ensure incorrect measurements are not recorded
- *possible causes of error* in measurement such as contact plate not flat, blunt blade, bent blade, wrong site, dirty light diode and incorrect measuring action

- requirements for monitoring and what corrective action is to be taken if the unit does not function properly
- workplace and/or manufacturer operating requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal plant throughput and over a period of time.

### Context of, and specific resources for assessment

Assessment must be completed in a registered processing plant.

### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
### RANGE STATEMENT

| Regulatory requirements may include: | • Export Control Act  
• relevant regulations  
• requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
• state and territory regulations regarding meat processing. |

| Communication skills may include: | • listening and understanding  
• sharing information  
• speaking clearly and directly  
• working with diverse individuals and groups. |

Required Skills and Knowledge

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* appropriate to the task
- take corrective actions if contamination occurs

Required knowledge

Knowledge of:
- ways to minimise contamination and cross-contamination
- relevant *regulatory requirements*
- relevant work instructions and relevant *workplace requirements*
- potential defects and contamination
- sources of contamination and cross-contamination
- relevant cutting lines
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed over a period of time.

### Context of, and specific resources for assessment

Assessment has to be conducted in a registered processing plant.

### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffins
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Communication skills** may include:

- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.
### RANGE STATEMENT

**Regulatory requirements** may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- federal, state and territory regulations regarding meat processing.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- trim product free of defects in accordance with workplace requirements (where laid down in the employee’s work instructions)
- inspect cuts for defects to workplace requirements
- follow the drop meat policy
- identify trim out-of-specification
- detect contamination including ingesta, excreta, rail dust, grease, bruising, bone chips and fibres
- deal with contaminated meat cuts promptly to ensure segregation from meat to be packaged or further processed
- communicate with trimmers and/or supervisors regarding defect problems as needed and accept feedback
- dispose of contaminated trimmings into inedible product tubs
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- observe relevant Occupational Health and Safety (OH&S) requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

**Required knowledge**

Knowledge of:

- nature and types of contaminants
- results of allowing contaminated meat to be packaged or further processed
- results of allowing out-of-specification cuts to be packaged or further processed
- workplace requirements for reporting consistent or repeated contamination of cuts or cuts out-of-specification
- relevant regulatory requirements
- relevant OH&S requirements

- Ability to:
  - demonstrate the inspection and selection of meat products prior to packaging
  - select and blend meat cuts and trimmings to meet customer specifications (where
### REQUIRED SKILLS AND KNOWLEDGE

- pack and arrange product to workplace, customer and regulatory requirements
- accurately weigh a variety of products (where appropriate)
- inspect packaging for defects and take appropriate action
- work effectively as an individual and as part of a team
- comply with OH&S requirements for packing including safe handling
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

#### Required knowledge

Knowledge of:

- how a variety of products may need to be arranged for packing
- labelling requirements where relevant
- requirements for inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- packaging requirements for the range of meat products to be packaged
- workplace, customer and regulatory requirements related to packing products
Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competency has to be demonstrated at a rate of packing that meets workplace requirements over a period of time.

**Context of, and specific resources for assessment**

Assessment has to be conducted in an operating meat processing plant.

**Method of assessment**

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Meat products may include:
- processed and unprocessed meat

Workplace requirements may include:
- enterprise-specific procedures
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS EN 1244.2:2003 Animal Tissue and their Derivatives Utilised in the Manufacture of Medical Devices - Controls on Sourcing, Collection and Handling
- federal, state and territory regulations regarding meat processing.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
### RANGE STATEMENT

- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Communication skills** may include:

- listening and understanding
- reading and interpreting workplace documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

| 1. Operate sealing machine | 1.1. Sealing machine is operated in accordance with workplace requirements and manufacturer’s specifications.  
1.2. Defects are reported promptly in accordance with workplace requirements. |
| 2. Maintain sealing machine | 2.1. Sealing machine is maintained in accordance with manufacturer’s specifications and workplace requirements.  
2.2. Consumables such as glue levels are monitored at designated intervals in accordance with workplace requirements.  
2.3. Consumables such as glue are refilled in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate the carton sealing machine in accordance with manufacturer’s specifications and workplace requirements
- to operate the carton sealing machine in accordance with Occupational Health and Safety (OH&S) requirements
- re-load the carton sealing machine with consumables
- report equipment faults to supervisor
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

Knowledge of:

- OH&S requirements related to sealing cartons
## REQUIRED SKILLS AND KNOWLEDGE

- operation of the carton sealing machine
- work instructions related to sealing cartons
- relevant regulatory requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- start-up and maintain carton forming equipment according to work instructions and manufacturer specifications
- operate carton forming machine in accordance with work instructions
- identify and comply with OH&S requirements related to operating carton forming equipment
- maintain the flow of cartons to the boning room
- monitor the inflow of carton blanks to ensure compliance with QA requirements
- monitor outflow of formed cartons to ensure compliance with QA requirements
- follow reporting procedures for defects in carton formation
- report equipment faults according to workplace requirements
### REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

Knowledge of:
- QA requirements for operating a carton forming machine
- the importance of maintaining flow of cartons to boning room
- relevant regulatory requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Carton forming machinery has to be operated to meet normal production requirements.

### Context of, and specific resources for assessment

Assessment must be conducted in a processing plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
## EVIDENCE GUIDE

| 2. Maintain CL determination machine               | 2.1. Routine maintenance of CL determination machine is performed in accordance with manufacturer specifications and workplace requirements.  
|                                                   | 2.2. Major maintenance problems are reported promptly in accordance with workplace requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- follow start-up and shut-down procedures as specified in manufacturer specifications and workplace requirements
- isolate out-of-specification cartons in accordance with work instructions
- apply relevant *Occupational Health and Safety (OH&S) requirements*
- apply relevant *regulatory requirements*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

Knowledge of:
- start-up and monitoring procedures for CL determination machines
- general principles of CL determination
- action required if out-of-specification cartons are detected
- relevant OH&S requirements
- relevant regulatory requirements
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Guidance information for assessment

| A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
RANGE STATEMENT

- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice etc.

**Regulatory requirements** may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- state and territory regulations regarding meat processing.

**Communication skills** may include:

- listening and understanding
- reading and interpreting workplace information
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

## Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Dentition assessment must be performed at a pace that is the same as the pace of production.

