Evidence Guide

EVIDENCE GUIDE		
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.		
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.	
	These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.	
	Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.	
	All assessment must be conducted against Australian meat industry standards and regulations.	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated at the normal rate of production.	
Context of, and specific resources for assessment	Assessment must be conducted on a slaughter floor.	
Method of assessment	Recommended methods of assessment include:	

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
