Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Locate storage area	 1.1. Information containing stock location is received and applied to <i>workplace requirements</i>. 1.2. Workplace signs, codes and labels are followed and applied to workplace standards and <i>regulatory requirements</i>.
2. Identify product	 2.1. Product is correctly identified in accordance with workplace documentation, signs, codes, labels and brands. 2.2. <i>Information on product location</i> is assessed either electronically or manually from company records. 2.3. Product is checked for quality in accordance with workplace quality standards.
3. Check product	 3.1. Product storage is checked to ensure workplace requirements are met. 3.2. Product is picked, counted, consolidated, replenished or adjusted to meet workplace, customer and regulatory requirements. 3.3. Routine problems with product storage area are identified and corrective action taken in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify any problems related to storage of products and take the corrective action detailed in work instruction
- locate storage areas for a variety of products
- identify products accurately
- work effectively as an individual and as a team member
- apply relevant Occupational Health and Safety (OH&S) requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant communication skills

Approved Page 4 of 9

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Knowledge of:

- purpose of product segregation
- relevant OH&S requirements
- products stored and explain their storage requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Guidelines for the Training Package.		
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated under normal circumstance of normal utilisation of chiller or freezer facilities.	
Context of, and specific resources for assessment	Assessment must occur in the workplace under normal operating conditions.	
Method of assessment	Recommended methods of assessment include: • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.	
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or