## Context of, and specific resources for assessment

Assessment must occur in an operating abattoir under normal processing conditions.

## Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- importance of maximising yield
- relevant regulatory requirements
- relevant anatomy of head
- sources of potential contamination and cross-contamination
- head meat to be boned
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in this unit must be demonstrated under normal production conditions and at normal speed of production over a period of time.

### Context of, and specific resources for assessment

Assessment of skills must occur in an operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements** may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
### RANGE STATEMENT

- requirements set out in standards and codes of practice.

*Regulatory requirements* may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 *Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption*
- state and territory regulations regarding meat processing.

MTMP2095C Remove cheek meat

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to remove the cheek meat from a head cleanly and safely. |

Application of the Unit

| Application of the unit | This unit is applicable to workers removing cheek meat either on a slaughter floor or in a head room. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | MTMPSR203A Sharpen knives |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

| 1. Remove cheek meat | 1.1. Cheek meat is removed in accordance with *workplace requirements*.  
1.2. *OH&S requirements* are identified and met.  
1.3. Edible cheek meat is forwarded for further processing in accordance with workplace requirements.  
1.4. Trimmings or *defects* are placed in inedible bins or chutes in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- apply relevant *regulatory requirements*
- identify defects and contamination
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

- potential sources of contamination of cheek meat
- workplace, OH&S and, hygiene and sanitation requirements related to removal of cheek meat
- recoverable meat from head
- relevant regulatory requirements
- defects and contamination

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- bar head according to workplace, OH&S and hygiene and sanitation requirements
- remove cheek meat according to workplace, OH&S and hygiene and sanitation requirements
- work cleanly to avoid the risks of contamination of the carcase
- correctly place edible and inedible cheek meat according to workplace and regulatory requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
REQUIRED SKILLS AND KNOWLEDGE

- use communication skills appropriate to the task

**Required knowledge**

Knowledge of:
- hygiene and OH&S requirements
- sources of contamination and cross-contamination
- steps involved in barring heads and removing cheek meat
- uses of cheek meats

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time

Assessment practices should take into account any relevant language or cultural issues related to
EVIDENCE GUIDE

Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify contamination and defects and take corrective action
- identify defects in offal including disease (including Ovine Johne's Disease (OJD)), parasite damage and contamination
- work efficiently in teams and individually
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- wash offal (where required) according to workplace requirements

Required knowledge

Knowledge of:
- hygiene and sanitation requirements related to processing offal
- OH&S requirements related to processing offal
- relevant regulatory requirements
- sources of contamination and cross-contamination
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Competency must be demonstrated at the normal chain speed.
- Competency must be demonstrated in processing a minimum of four (4) types of offal.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and
EVIDENCE GUIDE

| literacy demands of the assessment task should not be higher than those of the work role. |

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Offal** may include:

- brains
- head meat
- kidney
- lips
- liver
- oesophagus
- pancreas
- pituitary glands
- pizzles
- rectum
- runners
- sweet runners
- tail
- tendons
- testicles
- tongue root and tongue
- trachea
- uterus
- weasand.

**Contaminants** may include:

- abscess
- blood disease (such as OJD, Bovine Johne's Disease (BJD), etc)
### RANGE STATEMENT

| Workplace requirements may include: | enterprise-specific requirements  
|  | OH&S requirements  
|  | Quality Assurance (QA) requirements  
|  | Standard Operating Procedures (SOPs)  
|  | the ability to perform the task to production requirements

- relevant regulatory requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Required Skills and Knowledge

Required skills

Ability to:
- trim mountain chain in accordance with specifications, workplace, OH&S, Quality Assurance (QA), and hygiene and sanitation requirements
- work efficiently in teams and individually
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
- specifications for mountain chain
- impact of inadequately trimmed product being packed or processed
- relevant regulatory requirements
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency has to be demonstrated at normal chain speed and an acceptable rate of recovery must be achieved.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
RANGE STATEMENT

- requirements set out in standards and codes of practice.

**Regulatory requirements** may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- ensure that all points leading to the loadout area are open and relevant points are closed when handling carcasses on the rail
- loadout product to workplace, OH&S and regulatory requirements and customer specifications.
- use loading machinery and technology according to workplace and manufacturer’s specifications.
- check brands and correctly label product when part of loadout procedures
- correctly identify products
REQUIRED SKILLS AND KNOWLEDGE

- accurately record temperatures
- accurately weigh product where part of loadout procedures
- identify and comply with regulatory requirements for loadout including security arrangements for containers and trucks
- identify causes of cross contamination of carcases during manual handling
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

Knowledge of:

- OH&S, regulatory, hygiene and sanitation requirements related to loadout of product
- purpose and nature of relevant documentation
- security requirements related to loadout.
- impact of weather conditions at loadout from wild game depots e.g. rain (where applicable)
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant or game depot.

### Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any
EVIDENCE GUIDE

relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Product** may:
- be from a variety of species
- include varying types of product in a single order.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Brands** may include:
- Australian Quarantine Inspection Service AQIS
- Australian Inspection brands
- crown
- strip brands
- two-tooth.

**Labels** may include:
- carcase labels
- carton labels.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and

- potential OH&S risks related to storing carcase product, transferring carcasses on a rail, and working in a cold environment
- regulatory requirements related to storing carcase product
- importance of storing product at the required ambient temperature
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under normal operating conditions.

### Context of and specific resources for assessment

Assessment must be conducted in a large-scale chilling or freezing facility utilising a real system.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Carcase storage** may include:
- h-bone hanging
- quartered carcase
- split carcases
- whole carcase.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**Storage area** may include:
- blast freezer
- chiller
- conditioning tunnels
- freezers.

**Carcase meat product** may:
- include a range of species
- be identified by brands or tags.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
## RANGE STATEMENT

- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- identify carton defects
- identify cartons to be re-packed
- re-pack cartons in accordance with workplace requirements
- generate new labels for re-pack
- complete all necessary documentation correctly
- identify possible types and sources of contamination and cross-contamination and explain preventative measures
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

**Required knowledge**

Knowledge of:
- consequences of incorrect re-pack procedure
- documentation requirements for re-pack operations
- re-pack procedures
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

### Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- simulation
- verified work log or diary
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms

| 1. Prepare bagging materials | 1.1. Bagging consumables are checked prior to the start of the shift to ensure an adequate supply.  
1.2. Brands or stamps are checked.  
1.3. Supply of labels is checked. |
| 2. Bag carcase | 2.1. Carcase is bagged according to workplace requirements including hygiene and occupational Health and Safety (OH&S) requirements.  
2.2. Carcases are stamped and labelled according to workplace requirements, where applicable.  
2.3. Carcases are moved on rails in chillers, freezers and loadout areas according to workplace, hygiene and OH&S requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- observe OH&S requirements for working in chillers
- maintain product segregation as required
- move carcases around chillers and into freezers in accordance with workplace requirements
- use relevant communication skills
- use workplace equipment and technology according to workplace requirements
- bag carcases according to all workplace and regulatory requirements
- apply work instruction for the bagging of carcases
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- improve own work performance as a result of self-evaluation or feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:
### REQUIRED SKILLS AND KNOWLEDGE

- labelling requirements for different markets and customers
- potential sources of contamination and control methods to minimise contamination
- relevant regulatory requirements
- bagging requirements for different markets and customers
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| 1. Separate and tie runners | 1.1. Runners are separated and tied to prevent contamination and to meet *workplace* and *OH&S requirements*.  
1.2. Runners are inspected for defects or contamination according to workplace requirements.  
1.3. Runners are placed in appropriate chutes according to workplace requirements. |

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Ability to:
- handle runners in such a way as to avoid bile, ingesta, excreta or content contamination
- identify condemnation marks on runners
- dispose of inedible runners in appropriate bins or chutes
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

#### Required knowledge

Knowledge of:
- possible sources of contamination
- uses of end runners
- workplace, OH&S and Quality Assurance (QA) requirements related to separating and tying runners
- relevant regulatory requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
</table>

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

<table>
<thead>
<tr>
<th>Competency must be demonstrated at normal chain speed.</th>
</tr>
</thead>
</table>

### Context of, and specific resources for assessment

<table>
<thead>
<tr>

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency has to be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment must occur in an abattoir under normal production conditions.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| 1. Identify steps in processing animal coverings | 1.1. Trimming, grading, treatment and storage of hides is traced.  
1.2. Customer specifications in regard to animal coverings are identified. |
| 2. Identify requirements and specifications for the processing of hides | 2.1. Workplace, Occupational Health and Safety (OH&S), regulatory and Quality Assurance (QA) requirements are identified.  
2.2. Customer specifications for the processing of hides are identified. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

Knowledge of:
- methods of stacking and storing animal coverings
- methods of treating animal coverings
- importance of maintaining the quality of hides processed
- storage of animal coverings and the goals of such storage
- types of defects that occur in hides, pelts and skins and what causes these defects
- uses of animal coverings
- OH&S requirements for hide or skin processing
- customer requirements for hides, pelts and skins
- steps in processing of hides, pelts and skins
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Animal coverings** may include:
- feathers
- hair
- hide
- skin
- wool.

**Treatment** may include:
- brine curing
- fleshing
- packing
- salting or drying
- trimming
- weighing or grading.

**Workplace requirements** may include:
- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
--- | ---
1. Trim hide or skin | 1.1. Hide or skin is trimmed according to *workplace* and Occupational Health and Safety (*OH&S*) *requirements*.
 | 1.2. Customer specifications for trimming are identified and explained.
 | 1.3. Hide or skin is trimmed to customer specifications.
 | 1.4. Hide or skin is handled in accordance with OH&S requirements.
 | 1.5. Waste is disposed of in accordance with workplace requirements.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- trim hides or pelts to workplace and OH&S requirements and customer specifications, where applicable
- apply relevant *regulatory requirements*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

**Required knowledge**

Knowledge of:
- methods of treating animal coverings
- OH&S requirements for trimming hides or pelts
- importance of achieving a good trim
- steps in processing *animal coverings* at the plant
- workplace requirements for trimming animal coverings
- relevant regulatory requirements
Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competency must be demonstrated at normal chain speed.

**Context of, and specific resources for assessment**

Assessment should be conducted in an operating plant.

**Method of assessment**

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

MTMP2156B Treat hides chemically

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to treat hides coming off a slaughter floor prior to despatch. |

Application of the Unit

| Application of the unit | This unit is applicable to workers at an abattoir required to treat hides with chemicals. |

Licensing/Regulatory Information
Not Applicable

Pre-Requisites

| Prerequisite units | Nil |

| | |

| | |
Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- treat hides according to work instructions
- inspect hides for contamination, where applicable
- apply relevant *regulatory requirements*
- monitor chemicals and reservoir levels to be used in treating the hides
- store hides according to workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- treat hides safely according to workplace OH&S procedures

**Required knowledge**

Knowledge of:

- OH&S requirements when treating hides
- OH&S hazards when treating hides
### REQUIRED SKILLS AND KNOWLEDGE

- purpose of treating hides with chemicals
- work instructions for treating hides
- relevant regulatory requirements
- environmental issues and requirements when treating hides chemically
- storage requirements for hides after treatment
### Evidence Guide

#### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

| | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
| | These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
| | Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
| | All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| | Competency must be demonstrated at normal chain speed of production.

#### Context of, and specific resources for assessment

| | Assessment should be conducted in an operating plant.

#### Method of assessment

| | Recommended methods of assessment include:
| | - quiz of underpinning knowledge
| | - workplace demonstration
| | - workplace referee or third-party report of performance over time.
| | Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Contaminants** may include:

- abscess
- blood
- disease damage (such as Ovine Johne's Disease, Bovine Johne's Disease etc)
- fat
- ingesta
- tumour.

**Workplace requirements** may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
### RANGE STATEMENT

- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

### Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- chill or ice hides according to the work instructions and customer requirements
- chill or ice hides according to the workplace OH&S requirements
- apply post-chilling storage procedures and requirements
- monitor process according to workplace requirements
- apply relevant regulatory requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

Knowledge of:

- monitoring procedures where required
- purpose of chilling or icing hides
- work instructions for the chilling or icing hides process
- relevant regulatory requirements
- time and temperature requirements for the process
## REQUIRED SKILLS AND KNOWLEDGE

- OH&S hazards and workplace OH&S procedures
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment should be conducted in an operating plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

Required skills

Ability to:

- spray skins with chemicals in accordance with OH&S requirements and workplace specifications customer specifications
- operate spraying equipment to workplace and OH&S requirements
- cite and locate the material safety data sheets for the chemicals used and explain how they relate to the use and disposal of the chemicals
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback
REQUIRED SKILLS AND KNOWLEDGE

from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- environmental risks and controls related to the use of chemicals
- protective equipment to be used for each chemical and emergency procedures related to spills etc
- purpose of chemically treating skins in fellmongering
- relationship between concentration of chemicals and different types of skins
- relevant regulatory requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal production speeds.

### Context of, and specific resources for assessment

Assessment must be conducted in an operating fellmongering plant.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare chemicals for fellmongering process | 1.1. Chemicals for the fellmongering process are removed from storage and transported to area for mixing in accordance with workplace and Occupational Health and Safety (OH&S) requirements.  
1.2. Chemicals are mixed and stored in accordance with work instructions, OH&S requirements and manufacturer's specifications.  
1.3. Pumps and mixers are operated to workplace and OH&S requirements.  
1.4. Chemicals are mixed to workplace and OH&S requirements in accordance with the varying requirements of different types of skins.  
1.5. pH readings of the mixed chemicals are taken and checked against specifications.  
1.6. Chemicals are used, stored and disposed of in accordance with environmental protection requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- obtain and cite the Material Safety Data Sheets for the chemicals used and explain how they relate to the use, mixing, storage and disposal of the chemicals
- transport chemicals for the fellmongering process to an area for mixing in accordance with workplace and OH&S requirements
- mix chemicals in accordance with work instructions, OH&S requirements and manufacturer's specifications
- mix chemicals to workplace requirements in accordance with the varying requirements of different types of skins
- work efficiently in teams and individually
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation,
**REQUIRED SKILLS AND KNOWLEDGE**

- feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

**Required knowledge**

Knowledge of:

- OH&S requirements for mixing chemicals
- OH&S hazards associated with mixing chemicals
- environmental risks and controls related to storing, mixing and disposing of chemicals
- protective equipment to be used for each chemical and the emergency procedures related to spills etc
- purpose of chemically treating skins in fellmongering
- steps in mixing chemicals, the protective equipment needed and safety procedures
- use of different mixes of chemicals in fellmongering
- relevant regulatory requirements
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th></th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
</table>

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

<table>
<thead>
<tr>
<th></th>
<th>Competency must be demonstrated under normal production conditions and for a range of chemical formulations.</th>
</tr>
</thead>
</table>

### Context of, and specific resources for assessment

<table>
<thead>
<tr>
<th></th>
<th>Assessment must be conducted in an operational fellmongering plant.</th>
</tr>
</thead>
</table>

### Method of assessment

<table>
<thead>
<tr>
<th></th>
<th>Recommended methods of assessment include: • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</th>
</tr>
</thead>
</table>
EVIDENCE GUIDE

Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462.

Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Chemicals** may:

- be selected from a variety of different chemicals
- be used in different concentrations and mixes according to the requirements of a variety of skins.

**Workplace requirements may include:**

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
RANGE STATEMENT

- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

Specifications may include:
- workplace
- customer
- grading
- treatment
- mathematical information

Safety procedures may include:
- accident prevention
- electrical fault procedures
- emergency evacuation procedures
- emergency procedures in case of injury
- equipment malfunction procedures
- hand and arm protection.

Regulatory requirements may include:
- hygiene and sanitation requirements
- relevant regulations.

Communication skills may include:
- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
### REQUIRED SKILLS AND KNOWLEDGE

- maintain separation of wool types and classes according to classer's instructions
- monitor wool for correct drying
- press wool bales to workplace requirements
- operate, maintain and clean machinery for drying and pressing wool in accordance with workplace and OH&S requirements, and manufacturer's specifications
- work efficiently in teams and individually
- apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant **communication skills**

#### Required knowledge

Knowledge of:

- methods and goals of storage of wool bales
- purpose of drying wool
- reasons for drying and baling wool according to work instructions
- steps and importance of recording the details of the bale and its importance
- workplace and OH&S requirements and manufacturer's specifications associated with the operation of the wool drier
- relevant regulatory requirements
- OH&S hazards associated with operating a wool drier and a wool press, and **safety procedures**

1.3. Skirtings are stored in accordance with workplace requirements.  
1.4. Large skin pieces are sheared, where required.  
1.5. Mob separation of fleece wool is maintained.  
1.6. Sample fleeces are selected and dried where required. |
| 2. Weigh fleeces | 2.1. Fleeces are weighed and results recorded, where required. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- identify all types of wool to be skirted including bellies, legs, coloured wool and stained wool as well as skin and fat pieces
- skirt fleeces in accordance with workplace and wool classer's requirements
- maintain mob separation
- segregate skirtings in accordance with classer's instructions
- select and dry sample of fleeces where part of workplace requirements
- work efficiently in teams and individually
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Required knowledge

Knowledge of:
- relevant safety procedures
REQUIRED SKILLS AND KNOWLEDGE

- wools to be skirted from fleeces
- OH&S and Quality Assurance (QA) requirements for skirting wool
- purpose of skirting and classing
- purpose of storing fleeces in their mobs
- steps in skirting and classing fleece wool
- use of skins and pulled wool
- workplace requirements for skirting wool
- relevant regulatory requirements

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations. |

### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**OH&S requirements may include:**

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- personal protective equipment (PPE):
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Workplace requirements may include:**

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
## RANGE STATEMENT

<table>

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Operate wool puller | 1.1. Perform start-up and shut-down procedures.  
1.2. Operate wool puller according to work instructions.  
1.3. Monitor skins to ensure wool is pulled correctly.  
1.4. Operate puller according to Occupational Health and Safety (OH&S) requirements including the use of Personal Protective Equipment (PPE).  
1.5. Clean and check machinery according to workplace requirements.  
1.6. Report processing difficulties to supervisor.  
1.7. Monitor wool flow to ensure no bottlenecks. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:

- operate machinery according to work instructions
- operate machinery safely
- monitor machine operations
- clean and check machinery
- report defects in machinery performance
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

**Required knowledge**

Knowledge of:

- relevant safety procedures
- OH&S hazards associated with operating the wool puller
- operating requirements for pulling machine
- QA requirements for skins and pulled wool
### REQUIRED SKILLS AND KNOWLEDGE

- cleaning requirements
- relevant OH&S policies and procedures
- relevant regulatory requirements
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of throughput.

### Context of, and specific resources for assessment

Assessment must be conducted in an operating fellmongering plant.

### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| 3. Clean paunch | 3.1. Paunch is cleaned to workplace requirements to prevent cross-contamination.  
3.2. Paunch products are washed and packed. |
| 4. Remove relevant parts | 4.1. Paunch is trimmed to cutting lines in accordance with work instructions.  
4.2. Parts are trimmed of fat as required. |
| 5. Wash paunch | 5.1. Paunch is washed in accordance with work instructions.  
5.2. Waste is disposed of safely in accordance with work instructions. |
| 6. Work safely in paunch processing area | 6.1. Paunch is processed in accordance with OH&S requirements. |

Required Skills and Knowledge

REQUARED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- apply OH&S and workplace requirements related to processing of the paunch
- follow work instructions to process paunch
- use *mechanical aids* where applicable
- report faults in mechanical aids in accordance with workplace requirements
- work efficiently in teams and individually
- apply relevant *regulatory requirements*
### REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

Knowledge of:

- quality requirements and specifications for paunches
- uses of the paunch
- work instructions for the paunch processing area
- relevant regulatory requirements
- OH&S hazards and requirements for paunch processing area
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the usual speed of production.

### Context of, and specific resources for assessment

Assessment must be conducted in an operating abattoir or knackery.

### Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
| Guidance information for assessment | A current list of resources for this Unit of Competency is available from MINTRAC [www.mintrac.com.au](http://www.mintrac.com.au) or telephone 1800 817 462. |

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace requirements may include:**
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coat and apron
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh apron
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
### RANGE STATEMENT

<table>

|                 | 3.3. By-products are packaged according to OH&S requirements.                         |
| 4. Store *by-products* | 4.1. By-products are stored effectively to preserve product quality according to workplace requirements.  
|                 | 4.2. By-products are stored according to OH&S requirements.                           |
| 5. Dispose of slink carcase | 5.1. Slink carcase and other wastes are disposed of according to workplace requirements. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- use vacuum pumps to recover blood (where applicable)
- process slink *by-products* in accordance with workplace requirements and customer specifications
- process slink *by-products* to OH&S requirements
- pack and store slink *by-products* to workplace requirements
- work effectively as an individual and as part of a team
### REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*.

#### Required knowledge

Knowledge of:

- methods of packaging slink by-products for effective storage to meet workplace requirements and customer specifications
- packaging and labelling requirements for slink by-products to meet customer specifications and workplace requirements
- procedures for processing slink by-products
- storage requirements
- uses of slink by-products
- correct disposal of slink
- OH&S requirements for processing slink
- OH&S hazards related to processing slink by-products
- relevant regulatory requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- collect and process blood hygienically, safely and in accordance with:
  - relevant regulatory requirements
  - SOPs
  - work instructions
  - workplace OH&S requirements
  - operate processing equipment in accordance with workplace and manufacturer's requirements
  - use relevant workplace machinery correctly
  - pack and store blood products according to workplace requirements
  - apply relevant mathematical skills to ensure processing, packaging and storage
REQUIRED SKILLS AND KNOWLEDGE

- requirements are met
  - work effectively as an individual and as part of a team
  - take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:

- nature and uses of blood products produced
- relevant work instructions and SOPs
- ways of minimising contamination and cross-contamination
- workplace OH&S policies and procedures
- workplace and manufacturer's requirements for operating processing equipment
- OH&S hazards and ways of minimising them
- sources of contamination and cross-contamination
## Evidence Guide

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in this unit must be demonstrated under normal workplace conditions.

### Context of, and specific resources for assessment

Assessment must involve processing one or more blood products.

### Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

  3.2. Quality requirements for rendering are identified.  
  3.3. Control points for rendering are identified in accordance with workplace requirements.  
  3.4. Procedures associated with control points are identified in accordance with workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- apply relevant regulatory requirements
- meet the OH&S requirements for working in the rendering area

Required knowledge

Knowledge of:
- environmental hazards associated with rendering products and the appropriate workplace requirements to minimise these
- quality requirements for rendered products
REQUIRED SKILLS AND KNOWLEDGE

- workplace and customer quality requirements for rendered products
- relevant regulatory requirements
- steps in rendering and the process involved
- OH&S requirements for working in the rendering area

<tr>
<td>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

### Overview of assessment
- The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.
- These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.
- Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.
- All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit
- Competency must be demonstrated in a rendering plant at a rate that meets workplace requirements.

### Context of, and specific resources for assessment
- Assessment must occur in the workplace under normal production conditions.

### Method of assessment
- Recommended methods of assessment include:
  - assignments
  - debriefs
  - quiz of underpinning knowledge
  - simulation
  - verified work log or diary
  - workplace demonstration
  - workplace project
  - workplace referee or third-party report of performance over time.
- Assessment practices should take into account any

| 1. Deliver material to feeder bins | 1.1. Material is delivered to feeder bins in accordance with *workplace requirements*.  
1.2. Material is delivered to feeder bins in accordance with Occupational Health and Safety (*OH&S*) *requirements* and in particular, in accordance with manual handling requirements.  
1.3. Delivery of meat waste is monitored in accordance with workplace requirements.  
1.4. Condemned carcases are dealt with promptly.  
1.5. Housekeeping requirements are followed in relation to work area. |
| 2. Operate hogger | 2.1. Hogger is operated in accordance with manufacturer's and workplace requirements.  
2.2. Hogger is operated in accordance with *OH&S* requirements.  
2.3. Flow of waste material to rendering plant is maintained to keep adequate levels in holding or feeder bins.  
2.4. Problems associated with waste or hogger operation are promptly corrected or reported to supervisor.  
2.5. Routine maintenance and cleaning is carried out in accordance with workplace requirements. |
| 3. Monitor filling and emptying of raw material receival bins | 3.1. Filling and emptying of raw material receival bins is monitored to prevent overfilling and to clear any blockages in drainage in accordance with workplace requirements. |
| 4. Check size reduction equipment | 4.1. Size reduction equipment is checked for wear in accordance with workplace requirements. |
| 5. Operate metal detector (wet rendering) or magnet (dry rendering) | 5.1. Metal detector and magnet sensitivity is checked regularly.  
5.2. Metal detector or magnet is operated in accordance with workplace requirements.  
5.3. Metal is removed from magnet or product. |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**
# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## Required skills

Ability to:

- to operate the hogger in accordance with manufacturer's specifications and workplace requirements
- follow work instructions for the operation of the hogger
- monitor flow of waste
- follow OH&S requirements
- keep area neat and tidy
- monitor machinery gauges where fitted
- undertake routine maintenance and cleaning as specified in work instructions
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

## Required knowledge

Knowledge of:

- how the hogger works
- maintenance requirements related to the hogger
- OH&S requirements related to the hogger
- reporting procedures for problems related to the hogger
- flow requirements of the by-products processing plant
- waste specifications
- relevant regulatory requirements
- disposal arrangements for condemned carcasses
- emergency switches and shut-down procedures
## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

### Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

| 2. Operate waste recovery systems | 2.1. System is operated and monitored according to workplace requirements.  
2.2. Material is recovered from waste water according to workplace requirements.  
2.3. Material is disposed of in accordance with workplace requirements. |
| 3. Maintain waste recovery systems | 3.1. Waste recovery system is maintained in accordance with workplace requirements and manufacturer's specifications. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- operate waste recovery systems in accordance with workplace requirements
- consistently observe Occupational Health and Safety (OH&S) requirements
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- operate mechanised system so that solids are not pumped into the waste system

Required knowledge

Knowledge of:
- environmental and workplace requirements related to the operation of waste

| Overview of assessment | The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competency must be demonstrated in an operating facility. |

| Context of, and specific resources for assessment | Assessment must involve demonstrated competency monitoring a functioning waste recovery system. |

| Method of assessment | Recommended methods of assessment include:  
- quiz of underpinning knowledge  
- workplace demonstration  
- workplace referee or third-party report of performance over time.  
Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### Regulatory requirements may include:
- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 5008:2001 Australian Standard for the Hygienic Rendering of Animal Products

### OH&S requirements may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
RANGE STATEMENT

- coats and aprons
- ear plugs or muff
- eye and facial protection
- head-wear
- lifting assistance
- mesh aprons
- protective boot covers
- protective hand and arm covering
- protective head and hair covering
- uniforms
- waterproof clothing
- work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Ability to:
- pack and despatch rendered products according to workplace and OH&S requirements
- label rendered products according to customer specifications and workplace requirements
- despatch rendered products to workplace requirements
### REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

Knowledge of:
- OH&S hazards associated with packing and despatching by-products
- QA requirements for delivery trucks
- relevant regulatory requirements
**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Clean *carcase hanging equipment* | 1.1. Hanging equipment is rotated through cleaning, rinsing and, where applicable, oiling tanks, in accordance with workplace requirements.  
1.2. Cleaning chemicals are handled in accordance with manufacturer's specifications and Occupational Health and Safety (OH&S) requirements.  
1.3. Damaged spreaders etc are identified and dealt with in accordance with workplace requirements.  
1.4. Level and concentration of cleaning tank is monitored and adjusted to ensure complete sanitising of iron work.  
1.5. OH&S risks are identified and OH&S procedures are followed.  
1.6. OH&S requirements related to chemical and manual handling hazards are followed when loading and unloading tanks.  
1.7. Hoists are used in accordance with manufacturer's specifications, workplace and OH&S requirements. |
| 2. Maintain flow of equipment cleaning process | 2.1. Hanging equipment is inspected for damage and when necessary, sent for repair or disposal.  
2.2. Spreaders, gambles and any other hanging equipment are returned to the slaughter floor promptly.  
2.3. Spreaders, gambles and any other hanging equipment are processed and handled to avoid damage.  
2.4. Work area is kept neat and clean with clear segregation of sanitised and non-sanitised iron work.  
2.5. Difficulties encountered with maintaining the flow through the cleaning process are reported promptly to the supervisor. |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.
# REQUIRED SKILLS AND KNOWLEDGE

## Required skills

Ability to:
- inspect hanging equipment thoroughly for damage
- apply correct use of *mechanical handling aids* where appropriate
- demonstrate the capacity to clean hanging equipment
- adjust cleaning materials and process to suit the *variety of materials* to be cleaned
- maintain a clean and neat work area
- follow the cleaning procedure for iron work as described in work instructions
- despatch hanging equipment promptly to slaughter floor
- maintain the flow of hanging equipment through the cleaning process
- report damage of hanging equipment requiring repair or disposal either orally or written according to work instructions
- report any difficulties to supervisor
- co-operate and communicate with team members to maintain flow through the cleaning process
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*
- work in a safe manner with due regard to the cleaning chemicals used, manual handling dangers and any other OH&S requirements

## Required knowledge

- *cleaning* and sanitising process for hanging equipment
- function of hanging equipment in production
- need for adequate sanitising of the hanging equipment
- need for *oiling* of the iron work (where applicable)
- relevant regulatory requirements
- OH&S requirements for cleaning hanging equipment
- OH&S hazards and precautions of working in this area
- consequences of not returning the hanging equipment promptly to the slaughter floor
- repercussions of faulty or damaged hanging equipment returning to the slaughter floor

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Carcase hanging equipment to be cleaned may include:**
- chains
- gambrels
- hooks
- rollers
- spreaders.

**Carcase hanging equipment may be conveyed to and from production areas by:**
- forklift mesh or metal bins
- mechanised chain
- wheeled bins.

**OH&S requirements may include:**
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coat and apron
  - ear plugs or muffls
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh apron
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
**RANGE STATEMENT**

| Workplace requirements may include: | • documentation of chemical use  
| | • enterprise-specific requirements  
| | • OH&S requirements  
| | • Quality Assurance requirements  
| | • Standard Operating Procedures  
| | • the ability to perform the task to production requirements  
| | • work instructions. |

| Mechanical handling aids may include: | • electric hoist  
| | • forklift  
| | • manual block and chain. |

| The variety of materials to be cleaned may include: steel, plastics, teflon etc. |

| Regulatory requirements may include: | • environmental protection standards, controls and protocols  
| | • Export Control Act  
| | • hygiene and sanitation requirements  
| | • relevant regulations  
| | • requirements for the handling and storage of chemicals  
| | • requirements set out in AS 4696:2007  
| | Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption  
| | • state regulations regarding meat processing. |

| Communication skills may include: | • listening and understanding  
| | • sharing information  
| | • speaking clearly and directly  
| | • working with diverse individuals and groups. |

A variety of **cleaning** and **oiling** agents may be used.

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Clean toilets, shower blocks and locker rooms | 1.1. Toilets, shower blocks and locker rooms are cleaned in accordance with cleaning schedules, work instruction, and Occupational Health and Safety (OH&S) policies and procedures.  
1.2. Cleaning chemicals are used in accordance with manufacturer and workplace requirements.  
1.3. Specific areas requiring attention are identified.  
1.4. Post-cleaning monitoring is undertaken. |
| 2. Clean canteens and eating areas | 2.1. Eating areas are cleaned in accordance with cleaning schedule, work instructions and OHS requirements.  
2.2. Cleaning chemicals are used in accordance with workplace and manufacturer's requirements. |
| 3. Clean grounds | 3.1. Types of waste and rubbish to be cleared are identified.  
3.2. Waste disposal arrangements for different types of waste are identified and followed.  
3.3. Grounds are cleaned according to direction or relevant work instructions.  
3.4. Chemicals such as herbicides are used in accordance with workplace and manufacturer's requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- locate and cite relevant materials safety data sheets
- use chemicals according to workplace and manufacturer's requirements
- clean according to schedules
- dispose of waste correctly
- work efficiently in teams and individually
- follow OH&S policies and procedures
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation,

</tr>
</tbody>
</table>

**Required knowledge**

Knowledge of:

- monitoring of cleaned areas
- cleaning schedules for the range of areas
- waste disposal requirements
- importance of cleaning properly
- relevant regulatory requirements
- types of contamination
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Competency must be demonstrated at normal rate of production.</td>
</tr>
<tr>
<td>Context of, and specific resources for assessment</td>
<td>Assessment must be conducted in a registered operating meat processing plant.</td>
</tr>
</tbody>
</table>
| Method of assessment | Recommended methods of assessment include:  
  - quiz of underpinning knowledge  
  - workplace demonstration  
  - workplace referee or third-party report of performance over time.  
  Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role. |

|                          | 2.6. Workplace and regulatory requirements related to post-cleaning monitoring are identified.                                                                                                                         |
| 3. Use *chemicals* correctly | 3.1. Chemicals used in the workplace are identified.  
3.2. Material Safety Data Sheets (MSDS) for the chemicals and their contents are cited.                                                                                                                      |
|                          | 3.3. OH&S precautions for the use, handling and storage of chemicals are explained according to manufacturer's specifications and workplace requirements.                                                                 |
|                          | 3.4. Chemicals are handled in accordance with OH&S requirements and manufacturer's instructions at all times.                                                                                                          |
|                          | 3.5. Chemicals are stored according to OH&S, manufacturer's and workplace requirements.                                                                                                                                  |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- identify and follow a cleaning schedule
### REQUIRED SKILLS AND KNOWLEDGE

- correctly use cleaning chemicals for the work site and conditions
- correctly transfer waste materials to workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

### Required knowledge

**Knowledge of:**

- steps in a cleaning program
- OH&S requirements for cleaning with chemicals
- common hazards and the importance of maintaining a sanitary work environment
- importance of correct waste disposal
- importance of cleaning the whole work area when product has been removed
- importance of following a cleaning schedule
- purpose and action of detergents and sanitisers
- workplace requirements relevant to cleaning
- equipment used to transfer waste
- factors inhibiting achieving adequate standards of cleanliness
- waste materials for transfer and explain waste transfer requirements and conditions
- housekeeping tasks to be completed according to workplace procedures

MTMP2197C Clean after operations - boning room

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to clean and sanitise a boning room. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids in the boning room (e.g. packing machinery, conveyors, elevators, scales, recording and labelling machines). It also involves the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant. |

Application of the Unit

| Application of the unit | This unit is applicable to workers cleaning boning rooms after production has finished. The boning rooms may be attached to abattoirs or in smallgoods plants or part of food services, game processing or wholesaling operations. |

Electronic scales, recording and labelling machines are cleaned in accordance with workplace requirements and manufacturer's specifications.                                                                                                                                                                                                                       |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- clean boning room in accordance with workplace requirements
- clean boning room machinery in accordance with workplace requirements
- work effectively as an individual and as part of a team
- observe OH&S requirements for cleaning the boning room
- identify and apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills
### REQUIRED SKILLS AND KNOWLEDGE

- monitor program for boning room hygiene and sanitation including surface swabbing and pre-operational checks

### Required knowledge

Knowledge of:
- importance of drying, and of avoiding condensation in boning rooms
- cleaning schedule for the boning room
- major sources and locations of contamination in the boning room
- specific cleaning programs and OH&S requirements for boning room machinery and conveyor systems
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated during normal cleaning operations.

### Context of and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

### Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

MTMP2198C  Clean after operations - slaughter floor

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the skills and knowledge required to clean and sanitise a slaughter floor after operations. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids on the slaughter floor (e.g. knocking or stunning equipment, hoists, rails, chutes, bins, viscera tables). It also includes the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant. |

Application of the Unit

| Application of the unit | This unit is applicable to workers in abattoirs, knackeries and game processing plants. |

Licensing/Regulatory Information
Not Applicable

| 1. Clean slaughter floor | 1.1. Slaughter floor is cleaned in accordance with cleaning schedule and work instructions.  
1.2. Cleaning chemicals are used according to manufacturer's specifications and Occupational Health and Safety (OH&S) requirements.  
1.3. Post-cleaning monitoring is undertaken in accordance with workplace requirements.  
1.4. Slaughter floor cleaning is conducted to OH&S requirements.  
1.5. Specific areas of contamination risk for product are identified and cleaned according to workplace requirements. |
| 2. Clean, equipment and fittings | 2.1. Knocking or stunning area is cleaned and equipment isolated and/or immobilised.  
2.2. Equipment is tagged out and immobilised during cleaning.  
2.3. Machinery is isolated, stripped down, cleaned and sanitised according to work instructions.  
2.4. Cleaned areas are checked according to workplace requirements. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Ability to:
  - identify significant areas of contamination on slaughter floor
  - clean slaughter floor effectively in accordance with cleaning program
  - clean slaughter floor equipment in accordance with work instructions and OH&S requirements
  - work effectively as an individual and as part of a team
  - apply relevant regulatory requirements
  - take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

Required knowledge

Knowledge of:

- implications for production if slaughter floor fails to meet pre-operational check requirements
- cleaning schedule for slaughter floor
- hygiene and sanitation monitoring program for slaughter floor
- relevant regulatory requirements
- significant areas of contamination on slaughter floor
- specific OH&S risks associated with cleaning machinery on slaughter floor
### Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated throughout the process area and in cleaning all items of equipment.

#### Context of, and specific resources for assessment

Assessment must be conducted in an abattoir under normal working conditions.

#### Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration of competency for the assessor
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**OH&S requirements** may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

**Workplace requirements** may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
## RANGE STATEMENT

- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

### Equipment and fittings may include:
- knocking boxes
- stunners
- hoists
- rails
- pneumatic cutters
- restrainers
- rise and fall platforms
- breaking saws
- chutes and bins
- viscera tables.

### Regulatory requirements may include:
- environmental protection standards, controls and protocols
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- regulations relating to the storage, use and disposal of chemicals
- state regulations regarding meat processing.

### Communication skills may include:
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

</tbody>
</table>

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Ability to:
- prepare to transport food, such as:
  - confirming that food holding containers or receptacles meet workplace hygiene standards
  - confirming that equipment used to maintain the required environment during transport is ready for use
  - food parameters (e.g. temperature, loading and unloading areas, and containers and receptacles) are met prior to loading, transporting and unloading
  - confirm vehicle and associated equipment are ready to transport food
  - load and unload food as required by work responsibility by following procedures to ensure that food is loaded and unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food
## REQUIRED SKILLS AND KNOWLEDGE

- maintain work area and vehicles in a tidy state to meet workplace requirements
- transport food safely
- work effectively as an individual and as part of a team
- observe relevant Occupational Health and Safety (OH&S) requirements
- locate and follow workplace information relating to food safety responsibilities
- identify and implement the methods and procedures used to control food safety hazards
- monitor food safety hazards as required by workplace requirements
- record results of monitoring and maintain records as required by the food safety program
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- report non-conformance and/or unusual circumstances which could affect food safety
- take appropriate corrective action in response to failure to meet food safety requirements as required by workplace procedures
- undertake record-keeping responsibilities relating to food safety
- use relevant communication skills
- use work instructions to find advice on food safety responsibilities relating to own work

### Required knowledge

Knowledge of:

- characteristics of food transported as they affect loading and handling of food and the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported
- procedures and responsibilities for food safety relating to own work
- non-conformance and/or unusual circumstances which could affect food safety
- microbiological, physical and chemical hazards that can occur when loading, transporting and unloading food, including the types of hazards likely to occur, the conditions under which they occur and possible consequences
- environmental conditions necessary to maintain food safety
- methods and procedures used to control food safety hazards
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated utilising trucks usually used for delivery.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal despatch and delivery conditions.

Method of assessment

Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for assessment

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food may include:
- carcase meat
- carton meat
- portion control product
- smallgoods.

Workplace requirements may include:
- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- requirements set out in AS EN 1244.2:2003 Australian Standard - Animal Tissues and their Derivatives Utilised in the Manufacture of Medical Devices - Controls on Sourcing, Collecting and Handling
- state and territory regulations regarding product temperatures
## RANGE STATEMENT

- state and territory regulations regarding meat processing.

**OH&S requirements** may include:
- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
  - coats and aprons
  - ear plugs or muffs
  - eye and facial protection
  - head-wear
  - lifting assistance
  - mesh aprons
  - protective boot covers
  - protective hand and arm covering
  - protective head and hair covering
  - uniforms
  - waterproof clothing
  - work, safety or waterproof footwear
  - requirements set out in standards and codes of practice.

**Communication skills** may include:
- completing workplace documentation
- listening and understanding
- reading and interpreting workplace-related documentation
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

| 1. Restrain animal | 1.1. Animal is restrained humanely and safely in appropriate position in accordance with Animal Welfare Code of Practice.  
  1.2. Animal is restrained in correct position for stunning as required.  
  1.3. Animal is restrained with appropriate restraining equipment. |
| 2. Operate stunning equipment | 2.1. Stunning equipment is operated in accordance with workplace and regulatory requirements.  
  2.2. Stunning equipment and facilities are maintained in effective working order.  
  2.3. Stunning equipment is operated humanely in accordance with the Animal Welfare Code of Practice. |
  3.2. Animal is stunned to workplace and Occupational Health and Safety (OH&S) requirements.  
  3.3. Stun is checked, where part of work instructions, and corrective action is taken when effective stun is not achieved. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- restrain animal effectively and safely, with minimum stress to the animal
- stun animal effectively in accordance with OH&S, workplace and regulatory requirements
- correctly use measuring equipment for voltage and/or gas levels
- demonstrate procedures if stun is not effective
- check, operate and maintain stunning equipment according to workplace requirements
**REQUIRED SKILLS AND KNOWLEDGE**

- apply relevant *communication* and *mathematical skills*
- report equipment faults according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

**Required knowledge**

Knowledge of:

- alternative *methods of stunning*
- animal welfare requirements including importing country requirements where appropriate
- purpose of stunning animal
- risks of potential contamination and cross-contamination during stunning
- OH&S consequences of not achieving an effective stun
- impact of ineffective restraining and stunning on product quality
- relevant regulatory requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate effective sticking of animal in accordance with Occupational Health and Safety (OH&S) and workplace requirements
- maintain, clean and handle knives safely and hygienically
- apply relevant communication skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

Knowledge of:

- *religious requirements*, where relevant
- animal welfare considerations and animal welfare requirements
- consequences of an incomplete bleed for the quality of the product
- purpose of sticking
- purpose of a fast and complete bleed
- anatomical structures relevant to sticking, including variations between *species*
- relevant regulatory requirements
- potential causes of contamination and cross-contamination
- requirements of the Animal Welfare Code of Practice and enterprise ethical standards relating to the bleeding of animals
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

| The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations. |

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Competency must be demonstrated at normal chain speed. |

## Context of, and specific resources for assessment

| Assessment must occur in a registered slaughtering establishment under normal production conditions. |

## Method of assessment
